A Message from the President

Welcome to the University of Calgary! We are a thriving community of more than 35,000 students, faculty and staff, and we are delighted that you have joined our university family.

As one of Canada’s leading universities, the University of Calgary is proud to offer learning opportunities that enrich all aspects of the student experience — from academic excellence to athletic achievement to community service. Our stunning campus is home to iconic buildings like the Taylor Institute for Teaching and Learning, the Canadian Natural Resources Limited Engineering Complex, the Taylor Family Digital Library and the award-winning Energy, Environment, Experiential Learning (EEEL) building. We also have four satellite campuses that expand the UCalgary student experience: Downtown, Foothills, Spy Hill and the University of Calgary in Qatar.

Our university is dedicated to providing all students with an engaging learning environment and a supportive campus culture — we are a family that nurtures diversity, inclusion and respect. At the start of the year, we encourage all students to take part in this dynamic campus. Join us at Orientation Week, attend our Kickoff event, explore the endless variety of student clubs, and learn about how you can make a difference through everything from the annual United Way Campaign to the Campus Mental Health Strategy.

You are here to begin a journey of personal growth, expanding your knowledge and skills through new ideas, experiences and relationships. Together, our university community is here to help each step along the way.

We are committed to supporting your success through world-class teaching, learning and research.

Your journey at UCalgary begins now, and we can’t wait to get started.

Elizabeth Cannon
President
The University of Calgary extends its gratitude to all those dedicated individuals who contributed time and effort towards this Calendar.

University Registrar: Angelique Sawczko
Co-Chairs of the Calendar and Curriculum Subcommittee:
Drs. Susan Barker and Sherry Weaver
Editor: Carol Poland, Enrolment Services
Technical Production Specialist: Philip Tsang, Enrolment Services

## INDEX 547
**Important Notice and Disclaimer**

The material and information in this Calendar is compiled from academic and administrative office submissions and are time-sensitive. Every reasonable effort is made to ensure it is correct and accurate at the time of publication, but inaccuracies and errors may occur. If there is an inconsistency or conflict between the general academic regulations and policies published in the Calendar, and such regulations and policies as established by resolution of a Faculty or of the University General Faculties Council, the regulations and policies version as approved by the Faculty or the University General Faculties Council will prevail.

By the act of registration with the University of Calgary, each student shall be deemed to have agreed to be bound by the regulations and policies of the University and of the program in which that student is enrolled as well as any relevant Faculty policies and regulations.

Students are responsible for familiarizing themselves with the general information, rules and regulations contained in the Calendar, and with the specific information, rules and regulations of the Faculty or Faculties in which they are registered or enrolled or seek registration or enrolment, as well as the specific requirements of each degree, diploma or certificate sought. It is the student’s responsibility to ensure that the courses chosen are appropriate to the program and graduation requirements.

Students should note that not every course listed in the Calendar is offered every year, nor does being admitted into a program guarantee that student is enrolled as well as any such changes and, specifically, the University hereby disclaims liability to any person who may suffer loss as a result of reliance upon any information contained in this Calendar.

The University of Calgary disclaims all responsibility and liability for loss or damage suffered or incurred by any student or other party as a result of delays in or termination of its services, courses, or classes by reason of force majeure, pandemics, public health emergencies, fire, flood, riots, war, strikes, lockouts, damage to University property, financial exigency or other events beyond the reasonable control of the University. The University also disclaims any and all liability for damages arising as a result of errors, interruptions or disruptions to operations or connected with its operations or its campuses, arising out of computer failure or non-compliance of its computing systems.

Effective with the 2008/2009 edition, the online Calendar is the official University Calendar.

**Academic Schedule**

**2018-2019 Academic Dates and Deadlines**

Courses taught according to non-standard dates have different drop, add and withdrawal deadlines. Please refer to the Student Centre for details regarding those deadlines specific to your course(s). In addition, and in accordance with Faculty regulations, some courses will require Faculty approval to drop, add or withdraw from courses. The academic schedule may be updated online when required and as needed.

The dates for the Faculties of Graduate Studies, Law and the Cumming School of Medicine may have different start and end dates.

Native Centre
The University of Calgary welcomes, respects, and supports the rich diversity of Aboriginal learners, their communities, cultural traditions, and aspirations in post-secondary education. The Native Centre provides academic, personal, and cultural support to prospective and current First Nations, Métis, and Inuit students. Through student engagement and cultural events, the Native Centre also strives to create a welcome, inclusive, and inter-cultural educational environment for the whole campus community.
Telephone: 403.220.6034
Fax: 403.220.6019
Email: nativecentre@ucalgary.ca
Location Room 390z MacEwan Student Centre
Website: ucalgary.ca/nativecentre

Recruitment and Admissions
The Recruitment and Admissions Office acts as the first point of contact for prospective students who are interested in attending an undergraduate program at the University of Calgary.
Services for prospective students include application and admission advising, presentations at Canadian high schools, undergraduate application and admission services for both domestic and international applicants, and evaluation of domestic and foreign credentials.

Telephone: 403.210.7625
Fax: 403.220.0762
Email: future.students@ucalgary.ca
Location: MacKinnie Block 117
Website: ucalgary.ca/future-students

Scholars Academy
Co-ordinator: Jessica Cohen, PhD
The Scholars Academy provides talented students with the privilege of developmental opportunities that enhance their eligibility for prestigious scholarships and graduate/professional programs. Admission to the Scholars Academy requires students to be at the top of their class academically (minimum 3.60 CGPA). Students are also chosen based on a demonstrated ability to make the most of offered opportunities and their commitment/involvement in the community.

Telephone: 403.220.2625
Email: sap@ucalgary.ca
Website: ucalgary.ca/sap

Student Accessibility Services
Manager: Johanne Tottle, PhD
The Student Accessibility Services works collaboratively and innovatively with the campus community to create an accessible, equitable and supportive learning and living environment that enhances each student’s academic and personal development.

Telephone: 403.220.8237
Fax: 403.210.1063
TTY: 403.220.2823

Student Awards
Student Awards in Enrolment Services provides undergraduate scholarships, bursaries and awards to entering and continuing students to recognize academic achievement and provide financial support for their post-secondary studies.

For further information on student awards for undergraduate students, refer to the Awards and Financial Assistance section of this Calendar.

Telephone: 403.210.7625
Fax: 403.282.2999
Email: ucawards@ucalgary.ca
Location: MacKinnie Block Room 117
Website: ucalgary.ca/registrar/finances/awards

Student Ombuds Office
The Student Ombuds Office offers a safe place for undergraduate and graduate students of the University of Calgary to discuss student related issues, interpersonal conflict, academic and non-academic concerns, and many other problems.

For an appointment with the Student Ombuds, please send your request via email, call, or book an appointment online.

Telephone: 403.220.6420
Email: ombuds@ucalgary.ca
Website: http://ucalgary.ca/ombuds/

Student Success Centre
Director: Roxanne Ross, BA, MA
The Student Success Centre provides services and programs to undergraduate, graduate, international or open studies students. Our advisors, learning support staff, and writing support staff are here to assist you in enhancing your skills and achieving your academic goals.

Telephone: 403.220.5861
Fax: 403.220.0190
Location: Taylor Family Digital Library, 3rd Floor
Website: ucalgary.ca/ssc

SU Wellness Centre
Senior Director, Student Wellness, Access and Support: Debbie Bruckner
The SU Wellness Centre feels we all have a role to play in creating a healthy campus community, which is about working collaboratively to create a campus environment where students, faculty and staff feel empowered to support each other and participate actively in maintaining their own health and well-being. With a student-centred approach, we offer comprehensive, holistic and accessible programs and services to foster all dimensions of wellness.

Mental Health Services
Programs and services at the Wellness Centre include individual counselling and relationship support; online self-help; educational success strategies and career decisions. Whether you are a successful student looking to brush up on your skills, are concerned about a friend, or in crisis, the Wellness Centre can help you identify ways to improve your well-being and achieve your goals.

Telephone: 403.210.9355, Option #2
Fax: 403.284.0069
Location: MacEwan Student Centre 370
Website: https://ucalgary.ca/wellnesscentre/services/mental-health-services

Peer Support and Health Promotion
Building resiliency and capacity by offering innovative events and programs to promote wellness in mind, body and spirit through peer support, training and workshops.

Telephone: 403.220.7011
Email: communityhub@ucalgary.ca
Location: Campus Community Hub Yamnuska Hall YA S005
Website: https://www.ucalgary.ca/wellnesscentre/services/health

Student Support and Outreach
Support and outreach to students to address immediate and ongoing mental health needs. A multi-disciplinary team provides mental health information, referrals, help in developing personal coping strategies and response for reported students-at-risk.

Telephone: 403.220.9355, Option #2 for Counselling
Fax: 403.282.5218
Location: MacEwan Student Centre 373
Website: ucalgary.ca/wellnesscentre/services/studentsupport

Women's Resource Centre
Co-ordinator: Nanako Furuyama
The Women's Resource Centre is a safe and welcoming place for students, staff, faculty, and community to come together to connect. The Peer Support program supports women in making informed choices by providing information and access to resources while recognizing that each woman is resilient and has the strength to be her own agent of change and development.

Telephone: 403.220.8551
Fax: 403.210.7970
Email: women@ucalgary.ca
Location: MacEwan Student Centre 482
Website: ucalgary.ca/women
Hours: Monday to Friday, 8:30 a.m. – 4:30 p.m.

Active Living
As a University of Calgary student, you are automatically an ‘all-access’ member of one of Calgary’s largest and most complete recreation facility. Students can also purchase family memberships at special student rates. Community members, alumni and staff are also welcome to become members.

Our facilities include a Fitness Centre, Racquet Centre, Aquatic Centre, Gymnastics Centre, and Outdoor Centre. Active Living offers a wide variety of programs from health and wellness, to recreation programs and certifications.
Dinos Athletics (The Interuniversity Athletic Program)

Dinos Athletics is a full member of the Canada West Universities Athletic Association. Canada West is one of the most competitive conferences in Canadian Interuniversity Sport (CIS). The Dinos compete in Canada West conference league sports including basketball, field hockey, football, ice hockey, rugby, soccer, and volleyball and in Canada West tournament sports including cross-country, swimming, track and field, and wrestling. All undergraduate and graduate students are admitted free of charge to all regular season games upon presentation of proper I.D.

Telephone: 403.220.6803
Email: goDinos@ucalgary.ca
Location: Kinesiology Complex A 147
Website: goDinos.com

Environment, Health, and Safety

The University of Calgary is committed to providing a safe and healthy environment for students in which to learn. The EH&S Department provides leadership in the implementation of the University's Occupational Health and Safety and Environmental Management Systems, including WHMIS (Workplace Hazardous Materials Information System), radiation safety, and biohazardous materials. The EH&S website provides information on legislation; policies and procedures; safety courses and online registration; as well as other health and safety related information and guidance.

Telephone: 403.220.6345
Website: ucalgary.ca/safety

Food Services

University of Calgary Food Services oversees the food services operator, select retail outlets and catering on campus. The Dining Centre and 19 other food retailers across campus provides the campus community a variety of healthy choices.

Meal plans are managed by Food Services, in co-ordination with the Unicard office. Meal plans are available to anyone who has a Unicard. The cards are also loadable on an ad-hoc basis and can serve as a simple way to purchase food on campus (ucalgary.ca/unicard/use-unicard).

Telephone: 403.220.5541
Email: food.services@ucalgary.ca
Location: DC 18B, 2500 University Drive N.W.
Website: ucalgary.ca/ancillaryservices/foodservices

Hours of operation: Monday to Friday: 8:30 a.m. to 4:30 p.m.
All Food Services proceeds stay on campus; supporting student programming, academic, and research initiatives.

Hotel Alma

Hotel Alma treats guests to gracious service, affordable accommodations (special rates for staff and visiting families of students) and a host of meeting spaces. Accommodations include one, two and three bedroom apartments as well as traditional dormitory rooms and can accommodate groups of up to 1,122 people. Through the fall and winter season (late August through April), Seasonal Residence provides two bedroom, short-term residences to teams, student groups, exchange students, etc.

Telephone: 403.220.3203
Email: stay@hotelalma.ca
Location: 169 University Gate N.W.
Website: hotelalma.ca
Hours: 24-hours-a-day, seven-days-a-week
All Hotel Alma proceeds stay on campus; supporting student programming, academic, and research initiatives.

Information Technologies

The Information Technologies (IT) department provides computing and media services in support of learning, teaching, research, and administration at the University of Calgary. IT supports many online services that students will utilize throughout their academic learning experience at the University of Calgary. For more information on IT services, visit ucalgary.ca/it/service-catalogue-list.

Telephone: 403.220.5555 or 888.342.3802
Email: itsupport@ucalgary.ca
Twitter: @UCalgary_IT
Location: 7th Floor, Mathematical Sciences Building
Website: ucalgary.ca/it

Libraries and Cultural Resources

Libraries and Cultural Resources (LCR) operates eight University of Calgary libraries on campus and across the city. Included in LCR are two art galleries: the Nickle Galleries and the Founders’ Gallery at The Military Museums, as well as Archives and Special Collections, the University of Calgary Copyright Office, Research Data Centre and the University of Calgary Press.

For more information, please refer to: lcr.ucalgary.ca/

Parking and Transportation Services

Parking and Transportation Services is your one-stop shop for all of your parking and transportation needs at the University of Calgary.

Telephone: 403.220.6772
Email: parking@ucalgary.ca
Location: Olympic Volunteer Centre (OVC), 1833 Crowchild Trail N.W.
Website: ucalgary.ca/parking
Hours of operation: Monday to Friday: 7:30 a.m. to 5:00 p.m.
The Students’ Union
The SU is the elected voice of undergraduate students at the University of Calgary and advocates on their behalf on the quality and affordability of their university education. The SU also provides a range of programs and services, such as the undergraduate student health and dental plan, the Q Centre, the Campus Food Bank, SU Volunteer Services, support for more than 300 student clubs, and events such as the annual Teaching Excellence Awards and Bermuda Shorts Day. The SU manages Mac Hall and operates the Den and Black Lounge, La Taqueria, Bound and Copied, Stór, and a conference centre and all proceeds are reinvested into programs that benefit students and the campus.

Telephone: 403.220.6551
Email: supres@ucalgary.ca
Location: Students’ Union Office 251 MacEwan Student Centre
Website: https://www.su.ucalgary.ca/

Study Abroad Office/International Learning
Study Abroad Office/International Learning

Students are encouraged to include an “international experience” in their time at university. This may include Study Abroad in credit programs such as student exchange programs with partner universities; group study programs led by University of Calgary professors; term abroad programs; research projects; practica, internships and co-operative education abroad; independent study approved for a Letter of Permission. It may also include approved volunteering abroad or non-credit experience abroad.

Telephone: 403.220.5581
Fax: 403.289.4409
Email: study.abroad@ucalgary.ca
Location: MacEwan Student Centre, Room 275 (CISSA)
Website: ucalgary.ca/uci/abroad

Taylor Institute for Teaching and Learning
The Taylor Institute for Teaching and Learning is dedicated to better understanding and improving student learning. The Taylor Institute brings together teaching development, teaching and learning research, and undergraduate inquiry learning under one roof.

Telephone: 403.220.4949
Fax: 403.282.0730
Location: Taylor Institute for Teaching and Learning, 434 Collegiate Blvd.
Website: ucalgary.ca/taylorinstitute/

Unicard Office
The Unicard is a multi-purpose campus card for all students, staff and faculty, and is the official University of Calgary identification and access card. It can also be used to check out books at the library, to access the gym and athletic facilities and as a debit card for purchasing products and services on campus ranging from meals and Bookstore merchandise to printing and photocopying.

Telephone: 403.220.7290
Email: unicard@ucalgary.ca
Location: Dining Centre 018, 124 University Gate N.W.
Website: ucalgary.ca/unicard

Hours of operation: Monday to Friday: 8:30 a.m. to 4:30 p.m.

All Unicard proceeds stay on campus; supporting student programming, academic, and research initiatives.

University Child Care Centre Society (UCCS)
The University Child Care Centre Society currently has two locations at the U of C: one located on Main Campus between Scurfield Hall and the Biological Sciences Building and the other on West Campus, across from the Alberta Children’s Hospital. Both of our centres are licensed, monitored and regulated by both Alberta Human Services Child development branch and Alberta Environmental Health.

Email: waitlist@ucalgary.ca
Website: ucalgary.ca/uccc

Hours of operation: 7:30 a.m. to 5:30 p.m., Monday through Friday.

University Theatre Services
University Theatre Services (UTS) is a support service department within the Faculty of Arts, with a primary function to support the academic programs of the departments in the Faculty. UTS also provides a wide variety of production, publicity, box-office and management support services to all users of the University Theatre, the Rozsa Centre including the Eckhardt-Gramatté Hall, the Boris Roubakine Recital Hall and the Reeve Theatre, including both on campus and off campus customers. The Rozsa Centre also provides complete facilities for small conferences and meetings.

For more information please visit our website at: scpa.ucalgary.ca/theatre-services/welcome-theatre-services.

The courses of study in the University of Calgary are, unless otherwise noted, open to all qualified students. The University reserves the right to establish programs or pathways to support disadvantaged groups. The language of instruction at the University of Calgary is English except in certain courses. As resources permit, selected courses in some disciplines may also be offered in other languages.

A.1 Classification of Students

A.1.1 Undergraduate Students
Undergraduate students are students who have fulfilled admission requirements and are registered in courses for credit towards an undergraduate degree, diploma or certificate. Visiting students, visiting student researchers and Open Studies students are considered undergraduate students.

Undergraduate students fall into two categories:
(a) Full-time students: Those students who are registered in the equivalent of nine or more units each term;
(b) Part-time students: Those students who are registered in fewer than nine units each term.

Undergraduate students, or students in programs identified with undergraduate faculties, are classified as follows:
1. Regular Student: A student who has been formally admitted to study in the University and is registered in a program leading to a degree, diploma or certificate (credit).
2. Open Studies Student: A student who is permitted to register in credit courses, but who is not admitted to a program leading to a degree, diploma or certificate (credit). For more information, refer to A.14 Admission to Open Studies.
3. Visiting Student/Visiting Student Researcher: A student who is permitted to register in credit-based courses who is registered at another recognized/accredited degree granting institution and has obtained a letter of permission to take courses at the University of Calgary toward their home institution credential or to complete research at the University of Calgary toward their home institution credential.
4. Exchange Student: A student who is permitted to register in credit courses at the University of Calgary as part of a formal exchange agreement.

A.1.2 Graduate Students
Graduate students are those students who are admitted to the Faculty of Graduate Studies to pursue a master’s or doctoral degree, diploma or certificate, or are admitted as regular, interdisciplinary degree, Cotutelle, qualifying, conditional admission for language upgrading, visiting and exchange. Refer to the Faculty of Graduate Studies section for further information.

A.2 Undergraduate Admission

Applicants must meet the minimum standards indicated in this Calendar. Applicants seeking admission to the Faculties of Environmental Design, Graduate Studies, Law, Cumming School of Medicine (MD program), and Veterinary Medicine are advised to contact these faculties directly for admission procedures.

All applicants must satisfy the undergraduate admission requirements and faculty specific admission requirements. Admission to all programs at the University of Calgary is competitive. The admission average required to secure an offer of admission will be determined once the qualifications of the applicant pool have been assessed for each faculty/program; therefore, meeting the minimum admission requirement does not guarantee admission. While every attempt will be made to accept all qualified applicants to the University of Calgary, enrolment will be limited to the number of students that can be accommodated by the resources available to maintain an acceptable quality of education.

See section A.5 Undergraduate Admission Requirements for detailed information.

*Detailed information for change of program can be found in section D (Change of Faculty or Program).

Detailed information on admission deadlines can be found at ucalgary.ca/future-students/undergraduate/apply.

Detailed information on exchange programs can be found at: ucalgary.ca/future-students/
dergraduate/apply.

A.4 General Admission Procedures

Students who wish to be considered for admission to the University must complete an Application for Admission, pay the application fee and submit required documentation to demonstrate they meet the admission requirements (e.g., official transcripts, English language proficiency requirements, etc.). Qualified students who receive a notice of acceptance, will be required to accept the offer of admission prior to registering in courses.

The University of Calgary reserves the right, published requirements notwithstanding, to refuse applicants for admission or registration, even if they meet the entrance requirements, on the basis of their overall academic records or on the basis of grounds that, in the opinion of the University, are reasonable in the circumstances. If registration is cancelled, the application fee will not be refunded.

All students seeking admission to the University must ensure the information provided as part of their application for admission is true and accurate. Students who are identified as falsifying or omitting information as part of the admission process, up to the add/swap deadline, will have their admission and registration cancelled by the Registrar’s Office. After the course addswap deadline, academic misconduct regulations outlined in section K (Statement of Principles of Conduct) apply. Students may be identified to other post-secondary institutions.

Students who are identified as falsifying or omitting information may be identified to other post-secondary institutions. Falsified documents may be referred to the appropriate authorities for potential prosecution under the Criminal Code of Canada.

A.4.1 Application for Admission

An undergraduate Application for Admission must be completed by students who wish to be admitted to an undergraduate degree or diploma program. The University of Calgary participates in the Alberta Post-Secondary Application System. The Application for Admission is available online at https://www.applyalberta.ca/pub/app_process.asp.

International students can access the online application at ucalgary.ca/future-students/undergraduate/apply.

Students who wish to enter the Faculties of Law, Veterinary Medicine, Environmental Design, or Graduate Studies can access the application at https://www.applyalberta.ca/pub/app_process.asp or from the specific faculty website.

Students wishing to enter the MD program in the Cumming School of Medicine should contact the School for the application form and admission information ucalgary.ca/mdprogram/admissions.

Students who wish to register as Visiting, Exchange or Open Studies students must complete the online application form available at ucalgary.ca/future-students/undergraduate/apply.

Students who leave the University of Calgary to attend another post-secondary institution, must re-apply for admission and provide official transcripts from all post-secondary institutions attended. Please note that when an application is completed through the Alberta Post-Secondary Application System (APAS), students authorize the University of Calgary to request transcripts on their behalf from Alberta Education and other participating Alberta institutions, if applicable.

Students who have not attended the University of Calgary for two years or more (one year for the Faculty of Nursing and the Schulich School of Engineering) or who are applying to the Bachelor of Education Consecutive (After-Degree) program must re-apply for admission.
Any student who applied for admission to the University, but never attended, must complete a new Application for Admission and submit official transcripts. Previously submitted documents will be destroyed after a period of one year.

Students who have been suspended, expelled or required to withdraw from a faculty should refer to section A.6 Required to Withdraw Students for further information.

Incomplete applications or those submitted without the application fee will not be processed. Complete applications must be submitted to the Admissions Office prior to the application deadline to be considered. The University accepts no responsibility for denials of admission based on the failure of applicants who do not complete their application in a timely manner.

Future students should not wait until the results of test scores and/or final high school results are received before applying for admission.

A.4.2 Application Fee

Applicants submitting an Application for Admission to the University are required to pay a non-refundable $125.00 application fee ($145.00 for applicants presenting international credentials) by the application deadline. Applications received without the fee will not be considered for admission. Students who are required to re-apply for admission to the University of Calgary are required to pay this fee.

Students are encouraged to submit payments online. If paying by cheque or money order, make payable to the University of Calgary.

The above fees are subject to change without advance notice.

A.4.3 Supporting Documents

Supporting documents, such as transcripts, must be received by the University by the deadlines indicated on the website: ucalgary.ca/future-students/undergraduate/apply. If official transcripts are not available by the deadline, students may provide unofficial copies of high school and post-secondary records to be considered for tentative admission. They may be emailed as a PDF or TIFF file to transcripts@ucalgary.ca. Alternatively, they can be sent to us by transcript delivery systems such as Parchment or e-ScriptSafe.

Official transcripts are documents which are sent directly to the Admissions Office from the Department of Education and/or other institutions maintaining such records. Through APAS, applicants who have attended high school and/or another participating institution(s) in Alberta provide authorization to the University of Calgary to request transcripts on their behalf from Alberta Education and/or the institution. It is the applicant’s responsibility to request out-of-province institutions to send complete official transcripts directly to the Admissions Office. See paragraph above for acceptable delivery formats.

International applicants seeking admission on the basis of documents which are in a language other than English must submit official documents in the original language as well as English translations prepared by a certified translator. Documents must indicate the courses studied and the grades obtained in each course.

Transcripts received by the Admissions Office become the property of the University of Calgary and will not be photocopied or returned to students or forwarded to other institutions.

Documents submitted, but not required for admission, will be destroyed. Students are advised to only submit documents requested by the University and required for admission consideration.

A.4.4 Admission Deposit

Students who are offered admission will be required to pay a one-time $500.00 admission deposit by the deadline indicated in their offer of admission to confirm their seat in their admitted program. The deposit is non-refundable and will be applied against tuition and fees. Re-admits are required to pay the admissions deposit.

A.4.5 Deferral of Admission

Requests for deferral of admission are available to students who are applying directly from high school and have not attended another post-secondary institution. Requests may be submitted after a student has been admitted and paid the $500.00 admission deposit. Deferral requests may be submitted in writing to the Associate Registrar, Recruitment and Admissions who will consult with the Faculty to which the student has been admitted. Deferrals are not guaranteed and will be considered on a case by case basis. Students who attend another post-secondary institution during the deferral period will have the deferral cancelled and must re-apply for admission.

Students admitted to the Cumming School of Medicine (MD program), Veterinary Medicine, and Law see the faculty website for admission deferral information.

A.5 Undergraduate Admission Requirements

Admission to an undergraduate program may be obtained under one of the following categories:

1. Canadian High School Admission
2. International High School Admission
3. Transferring from Another Post-secondary Institution
4. Adult Student Admission
5. Second Degree

All applicants must demonstrate English language proficiency (refer to A.11 English Language Proficiency).

A.5.1 Canadian High School Students

The general admission requirement to the University of Calgary is Alberta Grade 12 graduation, or equivalent, and the completion of five courses at the 30 level (or equivalent). For information on equivalent courses visit ucalgary.ca/registrar/requirements. Students will be considered for admission decisions using the early admission process or the standard admission process.

Admission is competitive and meeting the minimum requirement does not guarantee admission. Students presenting an approved option as their fifth course must obtain a minimum 65 per cent average on the remaining four courses in addition to meeting the program specific competitive admission average.

Students must submit their application and supporting documents by the deadlines outlined in section A.3 (Deadline Dates for Undergraduate Applications for Admission). For more information on how to apply visit: ucalgary.ca/future-students/undergraduate/apply.

The University reserves the right to require additional assessments in cases where questions exist concerning documentation.

A.5.1.1 Admission Requirements

Prerequisite Requirements

Admission requirements may differ from prerequisite requirements for a specific degree or program. Applicants must be aware that they may be admitted to a program for which there are course prerequisite to complete the program. Course prerequisites can be found in the course description section of this calendar (ucalgary.ca/pubs/calendar/current/course-desc-main.html).

See the “Early Admission High School Requirements Table” on the next page. Recommended courses: May be required as a prerequisite for a first-year course, however, they are not required nor used for admission.

Approved Courses

The following is a list of approved Alberta high school courses. Information regarding equivalent courses is available at https://www.ucalgary.ca/registrar/requirements

- Aboriginal Studies 30 (5 credits)
- Biology 30
- Chemistry 30
- Computing Science, Intermediate Level (5 credits) or Advanced Level (5 credits)
- Career and Technology Series
- Fine Arts courses*: Unless stated above, one Fine Arts course may be used for admission to a non-Fine Arts program (Art 30 or 31, Choral Music 30, General Music 30, Instrumental Music 30, Drama 30, Dance 35)
- Language or Language and Culture Courses at the 30 level
- Mathematics 30-1
- Mathematics 30-2
- Mathematics 31
- Physical Education 30
- Physics 30
- Science 30

**Science**

Students are encouraged to take high school courses related to their intended major.

*A grade of at least 70% in Mathematics 30-1 is a prerequisite for first-year mathematics courses.

If Mathematics 31 was not attempted, the final admission average will be a minimum of 5% higher. Mathematics 31 will be replaced with another approved course.

*Selling School of Engineering

- English Language Arts 30-1
- Mathematics 30-1
- Mathematics 31
- Chemistry 30
- Physics 30

*Social Studies

- English Language Arts 30-1
- Mathematics 30-1 or 30-2
- One of Science 30, Biology 30, Chemistry 30 or Physics 30

*K-12 Four Year Education Program: On Campus

- English Language Arts
- Mathematics
- Two of Biology, Chemistry 30, Physics 30, Mathematics 31 or CTS Computer Science Advanced (5 credits)

Four Year Education Program: Community Based

Preference for admission will be given to students from rural communities.

*A grade of at least 70% in Mathematics 30-1 is a prerequisite for first-year mathematics courses.*

### Social Studies 30-1

Standard admission process: Approved courses may be presented at the 20 or 30 level.

#### Approved Options
- Other five-credit 30-level courses excluding Special Projects 30 and English 30-2.
- Three-credit courses: two three-credit 30-level courses can be combined to fulfill one approved option requirement.
- One-credit courses: five intermediate or five advanced credits in Career and Technology Studies (CTS) can be used to fulfill one approved option requirement.

Intermediate and Advanced Credits cannot be combined to satisfy a course requirement.

Standard admission process: Approved options may be presented at the 20 or 30 level.

#### Notes:
- Two courses in the same subject area may not be presented to satisfy entrance requirements unless the courses are Mathematics 30-1, Mathematics 30-2 or Mathematics 31.
- Only one 30-level course in a language stream may be used to satisfy admission requirements.
- A minimum grade of 70 per cent in Mathematics 30-1 (or equivalent) is the prerequisite for most year mathematics courses. Some courses may have additional requirements. Details available at ucalgary.ca/pubs/calendar/current/mathematics.html.
- Science 30 cannot be used to replace a specific 30-level science courses required for admission (Chemistry, Biology, Physics).

### A.5.1.2 Standard Admission Process for Current High School Students

The standard admission process considers five courses required for admission to a specific program. The admission average will be calculated using five courses at the 20 or 30 level (or equivalent). Approved subjects and approved option subjects are listed in section A.5.1.1 above (see Approved Courses and Approved Options). At least one approved course must be at the 30 level (or equivalent). If grades for a 20-level and 30-level courses are provided in the same subject, the 30-level grade will be used.

For the Schulich School of Engineering the standard admission process will be based on four courses if a grade for Mathematics 31 is not available.

Equivalent courses will be used for students who have completed studies outside the province of Alberta. For information on course equivalencies visit: ucalgary.ca/registrar/requirements.

#### A.5.1.3 Early Admission Process for Current High School Students

The early admission process considers current high school students who present a competitive admission average calculated on four approved courses. The average will be calculated on grades from 20-level courses (or equivalent). If grades for 30-level (or equivalent) courses are available, they will be used to calculate the average.

Admitted students must complete all 30-level (or equivalent) course requirements outlined in A.5.1.1 above, maintain the admission average required for admission in the year of application and obtain their Alberta Grade 12 Graduation (or equivalent).

Equivalent courses will be considered for courses completed outside the province of Alberta. For information on course equivalencies visit: ucalgary.ca/registrar/requirements.

- English Language Arts 20-1
- Mathematics 20-1
- Two of Biology 20, Chemistry 20, Physics 20, or Computer Science Advanced (5 credits)

#### Social Studies
- English Language Arts 20-1
- Mathematics 20-1 or 20-2
- One of Science 20, Biology 20, Chemistry 20 or Physics 20

#### Concurrent Education Program
- Must meet course requirements for faculty offering the concurrent degree.

### Approved Courses

The following is a list of approved Alberta high school courses. For information on equivalent courses visit ucalgary.ca/registrar/requirements.

- Aboriginal Studies 20 (5 credits)
- Biology 20
- Chemistry 20
- Computing Science, Intermediate Level (5 credits) or Advanced Level (5 credits)
- Career and Technology Series
- Fine Arts Courses*: Unless stated above, one Fine Arts course may be used for admission to a non-Fine Arts program (Art 20 or 21, Choral Music 20, General Music 20, Instrumental Music 20, Drama 20, Dance 25)
- Language or Language and Culture Courses at the 20 level
- Mathematics 20-1
- Mathematics 20-2
- Physical Education 20
- Physics 20
- Science 20
- Social Studies 20-1

Any two of the following 3- or 4-credit courses may be combined to fulfill one approved course:
- Political Thinking 20
- Comparative Government 20
- Religious Ethics 20
- Religious Meanings 20
- Local and Canadian Geography 20
- Personal Psychology 20
Admissions

- General Psychology 20
- General Sociology 20
- Sociological Institutions 20
- Origins of Western Philosophy 20
- Contemporary Western Philosophy 20
- Western Canadian History 20
- Canadian History 20
- Economics for Consumers 20

A.5.1.4 Finalizing Admission

Admission decisions are finalized when final transcripts are received. Students must complete all 30-level course requirements (or equivalent), maintain the minimum admission average required for their program in their admission year and obtain their Alberta Grade 12 Graduation (or equivalent) by the end of June. Students who do not finalize the requirements or do not provide final official transcripts by August 1 will have their admission and registration cancelled.

Additional admission decisions may be considered in July when final grades are received. July admission offers will be made to the applicants with the highest admission average first (top-down).

A.5.1.5 Alternate Admission Offers

Applicants will be considered for their first and second choice programs in order of choice. Applicants who are not granted admission to their first or second choice programs may be waitlisted and/or offered admission to an alternate program.

A.5.2 International High School Admissions

The United States and Countries Offering American-Based Curricula

Applicants completing an American-based high school curriculum may be considered for admission based on an evaluation including a standard college entrance exams (SAT or ACT) and overall high school GPA. Applicants following an American based curriculum in countries outside the United States (and US territories) may be exempted from providing the SAT or ACT test scores. Applicants who have attended a university/college may not submit SAT or ACT tests in order to gain admission to the University of Calgary.

College Entrance Examination

Applicants who are completing or have completed their twelfth year of education at an American high school may qualify for admission by obtaining acceptable scores on the Scholastic Assessment Test (SAT) or the American College Test (ACT) and proof of a high school diploma.

Students, are required to have a minimum combined Evidence-Based Reading and Writing plus Mathematics (ERw+M) score of 1190. For SATs written prior to March 2016, students must provide scores for the SAT Reasoning Test, three appropriate SAT Subject Tests and proof of a high school diploma. If presenting the SAT Reasoning Test, a minimum score of 1650 (with no mark below 550) must be presented in each of Critical Reading, Mathematics and Writing components.

If presenting the ACT Test, a minimum composite score of 24 is required. Admission is competitive, therefore, meeting the minimum score does not guarantee admission.

Applicants may also qualify for admission by presenting acceptable scores on the SAT Reasoning Test or ACT Test and a high school transcript for assessment of specific high school courses which may be acceptable equivalents to prescribed SAT Subject Tests. Applicants should note that admission is on a competitive basis with consideration of both SAT/ACT scores and high school achievement.

All test scores and an official high school transcript showing that the high school diploma has been conferred must be received by August 1. Students who fail to meet this requirement or do not provide final official transcripts by August 1 will have their admission and registration cancelled.

Notes:

1. In order to be considered for admission to the University under the College Entrance Examinations category applicants must have completed the required tests prior to undertaking university/college studies.
2. Only one of SAT Mathematics Level 1 or Mathematics Level 2 may be presented for admission.
3. Applicants whose school has been completed in countries other than the United States, with the exception of those applicants who are completing their twelfth year of schooling at an American high school outside of the Unites States, are not eligible for entrance under the College Entrance Examinations category.
4. Application information for the tests may be obtained from:
SAT: collegeboard.com/
ACT: actstudent.org/
Either the SAT Reasoning Test or ACT Test is required for admission to all programs.
The SAT test equivalents by faculty are:

Countries Offering the British Education System

General Certificate of Education (GCE)/General Certificate of Secondary Education (GCSE)

Students who present the GCE or GCSE will be considered using five academic courses as detailed in A.5.1.2 Standard High School Admission Requirements. Applicants can be considered with two courses at Advanced Level (A) and three GCSE/Odinary Level, or four courses at Advanced Subsidiary Level (AS) and one at the "GCSE" Level. Grades

Note: Specific SAT subject tests may be accepted as equivalent to prescribed high school courses.
of “D” and “E” are not acceptable, nor are scores of 7, 8 and 9 on School Certificates. The University of Calgary awards advanced credit for completion of A level courses when a grade of “C” or better is achieved. Students should refer to section A.12 Transfer Credit/Advanced Standing for details.

Other Countries
Applicants educated in other countries may be considered for admission on their academic merits. Those completing Canadian high school courses will always have the grades obtained in these courses used in lieu of equivalents obtained on international certificates. Detailed information is available at: ucalgary.ca/future-students/undergraduate/apply.

International students seeking admission on the basis of documents not listed on the Admissions website should submit certificates indicating the courses studied and the grades achieved to the Admissions Office. When these certificates are in a language other than English, English translations (prepared by a certified translator) must accompany the original documents.

Conditions of Admission
Students who are currently completing course work must meet the conditions of their admission by August 1. Conditions are removed upon receipt of final official transcripts confirming that course requirements and admission average have been met. Students who fail to meet this requirement or do not provide final official transcripts by August 1 will have their admission and registration cancelled.

International students who are not currently attending an institution are considered for regular admission when their application, all required transcripts and documentation are received. Applications with all supporting documents received by March 31 will be considered. Those with supporting documents received after March 31 will be considered as space permits.

A.5.2.1 International Baccalaureate (IB)
Applicants who have completed the International Baccalaureate diploma can be considered for admission on the basis of their diploma score. Students must meet the score and specific course requirements for the program to which they have applied. For applicants who complete both the International Baccalaureate diploma and senior matriculation/secondary school graduation, admission will be based on that credential which is to the advantage of the student.

The University of Calgary awards up to 30 units (one year) for the completed International Baccalaureate diploma. Specific course credit for Higher Level courses is awarded as set out in section A.12 Transfer Credit/Advanced Standing. Students awarded the full year of credit for a completed International Baccalaureate diploma remain eligible for all admission categories and University awards normally open to entering first-year students.

A.5.3 Transferring from Another Post-Secondary Institution
Applicants who have attended an accredited/recognized post-secondary institution may be considered for admission on the basis of their post-secondary academic standing. Some programs may require applicants to complete, or be in the process of completing, specific course requirements at the high school or post-secondary level. In some cases, university transferable course work may satisfy high school prerequisites.

To be considered a post-secondary transfer, students must have completed a minimum of 12 units from a recognized/accredited institution (some programs may require more units) by December 31 of the year prior to the year of admission for spring, summer, and fall entry; and August 31 for winter entry unless otherwise stated. The minimum admission GPA requirement is 2.00; however, admission is competitive and meeting the minimum admission requirement does not guarantee admission to the university, a specific faculty or program.

Students are not permitted to register in a University of Calgary degree, diploma or certificate programs while simultaneously working towards a credential at another institution, unless a formal partnership exists between institutions. Students who wish to attend the University of Calgary as a visiting student (letter of permission) see section A.14 Admission to Open Studies.

Conditional admission will be subject to verification of official transcripts showing final grades. If admission requirements are not met or if official transcripts are not received by the stated deadline, admission and registration will be cancelled.

Applications and supporting documents received by the stated deadline will be automatically considered for conditional admission. Refer to section A.12 Transfer Credit/Advanced Standing for information on the transfer of credits.

Transfer Admission GPA: Will be calculated using the most recent or in process work to a maximum of 30 units (University of Calgary courses and/or transferable courses taken at other institutions), unless otherwise specified by the faculty. All courses attempted within a term will be included except where the number of courses taken within a term results in the overall number of units exceeding 30 units. Should this occur, the highest grades from the oldest term being considered will be used to calculate the GPA. In some faculties prerequisite courses will be included first. Grades in high school equivalent courses offered by post-secondary institutions will not be used in determining the transfer admission GPA.

Prerequisite Requirements: Admission requirements may differ from prerequisite requirements for a specific degree or program. Applicant must be aware that they may be admitted to a program for which there are course prerequisite to complete the program. Course prerequisites can be found here: ucalgary.ca/pubs/calendar/current/course-desc-main.html.

A.5.3.2 Supplementary Admission Requirements
Some faculties/programs consider other criteria in addition to the admission average. This may include an audition, portfolio or supplementary information form. The following faculties require additional criteria:

- Faculty of Arts (Dance, Music, Visual Studies)
- Haskayne School of Business (Petroleum Land Management and Energy Management concentrations)
- Cumming School of Medicine (BCR, BHSc)
- Schulich School of Engineering (Energy Engineering)
- Faculty of Social Work

For additional details on supplementary application information visit: ucalgary.ca/future-students/undergraduate/apply.

A.5.4 Adult Student Admission
Applicants who are 21 years of age or older by the first day of classes who are unable to present the five high school courses or at least 12 post-secondary units required for admission, are automatically considered for admission as an Adult Student. To be considered under the category, applicants must be Canadian citizens or Permanent Residents.

Adult Students must present English Language Arts 30-1 or an acceptable equivalent. Additional grade 12 level high school courses, or equivalent, are normally required by the faculty to which the student is seeking admission. In addition, the University’s requirements for English language proficiency apply to Adult Students (see A.11 English Language Proficiency).

Official Transcripts: Applicants must provide official transcripts for all high schools and post-secondary institutions attended.

University of Calgary Continuing Education Courses: Students completing level

</tr>
</tbody>
</table>

Applicants who have completed high school courses required for admissions more than ten years ago, may not have adequate prerequisites for certain courses. Applicants should contact the faculty to which they are seeking admission for additional information.

### A.5.5 Second-Degree Students

Students who hold a three- or four-year bachelor’s degree (or equivalent) from a recognized/accredited institution may pursue a program leading to a second or subsequent bachelor’s degree (commonly referred to as an After-Degree), provided they qualifies for admission and meets all University and Faculty regulations. Consultation with academic advisors regarding admission and graduation requirements is necessary. The following regulations apply:

1. Applicants will not be considered for admission to a second or subsequent degree program in any major field, or equivalent, in which they already possess a degree or in a field that is deemed, by the University of Calgary, to be similar or equivalent to a degree already attained (e.g. applicants with a prior Bachelor of Business Administration will not be admitted to a Bachelor of Commerce).
2. Applicants holding a minor or equivalent will only be admitted to a second degree in the same area of the minor at the discretion of the University.
3. Normally, a minimum of 60 units (10.0 full-course equivalents) must be taken from the University of Calgary. These 60 units (10.0 full-course equivalents) are in addition to any courses used to satisfy requirements for the previous credential(s).

4. Prerequisites may be waived or advanced standing granted at the discretion of the admitting Faculty.

5. A student admitted to a second or subsequent degree program must satisfy all corresponding degree and major field requirements current at the time of admission into the program.

6. Combined degrees are not available for second or subsequent baccalaureate degrees.

A.6 Required to Withdraw Students

Students who have been required to withdraw for academic reasons from any faculty at the University of Calgary or another post-secondary institution will not be permitted to register at the University until at least twelve months have elapsed since the student was required to withdraw. To qualify for admission, students are required to submit an application for admission and meet competitive admission criteria as outlined in A.2 Undergraduate Admission, with the following exemptions:

1. Students required to withdraw for academic reasons other than a low grade point average, may be eligible for consideration of admission by another faculty provided they maintained a 2.00 or higher grade point average since their last review.

2. Students required to obtain a grade point average (GPA) above 2.00 for continuation in a program may be eligible for consideration of admission by another faculty provided they maintained a 2.00 grade point average since their last review.

3. Under exceptional circumstances, a University of Calgary student required to withdraw for academic reasons can be granted special permission by the appropriate Associate Dean of the faculty for immediate admission to the Fall Term. An Associate Dean can place restrictions on course registration and require a specific level of performance. Registration as an Open Studies student is not permitted.

Students seeking admission or re-admission after having been required to withdraw for academic reasons may submit a letter which: offers an explanation for their previously poor record; outlines their academic plans; and explains why they are now likely to be successful. This letter is mandatory for applicants to the Haskayne School of Business, the Faculty of Nursing and the Werklund School of Education. Admission is not automatic and will be considered on an individual basis.

Students who are granted admission or re-admission after having been required to withdraw will be admitted or re-admitted on probation.

Students who have twice been required to withdraw from one or more faculties at this or any other institution will not normally be considered for admission at any time.

Applicants seeking admission who have been involved in academic/non-academic misconduct at the University of Calgary or another institution which resulted in suspension will only be considered for admission once the suspension period or one year has elapsed, whichever comes first. In all cases of academic/non-academic misconduct, admission or re-admission to the University of Calgary is at the discretion of the faculty to which the applicant is seeking entrance. A student expelled from a faculty will not be considered for re-admission to the same faculty.

A.7 Home-Schooled Applicants

Home-schooled applicants can qualify for admission by presenting provincial (diploma) examination results in appropriate courses (where applicable) or by satisfying the requirements given under College Entrance Examinations. Applicants must normally possess a high school diploma and present acceptable scores and an admission average on the five appropriate SAT tests.

A.8 Special Admission Categories

A.8.1 Visiting Students

Visiting students must complete the Visiting Student Application form and submit:

1. A letter of permission from their home institution indicating the specific courses approved to take and the term(s) approved to attend the University of Calgary.

2. A copy of their home institution official transcript.

3. Evidence of satisfying English Language Proficiency requirements (if applicable).

A.8.2 Visiting Student Researcher

The Visiting Student Researcher admission status is available to graduate and undergraduate students who are enrolled in a full-time degree program at an accredited or recognized post-secondary institution. Visiting student researchers are full-time students who attend the University of Calgary to support a specific research project that aligns with their studies at their home institution. To apply as a visiting student researcher students must:

1. Submit a completed the Visiting Student Application form and pay the application fee.

2. Provide the name of the University of Calgary supervisor and their department name*

3. Provide the name and approval of the University of Calgary supervisor’s chair/ head of department*.

4. Indicate start and end dates on campus.

5. Provide details of any financial arrangements (e.g., stipend, travel costs, research expenses, etc.).

*Not applicable if part of a formal exchange agreement. With formal exchange agreements, only the agreement needs to be referenced on the application form.

A.8.3 Exchange Students

Exchange students are registered in a degree program at another post-secondary institution and wish to attend the University of Calgary as part of a formal exchange agreement. Students apply through the Exchange Co-ordinator at their home institution and provide the following:

1. Complete the Exchange Student Application form via the home institution’s Exchange Co-ordinator. Permission to take courses at the University of Calgary will be provided by the home institution.

2. An official transcript from the home institution.

3. Evidence of satisfying the University of Calgary’s English Language Proficiency requirement.

A.8.4 Aboriginal Student Access Program (ASAP)

The University of Calgary acknowledges and respects the rich diversity of our learners, their communities, cultures and traditions, and their aspirations and abilities. In order to ensure equitable access and successful participation of indigenous learners, the University of Calgary has instituted the Aboriginal Student Access Program for qualified indigenous applicants seeking admission to most undergraduate programs.

The Aboriginal Student Access Program (ASAP) is a transition year access program for Aboriginal students in a supportive learning environment. The program offers advising and includes cultural, peer and tutorial support. ASAP provides an alternate access route for Aboriginal students moving from high school or upgrading programs to post-secondary degree programs. The program is designed to give students the foundations they need, as well as assisting in the selection of relevant post-secondary option courses for each student’s target program. This admission pathway is available to students who may not meet standard admission requirements or are seeking additional support during their transition year.

ASAP provides enhanced academic support, including a designated advisor and one-on-one academic advising, cultural workshops, leadership training, peer support and tutorials. The program works closely with the Student Success Centre to provide a breadth of academic support services.

Upgrading courses may be taken through Continuing Education at the University of
Admissions

Calgary (or other adult learning institutions) in conjunction with University of Calgary ASAP courses. Students who take a minimum of 9 units are considered full-time students and may qualify for student loans, as well as other sources of funding.

Admissions Requirements

ASAP is for students of Aboriginal identity (First Nations, Métis and Inuit). Applicants must meet the general admission requirements for Open Studies, as defined in the University of Calgary Calendar. In addition, an advising interview will be conducted to determine the applicant's academic goals, discuss post-secondary sponsorship availability, course options, and available support services. The application deadline for the ASAP is determined by the application deadline specified for Open Studies.

Upgrading Courses

Upgrading courses may be taken through Continuing Education at the University of Calgary (or other adult learning institutions) in conjunction with University of Calgary courses.

- Nursing: Minimum score of 23 on the speaking component of the TOEFL iBT or 3+ on the MELAB Speaking Test.
- Education: Minimum score of 27 on the speaking component of the TOEFL iBT or 4- on the MELAB Speaking Test.

A.8.5 Dual Credit Students

Dual Credit programs enable current high school students to take university level courses at the University of Calgary for credit that can be applied toward their post-secondary education and their high school credential.

Dual Credit programs are formal agreements between a Board of Education or School and the University of Calgary and regulations governing the agreement are outlined in a Memorandum of Understanding (MOU) and the Dual Credit Operating Procedures available from the Office of the Registrar.

Dual Credit students will be considered as high school applicants should they apply for admission to a degree program, provided they have not attended another post-secondary institution since graduation from high school.

A.9 Diverse Qualifications Admission Process

The University of Calgary seeks first and foremost to attract excellent academic students. However, the University also recognizes that those who have achieved excellence outside academics or who have overcome significant hardships can make positive contributions to the University community. Recognizing that excellence means more than academic excellence, the University of Calgary may admit up to one per cent of new undergraduate students annually under this category.

To be eligible to apply under the Diverse Qualifications Admission Process, students must demonstrate:
- Excellence in non-academic areas
- High potential in academic/research activities
- Perseverance under great difficulty or hardship

In addition, students must:
- Meet the minimum admission requirements as specified in section A.5 of the Calendar
- Meet the University’s English Language Proficiency requirement
- Be either a citizen or permanent resident of Canada
- Indicate their desire to be considered under this category on the Application for Admission
- Provide contact information for two references
- Complete a personal profile outlining circumstances, personal achievements and educational goals
- Provide official transcripts from all high school and post-secondary institutions attended

For further information about the Diverse Qualifications Admission Process and application deadlines, visit: ucalgary.ca/future-students/undergraduate/diverse-qualifications.

A.10 Combined or Concurrent Degree Admissions

Admission will only be considered for combined or concurrent degrees outlined in the Faculty sections of this Calendar. Students wishing to enter such combined or concurrent degrees must carefully read descriptions to determine when admission to such degrees may be obtained.

A.11 English Language Proficiency

English is the official language of instruction at the University of Calgary. All applicants must demonstrate English language proficiency to be considered for admission to an undergraduate program. English language proficiency is achieved by meeting one of the following criteria:

For more information, contact 403.220.5975 or email ASAP@ucalgary.ca.
1. Successful completion of at least three years of formal, full-time study in English at a secondary school that meets one of the following requirements:
   a. Is in an exempt country; OR
   b. Is accredited to offer Canadian, American or British curricula; OR

2. Successful completion of at least two years of formal, full-time study in English at an accredited or recognized post-secondary institution in Canada or a University of Calgary approved English-speaking country; OR

3. Achieved a final grade of 80 per cent or better on the Alberta English Language Arts 30-1 (or equivalent); OR

4. Achieved a grade of 5 or better on the International Baccalaureate (IB) Higher or Standard Level English A (Literature or Language and Literature) examination or a grade of 6 or better on the Higher Level English B examination; OR

5. Achieved a grade of 4 or better on the Advanced Placement (AP) English Literature and Composition or English Language and Composition examination; OR

6. Achieved a grade of "A" or "B" in any GCSE-level, A/S-level or A-level English (non-ESL) in the General Certificate of Education (GCE)/General Certificate of Secondary Education (GCSE) curriculum; OR

7. Successful completion of at least three years at a school in English that is an accredited member of the Council of International Schools (CIS), including completion of a senior academic English course (Alberta 30-1 level or equivalent); OR

8. Successful completion of a University of Calgary English credit course, comparative literature course, or university equivalent with a final grade of "B+" or better; OR

9. Successful completion of an approved English language test/program as stated in the English Language Proficiency Requirements Table.

### A.11.1 International Foundations Program

IFP Pathways and Bridging applicants will need to submit minimum scores in one of the following external English Language Proficiency assessments, see the International Foundations Program Table.

### A.12 Transfer Credit/Advanced Standing

The University of Calgary will consider university-level course work completed at a recognized/accredited post-secondary institution (or equivalent) for credit toward a University of Calgary credential.

Students wishing to transfer should refer to the Alberta Transfer Guide which lists all course and program transfer agreements between post-secondary institutions in Alberta, Northwest Territories and Nunavut. The guide and other transfer information are available online at transferalberta.ca or by contacting: Alberta Council on Admissions and Transfer, Telephone: 780-422-9021 or 1-800-310-0000 (toll free). Email: acat@gov.ab.ca.

Students from other universities or colleges may be admitted with transfer credit to undergraduate programs. The amount of credit granted is determined by faculty regulations. Students transferring from other institutions must make themselves aware of the prerequisites for courses they wish to take. This may be done by consulting the Courses of Instruction section of this Calendar. Students receiving specified transfer credit status for particular courses should be aware that this does not necessarily imply that exact course equivalence is being awarded; it may indicate an equivalent level of experience in a particular subject area.

Students transferring to the University of Calgary who have attended publicly supported post-secondary institutions in Alberta shall be subject to the same regulations as those transferring from one faculty to another within the University. The University of Calgary honours all transfer credit agreements as listed in the Alberta Transfer Guide and follows the CARI transfer statement:

The Province of Alberta recognizes four Comprehensive Academic and Research Institutions (CARI) within the Campus Alberta system: Athabasca University, the University of Calgary, the University of Lethbridge, and the University of Alberta. Alberta’s CARIs are committed to the advancement of Campus Alberta goals, including enhanced learner movement within the advanced education system. To facilitate mobility, the four CARIs accept each other’s credit courses and transfer. Minimum grade and program requirements determine the applicability of specific courses to a student’s program.

Students who have taken the equivalent of university courses in some other manner may be given advanced placement (i.e., excused from taking such courses) but will not be granted advanced credit. In these cases, students will be required to substitute courses to complete program requirements. The University reserves the right to require applicants for advanced credit or advanced placement to write examinations at any level including that of matriculation standing.

### A.12.1 International Baccalaureate (IB) Program

The University of Calgary awards up to a full year of credit (30 units) for the completed International Baccalaureate diploma. Specific advanced standing or placement for Higher Level courses are awarded provided a minimum grade of "5" or higher is achieved. The balance of credit (including credit for Higher Level courses with grades below "5") required to bring the total to 30 units will be at the junior assigned option level. In the case of advanced credit, a grade of "CR" will be recorded on the student’s record.

Applicants who have not completed the diploma will receive advanced standing or placement as set out below for each Higher Level course completed with a grade of "5" or above. Junior assigned option credit beyond that set out below is not available to students who do not complete the full IB diploma. Official IB transcripts are required as part of the evaluation process.

Students awarded advanced credit or advanced placement for IB courses should consult their faculty regarding course selection. Note that if advanced credit is awarded for a 200-level course that is a prerequisite for a 300-level course, students will be permitted to enter the 300-level course in first year.

Higher level IB courses approved for advanced credit or advanced placement are:

### A.12.1 International Baccalaureate (IB) Program

The University of Calgary awards up to a full year of credit (30 units) for the completed International Baccalaureate diploma. Specific advanced standing or placement for Higher Level courses are awarded provided a minimum grade of "5" or higher is achieved. The balance of credit (including credit for Higher Level courses with grades below "5") required to bring the total to 30 units will be at the junior assigned option level. In the case of advanced credit, a grade of "CR" will be recorded on the student’s record.

Applicants who have not completed the diploma will receive advanced standing or placement as set out below for each Higher Level course completed with a grade of "5" or above. Junior assigned option credit beyond that set out below is not available to students who do not complete the full IB diploma. Official IB transcripts are required as part of the evaluation process.

Students awarded advanced credit or advanced placement for IB courses should consult their faculty regarding course selection. Note that if advanced credit is awarded for a 200-level course that is a prerequisite for a 300-level course, students will be permitted to enter the 300-level course in first year.

Higher level IB courses approved for advanced credit or advanced placement are:
A.12.2 Advanced Placement (AP) Program

AP students automatically receive advanced credit or advanced placement in approved courses where they present grades of 4 or higher. In the case of advanced credit, a grade of "CR" will be recorded on the student’s record. Official AP transcripts are required as part of the evaluation process.

† "Junior" refers to credit at the 200 level, but for which no direct University of Calgary equivalency exists.

A.13 Admission Appeals

Admission to the University of Calgary is competitive. Meeting the minimum admiss-
A.14.1 Application Deadline

- Submit official transcripts from past high schools or post-secondary institutions attended.

A.14.2 Admission Requirements

To be considered for Open Studies, applicants must meet the following requirements:

A. Academic Requirements:

1. Present a minimum 65 per cent in English 30-1, or equivalent; OR
2. Present a minimum 2.00 GPA in a transferrable post-secondary English course(s), OR
3. Achieved a minimum 2.00 cumulative GPA on the most recent 12 units from another post-secondary institution; OR
4. Be a University of Calgary Alumnus.*

*When more than one academic requirement is presented, the highest level of education is used for admission.

B. Submit the following documents:

1. Degree holders: must submit official transcript reflecting the credential awarded.
2. Non-degree holders: must submit official transcripts from all high school and post-secondary institutions attended.
3. University of Calgary Alumni are not required to provide transcripts, provided they have not attended any other post-secondary institutions.
4. Provide proof of English Language Proficiency Requirements (if applicable, see A.11 English Language Proficiency).

C. Be in good standing.

The following limitations apply to Open Studies:

1. Discontinued students from Open Studies at the University of Calgary or from another post-secondary institution must wait a minimum of 12 months since the end of the term in which they were last registered. Students must reapply for admission and meet the current Open Studies admission requirements.
2. Students who have been discontinued more than once from Open Studies are not eligible for readmission to Open Studies.
3. Students who are currently under suspension from a University of Calgary Faculty or from another post-secondary institution must wait until their suspension period has ended before they can apply to Open Studies. Students must meet the current Open Studies admission requirements.
4. Students who are required to withdraw from a University of Calgary Faculty or from another post-secondary institution must wait a minimum of 12 months before they can apply to Open Studies. Students must meet the current admission requirements for Open Studies.
5. Students who are required to withdraw from the University of Calgary for unsatisfactory academic performance will be considered for admission to Open Studies provided they attain a 2.00 cumulative GPA on the most recent 12 units from another postsecondary institution.
6. Students who have been expelled from a Faculty at the University of Calgary for academic or non-academic misconduct are not permitted to apply to Open Studies until 24 months have passed since the end of the term in which they were last registered.

A.15 Auditing Regulations

1. Auditing privileges are extended to students who have been admitted as a Degree, Visiting or Open Studies student. Auditing students participate in classroom activities however may not be able to complete lab or tutorial components of a course. Students do not complete any exam or course assignments.
2. (a) The audit fees are outlined in the Tuition and General Fees section of this Calendar.
   (b) All auditing fees are non-refundable.
3. ACADEMIC STAFF, POST-DOCTORAL FELLOWS and VISITING SCHOLARS (not to be interpreted as visiting students) are eligible to audit without payment of fees, are not required to seek admission to the University, but must obtain written permission from the instructor of the course on a "Permission to Audit" form obtained from Enrollment Services. Such audits will not be recorded on an official transcript. Administrative staff and visiting scholars who wish to have an audit course recorded on an official transcript must pay the regular audit course fees.
4. A course in which the student is registered and attends as an auditor, will be entered on the student's record. It will not count towards any degree or diploma program, nor will the student in an undergraduate faculty be permitted to change registration in that course from audit to credit or credit to audit status after the change deadline at the beginning of the term in which the course begins.
5. The auditing students shall, before admission to the class concerned, obtain written permission on a "Permission to Audit" form from: first, the Dean (or designate) of the faculty offering the course in which they would like to register; and second, the instructor teaching the course. Permission obtained from a dean or designate shall not bind the instructor to accept a student as an auditor in the class.
6. Applicants may audit a course which was previously successfully completed and may take credit for a course which
was previously audited. Approval will be required as stated above.

7. Any student seeking to audit courses must meet all admission, registration and fee deadlines applying to regular students.
B. Registration

Most undergraduate students will complete course registration for the Fall and Winter Terms via MyUoC using their online Student Centre. It is strongly recommended that students obtain academic advising from their faculty or department advisors, as appropriate, prior to registration.

It is expected that students will follow the program outlined in this Calendar. Registration in a course does not indicate acceptance of the course for degree purposes. Faculties reserve the right to refuse a student's registration in courses when they are not appropriate to the degree program in which the student is registered.

Prerequisites are not normally waived. Minimum grades in prerequisite courses are required to ensure that students have prior knowledge and/or skills to be able to successfully engage with learning in more advanced courses. In some faculties, in exceptional cases, if a student can demonstrate that they have equivalent knowledge to prerequisites listed, then they may seek approval from the relevant department/faculty to enrol in the course. Refer to individual faculties for more information.

The University of Calgary reserves the right, published requirements notwithstanding, to reject applicants for admission or registration in courses, even if they technically meet the entrance requirements, on the basis of their overall academic records or on the basis of grounds that, in the opinion of the University, are reasonable in the circumstances.

B.1 Student Accommodation

The Student Accommodation Policy and the Procedure for Accommodations for Students with Disabilities set out the University’s obligation to provide reasonable accommodation to students when they have requested such an accommodation on a protected ground, in its role as a service provider, under the Alberta Human Rights Act. The detailed University policy and procedure document is available at: ucalgary.ca/policies/files/policies/student-accommodation-policy.

B.1.1 Accommodation of Students with Disabilities or Medical Conditions

Students who require an accommodation because of a disability or medical condition should communicate this need to Student Accessibility Services (SAS) in accordance with the Procedure for Accommodations for Students with Disabilities. To view the full procedure document see ucalgary.ca/policies/files/policies/student-accommodation-policy. Also, see section E.6 regarding Recording of Lectures and section G.3 Final Examinations. For additional information on support services and accommodations for students with disabilities, visit ucalgary.ca/access/.

B.1.2 Accommodations on Protected Grounds other than Disability

Students who require an accommodation in relation to their coursework or to fulfill requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to their Instructor or the appropriate Associate Dean, Department Head or the department/faculty designated contact person. Students who require an accommodation unrelated to their coursework or the requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Vice-Provost (Student Experience). For additional information on support services and accommodations for students with disabilities, visit ucalgary.ca/access/.

B.2 Registration Priority and Procedures

All students will be assigned a Registration Appointment based on their academic record. Refer to the Enrolment Services website (ucalgary.ca/registration) for further information. Students will not be permitted to register earlier than the date and time specified.

Registration instructions and a schedule of classes will be made available to students prior to the beginning of registration. On or after their registration date, students can register via MyUoC using their online Student Centre. At the time of registration, students should register in courses for both Fall and Winter Terms. Students may view and print their Timetable and Statement of Fees in their online Student Centre after they have registered.

Newly admitted students entering year one of a degree program will be mailed the necessary registration materials at the time of admission. Students are strongly encouraged to seek advice on course selection from the Student Advisors in their faculty. This should be done as early as possible.

Students are advised to register for courses as soon as they are eligible to ensure the best selection. Those admitted after registration begins are required to register within three weeks of the issuance of their notification of admission. Faculties reserve the right to rescind the offer of admission if course registration has not taken place within this time frame.
Open Studies students with prior approval are able to register (add, drop and change courses) via MyUofC using their online Student Centre. Students not taking advantage of the prior approval procedure will register for courses at Enrolment Services.

Registration will begin for Open Studies students (degree and non-degree holding) on the dates noted online at the Enrolment Services website, ucalgary.ca/registrar (or check at Enrolment Services) for remaining spaces in all courses, except those courses which have been indicated by faculties and/or departments as being closed to such students.

Open Studies degree holders, at the time of initial application, must provide a transcript indicating courses completed and the degree awarded.

Visiting students may register via MyUoC using their online Student Centre after submitting the combined application/registration form available at Enrolment Services or at: ucalgary.ca/student-forms.

Visiting students will be permitted to register in Fall/Winter Term courses starting on a date noted online at Enrolment Services website, ucalgary.ca/registrar (or check at Enrolment Services).

At the time of registration, Visiting students must provide a written letter of approval from the home institution which letter gives the student permission to complete courses at the University of Calgary. The letter must indicate the number of courses as well as the term/year in which courses can be completed.

Exchange students are not eligible to register online and must register on a combined application/registration form through the Exchange Co-ordinator at their home university.

B.2.1 Residence Requirements

Baccalaureate degree programs do not specify full-time study. However, given the scheduling of courses and the necessity to often complete courses concurrently or in a specified order, many students find it necessary to attend on a full-time basis. Students planning to obtain a degree by attending solely in the late afternoon and evening often find that required courses are only available during the day.

Many faculties have indicated an overall time limit in which a degree must be completed and the maximum amount of transfer credit which may be granted. Most undergraduate faculties require at least one half of the degree to be completed with courses offered by the University of Calgary. Faculties also have the right to determine if a student will be permitted to attend another institution even though the maximum amount of transfer credit has not been awarded. See individual faculty sections in this Calendar for specific information.

To obtain an undergraduate degree from the University of Calgary normally a minimum of 60 units (10.0 full-course equivalents) of University of Calgary courses which are not part of the requirements for a previous degree/diploma must have been completed.

Residence requirements for graduate degrees are outlined in the Faculty of Graduate Studies Calendar.

B.3 Withholds

Withholds may be placed on student access to registration and other services for reasons including, but not restricted to, the following: indebtedness to the University (fees, library fines, parking, residence, laboratory fees, etc.), faculty registration restrictions, outstanding documents, etc. Prior to registering for a term, students are advised to check for any withholds on their records. The issue(s) may then be dealt with to ensure any withhold is removed permitting the student access to course registration.

B.4 Schedule of Classes

The schedule of classes offered in each term is available before the opening of registration. The University reserves the right to make any changes it deems necessary including the cancellation of particular courses and to adjust a student’s timetable to meet this schedule. Schedule of class information is available from the Enrolment Services website (ucalgary.ca/registrar) and via MyUoC using the online Student Centre.

Students should refer to the Schedule of Classes to ensure that they are not selecting courses at overlapping times.

B.5 Course Enrolment Limitations

It should be noted that some faculties limit enrolment in their courses solely to students registered in their faculty or in a particular program, and that limits on class or laboratory sizes are frequently imposed. Refer to the Enrolment Services website, (ucalgary.ca/registrar) for a listing of such restrictions.

B.6 Block Week Courses

The University of Calgary has set aside five days at the start of Fall and Winter Terms as Block Weeks mainly for the offering of regular courses in an intensive manner. Dates for Block Weeks are given in the Academic Schedule.

The following regulations apply to courses offered during Block Weeks:

- Block Week is for the offering of regular credit and non-credit courses. Some courses will be available only in a Block Week format.
- Lectures for Block Week courses must be held within the days set aside at the beginning of Fall and Winter Terms.
- Permission of the Provost and Vice-President (Academic) is required to start or end a Block Week course earlier or later.
- The number of hours for attendance each day during Block Week shall not exceed eight hours. The total number of hours is recommended to approximate those offered during a regular term.
- Junior (200-level) courses may not be offered during Fall Term Block Week.
- The last day to drop a Block Week course (without it appearing on the student’s transcript) shall be the end of the first day of lectures.
- The last day to withdraw from a Block Week course shall be the final day of lectures during the Block Week.
- Block Week courses beginning in the Fall may extend over both the Fall and Winter Block Weeks.
- Attendance at lectures, tutorials, laboratories, etc. will not be required beyond the duration of the Block Week(s). Students may be required to meet with instructors regarding assignments during the term.
- Although lectures, etc. are completed during the Block Week, students should be prepared to complete assignments and a final examination during the remainder of the term.
- Final grades for Block Week courses will not be required until the end of the term in which the course is offered.
- Final examinations for credit Block Week courses will be held during the regular examination period at the end of the term. In lieu of a final examination, a take-home final examination can be given...
out on the last day of lectures. Tests held on the last day of lectures cannot be worth more than 10 per cent of the final grade. Exceptions to these regulations require the approval of the Provost and Vice-President (Academic).

- Pre-term study is not permitted in Block Week courses unless the deadline to register in the course is one month in advance of the start of lectures. Sending of pre-term study materials to registered students shall be the responsibility of the department and/or faculty offering the course.

- A Block Week course can be a prerequisite for a regular credit course. Normally, a prerequisite course will not be offered in the Block Week immediately preceding the term in which the follow-up course is being offered.

- Where a mandatory course for a degree is available only in the Block Week format, departments shall make arrangements for students who, for legitimate reasons, are unable to complete a course during Block Week.

- Use of a Block Week format will not be indicated on the student’s transcript of record.

- It is at the discretion of the faculty in which a student is registered as to the number of courses that a student may attempt during a term, including Block Week courses.

- All Block Week courses will be subject to the GFC approved policy on Universal Student Ratings of Instruction.

B.7 Part-Time Studies
The University of Calgary provides courses on weekends and evenings, particularly those which support the Communications Studies minor in the Bachelor of Communication program. However, students are cautioned that they may not be able to depend on being able to complete a full degree without also taking some courses during regular workday times.

B.8 Graduate Level Courses
University of Calgary undergraduate students are permitted to register in graduate level courses only with permission of both their Faculty and the Department offering the course. Undergraduate students are not normally permitted to take courses numbered 700 level or above. Access to graduate level courses (numbered 600 and above) for Visiting and Exchange students is limited to those admitted to a graduate program. For Open Studies and other students, access to graduate courses is restricted to those with adequate preparation, normally an undergraduate degree or the equivalent. Permission for an Open Studies or other student to register in any graduate level course must be obtained from the Faculty of Graduate Studies office.

B.9 Repeating Courses
A student may repeat a course previously attempted (excluding withdrawals) only once. To repeat a course more than once requires the permission of the faculty in which the student is registered and the department offering the course. Permission is granted only under exceptional circumstances.

Students repeating courses taken at the University of Calgary will not have the original grade, failure or otherwise, removed from the transcript of record. The transcript of record will indicate both the original grade and the repeated course with its final grade in the term in which it was taken. Taking or repeating a course that is a prerequisite for a higher level course after having completed the higher level course with a grade of “C-” or better will be allowed only with the permission of both the faculty in which the student is registered and the department offering the course.

B.10 Faculty Approval of Course Selections
Students should obtain the advice of their faculty in selecting courses; however, the student is ultimately responsible for the correct selection. Faculties reserve the right to cancel a student’s registration in a course, regardless of the date, if the student fails to meet a stated prerequisite. Approval for waiver of prerequisites must be obtained prior to registration in a course.

B.10.1 Credit in Courses by Special Assessment (Challenge Examinations)
Some faculties will allow students who feel knowledgeable in the subject matter of a particular course to seek credit through special assessment (i.e., subjecting to an examination only without attending the course and completing all requirements in the normal way during a regular term). Facilities and departments are free to determine which, if any, of their courses may be taken by special assessment, by any particular student, and to determine the nature and scheduling of the examination or assessment procedures involved. The evaluation must be completed and a grade reported by the specified deadline for that particular academic term. Only those courses listed on the Schedule of Classes and offered during an academic term may be taken by special assessment. To complete a course under this policy, a student must obtain written permission by the registration deadline from the head of the department offering the course and the Dean’s Office of the faculty in which the student is registered, on appropriate forms headed “Credit by Special Assessment” (available from: ucalgary.ca/registrars/student-forms).

Upon submission of a completed form to the Registrar, on appropriate forms headed “Credit by Special Assessment,” the student will have the right to a written waiver from the course being registered and the course will be recorded/transcript and will not be required to pay fees for the course(s).

Students may withdraw from a course(s) through the Student Centre (my.ucalgary.ca) by the withdrawal deadline (see Academic Schedule), with the exception of students in the Faculties of Law, Nursing, the Cumming School of Medicine (BHSc), the Schulich School of Engineering and the Werklund...
Academic Regulations

School of Education who must first obtain approval from their faculty to withdraw from a course. Students who wish to withdraw from a course more than once must speak with an academic advisor as they are not able to withdraw from a course a second time through the Student Centre (my.ucalgary.ca). Students who withdraw from more than 30 units (5.0 full-course equivalents), attempted at the University of Calgary, may be Required to Withdraw (RTW) from their faculty. A student may not withdraw from a course to avoid academic misconduct (see K.5.2 Notations and Penalties).

Students are encouraged to speak with their academic advisor prior to withdrawing from a course(s) or making changes to their course schedule.

One week before the withdrawal deadline, instructors must inform students of the grade currently earned in the course; provided papers, assignments or tests have been submitted with sufficient time for marking.

Students who do not formally withdraw from a course are still considered registered in the course, even if they are no longer attending classes. In these cases, students will be assigned a grade and are responsible to pay the fees assessed for the course.

B.14.2 Withdrawal from a Term
Students may withdraw completely from a term through the Student Centre (my.ucalgary.ca) by the withdrawal deadline, provided this is the first withdrawal from all courses within the Term. This excludes students in the Faculties of Law, Nursing, the Cumming School of Medicine (BHSc), the Schulich School of Engineering, the Werklund School of Education and students withdrawing from a course a second time.

Law, Nursing, the Cumming School of Medicine (BHSc), the Schulich School of Engineering, the Werklund School of Education and students intending to withdraw from a course a second time who wish to withdraw completely from a term after the registration deadline must obtain permission from their faculty prior to the withdrawal deadline. Students should visit their faculty advising office for additional information.

The date a student withdraws from a term is noted on a student’s transcript.

Students in the Faculty of Graduate Studies should refer to the Graduate Studies Calendar section on Withdrawals (D.5) or Leave of Absence (D.7) for regulations on withdrawing from a term.

B.14.3 Extenuating Circumstance Withdrawal
Extenuating Circumstance Withdrawals (EWs) are defined as unexpected and uncontrollable circumstances that make it impossible for a student to complete the term or a course. EWs typically consider situations such as medical emergencies, compassionate grounds, or unforeseen conditions/situations that arise after the start of term and are considered on a case-by-case basis.

Short-term illnesses or pre-existing, unmanaged conditions are not typically considered for an EW.

EWs are considered when a student must withdraw from all courses in a given term or from a specific course due to the circumstance(s) that has been presented. Inability to achieve a high or passing grade in a specific course is not considered grounds for an EW.

Normal EW requests must be submitted within 30 calendar days of the last day of the term to the Office of the Registrar. The Registrar will review the request in consultation with the student’s home Faculty. If a student is unable to submit the request on their own, the Associate Dean of their faculty may submit on the student’s behalf. Application information is kept in strict confidence.

Typically, a student must withdraw by the withdrawal deadline for an EW application to be considered. Approved EW applications will result in an “EW” being placed on the transcript to replace a “W” notation. Normally, students who attempt the final exam are not considered for an EW.

EWs are not included in the withdrawal limit noted in section B.14.1 (Withdrawal from a Course). The impact of EWs on the program completion time will vary by faculty or program. Faculties will review extensions to program completion times on a case-by-case basis.

In cases where an EW request is denied, students may file an appeal in writing to the Office of the Vice-Provost (Student Experience) within 10 business days of the date EW decision notification. Students must provide: a) a copy of the decision; b) a statement of the basis for appeal; c) a statement of facts relevant to the basis of appeal; d) a statement of the outcome sought; and e) any supporting documentation to which the student intends to refer at the appeal hearing.

For more information on how to apply for an EW visit: ucalgary.ca/registrar/registration/appeals

B.15 Payment of Fees or Notification of Financial Assistance
A student’s registration is not complete until the balance of fees for any term has been paid. Fees are due and payable by the published deadlines. See the Tuition and General Fees section for details.

Students whose fees are not paid by the prescribed deadlines and who have not applied for financial assistance will not have their course registrations cancelled and will be indebted to the University for their tuition and general fees. Interest will be charged on outstanding balances at an annual rate as determined by the University (12 per cent at the time of the posting of this Calendar). Fee and interest rates may be subject to change without prior notice.

Students who apply for financial assistance and subsequently decide not to attend University, must advise Enrolment Services to cancel their registration before the deadline for fee payments, otherwise, they will be indebted to the University for their tuition and general fees.

B.16 Fee Refund
No refund of tuition and general fees will be made after the change of registration deadlines given in the Academic Schedule.

B.17 Change of Personal Information
Students should promptly inform Enrolment Services of changes in personal information - changes in contact information, name, citizenship, etc. Students who wish to change their surnames or given names must provide proof in the form of legal documentation. A Change of Personal Information form, for this purpose, is obtainable at Enrolment Services or on the web at ucalgary.ca/registrar/student-forms.

Students should change their contact information via MyUofC using their online Student Centre. The University is not responsible for incorrect mailing and for missed deadlines, etc. due to the student's failure to report a change of contact information. It is to the student’s advantage even after graduation to maintain an up-to-date contact information at the University.

B.18 Changes in Regulations
The University reserves the right to make changes in regulations governing degree programs from time to time. All such changes apply to new and continuing students. However, students continuing in the same program will be phased into the new program regulations without extending the number of courses required for their degree. Where a required course for a degree program is no longer offered, the faculty may specify an alternate. Students who interrupt their program by a Fall or Winter Term or more will be required to comply with new regulations upon resumption of their studies. Students should annually refer to the Calendar for appropriate faculty regulations governing their degree programs.

B.19. Open Studies Registration, Registration Standing and Appeals
The Office of the Registrar administers registration in the Open Studies category. Students in this registration category are not admitted to a program leading to degree, diploma or certificate. Students who are Canadian citizens or permanent residents are eligible to register in this category.

This section only applies to students who are registered as a non-degree holder or degree holder. For information on exchange or visiting, see the appropriate Faculty section. For information on the International Foundation Program, see section R (International Foundation Program).

B.19.1 Registration
1. Course Load:
Non-degree holders: students are permitted to register in a maximum of 12 units per term.
Degree holders: students are permitted to register in a maximum of 18 units per term.
2. Enrolment Limit: Normally, students registered in the Open Studies category may attempt a maximum of 36 units. Failed courses are considered as attempts.
3. Students who withdraw from more than 15 units (2.5 full-course equivalents) will be discontinued.
4. Open Studies students who wish to audit courses must follow Auditing Regulations (see A.15).
5. Open Studies students are eligible to register on the Enrolment Appointment date indicated in their Student Centre.
6. Open Studies students who have been inactive for one Calendar year must re-apply for admission.

Student Responsibility
Students are responsible for the completeness and accuracy of their application and registration and for any adjustments throughout the registration process. Students are responsible for ensuring they have the necessary prerequisites and corequisites for courses.

Academic Advising
Academic advising is available to all Open Studies students through the Student Success Centre. For additional information visit ucalgary.ca/ssc or email success@ucalgary.ca.

B.19.1.2 ASAP Program
Students enrolled in the Aboriginal Student Access Program can take up to four 3-unit university courses per semester. Course selection may be a combination of ASAP course requirements, electives that are directed to a student’s desired academic program and upgrading courses taken concurrently with their university courses. Student will consult with the ASAP co-ordinator regarding course selections.
For details on the ASAP admission requirements, see section A.8.1 Aboriginal Student Access Program.

Program Curriculum
The Program offers the following first-year, university-level core courses:

Fall
Academic Writing (ACWR) 201 – Introduc tory Academic Writing I
Indigenous Studies (INDG) 201 – Introduction to Indigenous Studies
University (UNIV) 205 – Learning Beyond High School: Theories and Practices

Winter
Academic Writing (ACWR) 203 – Introduc tory Academic Writing II
English (ENGL) 201 – Approaches to Literature

Upgrading courses may be taken through Continuing Education at the University of Calgary (or other adult learning institutions) in conjunction with University of Calgary ASAP courses.
For more information, contact the Native Centre at 403.220.6034 or email ASAP@ucalgary.ca

B.19.2 Academic Performance
Academic performance is monitored after each term. All course attempts in the term will be reviewed.
A formal review of academic performance will occur after the winter term. Decisions regarding registration standing will be made at this time. Students who earn a grade point average less than 1.70 on a minimum of nine (9) units will be discontinued from Open Studies.
Students who have withdrawn from more than 15 units will be discontinued from Open Studies unless they can demonstrate sufficient cause for the withdrawal.
Discontinued students from Open Studies at the University of Calgary may not register in Open Studies for a period of twelve months from the end of the term they last attended. Re-applicants will be required to meet the Open Studies admission standards prior to being reconsidered.
Open Studies students are encouraged to speak with the Open Studies Academic Advisor available in the Student Success Centre (success@ucalgary.ca). Open Studies students are not eligible for the Academic Turn Around program.
Notwithstanding the specific regulations pertaining to Academic Performance, academic performance may be reviewed at any time and students with generally poor academic performance may be discontinued at the discretion of the Office of the Registrar.

B.19.3 Appeal Process
A student may appeal a course limit requirement or an academic performance decision that requires them to be discontinued from the Open Studies category. The deadline for appeals is 15 calendar days from the date on the communications advising the student of their standing. The Faculty Appeal process outlined in section J (Non-Disciplinary Academic Appeals) will be followed. The Vice-Provost, Student Experience is considered the Dean equivalent for all Open Studies students. The Registration Appeals Committee is considered the Faculty Appeals Committee.
Should a student wish to appeal a decision made by the Registration Appeals Committee they must do so within 15 calendar days of the date on the appeal communication from the Registration Appeals Committee. Appeals are submitted to the Vice- Provost, Students Experience (vpease@ucalgary.ca).
Appeals relating to grades or other academic matters will following the appeals process outlined in sections I (Reappraisal of Grades) and K (Statement on Principles of Conduct).

B.19.4 Student Misconduct
The principles outlined in section K (Statement on Principles of Conduct) apply to all Open Studies students. Section K.5 (Plagiarism/Cheating/Other Academic Misconduct) outlines the process that will be followed by all Open Studies students. The Vice-Provost, Student Experience is considered the Dean equivalent for all Open Studies students. The Registration Appeals Committee is considered the Faculty Appeals Committee.

B.20 Registration Exemption Requests
Students may submit a request for the following exemptions from the registration regulations:
1. Requests for a late withdraw (W) from a course(s), provided a student has not attempted the final examination/assessment.
   a. Requests must normally be submitted within 30 calendar days of the last day of the term in which the course was taken or in exceptional circumstances up to one year from the start date of the course.
2. Requests for a late add/drop/swap for a course.
   a. These requests will be granted only in exceptional circumstances. A student must outline the exceptional circumstances for the request and provide supporting documentation. In the case of a late add/swap, a student must also provide written support from the Dean, or designate, of the Faculty offering the course.
3. Requests to exceed the number of units permitted as an Open Studies students.
   a. Requests must be submitted at least 30 calendar days prior to the start of the term in which a student wishes to take additional courses.
Requests and supporting documentation must be submitted to the Office of the Registrar for decision at rgappeal@ucalgary.ca within the timelines noted above, if any.
Requests will be reviewed in the order they are received and decisions will be provided within 30 calendar days. Decisions will be sent by email to the students UCalgary email account.
Should a student wish to appeal a decision of the Office of the Registrar, they may do so within 15 calendar days of date of the communication providing the decision. Appeals will only be considered on procedural grounds or based on new information that was not available at the time of the original request. Appeals must be submitted to the Vice- Provost (Student Experience) for decision at vpease@ucalgary.ca. The decision of the Vice-Provost (Student Experience) is final.

C. Mathematics Competency Equivalents
A. Students who wish to take Mathematics 211, 213, or 249 must present a 70 per
C.1 Mathematics II
Mathematics II, offered by Continuing Education, may be used as an admission requirement or a prerequisite as follows:

- A grade of “D” or better is acceptable in lieu of Mathematics 30-1 for general admission to most programs.
- A grade of “C-” or higher is acceptable as a prerequisite for courses in the Faculty of Science for which Mathematics 30-1 is a prerequisite (excludes courses that require 70 per cent or better in Mathematics 30-1). A grade of “B-” or better in Mathematics II is acceptable for courses that require 70 per cent or better in Mathematics 30-1.

C.2 Mathematics Diagnostic Test
The Mathematics Diagnostic Test is a 60 minute test of the student’s mastery of topics in Mathematics 30-1. The test is offered during the week preceding the start of classes in each of the Fall, Winter and Spring Terms.

After receiving their notice of admission, newly admitted students who wish to write the Mathematics Diagnostic Test are advised to do so at the earliest opportunity. The fee is $50.00 per attempt; to a maximum of two attempts. The fee must be paid through one of the acceptable methods listed in section P.4.2 (Methods of Payment) in advance of the test date. Students are required to register with the Department of Mathematics and Statistics prior to the date of the test as seating is limited. Students are required to present proof of payment and proof of identity to write the test.

D. Change of Faculty or Program
Requests for a Change of Program may be made through the online Student Centre via MyUofC. The deadline dates for Change of Programs are as follows:

Fall Term:
- February 1: All programs

Winter Term:
- September 1: Faculty of Nursing (Transfer and Degree Holder Routes only).
- December 1: All programs within the Faculty of Arts, excluding programs in Dance, Drama, Earth Science, Economics, International Relations, Law and Society, Music, Psychology or Visual Arts; Kinesiology; Science, excluding programs in Biological Sciences, Computer Science, Chemistry, Environmental Science, Geoscience, Nanoscience and Neuroscience.

E. Course Information
E.1 Course Outlines
Every course is required to have a course outline that provides the overall structure and requirements of a course and informs students about the kinds of learning experiences they can expect in the course. Course outlines are to be submitted to departmental offices (or in the case of non-departmentalized Faculties or interdisciplinary programs, the Dean’s Office). The home unit head is required to approve course outlines and confirm that the required elements listed below are included.

Each instructor responsible for a course is required to make a course outline available to each student no later than the first meeting day for the course. It is expected that the course outline (or in the case of clinical and professional practice-based courses, a Faculty-approved alternate document) will be available as a web-based document or through the learning management system (i.e. Desire2Learn). If it is not, a paper version of the outline will be handed out to every student at the first meeting of the class, and made available for those unable to attend the first class.

In addition to the required general information (number and title of course, name of the instructor, day, place and time of regular classes, prerequisites/corequisites, etc.) each course outline must contain the following:

(a) Course objectives/learning outcomes of the course;
(b) Required (and recommended) textbooks, readings, materials including electronic resources;
(c) Information on grading methods and/or scales used in the course;
(d) In all courses where exemptions to the Examination and Tests regulations are approved by the Dean or the Dean’s designate, the exemption should be noted in the course outline.
(e) The weights to be assigned to the various components which are to be considered in determining the final grade (term papers, laboratory work, class participation, tests, final examinations, etc.). This weighting may not be changed during the term or at the time of grade reporting;
(f) Whether or not a passing grade on any particular component of a course is essential if the student is to pass the course as a whole;
(g) Whether or not there will be a final examination and if an examination is held, whether the use of aids such as open book, etc., are permitted;
(h) Whether students in the course may be expected to participate as subjects or researchers when research on human subjects may take place;
(i) Whether writing and the grading thereof is a factor in the evaluation of the student’s work (see E.2 Writing Across the Curriculum statement);
(j) A list and description of approved optional and mandatory supplementary fees for courses;
(k) Academic Accommodations. It is the student’s responsibility to request academic
accommodations and according to the University policies and procedures listed below. The student accommodation policy can be found at: ucalgary.ca/access/accommodations.

Students needing an Accommodation because of a Disability or medical condition should communicate this need to Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities (ucalgary.ca/policies/files/policies/student-accommodation-policy).

Students needing an Accommodation based on a Protected Ground other than Disability, should communicate this need, preferably in writing, to “(Instructor) (Associate Dean) (Department Head) (other designated person)”. The course outline should clearly list the appropriate contact person and their contact details.

- Information regarding the Freedom of Information and Protection of Privacy Act and how this impacts the receipt and delivery of course material.
- Information on academic misconduct and the consequences thereof.
- Emergency Evacuation/Assembly Points (ucalgary.ca/emergencyplan/assemblypoints);
- Internet and Electronic Communication Device information;
- Safewalk information;
- Student Union or Graduate Student representative contact information;
- Link to the Student Ombuds’ Office (ucalgary.ca/ombuds/ombuds@ucalgary.ca).
- Link to campus mental health resources, including SU Wellness Centre and the Campus Mental Health Strategy website.

Instructors will also indicate in the course outline the use of calculators and/or electronic devices that will be allowed. In the absence of a written statement, the presumption is that the use of any calculators and/or electronic devices during examinations will not be allowed.

Instructors have the authority, at the discretion of the dean of their faculty, to require that specific course assignments, term papers and academic exercises be submitted in an electronic format. Instructors cannot require that multiple copies of an assignment be submitted.

E.2 Writing Across the Curriculum

Writing skills are not exclusive to English courses and, in fact, should cross all disciplines. The University supports the belief that throughout their University careers, students should be taught how to write well so that when they graduate their writing abilities will be far above the minimal standards required at entrance. Consistent with this belief, students are expected to do a substantial amount of writing in their University courses and, where appropriate, members of faculty can and should use writing and the grading thereof as a factor in the evaluation of student work. The services provided by the Writing Support, part of the Student Success Centre, can be utilized by all undergraduate and graduate students who feel they require further assistance.

E.3 Attendance

The University has directed that attendance will not be considered when assessing a student’s grade except in certain courses where class participation may be a necessary component of the course. Regular attendance is advised for students in all courses and there is no regulation which precludes an instructor from taking attendance in the class.

The full responsibility for meeting class and laboratory assignments, tests and term papers of the section of the course in which a student is officially registered lies solely with the student. It is the responsibility of students who have prolonged absences from class because of physical and/or emotional health problems to present to the faculty office offering the course a statement from a physician/counsellor attesting to the physical or mental health of the student. It is expected that this statement will normally be given only if the student present themselves to a physician/counsellor while the problem still exists rather than after recovery.

A student who is absent from a test for legitimate reasons must discuss an alternative course of action with the instructor. The instructor at their discretion may transfer the percentage weight for the test to the final examination, if there is a final examination in the course, set another test, etc. An instructor will normally make this decision on the basis of verbal information provided by the student. In the event that an instructor feels that they cannot judge the veracity of the information provided, the student may be required to submit a completed Physician/ Counsellor Statement form to confirm an absence for health reasons. Students must be aware that they are responsible for payment of any charge associated with the medical assessment and documentation as this service falls outside the realm of services provided by the Provincial Health Care Plan. See also G.6 Deferral of Final Examinations or G.7 Deferral of Term Work.

E.4 Religious/Spiritual Observance

The University recognizes and respects the diversity of its members, including diversity of religious faiths and observances. It is understood that some students may not be able to attend classes, write tests or write final examinations on days of observance. Students should consult the Student Accommodation Policy (ucalgary.ca/policies/files/policies/student-accommodation-policy) for further information. Religious accommodation requests relating to class, test or exam scheduling or absences must be submitted no later than 14 days prior to the date in question.

The Faith and Spirituality Centre provides further information on holy days (ucalgary.ca/fsc/resources/general-resources).

E.5 Ethics of Human Studies

The University is concerned with safeguarding the rights of people in the conduct of its affairs both on and off campus. Students may be requested to serve, on a voluntary basis, as human research subjects for certain of their courses. In such instances, the course outlines prepared by instructors must describe the students’ expected roles as subjects. Courses may also follow the pedagogical practice of assigning students to serve as apprentice researchers, e.g., interviewing community members. In all course work dealing with human studies, the usual ethical guidelines with respect to risks and benefits, informed consent, deception, privacy and confidentiality must be followed both by students and their instructors. Students should be referred to departmental ethics committees for information in regard to ethical safeguards. (Further details may be found in the University of Calgary publication entitled Ethics of Human Studies).

E.6 Recording of Lectures

Recording of lectures other than audio recordings, as outlined below are not permitted.

Audio recording of lectures, other than where an audio recording is an accommodation, shall be permitted for individual private study only at the discretion of the instructor. For any other use, whether by duplication, transcription, publication, sale or transfer of recordings, written approval must be obtained from the instructor for the specific use proposed. Any use other than that described above constitutes academic misconduct and may result in suspension or expulsion.

Any student with a disability who is registered with Student Accessibility Services (SAS), and who requires an accommodation to make audio recordings of course material shall be provided with such an accommodation if determined necessary by an Access Advisor in SAS.

With the permission of the instructor, students without a formal accommodation may audio record lectures, provided that the student and instructor sign a release form available from departmental and faculty offices. A copy of the Release form shall be retained by the instructor and by the department in which the course is offered. Any audio recording by students is permitted only for the purposes of private study by the individual student.

Students are cautioned that lectures, demonstrations, performances, and any other course material provided by an instructor may include copyright protected works. The Copyright Act and the copyright law protect every original literary, dramatic, musical and artistic work, including lectures by University instructors. Any audio recording by students is permitted only for the purposes of private study by the individual student. Students may not distribute, email or otherwise communicate these materials to any other person.
Academic Regulations

Students are encouraged to make notes of classroom discussions, lectures, demonstrations, and performances in order to advance their own learning and to develop a record for purposes of private study. The ordinary process of taking notes is encouraged since this practice requires that students develop the ability to actively attend to the material under consideration and to quickly summarize pertinent information in a coherent manner. Electronic or mechanical recording of lectures discourages the development of these important skills. In addition, the presence of audio recording devices may inhibit frank and open discussion of course material in the classroom, or otherwise interfere with the proper academic conduct of the class.

This regulation applies to all forms of electronic or mechanical recording of lectures, laboratories, tutorials, presentations, performances, electronic (computer) information, the duplication of course material, and to the translation of recordings or transcriptions of any of these materials to another form by electronic or mechanical means.

F. Academic Standing

F.1 Grading System and Transcripts

The official grading system must be used to report final grades to the Office of the Registrar.

If the official grading system is not used for individual assignments, quizzes, etc., the system used must be provided on the course outline as well as a conversion chart that enables students to determine their grade in relation to the official grading system. Approval is required as per the Course Outline regulation (section E.1 Course Outlines). The conversion chart should not be changed during the term. Should it become necessary to change a grading scale, it can only be changed during the term if the grades will not be lowered. Any concerns about changes to the conversion chart should be raised with the Department Head (or equivalent). Students not satisfied by the Department Head (or equivalent) should contact the Faculty office to follow normal appeal procedures.

F.1.1 Undergraduate Grading System

<table>
<thead>
<tr>

<td>Course in Progress</td>
</tr>
</tbody>
</table>

Notes:
- A grade of “C-” or below may not be sufficient for promotion or graduation, see specific faculty regulations.
- The number of “D” and “D+” grades acceptable for credit is subject to specific undergraduate faculty promotional policy.
Academic Regulations

F.3 Academic Notations
Academic notations indicate a student’s overall academic standing or highlight the receipt of special honours or distinctions. Notations are typically applied to a specific term; however, they can relate to multiple terms.

F.3.1 Academic Standing
In Good Standing: The progression requirements for a Faculty have been achieved. See the faculty section for specific requirements.

Academic Probation: The progression requirements for a faculty have not been achieved following an academic review. Students are placed on academic probation for a period of one year.

Disciplinary Probation: Penalty for plagiarism, cheating or other academic misconduct. Eligible to proceed in an academic program.

Required to Withdraw: If In Good Standing is not achieved during the Academic Probation period or performance requirements as outlined in section F.5 (Unsatisfactory Standing) and/or faculty-specific performance requirements are not met, a student will be required to withdraw from the faculty. May also be used for other academic misconduct penalties where the student is required to withdraw.

Suspension: Not permitted to register in any University of Calgary program or faculty for the period of the suspension. Will be eligible to re-apply for admission after the end of the suspension period. In cases of academic misconduct, the notation will read: Suspended by <Faculty/School> for academic misconduct.

Expulsion from Faculty: Permanent removal from the faculty registered in at the time of the offence. A student does not have the right to be re-admitted to the faculty they were registered in. May be considered for re-admission to another faculty after at least twelve months have passed since the end of the term the expulsion was applied. In cases of academic misconduct, the notation will read: Expelled by <Faculty/School> for academic misconduct.

Expulsion from University: Permanent removal from the University. A student does not have the right to apply for re-admission to the University.

F.3.2 Unsatisfactory Standing
All faculties review a student’s performance for continuation in a program. University regulations require that an undergraduate student, at the time of review, be required to withdraw from the University if the student’s grade point average is less than 1.70. Most faculties have higher requirements for continuation in a program.

Students will be permitted one probationary period while registered as undergraduate students at the University of Calgary. Students will be required to withdraw rather than be placed on probation for a second time. Probationary periods that have occurred in excess of five years previous will not be counted.

The records affecting promotion and graduation of all students in the Faculty are reviewed by persons designated by the faculty council. A student whose record is then found to be unsatisfactory will be so notified by the Dean (or designate). The student may be required to withdraw (RW) from the faculty or to repeat the year. Students who receive RW letters are encouraged to speak with an academic advisor and/or Counseling Services.

A Faculty reserves the right to review a students’ academic standing at any time and, at the discretion of the Dean or designate, a student may be permitted to continue in program under specified conditions or required to withdraw if specified conditions of admission or continuation in the program are not met. These conditions shall be specified in writing by the Dean or designate to the student.

The transcript of record will indicate if a student has been required to withdraw or placed on probation due to unsatisfactory standing. Normally, this notation will not be removed from the transcript of record. Students who have been required to withdraw from a faculty at the University of Calgary and wish to return must re-apply for admission to the University by the stated deadlines. For details on application requirements and processes, see section A.6 (Required to Withdraw Students).

For specific faculty promotional policies, please refer to each faculty section of this Calendar.

F.3.3 Aegrotat Standing
Aegrotat standing may be granted when a student is prevented by illness or injury from completing a course(s). The faculty offering the course(s) may award this standing to students who have completed a significant portion of the course material/learning outcomes and are able to progress in their program.

Students apply to the Dean (or designate) of the faculty offering the course.

F.3.4 Honours Degrees and Degrees with Distinction
Honours degrees are available from the Faculty of Arts, Kinesiology, Cumming School of Medicine (BHSc), and Science. Please refer to the graduation requirements for Honours degrees in the faculty sections of this Calendar.

The notation “With Distinction” will be awarded to candidates and inscribed on the graduation parchment for the degrees of BA, BSc, BComm, BCR, BSc (Engineering), BFA, BKin, BMus, BN, BSW, DVM or JD if the candidate has obtained the required average as defined under the faculty promotion policy.

A student who has taken part of their work at another university may be granted a degree “With Distinction” at the discretion of the faculty concerned.

F.3.5 Dean’s List
The Dean’s List recognizes the outstanding academic achievement of students in the Cumming School of Medicine (BHSc, BCR), Haskayne School of Business, Schulich School of Engineering and the Faculties of Arts, Kinesiology, Law, Nursing, and Science. Each Faculty’s section of this Calendar outlines the requirements for inclusion on the Dean’s List. Placement on a Dean’s List is noted on the student’s transcript.

Students on academic sanctions at the time of academic review, as outlined in section K. Statement on Principles of Conduct of this Calendar, are not eligible for the Dean’s List.

F.4 Grade Point Average
All grades are used in the calculation of yearly grade point averages, both for purposes of the official transcript of record and cumulative grade point averages determined by the faculties. When determining a grade point average, the average will be based on the second decimal point and will not be rounded. For example, a GPA calculated at 2.999 will be 2.99.

For promotion or graduation, refer to individual faculty sections for requirements.

To determine the grade point average, the course grade point is multiplied by the unit value of the course (e.g. 6 units or a full-course equivalent) to determining the weighting. The weightings are added together then divided by the total number of units to determine the grade point average (GPA).

Example: A student who completed two, 6-unit and four, 3-unit courses with grades of A+ and 3.00 GPA.

<table>
<thead>
<tr>
<th>Course</th>
<th>Grade</th>
<th>Weighted Grade Point</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
<td>24.00</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
<td>9.00</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
<td>6.00</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
<td>3.00</td>
</tr>
<tr>
<td>E</td>
<td>0.00</td>
<td>0.00</td>
</tr>
</tbody>
</table>

Total: 43.00 / 12 = 3.58 GPA

F.5 Transcripts
An official transcript is a complete and unabridged record of a student’s academic history at the University of Calgary. Official transcripts bear the University seal and signature of the Registrar. Official transcripts may be sent directly to an institution or provided to the student, either by mail in sealed
G.1 Scheduling of Tests

Tests must be scheduled within regular class time except in those special cases where prior approval has been obtained from the dean of the faculty offering the course. Common mid-year tests in courses that run over more than one term must occur during the final examination period, and must be scheduled by the Registrar, except:

- Mid-year tests that are take-home or oral tests, or mid-term projects.
- Mid-year tests in Law, Medicine (MD program only) and Veterinary Medicine, which are scheduled by each Faculty. The Faculty of Environmental Design also schedules its own mid-year tests except for courses in the Architectural Studies minor.

G.2 Proof of Identity

G.2.1 Tests

Invigilators of any tests may, when they have reason to believe there is cause to do so, challenge any candidate to produce proof of identity either in the form of the University of Calgary ID card (Unicard) or government-issued photo ID. If there is clear evidence that impersonation has occurred, the individual shall not be permitted to continue the test and shall be reported immediately to the dean or delegate of the faculty in which the course is offered.

A student who is not able to provide acceptable proof of identity may be permitted to continue the test if the student agrees to provide verification at a later date. If verification is not provided, then the student will receive an “F” on the test, and the matter will be referred to the dean or delegate of the faculty in which the course is offered for further disciplinary action.

G.2.2 Final Examinations

All candidates for final examinations are required to place their University of Calgary ID cards (UNICARD) on their desks for the duration of the examination. This requirement is publicized at the time of posting of the examination timetable each session. Students without an ID card who can produce an acceptable alternative ID, e.g., government-issued photo ID, will be allowed to write the examination. A student without acceptable ID will be required to complete an Identification form. The form indicates that there is no guarantee that the examination paper will be graded if any discrepancies in identification are discovered after verification with the student’s file.

A student who refuses to produce identification or who refuses to complete and sign the form will not be permitted to write the examination. The circumstances will be reported immediately in writing to the dean and to the Registrar for consideration of further disciplinary action.

G.3 Final Examinations

Any final examination scheduled by the Registrar is held in the examination period following the session in which the course was completed, as defined in the Academic Schedule.

Students requiring an accommodation because of disability or medical condition should contact SAS in accordance with the Procedure for Accommodations for Students with Disabilities available at: ucalgary.ca/policies/files/policies/student-accommodation-policy. Students who require an accommodation on a protected ground other than disability should communicate this need, preferably in writing, to their Instructor or the appropriate Associate Dean, Department Head or the department/faculty designated contact person.

Should a student write and hand in an examination for grading and later request the cancellation of the examination and a deferred examination or a retroactive withdrawal, such a request will be denied.

G.4 Scheduling of Examinations

All final examinations must be scheduled by the Registrar, except:

- Final examinations which are take-home examinations, oral examinations or terminal projects.
- Final examinations in Law, Medicine (MD program only) and Veterinary Medicine, which are scheduled by each Faculty. The Faculty of Environmental Design also schedules its own final exams except for courses in the Architectural Studies minor.

See ucalgary.ca/registrar for additional final examination regulations.

G.5 Exemptions to the Examination and Tests Regulations

Exemptions to the Examination and Tests regulations may be made on pedagogical grounds with the approval of the Dean or the Dean’s designate. In all courses where exemptions to the Examination and Tests regulations are approved by the Dean or the Dean’s designate, the exemption should be noted in the course outline.

Regardless of the format of a course, any external accreditation requirements must be met (or exceeded) in the evaluation plan for a course.

The Faculty of Environmental Design also schedules its own mid-year tests except for courses in the Architectural Studies minor.

In all Faculties, unscheduled examinations, assignments, tests, etc., may not be held by
instructors after the last day of classes, i.e.,
during the study break or the examination
period at the end of each term. Any such
testing should be conducted by the instruc-
tor during the regular class periods before
the end of a term. (See G.1 Scheduling of
Tests for weighting of tests during the last
14 calendar days of the standard term.)

Requests for pre-assignment of examina-
tions to special dates for whatever cause or
reason will not be accommodated. Similarly,
requests for changes to the dates of sched-
uled examinations will not be approved. Stu-
dent votes and petitions to change a sched-
ule examination will not be considered as
these have been found to result in undue
pressure on students not in agreement with
an altered examination schedule.

The Examinations Timetable for Registrar-
scheduled examinations will be published
approximately one month after the start of
the term and will be available via MyUCalgary
in the online Student Centre and at the
Enrolment Services website: ucalgary.ca/
registrar/exams.

G.5 Evening Credit and Campus
Course Examinations

Final examinations in all courses, including
evening credit courses, late afternoon cours-
es and week-end courses are scheduled by the
Registrar. The University cannot guar-
antee that examinations in evening credit
courses will be scheduled in the evening
but an effort is made to schedule as many
examinations as possible in the evening. An
examination common to both day and even-
ting sections of a course may be scheduled
during the day.

For courses offered at off-campus loca-
tions, the instructor will be responsible for
scheduling the final examinations during the
examination period at the end of the term.

G.6 Deferral of Final
Examinations

Deferred examinations are allowed in the
following circumstances: debilitating illness,
severe domestic affliction, religious convic-
tion or absence due to a faculty-approved
activity. Students who have three final
examinations within 24 hours are permitted
to request that one examination be deferred
to the deferred examination period.

The authority to grant or deny a deferred
final examination rests with the Dean (or
designate) of the Faculty in which the course
is offered. The Application for a Deferred
Final Examination is available from ucalgary.
ca/registrar which outlines the application
process.

Deferred final examinations will not be
granted if a student:

- Misses a final exam without just cause
- Books travel during a scheduled exam
  time
- Misreads the exam schedule
- Submits a final exam for marking
- Completes less than half of the assigned
  work in a course

G.6.1 Religious Conviction, Three
exams in 24 hours, Absence due to a
Faculty-Approved Activity

Students must inform their faculty advis-
 ing office within 10 business days after the
release of the exam schedule of any exam
conflicts due to religious conviction, three
exams in 24 hours, two (2) exams scheduled
at the same time or expected absence due
to a Faculty approved activity.

Students who do not provide appropri-
ate notification may not be approved for a
defered exam.

G.6.2. Debilitating Illness and Severe
Domestic Affliction

A. Prior to a Scheduled Exam:

Students may inform their faculty as soon
as possible if they are unable to attend a
scheduled final exam. Typically, this would
be done via email to the instructor or the
Dean (or designate) or as per approved
faculty regulations. Students will be required
to provide supporting documentation. In the
case of illness/medical a completed Physi-
cian/Counsellor Statement Form is required.

B. During a Scheduled Exam:

If a student experiences debilitating illness
or is notified of severe domestic affliction
during an examination, the student should
report to the instructor of record, hand in
the unfinished exam and request the exam
be cancelled. Normally, students are not
permitted to leave the examination due
to illness/domestic affliction once 50 per
cent of the examination time has passed.

Students will be required to provide support-
ding documentation confirming the illness/
domestic affliction experienced during
the examination. In the case of illness, a
completed Physician/Counsellor Statement
Form is required. Letters from a physician/
counsellor in lieu of a Physician/Counsellor
Statement Form will not be accepted. Stu-
dents are responsible for any costs associ-
ated with obtaining a medical assessment or
the completion of the Physician/Counsellor
Statement Form.

G.6.3 Limitations and Misuse of
Deferred Examination Regulations

Students who request multiple deferred
exams will be required to meet with a faculty
advisor, the Student Success Centre or the
SU Wellness Centre after the fourth deferred
exam request; this is cumulative and applies
to all studies pursued at the University of
Calgary. Students may be required to reduce
their course load in future terms or partici-
pate in exam preparation workshops.

Misuse of the deferred exam regulation,
 flattering documentation or false statements
made on any of the documents or provided
for a deferred examination will be consid-
 ered academic misconduct and is subject to
the academic misconduct regulations out-
lined in section K. Statement on Principles
of Conduct of this calendar.

G.6.4 Scheduling of Deferred
Examinations

Normally, deferred examinations will be
scheduled prior to the end of the course
change period of the term immediately fol-
lowing the final exam period*.

Deferred final examinations are scheduled
by the Office of the Registrar and a timetable
will be made available at: ucalgary.ca/regis-
trar one week prior to the deferred examina-
tion period. Students writing a deferred final
examination must consult this timetable to
determine the exact date and time of their
defered examination.

A deferred final examination will be different
in content and/or format from the original
final examination.

Students in their graduating year who
derfer Winter Term final examinations may
not graduate until the Fall convocation
ceremony.

Normally, deferred final examinations may
not be deferred a second time nor will
students be eligible for a late withdraw.
Requests for late withdraws will not be
considered when a student does not attend
a deferred examination without sufficient
cause.

*Does not apply to the Cumming School of
Medicine (MD program only) and the Facul-
ties of Law and Veterinary Medicine.

G.7 Deferral of Term Work

Term work is defined as any papers, proj-
ects, tests or other assignments that are due
on or prior to the last day of the term.

Term Work due Before the End of
Lectures:

Instructors, subject to any established
departmental or faculty procedures, may
establish their own deadlines for the
completion of term work. Students must be
made aware of any of the departmental or faculty
procedures on the course outline.

Term Work due After the End of the Term:

Should a request to defer term work exceed
the end of the term, a Deferral of Term Work
form must be completed. Deferrals are
granted at the discretion of the Dean (or
designate) and are normally granted for 30
days beyond the end of term. Should cir-
cumstances warrant, the maximum time that
may be granted for a deferral of term work
is one additional term. Application forms are
available at: ucalgary.ca/registrar.

See section E.3 Attendance for additional
information regarding absences from tests.
G.8 Debarment
A student may be refused permission to write a final examination in a course, on the recommendation of the department concerned and with the concurrence of the dean of the faculty, in the following circumstances:
1. The student has neglected to do a substantial proportion of the written and/or laboratory assignments in a course of which these are an essential feature.
2. The student has not officially registered in the course.

G.9 Examination Results
Students may access their final grades via MyUofC using their online Student Centre. For requests for official transcripts, see F.9 Transcripts.

G.10 Final Examination Papers
After grading, final examination answer papers are forwarded to the faculty or department office and retained for a period of one year from the end of the month the final exam period was held in. During this period students may be able to view their graded final examination papers in the faculty or department office or obtain a photocopy of their graded paper at a cost determined by the faculty or department office.

G.11 Off-Site Examinations
Students are not permitted to write a University of Calgary final examination paper at an outside centre except under very special circumstances and with the permission of the associate dean of the faculty offering the course and the Registrar. This must be substantiated by a medical certificate or other acceptable verification. Students will be responsible for invigilation fees, if any, charged by external examination centres.

H. Graduation
H.1 Applying to Graduate
All undergraduate and graduate students who expect to receive a credential must complete an Application to Graduate (whether you are attending the convocation ceremony or not). The Application to Graduate is available through the Student Centre at my.ucalgary.ca. Deadlines to apply to graduate are available at: ucalgary.ca/registrar/graduation.

There are three conferrals per year: Fall Convocation, Winter Conferral, and Spring Convocation.

<table>
<thead>
<tr>
<th>Credential requirements completed</th>
<th>Eligible Conferral</th>
</tr>
</thead>
<tbody>
<tr>
<td>By end of Summer Term</td>
<td>Fall Convocation</td>
</tr>
<tr>
<td>By end of Fall Term</td>
<td>Winter Conferral</td>
</tr>
<tr>
<td>By end of Winter Term</td>
<td>Spring Convocation</td>
</tr>
</tbody>
</table>

*There is no graduation ceremony connected with the Winter Conferral; students are invited to attend the Spring Convocation ceremony.

Students granted a letter of permission or approval for a deferred examination in the Winter Term of their graduating year are eligible to apply for Fall Convocation. Students are responsible for obtaining official transcripts and submitting them to the Office of the Registrar not later than one month before any conferral.

Students must be approved by their Faculty to be eligible to graduate and to participate in a convocation ceremony. Students who are not approved will be required to submit another Application to Graduate for a future conferral date.

H.2 Names on Parchment
The University only uses the legal name of a student on the parchment. Names are printed in upper case lettering in the following order: Given Name(s) and Surname. The use of an initial in place of a given name is not permitted. Any changes to the name currently on file with the Registrar’s Office must be supported by government issued documentation. See section B.17 (Change of Personal Information) for more information.

H.3 Parchment Information
Minors and approved concentrations and undergraduate specializations will not be indicated on degrees but will be noted on the official transcript.

H.4 Double Majors
Some degree programs permit a double major. Double major degrees will only be awarded if it is possible to obtain the degree with each of the majors. For example, a BA in Computer Science and History is permitted, whereas, a BSc in Computer Science and History would not be awarded since it is not possible to obtain a BSc in History.

H.5 Ceremony Attendance
Information regarding the convocation ceremony is available at: ucalgary.ca/registrar/graduation. Graduands must notify the Convocation Office by the deadline indicated in the Student Centre at my.ucalgary.ca, whether or not they will attend the ceremony. Seating is reserved only for those graduands who have notified the Convocation Office that they will be attending the ceremony.

Graduands who have indicated that they will not be attending the ceremony will have their degree mailed. A fee will apply.

H.6 Parchment Reprints
The University does not issue duplicate parchment; however, due to extraordinary circumstances, a replacement parchment may be issued. The Degree Reprint Form can be found online at: ucalgary.ca/registrar/student-forms. The new parchment will be marked “duplicate” with the date it was reprinted. A fee will apply.

H.7 Posthumous Degrees
With the approval of the Registrar, a degree may be awarded posthumously to a deceased student who completed a degree program or was completing the last term of their degree program. Degrees granted posthumously will be noted on the transcript of record.

H.8 Convocation
Convocation ceremonies are held in Spring and Fall terms on campus. Please refer to the Academic Schedule for dates. Students can access graduation information online at: ucalgary.ca/registrar/graduation.

H.9 Academic Dress
H.9.1 Hoods
Hoods are in accordance with the shape specified by the North American Intercollegiate Code for Bachelors’, Masters’, and Doctors’ degrees. Faculty colours or colours of a specific discipline are:
- Faculty of Arts - white*
  - BA - white
  - BCC - scarlet
  - BCS - silver grey
  - BFA - brown
  - BFS - scarlet
  - BMUS - pink
  - BSc - golden yellow

- Cumming School of Medicine
  - BCR - dark green
  - BHSc - dark green
  - DPLMD - dark green
  - MD - dark green

- Faculty of Environmental Design - russet
  - March - russet
  - MEDes - russet
  - MLA - russet
  - MPlan - russet

- Faculty of Graduate Studies - philosophy blue*
  - LLM - purple
  - MA - white
  - MBA - sapphire blue
  - MBT - golden yellow
  - MC - light blue
  - MCE - light green
  - MCS - silver grey
  - MDCS - dark green
  - MEd - light blue
  - MEng & MSc in Eng - orange
  - MFA - brown
  - MGIS - golden yellow
  - Mkin - sage green
  - MMus - pink
  - MN - apricot
  - MP - russet
  - MPP - turquoise
  - MSc - golden yellow
  - MSS - white
  - MSW - citron yellow
  - EdD - light blue
  - PhD - philosophy blue
  - BDipl - colour of discipline
  - MDipl - colour of discipline
  - PDipl - colour of discipline

- Haskayne School of Business - sapphire blue
BComm - sapphire blue
BHARM - sapphire blue

Faculty of Kinesiology - sage green*
BKin - sage green
BSc - golden yellow

Faculty of Law - purple
Faculty of Nursing - apricot
Schulich School of Engineering - orange
BSc in Eng - orange
DipSc - orange
DipSH - orange

Faculty of Science - golden yellow*
BA - white
BSc - golden yellow

Faculty of Social Work - citron yellow
Faculty of Veterinary Medicine - grey*

DVM - asphalt

Werkund School of Education - light blue
BEd - light blue
DipEd - light blue

*The scarf colour of the dean of the faculty differs from hood colours for specific degrees.

1. For the Bachelors’ and Masters’ degrees, the University of Calgary uses a black hood lined with the University colours, gold with red chevron, and trimmed with the colour indicating the subject of the degree, in a silk-like material. Those persons receiving Diplomas wear the bachelor’s hood of the faculty offering the Diploma.

2. For the PhD hood, the body is doctors’ scarlet, with a lining of gold and a chevron of scarlet with a three-inch trim at the edge (inside and out) of philosophy blue. The EdD hood conforms to the Intercollegiate Code in shape, size and colour. The trim colour is Education light blue.

3. For Honorary Doctorates of the University of Calgary (LLD) the hoods have a body in gold, lined in doctors’ scarlet with a gold chevron. The trim is a one-inch band of white silk edged with a three-inch band of scarlet velvet, the configuration follows that of the PhD hood.

4. The honorary degree Doctor of the University of Calgary (DUC) has been awarded previously. The hood is similar to the LLD hood without the white band.

**H.9.2 Headwear**

1. The headwear for Bachelors’ and Masters’ is the black mortarboard or trencher-type hat.

2. For Doctors’, the headwear is a black velvet John Knox cap or birretum.

**H.9.3 Gowns**

1. Bachelors’ and Masters’ gowns follow the black gown specified by the North American Intercollegiate Code.

2. Doctorate gowns (PhD) are doctors’ scarlet in colour with a gold yoke. The silk trim on the sleeves and front panels is of blue silk. Doctorate gowns (EdD) conform to the Intercollegiate Code in design. The normal gown for the EdD is the black gown with light blue bars on the arm.

3. Honorary Doctorate gowns are gold with a red velvet yoke. Trim on inside and outside of sleeves and the front panels is red velvet.

**H.9.4 Deans’ and Vice-Presidents’ Scarves**

The academic deans have scarves in the appropriate faculty colour with an embroidered University coat-of-arms, approximately two and one half by three and one half inches, on the left side. The vice-presidents’ scarves are of the scarlet used in the president’s gown and trimmed around the edges with the same silver braid.

**H.10 Official Degrees/Diplomas/Certificates**

H.11 Honorary Degrees
The Senate of the University of Calgary is responsible for selecting individuals to receive the University’s highest academic honour – the Honorary Doctor of Laws (LLD). Honorary degrees are conferred by the Chancellor to recognize extraordinary achievement in community, national or international service and to honour those individuals whose accomplishments are of such excellence that they provide, through example, inspiration and leadership to the graduates of the University. Contributions may have been made in any field, including the arts, business, the professions, scholarly endeavours and voluntary activities. Normally excluded from consideration are those currently holding elected office, as well as current members of the University community. For more information, contact senate@ucalgary.ca or telephone 403.220.6581.

H.12 The Order of the University of Calgary
The Order of the University of Calgary is a prestigious University award recognizing exemplary and distinguished service to the University. The award is available to any member of the University community, those currently or formerly attached to the University and to those representing the University in the community. Candidates nominated for membership in the Order may include, but are not limited to faculty, staff, students (graduate or undergraduate), volunteers and alumni. For more information, contact senate@ucalgary.ca or telephone 403.220.6581.

I. Reappraisal of Grades
The University acknowledges that there are instances when a student may wish to challenge University decisions about grades or academic policy. The following guidelines and procedures deal with those occasions. Please note that graduate students should refer to the Faculty of Graduate Studies Calendar.

I.1 General Principles
1. Students should recognize that reappraisals of term and final grades occur at the department/faculty level that originated those decisions.
2. Students should recognize that appeals of grade reappraisals and other academic decisions will be handled at the level of appeal closest to the level at which the decision was made.
3. Students must begin the reappraisal/appeal process at the appropriate level and proceed through successive levels of appeal in order, and with no omissions.
4. At every level, students should attempt, to the utmost of their ability, to present their arguments as effectively and as fully as possible. Mere dissatisfaction with a decision is not sufficient grounds for the appeal of a grade or other academic decision.
5. The General Faculties Council’s (GFC) Student Academic Appeals Committee will hear all appeals relating to academic misconduct. The GFC Student Academic Appeals Committee will hear reappraisal of grades and other academic appeals only if it can be demonstrated that there is (a) alleged bias, and/or (b) alleged unfair procedures at a lower level of appeal, and/or (c) substantial new evidence which could not have been presented at an earlier stage.
6. Students may obtain help in understanding the appeals process and in writing appeal letters from the Student Ombud Office. For more information, refer to their website: ucalgary.ca/provost/students/ombuds.

I.2 Reappraisal of Graded Term Work
A student who feels that a piece of graded term work (term paper, essay, test, etc.) has been unfairly graded, may have the paper re-graded as follows. The student shall discuss the work with the instructor within fifteen days of being notified about the mark or of the item’s return to the class. If not satisfied, the student shall immediately take the matter to the head of the department offering the course who will arrange for a reassessment of the work within the next fifteen days. Students in faculties without a departmental structure should take the matter to the dean or the associate/dean (Academic/Student Affairs) of the faculty offering the course. The result of that reassessment should be given to the student in writing.

The reappraisal of term work may cause the grade to be raised, lowered or to remain the same. There is no limit to the number of times that a student may request a reappraisal of term work.

I.2.1 Non-Disciplinary Appeals – Faculty Appeals Committee
Reappraisal of term work is generally settled at the departmental level. If the student is not satisfied with the decision and wishes to appeal, the student shall address a letter of appeal to the dean of the faculty offering the course within fifteen days of the unfavourable decision. In the letter, the student must clearly and fully state the decision being appealed, the grounds for appeal and the remedies being sought, along with any special circumstances which warrant an appeal of the reappraisal. The student should include as much written documentation as possible.

At this stage the dean, at the dean’s discretion, may attempt to resolve the situation without proceeding to the Faculty Appeals Committee. If the matter is not resolved to the student’s satisfaction, the appeal letter will be sent to the Faculty Appeals Committee.

The Faculty Appeals Committee will not hear the appeal if the appeal letter does not detail the decision being appealed, grounds for appeal and outcome sought by the student, or if the chair of the Faculty Appeals Committee decides that sufficient grounds do not exist. If the appeal is to be heard and if the student has not already received a copy, the student is advised to request from the dean’s office, a copy of the principles and procedures that govern the Faculty Appeals Committee for that faculty. These procedures will detail the composition of the committee, the right of the student to have an advocate at the hearing, how the hearing will be conducted, and other information.

The Faculty Appeals Committee will report its decision to uphold or deny the appeal in writing to the dean of the faculty, the Registrar and the appellant as quickly as possible.

I.2.2 Appeals – General Faculties Council’s Student Academic Appeals Committee
This committee hears appeals of decisions made by Faculty Appeals Committees on matters of academic concern to students. The General Faculties Council’s Committee will hear an appeal only if there is reason to believe that the Faculty Appeals Committee showed alleged bias, followed alleged unfair procedures, and/or if there is substantial new evidence which could not have been presented to a Faculty Appeals Committee. Grades obtained in courses completed by the student in the appeals process will not be considered as new evidence. Before the General Faculties Council’s Committee will accept an appeal, the chair of that committee must be satisfied that departmental and faculty appeals procedures have been fully utilized.

Students wishing to make an appeal to the GFC Student Academic Appeals Committee must do so within fifteen days of the unfavourable decision from the Faculty Appeals Committee. A letter of appeal shall be sent to the General Faculties Council’s Committee (Administration Building room 165), and must indicate the decision being appealed, the grounds for appeal (alleged bias, alleged unfair procedures and/or substantial new information) and the remedies sought by the student, together with all supporting documentation including copies of letters
demonstrating the levels of appeal that have already been utilized.

The General Faculties Council’s Committee will not hear the appeal if the chair decides that sufficient grounds do not exist.

A student whose appeal is to be heard by the General Faculties Council’s Committee is entitled to obtain from the Secretary to General Faculties Council the principles and procedures governing the General Faculties Council’s Committee. These procedures will detail the composition of the committee, the right of the student to have an assistant, how the hearing will be conducted and other information. The principles and procedures are also available on the University Secretariat website: ucalgary.ca/secretariat.

The committee will normally give fifteen days written notice of a hearing to the appellant and to the head of the academic unit against whose office the appeal is being made. Normally, the General Faculties Council’s Committee will hear an appeal within thirty days of its acceptance. The chairperson of the General Faculties Council’s Committee will convey the committee’s findings in writing to the appellant, the respondent, the Secretary to General Faculties Council and the Registrar.

For more specific information and other principles governing student academic appeals, the Secretary to General Faculties Council should be consulted.

I.3 Reappraisal of Final Grade

In the reappraisal of a final grade, the only element that will be considered is the grading of the final assessment that makes up the final mark (e.g., final examination, final project, final paper). An exception may occur when the Instructor of Record evaluates a piece of graded term work at the end of the term; that grade may also be considered in a reappraisal of final grade.

A student wishing a reappraisal of a final grade should first attempt to review the final assessment with the department or faculty offering the course. After which, the student shall obtain a Reappraisal of Final Grade form from ucalgary.ca/Registrar (under Student Forms). Students must indicate exactly what error was made in marking the final assessment and/or in computing the final grade. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected.

Students wishing a reappraisal of a final grade (excluding Law courses) must submit their request by the following dates:

Fall Term – March 1
Winter Term – June 30
Spring Intersession – August 15
Summer Term – October 15

Supplemental Examinations: 30 calendar days from the date the examination was written

For information relating to Law, Veterinary Medicine and the Cumming School of Medicine (MD) courses, please refer to the faculty section.

The reappraisal form shall be submitted to Enrollment Services, who will forward it to the department head or dean of the faculty offering the course. Reappraisals of final grades are dealt with by the head of the academic unit in consultation with members of academic staff. Normally, the department/faculty will respond to a reappraisal request within thirty calendar days of its initiation. After the reappraisal is completed, the department shall return the form to the Registrar’s Office who shall inform the student in writing of the decision.

Students should be aware that the grade being reappraised may be raised, lowered or remain the same. A student may request a reappraisal of final grade only twice in one academic year (September 1 – August 31).

J. Non-Disciplinary Academic Appeals

J.1 Non-Disciplinary Appeals – Faculty Appeals Committee

Reappraisal of term work and reappraisal of final grade are generally settled at the departmental level. If the student is not satisfied with the decision and wishes to appeal, the student shall address a letter of appeal to the Dean of the faculty offering the course within fifteen calendar days of the date of the notification providing the unfavourable decision. In the letter, the student must clearly and fully state the decision being appealed, the grounds for appeal and the remedies being sought, along with any special circumstances which warrant an appeal of the reappraisal. The student should include as much written documentation as possible.

The Dean may resolve the situation without proceeding to the Faculty Appeals Committee. If the matter is not resolved to the student’s satisfaction, the appeal letter will be sent to the Faculty Appeals Committee. The Faculty Appeals Committee will hear the appeal only if the appeal letter details the decision being appealed, the grounds for appeal and outcome sought by the student and if there are sufficient grounds to proceed with the appeal. If the appeal is to be heard, the Dean’s office will provide the student with a copy of the principles and procedures that govern the Faculty Appeals Committee for that faculty. These procedures will detail the composition of the committee, the right of the student to have an advocate at the hearing, how the hearing will be conducted, and other information.

The Faculty Appeals Committee shall report its decision to uphold or deny the appeal, in writing, to the Dean of the faculty, the Registrar and the appellant as quickly as possible.

J.3 Academic Appeals – General Faculties Council Student Academic Appeals Committee

The General Faculty Council (GFC) Student Academic Appeals Committee hears appeals of decisions made by Faculty Appeals Committees on matters of academic concern to students. The GFC Student Academic Appeals Committee will hear an appeal only if all other avenues of appeal have been exhausted prior to submitting an appeal with the GFC Student Academic Appeals Committee.

The GFC Student Academic Appeals Committee receives appeals relating to academic matters or academic misconduct (discipline). Disciplinary appeals will not be restricted by grounds at the Faculty, GFC or Board of Governors levels.

The GFC Student Academic Appeals Committee will hear non-disciplinary academic appeals (reappraisal of grade, appeal of...
required to withdraw, and other academic appeals) only if it can be demonstrated that there is alleged bias of the Faculty Appeals Committee; and/or alleged unfairness in the Faculty Appeals Committee procedures or hearing; and/or substantial new evidence that could not have been presented to the Faculty Appeals Committee. Dissatisfaction with a prior decision is not a ground for appeal.

Before the GFC Student Academic Appeals Committee will accept an appeal, a GFC Student Academic Appeals Committee Co-Chair must be satisfied that departmental and faculty appeals procedures have been fully utilized.

Students wishing to appeal non-disciplinary academic decisions to the GFC Student Academic Appeals Committee must do so within fifteen calendar days of the date on the notification providing the unfavourable decision to the Faculty Appeals Committee, unless otherwise extended by the Secretary to GFC in their absolute discretion. An appeal letter must indicate the decision being appealed, the grounds for appeal (noted above), and the remedies being sought by the student, and must include copies of decision letters from the Faculty, the Faculty Appeals Committee and any other supporting documentation. The appeal letter and supporting documentation can be mailed/dropped off to:

GFC Student Academic Appeals Committee
Office of the University Secretariat
Administration Building, Room 165
2500 University Drive NW
Calgary AB T2N 1N4

When an appeal has been lodged by a student, the Registrar shall be notified by the secretary of the GFC Student Academic Appeals Committee.

The GFC Student Academic Appeals Committee will not hear the non-disciplinary academic appeal if the co-chair decides that sufficient grounds do not exist. Academic discipline appeals will be heard.

A student whose appeal is to be heard by the GFC Student Academic Appeals Committee will be provided the principles and procedures governing the GFC Student Academic Appeals Committee. These procedures will detail the composition of the committee, the right of the student to have an assistant, how the hearing will be conducted and other information. The principles and procedures are also available on the University Secretariat website: ucalgary.ca/secretariat/student-appeals.

The committee will normally give fifteen calendar days written notice of a hearing to the appellant and to the head of the academic unit against whose office the appeal is being made. Normally, the General Faculties Council’s Committee will hear an appeal within thirty calendar days of its acceptance. The chair of the General Faculties Council’s Committee will convey the committee’s findings in writing to the appellant, the respondent, the Secretary to General Faculties Council and the Registrar.

For more specific information and other principles governing student academic appeals, the Secretary to General Faculties Council should be consulted.

J.4 Further Information about Other Appeals and Petitions to the University

It is expected that the procedures outlined above for appeals at the Faculty Council and General Faculties Council levels will be sufficient to deal with any student appeal. Students should note, that, except for cases of student discipline, as provided under Section 31(1)(a) of the Post-Secondary Learning Act, the Board of Governors does not have jurisdiction to act as an appellate body in any other matter and, specifically, there is no right to appeal a non-disciplinary decision of the GFC Student Academic Appeals Committee to the Board of Governors under the Act. Discipline, as it relates to Section 31(1) of the Act, means only academic or non-academic misconduct as defined in this Calendar and University Policy and determined by General Faculties Council.

Section 31(1)(a) of the Act states:

The General Faculties Council has general supervision of student affairs at a university and in particular, but without restricting the generality of the foregoing, the general faculties council may:

(a) subject to a right of appeal to the board, discipline students attending the University, and the power to discipline includes the power

(i) to fine students,

(ii) to suspend the right of students to attend the University or to participate in any student activities, or both, and

(iii) to expel students from the University.

The Board of Governors has approved principles and guidelines for its Student Discipline Appeal Committee to use in the consideration of discipline appeals submitted by students in accordance with the Post-Secondary Learning Act. The Student Discipline Appeal Committee is not a court of law and must not be assumed to have or exercise such authority. The decisions of the Student Discipline Appeal Committee shall be deemed to be decisions of the Board and are final and binding upon the Board.

When submitting an appeal to the Board of Governors, the appellant should ensure:

The appeal is delivered to the Secretary to the Board of Governors within fifteen calendar days of the GFC Student Academic Appeals Committee decision, in accordance with Section 31(1) of the Act, unless otherwise extended by the Secretary to the Board in their absolute discretion.

The appeal should include:

- The grounds for the appeal
- Supporting evidence
- A statement of remedy sought
- The GFC Student Academic Appeals Committee decision being appealed with respect to the case
- All relevant documents

On the call of the Chair, the Student Discipline Appeal Committee shall meet to consider and determine the appeal based on the documentary evidence submitted, and to choose from the three remedies available in the decision-making process:

- To refer the issue back to the level of the appropriate jurisdiction for a re-hearing and a new determination of the question.
- In referring the issue back, the Chair will provide appropriate instructions to rectify any procedural errors; such instructions may include a reconstitution of the Committee hearing the issue.

- To uphold the appeal or a part thereof.

This decision would be made when consideration of the GFC decision warrants a reversal of the decision appealed or a part thereof.

- To deny the appeal in whole or in part.

In the case of an appeal challenging a decision of the University body on procedural grounds such as breaches of natural justice or fairness, the Student Discipline Appeal Committee will not hear the issue back to the level of appropriate jurisdiction for a re-hearing and new determination of the question. In the case of an appeal challenging a decision in which the student is denied permission to register, the student shall not be registered while the appeal is before the Board.

For more specific information on the principles and procedures governing student discipline appeals to the Board of Governors, the University Secretariat should be consulted.

Further information is also available on the University Secretariat website: ucalgary.ca/secretariat.

J.5 Continued Registration While Under Appeal

Most students who appeal academic decisions shall be entitled to provisional registration to continue studies pending the outcome of the appeal. The student must contact the Office of the Registrar to register in courses while under appeal. All decisions with regard to an appeal shall be communicated immediately to the Registrar by the secretary of the GFC Student Academic Appeals Committee. The student is required to pay all fees. If the appeal is denied, the original date of suspension, expulsion or other academic sanction shall pertain and, in the case of suspension or expulsion, the student’s registration will be cancelled and all assessed tuition fees will be credited to the students account. The student must discontinue attending classes. If the appeal is upheld, the provisional registration will be made permanent.

Students appealing to the Board of Governors are not permitted to register while under appeal.
K. Statement on Principles of Conduct

K.1 Preamble
This statement applies to all members of the University community – including students, faculty, administrators, any category of staff, practicum supervisors, examiners, and volunteers. This statement applies in all situations where the persons are acting in their University capacities, whether or not on the University’s property. It also applies to visitors or any other persons on University property, and to persons with whom the University contracts for services.

All members of the University community have a responsibility to familiarize themselves with this Statement on Principles of Conduct and to conduct themselves accordingly.

K.2 Statement
1. The University of Calgary community has undertaken to be guided by the following statements of purpose and values:
   - To promote free inquiry and debate
   - To act as a community of scholars
   - To lead and inspire societal development
   - To respect, appreciate, and encourage diversity
   - To display care and concern for community
2. The University seeks to create and maintain a positive and productive learning and working environment as outlined in the University Code Conduct Policy (calgary, ca/policies/files/policies/code-of-conduct_1.pdf), which highlights an environment in which there is:
   - Respect for the dignity of all
   - Fair treatment of individuals
   - Respect for academic freedom
   - Respect for University Resources and the property of individuals
3. Those persons appointed by the University to positions of leadership and authority have particular responsibility, not only for their own conduct, but also for ensuring, to the extent of their authority and ability:
   - That a positive and productive learning and working environment is created and maintained
   - That conflicts and concerns are addressed in a positive, timely, reasonable, and effective manner
   - That persons within their jurisdiction are informed of their rights and responsibilities with respect to conduct
4. The University undertakes to ensure that its policies, systems, processes, and day-to-day operations foster the goals in #1 and #2 above.
5. The University encourages and undertakes to support all members of the University community in resolving conflicts and concerns in a positive, timely, reasonable, and effective manner.

K.3 Student Misconduct
A single offence of cheating, plagiarism, or other academic misconduct, on term work, tests, or final examinations, etc., may lead to disciplinary probation or a student’s suspension or expulsion from the faculty by the Dean, if it is determined that the offence warrants such action. A student is defined as any person registered at the University for credit or non-credit courses. Please note that graduate students should refer to the Faculty of Graduate Studies Calendar.

K.4 Statement of Intellectual Honesty
Intellectual honesty is the cornerstone of the development and acquisition of knowledge. Knowledge is cumulative and further advances are predicated on the contributions of others. In the normal course of scholarship, these contributions are apprehended, critically evaluated, and utilized as a foundation for further inquiry. Intellectual honesty demands that the contribution of others be acknowledged. To do less is to cheat. To pass off contributions and ideas of others as one’s own is to deprive oneself of the opportunity and challenge to learn and to participate in the scholarly process of acquisition and development of knowledge. Not only will the cheater or intellectually dishonest individual be ultimately their own victim but also the general quality of scholarly activity will be seriously undermined. It is for these reasons that the University insists on intellectual honesty in scholarship. The control of intellectual dishonesty begins with the individual’s recognition of standards of honesty expected generally and compliance with those expectations. With respect to student work in a course, it is the responsibility of the instructor to specify the academic requirements of the course.

K.5 Plagiarism/Cheating/Other Academic Misconduct

K.5.1 Definitions
1. Plagiarism – Plagiarism involves submitting or presenting work as if it were the student’s own work when it is not. Any ideas or materials taken from another source written, electronic, or oral must be fully and formally acknowledged. Plagiarism includes but is not limited to:
   - The work submitted or presented was done, in whole or in part, by an individual other than the one submitting or presenting the work (this includes having another impersonate the student or otherwise substituting the work of another for one’s own in an examination or test),
   - Parts of the work are taken from another source without reference to the original author,
   - The whole work (e.g., an essay) is copied from another source, and/or,
   - A student submits or presents work in one course which has also been submitted in another course (although it may be completely original with that student) without the knowledge of or prior agreement of the instructor involved.

While it is recognized that scholarly work often involves reference to the ideas, data and conclusions of other scholars, intellectual honesty requires that such references be explicitly and clearly noted. Plagiarism is an extremely serious academic offence. It is recognized that clause (d) does not prevent a graduate student incorporating work previously done by them in a thesis or dissertation.

2. Cheating is an extremely serious academic offence. Cheating at tests or examinations includes but is not limited to dishonest or attempted dishonest conduct such as speaking to other candidates or communicating with them under any circumstances whatsoever; bringing into the examination room any textbook, notebook, memorandum, other written material or mechanical or electronic device not authorized by the examiner; writing an examination or part of it, or consulting any person or material outside the confines of the examination room without permission to do so, or leaving answer papers exposed to view, or persistent attempts to read other students’ examination papers.

3. Other Academic Misconduct – Other academic misconduct includes, but is not limited to, tampering or attempts to tamper with examination scripts, class work, grades and/or class records; failure to abide by directions by an instructor regarding the individuality of work handed in; the acquisition, attempted acquisition, possession, and/or distribution of examination materials or information not authorized by the instructor; the impersonation of another student in an examination or other class assignment; the falsification or fabrication of clinical or laboratory reports; the non-authorized tape recording of lectures.

Any student who voluntarily and consciously aids another student in the commission of one of these offences is also guilty of academic misconduct.

K.6 Code of Conduct – University policy that outlines the University’s expectations with respect to the behaviour of Employees, Academic Staff Members, Students, Postdoctoral Scholars and Appointees.
K.5.2 Notations and Penalties

Where a Dean or designate is satisfied that a student is guilty of plagiarism, cheating or other academic misconduct, a notation of academic misconduct will be placed on the student’s university record until the student is approved for graduation. This notation is not considered a penalty; it is for internal administrative tracking purposes and does not appear on the student’s official transcript.

In addition to the notation, students may receive penalties as described below and may be required to complete an educational workshop on an aspect of academic integrity.

1. Failing Grade – A student may be given a failing grade on either course work (assignment, test etc.) or a course in which that student is found guilty of plagiarism, cheating or other academic misconduct. A failing grade will be applied in conjunction with other penalties mentioned in this section except when leniency is warranted. When leniency is warranted, a failing grade is the only penalty that will be applied. When a student is registered in a faculty other than that in which the course is given, a failing grade is the only penalty which shall be applied by the host faculty. A student may not avoid a failing grade by withdrawing from the course.

2. Disciplinary Probation – Students are entitled to proceed with their program, but only on the condition that registration will be forfeited and the student suspended or expelled, if they are found guilty of a further academic offence. A student who is placed on disciplinary probation is eligible to continue in the faculty, as per usual, after the satisfactory completion of their probationary period. This penalty shall be applied by the faculty in which the student is registered at the time of the offence and a notation of academic misconduct will be placed on the student record.

3. Suspension – Suspension takes place when a student is denied registration within a degree or other academic program for a specified period of time. A student who has been placed under suspension is conditionally eligible to reapply for admission or registration at either the end of a specified period of time or thereafter. Suspension does not imply automatic readmission; a student must satisfy the Dean and/or the faculty concerned of their eligibility for readmission. This penalty shall be applied by the faculty in which the student is registered at the time of the encouragement of their academic misconduct will be placed on the student record until graduation.

Note: If a student is guilty of plagiarism, cheating or other academic misconduct in circumstances which suggest a clear intention to deceive or otherwise commit an academic offence, the normal penalty will be either suspension or expulsion from the faculty. If there is more than a single offence, the normal penalty will be expulsion from the faculty, and in the most serious cases, expulsion from the University.

4. Expulsion – A student who is expelled from a faculty is dismissed permanently from the faculty with no right to apply for readmission to that faculty. This penalty shall be applied by the faculty in which the student is registered at the time of the offence and a notation of academic misconduct will be placed on the student record.

5. Effects of Suspension or Expulsion from a Faculty – A student suspended or expelled from a faculty normally may not apply or be considered for readmission to the University in another faculty, until at least twelve months after the end of the session in which the academic offence takes place.

6. Expulsion from the University – If, upon suspending or expelling a student from a faculty, the Dean and/or faculty determine that the severe sanction of expulsion from the University is warranted, such a recommendation may be made to the Vice-President (Academic), who may act to expel the student from the University. A notation of expulsion due to academic misconduct will appear permanently on the student transcript.

7. Credential Recission – If a Faculty determines that credential recission is warranted, the Dean (or designate) may make the recommendation to the Provost and Vice-President (Academic). The original conferring of a degree, diploma or certificate is permanently deleted from the student’s academic record. A notation of “<Degree/Diploma/Certificate> Rescinded” and the date of rescission will appear permanently on the student transcript.

K.5.3 Procedures

1. Identification of Students in Tests or Examinations – Invigilators of any tests or examinations may, when they have reason to believe that there is cause to do so, challenge any candidate to produce proof of identity either in the form of the University (I.D. card or of some acceptable equivalent (i.e., one bearing a photograph) such as the Provincial Driver’s License, Canadian Citizenship Card, Passport, etc.

If there is clear evidence that impersonation has occurred, the individual shall not be permitted to continue the examination and shall be reported immediately to the Dean of the faculty in which the course is offered or a delegate.

A student who is not able to provide acceptable proof of identity may be permitted to continue the examination provided that they undertake to provide verification of identity later. If verification is not provided, then the student will receive an “F” in the examination, and the matter will be referred to the Dean of the faculty in which the course is offered or a delegate for consideration of further disciplinary action.

2. The Responsibility of Instructors in Cases of Plagiarism, Cheating and Other Academic Misconduct – An instructor has the obligation to report immediately all suspected cases of plagiarism, cheating or other academic misconduct in their course or courses to the Dean of their faculty, or a delegate, and to the head of department or equivalent.

3. The Encouragement of the Reporting of Plagiarism, Cheating or Other Academic Misconduct – Students or other persons who consider themselves a victim of academic misconduct which amounts to plagiarism, cheating or other academic misconduct are encouraged to report such conduct to the Dean of the relevant faculty or a delegate. An individual or group of individuals making such a report must be prepared to state the alleged facts and their reasons for suspicion in writing, and to appear before the Dean, a delegate, the appropriate faculty disciplinary body, the Faculty Appeals Committee and the General Faculties Council’s Committee to Hear and Determine Student Academic Appeals.

4. The Responsibility of the Dean of the Faculty in Which the Course is Offered – The initial responsibility for dealing with cases of plagiarism, cheating or other academic misconduct lies with the Dean of the faculty offering the course in which the student is enrolled or a delegate, subject to structures for advice, recommendation or action devised by that faculty. When the student is registered in that particular faculty, any disciplinary action taken will normally not be of concern to any other faculty.

5. The Relative Responsibilities of the Faculty in Which a Student Takes a Course and the Faculty in Which They are Registered at the Time of the Offence – In cases in which a student who is accused of plagiarism, cheating or other academic misconduct is registered in a faculty other than that in which the course is given, the Dean of the faculty in which they are registered shall be advised of the incident, its circumstances, and its disposition within the host faculty, and where appropriate shall take disciplinary action within their own faculty subject to structures for advice, recommendation or action devised by that faculty. This notification shall be the responsibility of the Dean of the host faculty, or a delegate.

6. The Disposition of Cases by the Faculty in Which a Student is Registered at the Time of the Offence – In alleged cases of plagiarism, cheating or other academic misconduct, the Dean or a delegate after advising the student of the allegation and its basis and providing them with copies of any documentary evidence supporting the allegation shall interview both the instructor and the student concerned. Where they are satisfied that there is conclusive evidence that the student has committed an offence, the Dean or a delegate shall, subject to any structures for advice, recommendation or action devised by that faculty, exercise authority to place on probation, suspend or expel the student...
from the faculty in question. The probation, suspension or expulsion will be confirmed in writing to the student at their current address, the letter to include reference to faculty and University appeal procedures. In cases in which the student has admitted the offence reference shall be made to this fact in the letter.

The Registrar will be notified of the action taken. Upon receiving notification, the Registrar is empowered to withhold the issuance of a transcript or statement of grades for the student pending the expiry of the appeal period, or exhaustion of the appeal process allowed for under K.5.5.5 Disciplinary Appeals.

K.5.4 Academic Misconduct – Criminal Offence
Where there is a criminal act involved in plagiarism, cheating or other academic misconduct, e.g., theft (taking another student’s paper from their possession, or from the possession of a faculty member without permission), breaking and entering (forcibly entering an office to gain access to papers, grades or records), forgery, impersonation and conspiracy (impersonating another student by agreement and writing their paper) and other such offences under the Criminal Code of Canada, the University may take legal advice on the appropriate response and, where appropriate, refer the matter to the police, in addition to or in substitution for any action taken under these regulations by the University.

K.5.5 Disciplinary Appeals
1. Every faculty shall be required to have a Faculty Appeals Committee.
2. The Appeals Process - The student who is assessed an "F" grade for disciplinary reasons, placed on probation, suspended or expelled from a faculty, may appeal that decision to the appropriate Faculty Appeals Committee. The appeal, which must be initiated within fifteen calendar days of the date on the decision notification from the Dean (or designate), shall be in writing, addressed to the chairperson of the appropriate Faculty Appeals Committee, and shall state specifically (a) the decision which is being appealed, (b) the reasons for the appeal, (c) the remedy being sought. If a grade is being appealed, the appeal would be submitted to the Faculty Appeals Committee of the faculty offering the course. In the case of disciplinary probation, suspension or expulsion, the appeal would be submitted to the faculty in which the student is registered.

The principles applicable to an appeal to a Faculty Appeals Committee are those of fairness as outlined in the principles and procedures governing the GFC Student Academic Appeals Committee available on the University Secretariat website. It is recognized that the specific procedures used to attain fairness may vary from one faculty to another.
3. Appeal from a Faculty Appeals Committee - Where a student is unsuccessful in an appeal to a Faculty Appeals Committee, they may appeal that decision to the GFC Student Academic Appeals Committee, subject to the principles and procedures of the GFC Student Academic Appeals Committee.

K.6 Disciplinary Action for Non-Academic Misconduct
On December 11, 2014 the General Faculties Council approved a Student Non-Academic Misconduct Policy and Procedure. All non-academic misconduct will be managed under this policy effective January 1, 2015. The current policy may be found at: ucalgary.ca/conduct/policy/non-academic-misconduct-policy.

L. Integrity in Scholarly Activity
In addition to its regulations dealing with student academic misconduct, the University has a policy and procedures governing the scholarly integrity of members of the University’s faculty and persons holding postdoctoral fellowships or their equivalent. The policy and procedures are titled Integrity in Scholarly Activity and apply to both teaching and research.

L.1 Policy
The University and its members are committed both institutionally and individually to integrity in scholarly activity. Accordingly, the University has developed and implemented a policy and attendant procedures for handling cases of alleged scholarly misconduct. These are designed to recognize the differences among disciplines, to provide for fair treatment of those whose integrity is brought into question, and to protect those who set the process in motion or otherwise assist in dealing with complaints.

L.2 Scholarly Misconduct
The policy defines scholarly misconduct as including: plagiarism; fabrication or falsification of research data; conflict of scholarly interest, including suppressing the publication of the work of another scholar and improper negative reviewing of a research grant application by another scholar; and other practices that deviate significantly from those which are commonly accepted as appropriate within the scholarly communities. As well, each faculty has definitions and guidelines which are applicable to those disciplines and activities which characterize scholarly work within the faculty. In particular, the faculty guidelines deal with the retention of original data and material or products relating to scholarly activity and the authorship of published or presented work.
L.3 Summary of Procedures
Possible misconduct is to be first reported to the dean of the faculty. The dean is then responsible for assessing the report and ensuring that the prescribed procedures are followed. Two formal steps are involved, an enquiry to determine if a report warrants a full investigation followed by an investigation if warranted. At the end of an investigation, the dean is required to act on the investigating committee’s report including, according to the outcome, initiating disciplinary proceedings.

The detailed procedures contain provisions with respect to the time allowed for each stage, the make-up of the enquiry and investigating committees, the rules and procedures the committees are to follow and the manner of their reporting. Appeals of the outcome of the process are possible under the provisions of the University-Faculty Collective Agreement.

L.4 Confidentiality
The policy and procedures provide for a high degree of confidentiality throughout the process. Persons who report misconduct will not be named unless the case cannot be investigated otherwise and then only with those persons’ consent. Persons who are reported will not be named unless and until the case against them has been substantiated by thorough investigation.

L.5 Information
Information about and copies of the policy and procedures can be obtained from deans and the office of the Vice-President (Research). Copies of the faculty guidelines and definitions are available from the office of the dean of the faculty concerned or the office of the Vice-President (Research).

M. Sexual Harassment
The University of Calgary recognizes its moral and legal responsibilities to protect its students, staff and faculty against sexual harassment and has established a Sexual Harassment Policy and related procedures to deal with this serious issue.

The simple definition of sexual harassment is “unwanted sexual attention.” Any type of conduct which emphasizes the sexuality, gender or sexual orientation of an individual and creates for them an offensive, intimidating or hostile learning, working or living environment is sexual harassment. The harassment is more serious if submission or acceptance of such conduct is made either an implicit or explicit condition of an individual’s employment or academic status. Sexual harassment may take various forms. It includes but is not limited to the following: verbal abuse or threats of a sexual nature; unwelcome remarks, jokes, innuendos or taunting about a person’s sex (often linked with references to the body, attire, age or marital status of the individual); displaying pornographic, sexually offensive or derogatory pictures; unnecessary and unwelcome physical conduct such as touching, patting, pinching; unwelcome sexual invitation or requests, usually of a persistent nature; sexual assault. Gender harassment or sexism may also be one form of sexual harassment.

Sexual harassment has both males and females as its victims and perpetrators. It can occur between members of the opposite sex or of the same sex. Although sexual harassment often occurs where there is a real or perceived power imbalance, it can also occur amongst peers.

M.1 Advice and Information
Individuals with a concern regarding a possible occurrence of sexual harassment have the following mutually non-exclusive alternatives to assist them: (a) If possible, immediate personal strategies should be utilized such as informing the alleged harasser (either in person or by letter) that such behaviour is offensive and requesting an end to the perceived harassment. Frequently, this assertive stance curtails further incidents. (b) If this is not possible or productive, someone who is empowered to investigate allegations of sexual harassment should be contacted: the Sexual Harassment Advisor at 403.220.4086 or the appropriate dean or administrative equivalent who supervises the alleged harasser. In cases where physical assault has occurred, the complaint may also be lodged with Calgary Communities Against Sexual Abuse (CCASA) at 403.237.5888 or the Calgary Police at 403.266.1234. Whatever routes are taken, every effort should be made to document precisely what has transpired.

Complaints of sexual harassment do not have to enter a formal investigative and disciplinary procedure simply because an individual has chosen to speak to the Sexual Harassment Advisor. Individuals are free to simply make a report of the incident to the Advisor. These reports are useful for statistical purposes and assist in directing educational initiatives. Individuals wishing to pursue the matter can file a written complaint with the Advisor who will then attempt to effect an “informal resolution” to the problem. Informal resolutions usually involve the Advisor consulting with the two parties either individually or together. The end result must be satisfactory to all parties. If an informal resolution fails or is inappropriate, a formal hearing may be held on any written complaint of sexual harassment where there is no other negotiated or legislated procedure to pursue a complaint against the alleged offender.

Due to the nature of the issue of sexual harassment, the policy and procedures are regularly reviewed. Persons seeking information on this issue are therefore encouraged to contact the Sexual Harassment Advisor. The Advisor is presently located in the Math Sciences Building, Room 261 and may be reached by telephone at 403.220.4086. The Advisor is also available for confidential advice and assistance in dealing with other forms of discrimination and harassment.

Additional information is available on the web (ucalgary.ca/sexualharassment and ucalgary.ca/discrimination/).

N. Statements of Purpose/Support
N.1. The Use of Banned Drugs by Student Athletes
The University of Calgary Faculty of Kinesiology is unequivocally opposed to the use by student-athletes of any banned substance in contravention of the rules of the national and/or international sport federations, the International Olympic Committee (I.O.C.) or Federation International du Sport Universities. The University of Calgary Faculty of Kinesiology is equally opposed to any encouragement of the use of such substances by individuals in positions of leadership (coaches, medical practitioners, sport scientists, therapists, administrators) or by the student-athletes themselves.

The University of Calgary adheres strictly to the Drug Education and Doping Control policies and procedures as published by the Canadian Interuniversity Sport (CIS) in accordance with the Canadian Centre for Ethics in Sport (CCES). In addition to any actions which may be taken by the CIS/CCES and/or national sport governing body and in accordance with the University’s appropriate policies and procedures, the Faculty of Kinesiology, through the Dean of Kinesiology, may take action against personnel who encourage or willfully ignore the use of banned substances by student-athletes. Such action may include suspension for a stated period of time from all participation in the athletic program, indefinite suspension, or lifetime suspension.

If deemed necessary, following a substantial allegation or a positive test result with regard to a student-athlete:

I. The Athletic Director shall convene a Review Committee to deal with any matters pertaining to the use of banned drugs. This Review Committee shall consist of two representatives from the coaching and therapy staff (appointed by the Athletic Director) and the Athletic Director. The Review Committee shall meet within a period of five days after appointment and shall recommend to the Dean of the Faculty of Kinesiology:

(a) Whether or not there has been a violation of the policy related to the use of banned drugs and if so, by what athlete or staff member;
(b) The appropriate penalty or disposition, if any, to be imposed or made.

II. Penalties - Penalties that may be imposed or dispositions made for a violation may include any or more of the following:

(a) Reprimand or warning;
(b) Suspension from participation in all competition for a specified period;
(c) Ineligibility for national playoff competition;
(d) Requiring written or other undertakings;
(e) Requiring the making of procedural, structural, or other changes within the program to minimize the chance of further violations;

(f) Probation or suspension from the University.

III. The Dean of the Faculty of Kinesiology shall consider the recommendation of the Review Committee in reaching a decision.

(a) Should the penalty imposed by the Dean of Kinesiology be anything other than probation or suspension from the University (see II.(a-e)), the Dean shall advise the student-athlete in writing of the decision as expeditiously as possible. The Dean may request that the person involved appear before them to provide information. Upon being advised of the decision of the Dean, the student-athlete involved may appeal the decision to the Faculty of Kinesiology Appeals Committee. The decision of the Appeals Committee shall be final and binding.

(b) Should the penalty proposed by the Dean of Kinesiology be probation or suspension from the University (see II.(f)), the matter will proceed in accordance with the University Principles and Procedures Relating to Disciplinary Action for Non-Academic Misconduct. If the student-athlete is not registered in the Faculty of Kinesiology, the Dean of Kinesiology will recommend to the Dean of the student-athlete’s Faculty that actions proceed in accordance with these principles and procedures.

IV. Education - Every effort shall be made to provide to all coaches, student-athletes, and staff members information and counselling related to the use of banned drugs and their effects. The University of Calgary Interuniversity Athletic Program policy, procedures, and penalties related to such use shall be clearly articulated to all coaches, student-athletes, and staff members.

V. The University of Calgary Interuniversity Athletic Program does not intend to usurp the role of civil and criminal authorities with respect to the non-medical use of drugs which do not appear on the listed banned list of the international federations or the I.O.C.

N.2. Statement of Support for Persons with Life Threatening Communicable Illnesses

The University recognizes that persons suffering from life threatening communicable illnesses have a right and a responsibility to continue in their regular work or academic pursuits as long as they are capable of carrying out the duties and obligations associated with those pursuits; and recognizes that individuals who contract a life-threatening communicable illness are entitled to continue in their employment or studies provided that the health, safety and well-being of others are not endangered.

The University is guided in the application of this policy by current research findings and medical advice relevant to the individual case.

All members of the University community are urged to recognize the responsibility they have for ensuring that those with such illnesses are treated in a caring and supportive manner.

O. Student Communication and Responsibilities

The University of Calgary’s primary method to communicate with students is electronic communications. This includes email and Student Centre notifications.

University of Calgary students are provided with a UCalgary email address. Official notifications and communications from the University of Calgary will only be sent to the UCalgary email address. Students are responsible for ensuring they set up their UCalgary email prior to the start of their first term at the University of Calgary and are accountable for reading messages sent to their UCalgary email account, or posted on their Student Centre, on a regular basis to ensure important information is not missed.

Faculty of Science

Introduction
Co-operative Education and Internship are optional academic programs that provide students the opportunity to enhance their education by acquiring career-related work experience before graduation. Students gain practical experience, develop a network of contacts, and obtain a better understanding of careers in their field. This program allows students the opportunity to apply knowledge and skills developed in the classroom in a practical work environment, enhancing both the academic and employment portions of their University career.

Each four month Co-operative Education/Internship work term is registered as a Co-operative Education or Internship course. Evaluation of the Co-operative Education/Internship course/work term is a faculty responsibility and is based on successful completion of a work term report and/or assignment(s) and satisfactory work performance. Work performance is monitored by a Career Advisor and the employer.

Pattern
Students in the Co-operative Education/Internship program complete the normal academic curriculum while integrating a number of work terms into their program. Work terms and study sessions are full time and all students receive a salary while on a work term.

Co-operative Education students complete a minimum of twelve months and a maximum of twenty months of work experience (depending on Faculty/Department requirements), normally alternating periods of work and study starting and ending on an aca-

*Students may apply to Engineering Internship after October 15 but must contact the Engineering Internship Centre directly regarding admission.
**Deadline for transfer students.
***Students who do not meet the application deadline should contact Computer Science department regarding admission.

2. Academic Regulations

2.1 Admissions

Information pages describing each Co-operative Education/Internship program and application forms are available on the Career Services Co-op/Internship page (ucalgary.ca/career/co-op-internships). Information is also available at the Engineering Career Centre (EN C 205), the Haskayne School of Business Co-op Office (SH 346), the Undergraduate Science Centre (EEEL 426), and the Arts Co-op Office (SS 102). Students in Bachelor of Arts and Bachelor of Science Co-operative Education programs normally apply to Co-operative Education in the second year of their program. Applications to the Haskayne Co-op Program are accepted twice a year - on May 1st and October 1st. Direct entry students normally apply during their second year of the BComm Program; change of program and transfer students apply by May 1st of the year they apply to the business school, normally the end of their second year. Students in Schulich School of Engineering (applications accepted by October 15th) and Computer Science (applications accepted by May 1st and October 1st) Internship programs apply during third year. All students in the Faculty of Science (Ecology, Applied Chemistry and Actuarial Science) can apply during their second year by May 1st and December 1st. Students in the Faculty of Arts apply during their second year on October 15th directly through CareerLink (careerlink.ucalgary.ca/home.htm).

Students should be aware that the Career Development Workshop or equivalent is a requirement for admission. For the Faculty of Arts the pre-employment workshops are held after admission to the program.

2.2 Requirements

Students must:

- Be registered as full-time students,
- Be registered in a faculty/department offering Co-operative Education/Internship programs,
- Meet faculty/department GPA and course entrance requirements (Consult the appropriate faculty sections of this Calendar),
- Complete the Career Development Workshop or equivalent.

Note: Students entering the Haskayne School of Business are required to complete a Co-op Orientation and workshops in lieu of the Career Development Workshop.

Students applying to Co-operative Education/Internship should also be aware of the following:

1. Students must be legally permitted to work in Canada. International students must obtain a Co-op Work Permit to be eligible for work placements.
2. Students who are registered in combined degree programs can be eligible for Co-operative Education/Internship programs if one of the majors is in a faculty or department in which a Co-operative Education/Internship program is offered.
3. Students may be required to attend a personal interview with Co-operative Education/Internship and/or the faculty to decide admissibility.
4. The University reserves the right to refuse admission to a Co-operative Education/Internship program. Please refer to the application deadlines for the Co-operative Education/Internship program. Transfer students applying to the Haskayne School of Business apply to the Co-operative Education/Internship program by May 1st of the year they are applying to the Haskayne School of Business. All transfer students should complete one academic session at the University of Calgary prior to a work term.

