2048	FSR	In Progress	Financial Services	Change PC pre-fixes	Phase 1: Currently, prefixes in Project Costing are assigned in such a way that it is difficult to determine what grouping (ie: research, awards, other) they belong to based solely on the pre-fix. Second, new potential requests for more prefixes (for example, capital projects) makes this problem topical on a go-forward basis. Further, because pre-fixes cross over among the different funds, it precludes the possibility of inserting combo edits to ensure that the correct data is being entered. Phase 2: Determine whether Capital Assets projects should flow through Project Costing. If yes, implement.
2121	FSR	In Progress	Financial Services	Work with UAS to implement ACL software in regards to interfaces to PeopleSoft database	UAS wants to interface directly into PS, first with Finance, Supply Chain Management and Research data, then with HR and Student data at a Database access level to connect to their purchased ACL Software

3218	FSR	In Progress	Business Operations	Invoice Scanning and Workflow Improvements/Document Management	Implement invoice scanning based on recommendations from P2P audit done by Xerox. Part of project iMagine.
3245	FSR	In Progress	Business Operations	Vendor Load - bulk load of vendor data from spreadsheet	Create functionality that allows primary user group (Purchasing) to mass-load a number of new vendors, similar to initial upload for August, 2005, but refined to ensure that duplication of vendors, etc does not occur.
3246	FSR	In Progress	Business Operations	Travel & Expense Implementation	SCM Steering Committee iniative. implement full functionality of T&E modules, including how advances tracked; customization req'd for research
3248	FSR	In Progress	Business Operations	Freight Payments - automated to run through Journal Voucher process	Freight, GST (VAT) and Miscellaneous charges go to non-asset accounts even if what is being purchased qualifies as a capital asset. If the capital asset is for research, these extra charges are ineligible. They would be eligible, however, if they were charged to the asset account. Once this modification occurs, all Freight, GST (VAT) and Miscellaneous costs would be associated with the relevant capital asset (eligible expenditures), and would flow through to Research. Currently, Operations pays for them by default.