Application Process

Students must submit a completed Co-operative Education/Internship Student Application form by the appropriate deadline date. For more information on the application process, students should contact Career Services (MSC 188), the Engineering Internship Centre (SB 149), the Haskayne School of Business Co-op Office (SH 346), the Arts Co-op Office (SS 102), or the Science Co-op/Internship Office. Incomplete applications will not be accepted.

Applications for admission are reviewed by the faculty/department/internship office/Engineering Student Centre.

Admission Appeal Procedure

Students who believe there has been an error in the assessment regarding the suitability of their admission to the program should contact the Faculty office.

No student whose application is in the appeal process will be allowed to apply for Co-operative Education/Internship positions until a formal decision on the appeal has been made.

2.3 Registration

Course Registration

Registration in Co-operative Education/Internship course(s) occurs when the student accepts a position with an organization and completes the Co-operative/Internship Work.
Co-operative Education/Internship

2.4 Course Work
Planning Work Terms and Academic Sessions

Please refer to the appropriate Faculty section in this Calendar for information on the number and scheduling of work terms.

It is the student’s responsibility to plan work terms and academic sessions in relation to course availability. The University cannot guarantee all courses will be available in all sessions.

Both Co-operative Education and Internship programs should start and end with an academic session. Students in Co-operative Education programs normally alternate between periods of work and study. Work periods can be four months or eight months (two consecutive work terms) starting in January, May and September. Students in some programs may do three consecutive work terms with permission from their department of study. Co-operative Education programs with three or four work terms have a maximum of two spring/summer work terms. Co-operative Education programs with five work terms have a maximum of two consecutive, spring/summer work terms and three summer work terms in total.

Internship programs are a minimum of twelve and a maximum of sixteen consecutive months.

Co-operative Education and Internship Courses

Each four-month Co-operative Education/Internship work term is registered as a Co-operative Education/Internship course. Co-operative Education/Internship courses are in addition to the normal requirements for a degree program.

Each work term (Co-operative Education/Internship course) is approximately four months in duration beginning either in January, May or September. Courses are graded on a Completed Requirements/Fail (CR/F) basis. This grade is not included in the calculation of the grade point average.

Once students are registered in a Co-operative Education/Internship course (i.e., have accepted a placement), they are committed and expected to fulfill their commitment. If the placement accepted is for more than one-four-month work term, students are registered in the appropriate number of Co-operative Education/Internship courses and are committed to complete all of them. Students cannot withdraw from a Co-operative Education/Internship course (or leave a work term/placement) without permission from both Co-operative Education/Internship Program Office and the Faculty. (See 2.8 Withdrawal Policies.)

Transfer Credit for Co-operative Education/Internship Courses

Students transferring to the University of Calgary from another university, or transferring from one program to another, should consult with the faculty regarding possible transfer credits. To receive a degree with “Co-operative Education” students must complete a minimum of one four-month work term under the University of Calgary. Some faculties may require more than the minimum of one work term and each faculty determines the maximum number of transfer credits allowed.

To receive a degree with “Internship” designation students must complete a minimum of twelve consecutive months of work while enrolled in the University of Calgary Engineering Internship Program.

Credit by Special Assessment

Students who feel that they have previous relevant work experience and who wish to receive formal university credit may apply for credit “by special assessment”. Students should consult THEIR FACULTY CO-OPERATIVE EDUCATION INTERNSHIP OFFICE for instructions regarding the application and review process. Prior work experience will be evaluated by the faculty in which the student is registered. Students granted credit “by special assessment” will be assessed the course fees for Co-operative Education/Internship courses. Note: special assessment is not available for the Engineering Internship Program.

2.5 Student Standing
Co-operative Education/Internship Course Evaluation

Successful completion (Completed Requirements) of a co-operative education course/work term requires submission of work term reports and/or assignments and satisfactory job performance.

Work Term Report: The work term report is evaluated by a faculty member. Provided that it meets established criteria, the report is marked a Pass. If it is sub-standard, a Re-submit is required.

Failure to meet the work term report requirements results in a grade of “F” for the course. The student will be required to withdraw from the program and will not receive Co-operative Education/Internship designation.

Work Term Assignments: Students in the Schulich School of Engineering will be expected to complete assignments as part of their internship courses. Work term assignments must be submitted by specified dates, and will be evaluated by staff in the Schulich School of Engineering. Provided an assignment meets established criteria, the assignment will be deemed to be a Pass. If an assignment is sub-standard, a re-submit is required. Students should attempt to submit all course components by their respective specified deadlines. All required coursework must be submitted no later than the date on which classes end in the term as specified in the Academic Schedule.

All coursework submitted within a 5 day period following the due date when classes end will only be accepted if an extension was previously approved by the course instructor. A Deferral of Term Work form must be completed, should an extension of time be sought for completion of any term work beyond the 5 day period. Deferrals may only be granted at the discretion of the Dean of the Schulich School of Engineering, and will normally not exceed thirty days. In the event a student receives permission from the Dean to defer their coursework, they will receive a final grade of incomplete (I) during the deferment period. If all course components are not satisfactorily completed and submitted prior to the end of the deferment period, the final course grade will be changed to a fail (F). A final grade of “F” in an internship course will prevent students from registering in subsequent internship courses. If eligible, the student may choose to repeat the course in the subsequent term. Not clearing a final grade of “F” from an Internship (INTE) course will result in the student being removed from the internship program, and may result in the student being withdrawn from the Engineering Internship Program. Note that a student may only receive a final grade of “F” once during the internship period and still remain in the internship program.

Job Performance: The student’s job performance is assessed by the employer. Performance evaluations are conducted periodically during the internship and submitted to the Internship Office. An Advisor monitors performance feedback to determine whether any follow-up action is required.

If a student receives unsatisfactory performance or is asked to leave employment by an employer, the University will investigate the situation and determine the appropriate grade. If a student is asked to leave employment for “just cause” a grade of “F” will be given and the student will be required to withdraw from the Co-operative Education/Internship program. The student will not receive Co-operative Education/Internship designation and a permanent notation will be placed on the transcript of record that the student was required to withdraw from the Co-operative Education/Internship program.
Maintenance Requirements
Students must meet minimum GPA and course requirements established by faculty and maintain full-time status on academic sessions. Students who do not meet these requirements will be required to withdraw from the Co-operative Education/Internship program.

2.6 Graduation
Students who successfully complete the Co-operative Education/Internship program as required by the faculty in which they are registered will receive Co-operative Education or Internship designation on their transcripts and degree parchment.

2.7 Fees and Expenses
Admission fee: $50.00
Course fees are assessed for each Co-operative Education/Internship course at the time that the course is registered. Fees are payable on the normal fee deadlines. For more information refer to the Tuition and General Fees section of the Calendar.

Co-operative Education/Internship course fees are non-refundable and are due and payable, even if the student subsequently withdraws from the course(s) or is required to withdraw from the Co-operative Education/Internship program. (See 2.8 Withdrawal Policies).

In addition to the Co-operative Education/Internship course fees, other fees including full-time Students’ Union fees will be assessed. Campus Recreation and Athletic fees are optional. Students may opt out of Health and Dental Insurance in the Fall and Winter Terms with proof of alternate coverage. Students who register for other University courses while on a work term, will be assessed other course fees on a fee per course basis. Students should refer to the Tuition and General Fees section of this Calendar for more information.

2.8 Withdrawal Policies
The Co-operative Education/Internship program strongly values the commitment that is made between students and Co-op/Internship Employers. Our withdrawal policies have been set to encourage students to be accountable for their commitments.

Students cannot withdraw from a Co-operative Education/Internship course (or leave a work term/placement) without permission from both their Co-operative Education/Internship Program Office and the faculty.

Permission is only granted in cases of serious illness, domestic affliction or for academic issues. Students who receive permission to withdraw will receive credit for completed course/work terms. They will be withdrawn from the current registered course/work term. They will also be dropped from registered course/work terms not yet started and no fees will be charged for these course/work terms.

Withdrawal with Permission
(a) Student contacts their appropriate co-operative or internship office;
(b) A University representative meets with the student and employer to investigate and try to resolve issues when feasible or appropriate and seek a resolution;
(c) When the issue meets the criteria above and cannot be resolved, faculty approval can be given for the student to withdraw without penalty.

Withdrawal without Permission
Students who leave a work term (withdraw from a Co-operative Education or Internship course) without permission will be assigned a grade of “F” on the course and will be dropped from subsequent courses. No fees will be charged for the subsequent courses.

In addition students will be required to withdraw from the Co-operative Education/Internship program and will not receive Co-operative Education/Internship designation, notwithstanding the fact that they had completed the minimum work term requirements for the program. A permanent notation will be placed on the transcript of record that the student was required to withdraw from the Co-operative Education/Internship program.
Tuition and General Fees

The following are the approved tuition and general fees for the University of Calgary. The University reserves the right to change fees without notice. Changes to fees will be reflected in this Calendar. This is considered the official fee listing and will be used for all fee assessments and appeal considerations.

P.1 Undergraduate and Graduate Fees

Tuition and General Fees (2018 - 2019)

For more information, see below.

P.1.1 Undergraduate Tuition and General Fees

See the Undergraduate Tuition and General Fees Chart.

P.1.2 Graduate Tuition and General Fees

Graduate students are assessed tuition and general fees as listed below. Refer to the Academic Schedule for payment deadlines or consult with the Faculty of Graduate Studies regarding payment plans.

Thesis-Based Students

Students in a thesis-based degree (master’s or doctoral) program are assessed annual tuition fees. All tuition fees are pro-rated over four terms: one-third in Fall, one-third in Winter, one-sixth in Spring and one-sixth in Summer.

Students in thesis-based master’s programs (excluding MBA) are assessed tuition fees for the first year. After the first year, annual continuing fees will apply. Students in the thesis-based MBA program are assessed tuition fees in both the first and second years. After the second year, continuing fees will apply (see P.1.2.1 Graduate Program-Specific Fees).

Students in Doctor of Philosophy programs are assessed tuition fees until the term immediately following admission to candidacy (Spring/Summer are counted as one term). For information on admission to candidacy, see section K. (Candidacy) of the Graduate Studies Calendar. In all subsequent years, students will be assessed annual continuing fees.

The tuition fees below are the annual rates and apply to all thesis-based programs except for those specified in P.1.2.1 Graduate Program-Specific Fees.

Please note that differential fees may be assessed for courses offered by certain faculties or programs. All students who take these courses are required to pay the differential fee. Students in thesis programs who take courses with differential fee assessments will be required to pay the differential fee assessment in addition to their regular full or continuing fees.

Course-Based Students

Students in most course-based master’s programs pay tuition fees on a per course basis. Students in course-based programs are assessed tuition fees by course, based on the level of the course; therefore, undergraduate students taking a graduate-level course (600 or above) will pay the Graduate Studies course fee. Graduate students in course-based programs will take an undergraduate-level course will pay the undergraduate course fee.

Some programs may charge additional program fees, refer to the Program-Specific Fee table.

Please note that differential fees may be assessed for courses offered by certain faculties or programs. All students who take these courses are required to pay the differential fee. Students in thesis programs who take courses with differential fee assessments will be required to pay the differential fee assessment in addition to their regular full or continuing fees (with the exception of Haskayne PhD students).

The fees below apply to all course-based programs except for those specified in P.1.2.1 Graduate Program-Specific Fees.

### P.1.2.2 Graduate Fee Regulations

#### Transfers between Course-based and Thesis-based Master's Programs

Students transferring from a thesis-based route to a course-based route within a program will be assessed according to the tuition regulations for course-based programs from the first term of registration in the course-based program.

Students who have completed fewer than 18 units in a course-based route will be assessed full fees for one year from the date of transfer to a thesis route within the program.

Annual continuing fees will be assessed for subsequent years. Students who complete 18 units or more in a course-based route will be assessed annual continuing fees from the date of transfer into a thesis-based route within the program.

#### Courses Taken Extra-to-Program

Students in a thesis-based or a course-based program who wish to take a course that is extra to their degree program will be assessed a regular course fee in addition to the regular graduate tuition assessment. For more information, see D.1 Registration in the Graduate Studies Calendar.

#### Late Charges

Students who do not register by the posted deadline will be assessed a late registration fee of $60.00.

Students who make course changes (i.e., additions or substitutions) after the posted deadline will be assessed a fee of $60.00 for each Change of Registration form.

### Leaders in Medicine

Leaders in Medicine students are permitted to register in both the MD and the graduate program simultaneously for one term for the purpose of taking the final examination without graduate fees being assessed.

### Academic Staff, Post-doctoral Fellows and Visiting Scholars (Graduate Studies)

Academic Staff, Post-doctoral Fellows and Visiting Scholars (not to be interpreted as visiting students) are eligible to audit courses without payment of fees, and are not required to seek admission to the University, but must obtain written permission from the instructor of the course on a “Permission to Audit” form obtainable online.
from the Office of the Registrar (ucalgary.ca/registrar/student-forms). Such audits will not be recorded on an official transcript. Academic staff and visiting scholars who wish to have an audit course recorded on an official transcript must pay the regular audit course fees.

P.1.2.3 Health and Dental Insurance
Each student is responsible for their own basic health-care coverage and must be enrolled in a provincial health plan or its equivalent. The Graduate Student Association arranges an extended health and dental benefit plan which is compulsory for full-time students unless proof of alternative coverage (i.e., Blue Cross, Clarica), with their name and UCID on it, is submitted to the GSA online (gsa.ucalgary.ca/optingout) or in person (MacKinnie Tower, Room 214) before the fee payment deadline. Family Coverage must be applied for before the fee deadline. Part-time students are automatically excluded from the Health and Dental Plan, but may apply to the GSA to purchase this coverage. Application must be made before the fee payment deadline.

P.1.2.4 Donations
The Graduate Bursary Donation is an optional $10.00 per year for full- and part-time graduate students.

Students who wish to opt-out must do so in writing through the Faculty of Graduate Studies before the Fee Payment deadline of your Annual Registration by emailing graduate@ucalgary.ca.

P.1.3 Audit Fees
See Audit Fees chart.

P.1.4 Undergraduate Co-operative Education/Internship Course Fees
A non-refundable fee of $50.00 is payable upon admission to the Co-operative Education or Internship program. Students will see this charge in their online Student Centre.

Full-time Co-operative Education/Internship students are required to pay Students’ Union fees and Student Health and Dental Plan fees. Campus Recreation, Athletic, UPass and Student Services fees are not charged; however, if the student concurrently registers in other University of Calgary courses, all compulsory general fees will be charged. Co-operative Education/Internship fees are non-refundable once the student has registered in the course.

P.1.5 Off-Campus Fees
Tuition Fees for off-campus credit courses will be assessed at the time of registration in the course(s).

General fees for off-campus courses will be assessed at the Co-op/Internship rate as outlined in the chart here: P.1.1 Undergraduate Tuition and General Fees.

Off-campus students who wish to obtain the UPass, may do so by contacting Enrolment Services.

P.1.6 Exchange Students
The amount of tuition fees assessed and the institution to which fees are to be paid are determined by the Exchange agreement that is in effect at the time of the commencement of the program.

University of Calgary outgoing undergraduate exchange students will automatically be opted out of the Student Health and Dental Plan. To opt into the plan, students must complete the appropriate opt-in form available from the Student Health and Dental Plans Office or from their exchange co-ordinator. Students will automatically be assessed the Bursary Fund donation and if they wish to opt out, must complete the opt-out form available in the Student Centre.

INCOMING Exchange students will not be automatically assessed for either the Student Health and Dental Plans Office to inquire about insurance options.

Inquiries regarding assessments should be directed to the Exchange student advisors in Enrolment Services.

P.1.7 Visiting Students
Visiting students who take courses are assessed general fees and tuition fees on a per course basis.

Visiting student researchers are assessed campus recreation, student services fee and A&D insurance (graduate students only) each term. See A.3 Admission Categories in the Graduate Calendar for further information.

P.1.8 International Students
Students who are not Canadian citizens or permanent residents of Canada are required to pay a differential fee in addition to the international tuition fee.

Canadian student status includes: a) Canadian Citizens; b) Permanent Residents; c) conventional refugees.

International students who are dependents of foreign Consular officials will be assessed fees at the Canadian student rates.

International students whose immigration status changes will be required to provide proof of the new status before a change in fee assessment will be made. Students must provide a signed copy of their permanent residence papers or citizenship papers to enrolment services or the Faculty of Graduate Studies prior to the fee payment deadline for term. Requests received after the fee payment deadline will take effect during the next academic term in which the student is registered.

For 2018/19 the base international tuition fee for a 3 unit course at the undergraduate level: $611.28; graduate level: $811.32.

Note: Applicants who are in Canada on a Work Permit or dependents of persons on a Work Permit are required to pay international fees, unless the dependents are Canadians or Permanent Residents.

P.1.9 Senior Citizens
The University of Calgary waives tuition fees related only to undergraduate, bachelor’s level courses for senior citizens. The senior citizen must be 65 years of age or older by the fee deadline for the term they are registered in. Students are still responsible for the appropriate application fee and any mandatory supplementary course fees (if applicable).

Students’ Union, Campus Recreation, Athletic and Student Services fees are waived; however, if senior citizens wish to use any of these services, they may pay the required fees. Any senior citizens who register as full-time students will be assessed the Students’ Union Bursary, as well as the Health and Dental Plan fees and must opt out using forms available at Enrolment Services (https://www.mystudentplan.ca/ucalgary/en/home).

P.1.10 Mandatory Supplementary Fees for Courses
Course supplementary fees may be charged to students for materials or services associated with particular courses or sections of courses. Students will be notified of the additional fees in one of two ways: (1) fees are viewable under Class Notes in the Student Centre; or (2) once registered in a class with a supplementary fee, the fee will be indicated in the Finances section of the Student Centre. Departments/instructors are not permitted to charge mandatory supplementary course fees which are not assessed by the Registrar’s Office. Departments may charge students a laboratory breakage fee when appropriate. The laboratory breakage.

</tr>
</thead>
<tbody>
<tr>
<td>Audit fee rates per 3 units:</td>
</tr>
<tr>
<td>Undergraduate-level (except MD and JD) Canadian Students</td>
</tr>
<tr>
<td>$ 269.31</td>
</tr>
</tbody>
</table>

In addition to the tuition fees, students auditing courses must pay appropriate general fees as indicated in the fee chart. For courses with a differential fee assessment (e.g., MBA courses) a student who audits a course will be assessed half the current course fee and half the current differential fee.
fee should be approved by the Dean (or designate) and listed in the course outline.

Mandatory supplementary fees for courses are due by tuition fees payment deadline. In most cases, they are non-refundable after the last day to drop a course for the term(s); however, some courses may have earlier deadlines for refunds. When an earlier date is used it will be listed in the Class Notes section of the course schedule and on the faculty/department website.

The following general principles apply to course supplementary fees:

1. Tuition fees should provide for credit instruction, which includes the following:
   a. Evaluation of work/performance which includes practicums, marking of papers, examinations and other assignments.
   b. Laboratories which include laboratory assistance or supervision, laboratory materials or supplies.
   c. Resources to support instruction. This includes, but is not limited to materials or services required as a result of the method of teaching used by the instructor, classroom audio visual equipment, models for art classes, practice rooms, films and videotapes used for instructional purposes, course outlines, etc.
   d. Library facilities and related basic services.

2. Mandatory supplementary fees may be considered for special materials or services not included under general principle #1, if deemed necessary for the successful completion of the course as approved by the Provost & Vice-President (Academic).

3. Optional supplementary costs are those the student has the option of obtaining from a variety of sources. Examples include but are not limited to art supplies, laboratory coats, goggles, project materials, medical scrubs.

Off-campus courses may be exempt from these principles as needed to accommodate different course structures. Questions regarding mandatory supplementary fees can be directed to the department initiating the fee.

**P.1.11 Haskayne School of Business Fee**

Commerce courses at the 200, 300, 400 and 500 level (excluding Tourism Management) will be assessed a tuition differential fee of $238.83 per 3 units in addition to tuition fees. Continuing students admitted to the Haskayne School of Business prior to Fall 2011 are exempt from paying the tuition differential fee.

**P.1.12 Faculty of Law**

In addition to tuition and general fees, there is a mandatory $75.00 per term Law Career Services Fee for all Law students. Tuition fees for the Faculty of Law are assessed on a per-course basis. JD students should refer to the Undergraduate Tuition and General Fees chart.

Non-JD students, including those in a graduate program in the Faculty of Law who register in a JD course, must also pay the law program differential portion of the tuition fees.

International students pay a visa differential in addition to the international student tuition and general fees.

**P.1.13 Faculty of Nursing**

Students admitted to the University of Calgary nursing program at Medicine Hat College campus are assessed by, and pay fees to, the University of Calgary.

**P.1.14 Postgraduate Medical Education**

A tuition fee of $485.23 per term, to a maximum of $970.46 over a 12-month period, will be charged to all residents/fellows enrolled in postgraduate medical education based on the number of months active in the program.

The above fees will be assessed at the time of registration. Fees will be waived on the basis of a reciprocity for Canadian medical school residents taking electives through the Cumming School of Medicine. Residents/fellows will be sent a confirmation of their fee assessment with the fee payment deadline noted on the assessment. All fees are payable to the University of Calgary. See http://ucalgary.ca/registrar/finances for payment options.

**P.1.15 Schulich School of Engineering**

Full-time Engineering Students pay a mandatory $10.00 fee per term for the Engineering Students’ Society.

**P.1.16 Faculty of Social Work (Edmonton and Lethbridge Divisions)**

Students who are admitted to the University of Calgary’s Faculty of Social Work program but are attending the University of Lethbridge or the University of Alberta campus will be assessed University of Calgary tuition fees. Students will also be assessed the student donation, but can opt out of this fee by completing the online Change of Donation form. Students are also automatically enrolled in the Student Health and Dental Plan (see P.2.2). University of Calgary general fees will not be assessed; however, students will be responsible for paying the required general fees of the institution that they are attending. These fees will be visible in the online Student Service Centre and can be paid via standard University of Calgary payment options.

Inquiries regarding general fees may be directed to the program co-ordinator at the institution which the student is attending.

**P.2 General Fees**

**P.2.1 Students' Union (SU) Fees**

Undergraduate students (excluding Medicine - MD) are required to pay Students' Union general fees each term. This is to maintain the operations of the Students' Union. In addition students pay Students' Union Ancillary Fees. This consists of eight separate fees previously approved by student referendum to support external third parties or specific SU programs. Fee amounts are directly transferred by the Students' Union to appropriate committees or third parties to administer as follows:

More information is available on the Students’ Union’s website at https://www.su.ucalgary.ca/.

**P.2.2 Student Health and Dental Plan Fees**

All full-time undergraduate students in 9 units or more per Fall and Winter Term at the University of Calgary are automatically enrolled in the Student Health and Dental Plan when they register for classes. For the convenience of students, payments are made in two installments, September and January. The premium for each plan is assessed and charged annually; therefore the process for waiving fees for the year must be done prior to the fee deadline.

The Health Plan provides students with a comprehensive set of health insurance benefits (prescription drugs, paramedical services, such as physiotherapy, chiropractic treatment, and many other benefits). This plan is supplementary to any provincial health-care plan. The Managed Dental Plan provides students with dental coverage through a specific network of dental clinics throughout Calgary. For eligible students starting in the Fall Term, coverage begins September 1 and ends August 31. For eligible students starting in the Winter Term, coverage begins January 1 and ends August 31.

Optional family coverage (for one or both plans) is also available for an additional fee. This procedure must be completed by the fee payment deadline for the term.
If proof of comparable coverage is present-
ed to the Undergraduate Health and Dental Plan Office, prior to the opt-out deadline, students can opt-out of the Health and/or Dental Plan. The opt-out deadline is the fee payment deadline for the term. Continuing full-time students need only opt out of the plans once. An eligible student can opt back into the plan unconditionally prior to the fee deadline if every Fall Term or within 30 days of loss of comparable coverage during the year. The health and dental insurance fees are non-refundable if a student withdraws from a term.

For further details, please contact:
Undergraduate Health and Dental Plan Office (352 MacEwan Student Centre)
Telephone: 403.220.3906
Fax: 403.282.2729
Email: uofcalgaryplan@mystudentplan.ca
Website: https://www.su.ucalgary.ca/programs-services/student-services/health-dental/

P.2.3 Student Services Fee
The Student Services Fee is mandatory for all undergraduate, medicine and graduate students. Students are assessed on a per term basis for the fall and winter terms and per intersession during the summer term based on full-time or part-time status. The Student Service Fee is a comprehensive fee that covers a number of services provided to University of Calgary Students.

P.2.4 Campus Recreation and Athletic Fees
Descriptions of the Campus Recreation and Athletic programs are to be found in the Student and Campus Services section of this Calendar.

Payment of the athletic fee entitles part-time students to free admission to interuniversity athletic games.

Students completing all University of Calgary courses off-campus are not required to pay campus recreation or athletic fees. Campus recreation and athletic fees are non-refundable if a student withdraws from a term.

P.2.5 UPass (Universal Transit Pass)
In a 2002 referendum, the Students’ Union and Graduate Students’ Association members supported the introduction of the compulsory UPass program for all full-time students. The UPass program requires each full-time student attending the University of Calgary to pay a compulsory fee, per term. In return for a reduced rate transit pass.

More information can be found at: http://ucalgary.ca/unicard/upass.

Eligibility For the UPass
Full-time Students
To be eligible you must be a full-time undergraduate student registered in three courses for the Fall or Winter Terms or two courses for the Summer Term (including Spring Intersession) with at least one of the courses being on-campus, or a graduate student with full-time status (Summer). Students who are issued the UPass when their status is full-time and subsequently change their status to part-time are no longer considered eligible to use the UPass program. Students are required to return this sticker to the Parking and Transportation services counter by the posted deadline. Failure to return this sticker will result in a hold placed on the student account.

Students that change their status from part-time to full-time must wait 48 hours for the change to appear in the system before they can obtain a UPass.

Co-operative Education, Internship and Distance Education Students
Co-operative education, internship and distance education students are not automatically assessed the UPass fee during the terms away from campus, but are eligible to have the fee added for the applicable session(s) (Fall, Winter or Summer). To do so, make sure you are registered in a COOP or INTE course or as a distance education student; contact Enrolment Services to have the UPass fee added to your student account and after the system is updated (1-2 days), the UPass sticker may be picked up at the UPass Centre or Parking and Transportation Services. If you are registered in a campus-based course at the University of Calgary while you are on a work term or during your distance education program, you will automatically be assessed the compulsory UPass fee.

P.3 Donations
P.3.1 Bursary Funds
All students (including Open Studies and Visiting students) are being asked to make a tax deductible donation to the Student Peer Assistance Bursary Fund (undergraduate students) and the Graduate Students’ Association Bursary Fund (graduate students). Full-time undergraduate students are automatically levied $10.00 per Fall and Winter Term; part-time undergraduate students and Summer Term (including Spring Intersession) students are levied $7.00 per term. Full- and part-time graduate students are levied $10.00 per year. The monies raised will be used to provide bursaries for undergraduate and graduate students in financial need. Change or cancellation of donation forms are available at Enrolment Services (ucalgary.ca/register/student-forms) and must be submitted on or before the term fee deadline to opt out of the fee. The donation is not refundable after the deadline for payment of fees.

P.3.2 Calgary Engineering Endowment Fund
All Engineering students are being asked to make a tax deductible donation to the Calgary Engineering Endowment Fund, Full- and part-time undergraduate students (excluding Open Studies and Diploma students) are automatically levied $25.00 per Fall and Winter Terms. The monies which are raised will be put into an endowment fund with the interest being used towards improving the Engineering undergraduate program. The donation is not refundable after the deadline for payment of fees. Change or cancellation of donation forms are available at the Schulich School of Engineering Office and Enrolment Services or online at ucalgary.ca/registry/student-forms and must be submitted on or before the term fee deadline to opt out of the fee.

P.4 Fee Regulations
P.4.1 Payment of Fees
Fees are due by the fee payment deadline specified for each term. Consult the Academic Schedule for fee payment deadline information. Students who are receiving government student assistant must have their student loan confirmed in their Student Centre by the fee payment deadline to avoid interest charges.

Note: Some courses may have earlier payment deadlines or drop restrictions. These are noted in the Class Notes section of the Schedule of Classes.

P.4.2 Method of Payment
Students may only pay their fees through online banking, International fund transfer, cheque, money order and bank draft. Cheque, debit and bank drafts payments may be made in person by visiting Enrolment Services.

For detailed information on how to pay fees visit: www.ucalgary.ca/registrar/finances/tuition-fees/pay-your-fees.

If fees are to be paid from government student loans, the University of Calgary must confirm funding prior to the fee payment deadline. Student loans will be confirmed electronically with a pre-approved remittance amount. A remittance amount is paid directly to the University toward the student account. No interest accrues if payment is received within 30 days of the fee deadline. Payments received after 30 days are subject to late interest from the term fee deadline. Students are responsible for any amount outstanding in excess of the remittance amount or if loan funding is declined.

Students are responsible for all fees assessed by the University of Calgary and affiliates. The University of Calgary will not withdraw students from their current course registrations for non-payment or non-attendance.

P.4.2.1 Third-Party Sponsors
Sponsored students are students who have their education funded by a third party, such as a company, agency or foreign government. If fees are paid by a third-party, students will need to submit a sponsorship letter to Student Receivables prior to the term fee payment deadline. Sponsorship letters must be renewed once per year, usually in September.

For more information on paying fees by a sponsorship visit www.ucalgary.ca/registrar/finances/tuition-fees/sponsors.
P.4.3 Late Payment of Fees
Students whose fees are not paid by the term fee deadlines and who have not confirmed financial assistance will accrue interest on the outstanding balance at the rate of 1 per cent per month. Interest is calculated on the daily outstanding balance of $75.00 or more and is not compounded.

Students with an outstanding balance will have a hold placed on their record and services will be restricted (see B.3 Withholds). Students will receive email messages to their ucalgary.ca email address on a monthly basis if there is an outstanding balance. Interest rates are subject to change without prior notice.

For more information visit ucalgary.ca/registrar/finances/tuition-fees/late-fees-and-payment-issues.

P.4.4 Delinquent Student Accounts
Any current or former student with an overdue debt to the University of Calgary, including any administrative department, the Students' Union or the Graduate Students' Association, will not be allowed to register, will not receive transcripts of grades or parchments at graduation and may also be denied access to other University services until the outstanding account is settled in full, or in exceptional circumstances an acceptable payment arrangement is made. Delinquent student accounts that are 120 days past due, will receive a final notice in the mail and the balance will be forwarded to an external collection agency.

Students are encouraged to consult with Enrolment Services if they are having difficulty meeting their financial obligations.

P.4.5 Fee Refunds
Tuition or general fee refunds will be made for courses dropped up to and including the course drop deadline as outlined in the Academic Schedule. If a credit balance for the term remains on your account, you can request a refund through the Student Centre.

Student loan or a scholarship recipients will be reviewed prior to refunds being issued to ensure the refund is in alignment with student loan or scholarship regulations.

After the course drop deadline no refund of any tuition or general fees will be made.

Graduate thesis-based students who withdraw from individual courses will not have any changes made to their fee assessment for the year.

Graduate thesis-based students who withdraw from program will have tuition fees assessed to the end of the term in which they withdraw. If the student withdraws from program before the fee payment deadline, the tuition fees for that term will be refunded.

For more information visit ucalgary.ca/registrar/finances/tuition-fees/refunds.

The University of Calgary supports students through scholarships, bursaries and awards and participates in government student loan programs. Programs are available to recognize outstanding achievement, community service and leadership and provide financial support to students in need. Students are encouraged to develop a plan for financing the costs of university from their first term through to the completion of their program. To access financial assistance, apply for awards and government student loans before the start of the academic year and be aware of the application deadlines for awards and government student loans. Although each student’s needs and resources differ, the University provides a list of general fees and expenses. Refer to the “Tuition and General Fees” section in this Calendar for details.

Q.1 Awards for Undergraduate Students
Q.1.1 Types of Awards and Requirements
Scholarship: Offered in recognition of academic standing. To be considered for a scholarship, a student must normally present a minimum GPA of 3.20.
Bursary: Offered on the basis of clearly demonstrated financial need and satisfactory academic achievement. To be considered for a bursary, a student must present a minimum GPA of 2.60 and complete the financial information section of the awards application.

Competitive Award: Requires the submission of an online awards application. Academic standing and other criteria such as financial need, field of study, extra-curricular activities and contribution to community and/or campus life may be considered. Competitive awards require applicants to have completed a minimum of 24 units (4.0 full-course equivalents) over the previous Fall and Winter Terms at the University of Calgary. No awards application is required. The faculty or department recommends recipients to the Undergraduate Awards. Nominated awards require students to have completed a minimum of 24 units (4.0 full-course equivalents) over the previous Fall and Winter Terms at the University of Calgary. 

Nominated Award: No awards application is required. The faculty or department recommends recipients to the Undergraduate Awards. Nominated awards require students to have completed a minimum of 24 units (4.0 full-course equivalents) over the previous Fall and Winter Terms at the University of Calgary.

Q.1.2 Awards Application Deadline
High School Prestige Awards Deadline

Medical Elective Awards
April 1
Faculty of Law Awards
May 1
Undergraduate Awards for Continuing Students
August 1
Cumming School of Medicine Awards
August 10
Transfer Awards
October 1

Q.1.3 Awards Application Procedure
The Online Award application is available through my.ucalgary.ca and must be submitted by the respective deadlines. Applying for admission will give access to apply for awards. Admission to the University of Calgary is not required before applying for awards.

Q.1.4 Award Payment Information
For most award competitions, the award funds are split into two equal payments over Fall and Winter Terms and are automatically applied to outstanding tuition and fees. Excess award funds are processed in October (Fall Term) and in February (Winter Term) by direct deposit to the recipient’s bank account. With the exception of certain prizes and scholarships for graduating students, or if otherwise stated in the award conditions, payment of awards is contingent upon recipients maintaining full-time enrolment at the University of Calgary through the upcoming Fall and Winter Terms. Exceptions to these registration requirements are made for students participating in official exchanges and term abroad programs where tuition is paid to the University of Calgary.

Payment of tuition and fees is normally the first charge against undergraduate awards. Award recipients must provide their banking information so excess award funds can be electronically deposited. This must be completed and updated through my.ucalgary.ca. Students who do not update or provide electronic banking information will experience a delay in excess award funds.

Q.1.5 Policy and Regulations
Undergraduate awards are distributed equitably among the most deserving students, and adhere to the terms of reference. If a student is granted an award, the University of Calgary reserves the right to release pertinent recipient information to award donors, high schools, provincial funding bodies, University of Calgary faculty and administrative offices and public news agents. Specific information may be used by the university for promotional purposes.

Award recipients who no longer meet the program/registration/course load requirements, due to extenuating circumstances, may wish to submit an official awards appeal. Contact Undergraduate Awards directly by email: ucawards@ucalgary.ca.

Students with incomplete grades are not considered for awards. The University of Calgary assumes liability for the payment of scholarships, bursaries, prizes and other awards only to the extent that gifts from donors or returns from investments for these purposes will permit.

Q.1.6 Award Competitions
Award competitions for entering or continuing undergraduate students at the University of Calgary are listed below.

• President’s Admission Scholarships
• IB Diploma Scholarships
• University of Calgary International Entrance Scholarships and Awards

President’s Admission Scholarships

President’s Admission Scholarships are offered to students admitted to the University of Calgary directly from high school on the basis of their high school grades and who are entering the first year of an undergraduate degree program in the Fall Term. Entering students with an admission average of 95 per cent or higher are eligible to receive a President’s Admission Scholarship valued at $5,000 (non-renewable).

Students entering the International Foundations Program (IFP), formerly English for Academic Purposes (EAP), are not eligible for these scholarships, and will be considered for awards prior to entering the fall term of the first year of an undergraduate degree program. These students must contact Undergraduate Awards regarding their eligibility for awards.

Students entering the first year of an undergraduate degree program with transfer credit from either the University of Calgary or another post-secondary institution are not normally eligible for these awards.

Application: Not required. Students are considered automatically for these scholarships based on their fall IB Diploma Score. Students are responsible for providing the Admissions Office with a transcript of International Diploma grades by August 1 of the year entering the University of Calgary.

Notification: Recipients are notified by email in August. Recipients are not required to accept their award through my.ucalgary.ca.

Registration Requirement: Recipients must maintain full-time enrolment through the upcoming Fall and Winter Terms. Spring and summer courses are not used to reduce registration requirements.

University of Calgary International Entrance Scholarships and Awards

International Entrance Scholarships and Awards valued at $60,000, $15,000 (renewable annually) and $10,000 (non-renewable) are offered to international students entering first year in the Fall Term in any undergraduate degree program. Students entering the International Foundations (IFP) program, formerly English for Academic Purposes (EAP), are not eligible for these awards.

Application: Not required. Students are considered automatically for these scholarships. Selection is based on the admission average to the University of Calgary.

Notification: Recipients are notified by email in late April. Recipients are not required to accept their award through my.ucalgary.ca.

Registration Requirement: Recipients must maintain full-time enrolment through the upcoming Fall and Winter Terms. Spring and summer courses are not used to reduce registration requirements.

Seymour Schulich Scholarships and Awards

Seymour Schulich Academic Excellence Scholarships and the Seymour Schulich Community Service/Entrepreneurial Awards are prestigious renewable awards offered to students applying to the University of Calgary on the basis of their high school grades and entering the first year of a Bachelor of Science (BSc) degree program in the Schulich School of Engineering in the Fall Term. Seymour Schulich Academic Excellence Scholarships are based on exceptional academic merit. Seymour Schulich Community Service/Entrepreneurial Awards are based on academic merit as well as contribution to school life, community service and/or entrepreneurial talent.

- Value: $12,400 for Calgary and area recipients; $24,800 for recipients from outside Calgary.

Eligibility: Open to high school students entering the first year in the Schulich School of Engineering in the Fall Term.

Application: Submit the High School Awards application, available October 1 through my.ucalgary.ca. In submitting this application by the early deadline of December 15 of the year prior to entering the University applicants are considered for all competitive high school awards including Chancellor’s Club Scholarships, the Seymour Schulich Academic Excellence Scholarships and the Seymour Schulich Community Service/Entrepreneurial Awards.

Reminder: As part of the process of applying for admission, the University of Calgary issues a UCID number to each prospective student. This UCID number (or student ID) is required to apply for student awards. Admission to the University of Calgary is not required before applying for awards.

Notification: Recipients are notified by email in March, and must accept their award through my.ucalgary.ca.

Registration Requirement: Recipients must maintain full-time enrolment in the Schulich School of Engineering in a minimum of 30 units (5.0 full-course equivalents) through the upcoming Fall and Winter Terms.

Payment: Award funds are split into two equal payments over Fall and Winter Terms and are automatically applied to outstanding tuition and fees.

Renewability: Seymour Schulich Academic Excellence Entrance Scholarships are renewable at $12,400 or $18,500 annually in second and third year at the University of Calgary. Renewable.

Seymour Schulich Community Service/Entrepreneurial Entrance Awards are renewable at $12,400 or $18,500 annually in second and third year at the University of Calgary. Renewable.

Seymour Schulich Community Service/Entrepreneurial Scholarship Application, available October 1 through my.ucalgary.ca. In submitting this application, the student must complete an application by the early deadline of December 15 of the year prior to entering the University applicants are considered for all competitive high school awards including Chancellor’s Club Scholarships, the Seymour Schulich Academic Excellence Scholarships and the Seymour Schulich Community Service/Entrepreneurial Awards.

Reminder: As part of the process of applying for admission, the University of Calgary issues a UCID number to each prospective student. This UCID number (or student ID) is required to apply for student awards. Admission to the University of Calgary is not required before applying for awards.

Notification: Recipients are notified by email in March, and must accept their award through my.ucalgary.ca.

Registration Requirement: Recipients must maintain full-time enrolment in the Schulich School of Engineering in a minimum of 30 units (5.0 full-course equivalents) through the upcoming Fall and Winter Terms.

Payment: Award funds are split into two equal payments over Fall and Winter Terms and are automatically applied to outstanding tuition and fees.

Renewability: Seymour Schulich Academic Excellence Entrance Scholarships are renewable at $12,400 or $18,500 annually in second and third year at the University of Calgary. Renewable.

Seymour Schulich Community Service/Entrepreneurial Entrance Awards are renewable at $12,400 or $18,500 annually in second and third year at the University of Calgary. Renewable.

Seymour Schulich Community Service/Entrepreneurial Scholarship Application, available October 1 through my.ucalgary.ca. In submitting this application, the student must provide the Schulich School of Engineering with evidence of their continued contribution to school life, community service and/or entrepreneurial activities.

- Spring and summer courses are not used to reduce course load requirements,
nor are they used in calculating the GPA required for renewal.

**Chancellor’s Club Scholarships**

Chancellor’s Club Scholarships are prestigious renewable awards offered to students applying to the University of Calgary on the basis of their high school grades and entering the first year of an undergraduate degree program in the Fall Term.

- Value: $10,000. Renewable.
- Eligibility: Open to Canadian citizens or Permanent Residents entering the first year in any undergraduate degree program in the Fall Term.
- Application: Submit the High School Awards application, available October 1, through my.ucalgary.ca. In submitting this application by the early deadline of December 15 of the year prior to entering the University, applicants are considered for all competitive high school awards including Chancellor’s Club Scholarships, Seymour Schulich Academic Excellence Scholarships, and the Leader in Health Sciences Scholarships.
- REMINDER: As part of the process of applying for admission, the University of Calgary issues a UCID number to each prospective student. This UCID number (or student ID) is required to apply for student awards. Admission to the University of Calgary is not required before applying for awards.
- Notification: Recipients are notified by email in late March, and must accept their award through my.ucalgary.ca.
- Registration Requirement: Recipients must maintain full-time enrolment in a minimum of 30 units (5.0 full-course equivalents) over the previous Fall and Winter Terms.
- Payment: Award funds are split into two equal payments over Fall and Winter Terms, and are automatically applied to outstanding tuition and fees.
- Renewability: Renewable at $10,000 in second, third and fourth year at the University of Calgary provided the student earns a minimum GPA of 3.60 on a minimum of 30 units (5.0 full-course equivalents) over the previous Fall and Winter Terms, and completes a minimum of 30 units (5.0 full-course equivalents) in the upcoming Fall and Winter Terms. Recipients must also provide Undergraduate Awards with evidence of their continued contribution to school life and/or community service.
- Spring and summer courses are not used to reduce course load requirements, nor are they used in calculating the GPA required for renewal.

**Leader in Health Sciences Scholarships**

Leader in Health Sciences Scholarships are prestigious renewable awards offered to students applying to the University of Calgary on the basis of their high school grades and who are entering the first year of the Bachelor of Health Sciences degree program in the Cumming School of Medicine in the Fall Term.

- Value: $15,000 and assured admission to the MD program upon completion of the Bachelor of Health Sciences program.
- Eligibility: Open to Canadian citizens or Permanent Residents entering the Bachelor of Health Sciences degree program in the Cumming School of Medicine in the Fall Term.
- Application: Submit the High School Awards application, available October 1 through my.ucalgary.ca. In submitting this application by the early deadline of December 15 of the year prior to entering the University, applicants are considered for all competitive high school awards including the Chancellor’s Club Scholarships, Submit the Bachelor of Health Sciences (BHSc) Supplementary Application by January 5.

**REMINDER:** As part of the process of applying for admission, the University of Calgary issues a UCID number to each prospective student. This UCID number (or student ID) is required to apply for student awards. Admission to the University of Calgary is not required before applying for awards.

**Final Deadline:** March 1, 2018.

- Students who apply between December 16, 2017 and March 1, 2018 are considered for all high school awards including the Chancellor’s Club Scholarships, Seymour Schulich Academic Excellence Scholarships, Seymour Schulich Community Service/Entrepreneurial Awards and the Leader in Health Sciences Scholarships.
- Nominated awards: No application required. Recipients are nominated by their faculties and departments.

**REMINDER:** As part of the process of applying for admission, the University of Calgary issues a UCID number to each prospective student. This UCID number (or student ID) is required to apply for student awards. Admission to the University of Calgary is not required before applying for awards.

- Notification: Recipients are notified by email at the end of August. Recipients are not required to accept their award.
- Registration Requirement(s): Recipients are required to be registered full-time at the University of Calgary for the Fall Term by August 15, 2018 and must maintain full-time enrolment through the upcoming Fall and Winter Terms.
- Payment: Award funds are split into two equal payments over Fall and Winter Terms, and are automatically applied to outstanding tuition and fees.

### Undergraduate Awards for Continuing Students

The University of Calgary offers scholarships and bursaries to students continuing in their undergraduate degree program.

Eligibility: Open to students continuing in their undergraduate degree program after successfully completing the previous Fall and Winter Terms as a full-time student at the University of Calgary. A minimum GPA of 3.20 is required for scholarships and 2.60 for bursaries. The majority of these awards...
Awards and Financial Assistance

require the completion of a minimum of 24 units (4.0 full-course equivalents) of academic course work; applicants with a verifiable permanent disability are considered for these awards upon completion of a minimum of 18 units (3.0 full-course equivalents) of academic course work.

Spring and summer courses are not used in the calculation of a scholarship average for awards purposes, nor can they be used to reduce course load requirements.

Co-op and Internship Program Students:
Co-op Program: Students in co-op programs are eligible to apply for these awards after successfully completing study terms in the previous Fall and Winter Terms as a full-time student at the University of Calgary. Co-op students who participated in a work term offered by the University of Calgary in either the previous Fall Term or Winter Term may be eligible to apply for these awards; please contact Undergraduate Awards (ucawards@ucalgary.ca) to verify eligibility requirements.

Internship Program: Effective 2017, students in internship programs are eligible to apply for these awards after successfully completing study terms in the previous Fall and Winter Terms as a full-time student at the University of Calgary. Internship students who participated in a work term offered by the University of Calgary in either the previous Fall Term or Winter Term may be eligible to apply for these awards; please contact Undergraduate Awards (ucawards@ucalgary.ca) to verify eligibility requirements.

For 2017 only: Students participating in a 12- or 16-month internship offered by the University of Calgary are eligible to apply for these awards just prior to returning to full-time study at the University of Calgary. Grades earned in the previous Fall and Winter Terms before the start of the internship are used to calculate a scholarship average.

Official Exchange Programs: University of Calgary students who participated in an official exchange program in either the previous Fall Term or Winter Term are eligible to apply for these awards. Transferable courses from the host institution are combined with those from the University of Calgary to calculate a scholarship average. Students who participated in an official exchange over both terms are not eligible.

University of Calgary students who attended another post-secondary institution in either the previous Fall Term or the previous Winter Term, and did not participate in an official exchange, are not eligible for these awards. Students entering the first year of an after-degree program are not eligible for these awards. However, these students are encouraged to apply after completing a minimum of one year of the after-degree program.

Students with a previous degree who are entering the Doctor of Veterinary Medicine (DVM) program are not eligible. DVM students should apply after completing their first year of full-time studies in the Faculty of Veterinary Medicine. See Q.1.7 Faculty of Veterinary Medicine Awards for more information.

Students with a previous degree who are enrolled in the Faculty of Veterinary Medicine (DVM) program are not eligible. MD students should apply for Faculty of Veterinary Medicine Awards. See Q.1.8 Faculty of Veterinary Medicine Awards for more information.

Students with a previous degree who are enrolled in the Doctor of Medicine (MD) program are not eligible. MD students should apply for Cumming School of Medicine Bursaries. See Q.1.9 Cumming School of Medicine Awards for more information.

Application:

• **Competitive awards:** Submit the Continuing Undergraduate Awards application, available June 1 through my.ucalgary.ca.

• **DEADLINE:** August 1

Notification: Recipients are notified by email at the end of November.

Payment: Award funds are paid automatically to a student’s outstanding tuition and fees.

• **Nominated awards:** No application required. Recipients are nominated by their faculty and department.

Notification: Recipients are notified by email at the end of July.

Payment: Award funds are split into two equal payments over Fall and Winter Terms and are applied automatically to outstanding tuition and fees.

Registration Requirement: Competitive and Nominated award recipients must maintain full-time enrolment through the upcoming Fall and Winter Terms. Exceptions may be made for students completing their degree in the upcoming academic year.

Q.1.7 Faculty of Veterinary Medicine Awards

The University of Calgary offers scholarships and bursaries to students enrolled in the Doctor of Veterinary Medicine (DVM) program in the Faculty of Veterinary Medicine.

Eligibility: Open to students entering or continuing in the Doctor of Veterinary Medicine program at the University of Calgary.

Application: Submit the Continuing Undergraduate Awards application available June 1 through my.ucalgary.ca.

DEADLINE:** August 1

Nominated awards: No application required. Recipients are nominated by the faculty.

Notification: Recipients are notified by email in July; Differential Tuition Bursary recipients are notified in August by Undergraduate Awards.

Registration Requirement: Recipients must maintain full-time enrolment in the Faculty of Veterinary Medicine. Students entering the first year of the program are eligible for nominated awards only. Students continuing in second, third or fourth year are eligible for nominated awards and competitive undergraduate awards, which require an award application.

Application: Submit the Continuing Undergraduate Awards application available June 1 through my.ucalgary.ca.

Q.1.8 Faculty of Veterinary Medicine Awards

The University of Calgary offers scholarships, awards and bursaries to students enrolled in the Doctor of Medicine (MD) program in the Cumming School of Medicine.

Students wishing to apply for the competitive Medical Elective Awards submit a separate application; refer to the “Medical Elective Awards” section in this Calendar for details.

Eligibility: Open to students entering or continuing in the Doctor of Medicine (MD) program at the University of Calgary.

Students in year two or three of the Doctor of Medicine program must be in satisfactory academic standing to be eligible for these awards.

Students entering the Bachelor of Health Sciences or Bachelor of Community
Rehabilitation program (admitted on the basis of their high school grades) are not eligible for these awards and should apply for High School Awards (refer to the “High School Awards” section of this Calendar for details).

Students continuing in the Bachelor of Health Sciences or Bachelor of Community Rehabilitation program are not eligible for these awards and should apply for Undergraduate Awards for Continuing Students (refer to the “Undergraduate Awards for Continuing Students” section of this Calendar for details).

• Application: Competitive awards: Students must submit the Cumming School of Medicine Bursaries application, available June 1 in the online Student Centre through my.ucalgary.ca.

DEADLINE: August 10

Students who complete the Medicine Bursary application are also considered for Differential Tuition bursaries, provided the applicant submits proof of all outstanding government student loans. To be eligible for a Differential Tuition Bursary, a student must be paying the differential tuition fee to the Cumming School of Medicine for the academic year in which the Differential Tuition Bursary is awarded.

Nominated awards: No application required. Recipients are nominated by the faculty.

• Notification: Recipients are notified by email for nominated awards in July; for competitive awards and Differential Tuition Bursaries at the end of August by Undergraduate Awards.

• Registration Requirement: Recipients must maintain full-time enrolment in the Doctor of Medicine program.

• Payment: Award funds are split into two equal payments over Fall and Winter Terms, and are automatically applied to outstanding tuition and fees. Award values stated as ‘tuition and fees’ do not include differential tuition fees.

Q.1.9.2 Medical Elective Awards

The University of Calgary offers awards to students enrolled in the Doctor of Medicine (MD) program in the Cumming School of Medicine who are participating in a medical elective.

• Eligibility: Open to students continuing in the Doctor of Medicine (MD) program who are participating in a medical elective approved by the Undergraduate Medical Education (UME) office.

• Application: Submit the Medical Elective Awards application, available February 1 through my.ucalgary.ca.

DEADLINE: April 1

• Notification: Recipients are notified by email in May.

• Registration Requirement(s): Recipients must maintain enrolment in the Doctor of Medicine program. Confirmation of completion or approval of the elective(s) must be received from the Office of Undergraduate Medical Education (UME) before the award payment is processed. Undergraduate Awards (ucawards@ucalgary.ca) must be advised regarding any changes to the location, date and/or discipline of the elective(s). The elective must be a minimum of two weeks in duration.

• Payment: Award funds are paid directly to the student once the Office of Undergraduate Medical Education (UME) confirms completion or approval of the elective(s).

Q.1.10 Athletic Awards

The University of Calgary offers awards to student athletes enrolled full-time who are participating on Dinos athletic teams. Student athletes may be eligible for other awards at the University of Calgary – refer to the academic award categories listed elsewhere in this Calendar.

Athletic Awards are offered annually and are subject to U Sports regulations. For further information, contact the Director of Athletics, Faculty of Kinesiology (knesinfo@ucalgary.ca).

Eligibility:

- Entering student athletes: Students entering an undergraduate degree program in the Fall Term at the University of Calgary directly from high school must have a final admission average of 80.0 per cent or greater on a minimum of 18 units of transfer credit, as calculated by the Admissions Office.
- Entering students who are officially transferring into a recognized University of Calgary undergraduate degree program from another post-secondary institution must have an official transfer GPA of 2.00 or greater, as calculated by the Admissions Office.
- Students in their first year of studies in an undergraduate degree program at the University of Calgary who do not meet either of the above two requirements may be nominated in May of year one to receive a “First Year Athletic Award.” To be eligible, a minimum GPA of 2.00 completed on at least 18 units (3.0 full-course equivalents) taken at the University of Calgary over the previous Fall and Winter Terms is required.
- Continuing student athletes: Non-entering students continuing in a recognized undergraduate program (years two, three, four, etc.) must have earned a minimum GPA of 2.00 on at least 18 units (3.0 full-course equivalents) completed at the University of Calgary over the previous Fall and Winter Terms.
- Visiting students or students attending the University of Calgary on a Letter of Permission from another university are not eligible for University of Calgary Athletic Awards.

Convocation Awards for Undergraduate Students

Convocation Awards are presented in the following categories to students who are graduating:

• Silver Medallions: Each department (or equivalent unit) awards one silver medallion
W70

Awards and Financial Assistance

to the student graduating with the highest distinction in scholarship in their program. Eligibility: For students completing their undergraduate degree program requirements with academic excellence at the University of Calgary. Each faculty and department determines its own definition of academic excellence and establishes guidelines for the selection of medallion recipients, with consideration to the following criteria:

- Grade point average
- Course load
- Minimum number of University of Calgary courses taken

Application: No application required. Students are nominated by their faculties. It is the responsibility of the University’s undergraduate Awards Office Committee in Enrolment Services to select recipients for the Governor General’s Silver Medallions, the Muriel Kovitz Prize, and the Lieutenant Governor’s Gold Medallion.

Notification: Recipients of convocation awards are notified by email at the end of May by Undergraduate Awards.

Payment: Convocation awards with a monetary value are paid by direct deposit to the students’ bank accounts at the end of June. To receive payment, award recipients must provide their banking information to the University of Calgary through my.ucalgary.ca.

Q.2 Graduate Studies

Awards

See the Faculty of Graduate Studies website. Information concerning Graduate Studies Awards can be found at: grad.ucalgary.ca/awards.

Q.3 Financial Aid

Q.3.1 Government Student Loans

The Financial Aid office facilitates the confirmation and disbursement of approved government student loans enabling students to receive their government-approved loan funding. Student loans are available to Canadian citizens or permanent residents who are studying full- or part-time in a degree-granting program. Programs not leading to a degree (such as Continuing Education programs) are not eligible for government loan funding.

Students apply for loans through their home province/territory of residence (not the province where you will be attending university) and are considered for both federal and provincial loans and a variety of grants.

Loans: are determined and awarded based on financial need. Loans remain interest free while studying full-time but must be repaid upon graduation or any break in study longer than 6 months.

Grants: are determined and awarded based on financial need and other criteria. Grant eligibility is automatically assessed with a student loan application. Grants do not have to be repaid.

Alberta Students

Alberta residents who require financial assistance to pursue post-secondary education may obtain student loans by applying online through Student Aid Alberta. Students submit one loan application and may be eligible to receive any combination of Federal loans, provincial loans and grants.

Students with questions about loan eligibility and the application process can contact Student Aid Alberta directly for more information.

Student Aid Alberta

Box 28000 Station Main
Edmonton, AB T5J 4R4
Telephone: 1-855-606-2096
Website: studentaid.alberta.ca

Out-of-Province Students

Students who reside in a province other than Alberta are eligible for government student loan funding and can apply through their home province’s office of residence. Students submit one loan application and may be eligible to receive any combination of Federal loans, provincial loans and grants.

Students with questions about loan eligibility and the application process can contact their provincial loan office directly for more information. Additional information can also be found on the CanLearn website.

National Student Loan Service Centre (NSLSC)

PO Box 4030
Mississauga, ON L5A 4M4
Telephone: 1-888-815-4514
Website: canlearn.ca

Part-Time Students

The Federal government offers loan and grant funding options for part-time students. Loans are interest bearing and can be approved to cover tuition, general fees, books and supplies (educational costs) only. Federal grants for part-time students are awarded on the basis of financial need and provide for tuition, fees, books, transportation, child care and incidentals. Visit the Federal CanLearn website for more information (canlearn.ca).

Alberta students must apply using a paper loan application and must have the University of Calgary complete one section of the application before it can be submitted to Student Aid Alberta for consideration. Visit the Student Aid Alberta website for more information and to obtain a paper application (studentaid.alberta.ca).

For all other provinces, part-time student loans may be available. Contact your provincial lender for further information.

Q.3.1.1 Loan Confirmation and Disbursements

Once approved, all students are notified of loan disbursement amounts and dates from their lender in writing. Student loan borrowers should review this information carefully to ensure that any approved loan amounts or disbursement dates conform to the University of Calgary’s published fee deadlines. Regardless of method of payment, all students must ensure they arrange to pay tuition and fees by the deadline.

At the time of confirmation, the Financial Aid Office will remit funds from the loan to pay any current and past-due fees at the time of confirmation. Students receiving multiple loan disbursements for the loan study period may have current term fees remitted from the loan to cover these educational costs. Students receiving only one loan disbursement for the loan study period may have both term fees remitted from the loan. All loan borrowers are responsible for monitoring the Study Centre when expecting a loan disbursement to ensure that all fee balances are paid in full by the fee deadline. If there are excess funds applied to a student account, a refund request form is available at ucalgary.ca/registrar/finances/tuition-fees/refunds. If there are excess funds on a student’s account and the terms of the loan agreement have been breached, the credit will be refunded to the loan provider.

Students with a confirmed loan agreement prior to the published fee deadline for that term receive an automatic 30-day fee deferral. Any outstanding balance remaining after 30 days is subject to late interest and terms in accordance with the University of Calgary fee policy (see the Tuition and General Fees section of the Calendar). Students without a confirmed loan are not eligible for a fee deferral.

Q.3.1.2 Maintaining Previous Loans

Previously borrowed full-time student loans remain interest and payment free while studying full-time, even if a student does not borrow subsequent loans. To ensure that interest-free status continues during full-time study, students must provide adequate proof of enrolment to their lenders. This is done by a) having a subsequent full-time loan confirmed by the school; or b) completing confirmation of enrolment for interest-free status completed by the school. Students who require the latter confirmation can visit http://ucalgary.ca/registrar/finances/student-loans for up to date information on how this can be requested.

Part-time students with previous Alberta student loans may reinstate their Alberta loans to interest-free status by having a paper Form B completed by Enrolment Services (MB 117).

Interest-free status can only be confirmed 30 days prior to the start of a study period (with the exception of BC (interest-free status can be confirmed 26 days prior to the start of a study period) and Ontario (interest-free status can be confirmed on the first day of the study period)). Interest-free status can only be requested for a current study period and cannot be completed retroactively.

Q.3.1.3 Loan Repayment

Student loan repayment begins six months after a borrower ceases full-time studies. Repayment is managed by the student and co-ordinated with the lender(s) who provided the student loan funding.
If a borrower is having difficulties repaying their student loans they should contact their lender(s) immediately. Borrowers may qualify for a repayment assistance plan to help them avoid defaulting on their loan repayment agreement.

**Repayment Assistance Plan (RAP)**
The Repayment Assistance Plan is provided to assist students in keeping their student loan debt at a manageable level. The plan provides students with short-term assistance if they have temporary financial challenges and long-term support if they have persistent financial challenges. Students can apply for RAP at any time during their repayment term. For more information contact the National Student Loan Service Center at 1-888-815-4514 or visit: studentaid.alberta.ca/repaying-your-loan/repayment-options/ (Alberta borrowers) or canlearn.ca/eng/after/repaymentassistance/rrp.shtml.

**Q.3.2 U.S. Student Funding**
Students who are citizens or permanent residents of the United States have several funding options while attending the University of Calgary. Students who are dual citizens of Canada and the United States are encouraged to explore opportunities through the Canada Student Loans (canlearn.ca) program first.

For more information visit our website at ucalgary.ca/Registrar/finances or email us-loans@ucalgary.ca.

**William D. Ford Federal Direct Loans**
As a Title IV eligible foreign school, University of Calgary is able to facilitate the disbursement of four types of loans under the Direct Loans Program.

- **Direct Subsidized Loans** are loans made to eligible undergraduate students who demonstrate financial need to help cover the costs of higher education at a college or career school.
- **Direct Unsubsidized Loans** are loans made to eligible undergraduate, graduate, and professional students, but in this case, the student does not have to demonstrate financial need to be eligible for the loan.
- **Parent PLUS Loans** are loans made to parents of dependent undergraduate students to help pay for education expenses not covered by other financial aid.
- **Graduate PLUS Loans** are loans made to graduate or professional students to help pay for education expenses not covered by other financial aid.

Students must first establish eligibility by completing a Free Application for Student Financial Assistance (FAFSA) on the Federal Student Aid website (fafsa.ed.gov). Once complete, students must submit a Direct Loans application to the Financial Aid Office for funding assessment and approval.

**Sallie Mae**
Students who are ineligible for Direct Loans, or who need to borrow additional funding to meet the cost of attendance can apply for a Sallie Mae Smart Option Student Loan.

For more information visit our website at ucalgary.ca/Registrar/finances.

**Veterans Affairs GI Bill**
The University of Calgary supports veterans of the US Armed Forces in obtaining their GI bill benefits while attending studies.

All programs must be approved through the Department of Veterans Affairs before a student is eligible for funding. As this process can take up to six months, VA funded students who have applied to the University of Calgary are encouraged to contact the US Financial Aid Office as soon as possible.

For more information visit our website at ucalgary.ca/Registrar/finances or contact the US Financial Aid Office at usloans@ucalgary.ca.

**Q.3.3 Student Budgeting**
For the purposes of determining financial aid eligibility, the government uses a set standard of living costs for rent, utilities, food and clothing for each month of full-time study in the loan study period. In addition, educational expenses (tuition, fees, books and supplies) are calculated for the loan study period. Resources such as savings, part-time earnings, scholarships or bursaries, parental assistance, investment income, etc. may be used in calculating loan eligibility. Many provinces have an expected student contribution (resource) amount, regardless of actual contribution. All students are expected to have a financial plan (budget) in place for covering all necessary living and educational expenses before commencing studies. It is the students’ responsibility to plan to meet all expenses not fully covered by approved student loan funding. Visit Enrolment Services (MB 117) to access a variety of budgeting tipsheets and handbooks, or visit: alis.alberta.ca/pdf/cshop/StretchYourDollars.

Any student who experiences an unexpected emergency expense or extenuating circumstance beyond their control that precludes them from meeting their pre-established financial plan while in studies should visit Enrolment Services (MB 117) to explore temporary emergency funding options, such as a Student Emergency Loan.
The International Foundations Program (IFP) focuses on students who meet the admission requirements for their University of Calgary degree faculty, except for the requirement of English language proficiency. IFP provides two admission options to the University of Calgary, as well as language and course support within the University’s academic programs, for students whose first language may not be English. These two options are outlined below.

A. Students in IFP Pathways gain direct admission to the University of Calgary’s Schulich School of Engineering, Haskayne School of Business, or Faculty of Science degree programs and complete academic English in IFP Pathways while they are studying their first year courses.

AND

B. IFP Bridging offers English language courses and support for those students who are academically qualified for admission to their faculty, with the exception of meeting the English Language Proficiency requirements. Students can take IFP Bridging courses before, during or after starting the application process for their degree program. Completion of IFP Bridging meets the University of Calgary’s English Language Proficiency requirements for admission.

Students will complete a placement test upon admission, to determine at which Tier they will begin. Depending on the placement test result, students may begin in Tier 1, 2, or 3.

Beyond IFP’s focus on helping students meet the University’s English language entry requirements, the program also offers additional academic programs as noted in R.2 IFP Program Option Chart.

R.1 Admission

Refer to A.11 English Language Proficiency in the Admission section of this Calendar for information regarding University of Calgary English Language Proficiency requirements. Refer to A.11.1 International Foundations Program in the Admission section of this Calendar for information regarding University of Calgary degree faculty, except for the requirement of English Language Proficiency. Students who meet the admission requirements for the Haskayne School of Business, Schulich School of Engineering, or Faculty of Science degree programs, see A.5 and the minimum English language proficiency scores as outlined in A.11.1, may be admitted to the first year of an undergraduate academic program concurrent with English language and support courses.

Refer to the IFP website: http://werklund.ucalgary.ca/ifp/ for a step-by-step guideline on how to apply for IFP programs.

B. IFP Bridging

Students who meet the admission requirements for a faculty as outlined in A.5, except for the requirement of English Language Proficiency, can begin IFP Bridging after their degree application has been assessed for admission, with the condition of meeting the English language requirement prior to degree start. This route is available for the Faculties of Arts, Kinesiology, Schulich School of Engineering, Sciences and Graduate Studies. Students submit their application for admission to IFP Bridging by the deadlines as listed in A.3, as well as all required documentation in support of the application. Students begin this IFP Bridging program starting in September.

Students can begin IFP Bridging before or while they are applying for their University of Calgary degree program. Students apply using the Open Studies Application for Admission and submit all required supporting documentation by the deadline. Refer to A.3.B for deadline dates. Students using this entry route can begin IFP Bridging starting in September, January or May.

Note that IFP Bridging does not guarantee admission to a degree program.

Refer to the IFP website: http://werklund.ucalgary.ca/ifp/ for a step-by-step guideline on how to apply to an IFP Bridging Program.

R.2 Program Option Chart

See the Program Structure Chart below.
Paired courses focus on language and study skills for the successful completion of Engineering subject-specific courses.

Grades for IFP Pathways courses are not used in the calculation of grade point averages for degree programs unless specifically allowed by that program. In addition, IFP Pathways courses may not be used for credit toward a degree program unless specifically allowed by that program.

Students admitted to IFP Pathways Schulich School of Engineering must complete IFP Pathways and cannot submit English language proficiency scores for early exit.

Please refer to 4.16 International Foundations Program (IFP) Pathways in the Schulich School of Engineering section of the Calendar for detailed program of studies.

R.5.1.1 IFP Pathways – MEng
See Schulich School of Engineering section of the Graduate Academic Calendar.

R.5.2 IFP Pathways - Haskayne School of Business
Students admitted to IFP Pathways with the Haskayne School of Business complete a structured curriculum that includes Bachelor of Commerce courses combined with intensive English language and academic course support.

IFP Pathways Business students take first-year Bachelor of Commerce courses within the Haskayne School of Business, concurrently with English language and support courses within IFP over a two-year period. Language and academic course support consists of 7 unpaired courses and 5 paired courses.

Unpaired courses focus on foundational academic communication skills, including reading, listening, speaking, and composition.

Paired courses focus on language and study skills for the successful completion of Business subject-specific courses.

Grades for IFP Pathways courses are not used in the calculation of grade point averages for degree programs unless specifically allowed by that program. In addition, IFP Pathways courses may not be used for credit toward a degree program unless specifically allowed by that program.

Students admitted to IFP Pathways Schulich School of Engineering must complete IFP Pathways and cannot submit English language proficiency scores for early exit.

Please refer to 4.16 International Foundations Program (IFP) Pathways in the Schulich School of Engineering section of the Calendar for detailed program of studies.

R.5.4 IFP Bridging
IFP Bridging consists of three tiers which teach advanced academic language and skills for use in university contexts. Each Tier (1-3) consists of a full term (approximately 208 hours) of instruction. Refer to R.3 for information on how students are placed in Tiers.

IFP Bridging students who have completed all required Tier 2 courses are permitted to register in up to two credit courses per term with the approval of the IFP Associate Dean.

The following chart outlines the course requirements for each Tier:

<table>
<thead>
<tr>
<th>Tier 1</th>
<th>Tier 2</th>
<th>Tier 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>IFPX 270 Academic Writing and Grammar I</td>
<td>IFPX 280 Academic Writing and Grammar II</td>
<td>IFPX 290 Academic Writing and Grammar III</td>
</tr>
<tr>
<td>IFPX 273 Reading Comprehension and Proficiency I</td>
<td>IFPX 283 Reading Comprehension and Proficiency II</td>
<td>IFPX 293 Reading Comprehension and Proficiency III</td>
</tr>
<tr>
<td>IFPX 277 Listening Comprehension and Oral Fluency I</td>
<td>IFPX 287 Listening Comprehension and Oral Fluency II</td>
<td>IFPX 297 Listening Comprehension and Oral Fluency III</td>
</tr>
</tbody>
</table>

All IFP Bridging students who achieve a grade of “C-” or better in a course will be permitted to advance to the next course in the sequence. Students who achieve a grade of “C-” or lower in any course will be required to repeat that course. Students repeating courses will not have the original grade removed from the transcript. The transcript will indicate the grade for both the first attempt and the repeated course.

Grades for IFP Bridging courses are not used in the calculation of grade point averages for degree programs unless specifically allowed by that program. In addition, IFP Bridging courses may not be used for credit.
toward a degree program unless specifically allowed by that program. Students admitted to IFP Bridging cannot submit English language proficiency scores for early exit from the program after the first day of IFP classes.

R.6 Degree Progression

A. IFP Pathways
Please refer to 4.16 in the Schulich School of Engineering section; 4.1.1.1 in the Has-kayne School of Business section; or 4.8 in the Faculty of Science of the Calendar for detailed degree progression.

B. IFP Bridging
IFP Bridging students who successfully complete all IFP Bridging Tier 3 courses with a grade of ‘C’ or better will meet the English Language Proficiency requirement for admission into most University of Calgary undergraduate programs. Completion of this program also meets the English (ELA) 30-1 (or an equivalent course) requirement for University of Calgary admissions.

See the individual faculty sections of the Calendar for detailed admission and/or degree progression information in relation to studies after completion of the IFP Bridging Program.

R.7 Withdrawal from International Foundations Program Courses
The conditions of withdrawal from all IFP Pathways and Bridging courses are outlined in section B.14 and in the individual faculty sections. Withdrawals from IFP courses do not count toward the withdrawal limit outlined in section B.14.

R.8 Faculty Information
IFP Pathways and Bridging courses are listed in the Courses of Instruction section of this Calendar under International Foundations Program. For further information on admission to any IFP program, please contact the International Foundations Program office.

Detailed University of Calgary and International Foundations Program application guides are available in a number of languages on the International Foundations Program website.

1. Can be combined with: (a) an eligible BA, BSc, BFA or BMus within the Faculty of Arts, (b) an eligible BSc (Science) from the Faculty of Science, (c) a BSc (Engineering) from the Schulich School of Engineering, or (d) a BComm from the Haskayne School of Business.
2. Can be combined with: (a) an eligible BA, BSc, BFA or BMus within the Faculty of Arts, (b) an eligible BSc (Science) from the Faculty of Science, or (c) a BSc (Engineering) from the Schulich School of Engineering.
3. Can be combined with: (a) an eligible BA, BSc within the Faculty of Arts, (b) an eligible BSc (Science) from the Faculty of Science, or (c) a BSc (Engineering) from the Schulich School of Engineering.
4. Can be combined with an eligible BA or BSc within the Faculty of Arts.
5. Specialized Concurrent Degrees offered in conjunction with the Werklund School of Education.
6. Specialized Combined Degree offered in conjunction with the Cumming School of Medicine.
7. Degree programs that co-ordinate with related diploma programs at the Southern Alberta Institute of Technology and other similar institutions.
8. Multidisciplinary degrees without a Major Field of specialization.
9. Specialized Combined Degree offered in conjunction with the Faculty of Kinesiology.

### Description of Undergraduate Degree Programs

The Faculty of Arts offers a wide spectrum of department-based, interdisciplinary and multidisciplinary undergraduate degree programs in the fine arts, the humanities and the social sciences. Except as otherwise noted below, details of the undergraduate programs summarized here are given in Sections 3 and 4 of this part of the Calendar.

### Degree Programs within the Faculty of Arts:

#### Degree Programs with a Major Field of Study

The following degree programs normally require four years of study:
- Bachelor of Arts (BA), BA (Honours)
- Bachelor of Fine Arts (BFA), BFA (Honours)
- Bachelor of Music (BMus)
- Bachelor of Science (BSc), BSc (Honours)

#### Multidisciplinary Degree Programs

The following degree program normally requires three years of study:
- Bachelor of Communication and Culture (BCC) (Multidisciplinary)

The following degree programs normally require four years of study:
- BA or BSc (Multidisciplinary) in Communication and Culture

### Multi-Institution Degrees

The following degree programs normally require two and one half years of study at the University of Calgary and two years of work on a related diploma at SAIT Polytechnic or a similar institution:
- Bachelor of Communication and Media Studies (BCMS)
- Bachelor of Film Studies (BFS)

### Combined or Concurrent Degree Programs

The following two-degree programs normally require at least five years of study:
- Within the Faculty of Arts: BA, BFA or BSc (Arts)/BA, BFA or BSc (Arts)
- With the Cumming School of Medicine: Bachelor of Community Rehabilitation (BCR) (Medicine)/BA or BSc (Psychology)
- With the Haskayne School of Business: Bachelor of Commerce (BComm)/BA (Arts) or BSc (Arts)
- With the Faculty of Kinesiology: BKin (Kinesiology)/BA (Dance)
- With the Schulich School of Engineering: BSc (Engineering)/BA (Arts) or BSc (Arts)
- With the Faculty of Science: BA or BSc (Arts)/BSc (Science)
- With the Werklund School of Education: BA (Arts - see 3.4.5 for a list of eligible majors) or BFA (Drama Education or Visual Studies) or BMus (Music Educa-

---

### Second Baccalaureate Degree Programs

Second BA, BSc, BA (Honours) or BSc (Honours) degrees with a Major Field are available following an appropriate first degree and normally take two additional years.

### Co-operative Education

For many BA, BA (Honours), BSc and BSc (Honours) Degree Programs, relevant work experience can be integrated with academic study through Co-operative Education. Degree programs with Co-op normally take at least five years.

### Arts and Science Honours Academy

The Arts and Science Honours Academy provides an enriched undergraduate experience for highly motivated students in the Faculties of Arts and Science. See the Program Details section below.

### Double Majors

BA or BSc Degrees may be awarded with two Major Fields.

### Minor Fields of Study

Students in degree programs in the Faculty of Arts are generally eligible to declare established minors from Continuing Education, Environmental Design, the Haskayne School of Business, the Cumming School of Medicine and Science as well as from Arts.

**Minor Fields offered by the Faculty of Arts:**
- African Studies
- Anthropology
- Applied Energy Economics
- Arabic Language and Muslim Cultures
- Archaeology
- Canadian Studies
- Chinese
- Communication and Media Studies
- Dance
- Development Studies
- Drama
- Earth Science
- East Asian Studies
Faculty of Arts

- Economics
- English
- French
- Film Studies
- Geography
- German
- Greek
- Greek and Roman Studies
- History
- History and Philosophy of Science
- International Indigenous Studies
- Italian Studies
- Japanese
- Latin
- Latin American Studies
- Law and Society
- Linguistics
- Medieval, Renaissance and Reformation Studies
- Museum and Heritage Studies
- Music
- Philosophy
- Political Science
- Psychology
- Religious Studies
- Russian
- Science, Technology and Society
- Security Studies
- Sociology
- Sonic Arts
- Spanish
- Speech-Language Sciences
- Urban Studies
- Visual Studies and Art History
- Women’s Studies

Graduate Programs
All graduate degree programs fall under the jurisdiction of the Faculty of Graduate Studies. In the Arts fields, the Faculty of Graduate Studies offers the following degrees:
- Master of Arts (MA)
- Master of Communication and Media Studies (MCS)
- Master of Fine Arts (MFA)
- Master of Geographic Information Systems (MGIS)
- Master of Music (MMus)
- Master of Strategic Studies (MSS)
- Master of Science (MSc)
- Doctor of Philosophy (PhD)
Details can be found in the Faculty of Graduate Studies Calendar.

2. Information for Undergraduate Students
Undergraduate student programs in the Faculty of Arts are governed by the regulations in this part and other relevant parts of the Calendar. The Associate Deans, Undergraduate Programs and Student Affairs co-ordinates program development for the Faculty as well as acting as trouble-shooter if students have academic concerns.

2.1 Advising and Program Information
For guidance on where to go for assistance, students may consult the Faculty of Arts website under arts.ucalgary.ca/undergraduate in addition to the following information.

Arts Students’ Centre
The Faculty of Arts Students’ Centre is the overall headquarters for undergraduate programs in the Faculty of Arts. The key objective of this office is to connect students with whatever academic assistance that they require.

In addition to housing the Associate Dean, Undergraduate Programs and Student Affairs and the Associate Dean for Teaching and Learning, the Arts Students’ Centre is the specific home to:
- Program advising
- The Faculty’s Co-operative Education Program
- The Arts and Science Honours Academy
- The Faculty’s Interdisciplinary Programs
- A Student Help Desk

Location: Social Sciences Room 102
Phone: 403.220.3580
Email: ascarts@ucalgary.ca
Website: arts.ucalgary.ca/undergraduate/

Degree Advisors
Degree advisors in the Arts Students’ Centre assist undergraduate students in planning their overall degree programs. For example, they provide advice for students on:
- Contextual (big-picture) questions about the Major Field and honours programs
- Graduation checks and confirmation
- Changes of Program
- Letters of Permission for study at other institutions
- Assistance with Academic Requirements in the Student Centre
- After-degree program evaluation
- Honours applications and admissions
- New student registration

Location: Social Sciences Room 102
Phone: 403.220.3580
Email: ascarts@ucalgary.ca
Website: arts.ucalgary.ca/undergraduate/

Department Offices
Subject advisors in Department Offices deal with more specific inquiries related to courses and course content within a student’s major. For example, these advisors assist students with:
- Course-related questions
- Details about the Major Field
- Details about honours programs
- Transfer-credit assessment
- Overloads
- Course time conflicts

- Credit by special assessment
- Course audits
- Initial grade appeals
- Prerequisite waivers

Note that the Faculty of Arts Students' Centre provides subject advising on the topics listed above for the interdisciplinary programs within the Faculty.

Contact information is provided for each Major and Minor program under 4. Program Details and a contact list is provided on the Faculty of Arts website: arts.ucalgary.ca.

Enrolment Services
Enrolment Services helps with registration issues and problems, fee payments, awards, financial aid, admissions questions, visiting and exchange students, open studies, transcripts, deferred exams, etc.

Location: MacKinnie Block (MB) Lobby
Phone: 1.403.210.7625
Website: ucalgary.ca/currentstudents/contact

Student Success Centre
The Student Success Centre (SSC) provides broad educational planning, learning support, assistance with academic difficulties, academic program guidance, writing support, success seminars, and peer support.

Location: Taylor Family Digital Library, 3rd Floor
Phone: 403.220.5881
Email: success@ucalgary.ca
Website: ucalgary.ca/ssc/

2.2 First-Year Options
Students are able to enter directly into the Faculty of Arts for first year. The following options are available to students:
1. Enter the Faculty of Arts and declare a degree program with a specific Major Field.
2. Enter the Faculty of Arts and declare a general or multidisciplinary degree program.
3. Enter the Faculty of Arts directly but do not declare a degree program immediately. (This is an interim measure prior to deciding on a degree program.)

Students intending to complete a degree program in the fine arts — i.e., programs in Art, Dance, Drama, or Music — should enter directly into their programs in first year so as to complete their undergraduate studies in a timely fashion. While most other degree programs in the Faculty of Arts can be completed in a four-year time frame if students declare their program or change into a new program by the end of their first year, students are advised to finalize a program as early as possible. Students must declare a program by the time they have completed 60 units (10.0 full-course equivalents) or two years of study taking the normal course load. Admission to some programs is limited for transfer students as well as high-school applicants due to high demand and/or subject to additional selection criteria. See the Admissions section of this Calendar for details.
High-school applicants who are uncertain about their programs can choose either option 2 or 3. Subject to the constraints discussed above, there is considerable flexibility for subsequent program changes within the Faculty of Arts. Students may also be eligible to change to programs in other Faculties. Students in the Faculty of Arts should be exposed to a range of academic disciplines throughout their program. Students in degree programs in Art History, Dance, Drama, Music and Visual Studies have prescribed first-year programs. All other Arts students, regardless of whether they have declared a Major, are encouraged to complete at least 15 units (2.5 full-course equivalents) from across the fields of study within the Faculty. Further guidance on first-year course selection is available from the University of Calgary Registration Guide.

3. Faculty Regulations

3.1 Admission

New applicants should refer to A.2 Undergraduate Admission in the Admissions section of this Calendar for regulations regarding University admission requirements.

Preparation

Prospective students wishing to enrol in any program of the Faculty of Arts need adequate preparation. High school matriculation or the equivalent is required and English Language Arts 30-1 as well as four other subjects, as specified in the Admissions section of this Calendar, must be included. The following additional preparation items pertain to particular programs:

1. Mathematics Preparation: Students intending to major in Archaeology, Economics, Geography or the BSc program in Psychology should note that Alberta Education Pure Mathematics 30, Mathematics 30-1 (or the equivalent from other jurisdictions) is a prerequisite for some required courses and should be completed prior to admission. Students intending to major in the BA program in Psychology should note that a grade 12 level mathematics course (or the equivalent from other jurisdictions) is required for Psychology 300, which is a required course for all Psychology majors.

2. Additional Grade 12 Preparation:
   • For all Archaeology degrees with a concentration in Physical Anthropology, Biology 30 and Chemistry 30 are prerequisites for required courses.
   • For all BSc degrees in Psychology, Biology 30 and Chemistry 30 are prerequisites for required courses. Physics 30 and Mathematics 31 are suggested as useful preparation.
   • For the BSc in Anthropology and the BSc in Geography, Biology 30 and Chemistry 30 are strongly recommended as useful preparation because they are prerequisites for courses taken by most students.
   • For all degrees in Economics, Mathematics 31 is suggested as useful preparation.

3. Additional Application Requirements for Programs in the Fine Arts:
   • Applicants to the BFA (Visual Studies) program must submit a portfolio.
   • Applicants to the BMus program must complete an online audition form (including background information and a statement of interest) and audition.
   • Admission to the BMus, BA (Music) or Minor in Music programs requires evidence of successful completion of Grade II Royal Conservatory Theory/Advanced Rudiments or the departmental music theory diagnostic exam.
   • Applicants to the BA (Dance) program must audition and submit a statement of interest.

Enrolment in the following majors may be limited: Communication and Media Studies, Dance, Drama, Economics, International Relations, Law and Society, Psychology, and Visual Studies. Whenever such limits are in effect, the admission average for a program will normally be higher than those for other programs in the Faculty of Arts.

Transfer Students

Students transferring from other faculties and institutions must meet the deadlines and competitive admission requirements in place for the program to which they are applying. For more information refer to A.2 Undergraduate Admission in the Admissions section of this Calendar.

Admission on Academic Probation

Students may be admitted or readmitted to the Faculty on probation if (a) they are on probation in another faculty at the time of admission to the Faculty of Arts, or (b) they previously have been required to withdraw from the University of Calgary or any other post-secondary institution (see 3.3.5 Readmission). Students admitted on probation must clear probation at their first academic term. Students admitted on probation (see 3.3.4).

Second Baccalaureate Degree

Students who have received one or more approved undergraduate degrees (BA, BSc, BEd, etc.) may apply for admission to programs leading to a Second Baccalaureate Degree with a Major Field or a Second Baccalaureate Degree program with Honours in a Major Field. Students must apply to the Admissions Office and meet all deadlines and requirements. For more information on admission to a second undergraduate degree, refer to A.5.5 in Admissions. For more information regarding program requirements for a second degree, refer to 3.4.6 Second Baccalaureate Degrees.

3.2 Registration and Courses

3.2.1 Accuracy of Registration

Students are responsible for the completeness and accuracy of their registration and for arranging their course selections to meet all degree and program requirements as detailed in this Calendar. Any departure from standard degree and program requirements specified in this Calendar must receive prior written authorization by the Associate Dean, Undergraduate Programs and Student Affairs or other designate of the Dean.

Registration at all times should be appropriate to a student’s current degree program unless a student receives explicit permission from the Associate Dean, Undergraduate Programs and Student Affairs. Students with inappropriate course selections may require extra courses and additional time to complete their degrees.

3.2.2 Registration Planning and Consultation

It is important for all students to check their records and registration regularly found in Academic Requirements through their Student Centre, and meet with the Arts Degree Advisors and relevant Subject Advisors for guidance on any questions. Students should acquaint themselves with the dates and deadlines for registration set by the University (see B. Registration in the Academic Regulations section of this Calendar) and allow sufficient time before these deadlines to plan their registration and consult with advisors.

As students approach the completion of their programs, it is strongly recommended that students meet with an Arts Degree Advisor for a graduation check. Otherwise, a complete program audit is not done until a student applies for graduation when the consequences of any problems can be very serious.

3.2.3 Course Load

While five three-unit courses taken concurrently represent a normal full load, some programs prescribe additional courses. Students may elect to take up to six 3-unit courses in a term, but an extra course represents a substantial burden and may adversely affect overall performance. In many programs, opportunities for accelerated progress also exist through credit courses in the Spring and Summer Intersession as well as credits obtained by Special Assessment.

3.2.4 Opportunities to Take Courses at Another Institution

Students may be authorized to take some course work at another university if registration as a visiting student is acceptable to that university. Students with poor academic performance, including those on probation or having a large number of withdrawals, will not be afforded this opportunity. Students may apply online for such authorization by requesting a Letter of Permission through their online Student Centre. Students should check with program advisors in the Arts Students’ Centre to ensure that such transfer credits advance their particular programs. Once approved students will be advised officially as to how the proposed courses will transfer and an appropriate letter will be sent to the Registrar of the other university. The Letter of Permission must be obtained before the student registers for the courses at the other institution.
It will be the responsibility of the student to ensure that an official transcript of grades is forwarded directly to the Registrar of this university in order that appropriate credit may be officially recorded.

Many grade point average calculations used by the Faculty of Arts do not include transfer courses.

### 3.2.5 Credit in Courses by Special Assessment

The Faculty of Arts allows students to challenge some courses or, in other words, gain credit by special assessment. Students are referred to B.10.1 Credit in Courses by Special Assessment (Challenge Examinations) in the Academic Regulations section of this Calendar. Application for such credit should be made on the appropriate form and requires the approval of both the Department offering the course and the office of the Associate Dean, Undergraduate Programs and Student Affairs.

Not more than 30 units (5.0 full-course equivalents) completed by special assessment may be counted towards a degree.

### 3.2.6 Course Classification

Courses normally available for credit towards a baccalaureate degree carry numbers from 200 to 599. Courses numbered below 300 are termed junior courses; those numbered 300 or higher are senior courses.

The numbering of courses at the 200, 300, 400, and 500 levels in a particular field is intended to indicate the level of sophistication involved. Although some senior courses do not have prerequisites, it is very often the case that a 200-level course is a prerequisite for a 300-level course, a 300-level course is a prerequisite for a 400-level course, etc. The Faculty regularly publishes a list of senior courses that do not have prerequisites on its website.

Undergraduates may register in graduate courses at the 600 level only with the permission of the Department or Program offering the course.

### 3.2.7 First-Year Registration

Students may not register in courses at the 300 level or above until at least 18 units (3.0 full-course equivalents) at the 200 level have been successfully completed unless the 300-level course is a first-year program requirement or they receive permission of the Associate Dean, Undergraduate Programs and Student Affairs.

### 3.2.8 Prerequisites, Corequisites and Progression

All prerequisites for courses offered by the Faculty of Arts must be met with a minimum grade of "C-".

Prerequisites are not normally waived. Minimum grades in prerequisite courses are required to ensure that students have the knowledge and skills necessary to succeed in more advanced courses. In exceptional cases, if students can demonstrate that they have equivalent knowledge to the prerequisites listed, they may seek consent from the Department offering the course to enrol in the course.

Students are responsible for ensuring that they have all of the prerequisites and corequisites for each course in which they register. While the online registration system is set up to help students avoid accidental registration in courses for which they lack prerequisites, situations arise where inappropriate course registrations can occur. If registration in any course is contrary to regulations, the Faculty may cancel such registration at any time before or during the term.

#### 3.2.9 Writing Competence

Students who are identified as having deficient writing skills may be required to take steps to improve their writing.

#### 3.2.10 Course Enrolment Limitations

Enrolment caps are in effect for many courses in the Faculty of Arts. Further, registration in some courses is initially limited to students in particular programs or statuses of programs. Refer to the online Planning Guide for courses and dates.

#### 3.2.11 Cross-Listed Courses

In the case of cross-listed courses within the Faculty of Arts, regardless of the title under which the course was taken, credit will be applied to a student’s Major or Minor Field in the way that is most advantageous.

#### 3.2.12 Withdrawal from Courses

Withdrawal from one or more courses or from all courses in a term can have serious consequences. Students are referred to B.14 Withdrawal from Courses and Withdrawal from the Term in the Academic Regulations section of this Calendar.

Before deciding to withdraw from courses, students are encouraged to seek advice from a program advisor in the Arts Students’ Centre.

Students will normally be required to withdraw from the Faculty of Arts and the University if they have accumulated a total of more than 30 units (5.0 full-course equivalent) withdrawals while in attendance at the University of Calgary (see 3.3.3 Excessive Course Withdrawals).

#### 3.2.13 Repetition of Courses

Strict limitations apply to the repetition of courses. See B.9 Repeating Courses in the Academic Regulations section of this Calendar.

#### 3.2.14 Unauthorized Concentrations

Regardless of their home Faculties and degree programs, students are not permitted to include more than 36 units (6.0 full-course equivalents) from any group of courses constituting the Major Field of any program in the Faculty of Arts other than that to which a student has officially been admitted.

#### 3.2.15 Declaration of a Major

Students have the option of entering the Faculty of Arts without declaring a Major. By the time 60 units (10.0 full-course equivalents) are completed, however, students must either declare a Major for which they are eligible or enter a (general) multidisciplinary program.

### 3.2.16 Duration of Study

The Faculty and Major-Field requirements that pertain to degrees awarded by the Faculty of Arts may change by every Calendar issue. The time of entry into a program in the Faculty of Arts is defined as the first session after admission to the program during which a student successfully completes any courses applicable to the program. A student’s program is subject to the degree requirements that are in the Calendar current at the time of entry into the program. A student is allowed seven years counted from the time of entry into the program to graduate under these requirements.

Students who exceed this seven-year limit must consult with the Associate Dean, Undergraduate Programs and Student Affairs of the Faculty of Arts (or designate) who will decide on the degree requirements that will be applied for the proposed date of graduation.

### 3.3 Student Standing and Academic Review

#### 3.3.1 Dean’s List

The Dean’s List, which is compiled annually at the end of the Winter Term, recognizes outstanding achievement by students in the Faculty. A statement of inclusion on the Dean’s List will be recorded on the student’s transcript.

To qualify for the Dean’s List, a student must take a sufficient number of courses at the University of Calgary during the preceding Summer, Fall and Winter Terms and achieve a grade point average of 3.60 or above over all University of Calgary courses taken during that period. The alternative course load requirements are as follows:

(a) A minimum of 24 units (4.0 full-course equivalents) taken at the University of Calgary, OR
(b) A minimum of 24 units (4.0 full-course equivalents) taken at the University of Calgary plus successful completion of one four-month Co-operative Education work placement, OR
(c) A minimum of 12 units (2.0 full-course equivalents) taken at the University of Calgary plus successful completion of two four-month Co-operative Education work placements, OR
(d) A minimum of 12 units (2.0 full-course equivalents) taken at the University of Calgary plus successful completion of one or more approved full-time terms abroad, OR
(e) A program of study assessed by the Student Accessibility Services to be equivalent to (a), (b), (c) or (d) for a particular student.

#### Notes:

- Where it is appropriate for a student to be assessed under provisions (d) or (e), the student must arrange for all necessary documentation to be received by the Associate Dean, Undergraduate Programs and Student Affairs no later than May 15.
3.3.2 Performance Review, Probationary Status and Dismissal

Students are referred to section F.3.2 on Unsatisfactory Standing in the Academic Regulations section of this Calendar. The academic standing of students registered in the Faculty will be reviewed after each Winter Term provided that they have completed at least 18 units (3.0 full-course equivalents) at the University of Calgary since their previous review. (Students who have not completed 18 units (3.0 full-course equivalents) since the previous review will retain their existing status until the next subsequent review.) All University of Calgary credit courses, which have been completed since the previous review, are used for the purpose of academic review. Students placed on academic probation or required to withdraw as a result of the academic performance review will be so advised in writing. Notwithstanding the specific regulations pertaining to Student Standing, students' academic standing may be reviewed at any time and those with generally poor academic records may be placed or continued on academic probation or required to withdraw at the discretion of the Associate Dean, Undergraduate Programs and Student Affairs or other delegate of the Dean.

Students in Satisfactory Standing

(a) Will retain that standing if they have achieved a GPA of at least 2.00 over all courses taken since the previous review.

(b) Will be placed on academic probation if they have achieved a GPA of at least 1.70 but less than 2.00 over all courses taken since their previous review and have not been on academic probation within the preceding five years.

(c) Will be required to withdraw from the Faculty if they have achieved a GPA less than 2.00 over all courses taken since their previous review and they have a probationary period within the last five years. (Probationary periods that have occurred in excess of five years previous will not be counted.)

(d) Will be required to withdraw from the Faculty if they have achieved a GPA of less than 1.70 over all courses taken since their previous review.

Academic Turnaround Program (ATP)

The Academic Turnaround Program (ATP) provides eligible students facing their first Required to Withdraw (RTW) ruling for academic reasons the opportunity to continue in their current program or to seek admission to the Faculty of Arts following a RTW ruling from their current faculty. Students in the Faculty of Arts will receive a written invitation to participate in the Academic Turnaround Program from the dean or designate. Students accepted to the ATP may continue their studies under Special Academic Probation provided that they fulfill all requirements and are compliant with the conditions of the program. All ATP requirements will be provided to students in writing by the faculty dean or designate. Students who do not fulfill all requirements or who fail to meet the GPA criteria outlined below will be required to withdraw from the University and will be notified by the dean or designate.

At the end of the following Winter Term, students' progress will be reviewed by the Faculty regardless of the number of courses completed. In order to continue on Special Academic Probation, students must receive a cumulative GPA of 2.00 across all courses taken in the previous Summer (including Spring Intersession), Fall and Winter Terms. Students who have completed 18 units (6 half courses) and received a cumulative GPA of 2.00 across all courses taken will have completed Special Academic Probation and are considered in good academic standing. Students who are non-compliant with any of the ATP conditions will be required to withdraw. Students may only participate once in the ATP.

Students on Probation

(a) Will be reinstated in satisfactory standing if they have achieved a GPA of at least 2.00 over all courses taken since their previous review;

(b) Will be required to withdraw from the Faculty if they have achieved a GPA of less than 2.00 over all courses taken since their previous review.

3.3.3 Excessive Course Withdrawals

At the time of the Academic Review after winter term, students who have withdrawn from more than 30 units (5.0 full-course equivalents) will be required to withdraw from the Faculty of Arts unless they can demonstrate sufficient cause for their course withdrawals.

3.3.4 Mitigating Circumstances

Students who would normally be required to withdraw on the basis of their academic performance or excessive withdrawals may be placed on academic probation instead if they have experienced serious mitigating circumstances and can demonstrate that they have good prospects for future success. Students who believe that they fall into this category should discuss their situations with the Arts Students’ Centre at the earliest possible opportunity and no later than the end of Winter Term.

3.3.5 Readmission

Students who have been required to withdraw from the Faculty of Arts, other Faculties at the University of Calgary or other post-secondary institutions due to unsatisfactory academic performance or excessive course withdrawals may be considered for readmission after 12 or more months have elapsed since the date of dismissal. Readmission is not guaranteed. Applicants must apply by the deadlines stated in the current Calendar and meet the current admission requirements of the program to which they are seeking admission.

Readmission After Deficient Academic Performance

Students who have been required to withdraw due to deficient academic performance should note that it is not normally possible to be readmitted to the Faculty of Arts without first taking courses to improve their grade point averages to meet the required admission averages for their programs. Students readmitted after having been required to withdraw from the Faculty of Arts due to unsatisfactory academic performance must maintain a grade point average of at least 2.00 on all courses taken in each academic review period after readmission. Failure to do so will result in permanent dismissal from the Faculty of Arts.

Readmission After Excessive Course Withdrawals

Students (re)admitted after having been required to withdraw from the Faculty of Arts due to excessive withdrawals from courses must obtain Faculty permission to withdraw from any further courses. Failure to do so will result in permanent dismissal from the Faculty of Arts.

Limitation on Readmission

Students who have twice been required to withdraw from any Faculties at the University of Calgary and/or any other post-secondary institution will not normally be considered for admission to the Faculty of Arts at any time.

3.4 Graduation

3.4.1 Degrees with a Major Field

Faculty of Arts Requirements for Degrees with a Major Field

The following requirements apply to all Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music and Bachelor of Science degrees with a Major Field:

1. Overall Program: Successful completion of an approved program consisting of 120 units (20.0 full-course equivalents).

2. Program Focus: Successful completion of the “Major-Field Requirements” and any associated “Other Requirements” for the relevant degree.

3. Academic Achievement:

(a) A minimum GPA of 2.00 must be achieved over all courses in the Major Field and over all courses in the program.
3.4.2 Honours Degrees with a Major Field

Honours degrees provide students with an opportunity to pursue greater depth in a field of study. An important objective is to prepare the student for possible entry to graduate-level degree programs. High standards of performance are required.

Application Process and Deadline

While the point of their studies at which students are eligible to enter Honours varies considerably across programs, students are advised to apply for Honours as early as their programs permit. Delay may result in additional time to complete prerequisite courses and/or additional coursework beyond the normal 120 units (20.0 full-course equivalents).

Application deadlines fall between January 23 and May 1 annually, depending on the program. Consequently, interested students should consult with the Subject Advisor or Honours Co-ordinator for their program well in advance of January 23.

As part of an application to Honours, some programs require the submission of a research proposal, confirmation of supervisory and/or laboratory arrangements, etc. Students must submit all required materials to the Subject Advisor for their program and confirm their requirements using the Change of Program option in the online Student Centre by the deadline. Using the Student Centre alone is generally not sufficient.

Notes:
- Programs may elect to consider late applications if they can accommodate additional students.
- It is generally an advantage to complete application items such as a research proposal, confirmation of supervisory and/or laboratory arrangements, etc. as early as possible, especially where space in an Honours program is limited.

Notes:
- Courses from other institutions as well as the University of Calgary can be used in a student's grade-point calculation.
- Programs will announce annually by October 1 on their websites if their qualifying averages for Honours will be set above 3.30 for the following academic year.

Performance Review

The academic standing of each Honours student will be reviewed each year following the Winter Term. Continuation in an Honours program is contingent upon students achieving a GPA of at least 3.30 over all courses completed and all courses completed in the major since the last review.

Faculty of Arts Requirements for Honours Degrees

The following requirements apply to all Bachelor of Arts Honours, Bachelor of Fine Arts Honours and Bachelor of Science Honours Degrees with a Major Field:

1. Overall Program: Successful completion of an approved program consisting of 120 units (20.0 full-course equivalents).

2. Program Focus: Successful completion of the "Major Field with Honours Requirements" and any associated "Other Requirements" for the relevant degree.

3. Academic Achievement:
   - (a) Over the final 90 units (15.0 full-course equivalents), a minimum GPA of 3.30 must be achieved on all courses and on all courses in the Major Field.
   - (b) A maximum of 6 units (1.0 full-course equivalent) "D" or "D+" grade in the Major Field and a maximum of 18 units (3.0 full-course equivalent) "D" or "D+" grades overall.

4. University of Calgary Study:
   - (a) A maximum of 60 units (10.0 full-course equivalents) in eligible post-secondary transfer credits from other institutions may be counted toward the degree.
   - (b) A maximum of 24 units (4.0 full-course equivalents) in eligible post-secondary transfer credits from other institutions may be counted toward the degree.
transferring credits from other institutions may be counted toward the Major Field.  
5. **Depth**: A maximum of 48 units (8.0 full-course equivalents) at the junior or 200 level.  
6. **Breadth**: All students, except those in the BMus or BFA Degree, must take a minimum of 6 units (1.0 full-course equivalent) from the Faculty of Science.  

### 7. Physical Activity Courses: A maximum of 6 units (1.0 full-course equivalent) may be taken from: Dance Education Activity/Theory, Outdoor Pursuits Activity/Theory, and Physical Education Activity/Theory.

**Note:** For each degree program, the “Major Field with Honours Requirements” and any associated “Other Requirements” are defined under 4. **Program Details.** For each Bachelor’s Degree, at least 54 units (9.0 and not more than 10.0 full-course equivalents) in the Major Field are normally required. Students can choose to include additional courses in the Major Field to a maximum of 72 units (12.0 full-course equivalents). The Major Fields in BA, BMus Honours and BSc Honours degrees typically require considerably more courses. The completion of some programs requires additional supporting courses from outside the Major Field.

#### First Class Honours
The notation “First-Class Honours” will be inscribed on the permanent record and graduation parchment of any students completing an Honours Program with a grade point average of at least 3.60 over the last 90 units (15.0 full-course equivalents) taken for the degree. Courses from other institutions as well as the University of Calgary can be used in this calculation. In cases in which the last fifteen must include some but not all of a group of courses taken concurrently, the selection will be made in the manner most advantageous to the student.

#### 3.4.3 Minor Fields
Students may formally declare a Minor and have this officially recorded on their transcript of record. To obtain a Minor, students must complete at least 30 units (5.0 full-course equivalents) from the Minor Field and any requirements specified for the particular Minor. Students are normally not permitted to count more than 36 units (6.0 full-course equivalents) from their Minor fields in their degrees. See the sub-section on 3.2.14 Unauthorized Concentrations.

Students in the Faculty of Arts may be eligible to declare Minor Fields from Continuing Education, the Haskayne School of Business, the Cumming School of Medicine and the Faculty of Science as well as the Faculty of Arts. Students should consult the Calendar regulations for the Faculties within which they intend to declare a Minor. For Minors from the Faculty of Arts, see the section on 4. **Program Details.**

At least one Minor Field of study must be formally declared in conjunction with the Multidisciplinary Degree Programs. Some restrictions apply to the pairing of majors and minors as discussed under 4. **Program Details.** Students are advised that course work in addition to the normal 120 units (20.0 full-course equivalents) may sometimes be required if a formal Minor program is declared.

The declaration of a Minor must be made not later than the time of last registration. To receive further information, contact an Arts Degree Advisor in the Arts Students’ Centre.

**Note:** In accordance with other parts of this Calendar, students pursuing degrees from other Faculties may or may not be eligible to declare Minors from the Faculty of Arts at the discretion of their home faculty.

#### 3.4.4 Co-operative Education Programs

**Introduction**
In the Faculty of Arts, most degree programs, including honours degree programs, are offered with a Co-operative Education (Co-op) option. Co-op Programs normally take five years to complete and include 12 to 16 months of paid supervised work experience in various private companies, government agencies and non-profit organizations. After second year, three or four work terms are interspersed with regular academic terms. Co-operative Education Programs provide students with opportunities to experience the linkages between academic knowledge and a variety of appropriate job situations. Students completing the requirements of the Co-operative Education option will graduate with “Co-operative Education” designated on their transcripts and degree parchments. Students who are interested in pursuing the Co-operative Education option are urged to discuss their plans and course selection with the Co-operative Education Coordinators in the Faculty of Arts Co-operative Education Office as early in their program as possible.

**Faculty of Arts Co-operative Education Office**
Location: Social Sciences 102, Arts Students’ Centre  
Phone: 403.210.8509 or 403.220.8636  
Email address: artcoop@ucalgary.ca  
Website: arts.ucalgary.ca/co-op/  
Students should also consult with the subject advisor in the relevant Department or Program, particularly if they are considering combining Honours and Co-operative Education programs. In addition, students are referred to the Co-operative Education/Internship section of this Calendar.

**Notes:**
- The Bachelor of Communication and Media Studies and the Bachelor of Film Studies may be taken with Co-op but students may face sequencing constraints and/or require extra time to complete their programs.
- Co-operative Education is not available in conjunction with BA, BFA and BSc Degrees with the following Major Fields: Art History, Dance, Drama, Music, and Psychology. It is also not available to the BMus degree program.  
- Developing and implementing job-search skills is a part of the Co-operative Education Program. The Program does not guarantee that students will obtain work term placements.

**Admission**
Students must submit a completed application to the Faculty of Arts Co-operative Education program at arts.ucalgary.ca/co-op/home/apply-co-op by the deadline of October 15. The minimum eligibility criteria are as follows:

1. Students must meet all of the Requirements specified in the Co-operative Education/Internship section of this Calendar.
2. Students must have completed at least 30 units by October 15 (excluding the courses they are currently registered in), they must be engaged in full-time study, and they must have achieved a grade point average of 2.50 over their most recent 30 units (5.0 full-course equivalents).
3. A minimum of 30 units (5.0 full-course equivalents) must be remaining in their degree after their first planned work term, including a plan to end on an academic semester.

Meeting the minimum eligibility requirements does not guarantee admission. Capacity in the program may be limited due to program resources and market conditions.

**Progress Through the Program**
Progress through the Co-operative Education Program is bound by the rules concerning Registration, Course Work, Student Standing, Fees and Expenses and Withdrawal Policies specified in the Co-operative Education/Internship section of this Calendar.

**Sequence**
Those students who successfully apply by October 15 normally undergo preparation in the Term they applied and search for placement during the following Winter Term and enter their first work term in Spring/Summer term or the following Fall Term. Subsequent work terms are interspersed with academic terms. A minimum of three work terms is required and a fourth may be approved at a student’s request. Students must complete all of the academic requirements for their programs and must finish on a full-time academic term.

**Development of Job-Search Skills**
Approval for a student’s first work term and registration in the accompanying course, Co-operative Education 511.01, is conditional on full participation in the pre-placement preparatory activities established by the Co-operative Education Office.

**Prescribed Preparatory Courses**
To provide a sound foundation for work terms related to a Major Field of study and to enhance the student’s ability to compete for opportunities, academic Departments and Programs may also recommend courses to be completed by students in that Major. A list of the recommended courses for each Major Field is available through the Co-
operative Education office. These courses would be based on available courses in first and second year.

**Work Term Activity**
Students are expected to focus on their placements and do not normally take any academic courses during their work terms. Nevertheless, students may elect to take one three-unit course during a second and/or subsequent work term provided that they have a strong academic and placement record and the course does not occur during work hours or interfere with work term responsibilities.

**Work Term Assessment**
The mandatory work term courses, Co-operative Education 511.01, 511.02 and 511.03, and the additional course, Co-operative Education 511.04, are graded on a credit (CR) or fail (F) basis. A positive assessment requires satisfactory performance on each of the following items:

- (a) The Co-operative Education Co-ordinators evaluation of job performance, which is based on an on-site visit where practical.
- (b) The employer's evaluation of job performance.
- (c) The student's self-assessment of job performance and the overall job experience, which is normally based on participation in a debriefing or integrative session.
- (d) A work term report prepared by the student and evaluated by the Faculty.

**Note:** Upon the request of a student, the Faculty may approve registration in Co-operative Education 511.04 in conjunction with an extra (fourth) work term.

**Completion**
To graduate with the Co-operative Education designation, students must:

- (a) Successfully complete all of Co-operative Education 511.01, 511.02, 511.03.
- (b) Successfully complete Co-operative Education 511.04 if permission has been received to register in this course.
- (c) Achieve a minimum grade point average of 2.50 over their final 90 units (15.0 full-course equivalents) of academic subjects.

**Note:** Students must also meet all of the regular academic requirements for graduation in their BA or BSc degree programs.

---

### 3.4.5 Combined Degrees

Combined Degrees programs lead to two degrees and normally take at least five years to complete. It is often possible to earn one or both of the Degrees with Honours.

Combined Degree programs require careful selection of courses to complete all requirements of the two Major Fields. For advising on Faculty of Arts component(s) of Combined Degrees, students should consult with both the program advisor in the Arts Students’ Centre and the relevant Subject Advisor(s).

If courses have been chosen carefully, it may be possible for students to opt out of a combined degree program after the end of their third year and still complete a single degree program in four years, if courses have been unevenly distributed, however, it may require more than four years to complete a single degree.

**Note:** As described in Section 3.4.1, a single degree with Double Major (i.e., two majors) requires at least 120 units (20.0 full-course equivalents). By contrast, a combined degree program yields two degrees and requires at least 150 units (25.0 full-course equivalents).

### Faculty of Arts Requirements for Combined Degrees

The following faculty requirements apply to Combined Degrees programs that include a BA, BFA, BMus or BSc with a Major Field from the Faculty of Arts.

1. **Overall Program:** Successful completion of an overall program consisting of at least 150 units (25.0 full-courses equivalents).
2. **Program Focus:** Successful completion of the Major Field Requirements and any associated “Other Requirements” for any/each BA, BFA, BMus or BSc from the Faculty of Arts.
3. **Academic Achievement:**
   - (a) A minimum GPA of 3.30 must be achieved over the final 90 units (15.0 full-course equivalents).
   - (b) A maximum of 6 units (1.0 full-course equivalent) “D” or “D+” grade in the Major Field and a maximum of 18 units (3.0 full-course equivalents) “D” or “D+” grades overall.
4. **University of Calgary Study:**
   - (a) A maximum of 60 units (10.0 full-course equivalents) in eligible post-secondary transfer credits from other institutions may be counted toward the degree.
   - (b) A maximum of 24 units (4.0 full-course equivalents) in eligible post-secondary transfer credits from other institutions may be counted toward the Major Field.
5. **Depth:** A maximum of 54 units (9.0 full-course equivalents) at the junior or 200 level.
6. **Breadth:** A maximum of 6 units (1.0 full-course equivalent) from the Faculty of Science. (Students in the BA (Dance), BFA and BMus Degrees are exempt from this requirement only if the second degree is outside the Faculty of Arts.)
7. **Physical Activity Courses:** A maximum of 6 units (1.0 full-course equivalent) may be taken from: Dance Education Activity/Therapy, Outdoor Pursuits Activity/Theory and Physical Education Activity/Theory.

**Notes:**
- For each degree program, the “Major-Field with Honours Requirements” and any associated “Other Requirements” are defined below under 4. Program Details.
- The Faculty and Program Requirements of the partner Faculty must also be met.

### Faculty of Arts Requirements for Combined Degrees with an Honours Component

The following faculty requirements apply to Combined Degrees programs that include an BA Honours or BSc Honours from the Faculty of Arts.

1. **Overall Program:** Successful completion of an overall program consisting of at least 150 units (25.0 full-courses equivalents).
2. **Program Focus:** Successful completion of the Major Field with Honours Requirements and any associated “Other Requirements” for any/each BA or BSc Honours from the Faculty of Arts.
3. **Academic Achievement:**
   - (a) A minimum GPA of 3.30 must be achieved over the final 90 units (15.0 full-course equivalents).
   - (b) A maximum of 6 units (1.0 full-course equivalent) “D” or “D+” grade in the Major Field and a maximum of 18 units (3.0 full-course equivalents) “D” or “D+” grades overall.

### Combined Degree Programs within the Faculty of Arts

**BA, BFA, BMus or BSc (Arts)/BA or BSc (Arts)**

This program leads to two degrees from the Faculty of Arts. One or both degrees may be awarded with Honours.

Students may either be admitted to both degree programs when they first apply to the University or may seek admission to a second Degree Program after being admitted. Students must satisfy the requirements for admission to the Faculty of Arts and each program therein. (See the Admissions section of this Calendar.) Students applying...
Specialized Combined Degree Program with the Faculty of Kinesiology
Dance can be combined with Kinesiology:
- Bachelor of Kinesiology (Kinesiology)/Bachelor of Arts (Dance) - see School of Creative and Performing Arts under 4. Program Details.

Specialized Combined Degree Program with the Cumming School of Medicine
Psychology can be combined with Community Rehabilitation and Disability Studies:
- Bachelor of Community Rehabilitation (Medicine)/Bachelor of Arts (Psychology) or Bachelor of Science (Psychology) - see Psychology under 4. Program Details.

Specialized Concurrent Degree Programs with the Werklund School of Education
In several specialized fields in the Faculty of Arts, Concurrent Degree programs are offered in conjunction with the Werklund School of Education:
- Bachelor of Arts Canadian Studies/Bachelor of Education
- Bachelor of Arts Communication and Culture (Multidisciplinary Studies)/Bachelor of Education
- Bachelor of Arts Dance (with Dance Pedagogy Concentration)/Bachelor of Education (secondary route only)
- Bachelor of Arts Development Studies/Bachelor of Education
- Bachelor of Arts English/Bachelor of Education
- Bachelor of Fine Arts Drama Education/Bachelor of Education
- Bachelor of Arts French/Bachelor of Education
- Bachelor of Arts or Bachelor of Science Geography/Bachelor of Education
- Bachelor of Arts History/Bachelor of Education
- Bachelor of Arts International Indigenous Studies/Bachelor of Education
- Bachelor of Arts International Relations/Bachelor of Education
- Bachelor of Arts Music/Bachelor of Education (elementary route only)
- Bachelor of Music Music Education/Bachelor of Education (secondary route only)

- Bachelor of Arts Political Science/Bachelor of Education
- Bachelor of Arts Sociology/Bachelor of Education
- Bachelor of Arts Spanish/Bachelor of Education
- Bachelor of Fine Arts Visual Studies/Bachelor of Education

For more information on the requirements of the Arts major, see 4. Program Details. For the Education requirements see the Werklund School of Education.

Combined Degree Programs With Other Faculties
Bachelor of Arts and Bachelor of Science programs in the Faculty of Arts can be taken in combination with approved undergraduate programs from other Faculties. More than 150 units (25.0 full-course equivalents) may be required to complete some degree combinations. The Faculty of Arts degree may often be awarded with Honours, but more than 150 units (25.0 full-course equivalents) will frequently be needed for completion.

Students may either be admitted to both degree programs when they first apply to the University or may seek admission to a second Degree Program after being admitted. Students must satisfy the requirements for admission to both Faculties and Programs. While other Combined Degrees may be approved with the consent of both Faculties, students may apply directly for the three well-established Combined Degree Programs listed below:

Combined BComm/BA (Arts) or BSc (Arts)
This combined program leads to a Bachelor of Commerce from the Haskayne School of Business and either a Bachelor of Arts or a Bachelor of Science from the Faculty of Arts. The Haskayne School of Business provides complementary information on Combined Degrees in their section of this Calendar. The Haskayne School of Business limits combined degrees to specified majors within the Faculty of Arts.

Combined BSc (Engineering)/BA (Arts) or BSc (Arts)*
This combined program leads to a Bachelor of Science in Engineering from the Schulich School of Engineering and either a Bachelor of Arts or a Bachelor of Science from the Faculty of Arts. The Schulich School of Engineering provides complementary information on Combined Programs in their section of this Calendar.

Note: Because engineering degrees are highly structured, more than 150 units (25.0 full-course equivalents) are likely to be required to complete both sets of degree requirements. The BFA (Visual Studies) and the BMus degrees can only be used in these combinations with special permission from both Faculties.

3.4.6 Second Baccalaureate Degrees
Students will not normally be admitted to a Second Degree program in any field in which they already possess a degree. Some further restrictions apply to the pairing of majors in the first and second degree as discussed in the 4. Program Details section.

Upon admission to their program, students are advised to contact the Arts Students' Centre to discuss their academic plans, obtain general advice and receive an assessment of the remaining requirements.

Modified Rules and Regulations
The rules and regulations pertaining to 3.4.1 Degrees with a Major Field and 3.4.2 Honours Degree's with a Major Field remain applicable with the following modifications:

(a) Up to 60 units (10.0 full-course equivalents) counted towards any previous degrees may be used towards requirements in the Second Degree. These may not include more than 24 units (4.0 full-course equivalents) toward the new Major Field.

(b) Courses extra to previous degrees and so noted on transcripts may be counted towards the Second Degree if completed before enrolling in the Second Degree program and if consistent with Faculty regulations.

(c) Of all courses used toward the second degree, at least 60 units (10.0 full-course equivalents) must be taken from the University of Calgary.

(d) The Second Degree will be awarded “With Distinction” or “First-Class Honours” as applicable if a GPA of at least 3.60 is achieved over the courses completed for the Second Degree excluding the previous credit allowed under (a) above.

(e) For a second BA with Honours, admission to Honours will be determined based on the overall grade point average obtained for the final 60 units (10.0 full-course equivalents) in the first degree while the grade point averages required for graduation with Honours will be calculated using the courses completed for the Second Degree.
Co-operative Education
For Major Fields of specialization in which the Faculty of Arts offers Co-operative Education Programs, students may apply for a Second Degree or a Second Degree with Honours that includes Co-operative Education. Application for admission to the Co-operative Education program must be made when the student applies for admission to the Second Degree. Students who would have more than 84 units (14.0 full-course equivalents) completed towards the Second Degree prior to their first Co-operative Education placement are normally not eligible. Students in Second Degree programs with Co-operative Education are subject to:
(a) All of the requirements pertaining to Second Degrees with a Major Field or Second Degrees with Honours in a Major Field, and
(b) All of the requirements specified for Co-operative Education Programs.

4. Program Details
4.1 Arts and Science Honours Academy

Introduction
The Arts and Science Honours Academy (ASHA) is a program for motivated students of demonstrated ability who aspire to a well-rounded education that combines the depth of an Honours degree with the breadth of dedicated interdisciplinary courses, a language requirement and an international experience.

Contact Information
Email:asha@ucalgary.ca
Website: ucalgary.ca/asha

Admission
Entrance to the Program is competitive. Criteria include high academic achievement (a minimum high school average of 85 per cent) and evidence of community or academic involvement and leadership. Students must complete a separate online ASHA admission form, which will include a brief writing piece. Students may be interviewed (in person or by phone) as part of the application process. While admission is normally limited to incoming first-year students, the participating Faculties may each nominate up to two students for consideration for admission after the first year.

Requirements
1. Academic Achievement: Excellence in a degree program from the Faculty of Arts or the Faculty of Science demonstrated by either:
   a. Successful completion of a BA or BSc with Honours, or
   b. Completion with distinction of a BA or BSc with a Major Field and a significant independent research course.
2. Second Language: At least 6 units (1.0 full-course equivalent) in a (single) language other than English. The language requirement may be fulfilled during the international experience.
3. International Experience: While students are strongly encouraged to go abroad for a full academic year, they must participate in an approved study abroad or work abroad program of a duration of a minimum of 12 consecutive weeks. In exceptional cases, other arrangements may be considered. Students must submit a travel proposal appropriate for their program to the program director at the end of their second year.
4. Arts and Science Honours Academy Core Courses: 18 units (3.0 full-course equivalents) taken through the ASHA program as follows:
   a. Arts and Science Honours Academy 220 Quests and Questions (6 units or 1.0 full-course equivalent)
   b. Arts and Science Honours Academy 321 Problems in Representation (3 units or 0.5 full-course equivalent)
   c. Arts and Science Honours Academy 421 Invention (3 units or 0.5 full-course equivalent)
   d. Arts and Science Honours Academy 501 The Nature of Research (3 units or 0.5 full-course equivalent)
   e. Arts and Science Honours Academy 503 Capstone Seminar (3 units or 0.5 full-course equivalent)

Note: These courses may be used to satisfy the breadth requirements of courses outside the home faculty.

Other Requirements
Continuation in the program
Year 2: In order to continue into Year Two in good standing, students must have completed Arts and Science Honours Academy 220 and must have completed at least 24 units (4.0 full-course equivalents) with a minimum GPA of 3.30. Students whose GPA is between 2.70 and 3.30 will be placed on probation for one year. One period of probation will be permitted during the program. Probation will be cleared if the GPA at the next annual review is 3.30 or greater.
Year 3: In order to continue into Year Three in good standing, students must have completed at least 24 units (4.0 full-course equivalents) in Year Two, including Arts and Science Honours Academy 321 and 421, must have maintained a GPA of at least 3.30 and normally must have secured admission into an Honours Program in one of the participating Faculties. Students continue work in their discipline either in Calgary or abroad. The international experience is normally completed between the end of the Winter Term of Year 2 and the beginning of the Fall Term in Year 4.
Year 4: Students must maintain a GPA of at least 3.30. Students complete the final two courses (Arts and Science Honours Academy 501 and 503) and continue in their Honours or Major Program. In order to accommodate all the requirements of the Program and the international experience, time to graduation may be extended as appropriate.

4.2 African Studies
See Anthropology and Archaeology.

4.3 Ancient and Medieval History
See Classics and Religion.

4.4 Anthropology and Archaeology

Overview of Programs and Procedures
Baccalaureate Degrees Offered
Bachelor of Arts (BA) in Social and Cultural Anthropology
BA Honours in Social and Cultural Anthropology
BA in Social and Cultural Anthropology with Co-operative Education
BA Honours in Social and Cultural Anthropology with Co-operative Education
Bachelor of Science (BSc) in Anthropology
BSc Honours in Anthropology
BSc in Anthropology with Co-operative Education
BSc Honours in Anthropology with Co-operative Education
Bachelor of Arts (BA) in Archaeology
BA Honours in Archaeology
BA in Archaeology with Co-operative Education
BA Honours in Archaeology with Co-operative Education
Bachelor of Science (BSc) in Archaeology
BSc Honours in Archaeology
BSc in Archaeology with Co-operative Education
BSc Honours in Archaeology with Co-operative Education
Bachelor of Arts (BA) in Development Studies
BA in Development Studies with Co-operative Education
BA Honours in Development Studies
BA Honours in Development Studies with Co-operative Education
Concurrent BA in Development Studies and Bachelor of Education

Note: Minors are offered in African Studies, Anthropology, Archaeology, and Development Studies.

Introduction
The Department of Anthropology and Archaeology offers instruction in African Studies, Archaeology, Biological Anthropology, Social and Cultural Anthropology, and Development Studies. The Department of Anthropology and Archaeology takes a comparative, cross-cultural, and cross-species perspective to understand human beings. Anthropologists and archaeologists consider how humans evolved, how they shape — and are shaped by — their culture, and seek to understand the records they have left behind. Students are encouraged to take one of the field schools to gain hands-on experience.
Faculty of Arts

Students wishing to emphasize the social sciences and humanities in their Anthropology or Archaeology program should register for the BA degree. Those wishing to emphasize the natural and biological sciences should register for the BSc degree. It is recommended that first-year students in any of these programs register in Anthropology 201, 203, and Archaeology 201.

Archaeology: Archaeology courses address the development of complexity, paleopathology, ethnoarchaeology, lithic technology, geoarchaeology, human osteology, zooarchaeology, human-environment interaction, and cultural heritage management. Laboratory-based courses emphasize a hands-on approach to learning analytical techniques. Geographic areas include North and South America, Mesoamerica, North Africa, and the Arctic.

Biological Anthropology: The BSc in Anthropology (also known as physical anthropology) includes courses in paleoanthropology and bioanthropology, which investigate the origins of our species, variation, and adaptation in modern human populations, and the behaviour and ecology of other primate species. Laboratory-based courses examine casts of fossils from the earliest primates through to modern humans, and also human and primate genetics.

Social and Cultural Anthropology: The BA in Anthropology focuses on social and cultural anthropology and adopts a cross-cultural perspective. Courses seek to foster an understanding and appreciation of the wide variety of cultures in the world and provide critical insights into how people actually live and how they negotiate the challenges created by globalization. Courses examine such issues as indigeneity, racism, migration, gender, development, nationalism, terrorism, business, economics, religion, and urbanization.

Development Studies: The Development Studies program is an interdisciplinary program designed to provide students with an understanding of the issues, policies, and practices associated with sustainable global and community development in the context of both Canada and internationally. Courses examine social, economic, environmental, and political change as well as issues of poverty, hunger, social justice, colonialism, participatory development, cultural beliefs, human rights, and governance. Students gain practical skills for designing, implementing, and effectively managing community development projects which prepares them for further studies as well as employment in governmental, non-governmental, and other international development-related fields in Canada and abroad.

African Studies: The Department offers a minor in African Studies.

Contact Information
For Archaeology, Anthropology and Development Studies:
Location: Earth Sciences 620
Phone: 403.220.6516
Fax: 403.284.5467
Email: anth@ucalgary.ca; destprog@ucalgary.ca
Website: antharky.ucalgary.ca
For African Studies:
Program Co-ordinator: afstprog@ucalgary.ca
Website: http://idp.ucalgary.ca/afst

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.
For more specific advice regarding course selection and requirements in the major field, students should consult the Undergraduate Program Director located in the Department of Anthropology and Archaeology (consult Department website for contact information).

Admission to the Major
Prospective students wishing to enter the BA (Social and Cultural Anthropology, or Archaeology), the BA (Development Studies), or the BSc (Anthropology or Archaeology) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Admission to Honours
Honours programs in Anthropology, Archaeology and Development Studies offer senior students the opportunity to participate in more inquiry-based studies than those undertaken by Majors. Entrance occurs after completion of at least 75 units (12.5 full-course equivalents). The Anthropology and Archaeology Honours programs both permit students to select either an Honours BA, or an Honours BSc.

The Faculty of Arts procedures for Admission to Honours established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. The application deadline is February 1.

Field of African Studies
The Field of African Studies consists of the following courses:
- African Studies 301, 400, 501
- Anthropology 317, 319
- Archaeology 307, 395, 399, 439
- French 549
- Geography 377
- Greek and Roman Studies 345, 347
- History 397.01, 402
- Political Science 371, 471
- Religious Studies 339, 353

Field of Anthropology
The Field of Anthropology consists of all courses labelled Anthropology (ANTH) and Archaeology (ARKY) 201, 419, 437, 533, 555, and 599.

Field of Archaeology
The Field of Archaeology consists of all courses labelled Archaeology (ARKY) and Anthropology 201, 203, 305, 350, and 589.

Courses with a Natural-Science Emphasis
Anthropology 201, 311, 412, 413, 552, 589

All courses offered by the Faculty of Science.

Field of Development Studies
The Field of Development Studies consists of the following courses:
- All courses labelled Development Studies (DEST)
- African Studies 301
- Anthropology 303, 313, 317, 319, 321, 323, 329, 331, 341, 343, 349, 357, 385, 379, 393, 399, 411, 467, 479, 523
- Architectural Studies 423
- Biology 307, 309
- Canadian Studies 361
- Communication and Media Studies 313
- Economics 201, 203, 321, 337, 339, 349, 365, 377, 425
- Geography 205, 213, 251, 315, 321, 340, 341, 367, 421, 425, 453, 553
- Health and Society 301
- History 300, 307, 402, 494
- Indigenous Studies 201, 303, 305, 311, 312, 317, 397, 399, 407, 415
- Political Science 279, 359, 371, 379, 381, 399, 471, 487, 506, 565, 579
- Sociology 303, 311, 313, 315, 375, 487
- South Asian Studies 203, 303
- Sustainability Studies 401
- University 201, 203

4.4.1 BA in Social and Cultural Anthropology

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 45 (7.5 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Anthropology while fulfilling the following requirements:

1. Core: 15 units (2.5 full-course equivalents) Anthropology 201, 203, 391, 411, Archaeology 201.
2. Ethnography: 6 units (1.0 full-course equivalent) from Anthropology 317, 319, 321, 323, 329, 355, 421*, 427*; Archaeology 419.

Note: The following courses, are not in the Field of Anthropology, but may be used towards this requirement:
- African Studies 301
- Archaeology 345, 355, 399, 439
- Development Studies 403

3. Upper-Year Courses: 6 units (1.0 full-course equivalent) from Anthropology 400, 421*, 427*, 467, 479, 501, 523, 541.

Website: http://idp.ucalgary.ca/afst
4. Options: 18 units (3.0 full-course equivalents) from the Field of Anthropology.

Note: Anthropology 421 and 427 may not be used to satisfy both requirement 2 and requirement 3.

C. DEGREE OPTIONS

The BA in Social and Cultural Anthropology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: Students contemplating applying to enter a graduate program in Anthropology or seeking an applied research position are encouraged to include among their open options a Statistics or Quantitative Methods course.

4.4.2 BA Honours Social and Cultural Anthropology

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 57 (9.5 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Anthropology while fulfilling the following requirements:

1. Core: 15 units (2.5 full-course equivalents) Anthropology 201, 203, 391, 411, Archaeology 201.
3. Upper-Year Courses: 6 units (1.0 full-course equivalent) Anthropology 400, 421, 427, 467, 479, 501, 523, 541.

Note: The following courses may be used to satisfy this requirement but are not counted in the major field:
- African Studies 301
- Archaeology 345, 355, 399, 439
- Development Studies 403
- Anthropology 573.

4. Anthropology Options: 27 units (4.5 full-course equivalents) from the Field of Anthropology.

5. Capstone Honours Seminar: 3 units (0.5 full-course equivalent) Anthropology 573.

C. DEGREE OPTIONS

The BA Honours in Social and Cultural Anthropology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: Students contemplating applying to enter a graduate program in Anthropology or seeking an applied research position are encouraged to include among their open options a Statistics or Quantitative Methods course.

4.4.3 BSc in Anthropology

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 45 (7.5 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Anthropology while fulfilling the following requirements:

1. Core: 21 units (3.5 full-course equivalents) Anthropology 201, 203, 309, 311, 350, Archaeology 201.
2. Upper-Year Courses: 12 units (2.0 full-course equivalents) Anthropology 400, 412, 413, 425, 435, 441, 451, 505, 552, 553, 589; Archaeology 437, 533, 555, 595.
3. Options: An additional 12 units (2.0 full-course equivalents) from the Field of Anthropology.

C. OTHER REQUIREMENTS

1. Biological Requirement: 3 units (0.5 full-course equivalent) from any 200- or 300-level Biology course.

D. DEGREE OPTIONS

The BSc Honours in Anthropology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: Students enrolled in the BSc Honours program are advised to consult with the Undergraduate Director on the choice of both options and courses within the Major Field. Students should normally select their options from Archaeology, Linguistics, Psychology, Statistics, and Biological Sciences offerings.

4.4.5 Minor in Anthropology

The Minor in Anthropology is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Anthropology, including:

1. 9 units (1.5 full-course equivalents) Anthropology 201, 203, Archaeology 201.
2. An additional 21 units (3.5 full-course equivalents) from the Field of Anthropology with at least 15 units (2.5 full-course equivalents) at the 300 level or above.

4.4.6 BA in Archaeology

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

BA students must successfully complete a minimum of 45 (7.5 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Archaeology while fulfilling the following requirements:

1. Core: 12 units (2.0 full-course equivalents) Archaeology 201, 451, Anthropology 201, 203.
2. Regional Archaeology: 6 units (1.0 full-course equivalent) from Archaeology 303, 317, 321, 335, 341, 343, 351, 353, 357, 395, 401, 423, 437, 439, 455, 521, 537.

*Archaeology 306 counts as 3 units (0.5 full-course equivalent) for the Archaeological Techniques requirement; and the other 3 units (0.5 full-course equivalent) counts towards Archaeology Options.

4. Traditional Knowledge: 6 units (1.0 full-course equivalent) from Archaeology 307, 345, 355, 357, 399, 411, 419.

Note: The following courses may be used to satisfy this requirement but are not counted in the major field: Anthropology 317, 319, 321, 329, 355.

5. Archaeology Options: At least 15 units (2.5 full-course equivalents) from the Field of Archaeology.

Note: If Anthropology courses were used to fulfill requirement 4 above, increase the
The following courses may be used to fulfill requirement 4 above, increase the number of options by the number of Anthropology courses used.

6. 500-level Courses: Inclusive of the courses used to fulfill requirements 2-5 above, 6 units (1.0 full-course equivalent) from Archaeology 503, 505, 506, 515, 521, 523, 531, 533, 537, 555, 591, 593, 595, Anthropology 589.

C. DEGREE OPTIONS

The BA in Archaeology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.4.7 BSc in Archaeology

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

BSc students must successfully complete a minimum of 48 (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Archaeology while fulfilling the following requirements:

2. Regional Archaeology: 6 units (1.0 full-course equivalent) from Archaeology 303, 317, 321, 335, 341, 343, 351, 353, 357, 395, 401, 423, 437, 439, 455, 521, 537.

Note: The following courses may be used to satisfy this requirement but are not counted in the major field: Anthropology 317, 319, 321, 329, 355.

5. Archaeology Options: At least 15 units (2.5 full-course equivalents) from the Field of Archaeology.

Note: If Anthropology courses were used to fulfill requirement 4 above, increase the number of options by the number of Anthropology courses used.

6. 500-level Courses: Inclusive of the courses used to fulfill requirements 2-5 above, 6 units (1.0 full-course equivalent) from Archaeology 503, 505, 506, 515, 521, 523, 531, 533, 537, 555, 591, 593, 595, Anthropology 589.

7. Natural Science Requirement: Inclusive of the courses used to fulfill requirements 1-6 above, students must include in their degree a minimum of 48 units (8.0 full-course equivalents) from the lists of Courses with a Natural Science Emphasis.

Note: The Department may determine whether Anthropology 490, 505, 531, and 597 can be used as a Natural Sciences course, depending on the topic.

C. DEGREE OPTIONS

The BSc in Archaeology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.4.8 BA Honours Archaeology

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

BA students must successfully complete a minimum of 51 (8.5 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Archaeology while fulfilling the following requirements:

1. Core: 15 units (2.5 full-course equivalents): Anthropology 201, 451, 505, Anthropology 201, 203.

2. Regional Archaeology: 9 units (1.5 full-course equivalents) from Archaeology 303, 317, 321, 335, 341, 343, 351, 353, 357, 395, 401, 423, 437, 439, 455, 521, 537.

*Archaeology 306 counts as 3 units (0.5 full-course equivalent) for the Archaeological Techniques requirement. The remaining 3 units (0.5 full-course equivalent) would count towards partial fulfillment of the Archaeology Options requirement.

4. Traditional Knowledge: 6 units (1.0 full-course equivalent) from Anthropology 307, 345, 355, 357, 399, 411, 419.

Note: The following courses may be used to satisfy this requirement but are not counted in the major field: Anthropology 317, 319, 321, 329, 355.

5. Archaeology Options: At least 9 units (1.5 full-course equivalents) from the Field of Archaeology.

Note: If Anthropology courses were used to fulfill requirement 4 above, increase the number of options by the number of Anthropology courses used.

6. Honours Thesis: 6 units (1.0 full-course equivalent) Archaeology 596 or 598.

C. OTHER REQUIREMENTS

1. Geology/Geography Requirement: 6 units (1.0 full-course equivalent) consisting of either (a) Geology 201 and 202 or (b) Geography 211 and 307.

2. Language/Computer Science Requirement: 6 units (1.0 full-course equivalent) consisting of:
   a. Linguistics 201 and 353;
   b. Computer Science 203 and 231 (or equivalents); or
   c. 6 units (1.0 full-course equivalent) in a language other than English.

3. Statistics Requirement: 3 units (0.5 full-course equivalent) from Geography 339, 439; Psychology 300; Sociology 311, 315; Statistics 213, 217.

D. DEGREE OPTIONS

The BA Honours in Archaeology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:

• A language other than English is recommended for Honours students, especially those considering graduate work in Archaeology.

• It is strongly recommended that Honours students take the field school courses, Archaeology 306 and Archaeology 506, or other department-approved field-school courses. Students must obtain a letter of permission from the Faculty of Arts through their Student Centre prior to attending a field school run by another university.

4.4.9 BSc Honours Archaeology

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

BSc students must successfully complete a minimum of 54 (9.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Archaeology while fulfilling the following requirements:

2. Regional Archaeology: 9 units (1.5 full-course equivalents) from Archaeology 303, 317, 321, 335, 341, 343, 351, 353, 357, 395, 401, 423, 437, 439, 455, 521, 537.

*Archaeology 306 counts as 3 units (0.5 full-course equivalent) for the Archaeological Techniques requirement. The remaining 3 units (0.5 full-course equivalent) would count towards partial fulfillment of the Archaeology Options requirement.

4. Traditional Knowledge: 6 units (1.0 full-course equivalent) from Anthropology 307, 345, 355, 357, 399, 411, 419.

Note: The following courses may be used to satisfy this requirement but are not counted in the major field: Anthropology 317, 319, 321, 329, 355.

5. Archaeology Options: At least 9 units (1.5 full-course equivalents) from the Field of Archaeology.

Note: If Anthropology courses were used to fulfill requirement 4 above, increase the number of options by the number of Anthropology courses used.

6. Honours Thesis: 6 units (1.0 full-course equivalent) Archaeology 596 or 598.

C. OTHER REQUIREMENTS

1. Geology/Geography Requirement: 6 units (1.0 full-course equivalent) consisting of either (a) Geology 201 and 202; or (b) Geography 211 and 307.

2. Language/Computer Science Requirement: 6 units (1.0 full-course equivalent) consisting of:
   a. Linguistics 201 and 353;
   b. Computer Science 203 and 231 (or equivalents); or
   c. 6 units (1.0 full-course equivalent) in a language other than English.

3. Statistics Requirement: 3 units (0.5 full-course equivalent) from Geography 339, 439; Psychology 300; Sociology 311, 315; Statistics 213, 217.

4. Traditional Knowledge: 6 units (1.0 full-course equivalent) from Anthropology 307, 345, 355, 357, 399, 411, 419.

Note: The following courses may be used to satisfy this requirement but are not counted in the major field: Anthropology 317, 319, 321, 329, 355.

5. Archaeology Options: At least 9 units (1.5 full-course equivalents) from the Field of Archaeology.

Note: If Anthropology courses were used to fulfill requirement 4 above, increase the number of options by the number of Anthropology courses used.

6. Honours Thesis: 6 units (1.0 full-course equivalent) Archaeology 596 or 598.

7. Natural Science Requirement: Inclusive of the courses used to fulfill requirements 1–6 above, students must include in their degree a minimum of 48 units (8.0 full-course equivalents) from...
1. Core Courses: 12 units (2.0 full-course equivalents): Development Studies 201, 393, Economics 201, 203.
2. Research Methods Requirement: 3 units (0.5 full-course equivalent) from Anthropology 411, Communication and Media Studies 313, Geography 340, History 300, Political Science 399, Sociology 311, 313.
3. Development Studies Options: An additional 30 units (5.0 full-course equivalents) chosen from the Field of Development Studies.
4. Upper-Level Options: Inclusive of the courses used to fulfill requirements 2-3 above, at least 6 units (1.0 full-course equivalent) must be at the 400 level or above including at least 3 units (0.5 full-course equivalent) labelled Development Studies.
5. Capstone Seminar: 3 units (0.5 full-course equivalent) Development Studies 591.

C. OTHER REQUIREMENTS

Language Requirement: 6 units (1.0 full-course equivalent) in a modern language other than English. Students should select a language that will assist in their research or complement a regional focus.

D. DEGREE OPTIONS

The BSc Honours in Development Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.4.13 Minor in Development Studies

The Minor in Development Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) from the Field of Development Studies with at least 18 units (3.0 full-course equivalents) at the 300 level or above including:

1. 6 units (1.0 full-course equivalent) Development Studies 201, 393.
2. An additional 24 units (4.0 full-course equivalents) from the Field of Development Studies.

Note: In addition to the requirements for the minor, competence in a modern language other than English is highly recommended.

4.4.14 Minor in African Studies

The Minor in African Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) including:

2. Ethnography: 6 units (1.0 full-course equivalent) from Anthropology 317, 319, Archaeology 399, 439, Political Science 371.
3. Senior-Level Courses: At least 18 additional units (3.0 full-course equivalents) from the Field of African Studies at the 300 level or above.

Notes:

• The Department may approve additional courses in category 3 when they have significant African emphasis. For example, in some years Archaeology 531; Film 301; Economics 337; Geography 365, 425, 593; Political Science 279, 579; Religious Studies 349 and/or Sociology 487 may be approved.
• In addition to the courses mentioned above, competence in a language (other than English) appropriate to the study of Africa is highly desirable.

4.5 Archaeology

See Anthropology and Archaeology.
4.6 Applied Energy Economics - Collaborative Program
See Economics.

4.7 Architectural Studies
The Minor in Architectural Studies is now administered and delivered by the Faculty of Environmental Design. Please consult their section of the calendar at: ucalgary.ca/pubs/calendar/current/ev-4.html.

4.8 Art
Overview of Programs and Procedures
Baccalaureate Degrees Offered
Bachelor of Arts (BA) in Art History
Bachelor of Fine Arts (BFA) in Visual Studies
Bachelor of Fine Arts Honours in Visual Studies
Bachelor of Fine Arts (BFA) in Visual Studies with Co-operative Education
Bachelor of Fine Arts Honours in Visual Studies with Co-operative Education
Concurrent BFA in Visual Studies/Bachelor of Education
Notes:
• For the BFA or BFA Honours in Visual Studies students may choose a Concentration in Art Education or a Concentration in Media Arts.
• A Minor is offered in Visual Studies and Art History.
• The Department of Art offers a Minor in Museum and Heritage Studies.

Introduction
The Department of Art is committed to the study and practice of the visual arts as these relate to:
(a) Creative research in art practices (studio);
(b) Educational practice and theory (Art Education); and
(c) Critical study of art in its diverse historical and cultural settings (Art History).

Students in the BFA and BFA Honours (Visual Studies) are involved in creative research and visual art practices that engage with contemporary society. The courses of study enable the student to develop conceptual understanding in the visual arts, to develop a foundation of knowledge and practice of artistic self-sufficiency, to develop creative processes of planning in order to carry out their various studio interests, and to teach art in the elementary or secondary school systems or to work as art specialists in other settings. The program enables the individual student to determine through studio practice the understandings and insights that support their own artistic and intellectual development. Students interested in teacher certification may pursue the concurrent degree program with the Werklund School of Education, which offers three years of study in the Visual Studies program and two years in the Bachelor of Education program. The Visual Studies program provides a core of work in the theory and methodology of art education, as well as a foundation in studio art and Art History.

The BA (Art History) engages students in critical and creative analysis of art objects and cultural forms in a variety of historical, geopolitical, and cultural contexts. The Minor in Museum and Heritage studies is intended to develop a critical and analytical perspective on the issues and future of museum and heritage resources. These encompass national parks and heritage sites, museums and art galleries, archives and historic buildings.

Contact Information
Department Location: Art Building 612
Department Phone: 403.220.5251/403.220.6260
Department Fax: 403.289.7333
Department Email: artdpt@ucalgary.ca

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.

Students wishing to pursue the concurrent BFA (Visual Studies)/BEd degree program should also consult with an advisor at the Werklund School of Education. Advising contact information can be found online: werklund.ucalgary.ca/educ_info/contact-us.

For more specific advice regarding course selection and requirements in the major field, students should consult the Undergraduate Program Director located in the Department of Art (consult Department website for contact information).

Admission to the BFA in Visual Studies
Admission to the BFA (Visual Studies) program is contingent on the evaluation of a portfolio, which must be received by the department by February 1. For information about the portfolio submission process, see the Department of Art website under art.ucalgary.ca/undergraduate/prospective-students#portfolio.

Prospective students must also meet the criteria in the section of this Calendar on the supplemental components can be found on the Department of Art website. The department’s application form must be signed by a thesis supervisor and include a preliminary thesis proposal. To meet the February 1 deadline, it is recommended that students wishing to enrol in the Honours program obtain guidelines and an application form from the Program Co-ordinator no later than December 1. Students are strongly advised to secure a thesis supervisor by December 15.

Limitation of Enrolment
Enrolment in the Visual Studies program is limited, and thus not all qualified applicants may be admitted.

Applicants will be accepted on the basis of their portfolios and their academic standing in high school and/or previous post-secondary education completed.

Students who are accepted must register by the deadline indicated in their letters of acceptance. Admission is not guaranteed to those who do not register by the specified date.

Admission to the BA in Art History
Prospective students wishing to enter the BA (Art History) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Overlapping Programs
Programs in Art History and Visual Studies cannot be taken in conjunction with other programs in Art History or Visual Studies. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees, and Second Baccalaureate Degrees.

Fields of Study Related to Art Programs
Field of Art History
The Field of Art History consists of all courses labelled Art History (ARHI) as well as the following:
• Archaeology 327, 471
• Architectural Studies 201
• Canadian Studies 439
• Communication and Culture 201, 203, 305, 307
• Communication and Media Studies 203, 371, 381, 473
• Drama 345, 347
• Film 301, 305, 307
• Greek and Roman Studies 325, 327, 445, 447
• History 341
• Philosophy 333
• Religious Studies 346, 399

Field of Art
The Field of Art consists of all courses labelled Art (ART) and Art History (ARHI).
### Field of Museum and Heritage Studies

The Field of Museum and Heritage Studies consists of the following courses:

- All courses labelled Museum and Heritage Studies (MHST)
- Anthropology 203
- Archaeology 201, 303, 306, 307, 415, 417, 419
- Art courses at the 300 level or above
- Art History 201, 203 and all Art History (ARHI) courses at the 300 level or above
- Astronomy 207, 209
- Biology 307
- All Canadian Studies 300-level and above
- Communication and Culture 201, 203, 507
- Communication and Media Studies 313
- Development Studies 485
- Drama 223, 225, 313, 319
- Geography 251, 361
- Geology 201 or 209, 202
- Greek and Roman Studies 321, 325, 327, 445
- History 333, 337, 340, 341, 347, 357, 437, 476
- Marketing 341
- Philosophy 333
- Political Science 357
- Religious Studies 205
- Tourism Management 409

**Notes:**

- Students taking degrees with majors that require Communication and Culture 201, 203, or Communication and Media Studies 313 may not count these courses as part of the Museum and Heritage Studies Minor.
- Credit will not be given for both Geology 201 and 209.

### 4.8.1 BFA in Visual Studies

**A. FACULTY OF ARTS REQUIREMENTS**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. MAJOR-FIELD REQUIREMENTS**

The BFA in Visual Studies requires the successful completion of 75 units (12.5 full-course equivalents) to 96 units (16.0 full-course equivalents) in the Field of Art with the following requirements:

<table>
<thead>
<tr>
<th>Units</th>
<th>Course Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 units (1.5 full-course equivalents)</td>
<td>Art 301, 327, 329, 397, 399</td>
</tr>
<tr>
<td>3 units (0.5 full-course equivalent)</td>
<td>from Art 309, 342, 344</td>
</tr>
<tr>
<td>9 units (1.5 full-course equivalents)</td>
<td>Art 401, 465, 499</td>
</tr>
</tbody>
</table>

### 4.8.2 BFA Honours Visual Studies

The Honours degree in Visual Studies is an advanced undergraduate program for students seeking a more focused studio experience, aspiring to careers as practicing and professional artists, or considering further graduate level study in an MFA program. The Honours degree requires students to complete a minimum of 15 units (2.5 full-course equivalents) in the Field of Art beyond the requirements for the general BFA in Visual Studies. A high standard of creative achievement is required for admission, continuation, and completion.

**C. OTHER REQUIREMENTS**

- 3 units (0.5 full-course equivalent) in English.

**D. DEGREE OPTIONS**

The BFA Honours in Visual Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements. The BFA Honours in Visual Studies can be taken with a concentration in Art Education (see section 4.8.5).

### 4.8.3 BA in Art History

**A. FACULTY OF ARTS REQUIREMENTS**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. MAJOR-FIELD REQUIREMENTS**

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 (10.0 full-course equivalents) in the Field of Art History while fulfilling the following requirements:

1. **Core Courses:**
   - a. 15 units (2.5 full-course equivalents) Art History 201, 203, 211, 431, 511.
   - b. 3 units (0.5 full-course equivalent) Art History 331 or 333.
2. **Art History:** 12 units (2.0 full-course equivalents) in courses labelled Art History.
3. **Field of Art History Options:** 12 units (2.0 full-course equivalents) in courses from the Field of Art History.

**C. OTHER REQUIREMENTS**

- 1. English: 6 units (1.0 full-course equivalent) in English.
- 2. Arts: 6 units (1.0 full-course equivalent) in courses labelled Art.

**Note:** It is recommended that students take at least 3 units (0.5 full-course equivalent) in a language other than English.

### 4.8.4 Concurrent BFA (Visual Studies)/BEd

**Introduction**

This five-year program leads to a Bachelor of Education from the Werklund School of Education and a Bachelor of Fine Arts in Visual Studies from the Faculty of Arts. A minimum of 150 units (25.0 full-course equivalents) must be successfully completed.

Present certification requirements of the Province of Alberta can be satisfied. When planning courses, students should take into consideration Alberta Teacher Certification Requirements. For details, refer to the Werklund School of Education website.

**Admission**

Students must meet the admissions requirements for the Werklund School of Education and the BFA (Visual Studies) program (see the Overview of Programs and Procedures) as well as the requirements of the Faculty of Arts (see A.2 Undergraduate Admission). Note that admission to the BFA (Visual Stud-
ies) program is contingent on the evaluation of a portfolio (see “Admission to the BFA in Visual Studies”).

**Faculty of Arts Requirements**

**A. FACULTY OF ARTS REQUIREMENTS FOR CONCURRENT DEGREES**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. MAJOR-FIELD REQUIREMENTS**

**BFA Visual Studies Requirements**

Students must successfully complete 69 units (1.5 full-course equivalents) to 90 units (1.5 full-course equivalents) in the Field of Art with the following requirements:

- 45 units (7.5 full-course equivalents) from the following required courses:
  - 12 units (2.0 full-course equivalents) Art 231, 233, 235, 241
  - 3 units (0.5 full-course equivalent) Art History 201 or 203
  - 6 units (1.0 full-course equivalent) Art History 331, 333
  - 15 units (2.5 full-course equivalents) Art 309, 327, 329, 342, 344, 399
  - 3 units (0.5 full-course equivalent) Art 301 or Art 401
  - 3 units (0.5 full-course equivalent) Art 491
  - 3 units (0.5 full-course equivalent) Art 509
  - 24 units (4.0 full-course equivalents) from the Field of Art at the 300 level or above

**C. OTHER REQUIREMENTS**

- 3 units (0.5 full-course equivalent) in English

**Werklund School of Education Requirements**

Students in this program must meet the requirements for the BEd degree set by the Werklund School of Education.

**4.8.5 Concentration in Art Education**

Students may focus their BFA in Visual Studies by including a specified set of courses in their Major or Honours degree. The designation "Art Education Concentration" will appear on the transcripts of Majors who have completed the following courses in fulfillment of their BFA (Visual Studies) degree:

- 9 units (1.5 full-course equivalents) Art 309, 342, 344
- 6 units (1.0 full-course equivalents) Art 411, 491
- 3 units (0.5 full-course equivalent) Art 509
- 3 units (0.5 full-course equivalent) Communication and Culture 507

**Note:** If students wish to enhance their experience in Art Education the following courses are recommended: Development Studies 201, Education 201, Museum and Heritage Studies 201 and Social Work 201.

**4.8.6 Minor in Visual Studies and Art History**

The Minor in Visual Studies and Art History is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Art (including all courses labelled Art and Art History) with at least 18 units (3.0 full-course equivalents) at the 300 level or above.

**Note:** Students are also encouraged to take Art History 201 and 203.

**4.8.7 Concentration in Media Arts**

In addition to offering comprehensive programs in the visual and performing arts, the Faculty of Arts is committed to exploring relationships among the arts that are fostered by new media technologies. For students majoring in Dance, Drama, Music and Visual Studies the concentration must include courses from at least two areas other than the student's major program. For students whose major is other than Dance, Drama, Music or Visual Studies the concentration must include courses from at least two of the areas listed below. Anyone interested in acquiring this concentration should consult with an advisor for art, dance, drama or music at an early stage of planning as some of the courses listed below have prerequisites and/or may not always be offered every year.

**Requirements**

Students can acquire a Concentration in Media Arts by selecting a minimum of 18 units (3.0 full-course equivalents) from the following:

- Dance 571
- Drama 317
- Fine Arts 507
- Music 351, 451, 453

**4.8.8 Minor in Museum and Heritage Studies**

The Minor in Museum and Heritage Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 (5.0 full-course equivalents) with at least 18 units (3.0 full-course equivalents) at the 300 level or above, including:

1. 12 units (2.0 full-course equivalents) Museum and Heritage Studies 201, 331, 433, 533.
2. An additional 18 units (3.0 full-course equivalents) from the Field of Museum and Heritage Studies.

**4.9 Art History**

See Art.

**4.10 Asian Studies**

For South Asian Studies, see Classics and Religion. For East Asian Studies see School of Languages, Linguistics, Literatures and Cultures.

**4.11 Canadian Studies**

See History.

**4.12 Chinese**

See School of Languages, Linguistics, Literatures and Cultures.

**4.13 Classics and Religion**

**Overview of Programs and Procedures**

**Baccalaureate Degrees Offered**

Degrees in Ancient and Medieval History

- BA in Ancient and Medieval History
- BA in Ancient and Medieval History with Co-operative Education
- BA Honours in Ancient and Medieval History
- BA Honours in Ancient and Medieval History with Co-operative Education

Degrees in Greek and Roman Studies

- Bachelor of Arts (BA) in Greek and Roman Studies
- BA in Greek and Roman Studies with Co-operative Education
- BA Honours in Greek and Roman Studies
- BA Honours in Greek and Roman Studies with Co-operative Education

Degrees in Religious Studies

- Bachelor of Arts (BA) in Religious Studies
- BA in Religious Studies with Co-operative Education
- BA Honours in Religious Studies
- BA Honours in Religious Studies with Co-operative Education

**Related Interdisciplinary Degrees (See separate listings)**

- BA in Religious Studies and Applied Ethics
- "Applications to this program are currently suspended. No new admissions will be permitted.

**Notes:**

- Minors are offered in Greek and Roman Studies, Greek, Latin, Religious Studies, and South Asian Studies.
- A Concentration is available in Philosophy and Religion.

**Introduction**

The Department of Classics and Religion offers instruction in Ancient and Medieval History, Greek and Roman Studies, and Religious Studies.

**Ancient and Medieval History:** The BA and BA Honours programs in Ancient and Medieval History are offered by the Department of Classics and Religion. There is no Minor program in Ancient and Medieval History. Students considering this Major should consult the Classics and Religion Advisor or Program Director.

The Ancient and Medieval History program examines pre-modern societies around the globe, from those of the Greeks and Romans of antiquity to the European Middle Ages, from the civilizations of the ancient Near East to those of southern and eastern Asia, Africa, and the Americas. To study Ancient and Medieval History is to discover cultures that, while they are unlike our own in many respects, have nevertheless
provided the political, social, religious and intellectual foundations of the modern world.

**Greek and Roman Studies**: Greek and Latin language and literature, in Greek, Roman, and late antique history and archaeology, and in the more general area of ancient Mediterranean civilizations.

Both Greek and Latin may be started at the university. The relevant courses are Greek 201 and Greek 203, and Latin 201 and Latin 203. Advanced placement to Greek 301 or Latin 301 may be granted at the discretion of the Department to those students who have Greek 30, Latin 30 or an equivalent background.

Students majoring in the Department are encouraged to consult with a stream or thematically across streams. Students are required to take a stream or thematically across streams. Students are encouraged to consult with a stream or thematically across streams.

**Religious Studies**: Religious Studies seeks to foster an understanding of the wide variety of religions that have influenced the development of human cultures and that continue to be powerful forces in today's world. Courses examine religious worldviews and their associated texts and practices, movements and institutions, as they appear now and as they have developed over time in many cultures of the world. The Field of Religious Studies is multicultural, i.e., religions from all over the world are the subject of study, including the ancient traditions of Hinduism, Buddhism, Daoism, Confucianism, Judaism, Christianity, and Islam, as well as religious movements of more recent origin. Religious Studies is also multidisciplinary, which means that religion is studied with the use of methods and theories from various disciplines, including history, anthropology, philosophy, sociology, psychology, literary theory, and feminist theory.

Courses in the Field of Religious Studies are divided into three streams: Western Religions, Eastern Religions, and the Nature of Religion. Students are required to take courses in each of the three streams. A student may define a focus of study within a stream or thematically across streams. Students are encouraged to consult with the Department's Undergraduate Advisor regularly throughout their Undergraduate careers.

Students are strongly advised to include in their programs relevant language courses (e.g., Classical Hebrew, Greek, Latin, Sanskrit, Tibetan, Chinese, Japanese, French, German) and relevant courses from other disciplines.

**Contact Information**
Department Office: Social Sciences 558
Phone: 403.220.5886
Fax: 403.210.9191
Email: clare@ucalgary.ca
Website: clare.ucalgary.ca

**For Program Advice**
Students should consult a program advisor in the Arts Students' Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.

For more specific advice regarding course selection and requirements in the major field, students should consult the Undergraduate Program Director located in the Department of Classics and Religion (consult Department website for contact information).

**Admission to the Major**
Prospective students wishing to enter the BA (Ancient and Medieval History), BA (Greek and Roman Studies) or BA (Religious Studies) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

**Admission to Honours**
The Faculty of Arts procedures for Admission to Honours established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. The application deadline is February 1.

**Overlapping Programs**
Programs in Greek and Roman Studies cannot be taken in conjunction with Ancient and Medieval History. This restriction applies to Double Majors, Combined Degrees and Second Baccalaureate Degrees and also to most Major-plus-Minor combinations.

Minors in Greek or Latin may be taken in conjunction with degrees in Ancient and Medieval History.

Minors in Greek or Latin can only be taken in conjunction with the program in Linguistics and Language if the Language Option for that program differs from the language of the Minor.

Programs in Religious Studies cannot be taken in conjunction with programs in Religious Studies and Applied Ethics. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees.

**Field of Ancient and Medieval History**
The Field of Ancient and Medieval History consists of the following courses:

- Archaeology 325, 341, 343, 345, 353, 357, 401, 419, 423 and 439
- History 319, 321 and 496
- Philosophy 301, 303, 401, 403 and 501

**Field of Greek and Roman Studies**
The Field of Greek and Roman Studies consists of all courses labelled Greek and Roman Studies (GRST), Greek (GREK), and Latin (LATI).

**Field of Religious Studies**
The Field of Religious Studies consists of all courses labelled Religious Studies (RELS), Philosophy (PHIL) 331, 335, and 527, and Greek and Roman Studies (GRST) 499. Courses in the Field of Religious Studies are divided into Eastern, Western and Nature of Religion streams as indicated in the table under Religious Studies courses of instruction. Religious Studies 373, 399, 491 and 595 will be designated as Western, Eastern or Nature of Religion depending on the topic covered. Religious Studies 377, 577 and 590 are not counted in any of the three streams.

**Field of South Asian Studies**
The Field of South Asian Studies consists of the following courses:

- South Asian Studies 203, 303, 499, 531
- Art History 323
- History 404, 406
- Religious Studies 303, 309, 310, 312, 313, 317, 323, 327, 353, 451, 453

**Notes:**
- When the content is applicable and with permission of the Program Co-ordinator, Archaeology 325; History 205, 301, 307, 488; Political Science 359 and Religious Studies 491 may be used as courses with a focus on South Asia.
- Courses taken on a term abroad program may also be approved. Both individual-study and field-school programs in South Asia are potentially eligible.

4.13.1 BA in Ancient and Medieval History

**A. FACULTY OF ARTS REQUIREMENTS**
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. MAJOR-FIELD REQUIREMENTS**
Students must successfully complete a minimum of 48 (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Ancient and Medieval History while fulfilling the following requirements:

1. **Core Courses**:
   a. 12 units (2.0 full-course equivalents) from Greek and Roman Studies 341, 345, 347; History 319 and 321.
   b. 12 units (2.0 full-course equivalents) from Religious Studies 303, 313, 319, 323, 327, 329, 357, 359, 383, 385 and 387.
2. Advanced Courses: 6 units (1.0 full-course equivalent) from Greek and Roman Studies 415, 417, 419; Religious Studies 451, 453, 461, 469, 484.

3. Ancient and Medieval History Options: An additional 18 units (3.0 full-course equivalents) from the Field of Ancient and Medieval History. Courses listed under requirements 1 and 2 but not used to fulfill those requirements may be included.

C. DEGREE OPTIONS
The BA in Ancient and Medieval History can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- 6 units (1.0 full-course equivalent) of Latin is recommended in first year.
- Greek and Roman Studies 205 and History 201 are recommended in first year.

4.13.3 BA in Greek and Roman Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Greek and Roman Studies while fulfilling the following requirements:

1. Core Courses:
   a. 12 units (2.0 full-course equivalents) from Greek and Roman Studies 341, 345, 347; History 319, 321.
   b. 12 units (2.0 full-course equivalents) from Religious Studies 303, 313, 319, 323, 327, 329, 357, 359, 383, 385, 387.

2. Advanced Courses: 6 units (1.0 full-course equivalent) from Greek and Roman Studies 415, 417, 419; Religious Studies 451, 453, 461, 469, 484.

3. Historiography Course: 3 units (0.5 full-course equivalent) Greek and Roman Studies 499.

4. Honours Thesis: 3 units (0.5 full-course equivalent) from Greek and Roman Studies 504, Religious Studies 590.

5. Ancient and Medieval History Options: An additional 15 units (2.5 full-course equivalents) from the Field of Ancient and Medieval History. Courses listed under requirements 1 and 2 but not used to fulfill those requirements may be included.

C. OTHER REQUIREMENTS
Language Requirement to be satisfied by completing one of the following:
- 12 units (2.0 full-course equivalents) courses labelled Greek, OR
- 12 units (2.0 full-course equivalents) courses labelled Latin, OR
- 6 units (1.0 full-course equivalent) in each of two of the following languages: Classical Chinese (Religious Studies 320, 322), Classical Hebrew (Religious Studies 300, 302), Sanskrit (Religious Studies 310, 312), Tibetan (Religious Studies 314, 316), for a total of 12 units (2.0 full-course equivalents)

D. DEGREE OPTIONS
The BA Honours in Ancient and Medieval History can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: Greek and Roman Studies 205; History 201; Latin 201 and 203 are recommended in first year.

4.13.5 Minor in Greek and Roman Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 36 units (6.0 full-course equivalents) in Greek and Roman Studies including:

1. 300-Level Courses: 18 units (3.0 full-course equivalents) from the Field of Greek and Roman Studies while fulfilling the following requirements:
   a. 300-Level Courses: 18 units (3.0 full-course equivalents) labelled Greek and Roman Studies at the 300 level.
   b. Capstone: Greek and Roman Studies 504 and an additional 3 units (0.5 full-course equivalent) at the 500 level from the Field of Greek and Roman Studies (inclusive of courses in Greek and Latin).

2. Upper-Level Courses: An additional 12 units (2.0 full-course equivalents) at the 400 or above from the Field of Greek and Roman Studies (inclusive of courses in Greek and Latin).

3. Greek and Roman Studies Options: 30 units (5.0 full-course equivalents) from the Field of Greek and Roman Studies (inclusive of courses in Greek and Latin). Greek and Roman Studies 205 and 209 are recommended in first year.

4. Language Requirement: 18 units (3.0 full-course equivalents) in either Greek (GREK) or Latin (LATI) or 12 units (2.0 full-course equivalents) in each of these languages. Courses taken in Greek and/or Latin also count toward requirements 2 or 3 as applicable.

C. DEGREE OPTIONS
The BA Honours in Greek and Roman Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: For requirements 3 and 4, up to 6 units (1.0 full-course equivalent) may be substituted from Philosophy 301 and 501 and History 319.

4.13.6 Minor in Greek
The Minor in Greek is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must complete between 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in Greek and Roman Studies including:

1. 300-Level Courses: 18 units (3.0 full-course equivalents) labelled Greek and Roman Studies at the 300 level.

2. Upper-Level Courses: 6 units (1.0 full-course equivalent) from the Field of Greek and Roman Studies at the 400 or 500 levels.

3. Greek and Roman Studies Options: 6 units (1.0 full-course equivalent) at the 200 level or above from the Field of Greek and Roman Studies (inclusive of courses in Greek and Latin). Greek and Roman Studies 205 and 209 are recommended in first year.
Students must complete between at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Greek and Roman Studies, of which:

a. at least 18 units (3.0 full-course equivalents) must be labelled as Greek (GREK); and
b. at least 18 units (3.0 full-course equivalents) must be at the 300 level or above.

Note: The Minor in Greek is especially appropriate for students enrolled in Major programs such as English, French, History, Philosophy, and Religious Studies.

4.13.7 Minor in Latin
The Minor in Latin is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must complete between 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Greek and Roman Studies, of which:

a. at least 18 units (3.0 full-course equivalents) must be labelled as Latin (LATI); and
b. at least 18 units (3.0 full-course equivalents) must be at the 300 level or above.

Note: The Minor in Latin is especially appropriate for students enrolled in Major programs such as English, French, History, Philosophy, and Religious Studies.

4.13.8 BA in Religious Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 42 (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Religious Studies while fulfilling the following requirements:

1. Western and Eastern Religions: 6 units (1.0 full-course equivalent) from the “Western Religions” Stream and 6 units (1.0 full-course equivalent) from the “Eastern Religions” Stream. (See note below.)

2. Nature of Religion: 6 units (1.0 full-course equivalent) from the “Nature of Religions” Stream including at least 3 units (0.5 full-course equivalent) from Religious Studies 437 or 447.

4. Religious Studies Options: 21 units (3.5 full-course equivalents) from the Field of Religious Studies.

5. Inclusive of the courses used in requirements 1 - 4 above, at least 36 units (6.0 full-course equivalents) must be at the senior level (300 and above) of which 12 units (2.0 full-course equivalents) must be at the 400 level or above.

C. OTHER REQUIREMENTS
Language Requirement: 6 units (1.0 full-course equivalent) in a language other than English.

D. DEGREE OPTIONS
The BA in Religious Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- The list of courses that fulfill the requirements for the “Eastern Religions” stream, the “Western Religions” stream and the “Nature of Religions” stream are located before the Religious Studies courses in the “Courses of Instruction” section of this calendar.
- Religious Studies 201 and 203 are recommended.
- Students are strongly advised to include in their programs relevant language courses (e.g., Classical Hebrew, Greek, Latin, Sanskrit, Tibetan, Chinese, Japanese, French, German) and relevant courses from other disciplines. Language courses labelled Religious Studies can be counted as part of the 42 units (7.0 full-course equivalents) in Religious Studies.
- In planning their programs, students should bear in mind that language courses and some senior courses are not offered every year.

4.13.9 BA Honours in Religious Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 60 and a maximum of 72 units (10-12 full-course equivalents) in the Field of Religious Studies while fulfilling the following requirements:

1. Western and Eastern Religions: 6 units (1.0 full-course equivalent) from the “Western Religions” Stream and 6 units (1.0 full-course equivalent) from the “Eastern Religions” Stream. (See note below.)

2. Nature of Religion: 6 units (1.0 full-course equivalent) from the “Nature of Religions” Stream including at least 3 units (0.5 full-course equivalent) from Religious Studies 437 or 447.

5. Religious Studies Options: 33 units (5.5 full-course equivalents) in the Field of Religious Studies.

6. Inclusive of the courses used in requirements 1-5 above, at least 42 units (7.0 full-course equivalents) must be at the senior level (300 level and above) of which 18 units (3.0 full-course equivalents) must be at the 400 level or above.

C. OTHER REQUIREMENTS
Language Requirement: 6 units (1.0 full-course equivalent) in a language other than English.

D. DEGREE OPTIONS
The BA Honours in Religious Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- The lists of courses that fulfill the requirements for the “Eastern Religions” stream, the “Western Religions” stream and the “Nature of Religions” stream are located before the Religious Studies courses in the “Courses of Instruction” section of this calendar.
- Religious Studies 201 and 203 are recommended.
- By the beginning of a student’s final year in the Honours program, a reading knowledge of a language other than English relevant to the topic of the Honours Thesis is normally required. Language courses labelled Religious Studies can be counted as part of the 60 units (10.0 full-course equivalents) in Religious Studies.
- The Honours Thesis is written in Religious Studies 590, usually during the final year of a student’s program, under the direct supervision of a member of the Department. At the end of the year, the student defends the thesis before a committee that consists of three faculty members, of which normally at least two are members of the Department.
- The Honours Thesis in suitable form is to be submitted by the first day of the final examinations scheduled by the Registrar in the Winter Term.
- In planning their programs, students should bear in mind that language courses and some senior courses are not offered every year.

4.13.10 Minor in Religious Studies
The Minor in Religious Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Religious Studies with at least 18 units (3.0 full-course equivalents) at the 300 level or above, including Religious Studies 377. In addition, in each of the three streams — Western Religions, Eastern Religions and Nature of Religion — there must be at least 6 units (1.0 full-course equivalent) (see note below).

Note: The lists of courses that fulfill the requirements for the “Eastern Religions” stream, the “Western Religions” stream and the “Nature of Religions” stream are located before the Religious Studies courses in
the “Courses of Instruction” section of this calendar.

4.13.11 Concentration in Philosophy and Religion
Students completing a BA or BA Honours in Philosophy or Religious Studies can elect to complete a concentration in Philosophy and Religion. This option might be appropriate for students with an interest in the interdisciplinary study of philosophy and religion. The Concentration in Philosophy and Religion cannot be taken in conjunction with a combined or joint or double BA or BA Honours program in Philosophy and Religious Studies or a Major/Minor combination. Students must complete the following:

- 18 units (3.0 full-course equivalents) selected from the following:
  - Philosophy 201, 331, 335, 527
  - Religious Studies 345, 363, 444, 463
  - Other senior-level Philosophy or Religious Studies courses may be accepted when the topic is appropriate. Obtaining approval from the Department of Classics and Religion will be required.

4.13.12 Minor in South Asian Studies
The Minor in South Asian Studies requires students to complete 30 units (5.0 full-course equivalents) in the field, and is intended for students who may be considering graduate studies with a specialization in the field or careers where more extensive knowledge of South Asia would be advantageous. Students should contact the Program Coordinator as early as possible for advice on the program.

Requirements for the Minor
The Minor in South Asian Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) as follows:

1. South Asian Studies 203 and 531.
2. At least 24 units (4.0 full-course equivalents) from Art History 323; History 404, 406; Religious Studies 203, 303, 307, 310, 312, 313, 317, 323, 327, 353, 451, 453; South Asian Studies 303, 499.

4.14 Communication, Media and Film
Overview of Programs and Procedures
Baccalaureate Degrees Offered
Communication and Media Studies
Bachelor of Arts (BA) in Communication and Media Studies
BA in Communication and Media Studies with Co-operative Education
BA Honours in Communication and Media Studies
BA Honours in Communication and Media Studies with Co-operative Education
Bachelor of Communication and Media Studies (BCMS)
Bachelor of Communication and Media Studies with Co-operative Education
Film Studies
Bachelor of Arts (BA) in Film Studies
BA in Film studies with Co-operative Education
BA Honours in Film Studies
BA Honours in Film Studies with Co-operative Education
Bachelor of Film Studies (BFS)
Bachelor of Film Studies (BFS) with Co-operative Education
Science, Technology and Society
Note: Admission to Science, Technology and Society programs have been suspended as of Fall 2015. Students in these programs should consult with the department’s Director of Undergraduate Programs to ensure completion of program requirements in a timely manner.

Bachelor of Arts (BA) in Science, Technology and Society
Bachelor of Science (BSc) in Science, Technology and Society
BA in Science, Technology and Society with Co-operative Education
BSc in Science, Technology and Society with Co-operative Education
BA Honours in Science, Technology and Society
BSc Honours in Science, Technology and Society
BA Honours in Science, Technology and Society with Co-operative Education
BSc Honours in Science, Technology and Society with Co-operative Education

Note: Minors are offered in Communication and Media Studies and Film Studies.

Introduction
The Department of Communication, Media and Film hosts programs in Communication and Media Studies and Film Studies.

Communication and Media Studies
explores the ways in which communication constructs and reflects society and culture. The program emphasizes the theory, criticism, and history of communication through traditional media, new media and popular culture. It also focuses on the theory, critique and production of informative, persuasive and professional discourse in a range of public, media and organizational contexts (e.g., discourses related to identity, health, technology, food and food marketing and the environment).

The program aims to educate flexible and articulate analysts, researchers and practitioners for a wide range of academic, public and professional contexts. It provides graduates with the knowledge, skill and discernment to communicate ideas effectively and to investigate communication in and across a variety of media including speech, writing, television, film, radio and digital media. Our co-operative education and experiential learning opportunities enable students to develop and apply their skills in non-academic contexts.

The Department offers a Bachelor of Arts (BA) in Communication and Media Studies and a Bachelor of Communication and Media Studies (BCMS). Opportunities for further concentration are available via the BA (Honours) in Communication and Media Studies. The BCMS is offered in partnership with SAIT Polytechnic and is intended for students who want the broad interdisciplinary base of knowledge provided by a university degree combined with practical skills in public relations, journalism, new media production, radio, television, and broadcast news provided by a professional diploma program at SAIT or other approved program. A minor program is also offered. Degree requirements are outlined in 4.14.1 to 4.14.3.

Film Studies
situates motion pictures within a wider culture of images and sounds, comprising both contemporary media and diverse historical practices. The program offers students the analytical skills and historical and theoretical frameworks to critically assess contemporary visual culture, and in this way helps to prepare them for careers in film and media criticism; film programming and production; work in cultural institutions; and university research and teaching.

The Department offers a Bachelor of Arts (BA) in Film Studies and a Bachelor of Film Studies (BFS). Students taking a BA in Film Studies will develop a broad understanding of the medium, considering film as an art form, as a cultural industry, and as an innovative and developing technology with social, cultural, and political significance. Opportunities for further concentration are available via the BA (Honours) in Film Studies program. The BFS is offered in partnership with SAIT Polytechnic and is intended for students who want the broad interdisciplinary base of knowledge provided by a university degree combined with practical skills in film, video and new media production. A minor program is also offered. Degree requirements are outlined in 4.14.5 to 4.14.7.

Admission to the Science, Technology and Society programs has been suspended as of Fall 2015. Students in these programs should consult with the department’s Director of undergraduate programs to ensure completion of program requirements in a timely manner.

Contact Information
Department Office: Social Sciences 320
Phone: 403.220.6207
Fax: 403.210.8138
Email: ccapmail@ucalgary.ca
Website: commfilm.ucalgary.ca/

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.
For more specific advice regarding course selection and requirements in the major field, students should consult the Director of Undergraduate Programs in the Department of Communication, Media and Film.

Admission to Major
Prospective students wishing to enter any of the degree programs offered by the Department of Communication, Media and Film must meet the criteria listed in section A.2. Undergraduate Admission of this Calendar. Annual application deadlines are found in A.3 Deadline Dates for Undergraduate Applications for Admission and Transcripts.

Limitation of Enrolment
When demand exceeds capacity, enrolment in the BA Communication and Media Studies will be restricted on a competitive basis.

Admission to Honours
The Faculty of Arts procedures for Admission to Honours established in section, 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. Students wishing to apply to an Honours program must apply online for a change of program to Honours and must submit their completed Honours program application form to the Department of Communication, Media and Film by February 1. Students taking Majors offered by the Department are eligible to apply for the Honours Program only if they have completed at least 63 units (10.5 full-course equivalents).

Honours program applications to the department must include a preliminary Honours thesis proposal and the signature of a faculty member who has agreed to serve as the student's Honours thesis supervisor. Students are strongly advised to secure a supervisor by January 20. The Honours program application form is available at comuc.ucalgary.ca/forms.

Successful applicants to the Honours program must register in Communication and Media Studies 595 and 597 or Film 595 and 597. Further information is available on the department website. Students should also consult with the Honours Program Co-ordinator in the Department of Communication, Media and Film.

Overlapping Programs
The Bachelor of Communication and Media Studies and the Bachelor of Arts in Communication and Media Studies cannot be taken in conjunction with each other. The Bachelor of Film Studies and the Bachelor of Arts in Film Studies also may not be taken in conjunction with each other.

Degree Program Field Requirements
The Field of Communication and Media Studies consists of the following courses:

- All courses labelled Communication and Media Studies (COMS)
- All courses labelled Film Studies (FILM)
- All courses labelled Communication and Culture (CMCL)
- Anthropology 303
- Art 235, 251, 311.02, 321, 501, 503
- Art History 319
- Development Studies 485
- English 387, 483, 523
- German 469
- History 341, 495
- Japanese 201, 323, 325
- Linguistics 223, 227, 309
- Marketing 341
- Museum and Heritage Studies 201, 331
- Music 301
- Organizational Behaviour and Human Resources 321
- Philosophy 361
- Political Science 399, 430, 431
- Psychology 203, 345
- Science 311
- Sociology 341, 345, 403.09
- Urban Studies 313

Field of Film Studies
The Field of Film Studies consists of the following courses:

- All courses labelled Film
- Communication and Media Studies 371, 435, 475, 367, 401.43, 581
- Chinese 357
- Fine Arts 507
- French 343, 543
- German 357
- Spanish 573
- Urban Studies 313

Field of Science, Technology and Society
The Field of Science, Technology and Society consists of the following courses:

- The Field of Communication and Media Studies and fulfill (10.0 full-course equivalents) in the Field of Communication and Media Studies or Film 451.
- Courses from the "Domain of Science", for the Science, Technology and Society program, include the courses listed below:
  - All courses offered by the Faculty of Science
  - All courses offered by Schulich School of Engineering
  - All courses labelled Earth Science EASC, and Environmental Science ENSC
  - Anthropology 201, 311, 413, 435, 451, 506, 523, 552, 553, 571, 589
  - Archaeology 201, 306, 413, 415, 417, 437, 453, 471, 506, 515, 523, 533, 555, 595, 596
  - Geography 211, 231, 305, 307, 313, 333, 339, 357, 391, 392, 393, 403, 411, 413, 415, 417, 433, 437, 439, 457, 503, 519, 533, 567, 599
  - Psychology 300, 301, 407, 411, 469, 471, 473, 475, 477, 478, 479, 491, 497, 521, 531, 591

4.14.1 BA in Communication and Media Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS AND RECOMMENDED SEQUENCE
Students must successfully complete 48 units (8.0 full-course equivalents) to 60 units (10.0 full-course equivalents) in the Field of Communication and Media Studies and fulfill the following requirements:

1. Core Courses: 24 units (4.0 full-course equivalents) Communication and Media Studies 201, 203, 313, 369, 371, 381, 591; Communication and Culture 305.
2. 18 units (3.0 full-course equivalents) from courses labelled Communication and Media Studies or Film 451.
3. An additional 6 units (1.0 full-course equivalent) from the Field of Communication and Media Studies.

Note: Communication and Media Studies (COMS) courses were formerly named Communications Studies (COMS). All are COMS courses and considered equivalent for prerequisite purposes.

C. DEGREE OPTIONS
The BA in Communication and Media Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.14.2 BA Honours Communication and Media Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete 60 units (10.0 full-course equivalents) to 72
100 Faculty of Arts

units (12.0 full-course equivalents) in the Field of Communication and Media Studies and fulfill the following requirements:

1. Core Courses: 24 units (4.0 full-course equivalents) Communication and Media Studies 201, 203, 313, 369, 371, 381, 591; Communication and Culture 305.
2. 21 units (3.5 full-course equivalents) from courses labelled Communication and Media Studies or Film 451.
3. An additional 9 units (1.5 full-course equivalents) from the Field of Communication and Media Studies.

4. Undergraduate Thesis: 6 units (1.0 full-course equivalent) Communication and Media Studies 595 and 597, with a grade of “B-” or better in both courses.

Note: Communication and Media Studies (COMS) courses were formerly named Communications Studies (COMS). All are COMS courses and considered equivalent for prerequisite purposes.

C. DEGREE OPTIONS

The BA Honours in Communication and Media Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.14.3 Bachelor of Communication and Media Studies (BCMS)

The Bachelor of Communication and Media Studies degree is offered in partnership with SAIT Polytechnic or an equivalent approved program (see BCMS program requirements below for a list of approved diploma programs). The University of Calgary portion of the degree (72 units or 12.0 full-course equivalents) may be taken either before or after the diploma portion of the degree (48 units or 8.0 full-course equivalents).

Admission

Enrolment in the Bachelor of Communication and Media Studies program is limited. Students requesting admission to this program are assessed within the same pool as those applying to the Bachelor of Arts degree in Communication and Media Studies.

When a student presents a SAIT or equivalent diploma for block transfer credit to the Bachelor of Communication and Media Studies degree, the grade point average for admission to the Communication and Media Studies program will be calculated over the entire diploma.

For the purposes of admission and graduation, no more than 9 units (1.5 full-course equivalents) in the diploma may have a “D” or “D+” grade. Students with excess “D” or “D+” grades will need to upgrade before being considered for admission if the diploma is completed first. If the diploma is completed after the University of Calgary requirements and there are excess “D” or “D+” grades upgrading will be required in order to graduate.

Note: Students must apply separately to an approved diploma program and meet all its admission requirements and application deadlines.

Requirements

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the requirements set out in Faculty of Arts requirements in 3.4.1, inclusive of 48 units (8.0 full-course equivalents) for an applicable diploma.

A maximum of 54 units (9.0 full-course equivalents) will be allowed at the junior or 200 level (including the 24 units (4.0 full-course equivalents) of junior transfer credit received as part of the diploma).

B. COMMUNICATION AND MEDIA STUDIES REQUIREMENTS

2. 12 units (2.0 full-course equivalents) from courses labelled Communication and Media Studies or Film 451, of which 3 units (0.5 full-course equivalent) must be at the 400 level or above.

C. OTHER REQUIREMENT

Applicable Diploma: Completion of one of the following two-year diploma programs from SAIT Polytechnic, or an approved equivalent, with a grade point average of 2.00 on all courses.

• Journalism (Print/Online Journalism; Photojournalism); New Media Production and Design; Radio, Television and Broadcast News; Film and Video Production; Graphic Communications and Print Technology

D. DEGREE OPTIONS

The Bachelor of Communication and Media Studies can be taken with Co-operative Education but students may face sequencing constraints and/or require extra time to complete their programs. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:

• Students should consult a program advisor to ensure they do not exceed the limit for junior-level courses as the diploma transfers as 24 junior-level units.

• Students who are unsuccessful in applying to the post-secondary institution offering the diploma may transfer to the four-year Bachelor of Arts in Communication and Media Studies at the University of Calgary, or any other University of Calgary program for which they qualify. Courses already completed toward the Bachelor of Communication and Media Studies may be applied toward the Bachelor of Arts in Communication and Media Studies.

• Students should enrol in Communication and Media Studies 201, 203, 313, 369, 371, 381 and Communication and Culture 305 as early as possible in their program of study.

• Students completing their diploma in the semester prior to graduation will need to ensure that a transcript recording the diploma conferral is received by the University of Calgary by the transcript deadline date. Due to the processing time required, transcripts received after the deadline will be considered for the next convocation period. Please contact the Arts Students’ Centre for further information.

4.14.4 Minor in Communication and Media Studies

The Minor in Communication and Media Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Communication and Media Studies including:

1. Core Courses: 15 units (2.5 full-course equivalents)
   • 12 units (2.0 full-course equivalents) Communication and Media Studies 201, 203, 371, 381
   • 3 units (0.5 full-course equivalent) Communication and Media Studies 363, 369

2. Communication and Media Studies Options: 15 units (2.5 full-course equivalents) from courses labelled Communication and Media Studies, including 6 units (1.0 full-course equivalent) at the 400 level or above or Film 451.

4.14.5 BA in Film Studies

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Film Studies while fulfilling the following requirements:

1. Core Courses: 12 units (2.0 full-course equivalents) as follows:
   a. 9 units (1.5 full-course equivalents) Film 201, 321 and 591;
   b. 3 units (0.5 full-course equivalent) from Film 331 or 333.

2. Advanced Courses: 15 units (2.5 full-course equivalents) from courses labelled Film at the 400 level or above.

3. Film Options: 21 units (3.5 full-course equivalents) from the Field of Film, with a maximum of 6 units (1.0 full-course equivalent) from courses not labelled Film.

C. DEGREE OPTIONS

The BA in Film Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.14.6 BA Honours Film Studies

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.
B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

Students must successfully complete a minimum of 60 units (10.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Film Studies while fulfilling the following requirements:

1. Core Courses: 12 units (2.0 full-course equivalents):
   a. 9 units (1.5 full-course equivalents) Film 201, 321 and 591;
   b. 3 units (0.5 full-course equivalent) from Film 331 or 333.
2. Advanced Courses: 15 units (2.5 full-course equivalents) from courses labelled Film at the 400 level or above.
3. Film Options: 27 units (4.5 full-course equivalents) from the Field of Film, with a maximum of 6 units (1.0 full-course equivalent) from courses not labelled Film.
4. Undergraduate Thesis: 6 units (1.0 full-course equivalent) Film 595 and 597, with a grade of “B-” or better in both courses.

C. DEGREE OPTIONS

The Honours BA in Film Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.14.7 Bachelor of Film Studies (BFS)

The Bachelor of Film Studies degree is offered in partnership with SAIT Polytechnic. The University of Calgary portion of the degree (72 units or 12.0 full-course equivalents) may be taken either before or after the SAIT portion of the degree (48 units or 8.0 full-course equivalents).

Admission

Enrolment in the Bachelor of Film Studies program is limited. Students requesting admission to this program are assessed within the same pool as those applying to the Bachelor of Arts degree in Film Studies. When a student presents a SAIT or equivalent diploma for block transfer credit to the Bachelor of Film Studies degree, the grade point average for admission to the Film Studies program will be calculated over the entire diploma.

For the purposes of admission and graduation, no more than 9 units (1.5 full-course equivalents) in the diploma may have a “D” or “D+” grade. Students with excess “D” or “D+” grades will need to upgrade before being considered for admission if the diploma is completed first. If the diploma is completed after the University of Calgary requirements and there are excess “D” or “D+” grades upgrading will be required in order to graduate.

Note: Students must apply separately to SAIT Polytechnic and meet all its admission requirements and application deadlines.

Requirements

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the requirements set out in Faculty of Arts requirements in 3.4.1, inclusive of 48 units (8.0 full-course equivalents) for an applicable diploma.

A maximum of 54 units (9.0 full-course equivalents) will be allowed at the junior or 200 level (including the 24 units (4.0 full-course equivalents) of junior transfer credit received as part of the diploma).

B. FILM STUDIES REQUIREMENTS

1. Core Courses: 12 units (2.0 full-course equivalents) as follows:
   a. 9 units (1.5 full-course equivalents) from Film 201, 321; Communication and Media Studies 581.
   b. 3 units (0.5 full-course equivalent) from Film 331 or 333.
2. Advanced Courses: 3 units (0.5 full-course equivalent) from courses labelled Film at the 400 level or above.
3. Film Options: 21 units (3.5 full-course equivalents) from the Field of Film, with a maximum of 6 units (1.0 full-course equivalent) from courses not labelled Film.

C. OTHER REQUIREMENT

Applicable Diploma: Completion of the SAIT Film and Video Production diploma program, or approved equivalent, with a grade point average of 2.00 on all courses.

D. DEGREE OPTIONS

The Bachelor of Film Studies can be taken with Co-operative Education but students may face sequencing constraints and require extra time to complete their programs. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:

- Students who are unsuccessful in applying to SAIT may transfer to the four-year Bachelor of Arts in Film Studies at the University of Calgary, or to any other University of Calgary program for which they qualify. Courses already completed and not more than 36 units (6.0 full-course equivalents) from the Field of Film Studies including:
  1. 6 units (1.0 full-course equivalent) Film 201, 321.
  2. 3 units (0.5 full-course equivalent) Film 331 or 333.
  3. An additional 15 units (2.5 full-course equivalents) from courses labelled Film of which 6 units (1.0 full-course equivalent) be at the 400 level or above.
  4. An additional 6 units (1.0 full-course equivalent) from the Field of Film Studies.

4.14.8 Minor in Film Studies

The Minor in Film Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Film Studies including:

1. 6 units (1.0 full-course equivalent) Film 201, 321,
2. 3 units (0.5 full-course equivalent) Film 331 or 333.
3. An additional 15 units (2.5 full-course equivalents) from courses labelled Film of which 6 units (1.0 full-course equivalent) be at the 400 level or above.
4. An additional 6 units (1.0 full-course equivalent) from the Field of Film Studies.

4.14.9 BA or BSc in Science, Technology and Society

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

If a student accumulates 42 units (7.0 full-course equivalents) or more in the “Domain of Science” in fulfilling the Faculty and Major-Field Requirements listed below, the degree will be awarded as a BSc. Otherwise the degree will be awarded as a BA.

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) in the Field of Science, Technology and Society while fulfilling the following requirements:

1. Core Courses: 33 units (5.5 full-course equivalents) from Science, Technology and Society 327, 343 and 591; Philosophy 367; Communication and Culture 301, 303, 501, 503.
2. History of Science: 3 units (0.5 full-course equivalent) from: History 354, 372, 493.38, 493.39 or 541. Additional courses may be used to satisfy the History of Science requirement. Please consult with the Department.
3. Science, Technology and Society Options: an additional 12 units (2.0 full-course equivalents) chosen from the Field of Science, Technology and Society. (Additional courses from the Faculty of Science approved by the Department.)

C. OTHER REQUIREMENTS

Science Requirement: 3 units (0.5 full-course equivalent) at the 400 level from the Faculty of Science or from Faculty of Arts courses within the “Domain of Science” along with any relevant prerequisites.
D. DEGREE OPTIONS

The Bachelor of Arts in Science, Technology and Society can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.14.10 BA or BSc Honours Science, Technology and Society

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

If a student accumulates 42 units (7.0 full-course equivalents) or more in the "Domain of Science" in fulfilling the Faculty and Major-Field Requirements listed below, the degree will be awarded as a BSc. Otherwise the degree will be awarded as a BA.

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Science, Technology and Society while fulfilling the following requirements:

1. Core Courses: 25 units (5.0 full-course equivalents) from Science, Technology and Society 327, 343, 591; Philosophy 367; Communication and Culture 301, 303, 501, 503.

2. History of Science: 3 units (0.5 full-course equivalent) from History 101, 372, 493.38*, 493.39* or 541. Additional courses may be used to satisfy the History of Science requirement. Please consult with the Department.

3. Science, Technology and Society Options: an additional 12 units (2.0 full-course equivalents) chosen from the Field of Science, Technology and Society. (Additional courses from the Faculty of Science approved by the Department.)

*Courses used to fulfill the requirements for a Major.

C. OTHER REQUIREMENTS

Science Requirement: 3 units (0.5 full-course equivalent) at the 400 level from the Faculty of Science or from Faculty of Arts courses within the "Domain of Science" along with any relevant prerequisites.

D. DEGREE OPTIONS

The BA Honours in Science, Technology and Society can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.14.11 Minor in Science, Technology and Society

The Minor in Science, Technology and Society is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Science, Technology and Society with at least 18 units (3.0 full-course equivalents) at the 300 level or above. The Science, Technology and Society Minor also requires:

1. 12 units (2.0 full-course equivalents) from Science, Technology and Society 325 or 327, 591; Philosophy 367; and one of History 354, 372, 493.38, 493.39 or 541.

2. 9 units (1.5 full-course equivalents) from Science, Technology and Society 201, 325 or 327 (if not used to satisfy item 1. above) 341, 343, 401, 421, 501, 505.

3. An additional 9 units (1.5 full-course equivalents) from the list of “Courses with a Focus on Science, Technology and Society” within the Field of Science, Technology and Society.

4.15 Communications Studies

See Communication, Media and Film.

4.16 Comparative Literature

Overview of Programs and Procedures

Note: Applications to this program are currently suspended.

The Faculty of Arts offers a Minor Field of specialization in Comparative Literature. Students intending to pursue this Minor should consult with the Program Director for selection of the courses appropriate to the Minor and to their interest and background.

Contact Information and Program Advice

For overall program advice, speak to a program advisor in the Faculty of Arts Students’ Centre. Questions about program details should be addressed to the subject advisor in the Departmental Office; please see the Department website for contact information.

Field of Comparative Literature

The Field of Comparative Literature consists of the following courses:

- All courses labelled Comparative Literature (COLT)
- English 517
- French 511
- Philosophy 315

Notes:

- Most of the courses listed above have prerequisites, many of which lie outside the Field of Comparative Literature. It is the student’s responsibility to ensure that prerequisites are completed.
- Additional courses in the Field may be listed on the Faculty of Arts website.

4.16.1 Minor in Comparative Literature

The Minor in Comparative Literature is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) with at least 18 units (3.0 full-course equivalents) at the 300 level or above. In addition, the following specific requirements must be met:

1. Introductory Courses: Comparative Literature 201 and 203 (to be completed as early as possible).
2. Supporting Courses: 12 units (1.0 full-course equivalent) from Comparative Literature 405, 517; English 517; French 511; Philosophy 315.
3. Comparative Literature Options: A minimum of 18 units (3.0 full-course equivalents) in Comparative Literature. Literature courses from various Departments may be substituted for Comparative Literature courses with the approval of the Associate Dean (Undergraduate Programs and Student Affairs).

4. Language Requirement: In addition to English, reading competence is required in another language. This requirement may be met by course work in an ancient or a modern language appropriate to the student’s program or by examination. Language competence is required at a level equivalent to the completion of 12 units (1.0 full-course equivalent) at the 300 level or above in the language in question.

Notes:

- Some of the courses relevant to the Minor have prerequisites.
- Courses used to fulfill the requirements of the Minor may not be used to fulfill requirements for a Major.

4.17 Creative Writing

Effective September 2018, this program is terminated.

4.18 Dance

See School of Creative and Performing Arts.

4.19 Development Studies

See Anthropology and Archaeology.

4.20 Drama

See School of Creative and Performing Arts.

4.21 Earth Science

See Geography.

4.22 East Asian Language Studies

See School of Languages, Linguistics, Literatures and Cultures.

4.23 East Asian Studies

See School of Languages, Linguistics, Literatures and Cultures.

4.24 Economics

Overview of Programs and Procedures

Baccalaureate Degrees Offered

Bachelor of Arts (BA) in Economics

BA in Economics with Co-operative Education

BA Honours in Economics
BA Honours in Economics with Co-operative Education

Notes:
- A Minor is offered in Economics.
- A Minor and a Concentration are offered in Applied Energy Economics

Introduction

The Department of Economics offers instruction in the Field of Economics. The BA Honours program is recommended for students planning to pursue a graduate degree in economics and for those who seek an enriched understanding of the subject at the undergraduate level.

Students are urged to consult regularly with the Economics Advisor and/or designated Faculty members concerning the selection of their courses. Many 300-level courses have an Economics 201 and 203 prerequisites and some have Mathematics or Statistics courses as prerequisites. Economics 301, 303, 357, 359, 387, 389 and 395 are prerequisites for many 400- and 500-level courses, especially those in the Honours program.

Contact Information
Department Office: Social Sciences 454
Phone: 403.220.5857
Fax: 403.282.5262
Email: econ@ucalgary.ca
Website: econ.ucalgary.ca/

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: http://arts.ucalgary.ca/advising.

For more specific advice regarding course selection and requirements in the major field, students should consult the Undergraduate Program Director located in the Department of Economics (consult Department website for contact information).

Admission to the Major
Prospective students wishing to enter the BA (Economics) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Limitation of Enrolment
Due to high demand, admission to the Economics Major is limited. Whenever demand exceeds capacity, enrolment will be limited and students will be admitted on a competitive basis. Admission averages are typically set above the minimum level for the Faculty of Arts. These higher admission standards are applicable to high-school applicants, external transfer applicants from other post-secondary institutions and internal transfer applicants from other programs at the University of Calgary, whether inside or outside the Faculty of Arts.

Admission to Honours
The Faculty of Arts procedures for “Admission to Honours” established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. The application deadline is February 1.

Field of Economics
The Field of Economics consists of all courses labelled Economics (ECON).

4.24.1 BA in Economics

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Economics while fulfilling the following requirements:

1. Core: 21 units (3.5 full-course equivalents) Economics 201, 203, 301, 303, 357, 359 and 395.
2. Upper-Level Courses: 12 units (2.0 full-course equivalents) from the 400- or 500-level, which have one of Economics 301, 303, 357 or 359 as a prerequisite.
3. Economics Options: An additional 9 units (1.5 full-course equivalents) in Economics.

C. OTHER REQUIREMENTS

1. Mathematics Requirement: Mathematics 249 or 265.
2. Statistics Requirement: Statistics 205 or 213.

D. DEGREE OPTIONS

• The BA Honours in Economics can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

• The BA Honours in Economics can be taken with a “Concentration in Applied Energy Economics” (see section 4.24.4).

Notes:
- If a student has an acceptable Minor Field or a concentration of at least 18 units (3.0 full-course equivalents), the Undergraduate Director may reduce the number of courses in Economics required for Honours below 60 units (10.0 full-course equivalents). In all cases, the student must have at least 48 units (8.0 full-course equivalents) and meet requirements 1-3.

• Students are advised to take Mathematics 211, Economics 357 and 395 early in their programs of study because these courses are prerequisites for many 400- and 500-level economics courses.

• For program advice on recommended courses outside the Department, consult the Explicit Syllabus of the Department of Economics at: econ.ucalgary.ca/undergraduate/explicit-syllabus.

4.24.3 Minor in Economics

The Minor in Economics is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) not more than 36 units (6.0 full-course equivalents) from the Field of Economics with at least 18 units (3.0 full-course equivalents) at the 300 level or above.

4.24.4 Minor and Concentration in Applied Energy Economics

Major in Applied Energy Economics (available to non-Economics Majors)

Concentration in Applied Energy Economics (available to Economics Majors)

Note: Applied Energy Economics is not offered as a Major Field of study.

Introduction

The Faculty of Arts offers the Applied Energy Economics program. The Program provides
the historical and institutional background and the basic tools necessary for an understanding of the operation of North American and world energy markets. The program includes the development of analytical and problem-solving skills. Students will benefit from expert instruction by academics at the university.

While it is anticipated that students who graduate with a Minor or Concentration in applied energy economics will enhance their prospects of securing relevant and rewarding employment in the energy sector, additional education and training is recommended for those wishing to take full advantage of the career opportunities in applied energy economics. This typically involves the completion of a master’s degree. Students contemplating graduate work should consult the Department of Economics in the selection of courses.

There are two Applied Energy Economics programs. For the non-Economics major there is a Minor in Applied Energy Economics. For the Economics Major there is a Concentration in Applied Energy Economics. The Minor or Concentration in Applied Energy Economics Concentration will be recorded on a student’s transcript.

Admission

Applications for admission to the program (either the Minor or Concentration in Applied Energy Economics) can be made to the Faculty of Arts. Prior to applying for admission, students must have completed Economics 201 and 203.

For additional information, see the Economics Advisor. For additional information about programs and the Department, visit econ.ucalgary.ca.

Requirements for the Minor in Applied Energy Economics

This Minor, which is available only to students with Major Fields other than Economics, requires the successful completion of a minimum of 30 units (5.0 full-course equivalents) and a maximum of 36 units (6.0 full-course equivalents) from the Field of Economics as follows:

Required Courses: Economics 201, 203, 301, 357, 395 and 493.

Note: Versions of the decentralized courses Economics 399, 499 and 599, which are designated by the Department of Economics, may be used toward the requirement for Applied Energy Economics options.

Requirements for the Concentration in Applied Energy Economics

This Concentration is available only to students pursuing a Degree in Economics. In addition to the requirements for the BA or Honours BA in Economics, students must meet the additional following requirements:

Required Courses: Economics 427, 493.

Notes:

• Students may count the courses used to satisfy the requirements of the concentration toward either the BA or BA Honours in Economics. Depending on the choice of courses for the concentration, students may or may not be able to complete the BA or BA Honours in Economics with the minimum number of credit units.

• Students may be able to take additional “Applied Energy Economics Options” subject to the constraint that those in the BA in Economics are only permitted to take a maximum of 60 units (10.0 full-course equivalents) from the Field of Economics in total while those in the BA Honours in Economics are only permitted to take a maximum of 72 units (12.0 full-course equivalents).

• Students should choose their courses and course sequence in consultation with the Department of Economics. This is particularly important for students who are combining the Concentration in Applied Energy Economics with BA Honours, Co-operative Education, or Combined Degree programs.

• Versions of the decentralized courses Economics 399, 499 and 599, which are designated by the Department of Economics, may be used toward the requirement for Applied Energy Economics options.

4.25 English

Overview of Programs and Procedures in English

Baccalaureate Degrees Offered

Bachelor of Arts (BA) in English
BA in English with Co-operative Education
BA Honours in English
BA Honours in English with Co-operative Education
Concurrent BA in English/Bachelor of Education

Note:

• Minors are offered in English and Medieval, Renaissance and Reformation Studies.

Introduction

Students choosing to major in English may choose to complete either a BA in English or an Honours BA in English. Both are four-year programs. The BA in English and Honours BA in English provide students with a broad education in the history of literature in English and encourage wide exploration of indigenous and global traditions as well as theoretical contexts. Both programs are excellent preparation for careers in education, law, writing, business, and government. Students wanting to enhance their studies with non-academic experience may pursue their degree in tandem with the Co-operative Education program. The Honours BA in English is considered the best preparation for those wanting to pursue graduate studies in English.

The Faculty of Arts offers a Minor Field of specialization in Medieval, Renaissance and Reformation Studies. Students intending to pursue this Minor are encouraged to consult with the Program Director for advice on selecting courses appropriate to the Minor and to their interest and background.

This Minor is designed to provide a multi-disciplinary knowledge of the history, culture and thought of two key periods in the development of the Western European world. At the same time, it allows for specialization in areas of interest such as medieval art and literature, medieval and early modern France, the growth of European empires, or medieval and early modern performance cultures.

The Minor is intended to complement Major programs in related fields, such as History, English and Religious Studies. The Minor is desirable for students contemplating graduate-level work in related fields.

Contact Information

Department Office: Social Sciences 1152
Phone: 403.220.5470
Fax: 403.289.1123
Email: adveng@ucalgary.ca
Website: english.ucalgary.ca/

For Program Advice

Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements.

For more specific advice regarding course selection and requirements in the major field, students should consult the subject advisor located in their home Department (consult Department website for contact information).

Admission to Honours

The Faculty of Arts procedures for “Admission to Honours” established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. The application deadline is February 1.

Admission to the Major

Prospective students wishing to enter the BA (English) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Field of English

The Field of English consists of all courses labelled English (ENGL). It also includes Drama 371, 471 and Linguistics 221.

Note: English Composition (ENCO) courses do not count towards the Major Field in English.

Field of Medieval, Renaissance and Reformation Studies

The Field of Medieval, Renaissance and Reformation Studies consists of the subject areas and courses listed below:
6. **Honours Project:** 6 units (1.0 full-course equivalent) English 504.

7. **English Options:** An additional 24 units (4.0 full-course equivalents) from the Field of English, including at least 18 units (3.0 full-course equivalents) at the 300 level or above, and no more than 6 units (1.0 full-course equivalent) in Drama or Linguistics.

8. **Upper-Year Courses:** Inclusive of the courses used to satisfy requirements 2-6 above, 24 units (4.0 full-course equivalents) must be from courses labelled English at the 400 level or above, of which at least 12 units (2.0 full-course equivalents) must be at the 500 level.

### C. DEGREE OPTIONS

The BA Honours in English can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

**Notes:**
- English 203 and 205 are the recommended first-year courses for English Majors.
- English 302 (Introduction to Literary Theory) is the recommended theory course for English Majors and Honours students.
- With Department consent, students transferring from other institutions may satisfy part or all of the Historical course requirements with transfer courses focusing on the appropriate periods. Students must supply detailed course outlines for each proposed transfer course, in order for such equivalency to be considered.
- English Majors should note that competency in a second language is often required for advanced studies in the field.

### 4.25.2 BA Honours English

#### A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

#### B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 56 units (10.0 full-course equivalents) in the Field of English while fulfilling the following requirements:

1. **Historical Survey of Literature in English:** 6 units (1.0 full-course equivalent) English 305, 307.
2. **Literary Theory:** 6 units (1.0 full-course equivalent) from English 302, 303, 426, 481 515*, 517.
3. **Canadian Literature:** 3 units (0.5 full-course equivalent) from English 372, 471, 473, 509.
4. **Global and Indigenous Perspectives:** 3 units (0.5 full-course equivalent) from English 376, 378, 491, 493, 515*.
5. **Historical Courses pre-1850:** 6 units (1.0 full-course equivalent) from English 401, 403, 405, 406, 410, 411, 412, 413, 429, 431, 438, 441, 461, 495, 499**, 519**.
6. **English Options:** An additional 24 units (4.0 full-course equivalents) from the Field of English including at least 15 units (2.5 full-course equivalents) at the 300 level or above, and no more than 6 units (1.0 full-course equivalent) in Drama or Linguistics.

#### 4.25.3 Minor in English

The Minor in English is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of English, including at least 18 units (3.0 full-course equivalents) labelled English at the 300 level and above.

Inclusive of the regulations above, all English Minors must take:

1. 6 units (1.0 full-course equivalent) of **Historical Survey of Literature in English:** English 305, 307
2. 3 units (0.5 full-course equivalent) of **Literary Theory:** English 302, 303, 481, 426, 515 or 517
3. 3 units (0.5 full-course equivalent) of Canadian Literature: English 372, 471, 473 or 509, and 

4. 3 units (0.5 full-course equivalent) of Global and Indigenous Perspectives: English 376, 378, 491, 493 or 515.

Notes: 
- The department strongly encourages all English Minors, particularly those planning to enter the teaching profession, to take at least one course at the 400 level or above.
- Up to 3 units (0.5 full-course equivalent) selected from the following list may be counted towards the minor field: Drama 371, 471, Linguistics 221, 435.

4.25.4 Minor in Medieval, Renaissance and Reformation Studies

The Minor in Medieval, Renaissance and Reformation Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) with at least 18 units (3.0 full-course equivalents) at the 300 level or above. In addition, at least 6 units (1.0 full-course equivalent) must be completed in each of three of the five Subject Areas comprising the Field of Medieval and Early Modern Studies. No more than 6 units (1.0 full-course equivalent) can be counted from Area 5, Languages.

Notes: 
- Some of the courses listed above have prerequisites or require permission of the department. It is the student’s responsibility to ensure that prerequisites are completed and/or approvals have been received.
- The Program Director may approve additional courses when they have significant Medieval or Early Modern emphasis.

Faculty of Arts

Admission to the Major
Prospective students wishing to enter the BA or BSc (Geography) Program, the BSc (Earth Science) Program or the BA (Urban Studies) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Admission to Honours
The Faculty of Arts procedures for admission to the BA or BSc Honours (Geography) and the BSc Honours (Earth Science) are established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. The application deadline is February 1.

Overlapping Programs
Programs in Geography cannot be taken in conjunction with programs in: Earth Science; Environmental Science or Urban Studies. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees.

Programs in Earth Science can be taken in conjunction with Environmental Science, Geography, Applied and Environmental Geology or Geophysics with approval from the Faculty of Arts. Consent is required for Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees.

Field of Earth Sciences
The Interdisciplinary Field of Earth Science consists of the following courses:

- Archaeology 201, 413, 417, 453, 515, 531, 533.26 and 596
- Earth Science 401 and 501
- Geology 201, 202, 307, 313, 337, 343, 353, 381, 401, 441, 471, 475, 510, 555 and 561
- Geophysics 351, 355, 375, 509 and 565

Field of Geography
The Field of Geography consists of all courses labelled Geography (GEOG). Geography courses are subdivided as follows:

Field of Urban Studies
The Interdisciplinary Field of Urban Studies consists of the following categories and courses:

Core Courses

Urban Studies 253 and 591, Geography 341, 351 and 451.

Research Methods for Urban Studies

The following Research Methods courses are relevant to the Field of Urban Studies:

- A. Qualitative Methods:
  - Anthropology 411; Communication and Media Studies 313; Communication and Media Studies 371; English 302; Geography 340; History 300; Political Science 357; Sociology 313*, 413

Note: Courses of language instruction in a single language other than English or courses conducted in a single language other than English may be used to fulfill the Qualitative Methods requirement. Students must contact the Urban Studies program co-ordinator for approval.

- B. Quantitative Methods:
  - Economics 395; Geography 339, 439; Political Science 399; Sociology 311, 313*, 315; Courses labelled Statistics

*Sociology 313 is taught as either Qualitative or Quantitative. The Urban Studies Program Co-ordinator will determine the methods list into which the particular section will be counted.

C. Geospatial Methods

Geography 357, 437, 457

Urban Studies Options

All courses labelled Urban Studies; Anthropology 479; Archaeology 325; Geography 429, 463, 465, 470, 479; Greek and Roman Studies 325, 327, 445, 447; Political Science 433, 447, 451; Sociology 355, 375, 453, 467, 471, 499. Students admitted to the Architectural Studies minor may use Architectural Studies 457.01, 457.02 towards this requirement. Up to 6 units (1.0 full-course equivalent) from Geography 394, 395 (Overseas Field Schools) may be considered when content is Urban focused. Sociology 499 (Sociology Field School) may also be considered when content is Urban focused.

4.29.1 BA in Geography

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Geography while fulfilling the following requirements:

1. Introduction: 9 units (1.5 full-course equivalents)
2. Geography 211, 231
3. Geography 251 or 253

2. Physical Geography: 6 units (1.0 full-course equivalent) from Geography 365, 367.

3. Human Geography: 9 units (1.5 full-course equivalents) from Geography 321, 341, 351, 361, 365, 367.
4. Analytic Methods: 3 units (0.5 full-course equivalent) Geography 339.
5. Field Studies: 3 units (0.5 full-course equivalent) Geography 391.
6. Regional Geography and/or Overseas Field Studies: 6 units (1.0 full-course equivalent) from Geography 371, 377, 381, 392, 393, 394, 395, 397, 593. Geography 381 is strongly recommended.
7. Upper-Level Courses: 12 units (2.0 full-course equivalents) in Geography at the 400 or 500 level, including at least 6 units (1.0 full-course equivalent) selected from “Human Geography” (List A) or “Other Geography Courses” (List C). (See the Field of Geography.)
8. Human Geography Emphasis: At least 36 units (6.0 full-course equivalents) (inclusive of all courses used to fulfill requirements 1-7 above) from “Human Geography” (List A) and “Other Geography Courses” (List C).

C. OTHER REQUIREMENTS

Academic Writing: 3 units (0.5 full-course equivalent) from Communication and Media Studies 363, 369, Science 311.

D. DEGREE OPTIONS

The BA in Geography can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- Students should consult with the Geography Undergraduate Co-ordinator or advisors concerning their selection of 400- and 500-level courses.
- In meeting requirement 7 pertaining to “Upper-Level Courses,” students should take 12 units (2.0 full-course equivalents) from Lists A and C if they do not wish to take extra courses in the Field of Geography beyond the 48 units (8.0 full-course equivalents) minimum, to meet requirement 8.
- It is strongly recommended that students take Geography 391 at the beginning of the second year.
- Students planning to pursue graduate studies in Geography are advised to take Geography 439.

4.29.2 BSc in Geography

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Geography while fulfilling the following requirements:

1. Introduction: 9 units (1.5 full-course equivalents)
Faculty of Arts

- 6 units (1.0 full-course equivalent) Geography 211, 231
- 3 units (0.5 full-course equivalent) from Geography 251, 253

2. Physical Geography: 6 units (1.0 full-course equivalent) from Geography 305, 307, 313

3. Human Geography: 6 units (1.0 full-course equivalent) from Geography 321, 341, 351, 361, 365, 367.

4. Analytic Methods: 6 units (1.0 full-course equivalent)

- 3 units (0.5 full-course equivalent) Geography 339
- 3 units (0.5 full-course equivalent) from Geography 333, 357, 437, 439.

5. Field Studies: 3 units (0.5 full-course equivalent) Geography 391.

6. Regional Geography and/or Overseas Field Studies: 6 units (1.0 full-course equivalent) from Geography 371, 377, 381, 392, 393, 394, 395, 397, 593.

7. Upper-Level Courses: An additional 12 units (2.0 full-course equivalents) in Geography at the 400 or 500 level, including at least 6 units (1.0 full-course equivalent) selected from "Physical Geography" (List B). The remaining courses should preferably be selected from "Physical Geography" (List B) and "Other Geography Courses" (List C). (See the Field of Geography.)

8. Physical Geography Emphasis: At least 33 units (5.5 full-course equivalents) (inclusive of all courses used to fulfill requirements 1-7 above) from "Physical Geography" (List B) and "Other Geography Courses" (List C).

C. OTHER REQUIREMENTS

1. Academic Writing Requirement: 3 units (0.5 full-course equivalent) from Communication and Media Studies 363, 369, Science 311.

2. Science Requirement: 6 units (1.0 full-course equivalent) from Biology 241, 243; Chemistry 201 or 211, 203 or 213; Computer Science 217, 219, 231, 233; Data Science 211; Mathematics 211 or 213; Mathematics 249 or 265 or 275; Mathematics 267; Physics 211, 221, 223; any senior courses offered by the Faculty of Science and having one of these as a prerequisite.

D. DEGREE OPTIONS

The BSc in Geography can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- Students should consult with the Geography Undergraduate Co-ordinator or advisors concerning their selection of 400- and 500-level courses.
- In meeting requirement 6 and 7 pertaining to "Upper-Level Courses" and "Regional Geography and Overseas Field Studies," students should take at least 15 units (2.5 full-course equivalents) from Lists B and C if they do not wish to take extra courses in the Field of Geography beyond the 48 units (8.0 full-course equivalents) minimum in the process of meeting requirement 8.
- It is strongly recommended that students take Geography 391 at the beginning of the second year.
- Students planning to pursue graduate studies in Geography are advised to take Geography 439.
- Students may need additional prerequisites to enrol in senior-level courses.
- Some of these courses have particular requirements for high school courses in addition to those required for entry into the Faculty of Arts. Please consult the course listings in this Calendar.

4.29.3 BA Honours Geography

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

Students must successfully complete a minimum of 60 units (10.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Geography while fulfilling the following requirements:

1. Introduction:
   - 6 units (1.0 full-course equivalent) Geography 211, 231
   - 3 units (0.5 full-course equivalent) Geography 251 or 253.

2. Physical Geography: 6 units (1.0 full-course equivalent) from Geography 305, 307, 313.

3. Human Geography: 9 units (1.5 full-course equivalents) from Geography 321, 341, 351, 361, 365, 367.

4. Analytic Methods: 3 units (0.5 full-course equivalent) Geography 339.

5. Field Studies: 3 units (0.5 full-course equivalent) Geography 391.

6. Regional Geography and/or Overseas Field Studies: 6 units (1.0 full-course equivalent) from Geography 371, 377, 381, 392, 393, 394, 395, 397, 593. Geography 381 is strongly recommended.

7. Honours Paper: 3 units (0.5 full-course equivalent) Geography 598.

8. Upper-Level Courses: An additional 12 units (2.0 full-course equivalents) in Geography at the 400 or 500 level, including at least 6 units (1.0 full-course equivalent) selected from "Human Geography" (List A). The remaining courses should preferably be selected from "Human Geography" (List A) and "Other Geography Courses" (List C). (See the Field of Geography.)

9. Geography Options: An additional 9 units (1.5 full-course equivalents) from the Field of Geography with at least 0.5 full-course equivalent in "Other Geography Courses" (List C).

10. Human Geography Emphasis: At least 36 units (6.0 full-course equivalents) (inclusive of all courses used to fulfill requirements 1-9 above) from "Human Geography" (List A) and "Other Geography Courses" (List C).

C. OTHER REQUIREMENTS

Academic Writing Requirement: 3 units (0.5 full-course equivalent) from Communication and Media Studies 363, 369 and Science 311.

D. DEGREE OPTIONS

The BA Honours in Geography can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- Students should consult with the Geography Undergraduate Co-ordinator or advisors concerning their selection of 400- and 500-level courses.
- It is strongly recommended that students take Geography 391 at the beginning of the second year.
- Students planning to pursue graduate studies in Geography are advised to take Geography 439.

4.29.4 BSc Honours Geography

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

Students must successfully complete a minimum of 60 units (10.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Geography while fulfilling the following requirements:

1. Introduction:
   - 6 units (1.0 full-course equivalent) Geography 211, 231.
   - 3 units (0.5 full-course equivalent) Geography 251 or 253.

2. Physical Geography: 6 units (1.0 full-course equivalent) from Geography 305, 307, 313.

3. Human Geography: 9 units (1.5 full-course equivalents) from Geography 321, 341, 351, 361, 365, 367.

4. Analytic Methods: 3 units (0.5 full-course equivalent) Geography 339.

5. Field Studies: 3 units (0.5 full-course equivalent) Geography 391.

6. Regional Geography and/or Overseas Field Studies: 6 units (1.0 full-course equivalent) from Geography 371, 377, 381, 392, 393, 394, 395, 397, 593. Geography 381 is strongly recommended.

7. Honours Paper: 3 units (0.5 full-course equivalent) Geography 598.

8. Upper-Level Courses: An additional 12 units (2.0 full-course equivalents) in Geography at the 400 or 500 level, including at least 6 units (1.0 full-course equivalent) selected from "Human Geography" (List A) and "Other Geography Courses" (List C). The remaining
Faculty of Arts

109

courses should preferably be selected from “Physical Geography” (List B) and “Other Geography Courses” (List C). (See the Field of Geography.)

9. Geography Options: An additional 9 units (1.5 full-course equivalents) from the Field of Geography with at least 3 units (0.5 full-course equivalent) in “Other Geography Courses” (List C).

10. Physical Geography Emphasis: At least 33 units (5.5 full-course equivalents) (inclusive of all courses used to fulfill requirements 1-9 above) from “Physical Geography” (List B) and “Other Geography Courses” (List C).

C. OTHER REQUIREMENTS

1. Academic Writing Requirement: 3 units (0.5 full-course equivalent) from Communication and Media Studies 363, 369, Science 311.

2. Science Requirement: a total of 18 units (3.0 full-course equivalents) from the following:
   - 12 units (2.0 full-course equivalents) from Biology 241, 243; Chemistry 201 or 211, 203 or 213; Physics 211, 221, 223;
   - 6 units (1.0 full-course equivalent) from Computer Science 217, 219, 231, 233; Data Science 211; Mathematics 211 or 213; Mathematics 249 or 265 or 275; Mathematics 267.

Any senior courses offered by the Faculty of Science and having one of these as a prerequisite may be substituted for a course in this list.

D. DEGREE OPTIONS

The BSc in Earth Science can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:

- Students should consult with the Geography Undergraduate Co-ordinator or advisors concerning their selection of 400- and 500-level courses.
- In meeting requirement 7-9 pertaining to “Upper-Level Courses,” “Regional Geography and Overseas Field Studies” and “Geography Options,” students should take 12 units (2.0 full-course equivalents) from Lists B and C if they do not wish to take extra courses in the Field of Geography, beyond the 60 units (10.0 full-course equivalents) minimum, to meet requirement 10.
- It is strongly recommended that students take Geography 391 at the beginning of the second year.
- Students planning to pursue graduate studies in Geography are advised to take Geography 439.
- Students may need additional prerequisites to enrol in senior-level courses.
- Some of these courses have particular requirements for high school courses in addition to those required for entry into the Faculty of Arts. Please consult the course listings in this Calendar.

4.29.5 Minor in Geography

The Minor in Geography is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Geography with at least 18 units (3.0 full-course equivalents) at the 300 level or above.

4.29.6 BSc in Earth Science

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete exactly 63 units (10.5 full-course equivalents) in the Field of Earth Science while fulfilling the following requirements:

1. Core Courses:
   - a. 3 units (0.5 full-course equivalent) Archaeology 201
   - b. 3 units (0.5 full-course equivalent) from Archaeology 453, 515, 531, 596;
   - c. 15 units (2.5 full-course equivalents) Geography 211, 231, 305, 313, 391;
   - d. 3 units (0.5 full-course equivalent) Geography 307 or Geology 353;
   - e. 9 units (1.5 full-course equivalents) Geology 201, 202, 313;
   - f. 3 units (0.5 full-course equivalent) Geophysics 351 or 355;
   - g. 3 units (0.5 full-course equivalent) from Geology 307, Geography 417, Archaeology 417, 515, 533.26;
   - h. 3 units (0.5 full-course equivalent) Geophysics 375 or Geography 311;
   - i. 9 units (1.5 full-course equivalents) Geology 337, 343, 381 or 9 units (1.5 full-course equivalents) from Earth Science 401 and 501.1

1. Students who have completed Chemistry 203 may take the Geology sequence.

2. Upper-Level Earth Science Options:
   - 9 units (1.5 full-course equivalents) chosen freely from the following:
     - Archaeology 413
     - Earth Science 401, 501
     - Geography 311, 321, 403, 407, 411, 413, 415, 417, 421, 433, 457, 503, 509, 519
     - Geology 401, 555, 561
     - Geophysics 565

3. Methods: 3 units (0.5 full-course equivalent) Geography 333 or 357.

Note: It is critical that students wishing to major in Earth Sciences complete the prerequisites for Geophysics 351 and 355 (Mathematics and Physics) during the early stages of their program or risk delays in graduation.

C. OTHER REQUIREMENTS

1. Mathematics: 6 units (1.0 full-course equivalent)
   - 3 units (0.5 full-course equivalent) Mathematics 249 or 265 or 275;
   - 3 units (0.5 full-course equivalent) Mathematics 267 or 277

2. Chemistry: 3 units (0.5 full-course equivalent) Chemistry 201 or 211;

3. Physics: 6 units (1.0 full-course equivalent)
   - 3 units (0.5 full-course equivalent) Physics 211 or 221;
   - 3 units (0.5 full-course equivalent) Physics 223

D. DEGREE OPTIONS

The BSc in Earth Science can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.29.7 BSc Honours Earth Science

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

Students must successfully complete a minimum of 66 units (11.0 full-course equivalents) in the Field of Earth Science and fulfill the following requirements:

1. Core Courses:
   - a. 3 units (0.5 full-course equivalent) Archaeology 201
   - b. 3 units (0.5 full-course equivalent) from Archaeology 453, 515, 531, 596;
   - c. 15 units (2.5 full-course equivalents) Geography 211, 231, 305, 313, 391;
   - d. 3 units (0.5 full-course equivalent) from Geology 307 or Geology 353;
   - e. 9 units (1.5 full-course equivalents) from Earth Science 401 and 501.1

   *Students who have completed Chemistry 203 may take the Geology sequence.

2. Upper-Level Earth Science Options: 6 units (1.0 full-course equivalents) from:
   - Archaeology 413
   - Earth Science 401, 501
   - Geography 311, 321, 403, 407, 411, 413, 415, 417, 421, 433, 457, 503, 509, 519
   - Geology 401, 555, 561

**110 Faculty of Arts**

- Geophysics 565
- 3. Methods: 3 units (0.5 full-course equivalent) Geography 333 or 357.
- 4. Capstone: 6 units (1.0 full-course equivalent) Archaeology 596 or Geology 510; or 3 units (0.5 full-course equivalent) Geography 598 and 3 additional units (0.5 full-course equivalent) from #2 above.

**Note:** It is critical that students wishing to major in Earth Sciences complete the prerequisites for Geophysics 351 and 355 (Mathematics and Physics) during the early stages of their program or risk delays in graduation.

**C. OTHER REQUIREMENTS**

1. Mathematics:
   - 3 units (0.5 full-course equivalent) Mathematics 249 or 265 or 275
   - 3 units (0.5 full-course equivalent) Mathematics 267 or 277
2. Chemistry: 3 units (0.5 full-course equivalent) Chemistry 201 or 211
3. Physics
   - 3 units (0.5 full-course equivalent) from Physics 211 or 221
   - 3 units (0.5 full-course equivalent) Physics 223

**D. DEGREE OPTIONS**

The BSc in Earth Science can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

**4.29.8 Minor in Earth Science**

The Minor in Earth Science is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) from the Field of Earth Science including:

- 3 units (0.5 full-course equivalent) Archaeology 201;
- 9 units (1.5 full-course equivalents) from Geography courses within the Field of Earth Science;
- 6 units (1.0 full-course equivalent) Geology 201, 202;
- 6 units (1.0 full-course equivalent) from Geology and/or Geophysics courses within the Field of Earth Science (with the exception of Geology 510);
- 6 additional units (1.0 full-course equivalent) from the Field of Earth Science.

**4.29.9 BA in Urban Studies**

**A. Faculty of Arts Requirements**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. Major-Field Requirements**

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Urban Studies while fulfilling the following requirements:

1. **Core Courses:**
   - a. 15 units (2.5 full-course equivalents) Urban Studies 253, 591; Geography 341, 351, 451;
   - b. 6 units (1.0 full-course equivalent) from Anthropology 379; Canadian Studies 355; Economics 365; Geography 521, 553, 565; History 354; Political Science 425; Sociology 353; Urban Studies 311.
2. **Research Methods:** 12 units (2.0 full-course equivalents) from the “Research Methods for Urban Studies” (listed under Field of Urban Studies) with:
   - a. 6 units (1.0 full-course equivalent) from any one of the “Qualitative Methods”, “Quantitative Methods” or “Geospatial Methods” lists;
   - b. 6 units (1.0 full-course equivalent) selected from the other two “Methods” lists.
   - c. An additional 15 units (2.5 full-course equivalents) from the Field of Urban Studies including Core, Methods, and Options courses.

**Notes:**

- Other courses with a strong urban component may be approved by the Program Co-ordinator.
- The following courses are prerequisites for many of the senior courses in the program. It is strongly recommended to include Geography 231, Anthropology 203, and Sociology 201 as early as possible in the program. Failure to do so will significantly impact students’ choices. Students may also wish to consider Economics 201 and 203 and Political Science 321.

**C. Degree Options**

The BA in Urban Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

**4.29.10 Minor in Urban Studies**

The Minor in Urban Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) from the Field of Urban Studies with at least 18 units (3.0 full-course equivalents) at the 300 level or above. The Urban Studies Minor also requires:

- 1. 6 units (1.0 full-course equivalent) Urban Studies 253, 591.
- 2. 12 units (2.0 full-course equivalents) from the Core courses in the Field of Urban Studies, excluding Urban Studies 253 and 591.
- 3. 12 units (2.0 full-course equivalents) from the Field of Urban Studies.

**Notes:**

- Courses with a strong urban component may be approved by the Program Co-ordinator.
- No student may count more than 18 units (3.0 full-course equivalents) from any one discipline toward the Urban Studies Minor.

**4.30 German**

See School of Languages, Literatures, and Cultures.

**4.31 Germanic, Slavic and East Asian Studies**

See School of Languages, Literatures, and Cultures.

**4.32 Greek**

See Classics and Religion.

**4.33 Greek and Roman Studies**

See Classics and Religion.

**4.34 History**

**Overview of Programs and Procedures**

**Baccalaureate Degrees Offered**

**Degrees in History:**
- Bachelor of Arts (BA) in History
- BA in History with Co-operative Education
- BA Honours in History
- BA Honours in History with Co-operative Education
- Concurrent BA in History and Bachelor of Education

**Degrees in Canadian Studies:**
- Bachelor of Arts (BA) in Canadian Studies
- BA in Canadian Studies with Co-operative Education
- BA Honours in Canadian Studies
- BA Honours in Canadian Studies with Co-operative Education
- Concurrent BA in Canadian Studies and Bachelor of Education

**Degrees in Latin American Studies:**
- Bachelor of Arts (BA) in Latin American Studies
- BA in Latin American with Co-operative Education

**Introduction**

The Department of History offers instruction in a broad range of historical fields. The Programs in History provide a broad liberal arts education, with widespread application. The BA Honours in History deepens the foundation in historical studies and provides excellent preparation for graduate studies in history as well as fields such as education, law, journalism and public administration.

The Department strongly recommends that History students do not concentrate their studies in one period or thematic area. The Department encourages breadth in History and advises students to take courses about different chronological eras, in different geo-
graphic areas, and from different analytical perspectives.

The Canadian Studies program offers an introduction to Canadian literature, the arts, politics and society. It is designed for those who might wish to pursue careers in government, law, education, communications or in other areas where a thorough knowledge of Canada is necessary. The program is interdisciplinary, which allows students to benefit from exposure to faculty members and ideas and developments from different fields.

First-year students in Canadian Studies are encouraged to explore courses in a variety of areas. It is recommended that a first-year program include: Canadian Studies 201 and at least an additional 9 units (1.5 full-course equivalents) from the Faculty of Arts. Competency in a second language is highly recommended. Degree programs in Canadian Studies include optional senior-level courses offered by various Departments. It is therefore useful to take first-year courses from a variety of related areas such as history and political science.

The Latin American Studies program offers students diverse learning environments and seeks to maximize opportunities for students to experience Latin America firsthand. The program stresses the development of a critical and informed view of Latin America, linguistic skills, independent research and writing abilities, and cultural sensitivity. This major program prepares students for work in the public and private sectors in Canada that deal with Latin American countries and cultures. Graduates may find work opportunities in the diplomatic and the civil service, business, journalism, teaching and tourism.

Students considering graduate degrees should combine the Latin American Studies Major with a major or minor in a language relevant to their program.

Contact Information and Program Advice
Department Office: Social Sciences 656
Phone: 403.220.6401
Fax: 403.289.8566
Email: histdept@ucalgary.ca
Website: hist.ucalgary.ca

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements.

For more specific advice regarding course selection and requirements in the major field, students should consult the subject advisor located in their home Department (consult Department website for contact information).

Admission to the Major
Prospective students wishing to enter the BA Programs (Canadian Studies, History, or Latin American Studies) must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Admission to Honours
The Faculty of Arts procedures for Admission to BA Honours (History or Canadian Studies) established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. The application deadline is February 1.

History: In addition to having successfully completed at least 30 units (5.0 full-course equivalents) of post-secondary study, students must have completed at least 3 units (0.5 full-course equivalent) in History to enter the Honours program. The Honours Advisor will advise anyone who might be interested in joining the program. In addition to completing the online application in the Student Centre by the application deadline, a supplemental application must be submitted before January 15. The supplemental application can be found on the Department of History website (hist.ucalgary.ca/). Students are encouraged to consult with the Honours Advisor well before the deadline to determine their eligibility.

Canadian Studies: Students majoring in Canadian Studies who have completed a minimum of 75 units (12.5 full-course equivalents) are eligible to apply for Honours. In addition to completing the online application in the Student Centre by the application deadline, a supplemental application for Canadian Studies must be submitted to the Program Co-ordinator by January 15. The application form must be signed by a thesis supervisor and include a preliminary research proposal. To meet the deadline, it is recommended that students wishing to enrol in the Honours program obtain guidelines and an application form from the Program Co-ordinator no later than January 15. Students are strongly advised to secure a thesis supervisor by January 15.

Overlapping Programs
Programs in History cannot be taken in conjunction with programs in Ancient and Medieval History. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees.

Field of History
The Field of History consists of all courses labelled History (HTST) except History 200. It also includes Greek and Roman Studies (GRST) 315, 337, 339, 341, 345, 347, 425, 435 and 433*. A maximum of 6 units (1.0 full-course equivalent) Greek and Roman Studies course may be used towards the major field. Greek and Roman Studies courses do not count towards the minor field.

Field of Canadian Studies
The Field of Canadian Studies includes all courses labelled Canadians Studies (CNST) and the following courses:
- Anthropology 210, 355
- Archaeology 303, 321, 419, 521
- Art 301
- Art History 367
- Business and Environment 401
- Communication and Media Studies 435
- Development Studies 403
- Drama 355, 455
- English 372, 471, 473, 509
- Film 351, 451
- French 209, 211, 213, 225, 227, 399.02, 439
- Geology 301
- Geography 341, 381, 397, 05
- History 211, 213, 337, 340, 341, 343, 347, 349, 357, 351, 431, 435, 436, 437, 438, 439, 442, 443, 447, 450, 520, 521, 523, 525, 526, 528, 529, 530
- Indigenous Languages 205, 207
- Indigenous Studies 201, 303, 305, 311, 312, 317, 343, 397, 415, 502
- Law and Society 201, 203, 335
- Museum and Heritage Studies 201, 331
- Political Science 321, 343, 425, 426, 427, 428, 431, 432, 435, 444, 451, 521, 523, 525, 531, 551
- Sociology 205, 303, 307, 309, 327, 353, 355, 365, 375, 399, 405, 421.10, 423, 427, 467, 475.03
- Urban Studies 451
- Women’s Studies 201

Methodology Courses
- Art 361, Communication and Media Studies 313, History 300, Political Science 399, Sociology 313.

Note: Other courses may be approved by the Program Co-ordinator when their content is appropriate.

Field of Latin American Studies
The Field of Latin American Studies consists of the following courses:

Courses with a Focus on Latin America
All courses labelled Latin American Studies (LAST)

Anthropology 321, 421
Archaeology 341, 343, 345, 347, 351, 353, 355, 357, 411, 503*, 537

Geography 371
History 365, 367, 467, 471, 472, 487, 565, 569

Political Science 455*, 473, 481*, 565, 579*
Spanish 421, 423, 441*, 471*, 473*, 499*, 553, 555, 571*, 599*

Context Courses
Anthropology 405
Development Studies 375, 393, 405
Economics 337
Geography 425, 463
History 305

Indigenous Studies 312*, 399*, 407*
Music 301*
Political Science 279, 359

*Subject to approval by the Program Co-ordinator when
4.34.1 BA in History
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of History while fulfilling the following requirements:
1. Practice of History: 3 units (0.5 full-course equivalent) History 300.
2. Canadian History: 6 units (1.0 full-course equivalent) in Canadian History (see note below).
3. History before 1850: 6 units (1.0 full-course equivalent) in History before 1850 (see note below).
4. History Options: An additional 27 units (4.5 full-course equivalents) from the Field of History.

Senior-Level Courses: Inclusive of the courses used to fulfill the above requirements, 36 units (6.0 full-course equivalents) from the Field of History must be at the 300 level or above, of which:
- A minimum of 12 units (2.0 full-course equivalents) at the 400 level
- A minimum of 6 units (1.0 full-course equivalent) at the 500 level

C. DEGREE OPTIONS
The BA in History can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- The Department recommends that all History majors complete 6 units (1.0 full-course equivalent) at the 200 level.
- History students are advised to take History 300 during their second year and must do so before taking any 500-level courses.
- The lists of courses that fulfill the requirements for Canadian History and History before 1850 are located before the History courses in the “Courses of Instruction” section of this calendar.
- Students are strongly advised not to wait until their last year to fulfill their 500-level course requirement, since enrolment in these courses is limited.

4.34.2 BA Honours in History
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 54 units (9.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of History while fulfilling the following requirements:
1. Practice of History: 3 units (0.5 full-course equivalent) History 300.
2. Canadian History: 6 units (1.0 full-course equivalent) in Canadian History (see note below).
3. History before 1850: 6 units (1.0 full-course equivalent) in History before 1850 (see note below).
5. History Options: An additional 27 units (4.5 full-course equivalents) from the Field of History.

Senior-Level Courses: Inclusive of the courses used to fulfill the above requirements, 48 units (8.0 full-course equivalents) must be at the 300 level or above, of which:
- 12 units (2.0 full-course equivalents) must be at the 400 level
- 18 units (3.0 full-course equivalents) must be at the 500 level

C. OTHER REQUIREMENTS
Language Requirement: 12 units (2.0 full-course equivalents) in a language other than English relevant to a student’s studies. In some situations it may be possible to demonstrate language proficiency by examination rather than course work. Students should consult with the Undergraduate Director.

D. DEGREE OPTIONS
The BA Honours in History can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- It is recommended that first-year Canadian Studies Majors select Canadian Studies 201 and at least 9 units (1.5 full-course equivalents) from among the following courses (not all of which are in the field, but will enable students to progress): Anthropology 213; Economics 201, 203; Law and Society 201; History 211 and 213; Indigenous Studies 201; Political Science 201; Sociology 201 and 205.
- A maximum of 6 units (1.0 full-course equivalent) may be used in language courses from the field towards major field requirements. Students are encouraged to select a language of study that will assist them with their research in Canadian Studies. Languages other than French or Indigenous Languages may be accepted for credit with approval of the Program Co-ordinator.

4.34.3 Minor in History
The Minor in History is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of History with at least 18 units (3.0 full-course equivalents) at the 300 level or above. A minimum 3 units (0.5 full-course equivalent) must be at the 400 or 500 level.

Notes:
- It is strongly recommended that students with a Minor in History take History 300 in their second year so that they may enroll in 500-level seminars, for which it is a prerequisite.
- Greek and Roman Studies courses cannot count toward a Minor in History.

4.34.4 BA in Canadian Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete at least 48 units (8.0 full-course equivalents) in the Field of Canadian Studies while fulfilling the following requirements:
1. Core Courses:
   a. 6 units (1.0 full-course equivalent) Canadian Studies 201, 591.
   b. 9 units (1.5 full-course equivalents) from Canadian Studies 333, 355, 361, 401, 439, 451, 501.
2. Canadian Studies Options: 33 units (5.5 full-course equivalents) from the Field of Canadian Studies. No more than 12 units (2.0 full-course equivalents) from a single subject, other than Canadian Studies, can be used to fulfill this requirement.
3. Depth in Canadian Studies: At least 12 units (2.0 full-course equivalents) at the 400 level or above from the Field of Canadian Studies inclusive of the courses used in requirement 1 and 2 above.

C. OTHER REQUIREMENTS
Research Methods Requirement: 3 units (0.5 full-course equivalent) from Art 361, Communication and Media Studies 313, History 300, Political Science 399 or Sociology 313.

D. DEGREE OPTIONS
The BA in Canadian Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- It is recommended that first-year Canadian Studies Majors select Canadian Studies 201 and at least 9 units (1.5 full-course equivalents) from among the following courses (not all of which are in the field, but will enable students to progress): Anthropology 213; Economics 201, 203; Law and Society 201; History 211 and 213; Indigenous Studies 201; Political Science 201; Sociology 201 and 205.
- A maximum of 6 units (1.0 full-course equivalent) may be used in language courses from the field towards major field requirements. Students are encouraged to select a language of study that will assist them with their research in Canadian Studies. Languages other than French or Indigenous Languages may be accepted for credit with approval of the Program Co-ordinator.

4.34.5 BA Honours Canadian Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 57 units (9.5 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Canadian Studies while fulfilling the following requirements:
1. Core Courses:
   a. 6 units (1.0 full-course equivalent) Canadian Studies 201, 591.
b. 9 units (1.5 full-course equivalents) from Canadian Studies 333, 355, 361, 401, 439, 451, 501.

2. Canadian Studies Options: 33 units (5.5 full-course equivalents) from the Field of Canadian Studies. No more than 12 units (2.0 full-course equivalents) from a single subject, other than Canadian Studies, can be used to fulfill this requirement.

3. Honours Readings and Essay: 9 units (1.5 full-course equivalents) Canadian Studies 597, 598.

4. Depth in Canadian Studies: Inclusive of the courses used in requirements 1 and 2 above (but not requirement 3), at least 12 units (2.0 full-course equivalents) must be at the 400 level or above.

C. OTHER REQUIREMENTS

1. Research Methods Requirement: 3 units (0.5 full-course equivalent) from Art 361, Communication and Media Studies 313, History 300, Political Science 399, or Sociology 313.

2. Language Requirement: Successful completion of French 227 or demonstration of proficiency to that level in French as approved by the School of Languages, Linguistics, Literatures and Cultures.

D. DEGREE OPTIONS

The BA Honours in Canadian Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: A maximum of 6 units (1.0 full-course equivalent) may be used in language courses from the field towards major field requirements. Students are encouraged to select a language of study that will assist them with their research in Canadian Studies. Languages other than French or Indigenous Languages may be accepted for credit with approval of the Program Co-ordinator.

4.34.8 Minor in Latin American Studies

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) in the Field of Latin American Studies while fulfilling the following requirements:

1. Core Courses: 9 units (1.5 full-course equivalents) Latin American Studies 211, 311, 401.

2. Seminar or Research Course: 3 units (0.5 full-course equivalent) from Archaeology 503*, 537; History 565, 569; Latin American Studies 501; Political Science 579*; Spanish 553, 555, 571*, 599*.

*Subject to approval by the Program Co-ordinator when focused on Latin American topics.

3. Latin American Studies Options: 30 units (5.0 full-course equivalents) from the field of Latin American Studies including at least 24 units (4.0 full-course equivalents) chosen from the list of "Courses with a Focus on Latin America".

C. Other Requirements

1. Language: Successful completion of Spanish 303 or demonstration of proficiency to that level in Spanish or Portuguese as approved by the School of Languages, Linguistics, Literatures and Cultures.

2. Research Methodology: 3 units (0.5 full-course equivalent) from Communication and Media Studies 313, History 300, Political Science 399, Psychology 300, Sociology 313.

4.34.6 Minor in Canadian Studies

The Minor in Canadian Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) from the Field of Canadian Studies with at least 18 units (3.0 full-course equivalents) at the 300 level or above, including:

- 3 units (0.5 full-course equivalent) Canadian Studies 201
- 9 units (1.5 full-course equivalents) in courses labelled Canadian Studies.

Notes:

- It is suggested first-year Canadian Studies Minors select Canadian Studies 201 and at least 6 units (1.0 full-course equivalent) from among the following courses: Anthropology 210; Economics 201, 203; History 211 and 213; Indigenous Studies 201; Law and Society 201; Political Science 201; Sociology 205.
- A maximum of 6 units (1.0 full-course equivalent) may be used in language courses from the field towards major field requirements. Students are encouraged to select a language of study that will assist them with their research in Canadian Studies. Languages other than French or Indigenous Languages may be accepted for credit with approval of the Program Co-ordinator.

4.34.7 BA in Latin American Studies

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) in the Field of Latin American Studies while fulfilling the following requirements:

1. Core Courses: 9 units (1.5 full-course equivalents) Latin American Studies 211, 311, 401.

2. Seminar or Research Course: 3 units (0.5 full-course equivalent) from Archaeology 503*, 537; History 565, 569; Latin American Studies 501; Political Science 579*; Spanish 553, 555, 571*, 599*.

*Subject to approval by the Program Co-ordinator when focused on Latin American topics.

3. Latin American Studies Options: 30 units (5.0 full-course equivalents) from the field of Latin American Studies including at least 24 units (4.0 full-course equivalents) chosen from the list of "Courses with a Focus on Latin America".

C. Other Requirements

1. Language: Successful completion of Spanish 303 or demonstration of proficiency to that level in Spanish or Portuguese as approved by the School of Languages, Linguistics, Literatures and Cultures.

2. Research Methodology: 3 units (0.5 full-course equivalent) from Communication and Media Studies 313, History 300, Political Science 399, Psychology 300, Sociology 313.
4.48 Multidisciplinary Studies
Overview of Programs and Procedures

Baccalaureate Degrees Offered
Multidisciplinary Degrees
Bachelor of Arts (BA) in Communication and Culture
Bachelor of Science (BSc) in Communication and Culture (suspended)
Bachelor of Communication and Culture (BCC) (suspended)
Concurrent BA in Communication and Culture/Bachelor of Education

Note: Admission to the Bachelor of Science in Communication and Culture and the Bachelor of Communication and Culture programs has been suspended. Students in these programs should consult with an advisor in the Arts Students’ Centre to ensure completion of Education program requirements in a timely manner.

Introduction
The Faculty of Arts’ multidisciplinary degree programs provide an opportunity for students to design their own programs to include a primary and a secondary focus. The primary area of focus consists in the completion of a minor program in Arts. The secondary focus can be selected from the offerings available in any faculty.

Contact Information and Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their program requirements.

Admission
Prospective students wishing to enter a Multidisciplinary Program must meet the criteria listed in section A.2 Undergraduate Admissions of this Calendar. Annual application deadlines are found in A.3 Deadline Dates for Undergraduate Applications for Admission and Transcripts.

Program Combinations
The BA in Communication and Culture is not available with Honours.

The BA can be combined with another Bachelor’s degree provided that the courses used towards the primary and secondary areas of focus are not used towards the major field requirements of the other degree program.

The BA can be completed as a subsequent (second) Bachelor’s degree provided that the primary and secondary areas of focus are different from the credentials (major and minor) obtained in the previous degree.

Multidisciplinary Degrees With Distinction

The notation “With Distinction” will be inscribed on the permanent record and graduation parchments of any student achieving a grade point average of 3.60 over the final 90 units (15.0 full-course equivalents) of a 120 unit (20.0 full-course equivalent) BA (multidisciplinary) degree, or the final 60 units (10.0 full-course equivalents) of a 90 unit (15.0 full-course equivalent) BCC (multidisciplinary) degree. A student who has taken part of their work at another university or who has transferred into the Faculty may be granted a degree “With Distinction” at the discretion of the Faculty.

4.48.1 BA in Communication and Culture
A. Faculty of Arts Requirements
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. Multidisciplinary Studies Requirements
Student must successfully complete a minimum of 51 units (8.5 full-course equivalents) while fulfilling the following requirements:
1. Primary Focus: 30 units (5.0 full-course equivalents) completion of a minor program in the Faculty of Arts.

Note: No more than 36 units (6.0 full-course equivalents) may be taken from the field of study of the minor program.
2. Secondary Focus: Either completion of a second minor program from any faculty or completion of a minimum of 18 units (3.0 full-course equivalents) to a maximum of 36 units (6.0 full-course equivalents) in a single set of courses with the same label from any faculty.

Note: Courses used to fulfill this requirement cannot be used to fulfill requirement 1, i.e. courses cannot be double counted toward both the primary and secondary areas of focus.
3. Advanced Study: 12 units (2.0 full-course equivalents) at the 400 level or above, inclusive of requirements 1 and 2 above.
4. Capstone Course: 3 units (0.5 full-course equivalent) Arts 503.

4.48.2 BSc in Communication and Culture
Note: Applications to this program are currently suspended while the program is under review. Students currently in the BSc in Communication and Culture should continue to follow the program as described below.

The Bachelor of Science in Communication and Culture is a four-year multidisciplinary degree focusing on courses in the Domain of Science, which includes all courses offered by the Faculty of Science and many additional science-based courses from disciplines within the Faculty of Arts. For more information, see the list of courses in the "Domain of Science".

Students interested in a multidisciplinary program with a focus on science should also consider the BSc (Natural Sciences) Program offered by the Faculty of Science.

Note: The BSc in Communication and Culture is not available with Honours and it may not be used in a Combined Degree Program or subsequently completed as a Second Baccalaureate Degree with any of the following programs:
- Bachelor of Communication and Culture degree or equivalent
- BA or BSc (Major) program
- Bachelor of Communication and Culture degree/Bachelor of Education
- Bachelor of Communication in Communication and Culture
- Bachelor of Communication and Media Studies
- Bachelor of Film Studies

A. Faculty of Arts Requirements
1. Overall Program: Successful completion of an approved program consisting of 120 units (20.0 full-course equivalents).
2. Program Focus: Successful completion of the multidisciplinary requirements listed below.
3. Academic Achievement:
   a. A minimum GPA of 2.00 must be achieved over all courses.
   b. A maximum of 18 units (3.0 full-course equivalent) “D” or “D+” grades overall.
4. University of Calgary Study: A maximum of 60 units (10.0 full-course equivalents) in eligible post-secondary transfer credits from other institutions may be counted toward the degree.
5. Depth: A maximum of 48 units (8.0 full-course equivalents) at the junior or 200 level.
6. Breadth: A minimum of 6 units (1.0 full-course equivalent) from the Faculty of Science.
7. Physical Activity Courses: A maximum of 6 units (1.0 full-course equivalent) may be taken from: Dance Education Activity/Theory, Outdoor Pursuits Activity/Theory and Physical Education Activity/Theory.

B. Multidisciplinary Requirements
1. Minor Field: Successful completion of an approved Minor Field.

Note: It may be difficult to complete Minors that require limited enrolment courses. Not more than 36 units (6.0 full-course equivalents) may be from any one Department or from any group of courses that would comprise a Major Field.

2. Interdisciplinary Course: General Studies 300.
3. Literature: 3 units (0.5 full-course equivalent) in English literature or other literature, including Comparative Literature.
4. Writing: 3 units (0.5 full-course equivalent) chosen from Communication and Media Studies 363, 369 or Science 311.
5. Intercultural Requirement to be fulfilled in one of the following two ways:
   a. Successful completion of at least 6 units (1.0 full-course equivalent) from an approved post-secondary Term Abroad, Group Travel Study or Individual Travel Study program. See the Centre for International Students and Study Abroad for programs that are currently offered.
b. Successful completion of 12 units (2.0 full-course equivalents) from the Domain of Intercultural Courses.

6. Science Requirement: At least 63 units (10.5 full-course equivalents) must be from the courses in the "Domain of Science".

4.8.3 Bachelor of Communication and Culture

Note: Applications to this program are currently suspended while the program is under review. Students currently in the Bachelor of Communication and Culture should continue to follow the program as described below. The three-year (90 units (15.0 full-course equivalents)) Bachelor of Communication and Culture degree program provides a foundation of knowledge in the liberal arts that can be completed in a reduced period of time. Some students take this degree for its own sake and others as a foundation for further credentials. If students are intending to use this degree as a step to a career in teaching, they should take into consideration Alberta Teacher Certification Requirements. For further details, refer to the Werklund School of Education website.

Notes:
- The Bachelor of Communication and Culture is not available with Honours and it may not be used in a Combined Degree Program or subsequently completed as a Second Baccalaureate Degree.
- A three-year degree is not accepted as a preparation for graduate-level study.

A. FACULTY OF ARTS REQUIREMENTS

1. Overall Program: Successful completion of an approved program consisting of 90 units (15.0 full-course equivalents).

2. Multidisciplinary: Successful completion of the multidisciplinary requirements listed below.

3. Academic Achievement:
   a. A minimum GPA of 2.00 must be achieved over all courses.
   b. A maximum of 12 units (2.0 full-course equivalent) ‘D’ or ‘D+’ grades overall.

4. University of Calgary Study: A maximum of 45 units (7.5 full-course equivalents) in eligible post-secondary transfer credits from other institutions may be counted toward the degree.

5. Depth: A maximum of 42 units (7.0 full-course equivalents) at the junior or 200 level.

6. Breadth: A minimum of 6 units (1.0 full-course equivalent) from the Faculty of Science.

7. Physical Activity Courses: A maximum of 6 units (1.0 full-course equivalent) may be taken from: Dance Education Activity/Theory, Outdoor Pursuits Activity/Theory and Physical Education Activity/Theory.

B. MULTIDISCIPLINARY REQUIREMENTS

1. Minor Field: Successful completion of an approved Minor Field from within or outside the Faculty of Arts.

Note: It may be difficult to complete minors that require limited enrolment courses. Not more than 36 units (6.0 full-course equivalents) may be from any one Department or any group of courses that would comprise a Major Field.

2. Multidisciplinary Breadth: Either Communication and Culture 201 and 203 or a second approved minor.

3. Literature: 3 units (0.5 full-course equivalent) in English literature or other literature, including Comparative Literature.

4. Writing: 3 units (0.5 full-course equivalent) chosen from Communication and Media Studies 363, 369 or Science 311.

Note: It is recommended a second minor be chosen from within the Faculty of Arts.

4.51 Philosophy

Overview of Programs and Procedures in Philosophy

Baccalaureate Degrees Offered Degrees in Philosophy Bachelor of Arts (BA) in Philosophy BA in Philosophy with Co-operative Education BA Honours in Philosophy BA Honours in Philosophy with Co-operative Education Degrees in Women's Studies Bachelor of Arts (BA) in Women's Studies BA in Women's Studies with Co-operative Education BA Honours in Women's Studies BA Honours in Women's Studies with Co-operative Education

Related Interdisciplinary Degrees (See separate listings)

BA in Religious Studies and Applied Ethics*

*Applications to this program are currently suspended. No new admissions will be permitted.

Notes:
- Minors are offered in Philosophy and Women's Studies.
- A related interdisciplinary Minor is offered in the History and Philosophy of Science.
- A concentration is available in Philosophy and Religion.

Introduction

In philosophy we ask fundamental questions about ourselves and the world, as well as practical questions about how to live a good life and how to construct a just society.

As an academic discipline, philosophy is subdivided into areas such as ethics and political philosophy, aesthetics, epistemology (the theory of knowledge), metaphysics (the theory of reality or being), logic and the philosophy of logic, philosophy of language, philosophy of mind, philosophy of science, philosophy of religion, and the history of philosophy. Philosophy graduates pursue careers in business, law, the arts, and politics.

The Women's Studies Major program is designed to provide students with knowledge of the rapidly developing disciplinary and interdisciplinary literature in the field, while providing them with an understanding of the reasons for the development of a feminist scholarship. From its activist and academic perspective, the program will help prepare students for careers in government, social work, and business, while also providing them with a mode of analysis applicable to related fields, and to their own lives.

Contact Information

Department Office: Social Sciences 1256
Phone: 403.220.5531/5533
Fax: 403.289.5698
Email: phildept@ucalgary.ca
Website: phil.ucalgary.ca

For Program Advice

Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.

For more specific advice regarding course selection and requirements in the major field, students should consult the Undergraduate Program Director located in the Department of Philosophy (consult Department website for contact information).

Admission to the Major

Prospective students wishing to enter the BA (Philosophy or Women's Studies) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar. Annual application deadlines are found in A.3 Deadline Dates for Undergraduate Applications for Admission and Transcripts.

Admission to Honours

The Faculty of Arts procedures for Admission to Honours established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework.

Philosophy: Students must complete an application in the online Student Centre by the February 1 deadline.

Women’s Studies: Students majoring in Women’s Studies are eligible to apply for Honours by the February 1 deadline only if they will complete the program during the following academic year.

Overlapping Programs

Programs in History and Philosophy of Science cannot be taken in conjunction with programs in Philosophy. This restriction applies to Major-plus-Minor combinations,
Double Majors, Combined Degrees and Second Baccalaureate Degrees. A maximum of 60 units (10.0 full-course equivalents) is allowed in any discipline within the Major Field of History and Philosophy of Science.

Programs in the History and Philosophy of Science can be taken in conjunction with programs in History with approval from the Faculty and with the Bachelor of Health Sciences Program with approval from the Cumming School of Medicine. Consent is required for Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees (this includes a Major degree in Faculty of Science, the Schuhlig School of Engineering, and the Cumming School of Medicine – with consent from the relevant faculties).

Field of Philosophy
The Field of Philosophy consists of all courses labelled Philosophy (PHIL) and Religious Studies (RELS) 363, 444, 445, and 463.

Field of Women's Studies
The Field of Women's Studies consists of the following courses:
- All courses labelled Women's Studies (WMST)
- Anthropology 331, 349, 427
- Archaeology 503
- Canadian Studies 361
- Communication and Media Studies 479
- Development Studies 375
- English 387 (when topic is relevant)
- Film 307
- German 317.04
- Greek and Roman Studies 315
- History 308, 438, 442, 501, 551
- Law and Society 335
- Linguistics 309
- Philosophy 337
- Political Science 417, 453, 551, 554
- Religious Studies 381, 479
- Sociology 303, 371, 403
- Urban Studies 311

Field of History and Philosophy of Science
The Field of the History and Philosophy of Science consists of the following courses:
- Art History 411.01
- History 372, 395, 427, 476, 493.38, 493.39, 541.02, 541.05, 597, 598
- Anthropology 341, 361, 391, 441
- Computer Science 409
- Economics 483
- English 393
- Geology 201
- Greek and Roman Studies 321
- Health and Society 401
- Medical Science 205, 307

Neuroscience 421
Psychology 305
Religious Studies 397

4.51.1 BA in Philosophy
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (8.0 and a maximum of 10.0 full-course equivalents) in the Field of Philosophy while fulfilling the following requirements:

1. Logic: 3 units (0.5 full-course equivalent) from Philosophy 279 or 377.
2. Core Courses: 6 units (1.0 full-course equivalent) Philosophy 395, 397.
3. Upper-Level Courses: 24 units (4.0 full-course equivalents) from the Field of Philosophy at the 400 level or above.

4. Philosophy Options: 15 units (2.5 full-course equivalents) from the Field of Philosophy.

C. OTHER REQUIREMENTS
Language Requirement: 6 units (1.0 full-course equivalent) in a single language other than English.

D. DEGREE OPTIONS
The BA Honours in Philosophy can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: Students are advised to take one of Philosophy 201, 249, or 259 in their first year, in addition to the required Philosophy 279.

4.51.3 Minor in Philosophy
The Minor in Philosophy is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Philosophy with at least 18 units (3.0 full-course equivalents) at the 300 level or above.

4.51.4 Concentration in Philosophy and Religion
Students completing a BA or BA Honours in Philosophy or Religious Studies can elect to complete a concentration in Philosophy and Religion. This option might be appropriate for students with an interest in the interdisciplinary study of philosophy and religion. The Concentration in Philosophy and Religion cannot be taken in conjunction with a combined or joint or double BA or BA Honours program in Philosophy and Religious Studies or a Major/Minor combination. Students must complete the following:

18 units (3.0 full-course equivalents) selected from the following:
- Philosophy 201, 331, 335, 527
- Religious Studies 345, 363, 444, 463
- Other senior-level Philosophy or Religious Studies courses may be accepted when the topic is appropriate. Approval from the Department of Classics and Religion will be required.

4.51.5 BA in Women's Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) in Women's Studies while fulfilling the following requirements:

1. Core Courses: 12 units (2.0 full-course equivalents) Women's Studies 201, 311, 315 and 405.
2. Women's Studies Options: an additional 36 units (6.0 full-course equivalents) chosen from the Field of Women's Studies. Students may apply to the Program Co-ordinator to have a pertinent course not on the list counted toward their degree.
C. DEGREE OPTIONS
The BA in Women’s Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- Students entering the program in their third or fourth year of study may apply to the Program Co-ordinator to have an additional Women’s Studies Option counted in lieu of Women’s Studies 201.
- Students may apply to the Program Co-ordinator to have Communication and Culture 507 (Collaborative Learning and Peer Mentoring) counted as a Women’s Studies option if they are mentoring in a Women’s Studies course.

4.51.6 BA Honours Women’s Studies

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 54 units (9.0 full-course equivalents) in Women’s Studies while fulfilling the following requirements:

1. Core Courses: 12 units (2.0 full-course equivalents) Women’s Studies 201, 311, 315, 405.
2. Women’s Studies Options: An additional 36 units (6.0 full-course equivalents) chosen from the Field of Women’s Studies. Students may apply to the Program Co-ordinator to have a pertinent course not on the list counted toward their degree.
3. Undergraduate Thesis: 6 units (1.0 full-course equivalent) Women’s Studies 590.

C. DEGREE OPTIONS
The BA Honours in Women’s Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- Students entering the program in their third or fourth year of study may apply to the Program Co-ordinator to have an additional Women’s Studies Option counted in lieu of Women’s Studies 201.
- Students may apply to the Program Co-ordinator to have Communication and Culture 507 (Collaborative Learning and Peer Mentoring) counted as a Women’s Studies option if they are mentoring in a Women’s Studies course.

4.51.7 Minor in Women’s Studies
The Minor in Women’s Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Women’s Studies with at least 18 units (3.0 full-course equivalents) at the 300 level or above. The Women’s Studies Minor also requires:

1. Core Courses: 9 units (1.5 full-course equivalents) chosen from Women’s Studies 201, 311, 315, 405.
2. Breadth in Women’s Studies: 21 units (3.5 full-course equivalents) chosen from the Field of Women’s Studies.

4.51.8 Minor in the History and Philosophy of Science
The Minor in History and Philosophy of Science is aimed at the first instance at students in the BSc Programs in the Faculty of Science, the Schulich School of Engineering, the Cumming School of Medicine, and the Faculty of Arts. This Minor complements disciplinary studies in the sciences with the study of the historical and philosophical background and foundation of the sciences.

The Minor in the History and Philosophy of Science is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) chosen from the Field of the History and Philosophy of Science, including:

2. Philosophy of Science: 6 units (1.0 full-course equivalent) from: Philosophy 367, 467, 517, 565, 567.
3. An additional 18 units (3.0 full-course equivalents), with at least 3 units (0.5 full-course equivalent) at the 400 level or above.

4.52 Political Science

Overview of Programs and Procedures
Baccalaureate Degrees Offered
Bachelor of Arts (BA) in Political Science
BA in Political Science with Co-operative Education
BA Honours in Political Science
BA Honours in Political Science with Co-operative Education
Concurrent BA in Political Science and Bachelor of Education
Bachelor of Arts (BA) in International Relations
BA in International Relations with Co-operative Education
Concurrent BA in International Relations and Bachelor of Education
BA in International Indigenous Studies
BA in International Indigenous Studies with Co-operative Education
Concurrent BA in International Indigenous Studies and Bachelor of Education

Note: Minors are offered in Political Science, Security Studies, and International Indigenous Studies.

Introduction
The Department of Political Science offers courses in the principal fields of the discipline: Canadian government, political theory, comparative politics, and international relations. The BA (Political Science) program is designed to expose students to each of these fields, as well as to encourage an appreciation of the broader themes and issues that cut across them (see “Courses of Instruction” for Table of Principal Field courses).

The Department of Political Science offers an Interdisciplinary Major in International Relations. The BA (International Relations) is designed to expose students to the diversity of approaches to the study of international relations while also providing an opportunity for individualized programs that reflect student interests. The program is structured around a common core set of courses, a regional cluster focused on a specific area of the world, and a thematic specialization focused on major approaches to the study of international relations.

The BA (International Relations) requires careful selection of courses to meet its requirements. Students should consult with the Program Co-ordinator concerning their course selection. There is neither a Minor nor an Honours program available in International Relations.

The Department offers an interdisciplinary major in International Indigenous Studies. Students must carefully select their courses to meet the requirements of this degree and should consult with the Program Co-ordinator of the International Indigenous Studies program regarding course selection. A minor program is available in International Indigenous Studies but not an Honours program.

Security Studies: ssminor@ucalgary.ca
Website: http://idp.ucalgary.ca/ssminor

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.

Advice and information about Political Science courses and programs may be obtained from the Political Science Advisor, the Undergraduate Director, International Relations Program Co-ordinator or International Indigenous Studies Co-ordinator.
Admission to the Major
Prospective students wishing to enter the BA (Political Science) Program, the BA (International Relations) Program or the BA (International Indigenous Studies) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar. Annual application deadlines are found in A.3 Deadline Dates for Undergraduate Applications for Admission and Transcripts. The University of Calgary is committed to providing equitable access and participation of Aboriginal people in all its faculties, programs and services.

Limitation of Enrolment
Due to high demand, admission to the BA (International Relations) may be limited. Whenever demand exceeds capacity, enrolment will be limited and students will be admitted on a competitive basis. Admission averages may be set above the minimum level for the Faculty of Arts. These higher admission standards are applicable to high-school applicants, external transfer applicants from other post-secondary institutions and internal transfer applicants from other programs at the University of Calgary, whether inside or outside the Faculty of Arts.

Overlapping Programs
The Minor in Security Studies cannot be taken in conjunction with minors in History or Political Science.

Admission to Honours
The Faculty of Arts procedures for Admission to BA Political Science (Honours) established in section 3.4.2Honours Degrees with a Major Field are applicable and provide the overall framework. Students wishing to be considered into BA Political Science (Honours) program must have completed at least 30 units (5.0 full-course equivalents). The GPA for admission and continuation is typically higher than the 3.30 minimum set by the Faculty. Please see Department website for current admission and continuation GPA for Honours. The application deadline is February 1.

Field of Political Science
The Field of Political Science consists of all courses labelled Political Science (POL). For categorization of courses by subfield, see Table of Principal Fields found in the “Courses of Instruction” section of this calendar.

Field of International Relations
Courses in the Field of International Relations are grouped into Core Courses, Thematic Clusters and Regional Clusters:

A. Core Courses: Anthropology 203, Economics 201, 203, Geography 205 or 213, History 307, Political Science 381, International Relations 301 and 501.

B. Thematic Clusters
The thematic clusters reflect major approaches to and foci within International Relations:

1. International Political Economy
   This cluster focuses on the economic relations of states and other actors in the world economy, and the ramifications of these relations, including their political aspects.
   Strongly Recommended Courses: Economics 321, 423 and Political Science 485.
   Additional Courses: Anthropology 303, 357, 379, 385, 393; Development Studies 375, 393, 403, 405, 485, 591; Economics 327, 337, 371, 377, 425, 427, 527, 537; Geography 341, 425, 553; History 354, 395, 494; Philosophy 329; Political Science 379, 463, 579; Sociology 487, 493.
   2. Security and Strategy
   This cluster focuses on the traditional core concerns of International Relations, including the use and threat of force, and the interaction of states.
   Strongly Recommended Course: History 491.01.
   Additional Courses: Anthropology 343, 467; Geography 365; History 303, 333, 349, 381, 383, 402, 483, 485, 486, 488, 489, 490, 491.02, 530, 544, 545; Political Science 435, 439, 470, 479, 491, 519, 575, 585.

3. International Institutions and Governance
   This cluster focuses on efforts by states to manage their co-existence through legal, institutional and other devices, both formally and informally.
   Strongly Recommended Courses: Political Science 483 and 487.
   Additional Courses: Anthropology 371; Geography 361, 463; History 491.01, 491.02; Indigenous Studies 407; Law and Society 415, Linguistics 309; Political Science 447, 451, 453, 463, 481, 485, 506, 523, 561, 581, 587; Religious Studies 349; Sociology 487.

C. Regional Clusters
   The regional clusters group courses to give students a deeper understanding of contemporary historical, cultural, political, economic and geographical force at work within the principal area of the world:
   1. North America: Anthropology 355; Economics 325, 339; Canadian Studies 333; History 337, 351, 463, 467, 530, 535; Political Science 321, 359, 435, 477, 491, 521, 523.
   2. Latin America: Anthropology 321, 421; Archaeology 345, 355, 357; Economics 337; Geography 371; History 367, 467, 471, 472, 487, 569; Latin American Studies 311, 401, 501; Political Science 359, 473; Spanish 321.
   3. Europe: Central and East European Studies 313; Economics 333; French 391; Geography 397; German 317; History 333, 338, 412, 413, 427; Political Science 359, 463, 464, 561; Russian 317; Romance Studies 399; Spanish 321.
   4. Asia/Pacific: Anthropology 323, 427; Arabic Language and Muslim Culture 317, 319, 358, 359; Chinese 317, 461; East Asian Studies 531; Economics 337; Geography 397; History 317, 397.03, 404; Japanese 317, 461; Political Science 359, 465; Religious Studies 303, 307, 317, 329, 357, 359; South Asian Studies 203, 303, 499, 531.

5. Middle East and North Africa: Anthropology 319; Arabic Language and Muslim Culture 317, 319, 358, 359; Economics 327, 337, 427, 527; Geography 397; History 397.02; Political Science 359, 369, 469, 479, 569; Religious Studies 353, 357.

6. Africa: African Studies 301, 400, 501; Anthropology 317; Arabic Language and Muslim Culture 317, 319, 358, 359; Archaeology 395, 399; Economics 337; Geography 377; History 397.01, 402; Political Science 359, 371, 471; Religious Studies 339, 353.

Note: Development Studies 401 and 501 may be used towards either the International Institutions and Governance or International Political Economy clusters depending on the topic and subject to approval by the Program Co-ordinator.

Field of International Indigenous Studies
The field of International Indigenous Studies consists of the following courses:

A. Core Courses: Anthropology 210; Development Studies 201, 301; History 345; Indigenous Studies 301, 303, 305, 407, 415; Indigenous Languages 205; Sociology 307.

B. Canadian Focus: Archaeology 419, 423; Art History 367; Development Studies 403; Economics 339; English 376; History 443, 529; Indigenous Studies 311, 312, 317, 343, 397, 401, 502; Linguistics 505; Law and Society 335; Political Science 321, 343, 424, 524; Sociology 307, 421*, 473*.

C. International Focus: African Studies 301, 400, 501; Anthropology 317, 319, 321, 355, 357, 421; Archaeology 341, 343, 345, 351, 355, 357; Art History 367; Development Studies 393, 485; Economics 337; English 493; History 303, 439, 461, 467; Indigenous Studies 399, 503*; Latin American Studies 311; Linguistics 531; Political Science 279, 371, 381, 471, 473, 565, 579; Psychology 491; Religious Studies 339.

*With approval of the Program Co-ordinator.

Note: Special topic courses relevant to the field may be approved and categorized by the Program Co-ordinator.

Field of Security Studies
The Field of Security Studies consists of the following courses:

- Anthropology 343, 467;
- Computer Science 329, 418;
- Development Studies 201;
- Geography 311, 463, 522;
- History 302, 333, 383, 471, 489, 490, 530, 544, 545, 547;
- Philosophy 314;
- Political Science 381, 439, 455, 470, 481, 487, 491, 523, 575, 585;
- Religious Studies 349, 367;
- Sociology 325, 375, 421, 425

4.52.1 BA in Political Science
A. FACULTY OF ARTS REQUIREMENTS
   Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.
B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Political Science while fulfilling the following requirements:

1. Introduction: 6 units (1.0 full-course equivalent) in Political Science at the 200 level.
2. Canadian Politics: 3 units (0.5 full-course equivalent) Political Science 321.
3. Breadth in Political Science: 33 units (5.5 full-course equivalents) from the Field of Political Science, which must include any three of the following:
   a. 6 units (1.0 full-course equivalent) Political Science 310.
   b. 3 units (0.5 full-course equivalent) Political Science 359 and an additional 3 units (0.5 full-course equivalent) in “Comparative Politics” at the 300 level or above (see note below).
   c. 3 units (0.5 full-course equivalent) Political Science 381 and an additional 3 units (0.5 full-course equivalent) in “International Relations” at the 300 level or above (see note below).
   d. 3 units (0.5 full-course equivalent) Political Science 399.
   e. 2 units (0.5 full-course equivalent) Political Science 373.
4. Advanced-Level Political Science: Inclusive of the courses used to fulfill requirement 3, at least 12 units (2.0 full-course equivalents) must be at the 400 level or above, including at least 3 units (0.5 full-course equivalent) at the 500 level.

Note: The categories of courses that fulfill the requirements for Comparative Politics and International Relations are located before the Political Science courses in the “Courses of Instruction” section of this calendar: ucalgary.ca/pubs/calendar/current/political-science.

C. DEGREE OPTIONS

The BA in Political Science can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.52.2 BA Honours Political Science

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

Students must successfully complete a minimum of 54 units (9.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Political Science while fulfilling the following requirements:

1. Introduction: 6 units (1.0 full-course equivalent) in Political Science at the 200 level.
2. Canadian Politics: 3 units (0.5 full-course equivalent) Political Science 321.
3. Breadth in Political Science: 39 units (6.5 full-course equivalents) from the Field of Political Science, including:
   a. 6 units (1.0 full-course equivalent) Political Science 310.
   b. 3 units (0.5 full-course equivalent) Political Science 359 and an additional 3 units (0.5 full-course equivalent) in “Comparative Politics” at the 300 level or above (see note below).
   c. 3 units (0.5 full-course equivalent) Political Science 381 and an additional 3 units (0.5 full-course equivalent) in “International Relations” at the 300 level or above (see note below).
   d. 3 units (0.5 full-course equivalent) Political Science 399.
4. Advanced-Level Political Science: Inclusive of the courses used to fulfill requirement 3, at least 9 units (1.5 full-course equivalents) must be at the 400 level or above, including at least 6 units (1.0 full-course equivalent) at the 500 level.
5. Honours Seminar and Thesis: 6 units (1.0 full-course equivalent) Political Science 590 and 591. A grade of “B+” or higher in both Political Science 590 and 591 is required for graduation with the BA Honours degree.

Notes:
- The categories of courses that fulfill the requirements for Comparative Politics and International Relations are located before the Political Science courses in the “Courses of Instruction” section of this calendar: ucalgary.ca/pubs/calendar/current/political-science.
- Honours thesis will be read by two faculty members who will provide an assessment. The final grade will then be assigned by the thesis supervisor.

C. OTHER REQUIREMENTS

Language: 6 units (1.0 full-course equivalent) in a Language other than English or the equivalent.

D. DEGREE OPTIONS

The BA in International Relations can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- Students should select a language of study that will assist them with their research on an understanding of the world. Culture courses offered in English by language departments cannot be used toward this requirement.
- Apart from International Relations 501, the core courses should be taken early in a student’s program.
- Students may take International Relations 597 (Independent Study) or existing Departmental independent study courses from their declared clusters, but only 3 units (0.5 full-course equivalent) may be counted towards the Major. Any proposed syllabus for such independent study, whether International Relations 597 or existing departmental independent study courses, must be approved by the Program Director. Students may include Geography 397 (Regional Geography of Selected World Areas) and 592 (Overseas Field Studies in Social and Economic Geography) in their regional electives, with the permission of the Program Director, provided the region(s) covered are relevant to their declared
group electives. Questions about requirements may be directed to the Program Director.

4.52.5 BA in International Indigenous Studies

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) in the Field of International Indigenous Studies while fulfilling the following requirements:

1. Core Courses: 21 units (3.5 full-course equivalents) including:
   a. 15 units (2.5 full-course equivalents) Indigenous Studies 201, 303, 305, 407, 415;
   b. 6 units (1.0 full-course equivalent) from: Anthropology 210, Development Studies 201, History 345, Sociology 307;

2. Language Requirement: 3 units (0.5 full-course equivalent) Indigenous Languages 205.

3. Supporting Courses: An additional 24 units (4.0 full-course equivalents) from the Field of International Indigenous Studies, of which:
   a. 6 units (1.0 full-course equivalent) must have a “Canadian Focus” and
   b. 9 units (1.5 full-course equivalents) must have an “International Focus;”
   c. At least 6 units (1.0 full-course equivalent) of the supporting courses must be at the 400 level or above.

C. DEGREE OPTIONS

The BA in International Indigenous Studies can be taken with Co-operative Education. See section 3.4, 4 Co-operative Education Programs for information and requirements.

Notes:
- Students should pay close attention to the timetable and when courses are offered, as some courses are offered only in the University of Calgary, whether inside or outside the Faculty of Arts.
- Indigenous Studies courses at the 200 level should be taken before second year, if possible.
- Indigenous Studies 407 is normally taken in the final year.

4.52.6 Minor in International Indigenous Studies

The Minor in International Indigenous Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) from the Field of International Indigenous Studies with at least 18 units (3.0 full-course equivalents) at the 300 level or above including:

1. Core Courses: 6 units (1.0 full-course equivalents) Indigenous Studies 201, 407

2. Supporting Courses: An additional 24 units (4.0 full-course equivalents) from the Field of International Indigenous Studies.

4.52.7 Minor in Security Studies

The Minor in Security Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) from the Field of Security Studies while meeting the requirements below:

1. 9 units (1.5 full-course equivalents) from the following: Political Science 381, 439, 455, 470, 481, 487, 491, 523, 575, 585.

2. 9 units (1.5 full-course equivalents) from the following: History 202, 333, 383, 471, 489, 490, 530, 544, 545, 547.

3. 9 units (1.5 full-course equivalents) from the following: Sociology 325, 375, 421, 425; Anthropology 343, 467; Development Studies 201; Computer Science 329, 418; Geography 311, 463, 522; Philosophy 314; Religious Studies 349, 367.

4. 3 additional units (0.5 full-course equivalent) from the Field of Security Studies.

4.53 Primatology

See Anthropology and Archaeology.

4.54 Psychology

Overview of Programs and Procedures

Baccalaureate Degrees Offered

Bachelor of Arts (BA) in Psychology Bachelor of Science (BSc) in Psychology BA Honours in Psychology BSc Honours in Psychology Combined Bachelor of Community Rehabilitation (BCR)/BA or BSc in Psychology

Related Interdisciplinary Degrees (See separate listings):

BSc Honours in Neuroscience (Faculty of Science)

Note:
- A Minor in Psychology
- A Minor in Speech-Language Sciences is available to students majoring in Psychology

Introduction

Psychology is both a science and a profession. As scientists, psychologists work in a variety of settings like universities, hospitals, government, and corporations and carry out both basic and applied research. As a profession, psychology includes a number of different types of practitioners who apply psychological knowledge to solve personal, social, and practical problems. These include clinical psychologists who specialize in the identification and treatment of psychological disorders but also provide psychological assessments, health-related services, and psychological interventions. Practitioners also include industrial/organizational psychologists who work in recruitment, selection, training, and other business practice areas. Career options depend on students’ goals and interests and the level and type of training acquired. With a BA or BSc, students may find employment in a variety of settings and a range of occupations such as human resources manager, addictions counsellor, researcher, consultant, case worker, etc. A degree in psychology can also be the first step in the pursuit of a variety of careers in fields that require an undergraduate degree such as law, medicine, management, social work, speech pathology, and audiology. Students wishing to work as a clinical or counselling psychologist will require additional university training in Psychology beyond the BA or BSc degree. Students wishing to take a Psychology degree that emphasizes the social sciences and humanities should register for the BA degree; those who wish to emphasize the biological and natural sciences should register for the BSc degree. Students who are interested in pursuing graduate study in Psychology should consider the Psychology BA or BSc Honours Program.

Contact Information

Department Office: Administration 275
Phone: 403.220.5561
Fax: 403.282.8249
Undergraduate Program Email: psycugrd@ucalgary.ca
Graduate Program Email: psycgrad@ucalgary.ca

For Program Advice

Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.

For more specific advice regarding course selection and requirements in the major field, students should consult the Undergraduate Programs Advisor located in the Department of Psychology (consult Department website for contact information).

Admission to the Major

Prospective students must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Limitation of Enrolment

Due to high demand, admissions to the BA and BSc Degree programs in Psychology are limited. Students will be admitted on a competitive basis. Admission averages are typically set above the minimum level for the Faculty of Arts. These higher admission standards are applicable to high-school applicants, external transfer applicants from other post-secondary institutions and internal transfer applicants from other programs at the University of Calgary, whether inside or outside the Faculty of Arts.
Field of Psychology
The Field of Psychology consists of all courses labelled Psychology (PSYC).

Note: While Psychology 203 may be taken for overall degree credit, it does not count toward the minimum requirements for the Major or Honours in Psychology.

4.54.1 BA in Psychology
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 45 units (7.5 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Psychology while fulfilling the following requirements:

1. Introduction: 6 units (1.0 full-course equivalent) Psychology 200, 201.
2. Research Methods and Statistics: 6 units (1.0 full-course equivalent) Psychology 300, 301.
3. Foundation Courses:
   - 6 units (1.0 full-course equivalent) Psychology 345, 375
   - 9 units (1.5 full-course equivalents) from Psychology 321, 349*, 351*, 353*, 365, 369, 383, 385.
4. Applying Research Methods: At least 3 units (0.5 full-course equivalent) and no more than 6 units (1.0 full-course equivalent) from Psychology 400, 415, 425, 427, 430, 478, 504, 505.
5. Upper-Level Courses: An additional 15 units (2.5 full-course equivalents) at the 400 or 500 level from the Field of Psychology.

4.54.2 BSc in Psychology
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 45 and a maximum of 60 units (7.5 and a maximum of 10.0 full-course equivalents) in the Field of Psychology while fulfilling the following requirements:

1. Introduction: 6 units (1.0 full-course equivalent) Psychology 200, 201.
2. Research Methods and Statistics: 6 units (1.0 full-course equivalent) Psychology 300, 301.
3. Foundation Courses:
   - 6 units (1.0 full-course equivalent) Psychology 345, 375
   - 9 units (1.5 full-course equivalents) from Psychology 321, 349*, 351*, 353*, 365, 369, 383, 385.
4. Applying Research Methods: At least 3 units (0.5 full-course equivalent) and no more than 6 units (1.0 full-course equivalent) from Psychology 400, 415, 425, 427, 430, 478, 504, 505.
5. History of Psychology: 3 units (0.5 full-course equivalent) Psychology 305 or 405.
6. Advanced Research Methods: 3 units (0.5 full-course equivalent) from Psychology 407, 411, 415*

*Psychology 415 cannot be used to satisfy both requirement 5 and 6.

7. Honours Courses: 9 units (1.5 full-course equivalents) Psychology 501 and 598, which must be completed during the final year of program.
8. Psychology Options: An additional 15 units (2.5 full-course equivalents) from the Field of Psychology.
9. Inclusive of the courses above, at least 30 units (5.0 full-course equivalents) must be at the 400 level or above.

4.54.3 BA Honours Psychology
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 60 and a maximum of 72 units (10.0 and a maximum of 12.0 full-course equivalents) including Psychology 203 and 204; Chemistry 201 or 203; Mathematics 249 or 265 and one of 211, 213, 253, 267; and Physics 211 or 221 or 227.

4.54.4 BSc Honours Psychology
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 60 and a maximum of 72 units (10.0 and a maximum of 12.0 full-course equivalents) including Biology 241 and 243; Chemistry 201 or 211 and 203 or 213; Mathematics 249 or 265 and one of 211, 213, 253, 267; and Physics 211 or 221 or 227.

Due to high demand, the qualifying grade average for admission to Honours Psychology is typically set higher than the minimum 3.30 level for the Faculty of Arts. When this is the case, the qualifying average for the following year is announced on the Department website by October 1. For the purpose of admission to Honours, a student’s grade point average is calculated over the most recent course work to a maximum of 60 units (10.0 full-course equivalents) inclusive of courses from other institutions as well as the University of Calgary. Psychology Majors must apply for admission to the Honours program no later than January 23 of the year prior to their final year. Admission is contingent on the availability of an eligible thesis supervisor, as well as the availability of the resources (laboratory space, equipment, etc.) needed to complete the thesis. Students are encouraged to consult with the Psychology Advisor well before the January 23 deadline to determine their eligibility.

Courses and Registration
Registration in 400- and 500-level Psychology courses is restricted to Psychology Majors.

University of Calgary Collaborative BA and BSc in Psychology at Red Deer College
This program allows students to transfer up to two years of Red Deer College work and to qualify for the BA or BSc in Psychology by completing the required University of Calgary courses at Red Deer College. For further information, contact the Department of Psychology.

Students admitted to the Psychology Major in the University of Calgary program at Red Deer College may not register in Psychology courses offered on the Calgary campus without the permission of the Associate Dean, Undergraduate Programs and Student Affairs.

Overlapping Programs
Programs in Psychology cannot be taken in conjunction with programs in Neuroscience. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees.
equivalents) in the Field of Psychology while fulfilling the following requirements:

1. **Introduction**: 6 units (1.0 full-course equivalent) Psychology 200, 201.

2. **Research Methods and Statistics**: 6 units (1.0 full-course equivalent) Psychology 300, 301.

3. **Foundation Courses**:
   - 6 units (1.0 full-course equivalent) Psychology 345, 375
   - 9 units (1.5 full-course equivalents) from Psychology 321, 349, 351, 353, 365, 369, 383, 385.

   *A maximum of 3 units from Psychology 349, 351, 353 may be used to fulfill this requirement.

4. **History of Psychology**: 3 units (0.5 full-course equivalent) from Psychology 305 or 405.

5. **Applying Research Methods**: At least 3 units (0.5 full-course equivalent) and no more than 6 units (1.0 full-course equivalent) from Psychology 400, 415, 425, 427, 430, 478, 504, 505.

6. **Advanced Research Methods**: 3 units (0.5 full-course equivalent) from Psychology 407, 411, 415.

7. **Honours Courses**: 9 units (1.5 full-course equivalents) Psychology 501 and 598, which must be completed during the final year of program.

8. **Psychology Options**: An additional 15 units (2.5 full-course equivalents) from the Field of Psychology.

9. **Inclusive of the courses above, at least 30 units (5.0 full course equivalents) must be at the 400 level or above.

C. **OTHER REQUIREMENTS**

**Science Courses**: 21 units (3.5 full-course equivalents) including Biology 241 and 243; Chemistry 201 or 211 and 203 or 213; Mathematics 249 or 265 and one of 211, 213, 253, 267; and Physics 211 or 221 or 227.

4.54.5 **Combined BCR (Medicine)/BA or BSc (Psychology)**

This five-year program leads to a Bachelor of Community Rehabilitation from the Cumming School of Medicine and either a Bachelor of Arts or Science in Psychology from the Faculty of Arts. A minimum of 150 units (25.0 full-course equivalents) must be successfully completed.

Students pursuing this program may enter the combined degree in first year in either the Faculty of Arts or the Cumming School of Medicine. To qualify for the combined degree program, students must satisfy the admission requirements for both Faculties, for the Department of Psychology and for Community Rehabilitation.

The program requires careful selection of courses to complete all requirements of the two Faculties. Interested students should consult with the Arts Students’ Centre Program Advisors and the Psychology Advisor for the Faculty of Arts as well as the Student Advisor in the Community Rehabilitation program. If courses have been chosen carefully, it is normally possible for students to opt out of their combined degree program until the end of their third year and still complete a single degree program in four years. If courses have been unevenly distributed, however, it may require more than four years to complete a single degree.

Program details are listed in the Cumming School of Medicine section of this Calendar under 3. Community Rehabilitation and Disability Studies.

4.54.6 **Minor in Psychology**

The Minor in Psychology is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 and not more than 36 units (5.0 and not more than 6.0 full-course equivalents) from the Field of Psychology including Psychology 200, 201, 300 and 301. Spaces in Psychology courses are limited and cannot be guaranteed for Minors. Registration in 400- and 500-level Psychology courses is normally restricted to Psychology Majors.

4.54.7 **Minor in Speech-Language Sciences for Psychology Majors**

Psychology Majors become eligible to declare this Minor once they have completed Psychology 200 and 201.

1. **Required courses**: 24 units (4.0 full-course equivalents) Linguistics 201, 301, 303, 316, 337, 341, 441, 467.

2. **6 units (1.0 full-course equivalent)** from Linguistics 416, 516, Psychology 349.

4.55 **Religious Studies**

See Classics and Religion.

4.56 **Religious Studies and Applied Ethics**

Applications to this program are currently suspended. No new admissions will be permitted.

**Overview of Programs and Procedures**

**Baccalaureate Degrees Offered**

Bachelor of Arts (BA) in Religious Studies and Applied Ethics

BA in Religious Studies and Applied Ethics with Co-operative Education

**Introduction**

The Major in Religious Studies and Applied Ethics is offered jointly by the Department of Philosophy and the Department of Classics and Religion. Students wishing to enrol in this program should consult the Philosophy Advisor or the Program Director. A Minor Field of Specialization is not offered in Religious Studies and Applied Ethics.

In the program of study that leads to the Bachelor of Arts in Religious Studies and Applied Ethics, students learn to identify moral problems that arise in contemporary society and develop skills to evaluate responses. Students learn about religious worldviews that may inform moral decisions and develop sensitivity to cultural and religious contexts of ethical decision-making.

**Contact Information**

Website: phil.ucalgary.ca/undergrad/barrels.

**For Program Advice**

Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements.

For more specific advice regarding course selection and requirements in the major field, students should consult the subject advisor located in their home Department (consult Department website for contact information).

**Admission to the Major**

Prospective students wishing to enter the BA (Religious Studies and Applied Ethics) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar. Annual application deadlines are found in A.3 Deadline Dates for Undergraduate Applications for Admission and Transcripts.

**Overlapping Programs**

The program in Religious Studies and Applied Ethics cannot be taken in conjunction with programs in Philosophy or Religious Studies. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees. A maximum of 60 units (10 full-course equivalents) is allowed in any discipline within the Major Field of Religious Studies and Applied Ethics.

**Field of Religious Studies and Applied Ethics**

The Field of Religious Studies and Applied Ethics consists of all courses labelled Philosophy (PHIL) and Religious Studies (RELS).

4.56.1 **BA in Religious Studies and Applied Ethics**

A. **FACULTY OF ARTS REQUIREMENTS**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. **MAJOR-FIELD REQUIREMENTS**

Students must successfully complete a minimum of 51 units (8.5 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Religious Studies and Applied Ethics while fulfilling the following requirements:

1. **Introduction**: Religious Studies 203, 205, and 3 units (0.5 full-course equivalent) from Religious Studies 201, 273.

2. **Western and Eastern Religion**: 3 units (0.5 full-course equivalent) at the 300 level or above from the Western Religion Stream and 3 units (0.5 full-course equivalent) at the 300 level or above from the Eastern Religion Stream. (See the “Religious Studies” courses.)

Introduction

The School of Creative and Performing Arts (SCPA) is a dynamic new initiative designed to provide both rigorous and distinct disciplinary programs and uncommon opportunities for interdisciplinary exchange and collaboration. Hosting programs in Dance, Drama and Music, the SCPA provides students a range of options for specialization and innovation, both within and across its participating divisions.

Dance provides a four-year BA (Dance) degree and a four-year BFA (Dance) degree that explores dance from multiple perspectives, as well as a five-year combined BKIN/BA degree that highlights the relationships between the sciences, arts and humanities. Students delve into choreography, performance, technique, improvisation, dance for the camera, dance science, global dance, history, and theory in order to understand the place of dance in the twenty-first century. From ballet to contact improvisation, hip hop to contemporary, dance at the University of Calgary helps students gain in-depth experience as well as a broad understanding of a range of cultural forms. With emphasis on both practice and analysis, our program is designed to prepare graduates for careers in professional performance, choreography, scholarship, and education, as well as further dance study in graduate programs.

Drama offers a four-year Bachelor of Fine Arts Degree comprised of a broad curriculum including: acting, directing, scenography, playwriting, performance creation, drama education, theatre history and dramatic literature and criticism. The program allows the student to tailor their degree to their interests and their desired career path. Drama also offers a five-year concurrent BFA/BED degree with the Werklund School of Education. Many of our courses are available to non-Drama students and can contribute to an elective requirement.

Music offers a four-year Bachelor of Music (BMus) Degree that is designed for students wishing to enter a professional career in music, as performers, teachers, composers, sound designers, theorists, historians or musicologists. The BMus degree provides the opportunity for students to Major in Performance, Composition or Integrated Studies. In addition there is a major in Music Education that is available in the context of a five-year concurrent BMus/Bachelor of Education degree for students wishing to pursue the Secondary Route. Students wishing to pursue the Elementary Route should complete a BA Music/Bachelor of Education degree. All BMus programs have a common first year.

Music also offers four-year programs leading to Bachelor of Arts (Music) and Honours Bachelor of Arts (Music) degrees for the student who wishes to pursue a general liberal arts education with an emphasis on Music. It is an ideal degree for students who are interested in music but may wish to pursue careers in law, medicine, arts administration, media studies, elementary education, digital arts, and so on. In addition to music courses, BA (Music) students have the flexibility to take a large number of courses outside of the field of Music, allowing them to create degree plans that cater to their individual interests and needs.

In addition to the three discipline-specific divisions, the School provides unique opportunities for interdisciplinary instruction and collaboration. Specifically, there are two interdisciplinary courses required of all students enrolled in a major program in SCPA. These courses provide historical and contextual understanding of interdisciplinary practices as well as both theoretical and practical instruction in interdisciplinary exchange and creative processes. Beyond these required courses SCPA students enjoy a wide range of special topics electives and extra-curricular opportunities that explore a variety of interdisciplinary practices and subject material.

Admission

Prospective students wishing to enter any of the programs in the School must meet the criteria listed in section A.2. Undergraduate Admission of this Calendar. The application deadline is March 1.

Several of our programs require additional materials such as an audition and/or a statement of intent. These requirements are noted below.
Admission to the BA, BFA and BA/ BKin in Dance

Applicants to the BA Dance, BFA Dance and BKin/BA combined degree programs will be assessed on the basis of a dance audition, an Entrance Audition Form and a Statement of Interest. For information about the Entrance Audition Form and application deadlines, refer to the BA/BFA Dance Entrance Auditions website: arts.ucalgary.ca/schools/creative-performing-arts/dance/admission-auditions-and-faqs.

Applicants to the BKin/BA combined degree program must meet the admissions requirements for both the Faculty of Arts and the Faculty of Kinesiology (see A.2 Undergraduate Admission).

Dance Audition

After submitting an Admission Application to the University of Calgary Admissions Office and an Entrance Audition Form to the Division of Dance by the deadlines, all applicants will be expected to auditions.

Auditions are conducted by the Dance Committee and are held on the University of Calgary campus in March. During the audition, applicants will be required to participate in dance classes, written assignments and improvisation.

It is strongly suggested that applicants audition in person. Applicants who are unable to audition in person must submit a DVD audition by the deadline. Refer to the SCPA Audition website for further information and requirements for video auditions.

Limitation of Enrolment

Enrolment in the Dance program is limited. Therefore, all qualified applicants may not be admitted. Applicants will be admitted on the basis of the following criteria:

1. Academic standing in high school and/or previous post-secondary education (university admission requirements);
2. Written Statement of Interest;
3. Dance audition.

Admission to the BFA in Drama

An audition is not required for admission to the program.

Admission to the BA in Music

Admission requires evidence of successful completion of Royal Conservatory Level 8 Theory (formerly Advanced Rudiments) or the Division music theory diagnostic exam. Admission to BMus Programs is also contingent on an audition and interview where applicants are assessed not only on actual performance, but also on talent, potential, and musicality.

Audition Dates

Auditions typically occur in late February and/or early March.

More information, deadlines and audition forms are available on the Admission Requirements and Auditions section of the Music Undergraduate page: arts.ucalgary.ca/schools/creative-performing-arts/music/undergraduate.

Audition Requirements

Applicants should be prepared to perform two pieces (except for piano and voice, who should be prepared to perform three pieces), each from a different style period; singers and instrumentalists must provide their own accompanist. Applicants should be prepared to perform for approximately 10 minutes; in addition, they will be asked to sight-read a short piece of music appropriate to their instrument or voice.

Applicants audition on the instrument of their choice or in voice. Those who would like to audition on two instruments may do so. The jury will determine which instrument (or voice) will become the major when the applicant is admitted to a Music program.

Previously accepted students who have not been enrolled in a performance practice course for a year or more may be required to re-audition in order to determine if the previous level of attainment has been maintained.

Guidelines

As an indication of the level for admission to Music, the following guidelines should be noted:

- Pianists and vocalists should be prepared to perform repertoire at the Grade X level.
- All others should be prepared to perform repertoire at the Grade VIII level. Students who have not reached the Grade VIII level, but who have a serious interest in a career in music, are encouraged to apply and to audition at the level of performance they have reached. Suggested audition repertoire guidelines are available on the Admission Requirements and Auditions section of the Music Undergraduate page: arts.ucalgary.ca/schools/creative-performing-arts/music/undergraduate.

Applicants Who Live Outside a 150 Km Radius of Calgary

BMus applicants who live further than 150 km from Calgary may submit a video or audio recording. If a recording is submitted, the student may be required to perform a live audition upon arrival. The recording should consist of approximately 10 minutes of music and conform to the requirements for auditions given above. The recording should have been made not more than two months prior to submission, should be of good quality and should be solo or solo with accompaniment. Deadlines for the receipt of video or audio recordings are available on the Admission Requirements and Auditions section of the Music Undergraduate page: arts.ucalgary.ca/schools/creative-performing-arts/music/undergraduate.

Bachelor of Music (BMus) - Major Fields of Specialization

Bachelor of Music students take a common first-year program of study and then select one of the following Major Fields of specialization:

- Composition
- Integrated Studies
- Performance

Admission to each Major is conditional on:

1. The completion of Music 211, 213, 221, 223, 225, 231 and 233 with an average of “B-” (2.70) or better in those courses.
2. Grades of “B” (3.00) or better in courses in their area: Composition or Performance.
3. Approval of the Division Chair.

In order to continue in Performance, students must earn an average grade of “B-” or better in courses in that area of specialization in each academic year. Student who do not achieve this average will be required to choose a different field of specialization.

Music Students: Keyboard Proficiency Tests

Music has a required minimum level of keyboard proficiency, which all Bachelor of Music students must achieve in order to graduate. Applicants who have never played a keyboard instrument, or whose proficiency does not meet the required level, will be advised to take remedial work in keyboard, either through the Music Division or privately.

Courses and Registration

In planning their programs, students should bear in mind that some senior courses are not offered every year.

Overlapping Programs

Refer to Degrees in the Fine Arts in 1. Summary of Degree Programs for valid combinations.

Fields of Study

Field of Dance

The Field of Dance consists of all courses labelled Dance (DNCE).

Field of Drama

The Field of Drama consists of all courses labelled Drama (DRAM), except Drama 203 and 205.

Field of Music

The Field of Music consists of all courses labelled Music (MUSI), Music Performance (MUPF) and Music Education (MUED), which are categorized as follows:

*BMUS students may count a maximum of 6 units (1.0 full-course equivalent) from Music 301, 302, 304, 305, 401, 402, and 405 toward their open options. Music majors and Music minors may not count Music 209 and 309 toward their degree requirements.

**Students in the Sonic Arts minor may count Music 309 towards their degree requirements.

Music Theory and Musicianship: Music 211, 213, 225, 311, 313, 325, 329, 415, 417, 511, 513

Performance: Music 221, 223, 321, 323, 327, 421, 423, 427, 429, 462, 521, 523, 525, 527, 562, all courses labelled (MUPF)

Music History and Literature: Music 203, 231, 233, 303, 331, 333, 334, 336, 531, 533, 535

Composition: Music 341, 343, 441, 443, 445, 447

Sonic Arts: Music 255, 351, 355, 451, 453, 551

Music Education: all courses labelled (MUED)

Field of Fine Arts

The Field of Fine Arts consists of all course labelled Art (ART), Art History (ARHI), Dance (DNCE), Drama (DRAM), Film (FiLM), Fine Arts (FINA), Music (MUSI), Music Education (MUED), Music Performance (MUPF), and School of Creative and Performing Arts (SCPA).

4.58.1 BA in Dance

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

The BA in Dance requires the successful completion of the following program of study, which includes 48 units (8.0 full-course equivalents) to a maximum of 60 units (10.0 full-course equivalents) in the Field of Dance:

1. 36 units (6.0 full-course equivalents) from the following required courses:
   - Dance 207, 209, 235, 247, 267
   - Dance 305, 307, 331, 333, 347 and one of 309, 343, 503 or 581
   - Dance 481
2. 3 units (0.5 full-course equivalent) from the following Studio Options:
   - Dance 311, 321, 405, 427
3. 9 units (1.5 full-course equivalents) from the following Theory Options:
   - Dance 341, 359, 363, 391, 437, 447, 449, 465, 491

C. OTHER REQUIREMENTS

   - SCPA Courses: 6 units (1.0 full-course equivalent) from School of Creative and Performing Arts 290 and 399.

Note: Dance 481 is not offered every year. This course is required without exception. Students must arrange their schedules to accommodate the alternating timetable.
Faculty of Arts

Programs Office of Kinesiology, the Faculty of Arts program advisors located in the Arts Students’ Centre and Undergraduate Program Administrator for Dance.

4.58.4 Minor in Dance
The Minor in Dance is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Dance with at least 18 units (3.0 full-course equivalents) at the 300 level or above.

4.58.5 BFA in Drama
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
The BFA in Drama requires the successful completion of the following program of study, which includes 69 to 75 units (11.5 to 12.5 full-course equivalents) in the Field of Drama:

1. Core Courses: 33 units (5.5 full-course equivalents) from Drama 209, 210, 223, 225, 242, 243, 345, 346, 347, 391, 393.
2. Drama Option: 36 units (6.0 full-course equivalents) from the Field of Drama at the 300 level or above.

C. OTHER REQUIREMENTS
1. SCPA Courses: 6 units (1.0 full-course equivalents) from School of Creative and Performing Arts 290, 399.
2. 3 units (0.5 full-course equivalent) in English
3. 6 units (1.0 full-course equivalent) selected from courses in Art, Art History, Dance, Film, Fine Arts, Music, School of Creative and Performing Arts (SCPA) and/or courses at the 300 level or above in Drama.

Notes:
- Drama 225 is a 3-unit (0.5 full-course equivalent) course normally offered in the Fall Term. Drama 223 is also a 3-unit (0.5 full-course equivalent) course but it runs over the entire year and students must register in both "A" and "B" parts. Consequently, first-year course loads will be 13.5 units (2.25 full-course equivalents) for one semester and 16.5 units (2.75 full-course equivalents) for the other semester. This will still maintain full-time status; however, students are advised to contact a program advisor in the Arts Students’ Centre (ASC) for information concerning their registration.
- Drama offers the opportunity for selected students to complete a professional theatre internship with local professional theatre organizations while registered in Internship 591 and 593 (see 4.58.8).
- Students intending to pursue graduate studies in Drama are reminded that most Canadian universities require a reading knowledge of at least one modern language other than English.
- The Drama Division encourages students to enrich their degree programs with complementary courses, workshops and collaborations with other areas of study within the SCPA.

4.58.6 Concurrent BFA (Drama Education)/BEd
Introduction
This five-year program leads to a Bachelor of Fine Arts in Drama Education from the Faculty of Arts and a Bachelor of Education from the Werklund School of Education. A minimum of 150 units (25.0 full-course equivalents) must be successfully completed.

Present certification requirements of the Province of Alberta can be satisfied. When planning courses, students should take into consideration Alberta Teacher Certification Requirements. For details, refer to the Werklund School of Education website.

The BFA (Drama Education) program is a specialized three-year program, which exists only in combination with the two-year BEd. It is designed for students intending either to teach drama in schools or to work as drama specialists with young people or community groups following certification. It provides opportunities for course work in performance creation and other aspects of the theatre, which relate directly to the particular needs of theatre with and for youth and communities.

Admission
Students must meet the admissions requirements for the Faculty of Arts as well as the Werklund School of Education as specified in the Admissions section of this Calendar.

A. FACULTY OF ARTS REQUIREMENTS FOR CONCURRENT DEGREES
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS FOR DRAMA
Students must successfully complete the following program of study, which includes from 60 units (10.0 full-course equivalents) to 78 units (13.0 full-course equivalents) in the Field of Drama:

Drama Courses: 60 units (10.0 full-course equivalents) including:
- 18 units (3.0 full-course equivalents) Drama 209, 210, 223, 225, 242, 243
- 3 units (0.5 full-course equivalent) Drama 346
- 6 units (1.0 full-course equivalent) Drama 564
- An additional 33 units (5.5 full-course equivalents) labelled Drama at the 300 level or above

Note: Drama 348, 360, 365, 367 and 460 are recommended but not required.

C. BEd PROGRAM REQUIREMENTS
Refer to 4.5 Five-Year BEd (Concurrent) Program in the Werklund School of Education section of the Calendar.

Note: Students in this program must complete Education 201 before they can enter their first year in the Werklund School of Education.

4.58.7 Minor in Drama
The Minor in Drama is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (6.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Drama with at least 18 units (3.0 full-course equivalents) at the 300 level or above.

Note: Drama 203 and 205 are not applicable towards the minor.

4.58.8 Professional Theatre Internship
Introduction
Qualified students may apply to be placed in internship positions with local professional theatre organizations. Students may be accepted as interns in areas such as Acting, Design, Stage Management, Playwriting, Dramaturgy, Theatre Administration, and Directing. Students uncertain as to their specific career goal may be accepted as General Interns. Students accepted as interns become full-time members of a professional theatre company and are expected to devote themselves full-time to this activity. Interns are paid a monthly salary by their theatre company for the duration of the eight-month internship.

Students who are selected for the internship enrol in Internship 591.01 Professional Theatre Internship I and Internship 591.02 Professional Theatre Internship II in the Fall and Winter Terms respectively.

Admission
To be eligible for consideration, applicants must be registered in the BFA Drama program and have completed 90 units (15.0 full-course equivalents) before participating in the internship. Applications to be considered for the internship are due to Drama’s internship supervisor in February. See Drama’s website for more information.

4.58.9 BA in Music
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Music while fulfilling the following requirements:

1. Foundation Courses: Music 211, 213, 255, 334, 336, and 6 units (1.0 full-course equivalent) at the 300 level in Composition, Sonic Arts or Theory.
3. Upper-Level Courses: An additional 18 units (3.0 full-course equivalents) from
the Field of Music at the 400 or 500 level including:

a. A minimum of 6 units (1.0 full-course equivalent) in Music History and Literature.

b. A minimum of 3 units (0.5 full-course equivalent) in Composition, Sonic Arts or Theory.

C. OTHER REQUIREMENTS
6 units (1.0 full-course equivalent) School of Creative and Performing Arts 290 and 399.

Notes:

- It is recommended that students choose Music 451 or 453 in partial fulfillment of the Upper-Level Course requirement.
- Honours students in Music are required to declare a program of study during or before their third year of study. A student may define a more narrow focus of study within an area such as Music History, Music Theory, Composition, Digital Media, or Music Pedagogy, or they may link thematically across such areas.
- The Honours Project (Music 560) is usually written during the final year of a student's program, under the close supervision of a member of Music. At the end of the year, the student defends the thesis before a committee that consists of three faculty members, of which normally at least two are members of Music. The Honours project in suitable form is to be submitted by the first day of the final examinations scheduled by the Registrar in the Winter Term.
- Music 531 is recommended for students who intend to do a scholarly paper for their Honours Project.
- Students are urged to plan ahead in their selection of these courses to ensure that they meet prerequisites.
- Students with an interest in pursuing a Sonic Arts Concentration should select Music 351 and 355 to meet the Foundation Course requirement of 6 units (1.0 full-course equivalent) at the 300 level in Composition, Sonic Arts or Theory.

4.58.10 BA Honours Music

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 60 units (10.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Music while fulfilling the following requirements:

1. Foundation Courses: Music 211, 213, 255, 334, 336, and 6 units (1.0 full-course equivalent) at the 300 level in Composition, Sonic Arts or Theory.

2. Music Performance and Musicianship:
   9 units (1.5 full-course equivalents) Music 225, 325, and all courses labelled Music Performance.

4. Upper-Level Courses: An additional 24 units (4.0 full-course equivalents) from the Field of Music at the 400 or 500 level including:
   a. A minimum of 6 units (1.0 full-course equivalent) in Music History and Literature; and
   b. A minimum of 3 units (0.5 full-course equivalent) in Composition, Sonic Arts or Theory.

C. OTHER REQUIREMENTS
6 units (1.0 full-course equivalent) School of Creative and Performing Arts 290, 399.

Notes:

- It is recommended that students choose Music 451 or 453 in partial fulfillment of the Upper-Level Course requirement.
- Honours students in Music are required to declare a program of study during or before their third year of study. A student may define a more narrow focus of study within an area such as Music History, Music Theory, Composition, Digital Media, or Music Pedagogy, or they may link thematically across such areas.

4.58.11 BMus in Composition

This Major is for students with a particular interest in music composition.

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
The BMus in Composition requires the successful completion of the following program of study, which includes 90 units (15.0 full-course equivalents) to 96 units (16.0 full-course equivalents) in the Field of Music:

1. Common Core Program for BMus Majors:
   a. 42 units (7.0 full-course equivalents) Music 211, 213, 221, 223, 225, 255, 311, 313, 321, 323, 325, 334, 336 and one of Music Performance 201, 203, 205, 211, 213 or 215
   b. Pass piano proficiency exam or successfully complete Music 127
   c. Music 105.01, 105.02, 105.03, 105.04

2. Composition Requirements: 42 units (7.0 full-course equivalents) from:
   a. Music 341 and 343
   b. Music 441, 443, 445, 447, and 451
   c. Music 513 and 560
   d. One of Music Performance 301, 303, 305, 311, 313, 315, 321, 325, 327 or 329
   e. Music Performance 327
   f. Music 415 or 417
   g. Music 453 or 511

3. Music History and Literature: 6 units (1.0 full-course equivalent) in Music History and Literature at the 300 level or above.

C. OTHER REQUIREMENTS
6 units (1.0 full-course equivalent) School of Creative and Performing Arts 290 and 399.

Notes:

- Conducting is recommended as one of the open options.
- The Music Division encourages students to enrich their degree programs with complementary courses, workshops and collaborations with other areas of study within the SCPA.

4.58.12 BMus in Integrated Studies

The Major is designed for students looking to build strong musical skills in a comprehensive music degree. The flexibility of years three and four allows students to gain a broad musical knowledge (for example, equal parts Music History, Music Performance and Music Theory and Composition) OR to fuse two or more areas of musical study in a way that they are unable to in the other majors (for example performance and composition, music and technology, performance and early music studies). Admission to this major will depend on a statement of interest submitted to the Division Chair of Music at the end of the first year of studies.

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
The BMus in Integrated Studies requires the successful completion of the following program of study, which includes 78 units (13.0 full-course equivalents) to 96 units (16.0 full-course equivalents) in the Field of Music:

1. Common Core Program for BMus Majors:
   a. 42 units (7.0 full-course equivalents) Music 211, 213, 221, 223, 225, 255, 311, 313, 321, 323, 325, 334, 336 and one of Music Performance 201, 203, 205, 211, 213 or 215
   b. Pass piano proficiency exam or successfully complete Music 127
   c. Music 105.01, 105.02, 105.03, 105.04

2. Integrated Studies Courses: 15 units (2.5 full-course equivalents) from:
   a. Music 421, 423
   b. 9 units (1.5 full-course equivalents) from the following: Music Performance 301, 303, 305, 311, 313, 315, 321, 325, 327, 329
   c. Music Options: 21 units (3.5 full-course equivalents) from:
      a. 6 units (1.0 full-course equivalent) in Music History and Literature
      b. 3 units (0.5 full-course equivalent) in Composition, Sonic Arts, or Theory
      c. Music 521 and 523 or 6 units (1.0 full-credit equivalent) in Music options
      d. 3 units (0.5 full-course equivalent) in Music History and Literature and 3 units (0.5 full-course equivalent) Composition, Sonic Arts, or Theory
Faculty of Arts

or one of Music 462 or 560 (requires Division Chair approval)

C. OTHER REQUIREMENTS

6 units (1.0 full-course equivalent) School of Creative and Performing Arts 290 and 399.

Note: Students wishing to take Music 462 or 560 must obtain Division Chair permission. Students who take Music 462 will not also take Music 521 and 523.

4.58.13 BMus in Performance

This Major is for students with talent in performance who plan to become professional instrumentalists or singers. Admission as a Major in Performance will depend on an audition before a faculty jury at the end of the first or second year. In order to continue in Performance, students must earn an average grade of “B-“ or better in courses in their area of specialization in each academic year. Students who do not achieve this average will be required to choose a different field of specialization.

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

The BMus in Performance requires the successful completion of the following program of study, which includes 87 units (14.5 full-course equivalents) to 96 units (16.0 full-course equivalents) in the Field of Music:

1. Common Core Program for BMus Majors:
   a. 42 units (7.0 full-course equivalents) Music 211, 213, 221, 223, 225, 255, 311, 313, 321, 323, 325, 334, 336, and one of Music Performance 201, 203, 205, 211, 213, 215
   b. Pass piano proficiency exam or successfully complete Music 127
   c. Music 105.01, 105.02, 105.03, 105.04
   d. 36 units (6.0 full-course equivalents) from:
      a. Music 427, 462
      b. Music 527 and 562
   e. 9 units (1.5 full-course equivalents) from Music Performance 321, 323, 325, 327, 329, 341, 345
   f. 9 units (1.5 full-course equivalents) from Music Performance 301, 303, 305, 311, 313, 315
   g. Music Options: 9 units (1.5 full-course equivalents) from:
      a. 6 units (1.0 full-course equivalent) in Music History and Literature at the 300 level or above
      b. 3 units (0.5 full-course equivalent) in Composition, Sonic Arts or Theory at the 300 level or above

C. OTHER REQUIREMENTS

1. 6 units (1.0 full-course equivalent) School of Creative and Performing Arts 290 and 399.
2. Language Requirement: Voice Majors are required to complete 6 units (1.0 full-course equivalent) in French, German or Italian. Other Performance Majors are strongly urged to include two half courses in French, German, or Italian in their Non-Music options.

Notes:
   • Voice Majors are strongly encouraged to include Music 525.
   • Performance majors are strongly encouraged to take a Sonic Arts course as one of their 300 level or above options.
   • The Music Division encourages students to enrich their degree programs with complementary courses, workshops and collaborations with other areas of study within the SCPA.

4.58.14 Concurrent BMus (Music Education)/BEd

Introduction

This five-year program leads to a Bachelor of Education from the Werklund School of Education and a Bachelor of Music in Music Education from the Faculty of Arts. A minimum of 150 units (25.0 full-course equivalents) must be successfully completed.

Present certification requirements of the Province of Alberta can be satisfied. When planning courses, students should take into consideration Alberta Teacher Certification Requirements. For details, refer to the Werklund School of Education website.

The BMus (Music Education) part of the program involves three years of study and exists only in combination with the two-year BEd program. It is designed for students intending to teach music (both instrumental and choral) in the schools at the secondary level. In addition to the core areas of performance, theory, history and musicianship, the program provides course work in conducting, vocal and instrumental techniques and appropriate pedagogy for different age groups.

Admission

Students must meet the admissions requirements for both the Bachelor of Music program (see the Overview of Programs and Procedures) and the Faculty of Arts (see A.2 Undergraduate Admission), as well as the Werklund School of Education.

A. FACULTY OF ARTS REQUIREMENTS FOR CONCURRENT DEGREES

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS FOR MUSIC EDUCATION

Students must successfully complete the following program of study, which includes 75 units (12.5 full-course equivalents) to 81 units (15.5 full-course equivalents) in the Field of Music.

1. Common Core Program for BMus Majors:
   a. 42 units (7.0 full-course equivalents) Music 211, 213, 221, 223, 225, 255, 311, 313, 321, 323, 325, 334, 336, and one of Music Performance 201, 203, 205, 211, 213, 215

b. Pass piano proficiency exam or successfully complete Music 127

c. Three of Music 105.01, 105.02, 105.03, 105.04

2. Music Education Requirements:
   a. 18 units (3.0 full-course equivalents) Music Education 331, 333, 401, 403, 413, 415
   b. 6 units (1.0 full-course equivalent) Music 421, 423
   c. 6 units (1.0 full-course equivalent) from Music Performance 301, 303, 305, 311, 313, 315

3. Music Options
   a. 3 units (0.5 full-course equivalent) in Music History and Literature

C. OTHER REQUIREMENTS

3 units (0.5 full-course equivalent) School of Creative and Performing Arts 399

Note: School of Creative and Performing Arts 399 is strongly recommended.

4.58.15 Minor in Music

Admission to the Minor in Music requires evidence of successful completion of Royal Conservatory Level 8 Theory (formerly Advanced Rudiments) or the Division music theory diagnostic exam.

The Minor is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Music, with at least 15 units (2.5 full-course equivalents) at the 300 level or above. The Music Minor also requires:

1. At least 3 units (0.5 full-course equivalent) from an ensemble course: Music Performance 201, 203, 205, 211, 213, 215, 221, 223, 225, 227, 229, 241, 301, 303, 305, 311, 313, 315, 321, 323, 325, 327, 329, 341.

Note: Enrolment in Music 221 and 223 is by audition and subject to available resources. Students wishing to include these courses in their program of study should see “Audition Dates” under Overview of Programs and Procedures or contact the Music Undergraduate Program Administrator for more information on when and how to apply for an audition.

4.58.16 Minor in Sonic Arts

The Minor in Sonic Arts is for students who have an interest in electroacoustic music, soundscape composition, computer music, multi-channel sound spatialization, interactive music involving instruments with computer, and sound design for video, film, media arts and stage production.

The Minor is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Music including:

1. 21 units (3.5 full-course equivalents) Music 309, 351, 355, 451, 453, 551, Art 251.
4.58.17 Concentration in Sonic Arts for Music Majors

The Concentration in Sonic Arts is for BMus and BA (Music) students who have an interest in electroacoustic music, soundscape composition, computer music, multi-channel sound spatialization, interactive music involving instruments with computer, and sound design for video, film, media arts and stage production.

Students can acquire a Concentration in Sonic Arts by successfully completing 18 units (3.0 full-course equivalents) including:

1. 15 units (2.5 full-course equivalents) from Music 351, 355, 451, 453, 551
2. 3 units (0.5 full-course equivalent) from Music 533*, 511*, Fine Arts 503*, 507.

*With approval of the Division Chair, Music.

Of the six courses listed above, at least five are studio-based. As such, students who complete the concentration will be well-prepared for advanced work or the job market, particularly in the arts, multimedia and creative industries, including sound recording, sound design for games, installations, media production, podcasts, etc. While encompassing different approaches and techniques to working with sound and audio (soundscape studies, concert and field recording, electroacoustic music, interactive computer applications networked music performance, etc.), the concentration forms a cohesive suite of courses to give a well-rounded presentation to the student.

Anyone interested in pursuing the Concentration in Sonic Arts should consult with an Arts Advisor early in their planning process since not all courses are offered every year.

4.59 School of Languages, Linguistics, Literatures and Cultures

Overview of Programs and Procedures

Baccalaureate Degrees Offered

Degrees in East Asian Language Studies
Bachelor of Arts (BA) in East Asian Language Studies
BA in East Asian Language Studies with Co-operative Education

Degrees in East Asian Studies
Bachelor of Arts (BA) in East Asian Studies

Concurrent BA in French/Bachelor of Education
Concurrent BA in Spanish/Bachelor of Education

Notes:

• Minors are offered in Arabic Language and Muslim Culture, Chinese, East Asian Studies, French, German, Italian, Japanese, Linguistics, Russian and Spanish.

• A Minor in Speech-Language Sciences is offered to students with a declared Major in either Linguistics or Psychology.

• Concentrations are offered in Applied Linguistics and Speech-Language Sciences to students with a declared Major in Linguistics.

Introduction

The School of Languages, Linguistics, Literatures and Cultures offers programs that focus on Arabic, Chinese, French, German, Italian, Japanese, Russian, Spanish and the literatures and cultures associated with these languages, as well as programs in general linguistics. It also offers an interdisciplinary program in East Asian Studies.

The language programs challenge students to think critically about the relationship between language and culture, theories of language competency, cross-cultural awareness, including literature and film studies, and the socio-linguistic histories involved. The School recognizes the special role and place of French and Italian's two official languages, has played and continues to play in the socio-historical context of Canada. The French programs encompass French Canada, French-speaking Europe, francophone African literatures, critical theories, sociolinguistics and second language teaching.

Linguistics programs train students in the scientific study of language. Linguistic analysis and theory (syntax, morphology, semantics, phonology, phonetics, historical linguistics) constitute the core, which is enriched by the focal areas of language acquisition and processing and the analysis of Indigenous languages of Canada. Students in Linguistics can pursue a concentration in Applied Linguistics or Speech-Language Sciences.

Advanced Placement in Language Courses

Students who have prior knowledge of Arabic, Chinese, French, German, Italian, Japanese, Russian, or Spanish, including students with more than high school matriculation in these languages and graduates of a bilingual or immersion program, must consult the School to be placed in a course corresponding to their ability. Enrolment in Arabic and Chinese language courses involves a formal placement process. See details under Courses of Instruction, Arabic and Muslim Cultures and Chinese.

Native speakers are not eligible to take language courses by special assessment.

Notes:

• The School can refuse permission to remain in a particular language course if the instructor deems that the student’s knowledge exceeds the level of that course.

• Students are advised that misrepresenting their level of knowledge in the language of the course constitutes academic dishonesty and will be dealt with as such.

Study Abroad

The School of Languages, Linguistics, Literatures and Cultures encourages its students to take advantage of possibilities for studying off-campus, wherever one of its target languages is spoken. Detailed information on exchange programs and Study Abroad programs in Arabic, Chinese, French (in Quebec or elsewhere), German, Italian, Japanese, Russian, and Spanish is available from the School and/or the Centre for International Students and Study Abroad.
Students planning to study at another institution must obtain a letter of permission from their faculty. They are strongly advised to consult the School of Languages, Linguistics, Literatures and Cultures beforehand to discuss details concerning course selection and transfer of credit.

Le Centre français/The French Centre
Le Centre français est situé à Craigie Hall (C301). Le Centre propose un choix d’activités culturelles et gère “Le francophone,” lieu de rencontre et centre multimédia où l’on peut se détendre dans une ambiance francophone. Le Centre gère aussi des cours accrédités donnés en français dans différentes disciplines (French Language Instruction Program ou FLIP) permettant à l’étudiant de renforcer sa maîtrise de la langue. Pour plus amples renseignements, prière de s’adresser au Centre français, 403.220.7226, ucalgary.ca/frenchcentre.

The French Centre is located in Craigie Hall (C301). The Centre offers a variety of cultural activities, and operates “Le francophone,” a drop-in and media learning centre for those wishing to relax in a francophone atmosphere.

Through the French Language Instruction Program (FLIP), credit courses are offered in various disciplines providing students with opportunities to use and improve their French. Detailed information may be obtained from the Centre at 403.220.7226 or ucalgary.ca/frenchcentre.

Contact Information
Office Location: Craigie Hall C205, Craigie Hall D310
Phone: 403.220.5293 and 403.220.5300
Fax: 403.284.3610 and 403.284.3634
Email: slillac@ucalgary.ca
Website: slillac.ucalgary.ca

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements. Advising contact information can be found online: arts.ucalgary.ca/advising.

For more specific advice regarding course selection and requirements in the major field, students should consult the appropriate Undergraduate Advisor in the School of Languages, Linguistics, Literatures and Cultures (consult School website for contact information).

Admission to the Majors
Prospective students wishing to enter one of the BA programs offered by the School of Languages, Linguistics, Literatures and Cultures must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar.

Admission to Honours in French, German, Linguistics, Russian and Spanish
The Faculty of Arts procedures for Admission to Honours established in section 3.4.2

"Honours Degrees with a Major Field" are applicable and provide the overall framework for entry into the Honours Programs in French, German, Linguistics, Russian and Spanish. The application deadline is February 1.

Overlapping Programs
Programs in East Asian Language Studies cannot be taken in conjunction with programs in East Asian Studies. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees. Students cannot combine the East Asian Language Studies major with either a Chinese or Japanese minor.

Programs in Linguistics cannot be taken in conjunction with the program in Linguistics and Language. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees.

A Linguistics major may not be combined with both the Minor and the Concentration in Speech-Language Sciences.

Language programs (i.e., majors or minors) offered by the School of Languages, Linguistics, Literatures and Cultures can only be taken in conjunction with the major program in Linguistics and Language if the language or languages in the former program differ from the chosen Language Option for the latter. This restriction applies to Major-plus-Minor combinations, Double Majors, Combined Degrees and Second Baccalaureate Degrees.

Field of Arabic Language and Muslim Cultures
The Field of Arabic Languages and Muslim Cultures includes all courses labeled Arabic Languages and Muslim Cultures (ALMC) and the following courses:

- History 397.02, 406
- Political Science 369, 469, 479, 569
- Religious Studies 353, 357

Field of East Asian Language Studies
The Field of East Asian Language Studies consists of the following categories and courses:

**Chinese Language:**
- Chinese 205, 207, 229, 279, 301, 303, 311, 313, 331, 333, 341, 353, 401, 403, 431, 561

**Japanese Language:**
- Japanese 205, 207, 301, 303, 311, 313, 333, 441, 451, 471

**Japanese Studies:**

Subject to approval by the School, courses in Chinese Studies and Japanese Studies from other disciplines will be accepted towards the Field of Study.

Field of East Asian Studies
The Field of East Asian Studies consists of the following courses:

**Courses with a Focus on East Asia**
- Anthropology 303*, 323, 427
- Art History 325, 365
- East Asian Studies 201, 531
- History 209, 317, 404, 406, 547
- Japanese 201, 309, 311, 313, 317, 323, 325, 327, 341, 461
- Philosophy 335
- Political Science 465, 502*
- Religious Studies 203, 313, 323, 327, 329, 359, 453, 491*, 595*
- Strategy and Global Management 573

*With approval of the School.

**Language Courses**
- Chinese 205, 207, 229, 279, 301, 303, 311, 313, 331, 333, 341, 353, 401, 403, 431, 561
- Japanese 205, 207, 301, 303, 311, 313, 331, 333, 441, 451, 471

Field of French
The Field of French includes all courses labelled French (FREN).

Students with advanced placement may use Romance Studies 499 to fulfill one of the exempted Major Field requirements.

Field of German
The Field of German consists of all courses labelled German (GERM).

Field of Italian Studies
The Field of Italian Studies comprises the following:

**Courses with an Italian Focus**
- All courses labelled Italian (ITAL)
- Romance Studies 299, 341, 399 and 499

**Contextual Courses**
- Art History 327 and 357
- Greek and Roman Studies 209, 315, 327 and 345
- Religious Studies 383

Field of Linguistics
The Field of Linguistics consists of all courses labelled Linguistics (LING).

Field of Languages and Language
Students in this program select a particular language option (e.g., French or German or Russian, etc.). Students are not permitted to mix their languages except in the Ancient and Classical Languages option.

The Field of Languages and Language consists of all courses labelled Linguistics (LING) and all courses in the chosen language.

Field of Russian
The Field of Russian consists of all courses labelled Russian (RUSS) and the following:

- Slavic Studies 356
Field of Spanish
The Field of Spanish includes all courses labelled Spanish (SPAN). Students with advanced placement may use Romance Studies 499 to fulfill one of the exempted Major Field requirements.

4.59.1 Minor in Arabic Language and Muslim Cultures
The Minor in Arabic Language and Muslim Cultures is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.4 Minor Fields. Students must complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in Arabic Language and Muslim Cultures courses (see the Field of Arabic Language and Muslim Cultures) including Arabic Language and Muslim Cultures 331 and 333.

4.59.2 BA in East Asian Language Studies
Eligibility
Students who receive advanced placement at the 331 level or higher in both Chinese and Japanese are ineligible for this program.

Requirements
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students choose either Chinese or Japanese as the primary language of study and the other as their secondary language of study. Students who receive advanced placement in Chinese or Japanese at the 331 level or higher must choose the language in which they have not received advanced placement as their primary language of study.

Students must successfully complete a minimum of 45 units (7.5 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of East Asian Language Studies while fulfilling the following requirements:

1. Primary Language of Study: 24 units (4.0 full-course equivalents) from the list of either “Chinese Language” or “Japanese Language” courses. (See the lists under Major Field in East Asian Language Studies.) Students whose primary language is Japanese must take one of Japanese 441, 451 or 471.

2. Secondary Language of Study: 6 units (1.0 full-course equivalent) from the list of either “Japanese Language” or “Chinese Language” courses in the language not chosen for Requirement 1 above.

3. Primary Area of Studies: 9 units (1.5 full-course equivalents) from the list of either “Chinese Studies” or “Japanese Studies” courses, whichever corresponds to the primary language of study.

4. Secondary Area of Studies: 3 units (0.5 full-course equivalent) from the list of either “Japanese Studies” or “Chinese Studies” courses, whichever corresponds to the secondary language of study.

C. DEGREE OPTIONS
The BA in East Asian Language Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Note: Students with advanced placement in the secondary language may take up to 3 units (0.5 full-course equivalent) in the Secondary Area of Studies in place of 3 units (0.5 full-course equivalent) in the second language.

4.59.3 Minor in Chinese
The Minor in Chinese is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in “Chinese Language” and “Chinese Studies” courses (see the Field of East Asian Language Studies). Subject to School approval, a maximum of 6 units (1.0 full-course equivalent) from Chinese Studies in a different discipline may be credited towards the major field.

4.59.4 Minor in Japanese
The Minor in Japanese is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in “Japanese Language” and “Japanese Studies” courses (see the Field of East Asian Language Studies).

4.59.5 BA in East Asian Studies
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) from the list of either “Chinese Language” or “Chinese Studies” courses in the Field of East Asian Studies including:

2. Language: 12 units (2.0 full-course equivalents) from either: (a) Chinese 205, 207, 229, 279, 301, 303, 313, 331, 333, 341, 353, 401, 403, 431, 561; or (b) Japanese 205, 207, 301, 303, 313, 331, 333, 441, 451, 471.

3. East Asian Studies Options: an additional 21 units (3.5 full-course equivalents) chosen from within the Field of East Asian Studies with at least 15 units (2.5 full-course equivalents) chosen from the list of courses with a Focus on East Asia.

C. OTHER REQUIREMENTS
Methods and Frameworks:

a. 3 units (0.5 full-course equivalent) from: Philosophy 201, Religious Studies 205;

b. 3 units (0.5 full-course equivalent) from: Anthropology 203, Geography 251, Linguistics 201, Political Science 201, Sociology 201.

D. DEGREE OPTIONS
The BA in East Asian Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.59.6 Minor in East Asian Studies
The Minor in East Asian Studies is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.

Students must successfully complete at least 30 units (5.0 full-course equivalents) from the Field of East Asian Studies with at least 18 units (3.0 full-course equivalents) at the 300 level or above, including:

1. East Asian Studies 201 and one of Chinese 317 or 355 or Japanese 317.

2. Language: 6 units (1.0 full-course equivalent) from language courses in the Field of East Asian Studies from either: (a) Chinese 205, 207, 229, 279, 301, 303, 313, 331, 333, 341, 353, 401, 403, 431, 561; or (b) Japanese 205, 207, 301, 303, 313, 331, 333, 441, 451, 471.

3. At least 18 units (3.0 full-course equivalents) chosen from the Field of East Asian Studies with at least 12 units (2.0 full-course equivalents) from list of courses with a Focus on East Asia.

4.59.7 Baccalauréat en français/BA in French

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. EXIGENCES POUR LE BACCALAUREAT EN FRANÇAIS/MAJOR-FIELD REQUIREMENTS

La Section française de l’Ecole de langues, linguistique, littératures et cultures de l’Université de Calgary offre un programme d’étude complet de la langue et de la littérature françaises. Ce programme, de nature multidisciplinaire, est entièrement enseigné en français. Le programme de Baccalauréat (BA) est conçu pour développer les aptitudes linguistiques de l’étudiant jusqu’à un niveau très élevé. L’étudiant au BA apprendra la structure de la langue française, découvrira ses variations, et gagnera, ce faisant, un vaste fond de connaissances littéraires et culturelles dont le contenu traversera les siècles (du Moyen Âge à aujourd’hui), les cultures (la France, le Canada et toute la francophonie) et les média (la littérature et le cinéma notamment). Le Baccalauréat spécialisé (BA Honours) per-
Faculty of Arts

remet à l’étudiant d’approfondir ses connaissances linguistiques et culturelles tout en le préparant adéquatement pour les études supérieures, que ce soit en littérature, en linguistique, en éducation ou en traduction. Enfin, le Baccalauréat conjoint en Français et en Éducation (BA/BEd) prépare les étudiants à enseigner le français dans les réseaux d’enseignement primaires et secondaires tandis que les programme de Baccalauréat conjoints en français/italien et en français/espagnol intéresseront particulièrement les étudiants qui souhaitent jumeler leurs compétences en français à des compétences dans une deuxième langue romane.

Exigences: La concentration en français comprend un minimum de 48 unités (8.0 cours complets) et un maximum de 60 unités (10.0 cours complets), dont les suivants:

1. Niveau 200: 9 unités (1.5 cours complet) French 213, 225 et 227.
2. Niveau 300: 6 unités (1.0 cours complet) French 329, 369, plus 9 unités additionnelles (1.5 cours complet).
3. Niveau 400: 15 unités (2.5 cours complets).
4. Niveau 500: 9 unités (1.5 cours complets).

Remarques:
• Les étudiants doivent choisir comme premier demi-cours celui qui correspond à leurs connaissances de la langue française. Ceux qui ont suivi French 30N, 30S, 31, French Language Arts (FLA) 30 ou leur équivalent s’inscrivent d’habitude au cours French 225. Les étudiants qui ont suivi French 30 ou French N30 s’inscrivent d’habitude au cours French 213 après lequel ils pourront s’inscrire au cours French 225. Il est fortement recommandé, en cas de doute, de s’adresser à l’École avant la période des inscriptions.
• Les étudiants qui commencent en Français 209 ou 211 doivent compléter les exigences pour la concentration en français stipulées ci-dessus.
• Les étudiants qui sont placés à un niveau supérieur au cours French 225 dans la série des cours de langue doivent remplacer les cours dont ils sont dispensés par d’autres cours French (FREN) ou Romance Studies (ROST) de niveau 300 ou supérieur.
• Le Département recommande aux étudiants dont le français est la langue seconde de choisir French 489.01 (Phonologie).
• L’École recommande aux étudiants d’inclure parmi leurs options des cours FLIP (French Language Instruction Program) enseignés en français dans les autres départements. Un cours FLIP (French Language Instruction Program) peut compter pour 3 unités (0.5 cours complet).
• L’École recommande aux étudiants de choisir des options reliées à leur concentration en français telles que la littérature franco-canadienne, l’histoire de France, du Québec ou de la francophonie internationale, la linguistique, Women’s Studies, or African Studies.
• L’École recommande fortement aux étudiants de baccalauréat spécialisé d’effectuer un voyage d’études d’au moins un semestre dans un environnement francophone.
The French Section of the School of Languages, Linguistics, Literatures and Cultures offers a comprehensive, multidisciplinary instruction in French language, linguistics and literature, using the target language. The BA program is designed to help students learn and achieve proficiency in French, understand its structure and variations, and gain a broad knowledge of French and Francophone literatures, by studying texts from different centuries, different countries, as well as by studying French-language films. The BA Honours deepens the foundation in French studies and provides excellent preparation for graduate studies in literatures or linguistics, as well as in education and translation. The BA/BEd, and the double-majors (French/Italian, French/Spanish), should be of particular value to students seeking to combine French with another degree.

Major-Field Requirements: Students must successfully complete a minimum of 48 and a maximum of 60 units (8.0 and a maximum of 10.0 full-course equivalents) in the Field of French while fulfilling the following requirements:

1. 200-Level Courses: 9 units (1.5 full-course equivalents) French 213, 225 and 227.
2. 300-Level Courses: 6 units (1.0 full-course equivalent) French 329, 369, and 9 additional units (1.5 full-course equivalents).
3. 400-Level Courses: 15 units (2.5 full-course equivalents).
4. 500-Level Courses: 9 units (1.5 full-course equivalents).

Notes:
• Students should choose a first course appropriate to their command of the language. Those with credit in French 30N, 30S, 31, French Language Arts (FLA) 30 or equivalent should normally enrol in French 225. Students with French 30 or French N30 should normally enrol in French 213, after which they may enrol in French 225. In all cases of doubt students are strongly urged to seek the advice of the School before the registration period.
• Students who start in French 209 or 211 must fulfill the requirements for French Majors specified above.
• Students who place higher than the French 225 level in the language-course sequence must replace those language courses by other senior French (FREN) or Romance Studies (ROST) courses.
• The School recommends that non-francophone students choose French 489.01 (Phonology) as the required course at the 400 level.

- The School recommends that students include among their options FLIP (French Language Instruction Program) courses taught in French in other departments. Three units (0.5 full-course equivalent) FLIP (French Language Instruction Program) may be counted toward the French Major.
- The School recommends that students choose options related to the French Major, such as French-Canadian literature, the history of France, the history of Quebec and/or the Francophone world, Linguistics, Women’s Studies or African Studies.

C. DEGREE OPTIONS
The BA in French can be taken with Cooperative Education. See section 3.4.4 Cooperative Education Programs for information and requirements.

4.59.8 Baccalauréat spécialisé en français/BA Honours French

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. EXIGENCES POUR LE BACCALURÉAT SPÉCIALISÉ EN FRANÇAIS/MAJOR-FIELD WITH HONOURS REQUIREMENTS

Exigences: La concentration en français comprend un minimum de 60 unités (10.0 cours complets) et un maximum de 72 unités (12.0 cours complets), dont les suivants:

1. Niveau 200: 9 unités (1.5 cours complet) French 213, 225 et 227.
2. Niveau 300: 6 unités (1.0 cours complet) French 329, 369, plus 9 unités additionnelles (1.5 cours complet).
3. Niveau 400: 18 unités (3.0 cours complets).
4. Niveau 500: 3 unités (0.5 cours complet) French 511 ainsi que 9 unités (1.5 cours complets).

Le Mémoire de Baccalauréat spécialisé: 6 unités (1.0 cours complet) French 598. (Le mémoire de baccalauréat spécialisé sera rédigé en français).

Remarques:
• Les étudiants doivent choisir comme premier demi-cours celui qui correspond à leurs connaissances de la langue française. Ceux qui ont suivi French 30N, 30S, 31, French Language Arts (FLA) 30 ou leur équivalent s’inscrivent d’habitude au cours French 225. Les étudiants qui ont suivi French 30 ou French N30 s’inscrivent d’habitude au cours French 213 après lequel ils pourront s’inscrire au cours French 225. Il est fortement recommandé, en cas de doute, de s’adresser à l’École avant la période des inscriptions.
• Les étudiants qui commencent en Français 209 ou 211 doivent compléter les exigences pour le baccalauréat spécialisé en français (BA Honours) stipulées ci-dessus.
• Les étudiants qui sont placés à un niveau supérieur au cours French 225 dans la série des cours de langue doivent remplacer les cours dont ils sont dispensés par d’autres cours French (FREN) ou Romance Studies (ROST) de niveau 300 ou supérieur.
• Le Département recommande aux étudiants dont le français est la langue seconde de choisir French 489.01 (Phonologie).
• L’École recommande aux étudiants d’inclure parmi leurs options des cours FLIP (French Language Instruction Program) enseignés en français dans les autres départements. Un cours FLIP (French Language Instruction Program) peut compter pour 3 unités (0.5 cours complet).
• L’École recommande aux étudiants de choisir des options reliées à leur concentration en français telles que la littérature franco-canadienne, l’histoire de France, du Québec ou de la francophonie internationale, la linguistique, Women’s Studies, or African Studies.
placer les cours dont ils sont dispensés par d’autres cours. French (FREN) or Romance Studies (ROST) de niveau 300 ou supérieur.

• Le Département recommande aux étudiants dont le français est la langue conçue de choisir French 489.01 (Phonologie).

• L’École recommande aux étudiants d’inclure parmi leurs options des cours FLIP (French Language Instruction Program) enseignés en français dans les autres départements.

• Un cours FLIP (French Language Instruction Program) peut compter pour 3 unités (0.5 cours complet).

• L’École recommande aux étudiants de choisir des options reliées à leur concentration en français telles que la littérature franco-canadienne, l’histoire de France, du Québec ou de la francophonie internationale, la linguistique, Women’s Studies, ou African Studies.

• L’École recommande fortement aux étudiants de baccalauréat spécialisé d’effectuer un voyage d’études d’au moins un semestre dans un environnement francophone.

Major-Field with Honours Requirements: Students must successfully complete a minimum of 60 and a maximum of 72 units (10.0 and a maximum of 12.0 full-course equivalents) in the Field of French while fulfilling the following requirements:

1. 200-Level Courses: 9 units (1.5 full-course equivalents) French 213, 225 and 227.
2. 300-Level Courses: 6 units (1.0 full-course equivalent) French 329, 369 and 9 additional units (1.5 full-course equivalents).
3. 400-Level Courses: 18 units (3.0 full-course equivalents).
4. 500-Level Courses: 3 units (0.5 full-course equivalent) French 511 and 9 additional units (1.5 full-course equivalents).
5. Honours Thesis: 6 units (1.0 full-course equivalent) French 598.

Notes:

• Students should choose a first course appropriate to their command of the language. Those with credit in French 30N, 30S, 31, French Language Arts (FLA) 30 or equivalent should normally enrol in French 225. Students with French 30 or French N30 should normally enrol in French 213, after which they may enrol in French 225. In all cases of doubt students are strongly urged to seek the advice of the School before the registration period.

• Students who start in French 209 or 211 will have to fulfill the requirements for French Majors Honours specified above.

• Students who place higher than the 225 level in the language-course sequence must replace those language courses by other senior French (FREN) or Romance Studies (ROST) courses.

• The School recommends that non-francophone students choose French 489.01 (Phonology) as the required course at the 400 level.

• The School recommends that students include among their options FLIP (French Language Instruction Program) courses taught in French in other departments. Three units (0.5 full-course equivalent) FLIP (French Language Instruction Program) may be counted toward the French Honours Program.

• The School recommends that students choose options related to the French Major, such as French-Canadian literature, the history of France, the history of Quebec and/or the Francophone world, Linguistics, Women’s Studies or African Studies.

• The School strongly recommends that students in the Honours Program study for at least one semester in a Francophone environment.

C. DEGREE OPTIONS

The BA Honours French can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.59.9 Concurrent BA (French)/BEd

Introduction

This five-year program leads to a Bachelor of Education from the Werklund School of Education and a Bachelor of Arts in French from the Faculty of Arts. A minimum of 150 units (25 full-course equivalents) must be successfully completed.

Admission

Students must meet the admissions requirements for both the Faculty of Arts and the Werklund School of Education (see A.2 Undergraduate Admission).

A. FACULTY OF ARTS REQUIREMENTS FOR CONCURRENT DEGREES

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation. Students must complete a minimum of 42 units (7.0 full-course equivalents) in the Field of French and are exempt from 3 units (0.5 full-course equivalent) at the 400 level and 3 units (0.5 full-course equivalent) at the 500 level of the major field requirements of the BA in French. Students in this program must meet the requirements for the BEd degree set by the Werklund School of Education.

4.59.10 Minor in French

The Minor in French is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in French, including at least 18 units (3.0 full-course equivalents) at the 300 level or above.

Note: 6 units (1.0 full-course equivalent) from the French Language Instruction Program (FLIP) may be counted toward the minor.

Les exigences de la mineure en français sont précisées dans la section 3.4.3 des règlements de la faculté des Arts. Les étudiants doivent suivir un minimum de 30 unités (5 cours complets) et un maximum de 36 unités (6 cours complets) en français. Ce programme doit inclure au moins 18 unités (3 cours complets) au niveau 300 ou supérieur.

Les cours FLIP (French Language Instruction Program) peuvent compter pour 6 unités (1.0 cours complet).

4.59.11 BA in German

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of German while fulfilling the following requirements:

1. Core Courses:
   a. 3 units (0.5 full-course equivalent) German 349 or 353
   b. 6 units (1.0 full-course equivalent) German 501 and 503.

2. German Options: An additional 39 units (6.5 full-course equivalents) from the Field of German.

C. DEGREE OPTIONS

The BA in German can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:

• Students with no knowledge of German should begin with German 202.

• Students with German 30 should begin with German 331.

• Students who have some German but do not have German 30 must consult with the German Undergraduate Advisor to determine placement.

• German 357 and 359 are delivered in English and may be repeated for credit. However, a maximum of 6 units (1.0 full-course equivalent) of German 357 and/or 359 may be credited towards the major field requirements.

• A maximum of 6 units (1.0 full-course equivalent) from German Studies in a different discipline, subject to approval by the School, may be credited towards the major field requirements.

4.59.12 BA Honours German

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

Students must successfully complete a minimum of 54 units (9.0 full-course equivalents) and a maximum of 72 units (12.0 full-course
equivalents) in the Field of German while fulfilling the following requirements:

1. **Core Courses:**
   - 3 units (0.5 full-course equivalents) German 349 or 353;
   - 6 units (1.0 full-course equivalent) German 501, 503.

2. **Honours Thesis:** 3 units (0.5 full-course equivalent) German 591.

3. **German Options:** An additional 42 units (7.0 full-course equivalents) from the Field of German.

**C. DEGREE OPTIONS**

The BA Honours German can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

**Notes:**
- Students interested in applying for Honours should discuss their plans with and seek the advice of the Undergraduate Director. Upon admission each student will be assigned an undergraduate program advisor who will assist with program planning and course selection, and the designation of the thesis supervisor.
- It is strongly recommended that students develop a supporting area of focus consisting of at least 12 units (2.0 full-course equivalents) in a closely related Field (such as History 413).
- Students will find it to their advantage to have background in one or more of the following Fields: English, Greek and Roman Studies, History, Linguistics, Philosophy and Romance Languages.
- German 357 and 359 are delivered in English and may be repeated for credit. However, a maximum of 6 units (1.0 full-course equivalent) of German 357 and/or 359 and a maximum of 6 units (1.0 full-course equivalent) from German studies in a different discipline, subject to approval by the School, may be credited towards the minor.
- Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of German while fulfilling the following requirements:

**4.59.14 BA in Italian Studies**

**A. FACULTY OF ARTS REQUIREMENTS**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. MAJOR-FIELD REQUIREMENTS**

Students should choose a first course appropriate to their command of the language. Students with no previous training in Italian will normally begin with Italian 201. In all cases of doubt students are strongly urged to seek the advice of the School. Students with advanced placement will be required to begin with a higher level language course and must substitute approved courses for those language courses not required.

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Italian Studies while fulfilling the following requirements:

1. **200-Level Courses:** 6 units (1.0 full-course equivalent) Italian 201 and 203.
2. **300-Level Courses:** 6 units (1.0 full-course equivalent) Italian 301 and 303, plus 6 additional units (1.0 full-course equivalent).
3. **400-Level Courses:** 6 units (1.0 full-course equivalent).
4. **500-Level Courses:** 6 units (1.0 full-course equivalent).
5. **Italian Studies Options:** 12 units (2.0 full-course equivalents) from the Field of Italian Studies, of which: (a) a maximum of 6 units (1.0 full-course equivalent) of Romance Studies, and (b) a maximum of 6 units (1.0 full-course equivalent) from the Contextual Courses in the field of Italian Studies.

**C. DEGREE OPTIONS**

The BA in Italian Studies can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

**Notes:**
- In special circumstances, the Undergraduate Advisor may approve the following substitute methods courses: Anthropology 411, Geography 339, Political Science 399 or Sociology 313.
- All students, especially those interested in the Honours program, are strongly encouraged to meet specific degree requirements as early in their program as possible.
- Students are strongly advised to take the 301/401 sequence in a single academic year, and the 303/403 sequence in a single academic year.

**4.59.15 Minor in Italian Studies**

The Minor in Italian is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.4 Minor Fields. Students must complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Italian Studies, of which:

a. A maximum of 6 units (1.0 full-course equivalent) can be labelled Romance Studies.

b. A maximum of 6 units (1.0 full-course equivalent) can be from the Contextual Courses in the Field of Italian Studies, and

c. At least 18 units (3.0 full-course equivalents) must be at the senior level.

**4.59.16 BA in Linguistics**

**A. FACULTY OF ARTS REQUIREMENTS**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. MAJOR-FIELD REQUIREMENTS**

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Linguistics while fulfilling the following requirements:

1. **Core:** 27 units (4.5 full-course equivalents) Linguistics 201, 301, 303, 319, 341, 353, 401, 403 and 407.
2. **Experiential Course:** 3 units (0.5 full-course equivalent) from: Linguistics 316, 416, 441, 453, 467, 505, 571.
3. **Linguistics Options:** 12 units (2.0 full-course equivalents) from the Field of Linguistics including at least 6 units (1.0 full-course equivalent) at the 300-level or above.

**C. OTHER REQUIREMENTS**

1. **Language:** At least 6 units (1.0 full-course equivalent) from courses in languages other than English including the following courses on programming languages: Computer Science 217, 219, 231 and 233.
2. **Methods:** At least 3 units (0.5 full-course equivalent) from the following list of formal-methods courses: Linguistics 560, Philosophy 279, 377, Psychology 300, Sociology 311, Statistics 205.

**D. DEGREE OPTIONS**

The BA in Linguistics can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

The BA in Linguistics can be taken with a concentration in Applied Linguistics or Speech-Language Sciences (see 4.59.18 or 4.59.19).

**Notes:**
- In special circumstances, the Undergraduate Advisor may approve the following substitute methods courses: Anthropology 411, Geography 339, Political Science 399 or Sociology 313.
- All students, especially those interested in the Honours program, are strongly encouraged to meet specific degree requirements as early in their program as possible.
- Students are strongly advised to take the 301/401 sequence in a single academic year, and the 303/403 sequence in a single academic year.

**4.59.17 BA Honours Linguistics**

**A. FACULTY OF ARTS REQUIREMENTS**

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

**B. MAJOR-FIELD WITH HONOURS REQUIREMENTS**

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Linguistics while fulfilling the following requirements:

1. **Core:** 27 units (4.5 full-course equivalents) Linguistics 201, 301, 303, 319, 341, 353, 401, 403 and 407.
2. Capstone: 6 units (1.0 full-course equivalent) Linguistics 598.
3. Experiential Course: 3 units (0.5 full-course equivalent) from: Linguistics 316, 416, 441, 453, 467, 505, 571.
4. Linguistics Options: At least 15 units (2.5 full-course equivalents) from the Field of Linguistics including at least 9 units (1.5 full-course equivalents) at the 300-level or above.
5. Advanced Linguistics: Of the courses used to fulfill requirements 3-4 above:
   a. at least 9 units (1.5 full-course equivalents) must be at the 400 level or above, and
   b. at least 3 units (0.5 full-course equivalent) must be at the 500 level or above.

C. OTHER REQUIREMENTS
1. Language: At least 6 units (1.0 full-course equivalent) from courses in languages other than English including the following courses on programming languages: Computer Science 217, 219, 231 and 233.
2. Methods: At least 3 units (0.5 full-course equivalent) from the following list of formal-methods courses: Linguistics 560, Philosophy 279, 377, Psychology 312, Sociology 311 and Statistics 205.
3. Supporting Courses: 9 units (1.5 full-course equivalents) with 3 units (0.5 full-course equivalent) from each of the following three disciplines: Anthropology, Philosophy and Psychology.

D. DEGREE OPTIONS
The BA Honours in Linguistics can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.
The BA in Linguistics can be taken with a concentration in Applied Linguistics or Speech-Language Sciences (see 4.59.18 or 4.59.19).

Notes:
- In special circumstances, the Undergraduate Advisor may approve the following substitute methods courses: Anthropology 411, Geography 339, Political Science 399 or Sociology 313.
- Students are strongly advised to take the Linguistics 301/401 sequence in a single academic year, and the Linguistics 303/403 sequence in a single academic year.
- The Honours thesis must be completed during the last year. Students are governed by the Honours Thesis Guidelines available from the School of Languages, Linguistics, Literatures and Cultures.

4.59.18 Concentration in Applied Linguistics
Any student who has declared a Linguistics Major is also eligible to declare a Concentration in Applied Linguistics. Applied Linguistics is a wide-ranging field involving career paths in a variety of areas including Second Language Teaching, and Indigenous Studies.

Requirements
At least 18 units (3.0 full-course equivalents) from the following lists:
- Applicable General Course: Linguistics 373
- Courses with a Language Teaching and Learning Focus: Linguistics 221, 225, 309, 316, 381, 416, 516
- Courses with an Indigenous Studies Focus: Indigenous Languages 205, 207, Linguistics 505, 531, Sociology 307

Notes:
- Those most interested in the “Language Teaching and Learning Focus” should include appropriate language and culture courses among their electives.
- Any exceptions or substitutions are at the discretion of the Undergraduate Advisor.

4.59.19 Concentration in Speech-Language Sciences
Any student who has declared a Linguistics Major is also eligible to declare a Concentration in Speech-Language Sciences. This Concentration provides an opportunity for students intending to pursue a career path in Speech-Language Pathology.
A graduate program in Speech-Language Pathology is not offered at the University of Calgary. Graduate programs are offered at the University of Alberta, University of British Columbia, Dalhousie University, McGill University, Université de Montréal, University of Ottawa, University of Toronto, and University of Western Ontario. Students considering graduate study in Speech-Language Pathology are advised to investigate the entrance requirements of these programs, as these may differ across universities. A document with general information on Canadian programs in Speech-Language Pathology and Audiology may be obtained from the Linguistics, Languages, and Culture website: http://llc.ucalgary.ca/linguistics-program/slp-programs-canada.

1. Speech-Language Science Courses: At least 15 units (2.5 full-course equivalents) from the following list, of which at least 6 units (1.0 full-course equivalent) must be in Linguistics: Linguistics 316, 337, 416, 441, 516, 467/Psychology 467, Psychology 200, 201, 351, 353, 471.
2. Quantitative Methods Course: At least 3 units (0.5 full-course equivalent) from: Linguistics 560, Psychology 300, Sociology 311, 315, Statistics 213, 217.

Notes:
- First-year courses in Biology, Calculus and Physics are also highly recommended.
- Students are advised to check the prerequisites for Psychology 400-level courses. There are enrolment limits in these courses and enrolment priority is given to Psychology Majors.

4.59.20 Minor in Linguistics
The Minor in Linguistics is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.
Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in Linguistics and not more than 36 units (6.0 full-course equivalents) including the following:
- 21 units (3.5 full-course equivalents) Psychology 200, 201, 300, 301, 351, 375, 467.
- 3 units (0.5 full-course equivalent) Psychology 365 or 369.
- 6 units (1.0 full-course equivalent) from Psychology 451, 471, 479.

4.59.21 Minor in Speech-Language Sciences for Linguistics Majors
Linguistics Majors become eligible to declare this Minor once they have completed Linguistics 201.
The Minor in Speech-Language Sciences for Linguistics Majors is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields.
Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) including the following:
- 21 units (3.5 full-course equivalents) Psychology 200, 201, 300, 301, 351, 375, 467.
- 3 units (0.5 full-course equivalent) Psychology 365 or 369.
- 6 units (1.0 full-course equivalent) from Psychology 451, 471, 479.

4.59.22 BA in Linguistics and Language
A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.
B. MAJOR-FIELD REQUIREMENTS
1. Linguistics Requirements: Students must successfully complete a minimum of 24 units (4.0 full-course equivalents) in Linguistics and fulfill the following requirements:
   a. 15 units (2.5 full-course equivalents) Linguistics 201, 301, 303, 341, and 353.
   b. 3 units (0.5 full-course equivalent) from: Linguistics 319, 407 and 455.
   c. An additional 6 units (1.0 full-course equivalent) in Linguistics.
   d. At least 6 units (1.0 full-course equivalent), inclusive of the courses used to fulfill requirements (a)-(c) above, must be at the 400 level or above.
2. Language Requirements: Students must successfully complete a minimum of 24 units (4.0 full-course equivalents) and a maximum of 30 units (5.0 full-course equivalents) in accordance with the requirements for one of the following language options:
Faculty of Arts

French Option: A program of study including French 329 or 415 and at least an additional 6 units (1.0 full-course equivalent) at the 400 and/or 500 level, of which one must be in literature. French 489.01 is strongly recommended when available.

Spanish Option: A program of study including Spanish 405 and at least an additional 6 units (1.0 full-course equivalent) at the 400 and/or 500 level, of which one must be in literature. Spanish 475 is strongly recommended when available.

Italian Option: A program of study including at least 6 units (1.0 full-course equivalent) at the 400 and/or 500 level.

German Option: A program of study including German 413 and 415 and at least an additional 3 units (0.5 full-course equivalent) at the 400 or 500 level.

Russian Option: A program of study including Russian 333 and at least 6 units (1.0 full-course equivalent) at the 400 or 500 level.

Japanese Option: A program of study including Japanese 333 and at least 6 units (1.0 full-course equivalent) at the 400 and/or 500 level.

Chinese Option: A program of study including Chinese 333 and at least 6 units (1.0 full-course equivalent) at the 400 and/or 500 level.

Ancient and Classical Languages Option: From the courses listed below in a maximum of two languages, students must successfully complete a minimum of 24 units (4.0 full-course equivalents) and a maximum of 30 units (5.0 full-course equivalents), including a minimum of 3 units (0.5 full-course equivalent) at the 400 or 500 level.

• Greek Language: Greek 201, 203, 301, 303, 401, 403, 551
• Latin Language: Latin 201, 203, 205, 207, 301, 303, 401, 403, 551
• Hebrew Language: Religious Studies 300, 302, 491
• Sanskrit Language: Religious Studies 310, 312, 491
• Tibetan Language: Religious Studies 314, 316, 491
• Classical Chinese: Religious Studies 320, 322, 491

*Applicable only when the content of the course is appropriate.

C. DEGREE OPTIONS

The BA in Linguistics and Language can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:

• It is recommended that students who are interested in language teaching take Linguistics 316 and 416.
• Students are also encouraged to consider a study abroad program to gain international experience and improve language exposure.
• For each language option, it is strongly recommended that students choose their program of study and course sequence in consultation with the appropriate language Advisor.
• Students choosing the French option and beginning in French 213 should be aware that 30 units (5.0 full-course equivalents) will normally be required to complete the French option requirements.
• Romance Studies 399 may be used to satisfy part of this requirement in lieu of a language course in the French, Spanish, or Italian options.

4.59.23 BA in Russian

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Russian while fulfilling the following requirements:

1. Upper-Level Courses: 9 units (1.5 full-course equivalents) in Russian at the 400 level or above.
2. Russian Options: An additional 33 units (5.5 full-course equivalents) from the Field of Russian.

C. DEGREE OPTIONS

The BA in Russian can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.59.24 BA Honours Russian

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS

Students must successfully complete a minimum of 54 units (9.0 full-course equivalents) and a maximum of 72 units (12.0 full-course equivalents) in the Field of Russian while fulfilling the following requirements:

1. Upper-Level Courses: 9 units (1.5 full-course equivalents) in Russian at the 400 level or above.
2. Russian Options: An additional 42 units (7.0 full-course equivalents) from the Field of Russian.
3. Honours Thesis: 3 units (0.5 full-course equivalent) Russian 591.

C. DEGREE OPTIONS

The BA Honours in Russian can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:

• Students interested in applying for Honours should discuss their plans with and seek the advice of the Undergraduate Advisor. Upon admission to Honours in Russian each student will be assigned an undergraduate program advisor who will assist with program planning and course selection.
• An area of focus consisting of at least 12 units (2.0 full-course equivalents) in the area of Social Analysis or Linguistics is strongly recommended (see the School website for details). A background in one or more related fields such as History, Philosophy, Linguistics, and English is considered an advantage for Honours students.
• In the final year the student must take Russian 591 (Honours Project). This will require the preparation of an Honours Thesis under close supervision of a member of the School.

Students intending to take an Honours program in Russian should note that the sequence of Russian 301, 303 and 360 is recommended as providing the best foundation for Honours level work in senior courses.

4.59.25 Minor in Russian

The Minor in Russian is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must complete between 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in Russian including at least 3.0 full-course equivalents at the senior level.

4.59.26 BA in Spanish

A. FACULTY OF ARTS REQUIREMENTS

Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS

The BA program is designed to help students learn and achieve proficiency in Spanish. Instruction will consist of courses in language, linguistics, literature and film, using the target language. Students will acquire a broad knowledge of the Spanish language, Hispanic films, as well as of the literatures of Spain and the Spanish-American countries. The BA Honours strengthens the foundation in Spanish and is an excellent preparation for graduate studies. The BA/BEd and double-majors (Spanish/Italian, Spanish/French), should be of particular interest to students seeking to combine Spanish with another major.

Students should choose a first course appropriate to their command of the language. Students with no previous training in Spanish will normally begin with Spanish 201. Those with credit in Spanish 30, 31 or equivalent should normally enrol in Spanish 301. In all cases of doubt students are strongly urged to seek the advice of the School.

Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Spanish while fulfilling the following requirements:

1. Core Language Sequence: 21 units (3.5 full-course equivalents)
137

Faculty of Arts

- 12 units (2.0 full-course equivalents) Spanish 201, 203*, 301*, 303;
- 3 units (0.5 full-course equivalents) Spanish 321 or 323;
- 6 units (1.0 full-course equivalent) Spanish 405, 505.

Spanish 205 can be substituted for Spanish 203 and 301.

2. Upper-Level Courses:
- 12 units (2.0 full-course equivalents) from courses labelled Spanish at the 400 level
- 9 units (1.5 full-course equivalents) from the Field of Spanish at the 500 level.

C. DEGREE OPTIONS
The BA in Spanish can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

Notes:
- Students entering with Spanish 30 or the equivalent may be exempted from Spanish 201. Please consult with the Spanish Undergraduate Advisor for appropriate placement. Students placed at a higher level than Spanish 201 must replace those language courses from which they have been exempted by any Spanish non-language courses (literature, linguistics, civilization, culture) or by any senior Romance Studies (ROST) courses.
- It is strongly recommended that students choose an area of focus consisting of at least 12 units (2.0 full-course equivalents) from disciplines related to their interests in the Hispanic world (from areas such as Political Science, History, Latin American Studies or Women's Studies).
- Where Italian is one of two majors, students follow the requirements in section 4.59.7, except that for requirement 3 only 6 units (rather than 15 units) are required at the 400 level and for requirement 4 only 6 units (rather than 9 units) is required at the 500 level.
- Where French is one of the two majors, students follow the requirements in section 4.59.14.
- Where Spanish is one of the two majors, students follow the requirements in section 4.59.26.

4.59.28 Concurrent BA (Spanish)/BEd Introduction
This five-year program leads to a Bachelor of Education from the Werklund School of Education and a Bachelor of Arts in Spanish from the Faculty of Arts. A minimum of 150 units (25 full-course equivalents) must be successfully completed.

Admission
Students must meet the admissions requirements for both the Faculty of Arts and the Werklund School of Education (see A.2 Undergraduate Admission at the University of Calgary).

A. FACULTY OF ARTS REQUIREMENTS FOR CONCURRENT DEGREES
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation. Students must complete a minimum of 42 units (7.0 full-course equivalents) in the field of Spanish.

Students in this program must meet the requirements for the BEd degree set by the Werklund School of Education.

4.59.29 Minor in Spanish
The Minor in Spanish is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) in Spanish including at least 18 units (3.0 full-course equivalents) at the senior level.

Note: Students who place higher than Spanish 201 level must replace those language courses from which they have been exempted by any Spanish non-language courses or any senior Romance Studies (ROST) courses.

4.59.30 Double Majors within the School of Languages, Linguistics, Literatures and Cultures
Students are encouraged to consider double majors in: French and Italian, French and Spanish, or Italian and Spanish.

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in both of the selected Major Fields and meet the appropriate requirements:
- Where French is one of the two majors, students follow the requirements in section 4.59.7, except that for requirement 3 only 12 units (rather than 15 units) are required at the 400 level and for requirement 4 only 6 units (rather than 9 units) is required at the 500 level.
- Where Italian is one of two majors, students follow the requirements in section 4.59.14.
- Where Spanish is one of the two majors, students follow the requirements in section 4.59.26.

Notes:
- Students are strongly advised to study for at least one semester each in a Francophone, Italophone or a Hispanophone environment as applicable to their double major.
- It is understood in the Double Major programs that the 42 units (7.0 full-course equivalents) is a minimum requirement. Students are encouraged to take additional courses in their areas of specialization.

C. DEGREE OPTIONS
The BA with Double Majors in French and Italian, French and Spanish or Italian and Spanish can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.60 Science, Technology and Society
See Communication, Media and Film.

4.61 Social and Cultural Anthropology
See Anthropology and Archaeology.

4.62 Sociology
Overview of Programs and Procedures
Baccalaureate Degrees Offered
Bachelor of Arts (BA) in Sociology
BA in Sociology with Co-operative Education
BA Honours in Sociology
BA Honours in Sociology with Co-operative Education
Concurrent BA in Sociology and Bachelor of Education
Bachelor of Arts (BA) in Law and Society
BA in Law and Society with Co-operative Education
BA Honours in Law and Society
BA Honours in Law and Society with Co-operative Education

Notes:
• A Minor is offered in Sociology and in Law and Society.
• Concentrations are available to Sociology Majors in: Criminology, Deviance and Social Control and Gender, Family and Work.

Introduction
Sociology contributes to understanding our social world by studying how groups, organizations, societies, and their cultural products are produced, reproduced and transformed by the actions and interactions of people in social contexts. The Sociology program cultivates students' sociological imaginations by offering a wide range of opportunities to think sociologically and to use different theoretical approaches, research methods and data-analysis techniques so students gain experience thinking with and using a sociological perspective.

The program in Law and Society is designed to provide a broad exposure to the nature of law and its role in society. The overall aim of the program is not only to provide students with a deep understanding of the law but also to demonstrate that the law is not an isolated discipline but is a part of an integrated culture of which we all partake.

The program is not specifically a "pre-law" program. Nevertheless, the perspectives that it offers are likely to be of great benefit to those who hope to be lawyers, as well as to those considering a career in politics, the civil service, law enforcement, the social sciences, business and industry, or public-interest advocacy.

First-year students in Law and Society are encouraged to explore courses in a variety of areas. It is recommended that a first-year program include: Law and Society 201, 203 and at least an additional 9 units (1.5 full-course equivalents) from the Faculty of Arts. Degree programs in Law and Society include senior-level courses offered by various Departments either as core requirements or as options. It is therefore useful to take first-year courses from a variety of related areas such as Political Science and History. In planning their first-year programs, students should look ahead to later years and make sure they take courses that are prerequisites to the courses they may subsequently wish to take.

Courses that are required for the Law and Society major can generally be double-counted toward minor programs. Students are advised to consult with the Arts Students’ Centre for confirmation. The following minor programs are particularly good fits with a Law and Society major: Political Science, History, Economics, Philosophy, Sociology, Indigenous Studies, Canadian Studies, Women’s Studies.

Contact Information
Department Office: Social Sciences 956
Phone: 403.220.6502
Fax: 403.282.9298
Email: Sociology: sociundergrad@ucalgary.ca or Law and Society: ejmccoy@ucalgary.ca
Website: soci.ucalgary.ca/

For Program Advice
Students should consult a program advisor in the Arts Students’ Centre for information and advice on their overall program requirements.

For more specific advice regarding course selection and requirements in the major field, students should consult the subject advisor located in their home Department (consult Department website for contact information).

Sociology Students Association
The Sociology Students Association (SSA) is actively engaged in promoting the academic, social and political interests of students who Major or Minor in Sociology. The SSA fosters a sense of community within the Department and represents the interests of undergraduate Sociology students at appropriate councils and committees. All Sociology students are encouraged to become members.

Admission to the Major
Prospective students wishing to enter the BA (Sociology) Program or the BA (Law and Society) Program must meet the criteria listed in section A.2 Undergraduate Admission of this Calendar. Annual application deadlines are found in A.3 Deadline Dates for Undergraduate Applications for Admission and Transcripts.

Limitation of Enrolment
Due to high demand, admission to the Law and Society Major may be limited. Whenever demand exceeds capacity, students will be admitted on a competitive basis. Admission averages may be set above the minimum level for the Faculty of Arts. These higher admission standards are applicable to high-school applicants, external transfer applicants from other post-secondary institutions and internal transfer applicants from other programs at the University of Calgary, whether inside or outside the Faculty of Arts.

Admission to Honours
The Faculty of Arts procedures for Admission to Honours established in section 3.4.2 Honours Degrees with a Major Field are applicable and provide the overall framework. Students wishing to be considered for admission into the BA Sociology (Honours) program must have successfully completed Sociology 313, 315, 333, and at least 30 units (5.0 full-course equivalents) of course work. All beginning students who contemplate working towards a Sociology Honours degree should consult with the Department as soon as possible. The deadline to apply is normally February 1.

Students majoring in Law and Society are eligible to apply for Honours by the deadline only if they will complete the program during the following academic year. To meet the deadline, it is recommended that students wishing to enrol in the Honours program consult with the intended supervisor in January and obtain guidelines and an application form from the Law and Society Program Co-ordinator as early as possible.

University of Calgary Collaborative BA in Sociology at Red Deer College
This program allows students to transfer up to two years of College work and to qualify for the BA in Sociology by completing the remaining required University of Calgary courses at Red Deer College. For further information, please visit the collaborative website https://arts.ucalgary.ca/rcdc.

Field of Sociology
The Field of Sociology consists of all courses labelled Sociology (SOC). Sociology Majors in: Criminology, Deviance and Social Control and Gender, Family and Work.

Field of Law and Society
The Field of Law and Society consists of the following courses:

- Courses with a Focus on Law and Society
- All courses labelled Law and Society (LWSO)**

Anthropology 210
Business and Environment 395, 595
Canadian Studies 333, 361
Economics 345, 349, 355, 373, 377, 379
History 337, 345, 351, 438, 443, 450, 462, 473

- Indigenous Studies 201, 311, 343
- Law 595
- Political Science 283, 321, 343*, 425, 426, 444, 470 483, 581
- Sociology 307, 325, 327, 375, 421, 423, 425, 427, 429*

Women’s Studies 311

Context Courses
- Canadian Studies 201, 355, 439
- Communication and Culture 201, 203, 305, 307
- Communication and Media Studies 369
- Development Studies 375
- East Asian Studies 319
- Indigenous Studies 415
- Museum and Heritage Studies 331
- Religious Studies 343, 349
- South Asian Studies 203
- Statistics 205

Research Methods Courses
- Communication and Media Studies 313
- Geography 340
History 300
Law and Society 313
Political Science 399
Psychology 300, 301
Sociology 313

*Students may only apply Philosophy 425, Political Science 433 and Sociology 429 towards one requirement listed within the Law and Society Major Field Requirements below.

4.62.1 BA in Sociology

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD REQUIREMENTS
Students must successfully complete a minimum of 42 units (7.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Sociology while fulfilling the following requirements:

1. Core: 18 units (3.0 full-course equivalents) Sociology 201, 311, 313, 315, 331, 333.

2. Sociology Options: A minimum of 12 units (2.0 full-course equivalents) from the Field of Sociology.

3. Advanced-Level Sociology: 12 additional units (2.0 full-course equivalents) at the 400 level or above.

C. DEGREE OPTIONS
The BA in Sociology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements. The BA in Sociology can be taken with a concentration in (a) Criminology, Deviance and Social Control; (b) Gender, Family and Work (see section 4.61.3).

4.62.2 BA Honours Sociology

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR-FIELD WITH HONOURS REQUIREMENTS
Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) and a maximum of 60 units (10.0 full-course equivalents) in the Field of Sociology while fulfilling the following requirements:

1. Core: 18 units (3.0 full-course equivalents) Sociology 201, 311, 313, 315, 331, 333.

2. Honours Thesis: 6 units (1.0 full-course equivalent) Sociology 590.

3. Sociology Options: A minimum of 6 units (1.0 full-course equivalent) from the Field of Sociology.

4. Advanced-Level Sociology: 18 additional units (3.0 full-course equivalents) at the 400 level or above.

C. DEGREE OPTIONS
The BA Honours in Sociology can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.62.3 Concentrations

Criminology, Deviance and Social Control

Required: 6 units (1.0 full-course equivalent) Sociology 325, 327.

Four of: 12 units (2.0 full-course equivalents) from Sociology 421*, 423, 425, 427, 429.

*A topics course which may be taken a maximum of four times for credit toward the fulfillment of the requirements for the concentration in Criminology, Deviance and Social Control.

Gender, Family and Work

Required: 9 units (1.5 full-course equivalents) Sociology 303, 371, 393.

Three of: 9 units (1.5 full-course equivalents) from Sociology 365, 373, 399, 403*, 461, 471*, 493*.

*A topics course which may be taken a maximum of twice for credit toward the fulfillment of the requirements for the concentration in Gender, Family and Work.

4.62.4 Minor in Sociology
The Minor in Sociology is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (5.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Sociology with at least 18 units (3.0 full-course equivalents) at the 300 level or above.

4.62.5 BA in Law and Society

A. FACULTY OF ARTS REQUIREMENTS
Students must adhere to the applicable Faculty of Arts requirements in 3.4 Graduation.

B. MAJOR FIELD WITH REQUIREMENTS
Students must successfully complete a minimum of 48 units (8.0 full-course equivalents) in the Field of Law and Society while fulfilling the following requirements:

1. Core Courses: 24 units (4.0 full-course equivalents) including:
   a. 21 units (3.5 full-course equivalents) Law and Society 201, 203, 335, 337, 413, 415, 591;
   b. 3 units (0.5 full-course equivalent) from Political Science 343, Philosophy 425 or Sociology 429.

2. Courses with a Focus on Law and Society: 15 units (2.5 full-course equivalents), selected from the list of Courses with a Focus on Law and Society within the Field of Law and Society.

3. Context Courses: 6 units (1.0 full-course equivalent) from the list of Context Courses within the Field of Law and Society.

4. Research Methods Requirement: 3 units (0.5 full-course equivalent) from Communication and Media Studies 313, Geography 340, History 300, Law and Society 313, Sociology 313, Political Science 399, Psychology 300, 301.

5. Law and Society 590.

Notes:
- It is strongly recommended that students intending to apply for admission to the Honours program complete Communication and Culture 201 and 203.
- Students are strongly encouraged to take courses pertaining to other languages and cultures and to seek out opportunities to study abroad.

C. DEGREE OPTIONS
The BA Honours in Law and Society can be taken with Co-operative Education. See section 3.4.4 Co-operative Education Programs for information and requirements.

4.62.7 Minor in Law and Society
The Minor in Law and Society is regulated by the section of the Faculty of Arts Graduation Requirements entitled 3.4.3 Minor Fields. Students must successfully complete at least 30 units (6.0 full-course equivalents) and not more than 36 units (6.0 full-course equivalents) from the Field of Law and Society with at least 18 units (3.0 full-course equivalents) at the 300 level or above including:

1. 3 units (0.5 full-course equivalent) Law and Society 201.
2. 9 units (1.5 full-course equivalents) from Law and Society 203, 335, 337, 401, 425.
3. An additional 18 units (3.0 full-course equivalents) from List of Courses with a Focus on Law and Society with no more than 6 units (1.0 full-course equivalent) from courses in a single subject area.

4.63 South Asian Studies

Undergraduate

The Cumming School of Medicine offers a four-year Bachelor of Health Sciences Honours (BHSc Honours) degree.

The Cumming School of Medicine offers a four-year Bachelor of Community Rehabilitation (BCR) degree as well as a two-year BCR program after an approved college diploma.

Doctor of Medicine

The Cumming School of Medicine offers a three-year professional degree leading to a Doctor of Medicine (MD).

Postgraduate (Residency)

The Cumming School of Medicine offers various postgraduate (residency) programs that are only available to those with professional MD training. Full details can be found on the Cumming School of Medicine Postgraduate Medical Education website at cumming.ucalgary.ca/pgme.

Graduate

Graduate work leading to the Master of Biomedical Technology, Master of Community Medicine, Master of Disability and Community Studies, Master of Pathologists’ Assistant, Master of Science and Doctor of Philosophy degrees is offered by the Cumming School of Medicine under the administration of the Faculty of Graduate Studies. Details of these programs appear in the Faculty of Graduate Studies calendar.

3. Community Rehabilitation and Disability Studies

Introduction
Community Rehabilitation and Disability Studies offers a full range of interdisciplinary professional educational opportunities:

- A bachelor’s degree in Community Rehabilitation (BCR). The BCR degree is offered both on campus and through an off-campus program by distance delivery (post-diploma only).
- An undergraduate 30-unit (5.0 full-course equivalent) minor in Community Rehabilitation and Disability Studies.
- A combined degree BCR/BA or BSc (Psychology).
- A minor in Adapted and Therapeutic Physical Activity for Kinesiology students.
- Graduate master’s and doctoral degree programs through the Department of Community Health Sciences, Cumming School of Medicine.

3.1 Undergraduate Programs

Bachelor of Community Rehabilitation (BCR)
The Bachelor of Community Rehabilitation (BCR) program is available to:
- Students coming directly from high school;
- Students who have completed a Community College Diploma in Rehabilitation Studies or a related field;
- Students transferring from another university or have already completed a degree.

The BCR is an interdisciplinary degree both in the courses it provides and the students it serves.

Students are expected to achieve a foundation in health, leadership, human services, policy, community action, and critical disability studies, and will work with individuals of diverse ages and disabling conditions. Through specialized interdisciplinary study, practical experience and project work, they gain professional skills in individual counseling and personal planning, team co-ordination, design and management of community services, advocacy and small business development.

Students can specialize in areas such as career development, working with seniors, brain injury, community mental health or early intervention. Students specialize by choosing appropriate health and senior social science course options and doing their projects and practica in their chosen area.

Minor Programs
A Minor in Community Rehabilitation and Disability Studies is open to on-campus...
students in other faculties. A specialized Minor in Adapted and Therapeutic Physical Activity is offered for Kinesiology students by Community Rehabilitation and Disability Studies in conjunction with the Faculty of Kinesiology.

3.2 Opportunities
Certification
Students may be eligible for the following accreditation and/or certification:
- Registered Rehabilitation Professionals (RRP) through the Vocational Rehabilitation Association of Canada (VRAC)
- Certified Vocational Evaluator through Canadian Assessment of Vocational Evaluation and Work Adjustment (CAVEWA)

Study Abroad
The Community Rehabilitation and Disability Studies program has a long-established arrangement with Flinders University in Adelaide, South Australia that allows selected students to gain transfer credit for their BCR degree through a term abroad program. Interested students should speak with a CRDS Student Advisor or to consult with the Study Abroad/International Learning Office.

3.3 Student Affairs
Student Advising
Inquiries related to Faculty Regulations, BCR Admissions and BCR course requirements should be directed to the Student Advisor for Community Rehabilitation and Disability Studies.

For the precise interpretation of any statement or regulation, students should contact the Associate Dean (Undergraduate Health and Science Education), Cumming School of Medicine. The Associate Dean (UHSE) is responsible for all BCR student affairs in the School.

3.4 Resources
CRDS and Desire2Learn
All CRDS distance education Internet courses are now being offered through Desire2Learn, a tool that facilitates the creation of sophisticated Internet-based educational environments.

3.5 Admissions (BCR)
Applicants should refer to A.2 in the Admissions section of this Calendar for regulations regarding University admission requirements.

Admission to the program is competitive and meeting the minimum admission requirement does not guarantee admission.

Admission from High School
Students must present five Alberta high school courses (or equivalent) including English Language Arts 30-1 (or equivalent) and Biology 30 (or equivalent).

Post-Diploma Students
Students who have completed an approved Community College Diploma in Rehabilitation Studies or related field may apply for admission with a block transfer of credit to complete two years of study to earn a Bachelor of Community Rehabilitation. Applicants must present or an overall GPA of 2.50 on the diploma.

Transfer Students
Transfer students must present a cumulative grade point average of 2.00 or higher calculated over the most recent course work to a maximum of 30 units (5.0 full-course equivalents) (includes University of Calgary courses and/or transferable courses taken at other institutions). All grades within a term will be included except where the number of courses taken within a term exceeds that required to fulfill (to a maximum of) 30 units (5.0 full-course equivalents), in which case the highest grades will be used.

Students with fewer than 12 units (2.0 full-course equivalents) of post-secondary courses, will have their admission based on high school standing only.

Application Deadlines
Refer to the Admissions section of the Calendar: A.3 Deadline Dates for Undergraduate Applications for Admission and transcripts.

3.6 Registration (BCR)
Continuity of Program
Students whose registration has been inactive for two years must reapply for admission and will be required to meet current BCR program requirements if readmitted. The required courses for the degree must have been completed within ten years of the date of enrolment in the BCR program in order for the degree to be awarded.

Permission to Complete Courses at an Outside Institution
A letter of permission must be obtained from the Student Advisor, Community Rehabilitation and Disability Studies prior to registering at another university. Please be aware that there are limits to the number of courses that can be taken at another university.

Repeating Courses
Students may repeat a course previously attempted (including withdrawals) only once without permission of the Faculty office. Practicum courses offered by Community Rehabilitation and Disability Studies may not be repeated after a failing grade has been received without:
(a) The prior consent of the Director, Bachelor of Community Rehabilitation;
(b) Presenting evidence of having made an attempt to overcome previous difficulties encountered;
(c) Waiting a reasonable period of time (one semester to one calendar year) prior to repetition.

Excessive Number of Withdrawals
Students will not be permitted to withdraw more than once from a particular course. Students will be required to withdraw from the Cumming School of Medicine if they have accumulated a total of more than 30 units (5.0 full-course equivalents) withdrawals while in attendance at the University of Calgary.

Immunization Requirements
All Alberta-based BCR students and students taking Community Rehabilitation (CORE) courses involving practicum placements in Alberta are required to meet an immunization standard as outlined on the Student Immunization Form checklist. Documented proof of completion must be provided to the Cumming School of Medicine Immunization Co-ordinator or delegate prior to commencement of the program (for BCR students) or first practicum placement (for non-BCR students).

Throughout the BCR program, students are required to ensure that immunizations are current and must provide proof of updates to the Cumming School of Medicine Immunization Co-ordinator. Failure to do so will result in students being removed from practicum courses, or being placed in an alternate environment until such time as adequate proof has been provided. In the event of extenuating medical circumstances impacting immunization status, students may be accommodated in non-Alberta Health Services-affiliated environments. Please note that requirements may change during the program as determined by Alberta Health Services guidelines.

Police Information Check
Some courses may require a current Police Information Check, which includes a Vulnerable Sector Search.

3.7 Student Standing (BCR)
Academic Standing
Performance Review, Probationary Status and Dismissal
The academic standing of each student registered in the Bachelor of Community Rehabilitation program will be reviewed annually following the Winter Term as per the GPA requirements table.

GPA Requirements:
2.50 or above: Satisfactory standing
1.70 – 2.49: Continuation in BCR on probation
0.00 – 1.69: Required to withdraw from the school

The academic standing of students registered in the Faculty will be reviewed after each Winter Term provided that they have completed at least 18 units (3.0 full-course equivalents) at the University of Calgary since their previous review. Students who have not completed 18 units (3.0 full-course equivalents) since the previous review will retain their existing status until the next subsequent review. All University of Calgary credit courses that have been completed since the previous review are used for the purpose of academic review. Students placed on academic probation or required to withdraw as a result of the academic performance review will be so advised in writing.
Five-year Combined Degree:
1. Combined BCR/BA or BSc (Psychology)

Two minors are available to students in other faculties:
4. Minor in Community Rehabilitation and Disability Studies
5. Minor in Adapted and Therapeutic Physical Activity (for Kinesiology students only)

3.9.1 Four-Year BCR Degree
- 36 units (6.0 full-course equivalents): Community Rehabilitation 205, 207, 209, 435, 541, 547, 553, 569, 583
- 9 units (1.5 full-course equivalents) Practica: Community Rehabilitation 487, 594, 596
- 9 units (1.5 full-course equivalents) chosen from: Community Rehabilitation 321, 471, 473 or 475
- 3 units (0.5 full-course equivalent) Academic Writing 303
- 12 units (2.0 full-course equivalents) Health Options chosen from: Biology 305, Economics 379, Greek and Roman Studies 211, Health and Society 201, 301, 311, Kinesiology 201, 203, 213, 237, 251, 253, 259, 260, 339, 367, 397, Philosophy 313, Psychology 375, Sociology 321
- 6 units (1.0 full-course equivalent) Management Options chosen from: Business and Environment 395, 401, Communication and Culture 507, 509, Communication and Media Studies 363, Entrepreneurship and Innovation 201, 381, Environmental Design 401, Innovation 321, Law and Society 201, 203, 335, Marketing 341, Organizational Behaviour and Human Resources 321, Political Science 321, 343, 357, 381, Psychology 321, Sociology 345
- 42 units (7.0 full-course equivalents) Open Options

Notes:
- Some of the courses listed above have prerequisites and may be in high demand. Registration in these courses is not assured. It is the student's responsibility to ensure that prerequisites are completed.
- Psychology 200 and 201 are strongly recommended, but not required.

3.9.2 Two-Year Post-Diploma BCR Degree Route
For students who have completed an approved post-secondary diploma in Rehabilitation Studies or related field:
- 18 units (3.0 full-course equivalents): Community Rehabilitation 435, 541, 547, 553, 569, 583
- 6 units (1.0 full-course equivalents) Practica chosen from either: Community Rehabilitation 594 and 595, or Community Rehabilitation 597 and 598
- 9 units (1.5 full-course equivalent) chosen from: Community Rehabilitation 321, 471, 473 or 475
- 3 units (0.5 full-course equivalent) Academic Writing 303
- 6 units (1.0 full-course equivalents) Health Options chosen from: Biology 305, Economics 379, Greek and Roman Studies 211, Health and Society 201, 301, 311, Kinesiology 201, 203, 213, 237, 251, 253, 259, 260, 339, 367, 397, Philosophy 313, Psychology 375, Sociology 321
- 6 units (1.0 full-course equivalent) Management Options chosen from: Business and Environment 395, 401, Communication and Culture 507, 509, Communication and Media Studies 363, Entrepreneurship and Innovation 201, 381, Environmental Design 401, Innovation 321, Law and Society 201, 203, 335, Marketing 341, Organizational Behaviour and Human Resources 321, Political Science 321, 343, 357, 381, Psychology 321, Sociology 345

Note: Some of the courses listed above have prerequisites and may be in high demand. Registration in these courses is not assured. It is the student's responsibility to ensure that prerequisites are completed.

3.10 Combined BCR/BA or BSc (Psychology)
This five-year program leads to both the Bachelor of Community Rehabilitation (offered by the Cumming School of Medicine) and Bachelor of Arts or Bachelor of Science in Psychology (offered by the Faculty of Arts)
degrees, and is jointly sponsored by the two faculties. Completion of the program requires a minimum of 150 units (25.0 full-course equivalents).

Admission
Students pursuing this program may enter the combined degree in year one or a subsequent year. Admission requirements of both Faculties, the Department of Psychology and Community Rehabilitation Studies, must be satisfied in order to qualify for the combined degree program.

The program requires careful selection of courses to complete all requirements of the two Faculties. Interested students are urged to contact Arts Students’ Centre (Student Inquiries) and the Student Advisor in the Community Rehabilitation and Disability Studies Program. It will be possible for students to opt out of the combined program until the end of their third year and complete either a BA or BSc in Psychology or a BCR degree in four years. Students should note, however, that if courses have been unevenly distributed, more than four years may be required to complete the degree.

Requirements
1. The Faculty of Arts requires the successful completion of both:
   (a) the “Faculty of Arts Requirements for Combined Degree” or “Faculty of Arts Requirements for Combined Degrees with an Honours Component” listed in the Faculty of Arts, section 3.4.5 Combined Degrees, and
   (b) the requirements for the BA or BSc Psychology listed in section 4.5.4 Psychology. Students should seek Psychology course registration advice from a program advisor in the Arts Students’ Centre.
2. Students in the BCR/BA or BA Honours Psychology program must complete Biology 205 and 305. Students in the BCR/BSc or BSc Honours Psychology program must complete Biology 241 and 243.
3. The Cumming School of Medicine requires successful completion of all courses required for graduation with a BCR degree as listed in section 3.9 Graduation (BCR).
4. The following required Community Rehabilitation courses must be completed. At least 42 units (7.0 full-course equivalents) from this list must be taken at the University of Calgary. Students are strongly encouraged to meet with an Academic Advisor regarding the sequencing of course work.
   • 39 units (6.5 full-course equivalent) Community Rehabilitation 205, 207, 209, 321, 435, 487, 541, 547, 553, 569, 583, 594, 595
   • 6 units (1.0 full-course equivalent) chosen from: Community Rehabilitation 471, 473, 475
   • 3 units (0.5 full-course equivalent) any Community Rehabilitation course
   • 6 units (1.0 full-course equivalent) Biology 205 and 305; or Biology 241 and 243 (see note)
   • 12 units (2.0 full-course equivalents) any option
   • 24 units (4.0 full-course equivalents) any senior option
Note: The options and senior options may be used to complete the Psychology portion of the combined degree.

3.11 Minor in Community Rehabilitation and Disability Studies
A Minor in Community Rehabilitation and Disability Studies is available to students registered in other Faculties (e.g., Arts, Kinesiology, Science). All students are required to take:
   • Introductory Courses: 9 units (1.5 full-course equivalents) Community Rehabilitation 205, 209, 435.
   • Practice: 6 units (1.0 full-course equivalent) from Community Rehabilitation 207 and 487, or 594 and 595.
   • 15 units (2.5 full-course equivalents) from Community Rehabilitation 471, 473, 475, 535, 541, 553, 569, 583, 594, 595.
Contact the program or program website (cumming.ucalgary.ca/crds) for information.

3.12 Minor in Adapted and Therapeutic Physical Activity
This Minor is offered by Community Rehabilitation and Disability Studies for students in Kinesiology.
Requirements
1. 6 units (1.0 full-course equivalent) Community Rehabilitation 205, 209.
2. 6 units (1.0 full-course equivalent) practice from: Community Rehabilitation 207 and 487 or 594 and 595.
3. 9 units (1.5 full-course equivalents) required courses: Community Rehabilitation 435, 475 and Kinesiology 367, or 369, or 495.
4. 9 units (1.5 full-course equivalents) Community Rehabilitation 471, 473, 547.

4. Bachelor of Health Sciences Honours
4.1 Summary of Programs
Co-ordinated by the Cumming School of Medicine and in co-operation with the Faculties of Science and Arts, the Cumming School of Medicine offers an undergraduate degree in Health Sciences, the Bachelor of Health Sciences Honours (BHSc Honours), consisting of three majors (Bioinformatics, Biomedical Sciences, and Health and Society). (Details on majors are given in 4.5 Program Details.) Because of the admissions standard and GPA requirements, it is expected that most students will attain Honours standing. However, those students who progress to the fourth year but do not attain a cumulative GPA of 3.30 over the last 90 units (15.0 full-course equivalents) will graduate with a BHSc. The BHSc Honours degree will normally take four years. Students are selected through an admissions process and have direct entry into the first year. The deadline to apply for admission is March 1. Admission offers will normally be made by mid-April.
A Health Sciences Minor is available in Health and Society. (Details are given in 4.5.5 Program Details.)
A Bioinformatics Minor is also available. (Details are given in 4.5.3 Program Details.)

4.2 Faculty Student Affairs
Inquiries related to Faculty Regulations (section 4.3), BHSc Admissions (section 4.4) and BHSc course requirements (section 4.5) should be directed to the Program Coordinator for the BHSc Office. Contact information may be found at: cumming.ucalgary.ca/bhsc/contact-us.

4.3 Faculty Regulations
Students in the Cumming School of Medicine are governed by the regulations in this section of the Calendar as well as by the general University regulations in the sections titled Admissions and Academic Regulations. For the precise interpretation of any statement or regulation, students should feel free to contact the Associate Dean (Undergraduate Health and Science Education), the O’Brien Centre for the BHSc Office, Cumming School of Medicine. The Associate Dean (UHSE) is responsible for all undergraduate BHSc student affairs in the School.

Enrolment Limitations
Enrolment limits may be in effect for some courses in the Cumming School of Medicine and the Faculties of Science and Arts.

Immunization Requirements
All BHSc students are required to meet an immunization standard as outlined on the Student Immunization Form checklist. Documented proof of completion must be provided to the Immunization Co-ordinator or delegate prior to commencement of the program.
Throughout the BHSc program, students are required to ensure that immunizations are current and must provide proof of updates to the Cumming School of Medicine Immunization Coordinator. Failure to do so will result in students being removed from course-based research environments, or being placed in an alternate environment until such time as adequate proof has been provided. In the event of extenuating medical circumstances impacting immunization status, students may be accommodated in non-Alberta Health Services-affiliated environments. Please note that requirements may change during the program as determined by Alberta Health Services guidelines.

4.3.1 Degree Requirements
The following general requirements apply to all undergraduate BHSc degree programs in the Cumming School of Medicine:
Degree Programs

In order to graduate, a student must present an approved list of courses completed with passing grades. This list will be referred to as the Major. The Major must satisfy the following conditions:

(a) The Major must contain at least 120 units (20.0 full-course equivalents) with at least 66 units (11.0 full-course equivalents) numbered 300 or above.

(b) Only 3 units (0.5 full-course equivalent) in the Major may be graded a “D+” or “D-”.

(c) A minimum GPA of 3.60 over the last 90 units (15.0 full-course equivalents) will be eligible for a First Class Honours designation. Refer to “First Class Honours” requirements.

(d) A minimum GPA of 3.30 must be maintained over the last 90 units (15.0 full-course equivalents) for an Honours designation.

(e) Please refer to 4.3.4 Student Standing for a description of “satisfactory standing”.

(f) No more than 60 units (10.0 full-course equivalents) taken at other institutions and accepted for transfer credit may be included in the degree. Normally, transfer credit will be allowed only for coursework completed in the preceding ten years.

(g) Candidates for Honours have a maximum of five years in which they are registered to complete the required programs.

Notes:
- These requirements may change with every Calendar issue. A given Calendar entry applies to the academic year beginning on July 1 and ending on the following June 30. The time of entry into a Major in the Cumming School of Medicine is defined as the first term after admission to the Major during which a student successfully completes any courses applicable to the Major. A student’s Major is subject to the course requirements that are in the Calendar current at the time of entry into the BHSc Honours, is allowed five years counted from the time of entry into the Major, to graduate under these requirements. Students who exceed the allotted time limit must consult with the Associate Dean (UHSE), who will decide on an acceptable set of course requirements for graduation.

- A student who fails to maintain the necessary performance standards or who decides not to continue in the Honours degree may transfer to another faculty program, subject to that program’s admission requirements.

First Class Honours

In addition to the Honours requirements, first class designation requires successful completion of a program major equivalent to 120 units (20.0 full-course equivalents) with a GPA of at least 3.60 over the last 90 units (15.0 full-course equivalents). A student who has taken part of their course work at another university may be granted a degree with First Class Honours at the discretion of the School.

Minor Programs

A Minor is available in Health and Society. The course requirements are listed in 4.5.5 Program Details. The GPA over all courses counting towards the Minor must be at least 2.00.

A Minor is available in Bioinformatics. The course requirements are listed in 4.5.3 Program Details. The GPA over all courses counting towards the Minor must be at least 2.00.

4.3.2 Course Selection and Registration

Accuracy of Registration

Students are responsible for ensuring that their annual course selections are in accordance with all Calendar requirements, including the completion of prerequisite courses with a satisfactory grade and registration in corequisite courses as appropriate. Students are advised not to register in a course unless they have achieved a grade of at least “C-” in each prerequisite course. It is the responsibility of the student to ensure that they meet all prerequisite requirements. A student who has received credit for a course without having the normal prerequisite course(s) may not subsequently register in the prerequisite course(s) for program credit. Taking or repeating a course that is a prerequisite for a higher level course after having completed the higher level course with a grade of “C-” or better will only be allowed with the permission of the Associate Dean (UHSE). Registration in any course(s) contrary to regulations may be cancelled by the School after the beginning of classes. Registration must be appropriate to the major being followed. Students with inappropriate course selections may have their registration cancelled by the Associate Dean (UHSE). Students should seek advice from the Associate Dean (UHSE) or the BHSc Program Co-ordinator. Students are responsible for ensuring that they meet degree and program Major requirements. Although the BHSc Office endeavours to assist all students as they proceed in the various Majors, a final and thorough check is not done until application for graduation. Any departure from standard requirements must receive prior authorization in writing from the Associate Dean (UHSE). It is strongly recommended that students consult with the Associate Dean (UHSE) or the BHSc Program Co-ordinator before submitting their final registration.

First-year students should obtain a copy of the Course Registration and Planning Guide from the Office of the Registrar or visit ucalgary.ca/registrar/registration/first-year-students.

Withdrawal from Courses

Students will not be permitted to withdraw more than once from a particular course. Students will be required to withdraw from the Cumming School of Medicine if they have accumulated a total of more than 30 units (5.0 full-course equivalents) withdrawals while in attendance at the University of Calgary. A student who wishes to withdraw from a course must do so before the deadline specified in the Academic Schedule. Students should consult with the BHSc program prior to withdrawing from a course.

Repetition of Courses

A student will be permitted to repeat a particular course only once. This regulation applies not only to individual courses but also to sets of courses where it is stated that credit for more than one of the sets is not allowed. A withdrawal counts as an attempt.

Opportunities to Take Courses at Another Institution for Transfer of Credit

Students may request to take some program course work at another university. Students are advised to meet with the Program Coordinator to receive the necessary approved Letter of Permission to undertake course work at another university. It will be the responsibility of the student to ensure that an official transcript is forwarded directly to the Registrar of this University in order that appropriate credit may be officially recorded.

Credit in Courses by Special Assessment

Students who feel that they know the material covered in a certain course without having received formal University credit may apply for special assessment in the course. Students should obtain the form headed “Permission to Take Courses by Special Assessment” from the Office of the Registrar and submit their application to the faculty offering the course. A course in which the student was previously registered may not be taken subsequently by special assessment, nor may any course be attempted more than once in this way. The School will not allow more than 30 units (5.0 full-course equivalents) completed by special assessment to count towards a degree. See also the general University regulations concerning special assessment (see B.10.1 in Academic Regulations).

4.3.3 Assessment

Missed Components of Term Work

Any student who is absent from a test or fails to complete a laboratory assignment or similar work for legitimate reasons must discuss an alternative course of action with the instructor. The regulations covering such circumstances are outlined in the sections E.3 Attendance and G.7 Deferral of Term Work in the Academic Regulations section of this Calendar. In such cases, the instructor must be notified within 48 hours.

Deferral of Final Examination

See the general University regulations governing the deferral of final examinations. In order to apply for a deferral of a final examination, students must pick up an application form in the Office of the Registrar or download it from the Registrar’s website at ucalgary.ca/registrar/exams and submit the completed form to the Associate Dean (UHSE). Students seeking a deferral of a
final examination for medical reasons must submit a Physician/Counsellor Statement form, which they can obtain from the Office of the Registrar or download from the website. A medical certificate stating only that a student has been seen by a physician is insufficient. Misreading the examination timetable is not a valid reason for requesting a deferred final examination.

4.3.4 Student Standing

Performance Review, Probationary Status and Dismissal

The academic standing of each student registered in the BHSc program will be reviewed annually following the Winter Term as per the GPA Requirements table.

GPA Requirements

<table>
<thead>
<tr>
<th>End of Year 1</th>
<th>Year 2 and 3</th>
<th>Year 4 and Graduation</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.30 or above: satisfactory standing</td>
<td>3.30 or above: satisfactory standing</td>
<td>3.30 or above: BHSc Honours degree</td>
</tr>
<tr>
<td>2.75 - 3.29: continuation in BHSc</td>
<td>2.75 - 3.29: continuation in BHSc</td>
<td>2.75 - 3.29: BHSc degree</td>
</tr>
<tr>
<td>1.70 - 2.74: continuation in BHSc on probation (see note 1)</td>
<td>1.70 - 2.74: On Probation (see note 1)</td>
<td>1.70 - 2.74: no degree (see note 2)</td>
</tr>
<tr>
<td>0.00 – 1.69: Required to withdraw from the School</td>
<td>0.00 – 1.69: Required to withdraw from the School</td>
<td>0.00 – 1.69: Required to withdraw from the School</td>
</tr>
</tbody>
</table>

Notes:

1. University regulations permit students to be on probation only once during their degree. Therefore, students who merit placement on academic probation will have to maintain a GPA of at least 2.75 in each subsequent year in order to continue in their chosen program. Students who do not meet this will be required to withdraw from the Bachelor of Health Sciences program and, if qualified, may be able to enter another program at the University of Calgary.

2. At the time of graduation, students who have not achieved a GPA of 3.30 over the last 90 units (15.0 full-course equivalents) will be awarded a BHSc (i.e., without the Honours designation), provided that the minimum cumulative GPA attained (over the last 90 units) is greater than or equal to 2.75.

3. Any students wishing to appeal an academic ruling please see J.2 Other Academic Appeals in the Academic Regulations section for details.

Dean’s List

The Dean’s List recognizes the outstanding academic achievement of students. To be included, a student must achieve a grade point average of at least 3.60 over all University of Calgary courses taken in the preceding Fall and Winter Terms, with a minimum of 30 units (5.0 full-course equivalents) to be counted. A statement of inclusion on the Dean’s List will be recorded on the student’s transcript. Students on academic sanctions as outlined in section K (Statement on Principles of Conduct) of this Calendar are not eligible for the Dean’s List.

4.4 Admissions

Admission to the School involves at the same time admission to one of the three program majors. If the applicant is not admitted to the BHSc Honours, the application will be reviewed for admission to an alternative University of Calgary degree program designated by the applicant. Please see below regarding admission of transfer students into the second year of the BHSc Honours. If an application is unsuccessful, a new application (including a new supplementary application) must be submitted the following year.

There are approximately 100 first-year students granted admissions each year from the various Majors. Admission to these majors is based both on the admission requirements listed below and the Supplementary Application results.

Applicants must submit both a completed Bachelor of Health Sciences Supplementary Application and a University of Calgary Application for Admission. Students are directed to the online Supplementary Application once their main University of Calgary online application is submitted to the Bachelor of Health Sciences program.

Year 1 Admission

Admission to Year 1 is normally limited to those who meet the requirements set out below and have completed no more than 6 units (1.0 full-course equivalent) transferable courses from a recognized post-secondary institution. Those with more than 6 units (1.0 full-course equivalent) may be required to apply to Year 2.

(a) Final transcript deadline: August 1

(b) To be considered for admission applicants must present:

(i) In progress or completed marks for the following subjects (or equivalent)
- English Language Arts 30-1
- Mathematics 30-1 with a minimum grade of 70 per cent
- Biology 30
- Chemistry 30
- One approved course or option as defined in A.5.1.2 Standard Admission For High School Students

(ii) Online Supplementary Application

(c) Admission is competitive. Approximately 100 first-year students across the three majors are admitted each year. Therefore, meeting the minimum standards as set out in (b) does not guarantee admission. Those with more than six units (1.0 full-course equivalent) transferable courses may be required to apply to Year 2.

(d) Applications will only be accepted electronically. The supplementary application is to be submitted online. Applicants will be selected based on their academic qualifications and their supplementary application.

(e) An Admissions Committee will review applications and all applicants will be informed of their status through the applicant’s Student Centre on their MyUofC.

(f) The O’Brien Centre for the BHSc will consider applicants for Early Admission for the upcoming year in April. Incomplete files will not be reviewed. Applicants currently in high school should refer to Early Admission for High School Students in A.5.1.1 in the Admissions section of this Calendar for details. It is to the applicant’s advantage to apply for admission and submit the supplementary information as soon as possible.

Year 2 Admission

(a) Transcript deadline: June 30

Summer Term (Spring/Summer Intersession) courses completed in the year of application will not be considered.

(b) Admission is competitive and seats are limited. Transfer students must have completed at least 24 units (4.0 full-course equivalents). Applicants must have taken a minimum four of the following courses corresponding to the major applied to:

Biomedical Sciences Major:
- Biology 241, 243, Chemistry 201, 203, Mathematics 249 (or 265), Physics 211 (or 221), 223

Bioinformatics Major:
- Biology 241, 243, Computer Science 231 (or 217), 233 (or 219), Mathematics 265 (249), 267, Chemistry 201, 203

Health and Society Major:
- Biology 241, 243, Health and Society 201, any 200-level half course English or Comparative Literature 203, and three of Psychology 200, 201, Sociology 201, Anthropology 203, Geography 205, 251, Economics 201*, 203*, any 200-level Political Science course, Community Rehabilitation 205, 207

*Students considering the Health Economics concentration in the BHSc Honours are required to complete both Economics 201 and 203, as they are prerequisites for most 300-level Economics courses.

(c) Subject to (b) above, a maximum of approximately 10 transfer students will be admitted into the second year of the program.

(d) Applications will only be accepted electronically. The supplementary application is to be submitted online. Applicants will be selected based on their academic qualifications and their supplementary application.

(e) An Admissions Committee will review applications and all applicants will be informed of their status through the applicant’s Student Centre on their MyUofC.

(f) The O’Brien Centre for the BHSc will start processing applications for the upcoming year once a final and official post-secondary transcript, to include the most recent semester finished, is received. Incomplete files will not be reviewed. It is to the applicant’s advantage to apply for admission and submit all necessary transcripts, including the supplementary information, as soon as possible.

(g) Transfer students who are admitted are required to take all Inquiry courses except for Medical Science 203 and Medical Science 205 – inquiry for first-year students.
Medical Science 203 and 205 will be replaced with an open option.

4.5 Program Details

4.5.1 Biomedical Sciences Major

Required Courses:
- Biology 241, 243
- Chemistry 201, 203, 351, 353
- Physics 211 or 221, 223
- 3 units (0.5 full-course equivalent) English: any 200-level English or Comparative Literature 203
- Mathematics 249 or 265
- Biochemistry 393
- Medical Science 341, 351, 407
- Medical Science 203, 205, 308, 408: Inquiry courses to be taken in sequence through years one to three.
- Medical Science 508: Research Project to be taken in final year. It is worth 12 units (2.0 full-course equivalents) and is offered over two terms.
- Medical Science 508: Research Project to be taken in final year. It is worth 12 units (2.0 full-course equivalents) and is offered over two terms.
- 3 units (0.5 full-course equivalent) Humanities Elective

9 units (1.5 full-course equivalent) Open Options

9 units (1.5 full-course equivalent) Biomedical Option: any senior-level course offered by the Cumming School of Medicine, Faculty of Science or select senior-level courses offered by the Faculty of Arts

15 units (2.5 full-course equivalent) Core Option: Medical Science 321, 401, 402, 404, 415, 417, 419, 501, 503, 515, 519, 521, 541, 543, 545, 561, 565, 567, 569 and any Biochemistry course or any Cellular, Molecular and Microbial Biology course. Note: Medical Science 402 and 417/419 cannot be taken in the same year as Medical Science 508.

12 units (2.0 full-course equivalent) Senior Option: any course at the 300 level or above

acceptable courses from the Faculty of Arts to satisfy the Humanities Elective may be selected from the following departments:
- Classics and Religion
- English
- Philosophy
- School of Languages, Literatures and Cultures
- and Medical Science 307.

acceptable courses from the Faculty of Arts to satisfy the Biomedical Option are:
- Anthropology 305, 311, 413, 435, 451, 523, 552, 553, 589
- Archaeology 417, 523, 555, 595
- Geography 339, 357, 439, 457, 533

Other courses from the Faculty of Arts may be considered on a case-by-case basis with the approval of the Biomedical Sciences Director.

4.5.2 Bioinformatics Major

Required Courses:
- Biology 241, 243
- Chemistry 201, 203, 351, 353
- Mathematics 265 or 249, 267
- Statistics 321, 323
- Computer Science 102 (Block Week - highly recommended), 217 and 219; or 231 and 233
- 6 units (1.0 full-course equivalent) senior-level Computer Science Option
- Medical Science 341, 351, 401, 403, 519, 545
- Biochemistry 393
- Medical Science 203, 205, 308, 408: Inquiry courses to be taken in sequence through years one to three.
- 3 units (0.5 full-course equivalent) Humanities Elective: English 200-level, Philosophy 279 or Medical Science 307 (highly recommended)
- Medical Science 508: Research project to be taken in final year. It is worth 12 units (2.0 full-course equivalents) and is offered over two terms.
- Software Engineering 300
- 6 units (1.0 full-course equivalent) Core Option: Medical Science 402, 404, 417, 419, 507, 509, 528, Biochemistry 443 and Computer Science 433, 449, 481, 503, 531, 572, 583. Note: Medical Science 402 and 417/419 cannot be taken in the same year as 508.
- 3 units (0.5 full-course equivalent) Open Option
- 6 units (1.0 full-course equivalent) Senior Option: any course at the 300 level or above

acceptable courses from the Faculty of Arts to satisfy the Humanities Elective may be selected from the following departments:
- Classics and Religion
- English
- Philosophy
- School of Languages, Literatures and Cultures
- and Medical Science 307.

acceptable courses from the Faculty of Arts to satisfy the Biomedical Option are:
- Anthropology 305, 311, 413, 435, 451, 523, 552, 553, 589
- Archaeology 417, 523, 555, 595
- Geography 339, 357, 439, 457, 533

Other courses from the Faculty of Arts may be considered on a case-by-case basis with the approval of the Biomedical Sciences Director.

4.5.3 Bioinformatics Minor

A Minor in Bioinformatics is available for students in the following programs:
- Bachelor of Health Sciences (Biomedical Sciences or Health and Society majors)
- Bachelor of Science in majors offered through the Department of Biological Sciences (Biological Sciences, Biochemistry, Cellular, Molecular and Microbial Biology, Ecology, Zoology or Plant Biology)
- Bachelor of Science in Computer Science

The GPA over all courses counting towards the minor must be at least 2.00.

In order to be admitted to the Minor, students must have successfully completed a minimum of 24 units (4.0 full-course equivalents) with a minimum GPA of 2.50 over the preceding 24 units (4.0 full-course equivalents). Students must apply online via their Student Centre.

The Minor has a fixed number of places for students (maximum 15 per calendar year). Students will be considered for admission on a competitive basis. The application to the Minor will include consideration of the applicant’s grade point average and a statement of interest explaining why they wish to complete a Minor in Bioinformatics. Information on document submission can be found on the Bachelor of Health Sciences website (www.cumming.ucalgary.ca/bhsc) [information to be inserted following approval]. Where the number of qualified applicants exceeds the number of available places, consideration will be given to a distribution of students from all eligible disciplines (Health Sciences (BMED, HSOC); Biological Sciences (multiple majors); and Computer Science).

Students interested in a Minor in Bioinformatics should meet with a program advisor as early in their program as possible. Students should be aware that some courses have prerequisites and must be taken into consideration when planning their program.

Bioinformatics Minor for BHS
c Students (Biomedical Sciences major)
- 6 units (1.0 full-course equivalent): Computer Science 217 and 219; or Computer Science 231 and 233
- 3 units (0.5 full-course equivalent): Computer Science 319 or 331
- 3 units (0.5 full-course equivalent): any Computer Science course at the 300 level or above
- 9 units (1.5 full-course equivalents) chosen from: Biology 401; Cellular, Molecular and Microbial Biology 411, 413, 461, 511, 523; Ecology 529; Plant Biology 401; Medical Science 541, 543, 545, or 507
- 6 units (1.0 full-course equivalent): Medical Science 401 and 403
- 3 units (0.5 full-course equivalent): Medical Science 519 or 507

Medical Science 507 is an independent study course that may be repeated for credit. May be applicable when the topic is in the field of Bioinformatics and with consent of the Bioinformatics Co-Directors.

Bioinformatics Minor for BHS
c Students (Health and Society major)
- 6 units (1.0 full-course equivalent): Computer Science 217 and 219; or Computer Science 231 and 233
- 3 units (0.5 full-course equivalent): Computer Science 319 or 331
- 3 units (0.5 full-course equivalent): any Computer Science course at the 300 level or above
- 3 units (0.5 full-course equivalent): Medical Science 341 or 341
- 6 units (1.0 full-course equivalent): Biology 401; Cellular, Molecular and Microbial Biology 411, 413, 461, 511, 523; Ecology 529; Plant Biology 401; Medical Science 519, 543, 545, or 507
- 6 units (1.0 full-course equivalent): Medical Science 401 and 403
- 3 units (0.5 full-course equivalent): Medical Science 519 or 507

Medical Science 507 is an independent study course that
Bioinformatics Minor for BSc
Students in the Department of Biological Sciences (BISC, BECM, CMMB, PLBI majors)

- 6 units (1.0 full-course equivalent): Computer Science 217 and 219; or Computer Science 231 and 233; or Computer Science 235 and 3 units (0.5 full-course equivalent) of Computer Science at the 300 level or above
- 3 units (0.5 full-course equivalent): Computer Science 319 or 331
- 3 units (0.5 full-course equivalent): any Computer Science or Mathematics course at the 300 level or above
- 6 units (1.0 full-course equivalent): Medical Science 341 or Biology 311
- 6 units (1.0 full-course equivalent) chosen from: Biology 401; Cellular, Molecular and Microbial Biology 411, 413, 461, 511, 523; Ecology 529; Plant Biology 401; Medical Science 541, 543, 545, or 507¹
- 3 units (0.5 full-course equivalent): Biology 315 or Statistics 321
- 6 units (1.0 full-course equivalent): Medical Science 401 and 403
- 3 units (0.5 full-course equivalent): Medical Science 519 or 507²

¹Medical Science 507 is an independent study course that may be repeated for credit. May be applicable when the topic is in the field of Bioinformatics and with consent of the Bioinformatics Co-Directors.
²May be applicable with a project from the field of Bioinformatics or an equivalent project-based 507 course offered by the Department of Biological Sciences and with consent from the Bioinformatics Co-Directors.

Bioinformatics Minor for BSc
Students majoring in Computer
Science

- 6 units (1.0 full-course equivalent): Statistics 321 and 323; or 6 units (1.0 full-course equivalent): Statistics courses at the 300 level or above
- 6 units (1.0 full-course equivalent): Biological Science 241 and 243
- 3 units (0.5 full-course equivalent): Medical Science 341 or Biology 311
- 3 units (0.5 full-course equivalent): Medical Science 351 or Biology 331
- 3 units (0.5 full-course equivalent) chosen from Biology 401; Cellular, Molecular and Microbial Biology 411, 413, 461, 511, 523; Ecology 529; Plant Biology 401; Medical Science 541, 543, 545, Medical Science 507³ (CPSC 503)
- 6 units (1.0 full-course equivalent): Medical Science 401 and 403
- 3 units (0.5 full-course equivalent): Medical Science 519 or 507³

³Medical Science 507 is an independent study course that may be repeated for credit. May be applicable when the topic is in the field of Bioinformatics and with consent of the Bioinformatics Co-Directors.

Notes:
1. Students may use a maximum of 9 units (1.5 full-course equivalents) of coursework to fulfill the requirements of both their Major field and the Minor program.
2. Students should note that many of these courses have prerequisites and must be taken into consideration when planning their program.
3. Some of the above courses may be restricted to Majors in the field and students may not have enrolment priority in heavily subscribed courses.
4. Students who are pursuing an Honours degree may consider a cross-disciplinary Honours thesis and should consult with a program advisor regarding opportunities in the area.
5. Other courses may be approved to fulfill the requirements of the Bioinformatics minor at the discretion of the Co-Directors of Bioinformatics. Students should contact the BHSC Program Co-ordinator for more information.

4.5.4 Health and Society Major
Upon completion of Year 1, Health and Society students are required to declare an "Area of Concentration". This must be selected from Anthropology, Community Rehabilitation and Disability Studies, Economics, Psychology, Geography, Sociology, or Political Science. Course selection must correspond to the student’s chosen concentration discipline and must be chosen from the "Concentration Courses" listed below.

Required Courses:
- Health and Society 201, 301, 311, 401, 591
- Biology 241, 243
- 9 units (1.5 full-course equivalent) Major Option: Anthropology 203, Community Rehabilitation 205, 207, Economics 201, 203⁴
- Geography 265, 251, any 200-level Political Science, Psychology 200, 201⁴, Sociology 201
- 3 units (0.5 full-course equivalent) Life Sciences Option: any Biology course or Medical Science 341 or Kinesiology 251 or Anthropology 201
- 3 units (0.5 full-course equivalent) English: any 200-level English or Comparative Literature 203
- 21 units (3.5 full-course equivalents) Concentration Courses (see below)
- 9 units (1.5 full-course equivalents) Open Option
- Medical Science 203, 205, 308, (Inquiry courses to be taken in sequence through years one to two); Health and Society 406 (to be taken in year three)
- Medical Science 407
- Medical Science 508: Research project to be taken in final year. It is worth 12 units (2.0 full-course equivalents) and is offered over two terms.
- 3 units (0.5 full-course equivalent) Humanities Elective

- 12 units (2.0 full-course equivalents) Health Science Option: any senior-level course offered by the Faculty of Science, the Cumming School of Medicine or courses selected from Anthropology, Archaeology, Economics, Geography, History, International Relations, Linguistics, Indigenous Studies, Political Science, Psychology, Sociology, Urban Studies

- 6 units (1.0 full-course equivalent) Senior Option

⁴Students considering concentrating in psychology should take Psychology 200 and 201. It is strongly recommended that this course is completed during the first year of study to facilitate enrolment in senior-level Psychology course come the student’s second year.
⁵Students considering concentrating in economics should take Economics 201 and 203. It is strongly recommended that these two courses are completed during the first year of study to facilitate enrolment in senior-level Economics course come the student’s second year.

Acceptable courses from the Faculty of Arts to satisfy the Humanities Elective may be selected from the following departments: Classics and Religion; English; Philosophy; School of Languages, Linguistics, Literatures and Cultures; Medical Science 307.

CONCENTRATION COURSES**

ANTHROPOLOGY
Anthropology 341, 391, 393, 411 and 9 units (1.5 full-course equivalents) from Archaeology 595 or senior-level courses offered by the Department of Anthropology and Archaeology.

COMMUNITY REHABILITATION AND DISABILITY STUDIES
Community Rehabilitation 209, 435, one of 471 or 473 and 475 and 12 units (2.0 full-
course equivalents) senior-level Community Rehabilitation courses.

ECONOMICS
Economics 337, 355, 379 and 12 units (2.0 full-course equivalents) senior-level courses by offered by the Department of Economics. Students considering a concentration in Economics should take Economics 201 and 203 as Major options. It is strongly recommended that these two courses be completed during the first year of study to facilitate in senior-level Economics courses come the student's second year.

GEOGRAPHY
Geography 231, 251, and 339 and 12 units (2.0 full-course equivalents) senior-level courses offered by the Department of Geography

POLITICAL SCIENCES
Political Science 310, 359, 381, 399 and 6 units (1.0 full-course equivalent) senior-level courses offered by the Department of Political Sciences

PSYCHOLOGY
Psychology 300, 301, 305 or 405 and 12 units (2.0 full-course equivalents) senior-level courses offered by the Department of Psychology. Students considering a concentration in Psychology should take Psychology 200 and 201 as Major options. It is strongly recommended that this course be completed during the first year of study to facilitate in senior-level Psychology courses come the student's second year.

SOCIOLOGY
Sociology 311, 313, 315, 321, 331, 333, 413

**The above concentration courses are subject to the changes and restrictions of the department offering the course.

4.5.5 Health and Society Minor
A Minor is available in Health and Society. The GPA over all courses counting towards the minor must be at least 2.00.

A maximum of 50 students will be admitted into the Minor each calendar year. Students will be selected top down based on GPA over their last 30 units (5.0 full-course equivalents). Admission to the Minor will be offered to students once Fall and Winter Term grades have been received. Students must declare their intention to Minor in Health and Society after having taken a minimum of 24 units (4.0 full-course equivalents).

Students should apply to the Minor program through their Student Centre. Students should refer to the application deadline in the Admissions section of the Calendar. 12 units (2.0 full-course equivalents): Health and Society 201, 301, 311, 401 18 units (3.0 full-course equivalents) selected from: Anthropology 203, 341, 349, 391 Archaeology 595

Notes:
1. Students may not use courses in fulfillment of both Major and Minor requirements.
2. Students must complete enough senior-level courses to fulfill the requirements of their Major.
3. Students should note that many of these courses have prerequisites and must be taken into consideration when planning their program.
4. Some of the above courses may be restricted to Majors in the field and students may not have enrolment priority in heavily subscribed courses.
5. Students who are pursuing an Honours degree may consider a cross-disciplinary Honours thesis and should consult with their supervisor regarding opportunities in this area.
6. Other courses may be approved to fulfill the 18 units (3.0 full-course equivalents) at the discretion of the Director of Health and Society. Students should contact the BHSc Program Co-ordinator, Student Affairs for more information.

5. Doctor of Medicine
The Cumming School Medicine of the University of Calgary offers a three-year professional degree leading to a Doctor of Medicine (MD).

Following completion of the undergraduate medical program students must complete postgraduate medical training prior to starting independent practice. They need to obtain certification from the College of Family Physicians of Canada (a minimum of two additional years of training) or a Royal College of Physicians and Surgeons of Canada program (a minimum of four additional years of training). The University of Calgary has more than 60 residency training programs. Full details can be found on the Cumming School of Medicine Postgraduate Medical Education website at ucalgary.ca/pgme.

Leaders in Medicine Combined MD/PhD or MD/MSc Program
The Cumming School of Medicine offers a combined degree program with the Faculty of Graduate Studies leading to various MD/graduate degrees (i.e. MD/MSc, MD/MBA and MD/PhD) in all Cumming School of Medicine graduate programs and with permission in other University of Calgary graduate programs. Information can be obtained under the Leaders in Medicine heading in the Faculty of Graduate Studies section of this calendar, and in the sections describing the individual CSM graduate programs. Supplementary application forms can be obtained from the Leaders in Medicine Program office (Graduate Sciences Education) in the Cumming School of Medicine.

5.1 Faculty Information

Contact Information
Location: Undergraduate Medical Education Office, Health Science Centre G701
MD Program main reception number: 403.210.3841
Website: ucalgary.ca/mdprogram/

Student Advising and Wellness (SAW)
Student Advising and Wellness (SAW) encourages students to strive for balance in their academic and personal lives. Our office is here to help support you throughout the next three years of training and we encourage students to utilize our completely confidential services. We offer medical, emotional, academic and career counseling assistance; we are always available to help you. We strive to create a supportive environment to help promote positive growth and development as students transition into well-rounded medical professionals.

Contact Information:
Location: Health Sciences Centre G740
Main Reception Number: 403.220.4262
Office Hours: 8:00 a.m. – 4:00 p.m.
Monday to Friday (closed on holidays)
Phone: 403.944.1014
Website: ucalgary.ca/mdprogram/current-students/student-advising-wellness

Parking and Transportation Services
Students can apply for on-site parking through the Alberta Health Services Parking Office as follows:
Women’s Health Centre, Room 060
Foothills Medical Centre
Business Hours: 8:00 a.m. – 4:00 p.m. Monday to Friday (closed on holidays)
Phone: 403.944.1014

Alberta Health Services also operates a parking call centre with assistance from live operators available 24 hours per day, seven days per week. The toll-free call centre number is included on the parking information sheets and is also posted on all parking equipment. Please call us anytime to obtain general parking information, report a maintenance or equipment problem, or to obtain assistance with equipment operation. Call 1-855-535-1100.

Email: ProvincialParking@albertahealthservices.ca
Website: albertahealthservices.ca/5505.as
Map of Foothills Site: albertahealthservices.ca/info/Page12576.aspx

5.2 Pattern of Education

The curriculum at the Cumming School of Medicine follows an innovative “Clinical Presentation” curriculum. Curriculum content including basic and clinical sciences is organized around the 120 +/- 5 ways a patient can present to a physician. These clinical presentations can take the form of historical
Cumming School of Medicine

points (e.g. chest pain), physical examination signs (e.g. hypertension), or laboratory abnormalities (e.g. elevated serum lipids). The organization by clinical presentations allows for a comprehensive approach to patient problems. Collaboration with multidisciplinary colleagues is incorporated, with emphasis on the physician as a member of the health-care team. Elective opportunities allow students to explore areas of interest in greater depth, including clinical interests, research topics, and international health.

Medical students are exposed to patients from the time they enter the Cumming School of Medicine. This is facilitated by the Cumming School of Medicine’s associations with inpatient and outpatient settings throughout Calgary and Alberta. In these settings, students are able to participate in patient care and a team approach to healthcare delivery from the first day they enter medical school.

The curriculum maintains an active learning environment. In the first two years, more than 25 per cent of scheduled instructional activities are spent in small group, case-based learning sessions. These small group sessions allow a unique opportunity for students to create an approach to problem solving using diagnostic classification schemes, to analyze the objectives and content of lectures in an in-depth fashion, and to communicate and exchange feedback with faculty and peers. Student attendance at small group sessions is considered mandatory.

The third and final year is called the Clinical Clerkship. During this time, students work on hospital wards, in ambulatory care clinics and doctors’ offices as well as in the Emergency Department in Calgary and Southern Alberta. Students rotate through a variety of specialties including Emergency Medicine, Family Medicine, Internal Medicine, Surgery, Psychiatry, Paediatrics, Anaesthesia, and Obstetrics and Gynaecology. Students also have 12 weeks of elective experience in the clerkship year.

The Undergraduate Medical Education program employs electronic-based materials in lectures, small groups, and other learning events. As such a laptop computer is strongly recommended for all students.

Participation in Rural Rotations: In the School’s response to rural social accountability, the program provides teaching at several regional centres such as Medicine Hat, Lethbridge, Red Deer, Yellowknife and rural sites such as Brooks, High Level and Pincher Creek, etc. Students should expect to do a minimum of 5–10 weeks of their clinical experience (pre-clerkship and clerkship) outside the city of Calgary except in unusual circumstances. A longitudinal placement at a rural site in the clerkship year provides a further option for a longer rural training experience for interested students.

5.3 Admissions

The details contained in the following sections constitute the definitive account of the regulations relating the admission to the MD program at the University of Calgary. Applicants will also find helpful resources and clarifications on other provisions on the Undergraduate Medical Education program website (ucalgary.ca/mdprogram/admissions). The Application Manual includes more detailed descriptions of the admissions processes related to the regulations outlined within the Calendar.

Pre-Medicine

The Cumming School of Medicine welcomes applications from individuals with a wide variety of educational backgrounds. It does not require that a student undertake a formal pre-medical program or specified prerequisite courses. There is no preferred degree.

Eligibility for Admission

As a provincial university, the University of Calgary has a primary obligation to Canadian citizens residing in Alberta. Although priority will be given to Alberta residents, the School also invites applications from residents of other provinces. A maximum of 15 per cent of all available positions may be offered to non-Alberta residents.

The Cumming School of Medicine has a policy on the admission of candidates who are neither Canadian citizens nor permanent residents. The School does not accept applications from individual international students. Seats for international students are currently limited to students from institutions or countries that have formal, contractual agreements with the Cumming School of Medicine.

The Cumming School of Medicine is committed to providing an inclusive learning environment. In selecting students, no consideration is given to factors irrelevant to academic performance such as gender, age, race, or religion. Nor will the vocation of an applicant’s parent, guardian, or spouse be a consideration in the selection process.

The Cumming School of Medicine is committed to providing appropriate accommodations to students with disabilities in accordance with University of Calgary policy. Physical and learning disabilities must not prevent the student, upon graduation, from communicating with patients, making observations, gathering and analyzing data necessary to arrive at medical judgments, and from performing in a safe and timely manner the therapeutic interventions expected of a physician who has completed the educational program leading to an MD degree. Potential applicants with a disability who are concerned that their disability may impact their ability to complete or apply successfully to the MD program are encouraged to contact Student Accessibility Services (ucalgary.ca/access/) or the MD Admissions Office to discuss their particular situation.

The Cumming School of Medicine will not normally accept applications from students who have withdrawn, who have been required to withdraw, or who have been expelled from any school or college of medicine.

Educational Background

Students must have completed a minimum of two full-time years of university-level courses at the time of application. A full-time year is defined for the purposes of application as a minimum of 24 units (credits), completed between September 1st and April 30th of the following year. These courses must be completed at an MD/PhD granting institution or be transferable to such an institution. The admissions committee will also consider, on a case-by-case basis, applications from individuals who have been unable to complete undergraduate studies on a full-time basis for well-established medical or financial reasons. Such individuals must first petition the Admissions Committee for permission to apply by contacting the Director of Admissions prior to August 1st of the application year.

The Cumming School of Medicine does not require that students undertake a formal pre-medical program. No specific courses are required for application or acceptance to the MD program. The admissions committee recommends that applicants consider taking courses in as many of the following disciplines as their schedules allow, as the content of these courses will be helpful in preparing for the Medical College Admission Test and during the MD program: biology, chemistry, organic chemistry, literature, indigenous studies, ethics, statistics, biochemistry, physiology, psychology and research methods. Whether or not an applicant has taken these courses at the time of application will not be taken into consideration in scoring the academic record. Students should ensure that the courses they choose satisfy the degree requirements of the undergraduate faculty in which they are registered.

Definition of Alberta Residency for MD Admission

The Cumming School of Medicine Admissions Committee considers an applicant to be “Albertan” if they have been physically present in Alberta on a day-to-day basis for 24 consecutive months at some point between their 15th birthday and the first day of classes of the year for which they are applying. The residency requirement shall not be considered broken when the Admissions Committee is satisfied that the applicant has been temporarily out of the province for vacation, educational exchange or employment.

Applications

Applications for the MD program are done online at ucan.ucalgary.ca. The deadline for receipt by the Office of Admissions of the online application, official transcripts, official MCAT scores, three letters of reference, and the application fee of $150.00 is October 1.

Applicants should note that the Office of Admissions will not accept facsimile transmission copies of transcripts. Candidates are encouraged to submit their applications early in the process, preferably well before the deadline. It is the responsibility of the
have received a numerical or letter grade underpined years, defined as 24 units completed once applicants have entered all their automatically by the online application sys-

The GPA used for the purpose of the application to the MD program is calculated based on the requirements set by the Cumming School of Medicine. GPA Calculation and Minimum GPA

The GPA used for the purpose of the application to the MD program is calculated automatically by the online application system once applicants have entered all their undergraduate and graduate courses. It is calculated using the average of all full-time undergraduate years, defined as 24 units (credits) of which 18 units or more must have received a numerical or letter grade completed between September and April. Each such academic year is considered equivalent for the purposes of this calculation, regardless of how many units were completed within it.

This calculated GPA is then modified as follows:

- Applicants who have completed or will have completed their undergraduate degree prior to matriculation into the MD program will have their lowest GPA year removed from the above calculation.
- Applicants who have completed or will have completed a graduate degree prior to matriculation into the MD program will have their cumulative GPA for that graduate degree included in the calculation as equivalent to a single full-time undergraduate year.
- Applicants with both remote and recent post-secondary studies may elect to invoke a 10 year exclusion rule, and in doing so exclude from the GPA calculations any academic work completed more than 10 years previously. Applicants electing to do so, however, must meet the eligibility requirements based on academic work done in the immediately preceding 10 years.

Albertan applicants, indigenous applicants, regardless of their province of residence, individuals currently on active duty with the Canadian Forces or the RCMP, and current indigenous applicants are currently in place. Any applicant may self-declare as indigenous and will be invited to submit a supplemental short essay describing their connection to their community and the impact of their heritage on both their preparation for medical school and their plans following completion of the MD. All self-declared indigenous applicants are required to submit proof of status or indigenous ancestry. All indigenous applicants will also be invited to interview.

Non-Albertan applicants must achieve a score of 128 on the CARS sub-section of the MCAT in order to be eligible to apply.

Interviews

Applicants will be notified in February regarding whether or not they will be invited to attend a series of short interviews. The interviews take place at the University of Calgary in February or March.

Applicants must attend the interviews at their own expense. Applicants must take part in a series of short, back-to-back interviews, which the Committee will use to assess the candidates' non-academic qualifications.

The number of interviews offered varies from year to year, but usually ranges between 500 and 550 interview invitations.

Each interviewed applicant is assigned an interview score based on performance in the interview. The final admission offer decisions are made based on the final application score, which consists of 50 per cent File Review Score and 50 per cent Interview Score.

Indigenous Applicants

The Cumming School of Medicine recognizes the need to represent the demographics of indigenous individuals within the medical profession and the importance of producing a medical workforce that represents the demographic diversity of the population we serve. In recognition of these facts, certain modifications to the application process for indigenous applicants are currently in place. Any applicant may self-declare as indigenous and will be invited to submit a supplemental short essay describing their connection to their community and the impact of their heritage on both their preparation for medical school and their plans following completion of the MD. All self-declared indigenous applicants are required to submit proof of status or indigenous ancestry. All indigenous applicants will also be invited to interview.

Alternative Admissions Process

In a limited number of cases, the Admissions Committee reserves the right to admit eligible individuals to the MD program regardless of their Final Application Score, if the committee is sufficiently convinced that the applicant has the academic and personal qualities necessary to succeed, and that doing so will assist the Cumming School of Medicine in meeting the health needs of the Canadian public.

Admission/Registration Refusal

Admission to the MD program is competitive. Meeting the admission requirements does not guarantee admission to the program or allow students to register in courses. The University of Calgary reserves the right, the published regulations notwithstanding, to deny applicants admission or registration in courses on the basis of their overall academic records, or if, during the course of the application process, the applicant has demonstrated behaviours or characteristics deemed to be incompatible.
with the practice of medicine. Admissions decisions are final and not subject to appeal.

Admissions Committee
The Admissions Committee of the Cumming School of Medicine consists of representatives of the School, physicians-in-training, other health care disciplines, and the community at large. The committee is charged with the final selection of medical students on the basis of academic and non-academic qualifications.

Admission of Students by Transfer
The Committee is able to consider requests for students from another university to take clerkship education at the University of Calgary in mandatory clerkship courses, or their equivalents, for the entire clerkship year provided that:

1. There is support from the Associate Dean UME at the University of Calgary and the counterpart at the Canadian university from which the student is transferring. This must include justification for the request and confirmation of good academic and professional standing in the university from which the student is transferring.

2. There are sufficient resources at the University of Calgary, such that the transfer student will not displace University of Calgary students.

These requests can be considered in the same manner that the Committee will consider requests from University of Calgary students for extensions to clerkships and special leaves of absence.

Students accepted for transfer will become a University of Calgary student, and will, upon completion of all the requirements for an MD degree, be conferred a University of Calgary medical degree.

Pathways to Medicine

The Cumming School of Medicine offers a Pathways to Medicine program to individuals entering an undergraduate program at the University of Calgary. The program includes a scholarship and guaranteed admission to the MD program upon completion of the undergraduate degree, provided specific conditions are met. Eligibility for the Pathways to Medicine program is restricted to individuals from low-income backgrounds, with a particular focus on rural and indigenous students. For details, visit: cumming.ucalgary.ca/pathways.

Admission to the MD program upon completion of the undergraduate degree is conditional upon the following:

- Maintenance of an overall GPA of 3.40 or greater over the course of their undergraduate studies.
- Achievement of the minimum MCAT score required of regular applicants at the time of application, if such minimums are in place at the time.
- Completion of the application process in the same manner as regular applicants with a score on the file review and the interview above the twentieth percentile.

5.4 Program Details

Schedule of Classes and Timetable
The schedule of classes offered in each year of the MD Program is available online in the student scheduling system OSLER. In exceptional circumstances changes may be made to a student’s timetable to meet the schedule of the program. Schedule of detailed class information is available in the online student schedule in OSLER at: osler.ucalgary.ca. Students should refer to the online schedule in OSLER to ensure that they are not scheduling extracurricular events or overlapping with scheduled class time. In addition, master timetables of the curriculum can be found online. Refer to this link for the most updated version of the general timetable: ucalgary.ca/mdprogram/current-student/timetables-0.

Timelines
Year 1: July – March (9 Months)
Year 2: April – February (11 Months)
Year 3: February – April (13 Months)

Curriculum Requirements (Core Courses)
Year 1: Medicine 320, 330, 340, 350, 360, 370
Year 2: Medicine 402, 410, 420, 430, 440, 450, 460, 470, 480, 490
Year 3: Medicine 502, 504, 506, 508, 510, 512, 514, 516, 520, 522

For a complete listing and description of all courses offered in the MD Program, refer to the “Courses of Instruction” section of the University Calendar. ucalgary.ca/pubs/calendar/current/medicine.

Program Extensions

Students are allowed to request a program extension through the Student Academic Review Committee (SARC). Process for these requests is outlined in the SARC Terms of Reference, Appendix, Section E as found in: ucalgary.ca/mdprogram/about-us/ume-policies-guidelines-forms-terms-reference.

Extensions may be allowed in the clerkship year (Year 3 of Program) as a result of a student failing to be matched in the Canadian Resident Matching Service (CaRMS) residency match.

Maximum Time Allowance to Complete the Curriculum

Students are required to complete the first two years of the MD curriculum within no more than four years from the initiation of studies, and complete the third clerkship year within two years after the completion of the first two years of study. Exceptions are made for students formally enrolled in the MD/PhD or MD/MSc Programs, where the maximum time allowed for the completion of the combined programs is eight and six years respectively. Exceptions may be made in other unusual circumstances.

Approved leaves of absence (single or cumulative) may extend the time to complete the curriculum by no more than two years beyond the maximum time allowances.

Please refer to the Student Academic Review Committee (SARC) Terms of Reference for further information at: ucalgary.ca/md-program/about-us/ume-policies-guidelines-forms-terms-reference.

5.5 Faculty Regulations

Immunization Requirements

All MD students are required to complete a series of immunization and diagnostic tests as outlined on the Medical Student Immunization Form Worksheet. Documented proof of completion must be provided to the Associate Dean or designate prior to commencement of the program.

Throughout the MD program, students are required to ensure that immunizations are current and must provide proof of updates to the Cumming School of Medicine. Failure to do so will result in students being removed from clinical courses/site until such time as adequate proof has been provided.

Please note requirements may change during the program as determined by Alberta Health Services and AFMC guidelines.

N-95 Fit Testing

All MD students must be fit tested for an N-95 mask prior to commencement of Medicine 402 (Summer Electives). Students may be required to wear this mask in the practice setting to help protect against certain communicable diseases. Documented proof of a fit test will be available in the Undergraduate Medical Education office. Fit testing is only valid for two years; therefore students must present proof of a second fit testing at the time of expiration.

Security Clearance/Criminal Record Check

All applicants to the MD Program in the Cumming School of Medicine are required to provide a current Police Information Check (also referred to as a Criminal Record Check or Security Clearance). In order to be considered “current”, the Police Information Check must be completed during the three months prior to admission to the program. The original Police Information Check must be presented, in person, to an Undergraduate Medical Education staff for confirmation. Without this documentation, admission to the School will be rescinded.

Students who are concerned about the presence of a criminal record should contact the police department to discuss the process for eliminating or erasing such a record. It is important that students keep the original Police Information Check for future employment purposes.

Failure to present a clear Police Information Check may result in admission being denied/rescinded. An internal University appeal process is available to applicants who are refused admission for this reason.
Subsequent to admission and at any time during the program, a student may be
required to produce a current Police Information Check, the results of which could
require their withdrawal from the program, in the sole discretion of the University.
Students are obligated to inform the School immediately of any change in status of their
criminal record.

**Policies Relative to Clinical Experience**

Students are advised to read the general University regulations regarding attendance
(see E.3 Attendance) in the Academic Regulations section of this Calendar.

Students may be required to complete clinical experience at sites other than the
location of their residence. Students’ clinical experience may also be scheduled at
various hours, including evenings, nights and weekends, **Monday through Sunday**.
Medical Doctor students are responsible for all travel, parking and accommodation costs
related to clinical experiences except for University of Calgary Longitudinal Integrated
Clerkship (UOLIC) students.

Students must demonstrate satisfactory performance as delineated in the objectives
of the course. Participation in all activities that involve patients is mandatory.

Students who miss one or more clinical

days, must comply with the Undergraduate Medical Education (UME) attendance
policies.

An instructor may prohibit a student from attending or completing a clinical experience if
there is evidence that the student has acted in a manner that is detrimental to patient
care or that patient safety is at risk. The Associate Dean will be consulted or informed
about any such situation or action. A student who wishes to appeal such a decision will
follow the appeals process as outlined in the Calendar under section 5.8 Appeals.

**Policy Relative to Student Attendance**

Students are advised to read the general University regulations regarding attendance
(see E.3 Attendance) in the Academic Regulations section of this Calendar.

In addition to the academic regulations, the following attendance policies and guidelines
will apply to all students in the Medical Doctor program:

- Medical Student Attendance Policy
  (Related to Years 1 and 2 of the MD Program)
- Guidelines for Attendance in Clerkship
  located in the “Clerkship Policies and Procedures Manual” (Related to Year 3 of
  the MD Program)
- Medical Student Leave of Absence/Time
  Away Policy (Related to all three years of
  the Program)

All documents listed above can be located on the Medical Doctor Program website as follows:

- [cumming.ucalgary.ca/mdprogram/current-students](cumming.ucalgary.ca/mdprogram/current-students)

**Academic Accommodation Policy**

It is important for students with documented disabilities, who have met the admission cri-
teria, to note that the Academic Accommodation Policy does not require the University
to lower or substantially modify standards in order to accommodate students with
disabilities. Adaptive technology and/or academic accommodations are available to
facilitate learning; however, they do not relieve students of their responsibilities to
develop the essential skills and abilities expected of all other students.

**Fees and Expenses**

**Tuition**

Please refer to the Tuition and General Fees section of the Calendar for a breakdown of
tuition and general fees for the MD Program.

**Other Expenses**

In addition to textbooks and course packages, students can expect other additional
charges. Examples listed below:

- Uniforms
- Stethoscope
- Police Information Check
- CPR Certification/Re-certification
- Immunizations
- Travel to and from practice sites
- Parking Fees at practice sites
- Name badges
- Medical Council of Canada Examination Fees

**Tuition Fee Credits**

A tuition credit will be calculated by the Undergraduate Medical Education Office
(UME) when a student has gone on an approved Leave of Absence from the program
or has been requested to withdraw from the program. Students will not receive a refund
but rather a credit note for future tuition or general fee expenses. Please note that
general fees cannot be adjusted.

**Student Awards**

Student Awards Office
Location: MacKinnie Block 124
Telephone: 403.210.7625
Undergraduate Awards Email: ucawards@ucalgary.ca
Financial Assistance and Loans Email: financialaid@ucalgary.ca
Website: ucalgary.ca/registrar/finances/
The Student Awards Office provides scholarships, bursaries and awards informations to entering and continuing undergraduate students, linking them with valuable financial resources for their post-secondary studies. Students should review the cost of attending university from their very first term through to the completion of their program. Paying for a university education is ultimately the responsibility of the student. To access financial assistance, make the necessary applications well before the start of the academic year. Be aware of the application deadlines for grants, awards and government student loans. Although each student’s needs and resources differ, the University provides a list of general fees and expenses. Refer to the Tuition and General Fees section in this Calendar for details.

Awards specifically for medical students can be found online at:

- [ucalgary.ca/registrar/finances/professional](ucalgary.ca/registrar/finances/professional)
- [cumming.ucalgary.ca/ruralmedicine/awards](cumming.ucalgary.ca/ruralmedicine/awards)

**Graduation**

Students must have successfully completed all required components of the MD program
in order to Graduate.

Students will not be allowed to graduate with any failed course. The Student Aca-
demic Review Committee (SARC) of the MD Program will establish appropriate remedia-
tion requirements that must be fulfilled in order for students to obtain the standing of
satisfactory performance. These remediation requirements may include repeating one or
more practicum rotations, one or more entire courses, or the entire year.

**Policy Resources**

Clerkship Policy & Procedures Handbook:
[ucalgary.ca/mdprogram/current-students](ucalgary.ca/mdprogram/current-students)
Student Evaluation Committee (SEC): Policy for Development & Maintenance of Student Evaluations & Policy for Reappraisals and Appeals of Student Evaluations:
Undergraduate Medical Education Policies & Guidelines:
Student Academic Review Committee: Terms of Reference:

**5.6 Course Registration**

**Accuracy of Registration**

The Undergraduate Medical Education Office will register successful applicants
admitted to the Medical Doctor Program and ongoing students into all required yearly
courses. Payment of fees is the student’s responsibility through the Online Student Centre via MyUofC web portal. For more information refer to B.15 Payment of Fees or Notification of Financial Assistance in the Academic Regulations section of this Calendar.

**Withdrawal from Courses**

Students can withdraw from courses for the following reasons:

- Academic Issues and Student Academic Review Committee (SARC) Recommendations
• Approved Leave of Absences including Medical Leaves
• Approved Withdrawal from the MD Program

Prior to the add/drop deadline, students will have the course(s) removed from their permanent record and will not be required to pay tuition fees for the course.

After the registration deadline a student will have the withdrawal recorded on their permanent record and will not receive a tuition fee credit.

The date of withdrawal from a course or from the term will be noted on the student’s permanent record.

Leave of Absence

In cases of leave of absence, the Student Academic Review Committee (SARC) reserves the right to review all students who have taken leaves of absence prior to resumption of studies. The maximum duration of leave of absence without compulsory review of the student’s progress by SARC is one year. If the leave of absence is in excess of one year, the student will be reviewed by SARC prior to resumption of studies. SARC may ask for the student to be reassessed prior to resumption of studies and may request the student repeat any portion of the preceding curriculum if found unsatisfactory before continuing further studies.

For more information on Leaves of Absence or Time Away, refer to: ucalgary.ca/mdprogram/about-us/ume-policies-guidelines-forms-terms-reference.

5.7 Assessment

Exceptions and further information to Assessment, evaluations and appeals can be located in the following online documentation:

• Policy for Development and Maintenance of Student Evaluations
• Policy for Reappraisals and Appeals of Student Evaluations
ucalgary.ca/mdprogram/about-us/ume-policies-guidelines-forms-terms-reference

Scheduling of Examinations

Examinations are scheduled within regular class time except in those special cases where prior approval has been obtained from the Associate Dean of the Undergraduate Medical Education Office (UME).

Grading

The following grades/notations will be used by the Cumming School of Medicine for courses completed in the Cumming School of Medicine for courses completed in the MD Program.

CR – Completed Requirements
RM – Remedial Work Required
I – Incomplete
MT – Multi-Term
F – Fail

Grades in a course are reported according to the grading scheme of the faculty offering the course, regardless of the faculty in which a student is registered.

Satisfactory/Unsatisfactory standing is used to assess each course. Students will be deemed Satisfactory or Unsatisfactory in the complete (overall) evaluation. Students cannot be declared Satisfactory overall on some of the course evaluation components. To obtain credit for a course, a student must be certified as satisfactory on the course evaluation by achieving a score at or above the minimum performance level (MPL).

Results from Year 1 and 2 will be reported as either “Satisfactory” or “Unsatisfactory”.

Results from Year 3 will be reported as “Satisfactory”, “Unsatisfactory”, or “Satisfactory with performance deficiency”.

Satisfactory: The student has met or exceeded the level of performance minimally acceptable for promotion. A satisfactory standing will appear on the transcript as “CR”.

Unsatisfactory: The student has not met the minimum performance level for the evaluation. A student can also be deemed unsatisfactory in a situation where a serious professionalism breach has occurred. An unsatisfactory standing will be recorded on the student’s transcript as an “F”. A repeated course/rotation will be noted on the transcript with a different course number.

A student who receives an “unsatisfactory” standing may wish to review their result sheet with the examination key to aid in recognition of areas of deficiencies and assist in planning remedial studies or to identify an error in the marking. Should a student feel that an error has occurred in the marking of a non-multiple choice question (MCQ) they may submit a Request for Reappraisal.

Satisfactory with performance deficiency: Used in Clerkship for the following situations:

1. Failure of one component of a clerkship evaluation with subsequent completion of required remedial work and satisfactory performance on rewrite of that component.

2. Overall rating of satisfactory performance in a clerkship rotation but with one or more specific areas of deficiency noted including professional and ethical behaviour.

3. A course/rotation signed-off as “Satisfactory with Performance Deficiencies” will appear as a “CR*” on the transcript.

Minimum Performance Levels (MPL)

The MPL for an examination is the sum of MPLs for each item on the examination. Members of the Exam Review Working Committee set the MPL for each item.

The overall examination MPL and student results will be rounded as per the follow policy document:

Distribution of Results

Results are available to students through Dolphin which can be accessed through the Central Authentication System (CAS). These results include the overall score and minimum performance level for the exam.

Results are confidential. Individual student results will be made available to:

a. the student
b. the student’s permanent file
c. the office of the Associate Dean, UME
d. members of faculty committees responsible for student promotion and/or appeals
e. course chair and evaluation co-ordinator for relevant course or clerkship.

Anonymized group evaluation results may be released to the course chair and evaluation co-ordinator for the relevant course and to faculty responsible for program evaluation in the Undergraduate Medical Education Program.

Individual student grades and class standings are not reported on student transcripts or provided as part of Canadian Resident Matching Service (CaRMS) applications.

Consequences of an Unsatisfactory Performance

Students should refer to the Student Evaluation Committee’s (SEC) Policy for Development and Maintenance of Student Evaluations for consequences of unsatisfactory performance in any given year of the MD Program. This policy is located online as follows:

Student File

The Office of Medical Education maintains a file for each student in the MD Program – one academic file and one non-academic file. The file is a combination of Years 1 and 2 (Pre-clerkship) and Year 3 (Clerkship) academic documentation.

For further information regarding a student’s file, please refer to the online policy:

Promotions

On behalf of the Faculty Council, Student Academic Review Committee (SARC) determines whether or not students should be promoted to the next stage of the MD program, and ultimately receive the MD degree.

In accordance with The Terms of Reference for the Student Academic Review Committee, SARC is a delegated body of Faculty Council responsible for the review and ratification of undergraduate medical student performance. SARC makes recommendations to Faculty Council and the Dean concerning the promotion of students and discipline related to the academic performance (knowledge, skills and professional attitudes) of students who, by reason of unsatisfactory performance, cannot be promoted.
The Terms of Reference of the Student Academic Review Committee are located on the MD Programs website at: ucalgary.ca/mdprogram/about-us/ume-policies-guidelines-forms-terms-reference. Students experiencing any academic difficulty should refer to this document and become fluent with the faculty rules regarding policies and procedure of promotion. Guidance regarding an appearance is available from Student Affairs, Faculty Advisors and the UME office. Final decision for graduation is made by Faculty Council, under the advisement of SARC.

5.8 Appeals

Appeal Process
Students may appeal any evaluation decision within the MD Program. Students should be familiar with I. Reappraisal of Grades and J. Non-Disciplinary Academic Appeals in the Academic Regulations Section of the Calendar as well as the MD Program’s Policy for Student Evaluation: Reappraisals and Appeals posted online at: ucalgary.ca/mdprogram/about-us/ume-policies-guidelines-forms-terms-reference.

Appeals – Faculty Appeals Committee
Procedures for appealing a final grade reappraisal beyond the departmental level are detailed in J.1 Non-Disciplinary Appeals - Faculty Appeals Committee and are the same for a final grade as for a piece of graded term work.

6. Postgraduate (Residency Programs)

6.1 Course Registration
The Postgraduate Medical Education Office will register all new and ongoing students in residency programs with the Registrar’s Office. Payment of fees is the responsibility of the student. Information is available through the Online Student Portal via MyUofC web portal. No specific course registration is required for postgraduate medical education except in the following circumstances:

Individuals registered in the Public Health Preventive Medicine (PHPM) Residency Program may register in a maximum of 8 graduate credit courses at no additional charge. These comprise three mandatory courses and five courses selected based on future career plans. For applicable courses please see 6.2 Academic Requirements.

All other individuals registered in postgraduate (residency) training who wish to complete graduate courses must register and pay applicable tuition fees.

Any individual pursuing postgraduate (residency) training who wishes to register for a Master’s or PhD degree must register with the Faculty of Graduate Studies and pay the applicable tuition fees.

6.2 Academic Requirements

Students registered in the Public Health and Preventative Medicine (PHPM) Residency Program must complete a minimum of 21 units (7.0 half-course equivalents), as described below.

Mandatory Courses
Students must complete 9 units (3.0 half-course equivalents) of the following:

- Community Health Sciences 660: Introduction to Community Health Sciences
- Community Health Sciences 610: Biostatistics I: Essentials of Biostatistics
- Community Health Sciences 640: Fundamentals of Epidemiology

Option Courses
Students must complete a minimum of 12 units (4.0 half-course equivalents) selected from graduate courses offered in Community Health Sciences, or other relevant graduate courses as approved by the PHPM Program Director.

7. Administration

Faculty Administrative Officers
Dean
J.B. Meddings
Vice Dean
G.M. MacQueen

Senior Associate Deans
M.H. Topps, Education
R.J. Bridges, Faculty Affairs
M. Tonelli, Health Research
G.W. Zamponi, Research

Associate Deans
S. Wiebe, Clinical Research
D.V. Exner, Clinical Trials
K.W. Burak, Continuing Medical Education & Professional Development
D.L. Myhre, Distributed Learning & Rural Initiatives
B.L. Adams, Professionalism, Equity & Diversity
D.A. Keegan, Faculty Development
T.L. Beattie, Graduate Sciences Education
L. Welikovich, Postgraduate Medical Education
R.W. Turner, Research Grants

P.M. Veale, Undergraduate Medical Education, Clerkship
K.D. Busche, Undergraduate Medical Education, Pre-Clerkship
K.J. McLaughlin, Undergraduate Medical Education, Research & Innovation (Sabbatical until January 2018)

Executive Directors
E. Woolner, Alumni Affairs
G. Levy, Executive Director & Chief Financial Officer

Managers
K. Potter, Academic Appointments
P. Romeo, Educational Operations

Faculty of Environmental Design

1. Summary of Degree Programs

Degrees Offered
- Master of Architecture (MArch)
- Master of Landscape Architecture (MLA)
- Master of Planning (MPlan)

Thesis-Based Degrees
- Master of Environmental Design (MEDes)
- Doctor of Philosophy (PhD)

Minor Fields of Specialization
- Architectural Studies, course-based
- Undergraduate Certificate
- Sustainability Studies, course-based

2. Faculty Information

Contact Information
Location: Professional Faculties 2182
Student Information:
- 403.220.6601
- 403.284.4399
Email address: evdsinfo@ucalgary.ca
Website: evds.ucalgary.ca

Introduction
The Faculty of Environmental Design has a dual mandate to offer course-based, first professional degrees in Architecture, Landscape Architecture and Planning, and to offer advanced research opportunities in the Master of Environmental Design and PhD thesis degree programs. The latter research focus is intended for candidates who wish to build upon their professional career experience or related degree, with advanced, problem-oriented research.

It is worth noting that since the Faculty’s founding in 1971, the important roles for design, planning and management in human activities which impact built and natural environments have increased substantially. Significantly, the Faculty has championed interdisciplinarity as a means to understand and address the complex, and often subtle, interrelationships evident in the pursuit of these human activities. Further, the Faculty actively seeks to work co-operatively with local communities, governments, private corporations, associations and experts in other University Faculties to address complexity in a myriad of environmental design problems. The resulting outcomes may include new buildings, communities, artifacts, urban forms, and cultural landscapes, as well as plans, policies, environmental and ecosystem management strategies, and new technologies and information systems.

3. Faculty Regulations

3.1 Admissions

Admission to graduate degree programs in the Faculty of Environmental Design follows Faculty of Graduate Studies regulations and requirements found at: http://www.ucalgary.ca/pubs/calendar/grad/current/gs-a.html.

A recognized four-year undergraduate university degree is required for admission to the Master of Architecture, Master of Landscape Architecture, Master of Planning and the Master of Environmental Design pursuant to Faculty of Graduate Studies regulations. Senior undergraduates in other Faculties may be eligible to take courses in the Faculty of Environmental Design. However, prior approvals of the instructor and the Faculty are required.

For specific admission information into any of the programs, refer to: http://www.ucalgary.ca/pubs/calendar/grad/current/environmental-design-evds.html.

Admission to the Minor in Architectural Studies follows requirements identified below.

Because of limitations on enrollment, all applicants meeting admission requirements are not necessarily admitted.

Minor Field of Specialization in Architectural Studies

In order to be eligible for the Minor, students must have successfully completed a minimum of 24 units (4.0 full-course equivalents) in post-secondary study by the end of the Fall Term in the year in which they apply. Admission to the Minor will be granted for the Fall Term only. Students must apply via their online Student Centre by February 1. The Minor has a fixed number of places for students. Students will be admitted on a competitive basis. The application to the Minor will include consideration of the applicant’s grade point average and a portfolio of their creative work.

A minimum grade point average of 3.20 is required for consideration for admission, but does not guarantee admission. The grade point average for admission purposes will be calculated over the most-recent course work to a maximum of 30 units (5.0 full-course equivalents) inclusive of the University of Calgary courses and/or transferable courses taken at other institutions.

Applicants to the Minor must submit a digital portfolio that provides evidence of original or creative work in any field or medium, and includes a brief statement of their interest in the Minor. The requirements for digital portfolio submissions can be found on the Environmental Design website: evds.ucalgary.ca/content/minor-architectural-studies-arest.

Application Procedures

The deadline date for applications to the Master of Architecture, the Master of Landscape Architecture, the Master of Planning and Master of Environmental Design programs is January 15, for admission to the following Fall Term. The deadline date for applications to the Minor Field of Specialization in Architectural Studies is February 1, for admission to the following Fall Term. Degree Program Admission Committees for the Master of Architecture, Master of Landscape Architecture, Master of Planning and Master of Environmental Design and the Minor of Architectural Studies evaluate the respective pool of eligible candidates and offers admission to the most-qualified applicants. New admissions to all programs may be limited in number as required on an annual basis.

The deadline date for applications to the Master of Environmental Design and PhD programs is February 1, for admission to the following Fall Term.

3.2 Accuracy of Registration

Students are responsible for the completeness and accuracy of their registration and for arranging their program to meet all requirements as detailed in this Calendar. Students should, however, seek advice from the Faculty of Environmental Design concerning their choice of courses. In cases of doubt about the interpretation of regulations, a student should consult the Graduate Program Administrator or the Associate Dean for their Program.

4. Program Descriptions

For program information for the following graduate programs, refer to the Graduate Calendar: http://www.ucalgary.ca/pubs/calendar/grad/current/environmental-design-evds.html.

Master of Architecture (MArch)

The Master of Architecture is a course-based first professional degree offering a three-year curriculum based on a two year MArch program, plus a Foundation Year when deemed appropriate. The Canadian Architectural Certification Board accredits the degree, and prepares students for practice as registered architects in North America.

Master of Environmental Design (MEDes)

The Master of Environmental Design is a thesis-based interdisciplinary degree pro-
gram concerned with designing, planning, managing, and studying human activities in the built and natural environments.

**Master of Landscape Architecture (MLA)**
The Master of Landscape Architecture is a course-based first professional degree program, offering a three-year curriculum, based on a two-year MLA program, plus a Foundation Year when deemed appropriate. The curriculum reflects the requirements for accreditation by the Canadian Society of Landscape Architects. The program will be seeking accreditation with the graduation of our first cohort in 2018.

**Master of Planning (MPlan)**
The Master of Planning is a course-based first professional degree program, offering a two-year curriculum emphasizing sustainability, interdisciplinarity, physical planning and urban design. The Professional Standards Board of the Canadian Institute of Planners accredits the degree.

**Doctor of Philosophy (PhD)**
The Doctor of Philosophy is a thesis-based interdisciplinary degree program involving research inquiry in thematic areas related to Architecture, Planning, and Sustainable Design across the spectrum of faculty research expertise and professional planning experience.

**Minor Field of Specialization in Architectural Studies**
The courses required for the Minor are equivalent to the courses in the MArch Foundation Year, and constitute the prerequisites for the University of Calgary’s two-year MArch degree. Completion of this Minor does not guarantee admission to the MArch or to other degree programs in the Faculty of Environmental Design, but it may reduce the number of courses that are required for an MArch. Students completing the Minor must apply for admission to the MArch degree.

Students interested in pursuing an MArch at the University of Calgary should note that only those students who have completed a four-year degree are considered for admission. A three-year Bachelor of Communication and Culture coupled with the Minor is not sufficient.

**Field of Architectural Studies**
The Field of Architectural Studies consists of the following courses:
Architectural Studies 423, 444, 449, 451, 453, 457.01, 457.02, 484.

**Requirements**
The following 30 units (5.0 full-course equivalents) must be completed successfully to achieve the Minor:
- Architectural Studies 423 Sustainability in the Built Environment
- Architectural Studies 444 Studio II in Architecture
- Architectural Studies 449 Building Science and Technology I
- Architectural Studies 451 Graphics Workshop I
- Architectural Studies 453 Graphics Workshop II
- Architectural Studies 457.01 History of Architecture and Human Settlements I
- Architectural Studies 457.02 History of Architecture and Human Settlements II
- Architectural Studies 484 Studio I - Design Thinking

The following optional elective courses in Environmental Design are also available to students in the Minor:
- Environmental Design Block 697.33 Field Trip
- Other electives with approval of the Associate Dean (Academic – Architecture)

Other undergraduate courses in Environmental Design available to all students include:
- Architectural Studies 201 Introduction or Architectural Studies
- Sustainable Studies 201 Exploring Sustainability
- Environmental Design 401 Introduction to Environmental Design

5. Administration

**Faculty Administrative Officers**

Dean
J. Brown

Associate Deans
J. Johnson, Academic – Architecture
B.A. Sandalack, Academic – Landscape Architecture and Planning
B. Wylant, Research and International

**Graduate Program Director**
(Thesis-Based)
D. Monteyne
Faculty of Graduate Studies

1. Degrees Offered

See degrees chart below.

Graduate Programs

The Faculty of Graduate Studies administers doctoral programs leading to a Doctor of Philosophy or Education, and master’s programs leading to a Master of Architecture, Master of Arts, Master of Biomedical Technology, Master of Business Administration, Master of Community Medicine, Master of Counselling, Master of Disability and Community Studies, Master of Education, Master of Engineering, Master of Environmental Design, Master of Fine Arts, Master of Geographic Information Systems, Master of Kinesiology, Master of Landscape Architecture, Master of Laws, Master of Music, Master of Nursing, Master of Pathologists’ Assistant, Master of Planning, Master of Public Policy, Master of Science, Master of Social Work, or Master of Strategic Studies.

Combined Degree Programs

The Faculty of Graduate Studies has approved guidelines for Combined Degree Programs. A Combined Degree Program is a formal arrangement between two units offering programs whereby students may be registered simultaneously in two graduate programs (or in one master’s program and one professional program such as JD or MD that normally admits students with undergraduate degrees). The University of Calgary presently offers the following combined degree programs: JD/MBA, JD/MPP, MBA/ MPP, MBT/MBA, MN/MBA, MPlan/MBA, MSW/MBA, MSc/MBA, PhD/MBA, MD/ Master’s and MD/PhD (Leaders in Medicine). Information is available from the relevant graduate programs.

2. Faculty Information

Enquiries concerning graduate programs should be directed to the unit offering the program. The Faculty of Graduate Studies website contains direct links to units offering graduate programs: grad.ucalgary.ca.

Introduction

The mission of the Faculty of Graduate Studies at the University of Calgary is to work with graduate programs to aid them in attracting well-prepared students, supporting the students well while they are here, graduating a high percentage of them in reasonable time, and producing graduate degree holders who are well-respected contributors in their fields wherever they are employed. To achieve this, the Faculty works with programs in setting admission standards and program requirements, and in establishing supervisory and examination committees. The Faculty is also closely involved in the administration of over $30 million annually in financial awards for graduate study.

3. Admissions
There is no general right of admission to Graduate Programs. Each program determines whether to recommend to the Faculty of Graduate Studies the admission of a particular applicant based not only on the applicant’s credentials but also on the availability of resources for supervision and research, departmental research objectives, program balance, and other such considerations. Taking these considerations into account, graduate programs are expected to act in equitable manner in their admission procedures.

Graduate students are admitted to the Faculty in one of the following categories:

Regular
Students may be admitted to a program leading to the master’s or doctoral degree, provided admission qualifications are met.

Interdisciplinary Degree: A student wishing to pursue a thesis-based master’s or doctoral degree in an area not sufficiently represented by one graduate program can request to do an interdisciplinary degree. In an interdisciplinary degree program, the student is admitted to both a home program and a conjoint program. The student submits an application form and fee along with official transcripts and letters for reference to the proposed home program, which will liaise with the proposed conjoint program.

Qualifying
A student who meets the qualifications for admission but lacks the necessary background for a graduate program in a chosen area of specialization may be admitted as a qualifying graduate student. Upon satisfactory completion of a qualifying year, the student may be transferred to regular student status. Qualifying graduate students must be full-time registrants in either a master’s or a doctoral degree program. Qualifying status will not be granted for a period exceeding one year.

Because a qualifying student is required to take more courses in a degree program than a regular graduate student, a qualifying student in a thesis-based degree program will be assessed an extra year of full program fees. A qualifying student in a course-based program will pay tuition fees for the extra required courses on a per-course basis. Tuition fees for courses taken during the qualifying year will not count toward the tuition fee for the degree program.

Visiting
A student who is registered in a graduate degree program at another university that does not have an exchange agreement with the University of Calgary, and who wishes to engage in course work and/or research at the graduate level at the University of Calgary for credit at their home university may be admitted as a visiting graduate student. A visiting student must submit a completed Visiting Student Application form and the application fee. Visiting students apply to specific graduate programs, and the applications are forwarded to the Faculty of Graduate Studies for registration. Visiting students pay all applicable general and tuition fees. Visiting students pay only the applicable general fees at the University of Calgary. If there is no reciprocal agreement, the exchange student pays both applicable general and tuition fees at the University of Calgary.

Exchange
The Faculty of Graduate Studies at the University of Calgary has reciprocal exchange agreements with other institutions. Graduate students from these institutions may engage in course or research work at the University of Calgary for credit at the home institution. Exchange students must submit the appropriate application/approval form (grad.ucalgary.ca/future/admissions/admission-types/exchange-students).

Exchange students pay tuition fees at the home universities when this is written into the specific exchange agreement; they pay only the applicable general fees at the University of Calgary. If there is no reciprocal agreement, the exchange student pays both applicable general and tuition fees at the University of Calgary. It should be noted that exchange student status does not guarantee later admission to a graduate program at the University of Calgary.

The Western Deans’ Agreement covers graduate students from member universities in British Columbia (British Columbia Institute of Technology, Royal Roads University, Simon Fraser University, University of British Columbia, University of Northern British Columbia, Thompson Rivers University and University of Victoria), Alberta (Athabasca University, Concordia University College of Alberta, University of Alberta, University of Calgary, University of Lethbridge), Saskatchewan (University of Regina, University of Saskatchewan), and Manitoba (Brandon University, University of Manitoba).

The Canadian Graduate Student Mobility Agreement, initiated by the Canadian Association for Graduate Studies (CAGS), encourages graduate student mobility within Canada in order to foster the exchange of ideas, specialized training, research collaboration, and interdisciplinarity. Graduate students, who must be registered full-time and paying fees at a participating home
university, may register as “visiting graduate research students” at another participating university. No tuition fees will be charged to visiting graduate research students, provided they are not taking courses at the host institution. Incidental fees may be charged.

4. Qualifications
Applicants must hold or obtain the following minimum qualifications before the Faculty will give consideration to admission:

(a) A four-year baccalaureate degree or its equivalent from a recognized institution. Degrees and grades from other institutions are evaluated for their equivalency to those of the University of Calgary. A grade point average equivalent to 3.00 or better (on the University of Calgary four-point system) is required. This is based on the last two years of the undergraduate degree consisting of a minimum of 10 full-course equivalents. Senior Level courses of appropriate content for the graduate program applied for and any graduate work may also be considered. Individual graduate programs may require a higher admission grade point average.

In most cases, a master’s degree or equivalent is required for admission to a doctoral program. See program listings in the Graduate Calendar (ucalgary.ca/pubs/calendar/grad/current/) for exceptions and details.

(b) Proficiency in the English language is essential for the pursuit and successful completion of graduate programs at the University of Calgary. It is the student’s responsibility to demonstrate proficiency in English. For ways to meet the English language proficiency requirement, see Admissions in the Graduate Calendar.

1. Combined Degree with the Faculty of Arts
2. Combined Degree with the Faculty of Kinesiology
3. Combined Degree with the Faculty of Science
4. Combined Degree with the Schulich School of Engineering

Undergraduate

BComm and BComm (Honours)

The Haskayne School of Business offers programs leading to the Bachelor of Commerce (BComm or BComm (Honours)) degree.

The BComm (Honours) program provides motivated students with an opportunity for additional research-intensive coursework under the close guidance of Haskayne faculty members. A high standard of academic resiliency and performance combined with a demonstrated interest and commitment to research are required for admission and continuation in the program. The program is especially suited to those considering graduate studies in business upon completion of the degree.

Combined Programs

Additionally, the Haskayne School of Business offers combined degree programs (details in 4.2 Combined Degrees).

The Combined Bachelor of Commerce/Bachelor of Arts or Bachelor of Science (depending on the major), with the Faculty of Arts is available in: Ancient and

A Combined Bachelor of Commerce/Bachelor of Science (Actuarial Science or Computer Science major) is available with the Faculty of Science.

A Combined Bachelor of Commerce/Bachelor of Science (Actuarial Science or Computer Science major) is available with the Faculty of Science.

The Combined Bachelor of Science (Engineering)/Bachelor of Commerce with the Schulich School of Engineering is available in: Chemical Engineering, Civil Engineering, Electrical Engineering, Geomatics Engineering, Mechanical Engineering and Software Engineering.

Co-operative Education

Co-operative Education is an academic program designed to achieve the educational and career goals of many BComm students. Participants take their classroom learning to the job and bring their working knowledge back to the classroom. The experience gives students first-hand knowledge of what business is all about prior to graduation.

Minor

The Haskayne School of Business offers a minor program in Management and Society for students registered in other faculties.

Graduate

The Haskayne School of Business offers programs leading to Master of Business Administration (MBA) and PhD degrees. Details regarding the MBA and PhD degrees may be found in the Faculty of Graduate Studies Calendar.

Diplomas or Certificates

In conjunction with the Schulich School of Engineering, the business school also offers a diploma program in Project Management (details of this program are given in the Schulich School of Engineering section of this Calendar).

2. Business School Information

Contact Information

Location: Scurfield Hall 343

Undergraduate Student Information: 403.220.6593
Email address: undergraduate@haskayne.ucalgary.ca
Website: haskayne.ucalgary.ca/

Introduction

The challenge of competing effectively in a rapidly changing global economy can only be met through well-educated responsive business leadership.

Preparing those who will successfully meet this challenge is the Haskayne School of Business’s mission, accomplished through its mandate of teaching, research and community service. Recognizing that the practices of commerce, business and management are fundamental to, and impact upon every facet of contemporary society, delivery of comprehensive business education programs that are relevant and rigorous, yet responsive to change, forms the fundamental framework for the business school’s broad range of academic and executive programs.

Pattern

The business school offers the undergraduate programs in traditional fashion in which students complete eight academic study terms or through the Co-operative Education program in which students complement their academic studies by interspersing three or four four-month paid work terms with their study terms. (Details regarding the Co-operative Education program appear in the Co-operative Education section of this Calendar.)

After admission to the Bachelor of Commerce program, a student will complete an integrative core curriculum of business education in the areas of strategy and global management, entrepreneurial thinking, accounting, finance, organizational behaviour and human resources, operations management, business technology management, and marketing. An advisory system will provide assistance in selecting an area of concentration. The curriculum allows pursuit of a degree program fulfilling the business school objective of a strong general educational background together with a broad, integrative commerce education permitting a limited amount of functional specialization. An opportunity for applied research is avail-
able through the completion of the Honours program.

Objectives
The component parts of the programs have been formulated on the principle that graduates will spend a major portion of their work life in a constantly changing environment. Therefore, the task of the business school is to provide the student with the opportunity to obtain a broad knowledge of the concepts underlying the operation and management of organizations. Upon graduation, a student should be equipped to function, not only in an initial position, but also for the whole of their subsequent career.

Opportunities
The Bachelor of Commerce program and Master of Business Administration program are accredited by The Association to Advance Collegiate Schools of Business.

Bachelor of Commerce
The generalist orientation of this degree enables graduates to succeed in a range of diverse industries and positions. Organizations seek candidates who have developed relevant educational, extracurricular (clubs, volunteer positions), summer/part-time work experiences and take responsibility for the direction of their working lives.

The key to obtaining meaningful employment after graduation is the development of a marketable portfolio of skills and experiences. The Haskayne School of Business assists business students in:

- Researching career interests
- Skill identification
- Resume/cover letter targeting
- Interview preparation
- Identifying work opportunities

For students looking for a research focus or to continue into graduate studies in business, the Bachelor of Commerce program offers a research-intensive option.

MBA
The mission of the Haskayne MBA is to challenge students to develop their abilities as managers. The program develops skills in leadership, business development, communication, and strategic analysis through the core functions of business, and through focused specializations.

PhD
In addition to the role of an academic professor, students earning the PhD degree can succeed in research and advisory roles in government as well as a broad spectrum of industries and organizations.

Haskayne Student Organizations
Student-run organizations help to build community with fellow classmates, professors, alumni and businesses. Participating students apply theory to practice and develop interpersonal, leadership, task management, and creative thinking and problem-solving skills. A network of business contacts starts here.

The Commerce Undergraduate Society supports and co-ordinates student club affairs, and organizes major social, sporting, networking and academic-related events in collaboration with campus and corporate communities (http://www.cuscalgary.ca/).

The Haskayne Students’ Association provides student governance and voice, works to resolve student issues and transparency, and develops initiatives to improve the student experience, engagement, and recognition of the school (https://www.hsaucalgary.com/).

Resources
Computers in the Business School
All areas in business make extensive use of computers. Therefore, the business school recommends that students entering the business school purchase an appropriate computer for use in their academic program. Information on the recommended hardware and software configuration is available from the business school website haskayne.ucalgary.ca/services/its/students.

3. Business School Regulations

3.1 Admissions

Admission Requirements
The Haskayne School of Business has a quota on the number of students accepted into the Bachelor of Commerce program. Within this quota, there are further quotas on the number of students accepted into the Petroleum Land Management and Energy Management Concentrations. Admission into the Energy Management Concentration will be competitive based on academic performance. Admission into the Petroleum Land Management Concentration will be competitive based on academic performance, an interview and other required documents. Only those students entering third year of the Bachelor of Commerce program will be considered for admission into the Petroleum Land Management Concentration.

To be eligible for the first year admission consideration, applicants must be coming directly from high school and/or presenting no more than six units (1.0 full-course equivalent) transferable courses from a post-secondary institution (including the University of Calgary). Applicants presenting more than six units (1.0 full-course equivalent) transferable courses from a post-secondary institution (including the University of Calgary), will be considered for admission following the successful completion of a prescribed set of pre-commerce requirements. Additional information is provided in 4.1.1 BComm Requirements for Direct Entry Students and in 4.1.2 BComm Pre-Commerce Requirements for Transfer Students. Students seeking admission into a combined degree program are further directed to 4.2 Combined Degrees. Students seeking re-admission into the Haskayne School of Business following a voluntary withdrawal will be considered in competition with new transfer applicants and required to meet the transfer admission criteria prior to re-admission. Such students are encouraged to consult with the Haskayne Undergraduate Programs Office for advice and course planning.

Students seeking re-admission into the Haskayne School of Business after a requirement to withdraw are referred to “Student Probation and Dismissal” in 3.4 Student Standing.

Students who have obtained a Bachelor of Commerce, Bachelor of Administration, or equivalent degree may not enroll in a “second” Bachelor of Commerce degree.

Students who hold an approved non-business degree (BA, BSc, BEd, etc.), that is recognized by the University of Calgary are encouraged to speak to a graduate advisor regarding the admission requirements for the Master of Business Administration (MBA) program. Those who wish to pursue the Bachelor of Commerce as a second or subsequent undergraduate degree are advised that they will be required to follow the admission procedures and meet the requirements in place for transfer applicants to the program. For additional regulations regarding admission to a second undergraduate degree, refer to A.5.5 Second-Degree Students in the Admissions section of this Calendar.

Students not registering for the admission term must reapply for admission into the program.

Students are advised to register for courses as soon as they are eligible to ensure the best selection. Those admitted after registration begins are required to register within three weeks of the issuance of their notification of admission. The Haskayne School of Business reserves the right to rescind the offer of admission if course registration has not taken place within a three week period. The admission procedures are the responsibility of the Haskayne Undergraduate Programs Office.

International Foundations Program (IFP) Pathways Stream
Offered by the Werklund School of Education in conjunction with the Haskayne School of Business, IFP Pathways to Business is intended for direct entry students who meet the academic requirements for the Bachelor of Commerce degree program, but who do not meet the English Language Proficiency requirement for admission. Applicants to the IFP Pathways to Business stream are subject to the general requirements for direct entry admission to the business school listed under Admission Requirements above. In addition, applicants must meet the minimum English Language Proficiency (ELP) scores for the IFP Pathways stream, as shown in A.11.1 International Foundations Program.

Students admitted to the IFP Pathways to Business stream complete the IFP Pathways to Business stream curriculum over the first two years, concurrently with the first-year curriculum of the Bachelor of Commerce degree program. A minimum of three additional
years are required to complete the remaining Bachelor of Commerce degree requirements. Additional information is available at 4.1.1.1 International Foundations Program (IFP) Pathways to Business.

**Deadlines**

Students must observe all deadlines. All document submission must be submitted to the Admissions Office, MacKinnie Block 117, 2500 University Drive NW, Calgary, AB, T2N 1N4.

The Haskayne School of Business does not admit students to the Summer (Spring/Summer Intersession) or Winter Terms.

**Open Studies and Visiting Students**

Applicants are referred to the Admissions section of this Calendar, A.14 Admission to Open Studies, where more information is given on entering the University under these categories.

Applicants who wish to complete Haskayne School of Business courses as Open Studies or Visiting students (bona fide students of another institution), are required to submit the appropriate application by the deadline indicated in the Admissions section of this Calendar. All transcripts supporting the application form must be attached.

Enrolment in the majority of Haskayne School of Business courses is limited to students formally admitted into the school’s degree programs, or accepted as Visiting Exchange students on a Haskayne-approved partner exchange agreement. Open Studies Degree-Holders and other Visiting business students on Letters of Permission, may also be considered for limited-enrolment courses.

Students who do not meet the requirements mentioned above will only be permitted to register in Management and Society (MGSO) Minor courses.

In all cases, registration under these admissions categories will be subject to space availability and the applicant meeting University of Calgary rules and regulations, including course requisites.

Students not formally admitted into the Haskayne School of Business degree programs will be limited in enrolment to a maximum of 30 units (5.0 full-course equivalents) in the business school at the University of Calgary. Students are advised to contact the Haskayne Undergraduate Programs Office for further details.

### 3.2 Registration

#### Accuracy of Registration

Students are responsible for the completeness and accuracy of their registration and for arranging their program to meet all requirements as detailed in this Calendar. Students should, however, seek advice from the business school concerning their choice of courses. In cases of doubt about the interpretation of regulations, a student should consult the Haskayne Undergraduate Programs Office and in any case is strongly advised to do this prior to registration in the final courses towards a degree to ensure that all graduation requirements will be met.

#### 3.3 Course Work

##### Course Load

A student wishing to complete more than the normal load of 15 units (2.5 full-course equivalents) per Fall or Winter term must receive special permission from the Haskayne Undergraduate Programs Office. Permission will not be granted for the business school admission term.

#### Enrolment in Commerce Courses

1. Registration in commerce courses will be limited to students registered in the Haskayne School of Business with the exception of courses described in the Minor in Management and Society program.
2. Yearly enrolment restrictions may be placed by the Business School on high demand courses.
3. In selecting courses, students must take cognizance of prerequisites for each course. Only with the written permission of the Associate Dean (Undergraduate Programs), Haskayne School of Business, upon the recommendation of the area chair and instructor of the course, will stated prerequisites be waived. Permission is only granted under exceptional circumstances. However, should a student fail to achieve satisfactory standing in any course for which the stated prerequisite(s) is (are) lacking, they may be required to successfully complete the stated prerequisite(s) prior to being permitted to repeat the course.
4. Students are not permitted to register in courses when less than a “C-” grade or equivalent was received in a prerequisite course.

#### Enrolment in Non-Commerce Courses

For the purpose of satisfying breadth requirements in the Bachelor of Commerce program, the business school has classified specific non-Haskayne subjects into clusters. The clusters include both subjects offered at the University of Calgary and subjects that may have been awarded for coursework completed at other institutions prior to a student’s admission or while on a Letter of Permission following admission. Notwithstanding a listing on the table below, there is no obligation on the part of the Faculty offering the subject to allow registration. In selecting non-Haskayne options, students are cautioned that not all courses falling under a listed subject may be acceptable towards their program or available for registration. Program regulations, course enrolment restrictions and requisites may all impact a student’s ability to register and/or use a particular course towards fulfillment of a business program requirement. To ensure appropriate course selection, students are strongly encouraged to discuss their course choices with advisors in the Haskayne Undergraduate Programs Office, and review academic requirements in their Student Centre.

See Non-Haskayne Option Clusters for the Bachelor of Commerce chart below.

#### Credit in Courses by Special Assessment

Students are referred to the Academic Regulations section of this Calendar for University regulations on obtaining course credits by special assessment (see B.10.1). Application must be made on the form headed “Credit by Special Assessment” and signed by the Haskayne Undergraduate Programs Office. Students will be considered in light of their background and the program regulations.

A course previously failed or one in which a higher grade is sought may not be taken subsequently by special assessment, nor may any course be attempted more than once in this way. No more than 12 units (2.0 full-course equivalents) completed by special assessment may be counted towards a degree.

#### Withdrawals

A student is entitled to withdraw from any course up to and including the last day for withdrawals as indicated in the current Academic Schedule.

---

### Non-Haskayne Option Clusters for the Bachelor of Commerce

</tr>
</tbody>
</table>

Additional cluster-appropriate subjects not listed above may be permitted with approval from the office of the Associate Dean (Undergraduate Programs), Haskayne School of Business.
Students will not be permitted to withdraw more than once from a particular course. Students will be required to withdraw if they have accumulated a total of more than 30 units (5.0 full-course equivalents) withdrawals while in attendance at the University of Calgary.

Repetition of Courses
A student may repeat a course previously attempted (excluding withdrawals) only once. This regulation applies not only to individual courses, but also to sets of courses where it is stated that credit for more than one of the sets is not allowed. To repeat a course more than once will require the permission of the Haskayne Undergraduate Programs Office and the department offering the course. Permission is only granted under exceptional circumstances.

Students who unsuccessfully repeat a course that is required for graduation will be dismissed from the business school.

3.4 Student Standing

Grades
The official grading system of the University of Calgary is given in the Academic Regulations section of this Calendar.

Dean's List
The Dean’s List recognizes outstanding academic performance while registered in the Haskayne School of Business. It is compiled twice yearly at the end of each of the Fall and Winter Terms. To qualify for inclusion, a Bachelor of Commerce student must achieve a grade point average of 3.70 or better on 15 units (2.5 full-course equivalents) or more taken in either the Fall or Winter Term at the University of Calgary. Eligibility for those students registered in full-year courses spanning two terms will be determined at the end of the Winter Term. Students on academic sanctions as outlined in section K (Statement on Principles of Conduct) of this Calendar are not eligible for the Dean’s List.

Degree "With Distinction" or "First Class Honours" upon Graduation

The notation “With Distinction” will be entered in the permanent record and on the graduation parchment of a student who successfully completes the Bachelor of Commerce (non-Honours) program with a grade point average of at least 3.60 over the last 90 units (15.0 full-course equivalents) of the 120 units (20.0 full-course equivalents) applicable to the degree. In cases in which the “last 90” must include some but not all of a group of courses taken concurrently, the selection will be made in the manner most advantageous to the student. A student who has taken part of their course work at another institution may be granted a degree “With Distinction” at the discretion of the business school.

The notation “First Class Honours” will be entered in place of “With Distinction” for a student who successfully completes the Bachelor of Commerce (Honours) program to the same standard.

Student Probation and Dismissal
Academic performance is assessed following the term in which 18 units (3.0 full-course equivalents) or more are completed and the student is registered at the University of Calgary since the previous Haskayne appraisal. All courses taken since the previous Haskayne appraisal will be included in the next subsequent review.

If fewer than 18 units (3.0 full-course equivalents) have been completed since the previous Haskayne appraisal, the existing status is retained by the student until the next subsequent review.

For unconditional progression through the Bachelor of Commerce program students must earn a grade point average of no less than 2.00.

Students who earn a grade point average of less than 1.70 on 18 units (3.0 full-course equivalents) or more taken since their previous Haskayne appraisal, will be required to withdraw from the business school.

Students who earn a grade point average of at least 1.70 but less than 2.00 on 18 units (3.0 full-course equivalents) or more taken since their previous Haskayne appraisal, will be placed on probation for the next term in which they register.

Students who earn a grade point average of less than 2.00 on 18 units (3.0 full-course equivalents) or more taken since their previous Haskayne appraisal and while on probation, will be required to withdraw from the business school. Students will be removed from probation by achieving a 2.00 or better grade point average on 18 units (3.0 full-course equivalents) or more taken since they were placed on probation.

Students required to withdraw from the Haskayne School of Business for unsatisfactory academic performance must wait a minimum of 12 months from the date of withdrawal to reapply, at which time they will be considered for admission at the next admission cycle together with new transfer applicants. Re-applicants will be required to meet the transfer admission standards prior to being readmitted. Students who are readmitted after having been required to withdraw from the Haskayne School of Business will be placed on probation for the next term in which they register.

Notes:
1. Notwithstanding the above regulations, students who unsuccessfully repeat a course that is required for graduation, as outlined earlier in 3.3 Course Work, “Repetition of Courses,” will be required to withdraw from the business school following the term in which the unsuccessful repetition occurred.

2. Students are referred to section F. Academic Standing in the Academic Regulations section of this Calendar for additional University regulations including the maximum number of probationary periods permitted while registered as undergraduates.

Academic Turnaround Program (ATP)

The Academic Turnaround Program (ATP) provides eligible Haskayne students currently enrolled but facing a first requirement to withdraw for academic reasons with the opportunity to continue in the Bachelor of Commerce degree program. Students will receive a written invitation to participate from the Haskayne Undergraduate Programs Office. Haskayne students accepted into the Academic Turnaround Program may continue their studies on probation provided that they fulfill all requirements and are compliant with the conditions of the program. All Academic Turnaround Program requirements will be provided to students in writing by the Haskayne Undergraduate Programs Office. Students who do not fulfill all requirements or who fail to meet the GPA criteria outlined below will be required to withdraw from the business school and the university.

The academic records of Haskayne students admitted into the Academic Turnaround Program will be reviewed at the end of the first year following the placement on probation, regardless of the number of University of Calgary courses completed. In order to continue in the program and the business school, students must achieve a cumulative GPA of 2.00 on all University of Calgary courses taken since being placed on probation with no unsuccessful repetition of coursework. Students who have successfully completed 18 units (6.0 half-course equivalents) or more with a cumulative GPA of 2.00 or higher since being placed on probation will have the probation cleared and will be considered to be in good academic standing. Those with a GPA below 2.00 and/or with unsuccessful repetition of coursework will be required to withdraw from the business school and the university. A minimum of 18 units (6.0 half-course equivalents) must be completed within two years of being placed on probation. Students may not exceed the maximum number of withdrawals permitted while registered at the University of Calgary.

Students who are non-compliant with any of the Academic Turnaround Program conditions will be required to withdraw. Students may only participate once in the Academic Turnaround Program. The transcript of record will indicate the academic standing notation.

International Foundations Program (IFP) Pathways Stream

IFP Pathways to Business students are subject to a joint academic review process by the Haskayne School of Business and the Werklund School of Education. The business school regulations with regards to student standing in credit courses and continuation in the program apply equally to IFP Pathways to Business students. In addition, IFP Pathways participants will have their records reviewed for progression in accordance with Werklund School of Education regulations. Failure to successfully complete the requirements of the program will result in the
student being required to withdraw from the business school.

4.1.1 BComm Requirements for Direct Entry Students

Admission

Applicants planning to enter the BComm program from high school must present English Language Arts 30-1, Mathematics 30-1 or equivalent, and three additional academic subjects at the 30-level approved by the Haskayne School of Business. To be eligible for first year admission consideration, applicants must be obtaining directly from high school and/or presenting no more than 6 units (1.0 full-course equivalent) of transferable post-secondary courses (including University of Calgary courses). Additional and/or alternate admission requirements may exist for entrance into a Combined Degree program as outlined in 4.2 Combined Degrees.

Prospective applicants are advised to contact the Haskayne Undergraduate Programs Office for details and assistance in program planning.

Recommended Program Sequence – Year 1

(Transfer applicants refer to 4.1.2 BComm Pre-Commerce Requirements for Transfer Students for admission requirements. Only those students already admitted into the BComm program may follow the sequence below.)

Students directly admitted from high school are advised to complete up to 30 units (5.0 full-course equivalents) over the Fall and Winter Terms of their first year as outlined below. Ahead of registration, students are cautioned to consult course descriptions. The pre- or co-requisites listed within each course description (if any), will drive the selection and term sequencing, not the order in which the requirements appear in the following lists.

It is recommended that the following graduation requirements be taken in first year:

1. Economics 201
2. Economics 203
3. Junior English
4. Management Studies 217
5. Mathematics 249 or 265
6. Statistics 213
7. Strategy and Global Management 217

In addition to the 21 units (3.5 full-course equivalents) listed above, up to 9 units (1.5 full-course equivalents) may be selected from the list below in order to complete Year 1 registration:

1. Accounting 217
2. Statistics 217
3. Junior Humanities or Fine Arts Option1,2
4. Junior Science Option1,3,4,5
5. Junior Social Sciences Option1
6. Junior Non-Commerce Option1,4,5

Note: First-year students are restricted to junior (200-level) courses in their first year. Prior to registering in senior (300-level) courses, 18 units (3.0 full-course equivalents) at the junior level must be successfully completed.

1. Students are advised to refer to 3.3 Course Work “Enrolment in Non-Commerce Courses” for option selection. Only one Economics course can be used towards the Non-Commerce Options or Social Sciences Options in the Bachelor of Commerce degree. Junior or Senior Non-Commerce Options cannot be Statistics.
2. Students who wish to pursue a Concentration in International Business Strategy are advised that demonstrated proficiency equivalent to two courses in ONE modern language other than English is a requirement of this Concentration. A modern language minor is recommended. Refer to 4.1.4 Concentrations for further details.
4. Students who wish to pursue a Concentration in Petroleum Land Management are advised that a 200-level course in Geology is recommended for registration in the introductory Petroleum Land Management courses.
5. Data Science 201 and University 201 are recommended courses to fulfill the Junior Science Option and Junior Non-Commerce Option respectively for students interested in applying to the research-based Honours program in a subsequent year. Refer to 4.1.3 BComm Honours Program for further details.

BComm program may follow the sequence below. This program is made up of instructional and enrichment English language courses and the 200-level requirements of the Bachelor of Commerce degree program.

Upon successful completion of the IFP Pathways to Business two-year curriculum, students proceed to complete the senior-level requirements of the Bachelor of Commerce degree program as listed in 4.1.4 BComm Graduation Requirements. The entire program can be completed in five years.

1. Junior Option courses may be taken in any order over the two-year program. Students are advised to refer to 3.3 Course Work “Enrolment in Non-Commerce Courses” for option selection. Only one Economics course can be used towards the Non-Commerce Options or Social Sciences Options in the Bachelor of Commerce degree. Junior or Senior Non-Commerce Options cannot be Statistics.
2. Students who wish to pursue a Concentration in International Business Strategy are advised that demonstrated proficiency equivalent to two courses in ONE modern language other than English is a requirement of this Concentration. A modern language minor is recommended. Refer to 4.1.4 Concentrations for further details.
4. Students who wish to pursue a Concentration in Petroleum Land Management are advised that a 200-level course in Geology is recommended prior to registration in the introductory Petroleum Land Management courses.
5. Data Science 201 and University 201 are recommended courses to fulfill the Junior Science Option and Junior Non-Commerce Option respectively for students interested in applying to the research-based Honours program in a subsequent year. Refer to 4.1.3 BComm Honours Program for further details.
Haskayne School of Business

1. Students who wish to pursue a Concentration in Petroleum Land Management (IFPX) 332, International Foundations Program (IFPX) and International Foundations Program Business (IFPB) courses are not for credit toward the Bachelor of Commerce degree requirements.

4.1.2 BComm Pre-Commerce Requirements for Transfer Students

Admission

1. A prospective student presenting more than 6 units (1.0 full-course equivalent) transferable courses from a post-secondary institution (including the University of Calgary), and applying to transfer into the BComm program, must first successfully complete a minimum of 18 prescribed units (3.0 full-course equivalents) by the end of the Winter Term (January – April) of the year of application.

2. A maximum of 12 units (2.0 full-course equivalents) with “D” or “D+” grades may be used to fulfill commerce requirements. The “D” or “D+” grades cannot be in prerequisite courses or in the junior English course. The minimum grade required in a prerequisite course is “C-”, unless the course serves as the prerequisite to the concentration sought. In this case it must be a “C”. The minimum grade required in the junior English course is a “C-”.

3. Admission to the Haskayne School of Business will be based on the calculation of the grade point average over the most recent course work to a maximum of 30 units (5.0 full-course equivalents) (University of Calgary courses and/or transfer courses taken at other institutions). All grades within a term will be included except where the number of courses taken within a term exceeds that required to fulfill (to a maximum of) 30 units (5.0 full-course equivalents), in which case the highest grades will be used.

Spring Intersession courses taken after May 1 in the year of admission will not be used in the calculation of the grade point average.

4. Admission is competitive and meeting the minimum admission requirements is not a guarantee for admission. Applicants must have a minimum grade point average of 2.50 (calculated as outlined in point 3. above), to be considered.

5. Transfer applicants must present official transcripts to the Office of the Registrar indicating time spent and grades received in all courses being presented to satisfy pre-commerce requirements or for advanced standing in the Bachelor of Commerce program.

6. Those applicants attending Spring Intersession or to complete courses other than the 18 prescribed units (3.0 full-course equivalents) mentioned above, if admitted, will be admitted provisionally subject to successful academic standing and continued compliance with program regulations.

4.1.3 BComm Honours Program Application

Continuing Haskayne School of Business Bachelor of Commerce students (any concentration), may apply for the Honours program. Applications are considered for the Fall term only.

Prospective applicants must meet the admission requirements listed below and must submit a Change of Program request through their Student Centre. Deadline date information is found in this Calendar in Academic Regulations’ section D. Change of Faculty or Program. A supplementary application package will be sent to Change of Program applicants by the Haskayne School of Business.

Admission Requirements

Applicants to the BComm (Honours) program must have successfully completed a minimum of 48 units (8.0 full-course equivalents) by the Fall term to which they are seeking admission, including the following six prescribed courses completed no later than in the preceding Winter term:

1. Entrepreneurship and Innovation 317
2. Management Studies 391
3. Strategy and Global Management 217
4. Economics 201
5. Mathematics 249 or 265 or equivalent
6. Statistics 213
7. Statistics 217

In addition, the 12 units (2.0 full-course equivalents) below fulfill BComm graduation requirements and it is strongly recommended that these be taken to complete a competitive student application for registration:

1. Junior Humanities or Fine Arts Option
2. Junior Social Sciences Option
3. Junior Non-Commerce Option

Note: These courses need not necessarily be taken in the sequence indicated. Students should consult course descriptions in the latter section of this Calendar for prerequisites.

1. Students are advised to refer to 3.3 Course Work "Enrolment in Non-Commerce Courses " for option selection. Only one Economics course can be used towards the Non-Commerce Options or Social Sciences Options in the Bachelor of Commerce degree. Junior or Senior Non-Commerce Options cannot be Statistics.

2. Students who wish to pursue a Concentration in International Business Strategy are advised that demonstrated proficiency equivalent to two courses in ONE modern language other than English is a requirement of this Concentration. A modern language minor is recommended. Refer to 4.1.4 Concentrations for further details.

3. Students who wish to pursue a Concentration in Petroleum Land Management (IFPX) and Junior Non-Commerce Option respectively for students interested in applying to the research-based Honours program in a subsequent year. Refer to 4.1.3 BComm Honours Program for further details.

Haskayne School of Business

Of Calgary courses and/or transfer courses Business will be based on the calculation of the grade point average. Admission to the Haskayne School of Business is a “C-”. grade required in the junior English course, unless the course serves as a commerce requirement. The International Foundations Program Business (IFPB) is recommended to the academic policies of the Haskayne School of Business. In addition, students are subject to a joint academic review process by the Werklund School of Education and the business school. Regulations governing continuation in the program are found in 3.4 Student Standing.

It is recommended that students enrol in a minimum of 12 units or 2.0 full-course equivalents per term.

With the exception of International Foundations Program (IFPX) 332, International Foundations Program Business (IFPB) courses are not for credit toward the Bachelor of Commerce degree requirements. IFP Pathways to Business students adhere to the academic policies of the Haskayne School of Business. In addition, students are subject to a joint academic review process by the Werklund School of Education and the business school. Regulations governing continuation in the program are found in 3.4 Student Standing.

4.1.2 BComm Pre-Commerce Requirements for Transfer Students

Admission

1. A prospective student presenting more than 6 units (1.0 full-course equivalent) transferable courses from a post-secondary institution (including the University of Calgary), and applying to transfer into the BComm program, must first successfully complete a minimum of 18 prescribed units (3.0 full-course equivalents) by the end of the Winter Term (January – April) of the year of application.

2. A maximum of 12 units (2.0 full-course equivalents) with “D” or “D+” grades may be used to fulfill commerce requirements. The “D” or “D+” grades cannot be in prerequisite courses or in the junior English course. The minimum grade required in a prerequisite course is “C-”, unless the course serves as the prerequisite to the concentration sought. In this case it must be a “C”. The minimum grade required in the junior English course is a “C-”.

3. Admission to the Haskayne School of Business will be based on the calculation of the grade point average over the most recent course work to a maximum of 30 units (5.0 full-course equivalents) (University of Calgary courses and/or transfer courses taken at other institutions). All grades within a term will be included except where the number of courses taken within a term exceeds that required to fulfill (to a maximum of) 30 units (5.0 full-course equivalents), in which case the highest grades will be used. Spring Intersession courses taken after May 1 in the year of admission will not be used in the calculation of the grade point average.

4. Admission is competitive and meeting the minimum admission requirements is not a guarantee for admission. Applicants must have a minimum grade point average of 2.50 (calculated as outlined in point 3. above), to be considered.

5. Transfer applicants must present official transcripts to the Office of the Registrar indicating time spent and grades received in all courses being presented to satisfy pre-commerce requirements or for advanced standing in the Bachelor of Commerce program.

6. Those applicants attending Spring Intersession or to complete courses other than the 18 prescribed units (3.0 full-course equivalents) mentioned above, if admitted, will be admitted provisionally subject to successful academic standing and continued compliance with program regulations.

7. Courses or their equivalents presented to fulfill pre-commerce requirements must not have been repeated more than once.

8. Additional and/or alternate admission requirements may exist for entrance into a Combined Degree program as outlined in 4.2 Combined Degrees. Prospective applicants are advised to contact the Haskayne Undergraduate Programs Office for details.

Requirements

For combined degree requirements, please refer to 4.2 Combined Degrees in this section of the Calendar.

The following 18 prescribed units (3.0 full-course equivalents) must be successfully completed by the end of the Winter Term (January – April) of the year of application:

1. Economics 201
2. Mathematics 249 or 265 or equivalent
3. Statistics 213
4. Junior English
5. Economics 203
6. Statistics 217

In addition, the 12 units (2.0 full-course equivalents) below fulfill BComm graduation requirements and it is strongly recommended that these be taken to complete a competitive student application for registration:

1. Junior Humanities or Fine Arts Option
2. Junior Science Option
3. Junior Social Sciences Option
4. Junior Non-Commerce Option

Note: These courses need not necessarily be taken in the sequence indicated. Students should consult course descriptions in the latter section of this Calendar for prerequisites.

1. Students are advised to refer to 3.3 Course Work "Enrolment in Non-Commerce Courses " for option selection. Only one Economics course can be used towards the Non-Commerce Options or Social Sciences Options in the Bachelor of Commerce degree. Junior or Senior Non-Commerce Options cannot be Statistics.

2. Students who wish to pursue a Concentration in International Business Strategy are advised that demonstrated proficiency equivalent to two courses in ONE modern language other than English is a requirement of this Concentration. A modern language minor is recommended. Refer to 4.1.4 Concentrations for further details.

3. Students who wish to pursue a Concentration in Petroleum Land Management (IFPX) and Junior Non-Commerce Option respectively for students interested in applying to the research-based Honours program in a subsequent year. Refer to 4.1.3 BComm Honours Program for further details.
In addition to meeting the minimum grade point averages, applications are evaluated on the basis of an interview and the documents submitted in the admission application package. Admission is competitive and meeting the minimum requirements is not a guarantee for admission. The business school reserves the right to limit the number of students admitted into the BComm (Honours) program. Students on academic sanction are not eligible for the BComm (Honours) program.

Progression Requirements

BComm (Honours) students are subject to the same progression requirements already in place for all BComm students. In addition, academic performance is assessed each year at the end of the Winter term to determine eligibility to continue in Honours. A minimum grade point average of 3.30 over all courses completed since the last Honours assessment is required for continuation in the program.

Students may opt out of the BComm (Honours) program at any time and complete the regular BComm program.

4.1.4 BComm Graduation Requirements

All candidates for the Bachelor of Commerce degree must fulfill the following requirements:

1. An approved program with a minimum of 120 units (20.0 full-course equivalents). A minimum grade point average of 2.00 (or 3.30 for BComm (Honours) candidates), must be achieved over all 120 units.

2. A minimum "C" grade in the Junior English, Entrepreneurship and Innovation 317, Management Studies 451, 453, Strategy and Global Management 591 and in each course permitted to fulfill the concentration requirements. A maximum of 12 units (2.0 full-course equivalents) with "D" or "D+" grades in non-concentration and non-prerequisite courses.

3. A maximum of 60 units (10.0 full-course equivalents) taken at other institutions and acceptable for transfer credit may be counted toward the Bachelor of Commerce Degree. A maximum of 18 units (3.0 full-course equivalents) taken at other institutions and acceptable for transfer credit as Haskayne School of Business courses may be counted toward the Bachelor of Commerce Degree.

4. Students are permitted a maximum of 9 units (1.5 full-course equivalents) in Economics, including Economics 201 and 203, unless the course satisfies a specified concentration requirement.

5. The following courses or their equivalents presented for graduation must be completed within 10 years or less of the graduation date: the 3 units (0.5 full-course equivalent) Junior English, Mathematics 249 or 265, Economics 201 and 203, Statistics 215 and 217, and all Commerce courses.

The following courses, or their equivalents, constitute the Bachelor of Commerce program:

**Commerce Courses (63 units or 10.5 full-course equivalents)**

1. Management Studies 217
2. Strategy and Global Management 217
3. Accounting 217
4. Accounting 323
5. Business and Environment 395
7. Entrepreneurship and Innovation 317
8. Finance 317
9. Marketing 317
10. Operations Management 317
11. Organizational Behaviour and Human Resources 317
12. Management Studies 391
13. Management Studies 451
14. Management Studies 453
15. Strategy and Global Management 591
16.-21. Concentration: (18 units or 3.0 full-course equivalents) from one Concentration (listed below)

**Non-Commerce Courses (48 units or 8.0 full-course equivalents)**

1. Economics 201
2. Economics 203
3. Junior English (3 units or 0.5 full-course equivalent)
4. Mathematics 249 or 265
5. Statistics 213
6. Statistics 217
7. Junior Humanities or Fine Arts Option** (3 units or 0.5 full-course equivalent)
8. Junior Science Option* (3 units or 0.5 full-course equivalent)
9. Junior Social Sciences Option (3 units or 0.5 full-course equivalent)
10. Junior Non-Commerce Option** (3 units or 0.5 full-course equivalent)
11.-12. Senior Humanities, Social Sciences, Science* or Fine Arts Option (6 units or 1.0 full-course equivalent)
13.-16. Senior Non-Commerce Options (12 units or 2.0 full-course equivalents)

**Program-Specific Courses (9 units or 1.5 full-course equivalents)**

**BComm (non-Honours):**

1.-3. Senior Commerce or Non-Commerce Options** (9 units or 1.5 full-course equivalents)

**BComm (Honours):**

1. Management Studies 301
2. Management Studies 501
3. Management Studies 503

**Concentration course may be required.

Notes:

- Junior = 200-level and Senior = 300-level and above
- Refer to 3.3 Course Work "Enrolment in Non-Commerce Courses" for option selection. Only 3 units (0.5 full-course equivalent) Economics course can be used towards the Non-Commerce Options or Social Sciences Options. Non-Commerce Options cannot be Statistics.
- Course sequencing information for students is available in the Haskayne Undergraduate Programs Office.
- At the time of graduation, students who have not achieved a GPA of 3.30 over all 120 units (20.0 full-course equivalents) will be awarded a BComm (i.e., without the Honours designation).

4.1.4.1 Concentrations

The concentration program must be approved by the business school. Certain courses in a concentration may be compulsory. Information on concentrations is available from the office of the Associate Dean (Undergraduate Programs).

Bachelor of Commerce Concentrations consist of 18 units and are available in the areas of:

- Accounting
- Business Analytics
- Business Process Management (Suspended)
- Business Technology Management
- Energy Management
- Entrepreneurship and Innovation
- Finance
- General
- International Business Strategy
- Marketing
- Operations Management
- Organizational Behaviour and Human Resources
- Personal Financial Planning
- Petroleum Land Management
- Real Estate Studies
- Risk Management and Insurance
- Risk Management: Insurance and Finance
- Supply Chain Management
- Tourism Management (Suspended)
- Tourism Management and Marketing (Suspended)

Bachelor of Commerce Concentration Requirements

In order to pursue any concentration in the Bachelor of Commerce program, students must achieve a minimum grade of "C" in the required core course(s) which is (are) prerequisite(s) for that concentration: Accounting 217, and 323; Business Technology Management 317; Energy Management 301 and 403; Entrepreneurship and Innovation 317; Finance 317; Marketing 317; Operations Management 317; Organizational Behaviour and Human Resources 317; Real Estate Studies 317; Risk Management and Insurance 317; Petroleum Land Management 475 and 477; Strategy and Global Management 371; Tourism Management 309.
Accounting (ACCT)
Accounting 341
Accounting 343
Accounting 361
Accounting 445 or 465
Accounting 400- or 500-level
Accounting 400- or 500-level
Note: Students should complete Accounting 323 before Year 3.

Business Analytics (BANA)
Business Technology Management 331
Business Technology Management 431
Operations Management 415
Operations Management 419
Two of:
Business Technology Management 333
Business Technology Management 455
Business Technology Management 459
Business Technology Management 465
Business Technology Management 467
Business Technology Management 531
Computer Science 319
Operations Management 401
Operations Management 405
Operations Management 407
Operations Management 409
Operations Management 411

*Prerequisites required make this a suitable option for students in the combined degree program with Computer Science.

Note: Maximum one of Business Technology Management 455 or Operations Management 411. It is recommended that Data Science 201 be taken as a Junior Science Option.

Business Process Management (BPMA) - Suspended Concentration
Business Technology Management 333
Operations Management 403
One of:
Business Technology Management 455
Operations Management 411
One or Two of:
Business Technology Management 463
Business Technology Management 465
Operations Management 405
Operations Management 407
Organizational Behaviour and Human Resources 403
Organizational Behaviour and Human Resources 493
One or Two of:
Business Technology Management 331
Business Technology Management 459
Business Technology Management 461
Business Technology Management 467
Operations Management 409
Operations Management 415

Note: Maximum of three Operations Management courses, maximum of one Organizational Behaviour and Human Resources course, and maximum of three Business Technology Management courses.

Business Technology Management (BTMA)
Business Technology Management 331
Business Technology Management 333
Business Technology Management 400- or 500-level
Business Technology Management 400- or 500-level
Business Technology Management 400- or 500-level
Business Technology Management 400- or 500-level
400- or 500-level Commerce Option (including Business Technology Management)

Energy Management (ENMG)
Students are advised that admission to the Concentration is competitive and meeting the minimum Bachelor of Commerce requirements does not guarantee admission.

Energy Management 301
Energy Management 403
Energy Management 485
Energy Management 489
Energy and Environment Engineering 355
Two of:
Business and Environment 517 (formerly Management Studies 597.17)
Business and Environment 533 (formerly Management Studies 599.24)
Energy Management 485
Energy Management 487
Finance 445
Finance 467
Operations Management 407
Organizational Behaviour and Human Resources 493

Entrepreneurship and Innovation (ENTI)
Entrepreneurship and Innovation 351 (formerly 559.04)
Finance 473
One of:
Entrepreneurship and Innovation 405
Entrepreneurship and Innovation 559.05
Three of (not used above):
Entrepreneurship and Innovation 401
Entrepreneurship and Innovation 559
Marketing 449
Marketing 465
Marketing 477
Organizational Behaviour and Human Resources 493
Risk Management and Insurance 439

Finance (FNCE)
Finance 443
Finance 451
Finance 400- or 500-level
Finance 400- or 500-level
Finance 400- or 500-level
Finance 400- or 500-level

General (GENL)
Combination of 18 units (3.0 full-course equivalents) Senior Commerce courses from two or more areas.

International Business Strategy (IBST)*
Strategy and Global Management 371
Strategy and Global Management 571
Strategy and Global Management 579
Strategy and Global Management 589
Finance 461
Marketing 467
Three of (not used above):
Finance 461
Management Studies 571
Marketing 467
Risk Management and Insurance 559.02 (overseas component)
Strategy and Global Management 403
Strategy and Global Management 405
Strategy and Global Management 407
Strategy and Global Management 409
Strategy and Global Management 571
Strategy and Global Management 573
Strategy and Global Management 579
Strategy and Global Management 589

*Demonstrated proficiency equivalent to two courses in ONE modern language other than English is a requirement of this concentration. For this purpose, language courses taken will fulfill the Junior or Senior Humanities and/or Non-Commerce Options for IBST concentrators in the degree program. Courses presented cannot be literature or culture studies based, and cannot be taught in English. Students with equivalent backgrounds are advised to consult the Haskayne Undergraduate Programs Office for approval.

Note: It is strongly recommended that the Strategy and Global Management courses be taken in the sequence of 371 followed by 577 followed by 579.

Marketing (MKTG)
Marketing 465
Marketing 493
Marketing 400-level
Marketing 400-level
Marketing 400- or 500-level
Marketing 400- or 500-level
Note: Maximum of two 500-level Marketing courses.

Operations Management (OPMA)
Operations Management 401
Operations Management 405
Three of:
Operations Management 403
Operations Management 407
Operations Management 409
Operations Management 411
Operations Management 415
One of:
Business Technology Management 459
Business Technology Management 465
Risk Management and Insurance 449
Risk Management and Insurance 459
Risk Management and Insurance 579
One of:
Accounting 421
Economics 341
Finance 443
Finance 445
Finance 451
Finance 461
Finance 463
Finance 475
Risk Management and Insurance 559

Risk Management: Insurance and Finance (RMIF)
Risk Management and Insurance 317
Finance 451
Four of:
(One must be Finance and two must be 400- or 500-level Risk Management and Insurance. Maximum one of Finance 479 or Risk Management and Insurance 579.)
Economics 341
Energy Management 487
Finance 443
Finance 445
Finance 447
Finance 449
Finance 461
Finance 463
Finance 467
Finance 475
Finance 479
Risk Management and Insurance 459
Risk Management and Insurance 559
Risk Management and Insurance 579 (formerly 559.01)

Supply Chain Management (SCMA)
Supply Chain Management 451
Supply Chain Management 453 (formerly Operations Management 417)
Supply Chain Management 455 (formerly Operations Management 559.05)
One of:
Economics 321
Economics 323
Economics 371
Geography 341
Two of:
Business Technology Management 465
Business Technology Management 467
Management Studies 571
Marketing 433
Marketing 467
Operations Management 401
Operations Management 403
Operations Management 411
Organizational Behaviour and Human Resources 493

Strategy and Global Management 371 (formerly 575)
Strategy and Global Management 571
Supply Chain Management 559
Note: Maximum one of Management Studies 571 or Strategy and Global Management 371.

Tourism Management (TOUR) - Suspended Concentration
Tourism Management 309
Tourism Management 419
Tourism Management 449
Three of:
Tourism Management 429
Tourism Management 439
Tourism Management 469
Tourism Management 479
Tourism Management 499
Note: Students are advised to complete Tourism Management 309 as soon as possible.

Tourism Management and Marketing (TRMK) - Suspended Concentration
Tourism Management 419
Tourism Management 449
Tourism Management 400-level*
Marketing 465
Marketing 400- or 500-level
Marketing 400- or 500-level
* Except Tourism Management 409 which is not for credit in the Bachelor of Commerce.

Note: Students are advised that Tourism Management 309 is a prerequisite to the Tourism courses and must be taken in lieu of an open Senior Commerce Option for this Concentration.

4.1.4.2 Minor Field
A student may formally declare a Minor Field within the Bachelor of Commerce degree program and have this officially recorded on the transcript of record, provided that at least 30 units (5.0 full-course equivalents) in the field as specified by the Faculty offering the Minor are completed. This declaration must be made no later than the time of the last registration. Minors in Economics, Statistics, Management and Society, Entrepreneurship and Enterprise Development, and Workplace Learning are not permitted. Consultation with the Haskayne Undergraduate Programs Office regarding choices for a Minor is required.

4.2 Combined Degrees
General Requirements
Students may elect to complete the Bachelor of Commerce degree in combination with another approved undergraduate degree.
Five-year combined degree programs are sponsored jointly by the Haskayne School of Business and a second Faculty, and lead to two Bachelors’ degrees awarded at the same convocation ceremony. The program is comprised of a minimum of 150 units
(25.0 full-course equivalents), including all requirements of the two Faculties. Early contact with the Undergraduate Programs Offices of the two Faculties ensures that admission and graduation requirements are met in a reasonable timeframe and within the minimum 150 units (25.0 full-course equivalents). Advisors are available to assist students with course planning and program details.

With the exception of the BSc (Engineering)/BComm degree which will be administered by the Schulich School of Engineering, combined degree students shall be registered under the Haskayne School of Business for administrative purposes.

Students may elect to remain in the combined degree or switch to either of the two separate degree programs, as long as the requirements of each Faculty continue to be met. Failure to meet requirements will result in a student being required to withdraw from the combined or separate programs, as the case may be. The academic regulations of each Faculty concerning student standing and progression apply equally for combined degree students.

Any Bachelor of Commerce Concentration may be chosen in combination with those Majors listed below. Students wishing to also focus their non-commerce options in one area of study are cautioned that Minors in Economics, Statistics, Management and Society, Entrepreneurship and Enterprise Development, and Workplace Learning are not permitted within the combined degree. Consultation with student advisors in the Haskayne Undergraduate Programs Office regarding choices for a Minor is required.

**Admission Requirements**

Students wishing to enter any combined degree program are strongly advised to apply for admission to the combined degree directly from high school where more spaces may exist for entrance into the program, and where admitted students will gain earlier access to program-restricted courses. For the combined BSc (Engineering)/BComm program, direct entry admission is based on the Schulich School of Engineering high school admission criteria only, while students applying to all other BComm combined degree programs must meet the admission criteria of each faculty.

Students who are not admissible to the Haskayne School of Business directly or those who wish to apply after the direct entry process has closed, may apply for combined degree admission in a subsequent year, through the Change of Program process.

For the combined BSc (Engineering)/BComm program:

- Space permitting, students may apply for admission to the program after their first year in Schulich at the same time that the choice of a specific engineering major is made (section 3.1 Admission (Admission to Engineering Program) outlines the Engineering major selection process).

In this case, priority will be given to applicants who have completed all courses listed in 4.1 First Year Curriculum for Engineering students and who meet the competitive grade point average as outlined. Supplemental criteria (in the form of a video presentation, letter of intent, essay, etc.) may also be required for admission consideration by the business school. Students are referred to the Schulich School of Engineering Calendar for additional admission, registration and program details.

- In order to avoid extra coursework, prospective combined degree students are advised to fulfill their Engineering Complementary Studies requirement with a 200-level English course (required for graduation in the BComm degree program).

For all other BComm combined degree programs:

- Space permitting, students may apply upon successful completion of a prescribed set of pre-commerce requirements. Admission is subject to the competitive grade point average being met. Assistance in program planning is available through the Haskayne Undergraduate Programs Office.

Unless otherwise noted, the admission criteria that apply to the singular Bachelors' degrees apply equally to the combined degree program. The admission grade point average may be higher, but never lower, than that required for the singular Bachelor of Commerce degree.

Students already admitted into the Bachelor of Commerce and interested in transferring to a combined degree program, are required to submit a Change of Program application and meet the application deadlines and admission requirements of the intended second Faculty.

4.2.1 Combined BComm/BA or BSc (Arts)

A Major in the Arts consisting of at least 42 or 48 units (7.0 or 8.0 full-course equivalents) (depending on the Major selected) is required. Majors are available in: Ancient and Medieval History, Anthropology, Archaeology, Communication and Media Studies, Development Studies, East Asian Studies, East Asian Language Studies, Economics, English, Film Studies, French, Geography, German, Greek and Roman Studies, History, International Indigenous Studies, International Relations, Italian Studies, Latin American Studies, Law and Society, Linguistics, Linguistics and Language, Music, Philosophy, Political Science, Psychology, Religious Studies, Religious Studies and Applied Ethics, Russian, Sociology, Spanish, Urban Studies and Women's Studies.

**Requirements**

Please consult both Faculties for specific requirements for this program.

Students in Major Programs requiring statistics-based courses should be cognizant of the exclusions listed under the Statistics subject heading in the Courses of Instruction section of the Calendar.

With some exceptions, courses taken to satisfy the Faculty of Arts Major Program in the combined degree may be used, respective of level, to satisfy some or all of the non-commerce breadth requirements in the Bachelor of Commerce program. Details and restrictions are available from advisors in the Haskayne Undergraduate Programs Office.

4.2.2 Combined BComm/BSc (Actuarial Science) Program

**Requirements**

Please consult both Faculties for specific requirements for this program.

In this combined degree Statistics 321 and 323 replace Statistics 213 and 217 required in the Bachelor of Commerce program. Consequently, Statistics 213 and 217 cannot be used to satisfy other requirements of the combined degree program. Of level, Mathematics and Actuarial Science courses taken may be used to satisfy the Junior Non-Commerce Option and (up to) 21 units or 3.5 full-course equivalents of Senior Non-Commerce Options in the Bachelor of Commerce program.

4.2.3 Combined BComm/BSc (Computer Science) Program

**Requirements**

Please consult both Faculties for specific requirements for this program.

In this combined degree, Computer Science courses taken may be used, respective of level, to satisfy the Junior Non-Commerce Option and (up to) 21 units or 3.5 full-course equivalents of Senior Non-Commerce Options in the Bachelor of Commerce program.

4.2.4 Combined BComm/BKin (Kinesiology) Program

No major other than the BKin (Kinesiology) will be considered by the Faculty of Kinesiology.

**Requirements**

Please consult both Faculties for specific requirements for this program.

In this combined degree, Kinesiology 259 and 260 replace the Junior Science Option and Junior Non-Commerce Option, and Kinesiology 323 replaces a 3 unit or 0.5 full-course equivalent Senior Science Option. Additional senior Kinesiology courses taken may be used to satisfy (up to) 21 units or 3.5 full-course equivalents of Senior Non-Commerce Options in the Bachelor of Commerce program.

4.2.5 Combined BSc (Engineering)/BComm Program

A five-year combined degree program consisting of a minimum of 183 units or 30.5 full-course equivalents is required. Depending on the major and/or program enhancements (e.g. specialization, minor, internship) selected, additional coursework and time-to-completion may be necessary. Majors are available in: Chemical Engineering, Civil Engineering, Electrical Engineering, Geomat-
ics Engineering, Mechanical Engineering and Software Engineering.

Given the arrangement of coursework required in this combined degree, students interested in pursuing work experience will apply for admission into the continuous 12-16 month Engineering Internship Program (EIP), rather than separate Co-operative Education placements through the business school.

Requirements

Students wishing to pursue this combination are referred to the Schulich School of Engineering section of this Calendar where additional admission and program requirements and course sequencing information may be found.

In this combined degree, Engineering 319 and Mathematics 211 replace Statistics 213 and 217; Mathematics 275 replaces Mathematics 249 or 265; any of Engineering 201, 202, 225, 233 or Chemistry 209 will satisfy the Junior Science Option or Junior Non-Commerce Option; Engineering 200 will meet the Junior Social Sciences Option. The Junior Humanities or Fine Arts Option is waived as long as the student remains registered in the combined degree. Various senior courses completed as part of the Engineering program satisfy the remaining senior Bachelor of Commerce breadth requirements: 6 units or 1.0 full-course equivalent of Senior Science Options, and (up to) 21 units or 3.5 full-course equivalents of Senior Non-Commerce Options.

4.3 Co-operative Education Program

Introduction

All Bachelor of Commerce students are eligible to apply for admission to the Co-operative Education program, with the exception of BSc (Engineering)/BComm combined degree students who are directed to apply to the Engineering Internship program instead. The Co-operative Education program normally includes 12 to 16 months of supervised paid work experience in various private companies and government agencies in addition to the eight required academic terms.

Students who wish to pursue the Co-operative Education option are urged to discuss their course selection with the Co-op Program Co-ordinator at the Haskayne Career Centre as early in their program as possible. Bachelor of Commerce students completing the requirements of the Co-operative Education option will graduate with "Co-operative Education" designated on their parchment.

Admission

1. Prospective Business Co-operative Education students must complete a Co-operative Education application form.
2. The Haskayne School of Business has a quota on the number of students accepted into the Co-operative Education program. Admission will be competitive, based on the student's skills, attitudes and academic record. Students may be required to attend an interview to assess their suitability for admission.
3. Students should refer to 3.1 "Admissions" and 4.1 "Bachelor of Commerce (BComm)" sections of this Calendar for specific admission regulations pertaining to the Haskayne School of Business.

Requirements

1. Applications to the Haskayne Co-operative Education program are accepted twice a year - from March 15th to May 1st, and October 15th to December 1st. Direct entry students normally apply in the Fall of their second year in the Bachelor of Commerce program. Transfer students normally apply by May 1st following completion of 60 units (10.0 full-course equivalents) applicable towards the Bachelor of Commerce program.
2. Applicants must have been admitted into the Haskayne School of Business before their Co-operative Education application will be reviewed.
3. To be considered for admission applicants must have a minimum GPA of 2.50. Admission GPA is calculated on the most recent 36-45 units (6.0-7.5 full-course equivalents).
4. Before a Co-operative Education student's first work term commences, at least 54 units (9.0 full-course equivalents) and normally not more than 90 units (15.0 full-course equivalents) appropriate to the degree program must have been successfully completed, including at least one business course relating to the chosen Concentration (e.g., Accounting 217, Finance 317), and Management Studies 217, Strategy and Global Management 217 and Entrepreneurship and Innovation 317.
5. Co-operative Education students should have completed no more than 90 units (15.0 full-course equivalents) applicable to their Bachelor of Commerce before their first work term commences (consult the Co-op Program Co-ordinator at the Haskayne Career Centre).
6. Co-operative Education courses are in addition to the normal requirements for each degree, i.e., students must complete the required courses and the required number of non Co-operative Education courses as students completing the traditional degree programs.
7. Students must be registered full time during their academic terms. Students taking a vacation or a leave should inform the Co-op Program Co-ordinator. While on a four-month work term a student may take one evening or weekend academic course.
8. Once students have met graduation requirements, they are no longer eligible to participate in the Co-operative Education program.
9. If a student's academic performance results in the student being required to withdraw from the Haskayne School of Business, or being placed on probation, the student will be required to withdraw from the Co-operative Education program. If the student is required to withdraw from the Co-operative Education program but has already accepted a work term, the employer will be informed that the student is no longer registered in the Co-op program. Termination of the student's employment will be at the employer's discretion.
10. While on a work term students pay an academic course fee and are considered as full-time students.
11. Upon completion of each work term, the student must present a work term report to the Co-op Program Co-ordinator at the Haskayne Career Centre.
12. Students wishing to pursue the Co-operative Education designation who are enrolled in combined degree programs, other than the BSc (Engineering)/BComm...
program, should consult the Co-op Program Co-ordinator for regulations. BSc (Engineering)/BComm students should consult the Engineering Internship office.

13. Students who receive a Failure (F) on a work term will be required to withdraw from the Co-operative Education program. For further information please contact the Co-op Program Co-ordinator at the Haskayne Career Centre.

4.4 Minor in Management and Society
The Management and Society program is designed to expose students to the various aspects of the role of management in our institutions and society. The program does not portend the development of managerial competence. It is intended to prepare graduates in other disciplines for practicing their skills in a business environment.

Requirements
In order to complete the requirements for a Minor in Management and Society, students must take 30 units (5.0 full-course equivalents) as outlined below, with a maximum of 15 units (2.5 full-course equivalents) transferred from an institution outside of the University of Calgary. A maximum of 6 units (1.0 full-course equivalent) with a "D" or "D+" grade in a non-prerequisite course is permitted.

Required Courses:
- Entrepreneurship and Innovation 201*
- Accounting 301*
- One of:
  - Finance 341*
  - Finance 343*
  - Operations Management 301*
- Seven of (not used above):
  - Business and Environment 395
  - Business and Environment 401*
  - Business and Environment 533
  - Business Technology Management 321*
  - Entrepreneurship and Innovation 381
  - Entrepreneurship and Innovation 401
  - Entrepreneurship and Innovation 403
  - Entrepreneurship and Innovation 405
  - Entrepreneurship and Innovation 531
  - Entrepreneurship and Innovation 559
  - Finance 341*
  - Finance 343*
  - Marketing 341*
  - Operations Management 301*
  - Organizational Behaviour and Human Resources 321*
  - Tourism Management 409*

*Not available for credit in the Bachelor of Commerce program.

Note: Students not admitted to the Haskayne School of Business are not permitted to take more than 30 units (5.0 full-course equivalents) from the Haskayne School of Business without the written consent of the business school.

5. Administration
Business School Administrative Officers
- Dean
  - J. Dewald

**Concurrent Degree (Pedagogy concentration only) with the Werklund School of Education
***Combined Degree with the Faculty of Arts (Dance major only)

Graduate

Kinesiology

MKin

MSc

PhD

Undergraduate

The Faculty of Kinesiology offers four-year professional and disciplinary degree programs.

Students may declare only one Major. Honours degrees are offered in all majors with a maximum of 20 spaces available each Fall.

Students who are preparing to teach in either the elementary or secondary school system should enrol in the Bachelor of Kinesiology (Leadership in Pedagogy and Coaching, Pedagogy concentration) degree program.

The Faculty of Kinesiology offers a five-year combined Bachelor of Kinesiology (Kinesiology)/Bachelor of Arts (Dance) with the Faculty of Arts, a five-year Bachelor of Commerce/Bachelor of Kinesiology (Kinesiology) with the Haskayne School of Business and a five-year concurrent Bachelor of Kinesiology (Leadership in Pedagogy and Coaching)/Bachelor of Education in Physical Education with the Werklund School of Education. No other combined degree programs are available with Kinesiology degrees.

The Faculty of Kinesiology collaborates with the Cumming School of Medicine to offer a Minor in Adapted and Therapeutic Physical Activity for students in Kinesiology. Detailed requirements are listed in the Cumming School of Medicine section of this Calendar.

Graduate

The Faculty of Kinesiology offers graduate degrees leading to the thesis-based MSc, the course-based MKin degree, and the Doctor of Philosophy (PhD) degree.

Graduate degree programs are administered by the Faculty of Graduate Studies, and details are given in their portion of the Academic Calendar.

2. Faculty Information

Contact Information
Location: Kinesiology B 142/143

Introduction

The origins of Kinesiology at the University of Calgary date back to 1961 when the School of Physical Education was founded. In 1994, the name was changed to the Faculty of Kinesiology. Today, the faculty’s curriculum and majors are recognized and accredited by the Canadian Council of University Physical Education and Kinesiology Administrators (CCUPEKA). The curriculum is uniquely multi- and interdisciplinary. Undergraduate students study human movement from the perspectives of the natural sciences, social sciences, and humanities, with an integration of both theoretical and experiential learning components. Issues of health, wellness, and human performance are prominent in both the curriculum and research of the faculty. Kinesiology relates to the study of human movement and therefore active involvement in movement classes is part of the curriculum and an expectation of all students.

*Combined Degree with the Haskayne School of Business
**Concurrent Degree (Pedagogy concentration only) with the Werklund School of Education
***Combined Degree with the Faculty of Arts (Dance major only)

Pattern

In addition to a core curriculum, all undergraduate students pursuing a combined or concurrent degree with another faculty, refer to the Summary of Degree Programs chart for a list of allowable combinations.

The Bachelor of Kinesiology and Bachelor of Science in Kinesiology offers a solid foundation with depth and breadth in the Kinesiology discipline. Students may tailor their degree to meet their needs and interests.

The Biomechanics Major (BSc) focuses on the mechanics of human movement with an emphasis on biomedical and sports applications, through course work in Kinesiology, Mathematics, and Engineering.

The Exercise and Health Physiology Major (BSc) builds upon fundamental knowledge in human movement and physiological functioning to understand the physiological response to exercise (from activities of daily living to high performance sport), and also the impact of exercise and diet on the physiological determinants of health and human performance across the life span.

The Mind Sciences in Kinesiology Major (BKin or BSc) provides a comprehensive education in the areas of behavioural neurosciences, cognition and neuro-motor control, and the application of personality and social psychological principles to the fields of exercise and health psychology, and sport psychology.

The Leadership in Pedagogy and Coaching Major (BKin) allows students to declare a concentration in Pedagogy or Coaching.

The Pedagogy concentration addresses the teaching and learning of kinesiology content and activity for both children and adults. Teacher certification must be obtained after completing this program in order to work in the educational environment. The Coaching concentration will develop leaders from developmental to high performance coaching opportunities. Both Pedagogy and Coaching have a strong emphasis on experiential learning which includes practicum opportunities in the field. A concurrent Bachelor of Kinesiology (Pedagogy concentration only)/Bachelor of Education degree program is offered with the Werklund School of Education.
Objectives
The Kinesiology undergraduate curriculum addresses the eight core competencies endorsed by the University of Calgary. These are critical and creative thinking, problem analysis, effective communication, gathering and organizing information, abstract thinking, interpretative and assessment skills, and insight and intuition in generating knowledge. The curriculum provides an opportunity for students to acquire advanced levels of knowledge on contemporary issues related to health, movement, exercise, and sport. Laboratory, professional, and experiential courses are integral to our programs and designed to facilitate the transition from undergraduate education to the workplace and/or graduate education. Finally, the undergraduate program promotes a lifelong desire for learning, an appreciation for a healthy lifestyle, and willingness to assume leadership roles in the promotion of health, wellness, and human performance.

Career Opportunities
Graduates of Kinesiology may find employment in areas such as teaching, corporate wellness, sport administration and marketing, management, fitness assessment and exercise prescription, health promotion, coaching and training of amateur and high performance athletes, therapeutic rehabilitation, workplace health and safety, comprehensive health care, and research.

Student Affairs
Academic advisors in the Advising Office are available for program consultation during regular office hours. Students are encouraged to become acquainted with the Advising Office and its resources to discuss any aspect of academic programs. Kinesiology Student Society (KSS) is an undergraduate club responsible for academic and social activities. The main objective is to build spirit and rapport within the Faculty.

Resources
The Faculty of Kinesiology is home to many integrated units designed to provide a complete experience in education, research, and programming. Research in the Faculty is conducted in some of the finest laboratories, clinical space, and athletic/recreational training facilities found anywhere in the world. Several highly productive research units exist within the Faculty including the Roger Jackson Centre for Health and Wellness Research comprised of the Human Performance Laboratory (HPL) and the Sport Medicine Centre. The Faculty includes several large non-academic units. These units, integral to the Faculty, contribute to an enriched environment for students, staff, and faculty, and include the University of Calgary Varsity Athletic teams (the Dinos), Active Living, Community Programs, Outdoor Programs, and the Olympic Oval.

The Kinesiology Complex at the University of Calgary is a multi-faceted facility comprised of over 70,000 square metres of indoor area and over 8 hectares of outdoor activity space. The complex consists of five gymnasia, two dance studios, a 50 metre swimming pool, one wrestling room, two multipurpose studios, one fitness studio, a cycle centre, a gymnastics centre, two indoor climbing walls, a large fitness centre, and indoor 400 metre speed skating rink, an Olympic size hockey rink, a short track speed skating rink, high performance weight room, an indoor 200 metre six lane running track, an indoor 400 metre two lane running track, thirteen squash courts, seven raquetball courts, eight classrooms, four lecture theatres, and multiple meeting and conference rooms. The outdoor activity area is comprised of five natural grass playing fields, four outdoor tennis courts, and a synthetic field hockey pitch.

3. Faculty Regulations
Students in the Faculty of Kinesiology are governed by the academic regulations contained in this section and also in the Academic Regulations section of the Calendar. Certain courses are subject to individual prerequisites. Students are advised to read and carefully follow all regulations and in cases of doubt as to the precise meaning of any statement or regulation, to consult the office of the Associate Dean (Academic), Faculty of Kinesiology.

3.1 Admissions
New applicants should refer to A.2 in the Admissions section of this Calendar for regulations regarding University admission requirements. Applicants must meet all deadlines and requirements. Refer to ucalgary.ca/future-students/undergraduate/apply. The Faculty of Kinesiology admits students to the Fall Term only.

Limited Enrolment
Enrolment in the Faculty of Kinesiology is limited by admission quotas. Applicants will be admitted on the basis of academic performance, until the enrolment quota is reached.

Second Baccalaureate Degree
Students who hold a bachelor’s degree (or equivalent) from a recognized/accredited institution may be considered for a program leading to a second or subsequent bachelor’s degree (commonly referred to as an After-Degree), provided they qualify for admission and meet all University and Faculty regulations. Consultation with academic advisors regarding admission and graduation requirements is strongly recommended. For more information regarding admission to a second undergraduate degree, refer to A.5.5 in Admissions.

3.2 Registration
Accuracy of Registration
All students are responsible for the completeness and accuracy of their registration and for arranging their course selections to satisfy graduation requirements.

Course Load
Faculty of Kinesiology students are permitted to enrol in 15 units in each of the Fall and Winter academic terms. It should be stressed that extra courses represent substantial burdens and may negatively impact overall performance. Opportunities for accelerated progress exist through courses offered in Summer and Winter Intersession. A student wishing to complete more than the normal load of 15 units (2.5 full-course equivalents) per Fall or Winter term must receive special permission from the Kinesiology Advising Office. Permission will not be granted for the admission term.

Interruption of Program Leading to a Degree
Students who interrupt their degree program in the Faculty of Kinesiology are advised that after an absence of one calendar year (twelve consecutive months) from academic study at the University of Calgary, they may be required to comply with any regulation and curriculum change that may have come into effect. Students who do not attend the University of Calgary for two or more years (twenty-four consecutive months or greater) will be required to apply for admission and meet all admission requirements and deadlines for the year to which they apply.

Transfer Credit from Other Institutions
No more than 60 units (10.0 full-course equivalents) completed at other institutions or in a previously completed University of Calgary degree may be used as transfer of credit in the degree. Students must have obtained a minimum grade of “D” or its equivalent in courses proposed for transfer of credit. Grades obtained in transfer courses may be used in the computation of grade point averages for graduation purposes at the discretion of the Faculty. A maximum of 27 units (4.5 full-course equivalents) of Kinesiology Core courses (listed under 4. Program Details) may be transferred from other institutions. The Faculty reserves the right to determine any student’s sequence of courses; credit for a course will not be awarded unless the prerequisite for that course (as listed in the Calendar) has been completed with a minimum grade of “C-“.

Prior to registering for courses at a school outside the University of Calgary, students must submit a Letter of Permission request, via their Student Centre and receive approval. Students are strongly encouraged to meet with a Faculty advisor prior to submitting their request.

It is the responsibility of the student to provide full details of the courses proposed for transfer credit at the time of application. It is also the responsibility of the student to ensure that upon completion of the courses an official transcript is forwarded to the Admissions Office of this University in order that the appropriate credit may be officially recorded.
Duration of Degree
All course work used towards a Kinesiology degree must be completed within 10 calendar years from the time of first registration in the Faculty and includes transfer credit from external institutions.

Courses Bearing a Prerequisite
A student must obtain a minimum grade of "C-" in a prerequisite course to be eligible for the subsequent course.

Withdrawal from Courses
A student may withdraw from any course via the student registration system by the deadline as specified in the Academic Schedule. Before withdrawing from any course, it is strongly recommended a student seek advice from the instructor and the Advising Office.

Any student wishing to withdraw completely from the University should refer to the Academic Regulations section of this Calendar. Students will not be permitted to withdraw more than once from a particular course. Students will be required to withdraw from the Faculty once they have accumulated 30 units of withdrawals while in attendance at the University of Calgary.

Repetition of Courses
A student may repeat a course previously attempted (excluding withdrawals) only once. To repeat a course more than once requires the permission of the faculty in which the student is registered and the department offering the course. Permission is granted only under exceptional circumstances.

Taking or repeating a course that is a prerequisite for a higher level course after having completed the higher level course with a grade of "C-" or better will be allowed only with the permission of both the faculty in which the student is registered and the department offering the course.

Grades
Grades will be assigned per the Evaluation Component(s) and the Grading Scale stated in the course outline. In the event a student request of Deferral of Final Examination or Deferral of Term Work is approved, the student will receive a grade of Grade Pending (GP) during the deferral period.

In the event that the deferred final examination or term work is not completed, the grade will be based on the course work completed to date.

Non-Kinesiology Student Registration
Students not admitted to the Faculty of Kinesiology, who have completed 30 units (5.0 full-course equivalent) of Kinesiology courses (transfer or offered by the Faculty of Kinesiology), will be restricted from registration in additional Kinesiology courses.

3.3 Course Work
Credit in Courses by Special Assessment
Students are referred to B.10.1 in the Academic Regulations section of this Calendar for University regulations on special assessment. Students may not count more than 12 units (2.0 full-course equivalents) towards their degree in courses taken outside the Faculty by special assessment.

3.4 Student Standing
Performance Review, Probationary Status and Dismissal
Kinesiology students must maintain a minimum GPA of 2.00 to maintain continuation in the program. The academic standing of students registered in the Faculty will be reviewed at the end of each Winter Term provided that they have completed at least 18 units (3.0 full-course equivalents) at the University of Calgary since their previous review. Students who have not completed 18 units (3.0 full-course equivalents) since the previous review will retain their existing status until the next academic standing review. All University of Calgary units, completed since the previous review, are used for the purpose of academic review. Students placed on academic probation or required to withdraw as a result of the academic performance review will be so advised in writing.

Notwithstanding the specific regulations pertaining to Student Standing, students' academic standing may be reviewed at any time and those with generally poor academic records may be placed or continued on academic probation or required to withdraw at the discretion of the Associate Dean, Academic or other delegate of the Dean. Refer to section F.3.2 Unsatisfactory Standing.

Probation, Dismissal, Readmission
1. Probationary status is only available in Kinesiology, subsequent to a successful appeal of a student's "required to withdraw" status.
2. Probationary status carries the stipulation that a student will:
   a. Retain a GPA of at least 2.00 over all courses taken since the previous review.
   b. Be reinstated in satisfactory standing if they have achieved a GPA of at least 2.00 over all courses taken since their previous review.
   c. Will be required to withdraw from the Faculty if they achieve a GPA of less than 2.00 over all courses taken since their previous review.

3. Students who have been required to withdraw due to deficient academic performance should note that it is not normally possible to be readmitted to the Faculty of Kinesiology without first taking courses to improve their grade point averages to meet the required admission averages for their programs. Students readmitted after having been required to withdraw from the Faculty of Kinesiology due to unsatisfactory academic performance must maintain a grade point average of at least 2.00 on all courses taken in each academic review period after readmission. Failure to do so will result in permanent dismissal from the Faculty of Kinesiology.

4. Students required to withdraw from an Honours program under conditions of unsatisfactory academic performance will be deemed ineligible for readmission to an Honours program. However, the student may be considered for admissions to a BKin or BSc program.

Dean's List
The Dean's List recognizes the outstanding academic achievement of students in the Faculty of Kinesiology. To be considered for the Dean's List, a student must achieve a GPA of at least 3.60 over a minimum of 24 graded units (4.0 full-course equivalents), graded, completed in the preceding Fall and Winter Terms at the University of Calgary. Students on academic sanctions as outlined in section K (Statement on Principles of Conduct) of this Calendar are not eligible for the Dean's List.

3.5 Graduation
Degree "With Distinction"
In a non-Honours program a GPA of 3.60 or better over the most recently completed 90 units (15.0 full-course equivalents) will result in the degree being awarded with distinction.

A student who has taken part of their course work at another university or who has transferred into the Faculty may be granted a degree with distinction at the discretion of the Faculty.

Degree with First Class Honours
In an Honours program a GPA of 3.60 or better over the most recently completed 90 units (15.0 full-course equivalents) will result in the degree being awarded with First Class Honours.

A student who has taken part of their course work at another university or who has transferred into the Faculty may be granted a degree with First Class Honours at the discretion of the Faculty.

Minor Field Programs
Students may formally declare a Minor Field and have this officially recorded on their transcript of record provided they satisfy the requirements for the relevant Minor Field program. This declaration must be made prior to application for graduation and no later than the time of their last registration.

Refer to Minor Programs section of the Academic Calendar.

3.6 Appeals Process
There are no Faculty-specific regulations governing appeals. Refer to I. Reappraisal of Grades and J. Non-Disciplinary Academic Appeals in the Academic Regulations section of this Calendar.
3.7 Fees and Expenses
Students will be expected to pay supplementary fees in some courses, as specified in course registration materials. Refer to section P.1.10 Mandatory Supplementary Fees for Courses.

4. Program Details
4.1 Requirements
Bachelor of Kinesiology and Bachelor of Science Programs
1. Attainment a minimum 2.00 grade point average over the entire program, as outlined below.
2. Attainment a minimum 2.00 grade point average in all Faculty of Kinesiology courses.
3. No more than the equivalent of 12 units (2.0 full-course equivalents) "D" or "D+" grades in core course requirements.
4. No more than the equivalent of 24 units (4.0 full-course equivalents) "D" or "D+" grades throughout the entire program.
5. No "F" grades will be acceptable towards the BKin or BSc degree. A course normally may be repeated only once.
6. A minimum of 60 units (10.0 full-course equivalents) at the 300 level or above must be applied to all Kinesiology degree.

Kinesiology Core Courses
Within the 120 units (20.0 full-course equivalents) Bachelor of Kinesiology or Bachelor of Science degree, all students must complete the following core courses (54 units (9.0 full-course equivalents)).
- Kinesiology 201
- Kinesiology 203
- Kinesiology 213
- Kinesiology 237
- Kinesiology 244
- Kinesiology 251
- Kinesiology 253
- Kinesiology 259*
- Kinesiology 260*
- Kinesiology 263
- Kinesiology 323
- Kinesiology 344
- One of Kinesiology 351, 397, or 399
- Kinesiology 355
- Kinesiology 363
- Kinesiology 372
- Kinesiology 373
- Statistics 205 or 213

*It is recommended that Kinesiology 259 and 260 are taken in the first year.

In addition to the core, each Major requires the specific courses outlined in 4.2 Specific Program Requirements. Students are also recommended to select some of the 200-level requirements for their chosen major. Since this entails more than 30 units (5.0 full-course equivalents), students are expected to complete these 200-level courses in their first two years of study.

All students in the Faculty of Kinesiology must complete a minimum of 15 units (2.5 full-course equivalents), up to a maximum 45 units (7.5 full-course equivalents), from outside the Faculty of Kinesiology.

Additional Requirements for Bachelor of Science Programs
To meet BSc degree requirements, a minimum of 63 units (10.5 full-course equivalents) of science equivalents must be completed. These include:
- All courses offered by the Faculty of Science and Schulich School of Engineering.
- Courses offered collaboratively by the Faculty of Arts and the Faculty of Science in Earth Science EASC and Environmental Science ENSC.
- Anthropology 201, 311, 413, 435, 451, 505, 523, 552, 553, 571, 589.
- Psychology 200, 201, 300, 301, 407, 411, 469, 471, 473, 475, 477, 478, 479, 491, 497, 521, 531, 591.
- The following Kinesiology courses:

Honours Programs
See 4.2.6 for additional requirements for Honours programs.

4.2 Specific Program Requirements
4.2.1 Bachelor of Kinesiology or Bachelor of Science
Requirements
- A. Kinesiology Core (54 units (9.0 full-course equivalents))
- B. Senior Kinesiology Options (24 units (4.0 full-course equivalents))
- C. Senior Kinesiology Option (12 units (2.0 full-course equivalents))
- D. Options (18 units (3.0 full-course equivalents))

4.2.2 Bachelor of Science (Biomechanics)
Admission
Students should refer to the Standard Admission requirements listed in the Admissions section of this Calendar. Note that Mathematics 30-1 or Pure Mathematics 30 with a grade of 70 per cent or above is required for admission.

Requirements
- A. Kinesiology Core (54 units (9.0 full-course equivalents))
- B. Exercise and Health Physiology Major Requirements (36 units (6.0 full-course equivalents)):
  - Mathematics 211
  - Mathematics 275
  - Mathematics 277
  - Engineering 201
  - Engineering 202
  - Engineering 311
  - Engineering 317
  - Engineering 349
  - Kinesiology 393
  - Kinesiology 395
  - Kinesiology 463
  - Kinesiology 466 or 490
- C. Senior Kinesiology option (12 units (2.0 full-course equivalents))
- D. Options (18 units (3.0 full-course equivalents))

4.2.3 Bachelor of Science (Exercise and Health Physiology)
Admission
Students should refer to the Standard Admission requirements listed in the Admissions section of this Calendar. Note that Mathematics 30-1 or Pure Mathematics 30 with a grade of 70 per cent or above is required for admission.

Requirements
- A. Kinesiology Core (54 units (9.0 full-course equivalents))
- B. Exercise and Health Physiology Major Requirements (36 units (6.0 full-course equivalents)):
  - Chemistry 201, 203, 351
  - Biochemistry 341
  - Mathematics 249 or 265
  - Kinesiology 375, 433
  - Three of Kinesiology 365, 377, 437, 465, 469, 475, 479, 485, 493, 495

One of:
- Kinesiology 441 and 3 units (0.5 full-course equivalent) of Kinesiology options at the 300 level or above, or
- Kinesiology 490
- C. Kinesiology Options at the 300 level or above (3 units (0.5 full-course equivalent))
- D. Options (27 units (4.5 full-course equivalents))

4.2.4 Bachelor of Kinesiology (Leadership in Pedagogy and Coaching) Admission
Admission
Admission to the Leadership in Pedagogy and Coaching Program is competitive and space is limited to approximately 30 students.
Requirements
A. Kinesiology Core (54 units (9.0 full-course equivalents))
B. Leadership in Pedagogy and Coaching Major Requirements (21 units (3.5 full-course equivalents))
  • Kinesiology 311
  • Kinesiology 321
  • Kinesiology 367
  • Kinesiology 391
  • Kinesiology 433 or 403
  • Kinesiology 491
  • Physical Education 321
C. Concentration requirements (Students will declare either the Pedagogy concentration or the Coaching concentration when they enter the Leadership in Pedagogy and Coaching Major).
Pedagogy concentration requirements (15 units (2.5 full-course equivalents))
  • Dance Education 325
  • Physical Education 333
  • Physical Education 349
  • Kinesiology 331
  • One of Kinesiology 335, 351*, 375, 381, or 397*, 399*, or 469
  *May not be applied to both Core and Senior Option requirements.
Coaching concentration requirements (18 units (3.0 full-course equivalents))
  • Kinesiology 331
  • Kinesiology 381
  • Kinesiology 399*
  • Kinesiology 431
  • Two of Kinesiology 351*, 375, 397*, 437, or 469
  *May not be applied to both Core and Senior Option requirements.
D. Options
Pedagogy concentration (30 units (5.0 full-course equivalents))
Coaching concentration (27 units (4.5 full-course equivalents))

4.2.5 Bachelor of Kinesiology or Bachelor of Science (Mind Sciences in Kinesiology)
Requirements
A. Kinesiology Core (54 units (9.0 full-course equivalents))
B. Mind Sciences in Kinesiology Major Requirements (24 units (4.0 full-course equivalents))
  • Psychology 200
  • Psychology 201
  • Statistics 217
  • 6 units (1.0 full-course equivalent) from Kinesiology 351, 397, 399, 413
  • 3 units (0.5 full-course equivalent) from Kinesiology 451, 497, 499
  • 6 units (1.0 full-course equivalent) from Health and Society 201, 301, 311, Kinesiology 444, 490, 503, 593; Philosophy 201, 313, 361, Psychology 345, 351, 353, 365, 369, 375, 383; Sociology 201, 321, 341, 407, 409
C. Senior Kinesiology options in addition (12 units (2.0 full-course equivalents))
D. Options (30 units (5.0 full-course equivalents))

Notes:
1. Some of the courses listed above have prerequisites and are restricted to Majors in those programs. It is the student’s responsibility to ensure that prerequisites are completed.
2. Kinesiology 451, 497, 499, 503, 591, and 593 must be completed with an instructor associated with the Mind Sciences in Kinesiology Major.
3. Credit in 400-level Psychology courses may be used towards the Mind Sciences in Kinesiology Major. However, access to these courses is extremely limited.
4. Courses applied to this major may not be applied to a Minor in Psychology.

4.2.6 Bachelor of Kinesiology Honours or Bachelor of Science Honours
Honours programs are offered in all majors.

Admission
Applicants to an Honours program must have completed a minimum of 90 units (15.0 full-course equivalents) by the term in which they enter the Honours program. The completed units must include a junior level Statistics course, and a cumulative GPA of at least 3.30 over the completed 90 units (15.0 full-course equivalents) (with a minimum GPA of 3.30 in all Kinesiology courses). These grade point averages must be maintained in order to retain Honours standing.

Students are strongly encouraged to consult with the Faculty’s Advising Office prior to application.

Requirements
Enrolment in Kinesiology 490 (Interpretation of Research and Research Project) is added to the course requirements for each Major in an Honours program. Enrolment in Kinesiology 490 is limited and requires consent of the department. Registration in Kinesiology 490 is contingent on the student having made suitable arrangements with an eligible supervisor in the Faculty of Kinesiology, as well as confirmation of the availability of resources (laboratory space, equipment, etc.) required to complete the research project.

To graduate with Honours, a student will be required to present a minimum cumulative GPA of 3.30 over the last 90 units (15.0 full-course equivalents) and a minimum GPA of 3.30 in all courses offered by the Faculty of Kinesiology.

1. Once admitted to the Honours program a student must maintain a GPA of at least 3.30 in each academic year. The following circumstances will normally result in a student being required to withdraw from the Honours program:
   (a) Any “F” grades obtained in the final two years of the program.
   (b) The accumulation of more than 12 units (2.0 full-course equivalents) of “D” or “D+” grades.
2. Honours students must submit a written report annually to the Associate Dean (Academic) when Research Proposals are presented in the Fall term of Kinesiology 490.

4.2.7 Combined BKin (Kinesiology)/BA (Dance)
Introduction
The Faculty of Kinesiology with the Faculty of Arts offers a five-year combined Bachelor of Kinesiology (Kinesiology)/Bachelor of Arts (Dance) degree program. The program requires careful selection of courses to complete all requirements of the two Faculties. Interested students are urged to contact the Advising Offices of the two faculties for advice in choosing their first-year courses.

Admission
Applicants to the combined program must satisfy the admission requirements of both Faculties. Students are strongly advised to enter the combined program directly in first year.

Once accepted to the combined program, the requirements of each Faculty must be met. Failure to do so will result in a student being required to withdraw from the combined or separate programs. A student may elect to remain in the combined program or submit a Change of Program request through the online Student Centre via MyUofC to remain in either of the two separate degree programs.

Requirements
Students must adhere to the regulations and satisfy the graduation requirements of both Faculties. The combined degree requires at least 150 units (25.0 full-course equivalents) and the successful completion of both degree requirements. A maximum of 60 units (10.0 full-course equivalents) at the junior level, may be used towards the Kinesiology degree requirements.

The Faculty of Kinesiology requirements are as follows:
• 54 units (9.0 full-course equivalents) from the Kinesiology Core as listed in 4.1 of the Faculty of Kinesiology section of the Calendar.
• 21 units (3.5 full-course equivalents) of Kinesiology options at the 300 level or above.

Refer to section 4.58.3 Combined BA (Dance)/BKin (Kinesiology) for BA Dance program requirements.

4.2.8 Combined BComm/BKin (Kinesiology) Program
Introduction
No major other than the Bachelor of Commerce (BComm) will be considered by Haskayne School of Business.
The Faculty of Kinesiology with the Haskayne School of Business offers a five-year combined Bachelor of Commerce/Bachelor of Kinesiology (Kinesiology) degree program. The program requires careful selection of courses to complete all requirements of the two Faculties. Interested students are urged to contact the Advising Offices of the two faculties for advice in choosing their first-year courses.

**Admission**
Applicants to the BComm/BKin program must satisfy the admission requirements of both Faculties. Students are strongly advised to enter the combined program directly in first year. Students may apply for combined degree admission in a subsequent year, upon successful completion of a prescribed set of pre-commerce requirements (see section 4.1.2 in the Haskayne School of Business section of this Calendar).

At the point of admission to the combined degree program, students will be administered by the Haskayne School of Business, which is a quota restricted faculty. Therefore, admission and program requirements for the BComm program also apply to students pursuing the combined degree program.

**Requirements**
Once accepted to the combined program, students may elect to remain in it or submit a Change of Program request to remain in either of the two separate degree programs, understanding that the requirements of each Faculty must be met. Failure to meet requirements will result in a student being required to withdraw from the combined or separate programs.

Students must satisfy the graduation requirements of both Faculties (see section 4.1.4 in the Haskayne School of Business section of this Calendar).

### 4.2.9 Concurrent BKin (Leadership in Pedagogy and Coaching)/BEd

**Introduction**
The Faculty of Kinesiology in partnership with the Werklund School of Education offers a five-year concurrent Bachelor of Kinesiology (Leadership in Pedagogy and Coaching)/Bachelor of Education in Physical Education. Students are strongly advised to enter the concurrent program directly in first year.

Refer to 4.3 Five-Year BEd (Concurrent) Program in the Werklund School of Education section of the Calendar.

**Admission**
Applicants to the BKin/BEd must meet admission requirements for both the Faculty of Kinesiology (Leadership in Pedagogy and Coaching - Pedagogy concentration only) and the Werklund School of Education (see A.2 Undergraduate Admission in this Calendar).

**Requirements**
A. Kinesiology Core (54 units (9.0 full-course equivalents))

B. Leadership in Pedagogy and Coaching
Major Requirements (18 units (3.0 full-course equivalents)):
- Kinesiology 311
- Kinesiology 321
- Kinesiology 367
- Kinesiology 391
- Kinesiology 433 or 403
- Physical Education 321

C. Pedagogy concentration requirements (18 units (3.0 full-course equivalents)):
- Dance Education 325
- Education 201
- Kinesiology 331
- 3 units (0.5 full-course equivalent) English or French literature option
- Physical Education 333
- Physical Education 349

**Notes:**
1. Students must complete Kinesiology 391, Education 201, and a junior-level English or French literature course before commencing their first year in Education.
2. Completion of the BKin degree is required to be admissible to the final year in Werklund School of Education.

D. 60 units (10.0 full-course equivalents) required by the Werklund School of Education

### 5. Administration

**Faculty Administrative Officers**
Dean
W. Herzog

Associate Deans
D. Paskevich, Academic
P. Wiley, Graduate
C.A. Emery, Research
1. Summary of Degree Programs

Degrees Offered

Undergraduate
- JD
- Graduate
- LLM
- Post-baccalaureate Certificate
- Joint Programs
- JD/MBA*
- JD/MPP**

Combined Degree Programs

The Faculty of Law offers combined degree programs with the Haskayne School of Business (a combined JD/MBA program) the School of Public Policy (a combined JD/MPP program) and the University of Houston (a combined JD/JD program). Students wishing to obtain any of these combined degrees must be admitted to each Faculty/School through the regular admissions process. Students who have completed their first year of either program may still apply for a combined program by meeting the normal application and admission requirements for the other faculty. Students are generally only admitted to the International Energy Lawyers Program after completing the first year at either the University of Calgary or the University of Houston. Each combined degree program is a four year program.

Interested applicants should contact the Director, Academic & Student Services for additional information.

Graduate

The Faculty of Law offers graduate work leading to both a thesis-based and a course-based LLM degree, as well as a Post-baccalaureate Certificate program. The graduate program focuses on the areas of natural resources, energy and environmental law. For more information see the Faculty of Graduate Studies Calendar.

Introduction

The Faculty of Law at the University of Calgary officially opened in 1976 with a first year class of 60 students and 9 faculty members. The graduate program at the Faculty was instituted in 1988 with a focus on natural resources, energy and environmental law. Today the Faculty of Law admits 120 students into its JD program annually. The graduate program now consists of a course-based and thesis based LLM program, as well as a Post-baccalaureate Certificate, all of which continue to concentrate on issues and topics related to natural resources, energy and environmental law.

JD Program

Students are admitted into the JD program after successfully completing at least 60 units (10.0 full-course equivalents) in a program of study leading to a degree at a university in Alberta, or its equivalent. Almost every JD student has completed at least one university degree prior to beginning his or her JD studies.

The first year of the JD program is common to all students, and consists of intensive courses in Foundations of Law and Justice (in September and January) as well as courses in Legislation, Constitutional Law, Crime: Law and Procedure, Property, Torts and Contracts.

In the second and third year of the program students complete required courses in Civil Procedure, Administrative Law, Ethical Lawyering, Evidence, Negotiation and Advocacy. They will also take one course within the areas of international law and theoretical perspectives on the law, and fulfill an upper year writing requirement. Students choose the remainder of their courses from their area or areas of interest.

Students in joint degree programs will complete all of the required elements of the JD program.

All law graduates should have developed the ability to:

- Develop a coherent research strategy
- Identify and assess sources of legal and non-legal information appropriate to the particular issue(s) or matters

4. Legal analysis and reasoning

All law graduates should have developed the skills necessary for:

- Developing legal arguments and providing legal opinions, including the interpretation and application of statutes and case law
- Identifying, investigating and assessing a problem, both factually and legally placing a problem within a broader context as appropriate
- Understanding the relationship between different normative orderings, such as the relationship between international and domestic law methods
- Critiquing their own legal reasoning and that of others from substantive, normative and procedural perspectives

The Faculty of Law has identified the following minimum standard of competence for our graduates:

1. Substantive legal knowledge

All law graduates should have developed an understanding of:

- The principles and jurisprudence comprising foundational doctrinal areas of law (e.g., torts, contracts, constitutional, property, criminal and administrative law)
- The principles underlying common law and equity
- Developed knowledge of the sources of law, including the structure of, and relationship between, the branches of government
- The role of legislation in the common law system

2. The context of law

All law graduates should have developed an appreciation of:

- Various perspectives on law, including theoretical, historical and comparative perspectives
- The implications of international, multidisciplinary and technological innovations for law and legal practice
- The role of policy and its intersection with law
- The problem of access to justice and the role for lawyers in ameliorating it

3. Legal research

All law graduates should possess the ability to:

- Develop a coherent research strategy
- Identify and assess sources of legal and non-legal information appropriate to the particular issue(s) or matters
Faculty of Law

5. Legal communication
All law graduates should have developed the skills necessary for:
• Counseling and advising, including ascertaining the client’s needs, wishes and risks, providing options to the client, and helping the client to select the appropriate option
• Effective negotiation, advocacy and collaboration
• Clear and accurate communication in a format appropriate to its purpose drafting formal documents
• Evaluating communication to assess its effectiveness and impact
• Interpersonal skills, including teamwork and collaboration
6. Dispute resolution skills
All law graduates should have:
• Familiarity with drafting and transactional skills relevant to the prevention of disputes
• Knowledge of the characteristics and procedures of available forms of dispute resolution
• The understanding necessary to recommend appropriate form(s) of dispute resolution, whether consensus or adjudicative, for particular settings and specific conflicts
7. Ethics
All law graduates should have developed a critical understanding of:
• The normative foundations of the lawyer’s role
• The scope and limits of the lawyer’s role
• The law governing lawyers and legal practice
• The capacity to identify and resolve ethical dilemmas

Opportunities
To practice law in Canada a lawyer must be a member of a provincial law society, in Alberta the Law Society of Alberta. The JD program at the University of Calgary is approved as a law degree sufficient for admission to the Canadian common law law societies. The LLM programs at the University of Calgary are not approved as law degrees sufficient for admission to the Canadian common law law societies and do not allow students to satisfy the requirements for law society admission through the National Committee on Accreditation.

Graduates from the University of Calgary Faculty of Law work in a wide variety of settings. Many graduates work in legal practice assisting individuals, corporations, organizations and government with their legal needs. Faculty of Law graduates also work, however, in diverse professional, business and creative endeavours, including as legislators, judges, executives, entrepreneurs and academics.

The Faculty of Law at the University of Calgary works with all of our graduates to help them secure employment subsequent to graduation. Information on the Faculty’s Career and Development Office can be found here: ucalgary.ca/lawcareers.

Student Affairs
The Society of Law Students is the official student association recognized by the Faculty of Law to represent the interests of all students in the undergraduate law program.

The Society is responsible for providing law students with social, sporting, academic, volunteering, and administrative services, as well as being the official liaison between the student body and the Faculty, University and broader legal community.

3. Faculty Regulations
Students in the Faculty of Law are governed by the Faculty Regulations and also by the Academic Regulations section of this Calendar. The Faculty Regulations can be found here: law.ucalgary.ca/files/law/faculty-regulations-june-2015.

4. Admissions
Contact the Faculty Admissions Office or visit the Faculty of Law website to obtain the most up to date information.

Requirements
The educational prerequisite for admission to the Faculty of Law is success in the completion of 60 units (10.0 full-course equivalents) in a program of studies leading to a degree at a university in Alberta, or its equivalent. Courses to be considered must be completed prior to December 31 in the year in which the application is made. These requirements apply to all applicants including Aboriginal Canadian applicants. As a practical matter, however, successful applicants will have completed at least one university degree.

When selecting the 120 most promising students each year, the Admissions Committee considers a number of factors including:
• An academic record
• A personal statement
• Reference letters

Prospective applicants should check carefully the dates and deadlines. A late application will be considered only if the applicant can demonstrate exceptional circumstances.

5. Program Details

5.1 Requirements for Graduation

Course Requirements
Students must achieve satisfactory performance (i.e., “C+”, or higher, or “CR”) in the following courses:

- The Law School Admission Test
Law 400 Constitutional Law (5 units)
Law 402 Contracts (5 units)
Law 403 Legislation (3 units)
Law 404 Property (5 units)
Law 406 Torts (5 units)
Law 407 Foundations in Law and Justice I
   (4 units)
Law 408 Foundations in Law and Justice II
   (4 units)
Law 410 Crime: Law and Procedure (5 units)
Law 503 Administrative Law (3 units)
Law 505 Civil Procedure (3 units)
Law 507 Evidence (3 units)
Law 508 Negotiation: Selected Topics (4 units)
Law 509 Business Associations (3 units)
Law 510 Ethical Lawyering (3 units)
Law 602 Advocacy: Selected Topics (4 units)

Additional Requirements
Students must achieve satisfactory performance (i.e., "C-", or higher, or "CR") in the following courses and must submit a Written Declaration to the Director, Academic & Student Services attesting to their completion of these elements.
- Upper-Year Writing Requirement
- International Requirement
- Theoretical Perspectives Requirement

6. Administration

Introduction
The University of Calgary Faculty of Nursing was established in 1969. Undergraduates of the University of Calgary Baccalaureate Program in Nursing participate in the generation of disciplinary knowledge and are prepared to interpret, integrate and apply relevant knowledge from other fields to their practice, on a continuum of active learning. These Undergraduates have a clearly defined philosophical and conceptual basis for their practice; are prepared to provide a strong voice in inter-professional, collaborative undertakings; and use evidence-informed approaches and diverse ways of knowing to provide compassionate care, in order to sustain and promote healthful environments. They are called on to take leader-ship roles to promote health for individuals, families, public groups, communities and/or populations who are experiencing health transitions and, as such, work in a variety of settings across health/illness trajectories. Undergraduates of the University of Calgary Baccalaureate program in Nursing strive for excellence in meeting entry-level competencies as outlined by the College and Association of Registered Nurses of Alberta (2006) in five domains: professional responsibility/accountability; knowledge-based practice; ethical practice; service to the public; and self-regulation. They demonstrate professional and ethical decision-making behaviours as outlined in the Canadian Nurses Association Code of Ethics for Registered Nurses (2017).

Career Opportunities
Career opportunities in nursing are many and varied. Staff nurse positions are found in acute care (hospital) settings, extended care, home care, and community/rural settings. Nurses are also employed in occupational health nursing and in various government services such as outpost nursing, penitentiaries, international nursing or the Canadian Armed Forces. Completion of a BN degree allows graduates to write the National Council Licensure Examination (NCLEX) which is a prerequisite for licensure in any province/territory in Canada.

Student Affairs
Advising Services
Student advisors are available in the Nursing Undergraduate Programs Office on the ground floor of the Professional Faculties Building on the University of Calgary campus. Contact information, including office hours, can be found at: nursing.ucalgary.ca/undergraduate/undergraduate-programs-office. Students are encouraged to become familiar with the office and its services.

Undergraduate Nursing Society (UNS)
The UNS is a society consisting of elected representatives from the Nursing student body. UNS serves students by providing faculty-student liaisons, information on current nursing issues, graduation funding, social functions and a support network for Nursing students.

Professional Conduct
The study of nursing practice places students in a position of special trust with Registered Nurses, other health care professionals, and their patients or clients. The Faculty
 Faculty of Nursing

of Nursing recognizes that nursing education occurs both inside and outside the classroom and has the responsibility to ensure that its graduates are competent and ethical. Students are expected to comply with all University of Calgary policies and regulations. Although nursing students in program are not regulated members of the College and Association of Registered Nurses of Alberta (CARNA), as part of their formation as professional nurses, they are also expected to meet professional and ethical standards for Registered Nurses as outlined by:

Students are expected to ensure they are both familiar with, and comply with these standards.

Resources

The Faculty of Nursing is located on the first and second floors of the Professional Faculties Building and the sixth floor of Craigleith Hall, both of which are on the main campus of the University of Calgary. The Faculty houses a Clinical Simulation Learning Centre which is designed as an interactive environment to advance excellence in Nursing. Within it, the acquisition of knowledge and skills is facilitated through a variety of resources which link nursing education, practice and research.

Nursing is a practice based profession. Nursing practice courses begin in Term 3. Each nursing practice course for Terms 3 through 7 consists of a total of 247 practice hours or 19 hours per week. In Term 8 the total number of practice hours increases to 378 hours. Nursing practice courses take place in a variety of institutional and community settings, including rural and urban centres, with a variety of client populations. Students are expected to travel, at their own expense, to any nursing practice agency within commuting distance to Calgary. Examples of facilities and agencies utilized by the Faculty of Nursing include: Alberta Children’s Hospital, Alexandra Community Health Centre, Calgary Correctional Centre, Calgary Health Services, Clarenholm Hospital, Foothills Hospital, Home Care, High River Hospital, Peter Lougheed Centre, Rockyview Hospital, Stoney Tribal Health Centre, Strathmore Public Health Unit, Wood’s Homes. Many other community health agencies contribute in a variety of ways to the programs of the Faculty of Nursing. Out-of-region and international placements are arranged on an individual basis.

3. Faculty Regulations

3.1 Admissions

General Requirements

Students wishing to begin a Bachelor of Nursing degree program must meet minimum admission requirements as set out in 4. Program Details. Also see the Admissions section of this Calendar.

Deadlines

September Entry:
Refer to ucalgary.ca/future-students/undergraduate/apply

Transfer Students (January Entry)

September 1 for applications
September 30 for documents

Degree-Holding Students (January Entry)

September 1 for applications
September 30 for documents

Note: Qualifying degree must be completed no later than August 31 prior to the admission date.

BN Program at Medicine Hat College Site
March 1 for applications to the University of Calgary

June 1 for documents

Second Baccalaureate Degree

Students who have received one or more approved undergraduate degrees (BA, BSc, BEd, etc.) may apply for admission to the Bachelor of Nursing (Degree Holder Route). Students who hold a previous bachelor’s degree (or equivalent) in nursing, which at the discretion of the University is deemed similar or equivalent, will not be considered for admission.

Students must apply to the Admissions Office and meet all deadlines and requirements. For more information regarding admission to a second undergraduate degree, refer to A.5.5 in Admissions.

Attendance in a Prior Nursing Program

Applicants who have previously been enrolled in a baccalaureate Nursing program at another institution, must submit:

1) a letter which outlines their academic plans and explains their reasons for transferring to the University of Calgary program and;

2) a reference letter from the Dean or Designate of the current/prior Nursing program that the applicant is transferring from, confirming that the applicant was in good academic standing and that they are eligible to continue in the program.

A follow-up interview with the Associate Dean may be required as part of the review process. Admission is not automatic; applicants will be considered on an individual basis. In instances where applicants have failed prior nursing courses or have been required to withdraw from a prior nursing program, the letter must also explain why they are now likely to be successful. Refer to Admissions, section A.6 Required to Withdraw Students for more detailed information.

Immunization Requirements

All nursing students are required to complete a series of immunization and diagnostic tests as outlined on the Student Immunization Worksheet. Documented proof of completion must be provided to the Faculty of Nursing prior to commencement of the program.

Throughout the BN program, students are required to ensure that immunizations are current and must provide proof of updates to the Faculty of Nursing. Failure to do so will result in students being removed from practice courses until such time as adequate proof has been provided. Please note requirements may change during the program as determined by Alberta Health Services guidelines.

N-95 Fit Testing

All Nursing students must be fit tested for an N-95 mask prior to commencement of Term 1 (for High School Students) or Term 3 (for Transfer and Degree Holders). Students may be required to wear this mask in the practice setting to help protect against certain communicable diseases. Documented proof of a fit test must be provided to the Faculty of Nursing prior to commencement of the program. Fit testing is only valid for two years; therefore students must present proof of a second fit testing at the time of expiration.

English Language Proficiency

The Nursing profession requires a high level of spoken and written communication skills in order to ensure patient safety. Students who, after admission, show an inadequate command of spoken or written English must improve their proficiency to the Faculty’s satisfaction in collaboration with the International Foundations Program. Students may be asked to withdraw from the program if their inadequate command of English interferes with their ability to provide patient care.

Students should also be aware of the English Language Proficiency requirements as outlined in A.11 of the Admissions section of this Calendar.

Skills and Abilities for Becoming a Registered Nurse in Alberta

Nursing students require certain basic skills and abilities to progress through a nursing education program and for initial entry to practice as a Registered Nurse in Alberta. Prospective students are encouraged to review the document “Requisite Skills and Abilities for Becoming a Registered Nurse in Alberta (May 2011)” to identify their fit with the requirements of becoming a registered nurse and/or identify their potential need for accommodation in becoming a member of the nursing profession. Examples following each requisite skill and ability are included in
the document in order to provide a snapshot of the nature and kind of activities involved in typical entry-level registered nurse practice.

“Accommodation is the process of making alterations (to the extent of undue hardship) to the delivery of services so that those services become accessible to more people, including people with disabilities. (Alberta Human Rights Commission)

Academic Accommodation Policy

It is important for students with documented disabilities, who have met the admission criteria, to note that the Academic Accommodation Policy does not require the University to lower or substantially modify standards in order to accommodate students with disabilities. Adaptive technology and/or academic accommodations are available to facilitate learning; however, they do not relieve students of their responsibilities to develop the essential skills and abilities expected of all other students.

Police Information Check

All applicants to the Faculty of Nursing are required to provide a current Police Information Check, which includes a Criminal Record Check and a Vulnerable Sector Search. In order to be considered “current”, the Police Information Check must be completed during the three months prior to admission, (i.e. June 1-August 31 for Fall admission; October 1-December 31 for Winter admission). The original Police Information Check must be presented, in person, or via the online ePIC system, to a Faculty of Nursing Student Advisor. Without this documentation, admission to the Faculty will be rescinded. Detailed information, including deadlines, is available on the Faculty of Nursing website at: nursing.ucalgary.ca/undergradprogram/security-clearance.

Students who are concerned about the presence of a criminal record should contact the Parole Board of Canada for information on receiving a Canadian Pardon/Record Suspension.

Failure to present a clear Police Information Check may result in admission being denied/rescinded. An internal University appeal process is available to applicants who are refused admission for this reason.

Subsequent to admission and at any time during the program, a student may be required to produce a current Police Information Check, the results of which could require their withdrawal from the program, in the sole discretion of the University. Students are obligated to inform the Faculty immediately of any change in status of their criminal record.

3.2 Registration

Students should refer to B. Registration of the Academic Regulations section of this Calendar for registration procedures.

Accuracy of Registration

All students are responsible for the completeness and accuracy of their registration and for arranging their course selections to meet all program requirements as detailed in this Calendar.

Interruption of Program Leading to a Degree

Students who interrupt their degree program in the Faculty of Nursing are warned that after an absence of one calendar year from academic study at university level, they may be required to comply with any regulations which may have come into effect in regard to their program and requirements. Students who choose to withdraw for one year will not be required to re-apply for admission. However, they must notify the Faculty of Nursing in advance of their intention to return.

Students who choose to withdraw for more than one year, or students who are required to withdraw for academic reasons must re-apply for admission, and meet all admission requirements including the competitive grade point average.

Students whose program is interrupted due to unforeseen circumstances (e.g. illness, injury, etc.) may not be able to complete the term and may be required to complete all coursework at the next available offering. Each situation will be reviewed on an individual basis by the Associate/Assistant Dean, Undergraduate Programs. [NOTE: Terms 5 and 6 are only offered once per academic year.]

Cardio-Pulmonary Resuscitation Certification

All BN students will be required to submit proof of current CPR Certification (valid for a 12 month period from date of course completion) which includes a Health Care Provider component prior to the commencement of clinical practice courses. Evidence of such certification is to be shown to the practice instructor.

Students will be responsible for obtaining course training and certification.

3.3 Course Work

Course Load

The BN Program is a full-time professional program. Only students admitted to the BN Program will be permitted to register in Nursing (NURS) courses. Students must complete all of the required courses in the term and sequence as they are prescribed (see 4.1 Nursing Program Routes chart).

Since the BN Program is a full-time professional program, students are not allowed to take additional courses while enrolled in Terms 3 through 8, without the express permission of the Associate Dean.

Transfer Credit

Core Nursing courses considered for advanced credit must have been completed within the last five years. There is no time limit on completion of support courses which include non-core Nursing options.

Students must have obtained a minimum grade of “C-” in each Anatomy and Physiology course being presented for transfer credit.

Students should be aware that advanced credits awarded to them are part of the basis on which they have been admitted to the Faculty of Nursing, and therefore are not used in the calculation of grade point averages for promotion purposes.

Prospective students should consult with the Faculty of Nursing if they are planning to take courses as an Open Studies student or through another institution such as Athabasca University.

See 4. Program Details section for specific program regulations.

Course Work at Other Institutions for Transfer of Credit - Visiting Student Status

Only students in Year 1 (Terms 1 and 2) may be authorized to complete some of their program course work at another institution if their registration as a Visiting Student is acceptable to that institution, and if they are in good academic standing in the Faculty of Nursing. Permission for such authorization will be given on a Letter of Permission form and requires the approval of the Faculty of Nursing. A fee of $25.00 will be charged for each Letter of Permission.

On completion of studies, it will be the responsibility of the student to ensure that official transcripts of grades are forwarded directly to a Student Advisor in the Faculty of Nursing so that appropriate credit may be awarded. Students are advised that taking courses at the end of their program may affect their graduation date. Contact a Faculty of Nursing Student Advisor for more information.

Credit in Courses by Special Assessment

The Faculty of Nursing does not allow credit through special assessment for Core Nursing courses. Faculties offering option courses in Year 1 of the BN Program may allow credit through special assessment. Students are referred to the Admissions section of this Calendar for University regulations on obtaining course credits by special assessment. (See B.10.1)

3.4 Student Standing

General Requirements

Academic performance of students registered in the Faculty of Nursing is assessed at the end of each Fall, Winter and Summer Term.

Students must attain a minimum of “C-” in both Kinesiology 259 and 260 in order to progress to Year 2 of the BN Program.

In order to obtain satisfactory standing in the Faculty of Nursing, students must attain a minimum grade of “C-” in all nursing theory courses and a grade of “CR” (completed requirements) in all practice nursing courses.

Students will not be permitted to withdraw from practice nursing courses in order to avoid a failing grade.

Students who receive a “D”, “D+” or “F” grade in a nursing theory course will be required to repeat it, along with all corequisite nursing theory and practice courses and must meet with the Associate/Assistant
Dean (Undergraduate Programs) to determine a progression plan.

Students who receive a grade of “F” in a nursing practice course will be required to repeat it and the corequisite nursing theory courses. Students will be required to withdraw from the corequisite theory courses at the time of the failure of the nursing practice course and must meet with the Associate/Assistant Dean (Undergraduate Programs) to determine a progression plan.

“F” grades in required nursing practice courses and “D”, “D+” and “F” grades in required nursing theory (non-practice) courses must be cleared by repeating those courses before students may progress to any further nursing courses.

Students may repeat a course previously failed or one in which a higher grade is sought. However, students usually will be permitted to repeat a particular course only once. Exceptions to this regulation may be made only in unusual circumstances and at the discretion of the Associate Dean (Undergraduate Programs).

Students will not be permitted to withdraw more than once from a particular course. Students will be required to withdraw from the program if they have accumulated a total of more than 30 units (5.0 full-course equivalents) withdrawals while in attendance at the University of Calgary.

All grades (including original grades in repeated courses) are used in the calculation of grade point averages for purposes of the official University transcript of record and for progression in the Nursing programs as outlined in the sections “Students Previously in Satisfactory Standing” and “Students on Probation.”

### Policies Relative to Practice Experience

Students are advised to read the general University regulations regarding attendance (see E.3) in the section of this Calendar headed Academic Regulations.

Students may be required to complete practice experience at sites other than the location of their residence. Students’ practice experience may also be scheduled at various hours, including evenings, nights and weekends, Monday through Sunday. Nursing students are responsible for all travel, parking and accommodation costs related to practice.

Students must demonstrate satisfactory practice performance as delineated in the behavioural objectives of the course. Participation in all activities that are related to practice courses is mandatory.

Failure to fully participate in practice and tutorial sessions will be reviewed by the faculty members teaching the course. Students are advised that evaluation will be based in large measure on their day-to-day performance.

Students who miss one or more lab/practice days may be at risk of not successfully completing the course. Students may be asked to withdraw from the course and complete the course requirements at a later date or they may be granted a deferral of term work pending availability of resources. If required to withdraw from the practice course, the student may be required to repeat corequisite nursing theory courses. Each situation will be reviewed on an individual basis by the Associate/Assistant Dean, Undergraduate Programs.

Normally, a student will not be permitted to withdraw from a practice course in order to avoid a failing grade in that course.

An instructor may prohibit a student from attending or completing a practice experience if there is evidence that the student has acted in a manner that is detrimental to patient care or that patient safety is at risk.

The Associate Dean will be consulted or informed about any such situation or action. A student who wishes to appeal such a decision will follow the appeals process as outlined below under 3.6 Appeals Process.

### Students Previously in Satisfactory Standing

Students previously in satisfactory standing:

1. Will retain that standing if they have achieved a grade point average of at least 2.00 at the end of Term 2 and Term 4.
2. Will retain that standing if they have achieved a grade point average of at least 2.50 at the end of Terms 6 and 8 on all courses taken since their previous review.
3. Will be placed on probation for a maximum of one academic year if they have achieved a grade point average of 1.70 to 1.99 at the end of Term 2 and Term 4. At the end of Term 4, students will be required to clear probation by repeating all nursing theory and practice courses in the previous term. The student must meet with the Associate/Assistant Dean (Undergraduate Programs) to determine a progression plan.
4. Will be placed on probation for a maximum of one academic year if they have achieved a grade point average of 2.00 to 2.49 at the end of Terms 6 and 8 since their last review. At the end of Terms 6 and 7, students will be required to clear probation by repeating all nursing theory and practice courses in the previous term. The student must meet with the Associate/Assistant Dean (Undergraduate Programs) to determine a progression plan.
5. Will be placed on probation if they are required to repeat any nursing course, regardless of their grade point average.
6. Will be required to withdraw if they have a grade point average of less than 1.70 at the end of Term 2 and Term 4, or less than 2.00 at the end of Terms 6 and 8 since their last review.
7. Will be allowed academic probationary status only once while registered in the Faculty of Nursing.

**Note:** Terms 1 and 2 are taken in Year 1; Terms 3 and 4 are taken in Year 2; Terms 5 and 6 in Year 3; and Terms 7 and 8 in Year 4.

### Students on Probation

- Will be reinstated in satisfactory standing if they have achieved the required cumulative grade point average over all courses taken since and including those on their previous review.
- Will be required to withdraw if they fail to achieve the required cumulative grade point average over all courses taken since and including those on their previous review.
- Will be required to withdraw if they fail to obtain satisfactory standing in any subsequent nursing course, regardless of cumulative grade point average.

Students placed on probation or required to withdraw will be advised in writing.

Students required to withdraw may not apply for readmission in the twelve-month period following their withdrawal. Written application must then be made to the Dean.

### Unsatisfactory Standing

The Faculty Council may refuse permission to a student or prospective student to enter any year of any course, if, in the opinion of the Council, the student shows a lack of general educational attainment. Further, a student whose performance in the practice area, in the classroom, in tests, or in final examinations is unsatisfactory, may at any time be required to withdraw from the Faculty.

**Dean’s List**

The Dean’s List recognizes the outstanding academic achievement of all BN students in the Faculty. The Dean’s List is compiled at the end of Terms 2, 4, and 6. A statement of inclusion on the Dean’s List will be recorded on the student’s transcript. To be included on the Dean’s List, a student must achieve a grade point average of 3.60 or higher on 15 units (2.5 full-course equivalents) in each of the previous terms and must be in good academic standing. Students on academic sanctions as outlined in section K (Statement on Principles of Conduct) of this Calendar are not eligible for the Dean’s List.

### 3.5 Graduation Requirements

To be awarded the Bachelor of Nursing degree from the University of Calgary:

Students must maintain a minimum grade point average of 2.00 at the end of Terms 2 and 4 and 2.50 at the end of Terms 6 and 8 as set out in 3.4 Student Standing.

### Degrees "With Distinction"

The notation “With Distinction” will be inscribed on the permanent record and graduation parchment of all BN students whose grade point average is 3.60 or better in their most recent 60 units (10.0 full-course equivalents) taken through the University of Calgary Faculty of Nursing with no grade less than “C-”. The notation “With Distinction” will not be granted if a student obtains a “D”, “D+” or “F” grade in a Nursing Theory course or an “F” grade in a Nursing Practice course which has been completed during the time period in which the last 60 units...
(10.0 full-course equivalents) have been taken. Students who have taken part of their course work at another institution or who have transferred into the Faculty with fewer than 60 units (10.0 full-course equivalents) remaining to be completed for BN requirements may be granted a degree with distinction at the discretion of the Faculty.

### 3.6 Appeals Process

#### Reappraisal/Appeals

Appeals initiated by students in the BN and BN at Medicine Hat College Site will be governed by the University’s regulations and procedures. Appeals at the Faculty level must be in writing, directed to the Dean and submitted within 15 days of the event or ruling giving rise to the appeal. Any such appeal must specify (a) exactly what is being appealed, (b) grounds for the appeal, and (c) the remedy sought. If sufficient grounds are not specified in the letter of appeal, the Chairperson of the Committee on Appeals may refuse to entertain the appeal.

Also see sections I. Reappraisal of Grades and J. Non-Disciplinary Academic Appeals in the Academic Regulations section of this Calendar.

### 3.7 Fees and Expenses

#### Tuition

Please refer to the Tuition and General Fees section of this Calendar for a breakdown of tuition fees. BN students who take courses in Spring/Summer Intersession will complete degree requirements will be assessed tuition fees. BN students who take courses in the academic calendar base and supervised practice experience.

#### Other Expenses

In addition to textbooks and course packages, Nursing students can expect other additional charges. Examples listed below:

- Uniforms (as outlined in the Faculty of Nursing Uniform Policy)
- Stethoscope
- Police Information Check
- CPR Certification/Re-certification
- Immunizations
- N-95 Fit Test
- Travel to and from practice sites
- Parking Fees at practice sites
- Name badges
- Nurse Registration Examinations

### 4. Program Details

#### 4.1 Bachelor of Nursing Program at the University of Calgary

**Introduction**

The University of Calgary offers an innovative Bachelor of Nursing degree to prepare students for opportunities and challenges of a nursing career in a changing healthcare system. Throughout the program, students are provided with a sound theoretical base and supervised practice experience in a variety of nursing settings.

**Admission to the Program**

See admission regulations in the Admissions section of this Calendar.

**Direct Entry Route (from High School):**

To be eligible for the Direct Entry Route, applicants must be entering directly from high school or be presenting no more than 12 units (2.0 full-course equivalent) transferable post-secondary courses (including University of Calgary courses).

(a) Standard (high school) Admission: English Language Arts 30-1, Mathematics 30-1 or Mathematics 30-2, Biology 30, Chemistry 30 and one other “30” level 5-credit subject.

(b) Adult Student Admission: English Language Arts 30-1, Mathematics 30-1 or Mathematics 30-2, Biology 30 and Chemistry 30. The fifth 5-credit subject is waived.

(c) Transfer students must present the required matriculation subjects as outlined in (a) or (b) above. A transfer average will be calculated and used as outlined in A.2 (Undergraduate Admission) of this Calendar.

**Transfer Route:**

Applicants must present the following high school subjects or equivalent:

- Mathematics 30-1 or 30-2
- Biology 30
- Chemistry 30

Plus the following from an accredited post-secondary institution recognized by the University of Calgary:

- A minimum of 30 transferable units (5.0 full-course equivalents) which must include the following courses, or equivalent, at a junior level or higher:
  - English or a comparable English literature (3 units or 0.5 full-course equivalent)
  - Arts* course (3 units or 0.5 full-course equivalent)
  - Statistics course (3 units or 0.5 full-course equivalent)
  - Human Anatomy and Human Physiologys course(s)** (6 units or 1.0 full-course equivalent with a minimum of grade of “C-“)
  - A transfer grade point average (GPA) which meets the minimum admission average (set annually). Effective Fall Term 2017, the Transfer Admission GPA will be calculated based on the five prerequisites outlined above (English, Arts, Statistics and Anatomy/Physiology), regardless of when they were completed, plus an additional 15 units (2.5 full-course equivalents) taken from the most recent transferable coursework for a total of 30 units (5.0 full-course equivalents) and as per section A.2 (Undergraduate Admission).

*Arts includes any course offered by the Faculty of Arts at the University of Calgary.

**Approved by the Faculty of Nursing.

**Degree-Holder Route:**

Applicants must present the following from an accredited post-secondary institution recognized by the University of Calgary:

- An approved baccalaureate degree.
- A minimum of 90 transferable units (15.0 full-course equivalents) which must include the following courses, or equivalent, at a junior level or higher:
• English or a comparable English literature course (3 units or 0.5 full-course equivalent)
• Arts* course (3 units or 0.5 full-course equivalent)
• Statistics course (3 units or 0.5 full-course equivalent)
• Human Anatomy and Human Physiology course(s)** (6 units or 1.0 full-course equivalent with a minimum grade of "C-"
• A grade point average (GPA) which meets the minimum admission average (set annually). Effective Fall Term 2017, the Transfer Admission GPA will be calculated based on the prerequisite courses outlined above (English, Arts, Statistics and Anatomy/Physiology), regardless of when they were completed, plus an additional 15 units (2.5 full-course equivalents) taken from the most recent transferable coursework for a total of 30 units (5.0 full-course equivalents) and as per section A.2 (Undergraduate Admission).

*"Arts includes any course offered by the Faculty of Arts at the University of Calgary.
**Approved by the Faculty of Nursing.

Limitation of Enrolment

Enrolment in the BN program is limited. Applicants will be accepted on the basis of academic standing in high school and/or previous post-secondary education completed.

Deferral of Admission

Due to the high demand of this quota-based program, requests for deferral of admission will not normally be granted.

Course Requirements

Students are required to register according to the following schedule. Terms 1 and 2 (see “Nursing Program of Study” Table) are for students admitted to the Direct Entry Route (from High School). Students admitted to the Transfer and Degree-Holder Routes are exempt from completing these Terms; therefore, they commence the program in Term 3.

It is important to note that students will not be permitted to switch routes mid-program.

Nursing Program Routes

See the "Nursing Program Routes Table". Students in all three routes of the BN Program are required to complete the following program of study.

Nursing Program of Study

See the "Nursing Program of Study Table". Students admitted to the four-year program route must successfully complete all ten Term 1 and Term 2 courses as outlined under “Course Requirements” prior to commencement of Year 2 (Term 3), unless approved by the Associate Dean, Undergraduate Programs.

Terms 1 and 2 consist of the following required courses:

Kinesiology 259
Academic Writing 303
Junior Arts Option (Suggestions: Psychology 200, 203 or Sociology 201)
Kinesiology 260
Junior Statistics Option (Statistics 205 recommended)
Philosophy Option (Philosophy 249, 259, 313 or 347 recommended)
Junior Open Option (Science option recommended)
Junior Open Option
Open Option
Open Option

Other Requirements

Promotion from year to year is by recommendation of the Faculty of Nursing. For the purposes of promotion, Terms 1 and 2 are taken in Year 1; Terms 3 and 4 in Year 2; Terms 5 and 6 in Year 3, and Terms 7 and 8 in Year 4. The minimum requirement is a grade point average of 2.00 in each of the first two years and 2.50 in each of the last two years. Refer to 3.4 Student Standing: Students Previously in Satisfactory Standing.

Program Regulations

Duration of Degree Program

Except with special permission of the Dean, the BN degree must be completed within seven calendar years from the date of initial registration in the program.

Transfer Credit

Students transferring from other institutions or faculties within the University are considered on an individual basis. However, students will be required to complete the equivalent of not fewer than ten courses, at least six of which must be Nursing courses taken as a BN student.

Nurse Registration Examinations

In order to be considered eligible to write the National Council Licensure Examination (NCLEX), BN students are required to complete the fourth year program requirements with a minimum 2.50 grade point average.

4.2 Bachelor of Nursing Program at Medicine Hat College Site

Introduction

The Bachelor of Nursing program at Medicine Hat College is a four year partnership program offered entirely at the Medicine Hat College site, allowing students in the Medicine Hat area increased access to a baccalaureate program without having to relocate. This innovative Bachelor of Nursing degree program prepares students for the opportunities and challenges of a nursing career in a changing health-care system. Throughout the program, students are provided with a sound theoretical base and supervised practice experience in a variety of nursing settings.

Admissions

Students will apply to enter the program in year one at Medicine Hat College. Upon successful completion of their first two years of the program and upon meeting the University of Calgary Faculty of Nursing admission criteria (minimum 2.00 GPA on the last 30 units or 5.0 full-course equivalents), students apply to enter the University of Calgary as third year students. The remaining courses will be completed as University of Calgary students at Medicine Hat College.

Course Requirements

1st Year

First and Second Years of the program are Medicine Hat College courses.

Terms 1 and 2

Biology 275
English 252
Statistics (Statistics 333 recommended)
Biology 277
Junior Arts Option (Suggestions: Psychology 205 or Sociology 201)
Philosophy Option (Philosophy 313 recommended)
Junior Open Option (Cellular, Molecular and Microbial Biology 250 recommended)
Junior Open Option (Interdisciplinary Studies 100 recommended)
Junior Open Option
Junior Open Option

2nd Year

Term 7

Nursing 585
Nursing 587
Nursing Senior Option
Nursing Senior Option
Nursing 589
Term 8
Nursing 599

First and Second Year course descriptions will not be listed in the University of Calgary Calendar since students must complete them prior to their admission to this institution.

Other Requirements
Promotion from third year to fourth year is by recommendation of the University of Calgary Faculty of Nursing. For purposes of promotion, the academic year is considered to be from September 1 of one year to August 31 of the next. Hence, Spring/Summer grades are calculated with the previous Fall/Winter Term grades. The minimum requirement is a grade point average of 2.50 in each of the third and fourth years.

Program Regulations
Duration of Degree Program
Except with special permission of the Associate Dean (Undergraduate Programs), the BN degree must be completed within seven calendar years from the date of initial registration in the program.

Nurse Registration Examinations
In order to be considered eligible to write the nurse registration examinations, BN students at the Medicine Hat College Site are required to complete the fourth year program requirements with a minimum 2.50 grade point average.

4.3 Bachelor of Nursing (Qatar Campus)

Introduction
The University offers four-year Bachelor of Nursing and two-year post-diploma Bachelor of Nursing degree programs through the Qatar Faculty located in Doha, Qatar. For more information see ucalgary.ca/pubs/calendar/current/ucq-1.html or qatar.ucalgary.ca/.

5. Administration

*Combined Degree

Undergraduate

BSc Programs

The Schulich School of Engineering administers regular four-year programs leading to the BSc degree in Chemical, Civil, Electrical, Chemical, Mechanical, Oil & Gas, and Software Engineering and a polytechnic transfer program leading to the BSc in Energy Engineering.

Specialization

The Departments of Chemical and Petroleum Engineering, Civil Engineering, Electrical and Computer Engineering, Geomatics and Mechanical and Manufacturing Engineering offer a specialization in Biomedical Engineering which can be combined with the regular four-year programs leading to the BSc degree in Chemical, Civil, Electrical, Geomatics, Mechanical and Software Engineering.

The Departments of Chemical and Petroleum Engineering, Civil Engineering, Electrical and Computer Engineering, Geomatics and Mechanical and Manufacturing Engineering offer a specialization in Energy and Environment, which can be combined with the regular four-year programs leading to the BSc degree in Chemical, Civil, Electrical, Geomatics, Mechanical and Software Engineering.

Minors and Concentrations

In addition, the Department of Electrical and Computer Engineering offers an Electrical Engineering degree with a Minor in Computer Engineering, the Department of Chemical and Petroleum Engineering offers a Chemical Engineering degree with a Minor in Petroleum Engineering, the Department of Civil Engineering offers minors in Structural, and in Transportation Engineering, the Department of Geomatics Engineering offers a Geomatics Engineering degree with a Concentration in Cadastral Surveying, the Department of Mechanical and Manufacturing Engineering offers a Mechanical Engineering degree with minors in Mechatronics, Manufacturing Engineering or in Petroleum Engineering (offered in conjunction with the Department of Chemical and Petroleum Engineering). The Schulich School of Engineering in conjunction with the Haskayne School of Business offers a Minor in Entrepreneurship and Enterprise Development.

Engineering Internship Program

The Schulich School of Engineering also provides the option of an Internship Program. The Engineering Internship Program is a five-year program which includes, in addition to the regular four-year academic program, an internship year (a minimum of twelve and a maximum of sixteen consecutive months) of supervised work experience in industry.

Combined Programs

Undergraduate engineering students may combine their engineering degree with other undergraduate degrees and/or minors offered at the University of Calgary. Program details are given in the section 4.12 Combined Programs.

Graduate

Graduate work leading to the MSc, MEng and PhD degrees is offered by all engineering departments under the administration of the Faculty of Graduate Studies. Details of these programs appear in the Faculty of Graduate Studies Calendar.

Diplomas

Diplomas of the Schulich School of Engineering, which provide special qualifications in designated areas, are also offered.
For additional details see the section 4.13 Diplomas.

**Diploma of the Schulich School of Engineering**

The Schulich School of Engineering sponsors a diploma program providing additional special qualifications in designated departments which lead to the Diploma of the Schulich School of Engineering. This program is intended primarily for professional engineers engaged in practice who are not interested in submitting to the discipline of a true graduate degree including a thesis. The Schulich School of Engineering also sponsors a diploma program providing additional specialization in Environmental Engineering. This diploma is intended for professional engineers or holders of equivalent approved degrees and leads to the Diploma of the Schulich School of Engineering in Environmental Engineering.

**Diploma of the Schulich School of Engineering and the Haskayne School of Business in Project Management Specialization**

The Schulich School of Engineering and the Haskayne School of Business jointly sponsor a diploma program providing additional special qualifications in the area of Project Management which leads to the Diploma of the Schulich School of Engineering and of the Haskayne School of Business in Project Management. This program is intended primarily for professionals engaged in practice who are not interested in the MSc or MEng degrees.

### 2. Faculty Information

**Contact Information**

**Engineering Student Centre**

**Location:** Engineering C 205

**Student Information:** 403.220.5732

**Website:** schulich.ucalgary.ca/

**Introduction**

The Schulich School of Engineering at the University of Calgary was established in 1965. The degrees awarded by the Schulich School since its inception have been recognized by the Canadian Engineering Accreditation Board (CEAB). The engineering curriculum consists of a well-balanced mixture of traditional topics in engineering sciences and specialization in subjects relevant to current industrial practice. The academic staff and students of the Schulich School of Engineering come from all parts of the world, giving the Schulich School its uniquely friendly and international atmosphere.

**Enquiries**

Enquiries regarding admission, registration, interpretation of regulations, or any matter regarding undergraduate studies in Engineering should be directed to the Engineering Student Centre, Engineering C 205, telephone 403.220.5732. Students and prospective students are invited to view pertinent information available through the engineering website, schulich.ucalgary.ca/.

### Pattern

Admission to the four-year programs offered by the Schulich School of Engineering normally takes one of two forms: (1) Students are admitted to the first year of the program directly from high school; (2) Students are admitted to the first year or second year of the program after having received advanced credits from another University of Calgary faculty or from another post-secondary institution.

The first year of the four-year Engineering programs is common to all students. In April of the first year of study, students apply for admission to a discipline: Chemical, Civil, Electrical, Geomatics, Mechanical, Oil & Gas, or Software Engineering. Admission to the discipline is based on the grade point average (GPA) and the courses taken during the first Review Period. During second year, students not only complete courses common for all disciplines, but also courses specific to their chosen discipline. In the third year students take specialized courses in their chosen discipline.

Admission to the BSc in Energy Engineering requires prior completion of a Diploma in Engineering Technology from an accredited engineering technology program from a technology discipline relevant to Energy Engineering. See 3.1 Admission to the BSc in Energy Engineering Program for more detailed information.

At the end of third year students at their option may enrol in the Engineering Internship Program (EIP); this program consists of 12 to 16 months of work in an industry setting where students gain valuable practical engineering experience (see 4.14 Engineering Internship Program). This academic program is available to all students who have completed third year and are in good standing.

In some disciplines during the fourth year of study (fifth year for Internship enrollees) students have the option to take a minor in one of several areas. In addition to the technical requirements, students take complementary studies courses in non-Engineering and non-Science subjects as an integral component of an Engineering education. This pattern is somewhat different for students who enrol in a combined degree program with one of the other faculties of the University of Calgary (see 4.12 Combined Programs).

**Opportunities**

To practice in Canada as a professional engineer (P.Eng.) one must be registered (licensed) with the professional engineering association of the province or territory in which one practices. All BSc degrees offered by the Schulich School of Engineering are accredited by the Canadian Engineering Accreditation Board (CEAB) of Engineers Canada to a standards of the 12 professional engineering associations in Canada which registers and licenses engineers. Students graduating from these programs fulfill the academic requirements for registration as Professional Engineers with the province or territory where they choose to practice.

### Student Affairs

**Engineering Students’ Society (ESS)**

The Engineering Students’ Society (ESS) is an organization affiliated with the Association of Professional Engineers and Geoscientists of Alberta. The ESS provides a social atmosphere for engineering students and, in addition, acquaints them with the professional and technical responsibilities of the profession. It is expected that all engineering students will join the Society, participate in its activities and promote its interests.

By majority vote of the engineering-student population, in 1995 the Engineering Students’ Society established the Calgary Engineering Endowment. A $25.00 per term optional levy is included in the tuition of every engineering undergraduate student. Interest from the endowment is used to purchase equipment for the undergraduate laboratories. The funds are distributed by the Endowment Board of Directors whose membership consists of a majority of undergraduate students. Proposals are requested in March of each year.

### 3. School Regulations

**Students in the Schulich School of Engineering**

Students in the Schulich School of Engineering are governed by the academic regulations contained in this section and also in the Academic Regulations section of this Calendar. Students are advised to read and consider all regulations and, in cases of doubt as to precise meaning of any statement or regulation, to consult the Engineering Student Centre, Schulich School of Engineering, Engineering C 205.

#### 3.1 Admissions

**Admission Requirements**

New applicants should refer to A.2 in the Admissions section of this Calendar for regulations regarding University admission. Students wishing to enrol in the Schulich School of Engineering must meet minimum admission requirements for Standard Admission as set out in the Admissions section of this Calendar.

Students who have completed most of their high school work two or more years prior to the time of application should contact the Engineering Student Centre.

Students required to withdraw from another faculty or another post-secondary educational institution because of an unsatisfactory academic record will not normally be considered for admission to the Schulich School of Engineering within 12 months of the withdrawal. Students seeking admission or readmission to the Schulich School of Engineering who have been determined (through due process) to be guilty of academic or non-academic misconduct at this or any other academic institution must accompany their application with a letter of explanation and will be considered for admission on an individual basis. Students who have been expelled from the Schulich School of Engineering may not apply for readmission.
Students coming directly from high school must present English Language Arts 30-1, Pure Mathematics 30, Mathematics 31, Physics 30 and Chemistry 30 as specified in the Admissions section of this Calendar. They may apply for admission by the deadline indicated in the Applications for Admission Schedule and submit transcripts to the Registrar’s Office as soon as final grades become available and, in any case, not later than June 30. Students who have never taken Mathematics 31 and present another matriculation subject (e.g., Biology 30, Social Studies 30) instead of Mathematics 31 and who achieve a high standing (at least five per cent above the admission standard) over the five subjects used for admission purposes may be admitted to the School under special conditions. These conditions involve enrolment in an alternative calculus stream.

Students who have attended a post-secondary institution must apply for admission by the appropriate deadline and submit all transcripts to the Registrar’s Office as soon as possible but not later than June 30. All applicants must present senior matriculation standing (or equivalent) in the five specified high school subjects, even though they may have attended a post-secondary institution.

Applicants who have a CEAB-accredited engineering degree may be considered for admission to a subsequent engineering degree at the University of Calgary if the degree program requested is determined by the Associate Dean (Student Affairs) to be sufficiently different from the prior degree program. A minimum of 30 units (5.0 full-course equivalents) is required for completion of a University degree. Students admitted under this regulation may, depending on how much transfer credit they are granted, have the Minimum Residence Time regulation waived.

Aboriginal Applicants
The Schulich School of Engineering is committed to enhanced access for aboriginal applicants. In accordance with the University Aboriginal Admission Policy, spaces have been set aside for aboriginal applicants seeking to enter first year from high school or seeking to enter first or second year as a transfer or change-of-faculty student. Application should contact the Associate Dean (Student Affairs) for more information.

Student Athletes
The Schulich School of Engineering encourages applications from student athletes. The school maintains a program that allows Varsity and National team students in first year to balance their academic workload with athletic responsibilities.

Admission to Engineering Program
Choice of an engineering program (Chemical, Civil, Electrical, Geomatics, Mechanical, Oil & Gas, or Software) is normally made during the Winter Term of the first year of studies. Students in the BSc in Energy Engineering are admitted directly into their program. While a place in at least one of the programs is assured for every student advancing to second year with satisfactory performance, it is not always possible to accommodate every student’s first choice of program. Students will not normally be admitted to a program if they are deficient in more than two courses from the first year program or if they are deficient in any courses which are prerequisites for second year courses in the program of choice.

First year Engineering students wishing to enter the Biomedical Engineering Specialization or the Energy & Environment Specialization must apply for admission to the Biomedical Engineering Specialization program or the Energy & Environment Specialization at the same time the choice of an engineering program is made.

In the event that the number choosing a program exceeds the program quota, students will be admitted to the program in order of academic performance until the enrolment limit is reached. Academic performance is judged on the student’s GPA for those courses required for the engineering program and taken during the last review period. Priority is generally given to students who have taken a full course load in their last review period and who have all courses in the first year program complete. The exact policy for prioritization of students is determined by the Associate Dean (Student Affairs) and may be revised from year to year. Students may obtain information on current policy from the Engineering Student Centre.

Students admitted to a program at the second year level include the continuing students who have completed their first year successfully in the School and transfer students. Many transfer-student files are not complete and thus no admission decision has been taken at the time registration starts in the summer. To give transfer students a fair opportunity for admission to their program of first choice, a certain number of places will be set aside for continuing students and the remaining places will be retained for transfer students. The number of places in the two categories will be decided each year based on an assessment of the demand, with the objective of admitting transfer and continuing students to each program with equivalent qualifications. Transfer students are assessed for program admission on an equivalent basis to continuing students in terms of (a) the courses for which they have obtained transfer credit towards the engineering technical program, and (b) their GPA on those courses. Continuing students who have not registered in both Fall and Winter Term classes in their year, or the Summer of Year 1 will not be guaranteed their place in their program.

Students who have not been admitted to a program will not normally be permitted to register in courses specific to that program, even if there is room in one or more courses specific to a program.

Admission to Minors
Application to a Minor within an engineering program is made during the Winter Term.

To be considered for admission into any of: Computer Minor in Electrical Engineering; Structural or Transportation Minors in Civil Engineering; or Petroleum, Manufacturing, or Mechatronics Minors in Mechanical Engineering, students will be evaluated based on the most recent 10 courses (pertaining to degree requirements) completed at U of C at the time of selection. For the Computer Minor, students must have completed (or be on-track for completion of) second year curriculum in Electrical engineering; and for all other minors listed above, students must have completed (or be on-track for completion of) third year curriculum in the appropriate program.

To be considered for admission into any of: Petroleum minor in Chemical Engineering, or the Minor in Entrepreneurship and Enterprise Development (MEED), students must apply in their first year of studies. Requests from upper year students for MEED will be considered if space permits; see the Engineering Student Centre for details. For the Petroleum minor, a student must be first placed into Chemical Engineering; and for the MEED minor, a student must first be placed into a program. Students will be evaluated for these two Minors as outlined in Admission to Engineering Program (above).

Admission to the BSc in Energy Engineering Program
Applicants must have a Diploma in Engineering Technology from an accredited engineering technology program from a technology discipline relevant to Energy Engineering. Admission is competitive and applicants must have an admission average of at least 3.30 calculated over all courses comprising the engineering technology program to be eligible for admission consideration. However, we may also consider a range of accomplishments and qualifications, including:

- Overall grade point average (GPA)
- Schulich School of Engineering minimum course requirements
- Work experience

Notes:
1. This average is based on the marks/grades received by the applicants in the required courses for their engineering technology diploma.
2. For students who are in the process of completing their engineering technology diploma, admission will be based on the average calculated for the first three terms of study (Fall/Winter of Year 1 and Fall of Year 2) and will be conditional on successful completion of the student’s engineering technology
program prior to admission to the BSc in Energy Engineering program.

3. The minimum course requirements for BSc in Energy Engineering applicants are noted in Section A.5.1.2 of the University Calendar. Individual course requirements may be substituted by equivalent courses taken as part of the applicant’s engineering technology diploma.

Detailed application requirements are available in the Online Supplementary Application.

**Admission to the International Foundations Program (IFP)**

**Pathways Stream**

Applicants to the IFP Pathways stream are subject to the general requirements for admission to the Schulich School of Engineering listed under Admissions Requirements above. In addition, applicants must meet the minimum English Language Proficiency (ELP) scores for the IFP Pathways stream, as shown in A.11 Admissions.

Students admitted to IFP Pathways must complete the IFP Pathways curriculum and cannot submit ELP scores for early exit. The IFP Pathways curriculum is completed over two years, concurrently with the regular Schulich School of Engineering first-year curriculum (see A.18 International Foundations Program (IFP) Pathways).

**Limited Enrolment**

Enrolment in the Schulich School of Engineering is limited. Applicants will be accepted on the basis of academic standing in high school and/or previous course work completed. As a consequence of the limitations in enrolment, the following procedures apply. In addition, refer to information given under the heading Admission to Engineering Program.

**Readmission after Voluntary Withdrawal**

Students who withdraw voluntarily from the Schulich School of Engineering for two consecutive terms (Fall and Winter Terms of one academic year, or Winter Term and the following Fall Term) and who wish to return, must re-apply for admission by the prescribed deadlines and will be considered in competition with all other applicants. Students are encouraged to consult with the Associate Dean (Student Affairs) prior to making a decision concerning voluntary withdrawal.

**Transfer of Course Credits**

The Schulich School of Engineering may grant transfer credit to students for courses taken in another post-secondary educational program. Students must normally have obtained an acceptable overall academic standing to be eligible for transfer credit. Transfer credit will be considered for courses which are approximately equivalent to courses in the Engineering program and in which grades of “C-" or higher have been obtained. Transfer credit for a course will not be granted unless the student has obtained credit for the prerequisites for that course (as listed in this Calendar). The maximum number of transfer credits for technical courses that will be awarded is 45 units (7.5 full-course equivalents), except that more may be awarded to a student admitted after completing a CEAB-accredited Engineering degree. Transfer credits for third and fourth year technical courses will only be granted if the instructor(s) of the transferring courses hold a Professional Engineering degree or the equivalent in jurisdictions recognized by the CEAB. Credit for Engineering 513 will only be granted when the transferring course is from another CEAB or Accreditation Board for Engineering and Technology accredited program (or the equivalent in jurisdictions recognized by the CEAB).

Credit will not normally be granted for courses taken more than 8 years prior to the date of admission to the Schulich School of Engineering.

**Minimum Residence Time**

To qualify for a degree, a transfer student must successfully complete at least four regular terms of full-time study and a minimum of 60 units (10.0 full-course equivalents) while registered in the Schulich School of Engineering.

**Second Baccalaureate Degree**

Students who have received one or more approved undergraduate degrees (BA, BSc, BED, etc.) may apply for admission to programs leading to a Second Baccalaureate Degree with a Major Field or a Second Baccalaureate Degree program with Honours in a Major Field. Students must apply to the Admissions Office and meet all deadlines and requirements. For more information regarding admission to a second undergraduate degree, refer to A.5.5 in Admissions.

**3.2 Registration**

**Accuracy of Registration**

All students are responsible for the completeness and accuracy of their registration and for arranging course selections to satisfy graduation requirements.

**Management of Course Registration**

The Schulich School of Engineering may prioritize registration in certain courses to ensure that students are able to register in course sections appropriate to their program and that the available capacity is used to best support students’ progression through their programs. Students may contact the Engineering Student Centre for clarification of registration management practices and for assistance with registration, as required.

**3.3 Course Work**

**Prerequisites**

To register in an undergraduate course delivered by the Schulich School of Engineering, a student must have obtained a grade of at least "C-" or better in each prerequisite course.

This regulation takes effect at the beginning of the Fall 2013 session. Prior to Fall 2013 “D” and “D+” grades were acceptable as prerequisites (except when such grades meant that credit would not be given for the course under Student Standing regulations). If a student obtained a “D” or “D+” in a course in Summer 2013 or earlier (and is not required by Student Standing regulations to repeat the course), the grade in that course will be considered acceptable in courses for which it is a prerequisite.

**Equivalent Courses**

Approval may be given by the Associate Dean (Student Affairs) or by the relevant Department Head for a student to replace one or more courses in the Engineering program by registering in equivalent courses in other faculties. To receive credit, the student must normally obtain a grade of “C-” or higher.

**Final Year Technical Options**

A student in the final year of the Engineering undergraduate program, who has a high academic standing, may be permitted to substitute a graduate course(s) for a fourth year departmental course(s) with the approval of the department. The undergraduate grading scheme will apply to this student.

**Part-Time Studies**

Because space in the School is limited, students are encouraged to complete all required courses for their year of program within each academic year. Students who have not yet been placed in a specific degree program are advised that taking a reduced course load may disadvantage them when they are ranked for placement in programs. As long as students take at least 9 units (1.5 full-course equivalents) (not including Block Week courses) in each of the Fall and Winter Terms, they will be allowed to continue in Engineering as long as all other requirements for satisfactory standing are met. Students who take two or fewer courses in Fall or Winter without valid reason for doing so may be required to withdraw or may lose their space in their degree program. This applies as well to students who start a term in three or more courses but complete two or fewer due to withdrawals from courses. Students who wish to take two or fewer courses in a Fall or Winter Term for valid reasons must request permission from the Associate Dean (Student Affairs). Valid reasons include (but are not limited to): inability to take courses due to missing prerequisites; inability to take courses due to not having been placed in a degree program; extraordinary extracurricular activities such as national team athletic training and competition; extenuating circumstances such as serious disability, illness, or family issues.

As many required courses are not offered during the evenings or during the Spring or Summer Interession, students should anticipate that it will not be possible to complete their degree without a significant time commitment on weekdays during several Fall and Winter Terms.
3.4 Academic Performance, Review, and Student Standing

For normal advancement towards the degree, students must register in courses directly applicable to the degree program in which they are registered and must maintain satisfactory performance in their programs. Students are referred to the general University regulations regarding Unsatisfactory Standing. Students who maintain a course grade of "C-" or higher for a course that is a prerequisite for one or more courses that are required for graduation in their program may continue in the program.

Courses that fail to meet the minimum grade requirement will be recorded on the student's academic record as "W," indicating withdrawal. Students whose grades fall below the minimum requirement for the program will be placed on academic probation. In such cases, the student may be denied registration in higher-level courses until they have transferred the required course(s).

The required sequence of complementary studies courses for the Engineering program is as follows:

- Engineering 209 (Economics 209) - not open to first-year students
- Engineering 481
- Engineering 213 or Communications Studies 363
- Engineering 513
- Two general complementary studies courses are required for all programs except in the following cases:

  - For Chemical Engineering and Oil and Gas Engineering Programs, students are required to take three general complementary studies courses.

General complementary studies courses must be selected from the list of acceptable courses which may be obtained from the Schulich School of Engineering Student Centre and via the following link: schulich.ucalgary.ca/education/current-students/undergraduate/degree-programs-minors-and-specializations/complementary.

Note inclusions to the list of acceptable general complementary courses for specific programs:

- Energy Management 301, which is required in the Environment and Environment Specialization, counts as a general complementary studies course.
- For Geomatics Engineering Programs (except for Geomatics with Energy and Environment Specialization), Business and Environment 395 may be used as a general complementary studies course.

The sequence of complementary studies courses for BSc in Energy Engineering students is listed in 4.5. Energy Engineering students may not use Economics/Engineering 209 or Engineering 213 or Communications Studies 363; these students must take two general complementary studies courses.

A. Academic Performance and Progress

A.1. Clearing Courses - Students with one or more grades insufficient to clear a course (based on the minimum grades specified below), or course withdrawals “W,” in the courses taken during the period under review shall clear such courses in the following review period. The following minimum grades are required to clear a course:

- "C-" or higher for a course that is a prerequisite for one or more courses that are required for graduation in their program
- "D" or higher for a course that is not a prerequisite for any course that is required for graduation in their program

Students who have not yet been placed in an Engineering program:

- "C-" or higher for a course that is a prerequisite for one or more courses that are required for graduation in all Engineering programs
- "D" or higher for a course that is not a prerequisite for any course that is required for graduation in at least one Engineering program

Consistent with University regulations, the same course may normally be attempted no more than twice. A student who fails to clear a required course after two attempts may be required to withdraw or placed on academic probation.

A.2. Degree Progression - Students must prioritize lower-level courses before proceeding to higher-level courses even if they have the prerequisites for the higher-level courses. Students who have failed to clear a course that is a prerequisite for one or more required higher-level courses in their current program (with a "C-" or higher grade as required by A.1 above) may be denied registration in higher-level courses until they have cleared the prerequisite course.

A.3. Timely Completion - A student who, after eight calendar years from initial registration in the Engineering program, has not completed degree requirements, will be denied further registration in Engineering. (The eight years does not include time spent in the Internship Program, if any, or the extra time spent by those students in the combined degree programs.) For a transfer student, the permissible number of years will be prorated according to the number of credits in the program. Students with approved accommodations based on an assessment by Student Accessibility Services may be allowed additional time to complete their program, subject to approval by the Associate Dean (Student Affairs). Clarification may be obtained from the Engineering Student Centre.

B. Review and Student Standing

B.1 Dean's List

To be included in the Dean's List, a student must achieve a grade point average of 3.60 or higher during the review period, with at
least 30 units (10 half-course equivalents) taken over the immediately preceding 12 month period of May 1 to April 30. Students who have completed fewer than 30 units during the 12 month period are eligible for the Dean's list only if their program of study has been assessed by Student Accessibility Services to be equivalent to full-time studies for a particular student. Students on academic sanction as outlined in section K (Statement on Principles of Conduct) of this Calendar are not eligible for the Dean's List.

B.2 Good Standing

B.2a. A student who has a grade point average (GPA) of 2.00 or higher on 18 units or more (6.0 or more half-course equivalents) of courses taken during the period under review will be considered to have satisfactory performance and will be placed in Good Standing.

B.2b. A student who has a grade point average (GPA) of 2.00 or higher on fewer than 18 units (6.0 half-course equivalents) of courses taken during the period under review may be considered to have satisfactory performance, subject to recommendation by the Associate Dean (Student Affairs) and/or review of the student’s record by the Engineering Undergraduate Studies Committee.

B.3 Academic Probation

B.3a Placement on Academic Probation - A student in Good Standing, who has not been on Academic Probation for the past five years, and who has a grade point average of 1.70 or higher, but less than 2.00 in the current review period will be placed on Academic Probation.

B.3b Clearing Academic Probation – In order to clear Academic Probation, students must

1. clear (see A.1 Clearing Courses above) all courses in which they earned an insufficient grade or from which they withdrew ("W") in a previous review period; and

2. attain a GPA of 2.00 or greater in the review period.

Students on Academic Probation may have further restrictions placed on their registration such as denial of registration in upper-level courses.

B.3c Academic Turnaround Program and Academic Probation - A student who is facing their first Required to Withdraw ruling for academic reasons will be offered to participate in the Academic Turnaround Program. Students who accept this invitation by the deadline specified in the invitation letter and who complete the requirements to initiate participation in ATP will be placed on Academic Probation.

B.3d Clearing Academic Probation for participants in the Academic Turnaround Program - In order to clear Academic Probation, students must

1. attain a GPA of 2.00 or greater in the review period; and

2. meet all other requirements of the Academic Turnaround Program, including participation in required workshops and seminars; and

3. complete a minimum of 18 units since joining the Academic Turnaround Program; and

4. clear all courses in which they earned an insufficient grade to clear the course (see A.1 Clearing Courses above) or from which they withdrew ("W") in a previous review period.

Students who have met conditions i. and ii. above at the end of the first review period after joining the Academic Turnaround Program may be allowed to continue on Academic Probation in the Academic Turnaround Program for a second year, subject to the approval by the dean or designate of a plan for successful completion of requirements i. to iv. by the following review.

B.4 Required to Withdraw (RTW)

Students under review may be Required to Withdraw from the Schulich School or Engineering for the following reasons:

B.4a - failing to clear all first year courses by the end of their second review period; or

B.4b – failing to achieve a grade point average of 2.00 or greater for the period under review after having previously been placed on Academic Probation and/or failing to clear other terms of an Academic Probation. Students are permitted a maximum of one probationary period while registered as an undergraduate student at the University of Calgary, unless probationary periods are more than five years apart; or

B.4c – failing to achieve a grade point average of 1.70 in the period under review.

B.4d – failing to meet all requirements of the Academic Turnaround Program.

Students that are required to withdraw will not be permitted to register in any course specified as part of the degree requirements in Engineering for a period of 12 months from the date of withdrawal. A student who has been required to withdraw may apply for readmission by the University of Calgary, unless probationary periods are more than five years apart. Students applying for readmission must respect application and transcript deadlines posted by the University of Calgary Admissions Office; these deadlines are typically several months in advance of the beginning of the Fall Term. Readmission is not automatic and will be considered on an individual basis in competition with all other admission applications received. On readmission, students’ records will be reviewed to determine credits to be awarded.

Notes:

1. The above regulations are stated in terms of grades in three-unit courses (half-course equivalent). A grade in a six-unit course (full-course equivalent) will be considered to be equivalent to two such grades.

2. The method used to determine the grade point average is described under F. Academic Standing in the Academic Regulations section of this Calendar.

3. Grades obtained in courses in the Spring/Summer Intersessions are not used to alter retroactively the ruling made on a student’s performance at the end of the previous review period.

Mitigating Circumstances

Students who would normally be required to withdraw may be placed in an Academic Probation instead if they have experienced serious mitigating circumstances and can demonstrate that they have good prospects for future success. Students who believe that they fall into this category should discuss their situation with an Engineering Student Centre advisor at the earliest possible opportunity and no later than the end of Winter Term.

C. IFP Pathways Stream

IFP Pathways students are subject to a joint academic review process by the Schulich School of Engineering and the Werklund School of Education. The regulations set out in sections A and B above apply to IFP Pathways students. In addition, IFP Pathways participants must achieve a grade of “C” or better in general academic language instruction courses (IFPX), and a “Pass” in adjacent language support classes (IFPE) to continue in their program of studies. Appeals related to IFPE and IFPX courses will be heard by the Werklund School of Education, while other appeals will be heard by the Schulich School of Engineering.

- If an IFP Pathways student fails a course from the regular Schulich School of Engineering first-year curriculum (4.1 First Year Curriculum), the student will be required to retake the course at the next available opportunity. If, at the end of the second IFP Pathways year, a student is deficient in three or more technical courses, the student may be required to complete an additional year in the common first-year program in order to be placed into a second year Engineering program. Students who fail to clear the common first-year curriculum courses within twelve months of completing the two-year IFP Pathways curriculum (three years total) will be required to withdraw.

- As part of the academic review, the student may be offered or required to repeat the corresponding IFPE adjunct course.

- If an IFP Pathways student fails the final exam in an International Foundations Program (IFPX) discrete course, but has earned a passing grade (cumulative) on all term work, the student may be offered a remedial summative assessment. Otherwise, if a student fails an International Foundations Program (IFPX) discrete course, the IFPX course must be repeated in order to clear the English Language Proficiency requirement. The student is given an opportunity to clear the IFP Pathways requirements will be required to withdraw.

- If an IFP Pathways student fails the final exam in an International Foundations Program Engineering (IFPE) adjunct course, but has earned a passing grade (cumulative) on all term work, the student...
Supplemental Examinations for Graduating Students

At the discretion of the Engineering Undergraduate Studies Committee, supplemental privileges may be granted to fourth-year students. If these privileges are granted, the student will be informed in writing and may then make application to write the examinations prescribed. Supplemental examinations may be granted in Engineering courses required in the final year program to those students who, at the time of the convocation meeting of the Engineering Undergraduate Studies Committee, will be eligible to graduate if one or two "D", "D+" or "F" grades are raised to the required grade.

Where courses other than Engineering courses are involved, the successful completion of another approved course may be accepted as clearing the deficiency. A student may be granted supplemental privileges for graduating students only once and to a maximum of two supplemental examinations in the courses taken since the last review. Supplemental examinations granted during an academic year will normally be written in the following August.

3.6 Graduation

Graduation Requirements

Students are required to obtain credit for the full set of courses listed in the Calendar for any particular program.

For graduation in all branches of Engineering, a student must have an overall grade point average of at least 2.00 with no uncleared "F" grades. The average will be calculated by using the numerical equivalent of the best grade in each course taken. A six unit (full-course equivalent) course will be counted as two three-unit (half-course equivalent) courses for this purpose.

Note: An "F" grade in any technical elective course or complementary studies elective course may be cleared by a passing grade in another acceptable technical elective or complementary studies elective, respectively.

Degrees "With Distinction"

The notation "With Distinction" will be inscribed on the permanent record and graduation parchment of students who obtain a grade point average of at least 3.60 over the last 60 units (10.0 full-course equivalents) taken at the University of Calgary, with no more than one "D" or "D+" grade and no failures. The notation "With Distinction" will not be granted if a student obtains an "F" grade in a CR/F course (including Internship) which has been completed during the time period in which the last 60 units (10.0 full-course equivalents) have been taken. For cases in which the last 60 units (10.0 full-course equivalents) must include some, but not all, of a group of courses taken concurrently, the selection will be made in the manner most advantageous to the student. Students who have taken part of their work
at another university or who have transferred into this School may be granted a degree "With Distinction" at the discretion of the School.

4. Program Details

4.1 First Year Curriculum
The first year curriculum is common to all programs except Energy Engineering. Courses shown in both terms may be taken in either term.

*The courses that are acceptable for the Science option include Physics 365 or 369, Geology 377, Biology 241 or 243, Chemistry 321 and Mathematics 377. Other courses from the Faculty of Science may be substituted with approval of the student’s department and the relevant department in the Faculty of Science.

*It is recommended that students complete the 200-level English course prior to the start of their second year.

*Strategy and Global Management 217 can be completed at any time prior to the Fall Term of the student’s third year.

*Nine units (three half-course equivalents).

### Note: All technical electives may not be offered each year.

#### 4.3 Civil Engineering Admission

Refer to 3.1 Admissions.

**Accelerated Master’s Program**

Students entering their third year are encouraged to consider the possibility of continuing their education, by enrolling in a master’s degree program after completion of their BSc. By taking two or three courses (graduate or undergraduate) during their undergraduate program, which would be additional to their undergraduate degree program requirements, students will position themselves to be able to complete their master’s degree in 12 to 16 months after completion of their BSc. Students considering this possibility must consult with the Associate Head, Undergraduate Studies or the Department Head and should review the Faculty of Graduate Studies admission requirements.

**Civil Engineering, Regular Program**

**Suggested Sequence of Courses**

Courses shown in both terms may be taken in either term.

<sup>1</sup>One and one-half units (quarter-course equivalent).

<sup>2</sup>Fall and Winter.

### Notes:

1. One of the Group B Technical Elective course requirements may be satisfied by a 500-level or higher-level course from either the Faculty of Science or the Schulich School of Engineering with the approval of the Department Head. The higher-level course can be a 600-level or higher-level course from the Department of Civil Engineering if the student has a GPA higher than 3.00 at the end of third year and with the approval of the Department Head.

2. All technical elective courses have similar workloads even though the hours in the timetable are variable.

3. Optional undergraduate courses and all graduate courses are offered, in any calendar year, at the discretion of the Department of Civil Engineering.

Notes:

1. Students wishing to focus their elective in mechanical engineering should choose their technical elective from Mechanical Engineering 421, 521, 583, and 599; students wishing to focus their elective in petroleum engineering should choose their technical elective from Petroleum Engineering 507, 521, 525, 561, 563, 571, and 573.

2. Technical electives in the undergraduate program and all graduate courses are offered, in any academic year, at the discretion of the department.

Notes:
1. A 400-level or higher technical course from the Faculty of Science or another engineering department may be substituted for a technical elective with permission of the Head of the Department of Geomatics Engineering.
2. Technical electives in the undergraduate program and all graduate courses are offered, in any academic year, at the discretion of the department.
3. Students who complete Geomatics Engineering 443 may request that Geomatics Engineering 451 be taken as a technical elective with permission of the Head of the Department.

Geomatics Engineering, Concentration in Cadastral Surveying

The Concentration in Cadastral Surveying is for students who have an interest in pursuing a career as a professional land surveyor. Students can acquire a Concentration in Cadastral Surveying by successfully completing the following courses:

1. Geomatics Engineering 443: Geodetic and Engineering Surveys
2. Geomatics Engineering 545: Photogrammetric and Ranging Techniques
3. Geomatics Engineering 579: Survey Law and Practice

4. Geomatics Engineering 581: Land Use Planning
6. One of:
   - Geomatics Engineering 451: Design and Implementation of Geospatial Information Systems
   - Geomatics Engineering 531: Advanced Photogrammetric and Ranging Techniques
   - Geomatics Engineering 559: Digital Imaging and Applications

Students who complete a BSc in Geomatics Engineering with a Concentration in Cadastral Surveying are eligible to obtain a Certificate of Completion of Academic Requirements for Professional Surveyors from the Canadian Board of Examiners for Professional Surveyors (CBEPS). For more information about CBEPS and professional registration of land surveyors refer to their website: cbeps-cceag.ca.

| Computer Science 550 | Software Engineering for Engineers 519* |
| Computer Science 559 | Software Engineering for Engineers 545 |
| Computer Science 583 | Software Engineering 573 |

Note: Not all technical electives may be offered each year. An updated list of available technical electives may be found at ucalgary.ca/bme/undergraduate.

---

### 4.10 Biomedical Engineering Specialization

#### Introduction

The Biomedical Engineering Specialization (BMEN) allows a student to fulfill the requirements for a BSc degree in Chemical, Civil, Electrical, Geomatics, Mechanical or Software Engineering and at the same time complete a program in Biomedical Engineering.

#### Admission

First year Engineering students wishing to enter the Biomedical Engineering Specialization must apply for admission to the Biomedical Engineering Specialization program at the same time the choice of an engineering program is made.

#### Requirements

Curriculum requirements for the Biomedical Engineering Specialization are listed with the requirements for each program.

#### Biomedical Engineering Approved Technical Electives

| Biomedical Engineering 509 | Biomedical Engineering 585 |
| Biomedical Engineering 511 | Chemical Engineering 535 |
| Biomedical Engineering 515 | Computer Engineering 509 |
| Biomedical Engineering 519 | Electrical Engineering 563 |
| Biomedical Engineering 523 | Manufacturing Engineering 529 |
| Biomedical Engineering 525 | Biomedical Engineering 595 |

Note: Not all technical electives may be offered each year. An updated list of available technical electives may be found at ucalgary.ca/bme/undergraduate.

#### Practicum

All Biomedical Engineering Specialization students are required to complete a biomedical engineering practicum via at least one of the following options:

1. A minimum of four (4) months of industrial work experience in a biomedical engineering-related company (typically co-ordinated through the Engineering Internship Office).
2. A minimum of four (4) months research placement in biomedical engineering (typically a summer in a BME laboratory).
3. Successful completion of a 4th year BME thesis (Biomedical Engineering 500).
All internship or research placements must be approved by the Centre for Bioengineering Research and Education.

4.11 Energy and Environment Specialization

Introduction
The Energy and Environment Specialization (ENEE) allows a student to fulfill the requirements for a BSc degree in Chemical, Civil, Electrical, Geomatics, or Mechanical Engineering and at the same time complete a program in Energy and Environment.

Admission
First year Engineering students wishing to enter the Energy and Environment Specialization must apply for admission to the Energy and Environment Specialization program at the same time the choice of an engineering program is made.

Requirements
Curriculum requirements for the Energy and Environment Specialization are listed with the requirements for each program.

</tbody>
</table>

Note: All technical electives may not be offered each year.

4.12 Combined Programs
An engineering undergraduate degree program may be combined with any other undergraduate degree program on campus. Students may either be admitted to two degree programs when they first apply to the University or may seek admission to a second degree program after being admitted to engineering. Students are reminded that all degree programs at the University of Calgary are subject to quotas and it is the student’s responsibility to meet the admission requirements for the second degree program. Students should consult the engineering website or inquire at the Engineering Student Centre for more information. Students who are admitted to two degree programs when they initially apply to the University of Calgary may opt to spread their first year engineering courses over two years and be admitted to an engineering discipline after their second review period. Interested students must see the Associate Dean (Student Affairs) before the add/drop deadline of their first year to initiate this arrangement.

It is possible for students to opt out of a combined degree program after one year and complete either the BSc (Engineering) or the other degree.

Students may also combine their engineering degree with any minor offered by any faculty at the University of Calgary.

Combined Degree Program, BSc (Engineering)/BComm
The Schulich School of Engineering and the Haskayne School of Business offer a combined degree program leading to a BSc degree in Chemical, Civil, Electrical, Geomatics, Mechanical, or Software Engineering and a BComm degree. The BSc (Engineering)/BComm combined degree program can be completed in five years. Applicants who are interested in pursuing the BSc (Engineering)/BComm combined degree program may apply for direct entry to the combined degree program from high school. Admission to the combined degree program is competitive and based on the admission average calculated for the purpose of admission to Engineering.

Space permitting, students may apply for admission to the combined program after their first year in Schulich at the same time that the choice of a specific engineering major is made (section 3.1 Admission). Students who wish to pursue the BSc (Engineering)/BComm combined degree program must complete the specific course requirements listed in sections 4.1 First Year Curriculum, 4.2 Chemical Engineering, 4.3 Civil Engineering, 4.4 Electrical Engineering, 4.6 Geomatics Engineering, 4.7 Mechanical Engineering, and 4.9 Software Engineering.

4.13 Diplomas
4.13.1 Diploma of the Schulich School of Engineering

Introduction
The Schulich School of Engineering sponsors a diploma program providing additional special qualifications in designated departments which lead to the Diploma of the Schulich School of Engineering. The designated departments offering the diploma program are: Chemical and Petroleum; Civil; Electrical and Computer; and Mechanical and Manufacturing Engineering. This program is intended primarily for professional engineers engaged in practice who are not interested in enrolling in a graduate degree including a thesis, or who are unable to meet the residence requirements of the MSc degree.

Admission
Admission to the diploma program may be granted to holders of an approved degree or its equivalent. Engineers, without a degree, who are registered as Professional Engineers with the Association of Professional Engineers, Geologists and Geophysicists of Alberta, or an equivalent association, may also be eligible for admission to the diploma program.

Requirements
The diploma program consists of 24 units (4.0 full-course equivalents) of which at least 12 units (2.0 full-course equivalents) must be graduate courses in engineering. Courses which normally fall within an undergraduate program in the same area in which the diploma is sought will not be credited toward the diploma.

Regulations
A student must obtain a grade point average of at least 2.50 in the courses taken for credit toward the diploma. The minimum passing grade in courses taken for credit in the diploma program is “C”.

Enquiries about the diploma program should be directed to the department in which the diploma is sought.

Environmental Engineering
The Schulich School of Engineering also sponsors a diploma program providing additional specialization in Environmental Engineering, intended for professional engineers or holders of equivalent approved degrees and leading to the Diploma of the Schulich School of Engineering in Environmental Engineering. The admission criteria, requirements and regulations for the diploma are the same as for the Diploma of the Schulich School of Engineering. Enquiries about the specialization in Environmental Engineering should be directed to the Department of Civil Engineering.

4.13.2 Diploma of the Schulich School of Engineering and the Haskayne School of Business in Project Management Specialization

Introduction
The Schulich School of Engineering and the Haskayne School of Business jointly sponsor a diploma program providing additional special qualifications in the area of Project Management which leads to the Diploma of the Schulich School of Engineering and of the Haskayne School of Business in Project Management. This program is intended primarily for professionals engaged in practice who are not interested in the MSc or MEng degrees.
Admission
Admission to the diploma program may be granted to holders of an approved Engineering degree, Engineers without a degree who are registered with APEGA or an equivalent association, and those having equivalent qualifications or experience as determined by the Director of the Project Management specialization.

Criteria for admission to the Diploma with a Specialization in Project Management of the Schulich School of Engineering and the Haskayne School of Business are as follows:
1. An approved Engineering degree or registration with APEGA or an equivalent association or equivalent qualifications or experience as determined by the Director of the Project Management Specialization;
2. Up to five years of relevant experience in industry as determined by the Director of the Project Management Specialization;
3. Successful completion of up to 12 units (2.0 full-course equivalents) in the Project Management Specialization with a grade point average of at least 2.50, and a minimum passing grade of "C" for all courses.

Requirements
The diploma program consists of 24 units (4.0 full-course equivalents) of which at least 18 units (3.0 full-course equivalents) must be graduate courses in project management. Courses which fall within an undergraduate program in the area of Project Management will not normally be credited toward the diploma.

Regulations
A student must obtain a grade point average of at least 2.50 in the courses taken for credit toward the diploma. The minimum passing grade in courses taken for credit in the diploma program is "C".

Enquiries about the diploma program should be directed to the Director of the Project Management specialization.

4.14 Engineering Internship Program

Introduction
The Engineering Internship Program is a five-year program which includes, in addition to the regular four-year academic program, an internship year (a minimum of twelve and a maximum of sixteen consecutive months) of supervised work experience in industry. The internship year may commence in May or September after the student has completed the first three years of the Engineering program. (For students enrolled in the BSc (Engineering)/BComm combined degree program, the internship year will commence after the student has completed the first four years of the five-year program, and will extend the total length of the combined degree from five years to six years.) The student is expected to return to complete the final academic year of the program in September of the following year. In certain circumstances, it may be possible to commence the internship year in January, and return to the academic program the following January. Interested students are encouraged to contact the Engineering Internship office.

Admission
Students are required to apply online to the Engineering Internship Program prior to October 15 in the Fall Term of their third year. Students who do not meet the application deadline should contact the Engineering Internship Office regarding admission.

To be admitted to the Engineering Internship Program, students must be full-time students in good academic standing after second year. Only students who are in good standing and eligible for full-time registration in the Schulich School of Engineering at the time they apply for the internship program and at the time they expect to start their internship are eligible for access to the placement processes of the Engineering Internship Program. Students must normally have completed all courses listed in 4.1 First Year Curriculum and all courses listed in Second and Third Year in their engineering program (see the applicable section 4.2-4.9) to be eligible to start their internship. Students who will not meet these requirements at the end of their third year are encouraged to contact the Engineering Career Centre to discuss options for internship participation. Students should refer to the Co-operative Education/Internship section of this Calendar for general admission requirements.

Requirements
Students must complete a minimum of twelve months work experience while registered in the Internship courses, Internship 513.01-04 (Internship in Engineering I-IV), in addition to the regular requirements for the BSc in Engineering. Students who have completed any portion of the twelve month requirement will not be permitted to apply for positions that extend beyond either the sixteen month maximum permitted to complete the requirements, or the date on which they are expected to resume their academic program.

Regulations
If a student's academic performance in the third year results in the student not being in good standing after the third year, the student will normally be required to withdraw from the Engineering Internship Program. Students who have been required to withdraw from the Engineering Internship Program will no longer have access to the program's job search systems or support. If the student is required to withdraw from the Engineering Internship Program but has already accepted a placement, the employer will be informed that the student is no longer registered in the Internship Program. Students who have completed the twelve month minimum requirement will not be permitted to apply for further internship positions.

Students who have accepted a placement obtained through the Internship Placement process will be registered in the selected internship courses corresponding to the length of the placement and appropriate fees will be payable.

In order to have the Internship designation appear on the BSc parchment, a student must complete the twelve-month minimum requirement and pass the requisite internship courses.

Each work experience is supervised by a Professional Engineer in the host company. Normally the entire internship year is spent with the same employer.

4.15 Minor in Entrepreneurship and Enterprise Development in the Schulich School of Engineering

Introduction
The Schulich School of Engineering in partnership with the Haskayne School of Business offers a Minor in Entrepreneurship and Enterprise Development (MEED) open to all engineering students. MEED typically commences in Year Two of the engineering program and consists of five Entrepreneurship and Innovation (ENTI) courses, all of which are currently offered by the Haskayne School of Business plus any four fourth-year engineering courses that are taken as part of the normal requirements for the engineering degree. Thus, to satisfy MEED requirements, students must receive credit for 15 units (2.5 full-course equivalents) over and above the engineering degree requirements.

Admission
Students apply for admission to MEED at the same time as they apply for their choice of engineering program specialization, in April of their first year. Admission to the MEED program is limited to 50 students. In the event that the number of applicants exceeds the number of spaces available, admission will be decided on the basis of academic performance, using the same process as is used for admission to the engineering program specialization. If students apply later in their program than second year, they will be admitted in order of academic performance according to the number of spaces available. Students are encouraged to apply as soon as possible in order that the Haskayne School of Business may plan for the required number of places in the ENTI courses. Application forms are available from and should be submitted to the Engineering Student Centre. Admission to the program depends upon the availability of space in the required ENTI courses.

Requirements
Students must receive credit for 15 units (2.5 full-course equivalents) in addition to 15 units (2.5 full-course equivalents) fourth-year engineering courses that are part of the undergraduate engineering degree requirements. The five courses that are to be completed in addition to the engineering degree requirements are:
1. Entrepreneurship and Innovation 201
   Introduction to Business Venturing
2. Entrepreneurship and Innovation 381 Principles of Entrepreneurship
3. Entrepreneurship and Innovation 401 Opportunity Identification
4. Entrepreneurship and Innovation 405 New Venture Start-Up
5. One of the following options:
   Business and Environment 395 Business Law for Strategic Decision-Makers
   Business Technology Management 321 Information Technology in Business
   Entrepreneurship and Innovation 403 New Venture Planning
   Entrepreneurship and Innovation 531 Entrepreneurship Law
   Finance 341 Canadian Business Finance
   Finance 343 Personal Financial Management
   Marketing 341 Introduction to Marketing
   Operations Management 301 Introduction to Operations and Supply Chain Management
   Organizational Behaviour and Human Resources 321 Foundations in the Organizational Behaviour and Human Resources

Regulations
Regulations of the Schulich School of Engineering apply to students taking MEED courses. In order to have the Minor in Entrepreneurship and Enterprise Development appear on the student’s transcript, the five-course MEED program must be completed before the student graduates.

4.16 International Foundations Program (IFP) Pathways
For students admitted to IFP Pathways, the regular Schulich School of Engineering first-year curriculum (4.1 First Year Curriculum) is replaced by the following two-year curriculum. Upon successful completion of the IFP Pathways two-year curriculum, students will be placed into an Engineering program according to the process described under 3.1 Admissions.

IFP Pathways to Engineering students adhere to the academic policies of the Schulich School of Engineering. In addition, students are subject to a joint academic review process by the Werklund School of Education and the Engineering school. Regulations governing continuation in the program are found in 3.4 Academic Performance, Review, and Student Standing.

(See suspended programs on next page)

*Graduate degrees are offered in all Departments within the Faculty of Science. Details of graduate specializations can be found in the graduate section of this calendar.

1. All degrees in the Faculty of Science, except Environmental Science, can be combined with eligible BA and BSc programs in the Faculty of Arts.

2. Note this program is undergoing review.

3. Combined Degree with the Faculty of Arts (Note this program is currently undergoing review.)

4. Admission to the Applied and Environmental Geology degree is suspended as of Fall 2015.

5. Combined Degree with the Haskayne School of Business.

6. Concurrent Degree with the Werklund School of Education.

7. BSc and BSc Honours degrees can be combined with BSc degrees from the Schulich School of Engineering as described in section 3.4.H.

5. Administration .............................................................................. 266

Through its six Departments of Biological Sciences, Chemistry, Computer Science, Geoscience, Mathematics and Statistics, and Physics and Astronomy, and the USC Specialized Programs Office, the Faculty of Science offers the programs listed below.

The Faculty of Science is committed to providing students with rich undergraduate educational experiences that can be completed in four years. All BSc and BA programs within the Faculty normally require four years to complete, with the exception of the Combined Degree programs and the Co-operative Education/Internship programs that require at least five years. Students are encouraged to visit the Undergraduate Science Centre regularly throughout their degree for program advising and support in achieving the goal of completing their degree in the normal amount of time.

Students starting their first year of university may enter any Science Major programs designated for first-year students. Students who are undecided about which program to choose should register in the Natural Sciences program in first year. While registered in this program, they should register in the first-year courses that are appropriate to the future program of their choice.

Admission to some programs is based on selection criteria as described in Section 4 (Program Details).

Undergraduate Programs

Details on undergraduate programs are given in Section 4 (Program Details).

</tbody>
</table>

\(^1\)All degrees in the Faculty of Science, except Environmental Science, can be combined with eligible BA and BSc programs in the Faculty of Arts.

\(^2\)BSc and BSc Honours degrees can be combined with BSc degrees from the Schulich School of Engineering as described in section 3.4.H.

- Co-operative/Internship BSc Honours Programs
- BSc Double Major Programs
- BSc Double Honours Programs
- BSc/BSc Combined Degree Programs within the Faculty of Science
- Second Degree Programs following an appropriate first degree: BSc Major or BSc Honours Programs

BA degrees may be conferred in programs in the Department of Computer Science if the program is part of a Double Major program with the second program in another faculty that only awards BA degrees.

#### Combined or Concurrent Degree Programs with Other Faculties

- BSc or BA (Science) and BSc or BA (Arts), administered jointly with the Faculty of Arts.
- BComm and BSc, administered jointly with the Haskayne School of Business.
- BSc (General Mathematics in Education) or BSc (Natural Sciences) and BEd, administered jointly with the Werklund School of Education.
- Combined BSc degree with Schulich School of Engineering.

#### Minor Programs

Science Minors are available in the following subjects:
- Actuarial Science, Astrophysics, Biological Sciences, Chemistry, Computer Science, Data Science, Geology, Geophysics, Mathematics, Nanoscience, Physics, Statistics.

The minors in Applied Mathematics and Pure Mathematics have been suspended.

#### Pre-Professional Preparation for Degree Programs at this and Other Institutions

The Faculty of Science admits students only to its degree programs. However, students who wish to transfer to a professional program are advised to choose a Faculty of Science program that best fits their professional aspirations and which, at the same time, permits them to work toward completing the chosen Science program, i.e., it is important to simultaneously satisfy both Faculty of Science program requirements as well as pre-professional requirements.

- Dentistry - the University of Alberta, Edmonton.
- Medicine - the University of Calgary, University of Alberta and various other institutions.
- Optometry - the University of Waterloo, Ontario.
- Veterinary Medicine - the University of Calgary and the Western College of Veterinary Medicine, Saskatoon, Saskatchewan.

Students interested in applying to professional programs should consult the institution offering their desired program for details regarding the necessary pre-professional prerequisite requirements.

#### Graduate Programs

All Departments of the Faculty of Science offer graduate programs leading to Masters and Doctoral degrees. These programs are under the jurisdiction of the Faculty of Graduate Studies.

The normal preparation for graduate studies will be an Honours degree in the chosen subject.

Details on graduate programs are given in the Calendar of the Faculty of Graduate Studies.

#### 2. Faculty Student Affairs

All programs offered by the Faculty of Science are administered by the Undergraduate Science Centre, in collaboration with the six departments within the Faculty and the Directors of the Data Science, Environmental Science, Nanoscience, Natural Sciences and Neuroscience programs. Advice on these programs is available in the Undergraduate Science Centre, as well as Department and Program Directors’ offices.

General inquiries related to the Faculty Regulations described in Section 3 should be directed to the Undergraduate Science Centre. Specific inquiries related to course requirements, as described in Section 4, can be directed to the Undergraduate Science Centre, but often the Associate Head in the Department or Program Office concerned may be in a better position to answer these. Information on student advising is given in Section 4.

#### 3. Faculty Regulations

Students in the Faculty of Science are governed by the regulations in this section of the Calendar as well as by the general University regulations in the sections titled Admissions and Academic Regulations. For the precise interpretation of any statement or regulation, students should feel free to contact the Associate Dean (Undergraduate) of Science, telephone 403.220.7783. The Dean has delegated responsibility for undergraduate student affairs in the faculty to the Associate Dean (Undergraduate).

#### 3.1 Terminology

Please refer to the glossary at the back of this Calendar.

#### 3.2 Admission

All programs offered by the Faculty of Science have a fixed number of places for students. For any given program, whenever demand exceeds capacity enrolment will be limited and students will be admitted on the basis of descending ranked academic performance until that capacity is met. Specified selection criteria are described in Section 4 (Program Details) under the appropriate Department.

Direct entry is possible to most Science Major programs. Entry to most Science Honours programs is possible only after successful completion of at least 30 credits (5.0 full-course equivalents). A limited number of programs offer direct entry into a Science Honours program for highly qualified high school students. These programs are Biochemistry; Cellular, Molecular and Microbial Biology; Ecology; Neuroscience; Plant Biology; and Zoology. Students who do not enter an Honours program at the time of admission, can be considered following the completion of at least 30 credits (5.0 full-course equivalents).

Repeated courses may only be counted once in a student’s degree program but all instances (that fall within the group of courses used to calculate admission) are used in the calculation of the admission grade point average.

For additional admission requirements, refer to the departmental sections.

Students may transfer from one program to any other for which they are eligible.

Continuing University of Calgary students may request a change of program online us-
To an Honours program, must meet the requirements. Students who wish to change from a Major to an Honours program, and designation of a Minor. If an application is unsuccessful, a new application must be submitted in the following year. To be eligible for admission, a student must meet the following requirements:

**Major Programs**

High school matriculation or equivalent. All applicants should have English Language Arts 30-1, Mathematics 30-1 and three additional 30-level subjects (of which two must be science courses). Incoming students should complete the appropriate high school 30/31 courses that support their expected first-year course registrations and that are listed in A.2 in the Admissions section of this Calendar.

Students who have completed some university-level course work must consult A.2 in the Admissions section of this Calendar for details.

**Honours Programs**

Admission to an Honours Program requires successful completion of at least 30 units (5.0 full-course equivalents) with the exception of programs which offer direct admission from high school. These programs are described above under 3.2 Admission. At the time of admission, students must present (i) a GPA of at least 3.30 calculated over the most recent course work to a maximum of 60 units (10 full-course equivalents), and (ii) a GPA of at least 3.30 calculated for all science courses included in (i) above (University of Calgary courses and/or transferable courses taken at other institutions).

For continuation in an Honours program, students are subject to an annual review at the end of the winter semester. Students must maintain a GPA of 3.30 over the courses subject to assessment and on all science courses within those subject to assessment. If fewer than 60 units (10.0 full-course equivalents) have been completed then all courses will be subject to assessment; if more than 60 units (10.0 full-course equivalents) have been completed, then only the most recent 60 units (10.0 full-course equivalents) are subject to assessment.

Students whose review GPA is between 3.20 and 3.30 will be placed on notice that they may not be able to complete their Honours degree if their academic achievement does not improve to the level required by graduation requirements. Students who wish to reapply to an Honours Program must meet the admission requirements stated above. Students may apply for Honours after the first, second or third year of their program, but need to plan their program at an early stage in order to be able to meet all Honours Program Requirements. See 3.4 Program Requirements.

Students who wish to change from a Major to an Honours program, must meet the deadline for submission of their application.

**Note:** The BSc (Honours) in the following programs permits direct entry into first year: Biochemistry; Cellular, Molecular and Microbial Biology; Ecology; Neuroscience; Plant Biology; and Zoology.

**Second Baccalaureate Degrees**

Students who have received one or more approved undergraduate degrees (BA, BSc, BEd, etc.) may apply for admission to programs leading to a Second Baccalaureate Degree with a Major Field or a Second Baccalaureate Degree program with Honours in a Major Field.

Students must apply to the Admissions Office and meet all deadlines and requirements. For more information on admission to a second undergraduate degree, refer to A.5.5 in Admissions. For more information regarding requirements for a second degree, refer to 3.4 Program Requirements.

**3.3 Enrolment Limitations**

Enrolment limitations may be in effect for courses in the Faculty of Science. Any of the junior (200-level) courses offered by the Faculty of Science may be so limited. Students must consult the current Schedule Builder in their Student Centre for information about registration priorities in such courses.

At the senior level (courses numbered 300 or above), many courses in several departments may have limited enrolment. Selection criteria are described in Section 4 (Program Details) under the appropriate department.

**3.4 Program Requirements**

The following general requirements apply to all programs administered by the Faculty of Science. In addition, there are the course requirements for the individual programs. These are listed in Section 4 (Program Details).

**Table I**

The following courses may form part of a student’s degree program in Science, but may not be used to satisfy the requirement of 18 units (3.0 full-course equivalents) from outside the Faculty.

| Anthropology 309, 413, 415, 451, 552, 571 |
| Archaeology 417, 555 |
| Business Technology Management 321, 331 |
| Chemical Engineering 427, 501, 535, 537 |
| Civil Engineering 461 |
| Computer Engineering 339, 369, 467 |
| Electrical Engineering 327, 353, 489, 475, 563, 565, 575, (if both 563 and 565 are taken, one may be counted as from outside Science) |
| Engineering 201, 233, 311, 317, 319, 349, 407 |
| Energy and Environment, Engineering 355 |
| Geography 305, 307, 313, 415, 417 |
| Kinesiology 259, 260, 263, 363, 463 |
| Mechanical Engineering 479, 485 |
| Medical Science (all courses in this category) |
| Political Science 399 |

**Program Details**

- Psychology 300, 301, 312, 407, 478, 531
- Sociology 311, 315

**A. Major Degree Programs**

A student must present an approved list of courses completed with passing grades. This list will be referred to as the program. The program must satisfy the following conditions.

(a) The program must contain at least 120 units (20.0 full-course equivalents) with a maximum of 48 units (8.0 full-course equivalents) at the 200 level.

(b) The program must contain at least 45 units (7.5 full-course equivalents) in a Science field. Maximum allowable courses limits are specified in program regulations for each degree. The field chosen for a program will be referred to as the “major field.” The Science fields are listed in Section 4 (Program Details). Only 6 units (1.0 full-course equivalent) in the major field may be a “D” or “D+”.

(c) The GPA calculated over the program must be at least 2.00, and the GPA for courses in the major field must also be at least 2.00. The program may not contain more than 18 units (3.0 full-course equivalents) with “D” or “D+” grades.

(d) Breadth Requirement: The program must contain at least 54 units (9.0 full-course equivalents) from outside the major field, of which at least 18 units (3.0 full-course equivalents) must be courses selected from Faculties other than the Faculty of Science. Of these 18 units (3.0 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

The 18 units (3.0 full-course equivalents) from other faculties may not be chosen from among the courses listed in Table I. The requirement to include 18 units (3.0 full-course equivalents) in other areas is intended to broaden the student’s perspective beyond ones offered by the Faculty of Science. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

(e) The program must include certain specified courses. The specified courses required for individual programs are listed in Section 4 (Program Details).

(f) No more than 60 units (10.0 full-course equivalents) taken at other institutions and acceptable for transfer credit may be included in the program. A maximum of 24 units (4.0 full-course equivalents) taken at other institutions and acceptable for transfer credit may be included in the major field.

(g) Credit will not be granted toward Science degrees for Physical Activity courses (i.e., Dance Education Activity/Theory, Outdoor Pursuits Activity/Theory, and Physical Education Activity/Theory).

**Notes:**

- These requirements may change with every Calendar issue. A given Calendar issue applies to the academic year.
beginning on July 1 and ending on the following June 30. The time of entry into a program in the Faculty of Science is defined as the first session after admission to the program during which a student successfully completes any courses applicable to the program. A student’s program is subject to the course requirements which are in the Calendar current at the time of entry into the program, and a student is allowed five years counted from the time of entry into the program to graduate under these requirements. Students in Co-operative Education or Internship programs have six years counted from the time of entry into the program to graduate under these requirements.

- Students who exceed this five-year limit must consult with the Head of the Department (or designate) or Program Director (or designate) concerned who will decide on an acceptable set of course requirements for the proposed date of graduation. The Head (or designate) or Program Director (or designate) will communicate the decision to the Associate Dean (Undergraduate), or designate, in writing.

- Course work that forms part of the requirements from a student’s major field as listed in Section 4 (Program Details) and which is more than six years old at the time of graduation may be included in the program only with written permission of the Head (or designate) of the Department or Program Director (or designate) concerned.

- Courses taken in the University of Calgary Cummings School of Medicine or Faculty of Veterinary Medicine (and, at the discretion of the Associate Dean, courses taken as part of a degree in Dentistry or Optometry or Medicine or Veterinary Medicine outside of Calgary) may be counted towards a BSc degree in the Faculty if at least 90 units (15.0 full-course equivalents) have been taken in a Science program, and if the Science course requirements for a Science Major are met by those 90 or more units (15.0 or more full-course equivalents). Honours degrees and degrees with distinction cannot be granted in this manner. Not all Major programs can be completed in this way in three years.

B. Degrees "With Distinction"
The notation "With Distinction" will be entered in the permanent record and on the graduation parchment of a student successfully completing a Major program with a grade point average of at least 3.60 over the last 90 units (15.0 full-course equivalents) taken for the degree. In cases in which the "last 90" must include some but not all of a group of courses taken concurrently, the selection will be made in the manner most advantageous to the student.

A student who has taken part of their course work at another university or who has transferred into the Faculty at a relatively late stage may be granted a degree "With Distinction" at the discretion of the Faculty.

C. Honours Degree Programs
Degrees with Honours are awarded in two classes: Honours and First Class Honours. The requirements are the same as for the Major Programs, except for the following additions or changes.

Honours Requirements
- A minimum GPA of 3.30 over the last 90 units (15.0 full-course equivalents).
- Completion of Honours requirements as outlined in Section 4 (Program Details).
- The program must contain at least 54 units (9.0 full-course equivalents) and no more than 78 units (13.0 full-course equivalents) in the major field.

Note: A student who fails to maintain the necessary performance standards or who decides not to continue in an Honours program may transfer to a Major program.

First Class Honours Requirements
In addition to the Honours requirements, successful completion of a department-approved program equivalent to 120 units (20.0 full-course equivalents), with a GPA of at least 3.60 over the last 90 units (15.0 full-course equivalents). A student who has taken part of their course work at another university may be granted a degree with First Class Honours at the discretion of the Faculty.

D. Co-operative Education/Internship Degree Programs
Co-operative Education and Internship programs are five-year degree programs which include 12 to 16 months of supervised work experience in various companies or government agencies. Co-operative Education/Internship programs provide students with opportunities to experience the linkages between academic knowledge and a variety of relevant and appropriate employment opportunities. In conjunction with the mandatory work term courses, students completing the requirements of the Co-operative Education/Internship option will graduate with "Co-operative Education" or "Internship" designated on their transcripts and degree parchments.

Admission Requirements
Students who wish to enter the Co-operative Education/Internship program are urged to discuss their pre-admission course selection with a Program Advisor in the Undergraduate Science Centre (USC) as early in their program as possible. Co-operative Education/Internship programs are five-year degree programs in which students are admitted to a Co-operative Education/Internship program but do not complete their work terms before they have less than 9 units (1.5 full course equivalents) remaining to complete their degree requirements will be removed from the Co-operative Education/Internship program.

Work Term Assessment
The mandatory work term courses are graded on a credit (CR) or fail (F) basis. A positive assessment requires satisfactory performance on each of the following items:
- The Co-operative Education/Internship Coordinator’s evaluation of job performance, which is based on an on-site visit.
- The employer’s evaluation of job performance.

A work term report prepared by the student and evaluated by the Faculty.

Notes:
- The Faculty may approve registration in Co-operative Education 501.04 in conjunction with an optional (fourth) work term.
- The program does not guarantee that students will obtain work term placements.

Program Sequence
Co-operative Education:
The Co-op work terms may be completed while alternating between academic terms. The first work term is normally taken shortly after completing the courses required for admission. This typically occurs after year two (minimum 60 units or 10.0 full-course equivalents) but before completing year four (maximum 105 units or 17.5 full-course equivalents). Students must end their Co-operative Education program with a full time
The combination of Co-op work terms and academic terms will allow completion of the program in five years.

**Internship:**
The Internship period consists of the consecutive Internship 503.01, 503.02, 503.03, and optional 503.04 Internship work terms. This typically occurs after year three (minimum 90 units or 15.0 full-course equivalents) but before completing year four (maximum 105 units or 17.5 full-course equivalents). Students must end their Internship program with a full-time academic term (minimum of 9 units (1.5 full course equivalents)).

The combination of Internship and academic terms will allow completion of the program in five years.

**Regulations**

1. Bachelor of Science Co-operative Education/Internship students are required to complete a minimum of three four-month work terms. Internship work terms are taken consecutively.

2. Students must end their Co-operative Education/Internship program with a full-time academic term (minimum of 9 units (1.5 full course equivalents)).

3. The Co-operative Education and Internship courses are in addition to the normal requirements for each degree, i.e., students must complete the same number of required courses as students completing the traditional degree programs, as well as the Co-operative Education/Internship courses.

4. While on a four-month work term a student may take one 3 unit course, provided it does not interfere with their work term placement. Students must ensure they still have a minimum of 9 units (1.5 full course equivalents) to complete in their last academic term.

5. Once students have met graduation requirements, they are no longer eligible to participate in the Co-operative Education/Internship program.

6. If a student’s academic performance results in the student being required to withdraw from the Faculty of Science, or being placed on probation, the student will be required to withdraw from the Co-operative Education/Internship program. If the student is required to withdraw from the Co-operative Education/Internship program but has already accepted a work term, the employer will be informed that the student is no longer registered in the Co-op/Internship program. Termination of the student’s employment will be at the employer’s discretion.

7. While on a work term students pay an academic course fee and are considered full-time students.

8. Students who receive a Failure (F) on a work term will be required to withdraw from the Co-operative Education/Internship program and will not receive the Co-operative Education/Internship designation.

For further information please contact the office below:
Undergraduate Science Centre (USC)
Location: Energy Environment Experiential Learning (EEEL) 445
Phone: 403.220.8600
Email address: usc@ucalggary.ca
Website: http://www.ucalggary.ca/science/undergraduate/co_op_internship

**E. Double Major and Double Honours Degree Programs**

These are single degree programs. A student in a Major program whose program also meets the requirements for a second Major in a different field, in either the Faculty of Science or another faculty, may declare a second Major in this field. The same is true for Honours programs. It is not possible for one of the two programs to be an Honours program and for the other one to be a Major program.

Declaration of the second Major or Honours may be made no later than at the time of the last registration. Special restrictions apply to certain double Major or Honours combinations. Consult the relevant Department in Section 4 (Program Details). All such double Major or Honours combinations must be able to be accommodated under the same rubric (either BSc or BA).

**F. Combined Degree Programs Within the Faculty of Science**

Students may pursue a combined program of at least 150 units (25.0 full-course equivalents) that leads to two degrees from the Faculty of Science. The two degrees will be awarded simultaneously. Interested students should consult with program advisors in the Undergraduate Science Centre and the Associate Dean (Undergraduate).

The two programs may not be from the same Department, except for combinations of Geophysics with Geology or Environmental Science.

**G. Second Degree Programs**

The graduation requirements for a second degree are the same as those for a degree with a Major field except for the following:

- **Major Degree Requirements**
  - (a) Up to 60 units (10.0 full-course equivalents) counted towards any previous degrees may be counted towards requirements in the second degree. These may not include more than half the minimum number required in the new Major field.
  - (b) Courses not used toward previous degrees (as determined by the institution awarding those degrees) may be used to reduce the number required in the second degree where applicable.
  - (c) Students normally will not be admitted to a second degree program in any field in which they already possess a degree. Students with a degree in the Natural Sciences should consult the Undergraduate Science Centre to find out whether they would be permitted to enrol in a program that covers the same subject matter as their Concentration One.

Upon admission to the program, students are advised to contact the Undergraduate Science Centre to discuss their academic plans and obtain general advice regarding the requirements of the second degree. The Undergraduate Science Centre will then prepare a detailed formal assessment outlining the remaining requirements in each individual case.

The second degree will be awarded "With Distinction" if a GPA of at least 3.60 is achieved over the courses completed in the second degree program, excluding those used in point (a).

**Note:** Departments are under no obligation to compress their course offerings in such a way as to minimize the time spent on a second degree.

**Honours Degree Requirements**

The graduation requirements for a second degree in Honours is the same as a degree with Honours, with the following modifications:

- (a) Admissibility will be based on the overall grade point average obtained in the first degree, and grade point averages required for graduation will be calculated using courses completed in the second degree program.
- (b) The student must obtain approval of the Department or Program concerned.
- (c) The permissible duration of the second degree program will be determined by the Associate Dean (Undergraduate), or designate, at the start of the program in conformity with the spirit that governs the duration of a first degree honour program, taking into account what courses remain to be taken in the second degree program.
- (d) The degree will be awarded as First Class Honours if a GPA of at least 3.60 is obtained over the courses completed in the second Honours degree program.

**H. Combined and Concurrent Degree Programs with Other Faculties**

Students may pursue a combined program of at least 150 units (25.0 full-course equivalents) that leads to two degrees, one from the Faculty of Science and one from another faculty. The two degrees will be awarded simultaneously.

Students must meet the admission and graduation requirements of both Faculties involved, as described in the Faculties' sections of this Calendar.

These programs require careful selection of courses to complete the requirements of both faculties. Interested students are urged to contact the Advising Offices of both faculties for advice in choosing their courses, beginning in first year, and should see the Associate or Assistant Deans of the two Faculties involved.
With the Faculty of Arts

BSc or BA (Science) and BSc or BA (Arts) Program

Students intending to pursue this program may enter either the Faculty of Science or the Faculty of Arts. At the time of admission to either faculty, students must apply for the combined degree program and declare two major fields as described in each faculty’s section of this Calendar.

Degree Requirements for the BSc or BA (Science) and BSc or BA (Arts) Program

(i) The Faculties of Science and Arts require the successful completion of at least 42 and not more than 66 units (7.0 and not more than 11.0 full-course equivalents) in the Major Field. Faculty and departmental requirements for graduation in a program with a Major Field must be met.

(ii) Courses taken to satisfy the major field requirements for one of the two degrees may be counted towards the breadth requirement for the other degree.

(iii) The number of junior courses taken must not exceed 54 units (9.0 full-course equivalents) in total.

(iv) A maximum of 60 units (10.0 full-course equivalents) taken at other institutions and acceptable for transfer credit may be included in the combined programs. A maximum of 24 units (4.0 full-course equivalents) taken at other institutions and acceptable for transfer credit may be included in the major field of each program.

With the Haskayne School of Business

BComm and BSc (Actuarial Science) Program

For program details, see the Haskayne School of Business section of this Calendar.

BComm and BSc (Computer Science) Program

For program details, see the Haskayne School of Business section of this Calendar.

Concurrent Degrees with the Werklund School of Education

BSc (General Mathematics in Education) and BEd

For program details, see the Department of Mathematics and Statistics section in Section 4 (Program Details).

BSc (Natural Sciences) and BEd

For program details, see the Natural Sciences section in Section 4 (Program Details).

With the Schulich School of Engineering

BSc (Engineering) and BSc (Science) Program

Students intending to pursue this program may enter either the Faculty of Science or the Schulich School of Engineering. Students may either be admitted to both degree programs when they first apply to the University or may seek admission to a second degree program after being admitted. Students must satisfy the requirements for admission to both Faculties and Programs. (See the Admissions section of this Calendar.)

This combined program leads to a Bachelor of Science in Engineering from the Schulich School of Engineering and a Bachelor of Science from the Faculty of Science. The Schulich School of Engineering provides complementary information on Combined Programs in their section of this Calendar.

Note: Because engineering degrees are highly structured, more than 150 units (25.0 full-course equivalents) are typically required. Further, students who opt out of this Combined Degree program, particularly if they do so after first year, then require more than four years to complete a single degree.

I. Minor Programs

The course requirements for the Minor Programs are listed in Section 4 (Program Details) under the appropriate Department. Students are cautioned to check the Calendar descriptions of the courses required for the Minor and to include the necessary prerequisites for these courses in their programs.

For a Minor, passing grades must be obtained in at least 30 units (5.0 full-course equivalents) in the minor field of which at least 18 units (3.0 full-course equivalents) must be numbered 300 or above. For certain major/minor combinations there will be considerable overlap between fields. The degree of permissible overlap must be discussed with the Associate Dean (Undergraduate), or designate, before proceeding. The GPA over all courses counting towards the Minor must be at least 2.00 and only 3 units (0.5 full-course equivalent) with a "D" or "D+" grade will be allowed.

3.5 Course Selection and Registration

A. Accuracy of Registration

Students are responsible for ensuring that their annual course selections are in accord with all Calendar requirements, including the completion of prerequisite courses with a satisfactory grade and registration in corequisite courses as appropriate. If registration in any course(s) is contrary to regulations, the Faculty may cancel such registration anytime after the beginning of the term. Registration at all times must be appropriate to the degree program being followed. Students with wholly inappropriate course selections in their registration may have their registration cancelled by the Associate Dean (Undergraduate), or designate. Students should seek advice from that Associate Dean, the staff of the Undergraduate Science Centre, or from the Department or Program concerned.

Students are responsible for ensuring that they meet degree and program requirements. While the Undergraduate Science Centre endeavours to assist all students as they proceed in the various programs, a final and thorough check is not done until application for graduation. Any departure from standard requirements must receive prior authorization in writing from the Associate Dean (Undergraduate), or designate. It is strongly recommended that students consult with the Associate Dean before submitting their final registration.

First-year students in the Faculty of Science who wish to register in senior courses should be aware that in addition to stated prerequisites, senior courses offered by other faculties often require completion of 18 units (3.0 full-course equivalents) at the junior level.

Students must be admitted to a program before they will be allowed to register in more than 36 units (6.0 full-course equivalents) from the Department offering that program or in any group of courses required for that program.

First-year students should visit the Enrolment Services website (ucalgary.ca/registrar/registration/first-year-students) for registration details from the Office of the Registrar.

B. Introductory Courses for Science Degree Programs

All programs have introductory course requirements. Since these courses are often the prerequisites for more advanced courses, students are advised to take the introductory courses in the manner depicted in Section 4 (Program Details) "Suggested Program Sequences." By so doing, students make it possible to complete their programs in a timely fashion.

C. Prerequisites

A student may not register in a course unless a grade of at least "C-" has been obtained in each prerequisite course, except with a letter of permission from the Head of Department (or designate). It is the responsibility of students to ensure that they meet all prerequisite requirements. Students who do not meet the exact prerequisites/corequisites and do not have Departmental permission to waive those requirements will have their registrations cancelled automatically by the Faculty after the deadline for student change of registration.

D. Withdrawal from Courses

Students will not be permitted to withdraw more than once from a particular course. Students will be required to withdraw from the Faculty of Science if they have accumulated a total of more than 30 units (5.0 full-course equivalents) withdrawals while in attendance at the University of Calgary.

Since students could jeopardize their programs by withdrawing from courses, they should be aware of all potentially adverse consequences of such actions. If after having sought out and weighed all the information, a student still decides to proceed, withdrawal from a course must be done before the deadline specified in the Academic Schedule.

E. Repetition of Courses

A student will be permitted to repeat a particular course only once. This regulation applies not only to individual courses, but also to sets of courses where it is stated that credit for more than one of the sets is not allowed. For example, a student may not take...
Mathematics 265 twice and then attempt Mathematics 249.

**F. Course Load**

While five courses taken concurrently represent a full load, some programs prescribe additional courses. Students may elect to take up to six courses in a term, but an extra course represents a substantial burden and may adversely affect overall performance. Undergraduates may register in 600-level courses only with the permission of the Department offering the course and the Associate Dean (Undergraduate).

**G. Opportunities to Take Courses at Another Institution for Transfer of Credit**

Students may be authorized to take some program course work at another university if registration as a visiting student is acceptable to that university. Students with poor academic performance, such as being on probation or having a large number of withdrawals, will not be afforded this opportunity.

Students may apply online for such authorization by requesting a Letter of Permission through their online Student Centre. Students should check with Advisors in the Undergraduate Science Centre to ensure that such transfer credits advance their particular programs. Once approved, students will be advised officially as to how the proposed courses will transfer and an appropriate letter will be sent to the Registrar of the other university. The Letter of Permission must be obtained before the student registers for the courses at the other institution.

It will be the responsibility of the student to ensure that an official transcript of grades is forwarded directly to the Registrar of this University in order that appropriate credit may be officially recorded.

Many grade-point-average calculations used by the Faculty of Science do not include transfer courses.

**H. Credit in Courses by Special Assessment**

Students who feel that they know the material covered in a course without having received formal University credit for that course may apply for special assessment in such a course. Students should obtain the form headed "Permission to Take Courses by Special Assessment" from the Office of the Registrar and submit their application to the Department offering the course. A course in which the student was previously registered may not be taken subsequently by special assessment, nor may any course be attempted more than once in this way. The Faculty will not allow more than 30 units (5.0 full-course equivalents) completed by special assessment to count towards a degree.

See also B.10.1 in Academic Regulations for the general University regulations concerning special assessment.

### 3.6 Assessment

**A. Missed Components of Term Work**

Any student who is absent from a test or fails to complete a laboratory assignment or similar work for legitimate reasons must discuss an alternative course of action with the instructor. The regulations covering such circumstances are outlined in the sections titled E.3 Attendance and G.7 Deferral of Term Work in the Academic Regulations section of this Calendar. Notification of such eventualities must be given to the instructor within 48 hours.

**B. Deferral of Final Examinations**

See G.6 in Academic Regulations for the general University regulations governing the deferral of final examinations.

In order to apply for a deferral of a final examination in a course taught by the Faculty of Science, students must pick up an application form at the Enrolment Services or download it from the Registrar’s website at ucalgary.ca/registrar/exams and submit the completed form with all supporting documentation to Student Enrolment Services. Students seeking a deferral of a final examination for medical reasons must accompany the application form with a completed Physician/Counsellor Statement form, which may be obtained from the Office of the Registrar or may be downloaded from the Registrar’s website. A medical certificate stating only that a student was seen by a physician is insufficient. Students are warned that trivial medical excuses also are insufficient and that their record of applications for previous medical deferrals will be checked when deferred privileges are applied for. Medical documentation that does not coincide precisely with the examination(s) missed will not be accepted. Misreading the examination timetable is not a valid reason for requesting a deferred final examination.

In the event of foreseeable absence from a final examination, an application for a deferral must be made prior to the examination. In the event of an unforeseen need to be absent from such an examination, the Associate Dean (Undergraduate), or designee, should be notified as soon as possible and application made within 48 hours of the examination. Applications made after the deadlines printed in the Calendar will not be considered.

**C. Supplemental Examinations**

Supplemental examinations provide students with an opportunity to demonstrate competence in a course by re-writing the final examination. The primary goal is to allow students a chance to earn a “C-” grade in the course so they can use the course as a prerequisite. As such, if a student passes a supplemental examination, a “C-” will be the highest grade a student can achieve. If a student fails the supplemental examination, the original grade will stand.

Supplemental examinations are not available for all courses. Availability of supplemental exams is guaranteed only for courses that explicitly indicate on their official course outline that a supplemental examination is possible.

Additionally:

- No more than two supplemental examination privileges, in any University of Calgary course, may be granted to a student in one academic year,
- No more than four supplemental examination privileges will be granted to a student over their whole degree program.
- Only one supplemental exam will be allowed per course.

Supplemental examinations will normally be offered at the same time as deferred final examination for that course, during Spring/Summer intersession, or block weeks. Supplemental examinations may be in a different format than the regular final examination but will cover the same course material as the regular final examination. Supplemental examinations are not normally allowed for deferred examinations. Exceptions require approval from the Dean or designate.

Supplemental exams do not replace the deferred examination process as outlined in section G.6 in Academic Regulations by meeting the criteria set out below.

**You are eligible for a supplemental examination if you meet the following requirements:**

- Your GPA over your most recent coursework, up to 30 units (5.0 full course equivalents), is 2.00 or greater,
- You have earned a cumulative grade of “C-” or better on coursework (e.g. laboratories, assignments, mid-term examinations, quizzes), and
- You achieved the minimum grade for any required term-work components as indicated on the course outline e.g. requirement to pass the lab component).

**You are not eligible for a supplemental examination if you:**

- Have been previously allowed to write a supplemental examination for the course.
- Earned a final grade greater than a “D+” in the course.
- Did not write the final or an approved deferred final examination in the course.
- Were assigned a failing grade in the course due to academic misconduct.
- Are a graduate student.

**Application Process:**

Students who are eligible for a supplemental examination will be notified by the department offering the course. Students who indicate that they want to write the supplemental examination will be required to pay a $150.00 fee.

### 3.7 Student Standing

**A. Dean's List**

The Dean’s List recognizes the outstanding achievement of students in the Faculty. It is compiled annually at the end of the Winter Term. A statement of inclusion on the
Dean’s List will be recorded on the student’s transcript.

To qualify for the Dean’s List, a student must achieve a grade point average of 3.60 or higher over all University of Calgary courses taken in the preceding Summer (including Spring Intersession), Fall and Winter Terms on:

(a) A minimum of 24 units (4.0 full-course equivalents) taken at the University of Calgary (while registered in a program in the Faculty of Science), OR

(b) A minimum of 24 units (4.0 full-course equivalents) taken at the University of Calgary plus successful completion of one four-month Co-operative Education work placement (while registered in a program in the Faculty of Science), OR

(c) A minimum of 12 units (2.0 full-course equivalents) taken at the University of Calgary (while registered in a program in the Faculty of Science), plus two Co-op work placements.

(d) A minimum of 12 units (2.0 full-course equivalents) taken at the University of Calgary (while registered in a program in the Faculty of Science), plus successful completion of one or more approved full-time terms abroad, OR

(e) A program of study assessed by the Student Accessibility Services to be equivalent to (a), (b), (c) or (d) for a particular student.

Notes:
- Where it is appropriate for a student to be assessed under provisions (d) or (e), the student must arrange for all necessary documentation to be received by the Associate Dean (Undergraduate), or designee, no later than May 15.

- Only University of Calgary grades for regular academic courses are used for the Dean’s List; grades earned for Co-operative Education work placements or study-abroad terms do not enter into the grade point average calculations for (b), (c) or (d).

- Students on academic sanctions as outlined in section K (Statement on Principles of Conduct) of this Calendar are not eligible for the Dean’s List.

- Students with deferred examinations and/or term work after Winter Term may not be eligible to be included on the Dean’s List.

B. Performance Review, Probationary Status and Dismissal

The progress of students registered in the Faculty is monitored at least once per year after Winter Term. Students will be required to withdraw if they have accumulated a total of more than 30 units (5.0 full-course equivalents) withdrawals while in attendance at the University of Calgary.

The academic standing of students registered in the Faculty will be reviewed after each Winter Term provided that they have completed at least 18 units (3.0 full-course equivalents) at the University of Calgary since their previous review. (Students who have not completed 18 units (3.0 full-course equivalents) since the previous review will retain their existing status until the next subsequent review). All University of Calgary credit courses, which have been completed since the previous review, are used for the purpose of academic review. Students placed on academic probation or required to withdraw as a result of the academic performance review will be so advised in writing.

Notwithstanding the specific regulations pertaining to Student Standing, students’ academic standing may be reviewed at any time and those with generally poor academic records may be placed or continued on academic probation or required to withdraw at the discretion of the Dean’s delegate.

Academic Turnaround Program (ATP)

The Academic Turnaround Program (ATP) provides eligible students facing their first Required to Withdraw (RTW) ruling for academic reasons the opportunity to continue in their current science program or to seek admission to the Faculty of Science following a RTW ruling from their current faculty. Students in the Faculty of Science will receive a written invitation to participate in the Academic Turnaround Program from the dean or designate. Students accepted to the ATP may continue their studies under Special Academic Probation provided that they fulfill all requirements and are compliant with the conditions of the program. All ATP requirements will be provided to students in writing by the faculty dean or designate. Students who do not fulfill all requirements or who fail to meet the GPA criteria outlined below will be required to withdraw from the university and will be notified by the dean.

At the end of the following Winter Term, students’ progress will be reviewed by the Faculty regardless of the number of courses completed. In order to continue on Special Academic Probation, students must receive a cumulative GPA of 2.00 across all courses taken in the previous Summer (including Spring Intersession), Fall and Winter Terms. Students who have completed 18 units (6 half courses) and received a cumulative GPA of 2.00 across all courses taken will have completed Special Academic Probation and are considered in good academic standing. Students who are non-compliant with any of the ATP conditions will be required to withdraw. Students may only participate once in the ATP.

C. Students in Satisfactory Standing

(a) Will retain that standing if they have achieved a GPA of at least 2.00 over all courses taken since the previous review;

(b) Will be required to withdraw if they have achieved a GPA less than 2.00 over all courses taken since their previous review and they have a probationary period within the last five years. (Probationary periods that have occurred in excess of five years previous will not be counted);

(c) Will be placed on academic probation if they have achieved a GPA of at least 1.70 but less than 2.00 over all courses taken since their previous review and have not been on academic probation within the preceding five years;

(d) Will be required to withdraw from the Faculty if they have achieved a GPA of less than 1.70 over all courses taken since their previous review.

D. Students on Academic Probation

(a) Will be reinstated in satisfactory standing if they have achieved a GPA of at least 2.00 over all courses taken since their previous review;

(b) Will be required to withdraw from the Faculty if they have achieved a GPA of less than 2.00 over all courses taken since their previous review.

E. Readmission

- Students who have been required to withdraw for unsatisfactory academic performance may be considered for re-admission after 12 or more months have elapsed since the date of dismissal.

- Applicants must apply by the deadlines stated in the current Calendar and meet the current admission requirements of the program to which they are seeking admission.

- Readmission is not guaranteed.

- Students should note that it is not normally possible to be readmitted without taking courses to meet the admission average.

Students so readmitted must maintain a grade point average of at least 2.00 on all courses taken in each academic review period after readmission. Failure to do so will result in permanent dismissal from the Faculty of Science. Students who have twice been required to withdraw from one or more Faculties at this or any other institution will not normally be considered for admission at any time.

There are many options for graduate studies leading to MSc and PhD degrees in the area of Biological Sciences. Details of graduate specializations can be found in the graduate section of this calendar. All degrees in the Faculty of Science, except Environmental Science, can be combined with eligible BA and BSc programs from the Faculty of Arts. Refer to Section 3.4 for information on combined degrees, double majors with programs within the Faculty of Science as well as combined degrees with programs from other Faculties. Students interested in pursuing these degrees are encouraged to

BSc and BSc Honours in Ecology Co-operative Education
Minor in Biological Sciences

Department vs. Faculty Regulations
Programs in the Department of Biological Sciences are governed by a combination of general Faculty of Science regulations and the additional program specific regulations listed below.

It is essential for students to be familiar with both sets of regulations. It is helpful to read the Faculty regulations in Section 3 first. Students should consult Academic Requirements in their Student Centre periodically to ensure that requirements are being met. Also students are strongly urged to consult the Department and the Undergraduate Science Centre at all stages of their program.

Department Information
Student enquiries: 403.220.3140
Department Office: Biological Sciences 186
Other enquiries: 403.220.5261
Fax: 403.289.9311
Website: bio.ucalgary.ca/

Enrolment Limitations
Enrolment Limitations in Programs, Admissions and Student Standing
Admission to programs in the department is competitive. Admission will be granted for Fall Term only and will be based upon academic merit. (New admissions to the University are always subject to A.2 as stated in the Admissions section of this Calendar.)

Applications to the Department of Biological Sciences programs are accepted:
- Directly from High School (see Section 3.2 Admissions) into either the Biological Sciences program, or into Honours Biochemistry; Honours Cellular, Molecular and Microbial Biology; Honours Ecology; Honours Plant Biology; or Honours Zoology.
- From external transfer students and change of program requests from University of Calgary students into the Biological Sciences program.
- Subject to the Honours qualifications set out in Subsection 3.2 – Honours Programs, and to availability of space, students may request placement into any of the Honours programs offered by the Department.
- From external transfer students and change of program requests from University of Calgary students into BSc programs in Biochemistry; Cellular, Molecular and Microbial Biology; Ecology; Plant Biology; and Zoology after completion of a minimum of 30 units (5.0 full-course equivalents).

Notes:
- Students who are considering one of the BSc programs described above should plan to complete Biology 311, 371, 331 and at least one of Biology 313 and Biochemistry 393 by the end of their second year. Students should check the specific requirements for the program into which they plan to transfer, as some programs require both Biology 313 and Biochemistry 393.
- Any student in an Honours program is subject to the provisions for continuation in an Honours program, Subsections 3.2 and 3.4C.
- Honours students who do not qualify for continuation will be moved into the Biological Sciences BSc Program unless they have completed Biology 311, 371, 331 and one of Biology 313 or Biochemistry 393 prior to their review period and meet the minimum GPA requirement for admission into the specialized program. Students with a GPA of less than 2.000 are subject to the provisions of 3.7 Student Standing, B. Performance Review, Probationary Status and Dismissal.
- Students will be notified of the results of their application by email (results will not be provided by telephone).

Enrolment Limitations in Courses
Enrolment in many courses offered by the Department of Biological Sciences is limited by available laboratory or tutorial space. Consult the Schedule Builder in the Student Centre for details regarding enrolment in these courses.

Transfers between Alberta Universities and Colleges
The Departments of Biological Sciences at the Universities of Alberta and Calgary and the Department of Biology at the University of Lethbridge have a transfer agreement in effect. The full details of the Biological Sciences Transfer Agreement are available in the Alberta Transfer Guide published by the Alberta Commission on Admissions and Transfer (ACAT) - acat.gov.ab.ca/.

Ethics in the Biological Sciences
Studies in the Biological Sciences involve the use of living and dead organisms. Students taking laboratory- and field-based courses in these disciplines can expect involvement with and experimentation on such materials. Students perform dissections on dead or preserved organisms in some courses. In particular courses, students experiment on living organisms, their tissues, cells, or molecules. Sometimes field work requires students to collect a variety of living materials by many methods, including humane trapping.

All work on humans and other animals conforms to the Helsinki Declaration and to the regulations of the Canadian Council on Animal Care. The Department strives for the highest ethical standards consistent with stewardship of the environment for organisms whose use is not governed by statutory authority. Individuals contemplating taking courses or majoring in one of the fields of study offered by the Department of Biological Sciences should ensure that they have fully considered these issues before enrolling. Students are advised to discuss any concern they might have with the Undergraduate Program Director of the Department.

4.1.1 Common First and Second Years
See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty Regulations and Program Details in Section 4.

Required Courses
18 units (3.0 full-course equivalents) - Biology 241, 243, 311, 331, 371 and at least one of Biology 313 and Biochemistry 393
6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213
6 units (1.0 full-course equivalent) - One of Mathematics 249 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277 (see Recommendations below)
6 units (1.0 full-course equivalent) - Computer Science 217 and 219, or Computer Science 231 and 233, or Computer Science 235 and a senior Computer Science option or
Geology 201 and one of 202 or 203 or Physics 211 or 221, and 223 (see Recommendations below)
6 units (1.0 full-course equivalent) - Major options and/or options combination (see Second Year in the Program Sequence Table below)
3 units (0.5 full-course equivalent) - Chemistry 351
3 units (0.5 full-course equivalent) - Chemistry 353 or option3
12 units (2.0 full-course equivalents) - Breadth Requirement: Options from outside the Faculty of Science4

1Students planning to pursue the Biological Sciences, Plant Biology and Zoology programs require both Biology 313 and Biochemistry 393. Students pursuing the Biochemistry and Cellular, Molecular and Microbial Biology programs require Biochemistry 393. Students pursuing the Ecology program require Biology 313. Students in any program may take both courses should they desire. Consult specific program requirements for details.

2Chemistry 201 and 203 are offered in both Fall and Winter Terms and may be done in any order. Chemistry 211 and 213 are recommended for students majoring in Chemistry and other students with strong backgrounds in chemistry.

3Check details of other programs in the Department of Biological Sciences to see where Chemistry 353 is a requirement.

4These 12 units (2.0 full-course equivalents) form part of the 18 units (3.0 full-course equivalents) options from outside the Faculty of Science (check Table 1 in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

Recommendations
- Biology 241, 243, 311, 331 and 371 and at least one of Biology 313 or Biochemistry 393 should be taken in the sequence described below if students wish to pursue any of the degree programs...
of the Department of Biological Sciences.

- Students who have completed Mathematics 31 can take Mathematics 265 unless they are interested in pursuing programs in Physics and Astronomy. Students interested in those programs are encouraged to take Mathematics 275.
- Students planning a Biochemistry major must take Physics 211 or 221, and 223.
- Students planning a Zoology major must take either the Physics option (Physics 211 or 221, and 223) or the Geology option (Geology 201 and 202).
- Students planning an Ecology or Zoology major are advised to take a course in linear methods (i.e., Mathematics 211 or 213).
- Prior to registering in the second year, students should consider which program they wish to pursue in the third and subsequent years so that an appropriate choice of major access courses may be made (see Section 2 Second Year in the Program Sequence Table below).
- Chemistry 355 is an acceptable substitute for Chemistry 353; it is recommended that students planning Biochemistry Honours complete Chemistry 355 if available.

### Programs in Biochemistry

Effective 2015, the BSc Honours in Biochemistry degree program has been accredited by the Canadian Society for Chemistry (CSC) for Canadian Chemistry programs. The CSC manages the accreditation of undergraduate chemistry programs nationally and abroad. This program maintains national standards of education and promotes the portability of the qualifications of graduates from such programs.

See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty Regulations and Program Details in Section 4.

### Courses constituting the field of Biochemistry

- All courses labelled Biochemistry, except Biochemistry 341
- Biology 241, 243, 311, 331, 371
- Cellular, Molecular and Microbial Biology 411
- Certain Medical Science courses
- Certain 600-level courses may be considered to fulfill program requirements. Consult the department for further information.

### Required Courses - Major Program

See also Section 3.4 Program Requirements, in particular, the regulations on the number of courses at the 200 level and above allowed in a program and on the List of Science-Equivalent Courses in Other Faculties (Table I).

- 15 units (2.5 full-course equivalents) - Biology 241, 243, 311, 331, 371
- 6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213
- 6 units (1.0 full-course equivalent) - One of Mathematics 249 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277
- 6 units (1.0 full-course equivalent) - Physics 211 or 221, and 223
- 3 units (0.5 full-course equivalent) - Biochemistry 393
- 3 units (0.5 full-course equivalent) - Chemistry 351
- 3 units (0.5 full-course equivalent) - Chemistry 353 or 355
- 6 units (1.0 full-course equivalent) - Chemistry 311 and 315
- 12 units (2.0 full-course equivalents) - Biochemistry 401, 403, 411, and 471
- 18 units (3.0 full-course equivalents) - Choose from Biochemistry 443, 543, 547, 551, 553, 555, 561, 575, 577, 579, Cellular, Molecular and Microbial Biology 411
- 12 units (2.0 full-course equivalents) - Options selected from courses offered by the Faculty of Science
- 6 units (1.0 full-course equivalent) - Biochemistry 311 and 315
- 12 units (2.0 full-course equivalents) - Biochemistry 401, 403, 431, and 471
- 18 units (3.0 full-course equivalents) - Choose from Biochemistry 443, 543, 547, 551, 553, 555, 561, 575, 577, 579, Cellular, Molecular and Microbial Biology 411

### Required Courses - Honours Program

See also Section 3.4 Program Requirements, in particular, the regulations on the number of courses at the 200 level and above allowed in a program and on the List of Science-Equivalent Courses in Other Faculties (Table I).

- 15 units (2.5 full-course equivalents) - Biology 241, 243, 311, 331, 371
- 12 units (2.0 full-course equivalents) - Options

- These 18 units (3.0 full-course equivalents) options are selected from faculties outside the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

^1 Choose from either Biochemistry 443, 543, 547, 551, 553, 555, 581, 575, 577 or Cellular, Molarcular and Microbial Biology 411.

4.1.3 Programs in Biological Sciences

See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty Regulations and Program Details in Section 4.

Courses constituting the field of Biological Sciences

- All courses labelled Biochemistry^1, except Biochemistry 341^2
- All courses labelled Biology^2, except Biology 205, 305, 307, 309, 375
- All courses labelled Cellular, Molecular and Microbial Biology^3
- All courses labelled Ecology^2
- All courses labelled Plant Biology^2
- All courses labelled Zoology^2, except Zoology 269
- Most courses labelled Marine Science^4 including Marine Science 321, 420, 430, 440, 450, 451, 500, 507, 511, 515, 525, 537, 540, 544, 546, 572, 574, 582
- Certain other Medical Science courses^4
- Neuroscience 411
- Anthropology 413, 425, 435, 451, 571, Archaeology 417, 555, Geography 417, Geology 308, Neuroscience 401^5
- Certain 600-level courses may be considered to fulfill program requirements. Consult the department for further information.

^1 Students may apply a maximum of 9 units (1.5 full-course equivalents) from independent project courses numbered 507, 528 and 530 towards their major field; of these 9 units (1.5 full-course equivalents), students are permitted a maximum of 6 units (1.0 full-course equivalent) of independent project courses labelled as 507 offered by the Department of Biological Sciences.

^2 Certain courses with restricted enrollments are available in the first instance to those Program Honours and Majors who have met all prerequisites and whose programs require such courses. After a specific registration period for those students, other students who have met all prerequisites may be accommodated.

^3 Applicability to the field depends upon the actual course content. Additional approvals will be granted on a course-by-course basis. Check the list published by the Department each February.

^4 No more than 6 units (1.0 full-course equivalent) of such courses (approved by the Department prior to registering in the course) can be counted towards the major field.

^5 No more than 3 units (0.5 full-course equivalent) of the courses in this group may be counted towards the major field.

Required Courses - Major Program

See also 3.4 Program Requirements, in particular, the regulations on the number of courses at the 200 level and above allowed in a program and on the List of Science-Equivalent Courses in Other Faculties (Table I).

18 units (3.0 full-course equivalents) - Biology 241, 243, 311, 331, 333, 371
6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213
6 units (1.0 full-course equivalent) - One of Mathematics 249 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277
6 units (1.0 full-course equivalent) - Computer Science 217 and 219, or Computer Science 231 and 233, or 235 and Computer Science option or Geology 201 and one of 202 or 203 or Physics 211 or 221, and 223 (see Recommendations below)
3 units (0.5 full-course equivalent) - Biochemistry 393
3 units (0.5 full-course equivalent) - Chemistry 351
3 units (0.5 full-course equivalent) - Chemistry 353 or option
33 units (5.5 full-course equivalents) - At least 9 units (1.5 full-course equivalents) chosen from each of the three areas that constitute the Fields of Biochemistry, Cellular, Molecular and Microbial Biology, Ecology, Plant Biology and Zoology. Of these 33 units (5.5 full-course equivalents), at least 18 units (3.0 full-course equivalents) must be chosen from courses at the 400 level or higher. Note: These courses must be different from the 18 units (3.0 full-course equivalents) required Biology courses listed above and Biochemistry 393.
6 units (1.0 full-course equivalent) - Biology 530^6
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from outside the Faculty of Science^6
18 units (3.0 full-course equivalents) - Options

^6 Honours students should plan to complete this course in their final year.

These 18 units (3.0 full-course equivalents) options are selected from faculties outside the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

Recommended

- Major options should be selected to satisfy the requirements for entry into another chosen major program or to satisfy the requirements for the Biological Sciences program. (See Required Courses - Major Program and Required Courses - Honours Program.)
- Courses in Marine Science may be taken for credit during the summer and/or students may elect to spend the fall of either the third or fourth year attending the Bamfield Fall Program. Refer to the Marine Science course listings for details.
- Students in the Biological Sciences Major program are encouraged to meet with an academic advisor to plan out their course sequences for third and fourth year based on their areas of interest.

4.1.4 Programs in Cellular, Molecular and Microbial Biology

See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty Regulations and Program Details in Section 4.

Courses constituting the field of Cellular, Molecular and Microbial Biology

- Biochemistry 393, 443, 547, 555, 561
- Biology 241, 243, 311, 315, 331, 371, 436
• All courses labelled Cellular, Molecular and Microbial Biology\(^1\)
• Marine Science 500, 501\(^1\), 502\(^2\), 507\(^3\)
• Medical Science 401, 519, 541, 543, 545 and certain other Medical Science courses\(^3\)
• Neuroscience 411
• Plant Biology 401, 543
• Certain 600-level courses may be considered to fulfill program requirements. Consult the department for further information.

\(^1\)Students may apply a maximum of 9 units (1.5 full-course equivalents) from independent project courses numbered 507, 526 and 530 towards their major field; of these 9 units (1.5 full-course equivalents), students are permitted a maximum of 6 units (1.0 full-course equivalent) of independent project courses labelled as 507 offered by the Department of Biological Sciences.

\(^2\)Applicability to the field depends upon the actual course content. Approval will have to be granted on an individual basis. Check the list published by the Department each February.

\(^3\)No more than 6 units (1.0 full-course equivalent) of Medical Science courses can be counted towards the Major Field; Medical Science courses other than those specifically listed here require Department approval prior to registering in the course.

Required Courses - Major Program
See also 3.4 Program Requirements, in particular, the regulations on the number of courses at the 200 level and above allowed in a program and on the List of Science-Equivalent Courses in Other Faculties (Table I).

15 units (2.5 full-course equivalents) - Biology 241, 243, 311, 331, 371
6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213
6 units (1.0 full-course equivalent) - One of Mathematics 249 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277
6 units (1.0 full-course equivalent) - Computer Science 217 and 219, or Computer Science 231 and 233, or 235 and Computer Science option
or
Geology 201 and one of 202 or 203
or
Physics 211 or 221, and 223
3 units (0.5 full-course equivalent) - Biochemistry 393
3 units (0.5 full-course equivalent) - Cellular, Molecular and Microbial Biology 343
6 units (1.0 full-course equivalent) - Chemistry 351 and 353
3 units (0.5 full-course equivalent) - Biochemistry 443
6 units (1.0 full-course equivalent) - Cellular, Molecular and Microbial Biology 411, 527
12 units (2.0 full-course equivalents) - One of:

Cell Biology Emphasis: Cellular, Molecular and Microbial Biology 403 and three of Cellular, Molecular and Microbial Biology 413, 451, 461, 505, 511, 519, 523, 531, 561
or
Microbiology Emphasis: Cellular, Molecular and Microbial Biology 421, 443 and two of Cellular, Molecular and Microbial Biology

431, 451, 461, 523, 543, 545, 549, 563, Biology 435 (course substitutions permitted with consent of the Department)
6 units (1.0 full-course equivalent) - Options from the Field
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from outside the Faculty of Science\(^1\)
30 units (5.0 full-course equivalents) - Options

\(^1\)These 18 units (3.0 full-course equivalents) options are selected from faculties outside the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (5.0 full-course equivalents) from other faculties.

### 4.1.5 Programs in Ecology

See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty Regulations and Program Details in Section 4.

Courses constituting the field of Ecology

- Biochemistry 393
- Cellular, Molecular and Microbial Biology 343, 461
- All courses labelled Ecology\(^1\)
- Marine Science 321, 420, 430, 450, 500, 501\(^3\), 502\(^3\), 507\(^3\), 525, 537, 540, 544, 546
- Certain Medical Science courses\(^4\)
- Geography 231\(^2\), 313\(^2\), 333\(^2\), 357\(^2\), 417\(^2\)
- Plant Biology 327\(^2\), 541\(^2\)
- Zoology 401\(^2\), 403\(^2\), 515\(^2\), 571\(^2\), 577
- Certain 600-level courses may be considered to fulfill program requirements. Consult the department for further information.

\(^1\)Students may apply a maximum of 9 units (1.5 full-course equivalents) from independent project courses numbered 507, 526 and 530 towards their major field; of these 9 units (1.5 full-course equivalents), students are permitted a maximum of 6 units (1.0 full-course equivalent) of
independent project courses labelled as 507 offered by the Department of Biological Sciences.

A maximum of 6 units (1.0 full-course equivalent) of such courses may be counted towards the field.

Applicability to the field depends upon the actual course content. Approval will have to be granted on an individual basis. Check the list published by the Department each February.

No more than 6 units (1.0 full-course equivalent) of such courses (approved by the Department prior to registering in the course) can be counted towards the major field.

**Required Courses - Major Program**

See also 3.4 Program Requirements, in particular, the regulations on the distribution of courses at the 200 level and above allowed in a program and on the List of Science-Equivalent Courses in Other Faculties (Table I).

18 units (3.0 full-course equivalents) - Biology 241, 243, 311, 313, 331, 371

6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213

6 units (1.0 full-course equivalent) - One of Mathematics 240 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277

6 units (1.0 full-course equivalent) - Computer Science 217 and 219, or Computer Science 231 and 233, or 235 and Computer Science option

Geology 201 and one of 202 or 203

or

Physics 211 or 221, and 223

3 units (0.5 full-course equivalent) - Biology 315

3 units (0.5 full-course equivalent) - Chemistry 351

3 units (0.5 full-course equivalent) - Chemistry 353 or option

3 units (0.5 full-course equivalent) - Biology 401

3 units (0.5 full-course equivalent) - Ecology 425

9 units (1.5 full-course equivalents) - Chosen from Ecology 417, 419, 429, 430, 501, 527, 529 or Biology 451

3 units (0.5 full-course equivalent) - Chosen from Ecology 413, Marine Science 420, 430, 450, 537, 501 (approval on individual basis depending on topic) or other Bamfield courses or field-based Ecology 507 with approval of the Department

12 units (2.0 full-course equivalents) - Options from courses constituting the Field of Ecology

6 units (1.0 full-course equivalent) - Ecology 530

18 units (3.0 full-course equivalents) - Breadth Requirement: Options from outside the Faculty of Science

21 units (3.5 full-course equivalents) - Options

1 These 18 units (3.0 full-course equivalents) options are selected from faculties outside the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

**Required Courses - Honours Program**

18 units (3.0 full-course equivalents) - Biology 241, 243, 311, 313, 331, 371

6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213

6 units (1.0 full-course equivalent) - One of Mathematics 240 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277

6 units (1.0 full-course equivalent) - Computer Science 217 and 219, or Computer Science 231 and 233, or 235 and Computer Science option

or

Geology 201 and one of 202 or 203

or

Physics 211 or 221, and 223

3 units (0.5 full-course equivalent) - Biology 315

3 units (0.5 full-course equivalent) - Chemistry 351

3 units (0.5 full-course equivalent) - Chemistry 353 or option

3 units (0.5 full-course equivalent) - Biology 401

Units (0.5 full-course equivalent) - Ecology 425

9 units (1.5 full-course equivalents) - Chosen from Ecology 417, 419, 429, 430, 501, 527, 529 or Biology 451

3 units (0.5 full-course equivalent) - Chosen from Ecology 413, Marine Science 420, 430, 450, 537, 501 (approval on individual basis depending on topic) or other Bamfield courses or field-based Ecology 507 with approval of the Department

12 units (2.0 full-course equivalents) - Options from courses constituting the Field of Ecology

6 units (1.0 full-course equivalent) - Ecology 530

18 units (3.0 full-course equivalents) - Breadth Requirement: Options from outside the Faculty of Science

21 units (3.5 full-course equivalents) - Options

1 These 18 units (3.0 full-course equivalents) options are selected from faculties outside the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

**Suggested Program Sequence**

**Third Year**

- Ecology 417 or 429\(^1\)
- Biology 401
- Ecology 425
- Ecology 419 or 439\(^1\)
- Ecology 413
- Option
- Option
- Non-science option
- Non-science option

**Fourth Year**

- Ecology 530 (for Honours), option (for Majors)
- Ecology 530 continued (for Honours), option (for Majors)
- Ecology 417 or 429\(^1\)
- Option
- Ecology 501\(^1\)
- Option
- Option
- Option

Notes:

- The Faculty may approve registration in the Co-operative Education 543.04 in conjunction with an optional (fourth) work term.
- All courses in the common second-year program must be completed prior to the start of the first work term.
- Students should consult the Faculty Co-op Co-ordinator and Co-operative Education and Internship Co-ordinator for program planning.

**Ecology Co-operative Education**

Application deadline: October 1 for a May 1 placement. Or, May 1 for a September 1 or January 1 placement.

See the subsection on Co-operative Education/Internship Programs in Section 3 (Faculty Regulations) and the major section on "Co-operative Education/Internship" of this Calendar.

Co-operative Education programs are five-year degree programs that include 12 to 16 months of supervised work experience in various industrial and government workplaces. Minimaly, students must be in their second year in the Biological Sciences program with a grade point average of 3.30 before applying for admission to the BSc Ecology Co-operative Education program. A grade point average of 3.30 is required for entry into the BSc Honours Ecology Co-operative Education program. In addition, students must complete the courses outlined for the second year of the Ecology program with the same minimum grade point average before commencing the first co-operative education placement (the summer following second year).

**Required Courses**

120 units (20.0 full-course equivalents) - Same as Ecology Majors or Honours

12 months - Co-operative Education work terms (Co-operative Education 543.01, 543.02, 543.03)

**Work Term Assessment**

The mandatory work term courses, Co-operative Education 543.01, 543.02, 543.03 and the optional course, Co-operative Education 543.04, are graded on a credit (CR) or fail (F) basis. A positive assessment requires satisfactory performance on each of the following items:

- (a) The Co-operative Education Co-ordinator’s evaluation of job performance, which is based on an on-site visit where practical.
- (b) The employer’s evaluation of job performance.
- (c) The student’s self-assessment of job performance and the overall job experience, which is normally based on participation in a debriefing or integrative session.
- (d) A work term report prepared by the student and evaluated by the Faculty.

**Notes:**

- The Faculty may approve registration in Co-operative Education 543.04 in conjunction with an optional (fourth) work term.
- All courses in the common second-year program must be completed prior to the start of the first work term.
- Students should consult the Ecology Co-op Co-ordinator and Co-operative Education and Internship Co-ordinator for program planning.

**4.1.6 Programs in Plant Biology**

See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty
Regulations and Program Details in Section 4.

Courses constituting the field of Plant Biology

- Biochemistry 393, 443, 561
- Cellular, Molecular and Microbial Biology 411, 451, 461, 511, 519, 523, 543
- Ecology 413, 425, 419
- Marine Science 420, 5002, 5012, 5022, 5072, 525
- Certain Medical Science courses3
- All courses labelled Plant Biology1
- Certain 600-level courses may be considered to fulfill program requirements. Consult the department for further information.

1Students may apply a maximum of 9 units (1.5 full-course equivalents) from independent project courses numbered 507, 528 and 530 towards their major field; of these 9 units (1.5 full-course equivalents), students are permitted a maximum of 6 units (1.0 full-course equivalent) of independent project courses labelled as 507 offered by the Department of Biological Sciences.
2Applicability to the field depends upon the actual course content. Approval will have to be granted on an individual basis. Check the list published by the Department each February.
3No more than 6 units (1.0 full-course equivalent) of such courses (approved by the Department prior to registering in the course) can be counted towards the major field.

Required Courses - Major Program

See also 3.4 Program Requirements, in particular, the regulations on the distribution of courses at the 200 level and above allowed in a program and on the List of Science-Equivalent Courses in Other Faculties (Table I).

18 units (3.0 full-course equivalents) - Biology 241, 243, 311, 313, 331, 371
6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213
6 units (1.0 full-course equivalent) - One of Mathematics 249 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277
6 units (1.0 full-course equivalent) - Computer Science 217 and 219, or Computer Science 231 and 233, or 235 and Computer Science option
or Geology 201 and one of 202 or 203 or Physics 211 or 221, and 223
3 units (0.5 full-course equivalent) - Biochemistry 393
3 units (0.5 full-course equivalent) - Chemistry 351
3 units (0.5 full-course equivalent) - Chemistry 353 or option
15 units (2.5 full-course equivalents) - From Biology 435, 453, Plant Biology 327, 401, 403, 421, 543
6 units (1.0 full-course equivalent) - From Biochemistry 561, Biology 451, 505, Plant Biology 541
6 units (1.0 full-course equivalent) - Options from the Field
or Geology 201 and one of 202 or 203 or Physics 211 or 221, and 223
3 units (0.5 full-course equivalent) - Biochemistry 393
3 units (0.5 full-course equivalent) - Chemistry 351
3 units (0.5 full-course equivalent) - Chemistry 353 or option
15 units (2.5 full-course equivalents) - From Biology 435, 453, Plant Biology 327, 401, 403, 421, 543
6 units (1.0 full-course equivalent) - From Biochemistry 561, Biology 451, 505, Plant Biology 541
6 units (1.0 full-course equivalent) - Options from the Field

18 units (3.0 full-course equivalents) - Breadth Requirement: Options from outside the Faculty of Science1
30 units (5.0 full-course equivalents) - Options
1These 18 units (3.0 full-course equivalents) options are selected from faculties outside the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

4.1.7 Programs in Zoology

See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty Regulations and Program Details in Section 4.

Courses constituting the field of Zoology

- Biochemistry 393, 443, 547
- Cellular, Molecular and Microbial Biology 403, 411, 461, 505, 527
- Ecology 425, 527
- All courses in the Calendar labelled Zoology1 except Zoology 269
- Marine Science 321, 430, 440, 450, 451, 5002, 5012, 5032, 5072, 5022, 515, 537, 540, 544, 546, 572, 574, 582
- Certain Medical Science courses3
- Neuroscience 401, 4114
- Psychology 478
- Certain 600-level courses may be considered to fulfill program requirements. Consult the department for further information.

1Students may apply a maximum of 9 units (1.5 full-course equivalents) from independent project courses numbered 507, 528 and 530 towards their major field; of these 9 units (1.5 full-course equivalents), students are permitted a maximum of 6 units (1.0 full-course equivalent) of independent project courses labelled as 507 offered by the Department of Biological Sciences.
2Applicability to the field depends upon the actual course content. Approval will have to be granted on an individual basis. Check the list published by the Department each February.
3No more than 6 units (1.0 full-course equivalent) of such courses (approved by the Department prior to registering in the course) can be counted towards the major field.
4No more than 3 units (0.5 full-course equivalent) from this group of courses may be counted towards the major field.

Required Courses - Major Program

See also 3.4 Program Requirements, in particular, the regulations on the number of courses at the 200 level and above allowed in a program and on the List of Science-Equivalent Courses in Other Faculties (Table I).

18 units (3.0 full-course equivalents) - Biology 241, 243, 311, 313, 315, 331, 371, 401, 435, 451, 453, 505, 507, 525
6 units (1.0 full-course equivalent) - From Biology 249 or 265 or 275 and one of Mathematics 211 or 213 or 267 or 277
6 units (1.0 full-course equivalent) - Computer Science 217 and 219, or Computer Science 231 and 233, or 235 and Computer Science option
or Geology 201 and one of 202 or 203 or Physics 211 or 221, and 223
3 units (0.5 full-course equivalent) - Biochemistry 393
3 units (0.5 full-course equivalent) - Chemistry 351
3 units (0.5 full-course equivalent) - Chemistry 353 or option
15 units (2.5 full-course equivalents) - From Biology 435, 453, Plant Biology 327, 401, 403, 421, 543
6 units (1.0 full-course equivalent) - From Biochemistry 561, Biology 451, 505, Plant Biology 541
6 units (1.0 full-course equivalent) - Options from the Field
or Geology 201 and one of 202 or 203 or Physics 211 or 221, and 223
3 units (0.5 full-course equivalent) - Biochemistry 393
3 units (0.5 full-course equivalent) - Chemistry 351
3 units (0.5 full-course equivalent) - Chemistry 353 or option
15 units (2.5 full-course equivalents) - From Biology 435, 453, Plant Biology 327, 401, 403, 421, 543
6 units (1.0 full-course equivalent) - From Biochemistry 561, Biology 451, 505, Plant Biology 541
6 units (1.0 full-course equivalent) - Options from the Field
or Geology 201 and one of 202 or 203 or Physics 211 or 221, and 223
3 units (0.5 full-course equivalent) - Biochemistry 393
3 units (0.5 full-course equivalent) - Chemistry 351
3 units (0.5 full-course equivalent) - Chemistry 353 or option
15 units (2.5 full-course equivalents) - From Biology 435, 453, Plant Biology 327, 401, 403, 421, 543
6 units (1.0 full-course equivalent) - From Biochemistry 561, Biology 451, 505, Plant Biology 541
6 units (1.0 full-course equivalent) - Options from the Field

1These 18 units (3.0 full-course equivalents) options are selected from faculties outside the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
4.1.10 Minor in Biological Sciences

The requirements for a Minor in Biological Sciences are:

- 6 units (1.0 full-course equivalent) - Biology 241 and 243
- 24 units (4.0 full-course equivalents) - Courses constituting the Field of Biological Sciences at the 300 level or higher but must include at least one of Biology 311, 313, 331, and 371
- The 24 units (4.0 full-course equivalents) may include a maximum of 3 units (0.5 full-course equivalent) from the Field of Biological Sciences offered by departments other than the Department of Biological Sciences.

Notes:

- This Minor is available only to students who are not majoring in the Department of Biological Sciences or are not Environmental Science or Natural Sciences concentrators in Biological Sciences or BHSc majors in Biomedical Sciences or Bioinformatics or majors in the Neuroscience program. This is the single minor program offered by the Department and none of the other programs exist as Minors. Students must be aware that preference in enrolment in many courses offered by the Department of Biological Sciences is given to Majors or Environmental Science or Natural Sciences Concentrators within the Department.
- No more than 3 units (0.5 full-course equivalent) approved Medical Sciences courses can be counted towards the Minor Field.

There are many options for graduate studies leading to MSc and PhD degrees in the area of Chemistry. Details of graduate specializations can be found in the graduate section of this calendar.

All degrees in the Faculty of Science, except Environmental Science, can be combined with eligible BA and BSc programs from the Faculty of Arts. Please refer to Section 3.4 for information on combined degrees, double majors with programs within the Faculty of Science as well as combined degrees with programs from other Faculties. Students interested in pursuing these degrees are encouraged to speak with an advisor in the Undergraduate Science Centre to develop a degree completion plan.

Programs Offered

- BSc in Chemistry
- BSc Honours in Chemistry
- BSc in Applied Chemistry Co-operative Education
- BSc Honours in Applied Chemistry Co-operative Education
- Minor in Chemistry

Required Courses

- Honours Degree Programs) and 3.5B (Course Selection - Introductory Courses)
- 6 units (1.0 full-course equivalent) - Chemistry 201 or 211 (recommended) and Chemistry 203 or 213 (recommended)
- 6 units (1.0 full-course equivalent) - Physics 211 or 221 or 227 and 223
- 3 units (0.5 full-course equivalent) - Mathematics 249; or 265 or 275
- 3 units (0.5 full-course equivalent) - Mathematics 267 or 277
- 42 units (7.0 full-course equivalents) - Chemistry 311, 315, 331, 333, 351, 355 or 353, 371, 373, 453, 471, 502, 531 or 533, Biochemistry 341 or 393
- 15 units (2.5 full-course equivalents) - From the Field of Chemistry of which at least 9 units (1.5 full-course equivalents), in addition to Chemistry 531 or 533, must be 500-level courses
- 3 units (0.5 full-course equivalent) - Any Chemistry course at the 500 level (or above) or any other senior Science courses by the consent of the Department
- 3 units (0.5 full-course equivalent) - Physics 255 or 323
- 6 units (1.0 full-course equivalent) - Mathematics 211 or 213 and 331
- 3 units (0.5 full-course equivalent) - Science 311
- 15 units (2.5 full-course equivalents) - Breadth Requirement: Options selected from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 15 units (2.5 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts.
- 15 units (2.5 full-course equivalents) - Options

Recommended

Science 311 is limited in enrolment. Students may complete it in either the Fall or Winter Term as dictated by the course capacities.

Chemistry 515 is strongly recommended for students planning careers in analytical or environmental chemistry.
Chemistry 201 or 211 and Chemistry 203 or 213

Courses Required for Calculation of Admission GPA:
- A minimum grade point average of 2.70, or in progress before an application can be made to the Applied Chemistry program.
- Science Centre.

Students can apply through the Undergraduate Co-operative Education program sequence, as well as additional rules and regulations, may be obtained from the Undergraduate Faculty of Science, Subsections 3.2 and 3.4D.

Courses Constituting the Field of Applied Chemistry:
- All courses labelled Chemistry except Chemistry 209, 301, 357, 409 and 579
- Co-operative Education 503
- Biochemistry 341, 393 and 443

Required Courses - Major Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses)

4.2.2 Programs in Applied Chemistry Co-operative Education

Admission

Students can apply through the Undergraduate Science Centre once they have completed the required courses and achieved the necessary grades. The detailed Co-operative Education program sequence, as well as additional rules and regulations, may be obtained from the Undergraduate Science Centre.

The following courses (or equivalent transfer credits) must be successfully completed or in progress before an application can be made to the Applied Chemistry program. A minimum grade point average of 2.70, using the courses below, is necessary to be eligible to apply. Students interested in Honours Applied Chemistry must additionally meet the Honours qualifications set out in Subsection 3.2 – Honours Programs.

Courses Required for Calculation of Admission GPA:
- Chemistry 201 or 211 and Chemistry 203 or 213

(b) Honours Program

As above except that an option chosen from the list under the section called Required Courses - Honours Chemistry replaces one of the options in Third Year, and Chemistry 502 replaces two of the options in Fourth Year.

4.2.2 Programs in Applied Chemistry Co-operative Education

Admission

Students can apply through the Undergraduate Science Centre once they have completed the required courses and achieved the necessary grades. The detailed Co-operative Education program sequence, as well as additional rules and regulations, may be obtained from the Undergraduate Science Centre.

The following courses (or equivalent transfer credits) must be successfully completed or in progress before an application can be made to the Applied Chemistry program. A minimum grade point average of 2.70, using the courses below, is necessary to be eligible to apply. Students interested in Honours Applied Chemistry must additionally meet the Honours qualifications set out in Subsection 3.2 – Honours Programs.

Courses Required for Calculation of Admission GPA:
- Chemistry 351 and 355 or 353
- Chemistry 311 and 315
- Chemistry 331 and 333
- Physics 211 or 221 and Physics 227 or 223
- Mathematics 249 or 265 or 275 and Mathematics 267 or 277

In addition, to maintain status in Applied Chemistry, a grade point average of 2.70 must be achieved in each review period for continuation in the BSc program. Any student in an Honours program is subject to the provisions for continuation in an Honours program, Subsections 3.2 and 3.4D.

Courses Constituting the Field of Applied Chemistry:

- All courses labelled Chemistry except Chemistry 209, 301, 357, 409 and 579
- Co-operative Education 503
- Biochemistry 341, 393 and 443

Required Courses - Major Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses)

6 units (1.0 full-course equivalent) - Chemistry 201 or 211 (recommended) and Chemistry 203 or 213 (recommended)

6 units (1.0 full-course equivalent) - Physics 211 or 221 or 227 and 223

3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275

3 units (0.5 full-course equivalent) - Mathematics 267 or 277

42 units (7.0 full-course equivalents) - Chemistry 311, 315, 331, 333, 351, 355 or 353, 371, 373, 425, 453, 471, 515, 531 or 533, Biochemistry 341 or 393

12 units (2.0 full-course equivalents) - From the Field of Chemistry of which at least 6 units (1.0 full-course equivalent) in addition to Chemistry 515 and 531 or 533 must be 500-level courses

3 units (0.5 full-course equivalent) - Physics 255 or 323

6 units (1.0 full-course equivalent) - Mathematics 211 or 213 and 331

18 units (3.0 full-course equivalents) - Non-science options as follows

Science 311

15 units (2.5 full-course equivalents) - Breadth Requirement: (check Table I in 3.4 Program Requirements for ineligible courses)

- Of these 15 units (2.5 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts.

- Options

12 months - Co-operative Education 503.01, 503.02, 503.03

Notes:
- The Faculty may approve registration in Co-operative Education 503.04 in conjunction with an extra (fourth) work term.
- Students should consult the Chemistry Co-op Co-ordinator and Co-operative Education and Internship Co-ordinator for program planning.

Required Courses - Honours Program

See also Section 3 (Faculty Regulations), Subsections 3.4C (Program Requirements - Honours Degree Programs) and 3.5B (Course Selection - Introductory Courses)

6 units (1.0 full-course equivalent) - Chemistry 201 or 211 (recommended) and Chemistry 203 or 213 (recommended)

6 units (1.0 full-course equivalent) - Physics 211 or 221 or 227 and 223

3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275

3 units (0.5 full-course equivalent) - Mathematics 267 or 277

48 units (8.0 full-course equivalents) - Chemistry 311, 315, 331, 333, 351, 355 or 353, 371, 373, 425, 453, 471, 502, 515, 531 or 533, Biochemistry 341 or 393

12 units (2.0 full-course equivalents) - From the Field of Chemistry of which at least 6 units (1.0 full-course equivalent) in addition to Chemistry 515 and 531 or 533 must be 500-level courses

3 units (0.5 full-course equivalent) - Physics 255 or 323

6 units (1.0 full-course equivalent) - Mathematics 211 or 213 and 331

18 units (3.0 full-course equivalents) - Non-science options as follows

15 units (2.5 full-course equivalents) - Breadth Requirement: (check Table I in 3.4 Program Requirements for ineligible courses)

3 units (0.5 full-course equivalent) - Science 311

15 units (2.5 full-course equivalents) - Breadth Requirement: (check Table I in 3.4 Program Requirements for ineligible courses)

9 units (1.5 full-course equivalents) - Options
### 4.2.3 Environmental Science - Chemistry Concentration

Students may pursue a BSc program in Environmental Science with a concentration in Chemistry. This is a single-degree, four-year program offered by the Faculty of Science with collaboration from the Faculty of Arts. Program details are listed in 4.6 Non-Departmental Programs. Since this is a multidisciplinary program with restricted entry, students should consult the Director of the Environmental Science program at their earliest opportunity.

### 4.2.4 Suspended Programs

Admission to the following programs has been suspended:

Students previously admitted to a suspended program will be supported in the completion of their program. As such, program requirements are listed below for the reference of students already admitted to these programs.

#### 4.2.3.1 Program in Honours Chemical Physics

This program is offered in conjunction with the Department of Physics and Astronomy. The BSc Honours program in Chemical Physics has been suspended as of Fall 2016. Students interested in this program should seek advice from a program advisor in the Undergraduate Science Centre. Students interested in this area should consider applying to the Environmental Science program.

#### Admission

Admission to this program has been suspended as of Fall 2016.

#### Student Standing

- Any student in an Honours program is subject to the provisions for continuation in an Honours program, Subsections 3.2 and 3.4C.
- GPA requirements for Honours programs Students in Chemical Physics must present honours-level performance at the academic review completed after each winter semester. Details on the honours review is found in section A.2 of this calendar. After consultation, students who do not qualify for continuation will be moved into either Chemistry or Physics degrees unless they indicate otherwise and meet the admission requirements for their chosen program. Students with a GPA of less than 2.00 are subject to the provisions of 3.7 Student Standing, B. Performance Review, Probationary Status and Dismissal.

#### Courses Constituting the Field of Chemical Physics

- Chemistry 201, 203, 211, 213, 331, 333, 351, 353, 355, 371, 373, 402, 471, 502, 571, 573, 575

### Required Courses - Honours Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses)

- 6 units (1.0 full-course equivalent) - Chemistry 201 or 211 (recommended) and Chemistry 203 or 213 (recommended)
- 6 units (1.0 full-course equivalent) - Physics 211 or 221 or 227 and 255 or 323
- 3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
- 3 units (0.5 full-course equivalent) - Mathematics 267 or 277
- 3 units (0.5 full-course equivalent) - Mathematics 267 or 277
- 3 units (0.5 full-course equivalent) - Computer Science 217
- 21 units (3.5 full-course equivalents) - Chemistry 331, 333, 351, 355 or 353, 371, 373, 471
- 15 units (2.5 full-course equivalents) - Physics 341, 343, 397, 455, 543
- 6 units (1.0 full-course equivalent) - Chemistry 502 or Physics 598
- 9 units (1.5 full-course equivalents) - Applied Mathematics 307, 309, 433
- 3 units (0.5 full-course equivalent) - Physics 381
- 18 units (3.0 full-course equivalents) - Breadth Requirement: Options selected from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
- 21 units (3.5 full-course equivalents) - Options

1Mathematics 275 and 277 are the recommended sequence of mathematics courses.

### Recommendations

Science 311 is recommended as one of the options.

### Suggested Program Sequences

1Students completing an Honours degree in Applied Chemistry will replace the options in their final year with Chemistry 502.
4.3 Computer Science

Degrees Offered

| Undergraduate Programs | Core | Enhancements | Combined Degrees
|------------------------|------|--------------|-------------------|
| Computer Science       | BSc | BA           | BSc Honours, BSc Internship, BA Honours
|                         |     |              | BComm/BSc

There are many options for graduate studies leading to MSc and PhD degrees in the area of Computer Science. Details of graduate specializations can be found in the graduate section of this calendar.

*All degrees in the Faculty of Science, except Environmental Science, can be combined with eligible BA and BSc programs from the Faculty of Arts. Please refer to Section 3.4 for information on combined degrees, double majors with programs within the Faculty of Science as well as combined degrees with programs from other Faculties. Students interested in pursuing these degrees are encouraged to speak with an advisor in the Undergraduate Science Centre to develop a degree completion plan. The BA program in Computer Science is undergoing review. Students interested in this program should seek advice from a program advisor in the Undergraduate Science Centre. Many options for diversifying a BSc in Computer Science are available to students.

*Combined degree with the Haskayne School of Business.

Programs Offered

- BSc and BSc Honours in Computer Science
- BA and BSc Honours in Computer Science
- BSc and BSc Honours in Computer Science Internship
- Minor in Computer Science

Department vs. Faculty Regulations

Programs in the Department of Computer Science are governed by a combination of general Faculty of Science regulations and the additional program specific regulations listed below.

It is essential for students to be familiar with both sets of regulations. It is helpful to read the Faculty Regulations in Section 3 first. Students should consult Academic Requirements in their Student Centre periodically to ensure that requirements are being met. Also, students are strongly urged to consult with the Undergraduate Science Centre (USC) and the Department at all stages of their program.

Department Information

Department Office: Information & Communications Technologies (ICT) 602
Telephone: 403.220.6015
Undergraduate Advisor: Information & Communications Technologies (ICT) 602
Fax: 403.284.4707
Website: cpsc.ucalgary.ca
Email: cpsc@cpsc.ucalgary.ca

Accreditation

Effective 2001, the BSc and BSc Honours degree programs have been accredited by the Computer Science Accreditation Council (CSAC) for Computer Science programs. Effective 2001, the BSc degree program with Software Engineering Concentration and effective 2006 the BSc Honours with Software Engineering Concentration have been accredited by the CSAC for Software Engineering programs.

The CSAC is sponsored by the Canadian Information Processing Society (cips.ca). Its mandate is to ensure that accredited programs meet standards for education in Computer Science and Software Engineering.

Students who graduate from an accredited degree program are eligible for the Information Systems Professional (I.S.P.) designation after two years of professional experience. The I.S.P designation is recognized as a professional designation under provincial law in most Canadian Provinces, including Alberta.

First Courses in Computer Science

The Department of Computer Science offers the following courses for students who are interested in an introduction to the discipline of computer science or who wish to use computers more effectively. Each of Computer Science 217, 231 and 235 is intended primarily for a group of students (with differing academic objectives) who are interested in an introduction to computer science that includes an introduction to programming and that is available for credit in computer science programs. The pace at which programming concepts are introduced also differs in each course.

- Computer Science 217 is recommended for students wishing to combine studies in computer science with studies in other disciplines, or who are in programs other than computer science and who are interested in a course that includes an introduction to programming. Material related to computer science will be introduced at a pace that is appropriate for students who are unfamiliar with programming or scripting. Upon completion of Computer Science 217, students who are interested in computer science programs would continue by taking Computer Science 219. The latter course includes additional lectures in order to ensure that students in this course sequence are adequately prepared for senior courses in computer science.

- Computer Science 231 is recommended for computer science majors. Material related to computer science will be introduced at a somewhat faster pace than in Computer Science 217. Upon completion of Computer Science 231, students who are interested in computer science programs would continue by taking Computer Science 233.

- Computer Science 235 is a challenging course intended for exceptional students. This course also includes an introduc-
Required Courses - BSc Major Program

6 units (1.0 full-course equivalent) - One of the following three sets of courses:
- Computer Science 231 and 233
- Computer Science 217 or Data Science 211 and Computer Science 219
- Computer Science 235 and 3 units (0.5 full-course equivalent) from the Field of Computer Science at the 300 level or above

21 units (3.5 full-course equivalents) - Computer Science 313, 331, 355, 359, 413, 449 and 457
3 units (0.5 full-course equivalent) - Software Engineering 300 or 301
12 units (2.0 full-course equivalents) - One of Mathematics 211 or 213; one of Mathematics 249 or 265 or 275; one of Mathematics 271 or 273; and one of Statistics 213, 321, or an alternative course in Statistics with the consent of the Department (Statistics 321 is preferred)
3 units (0.5 full-course equivalent) - Logic Requirement: Philosophy 279 or 377
3 units (0.5 full-course equivalent) - Ethics Requirement: Philosophy 314
24 units (4.0 full-course equivalents) - from the Field of Computer Science: 9 units (1.5 full-course equivalents) of these must be numbered 500 or above, 12 units (2.0 full-course equivalents) at the 400 level or above, and 3 units (0.5 full-course equivalent) at the 300 level or above
36 units (6.0 full-course equivalents) - Non-CPSC Requirement: Options that are not in the Field of Computer Science
12 units (2.0 full-course equivalents) - Options (see Notes)

Notes:
- Students who complete Computer Science 217, 231 or Data Science 211 are only permitted to count a maximum of 6 units (1.0 full-course equivalent) of computer science at the 200 level toward the BSc Major program. Students who complete Computer Science 235 are only permitted to count a maximum of 3 units (0.5 full-course equivalent) of computer science at the 200 level toward the BSc Major program.
- Students who have completed Computer Science 319, prior to admission to a program in Computer Science, may use this course in lieu of Computer Science 331 as a program requirement. Students with Computer Science 319 will be required to complete a non-credit, on-line course in order to be qualified for senior courses in theoretical computer science. Students may contact the Department of Computer Science in order to register in this course.

4.3.1 Programs in Computer Science

Admission
See the Faculty of Science subsections on Enrolment Limitations in Section 3 Faculty Regulations and Program Details in Section 4.

In some cases, courses that are no longer offered can be substituted for newer courses listed in the following requirements. Additional information about course substitutions is available from the Department of Computer Science.

Courses constituting the field of Computer Science
- All courses labelled Computer Science except Computer Science 203;
- Mathematics 318, 391, 493;
- All courses labelled Software Engineering.

must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts. The 9 units (1.5 full-course equivalents) from other faculties may not be chosen from the courses listed in Table I in 3.4 Program Requirements.
- Statistics 321 has one of Mathematics 253 or 267 or 277 as a prerequisite.
- Science 311 may be counted among the 9 units (1.5 full-course equivalents) from other Faculties.
- The Department offers several concentrations that can provide focus on specific areas of computer science. Students interested in these concentrations need to choose their options carefully, including the options taken in the first two years of the program, to fulfill the concentration requirements.

Required Courses - BSc Honours Program

6 units (1.0 full-course equivalent) - One of the following three sets of courses:
- Computer Science 231 and 233
- Computer Science 217 or Data Science 211 and Computer Science 219
- Computer Science 235 and 3 units (0.5 full-course equivalent) from the Field of Computer Science at the 300 level or above

27 units (4.5 full-course equivalents) - Computer Science 313, 331, 355, 359, 413, 449, 457 and 502
3 units (0.5 full-course equivalent) - Software Engineering 300 or 301
12 units (2.0 full-course equivalents) - One of Mathematics 211 or 213, one of Mathematics 249 or 265 or 275, one of Mathematics 271 or 273, and one of Statistics 213, 321, or an alternate course in Statistics with the consent of the Department (Statistics 321 is preferred)
3 units (0.5 full-course equivalent) - Logic Requirement: Philosophy 279 or 377
3 units (0.5 full-course equivalent) - Ethics Requirement: Philosophy 314
24 units (4.0 full-course equivalents) - From the Field of Computer Science: 15 units (2.5 full-course equivalents) of these courses must be at the 500 level or above, and 9 units (1.5 full-course equivalents) at the 400 level or above
24 units (4.0 full-course equivalents) - Non-CPSC Requirement: Options that are not in the Field of Computer Science
18 units (3.0 full-course equivalents) - Options (see Notes)

Notes:
- Students who complete Computer Science 217, 231 or Data Science 211 are only permitted to count a maximum of 6 units (1.0 full-course equivalent) of computer science at the 200 level toward the BSc Honours program. Students who complete Computer Science 235 are only permitted to count a maximum of 3 units (0.5 full-course equivalent) of computer
science at the 200 level toward the BSc Honours program.

- Students who have completed Computer Science 319, prior to admission to a program in Computer Science, may use this course in lieu of Computer Science 331 as a program requirement. Students with Computer Science 319 will be required to complete a non-credit, on-line course in order to be qualified for senior courses in theoretical computer science. Students may contact the Department of Computer Science in order to register in this course.

- Courses used to satisfy the above Logic Requirement, Ethics Requirement and Non-CPSC Requirement must include at least 18 units (3.0 full-course equivalents) chosen from faculties other than the Faculty of Science. Of these 18 units (3.0 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

- The 18 units (3.0 full-course equivalents) from other faculties may not be chosen from the courses listed in Table I in 3.4 Program Requirements.

- Statistics 321 has one of Mathematics 253 or 267 or 277 as a prerequisite.

- Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

- The Department offers several concentrations that can provide focus on specific areas of computer science. Students interested in these concentrations need to choose their options, including the options taken in the first two years of the program, carefully to fulfill the concentration requirements.

**Required Courses - BA Major Program**

The BA program in Computer Science is undergoing review. Students interested in this program should seek advice from a program advisor in the Undergraduate Science Centre. Many options for diversifying a BSc in Computer Science are available to students.

This program is available to students wishing to complete a double major with an Arts discipline: It is only open to students who are also registered in a BA program offered by the Faculty of Arts. Students interested in this program should contact the Department of Computer Science for advice concerning the choice of courses in Computer Science that would complement their studies in Arts.

6 units (1.0 full-course equivalent) - One of the following three sets of courses:

- Computer Science 231 and 233
- Computer Science 217 or Data Science 211 and Computer Science 219
- Computer Science 235 and 3 units (0.5 full-course equivalent) from the Field of Computer Science at the 300 level or above

15 units (2.5 full-course equivalents) - Computer Science 331, 355, 441, 449, and 481

3 units (0.5 full-course equivalent) - Software Engineering 300 or 301

9 units (1.5 full-course equivalents) - One of Mathematics 211 or 213, one of Mathematics 249 or 265 or 275, and one of Mathematics 271 or 273

6 units (1.0 full-course equivalent) - Logic Requirement: One of Philosophy 279 or 377 and 379

3 units (0.5 full-course equivalent) - Ethics Requirement: Philosophy 314

24 units (4.0 full-course equivalents) - Taken from the Field of Computer Science: one numbered 500 or above, two numbered 400 or above, and one numbered 300 or above

48 units (8.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these, at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the courses from other faculties.

6 units (1.0 full-course equivalent) - Options

**Notes:**

- Students who complete Computer Science 217, 231 or Data Science 211 are only permitted to count a maximum of 6 units (1.0 full-course equivalent) of computer science at the 200 level toward the BA Major Program. Students who complete Computer Science 235 are only permitted to count a maximum of 3 units (0.5 full-course equivalent) of computer science at the 200 level toward the BA Major program.

- Students who have completed Computer Science 319, prior to admission to a program in Computer Science, may use this course in lieu of Computer Science 331 as a program requirement. Students with Computer Science 319 will be required to complete a non-credit, on-line course in order to be qualified for senior courses in theoretical computer science. Students may contact the Department of Computer Science in order to register in this course.

- Courses used to satisfy the above Logic Requirement, Ethics Requirement and Non-CPSC Requirement must include at least 18 units (3.0 full-course equivalents) chosen from faculties other than the Faculty of Science. Of these 18 units (3.0 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

**Recommendations:**

- Students unable to take Philosophy 279 in first year may substitute Philosophy 377. Philosophy 379 is not required for a BSc in Computer Science but is recommended. This course is required for a BA in Computer Science.

- A course in technical writing, such as Communications Studies 363 or Science 311, is highly recommended. If no such course is available then any course in which a student’s writing will be assessed should be considered.

- Courses offered by the Haskayne School of Business are often a good choice for non-science options for future software developers. Space permitting, and provided the Area Chair and Associate Dean (Undergraduate Affairs) in the Haskayne School of Business have given approval, registration in restricted Business Technology Management (BTMA) courses may be permitted. Consult the Undergraduate Program Advising Office in the Haskayne School of Business (Scurfield Hall 351) for details.

- To ensure compliance with CSAC accreditation breadth requirements, students should ensure that they complete 30 units (5.0 full-course equivalents) that are not in computer science or mathematics as part of their degree program, provided that program requirements allow for this course selection.

**Recommended Program Sequence BSc (Majors and Honours)**

There are many sequences in which courses can be taken in order to complete requirements for the BSc in Computer Science and BSc Honours in Computer Science programs. In general, the following tables simply list one commonly used sequence. For information about alternatives, see the note on “First Courses in Computer Science,” above, the preceding list of requirements for whichever Computer Science program is of interest, the above recommendations, and recommendations concerning Mathematics and Statistics courses that are included in the description of Mathematics and Statistics programs.

Students interested in a specific concentration need to choose their computer science, science and non-science options according to the concentration requirements. This includes options taken in years 1 and 2 of the program.

*Students are encouraged to complete these required 400-level courses in Computer Science as soon as possible. Choice of 500-level options in Computer Science will be limited if this advice is not followed.

**Computer Science 502 is required for the Honours program.** Computer Science Majors interested in a research project should consider Computer Science 503.

### Concentrations

Students may focus their program on one of nine areas of interest by including a specified set of courses in their Major or Honours degree. Successful completion will mean that the area of concentration will appear on the transcript. The concentrations and course requirements are:

**A. Concentration in Computer Game Development**

3 units (0.5 full-course equivalent) from Mathematics 267, 277, 283 or 331
3 units (0.5 full-course equivalent) from Physics 211, 221 or 227
6 units (1.0 full-course equivalent) Computer Science 453 and 585
3 units (0.5 full-course equivalent) from Computer Science 441, 461 or 481
3 units (0.5 full-course equivalent) from Computer Science 587, 589 or 591
3 units (0.5 full-course equivalent) from Computer Science 433, 531 or 535
6 units (1.0 full-course equivalent) selected from:
- Art 231, 233, 241, 243, 249, 273, 373, 377, 379
- Drama 223, 225
- English 265, 393, 395, 399
- Communications Studies 201
- Operations Management 301
- Music 209, 211, 213, 225, 309, 325, 329, 351, 451, 453, 511, 513, 551, or any Music course listed as formerly Music Theory and Composition

**Note:** Students interested in taking courses offered by the Department of Art to complete these requirements are encouraged to contact that department for permission to enrol in courses normally restricted to BFA Art students.

**B. Concentration in Software Engineering**

6 units (1.0 full-course equivalent) Computer Science 594 or 502.06, or Computer Science 503.06 and 3 units (0.5 full-course equivalent) chosen from courses labelled Software Engineering

Computer Science 481

9 units (1.5 full-course equivalents) chosen from courses labelled Software Engineering, Computer Science 453 or 591
6 units (1.0 full-course equivalent) chosen from courses labelled Software Engineering, Computer Science 411, 441, 453, 471, 499*1, 527, 528, 559, 567, 571, 575, 585, 599*1
3 units (0.5 full-course equivalent) chosen from Computer Science 405, Economics 201 or courses offered by the Haskayne School of Business

**Notes:**
- The Haskayne School of Business will consider waiving the prerequisites for senior courses (particularly Business Technology Management 463 and 465) on an individual request basis. Students should contact the particular Area Chair in the Haskayne School of Business regarding prerequisite waivers.
- Honours students interested in Software Engineering should consider the use of Computer Science 502.06 to complete the Honours requirement for Computer Science 502.

*Students interested in using Computer Science 499 or 599 should contact the department to determine which topics, if any, are being offered in a given year that may be used to fulfill the requirements of this concentration.

**C. Concentration in Theoretical Computer Science**

18 units (3.0 full-course equivalents) chosen from Mathematics 311, 313, 391, Statistics 321, Philosophy 379, Computer Science 411, 418, 491, 502.02, 503.02, 511, 513, 517, 518, 519, 521, 522, 530, 561, Mathematics 527 or Pure Mathematics 527, of which, a maximum of 6 units (1.0 full-course equivalent) may be at the 300 level.

**Note:** Honours students interested in Theoretical Computer Science should consider the use of Computer Science 502.02 to complete the Honours requirement for Computer Science 502.

**D. Concentration in Scientific Computation**

3 units (0.5 full-course equivalent) from Mathematics 267 or 277
3 units (0.5 full-course equivalent) of courses labelled Mathematics or Statistics 300-level or above
6 units (1.0 full-course equivalent) Computer Science 471 and 491 or Mathematics 391
9 units (1.5 full-course equivalents) chosen from Computer Science 453, 461, 531, 535, 537, 567, 583, 599*1 or 601*1, of which, a maximum of 3 units (0.5 full-course equivalent) may be at the 400 level
3 units (0.5 full-course equivalent) from Biology 311, 313, 371, Marine Science 321, Plant Biology 327, 403, 421, Chemistry 311, 331, 351, 371, 373, 402.01, Physics 325, 343, 375, 455, Astrophysics 307, 409, Geology 312, 323, 337, 343, 353, 381, 401, 475, Geophysics 351, 355, or 453. All of these courses require a minimum of 6.0 units (1.0 full-course equivalent) of prerequisite courses. Students should identify the prerequisite courses needed for the course they intend to complete from this list.

**Notes:**
- Honours students interested in Computer Graphics should consider the use of Computer Science 502.03 to complete the Honours requirement for Computer Science 502.

**E. Concentration in Human-Computer Interactions**

Computer Science 481
6 units (1.0 full-course equivalent) chosen from Computer Science 581 (recommended), 583 or 584
3 units (0.5 full-course equivalent) from Computer Science 453, 502.07, 503.07, 581, 583, 584, Software Engineering 403, 471 or 515 that is not already being used to meet another concentration requirement
6 units (1.0 full-course equivalent) chosen from:
- Anthropology 203
- Art 317, 321, 331, 334, 399, 401, 431, 491
- Communications Studies 201, 481
- Innovation 321, 323
- Museum and Heritage Studies 201
- Psychology 200, 201, 203, 300, 301, 365, 369
- Sociology 201, 311, 313, 315, 341, 345

**Notes:**
- Honours students interested in Human-Computer Interactions should consider the use of Computer Science 502.07 to complete the Honours requirement for Computer Science 502.
- Students interested in taking courses offered by the Department of Art to complete these requirements are encouraged to contact that department for permission to enrol in courses normally restricted to BFA Art students.

**F. Concentration in Computer Graphics**

3 units (0.5 full-course equivalent) from Mathematics 267 or 277
Computer Science 453
6 units (1.0 full-course equivalent) from Computer Science 587, 589 and 591
6 units (1.0 full-course equivalent) from Computer Science 481, 535, 585, 587, 589, 591 or 599*1, that are not already being used to meet another concentration requirement
3 units (0.5 full-course equivalent) from Art 231, 233, 241, 249, 373, 377, 379, Physics 211, 221, or 227

**Notes:**
- Honours students interested in Computer Graphics should consider the use of Computer Science 502.03 to complete the Honours requirement for Computer Science 502.
Students interested in taking courses offered by the Department of Art to complete these requirements are encouraged to contact the department for permission to enrol in courses normally restricted to BFA Art students.

Students interested in using Computer Science 599 should contact the department to determine which topics, if any, are being offered in a given year that may be used to fulfill the requirements of this concentration.

G. Concentration in Information Security

Computer Science 329, 441, 525 and 526
3 units (0.5 full-course equivalent) from Computer Science 418, Pure Mathematics 418, or Mathematics 318
3 units (0.5 full-course equivalent) from Computer Science 502.04, 503.04, 527, 528, 530, 577 or Software Engineering 521

Note: Honours students interested in Information Security should consider the use of Computer Science 502.04 to complete the Honours requirement for Computer Science 502. Computer Science 418 is recommended over Pure Mathematics 418.

H. Concentration in Networks and Distributed Computing

Computer Science 329
Computer Science 441
3 units (0.5 full-course equivalent) from Computer Science 559 or 561
3 units (0.5 full-course equivalent) from Computer Science 525, 526, 528 or 530
3 units (0.5 full-course equivalent) from Computer Science 502.08 or Computer Science 503.08
3 units (0.5 full-course equivalent) from Software Engineering 513, Computer Science 550, 567, 568 or 571

Note: Computer Science 526 is recommended over Computer Science 525, 528 or 530.

I. Concentration in Visualization and Analytics

3 units (0.5 full-course equivalent) from Computer Science 583 or 599.87
3 units (0.5 full-course equivalent) from Computer Science 471 or 599.44
3 units (0.5 full-course equivalent) from Statistics 321, 327 or 423
9 units (1.5 full course equivalents) of Computer Science 453, 481, 502.03, 502.07, 503.03, 503.07, 583, 599.87, 599.88, or 599.89 that is not already being used to meet another concentration requirement.

Note: Students are strongly encouraged to complete both Computer Science 583 and 599.87.

4.3.2 BSc Major and Honours in Computer Science Internship Programs

The Internship programs in Computer Science are five-year (120 units or 20 full-course equivalents) degree programs that include a 12- or 16-month Internship period of supervised work experience.

Before starting their first Internship work period, students must meet the admission requirements specified in the Co-operative Education/Internship section of this Calendar. In addition, students must be Computer Science majors or Computer Science Honours students, and must have completed (at the relevant application deadline) between 75 and 96 units (12.5 and 16 full-course equivalents) appropriate to their degree program, including:

(a) All of Computer Science 313, 319 or 331, 355, 359 and Software Engineering 300 or 301
(b) Philosophy 279 or 377
(c) An additional 18 units (3.0 full-course equivalents) in the Field of Computer Science numbered 300 or above.

Students should have a minimum grade point average of 2.50 calculated over the most recent course work to a maximum of 30 units (5.0 full-course equivalents) at the time of application to the Internship Major program. Honours students in good standing at the time of application will be admitted to the Internship Honours program.

Students must apply to the Undergraduate Science Centre prior to completing the admission requirements outlined above, and by the dates given below. Transcripts must show that the student is enrolled in any courses necessary to complete the admission requirements. Application deadlines are:

- October 1 for a May 1 first Internship placement
- May 1 for a September 1 first Internship placement
- May 1 for a January 1 first Internship placement

Requirements

Students in the BSc in Computer Science Internship program must meet all requirements for the BSc Major in Computer Science degree program. Students in the BSc Honours in Computer Science Internship program must meet all requirements for the BSc Honours in Computer Science program. In addition to the above requirements, students must complete the following three courses (which represent the individual Internship work terms):

- Internship 503.01, 503.02, and 503.03 (Internship 503.04 is recommended but not required.)

Students must take all their Internship work terms consecutively and be registered full-time. Upon completion of each Internship work term, the student must present a work term report to the Department of Computer Science Internship Representative. Reports and work terms are evaluated on a CR/F grade, based on job performance and completion of a work term report that meets the standards of the Department of Computer Science. Students should also be aware of the policy concerning course withdrawal, as specified in the Co-operative Education/Internship section of this Calendar.

For further details and information, see the Department of Computer Science web page (cpsc.ucalgary.ca/undergrad/internship/).

Work Term Assessment

The mandatory work term courses, Internship 503.01, 503.02 and 503.03 and the additional course, Internship 503.04, are graded on a credit (CR) or fail (F) basis. A positive assessment requires satisfactory performance on each of the following items:

(a) The Internship Co-ordinator’s evaluation of job performance, which is based on an on-site visit where practical.
(b) The employer’s evaluation of job performance.
(c) The student’s self-assessment of job performance and the overall job experience, which is normally based on participation in a debriefing or integrative session.
(d) A work term report prepared by the student and evaluated by the Faculty.

Notes:

- The Faculty may approve registration in Internship 503.04.
- Students should consult the Computer Science Internship Co-ordinator and Co-operative Education and Internship Co-ordinator for program planning

Program Sequence

The Internship period, consisting of the consecutive Internship 503.01, 503.02, 503.03 and optional 503.04 Internship work terms, is normally taken shortly after completing the required courses as indicated above. This typically occurs after year three (minimum 90 units or 15.0 full-course equivalents) but before completing year four (maximum 105 units or 17.5 full-course equivalents).

The combination of Internship and study sessions will allow completion of the program in five years.

4.3.3 Combined Degree Programs

Please see 3.4 Program Requirements of the Faculty of Science section of the Calendar concerning programs that combine studies in multiple disciplines – including Double Major and Double Honours programs, Combined Degree Programs within the Faculty of Science, and Combined Degree Programs with other Faculties. Combinations involving Computer Science and another Discipline that are commonly pursued include:

- A Double Major or Combined degree programs with those offered by the Department of Mathematics and Statistics.
- A Combined Program with another Science discipline – notably with Biological Science.
- A Combined Program leading to a BComm degree (offered by the Haskev School of Business) and to a BSc in Computer Science.

Requirements for such programs are often extremely tight. Please consult the Department of Computer Science for advice about course selections if you are interested in these or other program combinations.
4.3.4 Required Courses - Minor Program

- 6 units (1.0 full-course equivalent) - One of the following three sets of courses:
  - Computer Science 217 or Data Science 211 and Computer Science 219
  - Computer Science 231 and 233
  - Computer Science 235 and 3 units (0.5 full-course equivalent) in the Field of Computer Science at the 300 level or above
- 3 units (0.5 full-course equivalent) - Computer Science 319 or 331
- 21 units (3.5 full-course equivalents) - From the Field of Computer Science of which 15 units (2.5 full-course equivalents) must be numbered 300 or above, and 6 units (1.0 full-course equivalent) must be numbered 400 or above

Notes:
- Many senior courses in Computer Science have prerequisites in other disciplines, especially in Mathematics and Statistics.
- Students with Computer Science 319 will be required to complete a non-credit, on-line course in order to be qualified for senior courses in theoretical computer science. Students may contact the Department of Computer Science in order to register in this course.

There are many options for graduate studies leading to MSc and PhD degrees in the area of Geosciences. Details of graduate specializations can be found in the graduate section of this calendar.

Double Major and Combined Degree Programs

- Double major programs are allowed combining any two of: (i) Geology or Geophysics (Petroleum Geology Concentration), (ii) Geophysics, (iii) Earth Science, (iv) Environmental Science (Geology).
- Combined degree programs are allowed combining Geophysics with one of (i) Geology, (ii) Geology (Petroleum Geology Concentration), (iii) Environmental Science (Geology).

Department vs. Faculty Regulations

Programs in the Department of Geoscience are governed by a combination of general Faculty of Science regulations and the additional program specific regulations stated in the following sections. It is essential for students to be familiar with both sets of regulations. It is helpful to read the Faculty Regulations in Section 3 first. Students should consult Academic Requirements in their Student Centre periodically to ensure that requirements are being met. Also, students are strongly urged to consult with the Undergraduate Science Centre (USC) at all stages of their program.

APEGAWomen Requirements

The practice of geology and geophysics in Alberta is governed by Provincial law and regulated by the Association of Professional Engineers and Geoscientists of Alberta (APEGAWomen). Students are advised to visit apegawomen.ca/educators/asap/ to fill out an application form for the APEGAWomen Student Advantage Program (ASAP). In order to meet the requirements of professional registration, specific academic training and four years of appropriate full-time experience as a geologist- or geophysicist-in-training following graduation are needed. The Majors and Honours BSc programs in Geology, Geophysics (Petroleum Geology Concentration), Applied and Environmental Geology, and Geophysics, whose course requirements are stipulated in sections 4.4.1 - 4.4.5, with the exception of 4.4.4 Environmental Science - Geology Concentration, meet the current academic requirements for professional registration with APEGAWomen, if the appropriate options are taken (see the Notes in the Required Courses subsections in sections 4.4.1 - 4.4.5, with the exception of 4.4.4 Environmental Science - Geology Concentration). These academic requirements are available on the APEGAWomen website: apegawomen.ca, and on the Department website (see below).

Department Information

Department Office: Earth Sciences 118
Telephone: 403.220.5841
Fax: 403.284.0074

Email: geoscience@ucalgary.ca

Enrolment Limitations

Program Enrolment Limits
1. The Department of Geoscience limits enrolment in all programs. Students may be directly admitted into the Geology or Geophysics programs. Students may also apply to transfer into the Geology (Petroleum Geology Concentration) program after completion of 30 units (5.0 full-course equivalents). As space permits, the Department will accept a certain number of students who wish to gain admission to the Department’s programs by transferring from other institutions or programs. Any student requesting admission at this level is subject to section A.2.1 of the Admissions section of this Calendar. In the event that the number of students choosing any of these programs exceeds the number that can be accommodated by available resources, students will be admitted to that program in descending rank order of academic performance until the enrolment limit is reached.

2. Admission will be granted for Fall Term only and will be based upon academic merit. Due to limited enrolment capacity in many senior courses, it may not always be possible to accommodate every student’s choice of optional geology courses in the third and subsequent years.

Course Enrolment Limitations

Many of the second-, third- and fourth-year courses in Geology and Geophysics are limited-enrolment courses, and priority for enrolment is given to students registered in one of the following programs: Geology, Geophysics (Petroleum Geology Concentration), Geophysics, Environmental Science (Geology Concentration), Natural Sciences (Geoscience Concentration), Earth Science.

4.4.1 Programs in Geology

Admission

See the sections on Enrolment Limitations under the Department of Geoscience and under Section 3 (Faculty Regulations).

Courses constituting the field of Geology

- All courses labelled Geology excluding Geology 209, 301, 305, 307, 308, 377, 471

Geology Program Streams*

Students may focus their studies by following the Hydrogeology/Environmental Geoscience stream or the Solid Earth Geoscience stream. This entails choosing appropriate options, as outlined in the Required Courses - Major Program Section. More information can be found on the Department of Geoscience website.

Programs Offered

BSc and BSc Honours in Geology, Geology (Petroleum Geology Concentration), and Geophysics

Minors in Geology and Geophysics

Suspended Programs

BSc in Applied and Environmental Geology
BSc Honours in Applied and Environmental Geology

Notes:

1. All degrees in the Faculty of Science, except Environmental Science, can be combined with eligible BA and BSc programs from the Faculty of Arts. Please refer to Section 3.4.1 for information on combined degrees, double majors with programs within the Faculty of Science as well as combined degrees with programs from other faculties. Students interested in pursuing these degrees are encouraged to speak with an advisor in the Undergraduate Science Centre to develop a degree completion plan.

* A stream is not a separate program, but rather a route or a suggested sequence of courses within the Geology program that students should take to focus their studies in a certain area.
3 units (0.5 full-course equivalent) - Geophysics 351

18 units (3.0 full-course equivalents) - Options from the Field of Geology

- Students interested in the Hydrogeology/Environmental Geoscience stream are advised to take Geology 401 and 403 (foundational courses), and Geology 441, followed by one or more recommended options. Recommended options are Geology 435, 475, 505, 537, 571, 597.

- Students interested in the Solid Earth Geoscience stream are advised to take Geology 431 and 433 (foundational courses), and Geology 435, followed by one or more recommended options. Recommended options are Geology 523, 527, 535, 541, 543, 555.

- To meet APEGA Geology requirements, students should satisfy either (a) or (b):
  (a) take one of Geology 431, 433, 463, 483
  (b) take both Geology 401 and 571

6 units (1.0 full-course equivalent) - Geology, Geophysics or Engineering (GGE) options from the following (see Notes):

- Petroleum Engineering 507, 513, 515, 523, 525, 533, 543, 563, 573
- A maximum of two of these may be counted towards APEGA Geology requirements. Some of these courses have Petroleum Engineering 523 as a prerequisite. Students are advised to take Petroleum Engineering 523 in the Fall Term.

- Courses in the Fields of Geology and Geophysics

- Recommended geophysics options for students interested in the Hydrogeology/Environmental Geoscience stream: Geophysics 355, 565.
- Recommended geophysics options for students interested in the Solid Earth Geoscience stream: Geophysics 355, 453.

6 units (1.0 full-course equivalent) - Physics 211 or 221, and 223

6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213

3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275

3 units (0.5 full-course equivalent) - Mathematics 253 or 267 or 277

3 units (0.5 full-course equivalent) - Mathematics 211

3 units (0.5 full-course equivalent) - Science 311

6 units (1.0 full-course equivalent) - Science options from the following (see Notes):

  - Applied Mathematics 307, 413, 415
  - Biology 205, 241, 243
  - Chemistry 311, 315, 331, 333, 351, 353, 371, 373

6 units (1.0 full-course equivalent) - Computer Science 217 or 231 or 235; Computer Science 219 or 233

Data Science 211

Mathematics 311, 331, 349, 353, 367, 375, 376, 377, 413, 415

Physics 3211, 3231, 325

Statistics 205 or 213 or 321 or 327

*Recommended options

15 units (2.5 full-course equivalents) - Breadth Requirement (see Notes)

12 units (2.0 full-course equivalents) - Options (Science options are recommended -- see Notes)

Notes:

- The Major program may contain a maximum of 66 units (11.0 full-course equivalents) from the Field of Geology.
- The Major programs must contain at least 9 units (1.5 full-course equivalents) at the 500 level or above from the Field of Geology.
- 600-level courses are available to fourth year students with prerequisites and consent of the Department.

In order to meet the academic requirements for registration with APEGA, 6 units (1.0 full-course equivalent) from the Science Options and/or the Options must be chosen from one or more of biology, chemistry (3 units or 0.5 full-course equivalent maximum), computer science, physics (3 units or 0.5 full-course equivalent maximum), or statistics.

Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements)

Required Courses - Honours Program

See also Section 3 (Faculty Regulations), Subsections 3.4C (Program Requirements - Honours Degree Programs) and 3.5B (Introductory Courses for Science Degree Programs).

36 units (6.0 full-course equivalents) - Geology 201; 202 or 203; 313 or 423; 323; 333 or 311; 337; 341 or 445; 343; 353 or 373; 381; 435 or 441; 493 or 491

3 units (0.5 full-course equivalent) - Geophysics 351

3 units (0.5 full-course equivalent) - Geophysics 355 or 453 or 565

One of:

- 6 units (1.0 full-course equivalent) - Geology 510 and 12 units (2.0 full-course equivalents) options from the Field of Geology

- 3 units (0.5 full-course equivalent) - Geology 509 and 15 units (2.5 full-course equivalents) options from the Field of Geology

- Students interested in the Hydrogeology/Environmental Geoscience stream are advised to take Geology 401 and 403 (foundational courses), and Geology 441, followed by one or more recommended options. Recommended options are Geology 435, 475, 505, 537, 571, 597.

- Students interested in the Solid Earth Geoscience stream are advised to take Geology 431 and 433 (foundational courses), and Geology 435, followed by one or more recommended options. Recommended options are Geology 523, 527, 535, 541, 543, 555.

- To meet APEGA Geology requirements, students should satisfy either (a) or (b):
  (a) take one of Geology 431, 433, 463, 483
  (b) take both Geology 401 and 571

6 units (1.0 full-course equivalent) - Geology, Geophysics or Engineering (GGE) options from the following (see Notes): 

- Petroleum Engineering 507, 513, 515, 523, 525, 533, 543, 563, 573
- A maximum of two of these may be counted towards APEGA Geology requirements. Some of these courses have Petroleum Engineering 523 as a prerequisite. Students are advised to take Petroleum Engineering 523 in the Fall Term.

- Courses in the Fields of Geology and Geophysics

- Recommended geophysics options for students interested in the Hydrogeology/Environmental Geoscience stream: Geophysics 355, 565.
- Recommended geophysics options for students interested in the Solid Earth Geoscience stream: Geophysics 355, 453.

6 units (1.0 full-course equivalent) - Physics 211 or 221, and 223

6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213

3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275

3 units (0.5 full-course equivalent) - Mathematics 253 or 267 or 277

3 units (0.5 full-course equivalent) - Mathematics 211

3 units (0.5 full-course equivalent) - Science 311

6 units (1.0 full-course equivalent) - Science options from the following (see Notes): 

- Applied Mathematics 307, 413, 415
- Biology 205, 241, 243
- Chemistry 311, 315, 331, 333, 351, 353, 371, 373

6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213

3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275

3 units (0.5 full-course equivalent) - Mathematics 253 or 267 or 277

3 units (0.5 full-course equivalent) - Mathematics 211

3 units (0.5 full-course equivalent) - Science 311

6 units (1.0 full-course equivalent) - Science options from the following (see Notes): 

- Applied Mathematics 311, 413, 415
- Biology 205, 241, 243
- Chemistry 311, 315, 331, 333, 351, 353, 371, 373
- Computer Science 217 or 231 or 235; Computer Science 219 or 233
- Data Science 211
Required Courses - Minor Program
30 units (5.0 full-course equivalents) in the Field of Geology

Suggested Program Sequence (Majors and Honours)

First Year
Geology 201 Geology 202
Chemistry 201 or 211 Chemistry 203 or 213
Mathematics 249 or 265 or 275 Mathematics 267 or 277
Physics 211 or 221 Physics 223
Non-science option Non-science option

Second Year
Geophysics 351 Geology 323
Geology 313 Geology 333
Geophysics 381 Geology 343
Mathematics 211 or 221 Geology 353
Science 311 Non-science option

Third Year
Geology 337\textsuperscript{1} Geology 493
Geology 445 Geology 435\textsuperscript{1} or 441\textsuperscript{1}
Geology option Geology option
Geology option Geology option
Non-science option Science option

Fourth Year
Geology option Science option
GGE option\textsuperscript{2} (for Majors); Geophysics 355 or 453 or 565 (for Honours) GGE option\textsuperscript{2}
Geology option (for Majors) or Geology 510\textsuperscript{1} (for Honours) Geology option (for Majors) or Geology 510\textsuperscript{1} (for Honours)
Option (Science recommended) Option (Science recommended)
Option Option

\textsuperscript{1}Geology 337 is a field school that runs for about 15-18 days in the Spring and/or Summer Term.
\textsuperscript{2}Geology, Geophysics or Engineering option from the specified list.

4.4.2 Programs in Geology (Petroleum Geology Concentration)

Admission
See the sections on Enrolment Limitations under the Department of Geoscience and under Section 3 (Faculty Regulations).

Courses constituting the field of Geology (Petroleum Geology Concentration)

- All courses labelled Geology excluding Geology 209, 301, 305, 307, 308, 377, 471

Required Courses - Major Program
See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Degree Programs) and 3.5B (Introductory Courses for Science Degree Programs).

54 units (7.5 full-course equivalents) - Geology 201, 202 or 203, 313 or 423, 323, 333 or 311, 337, 343, 353 or 373, 381, 435, 445 or 341, 463 or 483 or 461 or 583, 491 or 493, 577, 581 or 575 or 591
3 units (0.5 full-course equivalent) - Option from the Field of Geology
6 units (1.0 full-course equivalent) - Geophysics 351 and 559
9 units (1.5 full-course equivalents) - Geology, Geophysics or Engineering options from the following:
- Petroleum Engineering 507, 513, 515, 523, 525, 533, 543, 563, 573
- A maximum of two of these may be counted towards APEGA Geology requirements. Students are advised to take Petroleum Engineering 523 first, and to take it in the Fall Term.

- Courses in the Field of Geology
  - Recommended Options: Geology 401, 463 or 483 or 461 or 583, 537, 541, 545, 561, 579, 597.

- Courses in the Field of Geophysics
  - Recommended Option: Geophysics 355.

6 units (1.0 full-course equivalent) - Physics 211 or 221, and 223
6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
3 units (0.5 full-course equivalent) - Mathematics 253 or 267 or 277
3 units (0.5 full-course equivalent) - Mathematics 211
3 units (0.5 full-course equivalent) - Science 311
6 units (1.0 full-course equivalent) - Science options: same as for Geology Major program (also, see Notes)
12 units (2.0 full-course equivalents) - Options (Science options are recommended -- see Notes)
15 units (2.5 full-course equivalents) - Breadth Requirement (see Notes)

Notes:
- The Honours program may contain a maximum of 66 units (11.0 full-course equivalents) in the Field of Geology.
- The Major program must contain at least 9 units (1.5 full-course equivalents) at the 500 level or above from the Field of Geology.
- 600-level courses are available to fourth year students with prerequisites and consent of the Department.
- In order to meet the academic requirements for registration with APEGA, 6 units (1.0 full-course equivalent) from the Science Options and/or the Options must be chosen from one or more of biology, chemistry (3 units or 0.5 full-course equivalent maximum), computer science, physics (3 units or 0.5 full-course equivalent maximum), or statistics.
- Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). These 15 units (2.5 full-course equivalents) and Science 311 form the 18 units (3.0 full-course equivalents) non-science course requirements selected from faculties other than the Faculty of Science. Of these 15 units (2.5 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

- Students are advised to try 201 or 211, and 203 or 213
- Geology 337 is a field school that runs for about 15-18 days in the Spring and/or Summer Term.
- Geology, Geophysics or Engineering option from the specified list.
- Geology 510 (a 6-unit full course) may be replaced by Geology 509 (a 3-unit half course) plus a 3-unit option from the Field of Geology for the Honours program.
- Geology 435 is a field school that runs for about 15-16 days in the Spring and/or Summer Term.
- Geology 441 is a field school that runs for about 12-14 days in the Summer Term.
Notes:

- The Honours program may contain a maximum of 78 units (13.0 full-course equivalents) in the Field of Geology.
- In order to meet the academic requirements for registration with APEGA, 6 units (1.0 full-course equivalent) from the Science Options and/or the Options must be chosen from one or more of biology, chemistry (3 units or 0.5 full-course equivalent maximum), computer science, physics (3 units or 0.5 full-course equivalent maximum), or statistics.
- Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). These 15 units (2.5 full-course equivalents) and Science 311 form the 18 units (3.0 full-course equivalents) non-science course requirements selected from faculties other than the Faculty of Science. Of these 15 units (2.5 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

‡Geology 435 is a field school that runs for about 15-16 days in the Spring and/or Summer Term.

4.4.3 Programs in Geophysics

Admission

See the sections on Enrolment Limitations under the Department of Geoscience and scientific regulation.

Courses constituting the field of Geophysics

- All courses labelled Geophysics excluding Geophysics 365 and 375
- Geology 201, 202 or 203, 341, 343, 381, 449
- Physics 211, 212, 223, 321, 323

Required Courses - Major Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Degree Programs) and 3.5B (Introductory Courses for Science Degree Programs).

33 units (5.5 full-course equivalents) - Geophysics 355, 351 or 359, 419, 453, 457, 517, 547, 549, 551, 557, 559
15 units (2.5 full-course equivalents) - Geology 201, 202 or 203, 343, 381, 446 or 441
3 units (0.5 full-course equivalent) - Applied Mathematics 415 or Mathematics 415
6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213

3 units (0.5 full-course equivalent) - Computer Science 217 or 231 or 235
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
9 units (1.5 full-course equivalents) - Mathematics 211; 253 or 267 or 277; 331
12 units (2.0 full-course equivalents) - Physics 211 or 221, 223, 321, 323

6 units (1.0 full-course equivalent) - Science or Engineering options from the following:
- Applied Mathematics 307 or 311, 413
- Chemistry 321, 371, 373
- Computer Science 219 or 233
- Data Science 211
- Mathematics 307, 311, 349, 361, 375, 376, 411, 413, 421
- Petroleum Engineering 507, 513, 515, 523, 543
- Physics 325, 341, 343, 397, 455, 497
- Statistics 321, 327
- Courses in the Field of Geophysics
- Courses in the Field of Geology

Notes:

- Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
- The Major program may contain a maximum of 66 units (11.0 full-course equivalents) from the Field of Geophysics, and the Honours program may contain a maximum of 78 units (13.0 full-course equivalents) from the Field of Geophysics.
- 600-level courses are available to fourth year students with prerequisites and consent of the Department.
- The Majors and Honours programs in Geophysics meet the current academic requirements for professional registration with APEGA.
- Geophysics majors are allowed to replace Mathematics 331 with 367 or 377 in their programs as long as they also take either Applied Mathematics or Mathematics 376 as a Science Option or Option in their programs. Such a replacement should be made by Geophysics majors wishing to do an Applied Mathematics Minor program, as Mathematics 331 is not accepted in the Applied Mathematics minor program.
4.4.4 Environmental Science - Geology Concentration

Students may pursue a BSc program in Environmental Science with a concentration in Geology. This is a single-degree, four-year program offered by the Faculty of Science with collaboration from the Faculty of Arts. Program details are listed in 4.6 Non-Departmental Programs. Since this is a multidisciplinary program with restricted entry, students should consult the Director of the Environmental Science program at their earliest opportunity.

Note: Students may also pursue BSc programs in Earth Science which is offered by the Faculty of Arts in collaboration with the Faculty of Science.

4.4.5 Suspended Programs

Admission to the following program has been suspended.

Students previously admitted to a suspended program will be supported in the completion of their program. As such, program requirements are listed below for the reference of students already admitted to these programs.

4.4.5.1 Programs in Applied and Environmental Geology

Admission

Admission to this program has been suspended as of Fall 2015. See the sections on Enrolment Limitations under the Department of Geoscience and under Section 3 (Faculty Regulations).

Courses constituting the Field of Applied and Environmental Geology

- Geology 201, 202 or 203, 313, 323, 333, 337, 343, 353, 381, 401, 403, 503, 435, 441, 445, 505, 510, 571, 597
- Geophysics 351, 355

Required Courses - Major Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Degree Programs) and 3.5B (Introductory Courses for Science Degree Programs).

45 units (7.5 full-course equivalents) - Geology 201 or 202 or 203, 313 or 423, 323, 333 or 311, 337, 343, 353 or 373, 381, 401, 403 or 503, 445 or 341, 505, 571, 597

3 units (0.5 full-course equivalent) - Option from the Field of Geology (Geology 441 is recommended)

8 units (1.0 full-course equivalent) - Geophysics 549 or 355, 565

6 units (1.0 full-course equivalent) - Physics 211 or 221, 223
6 units (1.0 full-course equivalent) - Chemistry 201 or 211, and 203 or 213
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
3 units (0.5 full-course equivalent) - Mathematics 253 or 267 or 277
3 units (0.5 full-course equivalent) - Mathematics 211
3 units (0.5 full-course equivalent) - Mathematics 331
3 units (0.5 full-course equivalent) - Statistics 327
3 units (0.5 full-course equivalent) - Statistics 311
12 units (2.0 full-course equivalents) - Science or Engineering options chosen from the following (see Notes):
   • Applied Mathematics 307 or 311, 413, 415
   • Chemistry 311, 315, 321, 331, 333, 351, 353, 371, or 373
   • Civil Engineering 423, 523, 525
   • Computer Science 217 or 231 or 235; Computer Science 219 or 233
   • Engineering 481
   • Geology courses (from the Field of Geology)
   • Geophysics 355, 453, 457, 559, or other courses from the Field of Geophysics
   • Mathematics 311, 349, 375, 376, 413, 414, or Mathematics 321 or Statistics 321
   • Petroleum Engineering 507, 513, 515, 523, 543
   • Physics 321, 323, 325

3 units (0.5 full-course equivalent) - Mathematics 211
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
3 units (0.5 full-course equivalent) - Mathematics 253 or 267 or 277
3 units (0.5 full-course equivalent) - Mathematics 331
3 units (0.5 full-course equivalent) - Statistics 327
3 units (0.5 full-course equivalent) - Science 311
9 units (1.5 full-course equivalents) - Option (Science or Engineering options are recommended)
15 units (2.5 full-course equivalents) - Breadth Requirement (see Notes)

Notes:
   • The Major program may contain a maximum of 66 units (11.0 full-course equivalents) from the Field of Applied and Environmental Geology.
   • 600-level courses are available to fourth year students with prerequisites and consent of the Department.
   • In order to meet the academic requirements for registration with APEGA, the Applied and Environmental Geology Majors program must include, in addition to the physics, chemistry and statistics courses already required in the program, 3 units (0.5 full-course equivalent) in one of biology, chemistry, computer science, statistics or physics. This choice must be made from either the 12 units (2.0 full-course equivalents) Science or Engineering Options or the 9 units (1.5 full-course equivalents) Options for the Applied and Environmental Geology Majors program.
   • Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). These 15 units (2.5 full-course equivalents) and Science 311 form the 18 units (3.0 full-course equivalents) non-science course requirements selected from faculties other than the Faculty of Science. Of these 18 units (3.0 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

Required Courses - Honours Program
See also Section 3 (Faculty Regulations), Subsections 3.4G (Program Requirements - Major Degree Programs) and 3.5B (Introductory Courses for Science Degree Programs).
45 units (7.5 full-course equivalents) - Geology 201, 202 or 203, 313 or 423, 323, 333 or 311, 337, 343, 353 or 373, 381, 401, 403 or 503, 445 or 341, 505, 571, 597

One of:
   • 3 units (0.5 full-course equivalent) - Geology 509 and 9 units (1.5 full-course equivalents) Science or Engineering options chosen from the list below
   • 6 units (1.0 full-course equivalent) - Geology 510 and 6 units (1.0 full-course equivalent) Science or Engineering options chosen from the list below

   • Science or Engineering options (see Notes):
     • Applied Mathematics 307 or 311, 413, 415
     • Chemistry 311, 315, 321, 331, 333, 351, 353, 371, or 373
     • Civil Engineering 423, 523, 525
     • Computer Science 217 or 231 or 235; Computer Science 219 or 233
     • Engineering 481
     • Geology courses (from the Field of Geology)
     • Geophysics 355, 453, 457, 559, or other courses from the Field of Geophysics
     • Mathematics 311, 349, 375, 376, 413, 414, or Mathematics 321 or Statistics 321
     • Petroleum Engineering 507, 513, 515, 523, 543
     • Physics 321, 323, 325

There are many options for graduate studies leading to MSc and PhD degrees in the area of Mathematics and Statistics. Details of graduate specialisations can be found in the graduate section of this calendar. All degrees in the Faculty of Science, except Environmental Science, can be combined with eligible BA and BSc programs from the Faculty of Arts. Please refer to Section 3.4 for information on combined degrees, double majors with programs within the Faculty of Science as well as combined degrees with programs from other faculties. Students interested in pursuing these degrees are encouraged to speak with an advisor in the Undergraduate Science Program to develop a degree completion plan.

Combined Degree with the Haskein School of Business.

The BSc/BEd program is a current degree offered with the Werklund School of Education. Please see section 4.5.9 and the Werklund School of Education section of the calendar for more details.

Programs Offered

- BSc and BSc Honours in Actuarial Science
- BSc and BSc Honours in Actuarial Science Co-operative Education
- BSc and BSc Honours in Mathematics
- BComm/BSc Combined Degree in Actuarial Science and Business
- BSc/BEd Concurrent Degree in General Mathematics in Education
- Minors in Mathematics and Statistics

Suspended Programs

- BSc and BSc Honours in Applied Mathematics
- BSc and BSc Honours in Pure Mathematics
- BSc and BSc Honours in Statistics
- Minors in Applied Mathematics and Pure Mathematics

Department vs. Faculty Regulations

Programs in the Department of Mathematics and Statistics are governed by a combination of general Faculty of Science regulations and the additional program specific regulations listed below.

It is essential for students to be familiar with both sets of regulations. It is helpful to read Section 3 (Faculty Regulations) first.

Students should consult Academic Requirements in their Student Centre periodically to ensure that all requirements are being met. Students are strongly urged to consult the Department or Undergraduate Science Centre (USC) at all stages of their program.

Department Information

Courses offered by the Department bear the labels Mathematics, Statistics and Actuarial Science. The course descriptions appear in the back of this Calendar in three non-contiguous alphabetically arranged blocks.

All students intending to pursue a Major or Honours program in Mathematics or Actuarial Science should consult the Associate Head - Undergraduate. The Associate Head - Undergraduate can provide advice on such important matters as specialized programs available within the field, recommended course sequences, possible combinations of Major and Minor fields and recommended undergraduate study leading to graduate study.

Mathematics and Statistics

Department Office: Mathematical Sciences 476
Telephone: 403.220.5203
Fax: 403.220.5150
Website: math.ucalgary.ca/
Email: mathinfo@ucalgary.ca

Diagnostic Testing and First-Year Mathematics Prerequisites

Refer to C. Mathematics Competency Equivalents in the Academic Regulations section.

Special Assessment (Challenge Examinations)

Students who are enrolled in Mathematics 211 or 265, but who feel that they have already mastered the course material, may take a challenge examination during the first week of classes. Students who pass the appropriate test are granted special assessment status for that course and direct entry into Mathematics 311 or 267, respectively. Credit will be given for the course taken by special assessment, a grade assigned, and the regular course fee will be assessed. Students interested in pursuing special assessment should consult the Department during the first week of classes.

Option

Option

*Geology 337 is a field school that runs for about 15-18 days in the Spring and/or Summer Term.
*Geology 441 is a field school that runs for about 12-14 days in the Summer Term.

Note: Students taking a geology field school course in a term are permitted to register in an additional 15 units (2.5 full-course equivalents) in that term (for a total of 18 units or 3.0 full-course equivalents).
Core Courses
All programs include the following common core of courses:
- Mathematics 211 or 213
- Mathematics 249 or 265 or 275
- Mathematics 267 or 277
- Mathematics 311 or 313
- Mathematics 321 or Statistics 321
- Mathematics 367 or 381
- Computer Science 217 or 231 or 235 or Data Science 211

4.5.1 Recommended First and Second Year Sequence
First Year for All Programs
1. Mathematics 249 or 265 or 275
2. Mathematics 267 or 277
3. Mathematics 211 or 213
4. Computer Science 217 or 231 or 235 or Data Science 211
5. Mathematics 271 or 273 or option
6. Statistics 205 or option
7. Arts option
8. Arts option
9. Non-science option
10. Non-science option

Second Year for All Programs
1. Mathematics 311 or 313
2. Statistics 321 or option
3. Statistics 323 or option
4. Actuarial Science 325 or option
5. Actuarial Science 327 or option
6. Option
7. Option
8. Option
9. Non-science option
10. Non-science option

*Students in the Department of Mathematics and Statistics programs are encouraged to take Mathematics 213 and 313. Eligible students should consider the Honours Program in Actuarial Sciences, Applied Mathematics, Pure Mathematics or Statistics.

4.5.2 Programs in Mathematics
Courses constituting the field of Mathematics
- All courses labelled Mathematics except Mathematics 205, 305, 331, 403, 415 and 433
- All courses labelled Statistics except Statistics 213, 217, 327, 423 and 425
- Actuarial Science 437, 511

Required Courses - Major Program
See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses).

6 units (1.0 full-course equivalent) - Mathematics 211 or 213; Mathematics 311 or 313
6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; Mathematics 267 or 277
6 units (1.0 full-course equivalent) - Two from Statistics 205, 321 and either Mathematics 271 or 273
18 units (3.0 full-course equivalents) - Options from the Field of Mathematics
3 units (0.5 full-course equivalent) - Computer Science 231 or 217 or 235 or Data Science 211
6 units (1.0 full-course equivalent) - Any courses in the Field of Mathematics at the 400 level or above
3 units (0.5 full-course equivalent) - Mathematics 516 or 518 or Statistics 517
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
54 units (9.0 full-course equivalents) - Options

*Note: These courses are recommended for students in the Honours Mathematics program.

Required Courses - Honours Program
In addition to the requirements specified by the Faculty of Science (see Section 3), students are required to complete the following program of study:

6 units (1.0 full-course equivalent) - Mathematics 211 or 213; Mathematics 311 or 313
6 units (1.0 full-course equivalent) - Mathematics 213 or 211; Mathematics 311 or 313
6 units (1.0 full-course equivalent) - Mathematics 249 or 265; Mathematics 267
6 units (1.0 full-course equivalent) - Two from Statistics 205, 321 and either Mathematics 271 or 273
18 units (3.0 full-course equivalents) - Any courses in the Field of Mathematics
6 units (1.0 full-course equivalent) - Any courses in the Field of Mathematics at the 400 level or above
3 units (0.5 full-course equivalent) - A course in the Field of Mathematics at the 500 level or above excluding Mathematics 516, 518 and Statistics 517
3 units (0.5 full-course equivalent) - Mathematics 518 (with a grade of “B” or higher)
3 units (0.5 full-course equivalent) - Computer Science 231 or 217 or 235 or Data Science 211
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from Faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
51 units (8.5 full-course equivalents) - Options

*Note: A grade of “B” or higher in Mathematics 518 is required for the Honours program. Students who do not achieve a grade of “B” or higher in Mathematics 518 may still graduate from the regular BSc in Mathematics. Whenever applicable and feasible, students in the Honours program should take the advanced version of any course in the field.

Suggested First and Second Year Honours in Mathematics*

First Year Courses
1. Mathematics 249 or 265
2. Mathematics 267
3. Mathematics 213
4. Computer Science 217 or 231 or 235 or Data Science 211
5. Mathematics 273
6. Statistics 205 or option
7. Arts option
8. Arts option
9. Option
10. Non-science option

Second Year Courses
1. Mathematics 367
2. Mathematics 376
3. Mathematics 355
4. Mathematics 313
5. Statistics 321 or option
6. Option
7. Option
8. Option
9. Non-science option
10. Non-science option

*Any two of Statistics 265, 321 and either Mathematics 271 or 273.

Note: Students interested in a statistics focused plan of study should consult the section on the Concentration on Statistics below for alternative first and second year course selections.

Recommendations
Students should consult with the Undergraduate Director or the Undergraduate Science Centre (USC) on a regular basis throughout their program.

Concentrations
Students may choose to focus their program on one of three areas of interest by including a specified set of courses into their Major degree. Students must apply for concentrations via their Student Centre. Concentrations will appear on the transcript. Students should carefully plan their course selections to ensure that prerequisites for upper-level courses are obtained. Consulta-
A. Concentration in Statistics

Students must complete the same requirements as those in the Major program with some substitutions. For clarity, the requirements for the entire program are listed below.

a. 6 units (1.0 full-course equivalent) - Mathematics 211 or 213; Mathematics 311 or 313
b. 6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; Mathematics 267 or 277
c. 3 units (0.5 full-course equivalent) - One of Statistics 205 and either Mathematics 271 or 273
d. 6 units (1.0 full-course equivalent) - Statistics 321 and 323
e. 21 units (3.5 full-course equivalents) - Courses in the Field of Mathematics
f. 18 units (3.0 full-course equivalents) are required from the following list:
   - Courses from list "f" that are also in the Field of Mathematics, may be applied towards list "e". Courses from list "f" that are not in the Field of Mathematics will apply towards Options.
g. 3 units (0.5 full-course equivalent) - Statistics 517
h. 3 units (0.5 full-course equivalent) - Mathematics 518 (with a grade of “B”)
i. 3 units (0.5 full-course equivalent) - Computer Science 231 or 217 or 235 or Data Science 211
j. 18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
k. 51 units (8.5 full-course equivalents) - Options

B. Concentration in Computational Applied Mathematics

Students must complete the same requirements as those in the Major program with some substitutions. For clarity, the requirements for the entire program are listed below.

a. 3 units (0.5 full-course equivalent) - Mathematics 211 or 213
b. 6 units (1.0 full-course equivalent) - Mathematics 311 and 361 or 313 and an Option
c. 6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; Mathematics 267 or 277
d. 3 units (0.5 full-course equivalents) - Mathematics 271 or 273
e. 6 units (1.0 full-course equivalent) - Statistics 321 and 323
f. 9 units (1.5 full-course equivalents) - Statistics 321 and 323
g. 3 units (0.5 full-course equivalent) - Mathematics 307
h. 9 units (1.5 full-course equivalents) - Mathematics 325, 391 and 493
i. 3 units (0.5 full-course equivalent) - Mathematics 335 or 355

Honours degree with a Concentration in Statistics

Students wishing to complete an Honours degree in Mathematics with a Concentration in Statistics must have credit for both Mathematics 518 (with a grade of “B” or higher) and Statistics 517. The requirement of Mathematics 518 replaces 3 units (0.5 full-course equivalent) of Options.

a. 6 units (1.0 full-course equivalent) - Mathematics 211 or 213; Mathematics 311 or 313
b. 6 units (1.0 full-course equivalent) - Mathematics 249 or 265; Mathematics 267
Honours degree with a Concentration in Mathematical Finance and Risk Management

Students wishing to complete an Honours degree in Mathematics with a Concentration in Mathematical Finance and Risk Management must complete the above requirements. However, Mathematics 518 (with a grade of “B” or higher) is specifically required.

- a. 3 units (0.5 full-course equivalent) - Mathematics 211 or 213
- b. 6 units (1.0 full-course equivalent) - Mathematics 311 and 361; or 313 and an Option
- c. 6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; Mathematics 267 or 277
- d. 3 units (0.5 full-course equivalents) - Mathematics 271 or 273
- e. 9 units (1.5 full-course equivalents) - Statistics 321, 323, 507
- f. 9 units (1.5 full-course equivalents) - Mathematics 367, 376 and 413
- g. 3 units (0.5 full-course equivalents) - Mathematics 307
- h. 3 units (0.5 full-course equivalents) - Mathematics 335 or 355
- i. 15 units (2.5 full-course equivalents) - Mathematics 383, 391, 493, 581 and 583
- j. 3 units (0.5 full-course equivalents) - Computer Science 217 or 231 or Data Science 211
- k. 3 units (0.5 full-course equivalent) - Computer Science 219 or 233
- l. 3 units (0.5 full-course equivalent) - Mathematics 516 or 518 or Statistics 517
- m. 18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
- n. 36 units (6.0 full-course equivalents) - Options

Recommendations

Students should consult with the Undergraduate Director or the Undergraduate Science Centre (USC) on a regular basis throughout their program.

Required Courses - Minor Program

- 30 units (5.0 full-course equivalents) from the Field of Mathematics with at least 18 units (3.0 full-course equivalents) at the 300-level or higher.

4.5.3 Programs in Statistics

Courses constituting the Field of Statistics

- Mathematics 211, 213, 249, 265, 267, 273, 275, 277, 311, 313, 367
Faculty of Science

Actuaries’ requirements, ultimately the Society of Actuaries will make this determination.

**Required Courses - Major Program**

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses).

3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
3 units (0.5 full-course equivalent) - Mathematics 267 or 277
3 units (0.5 full-course equivalent) - Mathematics 311 or 313
6 units (1.0 full-course equivalent) - Statistics 321 and 323
6 units (1.0 full-course equivalent) - Mathematics 211 or 213; Mathematics 311 or 313
6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; Mathematics 267 or 277
9 units (1.5 full-course equivalents) - Mathematics 367 or one from the field of Actuarial Science at the 300 level or higher
9 units (1.5 full-course equivalents) - Mathematics 271 or 273

**Required Courses - Minor Program**

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Minor Programs) and 3.5B (Course Selection - Introductory Courses).

3 units (0.5 full-course equivalent) - Statistics 429
3 units (0.5 full-course equivalent) - Statistics 505, 507, 533, 543
6 units (1.0 full-course equivalent) - Selected from:
- All Actuarial Science courses;
- Statistics 505, 507, 533, 543

18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

33 units (5.5 full-course equivalents) - Options

**Recommendations**

- Not every 400- and 500-numbered Statistics and Actuarial Sciences course is offered every year. Students in third year should ensure they take a sufficient number of these in order to graduate at the end of their fourth year.

**Required Courses - Honours Program**

In addition to the requirements specified by the Faculty of Science (see Section 3), students are required to complete the following program of study:

3 units (0.5 full-course equivalent) - Mathematics 271 or 273
9 units (1.5 full-course equivalents) - Mathematics 249 or 265, 267, 367
6 units (1.0 full-course equivalent) - Mathematics 211 or 213; Mathematics 311 or 313
6 units (1.0 full-course equivalent) - Statistics 321 and 323
3 units (0.5 full-course equivalent) - Computer Science 217 or 231 or 235 or Data Science 211
12 units (2.0 full-course equivalents) - Actuarial Science 325, 327, 427 and 527

**Admission**

Application deadlines: October 1 for a May 1 placement. Or, May 1 for a September 1 or January 1 placement.

The Actuarial Science Co-operative Education programs are five-year degree programs which include 12 months of supervised work experience in various companies and government agencies. Students who wish to enter the Actuarial Science Co-operative Education program are urged to discuss their pre-admission course selection with a Program Advisor in the Undergraduate Science Centre (USC) as early in their program as possible.

Students should normally have successfully completed at least 48 units (8.0 full-course equivalents) appropriate to their degree program, including Mathematics 321 or Statistics 321, Statistics 323 and Actuarial Science 325 and 327, before commencing the first co-operative education placement. Students must have a minimum grade point average of 2.70 in the field before commencing the Co-operative Education major program, or a minimum grade point average of 3.30 in the field before commencing the Co-operative Education honours program.

**Requirements**

120 units (20.0 full-course equivalents) - Same as Actuarial Science Majors or Honours
12 months - Co-operative Education work terms (Co-operative Education 501.01, 501.02, 501.03) - A minimum grade point average of 2.70 must be maintained for continuation in the BSc degree programs. A minimum grade point average of 3.30 must be maintained for continuation in the BSc Honours degree program.

**Work Term Assessment**

The mandatory work term courses, Co-operative Education 501.01, 501.02, 501.03 and the optional course, Co-operative Education...
A Major in General Mathematics cannot be combined with any other Major or Minor program offered by the Department of Mathematics and Statistics.

4.5.8 Concurrent Degree in General Mathematics in Education and BEd

Admission

Students accepted into the BSc (General Mathematics)/BEd concurrent degree program must meet the requirements for admission into the General Mathematics Program. Students interested in Science education should consider the BSc (Natural Sciences)/BEd concurrent degree program. Students registered in undergraduate degree programs in other faculties of the University of Calgary who wish to transfer to the BEd concurrent program can do so if they have completed no more than 60 units (10.0 full-course equivalents). Students in the concurrent degree program should also consult the information on the program in the Werklund School of Education portion of the calendar.

Admission to the program is competitive and meeting the minimum requirements does not guarantee admission. Students interested in the concurrent degree program should consult the Department of Mathematics and Statistics and the Werklund School of Education at the earliest possible opportunity.

Requirements

The 90 units (15 full-course equivalents) Faculty of Science part of the requirements for a major in the concurrent degree program in General Mathematics and Education are:

- 3 units (0.5 full-course equivalent) - Education 201
- 3 units (0.5 full-course equivalent) - English 12 units (2.0 full-course equivalents) - Mathematics 211 or 213; Mathematics 311 or 313; Mathematics 249 or 265 or 275; Mathematics 267 or 277
- 3 units (0.5 full-course equivalent) - Computer Science 217 or 231 or 235 or Data Science 211
- 33 units (5.5 full-course equivalents) - Selected from the Field of General Mathematics
- 3 units (0.5 full-course equivalent) - Selected from the Field of General Mathematics at the 400 level or above
- 18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
- 51 units (8.5 full-course equivalents) - Options

Recommendations

Students should consult with the Undergraduate Director or the Undergraduate Science Centre on a regular basis throughout their program.

4.5.7 Double Major and Major/Minor Combinations

A Double Major program combining Mathematics and Actuarial Science can be obtained by a program of study meeting the requirements of both Major programs.

- The General Mathematics in Education degree is only awarded to students who complete all five years of the degree program. Students seeking the concurrent degree should follow the recommended course sequence exactly.

Recommended Course Sequence

Although this course sequence appears flexible with respect to course choices, students should carefully plan their course selections to ensure that prerequisites for upper-level courses are obtained. For example, students interested in taking senior statistics courses should take Statistics 321 and 323 in Year 2; students interested in senior Mathematics courses should take Mathematics 315 or 335 or 355 or 376 in Year 2.

First Year

1. Mathematics 201 and 3 units (0.5 full-course equivalent) - English 2. Mathematics 249 or 265 or 275 and 211 or 213
3. Mathematics 267 or 277 and 3 units (0.5 full-course equivalent) from: Mathematics 205, 271, 273, Statistics 205
4. Computer Science 217 or 231 or 235 or Data Science 211
5. Open option: 9 units (1.5 full-course equivalents)

Second Year

1. Mathematics 311 or 313
2. 12 units (2.0 full-course equivalent) - Selected from the Field of General Mathematics
3. 3 units (0.5 full-course equivalent) - Mathematics 319
4. 12 units (2.0 full-course equivalent) - Open options

Third Year

1. 12 units (2.0 full-course equivalents) - Selected from the Field of General Mathematics
2. 3 units (0.5 full-course equivalent) - Selected from the Field of General Mathematics at the 400 level or higher
3. 12 units (2.0 full-course equivalents) - Open options
4. 3 units (0.5 full-course equivalents) - Senior-level open options

Fourth Year

1. Education 420/427
2. Education 430/435
3. Education 440/445
4. Education 450/456
5. Education 460/465

Fifth Year

1. Education 520/525
2. Education 530/535
3. Education 540/546
4. Education 551/556
5. Education 560

It is recommended that some courses in the history or philosophy of science and technology be included in the program. Possibilities are: Engineering 481, Science,
4.5.9 Combined Degree and Double Major Suggestions

Please see Section 3.4 (Program Requirements) of the Faculty of Science section of the Calendar concerning programs that combine studies in multiple disciplines— including Double Major and Double Honours programs, Combined Degree Programs within the Faculty of Science, and Combined Degree Programs with other faculties. Combinations involving programs offered by the Department of Mathematics and statistics and another discipline that are commonly pursued include:

- A Double Major of Mathematics with Computer Science
- A Double Major of Mathematics with Physics
- A Double Major of Actuarial Science with Economics
- A Double Major of Actuarial Science with Mathematics
- A Combined Program leading to a BComm degree (offered by the Haskayne School of Business) and to a BSc in Actuarial Science

Requirements for such programs are often extremely tight and in some cases involve special course selections. Please consult the Department of Mathematics and Statistics and other relevant departments or faculties for advice about course selections if you are interested in these or other program combinations.

4.5.10 Environmental Science - Statistics Concentration

Students may pursue a BSc program in Environmental Science with a concentration in Statistics. This is a single-degree, four-year program offered by the Faculty of Science with collaboration from the Department of Arts. Program details are listed in 4.6 Non-Departmental Programs. Since this is a multidisciplinary program with restricted entry, students should consult the Director of the Environmental Science program at their earliest opportunity.

4.5.11 Suspended Programs

Admission to the following programs has been suspended.

Students previously admitted to a suspended program will be supported in the completion of their program. As such, program requirements are listed below for the reference of students already admitted to these programs.

4.5.11.1 Programs in Applied Mathematics

Admission to this program has been suspended as of Fall 2017.

Courses Constituting the Field of Applied Mathematics

- Statistics 321, 323

Required Courses - Major Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses).

- 3 units (0.5 full-course equivalent) - Mathematics 211 or 213
- 3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
- 9 units (1.5 full-course equivalents) - Mathematics 267 or 277 and Mathematics 311 or 313 and Statistics 321
- 6 units (1.0 full-course equivalent) - Mathematics 367 and any course offered in the Field of Applied Mathematics at the 300 level or higher
- 3 units (0.5 full-course equivalent) - Mathematics 376
- 3 units (0.5 full-course equivalent) - Computer Science 231 or 217 or 235
- 3 units (0.5 full-course equivalent) - Mathematics 315 or Statistics 323
- 6 units (1.0 full-course equivalent) - Two from:
  - Physics 211 or 221 or 227, 223 or 255
  - Astrophysics 303
  - Chemistry 201 or 211 and 203 or 213
  - Computer Science 233, 313, 331
  - Biology 241, 243
  - Geophysics 355, 565
- 6 units (1.0 full-course equivalent) - Mathematics 361 and 413
- 3 units (0.5 full-course equivalent) - Mathematics 335 or 355
- 3 units (0.5 full-course equivalent) - Mathematics 445 or 447
- 3 units (0.5 full-course equivalent) - Mathematics 307
- 3 units (0.5 full-course equivalent) - Mathematics 391
- 3 units (0.5 full-course equivalent) - Applied Mathematics 425 or 476 or 493
- 18 units (3.0 full-course equivalent) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
- 45 units (7.5 full-course equivalents) - Options

Note: Mathematics 311 and 411 may be replaced by Mathematics 313 and a field course at the 300 level or higher, with permission.

Required Courses - Honours Program

In addition to the requirements specified by the Faculty of Science (see Section 3), students are required to complete the following program of study:

- 3 units (0.5 full-course equivalent) - Mathematics 273
- 9 units (1.5 full-course equivalents) - Mathematics 249 or 265, 267, 367
- 3 units (0.5 full-course equivalent) - Statistics 321
- 6 units (1.0 full-course equivalent) - Mathematics 211 or 213 and 311 or 313
- 3 units (0.5 full-course equivalent) - Mathematics 315 or Statistics 323
- 3 units (0.5 full-course equivalent) - Mathematics 431 or 383
- 3 units (0.5 full-course equivalent) - Mathematics 447
- 3 units (0.5 full-course equivalent) - Mathematics 545*
- 3 units (0.5 full-course equivalent) - Mathematics 307
- 12 units (2.0 full-course equivalents) - Mathematics 376, 391, 476 and 413
- 3 units (0.5 full-course equivalent) - Computer Science 217 or 231 or 235
- 6 units (1.0 full-course equivalent) - Any 500-level or above course in Applied Mathematics
- 18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
- 42 units (7.0 full-course equivalents) - Options

Note: Mathematics 213 and 313 are the preferred sequence for the honours program.

Note: The following substitutions allow students to enter the honours program later in their studies:

(a) The calculus sequence Mathematics 265, 267, 367 may be replaced by Mathematics 281, 283, 381 or an equivalent sequence with permission from the Department of Mathematics and Statistics;
(b) Mathematics 273 may be replaced by a grade of ‘B+’ or better in Mathematics 271 with permission;
(c) Mathematics 213 may be replaced by a grade of ‘B+’ or better in Mathematics 211 or 221 with permission;
(d) Mathematics 355 may be replaced by a grade of ‘B+’ or better in Mathematics 335 with permission.
Concentrations
Students may focus their program on one of two areas of interest by including a specified set of courses into their Major degree. Successful completion will mean that the area of concentration will appear on the transcript. Students should carefully plan their course selections to ensure that prerequisites for upper-level courses are obtained. Consultation with the Undergraduate Director on a regular basis is highly recommended.

A. Concentration in Mathematical Finance and Risk Management
3 units (0.5 full-course equivalent) - Statistics 323
6 units (1.0 full-course equivalent) - Computer Science 231 and 233, or Computer Science 235 and Actuarial Science 325
3 units (0.5 full-course equivalent) - Mathematics 307
3 units (0.5 full-course equivalent) - Mathematics 335 or 355
3 units (0.5 full-course equivalent) - Mathematics 445 or 447
6 units (1.0 full-course equivalent) - Statistics 421 and 507
3 units (0.5 full-course equivalent) - Mathematics 313 or 361
18 units (3.0 full-course equivalents) - Mathematics 381, 391, 413, 493, 581, and 583
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
33 units (5.5 full-course equivalents) - Options

B. Concentration in Computational Applied Mathematics
3 units (0.5 full-course equivalent) - Statistics 323
6 units (1.0 full-course equivalent) - Computer Science 231 and 233 or 235 and 3 units (0.5 full-course equivalent) senior-level Computer Science option or Applied Mathematics option
3 units (0.5 full-course equivalent) - Mathematics 271 or 273
3 units (0.5 full-course equivalent) - Computer Science 331
3 units (0.5 full-course equivalent) - Software Engineering 301
3 units (0.5 full-course equivalent) - Mathematics 307
3 units (0.5 full-course equivalent) - Mathematics 335 or 355
3 units (0.5 full-course equivalent) - Mathematics 445 or 447
3 units (0.5 full-course equivalent) - Mathematics 361
15 units (2.5 full-course equivalents) - Mathematics 325, 391, 413, 493, and 503
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
3 units (0.5 full-course equivalent) - choose one of Biology 241, Chemistry 201 or 203 or 211, Physics 211, 221 or 227
39 units (5.0 full-course equivalents) - Options

Required Courses - Minor Program
3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
3 units (0.5 full-course equivalent) - Mathematics 267 or 277
3 units (0.5 full-course equivalent) - Mathematics 311 or 313
6 units (1.0 full-course equivalent) - Mathematics 271 or 273 and Mathematics 367
3 units (0.5 full-course equivalent) - Mathematics 375 or 376
9 units (1.5 full-course equivalents) - Any courses from the Field of Applied Mathematics at the 300 level or higher

4.5.11.2 Programs in Pure Mathematics
Admission to this program has been suspended as of Fall 2017.

Courses Constituting the Field of Pure Mathematics
- Statistics 321, 323

Required Courses - Major Program
See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses).
3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
9 units (1.5 full-course equivalents) - Mathematics 267 or 277 and Mathematics 311 or 313 and Statistics 321
6 units (1.0 full-course equivalent) - Mathematics 367 and any course offered in the Field of Pure Mathematics at the 300 level or higher
3 units (0.5 full-course equivalent) - Mathematics 271 or 273
3 units (0.5 full-course equivalent) - Mathematics 315
3 units (0.5 full-course equivalent) - Computer Science 217 or 231 or 235
3 units (0.5 full-course equivalent) - Mathematics 376
3 units (0.5 full-course equivalent) - Statistics 323 or Computer Science 233 or Physics 211 or 221 or 227, 233, Philosophy 279 or 377
15 units (2.5 full-course equivalents) - Selected from the Field of Pure Mathematics
6 units (1.0 full-course equivalent) - Selected from any course labelled Mathematics or Statistics at the 300 level or above
Faculty of Science

18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

24 units (4.0 full-course equivalents) - Options

No substitutions will be allowed for Mathematics 545.

Required Courses - Honours Program
30 units (5.0 full-course equivalents) - Selected from the Field of Pure Mathematics.

4.5.11.3 Programs in Statistics
Admission to this program has been suspended as of Fall 2017.

Courses constituting the field of Statistics
- Mathematics 211, 213, 249, 253, 265, 267, 273, 275, 277, 311, 313, 367
- Statistics 205, 321, 323
- All Statistics courses numbered 400 or higher
- Actuarial Science 437, 511

Required Courses - Major Program
See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses).

3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
3 units (0.5 full-course equivalent) - Mathematics 267 or 277
9 units (1.5 full-course equivalents) - Mathematics 311 or 313, Statistics 321 and 323
6 units (1.0 full-course equivalent) - Mathematics 367 and one from the Field of Statistics at the 300 level or higher
3 units (0.5 full-course equivalent) - Computer Science 231 or 217 or 235
9 units (1.5 full-course equivalents) - Statistics 421, 429 and 517
18 units (3.0 full-course equivalents) - Selected from any courses in the Field of Statistics at the 400 level or above
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
48 units (8.0 full-course equivalents) - Options

Required Courses - Honours Program
Students are expected to enrol in honours courses upon their decision to become honours majors. In addition to the requirements specified by the Faculty of Science (see Section 3), students are required to complete the following program of study:

3 units (0.5 full-course equivalent) - Mathematics 273
9 units (1.5 full-course equivalents) - Mathematics 249 or 265, 267, 367
12 units (2.0 full-course equivalents) - Mathematics 211 or 213, Mathematics 311 or 313, Statistics 321 and 323
3 units (0.5 full-course equivalent) - Computer Science 217 or 231 or 235
9 units (1.5 full-course equivalents) - Statistics 421, 429 and 517
24 units (4.0 full-course equivalents) - Selected from any courses in the Field of Statistics at the 400 level or above
3 units (0.5 full-course equivalent) - Mathematics 335 or 355
3 units (0.5 full-course equivalent) - Mathematics 445 or 447
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
36 units (6.0 full-course equivalents) - Options

Note: The following substitutions allow students to enter the honours program later in their studies:
(a) Mathematics 273 may be replaced by a grade of "B+" or better in Mathematics 271 with permission.
(b) Mathematics 213 may be replaced by a grade of "B+" or better in Mathematics 211 or 221 with permission.
(c) Mathematics 213 may be replaced by a grade of "B+" or better in Mathematics 211 or 221 with permission.

4.6 Non-Departmental Programs: Data Science, Environmental Science, Nanoscience, Natural Sciences, Neuroscience

4.6.1 Data Science
Programs Offered in Data Science
- Minor in Data Science

Program vs. Faculty Regulations
Regulations governing the Minor in Data Science are a combination of general Faculty of Science regulations and the additional program specific regulations listed below. It is essential for students to be familiar with both sets of regulations. It is helpful to read section 3 (Faculty Regulations) first.

Program Information
Student enquiries: Undergraduate Science Centre (USC) - Energy Environment and Experiential Learning (EEEL) 445

Website: http://www.ucalgary.ca/science/data-science/

Enrolment Limitations
Enrolment Limitations in Program
The number of spaces in the Data Science Minor is limited and entry is competitive.

Enrolment Limitations in Courses
In the first instance, enrolment in Data Science courses is available to Data Science Minors who meet the prerequisite(s). Depending on space availability, other students who meet the prerequisite(s) may register in a course. Consult the Schedule Builder in the Student Centre for details regarding enrolment in these courses.

4.6.1.1 Programs in Data Science
Admission
In order to be admitted to the Minor, student must have successfully completed a minimum of 15 units (2.5 full-course equivalents). Additionally, students require a minimum GPA of 3.00 calculated using the most recent course work to a maximum of 30 units. See A.5.3 for GPA computation guidelines.

Students must apply online via their Student Centre.

Students will be considered for admission on a competitive basis, and meeting the minimum requirements does not guarantee admission.

See also 3.2 Admission.

Courses Constituting the Field of Data Science
- All courses labelled Data Science
- Biology 315
- Computer Science 471, 481, 583
- Geology 597
- Geophysics 517, 549, 557
- Linguistics 560
- Mathematics 211
- Medical Science 401, 519
- Sociology 315, 355
- Statistics 323, 423, 425, 429, 431, 505, 519, 523, 531, 533, 541, 543

Required Courses - Minor
3 units (0.5 full-course equivalents) - Data Science 201
3 units (0.5 full-course equivalents) - Data Science 211, Computer Science 217, 231, 235
6 units (1.0 full-course equivalent) - Statistics 321 and 323

6 units (1.0 full-course equivalent) - Statistics 321 and 323
3.6 units (1.0 full-course equivalent) - Psychology 300 and 301
4.6.2 Environmental Science

Programs Offered
BSc in Environmental Science
BSc Honours in Environmental Science

The Environmental Science program is a single, four-year multidisciplinary program offered by the Faculty of Science with collaboration from the Faculty of Arts. This multidisciplinary program is flexible in scope. Students must select one of six areas of concentration: Biological Sciences, Chemistry, Geography, Geology, Physics, or Statistics.

For program advice, see the Program Director and/or the Undergraduate Science Centre (USC).

Program vs Faculty Regulations
The Environmental Science program is governed by a combination of general Faculty of Science and Faculty of Arts regulations, as well as the additional program-specific regulations listed below. In cases where the regulations of the two Faculties are different, students in the Environmental Science program will follow the regulations listed in the Faculty of Science section.

It is essential for students to be familiar with all regulations and it is helpful to read Section 3 of the Faculty of Science regulations first.

Program Information
Office: Energy Environment Experiential Learning (EEEL) 426
Telephone: 403.220.8979
Website: ucalgary.ca/ensc
Email: ensc@ucalgary.ca

Admission and Enrolment Limitations
Enrolment is limited in the Environmental Science program. Students may be admitted directly into the Environmental Science program and, once admitted, a place in the program is assured for students advancing through the second and subsequent years with satisfactory performance. Admission will be granted for Fall Term only and will be based upon academic merit.

As space permits, a certain number of students who wish to gain admission to the second or third year of the program by transferring from other institutions or programs will be accepted. Any student requesting admission at this level must meet a competitive grade point average calculated over the most recent course work, to a maximum of 30 units (5.0 full-course equivalents). The competitive grade point average will be established annually and will not be lower than 2.50. Students applying for admission must meet the competitive admission average of their chosen concentration.

Courses Constituting the Fields in Areas of Concentration
For each area of concentration, the field will be Environmental Science 401, 501, 502, 504, 505 plus the total of all courses that constitute the major field offered by the department in which the concentration is taken.

4.6.2.1 Program Requirements
(a) Major Program
The student must present an approved list of courses completed with passing grades. This list, referred to as the program, must satisfy the following conditions:

A. (a) The program must contain the equivalent of at least 120 units (20.0 full-course equivalents), with at least 72 units (12.0 full-course equivalents) numbered 300 or above.
(b) The GPA for the program must be at least 2.00 and the GPA for courses in the major field must also be at least 2.00.
(c) The program may not contain more than 18 units (3.0 full-course equivalent) "D" or "D+" grades, or more than 6 units (1.0 full-course equivalent) in the field with a "D" or "D+" grade.

B. (a) The program may not contain more than 60 units (10.0 full-course equivalent) credits transferred from other institutions.
(b) A maximum of 24 units (4.0 full-course equivalent) transfer credits are allowed in the field.
C. The program must contain:
(a) At least 54 units (9.0 full-course equivalents) from outside the major field, of which at least 18 units (3.0 full-course equivalents) must be from outside the Faculty of Science. Of these 18 units (3.0 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts. Environmental Science 503 may be counted among the 18 units (3.0 full-course equivalent) from other faculties. A list of recommended courses is available at ucalgary.ca/ensc/academicadvice.
(b) Environmental Science 401, 501, 502, 503
(c) Biology 241, 243, 313
(d) Ecology 417 or 419
(e) Specific Science and Arts courses, depending on the area of concentration chosen by the student.

The entire 120 units (20.0 full-course equivalents), including the courses in Science and Arts specific to each concentration, are as follows:

Concentration in Biological Sciences
21 units (3.5 full-course equivalents) - Biology 241, 243, 311, 313, 315, 331, 371
3 units (0.5 full-course equivalent) - Biochemistry 333
6 units (1.0 full-course equivalent) - Options from the Field of Biological Sciences
3 units (0.5 full-course equivalents) - Ecology 417 or 419
3 units (0.5 full-course equivalents) - Ecology 425
6 units (1.0 full-course equivalent) - Chemistry 201 or 211 and 203 or 213
15 units (2.5 full-course equivalents) - Chemistry 311, 315, 351, 353 and one of 321 or 515
6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; and Mathematics 211 or 213 or 267 or 277
6 units (1.0 full-course equivalent) - Physics 211 or 221 and 223; or Geology 201 and 202 or 203
3 units (0.5 full-course equivalent) - Geography 211 or Geology 201
3 units (0.5 full-course equivalent) - Geography 415
15 units (2.5 full-course equivalents) - Environmental Science 401, 501, 502, 503
9 units (1.5 full-course equivalents) - Options from faculties other than the Faculty of Science, as noted in 4.6.1.1C (a)
6 units (1.0 full-course equivalent) - Options from the Faculty of Arts
15 units (2.5 full-course equivalents) - Options

1Environmental Science students may contact the Department of Geography for consent to register in this course.
2See ucalgary.ca/ensc/academicadvice for a list of recommended courses.
3Environmental Science 201 is highly recommended to be completed as an option in the program.

Concentration in Chemistry
9 units (1.5 full-course equivalents) - Biology 241, 243, 313
3 units (0.5 full-course equivalents) - Ecology 417 or 419
6 units (1.0 full-course equivalent) - Chemistry 201 or 211 and 203 or 213
33 units (5.5 full-course equivalents) - Chemistry 311, 315, 321, 331, 333 or 373, 351, 353 or 355, 371, 423 or 425, 515, 521 or 541
3 units (0.5 full-course equivalent) - Option from the Field of Chemistry
3 units (0.5 full-course equivalent) - Statistics 327 or Biology 315
3 units (0.5 full-course equivalent) - Geology 201
6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; and Mathematics 267 or 277
9 units (1.5 full-course equivalents) - Physics 211 or 221; and 223 and 323
15 units (2.5 full-course equivalents) - Environmental Science 401, 501, 502, 503
Concentration in Geography and Arts
3 units (0.5 full-course equivalent) - Archaeology 201 or Anthropology 203
9 units (1.5 full-course equivalents) - Biology 241, 243, 313
3 units (0.5 full-course equivalent) - Ecology 417 or 419
6 units (1.0 full-course equivalent) - Chemistry 203 and 321
30 units (5.0 full-course equivalents) - Geography 211, 231, 251 or 253, 305 or 307, 313, 321, 333 or 357, 340, 413 or 417, and 415
3 units (0.5 full-course equivalent) - Geography 341 or 351 or 367 or 405 or 433 or 457
3 units (0.5 full-course equivalent) - Geography 421 or 429 or 529
3 units (0.5 full-course equivalent) - Statistics 327 or Biology 315
12 units (2.0 full-course equivalents) - Economics 201, 203, 323 or 325 or 327 or 337 and 367 or 377
6 units (1.0 full-course equivalent) - Mathematics 249 or 265 or 275; and Mathematics 211 or 213 or 267 or 277
3 units (0.5 full-course equivalent) - Psychology 200 or 205 or Sociology 201
15 units (2.5 full-course equivalents) - Environmental Science 401, 501, 502, 503
6 units (1.0 full-course equivalent) - Options from the Faculty of Arts
18 units (3.0 full-course equivalents) - Options
Recommended courses: Physics 211 or 221 and 223
1See ucalgary.ca/ensc/academicadvice for a list of recommended courses.

Concentration in Geology
9 units (1.5 full-course equivalents) - Biology 241, 243, 313
3 units (0.5 full-course equivalent) - Ecology 417 or 419
9 units (1.5 full-course equivalents) - Chemistry 201 or 211; 203 and 321
39 units (6.5 full-course equivalents) - Geology 201, 202 or 203, 313 or 423, 323, 333 or 311, 337, 341 or 343, 353 or 373, 381, 401, 475, 403 or 503, and 505
9 units (1.5 full-course equivalents) - Mathematics 211 or 213; and 249 or 265 or 275; and 253 or 267 or 277
6 units (1.0 full-course equivalent) - Physics 211 or 221, and 223
3 units (0.5 full-course equivalent) - Statistics 327 or Biology 315
15 units (2.5 full-course equivalents) - Environmental Science 401, 501, 502, 503
9 units (1.5 full-course equivalents) - Options from faculties other than the Faculty of Science, as noted in 4.6.1.1C (a)
6 units (1.0 full-course equivalent) - Options from Faculty of Arts
12 units (2.0 full-course equivalents) - Options
1The sequence Mathematics 249 or 265, 267, 367 plus Mathematics 311 can be used in place of Mathematics 275, 277, 375, 377 but is not recommended. Mathematics 267 or 277 can be used in place of Mathematics 277.
2Physics 501 requires Physics 457 as a prerequisite.
3Environmental Science 201 is highly recommended to be completed as an option in the program.

Concentration in Physics
9 units (1.5 full-course equivalents) - Biology 241, 243, 313
3 units (0.5 full-course equivalent) - Ecology 417 or 419
6 units (1.0 full-course equivalent) - Chemistry 203 and 321
3 units (0.5 full-course equivalent) - Geology 201
18 units (3.0 full-course equivalents) - Mathematics 211 or 213; 275 or 281; 277 or 283; 375 or 377; 311
36 units (6.0 full-course equivalents) - One of four sequences of Physics courses:
Option I: Physics 227, 255, 325, 341, 343, 377, 449, 455, 561, 663 and one of Physics 375, 457, 497, 501, 507, 509, 543, or 593 or 599
Option II: Physics 223, 227, 325, 341, 343, 397, 443, 449, 455, 561 and one of Physics 375, 457, 497, 501, 507, 509, 543, 593, 599 or 663
Option III: Physics 211 or 221, 255, 321, 325, 341, 397, 443, 449, 455, 561 and one of Physics 375, 457, 497, 501, 507, 509, 543, 593, 599 or 663
Option IV: Physics 211 or 221, 231, 323, 325, 341, 343, 449, 445, 561 and one of 375, 457, 497, 501, 507, 509, 543, 593, 599 or 663
3 units (0.5 full-course equivalent) - Statistics 327 or Biology 315
15 units (2.5 full-course equivalents) - Environmental Science 401, 501, 502, 503
9 units (1.5 full-course equivalents) - Options from faculties other than the Faculty of Science, as noted in 4.6.1.1C (a).
6 units (1.0 full-course equivalent) - Options from the Faculty of Arts
18 units (3.0 full-course equivalents) - Options
1See ucalgary.ca/ensc/academicadvice for a list of recommended courses.
2Environmental Science 201 is highly recommended to be completed as an option in the program.

(b) Honours Programs
The GPA requirements for the Honours program are specified in the Faculty of Science section of this Calendar in 3.4C Program Requirements, Honours Program. The course requirements are the same as for the Major programs except students must have a minimum of 54 units (9.0 full-course equivalents) in their field and include one of Environmental Science 504 or 505 in their program, preferably in their final year of study. Students in an honours program may have a maximum of 78 units (13.0 full-course equivalents) in their major field.

Suggested Program Sequences

Biological Sciences

First Year
- Biology 241
- Chemistry 201 or 211
- Mathematics 249 or 265 or 275
- Physics 211 or 221 or Geology 201
- Computer Science 217
- Environmental Science 504

Second Year
- Biology 371
- Geography 211 or Geology 201
- Chemistry 351
- Chemistry 311
- Option

Third Year
- Biology 311
- Biology 331
### Faculty of Science

#### Chemistry

**First Year**
- Chemistry 201 or 211
- Mathematics 429 or 265 or 275
- Physics 211 or 221
- Biology 241
- Option

**Second Year**
- Chemistry 203
- Mathematics 313
- Physics 321
- Option

**Third Year**
- Chemistry 321
- Physics 343
- Option

**Fourth Year**
- Environmental Science 501
- Environmental Science 502
- Chemistry 321 or 515
- Ecology 417 or Option
- Option

1. Field course typically offered in the last two weeks before the beginning of the regular Fall Term.
2. At least one of Ecology 417 or 419 must be completed.
3. Environmental Science 201 is highly recommended.

#### Geography and Arts

**First Year**
- Geography 211
- Economics 201
- Option

**Second Year**
- Geography 251 or 253
- Biology 241
- Geology 250 or 253
- Biogeography 421 or 429 or 529
- Option

**Third Year**
- Geography 321
- Biology 413 or 417
- Option

**Fourth Year**
- Geology 327 or Biology 315
- Mathematics 211 or 213
- Physics 325
- Option

1. Field course typically offered in the last two weeks before the beginning of the regular Fall Term.
2. At least one of Ecology 417 or 419 must be completed.
3. Environmental Science 201 is highly recommended.

#### Economics

**First Year**
- Economics 201
- Chemistry 201 or 203
- Mathematics 267 or 277
- Physics 223
- Biology 243
- Option

**Second Year**
- Economics 323 or 325 or 327 or 337 or 367
- Geography 343
- Chemistry 321
- Option

**Third Year**
- Economics 327
- Statistics 327 or Biology 315
- Mathematics 267 or 277
- Physics 227
- Biology 313
- Option

**Fourth Year**
- Economics 501
- Economics 502
- Chemistry 211 or 213
- Physics 397
- Mathematics 277
- Option

1. At least one of Ecology 417 or 419 must be completed.
2. Environmental Science 201 is highly recommended.

#### Geology

**First Year**
- Geology 201
- Mathematics 249 or 265 or 275
- Biology 241
- Geography 251 or 253
- Mathematics 211 or 267 or 277
- Biology 243

**Second Year**
- Geology 341 or 351 or 367 or 405 or 433 or 457
- Geography 333 or 357
- Option

**Third Year**
- Geology 321
- Geology 413 or 417
- Option

**Fourth Year**
- Geology 367 or 405 or 433 or 457
- Geology 417 or Option
- Option

1. Field course typically offered in the last two weeks before the beginning of the regular Fall Term.
2. At least one of Ecology 417 or 419 must be completed.
3. Environmental Science 201 is highly recommended.

#### Physics

**First Year**
- Physics 227
- Physics 241
- Mathematics 275
- Physics 397
- Mathematics 375
- Biology 201
- Option

**Second Year**
- Physics 343
- Mathematics 277
- Physics 443
- Physics 663
- Mathematics 311
- Option

**Third Year**
- Physics 401
- Physics 402
- Physics 403
- Physics 449
- Physics 505
- Chemistry 201
- Option

**Fourth Year**
- Physics 417 or Option
- Option

1. Students who achieve a grade of "A" or better in Physics 211 or 221 may use either of these courses in place of Physics 227.
2. Field course typically offered in the last two weeks before the beginning of the regular Fall Term.
3. At least one of Ecology 417 or 419 must be completed.
4. Environmental Science 201 is highly recommended.
### 4.6.3 Nanoscience

#### Programs Offered in Nanoscience
- **Minor or Concentration in Nanoscience**

**Note:** If applications exceed the capacity of the Minor and Concentration in Nanoscience, priority will be given to students in satisfactory standing in the BSc or BSc (Honours) in Applied Chemistry, Biochemistry, Biological Sciences, Cellular, Molecular and Microbial Biology, Chemistry, Chemical Physics, Ecology, Geology, Geophysics, Physics, Plant Biology or Zoology.

#### Program vs. Faculty Regulations

Regulations governing the Minor or Concentration in Nanoscience are a combination of general Faculty of Science regulations and the additional program specific regulations listed below. It is essential for students to be familiar with both sets of regulations. It is helpful to read Section 3 (Faculty Regulations) first.

Students should consult Academic Requirements in their Student Centre periodically to ensure that requirements are being met.

#### Program Information

- **Program Student Office:** Science B 149  
- **Student enquiries:** 403.220.8367  
- **Fax:** 403.210.8126  
- **Website:** ucalgary.ca/nanoscience  
- **Email:** nanosci@ucalgary.ca

#### Enrolment Limitations

- **Enrolment Limitations in Program**
  - The number of spaces in the Nanoscience Concentration and Minor is limited and entry is competitive.

- **Enrolment Limitations in Courses**
  - In the first instance, enrolment in Nanoscience courses is available to Nanoscience Concentrators or Minors in satisfactory standing who meet the prerequisite(s). Depending on space availability, other students who are in satisfactory standing and meet the prerequisite(s) may register in a course.
  - Consult the Schedule Builder in the Student Centre for details regarding enrolment in these courses.

#### 4.6.3.1 Programs in Nanoscience

**Admission**

Students in satisfactory standing may select the Nanoscience Concentration or Minor after they have completed at least 21 units (3.5 full-course equivalents). Note: If applications exceed the capacity of the Minor or Concentration in Nanoscience, priority will be given to students in satisfactory standing in the BSc or BSc Honours in Applied Chemistry, Biochemistry, Biological Sciences, Cellular, Molecular and Microbial Biology, Chemistry, Chemical Physics, Ecology, Geology, Geophysics, Physics, Plant Biology or Zoology. See also 3.2 Admission.

Any course used to satisfy Major or Honours field requirements may not be applied to the Nanoscience Concentration or Minor.

#### Courses Constituting the Field of Nanoscience

**The Field of Nanoscience is defined as:**
- **Biological Sciences** except Mathematics 205
- **All courses labelled 200-level Mathematics except Mathematics 205**
- **All courses labelled Nanoscience**
- **Physics 211, 221, 223, 227 and 255**

#### Required Courses - Concentration

See also Section 3 (Faculty Regulations), Subsection 3.4A (Program Requirements - Major and Honours Programs) and Subsection 3.5B (Course Selection and Registration - Introductory Courses for Science Degree Programs).

1. 3 units (0.5 full-course equivalent) - One of Mathematics 249, 265 or 275
2. 3 units (0.5 full-course equivalent) - One of Mathematics 257, 277, 211 or 213
3. 6 units (1.0 full-course equivalent) - One of the following sets of courses:
   - Biology 241 and 243
   - Chemistry 201 or 211 and 203 or 213
   - Geology 201 and 202 or 203
   - Physics 211 or 221 and 223; or Physics 227 and 255
4. 6 units (1.0 full-course equivalent) - Nanoscience 301 and 401
5. 3 units (0.5 full-course equivalent) - Additional Nanoscience courses

**Note:** Students may complete no more than 6 units (1.0 full-course equivalent) additional courses labelled Nanoscience beyond those listed above.

#### Required Courses - Minor

- **Same as for the Concentration up to (4):**
  - **12 units (2.0 full-course equivalents) - Nanoscience 301, 401, 502**
  - **6 units (1.0 full-course equivalent) - Additional Nanoscience courses**

**Note:** Students may complete no more than 6 units (1.0 full-course equivalent) additional courses labelled Nanoscience beyond those listed above.

#### 4.6.4 Natural Sciences

**Degrees Offered**

**Undergraduate Programs**

<table>
<thead>
<tr>
<th>Natural Sciences</th>
<th>Core</th>
<th>Enhancements</th>
<th>Combined Degrees</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSc</td>
<td></td>
<td>BSc Honours</td>
<td>BSc/BEd</td>
</tr>
</tbody>
</table>

**Courses Offered**

- **BSc in Natural Sciences**
- **BSc Honours in Natural Sciences**
Students may apply to their concentrations with their initial application to the University. However, students may also initially apply to Natural Sciences with no concentrations in the event that they are uncertain which areas they wish to specialize in or they do not meet the competitive average of their desired concentration(s). Students will find that it is in their best interest to declare their concentrations at the earliest possible opportunity.

VIt is not possible for students in the Natural Sciences program to choose a minor in either area of their concentrations. However, students may complete a minor outside of their areas of concentration. Furthermore, Natural Sciences students may not select a second major or combined degree in areas of their two concentrations.

4. Science Breadth
The program must include the following:

• 6 units (1.0 full-course equivalent) in Mathematics\(^1\), selected from Mathematics 211 or 213, Mathematics 249 or 265 or 275, Mathematics 267 or 277. Note: Students who have completed Mathematics 31 should take Mathematics 265 unless they are interested in pursuing programs in Physics and Astronomy, in which case they should take Mathematics 275.

• 3 units (0.5 full-course equivalent) in Computer Science\(^1\) selected from Computer Science 217 or 231 or 235 or Data Science 211.

• At least 6 units (1.0 full-course equivalent) from each of four different Science Departments\(^1\).

• 6 units (1.0 full-course equivalent) of course work accompanied by a laboratory component\(^1\) (taken from any of the Departments of Biological Sciences, Chemistry, Geoscience, and Physics and Astronomy).

Apply these courses to either (1) Major Field Courses or (3) Other Courses outside the Major Field as appropriate.

Required Courses - Honours Program
See also Section 3 (Faculty Regulations), Subsections 3.4C (Program Requirements - Honours Degree Programs) and 3.5B (Introductory Courses for Science Degree Programs).

1. Major Field Courses (Concentrations One and Two)
The program must contain two concentrations as described under Application to Concentrations.

The courses in the two concentrations must be selected as follows:

Students require a minimum of 30 units (5.0 full-course equivalents) in their C1. Students may not exceed 36 units (6.0 full-course equivalents) in their C1. Within those courses completed for their C1, students must complete a minimum of 3 units (0.5 full-course equivalent) at the 400 level or higher.

Students require a minimum of 18 units (3.0 full-course equivalents) in their C2. Students may not exceed 30 units (5.0 full-course equivalents) in their C2.

The combination of units in C1 plus C2 may not exceed 60 units (10.0 full-course equivalents).

2. Natural Science Specific Courses
3 units (0.5 full-course equivalent) - Science 301
3 units (0.5 full-course equivalent) - Science 403
3 units (0.5 full-course equivalent) - Science 501 or Science 529 (for Energy Science concentrators)

3. Other Courses outside the Major Field
18 units (3.0 full-course equivalents) - Non-science options as follows (check Table I in 3.4 Program Requirements for ineligible courses; Science 311 may be counted among these courses):

Chosen from Faculties other than the Faculty of Science. Of these 18 units (3.0 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

4. Science Breadth
The program must include the following:

• 6 units (1.0 full-course equivalent) in Mathematics\(^1\), selected from Mathematics 211 or 213, Mathematics 249 or 265 or 275, Mathematics 267 or 277. Note: Students who have completed Mathematics 31 should take Mathematics 265 unless they are interested in pursuing programs in Physics and Astronomy, in which case they should take Mathematics 275.

• 3 units (0.5 full-course equivalent) in Computer Science\(^1\) selected from Computer Science 217 or 231 or 235 or Data Science 211.

• At least 6 units (1.0 full-course equivalent) from each of four different Science Departments\(^1\).

• 6 units (1.0 full-course equivalent) of course work accompanied by a laboratory component\(^1\) (taken from any of the Departments of Biological Sciences, Chemistry, Geoscience, and Physics and Astronomy).

Apply these courses to either (1) Major Field Courses or (3) Other Courses outside the Major Field as appropriate.

Required Courses - Honours Program
See also Section 3 (Faculty Regulations), Subsections 3.4C (Program Requirements - Honours Degree Programs) and 3.5B (Introductory Courses for Science Degree Programs).

1. Major Field Courses (Concentrations One and Two)
The program must contain two concentrations as described under Application to Concentrations.

The courses in the two concentrations must be selected as follows:

Students require a minimum of 30 units (5.0 full-course equivalents) in their C1. Students may not exceed 36 units (6.0 full-course equivalents) in their C1. Within those courses completed for their C1, students must complete a minimum of 3 units (0.5 full-course equivalent) at the 400 level or higher.

Students require a minimum of 18 units (3.0 full-course equivalents) in their C2. Students may not exceed 30 units (5.0 full-course equivalents) in their C2.

The combination of units in C1 plus C2 may not exceed 60 units (10.0 full-course equivalents).

2. Natural Science Specific Courses
3 units (0.5 full-course equivalent) - Science 301
3 units (0.5 full-course equivalent) - Science 403
3 units (0.5 full-course equivalent) - Science 501 or Science 529 (for Energy Science concentrators)

Faculty of Science
3. Other Courses outside the Major Field

18 units (3.0 full-course equivalents) - Non-science options as follows (check Table I in 3.4 Program Requirements for ineligible courses; Science 311 may be counted among these courses):

Chosen from Faculties other than the Faculty of Science. Of these 18 units (3.0 full-course equivalents), students must take at least 6 units (1.0 full-course equivalent) from the Faculty of Arts.

4. Science Breadth

The program must include the following:

- 6 units (1.0 full-course equivalent) in Mathematics1, selected from Mathematics 211 or 213; Mathematics 249 or 265 or 275; Mathematics 267 or 277. Note: Students who have completed Mathematics 31 should take Mathematics 265 unless they are interested in pursuing programs in Physics and Astronomy, in which case they should take Mathematics 275.

- 3 units (0.5 full-course equivalent) in Computer Science1 selected from Computer Science 217, 231, 235 or Data Science 211.

- At least 6 units (1.0 full-course equivalent) from each of four different Science Departments1.

- 6 units (1.0 full-course equivalent) of coursework accompanied by a laboratory component1 (taken from any of the Departments of Biological Sciences, Chemistry, Geoscience, and Physics and Astronomy).

1Apply these courses to either (1) Major Field Courses or (3) Other Courses outside the Major Field as appropriate.

Required Courses - Concentration One

Biology Concentration. The minimum requirements for a C1 in Biology are as follows:

- 6 units (1.0 full-course equivalent) - Biology 241 and 243
- 9 units (1.5 full-course equivalents) - Biology 311, 331, 371
- 3 units (0.5 full-course equivalent) - Biochemistry 393 or Biology 313
- 9 units (1.5 full-course equivalents) - Courses from the Field of Biological Sciences at the 300 level or higher
- 3 units (0.5 full-course equivalent) - Courses from the Field of Biological Sciences at the 400 level or higher

Note: Natural Sciences students are not permitted to take more than 6 units (1.0 full-course equivalent) from courses numbered 507 offered by the Department of Biological Sciences.

Chemistry Concentration. The minimum requirements for a C1 in Chemistry are as follows:

- 6 units (1.0 full-course equivalent) - Chemistry 201 or 211; and 203 or 213
- 12 units (2.0 full-course equivalents) - Chemistry 311, 331, 351; and 371 or 373
- 9 units (1.5 full-course equivalents) - Courses from the Field of Chemistry at the 300 level or higher
- 3 units (0.5 full-course equivalent) - Courses from the Field of Chemistry at the 400 level or higher

Computer Science Concentration1. The minimum requirements for a C1 in Computer Science are as follows:

- 6 units (1.0 full-course equivalent) - One of the following three sets of courses:
  - Computer Science 217 or Data Science 211 and Computer Science 219
  - Computer Science 231 and 233
  - Computer Science 235 and 0.5 full-course equivalent senior Computer Science Option
- 3 units (0.5 full-course equivalent) - Computer Science 319 or 331
- 18 units (3.0 full-course equivalents) - Courses in the Field of Computer Science
- 3 units (0.5 full-course equivalent) - Courses in the Field of Computer Science at the 400 level or higher

1Students interested in completing a C1 in Computer Science should complete Philosophy 279 in their first year.

Energy Science Concentration. The minimum requirements for a C1 in Energy Science are as follows:

- 3 units (0.5 full-course equivalent) - Chemistry 203 or 213
- 3 units (0.5 full-course equivalent) - Physics 211 or 221 or 227
- 3 units (0.5 full-course equivalent) - Physics 223 or 255
- 3 units (0.5 full-course equivalent) - Energy and Environment, Engineering 355
- 3 units (0.5 full-course equivalent) - Chemistry 321 or 425
- 15 units (2.5 full-course equivalents) - Chosen from energy science content: Science 317, 421, 423, 427, 531, 533, Physics 323, 325, or 397 (a maximum of 6 units (1.0 full-course equivalent) can be chosen from Physics 323, 325, 397)

Note: Energy Science students completing a Concentration Two in Physics will have the first-year Physics courses count toward both concentrations. No Physics courses beyond required first-year Physics courses can count toward both Energy Science and a Physics concentration. A maximum of 6 units (1.0 full-course equivalent) from Physics 323, 325 and 397 can be used towards completion of the Energy Sciences Concentration. Energy Science students completing a Concentration Two in Chemistry will have Chemistry 203 count toward both concentrations.

Geoscience Concentration. The minimum requirements for a C1 in Geoscience are as follows:

- 15 units (2.5 full-course equivalents) - Geology 201, 202 or 203, 343 or 341, 381, and Geophysics 351 or 355
- 12 units (2.0 full-course equivalents) - Courses in the Fields of Geology and/or Geophysics at the 300 or 400 levels1
- 3 units (0.5 full-course equivalent) - Courses in the Fields of Geology and/or Geophysics at the 400 level or higher1

1Students pursuing a Geoscience concentration are free to mix and match appropriate Geology and Geophysics options. It is recommended that students intending to apply for admission into the Geology program (including the Petroleum Geology concentration) take Geology 313, 381, 323, 333 while students intending to apply for admission into the Geophysics program take Geophysics 351 or 359, 453, 457 and an additional Geology or Geophysics option. For more details, see the Geoscience Program Section of this Calendar.

Mathematics Concentration. The minimum requirements for a C1 in Mathematics are as follows:

- 3 units (0.5 full-course equivalent) - Mathematics 211 or 213
- 3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
- 3 units (0.5 full-course equivalent) - Mathematics 267 or 277
- 6 units (1.0 full-course equivalent) - Mathematics 311 or 313; and Statistics 321
- 3 units (0.5 full-course equivalent) - Mathematics 367 or 375
- 9 units (1.5 full-course equivalent) - Courses in the Field of General Mathematics.
- 9 units (0.5 full-course equivalent) - Courses in the Field of General Mathematics at the 400 level or higher

Physics Concentration. The minimum requirements for a C1 in Physics are as follows:

- 6 units (1.0 full-course equivalent) - Either Physics 211 or 221 and 321; or Physics 227 and 3 units (0.5 full-course equivalent) Physics option
- 6 units (1.0 full-course equivalent) - Either Physics 223 and 323; or 255 and 397
- 15 units (2.5 full-course equivalents) - Courses in the Field of Physics1 at the 300 level or higher
- 3 units (0.5 full-course equivalent) - Courses in the Field of Physics1 at the 400 level or higher1

1Students completing either a C1 or C2 in Physics may use courses in Astrophysics to satisfy requirements from the Field of Physics.

Required Courses - Concentration Two

Biology Concentration. The minimum requirements for a C2 in Biology are as follows:

- A minimum of 18 units (3.0 full-course equivalents) to a maximum of 30 units (5.0 full-course equivalents) selected from the major Field of Biological Sciences.

Chemistry Concentration. The minimum requirements for a C2 in Chemistry are as follows:

- A minimum of 18 units (3.0 full-course equivalents) to a maximum of 30 units (5.0 full-course equivalents) selected from the major Field of Chemistry.
Computer Science Concentration. The minimum requirements for a C2 in Computer Science are as follows:
A minimum of 18 units (3.0 full-course equivalents) to a maximum of 30 units (5.0 full-course equivalents) selected from the major Field of Computer Science.

Energy Science Concentration. A Concentration Two in Energy Science is not permitted.

Geoscience Concentration. The minimum requirements for a C2 in Geoscience are as follows:
A minimum of 18 units (3.0 full-course equivalents) to a maximum of 30 units (5.0 full-course equivalents) selected from the major Field of Geology and/or Geophysics.

Mathematics Concentration. The minimum requirements for a C2 in Mathematics are as follows:
A minimum of 18 units (3.0 full-course equivalents) to a maximum of 30 units (5.0 full-course equivalents) selected from the major Field of General Mathematics.

Physics Concentration. The minimum requirements for a C2 in Physics are as follows:
A minimum of 18 units (3.0 full-course equivalents) to a maximum of 30 units (5.0 full-course equivalents) selected from the major Field of Physics and/or Astrophysics.

Recommendation for both the Major and Honours Programs

Writing Component

It is strongly recommended that a course emphasizing writing skills be included in the program, e.g., a junior English course or Communications Studies 363 or Science 311.

International Component

This suggestion may be satisfied in various ways, e.g., by completing 6 units (1.0 full-course equivalent) from the list of courses in item 4 of the section "Make Your Degree More International," under "About the University" in the back of the Calendar, or by following one of the other suggestions listed there. If non-science course work is used to satisfy this recommendation, this course work could be part of the breadth requirement.

1. Students should refer to registration materials at the following website (ucalgary.ca/degreeguide) to determine recommended first-year Mathematics courses based on their concentration.

2. Energy Science Concentrators must take Science 529 instead of Science 501.

3. Required for Honours, replaced by options in the Major program.

Notes:

1. The schedule is adjustable to accommodate individual programs. Options include any courses that are prerequisite to the concentration courses, but are from another field, and also include the Science Breadth requirements.

2. If Mathematics courses or Computer Science courses are part of a C1 or C2, the number of C1 and C2 slots in this schedule can be reduced accordingly as per degree requirements.

4.6.4.2 Concurrent Degree in Natural Sciences and BEd

Admission

Students accepted into the BSc (NTSC)/BEd concurrent degree program must meet the requirements for admission into the Natural Sciences Program and the departments of their two concentrations. Students will be required to choose two concentrations from Biology, Chemistry or Physics when applying for admission; it is not possible to complete the concurrent degree with the other concentrations offered within the Natural Sciences. Students interested in Mathematics education should consider the BSc (General Mathematics)/BEd concurrent degree program. Students in the concurrent degree program should also consult the information on the program in the Werklund School of Education portion of the calendar.

Note: Admission to the program is competitive and meeting the minimum requirements does not guarantee admission. Students interested in the concurrent degree program should consult the Undergraduate Science Centre at the earliest possible opportunity.

Continuation

Students must maintain satisfactory standing in both the Faculty of Science and the Werklund School of Education throughout their degree to remain in the concurrent degree program. For more information, refer to the Faculty Regulations sections of both faculties. All education requirements must be completed at the University of Calgary. Please consult the Werklund School of Education for more details on the education portion/regulations of the concurrent degree.

Program Structure

The program is divided into a Science portion, which consists of 90 units (15.0 full-course equivalents) and an Education portion, which consists of 60 units (10.0 full-course equivalents). The outline of the concurrent degree is shown in the suggested course sequence below. Students will complete the first two full years (90 units (15.0 full-course equivalents)) in the Faculty of Science. In years 4 and 5, students will complete the education portion of the degree. Students should consult the Werklund School of Education for complete details of years 4 and 5 of their degree. In the Education portion of the program in Year 5, a project course is required amalgamating Science and Education. This course replaces the 500-level Science project course (Science 501) and an option required in the regular Natural Sciences program.

Science Portion (90 units (15.0 full-course equivalents))

In the Science portion, the following concentrations are possible: Biology, Chemistry and Physics.

The requirements are the same as for the Natural Sciences Major program as specified in the Program Structure except that the 6 units (1.0 full-course equivalent) Natural Sciences specific course requirements (Science 301, 501) and the 3.0 full-course equivalents) Non-Science options are replaced by:

3 units (0.5 full-course equivalent) - English
3 units (0.5 full-course equivalent) - Education 201
3 units (0.5 full-course equivalent) - Science 403
15 units (2.5 full-course equivalents) - Options

Education Portion (60 units (10.0 full-course equivalents))

For details see the information in the Werklund School of Education portion of the calendar.

Suggested Course Sequence

First Year

1. 3 units (0.5 full-course equivalent) - Education 201
2. 3 units (0.5 full-course equivalent) - English
3. 6 units (1.0 full-course equivalent) - Mathematics
4. 6 units (1.0 full-course equivalent) - Concentration 1
5. 6 units (1.0 full-course equivalent) - Concentration 2
6. 6 units (1.0 full-course equivalent) - Computer Science 217 or 231 or 235 or Data Science 211 or option
Faculty of Science

Second Year
1. 3 units (0.5 full-course equivalent) - Open option
2. 3 units (0.5 full-course equivalent) - Science Breadth¹
3. 12 units (2.0 full-course equivalents) - Concentration 1
4. 6 units (1.0 full-course equivalent) - Concentration 2
5. 6 units (1.0 full-course equivalent) - Option

Third Year
1. 3 units (0.5 full-course equivalent) - Science 403
2. 9 units (1.5 full-course equivalents) - Concentration 1
3. 3 units (0.5 full-course equivalent) - Concentration 1 at the 400 level or higher
4. 6 units (1.0 full-course equivalent) - Concentration 2
5. 9 units (1.5 full-course equivalents) - Option

Fourth Year
1. Education 420/427
2. Education 430/435
3. Education 440/445
4. Education 450/456
5. Education 460/465

Fifth Year²
1. Education 520/525
2. Education 530/535
3. Education 540/546
4. Education 551/556
5. Education 560

¹Students should refer to registration materials at the following website (ucalgary.ca/degreeguide/) to determine recommended first-year Mathematics courses based on their concentration.
²Refer to the Science Breadth Requirement found in 4.6.3.1 Required Courses - Major Program - 4. Science Breadth. A Computer Science course is recommended.

Note: This schedule is somewhat adjustable to accommodate individual programs. Options include any courses that are prerequisites to the concentration courses, but are from another field, and also include the Science Breadth Requirements.

4.6.5 Neuroscience

Degrees Offered
Undergraduate
- Neuroscience
- Biology

BSc Honours

Programs Offered
BSc Honours in Neuroscience

Note: There is no Minor offered in Neuroscience.

Program vs. Faculty Regulations
Regulations governing programs in Neuroscience are a combination of general Faculty of Science regulations and the additional program specific regulations listed below. It is essential for students to be familiar with both sets of regulations. It is helpful to read Section 3 (Faculty Regulations) first.

Program Information
Program Office: Energy Environment Experiential Learning (EEL) 426
Telephone: 403.220.8979
Fax: 403.210.8126
Website: ucalgary.ca/bscneuro
Email: bscneuro@ucalgary.ca

Enrolment Limitations
Enrolment Limitations in Program
The number of spaces in Neuroscience program is limited and entry into this program is competitive.

Enrolment Limitations in Courses
In the first instance, enrolment in Neuroscience courses is available to Neuroscience students in satisfactory standing who meet the prerequisite(s). Depending on space availability, other students who are in satisfactory standing and meet the prerequisite(s) may register in a course. Consult the Schedule Builder in the Student Centre for details regarding enrolment in these courses.

Ethics in Neuroscience
Studies in Neuroscience involve the use of living and dead organisms. Students taking laboratory- and field-based courses in this discipline can expect involvement with and experimentation on such materials. Students perform dissections on dead or preserved organisms in some courses. In particular courses, students experiment on living organisms, their tissues, cells, or molecules. Sometimes field work requires students to collect a variety of living materials by many methods, including humane trapping.

All work on humans and other animals conforms to the Helsinki Declaration and to the regulations of the Canadian Council on Animal Care. The Program strives for the highest ethical standards consistent with stewardship of the environment for organisms whose use is not governed by statutory authority. Individuals contemplating taking courses in the Neuroscience program should ensure that they have fully considered these issues before enrolling. Students are advised to discuss any concern they might have with the Program Director.

4.6.5.1 Programs in Neuroscience

Admission and Student Standing
New applicants should refer to A.2 in the Admissions section of this Calendar for general regulations regarding admission requirements to the University of Calgary. Bachelor of Science Honours in Neuroscience program is limited to 30 students each year. Admission is based on high school averages or university GPA.

New applicants are considered for admission to the first or third years of the Bachelor of Science Honours in Neuroscience degree program only. There is no second year admission. To be eligible for first year admission consideration, applicants must be coming directly from high school and/or presenting no more than 6 units (1.0 full-course equivalent) transferable post-secondary courses (including University of Calgary courses). To be considered for admission to third year, transfer applicants must have completed 60 units (10.0 full-course equivalent) transfer courses and have earned a GPA that meets the standard for admission into an honours program (Section 3.2 Admission and 3.4C Program Requirements). Transfer admission into this program is highly competitive and a GPA of at least 3.70 is required in order to be considered for a transfer, although does not guarantee admission. Students will be evaluated on their academic performance as outlined for the honours review and must have completed or be currently enrolled in the following courses. These courses must include the following or their equivalents:
- Biochemistry 341 or 393
- Biology 241, 243, 311 and 331
- Chemistry 351 and one of 201 or 211 and one of 203 or 213
- Mathematics 211 or 213 and one of Mathematics 249 or 265 or 275
- Physics 211 or 221, and 223
- Psychology 200, 300 and 301

Additionally, it is recommended that students take Psychology 375 and one of Computer Science 217 or 231 or Data Science 211, or their equivalents, prior to transferring.

Students who have obtained a Bachelor degree in Biological Sciences, Psychology or Zoology, or an equivalent degree, may not enrol in the Bachelor of Science Honours in Neuroscience degree, as Biological Sciences, Psychology and Zoology are integral components of the Bachelor of Science Honours in Neuroscience degree. Students with such degrees are encouraged to seek a second degree in the other discipline (Psychology or Biological Sciences/Zoology, as appropriate) or to consider applying to a graduate degree in Psychology, Biological Sciences or Neuroscience.

Students who hold an approved Bachelor’s degree recognized by the University of Calgary (BA, BSc, BEd, etc.) in disciplines other than Psychology or Biological Sciences, which wish to pursue the Bachelor of Science Honours in Neuroscience degree as a second or subsequent undergraduate degree are advised that they will be required to follow the admission procedures and meet the requirements in place for transfer applicants to the program. For additional regulations regarding admission to a second undergraduate degree, refer to A.5.5 Second-Degree Students in the Admissions section of this Calendar.

Note: Any student in an Honours program is subject to the provisions for continuation in an Honours program, Subsections 3.2 and 3.4C.
GPA Requirements

Students in Neuroscience must present honours-level performance at the academic review completed after each winter semester. Details on the honours review is found in section A.2 of this calendar. Students who do not qualify for continuation will be moved into the Biological Sciences program in the Department of Biological Sciences unless they indicate otherwise and meet the admission requirements for their chosen program. Students with a GPA of less than 2.000 are subject to the provisions of 3.7 Student Standing. B. Performance Review, Probationary Status and Dismissal.

Note: Students in Neuroscience may take no more than 36 units (6.0 full-course equivalents) that would fulfill major field requirements in Biological Sciences programs or the Psychology program respectively. Students who wish to transfer out of Neuroscience into either Biological Sciences or Psychology must apply to transfer by the application deadline and will be able to take more such courses once admitted to their new program.

Courses Constituting the Honours Field of Neuroscience

- Biology 241, 243, 311 and 331
- Psychology 200 or 205, 300, 301 and 375
- All courses labelled Neuroscience, excluding Neuroscience 321

Required Courses - Honours Program

See also Section 3 (Faculty Regulations), Subsection 3.4A (Program Requirements - Major and Honours Programs) and Subsection 3.5B (Course Selection and Registration - Introductory Courses for Science Degree Programs).

- 3 units (0.5 full-course equivalent) - Biochemistry 341 or 393
- 12 units (2.0 full-course equivalents) - Biology 241, 243, 311 and 331
- 9 units (1.5 full-course equivalents) - Chemistry 351 and one of 201 or 211 and one of 203 or 213
- 3 units (0.5 full-course equivalent) - Computer Science 217 or 231 or Data Science 211
- 3 units (0.5 full-course equivalent) - Mathematics 211 or 213
- 3 units (0.5 full-course equivalent) - One of Mathematics 249 or 265 or 275
- 24 units (4.0 full-course equivalents) - Neuroscience 201, 301, 401, 411, 421, 500, 511
- 15 units (2.5 full-course equivalents):
  - At least 3.0 units (0.5 full-course equivalent) in the area of Human Neuroscience chosen from: Neuroscience 479 or 521
  - At least 3.0 units (0.5 full-course equivalent) in the area of Biological Neuroscience chosen from: Neuroscience 475 or 531
  - At least 3.0 units (0.5 full-course equivalent) in the area of Behavioural Neuroscience chosen from: Neuroscience 474, 477, or 478

Required Courses - Major Program

The non-Honours, BSc in Neuroscience program is not open for enrolment, but may be awarded in cases where students do not meet requirements for being awarded the BSc (Honours) in Neuroscience.

- 3 units (0.5 full-course equivalent) - Biochemistry 341 or 393
- 12 units (2.0 full-course equivalents) - Biology 241, 243, 311 and 331
- 9 units (1.5 full-course equivalents) - Chemistry 351 and one of 201 or 211 and one of 203 or 213
- 3 units (0.5 full-course equivalent) - Mathematics 211 or 213
- 3 units (0.5 full-course equivalent) - Mathematics 249 or 265 or 275
- 15 units (2.5 full-course equivalents) - Neuroscience 201, 301, 401, 411, 421
- 9 units (1.5 full-course equivalents):
  - At least 3.0 units (0.5 full-course equivalents) in the area of Human Neuroscience chosen from: Neuroscience 479 or 521
  - At least 3.0 units (0.5 full-course equivalents) in the area of Biological Neuroscience chosen from: Neuroscience 475 or 531
  - At least 3.0 units (0.5 full-course equivalents) in the area of Behavioural Neuroscience chosen from: Neuroscience 474, 477 or 478
- 6 units (1.0 full-course equivalent) - Physics 211 or 221, and 223

- 3 units (0.5 full-course equivalent) - Philosophy 275 or 279
- 12 units (2.0 full-course equivalents) - Psychology 200 or 205, 300, 301, 375
- 6 units (1.0 full-course equivalent) - Zoology 461 and 463
- 39 units (6.5 full-course equivalents) - Options

Recommendations for the Honours Program

Hotchkiss Brain Institute

Throughout their time in the Neuroscience program, students are encouraged to attend seminars at the Hotchkiss Brain Institute. In their fourth year, students must register in Neuroscience 511.

International Component

This suggestion may be satisfied in various ways, e.g., by completing 6 units (1.0 full-course equivalent) from the list of courses in item 4 of the section "Make Your Degree More International," under "About the University" in the Calendar, or by following one of the other suggestions listed there. If non-science course work is used to satisfy this recommendation, this course work could be part of the breadth requirement.

Optional courses

Students typically choose optional courses in consultation with a faculty mentor.

4.6.5.2 Double Majors including Neuroscience

Programs with two Major fields that include Neuroscience may be completed in the following manner:

- Both Majors must be Honours.
- The minimum requirements for both Major fields must be fulfilled.
- It is not possible to combine Neuroscience with any of Biological Sciences Honours, Psychology Honours or Zoology Honours.

If Neuroscience is combined with another Major in the Department of Biological Sciences, then:

- Biology 241, 243, 311, 331 and Biochemistry 393 will be counted towards both Honours. For any other course that is a requirement for both programs that course may be counted towards only one and a substitution must be made to fulfill the requirements of the other Honours field.

For further details consult the Neuroscience Program Student Office.

4.6.5.3 Combined Degrees

It is not possible to undertake a combined Neuroscience degree with a degree in Biological Sciences, Psychology or Zoology. If Neuroscience is combined with another Major in the Department of Biological Sciences (i.e., Biochemistry; Cellular, Molecular & Microbial Biology; Ecology or Plant Biology), then:

- Biology 241, 243, 311, 331 and Biochemistry 393 will be counted towards both degrees. For any other course that is a requirement for both programs that course may be counted towards only one and a substitution must be made to fulfill the requirements of the other degree.

4.6.5.4 Minor with Neuroscience

There is no Minor offered in Neuroscience. Students in the Bachelor of Science Honours in Neuroscience may not also minor in Psychology or Biological Sciences, as these programs are already integral components of the Bachelor of Science Honours in Neuroscience degree.

4.7 Physics and Astronomy

</table>

There are many options for graduate students leading to MSc and PhD degrees in the area of Physics and Astrophysics. Details of graduate specializations can be found in the graduate section of this calendar.

4.6.5.4 Minor with Neuroscience

Students in the Bachelor of Science Honours, Psychology Honours or Zoology Honours may be combined with eligible BA and BSc programs from the Faculty of Arts. Please refer to Section 3.4 for information on combined degrees, double majors with programs within the Faculty of Science as well as combined degrees with programs from other faculties.

Students interested in pursuing these degrees are encouraged to speak with an advisor in the Undergraduate Science Program to develop a degree completion plan.

Programs Offered

BSc in Physics, Astrophysics
BSc Honours in Physics, Astrophysics
Minors in Physics and Astrophysics

Department vs. Faculty Regulations

Programs in the Department of Physics and Astronomy are governed by a combination of general Faculty of Science regulations and the additional program specific regulations listed below.

It is essential for students to be familiar with both sets of regulations. It is helpful to read the Faculty Regulations in Section 3 first.

Students should consult Academic Requirements in their Student Centre periodically to ensure that requirements are being met. Also, students are strongly urged to consult with the Undergraduate Science Centre (USC) and the Department at all stages of their program.

Department Information

Department Office: Science B 605
Telephone: 403.220.5385
Fax: 403.289.3331
Website: phas.ucalgary.ca

4.7.1 Programs in Physics

Courses constituting the field of Physics

- All courses labelled Physics except Physics 271, 303 or 371
- Astrophysics 609

Required Courses - Major Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses).

6 units (1.0 full-course equivalent) - Physics 227 and 255
3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 275 or 249 or 285
3 units (0.5 full-course equivalent) - Mathematics 277, or Mathematics 267 and 177
6 units (1.0 full-course equivalent) - Chemistry 201 or 211 and one of Chemistry 203 or 215 or Biology 241 or Astrophysics 305
3 units (0.5 full-course equivalent) - Computer Science 217
39 units (6.5 full-course equivalents) - Physics 325, 341, 343, 375, 381, 397, 434, 449, 455, 457, 497, 501, and 599 or 598
3 units (0.5 full-course equivalent) - 400- or 500-level Physics option
3 units (0.5 full-course equivalent) - Mathematics 311 or 313
9 units (1.5 full-course equivalents) - Mathematics 375 or 376 or Applied Mathematics 311; and Mathematics 377 or 367; and Applied Mathematics 433 or Mathematics 433
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table 1 in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.

6 units (1.0 full-course equivalent) - Science options
18 units (3.0 full-course equivalent) - Options

Notes:

- Students can a) have obtained an "A-" or better in Physics 211/221 or b) have completed both Physics 211/221 and Physics 231 in order to satisfy their program requirement of Physics 227.
- Students who have completed either of these options must visit the Undergraduate Science Centre (EEEL 445) to have this substitution applied to their student record.

- It is strongly recommended that students take 6 units (1.0 full-course equivalent) English to complete the 6 units (1.0 full-course equivalent) Faculty of Arts requirement.

- The Mathematics 275, 277, 375, 377 recommended sequence can be replaced with a sequence of Mathematics 249 or 265, Mathematics 267, Mathematics 177, Applied Mathematics 311 or Mathematics 376, and Mathematics 367.

- Students using only a single chemistry course to fulfill their program requirements may use Chemistry 203 or Chemistry 209 in place of the suggested Chemistry 201 or 211.
Required courses - Honours Program

See also Section 3 (Faculty Regulations), Subsections 3.4C (Program Requirements - Honours Degree Programs) and 3.5B (Course Selection - Introductory Courses).

6 units (1.0 full-course equivalent) - Physics 227 and 255
3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 275 or 249 or 2651
3 units (0.5 full-course equivalent) - Mathematics 277, or Mathematics 2671 and 177
6 units (1.0 full-course equivalent) - Chemistry 201 or 211 and one of Chemistry 203 or 213 or Biology 241 or Astrophysics 305
3 units (0.5 full-course equivalent) - Computer Science 217
42 units (7.0 full-course equivalents) - Physics 325, 341, 343, 375, 381, 397, 443, 449, 451, 455, 457, 481, 497, 501, 543, 597 and 598
3 units (0.5 full-course equivalent) - Mathematics 311 or 313
9 units (1.5 full-course equivalents) - Mathematics 375 or 376 or Applied Mathematics 311; and Mathematics 377 or 367; and Applied Mathematics 433 or Mathematics 433
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
3 units (0.5 full-course equivalent) - Science option
9 units (1.5 full-course equivalents) - Options

1The recommended sequence for Mathematics courses in Physics and Astronomy is Mathematics 275 and 277. Students who complete Mathematics 267 will have to take a Block Week class for it to be equivalent to Mathematics 277.

Notes:

- Students can a) have obtained an "A+" or better in Physics 211/221 or b) have completed both Physics 211/221 and Physics 321 in order to satisfy their program requirement of Physics 227. Students who have completed either of these options must visit the Undergraduate Science Centre (EEEL 445) to have this substitution applied to their student record.
- It is strongly recommended that students take 6 units (1.0 full-course equivalent) English to complete the 6 units (1.0 full-course equivalent) Faculty of Arts requirement.
- The Mathematics 275, 277, 375, 377 recommended sequence can be replaced with a sequence of Mathematics 249 or 265, Mathematics 267, Mathematics 177, Applied Mathematics 311 or Mathematics 376, and Mathematics 367.
- Students using only a single chemistry course to fulfill their program requirements may use Chemistry 203 or Chemistry 209 in place of the suggested Chemistry 201 or 211.

Recommendations

It is strongly recommended that Mathematics 275 be taken in preference to Mathematics 249 or 265.

Minor in Physics

- Physics 211 or 221 or 227; and Physics 223 or 255
- 24 units (4.0 full-course equivalents) at the 300 level or higher in the Field of Physics
- Mathematics prerequisites as needed

4.7.2 Programs in Astrophysics

Courses constituting the field of Astrophysics

- All courses labelled Astrophysics

Required Courses - Major Program

See also Section 3 (Faculty Regulations), Subsections 3.4A (Program Requirements - Major Programs) and 3.5B (Course Selection - Introductory Courses).

3 units (0.5 full-course equivalent) - Astrophysics 305
6 units (1.0 full-course equivalent) - Physics 227 and 255
3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 275 or 249 or 2651
3 units (0.5 full-course equivalent) - Mathematics 277, or Mathematics 2671 and 177
3 units (0.5 full-course equivalent) - Chemistry 201 or 211 or 209
3 units (0.5 full-course equivalent) - Computer Science 217
9 units (1.5 full-course equivalents) - Astrophysics 307, 401, 403
24 units (4.0 full-course equivalents) - Physics 325, 341, 343, 375, 381, 443, 449 and 455
6 units (1.0 full-course equivalents) - Two of Physics 481, Astrophysics 503 or Astrophysics 509
9 units (1.5 full-course equivalents) - 400- or 500-level Physics option
3 units (0.5 full-course equivalent) - Mathematics 311 or 313
9 units (1.5 full-course equivalents) - Mathematics 375 or 376; and Mathematics 377 or 367; and Mathematics 433 or Applied Mathematics 433
3 units (0.5 full-course equivalent) - Science option
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
15 units (2.5 full-course equivalents) - Options

1The recommended sequence for Mathematics courses in Physics and Astronomy is Mathematics 275 and 277.
Notes:
- Students can a) have obtained an "A-" or better in Physics 211/221 or b) have completed both Physics 211/221 and 321 in order to satisfy their program requirement of Physics 227. Students who have completed either of these options must visit the Undergraduate Science Centre (EEEL 445) to have this substitution applied to their student record.
- Suggested Physics or Science options are Physics 457, 501, 509, 543, Computer Science 491.
- It is strongly recommended that students take 6 units (1.0 full-course equivalent) English to complete the 6 units (1.0 full-course equivalent) Faculty of Arts requirement.
- The Mathematics 275, 277, 375, 377 recommended sequence can be replaced with a sequence of Mathematics 249 or 265, Mathematics 267, Mathematics 177, Mathematics 376, and Mathematics 367.
- Astrophysics 503 and 509 are taught in alternate years.

Required Courses - Honours Program
3 units (0.5 full-course equivalent) - Astrophysics 305
6 units (1.0 full-course equivalent) - Physics 227 and 255
3 units (0.5 full-course equivalent) - Mathematics 211 or 213
3 units (0.5 full-course equivalent) - Mathematics 275 or 249 or 265
3 units (0.5 full-course equivalent) - Mathematics 277, or Mathematics 267 and 177
3 units (0.5 full-course equivalent) - Chemistry 201 or 211 or 209
3 units (0.5 full-course equivalent) - Computer Science 217
9 units (1.5 full-course equivalents) - Astrophysics 307, 401, 403
24 units (4.0 full-course equivalents) - Physics 325, 341, 343, 375, 381, 443, 449 and 455
9 units (1.5 full-course equivalents) - Physics 481, Astrophysics 503 and 509
3 units (0.5 full-course equivalent) - Mathematics 311 or 313
9 units (1.5 full-course equivalents) - Mathematics 375 or 376; and Mathematics 377 or 367; and Mathematics 433
15 units (2.5 full-course equivalents) - Physics 451, 457, 501, 543 and 599.
18 units (3.0 full-course equivalents) - Breadth Requirement: Options from faculties other than the Faculty of Science (check Table I in 3.4 Program Requirements for ineligible courses). Of these 18 units (3.0 full-course equivalents), at least 6 units (1.0 full-course equivalent) must be from the Faculty of Arts. Science 311 may be counted among the 18 units (3.0 full-course equivalents) from other faculties.
9 units (1.5 full-course equivalents) - Options
- The recommended sequence for Mathematics courses in Physics and Astronomy is Mathematics 275 and 277. Students who complete Mathematics 267 will have to take a Block Week class for it to be equivalent to Mathematics 277.

Notes:
- Students can a) have obtained an "A-" or better in Physics 211/221 or b) have completed both Physics 211/221 and 321 in order to satisfy their program requirement of Physics 227. Students who have completed either of these options must visit the Undergraduate Science Centre (EEEL 445) to have this substitution applied to their student record.
- Suggested Physics or Science options are Physics 457, 501, 509, 543, Computer Science 491.
- It is strongly recommended that students take 6 units (1.0 full-course equivalent) English to complete the 6 units (1.0 full-course equivalent) Faculty of Arts requirement.
- The Mathematics 275, 277, 375, 377 recommended sequence can be replaced with a sequence of Mathematics 249 or 265, Mathematics 267, Mathematics 177, Mathematics 376, and Mathematics 367.
- Astrophysics 503 and 509 are taught in alternate years.

Note: Honours students can elect to do Physics 598 instead of 599 and an option.

**Minor in Astrophysics**
3 units (0.5 full-course equivalent) - Astrophysics 305
15 units (2.5 full-course equivalents) - Physics 227, 255, 325, 341, 381, 541, 581
6 units (1.0 full-course equivalent) - Astrophysics 401 and 403
6 units (1.0 full-course equivalent) - Courses from the Field of Astrophysics (in addition to those specifically required above)

Note: The preceding courses require prerequisites in Mathematics and Computer Science; see the course descriptions for more details.

### 4.7.3 Environmental Science - Physics Concentration
Students may pursue a BSc program in Environmental Science with a concentration in Physics. This is a single-degree, four-year program which is offered by the Faculty of Science with collaboration from the Faculty of Arts. Program details are listed in 4.6 Non-Departmental Programs. Since this is a multidisciplinary program with restricted entry, students should consult the Director of the Environmental Science program at their earliest opportunity.

### 4.7.4 Suspended Programs

#### 4.7.4.1. Chemical Physics Program (Honours)
This program has been suspended as of Fall 2016. Students interested in this program should seek advice from a program advisor in the Undergraduate Science Centre. Students interested in this area should consider completing a double degree or minor.

#### 4.8 International Foundations Program (IFP) – Faculty of Science
A student who meets the admission requirements for the Faculty of Science degree programs (see A.5 Undergraduate Admission Requirements in this Calendar for more...
information), and the minimum English language proficiency scores outlined in Section A.11.1 (International Foundations Program), may be admitted to the first year of an undergraduate academic program concurrent with English language and support courses. The IFP Pathways Route only accepts students for start in September.

Students admitted to IFP Pathways with the Faculty of Science complete a curriculum that includes BSc courses combined with intensive English language and academic course support.

IFP Pathways Science students take first-year science courses within the Faculty of Science, concurrently with English language and support courses within IFP, commencing in the Summer Intersession. Students also take three courses in the Spring intersession of the Spring/Summer Term later in their degree. This allows students to complete the first year Science program without any delays. The IFP Pathways Science students’ language and academic course support consists of 7 unpaired courses:

- Unpaired courses focus on foundational academic communication skills, including reading, listening, speaking, and composition.

Grades for IFP Pathways courses are not used in the calculation of grade point averages for degree programs unless specifically allowed by that program. In addition, IFP Pathways courses may not be used for credit toward a degree program.

Students admitted to IFP Pathways Faculty of Science must complete IFP Pathways and cannot submit English language proficiency scores for early exit.

For information on admission to the IFP Pathways Science program, refer to R.1 International Foundations Program Admission. The below charts outline the first year program progression for IFP Pathways students based on their program.

### 4.8.1 Biological Sciences (IFP Pathways Science)

IFP Pathways Science students must complete the below first year progression if they are majoring in Biochemistry; Biological Sciences; Cellular, Molecular and Microbial Biology; Ecology; Plant Biology or Zoology.

#### Summer

- IFPX 248: Academic Success in STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Fall

- IFPX 248: Introduction to Academic Writing for STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Winter

- IFPX 246: Intermediate Academic Writing for STEM
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Spring

- IFPX 240: Introduction to Academic Writing for STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

*Courses typically taken. Please refer to the Course Listings for more information on the prerequisite and content differences between sets of courses.

---

**4.8.4 Geoscience (IFP Pathways Science)**

IFP Pathways Science students must complete the below first year progression if they are majoring in Geology or Geophysics.

#### Summer

- IFPX 248: Academic Success in STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Fall

- IFPX 240: Introduction to Academic Writing for STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Winter

- IFPX 246: Intermediate Academic Writing for STEM
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Spring

- IFPX 240: Introduction to Academic Writing for STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

*Courses typically taken. Please refer to the Course Listings for more information on the prerequisite and content differences between sets of courses.

**Delayed:** 6 units of non-Science options (to be taken in Spring Intersessions later in degree).

**Note:** Due to the prerequisite requirements for second-year Geoscience courses, it will be necessary for students to complete Mathematics 267 in the Summer Intersession.

---

**4.8.5 Mathematics and Statistics (IFP Pathways Science)**

IFP Pathways Science students must complete the below first year progression if they are majoring in Mathematics, General Mathematics or Actuarial Science.

#### Summer

- IFPX 248: Academic Success in STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Fall

- IFPX 240: Introduction to Academic Writing for STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Winter

- IFPX 246: Intermediate Academic Writing for STEM
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

#### Spring

- IFPX 240: Introduction to Academic Writing for STEM
- IFPX 242: Intermediate Language and Skills Development
- IFPX 342: Advanced Language and Skills Development
- IFPX 346: Technical Writing

*Courses typically taken. Please refer to the Course Listings for more information on the prerequisite and content differences between sets of courses.

**Delayed:** 6 units of non-Science options (to be taken in Spring Intersessions later in degree).
### 4.8.6 Physics and Astronomy (IFP Pathways Science)

IFP Pathways Science students must complete the below first year progression if they are majoring in Astrophysics.

<table>
<thead>
<tr>
<th>Summer</th>
<th>Fall</th>

</tbody>
</table>

*Courses typically taken. Please refer to the Course Listings for more information on the prerequisite and content differences between sets of courses.

**Delayed:** 3 units from Computer Science 217; 6 units of non-Science options (to be taken in Spring Intersessions later in degree)

**Note:** If Mathematics courses or Computer Science courses are part of a C1 or C2, the number of C1 and C2 slots in this schedule can be reduced accordingly as per degree requirements.

### 4.8.8 Environmental Science (IFP Pathways Science)

IFP Pathways Science students who are majoring in Environmental Science must complete a first year progression appropriate to their concentration. Students may contact the Undergraduate Science Centre (USC) for assistance determining the courses required for their concentration.

<table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

*Students should contact the Undergraduate Science Centre (USC) to confirm the appropriate courses for their concentration. Students may also refer to the Course Listings for more information on the prerequisite and content differences between sets of courses.

**Delayed:** 9 units appropriate to the concentration chosen (to be taken in Spring Intersessions later in degree)

*Physics concentrators should take Mathematics 275.

### 5. Administration

**Faculty Administrative Officers**

- Dean: L. Rigg
- Vice Dean and Associate Dean (Research): B.A. Keay
- Associate Deans:
  - N. Chibny, Student Affairs
  - L.F. Reid, Teaching and Learning
  - C.M. Graham, Undergraduate
Faculty of Social Work

1. Summary of Degree Programs

Degrees Offered

| Undergraduate | BSW | Graduate | MSW | PhD |

Undergraduate

Bachelor of Social Work (BSW)
The Faculty of Social Work provides post-secondary education throughout Alberta. The BSW degree, accredited by the Canadian Association for Social Work Education, prepares students for generalist practice. Students may pursue the BSW degree on a full-time or part-time basis. Students have up to five years to complete the 3rd and 4th year of the BSW program. The BSW program is administered from three locations:

- Calgary: BSW Calgary and BSW Online (Virtual Learning Circles).
- Edmonton (for Central and Northern Alberta Region): BSW Edmonton and Community-Based Learning Circles in Grande Prairie and Red Deer.
- Lethbridge (for Southern Alberta Region): BSW Lethbridge and Community-Based Learning Circles in Medicine Hat.

The Learning Circles program prepares students for practice that is geographically relevant and particularly sensitive to the needs of Indigenous peoples. Students in the Community-Based Learning Circles program must be available to attend course offerings in Alberta communities where the Community-Based Learning Circles are being offered. The Virtual Learning Circles program delivers the curriculum through a blended learning approach, integrating online learning with some in-person classes in Calgary.

The Faculty of Social Work’s admission routes into its different programs are described in the section 3.1 Admissions.

Graduate

Master of Social Work (MSW)
The Faculty offers a Master’s program accredited by the Canadian Association for Social Work Education leading to the MSW degree. The objective of the MSW program is to prepare students for advanced professional practice in social work. The Faculty of Social Work offers MSW programs in Calgary, Edmonton, and Lethbridge. In all locations, students choose between the course-based or the thesis route to the degree, except for the Leadership in the Human Services specialization, which is only course-based.

In Calgary, MSW students are admitted annually and choose from one of three Specializations: Clinical Social Work Practice, Leadership in the Human Services, or International and Community Development. Students without an undergraduate degree in social work must complete nine Foundation courses prior to taking any Specialization courses. MSW graduates are admitted directly into the Specialization route.

In Edmonton, the Faculty of Social Work offers only the Clinical Social Work Practice Specialization. Students without an undergraduate degree in social work must complete nine Foundation courses prior to taking any Specialization courses. MSW graduates are admitted directly into the Specialization route.

In Lethbridge, the Faculty of Social Work offers only the Clinical Social Work Practice Specialization and to students with a BSW. Lethbridge does not offer the Foundation route.

The course-based MSW in Leadership in the Human Services Specialization is administered through Calgary as a blended program and is accessible to students regardless of home location.

More details about the MSW program may be found in the Faculty of Graduate Studies Calendar at grad.ucalgary.ca.

Doctor of Philosophy (PhD) in Social Work
The PhD program offers a research-based degree and is intended to produce highly qualified social work researchers and teachers. It is Calgary-based.

For further information please consult the Faculty of Graduate Studies Calendar at grad.ucalgary.ca.

MSW/MBA
The Faculty of Social Work and the Has­kayne School of Business offer a combined program leading to the Master of Social Work/Master of Business Administration (MSW/MBA) degree. Offered from the Calgary location, this program is designed to prepare students for business-related social work careers. Applications to the combined MSW/MBA are not being accepted for Fall 2018.

Post-baccalaureate Certificate and Diploma
A Post-baccalaureate Certificate and Diploma in Mental Health and Addictions is offered in Calgary. Information about this program can be obtained from the Student Services Office in the Faculty of Social Work or from the Faculty’s website at fsw.ucalgary.ca. Applications to the Post-baccalaureate Certificate and Diploma are not being accepted for Fall 2018.

2. Faculty Information

Contact Information

Location: Professional Faculties 3256
Student Information: 403.220.2011/403.220.5430
Dean’s Office: 403.220.5945
Dean’s Office Email: browna@ucalgary.ca
Student Services Email: socialwk@ucalgary.ca
Website: fsw.ucalgary.ca

Additional Information

Students interested in pursuing the BSW in Calgary or through the BSW Virtual Learning Circles program must contact: Student Services Faculty of Social Work, University of Calgary 3-250, 10230 Jasper Avenue Edmonton, Alberta T5J 4P6

Email: bswinfo@ucalgary.ca
The BSW is consistently offered in Calgary. In addition, Central and Northern Alberta communities currently hosting the BSW Learning Circles program are: Grande Prairie and Red Deer.

Students interested in studying in the Central and Northern Alberta Region must contact:
Student Services Faculty of Social Work, University of Calgary 3-250, 10230 Jasper Avenue Edmonton, Alberta T5J 4P6

Email: fswcnar@ucalgary.ca
The BSW program is consistently offered in Lethbridge. The Southern Alberta commu-
Faculty of Social Work

Introduction

International Definition of Social Work

“Social work is a practice-based profession and an academic discipline that promotes social cohesion, and the empowerment and liberation of people. Principles of social justice, human rights, collective responsibility and respect for diversities are central to social work. Underpinned by theories of social work, social sciences, humanities and indigenous knowledge, social work engages people and structures to address life challenges and enhance well-being.”

(Faculty of Social Work)

Faculty of Social Work Vision

Creating social well-being and just societies.

Faculty of Social Work Mission

- Dedicated to promoting societies that respect human dignity and worth, meet basic human needs, are anti-oppressive, inclusive, and based on principles of social justice.
- Committed to learners by providing and building a knowledge base and set of skills in environments designed to stimulate and support a spirit of critical inquiry.
- Focused on serving as a catalyst for positive community impact through the creation and dissemination of knowledge and innovation.

Objectives

The Faculty of Social Work prepares BSW graduates to address individual, family, community, and social concerns in the context of diverse and changing societies. Graduates are prepared to draw upon a variety of assessment and intervention methods to help achieve social well-being outcomes with appropriate structural supports across the life span.

The program is based on the social work tenets of mobilizing strengths of individuals and groups, social engagement and civil societies, respect for diversity, inclusion, equitable participation, and social justice.

The program is grounded in the vision and mission of the Faculty, inquiry based methods of learning, the Codes of Ethics and Standards of Practice of the social work profession, and the national accreditation standards for schools of social work.

Opportunities

The BSW program provides the student with the professional knowledge, theory, and skills of social work including a wide range of experiential opportunities to integrate this learning in supervised practice settings. Upon graduation, students are prepared to practice as generalist social workers in a wide variety of social welfare fields in a continuously changing world. Areas of practice may include child welfare, family violence, community development, health, gerontology, mental health and addictions, social policy development, and working with individuals, families, groups, organizations, and communities.

Social Work Students' Association

The Social Work Students’ Association (SWSA) is actively involved in the governance of the Faculty, with representatives on Faculty Council and Faculty committees. The society is an active advocate of student interests and issues, and a sponsor of social events for charitable causes. The Association is active in local regions and all students in the faculty are eligible for membership.

Professional Conduct

The study of social work practice places students in a position of special trust with professional social workers and their clients. The Faculty recognizes that social work education occurs both inside and outside the classroom and has the responsibility to ensure that its graduates are competent and ethical. Students are expected to comply with all university policies and regulations in addition to professional standards for the Social Work profession as outlined by the Canadian Association for Social Workers, Code of Ethics (2005): https://casw-acts.ca/sites/casw-acts.ca/files/documents/casw_code_of_ethics.pdf and the Alberta College of Social Work Standards of Practice (2013): acsw.ab.ca/document/1327/final_standards_of_practice_20131104.

Students are expected to ensure they are both familiar and compliant with these standards.

3. Faculty Regulations

3.1 Admissions

Applicants must meet the basic University admission requirements outlined in A.2 Undergraduate Admission section of this Calendar. Students who lack university admission requirements cannot be admitted to the Faculty. In addition, applicants must have a minimum grade point average of 2.30 calculated over the most recent course work to a maximum of 30 units (5.0 full-course equivalents) of University of Calgary courses and/or transfer courses taken at other institutions. All grades within a term will be included except where the number of courses taken within a term exceeds 30 units (5.0 full-course equivalents), in which case, the highest grades will be used.

Students are admitted to the Fall Term only. Admission quotas limit enrolment in each of the routes. Therefore, not all qualified applicants may be admitted.

All applicants, including current University of Calgary students, must submit the University of Calgary online Application for Admission and upload the required supporting documents by the deadline dates specified below. All applicants must also provide two reference letters (one of which must be academic). Detailed application instructions can be obtained from the Faculty of Social Work website at: fsw.ucalgary.ca. Admission requirements for part-time students are the same as those listed for full-time students.

Applicants can only apply to one location. Applicants who wish to switch their location choice (e.g. from Calgary to Edmonton or Lethbridge) must contact the Student Services Office prior to March 1. Requests for change will be considered at the discretion of the Faculty.

Application Deadlines

Application and documentation deadlines for the Bachelor of Social Work program: March 1.

Transcript deadline: March 15.

Also refer to ucalgary.ca/future-students/undergraduate/apply.

University Transfer Route (including After Degree)

The University Transfer route is available in Calgary, Edmonton and Lethbridge and through the Learning Circles and Virtual Learning Circles programs.

Applicant to the University Transfer (UT) route must meet the following requirements:

- A minimum of 57 units (9.5 full-course equivalents) non-social work university transferable courses, OR an undergraduate degree in another discipline from a recognized institution
- Successful completion of Social Work 201 or equivalent
- Admissibility to the University of Calgary
- English 30-1 or an acceptable equivalent
- A minimum admission grade point average of 2.30 on a 4.00 scale
- Proficiency in English language

All courses must have been completed by the end of the Winter Term preceding the Fall Term for which entry is sought. Winter, Spring and Summer courses taken in the terms immediately preceding admission will not be used in the calculation of the admission GPA. However, applicants must successfully complete their Winter courses and must maintain a GPA sufficient to satisfy the University admission requirements.

Social Work 201 is a prerequisite for admission into the University Transfer route and must be completed prior to admission.

The Faculty of Social Work evaluates applications on the following criteria:

1. Admission Grade Point Average. The grade point average is calculated on the most recently completed 30 units (5.0 full-
course equivalents), starting with courses completed prior to the application deadline.

2. Relevant work/volunteer experience.

3. Admission essay.

4. Two letters of reference. One of these should be from an academic source (e.g. previous instructor). The other should be from a professional (e.g. a former employer or supervisor) who is qualified to comment on the applicant’s suitability for undergraduate studies in social work.

Applicants wishing to take the BSW degree program at the University of Calgary may complete their 57 non-social work units (9.5 full-course equivalents) from the required 60 units (10.0 full-course equivalents) for admission, via the Faculty of Arts.

Notes:

- Applicants who have graduated with a social work diploma from a college that does not have an agreement with the Faculty of Social Work are considered University Transfer applicants. They will normally receive credit for 30 unspeciﬁed units (5.0 full-course equivalents) of transfer credit, including the equivalent of Social Work 201 from their diploma program. These applicants will be required to take up to 30 additional units (5.0 full-course equivalents) of non-social work university transferable courses, to meet the minimum admission requirements for the University Transfer route. Please contact one of the undergraduate student advisors in the Faculty of Social Work for further information.

- Applicants with a complete non-Social Work four-year degree and with the equivalent of two years of paid or volunteer work experience in the human services may consider applying to the two year MSW program. Applicants are strongly encouraged to consult with Student Services for academic reasons will not normally be readmitted.

- Applicants who have graduated with a social work diploma from a college that does not have an agreement with the Faculty of Social Work, will normally receive transfer credit for 30 unspeciﬁed units (5.0 full-course equivalents) including the equivalent of Social Work 201 from their diploma program. These applicants will be required to take an additional 30 units (5.0 full-course equivalents) of non-social work university transferable courses, to meet the minimum admission requirements for the University Transfer route. Please contact one of the undergraduate student advisors in the Faculty of Social Work for further information.

The Faculty of Social Work evaluates applications on the following criteria:

1. Admission Grade Point Average. The cumulative grade point average achieved on the Social Work Diploma will be used to calculate the admission average. For students still working on their diploma the cumulative GPA will be calculated on the most recently completed courses, starting with the Fall Term prior to the application deadline.

2. Admission essay.

3. Relevant volunteer/work experience.

4. Two letters of reference. One of these should be from an academic source (e.g. previous instructor). The other should be from a professional (e.g. a former employer or supervisor) who is qualiﬁed to comment on the applicant’s suitability for undergraduate studies in social work.

Second Baccalaureate Degree

Students who have received one or more approved undergraduate degrees (BA, BSc, BEd, etc.) may apply for admission to the Bachelor of Social Work program (University Transfer/After-Degree route).

Students must apply using the University of Calgary online application system and submit all required supplementary documents by the application deadline. For more information regarding admission to a second undergraduate degree, refer to A.5.5 in Undergraduate Admissions.

3.2 Registration

Course Load

The normal course load is 15 units (2.5 full-course equivalents) per term.

Accuracy of Registration

All students are responsible for the completeness and accuracy of their registration and for arranging their course selections to meet all program requirements as detailed in this Calendar.

Transfers Between Locations for Current BSW Students

Current BSW students who wish to transfer to another location must apply for a location transfer by February 1 for the following Fall. Students must:

1. Discuss the possibility of transfer with faculty advisors from both the location they wish to leave and the location they wish to transfer to. The decision will be made through consultation between the program directors and field co-ordinators at the two locations.

2. Fill out and submit the Request for Transfer Between Locations form to Student Services at the current location, prior to the deadline.

Interuption of Program Leading to a Degree

Students who interrupt their degree program in the Faculty of Social Work are advised that after an absence of one calendar year (twelve consecutive months) from academic study at the university level, they may be required to comply with any regulations that may have come into effect in regard to their program requirements during their absence. Students who choose not to attend for a year (twelve consecutive months) will not be required to re-apply for admission. However, they must notify the Faculty of Social Work in writing by February 1 of their intention to return the following Fall. Students who interrupt their degree program for two or more years (twenty-four consecutive months) will be required to re-apply for admission. Students who are required to withdraw for academic reasons will not normally be readmitted.

Other Requirements

Most courses have a web-based component. In order to take advantage of this, students must be familiar with navigating the Internet and have access to a computer. Some courses may be available only online or through combined online and video-conferencing. Email is routinely used to distribute information to students. A University of Calgary email address is required. Small computer labs are available for student use in Calgary, Edmonton, and Lethbridge.

3.3 Course Work

Field Practicum

Field practicum courses provide an opportunity for the student to be directly involved in social work practice. Successful completion of these courses is a requirement for continuation in the program. In all BSW program routes, students are required to complete a number of 300-level Social Work courses before registering in field practice. Students are advised to review the curriculum plan specific to their route.

The field practicum courses are Social Work 410 and 412. All continuing students planning to enrol in the field practicum courses must register in the appropriate course(s). Students will be assigned placements in the field practicums based on availability and student interest and choices made by agencies. Information on field placement arrangements, including international placements, is available from the Director of Field Education.

Students are expected to be in practicum for a specific number of hours per week for the duration of their scheduled term. The practicum represents a significant time commitment. Students must ensure that they are aware of field requirements, and available for field placements as scheduled, in order to complete their practica within the appropriate terms.
Faculty of Social Work

Notes:
- Students must maintain concurrent registration in practica and related integrative seminars (that is, the practicum Social Work 410 must be taken at the same time as the integrative seminar Social Work 411 and the practicum Social Work 412 must be taken at the same time as the integrative seminar Social Work 413).
- Students registered in the field practicum courses, Social Work 410 and 412, are required to attend the practicum during Reading Days in the Fall Term but not during Reading Week in the Winter Term. Students should also note that Social Work practicum courses will normally run one week past the last day of lectures in Fall and Winter Terms.

Police Information Check
Students are advised that many agencies that offer social work practicum placements require a current Police Information Check (PIC) prior to acceptance into a placement. The placement agency has the discretion to refuse a placement based on a Police Information Check. Registration with the Alberta College of Social Workers (ACSW) also requires a Police Information Check. Students who are concerned about the presence of a criminal record should contact the police department to discuss the process for eliminating or erasing such a record. Students are obligated to inform the Faculty immediately of any change in status of their criminal record. Alberta Health Services (AHS) requires the Faculty of Social Work to document a PIC for all students placed in AHS practice.

Immunization Requirements
Many practicum settings require students to be immunized prior to a practicum placement, e.g., Alberta Health Services see www.albertahealthservices.ca/assets/info/hp/cdc/if-hp-cdc-ipsm-std-imm-post-sec-stud-08-302.pdf. Students must meet immunization requirements prior to the start of all practicum courses if required by their practicum agency.

Student Advising
The Faculty of Social Work Student Services Offices in Calgary, Edmonton and Lethbridge advise students on academic matters and University regulations. Students can drop-in or book an appointment with Student Services staff through the online booking system.

3.4 Student Standing
Promotion and Graduation Requirements
1. Academic performance and professional suitability (see Professional Conduct) will be monitored throughout the program and assessed at the end of each Winter Term.
2. Once admitted to the BSW program, students are allowed a maximum of 6 units (1.0 full-course equivalent) of "D" or "D+" grades within their program.
3. A student who fails or withdraws from a field practicum course (Social Work 410 or 412) will fail or be required to withdraw from the corequisite courses (Social Work 411 and 413). In addition, the student may be required to withdraw from the program. Normally, students may register in practicum courses a maximum of two times.
4. A cumulative grade point average of 2.30 or above is required on all courses taken towards the BSW degree. Normally, a student who has obtained a cumulative GPA of at least 2.00 but less than 2.30 will be placed on academic probation. Students whose cumulative GPA falls below 2.00 will be required to withdraw.
5. Students who are required to withdraw from the Faculty of Social Work will normally be readmitted.
6. A maximum of 6 units (1.0 full-course equivalent) of Social Work courses will be allowed for transfer credit.

To be awarded the Bachelor of Social Work degree from the University of Calgary, students must meet all program requirements as described under 4, Program Details. All students must complete a minimum of 30 units (5.0 full-course equivalents) at the University of Calgary to obtain a degree from this institution. In the case of a student repeating a required course, the GPA for graduation purposes (not degrees with distinction) shall include only the higher grade.

Minor Field Programs
Students may formally declare a Minor Field and have this officially recorded on their transcript of record provided they satisfy the requirements for the relevant Minor Field program. This declaration must be made no later than the time of their last registration. Minor Fields may be taken from Continuing Education and the Faculties of Arts, Education, Medicine, Science, and the Haskayne School of Business. Students must satisfy the Minor Field requirements of the relevant Faculty.

Graduation "With Distinction"
The notation "With Distinction" will be inscribed on the permanent record and graduation parchment of all BSW students whose grade point average on the last 27 units (4.5 full-course equivalents) of University of Calgary Social Work graded courses places them in the top 10 per cent of the Faculty’s graduates. A minimum GPA of 3.60 will be required.

3.5 Timeline for Program Completion
Degree requirements for all students must be completed within five consecutive 12-month periods from the date of initial registration in the Faculty of Social Work.

4. Program Details
4.1 BSW (Calgary, Edmonton, Lethbridge)
4.1.1 University Transfer Route (including After-Degree)
Students are required to complete a total of 60 units (10.0 full-course equivalents) in the following configuration:
- 51 units (8.5 full-course equivalents) of Social Work required courses, including: Social Work 355, 361, 363, 365, 371, 383, 391, 393, 395, 397, 399, 410, 411, 412, 413; and
- 9 units (1.5 full-course equivalents) of Social Work elective courses at the 500 level.

Note: All required 300-level Social Work courses must be completed prior to registering in Social Work 410 or 412.

4.1.2 Alberta Social Work Diploma Route
Students are required to complete a total of 60 units (10.0 full-course equivalents) in the following configuration:
- 24 units (4.0 full-course equivalents) of Social Work required courses, including: Social Work 355, 361, 363, 365, 371, 412, 413;
- 9 units (1.5 full-course equivalents) of Social Work courses at 500 level;
- 24 units (4.0 full-course equivalents) of non-Social Work courses;
- 3 units (0.5 full-course equivalent) of either 500 level Social Work or non-Social Work course.

Notes:
- All required 300-level Social Work courses must be completed prior to registering in Social Work 412.
- All required non-Social Work courses will normally be completed prior to registering in Social Work 412.
- If students have completed additional University of Calgary transferable courses outside those required for the diploma, it is the student’s responsibility to request the transfer of credits for those additional courses at the time of admission.

4.2 Learning Circles
Introduction
The Faculty of Social Work offers two BSW Learning Circles programs, namely the community-based Learning Circles and the Virtual Learning Circles. These programs provide an undergraduate curriculum that is culturally and geographically relevant. Course content is innovative and aligned with traditional philosophies and knowledge systems. Community collaboration and flexible delivery methods are key features of these programs.

Students in the BSW community-based Learning Circles program must be available to attend course offerings in Alberta. 

270 Faculty of Social Work
may take Social Work 410 (Practicum I) and 411 (Integrative Seminar I) in their final semester of required social work theme courses. Upon completion of Social Work 410 and 411, University Transfer students may take Social Work 412 (Practicum II) and 413 (Integrative Seminar II).

4.2.2 Learning Circles Alberta Social Work Diploma Route

Students are required to complete a total of 60 units (10.0 full-course equivalents) in the following configuration:

- 45 units (7.5 full-course equivalents) of social work required courses, including: Social Work 300, 301, 302, 303, 304, 305, 306, 307, 412, 413; and
- 15 units (2.5 full-course equivalents) of non-Social Work courses.

Notes:

- All required 300-level Social Work courses must be completed prior to registering in Social Work 412.
- All required non-Social Work courses will normally be completed prior to registering in Social Work 412.

4.3 Interprofessional Health Education

The Faculties and Departments of Education, Medicine, Nursing, Social Work, Community Rehabilitation and Disability Studies, and Psychology, along with Alberta Health Services, jointly sponsor courses in Interprofessional Health Education (IPHE). The courses provide the foundation for sound and evidence-informed interprofessional practice in the fields of health, mental health, and addictions where comorbidity is common. Interprofessional Health Education (IPHE) 501 and 503 may be taken by Social Work undergraduate students and credited either as a 500-level Social Work option or as a non-Social Work option.

5. Administration

Faculty Administrative Officers

Dean
J.D. Sieppert

Associate Deans,
R. Enns, Central and Northern Alberta Region
C. Walsh, Research and Partnerships
S.M. Kwok, Southern Alberta Region
E. Perrault, Teaching and Learning

Directors
S. St. George, Graduate Programs
H. Ngo, Undergraduate Programs
Faculty of Veterinary Medicine

1. Summary of Degree Programs

Degrees Offered

Undergraduate
Professional
DVM
Graduate
MSc
PhD

Doctor of Veterinary Medicine
The Faculty of Veterinary Medicine offers a four-year professional degree leading to a Doctor of Veterinary Medicine (DVM). Completion of at least two years of post-secondary instruction at a recognized university or at a college providing university-equivalency in coursework is required prior to application to the DVM program. Please refer to Admissions under the Faculty Regulations section for further details.

Graduate
Graduate work supervised by members of the Faculty of Veterinary Medicine leading to the Master of Science (MSc) and Doctor of Philosophy (PhD) degrees is offered under the administration of the Faculty of Graduate Studies. Graduate degrees are linked to research conducted in basic biomedical, clinical, population and public health or related disciplines. The Veterinary Medical Sciences graduate program is designed specifically for animal health related research. Details of specific programs appear in the Faculty of Graduate Studies Calendar and on the Faculty website. Post-DVM clinical training positions are also available.

Introduction
The University of Calgary Faculty of Veterinary Medicine (UCVM) offers an accredited program leading to a Doctor of Veterinary Medicine (DVM) degree and eligibility for licensure in North America. UCVM also offers graduate education and advanced clinical training programs. The DVM program is offered and administered by the Faculty of Veterinary Medicine. Graduate studies under the supervision of UCVM faculty members are administered through the Faculty of Graduate Studies.

The Mission of the Faculty is to meet the veterinary, animal, and public health needs of Alberta through:

- Excellence in delivery of a comprehensive undergraduate veterinary medical education, emphasizing production animal health, ecosystem and public health, equine health and investigative medicine;
- Excellence in clinical, diagnostic and professional teaching and service, in collaboration with our partners in the Distributed Veterinary Learning Community;
- Excellence in the creation and distribution of new knowledge through research, graduate veterinary education, and continuing education in animal health, disease, and welfare, and its relation to human health.

Our education, research and service activities will contribute to the promotion and protection of animal and human health and welfare in Alberta, Canada and internationally.

Pattern
The DVM program is accredited by the AVMA-CVMA (American and Canadian Veterinary Medical Associations) Council on Education and is based on an integrated core-elective model. The core program provides a comprehensive general veterinary education covering all the major domestic species, including food producing animals, equine and companion animals, and the major exotic animal species. The core program also includes public and ecosystem health, wildlife and conservation medicine, professional and communication skills, research skills and comparative medicine. The core program prepares students for general veterinary practice, with an emphasis on skills for successful practice in rural communities and provides a foundation to pursue all careers in veterinary medicine. The elective programs cover all areas of general veterinary practice and provide enhanced opportunities in four Areas of Emphasis:

- **Production animal health:** population and individual animal health of all food and other production animal species; educating veterinarians to meet the needs of the livestock industry and rural Alberta.
- **Ecosystem and public health:** animal and public health at the interface of domestic animals, wildlife, humans and the environment; educating veterinarians to meet the needs of society through public and private practice in areas related to public health, food safety, environmental and agricultural interfaces, wildlife/conservation/zoo medicine and health.
- **Equine health:** population and individual care of horses; educating veterinarians to meet the needs of the horse industry, horse owners, and rural Alberta.
- **Investigative Medicine:** comparative medicine and biomedical research; encouraging students to pursue careers advancing animal and human health through research (basic, clinical, applied, or population health). The DVM program is delivered over four calendar years and includes nine semesters of instruction. The first three years are two semesters in length and follow the University academic calendar. They include on-campus and off-campus learning experiences. A number of extracurricular learning activities are also available. The fourth (practicum) year is the equivalent of three semesters - 40 weeks of practicum rotation experiences, plus two additional weeks for assessment, delivered over a full calendar year. Through our Distributed Veterinary Learning Community (DVLC) students will gain valuable hands-on clinical, diagnostic and professional experience in the fourth year of the
program. The DVLC is comprised of private and public practices, non-government organizations, federal and provincial agencies and other animal industry partners who work with UCVM faculty to provide an exciting collaborative environment and outstanding learning opportunities for our DVM students. The DVM curriculum provides a balance of opportunities for students to learn comparative medicine and discipline-based knowledge, to acquire and practice clinical and professional skills, and to develop diagnostic reasoning during the first three years. Early exposure to clinical material at the individual animal and population levels is provided in the Clinical Presentations courses, which integrate basic, preclinical, clinical and population health material.

Clinical skills courses offered in each semester of the first three years enable students to have early and frequent contact with animals. In the first year, students learn and practice clinical skills necessary for the practicum year. Professional Skills courses in each of the first three years cover clinical communications, ethics, jurisprudence, business operations, informatics, and research.

Delivery of final year practicum rotations through the DVLC provides a wealth of clinical and professional experiences, preparing students for the broad range of career opportunities available within the veterinary profession. The Distributed Veterinary Teaching Hospital gives students access to a large case load that includes a significant proportion of primary care cases, in addition to more complex cases. Scheduling of the final year over 12 months provides opportunities to capture seasonality in clinical experiences.

In the fourth year, practicum rotations are organized into four different courses. All students must take a course in Laboratory Diagnostics (four weeks) and a course in General Veterinary Practice, involving clinical rotations covering the major domestic species and rural community practice (16 weeks). Students also choose one of four Areas of Emphasis (10 weeks) in the following areas: production animal health, equine health, ecosystem and public health, and investigative medicine. Students also follow a course of Clinical Enrichment rotation electives (10 weeks) which cover all major species and areas of veterinary medicine, including small animal, food animal, wildlife and zoo medicine, public practice, international, ecosystem health, and many other electives.

Opportunities

Graduates of the DVM program are eligible for licensure to practice in Canada, but the DVM degree does not itself confer the right to practice. The Alberta Veterinary Medical Association (ABVMA) is the professional organization governing the practice of veterinary medicine in Alberta under the authority of the Veterinary Profession Act. Students interested in exploring matters relative to license to practice in Alberta should refer to the ABVMA website (abvma.ca/). For information relative to license to practice in the other provinces in Canada, students should contact the appropriate provincial veterinary association.

Student Services

The Office of Student Experience in the Faculty of Veterinary Medicine serves as the first point of contact for students requiring assistance with any aspect of student life.

Resources

The Faculty of Veterinary Medicine is located on the Foothills Campus and at the Spy Hill Campus, including the Clinical Skills Building, the Veterinary Sciences Research Station, and the Wildlife Research Station. The Foothills campus is located approximately one kilometre south of the main campus of the University of Calgary and functions as home-base for the Faculty, containing faculty and administrative offices, educational space, the Health Sciences Library, a student bookstore, food services, and many of the professional support services. The Dean's Office is located on the second floor of the Teaching, Research, and Wellness (TRW) building.

The Spy Hill campus is approximately 17 kilometres north-west of the Foothills campus. The Clinical Skills Building (CSB) is the site of clinical and professional skills education during the first three years of the DVM program. The CSB has educational facilities for anatomy, animal handling, medical exercises, surgical exercises, diagnostic imaging, diagnostic support, and pathology instruction. There are outside holding pens for cattle and horses, and kennel facilities for dogs and cats. The CSB also has classrooms, small group teaching rooms, laboratory facilities, and all the necessary support areas. Primary student support services are provided at the Foothills Campus and main campus; however, additional administrative and student support space (e.g. kitchen, lounge area, learning commons) are available at the CSB to support students and activities while they are at that location. The Wildlife Research Station and the Veterinary Sciences Research Station are also located at the Spy Hill campus and support the educational and research activities of the Faculty.

The first three years of the DVM program are delivered predominantly at the Foothills and Spy Hill Campuses, with students spending approximately 50 per cent of their time at each site. Students are responsible for their own travel between sites, with classes scheduled to allow full day activities at each site. During the final year of the DVM program, students complete their practicum rotations on and off campus. Many practicum rotations occur in private veterinary practices and other institutional settings that together constitute the Faculty of Veterinary Medicine's Distributed Veterinary Learning Community. Many of the off-campus sites are located within a 90 minute drive of Calgary, while others are distributed across Alberta and beyond, including international sites. As part of the DVM program, students must participate in learning opportunities at partner sites and may be required to live in close proximity to the site to facilitate on-call responsibilities. If on-call support is provided, students are responsible for their travel arrangements to partner locations and for their own accommodation arrangements.

3. Faculty Regulations

3.1 Admissions

The Faculty of Veterinary Medicine generally accepts 30-32 students per year. Students must be Alberta residents, as defined by the Province of Alberta. The Admissions Committee recommends students for admission to the program on the basis of academic and non-academic factors. Students are assessed academically on performance in their last four full undergraduate terms and in the required courses (see Minimum Academic Requirements below). Selected applicants are invited for an interview where non-academic factors are assessed. At interview days, applicants are required to complete an on-site essay and participate in a series of interviews and other activities. The interview day will normally take place on a weekend in March at the Foothills campus. Applicants must attend interview day at their own expense. Three references are required. References must include an instructor at a post-secondary institution, a supervisor from a work/volunteer setting and a personal reference who is a non-relative.

Consistent with UCVM's mandate, preference will be given to applicants who demonstrate the attributes for successful careers in veterinary practice that support rural development and sustainability, and for careers related to our areas of emphasis. While no specific animal or veterinary-related experience is required, such experience is an asset. Understanding of the veterinary profession and animal industries relevant to the applicant's career interests is expected. This can be obtained through practical experience or through other means.

The application deadline will normally be in November for admission in the next fall term, with interviews in March in Calgary. The exact dates will be published each fall on our website and included in the application manual. Applicants will typically be notified of the Admissions Committee's decision no later than mid-June in the year of admission.

Applicants to the University of Calgary Faculty of Veterinary Medicine should ensure they have read the application manual which can be found on the Faculty website: vet.ucalgary.ca/dvmapplication. The application manual details the latest requirements, processes and timelines for admissions.

Eligibility

To be eligible to apply, you must be an Alberta resident. The Alberta Government Guidelines within the Student Financial Assistance Regulations will be used to determine residency status. Details of the residency requirements can be found on the Alberta Government website at: studentaid.alberta.ca/ before-you-apply/eligibility/.
Faculty of Veterinary Medicine

**English Language Proficiency**

English language proficiency must be demonstrated for all applicants for whom English is not their first language. English language proficiency can be demonstrated in one of the following ways:

(a) Completion of at least two full years within a degree program offered by an accredited university in a country which the University of Calgary recognizes as English language proficient.

(b) A minimum score of 92 on the Internet-based TOEFL (Test of English as a Foreign Language) and a minimum score of 50 on the Test of Spoken English (TSE); or a minimum score of 237 on the computer-based TOEFL and a minimum score of 50 on the TSE; or a minimum score of 580 on the paper-based TOEFL and a minimum score of 50 on the TSE.

**Applications**

Online application forms and the current-year application manual for the Faculty of Veterinary Medicine are available on the Faculty website vet.ucalgary.ca/dvmapplication. Applicants to the University of Calgary Faculty of Veterinary Medicine should ensure they have read the application manual and are familiar with the latest requirements and processes regarding the admissions process. Application deadlines are strictly followed.

Applications will be considered from those applicants who meet the stated residency, English and Minimum Academic Requirements. Application packages are to be submitted by the established deadlines along with the application fee. A current set of official transcripts must be submitted directly to the UCVM Admissions office. Applicants should delay submission of the first transcript until final marks from their Fall Term are available; the final submission deadline for Fall transcripts will be established each year but will normally be in the last week of January. Applicants are also required to provide official transcripts for the Winter Term as soon as they are available; the final submission deadline for Winter transcripts will be established each year but will normally be in the last week of May. Please consult the current year application manual for details.

Transcripts should be sent directly to the UCVM Admissions Office:

UCVM Admissions

TRW 2D03, 3280 Hospital Drive NW

Calgary, AB T2N 4N2

Offers of Admission will be sent by email, typically during the first two weeks of June. You will have five working days to reply either by email (vet.admissions@ucalgary.ca) or telephone (403.220.8699) to this offer. You will have five working days from the date of your email or telephone call to submit (hand delivery, regular mail or courier) the signed acceptance page. You must also submit a deposit of $500.00 electronically to your Student Centre. Such deposits will be applied to the first year's fees. Failure to do so may result in the position being assigned to another applicant. An applicant who accepts a position but later rescinds the acceptance will forfeit the entire $500.00 deposit.

Official acceptance letters will be mailed upon receipt of the signed acceptance page and deposit. Letters to waitlisted students and students not offered admission will be sent in the second week of June. If and when additional spaces become available, waitlisted students will be notified immediately. Please note that placements may be available well into the summer.

### 3.2 Registration

Successful applicants are required to have or receive immunization for tetanus and rabies following admission.

**Accuracy of Registration**

The Faculty of Veterinary Medicine will directly register successful applicants and ongoing students into all required yearly courses. Payment of fees is the student's responsibility through the Online Student Centre via MyUofC web portal. For more information refer to B.15 Payment of Fees or Notification of Financial Assistance in the Academic Regulations section of this Calendar.
Faculty of Veterinary Medicine

Deferrals

Students wishing to apply for deferral should make this request in a letter to the Dean, care of the UCVM Admissions Office within 15 days of the date at the top of their acceptance letter. Requests for deferred admission will only be considered from applicants who have accepted the offer of admission and paid the $500.00 acceptance fee. The applicant must clearly explain the reason for the deferral request. Deferrals will be considered for academic and/or non-academic reasons, including completion of degrees. Deferral requests for attending other veterinary schools will not be accepted. It is at the sole discretion of the Dean to grant or deny a deferral. Deferrals will normally be for one year only.

 Interruption of Program Leading to a Degree

Students who voluntarily withdraw from the DVM program and who wish to return must re-apply to the program through the Admissions Office if they withdrew from first year, or for advanced standing through the Associate Dean (Academic) if they withdrew from second-fourth year. Students contemplating a withdrawal from the program are cautioned that there is an enrolment limitation for the program and that re-entry will be conditional on the availability of space and on academic performance.

3.3 Course Work

Students in the DVM program must take the full complement of required courses in each year of the four year program. There is no provision for students entering the program to take courses on a part-time basis and course credits or exemptions will not normally be provided. Under certain circumstances, incumbent students registered in the program may be permitted to repeat specific courses (and not the entire year), and therefore may enrol in a subset of the program while they repeat those courses.

Policies Relative to Practicum Experiences

Students will be required to complete practicum experiences at sites outside of the city of Calgary in locations throughout the province and further afield. Schedules for student’s practicum experiences will also include evenings, nights, and weekends.

Students must demonstrate satisfactory practicum performance as outlined in the objectives of the course. Participation in all activities that are related to practicum courses is mandatory.

A student may be prohibited from attending or completing a practicum experience if there is evidence that the student has acted in a manner that is detrimental to participant safety, patient care or client relations. A student who wishes to appeal such a decision will follow the appeals process as outlined under 3.6 Appeals Process.

3.4 Student Standing

For continuation of study in the DVM program in the Faculty of Veterinary Medicine, a student must satisfy the conditions as presented below.

The regular University grading system will normally apply to all courses in the DVM program. To calculate the grade point average (GPA) for the year under review, grades will be weighted on the basis of course credits. Courses that are given a grade of CR/F will not be included in the calculation of the GPA.

General Requirements

1. To be promoted to the next year of the DVM program, a student must achieve a satisfactory academic standing and clear any failed or incomplete courses.

2. At the discretion of the Associate Dean (Academic), supplemental privileges may be granted to a student who has received a "D+", "D", or "F" grade in a course. The student must write an application to write the supplemental examination to the Associate Dean (Academic) within seven days of the notification of the final grade for the semester in which the "D+", "D", or "F" grade was received.

3. Any student granted a supplemental privilege must meet with the Associate Dean, (Academic) who will inform the student of resources available that might help the student with his or her academic difficulties.

4. A student will be deemed to have failed a course if they attain an "F" grade in the course and they are not eligible for a supplemental privilege, or if they attain an "F" grade in the course and they subsequently fail to attain a grade of "C-" on a supplemental exam.

5. Successful completion of a supplemental exam (a "C-" or above) will not result in a grade higher than "C-" being awarded for the course. If a student who originally received a "D+" or "D" on a course receives a grade lower than a "D", the previously achieved "D" will stand.

6. A student may be granted supplemental privileges only once for a course. Any student who fails a course once, then attains an "F" grade after repeating the same course, will be required to withdraw from the DVM program.

7. No more than two supplemental privileges may be granted to a student in one year of the program, and no more than four supplemental privileges will be granted to a student over the whole program. Any student who attains an "F" grade in a fifth course over the program will be required to withdraw from the DVM program.

8. Upon review of the academic performance of a student who fails one course they may be required to repeat the course, repeat all courses in the year, depending upon the nature and size of the course failed, or withdraw from the program. Upon review of the academic performance of a student who fails two courses, they will be required to repeat the year or withdraw from the program.

9. Students must normally repeat a failed course, or year, in the academic year immediately following that in which the failure occurred.

10. Normally, students may carry a maximum of one course with a grade of "D" or "D+" in their program. Students who receive a grade of "D" or "D+" in a second course must raise the mark to "C-" through a supplemental exam before being considered for promotion to the next year of the program.

11. Students required to withdraw from the DVM program will not normally be considered for re-admission.

12. Normally, students must complete the requirements of the DVM Program within 6 years of first enrolment. Failure to complete the program within this time will normally result in the student being required to permanently withdraw from the program.

Students Previously in Satisfactory Standing

1. With a GPA of 2.00 or higher, and a pass in all courses for the year under review will retain the standing of satisfactory academic performance.

2. With unsatisfactory academic performance, will be placed on probationary status.

3. With a GPA of less than 1.70 in any year under review will be required to withdraw from the DVM program.

Students on Probation

1. Upon completion of first or second year will have their probation cleared if they attain a GPA of at least 2.00 and pass all courses by the end of second or third year respectively.

2. Upon completion of the third year of the program will not be permitted to proceed to fourth year until they have cleared probation. The Associate Dean, Academic will establish appropriate remediation requirements that must be fulfilled in order for the students to clear probation and obtain the standing of satisfactory performance. These remediation requirements may include repeating a component of a course, one or more entire courses, or an entire year.

3. Will be required to withdraw from the DVM program if their GPA at the end of the following year is less than 2.00. This is consistent with University regulations, which state that students will be required to withdraw rather than be placed on probation for a second time.

3.5 Graduation Requirements

Students must have successfully completed all required components of the program. Students will not be allowed to graduate while on probation or with any failed fourth year courses. The Associate Dean (Academic) will establish appropriate remediation requirements that must be fulfilled in order for students to clear probation and obtain the standing of satisfactory performance. These remediation requirements may include repeating one or more practicum rotations,
one or more entire courses, or the entire fourth year.

**Degrees "With Distinction"**
The notation "With Distinction" will be inscribed on the permanent record and graduation parchment of all DVM students with no failures whose grade point average is 3.60 or better across all courses taken during the DVM program.

**3.6 Appeals Process**
Students may appeal any decision. Students should be familiar with I. Reappraisal of Grades and J. Non-Disciplinary Academic Appeals in the Academic Regulations section of this Calendar. Appeals at the Faculty level must be submitted in writing to the Associate Dean (Academic) within 15 calendar days of the event or ruling giving rise to the appeal. Any appeal must specify (a) exactly what is being appealed, (b) the grounds for the appeal, and (c) the remedy sought.

**3.7 Fees and Expenses**
Please refer to the Tuition and General Fees section within the Calendar for details on DVM tuition and general fees. In addition to tuition and general fees, DVM students may be assessed a safety equipment fee.

**4. Program Details**

**4.1 Doctor of Veterinary Medicine**

**Introduction**
The Faculty of Veterinary Medicine of the University of Calgary offers a four-year professional degree leading to a Doctor of Veterinary Medicine (DVM). The first three years of the program follow the regular academic year, while the fourth year is scheduled for 40 weeks, with two additional weeks for assessment, across the entire calendar year (May-April).

The DVM program is accredited by the AVMA-CVMA Council on Education and is based on an integrated core-elective model. The core program provides a comprehensive general veterinary education covering all major domestic species, including food producing animals, equine and companion animals, and the major exotic animal species. The core program also includes public and ecosystem health, wildlife and conservation medicine, professional and communication skills, research skills and comparative medicine. The core program prepares students for general veterinary practice, with an emphasis on skills for successful practice in rural communities and provides a foundation to pursue all careers in veterinary medicine. The elective programs cover all areas of general veterinary practice and provide enhanced opportunities in four Areas of Emphasis: production animal health, ecosystem and public health, investigative medicine, and equine health.

**Admissions**
Applicants to the DVM program should refer to the Admissions requirements under 3. Faculty Regulations section. Please consult our website for additional details: vet.ucalgary.ca.

**Course Requirements**
All courses in the first three years are required, but students have a choice of elective content within some courses. In fourth year, all students are required to take Veterinary Medicine 570 (Laboratory Diagnostics), Veterinary Medicine 580 (General Veterinary Practice) and Veterinary Medicine 590 (Clinical Enrichment).

In fourth year, each student must also choose one of the following elective courses:
- **Veterinary Medicine 582: Production Animal Health**
- **Veterinary Medicine 583: Ecosystem and Public Health**
- **Veterinary Medicine 584: Equine Health**
- **Veterinary Medicine 585: Investigative Medicine**

**Regulations**
See 3. Faculty Regulations.

### 1. Summary of Degree Programs

The Werklund School of Education offers five Bachelor of Education (BEd) undergraduate degree pathways:

- **Four-Year BEd**
  - Fall-start on-campus pathway
  - Summer-start Community-Based blended delivery pathway

- **Five-Year Concurrent BEd**

- **Two-Year After-Degree BEd** for holders of approved degrees
  - Fall-start on-campus pathway
  - Summer-start Community-Based blended delivery pathway

All students in the Five-Year Concurrent BEd and Two-Year-After Degree BEd pathways must choose a route - Elementary route (kindergarten through grade 6) or Secondary route (grades 7 through 12) and a Teachable Subject Area. Students in the Five-Year Community-Based BEd pathway will be in a K-12 route and apply for ONLY a Teachable Subject Area, not a route. Students in the Four-Year BEd (On-Campus) pathway may declare a Route, depending upon desired Teachable Subject Area. Some Areas offer a K-12 focus. Students should refer to ‘Degrees Offered’, below.

Please note: Bachelor of Education degree pathways are offered on a full-time basis only. Part-time studies are not permitted without the express permission of the Associate Dean, and only under very exceptional circumstances.

#### Graduate Programs in Education

Information on graduate work leading to Master of Education (MEd), Master of Counselling (MC), Master of Arts (MA), Master of Science (MSc), Doctor of Philosophy (PhD) and Doctor of Education (EdD) degrees appear in the Graduate Studies Calendar.
Werklund School of Education

For more information and advice regarding Graduate Programs offered by the Werklund School of Education please contact the Graduate Programs in Education (GPE) Office.
Location: Education Tower 114
Telephone: 403.220.5675
Fax: 403.282.3005
Email address: gpe@ucalgary.ca
Website: werklund.ucalgary.ca/gpe/

2. Faculty Regulations
Students in the Werklund School of Education are governed by the academic regulations contained within the individual program sections and also the Admissions and Academic Regulations sections of the Calendar. Students are advised to read and consider all regulations and if there are any questions, they should consult the student advisors in the relevant faculties.

2.1 Advising and Program Information

Undergraduate Programs in Education Office
Undergraduate Programs in Education (UPE) is the home of undergraduate programs in the Werklund School of Education. In addition to housing the Associate Dean, the Directors of Student Experience and Directors of Field Experience, UPE connects students with any academic assistance they require. Services include:
- Program advising for prospective and current students
- Field Experience advising
- Career advising
- Graduation checks and confirmation
- Changes of Program
- Leaves of Absence requests
- Letters of Permission for study at other institutions
- Academic Requirements
- Diverse Qualifications applications and admissions
- New student registration

Location: Education Tower 230
Phone: 403.220.5639
Email: upe@ucalgary.ca
Website: werklund.ucalgary.ca/ipe

Other Advising Offices
Students in the BEd Concurrent program must also consult with an advisor from their co-operating faculty. Undergraduate Advising Offices are found in Arts, Science and Kinesiology.

Arts Students’ Centre
Location: Social Sciences 102
Phone: 403.220.3580
Email: artsads@ucalgary.ca
Website: arts.ucalgary.ca/undergraduate

Undergraduate Science Centre
Location: Energy Environment & Experiential Learning (EEEL) 445
Phone: 403.220.8600
Email: usc@ucalgary.ca
Website: ucalgary.ca/science/undergraduate/usc

Faculty of Kinesiology Advising Office
Location: Kinesiology B 142
Phone: 403.220.7018 or 403.220.3407
Email: knesinfo@ucalgary.ca
Website: ucalgary.ca/knes/undergraduate

2.2 Objectives
The teaching profession requires that teachers have a solid background in one or more academic disciplines and a demonstrable mastery of the knowledge and skills associated with effective teaching. Programs in the Werklund School of Education recognize these demands and promote inquiry and life-long professional growth, as well as university-school and community collaboration that will integrate theory with practice.

Program graduates are eligible to apply for Alberta provincial teaching certification from kindergarten to grade 12.

2.3 Career Opportunities
Eligibility to Teach in Alberta
Alberta provincial teaching certification is a two-stage process and it requires separate evaluations by separate governing bodies.
- Alberta Education issues teaching certificates.
- The Alberta Teachers’ Association (ATA), through the Teacher Qualifications Service (TQS), determines salary.
Both evaluations are required to be eligible to teach in Alberta public schools.

Certification
To be eligible to teach in Alberta, a valid teaching certificate issued by the Province of Alberta is required. After the successful completion of the BEd program, a student may be recommended for an Alberta Interim Professional Certificate by the Werklund School of Education. Typically all of the required units needed for certification are included within the courses taken as a part of the BEd program.

Note: In order to meet certification requirements students who are in the Two-Year After-Degree BEd program are required to present 3 units in English Literature or French Literature in addition to the courses taken as a part of the BEd. Typically, these are taken as a part of the student’s first degree, or they can be taken following the completion of the first degree as long as they are completed prior to admission to the BEd program.

2.4 Police Information Check
All applicants to the Werklund School of Education are required to provide a current Police Information Check which includes a Criminal Record Check and a Vulnerable Sector Search. Students who are not residents of Calgary must arrange for a Police Information Check through their nearest police service or RCMP detachment in the area where they reside. In order to be considered “current”, the Police Information Check must be completed and dated after July 1st in the year of admission and every 12 months.

Certification Enquiries
All enquiries concerning certification should be directed to the Alberta Education website.

Teacher Qualifications for Salary Purposes
Evaluations for salary purposes are determined by the Teacher Qualification Service (TQS). Alberta Teachers’ Association, and not by Alberta Education or the University of Calgary.

For more information, please refer to the Teacher Qualifications Service website.

Careers in Education
The majority of teacher education graduates can expect to work as kindergarten/elementary and/or secondary teachers. Indeed, the role of classroom teacher is one that permits graduates to work most closely with young people and allows for the greatest direct service to educational communities. The modern context of education demands that graduates be prepared to go beyond the traditional role of classroom teacher. To teach successfully, graduates must be prepared to work closely and effectively with students, colleagues, parents, and the community in virtually every aspect of educational decision-making. Furthermore, graduates must understand and embrace that it is imperative to extend their formal education throughout their careers. The successful completion of a BEd program is only the beginning of a teacher’s academic and professional learning.

Increasingly, Education students are finding employment in community and workplace settings. Teachers develop numerous skills that are highly valued in community, government, and business organizations.

Many graduates will choose from one or more additional careers in education, nearly all of which require successful experience as a school-based practitioner, permanent professional certification, and a master’s or doctoral degree in education:
- Curriculum developer
- Assessment designer
- Administrator
- Staff developer
- Staff officer for a teachers’ professional association
- Author of instructional resources
- College instructor
- University professor

2.4 Police Information Check
All applicants to the Werklund School of Education are required to provide a current Police Information Check which includes a Criminal Record Check and a Vulnerable Sector Search. Students who are not residents of Calgary must arrange for a Police Information Check through their nearest police service or RCMP detachment in the area where they reside. In order to be considered “current”, the Police Information Check must be completed and dated after July 1st in the year of admission and every 12 months.
thereafter. Online Police Information Checks (ePICs) will not be accepted. The original Police Information Check must be presented in person to the administration in the Undergraduate Program Office in the Werklund School of Education prior to the start of the academic year, with the exception of Community-Based and Teaching Across Borders students, who must submit a scanned copy to upfield@ucalgary.ca by the same date. All students must also present the original police information check to the partner school administration on the first day of each Field Experience (Education 440, 465, 540, 560). Students will also be required to complete and return the “Notice Regarding Requirement for Police Information Checks – Student” form signed and witnessed electronically to the upfield@ucalgary.ca no later than one week prior to the first day of classes.

Students who are concerned about the presence of a criminal record should contact the police department to discuss the process for eliminating or erasing such a record. Students who do not present a clear Police Information Check will not be placed in a Field Experience and as a result, cannot continue in the Education program. Successful completion of Field Experience is required for graduation.

A Police Information Check is required for all community or service learning placements. Failure to present a clear Police Information Check will result in the student being unable to complete their Field Experience or community placement. Students are obligated to inform the Faculty immediately of any change in status of their criminal record.

2.5 Student Affairs

Education Students’ Association

The Education Students’ Association (ESA) is a professional organization and a student local of the Alberta Teachers’ Association (ATA). Through its relationship with the Werklund School of Education, it provides an important liaison between students and the profession. It is expected that all Education students will join the society, actively promote its professional interests, and participate in its social activities.

For more information, please visit the ESA website: ucalgary.ca/esa/.

3. Werklund School of Education Regulations

3.1 Admission

New applicants should refer to A.2 in the Admissions section of this Calendar for regulations regarding University admission requirements.

Application Deadlines

Please refer to ucalgary.ca/future-students/undergraduate/apply.

Students are advised to check this website for the most up-to-date information.

Applicants who may fall under the Indigenous or Diverse Qualifications Admission applicant categories should refer to A.8.4 or A.9, respectively, for more details about those policies.

English Language Proficiency

In addition to the admission requirements of the Werklund School of Education, all applicants must demonstrate English Language Proficiency to be considered for admission to an undergraduate program. These requirements are outlined in the A.11 in the Admissions section of this Calendar, specific to Education, and include both written and spoken components.

3.1.1 Four-Year BEd Program

Students wishing to enter the Four-Year Bachelor of Education degree program (either the on-campus or the Community-Based pathways) must meet minimum admission requirements as set out in the Admissions section of this Calendar.

The on-campus pathway of this program begins in the Fall Term and has only one intake per year.

The Community-Based pathway of this program begins in the Summer Term and has only one intake per year; it is a blended delivery mode of instruction and is intended for students who live in rural and remote locations in Alberta.

Enrolment in the Werklund School of Education is limited and students will be admitted on a competitive basis. Meeting the minimum requirements does not guarantee admission to the Werklund School of Education.

Transfer to the Four-Year BEd Program

Students transferring from other faculties and institutions must meet the deadlines and competitive admission requirements in place for the program to which they are applying. For more information refer to A.2 in the Admissions section of this Calendar.

Students who have received one or more approved undergraduate degrees (BA, BSc, etc.) may apply for admission to the Two-Year BEd (After-Degree) Program. Degree holders are not eligible for admission to the Four-Year BEd Program. For more information regarding admission to a second undergraduate degree, refer to A.5.5 in Admissions.

To qualify for a degree, a transfer student must successfully complete all required Education (EDUC) courses while registered in the Werklund School of Education. Students can transfer no more than half of the courses (60 units or 10.0 full-course equivalents) into the Four-Year BEd Program.

It is required that all Four-Year students complete Education 201 at the University of Calgary prior to entering their first semester of 400-level Education courses. Students who have not completed Education 201 cannot progress to Semester 1 of the BEd program.

Students who wish to transfer to the Five-Year BEd program (either on-campus or Community-Based pathways) must have a GPA of at least 2.50. Refer to A.2 in the Admissions section of this Calendar.

3.1.2 Five-Year BEd (Concurrent) Program

High school course requirements for admission to the Five-Year BEd (Concurrent) program are found in the Faculty of Arts, Science, or Kinesiology admission sections. The Werklund School of Education does not have additional course requirements for admission. Enrolment in the Werklund School of Education is limited and students will be admitted on a competitive basis. Meeting the minimum requirements for the Faculty of Arts, Science, or Kinesiology, or the minimum requirements for the BEd, does not guarantee admission to the Werklund School of Education.

Transfer to the Five-Year BEd (Concurrent) Program

Students who wish to transfer to the Five-Year BEd (Concurrent) program should not have completed more than 60 units (10.0 full-course equivalents) in transferable courses at the post-secondary level by the end of the Winter Term and must have a GPA of at least 2.50. Refer to A.2 in the Admissions section of this Calendar.

It is required that all concurrent students complete Education 201 at the University of Calgary prior to entering the fourth year of the Five-Year BEd (Concurrent) program. Students who have not completed Education 201 cannot progress to Semester 1 of the BEd program.

The standard structure within the Five-Year Concurrent BEd program is for students to do the first three years within their co-operating faculty (Arts, Science, or Kinesiology) and the last two years within Education. Students must end the Concurrent BEd program on an Education year.

3.1.3 Two-Year BEd (After-Degree) Program

To be considered for admission, applicants must present the following requirements:

1. a degree with at least 90 units (15.0 full-course equivalents) from an accredited post-secondary institution recognized by the University of Calgary, and
2. a minimum grade point average (GPA) of 2.50.

Admission to the program is on a competitive basis by Route and Teachable Subject Area; therefore, meeting the minimum requirements does not guarantee admission.

The GPA is calculated using the grades from the most recent course work to a maximum of 30 units (5.0 full-course equivalents). University of Calgary courses (both on-campus and/or transferable courses taken at other institutions will be considered. All grades within a term will be included, except where the number of courses taken within a term exceeds 30 units (5.0 full-course equivalents), in which case the highest grades will be used.

For students currently completing a degree, Winter and Summer Term (including Spring Intersession) grades will not count toward admission GPA for the following Fall Term. However, admission is conditional subject to...
successful completion of the current degree or coursework, prior to commencement of the BEd (After-Degree) program.

For students in the Two-Year After-Degree Community-Based BEd pathway, the program begins in the Summer Term and has only one intake per year; it is a blended delivery mode of instruction and is intended for students who live in rural and remote locations in Alberta. Students must meet all of the admissions requirements of the Two-Year After-Degree BEd as per above, including GPA, but can only apply for the following teachable subject areas: Elementary-English Language Arts, Elementary-Mathematics, Elementary-Science, Elementary-Social Studies, Secondary-English Language Arts, Secondary-Mathematics, Secondary-Science, and Secondary-Social Studies.

Course Requirements for Admission to the Two-Year BEd (After-Degree) Program

Elementary Route
Applicants interested in focusing on elementary education require an academic degree from a recognized university.

The elementary route (kindergarten to grade 6) of the BEd prepares graduates to teach across the elementary grades and in a Teachable Subject Area.

To be eligible for admission, all applicants must complete 3 units (0.5 full-course equivalent) in English literature or French literature prior to entering the program.

Applicants in the Elementary-French Teachable Subject Area must be proficient in French and will be required to demonstrate their proficiency prior to admission to the program.

Secondary Route
Applicants must present an undergraduate degree with an academic major or a minimum of 30 units (5.0 full-course equivalents), of which only 12 units (2.0 full-course equivalents) can be at the first year level, in the Teachable Subject Area the applicant chooses, except for Fine Arts, French, and Second Languages, where a degree in the Teachable Subject Area is required.

To be eligible for admission, all applicants must complete 3 units (0.5 full-course equivalent) in English literature or French literature, prior to entering the program.

To be eligible for the following Teachable Subject Areas, applicants are required to meet the degree requirements listed below:

Visual Studies (Fine Arts)
Applicants must present a degree with a major in art.

Drama Education (Fine Arts)
Applicants must present a degree with a major in drama.

English Language Arts
Applicants must present a degree with a major in English. Applicants who do not have a degree with a major in English must present a minimum of 30 units (5.0 full-course equivalents) in a range of areas that may include: historical surveys of English literature; critical reading and writing; Canadian literature; popular genres of literature; children’s literature; and, world literature.

French
Applicants must present a degree taught in French in one or more of the following areas: French literature, science, mathematics, history, or the equivalent. If the degree was not taught in French, applicants must have a major in French. Applicants must be fully competent in oral and written French and demonstrate this competency through a proficiency interview prior to admission to the program.

Mathematics
Applicants must present a degree with a major in mathematics, or a degree with a minimum of 30 units (5.0 full-course equivalents) that demonstrate proficiency in at least five of the following areas: calculus, number systems, number theory, linear algebra, geometry, probability, statistics, applied mathematics, discrete mathematics, or history of mathematics.

Music (Fine Arts)
Applicants must present a degree with a major in music. Secondary music teachers need to be proficient on an instrument, have a coherent understanding of music theory and history, sophisticated conducting and aural skills in a choral/instrumental environment, plus a working knowledge of appropriate repertoire and musical concepts. Applicants should be prepared to instruct in a beginner band/choral environment.

Physical Education
Applicants must present a degree from a CCUPEKA PE accredited undergraduate program and/or graduate from a KINES/PE undergraduate program. Applicants who do not have a degree with a major in kinesiology, or a degree that is not from an accredited program, must present a minimum of 30 units (5.0 full-course equivalents), in a range of the following areas that include: anatomy, human physiology, exercise physiology, biomechanics, motor learning/control, sport or health psychology, growth and development, health education, physical education for special populations, and activity-based courses. Students should have prior experience and be prepared to instruct activity-based courses in a Physical Education environment.

Second Languages
Applicants must present a degree taught in a second language. If the degree was not taught in a second language, applicants must have a major in a second language. The major must include a minimum of 30 units (5.0 full-course equivalents), in one or more of the following areas: literature, history, or the equivalent. Please note that Education courses in the Second Languages teachable subject area will be taught in English. Field Experience placements cannot be guaranteed in the particular second language.

Biology (Science)
Applicants must present a degree with a major in biology. Applicants who do not have a degree with a major in biology must present a minimum of 30 units (5.0 full-course equivalents) that demonstrate proficiency in five of the following areas: biochemistry, botany, cellular microbiology, molecular microbiology, ecology, evolutionary theory, genetics, human anatomy, physiology, and zoology. Other areas of knowledge which are important for secondary biology teachers include biological conservation, genetic engineering, and immunology.

Chemistry (Science)
Applicants must present a degree with a major in chemistry. Applicants who do not have a degree with a major in chemistry must present a minimum of 30 units (5.0 full-course equivalents) in five of the following areas: inorganic, organic, physical, analytical chemistry, biochemistry, quantum mechanics, and thermodynamics. Other areas of knowledge which are important for secondary chemistry teachers include electrochemistry, industrial chemistry, and spectroscopy.

Physics (Science)
Applicants must present a degree with a major in physics. Applicants who do not have a degree with a major in physics must present a minimum of 30 units (5.0 full-course equivalents) that demonstrate proficiency in five of the following areas: classical mechanisms, electromagnetism, modern physics, optics, quantum mechanics, statistical mechanics, relativity theory, and thermodynamics. Other areas of knowledge which are important for secondary physics teachers include acoustics, atmospheric physics, biophysics, and environmental physics.

Social Studies
Applicants must have completed a minimum of 30 units (5.0 full-course equivalents) across the following three areas with at least 3 units (0.5 full-course equivalent) per area:

1. History
Applicants must present course work in Canadian history, European history, or world history. Courses with a major focus on history, although not designated as history courses, may be considered as suitable background. In these cases, a course outline must be submitted for review.

2. Geography
Applicants must present course work in physical geography, human geography, or other courses with a focus on human interaction with physical and cultural environments.

3. Social Sciences
Applicants must present course work in the social sciences. Suitable courses may include: political science, sociology, economics, anthropology, and archaeology, cultural studies, women’s studies, native studies, religious studies, Canadian studies, globalization, indigenous studies, international relations, philosophy and psychology.
3.2 Registration and Courses

3.2.1 Accuracy of Registration
Students are responsible for the completeness and accuracy of their registration and for arranging their course selections to meet all degree and program requirements as detailed in this Calendar. Any departure from standard degree and program requirements specified in this Calendar must receive prior written authorization by the Associate Dean, Undergraduate Programs in Education or other designate of the Associate Dean.

Registration at all times should be appropriate to a student’s current degree program unless a student receives explicit permission from the Associate Dean, Undergraduate Programs in Education. Students with inappropriate course selections may require extra courses and additional time to complete their degrees.

3.2.2 Registration Planning and Consultation
Students are ultimately responsible for the accuracy of their registration, and for ensuring that they meet their degree requirements, therefore it is important for all students to check their records and registration regularly with the online program-monitoring system and meet with the relevant program advisors for guidance on any questions.

BEd courses are scheduled to fulfill all program requirements. As a result, course dates will extend beyond the Academic Schedule (e.g. reading week, Block Week, etc.). Accommodations cannot be made for any commitments that are scheduled during course instruction time or the field experience in the BEd program. Students are advised not to make other commitments during the program, and are advised to speak to student advisors for a specific course instruction.

As students approach the completion of their programs, it is strongly recommended that students meet with a student advisor for a graduation check. Otherwise, a complete program audit is not done until a student applies for graduation when the consequences of any problems can be very serious, including denial of graduation, and therefore ineligibility for teacher certification.

Students should ensure that they comply with the dates and deadlines for registration set by the University (see B. Registration in the Academic Regulations section of this Calendar) and allow sufficient time before these deadlines to plan their registration and consult with the student advisors. Due to the nature of a professional degree program, registration deadlines may be different from standard University courses; students should view information regarding individual courses through the MyUofC Student Services Centre.

3.2.3 Residency
Students in the Community-Based pathways of the Four-Year BEd and the Two-Year BEd (After-Degree) programs must attend face-to-face on-campus instruction during two intensive weeks during the Summer Term and then will continue with an online blended component for the remainder of the term. The Orientation activities that occur during this period are mandatory. Courses with a blended delivery mode have scheduled synchronous sessions throughout the term that must be attended.

Students in the on-campus pathways of the Four-Year BEd, Five-Year BEd Concurrent and Two-Year BEd (After-Degree) take courses predominantly on-campus.

3.2.4 Course Load
The BEd program is a full-time program. Only students admitted to the BEd will be permitted to register in Education (EDUC) courses, with the exception of Education 201. Students must complete all of the required courses in the term and sequence as they are prescribed. Students cannot be enrolled in any other program, either graduate or undergraduate, at the same time as the BEd, unless in an approved Concurrent program.

Additional Courses
Since the BEd program is a full-time professional program, students are not allowed to take more than 15 units (2.5 full-course equivalents) per each Fall or Winter Term, or to take courses from outside the Werklund School of Education during an Education term, without the express permission of the Associate Dean.

Courses From Other Institutions
All Education (EDUC) courses must be taken through the Werklund School of Education. Students in the Four-Year BEd program may choose to take additional coursework at another institution to use towards their required non-Education courses. Students may apply online for authorization by requesting a Letter of Permission through their online Student Centre. Students should check with undergraduate student advisors in the Werklund School of Education to ensure that the courses taken would meet requirements prior to enrolling.

Students in the Five-Year BEd (Concurrent) program should consult with their co-operating Faculty if they are interested in taking courses from another institution to be used towards their non-education degree requirements.

Students in the Two-Year BEd (After-Degree) and Two-Year BEd (After-Degree) Community-Based pathway programs may choose to take additional coursework at another institution to meet certification requirements prior to admission to the program, however, all Education (EDUC) courses must be taken through the Werklund School of Education. The GPA calculation for certification purposes are based only on Education (EDUC) courses.

After a request for a Letter of Permission is approved, a letter will be sent to the Registrar of the other university. The Letter of Permission must be obtained before the student registers for the courses at the other institution.

It will be the responsibility of the student to ensure that an official transcript of grades is forwarded directly to the Registrar of the University of Calgary in order that appropriate credit may be officially recorded.

Students with poor academic performance, including those on probation or having a large number of withdrawals, will not be allowed to take courses at another institution.

3.2.5 Withdrawal from Courses
Withdrawal from one or more courses or from all courses in an Education semester can have serious consequences. Students are referred to B.14 Withdrawal from Courses and Withdrawal from the Term in the Academic Regulations section of this Calendar.

Before withdrawing from Education courses, students are required to seek approval from the Director, Student Experience OR the Director, Student Experience (Community-Based) based on the student’s BEd program pathway, prior to the deadline date for withdrawal. Students are also encouraged to meet with a student advisor for guidance prior to requesting approval for a withdrawal. Students will not be able to continue to the next Education semester, until all courses in the previous Education semester(s) have been successfully completed.

Students may not withdraw from a Field Experience course once it has commenced (Education 440, 465, 540, 560), except with permission. A school may decide to terminate a Field Experience early if it is deemed that there is a risk to the partner school, partner teacher or to its students. Early termination of a Field Experience by the school or by the student will normally result in a failing grade for the course. In exceptional circumstances credit may be awarded or a withdrawal granted, at the discretion of the Director, Student Experience and the Director, Field Experience.

Students will be required to withdraw from the BEd program if they have withdrawn from more than 15 units (2.5 full-course equivalents) of Education (EDUC) courses, with a maximum of 30 units (5.0 full-course equivalents) in all courses taken during their current program. Students who are required to withdraw will be advised in writing.

3.2.6 Repetition of Courses
A student may repeat a course previously attempted only once. Permission from the Associate Dean is required to repeat a course more than once, and is granted only under exceptional circumstances.

Students repeating courses taken at the University of Calgary will not have the original grade, failure or otherwise, removed from the transcript of record. The transcript of record will indicate both the original grade and the repeated course with its final grade in the semester in which it was taken.

3.2.7 Field Experience Courses
Field Experience courses (Education 440, 465, 540, 560) are fundamental to the BEd program and must be successfully completed in sequence before a student
can progress to the next term. If a student is unsuccessful, receiving a failing grade (non-credit) OR a withdrawal (W), in a Field Experience course they will require permission from the Director, Field Experience to attempt the course a second time. Should the student be unsuccessful in their second attempt at the course they will be required to withdraw from the BEd program.

Field Experiences take priority over any other professional or personal commitments. The only acceptable reasons for missing Field Experience are illness, family emergency, religious observance, approved professional development or approved University activity. The number of days of absence allowed varies by Field Experience course and will be detailed in the course outline as provided by the instructor at the beginning of the course. Additional days of absence will not be allowed except with the express permission of the Director, Field Experience.

3.2.8 Deferral of Term Work
Students who are able to complete assignments or other required coursework, including exams, due to unforeseen circumstances by the dates published in the course outline should contact their instructor to request an extension, prior to the original deadline. Students will be required to provide documentation to support their request. Should a student require an extension that is beyond five days after the last day of lectures, the student must apply for a Deferral of Term Work. Deferrals are not guaranteed, will not exceed 30 days past the last day of lectures, and will be granted at the discretion of the Associate Dean, or delegate. In exceptional cases where students have been granted a deferral of term work with a deadline that extends into the following semester, they will be permitted to begin subsequent courses, but if the deferral of term work is not successfully completed by the agreed upon deadline, they will be withdrawn from those courses. Should a student not meet the agreed upon deadline on an approved Letter of Permission, the student will receive a zero on that course component.

3.2.9 Leave of Absence
Students are allowed to request a leave of absence for a period of up to one year after successful completion of one term in the BEd program. Only one leave of absence will be granted for the duration of the BEd program. Students will be notified in writing if they are approved for a Leave of Absence. Students who wish to take a leave of absence must make a formal request in writing to the Director of Student Experience. Students returning to the program after a leave of absence must notify the Werklund School of Education by March 1st if they are planning to return for the Fall Term (or Summer Term for students in a Community-Based BEd pathway) and by October 1st if they are planning to return for the Winter Term. Due to the prescribed nature of the BEd programs, students returning from a year-long Leave of Absence must register no later than the next available term in which their required courses are offered.

Students who do not return to the program after their leave of absence will be required to re-apply for admission (see section 3.3 Readmission).

Students may not interrupt their degree program in the Werklund School of Education unless they are on an approved Leave of Absence. Students who have not registered in a given academic year without an approved Leave of Absence will be removed from the program, and will be required to re-apply.

3.2.10 Duration of Study

Four-Year BEd degree program:

Students must complete the Four-Year BEd, including those in the Community-Based pathway degree program within seven years from initial admission into the BEd program.

Five-Year BEd (Concurrent) degree program:

Students must complete the Five-Year BEd (Concurrent) program within seven years from initial admission into the BEd program.

Two-Year BEd (After-Degree) degree program:

Students must complete the Two-Year BEd (After-Degree), including those in the Community-Based pathway, degree program within five years from initial admission into the BEd program.

3.3 Student Standing and Academic Review

Students in either pathways of the Four-Year BEd degree program will have their academic standing reviewed after each Fall and Winter Term. All courses taken since the previous academic review will be used and this includes courses taken at the University of Calgary as well as those taken at other institutions on an approved Letter of Permission.

In the Five-Year BEd (Concurrent) degree program will have their academic standing reviewed using completed courses in their co-degree prior to commencing the Education portion of their degree, to determine if they are eligible to progress to their Education coursework in the subsequent Fall Term. They will also have their academic standing reviewed after each Fall and Winter Term while in their Education coursework.

Students in the Five-Year BEd (Concurrent) degree program must have completed all of their co-degree requirements before the final year of the Concurrent program (the second Education year).

Students in either pathways of the Two-Year BEd (After-Degree) program will have their academic standing reviewed after each Fall and Winter Term.

All students’ academic standing will be reviewed using courses which have been completed since the previous review. A student’s academic standing may be reviewed at any time at the discretion of the Associate Dean.

Satisfactory Academic Standing

Students who have successfully completed all courses with a minimum GPA of 2.50, calculated based on all courses taken since the student’s last academic review, are in satisfactory academic standing.

Unsatisfactory Academic Standing

Students are referred to section F.3.2 Unsatisfactory Standing in the Academic Regulations section of this Calendar for more information.

Students who have achieved a GPA of less than 2.50, calculated based on all courses taken since the student’s last academic review, are considered to have an unsatisfactory academic standing in the Werklund School of Education and may be:

• Placed on academic probation, or
• Required to withdraw from the program.

Academic Probation

• A student who has achieved a GPA of at least 2.00 but less than 2.50, calculated based on all courses taken since the student’s last academic review, will be placed on academic probation until their next academic review.

• A student who has failed a course in the BEd program, will be placed on academic probation for one year.

• Students may only be on academic probation once during their BEd program.

• Students placed on academic probation will be advised in writing.

Required Withdrawals

• A student who has achieved a GPA of less than 2.00, calculated based on all courses taken since the student’s last academic review, will be required to withdraw from the BEd program.

• A student who is on academic probation and has achieved a GPA of less than 2.50, calculated based on all courses taken since the student’s last academic review, will be required to withdraw from the BEd program.

• Students will be required to withdraw from the BEd program if they have withdrawn from more than 15 units (2.5 full-course equivalents) Education (EDUC) courses in the BEd program, with a maximum of 30 units (5.0 full-course equivalents) in all courses taken during their current program.

• A student on probation who receives a second failing grade in any Education (EDUC) course, not necessarily the same course that they previously received a failing grade in, will be required to withdraw from the BEd program.

• A student can only be on academic probation once during their BEd program. If a student’s academic standing falls such that they would be on academic probation a second time during their BEd program, they will be required to withdraw from the BEd program.

• Students required to withdraw will be advised in writing.
Reinstatement to Satisfactory Academic Standing

Students on academic probation who have achieved a GPA of 2.50 or higher, calculated based on all courses taken since the student’s last academic review, will be reinstated to satisfactory academic standing.

Students who have successfully completed the course in which they received a failing grade, will be reinstated to satisfactory academic standing and may proceed to the next term, provided they have a current GPA of 2.50 or higher.

Readmission After Unsatisfactory Academic Performance

Students who have been required to withdraw from the Werklund School of Education, other Faculties at the University of Calgary or other post-secondary institutions may not apply for admission to the BEd program in the twelve month period following their required withdrawal.

Admission to the BEd program after unsatisfactory academic performance is not guaranteed. Applicants must apply by the deadlines stated in the current Calendar, meet the current admission requirements of the BEd program and obtain express permission from the Director, Student Experience or Associate Dean, Undergraduate Programs in Education before they can return to the program. In addition to the online admission application, students must write a letter to the Associate Dean requesting re-admission to the BEd program.

Students re-admitted after having been required to withdraw from the Werklund School of Education due to unsatisfactory academic performance are admitted on probation and must maintain a grade point average of at least 2.50 on all courses taken in each semester after re-admission. Failure to do so will result in permanent withdrawal from the Werklund School of Education.

Mitigating Circumstances

Students who would normally be required to withdraw on the basis of their academic performance or excessive withdrawals may instead be placed on academic probation, if they have experienced serious mitigating circumstances and can demonstrate that they have good prospects for future success.

Students who believe that they fall into this category should provide written documentation to the Associate Dean, Undergraduate Programs as soon as possible and no later than the end of the term.

Voluntary Withdrawal from Program

Students must notify Undergraduate Programs in Education in writing of their intention to withdraw. After a voluntary withdrawal from the program, students will be required to re-apply for admission.

Readmission

Students who have left the BEd program, for any reason, will need to re-apply for admission. Re-admission is not guaranteed. Applicants must apply by the deadlines stated in the current Calendar, meet the current admission requirements of the BEd program and obtain express permission from the Director, Student Experience or Associate Dean, Undergraduate Programs in Education before they can return to the program. Students seeking re-admission to the BEd program may need to retake some or all of their previously completed Education coursework, as determined by the Associate Dean, in order to meet program and certification requirements.

Newly admitted students who do not attend the term to which they were admitted must reapply for admission, and will be considered using the admission criteria in effect at the time of re-application.

3.3.1 Progression

Normally students in the BEd program (all pathways) will take their required courses in the prescribed sequence. Students should successfully complete all 400-level Education (EDUC) courses prior to proceeding to the subsequent 500-level courses.

Students in the Four-Year BEd (either the on-campus or Community-Based pathways) should have completed Education 201 before proceeding to any 400-level Education courses, and have completed all other requirements of their degree before proceeding to the 500-level Education courses, taken in the final year of the program.

Students are expected to complete the first three years of the Five-Year Concurrent BEd in their non-Education faculty. Students in the third year of the Concurrent program will normally be allowed to proceed into the fourth year, the first in Education, provided they have achieved a minimum GPA of 2.50, calculated on all courses taken since the student’s last academic review, successfully taken Education 201, and have completed all of the non-Education degree requirements of their degree.

If students would like to change the progression sequence of their degree, permission will be needed from the Director, Student Experience in Education.

3.4 Standards of Professionalism

As a professional degree, the Bachelor of Education requires that students abide by a high standard of professionalism in every aspect of their academic and non-academic behaviour. The Werklund School of Education recognizes that teacher preparation and learning occurs both inside and outside the classroom and has the responsibility to ensure that its student teachers and graduates are competent and conduct themselves in accordance with the standards and expectations of the profession. As such, lack of professionalism may be grounds for determining whether the student should continue in the program, with or without conditions, or be dismissed from the Bachelor of Education program.

The Director of Field Experience may prohibit a student from attending or completing a Field Experience if there is evidence that the student has acted in a manner that may be deemed harmful to oneself or others, or commits any other serious contravention of the Alberta Teachers’ Association (ATA) Code of Professional Conduct. Students will have the opportunity to make submissions and present evidence to address concerns about their attending a Field Experience.

Students have 15 working days from the date the Director of Field Experience prohibits them from attending or completing a Field Experience to submit an appeal to the Dean of the Werklund School of Education.

Reasons for which a student may be deemed unsuitable for the teaching profession, and the Bachelor of Education, are related to the Alberta Teachers’ Association (ATA) Code of Professional Conduct and include, but are not limited to, the following:

- Concealment or distortion of the truth on the Application for Admission to the Bachelor of Education program or the University of Calgary.
- Persistent and/or serious conduct that contravenes the University of Calgary Statement on Principles of Conduct.
- Academic misconduct, including, but not limited to, plagiarism.
- Behaviour which would jeopardize the standing or reputation of the Werklund School of Education or the University of Calgary.
- Behaviour that may be deemed harmful, whether physically or emotionally, to others, such as school children, partner teachers, partner schools, colleagues, staff, instructors, or others associated with the Werklund School of Education.
- Persistent and/or serious medical condition that affects the student’s ability to perform as a teacher if that condition negatively affects judgment and interferes with the ability to function within a professional context.
- Persistent substance abuse (e.g., alcoholism, drug addiction, use of illegal drugs) that interferes with the ability to function within a professional context.
- Criminal behaviour which would result in a change to a student’s Police Information Check and/or Vulnerable Sector Check.
- Persistent and/or serious conduct that contravenes the policies of the Field Experience setting (applies to students in Field Experience).
- Harassment, physical, verbal, or emotional in nature, of a student or colleague, regarding, but not restricted to, behaviour, values, or roles related to race, ethnicity, religion, marital status, gender, sexual orientation, age, socio-economic status, income source or amount, political affiliation, disability or diagnosis, or national origin, that would interfere with the provision of teaching.
- Persistent and/or serious inability to form professional relationships.

4. BEd Program Details

The Bachelor of Education program recognizes that teaching is one of the most important and challenging professions in
society; therefore, a teacher should be knowledgeable, thoughtful, and deeply caring about the responsibilities associated with education.

The BEd program focuses on teachers as experts of learning in Teachable Subject Areas for the elementary, secondary and K-12 routes, field experiences linked to partner research schools, and integration across program components (courses). The Bachelor of Education program will:

- Foster professional competencies that are appropriate to a complex and rapidly changing world;
- Have an applied and critical knowledge of theories of learning and learners;
- Develop the specialized knowledge associated with teaching a discipline, and in fostering an interdisciplinary approach;
- Critically evaluate and respond to the contexts of contemporary learning in relation to changing sociocultural, political, economic, environmental, and technical realities within the broader public sphere;
- Foster a critical and pragmatic knowledge of diversity in education;
- Contribute actively to knowledge in the field of education;
- Understand the legal, moral, and ethical frameworks of contemporary education;
- Respond to the diverse needs of students;
- Build research capacity as teacher professionals.

The program is delivered through plenaries, seminars, and field experiences.

### 4.1 Course Requirements Common to All Programs

The following courses are required for all Bachelor of Education students in the Werklund School of Education.

- Education 420 Issues in Learning and Teaching
- Education 427 Science, Technology, Engineering and Mathematics (STEM)
- Education 430 Pragmatics of Learning and Teaching
- Education 435 Literacy, Language and Culture
- Education 445 Individual Learning: Theories and Applications
- Education 450 Diversity in Learning
- Education 456 Assessment
- Education 460 Specialization I
- Education 520 Interdisciplinary Learning
- Education 525 Ethics and Law in Education
- Education 530 Indigenous Education
- Education 535 Specialization II
- Education 546 Design-based Thinking
- Education 551 Comprehensive School Health and Wellness
- Education 556 Professional Learning

The following Field Experience courses must be completed successfully with a grade of "CR" (Completed Requirements):

- Education 440 Field Experience I
- Education 465 Field Experience II
- Education 540 Field Experience III
- Education 560 Field Experience IV

### 4.2 Four-Year BEd Program

- 57 units (9.5 full-course equivalents) in Education courses including:
  - Education 201 (to be taken in Year 1)
  - Education 420, 427, 430, 435, 440, 445, 450, 456, 465
  - Education 520, 525, 530, 540, 546, 551, 556, 560
- 30 units (5.0 full-course equivalents) in courses in Teachable Subject Areas including:
  - Teachable Subject Area courses (24 units or 4.0 full-course equivalents)
  - Education 460, 535 (6 units or 1.0 full-course equivalent)
- 18 units (3.0 full-course equivalents) in required non-education courses
- Course in English or French Literature (3 units or 0.5 full-course equivalent)
- Course in Creative and Performing Arts (3 units or 0.5 full-course equivalent)
- Course in Psychology (3 units or 0.5 full-course equivalent)
- Course in Physical Education or Health and Wellness (3 units or 0.5 full-course equivalent)
- Course in Sciences (3 units or 0.5 full-course equivalent)
- Course in Canadian Studies (3 units or 0.5 full-course equivalent)
- 15 units (2.5 full-course equivalents) in elective courses

#### Teachable Subject Areas (On-Campus Pathway)

In addition to the required Education, non-Education, and elective courses, students are required to complete 24 units (4.0 full-course equivalents) in their teachable subject area as listed below.

Teachable Subject Areas (Community-Based Pathway)

In addition to the required Education, non-Education, and elective courses, students are required to complete 24 units (8 half-course equivalents) in their teachable subject area as listed below.

<table>
<thead>
<tr>
<th>English Language Arts (K-12) 24 units</th>

4.2.1 Bridging to Community-based Bachelor of Education

The Bridging to Community-based Bachelor of Education pathway provides students that do not meet the subject requirement for English 30-1 or do not have a competitive average for admission in to the Four-Year Bachelor of Education Community-based Program the opportunity to upgrade. Students must be non-traditional, including located in a rural or remote location to be eligible for this bridging pathway. Students must apply for the Four-Year Bachelor of Education Community-based program, and meet all other admission requirements mandated. Students solely deficient English 30-1 and/or not meeting the competitive average requirement will be eligible for the Bridging pathway. Students should refer to A.5.1.1 Admission Requirements.

The Bridging to Community-based Four-Year Bachelor of Education Route only accepts students for a July start. Students will take English Academic Success (equivalent to English 30-1; non-credit), which is conducted largely online with some on-campus term, commencing in the Summer Term. Students then take three online courses in the Fall Term, and an additional three online courses in the following Winter Term. Five of the six credit courses may be used to count toward elective courses in the four-year BEd program.
The below chart outlines the first year program progression for Bridging to Community Based Four-Year Bachelor of Education program.

Bridging to Four-Year Community-based Bachelor of Education students must complete the first year progression (below) with a minimum grade of "B-" in the English Academic Success course, along with successful completion of all 6 (Fall and Winter) courses of the Bridging Pathway to the Community-based Four-Year Bachelor of Education program with an overall minimum GPA of 2.50.

<table>
<thead>
<tr>

<td>Education 213: How Children Learn to Write (online)</td>
<td></td>
</tr>
<tr>
<td>Education 209: Supporting Children’s Reading (online)</td>
<td>Education 215: Supporting Children’s Writing (online)</td>
<td></td>
</tr>
</tbody>
</table>

Students admitted to the Bridging Pathway Community-based Bachelor of Education program must successfully complete 21 units in order to progress to the first year of the Four-Year Community-based BEd program.

If a student does not successfully complete one of the Education (EDUC) courses, they will have to re-take and successfully complete the course. As per faculty regulations, a course may be repeated only once: http://www.ucalgary.ca/pubs/calendar/current/ed-3-2-6.html. In addition, an overall minimum GPA of 2.50 must be achieved before being able to progress in the program.

### 4.3 Five-Year BEd (Concurrent) Program

The Werklund School of Education in partnership with the Faculties of Arts, Science, and Kinesiology offers a number of Five-Year BEd (Concurrent) degree programs.

The following Education courses must be completed. Consult with the partner faculty for the required non-Education courses.

- Education 201 Introduction to Educational Studies
- Education 420 Issues in Learning and Teaching
- Education 427 Science, Technology, Engineering and Mathematics (STEM)
- Education 430 Pragmatics of Learning and Teaching
- Education 435 Literacy, Language and Culture
- Education 445 Individual Learning: Theories and Applications
- Education 450 Diversity in Learning
- Education 456 Assessment
- Education 460 Specialization I
- Education 520 Interdisciplinary Learning

Education 525 Ethics and Law in Education
Education 530 Indigenous Education
Education 535 Specialization II
Education 546 Design-based Thinking
Education 551 Comprehensive School Health and Wellness
Education 556 Professional Learning

The following Field Experience courses must be completed successfully with a grade of "CR" (Completed Requirements): Education 440 Field Experience I Education 465 Field Experience II Education 540 Field Experience III Education 560 Field Experience IV

The following Non-Education course is required for teacher certification: 3 units - English or French Literature

**Note:** Community-Based pathway students must meet the same course requirements, and should refer to section 3.2.3 for Residency requirements.

### 4.4 Two-Year BEd (After-Degree) Program

The following Education courses must be completed.

- Education 420 Issues in Learning and Teaching
- Education 427 Science, Technology, Engineering and Mathematics (STEM)
- Education 430 Pragmatics of Learning and Teaching
- Education 435 Literacy, Language and Culture
- Education 445 Individual Learning: Theories and Applications
- Education 450 Diversity in Learning
- Education 456 Assessment
- Education 460 Specialization I
- Education 520 Interdisciplinary Learning
- Education 525 Ethics and Law in Education
- Education 530 Indigenous Education
- Education 535 Specialization II
- Education 546 Design-based Thinking
- Education 551 Comprehensive School Health and Wellness
- Education 556 Professional Learning

The following Field Experience courses must be completed successfully with a grade of "CR" (Completed Requirements): Education 440 Field Experience I Education 465 Field Experience II Education 540 Field Experience III Education 560 Field Experience IV

Community-Based pathway students must meet the same course requirements, and should refer to section 3.2.3 for residency requirements.

### 5. International Foundations Program IFP

The International Foundations Program (IFP) focuses on students who meet the admission requirements for their University of Calgary degree faculty, except for the requirement of English Language Proficiency. For more information, refer to section 3.2.3 for Residency requirements.
1. Summary of Programs

Credit Programs
Continuing Education offers Workplace Learning as a minor field of study towards selected undergraduate degrees offered at the University of Calgary. A Degree in Workplace Learning helps students develop the knowledge and skills they need to function effectively in a rapidly changing workplace and provides them with strategies to facilitate both their own and their colleagues’ learning. The Minor in Workplace Learning is recognized as a degree minor in several University of Calgary Faculties including Arts, Kinesiology and Science. This minor field of study is composed of 30 units (5.0 full-course equivalents) or 400 hours of specified Continuing Education certificate credit.

See 4.1 Minor in Workplace Learning for more information.

Non-Degree Credit Programs
Continuing Education offers a wide range of seminars, courses, certificate programs, and professional designations to individuals seeking opportunities for professional development and personal enrichment, as well as to organizations seeking training for employees. Major programming areas include business, management and professional designation programs, languages, liberal arts, fine arts, adult education, writing and computer and business technology.

Continuing Education provides educational opportunities for lifelong learners seeking superior quality programming and instruction. Courses and programs serve local, online, and international communities, and are aligned with the academic mandate of the University of Calgary.

Certificates/Designations
Continuing Education certificate courses have been developed with part-time learners in mind and are offered at convenient times and in formats suitable for adults. Most courses are taught in the classroom. Many are offered online or in a blended format – partly in the classroom and partly online. Some certificates can be achieved completely through online learning.

See conted.ucalgary.ca for more information.

2. Information

Contact Information
Student Information: 403.220.2866; 1.866.220.4992 (outside Calgary)
Email address: conted@ucalgary.ca
Website: conted.ucalgary.ca

Locations:
Domestic Programs - Energy Resources Research Building 3512 – 33 Street N.W.
English Language Programs – Education Tower – 11th Floor

Resources
Upgrading Courses (Academic Preparation)
Courses are offered through Continuing Education for students who require academic upgrading in Biology, Chemistry, English, Mathematics and Physics for admission to the University of Calgary. Information on admission to the University of Calgary may be found at: ucalgary.ca/future-students.

3. Admission
Because of the wide diversity of programs administered, admission requirements, registration procedures and general regulations vary. It is recommended that prospective students contact the Continuing Education office to obtain detailed information regarding their areas of interest. (See Contact Information). Registrants must be 18 years of age or older to enrol and participate in a course offered through Continuing Education unless otherwise specified. Successful completion of a Grade 12 diploma and relevant work experience are recommended. If English is not your first language, please review the English language proficiency requirements. A degree or diploma are not typically required.

4. Program Details
4.1 Minor in Workplace Learning
Introduction
Continuing Education offers a Minor in Workplace Learning, which helps students develop the knowledge and skills they need to function effectively in a rapidly changing workplace as well as provides them with strategies to facilitate both their own and their colleagues’ learning.

The Minor in Workplace Learning is recognized in several University of Calgary Faculties including Arts, Kinesiology and Science. A Minor field of study is composed of five full-course equivalents or 400 hours of specified certificate credit.

Requirements
In order to complete the requirements for a Minor in Workplace Learning, students must complete 400 hours of instruction. This requires completion of:

Business Management Certificate
(a) One of the 300-hour University of Calgary Management Certificate program (excluding Environmental Management); (b) 60 hours of instruction from an array of courses in the Certificate in Adult Learning; and (c) the “capstone” 40-hour course Learning in the Workplace;

or

Certificate in Adult Learning
(a) The 300-hour University of Calgary Certificate in Adult Learning; (b) 60 hours of instruction from the wide range of courses offered in the Management Certificate program; and (c) the “capstone” 40-hour course Learning in the Workplace.

Other Requirements
1. Students must meet undergraduate admission requirements.
2. Successful completion of the 30 units (5.0 full-course equivalents) of advanced credit (12 units (2.0 full-course equivalents) at the junior level and 18 units (3.0 full-course equivalents) at the senior level) for the Minor in Workplace Learning will be recorded with the designation “CR” instead of a grade. Calculation of a GPA will be based on the remaining courses taken to complete the degree.
3. The Minor in Workplace Learning will be recognized as transfer courses in your undergraduate program. Most University of Calgary degrees require at least half the courses to be counted toward the degree to be University of Calgary courses, not transfer courses. Please check with your undergraduate academic advisor to determine if there are any limitations on transferring the Minor in Workplace Learning with other transfer credits you have been granted.
4. Students who have completed the 400-hour requirement for the Minor in Workplace Learning may be eligible for undergraduate credit whether or not the Minor is claimed.
5. Continuing Education is responsible for deciding the suitability for advanced credit of certificate programs from other institutions.
6. Students may take regular undergraduate courses prior to completing the Minor in Workplace Learning.
Courses of Instruction

How to Use
This section contains the descriptions of courses offered at the University of Calgary. The courses are arranged in alphabetical order by course title not by abbreviation. In order to better understand the notations used throughout this section, an illustrated example of a course description is provided.

All courses listed are not necessarily offered every year and students should consult the Schedule of Classes for an official listing of those courses that will be offered in a given term.

Since this Calendar is published a considerable time before the opening of the academic year, the University reserves the right to make whatever changes circumstances may require including the cancellation of a particular course.

Note: Access to graduate level courses (numbered 600 and above) for Visiting and Exchange students is limited to those admitted to a graduate program. For Open Studies and other students, access to graduate courses is restricted to those with adequate preparation, normally an undergraduate degree or the equivalent. Permission for an Open Studies or other student to register in any graduate level course must be obtained from the Faculty of Graduate Studies office.

Sample Course Description
See numbered footnotes for explanations of the information commonly provided in a course description.

| Course Numbers: e.g. Biology 241 (BIOL 241) |
| The number of the course indicates the level of the course |
| Supplementary study for degree: courses labelled in the 100s |
| Junior level: 200s |
| Senior level: 300s and 400s |
| Upper level undergraduate: 500s |
| Graduate level: 600s and 700s |
| To understand course acronyms, refer to the section “Courses of Instruction by Faculty”. |

| 'Hours of Instruction: e.g. 3 units; H(3-3) |
| We are transitioning to the sole use of “units” of course credit from the historical convention of “full-course equivalent” or “half-course equivalent” terminology. Fees and graduation are determined using “units”. The unit weight of the course is indicated in the calendar by the first part of the course hours, e.g. “3 units; H”. |
| The hours of instruction expected per week are indicated by the numbers contained in the brackets. The first number represents the number of lecture hours per week and the second number represents the number of lab hours per week. For example, (3-0) would indicate 3 hours of lectures per week and no labs. For (3-3), there would be 3 hours of lectures per week, along with 3 hours of lab per week. A course labelled (3-2/3) means that there are 3 hours of lecture per week and 3 hours of lab every other week. |
| A course may also have tutorial and/or seminar hours assigned. These are noted as (3-0-1T or 1S). |
| The expected hours of instruction per week may vary from course to course. |

Guide to understanding course hours:

<table>
<thead>
<tr>
<th>Number of Units</th>
<th>&quot;Formerly Known as&quot; Course Equivalents</th>
<th>Expected Weeks of Instruction</th>
<th>Range of Total Hours of Expected Instruction*</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.75</td>
<td>E – Eight (0.12 Full-Course Equivalent)</td>
<td>3 weeks or less</td>
<td>Less than 13 hours</td>
</tr>
<tr>
<td>1.5</td>
<td>Q – Quarter (0.25 Full-Course Equivalent)</td>
<td>6.5 weeks</td>
<td>13 – 26 hours</td>
</tr>
<tr>
<td>3.0</td>
<td>H – Half (0.5 Full-Course Equivalent) or FCE</td>
<td>13 weeks</td>
<td>27 – 100 hours</td>
</tr>
<tr>
<td>6.0</td>
<td>F – (1.0 Full-Course Equivalent) or FCE</td>
<td>26 weeks</td>
<td>100 – 250 hours</td>
</tr>
<tr>
<td>9.0+</td>
<td>M – More than Full-Course Equivalent</td>
<td>N/A</td>
<td>Greater than 250 hours</td>
</tr>
</tbody>
</table>

*Range of total hours of expected instruction is based on current practice and approved course hours at the University of Calgary. Some courses may have approval to have units and hours outside of these ranges.
Courses of Instruction

To calculate the total hours of expected instruction given the weekly course hours provided in the calendar, one should take the total expected weeks of instruction and multiply by the number of weekly hours in the brackets. For example, Biology 241 (3-3), the total expected lecture hours are 3 (hours) x 13 (weeks) = 39 hours, and similarly 3 x 13 = 39 lab hours. A course designated 6 units; F(2-0) would be 2 (hours) x 26 (weeks) = 52 hours, which may be taught over the course of two terms or entirely in one term, provided total hours equal 52. Courses may be taught during block week, in 3 week approved sessions, 6 week approved sessions, 13 week terms, over 26 weeks or 2 terms, or for approved non-standard dates. Whatever the duration of the course, the total instructional hours should remain the same.

Courses that use blended learning teaching formats, may meet the required instructional hours using alternate methods such as online instruction. Courses indicated as independent study or independent research include an hourly designation expected of the student to full-fill their independent work and may not have scheduled instruction time. Practicum and field study courses may indicate the total hours of instruction in the brackets instead of a weekly designation used by other courses. For example, Nursing 289 has 6 units; F(247) hours listed as the course hours.

Prerequisites: Courses that must be completed or currently registered in before a student may be able to register in this course.

Note: All courses listed as a prerequisite assume a minimum grade of “C-”, unless otherwise stated. When a number of units (full-course equivalents) is listed, it is assumed this is the minimum and that all “F” grades are excluded from this count.

Corequisites: Must be completed at the same time as this class.

Antirequisites: Certain courses carry the notation “Not open to students with credit in course number XXX” or “Credit for course number XXX and course number XXX will not be allowed.” Students may take these courses if they wish, but credit for both courses will not be granted towards their degree.

Some antirequisites may include cross-listed courses such as Cellular, Molecular and Microbial Biology 561 and Medical Science 561 or Nursing 221 and Kinesiology 259. These courses are listed under two faculties and can only be taken for credit from one faculty, but not both. The credit is determined by the student’s registration in either class.

Notes: This contains any information that may be helpful regarding enrolment in the course. Some examples are: “Enrolment in this course may be limited”, “See Program Details in the Faculty of Science section of this Calendar”, or: “This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped”.

May Be Repeated for Credit

Some courses are decimalized in order to accommodate different unique topics of study e.g. 499.01, 499.02. If this notation is present, students are allowed to take multiple topics belonging to one course number.

Not Included in GPA

A course with this notation is graded as CR (Completed Requirements) or F (Fail). The course is not included in the calculation of the grade point average.

Course Descriptions

Academic Writing ACWR
Instruction offered under the direction of the Department of Communication, Media and Film.

Junior Courses

Academic Writing 201 3 units; H(3-1T)

Introductory Academic Writing I
An introduction to academic writing and to the genres of narrative, critical, and essay writing. Emphasis on developing an effective writing process, reading critically, developing arguments, and using and citing sources. Some emphasis on oral presentations may be included.

Note: Certain sections may be restricted to students in particular programs.

Academic Writing 203 3 units; H(3-1T)

Introductory Academic Writing II
An introduction to inquiry-based research writing, from formulating good research questions to conducting an information search, developing an argument, using sources effectively, and revising and editing. A focus on oral presentations may also be included.

Note: It is recommended, though not required, that students complete Academic Writing 201 before Academic Writing 203. Certain sections may be restricted to students in particular programs.
Courses of Instruction

Senior Course

Academic Writing 303 3 units; H(3-0)

Intermediate Academic Writing
An intermediate level course in the writing styles, genres and modes of evidence and reasoning appropriate to academic writing in a specific discipline or disciplines. Emphasis on connections between reading, writing, critical reasoning and, where appropriate, other discourse forms such as oral and electronic presentation.

Note: Certain sections may be restricted to students in particular programs.

Accounting ACCT

Instruction offered by members of the Haskayne School of Business.

Junior Course

Accounting 217 3 units; H(3-1T)

Introductory Financial Accounting
Introduction to accounting for business organizations. Reporting of financial results of operations and financial position to investors, managers, and others. Emphasis on the use of accounting information for decision making.

Prerequisite(s): Admission to the Haskayne School of Business, and 12 units (2.0 full-course equivalents) including Mathematics 249 or 251 or 265 or 281.

Antirequisite(s): Credit for Accounting 217 and any of Accounting 301, 317 or Business and Environment 291 will not be allowed.

Senior Courses

Accounting 301 3 units; H(3-0)

Accounting Principles
Introduction to basic accounting principles and practices. Emphasis is placed on the accounting cycle and the key financial statements necessary for business decisions. Introduces basic financial and managerial accounting concepts.

Prerequisite(s): 24 units (4.0 full-course equivalents) including Entrepreneurship and Innovation 201.

Antirequisite(s): Credit for Accounting 301 and any of 217, 317 or 323 will not be allowed.

Note: Not available for credit towards the Bachelor of Commerce degree. Preference in enrolment is given to students who have declared a Management or Society Minor. Will not act as a prerequisite for any higher level accounting course.

Accounting 323 3 units; H(3-1T)

Introductory Managerial Accounting
An introduction to the use of accounting within an organizational context. Emphasis is placed on the development and dissemination of accounting information necessary for effective management including: planning, directing, motivating, and controlling activities and behaviours.

Prerequisite(s): Admission to the Haskayne School of Business, and Accounting 217 or 317.

Antirequisite(s): Credit for Accounting 323 and 301 will not be allowed.

Accounting 341 3 units; H(3-1T)

Intermediate Financial Accounting I
Financial accounting from a producer point of view. Topics include cash, receivables, inventories, short and long-term investments, intangible assets and capital assets including the appropriate financial statement considerations.

Prerequisite(s): Admission to the Haskayne School of Business and Accounting 217 or 317, and 323.

Accounting 343 3 units; H(3-1T)

Intermediate Financial Accounting II
Financial accounting from a producer point of view. Topics include accounting for liabilities, shareholders equity, leases, future income taxes, pensions, accounting changes and earnings per share including the relevant financial statement considerations.

Prerequisite(s): Admission to the Haskayne School of Business and Accounting 341.

Accounting 361 3 units; H(3-1T)

Cost Accounting
The production of accounting data for the purpose of decision-making, control and evaluation. Topics covered are in the cost classifications and methods of cost establishment, cost data appropriate for decision models, standards and controls.

Prerequisite(s): Admission to the Haskayne School of Business and Accounting 323.

Accounting 421 3 units; H(3-1T)

Taxation
Taxation levied on profits, sales, property and estates and its impact upon management decisions. Consideration will be given to the biases and shifts implicit in any system of taxation.

Prerequisite(s): Admission to the Haskayne School of Business, and 54 units (9.0 full-course equivalents) including Accounting 217 or 317.

Accounting 423 3 units; H(3-0)

Advanced Taxation
Focuses on tax planning. Extends the material covered in the introductory tax course with an examination of specialized topics in personal and corporate income tax. Topics include detailed review of taxation of corporations, income trusts, partnerships, business reorganization, amalgamations, winding-up of businesses, sale of an incorporated business, tax consequences of leaving Canada and death of a taxpayer.

Prerequisite(s): Admission to the Haskayne School of Business and Accounting 421.

Accounting 425 3 units; H(3-0)

Auditing
A conceptual study of audit evidence, basic audit techniques, professional ethics, audit reports.

Prerequisite(s): Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents) including Accounting 421.

Accounting 443 3 units; H(3-1T)

Advanced Financial Accounting
Topics include accounting for business combinations and intercorporate investments, foreign currency transactions and translation, bankruptcy, partnerships, and not-for-profit organizations.

Prerequisite(s): Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents) including Accounting 343.

Accounting 445 3 units; H(3-0)

Accounting Theory
Examines the origins of financial accounting and current theories on the use of financial accounting information by investors, regulators, standard setters, and other corporate stakeholders.

Prerequisite(s): Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents) including Accounting 343.

Accounting 465 3 units; H(3-0)

Managerial Control Systems
Case approach to Management Control Systems explaining the use of accounting data from a managerial perspective. Emphasis is placed on how managers use planning and control to accomplish a firm’s strategies.

Prerequisite(s): Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents) including Accounting 361.

Accounting 559 3 units; H(3-0)

Selected Topics in Accounting
Investigation of selected topics in Accounting.

Prerequisite(s): Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents) including Accounting 343. For certain topics, consent of the Haskayne School of Business will also be required.

Note: For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Accounting 601 3 units; H(3-0)

Introductory Financial Accounting
Introduction to accounting for business organizations. Reporting of financial results of operations and financial position to investors, managers, and others. Emphasis on the use of accounting information for decision-making.

Accounting 603 3 units; H(3-0)

Management Accounting
Breakeven analysis, activity-based costing and management, budgeting, productivity measures, and other tools and techniques that are part of a planning and control system that will help the manager make better economic decisions.

Prerequisite(s): Accounting 601.

Accounting 641 3 units; H(3-0)

Intermediate Financial Accounting I
Provides detailed coverage of the Generally Accepted Accounting Principles (GAAP) primarily related to assets. Emphasizes the theory behind the methods, the strengths and weaknesses of such methods and the need for sound professional judgment.

Prerequisite(s): Accounting 601 and 603; or consent of the Haskayne School of Business.

Accounting 643 3 units; H(3-0)

Intermediate Financial Accounting II
Builds on Intermediate Financial Accounting I with coverage of the Generally Accepted Accounting Principles (GAAP) primarily related to liabilities and owners’ equity. Emphasizes the theory behind the methods, the strengths and weaknesses of methods and the need for sound professional judgment.

Prerequisite(s): Accounting 641.

Accounting 661 3 units; H(3-0)

Cost Accounting
Provides intermediate level discussions to the production and analysis of costs used for pricing, production and investment decisions, revenue
analysis, performance evaluation, management incentive systems and strategy analysis.

**Prerequisite(s):** Accounting 603.

**Accounting 721** 3 units; H(3-0)

**Taxation**
Discusses the core concepts, regulations, and interpretations underlying the Canadian individual and corporate income taxation. Emphasis is on who is taxable, on what income, when and how tax is calculated. Tax planning opportunities will be identified by using long-term and clientele-based techniques.

**Prerequisite(s):** Accounting 601.

**Advanced Taxation**
Focuses on tax planning. It extends the material covered in the introductory tax course with an examination of specialized topics in personal and corporate income tax.

**Prerequisite(s):** Accounting 721.

**Accounting 725** 3 units; H(3-0)

**Auditing**
Discusses the techniques and theory behind the external auditor’s provision of assurance services on financial information. Topics include: the demand for assurance, the role of auditors in providing assurance, auditor independence, audit reports, and audit liability.

**Prerequisite(s):** Accounting 641.

**Financial Statement Analysis**
Covers the theories, concepts and practices of financial statement analysis with an emphasis placed on applications.

**Prerequisite(s):** Accounting 603.

**Accounting 743** 3 units; H(3-0)

**Advanced Financial Accounting**
Focuses on advanced accounting methods related to inter-corporate investments and financial reporting. Topics include accounting for business combinations and inter-corporate investments, foreign currency transactions and translation, bankruptcy, partnerships, and not-for-profit organizations.

**Prerequisite(s):** Accounting 643.

**Accounting 745** 3 units; H(3-0)

**Accounting Theory**
Examines the conceptual framework underlying the preparation of financial accounting information, and the theories and propositions on the use of such information by investors, regulators, standard setters, and other corporate stakeholders.

**Prerequisite(s):** Accounting 643.

**Accounting 765** 3 units; H(3-0)

**Managerial Control Systems**
Emphasis is placed on how managers use planning and control to accomplish a firm’s strategies. Uses a case approach to management control systems explaining the usefulness of accounting data from a managerial perspective.

**Prerequisite(s):** Accounting 661.

**Accounting 789** 3 units; H(3S-0)

**Seminar in Accounting**
Development of and solutions to current issues and problems in accounting.

**Prerequisite(s):** Accounting 603 or consent of the Haskayne School of Business.

**MAY BE REPEATED FOR CREDIT**

**Advanced Seminar in Accounting**
Advanced accounting research topics.

**Prerequisite(s):** Consent of the Haskayne School of Business.

**MAY BE REPEATED FOR CREDIT**

**Actuarial Science ACSC**

**Actuarial Science 325** 3 units; H(3-0)

**Theory of Interest/Mathematics of Finance**
Measurement of interest, elementary annuities, general annuities, amortization schedules and sinking funds, bonds and other securities.

**Prerequisite(s):** One of Mathematics 249, 265 or 275.

**Note:** Actuarial Science 325 is strongly recommended as preparation for Actuarial Science 327.

**Actuarial Science 327** 3 units; H(3-1T)

**Life Contingencies I**
The survival function, force of mortality, life tables, analytical laws of mortality, life insurance, continuous and discrete life annuities, recursion equations. Introduction to benefit premiums and/ or insurance and annuity models with interest as a random variable as time permits.

**Prerequisite(s):** A grade of "C" or higher in Statistics 321.

**Note:** Actuarial Science 325 is strongly recommended as preparation for Actuarial Science 327.

**Actuarial Science 425** 3 units; H(3-0)

**Intermediate Topics in Finance and Investment**
Selected topics relevant to students with an interest in actuarial science, enterprise risk management, financial mathematics, etc. Topics include financial instruments; sources and cost of capital; portfolio selection; CAPM and alternatives; dividend policy; taxation; basic option pricing theory; stock valuation; measurement and assessment of financial performance; risk management.

**Prerequisite(s):** Actuarial Science 325 and Statistics 323; or Actuarial Science 325 and 60 units (10 full-course equivalents) and consent of the Department.

**Antirequisite(s):** Credit for Actuarial Science 425 and Finance 317 will not be allowed without consent of the Department.

**Note:** Students with credit for Finance 317 but requiring Actuarial Science 425 for VEE credit from the Society of Actuaries should consult with the Department.

**Actuarial Science 427** 3 units; H(3-0)

**Life Contingencies II**

**Prerequisite(s):** Actuarial Science 327; Statistics 323; one of Mathematics 311, 313, 367 or 375.

**Actuarial Science 437** 3 units; H(3-0)

(formerly Statistics 437)

**Actuarial Models**
Basic distributional quantities; characteristics of actuarial models; continuous models; Basic and advanced discrete distributions; frequency and severity with coverage modifications (deductibles, policy limits, coinsurance); aggregate loss models.

**Prerequisite(s):** Statistics 323.

**Actuarial Science 511** 3 units; H(3-0)

**Generalized Linear Models for Actuaries**
Description of insurance data, response distributions, exponential family responses and estimation, GLMs, models for count data, categorical and continuous responses. Applications include: personal injury insurance, vehicle insurance, diabetes deaths, third party claims, and degree of vehicle crash. Software for fitting GLMs will be discussed.

**Prerequisite(s):** Statistics 323.

**Note:** Statistics 429 is recommended as a corequisite or as preparation for Actuarial Science 511.

**Actuarial Science 513** 3 units; H(3-0)

**Fundamentals of Actuarial Practice**
An introduction to the foundations of actuarial science including the history and development of insurance, the actuarial profession, and the professional societies. Standards of practice and codes of ethics and conduct. An examination of the contexts and environments (including the legal, political, and societal) in which actuarial work takes place. Foundational skills required by actuaries, with an emphasis on communication.

**Prerequisite(s):** Actuarial Science 327 and Statistics 321.

**Antirequisite(s):** Credit for Actuarial Science 513 and 539.02 will not be allowed.

**Actuarial Science 515** 3 units; H(3-0)

**Models for Financial Economics**
Survey of financial derivatives, valuation of derivatives using binomial trees, Black-Scholes-Merton equation, dynamic hedging, Brownian motion and Ito’s Lemma.

**Prerequisite(s):** Actuarial Science 325 and Statistics 321.

**Antirequisite(s):** Credit for Actuarial Science 515 and 539.04 will not be allowed.
Courses of Instruction

Actuarial Science 517 3 units; H(3-0)

Estimating Unpaid Claims in General Insurance
Data collection, adjusting premiums, trending losses, development triangles, expected method, frequency-severity method, Bornhuetter Ferguson method, Benktander method, Cape Cod method, impact of changing conditions on projection method.

Prerequisite(s): Actuarial Science 327.

Actuarial Science 519 3 units; H(3-0)

Quantitative Financial Risk Management
Risk measures, correlations and copulas, various approaches to modelling market and credit risk, liquidity risk, enterprise risk management.

Prerequisite(s): Actuarial Science 327.

Actuarial Science 527 3 units; H(3-0)

Life Contingencies III

Prerequisite(s): Actuarial Science 327; Statistics 323; one of Mathematics 311, 313, 367 or 375; and one of Computer Science 217, 231, 235 or Data Science 211.

Actuarial Science 531 3 units; H(3-0)

Loss Distributions and Their Estimations
Review of mathematical statistics; estimation based on complete and modified data; frequentist estimation; Bayesian estimation; simulation in actuarial modelling; model selection.

Prerequisite(s): Actuarial Science 327; Statistics 323; one of Mathematics 311, 313, 367 or 375.

Antirequisite(s): Credit for Actuarial Science 531 and 533 will not be allowed.

Note: Actuarial Science 437 or Statistics 437 is strongly recommended as preparation for Actuarial Science 531.

Actuarial Science 535 3 units; H(3-0)

Mathematics of Demography
Conventional and adjusted measures of mortality; measures of fertility; measures of morbidity; North American demographic characteristics and trends; evaluation of demographic data; projections for stable and stationary populations; actuarial applications of demographic characteristics and trends.

Prerequisite(s): Actuarial Science 327 and Statistics 323.

Actuarial Science 537 3 units; H(3-0)

Credibility Theory
Limited fluctuation credibility; full and partial credibility; greatest accuracy credibility; Bayesian methodology; credibility premium; Buhlmann model; Buhlmann-Straub model; empirical Bayes method; bonus-malus system.

Prerequisite(s): Actuarial Science 327; Statistics 323; and one of Mathematics 311, 313, 367 or 375.

Antirequisite(s): Credit for Actuarial Science 537 and either 533 and 637 will not be allowed.

Note: Actuarial Science 437 or Statistics 437 is strongly recommended as preparation for Actuarial Science 537.

Actuarial Science 539 3 units; H(3-0)

Special Topics in Actuarial Science
Offered under various subtitles.

Prerequisite(s): Actuarial Science 327; Statistics 323; and one of Mathematics 311 or 313 or 367 or 375.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Actuarial Science 600 1.5 units; Q(3S-0)

Research Seminar
A professional skills course, focusing on the development of technical proficiencies that are essential for students to succeed in their future careers. The emphasis is on professional presentations and using modern actuarial techniques and statistical research tools. Ethics and professionalism are also covered.

MAY BE REPEATED FOR CREDIT NOT INCLUDED IN GPA

Actuarial Science 611 3 units; H(3-0)

Generalized Linear Models for Actuaries
Description of insurance data, response distributions, exponential family responses and estimation, GLMs, models for count data, categorical and continuous responses. Applications include: personal income insurance, vehicle insurance, diabetes deaths, third party claims, and degree of vehicle crash. Software for fitting GLMs will be discussed.

Prerequisite(s): Statistics 323 or Mathematics 323, and Statistics 429.

Actuarial Science 617 3 units; H(3-0)

Estimating Unpaid Claims in General Insurance
Data collection, adjusting premiums, trending losses, development triangles, expected method, frequency-severity method, Bornhuetter Ferguson method, Benktander method, Cape Cod method, impact of changing conditions on projection method.

Prerequisite(s): Actuarial Science 327.

Antirequisite(s): Credit for Actuarial Science 617 and either 517 or 539.06 will not be allowed.

Actuarial Science 619 3 units; H(3-0)

Quantitative Financial Risk Management
Risk measures, correlations and copulas, various approaches to modelling market and credit risk, liquidity risk, enterprise risk management.

Prerequisite(s): Actuarial Science 327.

Actuarial Science 627 3 units; H(3-0)

Advanced Life Contingencies

Prerequisite(s): Actuarial Science 327; Statistics 323; and one of Mathematics 311 or 313 or 353 or 367 or 375 or 381; and one of Computer Science 217 or 231 or 235.

Antirequisite(s): Credit for Actuarial Science 627 and 527 will not be allowed.

Actuarial Science 637 3 units; H(3-0)

Credibility Theory
Limited fluctuation credibility; full and partial credibility; greatest accuracy credibility; Bayesian methodology; credibility premium; Buhlmann model; Buhlmann-Straub model; empirical Bayes method; bonus-malus system.

Prerequisite(s): Actuarial Science 327; Statistics 323 or Mathematics 323; and one of Mathematics 311 or 313 or 353 or 367 or 375 or 381.

Antirequisite(s): Credit for more than one of Actuarial Science 537, 637 and 533 will not be allowed.

Actuarial Science 639 3 units; H(3-0)
(formerly Statistics 639)

Conference Course in Actuarial Modelling
Topics in advanced actuarial theory and practice, such as: insurance risk models; practical analysis of extreme values; advanced property and casualty rate making; actuarial aspects of financial theory.

MAY BE REPEATED FOR CREDIT

African Studies AFST

Introduction to African Studies
An interdisciplinary perspective on the people and ecologies of the African continent. The major theme will be the processes and effects of social, religious, political, economic, historical and cultural change on the lives of Africans.

African Studies 400 6 units; F(9-0)

Field Study in Africa
A field course for the in situ interdisciplinary study of a country or region of Africa, emphasizing the geographical, archaeological, historical, cultural, political, economic and artistic aspects.

Prerequisite(s): Consent of the Program Coordinator.

African Studies 501 3 units; H(3-0)

Seminar
Study of a particular topic(s) or region(s) from an interdisciplinary and comparative perspective. Students will be required to examine how political, social, economic and cultural factors intersect to shape various issues in the African setting.

Prerequisite(s): One of African Studies 301; Anthropology 317, History 401, or Political Science 371.

American Sign Language ASL

Introduction to African Studies
An interdisciplinary perspective on the people and ecologies of the African continent. The major theme will be the processes and effects of social, religious, political, economic, historical and cultural change on the lives of Africans.

African Studies 400 6 units; F(9-0)

Field Study in Africa
A field course for the in situ interdisciplinary study of a country or region of Africa, emphasizing the geographical, archaeological, historical, cultural, political, economic and artistic aspects.

Prerequisite(s): Consent of the Program Coordinator.

African Studies 501 3 units; H(3-0)

Seminar
Study of a particular topic(s) or region(s) from an interdisciplinary and comparative perspective. Students will be required to examine how political, social, economic and cultural factors intersect to shape various issues in the African setting.

Prerequisite(s): One of African Studies 301; Anthropology 317, History 401, or Political Science 371.

American Sign Language ASL

Instruction is the responsibility of the Division of Linguistics in the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

American Sign Language 201 3 units; H(3-1)

Beginners’ American Sign Language I
Introduction to American Sign Language (ASL) and the culture of deaf people. Covers material in matriculation-level ASL. It teaches basic communication and conversational skills in ASL and is for students with no background in ASL.

Note: Preference in enrolment is given to students in Medicine, Nursing, and Social Work.

## Courses of Instruction

### Anthropology 363
3 units; H(3-0)

**Magic, Witchcraft, and Gods: Anthropology of Religion**

Contemporary anthropological theoretical perspectives on topics such as divination, ritual, witchcraft, magic and symbolism in both indigenous and world religions. The relationship of religion to healing, gender and power is also examined.

**Prerequisite(s):** Anthropology 203.

### Anthropology 371
3 units; H(3-0) (formerly Anthropology 471)

**Political Anthropology**

Comparative analysis of power, authority, dependency relations, and processes of governance, from the perspective of social and cultural anthropology.

**Prerequisite(s):** Anthropology 203.

### Anthropology 379
3 units; H(3-0)

**Urban Anthropology**

A study of tribalism, ethnicity, sub-cultures, social networks and related phenomena in urban societies. Attention will be paid to planning and applied urban anthropology.

**Prerequisite(s):** Anthropology 203.

### Anthropology 385
3 units; H(3-0) (formerly Anthropology 485)

**Economic Anthropology**

Comparative analysis of production, distribution and consumption in small-scale and complex societies; theories of exchange; effects of capitalism upon traditional economics and social organizations.

**Prerequisite(s):** Anthropology 203.

### Anthropology 391
3 units; H(3-0)

**Anthropological Theory**

Study of a variety of theories in Social and Cultural Anthropology, and their implications for research design and field work.

**Prerequisite(s):** Anthropology 203.

**Antirequisite(s):** Credit for Anthropology 391 and 365 will not be allowed.

### Anthropology 393
3 units; H(3-0)

**Ethnography of Global-Local Dynamics**

Changes in the international division of labour and resulting social, cultural, and political effects.

**Prerequisite(s):** Anthropology 203.

**Antirequisite(s):** Credit for Anthropology 393 and 367 will not be allowed.

### Anthropology 395
3 units; H(3-0)

**Anthropology of Science**

An introduction to the culture and the politics of science which draws on both early and contemporary ethnographers of scientific practice. Examines conceptual and daily practices in the laboratory, the scientific method, the training of scientists, the work of scientific collaboration and the intersection between scientists and wider political, racial, gendered and religious issues. Special consideration will be given to the anthropology of scientific controversy.

**Prerequisite(s):** Anthropology 203.

**Antirequisite(s):** Credit for Anthropology 395 and 399.06 will not be allowed.

### Anthropology 399
3 units; H(3-0)

**Special Topics in Anthropology**

Examination of selected problems in Anthropology. Topics may be drawn from all subfields of the discipline.

**MAY BE REPEATED FOR CREDIT**

### Anthropology 400
3 units; H(0-3T)

**Independent Study**

Selected topics in anthropology to be offered to Majors and Honours in their final year.

**Prerequisite(s):** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Anthropology 411
3 units; H(3-0) (formerly Anthropology 505.11)

**The Primate Fossil Record**

A review of the evolution of the primates, covering the morphological and taxonomic diversity of fossil primates, environmental and chronological context for primate evolution, and current debates and problems in the field of primate evolution. In class laboratories focus on the diversity of primate diatary, locomotor, and social adaptations, and how these are inferred from the fossil record.

**Prerequisite(s):** Anthropology 391.

### Anthropology 412
3 units; H(3-0) (formerly Anthropology 505.11)

**Method in Primatology**

Focus on observational methods and analysis, with practical application in laboratory study at the Calgary Zoo.

**Prerequisite(s):** Anthropology 311.

**Antirequisite(s):** Credit for Anthropology 413 and 351 will not be allowed.

**Note:** Field trips required.

### Anthropology 421
3 units; H(3-0)

**Contemporary Latin American Society**

An examination of selected issues in the anthropological study of contemporary Latin America.

**Prerequisite(s):** Anthropology 321.

### Anthropology 425
3 units; H(3-0)

**Primate Cognition**

Causes and consequences of primate sociality, such as brain structure and evolution, kin recognition, theory of mind, social perception and awareness, and similarities and differences in communication and cognition between human and non-human primates.

**Prerequisite(s):** Anthropology 311.

**Antirequisite(s):** Credit for Anthropology 425 and 505.03 will not be allowed.

### Anthropology 427
3 units; H(3-0)

**Women in East Asian Societies**

Comparison of women’s roles in China, Japan, and Korea, with particular reference to family structure and economic organization.

**Prerequisite(s):** Anthropology 323.

### Anthropology 435
3 units; H(3-0)

**Evolution of Human Behaviour**

Analysis of evolutionary principles and processes (such as natural selection, sexual selection, kin selection, parental investment) as they are applied to the current study of human and non-human primate behaviour. Special emphasis on socioecological approaches to primate behaviour.

**Prerequisite(s):** Anthropology 311.

### Anthropology 441
3 units; H(3-0)

**Problems in the Anthropology of Health**

An examination of selected problems in the anthropology of health. Topics may include models of health in Canada, etiological claims in health research, and anthropology of pharmaceuticals.

**Prerequisite(s):** Anthropology 341.

### Anthropology 451
3 units; H(3-0)

**Topics in Primate Behavioural Ecology and Conservation**

Advanced topics in the behavioural ecology and conservation biology of non-human primates, including related theory and field techniques.

**Prerequisite(s):** Anthropology 311.

**MAY BE REPEATED FOR CREDIT**

### Anthropology 467
3 units; H(3-0)

**Soldiering: Perspectives on Military Life**

An anthropological approach to soldiering in the aftermath of the Second World War. Questions the idea of a universal soldier, soldiers’ shifting relationship to the nation-state, the rise of privatized warfare and the creation of global military communities. Special attention will be paid to the rise of humanitarian military regimes, military occupation, new technologies of warfare and non-human soldiers.

**Prerequisite(s):** Anthropology 343.

### Anthropology 479
3 units; H(3-0) (Geography 479)

**Housing and Society**

Examines interactions between housing and social organization in cross-cultural context. Emphasizes the varied types of built form, their cultural meanings, implications for social life within households and for society more broadly, and their political and economic consequences. Pays particular attention to contemporary housing problems such as homelessness and urban sprawl.

**Prerequisite(s):** Anthropology 379 or Geography 351.

### Anthropology 501
3 units; H(3-0)

**Conference Course in Anthropology**

Arranged for various topics of anthropology on the basis of special interest and need.

**Prerequisite(s):** Anthropology 203 and one senior Anthropology course and consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Anthropology 505
3 units; H(3-0)

**Conference Course in Primatology**

Arranged for various topics of primatology on the basis of special interests and need.

**Prerequisite(s):** Anthropology 311 and one senior primatology course and consent of the Department.

**MAY BE REPEATED FOR CREDIT**
Graduate Courses
Only where appropriate to a student's program may graduate credit be received for courses numbered 500-599.

**Anthropology 601** 3 units; H(3-0)

**Conference Course in Anthropology**
A specialized area of Anthropology selected on the basis of particular interest and need.
Prerequisite(s): Consent of the Department.
May be repeated for credit

**Anthropology 603** 3 units; H(3S-0)

**Thesis Development**
A reading and conference course in the student's substantive area conducted jointly by at least two faculty members.
Prerequisite(s): Consent of the Department.
May be repeated for credit

## Prerequisite(s)
- Anthropology 523 (Archaeology 523)
- Human Ecology
- Current directions in various subfields of human ecology as they apply to Anthropology, Archaeology, and Geography.
Prerequisite(s): Consent of the Department.

## Antirequisite(s)
- Anthropology 523 and Geography 523 will not be allowed.

## Field Study in Social and Cultural Anthropology
Research projects carried out off campus, under the supervision of a member of academic staff, and resulting in a graded project report.
Prerequisite(s): Consent of the Department.

## Corequisite(s)
Anthropology 541

## Note
A supplementary fee will be assessed to cover additional costs associated with this course.

## MAY BE REPEATED FOR CREDIT

## Anthropology 552
Field Studies in Primatology
Intensive training and practice in field methods of observational primate behaviour or behavioural ecology.
Prerequisite(s): Consent of the Department.
Corequisite(s): Anthropology 553.

## Note
Normally offered during Spring Intersession. A supplementary fee will be assessed to cover additional costs associated with this course.

## MAY BE REPEATED FOR CREDIT

## Anthropology 553

## Primate Behavioural Research Design
Design of a research project, including the identification and operationalization of a research question and the collection and analysis of data.
Prerequisite(s): Consent of the Department.
Corequisite(s): Anthropology 552.

## Note
Normally offered during Spring Intersession. A supplementary fee will be assessed to cover additional costs associated with this course.

## MAY BE REPEATED FOR CREDIT

## Anthropology 571
Honours Seminar in Biological Anthropology
Current theoretical and methodological issues will be explored in a discussion-based seminar format.
Prerequisite(s): Anthropology 413 and admission to the Anthropology Honours Program.

## Anthropology 573
Honours Seminar in Social and Cultural Anthropology
Current theoretical and methodological issues will be explored in a discussion-based seminar format, with the possibility of development of a research project.
Prerequisite(s): Anthropology 411 and admission to the Anthropology Honours Program.

## Anthropology 589
(formerly Archaeology 589)

## Nutritional Anthropology
The study of human dietary practices from biological and cultural perspectives. Subjects covered include the development of nutritional anthropology, principles of nutrition, principles of ecology, diet from an evolutionary, comparative and historic perspective, the impact of undernutrition on human physiology, and behaviour and methods in nutritional anthropology.
Prerequisite(s): Consent of the Department.

## Antirequisite(s)
- Consent of the Department.
- Anthropology 701
- Independent Studies

## Arabic Language and Muslim Cultures ALMC
Instruction offered by members of the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

All students wishing to take Arabic language courses for the first time must consult the School of Languages, Linguistics, Literatures and Cultures to be placed in an appropriate course. Native speakers are not eligible to take language courses, but are eligible to take Arabic literature, linguistics and culture courses such as Arabic Language and Muslim Cultures 317, 319, 353, 358 or 359.

## Arabic Language and Muslim Cultures 202
3 units; H(4-0)

## Beginners Arabic I
A comprehensive course for students with no prior knowledge of the language. Includes training in listening, speaking, reading and writing of Modern Standard Arabic in its cultural context.
Prerequisite(s): Consent of the School.

## Arabic Language and Muslim Cultures 204
3 units; H(4-0)

## Beginners Arabic II
Continuation of Arabic Language and Muslim Cultures 202.
Prerequisite(s): Arabic Language and Muslim Cultures 202.

## Arabic Language and Muslim Cultures 301
3 units; H(4-0)

## Continuing Arabic I
A comprehensive course that includes further training in listening, speaking, reading and writing Modern Standard Arabic in its cultural context. Development of increased sophistication in language production and cultural understanding.
Prerequisite(s): Arabic Language and Muslim Cultures 204.

## Arabic Language and Muslim Cultures 303
3 units; H(4-0)

## Continuing Arabic II
A continuation of Arabic Language and Muslim Cultures 301.
Prerequisite(s): Arabic Language and Muslim Cultures 301.

analytical techniques, and interpretive trends in the study of the Paleolithic era.

Prerequisite(s): Archaeology 201 or 203.

Antirequisite(s): Credit for Archaeology 437 and 533.14 will not be allowed.

Archaeology 439 3 units; H(3-0)

African Complex Societies
Ancient African complex societies with an emphasis on state development south of the Sahara. Topics include why these states developed, their participation in internal and international systems of exchange, technological developments, belief systems that supported power structures, and the reasons for their collapse. Time period covered is from the rise of the ancient state of Egypt to the colonial period.

Archaeology 443 3 units; H(3-0)

Hunter-Gatherer Archaeology
An overview of the history of hunter-gatherer studies in anthropology and archaeology. Introduces current theoretical issues in hunter-gatherer research.

Prerequisite(s): Archaeology 201.

Antirequisite(s): Credit for Archaeology 443 and 531.81 will not be allowed.

Archaeology 451 3 units; H(3-0)

Introduction to Method and Theory
A survey of contemporary approaches to the study of archaeology.

Prerequisite(s): Archaeology 201 and 60 units (10 full-course equivalents).

Archaeology 453 3 units; H(3-2)

Fundamentals of Geoarchaeology
Analytical methods used in geoarchaeology. The interpretation of site and regional context, provenance, and paleoenvironment, and the application of dating methods, chemical and isotopic methods, and remote sensing. Case studies and experiential learning through field examples.

Prerequisite(s): Archaeology 201 or Geography 211 or Geology 201 or Geology 209.

Archaeology 455 3 units; H(3-0)

Paleoenidan Archaeology
Comprehensive overview of early hunter-gatherer archaeology in North and South America, including the Clovis/pre-Clovis debate, theoretical issues surrounding early hunting and mobility, the migration to the Americas during the last ice age, and cultural ecological dynamics.

Prerequisite(s): Archaeology 201.

Archaeology 471 3 units; H(3-2)

Ceramic Analysis

Prerequisite(s): Archaeology 201.

Archaeology 490 3 units; H(3S-0)

Current Topics in Archaeology
Examination of current theoretical, methodological, or topical issues in archaeology.

Prerequisite(s): Consent of the Department.

Archaeology 503 3 units; H(3-0)

Gender in Prehistory
The theoretical background for feminist archaeology and some of the important advances in Old and New World gender studies. Topics include the relationship of gender hierarchy to the rise of the state; contrasts between the ideological representation of gender and culture practice; and an over-arching theme of critical analysis relating the present to the past.

Prerequisite(s): Archaeology 451.

Archaeology 505 3 units; H(3-0)

Current Debates
Topics of debate in archaeology and human biology from a perspective that emphasizes philosophical, theoretical and methodological issues. Designed to hone students’ critical, analytical, and debating skills, and as preparation for graduate studies.

Prerequisite(s): Archaeology 451.

Note: Archaeology 505 should be taken in the final year of the program.

Archaeology 506 6 units; F(0-7)

Advanced Archaeological Field Techniques
Training in the more advanced aspects of field work.

Prerequisite(s): Archaeology 201 and 306.

Note: Normally offered during the Spring and/or Summer Intersession. A supplementary fee will be assessed to cover additional costs associated with this course.

Archaeology 515 3 units; H(3-3)

Paleoethnobotany
The study of the uses of plants for food and other purposes such as tools by people in the past through archaeological remains and ethnobotanical research with contemporary people. Macroscopic and microscopic plant remains, such as phytoliths, starch grains, seeds, and charcoal are employed to reconstruct the past environments of ancient people. Theoretical and ethnobotanical issues such as folk taxonomy and ownership of traditional knowledge are explored.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Archaeology 515 and 533.26 will not be allowed.

Archaeology 521 3 units; H(3-0)

Reconstructing Plains Culture
Archaeological plains cultures and the methodological and theoretical issues involved in the use of archaeological reconstructions of the past. Normally, focus will be on the Canadian Plains.

Prerequisite(s): Archaeology 321.

Antirequisite(s): Credit for Archaeology 521 and 623 will not be allowed.

Archaeology 523 3 units; H(3-0)

Human Ecology
Current directions in various subfields of human ecology as they apply to Anthropology, Archaeology, and Geography.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Archaeology 523 and Geography 523 will not be allowed.

Archaeology 531 3 units; H(3-0)

Advanced Topics in Archaeology
Investigation of various theoretical and/or topical issues in archaeology.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Archaeology 533 3 units; H(3-0)

Advanced Topics in Analytical Archaeology
Investigation of various methodological and/or analytical topics in archaeology at an advanced level.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Archaeology 537 3 units; H(3-0)

Topics in Mesoamerican Archaeology
Focus on particular time periods or themes in Mesoamerican archaeology and ethnohistory.

Prerequisite(s): 6 units (1.0 full-course equivalent) from Archaeology 341, 343, 345, 347.

MAY BE REPEATED FOR CREDIT

Archaeology 555 3 units; H(3-2)

Human Osteology
Identification and interpretation of human skeletal and dental remains. Emphasis is on functional anatomy and reconstruction of prehistoric lifeways.

Prerequisite(s): Archaeology 203 or Anthropology 201 and admission to the Archaeology or Anthropology major.

Antirequisite(s): Credit for Archaeology 555 and 613 will not be allowed.

Archaeology 591 3 units; H(3-0)

Landscape Archaeology
Human perceptions and uses of the biophysical and cultural environment. The emphasis is on the act of humanizing the environment by naming places, identifying resources, establishing paths, and modifying the natural landscape thereby creating a tradition of land use that can be accessed archaeologically.

Prerequisite(s): Archaeology 451.

Archaeology 593 3 units; H(3-0)

Household Archaeology
Human perceptions and uses of the built environment, particularly residential architecture. The emphasis is on the structure and symbolism associated with the spatial arrangements of objects, activities, and social interactions.

Prerequisite(s): Archaeology 451.

Archaeology 596 3 units; H(3-0)

Problems in Palaeopathology and Palaeonutrition
Patterns of disease in prehistoric human populations with consideration to the interaction of health and nutrition. Techniques for determining disease and nutrition from prehistoric remains are covered.

Prerequisite(s): Anthropology 201, Archaeology 555 and either Anthropology 550 or Archaeology 203, and admission to the Archaeology or Anthropology major.

Archaeology 598 6 units; F(3S-0)

Honours Thesis (BSc)
Thesis normally required of Honours BSc students and also open for credit to other undergraduate majors. Students are expected to carry out an analytical research project on a subject acceptable
Courses of Instruction

Archaeology 597 3 units; H(3S-0)

Indepedent Reading Course
An independent reading course for archaeology Majors. Each student is required to choose reading in consultation with an advisor.

Prerequisite(s): Consent of the Department.

Archaeology 598 6 units; F(3S-0)

Honours Thesis (BA)
The thesis normally required of Honours BA students and also open for credit to other undergraduate majors. Students are expected to carry out a research project in a subject acceptable to the Department and to produce a final report written in a professional manner.

Prerequisite(s): Consent of the Department.

Graduate Courses

Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

Archaeology 601 3 units; H(3S-0)

Theoretical Foundations
The philosophy of science, the history of anthropological theory, and a survey of contemporary theoretical approaches in anthropology. Throughout, the relevance to and connections with the subdisciplines of archaeology and biological anthropology will be emphasized.

Prerequisite(s): Consent of the Department.

Archaeology 603 3 units; H(3S-0)

Seminar on Special Topics
Intensive study of special problems of particular interest to Archaeology Department graduate students. Subject matter for any particular year to be left to the discretion of the Department.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Archaeology 613 3 units; H(3-1T-2)

Analysis of Human Skeletal Remains
Methods of analyzing human remains from archaeological contexts with emphasis on identification and description. Lecture, lab and weekly seminar directed to Archaeology graduate students who have not had a previous course in human osteology.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Archaeology 613 and either 555 or 603.07 will not be allowed.

Archaeology 615 3 units; H(3S-0)

Topics in Archaeological Theory and Method
The history of archaeological theory and contemporary theoretical and methodological approaches used in archaeological research.

Prerequisite(s): Consent of the Department.

Archaeology 617 3 units; H(3S-0)

Theory and its Application in Biological Anthropology
Basic issues in the study of human adaptation with a focus on principles of evolutionary biology as they apply to modern studies. Throughout, a biocultural approach will be emphasized.

Prerequisite(s): Consent of the Department.

Archaeology 619 3 units; H(3-0)

Advanced Topics in Human Osteology
Current developments in interpretation of human skeletal and dental remains. Topics include forensic anthropology, bone biology, and population reconstruction.

Prerequisite(s): Archaeology 555.

Archaeology 621 3 units; H(3S-0)

Problems in Ethnoarchaeology
Seminar on selected topics relating to ethnoarchaeology.

Prerequisite(s): Consent of the Department.

Archaeology 625 3 units; H(3S-0)

Hunter-Gatherer Adaptations
Intensive study of contemporary and prehistoric hunter-gather social and economic adaptations.

Archaeology 627 3 units; H(3S-0)

Origins of Agriculture
Intensive study of the origins of agriculture throughout the world.

Archaeology 631 3 units; H(3S-0)

The Development of Complex Societies
The rise, development, and collapse of complex societies throughout the world.

Prerequisite(s): Consent of the Department.

Archaeology 633 3 units; H(3S-3)

Specialized Analyses of Archaeological Materials
Theory and practice for specialized analyses of the physical and chemical composition of archaeological materials, including microscopic traces of use. Topics will cover procedures used to prepare materials for such specialized analyses and to identify the relevant properties, as well as issues of quantification and interpretation.

Prerequisite(s): Consent of the Department.

Archaeology 635 3 units; H(3S-0)

Social Identity
Social identity is a fundamental theoretical and practical concern for archaeologists, physical anthropologists, and paleoanthropologists. Explores how humans use material culture and cultural practices to interact in a world ordered by social identities. Students will explore how research in their area of interest has addressed social identities.

Prerequisite(s): Consent of the Department.

Archaeology 637 3 units; H(3S-0)

Mesoamerican Archaeology and History
Ancient history of Mesoamerica, emphasizing a conjunctive approach based on hieroglyphic, historical and ethnohistorical sources as well as on archaeological evidence.

Prerequisite(s): Consent of the Department.

Archaeology 639 3 units; H(3S-0)

Stable Isotope Methods in Archaeology
Methods and applications of stable isotope analysis to archaeological research. Topics to be covered include the use of light stable isotopes to determine past and present diet, the use of stable isotopes to document residence and migration, analysis of stable carbon and nitrogen isotopes in soils, stable isotope ecology for environmental reconstruction and paleoclimate studies.

Prerequisite(s): Consent of the Department.

Archaeology 701 3 units; H(3S-0)

Special Topics in World Archaeology
Archaeology of particular geographical areas such as circumpolar, North America, Mesoamerica, South America, Africa, Oceania, and Europe and Near East.

MAY BE REPEATED FOR CREDIT

Archaeology 703 3 units; H(3S-0)

Advanced Seminar in Selected Topics
Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Architectural Studies ARST

Offered by the Faculty of Environmental Design.

Junior Course

Architectural Studies 201 3 units; H(2-1T)

Introduction to Architectural Studies
An introduction to architecture as an artistic and scientific endeavour as well as an examination of its purpose and intentions, its processes, and its products. Students will develop an understanding of the social, cultural, historical, technological, economic, and natural context influencing the design of buildings and other objects.

Senior Courses

Architectural Studies 423 3 units; H(3-0)

Sustainability in the Built Environment
The principle of sustainability recognizes people as temporary stewards of their environments, working toward a respect for natural systems and a higher quality of life. Examination of the built environment and the tools to achieve a stable and balanced and a regenerative ecosystem in a process of responsible consumption, wherein waste is minimized and the built environment interacts with natural environments and cycles. Healthful interior environments, resource efficiency, ecologically benign materials, renewable energies and social justice issues are examined.

Prerequisite(s): Admission to the Architectural Studies Minor or consent of the Faculty.

Antirequisite(s): Credit for Architectural Studies 423 and Environmental Design 523 will not be allowed.

Architectural Studies 444 6 units; F(0-8)

Studio II in Architecture
An introduction to the application of ordering principles of architecture and to the numerous layers that contribute to the quality of inhabitation of place and space through design. Issues explored include the formal, the experiential and the theoretical concerns of architectural design in today’s cultural context.

Prerequisite(s): Architectural Studies 451 and 484 and admission to the Architectural Studies Minor or consent of the Faculty.

Corequisite(s): Architectural Studies 453.

Antirequisite(s): Credit for Architectural Studies 444 and Environmental Design Architecture 592 will not be allowed.

Architectural Studies 449 3 units; H(3-0)

Building Science and Technology I
Functioning of the building enclosure: demonstration of the behaviour of building elements and their sub-assemblies under differential temperature and pressure stresses; fundamentals of acoustics; nature and use of building materials; response
of building materials to climatic cycles radiation, precipitation, heating and cooling.

Prerequisite(s): Admission to the Architectural Studies Minor or consent of the Faculty.

Antirequisite(s): Credit for Architectural Studies 449 and Environmental Design Architecture 511 will not be allowed.

Architectural Studies 451 3 units; H(0-8)

Graphics Workshop I
A skill building course with instruction and supervised experience in basic drafting, sketching and rendering; principles of perspective, drawing and presentation conventions. A variety of instruction may be offered to accommodate the varied level of student development.

Prerequisite(s): Admission to the Architectural Studies Minor or consent of the Faculty.

Corequisite(s): Architectural Studies 484.

Antirequisite(s): Credit for Architectural Studies 451 and Environmental Design Architecture 541 will not be allowed.

Architectural Studies 453 3 units; H(0-8)

Graphics Workshop II
Instruction and supervised experience in drafting, sketching and rendering; drawing and presentation conventions. Builds on Architectural Studies 451. A variety of instruction may be offered to accommodate the varied level of student development.

Prerequisite(s): Architectural Studies 451 and 484 and admission to the Architectural Studies Minor or consent of the Faculty.

Corequisite(s): Architectural Studies 444.

Antirequisite(s): Credit for Architectural Studies 453 and Environmental Design Architecture 543 will not be allowed.

Architectural Studies 457 3 units; H(3-0)

History of Architecture and Human Settlements
A survey history of architecture and human settlement from the prehistoric world until the present. The first course addresses the pre-modern traditions of the major world cultures. The second course explores the traditions of the Western world from the beginning of the Italian Renaissance until the present. The courses will examine the changes in world view that have altered the course of architecture through the study of selected works of architecture and urbanism.

457.01. History of Architecture and Human Settlements I-Premodern Traditions of the World
457.02. History of Architecture and Human Settlements II-The Rise of Modernity, 1750 to the Present

Prerequisite(s): Admission to the Architectural Studies Minor or consent of the Faculty.

Antirequisite(s): Credit for Architectural Studies 457 and Environmental Design Architecture 523 will not be allowed.

Architectural Studies 484 6 units; F(0-8)

Studio I - Design Thinking
Foundation concepts in design and form making involving a sequence of progress skill building, visual and spatial thinking and problem solving exercises.

Prerequisite(s): Admission to the Architectural Studies Minor or consent of the Faculty.

Corequisite(s): Architectural Studies 451.

Antirequisite(s): Credit for Architectural Studies 484 and either Architectural Studies 485 or Environmental Design Architecture 580 will not be allowed.

Art ART

Instruction offered by members of the Department of Art in the Faculty of Arts.

Junior Courses

Art 231 3 units; H(3-3)

Art Fundamentals: 2D
Foundation course in two-dimensional art making. Creative exploration may include media such as plaster, clay, wood, and found objects. Technical approaches may include mold-making, casting, additive and subtractive processes. Form, mass, volume and materials will be addressed in the context of research, problem solving, visual fluency and conceptual development.

Art 233 3 units; H(3-3)

Art Fundamentals: 3D
Foundation course in three-dimensional art making. Creative exploration may include media such as plaster, clay, wood, and found objects. Technical approaches may include mold-making, casting, additive and subtractive processes. Form, mass, volume and materials will be addressed in the context of research, problem solving, visual fluency and conceptual development.

Art 235 3 units; H(3-3)

Introduction to Photography and Digital Imaging
An introductory course in current photographic methods, including digital photography, digital image processing and printing, and the presentation of photographs.

Note: Students must provide their own digital single lens reflex camera for the duration of the term. Please consult with the department for more information.

Art 241 3 units; H(3-3)

Drawing I
Introductory course in observational and representational drawing. Creative exploration includes mark-making, hand-eye co-ordination, proportions, perspective, line, texture, figure-ground relationships and pictorial composition. Approaches may include pencil, conté, charcoal, pastel, pen and ink. These will be addressed in the context of research, problem-solving, visual fluency and conceptual development.

Art 243 3 units; H(3-3)

Drawing II
Developing observational and representational skills through figure drawing and exploration of the contemporary field. Approaches will include a more developed understanding of colour, research, problem solving, visual fluency and conceptual development.

Prerequisite(s): Art 241.

Art 251 3 units; H(3-3)

Media Arts: Practice and Theory
Technical instruction and creative opportunities in the media arts, in addition to examination of historical, theoretical and critical context.

Art 271 3 units; H(3-3)

Introduction to Printmaking
Basic concepts and techniques in Fine Art Printmaking.

Senior Courses

Art 301 3 units; H(3-0)

Studies in Contemporary Canadian Art
Study of recent Canadian art from a range of perspectives in art criticism.

Art 309 3 units; H(3-3)
(Formerly Art 205)

Foundations of Art Education
An introduction to the history, theory and philosophy of art education through participatory learning events.

Prerequisite(s): Admission into the Major and Minor degree programs offered by the Department of Art.

Art 311 3 units; H(3-0)

Topics in Art
Topics related to contemporary studio and curatorial practices such as spirituality, exhibitions, digital storytelling, new media, or public art.

MAY BE REPEATED FOR CREDIT

Art 313 3 units; H(3-3)

Video Art
Focuses on concepts, issues, and techniques of video as an art medium. Students will gain experience and a working knowledge of concept development, video shooting and digital editing, in the context of contemporary art theory and practice.

Prerequisite(s): Art 235.

Note: Students must provide their own digital video camera for the duration of the term.

Art 315 3 units; H(3-3)

Programming for Artists
An introduction to computer programming techniques used to create interactive art projects.

Prerequisite(s): 3 units (0.5 full-course equivalent) in courses labelled Art.

Antirequisite(s): Credit for Art 315 and any of Computer Science 217, Computer Science 231, 235, Data Science 211 or Engineering 233 will not be allowed.

Art 317 3 units; H(3-3)
(Formerly Art 439)

Electronics for Artists
Theoretical and practical applications of basic electronic principles and techniques involving the use of electronics in contemporary art practices. Will include applied experiences with hardware and visual programming environments.

Prerequisite(s): 3 units (0.5 full-course equivalent) in courses labelled Art.

Art 319 3 units; H(3-3)

Digital Illustration
Introduces students to vector-based illustration techniques, their historical context and terminology. The course provides a focus on the fundamentals of designing with imagery, and the relationship between verbal and visual communication.

Prerequisite(s): Art 235.

Antirequisite(s): Credit for Art 319 and 253 will not be allowed.

Art 321 3 units; H(3-0)

Net Art: Theory and Practice
Examination of the work of Net-based artists and investigation of the Internet as a vehicle to extend art and design practice.

</table>
devices for use in artmaking, providing practical experience with sensors, motors, switches, gears, lights, simple circuits and computers to create kinetic and interactive works of art.

Prerequisite(s): Art 235 and 315.

Art 411 3 units; H(3-0)

Selected Topics in Art Education
Exploration of topics in art education such as multiculturalism, creativity, developmental issues, or special needs learners.

MAY BE REPEATED FOR CREDIT

Art 421 3 units; H(3-3)

Advanced Topics in Digital Arts
Advanced studio inquiry into digital art forms developing students’ technical and conceptual skills. Advanced exploration of digital practices such as 2D graphics, 3D graphics, animation, motion capture, and modelling will enable research creation directed toward self-generated practice.

Prerequisite(s): 15 units (2.5 full-course equivalents) in Art at the 300 level including one of Art 313, 319, 323, 331, 334 or 336.

MAY BE REPEATED FOR CREDIT

Art 431 3 units; H(3-3)

3D Digital Imaging
Creative research in 3D digital visualization and fabrication involving multimedia software and hardware. May include 3D printing, rapid prototyping, laser cutting, and computer controlled milling.

Prerequisite(s): 15 units (2.5 full-course equivalents) in Art at the 300 level including one of Art 313, 319, 323, 331, 334 or 336.

Art 438 3 units; H(3-3)

Advanced Topics in Photography
Advanced studio inquiry into photography developing students' foundational, technical and conceptual skills. Deeper exploration of topics in photography such as long term projects, narrative, projection, printing and alternative processes will enable research creation directed toward self-generated practice.

Prerequisite(s): 15 units (2.5 full-course equivalents) in Art at the 300 level including all of Art 313, 319, 323, 331, 333, 334 or 336.

MAY BE REPEATED FOR CREDIT

Art 445 3 units; H(3-3)

Advanced Topics in Drawing
Advanced studio inquiry into drawing that develops foundational, technical and conceptual skills. Deeper exploration of topics in drawing such as mixed media, street art and socio-political issues will enable research and creation directed toward self-generated practice.

Prerequisite(s): 15 units (2.5 full-course equivalents) of Art at the 300 level including one of Art 341, 343, 345, 347 or 349.

Antirequisite(s): Credit for Art 445 and either 441 or 443 will not be allowed.

MAY BE REPEATED FOR CREDIT

Art 451 3 units; H(3-3)

Painting: Expanded Field
Students explore an expanded field of painting through installing and contextualizing their work. This may include pictorial, spatial, performative, and conceptual responses to site. Students may engage in collage/assemblage, shaped canvases, text/image, objects, paint, and unconventional materials.

Prerequisite(s): Art 231 or 241.

Art 455 3 units; H(3-3)

Advanced Topics in Painting
Advanced studio inquiry into painting developing students’ foundational, technical and conceptual skills. Deeper exploration of painting will enable research creation directed toward self-generated practice. Activities will include workshops, studio practice and critique. Topics offered may include murals, gender and the body, figure and landscape, or materiality.

Prerequisite(s): 15 units (2.5 full-course equivalents) in 300 level Art and one of Art 351 or 353.

MAY BE REPEATED FOR CREDIT

Art 465 3 units; H(3-3)

Topics in Studio Research and Critique II
A studio-based topics course that provides students with an opportunity for developing their exploration of contemporary and emerging creative research practices, contextualized via critique. Topics may include visiting artist, studio research, figure painting, visual research.

Prerequisite(s): 15 units (2.5 full-course equivalents) in Art at the 300 level including all of Art 333.

MAY BE REPEATED FOR CREDIT

Art 475 3 units; H(3-3)

Advanced Topics in Printmaking
Advanced studio inquiry into printmaking developing students technical and conceptual skills. The course will explore advanced practices in areas such as lithography, serigraphy, intaglio through thematic approaches such as technology and place.

Prerequisite(s): 15 units (2.5 course equivalents) of Art at the 300 level, including one of Art 373, 377 or 379.

Antirequisite(s): Credit for Art 475 and either 471 or 473 will not be allowed.

MAY BE REPEATED FOR CREDIT

Art 481 3 units; H(3-3)

Sculpture: Mold Making and Casting
An exploration of mold making and casting techniques in the realization of sculptural forms.

Prerequisite(s): Art 233.

Art 485 3 units; H(3-3)

Advanced Topics in Sculpture
Advanced studio inquiry into sculpture that develops technical and conceptual skills. Activities will include studio practice and critique enabling research creation directed toward self-initiated practice. Topics may include sculptural exploration of installation, performance, and site specific art.

Prerequisite(s): 15 units (2.5 full-course equivalents) in Art at the 300 level including one of Art 381 or 383.

Antirequisite(s): Credit for Art 485 and 483 will not be allowed.

MAY BE REPEATED FOR CREDIT

Art 491 3 units; H(2-1)

Community-Based Art Experiences
A seminar and field experience course introducing prospective educators to all facets of planning and implementing positive art experiences in a non-school setting.

MAY BE REPEATED FOR CREDIT

Art 499 3 units; H(3-0)

Art in Theory and Practice II
Examination and discussion of theoretical issues associated with current practice in art.

Prerequisite(s): Art 399 and admission to the BFA or BFA Honours in Visual Studies.

Art 501 3 units; H(3-0)

Advanced Topics in Media Arts
Advanced studio inquiry into media art forms developing students’ technical and conceptual skills. Topics may include sound and interactivity, immersive art, tele-arts and projection mapping that will enable research creation directed toward self-generated practice.

Prerequisite(s): 15 units (2.5 full-course equivalents) of Art at the 300 level including one of Art 323, 315, 317 or 321.

Antirequisite(s): Credit for Art 501 and either Fine Arts 507.08 or 507.09 will not be allowed when the topic is Tele-Arts.

MAY BE REPEATED FOR CREDIT

Art 503 3 units; H(3-0)

Computer Game Design
The game design process will be explored, including a history of video games, genres, game mechanics, design documents, and a summary of the development process. The focus will be on design, rather than development, and the artistic and creative assets, rather than the software. Students will design a game and will create a playable prototype. The principles will be applicable to other sorts of games, and to media art in general.

Prerequisite(s): Art 251.

Antirequisite(s): Credit for Art 503 and either Fine Arts 507.06 or 507.07 will not be allowed.

Art 509 3 units; H(3-0)

Curriculum Building for Art
Developing curriculum and program structures for formal and community art education. Program design includes current theory and practice and a field research component.

Prerequisite(s): Art 231, 233, one of 342 or 344 and 12 units (2.0 full-course equivalents) in courses labelled Art at the 300 level or above.

Antirequisite(s): Credit for Art 509 and 515 will not be allowed.

Art 513 3 units; H(1T-6)

Directed Study
Independent studio research under the supervision of a faculty member.

Prerequisite(s): Consent of the Department.

Note: May be repeated for credit to a maximum of 9 units (1.5 full-course equivalents).

MAY BE REPEATED FOR CREDIT

Art 560 6 units; F(2T-4)

Honours Thesis
Independent studio research and production supported by a research paper for BFA Honours Visual Studies students, culminating in a Thesis Examination.

Prerequisite(s): Art 461 and admission to the BFA Honours Visual Studies Program.

Note: Normally completed concurrently with Art 561 and 563.
Courses of Instruction

Art 561 3 units; H(3-3)

Advanced Studio II
Directed studio research and production.
Prerequisite(s): Consent of the Department.

Art 563 3 units; H(3-3)

Advanced Studio III
Further directed studio research and production.
Prerequisite(s): Art 561.

Art 565 3 units; H(3-0)

Studio Research and Critique III
Advanced studio course that develops self-generated approaches to creative research and critique. Encourages engagement with contemporary and emerging practices and leads to critical fluency, contextualized via critique. Situated in an interdisciplinary setting, students can expect to encounter a wide range of themes and approaches to support their practice.
Prerequisite(s): Art 465.

Art 595 3 units; H(1T-6)

Studio Research
Independent studio research for honours students.
Prerequisite(s): Admission to Honours in Visual Studies and consent of the Department.
Corequisite(s): Art 561 or 563.
Note: May be repeated for credit a maximum of 6 units (1.0 full-course equivalent).
MAY BE REPEATED FOR CREDIT

Art 599 3 units; H(3-0)

Professional Aspects of Art
Examination and discussion of the issues associated with the professional aspects of surviving as an artist. Presentations by professional artists practicing in the field will form a major component of the course.
Prerequisite(s): 3 units (0.5 full-course equivalent) in courses labelled Art at the 400 level and admission to the BFA or BFA Honours in Visual Studies.

Graduate Courses

Art 601 3 units; H(0-3T)

History of Art I
Individual study: in consultation with the instructor, the student will select a research topic in art history or art criticism.
Prerequisite(s): Admission to a graduate program in the Department of Art.

Art 603 3 units; H(0-3T)

History of Art II
Individual study: in consultation with the instructor, the student will select a research topic in art history or art criticism.
Prerequisite(s): Art 601.

Art 605 3 units; H(0-3T)

Critical Study and Research
Individual study and research in the area of studio specialization, critical theory, methodological issues and/or historical topics.
Prerequisite(s): Admission to a graduate program in the Department of Art.
MAY BE REPEATED FOR CREDIT

Art 609 3 units; H(3-0)

Art Theory and Criticism
Investigation of contemporary global art theory and criticism.
Prerequisite(s): Consent of the Department.

Art 611 3 units; H(3-0)

Research Methods in Art
Introduces students to art making as a process of knowledge production and research creation.
Prerequisite(s): Admission to a graduate program in the Department of Art.

Art 661 6 units; F(3/2S-10)

Advanced Studio Practice
Individual study, with seminar-based discussions in research area. 661.01. Advanced Studio Practice 661.02. Thesis Studio Practice
Prerequisite(s): For Art 661.01: Admission to a graduate program in the Department of Art. For Art 661.02, the prerequisite is Art 661.01.

Art 691 3 units; H(3-0)

Pedagogy and Professional Practice
Issues in professional practice and post-secondary teaching in visual art. Optional course.
Prerequisite(s): Admission to a graduate program in the Department of Art.
MAY BE REPEATED FOR CREDIT

Art 761 3 units; H(2T-10)

Advanced Independent Studio research
Theoretical and applied concepts in studio.
Prerequisite(s): Admission to a graduate program in the Department of Art.
MAY BE REPEATED FOR CREDIT

Senior Courses

Art History 305 3 units; H(3-0)

Canadian Art History
A critical analysis of the forms, objects, and practices that compose the art canon of northern North America. Organized thematically, this course covers the period of history ranging from European contact to the present day.
Antirequisite(s): Credit for Art History 305 and either 301 or 303 will not be allowed.

Art History 311 3 units; H(3-0)

Introduction to a History of Photography
An introduction to the histories of photography and the photographic image. Examines the development of photography as a technology, art form, and way of envisioning the world.
Antirequisite(s): Credit for Art History 319 and either 419 and 423 will not be allowed.

Art History 321 3 units; H(3-0)

Medieval Art and Architecture
An examination of art and architecture c. 400-1400.

Art History 323 3 units; H(3-0)

Survey of Far Eastern Art: India and Related Civilizations
An examination of the art and architecture of ancient India and related civilizations, with special emphasis on Buddhist, Hindu and Islamic art.

Art History 325 3 units; H(3-0)

Survey of Far Eastern Art: China and Related Civilizations
An examination of the art and architecture of ancient China and related civilizations, with special emphasis on Confucian, Taoist and Buddhist art.

Art History 327 3 units; H(3-0)

Renaissance Art
An examination of the arts and architecture of Europe from c. 1300-1600.
Prerequisite(s):
Antirequisite(s): Credit for Art History 327 and 329 will not be allowed.

Art History 331 3 units; H(3-0)

Discourses of Modern Art and Architecture
A critical exploration of the development of and discussions about different art movements in relation to Modern Art and the avant-garde, addressing the historical circumstances that enabled the creation of selected art movements, which may include Impressionism, the Arts and Crafts Movement, Cubism, Surrealism, Pop Art, Fluxus, and Situationism.
Antirequisite(s): Credit for Art History 331 and any of 209, 405, 407 or 415 will not be allowed.

Art History 333 3 units; H(3-0)

Discourses of Contemporary Art and Architecture
An introduction to the socio-political approaches and critical discourses that have informed art-making in the contemporary period. Examines

</table>
Courses of Instruction

Astronomy ASTR

Instruction offered by members of the Department of Physics and Astronomy in the Faculty of Science.

Note: For listings of related courses, see Astrophysics, Physics, Medical Physics, and Space Physics.

Senior Courses

Astrophysics 305 3 units; H(3-2T-1) (formerly Astrophysics 213)

Introduction to Astrophysics

Fundamentals of modern astrophysics including observations and physical interpretation physical phenomena in the Universe. Topics include the nature of the Sun and stars, galaxies, and the interstellar medium; distances and motions in the universe; radiation and telescopes; celestial mechanics; stellar evolution. Minor laboratory exercises including one at the Rothney Astrophysical Observatory as circumstances permit.

Prerequisite(s): One of Physics 211, 221, 227 or Engineering 202; and one of Mathematics 249, 265 or 275.

Astrophysics 307 3 units; H(3-3) (formerly Astrophysics 507)

Introduction to Observational Astrophysics

Lectures and practical laboratory sessions in observational astronomy. Students will collect, reduce, and interpret astronomical data, develop an understanding of telescopes, instruments, and detectors; reduction and analysis methods; simulations and model fitting; data and error analysis. Observations will be carried out at the Rothney Astrophysical Observatory and/or the main campus.

Prerequisite(s): Astrophysics 213 or 305; one of Physics 211, 221, 227 or Engineering 202; and one of Physics 295, 298 or 323.

Astrophysics 401 3 units; H(3-0)

Galactic Astrophysics

The galaxy: space distribution of stars and interstellar material; kinematics and dynamics of stellar systems; rotation and spiral structure; classification and global properties of galaxies; active galaxies.

Prerequisite(s): Physics 325, Mathematics 375; and one of Astrophysics 213 or 305.

Astrophysics 403 3 units; H(3-0)

Stellar Structure and Evolution

Observational properties of stars; equations of stellar structure; physics of stellar interiors; structure and evolution of stars; white dwarfs, neutron stars, black holes; observational aspects of stellar atmospheres; radiative transfer in stellar atmospheres; opacity; spectral line formation.

Prerequisite(s): Astrophysics 213 or 305; Physics 325 and Mathematics 375.

Astrophysics 409 3 units; H(3-0) (formerly Astrophysics 309)

Planetary Astrophysics

Prerequisite(s): Mathematics 375 and Astrophysics 213 or 305.

Astrophysics 503 3 units; H(3-0)

The Interstellar Medium

Multiwavelength observations of gas and dust in our Galaxy; distribution and physics of neutral atomic hydrogen and molecules; interstellar chemistry; physics of dust grains; HII regions; interstellar shocks; gas dynamics; star formation.

Prerequisite(s): Astrophysics 401, Physics 325, 343 and Mathematics 375.

Note: Concurrent or prior enrolment in Astrophysics 403 is highly recommended.

Astrophysics 509 3 units; H(3-0)

High Energy Astrophysics and Cosmology

Clusters of galaxies; microwave and X-ray background radiation; dark matter and dark energy; overview of cosmology; general relativistic considerations; large-scale structure and expansion of the universe; nucleosynthesis; gamma ray bursts and cosmic rays.

Prerequisite(s): Astrophysics 401, Physics 325, 343 and Mathematics 375.

Note: Concurrent or prior enrolment in Astrophysics 403 is highly recommended.

Graduate Courses

Astrophysics 607 3 units; H(1-6)

Advanced Observational Astrophysics

Principles and tools of modern ground-based and space astronomy emphasizing ultraviolet, optical, infrared, and radio radiation. Data acquisition and reduction techniques for astrometry, photometry, spectroscopy, imaging, and interferometry. Use of astronomical data analysis software.
Courses of Instruction

Astrophysics 611 3 units; H(3-0)

Radio Astronomy
Wave propagation, antennas, interferometry, aperture synthesis, radio receivers, and spectrometers. Applications to continuum and line radiation in stars, interstellar medium and extragalactic objects.

Astrophysics 621 3 units; H(3-0)

High Energy Astrophysics
Interaction of high energy particles with matter, propagation and origin of cosmic rays; structure of white dwarfs and neutron stars; the physics of jets and the accretion process onto compact objects; supernovae and supernova remnants; active galactic nuclei.

Athletic Therapy ATTH
Instruction offered by members of the Faculty of Kinesiology.
Students should also see course listings under the headings Dance Education, Kinesiology, and Physical Education.

Senior Courses

Athletic Therapy 491 3 units; H(3-3)

Advanced Practicum in Athletic Therapy
Practical case studies to develop leadership and problem solving skills applicable to Athletic Therapy issues. Practical experience in athletic equipment fitting, maintenance, selection, repair, and CSA certification.

Antirequisite(s): Successful completion of Mount Royal University Certificate in Athletic Therapy courses.

Biochemistry BCEM
Instruction offered by members of the Department of Biological Sciences in the Faculty of Science.
Students interested in taking Biochemistry courses are urged to read the advice in the Faculty of Science Program section of this Calendar.

†Limited amounts of non-scheduled class time involvement will be required for these courses.

Senior Courses

Biochemistry 341 3 units; H(3-3/2)

Biochemistry of Life Processes
Emphasis is placed on describing the chemistry of biochemical molecules including proteins, carbohydrates, lipids, and nucleic acids, and how this relates to cell structure and life processes. Basic concepts of metabolism are introduced, focusing on the breakdown of carbohydrates for energy. The laboratory component reinforces learning of the lecture material, while teaching technical skills and the analysis and interpretation of experiments involving biochemical molecules.

Antirequisite(s): Chemistry 351.

Introduction to Biochemistry
Biomolecules and metabolism as a foundation for understanding molecular organization and reactions of life. Relationships between structure and biological function of amino acids, proteins, lipids, nucleic acids and coenzymes. Principles of metabolism are illustrated using key metabolic pathways. Laboratory involves inquiry-based approaches for studying biomolecules and metabolic pathways.

Prerequisite(s): Chemistry 351; and Biology 311 or admission to the BHSc Honours program and Medical Sciences 341.

Note: Prior or concurrent completion of Biology 331 is strongly recommended. Biochemistry 393 and 443 are the recommended courses for students wishing to take only two biochemistry courses.

Biochemistry 401 3 units; H(3-6)

Biochemistry Laboratory Techniques I
Recombinant DNA techniques, protein expression and mutagenesis stressing nucleic acid and protein properties relevant to these techniques. Practical experience in the laboratory includes DNA amplification (PCR), gene cloning and expression, nucleic acid-protein bioinformatics and introduction to methods for working with proteins. Emphasis on the scientific process: experimental design, data analysis and dissemination of results.

Antirequisite(s): Biochemistry 393 and one of Chemistry 353 or 355.

Biochemistry 403 3 units; H(3-6)

Biochemistry Laboratory Techniques II
Chromatography, protein purification, biophysical and enzymatic methods of characterizing proteins. Practical experience in the laboratory with protein purification and protein characterization techniques selected to complement the selection from Biochemistry Laboratory Techniques I.

Antirequisite(s): Biochemistry 401 and 471.

Biochemistry 431 3 units; H(3-0)

Proteins and Proteomics
Protein structure and chemistry: structural motifs, ligand-binding, conformational changes, chemical modification; protein folding; structure prediction by molecular modeling. Identification of proteins in the proteome: 2D gel electrophoresis and chromatography, mass spectrometry; metalloproteins; post-translational modifications; protein-protein interactions.

Antirequisite(s): Biology 331, Biochemistry 393 and one of Chemistry 353 or 355.

Biochemistry 443 3 units; H(3-4/2)

Metabolism and Basic Nucleic Acid Biochemistry
Intermediary carbohydrate, lipid and nitrogen metabolism, and the regulation of these metabolic pathways; nucleic acid chemistry, structure, stability and enzymatic processing.

Antirequisite(s): One of Chemistry 353 or 355; and Biochemistry 341 or 393.

Note: Not required for majors in the Biochemistry program. Biochemistry 341 and 443 are the recommended courses for students wishing to take only two biochemistry courses.

Biochemistry 471 3 units; H(3-2T)

Physical Biochemistry
The laws of thermodynamics as they apply to biological systems: the hydrophobic effect, properties of water, electrolyte solutions and ligand binding. Optical spectroscopic methods including UV/visible absorption, fluorescence, and infrared as applied to biological molecules.

Prerequisite(s): Biochemistry 341 or 393; Chemistry 353 or 355; one of Mathematics 248, 251, 265, 275, 281, or Applied Mathematics 217 and one of Mathematics 252, 267, 277, 283, 211, 213, or Applied Mathematics 219; and Physics 211 or 221, and 223.

Biochemistry 507 3 units; H(0-8) or H(3-0)

Special Problems in Biochemistry
Independent research or reading project that may include seminars, lectures, term papers and training in theoretical and/or laboratory methods.

Prerequisite(s): 54 units (9.0 full-course equivalents) and consent of the Department.

Note: Students completing a typical course sequence in their program would normally be eligible to enrol in their third or fourth year. After consultation with a departmental faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be signed by the course supervisor before a student can register.

MAY BE REPEATED FOR CREDIT

Biochemistry 528 6 units; F(0-8)

Independent Studies in Biochemistry
Original and independent thought, practical research and the completion of written and oral reports.

Prerequisite(s): 72 units (12 full-course equivalents) and consent of the Department.

Note: After consultation with a departmental faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be signed by the course supervisor before a student can register.

MAY BE REPEATED FOR CREDIT

Biochemistry 530 6 units; F(0-8)

Honours Research Project in Biochemistry
Research project under the direction of one or more faculty members in the Department of Biological Sciences. Formal written and oral reports must be presented on completion of this course. Open only to Honours Biochemistry students or Honours Biological Sciences students.

Prerequisite(s): Biochemistry 403, 72 units (12 full-course equivalents) and consent of the Department.

Note: After consultation with a department faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be completed before a student can register.

Biochemistry 541 3 units; H(3-0) (Chemistry 541)

Biochemical Toxicology
An interdisciplinary course focused on the diverse biomolecular mechanisms by which organic (e.g. PCB’s) and inorganic pollutants (e.g. Cd, Hg, As) adversely affect cell function examined at multiple levels of organization, from molecules to whole animals. Topics include how natural toxins exert toxicity, how toxins/light generate free radicals within cells, how the speciation of metals in the environment affects their bioavailability/toxicity, and the toxicity mechanisms that lead to homeostatic dysfunction.

Prerequisite(s): Biochemistry 341 or 393; Chemistry 311, 321 and 351.
### Courses of Instruction

<table>
<thead>
<tr>
<th>Biochemistry 543</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Enzymology</strong></td>
<td>The structure, mechanisms and biological interactions of enzymes. Binding, catalysis, rates and regulation will be discussed with regard to chemical principles of kinetics and reaction. The principles of enzyme action will be considered in the context of the biological role that enzymes play.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biochemistry 393 or 443.</td>
<td></td>
</tr>
<tr>
<td>Biochemistry 547</td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>Signal Transduction and Regulation of Metabolism</strong></td>
<td>Principles of signal transduction with examples from prokaryotes and eukaryotes. Discussion of protein covalent modifications, ionotol lipid signaling, structure and function of protein kinases and protein phosphatases and their role in regulating various aspects of cell function. Emphasis on metabolic pathways, cell cycle control, checkpoints, DNA damage response and epigenetics.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biochemistry 393 or 443.</td>
<td></td>
</tr>
<tr>
<td>Biochemistry 551</td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>Structural Biology</strong></td>
<td>Applications of modern methods to structural studies of proteins and nucleic acids by NMR and X-ray crystallography with a comparison of the structural information derived from the two methods. Crystallization of macromolecules. Experimental and theoretical foundations of X-ray and NMR structure determination, and ligand binding. Non-invasive NMR studies of metabolism, and magnetic resonance imaging.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> One of Biochemistry 341 or 393; and one of Biochemistry 471 or Chemistry 371.</td>
<td></td>
</tr>
<tr>
<td>Biochemistry 553</td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td>(formerly Biology 553)</td>
<td>Molecular Biophysics</td>
</tr>
<tr>
<td><strong>A comprehensive survey of modern biophysics covering the flow and processing of matter, energy and information in living systems. Equilibrium and non-equilibrium thermodynamics in biology. Molecular motors and facilitated proton transport. An integrative approach connecting atomistic theories to cellular processes.</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biochemistry 341 or 393; and Biochemistry 471 or Chemistry 371.</td>
<td></td>
</tr>
<tr>
<td><strong>Note:</strong> Prior completion of Biochemistry 555 is strongly recommended.</td>
<td></td>
</tr>
<tr>
<td>Biochemistry 555</td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>Biomembranes</strong></td>
<td>The material examines the structure and function of biological membranes with a strong emphasis on the role of membrane proteins. Topics may include: the physical properties of lipid bilayers, isolation and purification of membrane proteins, preparation of membrane mimetic systems, ion and solute movement across membranes (transport and ion channels), membrane protein folding, assembly and structure, and protein secretion and translocation systems.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biochemistry 431 and 471 and one of 393 or 443.</td>
<td></td>
</tr>
<tr>
<td>Biochemistry 561</td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>Applied Biochemistry and Biotechnology</strong></td>
<td>An introduction to the language, materials, methods, concepts and commercial applications of biotechnology with emphasis on methodology, proteins as products, and the impact of genome sequencing on biotechnology. Topics will also include microbial, animal, and bioremediation biotechnology, expanding the genetic code, synthetic biology, antibiotic resistance, cancer immunotherapy, stem cells, and gene therapy.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biochemistry 393.</td>
<td></td>
</tr>
<tr>
<td><strong>Note:</strong> Prior completion of Cellular and Microbial Biology 411 or Biochemistry 401 is strongly recommended.</td>
<td></td>
</tr>
<tr>
<td><strong>Biochemistry 575</strong></td>
<td>3 units; H(3-1T-0)</td>
</tr>
<tr>
<td><strong>Lipsids</strong></td>
<td>Structure and function of lipids including phospholipids, sphingolipids, and steroids. Topics include properties of lipids and bilayers, lipid-lipid and lipid-protein interactions, technological applications, biosynthesis and regulation, lipids as second messengers, intracellular trafficking, and lipids in physiology and disease. Literature review and student seminars are significant components of this course.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biochemistry 393 and one of Biochemistry 401 or 443.</td>
<td></td>
</tr>
<tr>
<td>Biochemistry 577</td>
<td>3 units; H(3-4)</td>
</tr>
<tr>
<td><strong>Biomolecular Simulation</strong></td>
<td>Introduction to simulation and computer modeling methods commonly used in biochemistry and biophysics, with a focus on physical models to understand the behaviour of biomolecules. Topics include simulation methods, dynamics of proteins, DNA, and lipids, calculation of binding constants, protein-drug interactions, properties of ion channels as well as a number of recent literature topics.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> One of Biochemistry 341 or 393 and one of Biochemistry 471 or Chemistry 371.</td>
<td></td>
</tr>
<tr>
<td><strong>Graduate Courses</strong></td>
<td>Enrolment in any graduate course requires consent of the Department. Only where appropriate to a student's program may graduate credit be received for courses numbered 500-599. 600-level courses are available with permission to undergraduate students in the final year of their programs. See also the separate listing of graduate level Chemistry courses.</td>
</tr>
<tr>
<td><strong>Biochemistry 641</strong></td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>Selected Topics in Biochemistry</strong></td>
<td>Selected topics in Biochemistry such as those which appear annually in the serial publication Annual Review of Biochemistry.</td>
</tr>
<tr>
<td><strong>MAY BE REPEATED FOR CREDIT</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Biochemistry 731</strong></td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>Current Topics in Biochemistry</strong></td>
<td>A discussion of contemporary experimental and theoretical biochemical methods used for the study of drugs and diagnostics at a biomolecular level. Structural analysis, drug design and computational methods will be introduced, as well as modern ‘omics’ research approaches and current protein drug targets of the pharmaceutical industry.</td>
</tr>
<tr>
<td><strong>Biochemistry BIOL</strong></td>
<td>Instruction offered by members of the Department of Biological Sciences in the Faculty of Science. For other courses offered by the Department of Biological Sciences see Biochemistry; Cellular, Molecular and Microbial Biology; Ecology; Marine Sciences; Plant Biology; Zoology.</td>
</tr>
<tr>
<td><strong>Note:</strong> Limited amounts of non-scheduled class time involvement will be required for these courses.</td>
<td></td>
</tr>
<tr>
<td><strong>Junior Courses</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Biology 202</strong></td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>The Science of Food and Cooking</strong></td>
<td>Introduction to a scientific understanding of food and cooking using principles from a range of biological sciences, including biochemistry, molecular biology, microbiology, immunology, physiology and ecology. Topics include: building blocks of food, molecular-level understanding of recipes, biochemical reactions of cooking, microbiology of food production, physiology of sensory apparatus, food-related diseases, and industrialized food production.</td>
</tr>
<tr>
<td><strong>Antirequisite(s):</strong> Credit for Biology 202 and either 241 or 243 will not be allowed. Not open for credit to Honours, Majors or Minors in the Department of Biological Sciences or to Natural Sciences students with a Concentration in Biological Sciences.</td>
<td></td>
</tr>
<tr>
<td><strong>Biology 205</strong></td>
<td>3 units; H(3-0)</td>
</tr>
<tr>
<td><strong>The Organization and Diversity of Life</strong></td>
<td>A study of biological concepts and mechanisms illustrated by current examples of medical and environmental problems.</td>
</tr>
<tr>
<td><strong>Antirequisite(s):</strong> Not open for credit to Honours, Majors or Minors in the Department of Biological Sciences or to Natural Sciences program students with a Concentration in Biological Sciences. Credit for Biology 205 and any of 231, 233, 241 and 243 will not be allowed.</td>
<td></td>
</tr>
<tr>
<td><strong>Biology 241</strong></td>
<td>3 units; H(3-3)</td>
</tr>
<tr>
<td><strong>Energy Flow in Biological Systems</strong></td>
<td>An introduction to the energetics of life from molecules through ecosystems. Topics include: energy in biological systems; how different organisms obtain, store and use energy; energy budgets of organisms; and energy flow through cells and ecosystems.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biology 30 and Chemistry 30.</td>
<td></td>
</tr>
<tr>
<td><strong>Antirequisite(s):</strong> Credit for Biology 241 and 205 will not be allowed. Credit for more than two of Biology 231, 233, 241, 243 will not be allowed.</td>
<td></td>
</tr>
<tr>
<td><strong>Note:</strong> Biology 241 is a prerequisite for Biology 243. Not recommended for students seeking a single course, general-interest overview of the biological sciences. Those seeking such a course should consider Biology 205.</td>
<td></td>
</tr>
<tr>
<td><strong>Biology 243</strong></td>
<td>3 units; H(3-3)</td>
</tr>
<tr>
<td><strong>DNA, Inheritance and Evolution</strong></td>
<td>An introduction to central concepts in evolution and DNA as a vehicle for inheritance of genetic information. Topics include: the nature of genetic information and inheritance including transcription, translation and replication; natural selection and speciation; origin and history of biodiversity.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Biology 241.</td>
<td></td>
</tr>
<tr>
<td><strong>Antirequisite(s):</strong> Credit for Biology 243 and 205 will not be allowed. Credit for more than two of Biology 231, 233, 241, 243 will not be allowed.</td>
<td></td>
</tr>
<tr>
<td><strong>Note:</strong> Biology 241 is a prerequisite for Biology 243. Not recommended for students seeking a single course, general-interest overview of the biological sciences. Those seeking such a course should consider Biology 205.</td>
<td></td>
</tr>
<tr>
<td><strong>Biology 305</strong></td>
<td>3 units; H(3-0)</td>
</tr>
</tbody>
</table>
| **The Human Organism** | An introduction to human biology that analyzes the structure and function of systems in our bodies. Leads to an appreciation of how the human body maintains itself and carries out the functions
necessary to sustain any organism. A course for non-majors that will develop their understanding of the anatomy and physiology of their own species in a zoological and evolutionary context.

**Prerequisite(s):** One of Biology 30 or 205 or 231 or 241.

**Antirequisite(s):** Not open to credit to Honours, Majors and Minors in the Department of Biological Sciences or to Natural Sciences program students with a Concentration in Biological Sciences. Credit for Biology 305 and any of Kinesiology 259, 260, Medical Science 404, Zoology 269, 461 or 463 will not be allowed.

**Biology 307** 3 units; H(3-0)

**Ecology and Human Affairs**

The major principles of ecology. How the physical environment affects organisms; behavioural ecology and life histories; species interactions; the biology of populations, communities, and ecosystems; biodiversity and conservation. The non-biologists will gain an understanding of ecological and evolutionary principles that will allow them to better appreciate the natural world, and the increasing environmental impacts of humans.

**Prerequisite(s):** 24 units (4.0 full-course equivalents).

**Antirequisite(s):** Not open for credit to Honours, Majors and Minors in the Department of Biological Sciences or to Natural Sciences program students with a Concentration in Biological Sciences, or to students in the Environmental Sciences program.

**Biology 309**

(formerly Botany 309)

3 units; H(3-0)

**Plants and People**

A review of the structure and function of plants. A survey of the nature of plant's basic food plants and an overview of agricultural and forestry practices. Plant improvement by traditional and modern methods, and plant propagation.

**Prerequisite(s):** Biology 205 or 231 or 241.

**Antirequisite(s):** Not open to credit to Honours, Majors and Minors in the Department of Biological Sciences or to Natural Sciences program students with a Concentration in Biological Sciences.

**Biology 310**

(formerly Botany 310)

3 units; H(3-3)

**Principles of Genetics**

Topics will include Mendelian inheritance, allelic relationships, genetic linkage, sex linkage, changes in chromosome structure, segregation and recombination, epistasis, molecular genetics, genetics of bacteria and viruses, gene fine structure, gene function, complementation, bioinformatics and regulation of gene expression. Several selected organisms will be used in the laboratories to illustrate pertinent genetic principles.

**Prerequisite(s):** Any two of Biology 231, 233, 241 and 243.

**Note:** Students are urged to complete this course in their second year to ensure timely completion of the program.

**Biology 313**

3 units; H(3-3)

**Principles of Ecology**

The ecological principles, theories and interactions of organisms at individual, population, community and ecosystem levels will be explored. Ecological principles will be applied to examine current issues involving conservation of species, habitats, biodiversity and ecosystem function.

**Prerequisite(s):** 24 units (4.0 full-course equivalents), including Biology 233 or any two of Biology 231, 241 and 243.

**Note:** Students are urged to complete this course in their second year to ensure timely completion of their program.

**Biology 315**

3 units; H(3-3)

**Quantitative Biology I**

Data collection, presentation and analysis in the biological sciences. Basic design of biological experiments including concepts of control, replication, and intercession. Analysis of biological data will include tests of statistical hypotheses and estimation techniques.

**Prerequisite(s):** Biology 233 or 241.

**Note:** Biology 315 is a prerequisite for several Ecology courses offered by the department. Students are urged to complete this course in their second year to ensure timely completion of the program.

**Biology 331**

3 units; H(3-1T)

**Introduction to Cellular and Molecular Biology**

The principles of cellular structure and function. Molecular organization of membranes, organelles, nucleus and cytoplasmic structures; the integration of cellular functioning assembly of organelles; the regulation of cell proliferation; and the interaction of cells with their neighbours and their environment.

**Prerequisite(s):** Biology 311.

**Note:** Students are urged to complete this course in their second year to ensure timely completion of their program.

**Biology 371**

3 units; H(3-1T)

**Comparative Biology of Plants and Animals**

An exploration of how multicellular organisms meet the challenges of living, both as individuals, and in an evolutionary context. Parallels and divergence between plants and animals are illustrated in their responses to the challenges they face, with the water-to-land transition forming a central theme in shaping the form and function of plant and animal life.

**Prerequisite(s):** Biology 241 and one of Biology 243 or 231.

**Antirequisite(s):** Biology 233.

**Note:** Students are urged to complete this course in their second year to ensure timely completion of their program.

**Biology 375**

3 units; H(3-0)

**Insects, Science and Society**

Examination of insects as the most diverse and abundant form of animal life on the planet, why they are so successful and how they influence our lives. Topics include how insects are built, what they do, and how they interact with people and have come to be so important economically and culturally, as pests, pollinators, experimental animals, maintaining our environment and forming complex societies. Other topics include evolution of insects, insects in history and culture and how insects can help us address issues such as biological conservation, climate change and animal rights.

**Prerequisite(s):** 24 units (4.0 full-course equivalents).

**Antirequisite(s):** Not open for credit to Honours, majors or minors in the Department of Biological Sciences or to Environmental Science and Natural Sciences program students with a Concentration in Biological Sciences.

**Biology 401**

3 units; H(3-1T)

**Evolutionary Biology**

An introduction to the macro- and macro-evolutionary processes responsible for the diversity of organisms. Topics include heredity, genetic variation, population structure, genetic drift, natural selection and adaptation, sexual selection, evolution of interactions between species, speciation, phylogeny and biogeography.

**Prerequisite(s):** Biology 313 and 315.

**Biology 435**

3 units; H(3-3)

**Biology of Fungi**

Morphology, life history patterns and systematics of fungi. Fungal ecology including fungi as parasites, symbionts and decomposers. Basic molecular biology, genetics and physiology.

**Prerequisite(s):** Biology 313 and 331.

**Antirequisite(s):** Credit for Biology 435 and 335 will not be allowed.

**Biology 451**

3 units; H(3-1T)

**Conservation Biology**

The application of ecological theory and principles to the conservation and management of natural and modified ecosystems, with emphasis on preservation of biodiversity and sustainable development. Topics include disturbance as an ecological process, ecological and evolutionary responsiveness of natural systems, ecology of resource harvesting, management of endangered habitats and populations, implications of human population growth and global change.

**Prerequisite(s):** Biology 313.

**Biology 453**

(formerly Biology 351)

3 units; H(3-0)

**Plants in their Environment**

An integration of physiological and ecological aspects of plant adaptation to different environments. Topics include interactions between plants and other organisms (e.g., bacterial and fungal symbionts, animal pollinators, herbivores) as well as the influence of abiotic stressors on plant growth and distribution. The ecological consequences and possible applications of such interactions are discussed.

**Prerequisite(s):** Biology 313 and one of Botany 303, Biology 371 or Plant Biology 403.

**Biology 501**

(formerly Medical Science 501)

3 units; H(3-0)

**Principles and Mechanism of Pharmacology**

Basic principles of pharmacology, with specific emphasis on receptor signaling mechanisms. Explores the application of pharmacological principles to the treatment of disease.

**Prerequisite(s):** Biochemistry 393; one of Zoology 463 or Medical Science 404 and consent of the BHSc program.

**Biology 503**

(formerly Medical Science 503)

3 units; H(3-0)

**Pharmacology of Organ Systems**

Through analysis and discussion of research literature, this course explores topics in pharmacology including the nervous, cardiovascular, renal, respiratory and immune systems, as well as anti-cancer therapies.

**Prerequisite(s):** Biology 501 (Medical Science 501) and consent of the BHSc program.
### Courses of Instruction

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Units</th>
<th>Prerequisite(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biology 505</td>
<td>Medicinal Plant Biochemistry</td>
<td>3 units; H(3-0)</td>
<td>Deals with biochemical, molecular, and cellular aspects of plant metabolism, natural product diversity in the plant kingdom, and modern molecular and biochemical methods to understand plant metabolism. The focus is on the metabolic pathways that are either unique to plants, or that exhibit unique features in, plants. Several key plant pathways that produce plant-derived medicines will be discussed.</td>
</tr>
<tr>
<td>Biology 515</td>
<td>Field Course in the Natural History and Classification of Invertebrates</td>
<td>3 units; H(3-0)</td>
<td>Invertebrate Biodiversity: Field course in the natural history and classification of invertebrates as they are encountered in their natural habitat. Course material will include techniques for collection and identification of major groups of invertebrates; aspects of behaviour and ecology of local species; use of invertebrates as indicators of environmental change; censusing/monitoring invertebrates populations.</td>
</tr>
<tr>
<td>Biology 520</td>
<td>Field Course in Tropical Biology</td>
<td>6 units; F(3-3) or F(3-2)</td>
<td>An examination of biodiversity in a selected region of the tropics, including aspects of ecology of animals and plants, animal behaviour and an introduction to field techniques for observing and censusing selected taxa. Field studies will take place at forest and savannah sites with consideration of community-based conservation efforts.</td>
</tr>
<tr>
<td>Biology 530</td>
<td>Honours Research Project in Biological Sciences</td>
<td>6 units; F(0-8)</td>
<td>Research project under the direction of one or more faculty members in the Department of Biological Sciences. Formal written and oral reports must be presented on completion of this course. Open only to Honours Biological Sciences students.</td>
</tr>
<tr>
<td>Biology 591</td>
<td>Invertebrate Biodiversity</td>
<td>3 units; H(1-5) or H(1-4)</td>
<td>Field course in the natural history and classification of invertebrates as they are encountered in their natural habitat. Course material will include techniques for collection and identification of major groups of invertebrates; aspects of behaviour and ecology of local species; use of invertebrates as indicators of environmental change; censusing/monitoring invertebrates populations.</td>
</tr>
<tr>
<td>Biology 601</td>
<td>Research Seminar</td>
<td>3 units; H(1S-0)</td>
<td>Reports on studies of the literature or of current research. Graduate students normally register in their supervisor's research cluster.</td>
</tr>
<tr>
<td>Biology 607</td>
<td>Special Problems in Biology</td>
<td>3 units; H(3-0 or 0-6)</td>
<td>Independent research or reading project that may include seminars, term papers and training in theoretical and/or laboratory methods.</td>
</tr>
<tr>
<td>Biology 609</td>
<td>Advanced Statistical Applications in Biology</td>
<td>3 units; H(3-0)</td>
<td>Explains and demonstrates the analysis of biological data with general linear models, generalized linear models, maximum-likelihood fitting of non-linear models, and resampling techniques. Content is presented in a workshop format, so that students learn the application of computer analysis coincidentally with statistical concepts.</td>
</tr>
<tr>
<td>Biology 617</td>
<td>Darwin's Origin of Species</td>
<td>3 units; H(3-0)</td>
<td>An examination of the first edition of Charles Darwin's &quot;On the Origin of Species&quot; and related writings. Students will lead discussions of scientific, philosophical, and other issues raised by the book.</td>
</tr>
<tr>
<td>Biology 619</td>
<td>Advanced Evolutionary Biology</td>
<td>3 units; H(3-0)</td>
<td>The theory of organic evolution. Historical development of evolutionary ideas. Darwin's contribution. The mechanism of natural selection; sexual, kin and group selection. The application of the theory in biogeography, ecology, ethology and other areas of biology.</td>
</tr>
<tr>
<td>Biology 703</td>
<td>Recent Advances in Biology</td>
<td>3 units; H(3-0) or H(0-6)</td>
<td>Lectures, seminars and/or laboratories on special advanced topics in biological sciences. Each student should seek consent of a departmental faculty member who will supervise the chosen study.</td>
</tr>
</tbody>
</table>

### Graduate Courses

- **Enrolment in any graduate course requires consent of the Department.**
- **Only when appropriate to a student’s program may graduate credit be received for courses numbered 500-599.**
- **600-level courses are available with permission to undergraduate students in the final year of their program.**

### Biomedical Engineering BMEN

**Introduction to Biomedical Engineering**

Fundamentals of biological systems and the application of engineering principles to solving problems in medicine. Topics include pharmaceuticals and drug delivery, instrumentation and devices, physiological and biological measurements, biomechanics, the Scientific Method and the Canadian health-care system. Applications may include cardiovascular, neural and musculoskeletal systems.

### Biomedical Engineering 309

**3 units; H(3-3)/**

**Anatomy and Physiology for Engineers**

Physiological terminology and anatomical planes of reference; cell biology and physiology; includes structure and function of musculoskeletal, cardiac, nervous, gastrointestinal and respiratory tissues and systems; diseases and disorders of those systems; design constraints for bioengineering products.

### Biomedical Engineering 401

**3 units; H(3-17)/**

**Fundamentals of Biomedical Device Design**

An introduction to the development of biomedical devices. Topics may include identifying market needs, idea generation, biologically inspired design, human factors related to design, regulatory issues, intellectual property protection, clinical trials, and commercialization considerations. Case studies may be drawn from cardiovascular, neural and musculoskeletal applications.

### Biomedical Engineering Research Thesis

A research project in an area of interest, directed by a project advisor/faculty member within the Schulich School of Engineering, Cumming School of Medicine, Faculty of Kinesiology, or Faculty of Science. Includes a lecture component covering the scientific process, ethics, review of literature, and writing scientific proposals and manuscripts. The course culminates with a written thesis and presentation. Projects may involve experimental, analytic or computer modelling studies.

### Biomedical Engineering 501

**9 units; M(1-8)/**

**Biomedical Engineering Research Thesis**

A project in an area of interest, supervised by a project advisor/faculty member within the Schulich School of Engineering, Cumming School of Medicine, Faculty of Kinesiology, or Faculty of Science. Includes a lecture component covering topics including the scientific process, ethics, review of literature, patent searches, market analysis, and technology evaluation. The project involves choosing a particular product, process or theory relevant to biomedical engineering, researching it and...
Courses of Instruction

justifying its selection. A final report and presentation are required.

Prerequisite(s): Fourth- or fifth-year standing in the Engineering program of choice.

Note: Pre-term study is required.

Biomedical Engineering 509 3 units; H(3-2)

Introduction to Biomedical Imaging and Applications
Principles of various imaging modalities used in Biomedical Imaging applications, including CT, MRI, ultrasound, PET, SPECT. Image processing operations: filtering, enhancement, feature extraction, pattern recognition and image reconstruction. Image registration and integration of different imaging modalities.

Prerequisite(s): Fourth- or fifth-year standing in the Engineering program of choice.

Biomedical Engineering 511 3 units; H(3-2/2)

Biomaterials and Biocompatibility
Basic chemical and mechanical properties of biological and synthetic materials and their role in biomedical systems, design, and production. Role of microstructure, material properties, and biocompatibility aspects in selection of biomaterials for medical or industrial applications. Incorporation of biomimetic concepts in material design. Topics may include artificial and tissue engineered products, implants, prostheses, biomimics, biosensors, and foreign body response.

Prerequisite(s): Fourth- or fifth-year standing in the Engineering program of choice.

Biomedical Engineering 515 3 units; H(3-0)

Bioengineering Methods in Systems Biology and Physiology

Prerequisite(s): Mathematics 375 or Applied Mathematics 307.

Biomedical Engineering 519 3 units; H(3-2)

Special Topics in Biomedical Engineering
Current topics in Biomedical Engineering.

Prerequisite(s): Consent of the BMES Director or designee.

MAY BE REPEATED FOR CREDIT

Biomedical Engineering 523 3 units; H(3-2)

Biomechanics of Movement
Introduction to musculoskeletal biomechanics, including experimental and analytical approaches to the analysis of movement, experimental instrumentation and devices, and joint dynamics. Review of linear algebra, introduction to three-dimensional rigid body mechanics. Determination of the joint forces and moments. Analysis of the contribution of external loading, forces generated by muscles and constraints provided by other musculoskeletal structures to predict forces in musculoskeletal joints and tissues. Numerical and modelling approaches, including inverse dynamics and optimization, and determination of segmental inertial properties. Applications in orthopaedic engineering, movement assessment, ergonomics and joint injury replacements.

Prerequisite(s): Engineering 349 and fourth-year standing in the Schulich School of Engineering.

Antirequisite(s): Credit for Biomedical Engineering 523 and Mechanical Engineering 523 will not be allowed.

Biomedical Engineering 525 3 units; H(3-2)

Biomechanics of Tissues
The structure and functional behaviour of complex tissues which make up the human musculoskeletal system (bone, cartilage, muscles, tendons, ligaments) and cardiovascular systems (heart, blood vessels) will be explained by applying basic principles of mechanics as well as continuum mechanics. Introductory topics include: review of linear and tensor algebra, kinematics of continua, deformation gradient, deformation and strain tensors, Cauchy stress tensor and equilibrium, conservation laws, stress and power measures of stress. Constitutive equations for solids and fluids will be introduced as they apply to the study of biological tissues; anisotropy and inhomogeneity, fibre-reinforced non-linear behaviour.

Prerequisite(s): Engineering 317 and 349.

Antirequisite(s): Credit for Biomedical Engineering 525 and 405 will not be allowed.

Biomedical Engineering 585 3 units; H(3-2/2)

Molecular, Cellular and Tissue Engineering
Concepts, calculations, and methodologies in molecular, cellular and tissue engineering will be discussed and applied to solve problems in the areas of molecular diagnostics, pharmaceuticals, nanomedicine and regenerative medicine. Topics include cell biology and culture, stem cells, bioreactors, biomaterials, drug delivery, fluid dynamics, kinetics, and diffusion.

Prerequisite(s): Fourth- or fifth-year standing in the Engineering program of choice.

Antirequisite(s): Credit for Biomedical Engineering 585 and any of Biomedical Engineering 407, Biomedical Engineering 519.09, and Chemical Engineering 541 will not be allowed.

Graduate Courses

Biomedical Engineering 600 3 units; H(4-0)

(formerly Biomedical Engineering 611/612/613/614)

Biomedical Engineering Foundations
An introduction to core concepts of Biomedical Engineering including an introduction to biomedical engineering fundamentals. Course allows students to select between a biology focused or an engineering focused fundamental module to complement previous course work (with approval of course instructor).

Biomedical Engineering 602 3 units; H(2-0)

(formerly Biomedical Engineering 611/612/613/614)

Biomedical Engineering Core I
Topics may include an introduction to a) biomedical engineering research, research integrity and ethics, b) career paths and progression in biomedical engineering and c) oral research communication skills.

Antirequisite(s): Credit for Biomedical Engineering 602 and either 605 or 607 will not be allowed.

NOT INCLUDED IN GPA

Biomedical Engineering 604 3 units; H(2-0)

(formerly Biomedical Engineering 611/612/613/614)

Biomedical Engineering Core II
Topics may include an introduction to a) research methodology, including experimental design and b) written research communication skills in biomedical engineering, and c) preparation and review of research proposals. Satisfactory completion of this course within one year of first registration will ensure that the Biomedical Engineering Graduate Program Research Proposal requirements are met.

Antirequisite(s): Credit for Biomedical Engineering 604 and either 605 or 607 will not be allowed.

NOT INCLUDED IN GPA

Biomedical Engineering 605 1.5 units; Q(1.5S-0)

Research Seminars in Biomedical Engineering
Reports of studies of the literature or of current research.

NOT INCLUDED IN GPA

Biomedical Engineering 607 1.5 units; Q(1.5S-0)

Research Seminars in Biomedical Engineering
Reports of studies of the literature or of current research.

NOT INCLUDED IN GPA

Biomedical Engineering 609 3 units; H(3-3/2)

Anatomy and Physiology for Biomedical Engineers
Advanced instruction on human skeleton structure, types of connective tissues, structure of joints, muscle and organ structure and function, cardiac physiology, blood properties and flow, introduction to autonomous nervous system, and disorders of the musculoskeletal system. Other topics will be covered dependent on the interests of the instructor and students.

Biomedical Engineering 619 3 units; H(3-0)

Special Problems in Biomedical Engineering
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member.

MAY BE REPEATED FOR CREDIT

Biostatistics BIST

Instruction offered by members of the Department of Mathematics and Statistics in the Faculty of Science.

Biostatistics 600 1.5 units; Q(3S-0)

Research Seminar
A professional skills course, focusing on the development of technical proficiencies that are essential for students to succeed in their future careers as practicing statistician in academia, government, or industry. The emphasis is on delivering professional presentations and using modern statistical research tools. A high level of active student participation is required.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

### Business and Environment 533 3 units; H(3-0) |

**Dilemmas and Decisions in Business**
Managers must balance ethical, social, legal and economic issues while making complex decisions that affect both internal and external stakeholders. Using legal and business case methods as the primary teaching tools, students will, individually and in groups, gain an understanding of how to balance ethical, social and legal decision-making principles, process complex facts and obtain well-reasoned results in order to make decisions in turbulent times.

**Prerequisite(s):** 60 units (10.0 full-course equivalents) including Business and Environment 395, and either admission to the Haskayne School of Business or enrolment in the Management and Society Minor.

**Antirequisite(s):** Credit for Business and Environment 533 and Management Studies 559.24 will not be allowed.

### Business and Environment 551 3 units; H(3-0) |

**Social Issues, Strategies and Shareholders**
An examination of the management of social and environmental issues. A focus on the pressing global issue of climate change and the economic impacts, both threats and opportunities, of greenhouse gas emissions mitigation on energy production and consumption throughout the economy.

**Prerequisite(s):** Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents). |

**Antirequisite(s):** Credit for Business and Environment 551 and Management Studies 559.12 will not be allowed.

### Business and Environment 559 3 units; H(3-0) |

**Selected Topics in Business and Environment**
Investigation of selected topics related to business and environment issues.

**Prerequisite(s):** Admission to the Haskayne School of Business. For certain topics, consent of the Haskayne School of Business will also be required.

**Note:** For more information on topics and prerequisite requirements, see Class Notes in the Course Search. Third-year standing is highly recommended.

**MAY BE REPEATED FOR CREDIT**

### Business and Environment 561 3 units; H(3-0) |

**Ethical Issues and the Professional Manager**
Major ethical principles are evaluated from different perspectives to provide tools for making sound ethical decisions in various business situations and in the face of moral dilemmas.

**Prerequisite(s):** Admission to the Haskayne School of Business and 30 units (5.0 full-course equivalents).

### Business and Environment 595 3 units; H(3-0) |

**Advanced Business Law**
Various advanced topics that are of current interest in business law. These topics may probe deeper into several of the topics covered in the introductory business law course or may introduce new legal topics of current interest to business managers.

**Prerequisite(s):** Admission to the Haskayne School of Business and Business and Environment 395.

### Project External Issues 3 units; H(3-0) |

**Project External Issues**
Projects will focus on the effects of external factors on business. External factors may include: corporate influences; financial interfaces; sources of funds; lending environment, owner’s and lender’s risks; government involvement; regulatory requirements; public interfaces; public information; compensation; project commissioning.

**Prerequisite(s):** Business and Environment 691.

### Business and Environment 749 3 units; H(3-0) |

**Rediscovering Leadership: The Haskayne Wilderness Retreat**
One-week intensive wilderness retreat combines experiential outdoor activities and personal growth challenges with cross-cultural First Nations teachings and ceremonies to deliver core leadership skills for social responsibility and sustainable development.

### Business and Environment 751 3 units; H(3-0) |

**Strategies for Sustainable Development**
The strategic context for making business decisions with respect to sustainable development issues. The role of sustainability in economic development, international trade relations and emerging technologies. Stakeholder perspectives and the effect of environmental and social issues on industrial performance.

### Business and Environment 753 3 units; H(3-0) |

**Managing Social and Environmental Issues in the Global Market Place**
Canadian companies operating in the international arena find themselves faced with an increasingly complex array of social and environmental risks that threaten their strategic objectives. This course examines this new class of strategic corporate risks through a review of changes in international sustainable development policy initiatives, changes in communications, the emergence of an environmental and social activist sector, and the interaction of these factors resulting in new international business risk challenges. The course uses lectures, cases, simulations and class discussion of theories and concepts.

### Business and Environment 761 3 units; H(3-0) |

### Ethics and the Professional Manager**
The role of values in business decision making; alternative moral codes and their principles; moral principles as decision tools, and reasoning through moral dilemmas; role of business in society; specific issues in business ethics; application through cases and exercises.

### Business and Environment 777 3 units; H(3-0) |

### Global Environment of Business**
Economic, political, social and legal factors affecting management decisions. Topics may include Canada in the world economy, business and government relations, business ethics and legal
environment for business. Develops knowledge and ability to analyze and deal with complexities of the business environment.

Business and Environment 789 3 units; H(3S-0)

Seminar in Business and Environment
Study and discussion of current research literature and contemporary issues on topics related to Business and Environment.

MAY BE REPEATED FOR CREDIT

Business and Environment 793 3 units; H(3-0)

Legal Environment of Business
The study of the various areas of business law. Topics may include: contracts, patents and copyrights, product liability, incorporation and other relevant legal issues.

Prerequisite(s): Organizational Behaviour and Human Resources 601, Operations Management 601, Business Technology Management 601, and Accounting 601.

Business and Environment 797 3 units; H(3S-0)

Advanced Seminar in Business and Environment
Prerequisite(s): Consent of the Haskayne School of Business.

MAY BE REPEATED FOR CREDIT

Business Technology Management BTMA

Instruction offered by members of the Haskayne School of Business.

Senior Courses

Business Technology Management 317 3 units; H(3-3T)

(formerly Management Information Systems 317)

Introduction to Business Technology Management
Focus is on digital business technology management and enterprise applications. Foundation areas include: digital business strategy, strategy alignment, enterprise analysis, IT platforms, data management, business analytics, IT governance, IT innovation, organizational impacts, and economic considerations. Technical skills are developed with an examination of managerial and leadership issues.

Prerequisite(s): Admission to the Haskayne School of Business, and either Management Studies 217 and Strategy and Global Management 217, or Business and Environment 291 and Computer Science 203.

Antirequisite(s): Credit for Business Technology Management 317 and 321 will not be allowed.

Business Technology Management 321 3 units; H(3-0)

(formerly Management Information Systems 321)

Information Technology in Business
Introduction to the fundamentals of business technology management and how such systems facilitate business transactions and decision-making at all levels of management. Topics examine the development, organization, management, control, and evaluation of information systems. Societal implications of the use of computer and networking technologies in business are also examined.

Prerequisite(s): 30 units (5.0 full-course equivalents).

Antirequisite(s): Credit for Business Technology Management 321 and 317 will not be allowed.

Note: Not available for credit towards the Bachelor of Commerce degree. Preference in enrollment is given to students who have declared a Management and Society Minor.

Business Technology Management 331 3 units; H(3-0)

(formerly Management Information Systems 331)

Data Management and Business Analytics
In today's world, businesses, consumers, and societies create massive amounts of data, by design and as a by-product of their activities. Businesses in every industry are harnessing the power of data to support operations, decision-making, planning, and risk management. Students will focus on organizing, storing, and managing the available data using relational database technologies and generating insights through business analytics techniques.

Prerequisite(s): Admission to the Haskayne School of Business and Business Technology Management 317.

Business Technology Management 333 3 units; H(3-0)

(formerly Management Information Systems 333)

Enterprise Analysis
Focus is on enterprise analysis and high level design of IT-enabled solutions to business problems. Emphasis is placed on problem identification, requirements determination, system development methodologies, modelling the enterprise architecture (business, information, application, and technology), building the IT business case, IT project management, and change management.

Prerequisite(s): Admission to the Haskayne School of Business and Business Technology Management 317.

Business Technology Management 431 3 units; H(3-0)

Gathering, Wrangling, and Analyzing Data in R
Introduction to software tools, including R, to clean/organize/analyze data, for graphical analyses, reports, and presentations. Topics include working with API's, advanced data scraping tools, dynamic and interactive visualizations, and implementations of statistical methods in data analytics. Skills are applied to typical business data sources and case studies with presentations.

Prerequisite(s): Admission to the Haskayne School of Business and Business Technology Management 317.

Business Technology Management 453 3 units; H(3-0)

(formerly Management Information Systems 453)

Business Technology Management Field Project
Student teams are assigned to organizations in Calgary and the surrounding area to solve specific information and technology issues. Teams investigate the issues and present proposed solutions to the organization contact. Teams will execute the approved project plan and present a final report both orally and in writing to the organization contact. The project may involve interviewing, library and Internet research, and data collection.

Prerequisite(s): Admission to the Haskayne School of Business, Business Technology Management 317 and one senior Business Technology Management course.

Corequisite(s): One other senior Business Technology Management course.

Business Technology Management 459 3 units; H(3-0)

(formerly Management Information Systems 459)

Decision Support Application Development using VBA Programming
Visual Basic for Applications (VBA) is used to create decision support systems and other applications across Microsoft Office Suite applications. Instruction in how to use VBA skills to produce business applications. Focus is on the creation of applications that will allow managers to make meaningful decisions using available data like financial and other industry data from both internal and external sources.

Prerequisite(s): Admission to the Haskayne School of Business and Business Technology Management 317.

Business Technology Management 461 3 units; H(3-0)

(formerly Management Information Systems 461)

IT Platform Management
Technology background related to telecommunications, data communications and IT platforms. Technologies and management issues associated with network models, networking, security and compliance, platform design and competition, network planning design, integration, implementation, and operation including inter-organizational issues. Current and future issues in organizational implications of telecommunications and IT platform business technologies.

Prerequisite(s): Admission to the Haskayne School of Business and Business Technology Management 317.

Business Technology Management 463 3 units; H(3-0)

(formerly Management Information Systems 463)

Issues in Business Technology Management
Incorporating the customer point of view, exposure to issues and emerging issues confronting both information systems managers and functional area managers using an integrated learning approach. Emphasis is on the managerial, organizational, and technological issues associated with effective and efficient use of information, technology resources, and IT platforms.

Prerequisite(s): Admission to the Haskayne School of Business and Business Technology Management 317.

Business Technology Management 465 3 units; H(3-0)

(formerly Management Information Systems 465)

Enterprise Systems
Exploration of the technologies and issues underlying enterprise systems, enterprise application integration, workflow systems, and information analytics. Focus on strategic, managerial, and technical implications of the use of such systems in organizations. Examination of the current
managerial practices for enterprise system design, implementation, and usage.

**Prerequisite(s):** Admission to the Haskayne School of Business and Business Technology Management 317.

**Business Technology Management 467** 3 units; H(3-0)
(formerly Management Information Systems 467)

**e-Business**
Role, management and use of information technologies to enable a range of organizational and business relationships, models and strategies. Topics include developing an IT strategy; digital marketing; customer relationship management (CRM); supply chain management (SCM); planning, developing, and maintaining websites cloud computing; IT platforms; legal, privacy, and security issues; and information technologies for facilitating the use of data, knowledge, and multimedia.

**Prerequisite(s):** Admission to the Haskayne School of Business and Business Technology Management 317.

**Antirequisite(s):** Credit for Business Technology Management 531 and 559.03 will not be allowed.

**Business Technology Management 559** 3 units; H(3-0)
(formerly Management Information Systems 559)

**Selected Topics in Business Technology Management**
Discussion of current or special interest topics in Business Technology Management from a managerial orientation.

**Prerequisite(s):** Admission to the Haskayne School of Business and Business Technology Management 317. For certain topics, consent of the Haskayne School of Business will also be required.

**Note:** For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

**MAY BE REPEATED FOR CREDIT**

**Graduate Courses**

**Business Technology Management 601** 3 units; H(3-0)
(formerly Management Information Systems 601)

**Business Technology Management**
The fundamentals of how to use information technology (IT) innovatively to create competitive firms, to manage global interdependencies, and to provide and support quality products and services efficiently and effectively. Topics covered include trends in IT and how they may affect organizations, how organizations and the value chain can be redesigned using IT to encourage and facilitate better performance, how the Internet and electronic commerce impact organizations and markets, how IT-based platforms drive the network economy.

**Business Technology Management 725** 3 units; H(3-0)
(formerly Management Information Systems 725)

**e-Business**
The fundamental theories and practices in e-Business. Topics include economic motivations for e-Business, the underlying information technologies and applications that enable e-Business, and e-Business strategies.

**Prerequisite(s):** Business Technology Management 601.

**Business Technology Management 731** 3 units; H(3-0)

**Data Management and Business Analytics**
Covers organizing, storing, and managing available data using relational database technologies and generating insights through business analytics techniques.

**Prerequisite(s):** Business Technology Management 601.

**Business Technology Management 735** 3 units; H(3-0)
(formerly Management Information Systems 735)

**Enterprise Analysis**
Course focus is on enterprise analysis and management of IT-enabled solutions to business problems. Emphasis is placed on problem identification, requirements determination, process analysis, enterprise architecture design and IT auditing using the COBIT framework.

**Prerequisite(s):** Business Technology Management 601.

**Business Technology Management 736** 3 units; H(3-0)

**Data Analytics I**
Covers tools and methods used in data analytics to discover, collect, organize, and clean data to make it ready for analysis. Software packages used to clean and organize the data for analysis will be introduced, as well as software to enable users’ understanding of the data that is collected.

**Prerequisite(s):** Business Technology Management 601.

**Business Technology Management 737** 3 units; H(3-0)
(formerly Management Information Systems 737)

**Data Analytics II**
Covers tools and methods used in data analysis. Focus is on analytic and mapping methods, such as data mining, text mining, machine learning, social network analytics and preference mapping, and their application to business data analytics.

**Prerequisite(s):** Business Technology Management 601.

**Business Technology Management 743** 3 units; H(3-0)
(formerly Management Information Systems 743)

**IT Platform Strategy**
Basic characteristics of industries based on network and information goods. Topics include platform-mediated networks, network effects, versioning, pricing, and compatibility, discussed through analytical models and business cases.

**Prerequisite(s):** Business Technology Management 601.

**Business Technology Management 797** 3 units; H(3S-0)
(formerly Management Information Systems 797)

**Advanced Seminar in Business Technology Management**

**Prerequisite(s):** Consent of the Haskayne School of Business.

**MAY BE REPEATED FOR CREDIT**

**Business Technology Management 799** 3 units; H(3S-0)
(formerly Management Information Systems 799)

**Doctoral Seminars in Business Technology Management**
799.01. PhD Seminar I in Business Technology Management
799.02. PhD Seminar II in Business Technology Management
799.03. PhD Seminar III in Business Technology Management
799.04. PhD Seminar IV in Business Technology Management

**Canadian Studies**

**CNST Courses of Instruction**

**Junior Course**

**Canadian Studies 201** 3 units; H(3-0)

**Introduction to Canadian Studies**
An interdisciplinary examination of the social, cultural, ethnic, political, economic, national, and regional dimensions of Canada, past, present and future.

**Senior Courses**

**Canadian Studies 333** 3 units; H(3-0)

**A Comparison of Canadian and American Cultures**
An interdisciplinary comparison of Canadian and American cultures and cultural assumptions. A variety of issues and contexts will be dealt with from historical and contemporary perspectives.

**Canadian Studies 337** 3 units; H(3-0)

**Introduction to Folklore: The Canadian Context**
Introduction to the academic study of folklore: basic terminology, folk groups, performance and applications with examples taken from the Canadian and Alaskan context. Introduction to traditional genres of folkloristic expression and analyses of current folk groups and their folklore.

**Canadian Studies 355** 3 units; H(3-0)

**Canadian Cities**
Canadian urban life from an interdisciplinary perspective.

**Canadian Studies 361** 3 units; H(3-0)

**Gender, Race and Ethnicity in Canada**
An interdisciplinary introduction to gender, race and ethnicity in Canada to provide an understanding of race, ethnicity and gender as simultaneous and intersecting systems of relationship and meaning.
Canadian Studies 401 3 units; H(3-0)

**Topics in Canadian Studies**
An examination of selected social, cultural, ethnic, economic, political, regional, or national topics in Canadian Studies.

**Antirequisite(s):** Canadian Studies 439 and Interdisciplinary Studies 590 will not be allowed.

**Credit for Canadian Studies**
Students in their fourth year.

**Directed readings for Canadian Studies Honours Program and one of: Art 361, Communication and Media Studies 313, History 300, Political Science 399 or Sociology 313.

**Prerequisite(s):** Credit for Canadian Studies 598 and Interdisciplinary Studies 590 will not be allowed.

**Note:** It is intended that students take Canadian Studies 597 and 598 at the same time.

---

### Cellular, Molecular and Microbial Biology CMMB

Instruction offered by members of the Department of Biological Sciences in the Faculty of Science.

**Note:** Limited amounts of non-scheduled class time involvement will be required for this course.

---

### Senior Courses

**Cellular, Molecular and Microbial Biology 343**
Microbiology
An introductory study of prokaryotes, viruses and immunology with emphasis on systematics, ecology, physiology, molecular biology and roles in pathogenesis of the major groups of prokaryotes.

**Prerequisite(s):** Chemistry 351 and one of Biology 231 or 243 or 311 or Medical Science 341.

**Note:** Prior completion of or concurrent registration in Biochemistry 393 and Chemistry 353 is strongly recommended.

**Cellular, Molecular and Microbial Biology 403**
Developmental Biology of Animals
Study of the mechanism of cellular differentiation with emphasis on intra- and intercellular processes.

**Prerequisite(s):** Biochemistry 393; one of Biology 311 or Medical Science 341; and one of Biology 331 or Medical Science 351.

**Cellular, Molecular and Microbial Biology 411**
Molecular Genetics
Molecular biology and gene expression in prokaryotes and eukaryotes. Topics include: DNA topology, genome structure, chromatin structure, DNA replication, RNA repair and recombination, mechanisms of transcription and gene expression, post-transcriptional RNA processing, translation.

**Prerequisite(s):** One of Biology 311 or Medical Science 341; one of Biology 331 or Medical Science 351; and one of Biochemistry 341 or Biochemistry 393.

**Note:** Prior completion of or concurrent registration in Biochemistry 401 or 443 is strongly recommended.

**Cellular, Molecular and Microbial Biology 413**
Human Genetics
The principles of genetics as applied to human and medical genetics. Mendelian and multifactorial inheritance of normal and abnormal traits, pedigree analysis, segregation, linkage and gene mapping. Cytogenetics and developmental genetics. Population genetics including inbreeding and evolution in humans. Genetic predisposition to disease.

**Prerequisite(s):** Biology 311 or Medical Science 341.

**Cellular, Molecular and Microbial Biology 421**
Virology
Comprehensive overview of virus structure and replication; molecular events involved in virus infection and replication including genetics, biochemistry and molecular biology of bacterial, plant and animal viruses. Areas of persistent viruses, viral immunology, cancer and AIDS will be covered.

**Prerequisite(s):** Biochemistry 393 and Cellular, Molecular and Microbial Biology 343; and one of Biology 311 or Medical Science 341; and one of Biology 331 or Medical Science 351.

**Note:** Prior completion of or concurrent registration in Biochemistry 401 or 443 is strongly recommended.

**Cellular, Molecular and Microbial Biology 431**
Bacterial Pathogens
An introduction to microbes that cause infections (in humans, other animals and plants). Topics include: the relationship between pathogen and host, ability of pathogens to colonize, reproduce and cause disease, the role of antibiotics and vaccines in treatment and prevention of infection, antibiotic resistance in bacteria, environmental control of virulence factor production.

**Prerequisite(s):** Cellular, Molecular and Microbial Biology 343.

**Cellular, Molecular and Microbial Biology 443**
Microbial Physiology
The focus is structure and function of prokaryotic cells. Topics include cell envelope structure, cell division, transport and secretion, signal transduction, differentiation and development, bacterial growth and energetics, and the diversity of metabolic pathways in bacteria and archaea. The laboratory introduces analytical techniques commonly used in bacterial physiology, and some useful biochemical assays.

**Prerequisite(s):** Biochemistry 393 and Cellular, Molecular and Microbial Biology 343.

**Cellular, Molecular and Microbial Biology 451**
Molecular Analysis of Biological Systems
A laboratory course emphasizing techniques in molecular biology that can be applied to the analysis of problems in cellular, molecular and microbial biology.

**Prerequisite(s):** Cellular, Molecular and Microbial Biology 411 and admission to the Cellular, Molecular and Microbial Biology major or to the Biological Science Honours program.

**Antirequisite(s):** Credit for Cellular, Molecular and Microbial Biology 451 and either Biochemistry 401 or 441 will not be allowed.

**Cellular, Molecular and Microbial Biology 461**
Functional Genomics and Molecular Networks
Introduction to high-throughput methods for global functional and network analysis of genes and proteins. Topics include microarrays, chromatin immunoprecipitation, synthetic genetic array analysis, next-generation sequencing and network topology.

**Prerequisite(s):** Biology 331.

</tbody>
</table>
Courses of Instruction

Lectures, small group interactive sessions, specified readings.

Prerequisite(s): Cellular, Molecular and Microbial Biology 527 or Medical Science 321.

Graduate Course

Enrollment in any graduate course requires consent of the Department.

Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

600-level courses are available with permission to undergraduate students in the final year of their programs.

Cellular, Molecular and Microbial Biology 637
3 units; H(3-0)

Advanced Topics in Molecular Microbiology

Techniques and discussion of recent literature in molecular microbiology. Topics covered will vary from year-to-year, but could include bioinformatics, genomics, mutagenesis, advanced microscopy techniques, proteomics, vectors and cloning techniques, gene expression, and over-expression of proteins, as they relate to the study of prokaryotic systems. Course content will be tailored to the interests of the graduate students enrolled in the class in a given year.

Central and East European Studies CEST

Instruction offered by the Faculty of Arts.

Senior Course

Central and East European Studies 313
3 units; H(3-0)

An Introduction to Cultural Traditions

A survey of Russian and Eastern European cultural history from the settlement of the Slavic peoples to the early twentieth century. Included will be such topics as the ethnic, linguistic, and cultural composition of the region; art and architecture of medieval Russia; the Enlightenment; national revival movements; literature, music and painting; modernism; the cultural efflorescence of the early Soviet period.

Prerequisite(s): Consent of the Centre for International Students and Study Abroad.

Antirequisite(s): Credit for Central and East European Studies 313 and History 493.19 will not be allowed.

Note: Normally taught as part of the Term Abroad Program.

Chemical Engineering ENCH

Instruction offered by members of the Department of Chemical and Petroleum Engineering in the Schulich School of Engineering.

Senior Courses

Chemical Engineering 315
3 units; H(3-2)

Chemical Engineering Process Calculation

Material and energy balances of physical and chemical systems for steady state and transient conditions. Introduction to analysis and synthesis of chemical processes.

Corequisite(s): Engineering 311.

Chemical Engineering 317
3 units; H(3-1T)

Materials Science for Chemical Engineers

Classes of inorganic and polymeric materials and their applications, crystal structure determination, phase diagrams and phase transformation, defects and material properties, materials processing methods, characterization tools for materials engineers, nanotechnology.

Prerequisite(s): Engineering 202 and Mathematics 275 or Applied Mathematics 217.

Corequisite(s): Chemistry 357.

Chemical Engineering 311
3 units; H(3-1T/2)

Process Fluid Dynamics

Fluid Properties; Newtonian and non-Newtonian fluids. Fluid statics. Bernoulli equation; derivation and applications. Control volume and system representation. Differential analysis of flows. The Navier-Stokes equation; applications. Dimensional analysis. Analysis of flows in conduits; laminar and turbulent flows; single-pipe and multiple-pipe systems. Forces on immersed bodies; fluidization; Metering.

Prerequisite(s): Engineering 201 and 202; and Mathematics 375 or Applied Mathematics 307.

Corequisite(s): Chemical Engineering 401.

Chemical Engineering 401
3 units; H(3-1)

Partial Differential Equations in Transport Processes

Prerequisite(s): Chemical Engineering 331 and Mathematics 375 or Applied Mathematics 307.

Corequisite(s): Chemical Engineering 403.

Chemical Engineering 403
3 units; H(3-1T/4/2)

Heat Transfer

Prerequisite(s): Mathematics 375 or Applied Mathematics 307 and Chemical Engineering 331.

Corequisite(s): Chemical Engineering 405.

Chemical Engineering 405
3 units; H(3-1T/2)

Separation Processes I

Diffusion and convective mass transfer. Staged and continuous contacting. Solid-liquid and liquid-liquid extraction, distillation, absorption and stripping.

Prerequisite(s): Chemical Engineering 403 and 427.

Chemical Engineering 407
3 units; H(3-2T)

Numerical Methods in Chemical and Oil & Gas Engineering

The theory and use of numerical computational procedures to solve chemical and oil and gas engineering problems. Methods for solution of nonlinear equations, solution of simultaneous linear equations, regression, curve fitting, solution of the algebraic eigenvalue problem, interpolation, differentiation, integration, solution of ordinary differential equations and partial differential equations are included.

Prerequisite(s): Engineering 233 and Mathematics 375 or Applied Mathematics 307.

Chemical Engineering 407
3 units; H(3-2T)

Chemical Engineering Antirequisite(s): Credit for Chemical Engineering 407 and Engineering 407 will not be allowed.

Chemical Engineering 421
3 units; H(3-1T)

Chemical Engineering Process Development

Design of chemical processing units and plants; cost estimates and chemical process economics; optimization techniques; introduction to linear programming. Safety and environmental considerations in process design.

Prerequisite(s): Chemical Engineering 315.

Antirequisite(s): Credit for Chemical Engineering 423 and Petroleum Engineering 423 will not be allowed.

Chemical Engineering 423
3 units; H(3-1)

Chemical Engineering Process Development

Design of chemical processing units and plants; cost estimates and chemical process economics; optimization techniques; introduction to linear programming. Safety and environmental considerations in process design.

Prerequisite(s): Chemical Engineering 315.

Antirequisite(s): Credit for Chemical Engineering 423 and Petroleum Engineering 423 will not be allowed.

Chemical Engineering 427
3 units; H(3-1T)

Chemical Engineering Thermodynamics

Review of first and second law principles; application to the properties of fluids and solutions; vapour liquid equilibria; the third law; applications to chemical equilibrium and chemical reactions.

Prerequisite(s): Engineering 311 and Chemical Engineering 315.

Chemical Engineering 429
3 units; H(3-2T/3/2)

Process Dynamics and Control

Mathematical models describing transient response characteristics of basic process elements; use of a dynamic process simulator; block flow diagram of a feedback control loop; process control hardware; basic control modes; tuning feedback controllers; cascade control; feedforward control; common control loops; distillation column control; design of multiple single loop controllers; plant wide modelling and control.

Prerequisite(s): Chemical Engineering 315 and Mathematics 375.

Corequisite(s): Chemical Engineering 405.

Antirequisite(s): Credit for Chemical Engineering 429 and 529 will not be allowed.

Chemical Engineering 501
3 units; H(3-1T)

Transport Phenomena

Prerequisite(s): Chemical Engineering 401.

Chemical Engineering 503
3 units; H(3-T)

Crude Oil Upgrading and Refining

Upgrading objectives; analysis and composition of non-distillable material and its relationship to upgrading; upgrading processes; refinery products
Chemical Engineering 505 3 units; H(3-1T-1)

Separation Processes II
Concepts in mass transfer including molecular diffusion, mass transfer rates, and mass transfer coefficients. Application of these and other fundamental concepts in chemical engineering to develop process design specifications for various unit operations which may include: crystallization, humidification and cooling, drying, adsorption, and membrane processes.

Prerequisite(s): Chemical Engineering 405.

Chemical Engineering 511 3 units; H(3-4)
Chemical Process Design I
Team design project applying principles of process engineering and project management; Gantt charts; critical path method; process simulation, degrees of freedom analysis; considerations in process selection; plant location; block flow diagrams; process flow diagrams; short cut process equipment design/sizing procedures; preliminary equipment cost estimating techniques.

Prerequisite(s): Chemical Engineering 405, 421, 423 and 429.
Antirequisite(s): Credit for Chemical Engineering 511 and Petroleum Engineering 511 will not be allowed.

Note: Restricted to Chemical Engineering students only. Consent of department required for non-U of C students. Chemical Engineering 511 and 531 are a required two-course sequence that shall be completed in the same academic year.

Chemical Engineering 519 3 units; H(3-1T)
Special Topics
Current advanced topics in Chemical Engineering.

Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Chemical Engineering 530 3 units; H(3-1T)
Electrochemical Engineering

Antirequisite(s): Credit for Chemical Engineering 530 and any of 519.13, 519.14 or 651 will not be allowed.

Chemical Engineering 531 3 units; H(2-6)
Chemical Process Design II
Team design project continuing from Chemical Engineering 511. Detailed design of large commercial plants involving the preparation of a process and instrumentation diagram; emphasis on computer design procedures; specification sheets for chemical processing equipment such as separators, pumps, compressors, columns and process piping. Other topics include operational considerations in design, plant safety; relief system design; waste treatment and pollution control processes; plant and equipment plot plans; control and computer simulation.

Prerequisite(s): Chemical Engineering 511.
Note: Chemical Engineering 511 and 531 are a required two-course sequence that shall be completed in the same academic year.

Chemical Engineering 535 3 units; H(3-2/2)
Principles of Biochemical Engineering
Introduction to biochemical, enzyme kinetics and cell growth and metabolism. Aspects of mass transfer, heat transfer and fluid flow related to the design of biological process equipment. Fermentations, sterilization and extraction techniques. Treatment of effluents. Introduction to bio-reactor design and scale-up. Introduction to process instrumentation and control.

Prerequisite(s): Chemistry 357.

Chemical Engineering 537 3 units; H(3-1T)
Computational Thermodynamics
Amalgamation of thermodynamic models and computational techniques with application to industrially important thermodynamic problems such as multi-component flash calculations, reacting systems, phase stability and gas hydrates.

Prerequisite(s): Chemical Engineering 427.

Chemical Engineering 539 3 units; H(3-1T)
Polymer Engineering
Introduction to polymer science and technology. Molecular structure, processing, rheology, thermal, physical and mechanical properties. Synthetic and natural polymers used in biomedical, manufacturing and other advanced technological applications.

Prerequisite(s): Chemical Engineering 403.
Corequisite(s): Prerequisite or Corequisite: Chemistry 357.

Chemical Engineering 551 3 units; H(2-4/1)
Chemical Engineering Laboratory
Experiments which demonstrate the operation of chemical process equipment involving heat and/or mass transfer, or kinetics. Lectures will cover experimental design and applied statistics.

Prerequisite(s): Chemical Engineering 405.
Corequisite(s): Chemical Engineering 505 or Biomedical Engineering 500 or 501.
Antirequisite(s): Credit for Chemical Engineering 551 and Petroleum Engineering 551 will not be allowed.

Graduate Courses

Chemical Engineering 607 3 units; H(3-0)
Natural Gas Processing Principles
Physical and chemical properties of natural gases; vapour-liquid equilibrium data and computations; flow of gas and gas-liquid mixtures; separation of gaseous mixtures; heat transfer in gas processing; production of natural gas and its associated liquids.

Note: This course does not count towards the degree requirements of MSC and PhD students.

Chemical Engineering 609 3 units; H(3-0)
Natural Gas Processing Technology
Design and operational criteria in transporting and processing of natural gas; refrigeration and compression; cryogenics; hydrocarbon dew point control; LPG recovery; sulphur recovery; mechanical flow diagrams; process simulation.

Prerequisite(s): Chemical Engineering 607 or an undergraduate degree in Chemical Engineering.

Chemical Engineering 613 3 units; H(3-0)
Advanced Topics in Mass Transfer
Advanced concepts in mass transfer in multiphase systems. Mass transfer with simultaneous chemical reaction and heat transfer.

Chemical Engineering 615 3 units; H(3-1.5)
Model Predictive Control

Chemical Engineering 617 3 units; H(3-1.5)
Modelling and Identification Advanced Control

Chemical Engineering 619 3 units; H(3-0)
Special Problems
Advanced studies on specialized topics in chemical, petroleum, biochemical and environmental engineering.

MAY BE REPEATED FOR CREDIT

Chemical Engineering 620 6 units; F(0-4)
Graduate Project
Individual project in the student’s area of specialization under the guidance of a faculty member. A written proposal, one or more written progress reports, and a final written report are required. An oral presentation is required upon completion of the course. Open only to students in the MEng (course-based) program.

Prerequisite(s): Consent of the Department Head or Associate Head Graduate Studies.

Antirequisite(s): Credit for Chemical Engineering 620 and 699 will not be allowed.

Chemical Engineering 621 3 units; H(3-0)
Reservoir Simulation
Enhanced recovery modelling (generalized black-oil models, compositional and miscible), well treatment, grid orientation. New developments in griding, thermal models, naturally fractured reservoirs, modelling of induced fractures (hydraulic and waterflood), reservoir geomechanics, and practical aspects of conducting simulation studies.

Prerequisite(s): Petroleum Engineering 429 or 523.

Chemical Engineering 623 3 units; H(3-0)
Chemical Reactor Design
Advanced study of design and operation of chemical reactors for both homogeneous and heterogeneous systems, batch, continuous flow stirred tank, tubular and multibed adiabatic reactors. Cold shot cooling in reactors. Optimal temperature gradients and yields. Catalyst effectiveness factors and optimal control with catalytic reactors. Analysis of sulphur plant reactor design including cost optimization.

Prerequisite(s): Chemical Engineering 421.

Chemical Engineering 625 3 units; H(3-0)
Advanced Topics in Heat Transfer
Diffusive and convective transport of heat. Analytical and approximate solutions to steady state and transient conduction and convection problems.
Courses of Instruction

Superposition techniques. Forced convection of heat in laminar and turbulent regimes.

Chemical Engineering 627  3 units; H(3-1.5)

Chemical Process Simulation
Object oriented programming applied to the design of a steady state chemical process simulator via the sequential modular approach and by the equation-based approach. Material and energy balances for systems of process units.

Chemical Engineering 629  3 units; H(3-0)

Secondary and Tertiary Recovery

Prerequisite(s): Petroleum Engineering 525.

Chemical Engineering 630  3 units; H(3-1T)

Electrochemical Engineering

Antirequisite(s): Credit for Chemical Engineering 630 and any of 519.13, 519.14 or 651 will not be allowed.

Chemical Engineering 631  3 units; H(3-0)

Advanced Topics in Fluid Mechanics

Chemical Engineering 633  3 units; H(3-0)

Chemical Thermodynamics
Advanced application of thermodynamic principles. Calculation of thermodynamic properties; ideal and non-ideal solution theory; calculation of phase equilibria; properties of reacting mixtures.

Prerequisite(s): Chemical Engineering 427.

Chemical Engineering 639  3 units; H(3-0)

Applied Numerical Methods in Engineering

Note: Knowledge of a programming language and undergraduate-level numerical methods is necessary.

Chemical Engineering 643  3 units; H(3-0)
(Environemntal Engineering 641)

Air Pollution Control Engineering
Introduction to air quality and air pollution. Energy and air pollution. Fossil fuel combustion and related air pollution. Industrial air pollution control. Control of particulate matter. Control of VOCs, SOx, and NOx. Adsorption, absorption and biofiltration of air pollutants. GHG emission control. Recent advances on related topics.

Antirequisite(s): Credit for Chemical Engineering 643 and Environmental Engineering 641 will not be allowed.

Chemical Engineering 645  3 units; H(3-0)
(Environemntal Engineering 661)

Industrial and Produced Wastewater Treatment
Sources and characterization of industrial wastewater. Treatment objectives and regulations. Unit and process design. Physical/chemical treatment including sedimentation, coagulation, filtration, absorption, adsorption, ion exchange, membrane processes and pH adjustment.

Note: Credit for Chemical Engineering 645 and Environmental Engineering 661 will not be allowed.

Chemical Engineering 647  3 units; H(3-0)

Thermal Recovery Methods

Prerequisite(s): Petroleum Engineering 429, 523 or 621.

Chemical Engineering 649  3 units; H(3-0)

Naturally Fractured Reservoirs
Classification and characterization of naturally fractured reservoirs. Drilling and completion methods. Production characteristics. Tight gas reservoirs. Reserve estimation. Emphasis is placed on the relationship between geology, log interpretation, well testing, and primary-secondary recovery of hydrocarbons from naturally fractured reservoirs.

Chemical Engineering 653  3 units; H(3-0)

Horizontal Wells for Petroleum Production
Drilling and completion methods for horizontal wells; mathematical analysis of steady state flow to horizontal wells and well combinations; pseudo steady state and constant well bore pressure models; theoretical comparisons of predicted performance and coning behaviour of horizontal and vertical well patterns; performance in fractured reservoirs; potential for horizontal wells in heavy oil and bitumen production; basic conceptual ideas of steam-assisted gravity drainage.

Prerequisite(s): Petroleum Engineering 429 or Petroleum Engineering 523.

Chemical Engineering 657  3 units; H(3-0)

Advanced Reservoir Engineering
Formulation and solution of reservoir-engineering problems including combination of variables, Laplace transform, approximate Integral methods, and solution methods of moving boundary problems. Examples from thermal processes (e.g. hot waterflooding, SAGD), different recovery mechanisms (e.g. imbibition, expansion drive, solution-gas drive), well testing problems and naturally fractured reservoirs.

Prerequisite(s): Petroleum Engineering 429 or Petroleum Engineering 523.

Chemical Engineering 661  3 units; H(3-0)

Geostatistics for Reservoir Characterization
Statistical/probability concepts, exploratory data analysis, spatial structural analysis, estimation theory (Kriging), integration of auxiliary information and conditional stochastic simulation. Special emphasis on reservoir characterization and the particular problems encountered in that area. The geostatistical methodology for reservoir characterization will be demonstrated on a fluvial reservoir example.

Prerequisite(s): Petroleum Engineering 429 or Petroleum Engineering 523.

Chemical Engineering 665  3 units; H(3-0)
(Environemntal Engineering 665)

Wastewater Issues for the Oil and Gas Industry

Note: Credit for Chemical Engineering 665 and Environmental Engineering 665 will not be allowed.

Chemical Engineering 667  3 units; H(3-0)

Advanced Oil and Gas Engineering
Problems related to production of conventional oil, heavy oil and natural gas; analysis of the interactions of oil, water and gas, effects of fluid properties, rock structure and capillary, gravity and viscous forces acting on the reservoir system; application to the design of improved oil and gas recovery methods. New processes in oil and gas recovery.

Prerequisite(s): Petroleum Engineering 429 or Petroleum Engineering 523.

Chemical Engineering 687  3 units; H(3-0)
(formerly Chemical Engineering 619.60)

Petroleum Economics
Economic principles and risk management practices in the petroleum industry. Project selection; investment ranking; budgeting; and portfolio development. Decision making under uncertainty and risk.

Antirequisite(s): Credit for Chemical Engineering 687 and Petroleum Engineering 626 will not be allowed.

Chemical Engineering 689  3 units; H(3-0)

Drilling Advances, Modelling and Simulation
Application of drilling optimization simulator tools to optimize rate of penetration and minimize cost. Drilling hydraulics simulation, directional well string torque and drag calculations, drilling fluid selection and analysis and real time drilling rate analysis.

Antirequisite(s): Credit for Chemical Engineering 689 and either Chemical Engineering 619.91 or Petroleum Engineering 827 will not be allowed.
Courses of Instruction

Chemical Engineering 698  6 units; F(S-0)  (Geology 698)

Reservoir Characterization for Field Development
A team-based, integrated reservoir description experience working with geophysical, geological, petrophysical, and engineering data to produce a field development plan.

Prerequisite(s): Chemical Engineering 621, Geology 697 and Organizational Behaviour and Human Resources 789 and admission to the Master of Engineering with Reservoir Characterization Specialization.

Antirequisite(s): Credit for Chemical Engineering 698 and either 619.95 and 619.96 will not be allowed.

Chemical Engineering 699  3 units; H(0-4)

Special Project
Project study conducted under the guidance of a faculty member and intended to expose the student to the tools, techniques and basic aspects of research. A written comprehensive report and one or more written progress reports are required.

Prerequisite(s): Consent of the Department Head or Associate Head Graduate Studies.

Antirequisite(s): Credit for Chemical Engineering 699 and 620 will not be allowed.

MAY BE REPEATED FOR CREDIT

Chemical Engineering 701  3 units; H(3-0)  (Environmental Engineering 621)

Experimental Design and Error Analysis
Statistical analysis and design of engineering experiments. Random variables and sampling distributions; estimation and hypothesis testing; concepts of central tendency; variability, confidence level; correlation, regression and variation analysis; robust estimation; experiments of evaluation; experiments of comparison; factorial experiments (analysis of variance); experimental designs (including randomization, replication, blocking and analysis of covariance).

Antirequisite(s): Credit for more than one of Chemical Engineering 701, Environmental Engineering 621, Chemical Engineering 619.45 and 619.82 will not be allowed.

Note: Intended for MSc/PhD students. MEng students may be able to register with Instructor's Permission.

Chemical Engineering 703  3 units; H(3-0)

Advanced Mathematical Methods in Engineering
Review of theory of linear algebra. Review of ordinary differential equations: linear, non-linear; series solutions; special exact solutions; applications. Partial differential equations: geometric interpretation; characteristic curves; separation of variables; the Sturm-Liouville problem and Fourier series; eigenfunction expansion; Fourier, Laplace and Hankel transforms; self-similarity; Green's function; applications.

Antirequisite(s): Credit for Chemical Engineering 703 and 619.83 will not be allowed.

Note: Intended for MSc/PhD students. MEng students may be able to register with Instructor's Permission.

Chemistry CHEM

Instruction offered by members of the Department of Chemistry in the Faculty of Science. Students interested in taking Chemistry courses are urged to read the advice in the Faculty of Science. The chemistry of water. The chemistry of inorganic and organic examples. The focus is on developing a general awareness of the chemistry all around us; where chemical principles are surveyed in a variety of current and everyday contexts.

Antirequisite(s): Not open to students in Honours, Majors or Minors in Chemistry programs, or to Environmental Science and Natural Sciences students with concentrations in Chemistry. Credit for Chemistry 301 and any of 201, 209, 211 or 213 will not be allowed.

Note: Some previous exposure to chemistry, e.g. Chemistry 20, is strongly recommended. This course will not serve as a prerequisite for senior chemistry courses.

Chemistry 311  3 units; H(3-4)

Analytical Chemistry: Quantitative Analysis

Prerequisite(s): Chemistry 201 or 211; and 203 or 213; and one of Mathematics 249, 251, 265, 275 or Applied Mathematics 217.

Chemistry 315  3 units; H(3-4)

Analytical Chemistry: Introductory Instrumental Analysis

Prerequisite(s): Chemistry 311.
Courses of Instruction

Chemistry 321 3 units; H(3-0)

Environmental Chemistry
A survey course of major aspects of environmental chemistry including the natural chemical cycles in the biosphere, atmosphere, hydrosphere and atmosphere and the consequences of anthropogenic disturbances to these cycles. Topics discussed will include: Aquatic Chemistry and water pollution, Atmospheric Chemistry and its alteration, Soil Chemistry and the fate of pollutants. Hazardous waste. Toxicological Chemistry.
Prerequisite(s): One of Chemistry 203, 209 or 213.

Chemistry 331 3 units; H(3-3)

Inorganic Chemistry: Main Group Elements
Lectures: The structure of many-electron atoms. Bonding, stereochemistry and symmetry in inorganic compounds. Solid-state science and aspects of inorganic solution chemistry. The chemistry of the main group elements. Laboratory: Applications of chemical principles to inorganic synthetic and qualitative analytical problems.
Prerequisite(s): Chemistry 201 or 211; and 203 or 213.

Chemistry 333 3 units; H(3-3)

Inorganic Chemistry: Transition Metals
Lectures: Bonding models for metals and for transition metal compounds. Interpretation of redox and thermodynamic properties based on ligand field theory. Co-ordination and organometallic compounds of the transition metals. Metal complexes as catalysts in industry and biology. Laboratory: Synthesis, analysis, and physical investigations of transition metal compounds which illustrate their important properties.
Prerequisite(s): Chemistry 201 or 211; and 203 or 213; and 331.

Chemistry 351 3 units; H(3-1T-3)

Organic Chemistry I
An introduction to Organic Chemistry from a mechanistic perspective. Structure, bonding, and function, e.g. physical properties and reactivity. Stereochemistry; kinetics and thermodynamics. Spectroscopy (nuclear magnetic resonance, infra-red, ultra-violet/visible, and mass spectrometric techniques). Substitution and elimination reactions of saturated functional groups - the chemistry of alkanes, alkyl halides, alcohols and their derivatives. Laboratory: Practical techniques.
Prerequisite(s): Chemistry 201 or 211; and 203 or 213.
Antirequisite(s): Credit for Chemistry 351 and 357 will not be allowed.
Note: Students are advised to take Chemistry 351 and 353 in consecutive terms.

Chemistry 353 3 units; H(3-1T-3)

Organic Chemistry II
The concept and implications of aromaticity. The reactions of unsaturated functional groups via substitution, elimination and addition mechanisms - the chemistry of alkenes, alkynes, aromatics, aldehydes, ketones and carboxylic acids and their derivatives. Laboratory: Characteristic functional group reactivity, synthesis, and qualitative organic analysis.
Prerequisite(s): Chemistry 351.
Antirequisite(s): Credit for Chemistry 353 and either 355 or 357 will not be allowed.
Note: Students are advised to take Chemistry 351 and 353 in consecutive terms.

Chemistry 355 3 units; H(3-1T-3)

Organic Chemistry II (for Chemists)
Mechanisms and synthetic applications of the reactions of alkenes, alkynes, aromatics, carbonyl compounds, carboxylic acids and derivatives, and conjugated systems such as 1, 3-dienes and enones. The concept of aromaticity and its effect on chemical behaviour. Laboratory: Emphasis on organic synthesis and the methods of qualitative organic analysis.
Prerequisite(s): Chemistry 201 or 211; and 203 or 213; and 351 and admission to the Chemistry major, Applied Chemistry major or Chemical Physics major.
Antirequisite(s): Credit for Chemistry 355 and either 353 or 357 will not be allowed.
Note: Open to students in other programs by consent of the Department. Students are advised to take Chemistry 351 and 355 in consecutive terms. Honours Biochemistry majors interested in taking this course should contact the Department of Chemistry regarding permission to enrol.

Chemistry 357 3 units; H(3-1T)

Industrial Organic Chemistry for Engineers
The hybridization of the carbon atom and covalent bonding. Typical reactions of alkanes, alkenes, alkynes and industrial applications. Substitution; halogenation, nitration and oxidation of aromatic hydrocarbons; polymerization and industrial applications. Functional groups and their reactions; oxidation, reduction, addition and elimination reactions, and industrial applications.
Prerequisite(s): Chemistry 209, or 201 or 211; and 203 or 213.
Antirequisite(s): Credit for Chemistry 357 and any of 351, 353 or 355 will not be allowed.

Chemistry 371 3 units; H(3-1T-3)

Physical Chemistry: Thermodynamics
Chemistry
Prerequisite(s): Chemistry 201 or 211; and 203 or 213; Physics 223 or 255; and one of Mathematics 253, 267, 277, 283 or Applied Mathematics 219.
Antirequisite(s): Credit for Chemistry 371 and any of Physics 347, 348, or 447 will not be allowed.

Chemistry 373 3 units; H(3-1T-3)

Physical Chemistry: Quantum Chemistry
Lectures: Elementary quantum mechanical treatment of the energy levels of atoms and molecules. Atomic spectra. Symmetry elements, operations, and point groups. Laboratory: Experimental measurements, interpretations, and calculations relating to the topics discussed in lectures.
Prerequisite(s): Chemistry 201 or 211; and 203 or 213; Physics 223; and one of Mathematics 253, 267, 277, 283 or Applied Mathematics 219.

Chemistry 379 3 units; H(3-1T)

Materials Chemistry for Engineers
An introduction to materials chemistry with industrial applications. Theories of chemical bonding and the relationship between chemical structure and observable properties. Chemical and physical properties of mixtures and interfaces. Structure and applications of polymers, ceramics, soft materials.
Prerequisite(s): Chemistry 209, or 201 or 211; and 203 or 213.

Chemistry 402 3 units; H(0-9)

Introduction to Research in Chemistry
A chemistry-based research project under the supervision of an academic staff member.

Chemistry 409 3 units; H(3-0)

Applied Chemistry and Chemical Pathways for Engineers
Analysis of industrial chemical processes based on reaction pathways to infer system performance including co-product formation and the role of catalysts. Examples from oil, gas, coal and petrochemical processing.
Prerequisite(s): Chemistry 209 and 357.

Chemistry 417 3 units; H(3-0)

Modern Chromatographic Analysis
Fundamental concepts and methods of chromatographic separation science: Partition theory, sample preparation, chromatographic theory, gas and liquid chromatography, principles of detection. Emerging concepts such as micro-fluidic separation platforms, column technology and novel mobile phases.
Prerequisite(s): Chemistry 311 and 315.

Chemistry 423 3 units; H(3-0)

Green Chemistry: Principles and Techniques
Green Chemistry focuses on the science and techniques that chemists and chemical and process engineers use to generate less waste, and to develop products and processes that are more atom- and energy-efficient, environmentally sensitive, and cost-effective. A look at the principles behind green chemistry, some techniques and processes used in achieving atom- and energy-efficiency, and waste reduction.
Prerequisite(s): Chemistry 333 and one of 353 or 355; or Chemistry 357 and 409.

Chemistry 425 3 units; H(3-0)

Industrial Chemistry
Electrochemical processes and the applications of some of their products. Unit operations and reactor types in the chemical industry. Petroleum refining including heavy oil and bitumen. Industrial organic synthesis including monomers for subsequent polymerization. Design of specialized polymers.
Prerequisite(s): Chemistry 353 or 355.

Chemistry 453 3 units; H(3-4)

Advanced Organic Chemistry
Prerequisite(s): Chemistry 351 and one of Chemistry 353 or 355.

Chemistry 471 3 units; H(3-1T-3)

Physical Chemistry: Kinetics and Spectroscopy
Vibrational, electronic and magnetic resonance spectra. Reaction kinetics and transport properties.
Courses of Instruction

in the gas phase and in solution. Catalysis. Laboratory: Experimental measurements, interpretations, and calculations relating to the topics discussed in lectures.

Prerequisite(s): Chemistry 371 and 373.

Chemistry 502 6 units; F(0-9)

Research in Chemistry

Comprehensive research project under the direction of a staff member. A research report must be presented on completion of the course, and attendance at a weekly research seminar is expected.

Prerequisite(s): Consent of the Department.

Note: It is recommended that students have completed the third year of their program in Chemistry, Applied Chemistry or Chemical Physics.

MAY BE REPEATED FOR CREDIT

Chemistry 515 3 units; H(3-4)

Advanced Instrumental Analysis

Prerequisite(s): Chemistry 311 and 315.

Chemistry 521 3 units; H(3-0)

Introduction to Atmospheric Chemistry

Prerequisite(s): Chemistry 315 and 373.

Note: Chemistry 471 is recommended as a prerequisite.

Chemistry 531 3 units; H(3-1T)

Advanced Inorganic Chemistry I

Co-ordination and organometallic chemistry of the transition elements, incorporating the lanthanoids and actinoids. Fundamental and applied aspects, including characterization techniques, reaction mechanisms, catalysis and bioinorganic chemistry.

Prerequisite(s): Chemistry 331, 333 and one of 353 or 355.

Chemistry 533 3 units; H(3-1T)

Advanced Inorganic Chemistry II

Chemistry of the s- and p-block elements. Interpretation of nuclear magnetic resonance, electron paramagnetic resonance, vibrational and mass spectra. Fundamental concepts and industrial uses of inorganic heterocycles and polymers, electron-deficient and organometallic compounds. Solid-state chemistry.

Prerequisite(s): Chemistry 331, 333 and one of 353 or 355.

Chemistry 535 3 units; H(1-8)

Advanced Inorganic Laboratory

Advanced laboratory techniques for the synthesis and characterization of main group compounds, organometallics and solid-state materials using modern spectroscopic and structural methods. Includes a short project.

Prerequisite(s): Chemistry 331, 333 and 453 and admission to the Chemistry major, Applied Chemistry major or Physical Chemistry major.

Note: Open to students in other programs by consent of the Department.

Chemistry 541 3 units; H(3-0)

(Biochemistry 541)

Concepts in Biochemical Toxicology

An interdisciplinary course focused on the diverse biomolecular mechanisms by which organic (e.g. PCB’s) and inorganic pollutants (e.g. Cd, Hg, As) adversely affect cell function examined at multiple levels of organization, from molecules to whole organisms. Topics include how natural toxins exert toxicity, how toxins/light generate free radicals within cells, how the speciation of metals in the environment affects their bioavailability/toxicity, and the toxicity mechanisms that lead to homeostatic dysfunction.

Prerequisite(s): Chemistry 311, 321, 351; and one of Biochemistry 341 or 393.

Antirequisite(s): Credit for Chemistry 541 and either Chemistry 641 or Biochemistry 541 will not be allowed.

Chemistry 551 3 units; H(3-1T)

Organic Synthesis

Concepts and strategies of synthesizing molecules with emphasis on carbon-carbon bond-forming reactions, protecting groups, chemo-, regio- and stereoselectivity.

Prerequisite(s): Chemistry 453.

Chemistry 553 3 units; H(3-1T)

Bio-organic Chemistry

Organic chemistry applied to the understanding of biomolecules: Selected topics from carbohydrate, peptide/protein, lipid and nucleoside chemistry, enzyme inhibition and drug design.

Prerequisite(s): Chemistry 453.

Chemistry 555 3 units; H(1-8)

Advanced Organic Laboratory

Advanced laboratory techniques: Methods of purification and identification of products, purification of reagents, experimental design, working with air/moisture sensitive reagents. Includes a short research project.

Prerequisite(s): Chemistry 453 and admission to the Chemistry major, Applied Chemistry major or Chemical Physics major.

Note: Open to students in other programs by consent of the Department.

Chemistry 559 3 units; H(3-1T)

Organic Spectroscopy

The instrumentation, theory and practical aspects of spectroscopy (e.g. UV/vis, MS, IR, 1H and 13C NMR including 2D-techniques). The emphasis will be on the application for structural elucidation through a problem solving approach.

Prerequisite(s): Chemistry 351 and one of 353 or 355.

Chemistry 571 3 units; H(3-0)

Physical Chemistry of Interfaces

The chemical and electrical nature, as well as basic thermodynamics, of interfaces. Surface films and aqueous interfaces, including micelles and bilayers. Interfaces involving solids such as metals and semiconductors. Absorption phenomena and surface catalysis. Survey of experimental approaches for interfacial studies.

Prerequisite(s): Chemistry 371 and 373.

Chemistry 573 3 units; H(3-0)

Nature of the Condensed Phase in Chemistry

Theoretical models of liquids and solids. Dielectric continuum, polarizabilities and magnetism. Ionic crystal, insulators, conductors, semiconductors and superconductors. Some aspects of scattering techniques for structure determination.

Prerequisite(s): Chemistry 371 and 373.

Chemistry 575 3 units; H(3-1T-3)

Advanced Electronic Structure Theory

A discussion of the theories of modern electronic structure illustrated by applications to molecular structure and bonding, electronic spectroscopy, as well as chemical reactivity and dynamics.

Prerequisite(s): Chemistry 371 and 373.

Chemistry 579 3 units; H(3-0)

Surface and Colloid Chemistry for Engineers

Introduces the fundamental and applied aspects of interfacial phenomena including capillarity, surface and interfacial tension, films, wetting and contact angles, adsorption, micellization, solubilization and emulsification. Examples drawn from colloids, foams, aerosols and macromolecules.

Prerequisite(s): Chemistry 209; and 357 or 379; and Chemical Engineering 427.

Chemistry 599 3 units; H(3-0)

Selected Topics in Chemistry

Selected topics are offered based on the interests of Chemistry faculty and students.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Advanced graduate level courses are listed below. Courses in certain areas are grouped under "Selected Topics" titles. The content and offering of these are decided annually by the Department to meet the requirements of graduate students in the program. A student may receive credit for several courses in a given selected topics area. Details of offerings and course outlines may be obtained from the Department on request.

Unless stated otherwise the prerequisite for entry to all courses at the 600 level and above is "consent of the Department." Only where appropriate to a student's program may graduate credit be received for courses numbered 500-599.

Chemistry 601 3 units; H(2S-0)

Research Seminar

Reports on studies of the literature or of current research. Required of all graduate students in Chemistry.

NOT INCLUDED IN GPA

Chemistry 603 3 units; H(2S-0)

Research Seminar

Continuation of Chemistry 601.

NOT INCLUDED IN GPA

Chemistry 613 3 units; H(3-0)

Electrochemical Fundamentals and Methodologies

Origin, significance, and thermodynamics of interfacial potential differences; structure of the double layer; basic principles of electron transfer at interfaces, Butler-Volmer equation; mass transport
Courses of Instruction

count of electro-chemical reactions; controlled potential methods as applied to electrode surface reactions and homogeneous reactions coupled to electron-transfer processes.

Chemistry 615 3 units; H(3-0)

Analytical Separations
Theory and practice of resolving mixtures into separate components for analysis. Basic theory; liquid-liquid extraction; high performance liquid chromatography; gas-liquid, open bed, ion exchange and exclusion chromatography; electrohoresis.

Chemistry 617 3 units; H(3-0)

Advanced Analytical Chemistry
Consideration of principles and equilibria pertaining to aqueous and nonaqueous neutralization, redox, complexation, precipitation and potentiometric methods employed in analyses. Statistical considerations of analytical data and analysis.

Chemistry 619 3 units; H(3-0)

Selected Topics in Analytical Chemistry
Topics of current interest such as: properties of synthetic polymer membranes, advanced instrumental methods, developments in chemical sensors, speciation studies, environmental analytical chemistry.

MAY BE REPEATED FOR CREDIT

Chemistry 621 3 units; H(3-0)

Organometallic Chemistry
A detailed discussion of structure, bonding and preparative methods in organometallic chemistry including the industrial and synthetic applications of organometallic compounds.

Chemistry 623 3 units; H(3-0)

Chemistry of the Main Group Elements
The chemistry of electron-deficient, electron-poor, and electron-rich rings, inorganic polymers, and organometallic compounds of the main group elements; applications of spectroscopic techniques; industrial uses. Seminars on recent research developments.

Chemistry 627 3 units; H(3-0)

Theoretical Inorganic Chemistry
Aspects of theoretical inorganic and organometallic chemistry including: quantitative and qualitative molecular orbital theory; the bonding of molecules, clusters, and extended arrays; the fragments of organometallic species; orbital correlation diagrams in inorganic reactions; spectroscopic methods and their interpretation.

Chemistry 629 3 units; H(3-0)

Selected Topics in Inorganic Chemistry
Courses are offered to cover topics of current interest, such as bioinorganic chemistry, inorganic solution phenomena, and the inorganic chemistry of the solid state.

MAY BE REPEATED FOR CREDIT

Chemistry 641 3 units; H(3-0)

Concepts in Biochemical Toxicology
An interdisciplinary course focused on the diverse biochemical mechanisms by which organic (e.g. PCB's) and inorganic pollutants (e.g. Cd, Hg, As) adversely affect cell function examined at multiple levels of organization, from molecules to whole organisms. Topics include how natural toxins exert toxicity, how toxins/light generate free radicals within cells, how the speciation of metals in the environment affects their bioavailability/toxicity, and the toxicity mechanisms that lead to homeostatic dysfunction.

Antirequisite(s): Credit for Chemistry 641 and either Chemistry 541 or Biochemistry 541 will not be allowed.

Chemistry 651 3 units; H(3-0)

Advanced Organic Stereochemistry
Stereochemical principles in organic chemistry, including: geometry, bonding, symmetry, molecular isomerism, conformational analysis, asymmetric and stereoregulated reactions.

Chemistry 653 3 units; H(3-0)

Advanced Organic Spectroscopy
Advanced spectroscopic techniques for the determination of complex organic structures. Emphasis will be on NMR methods, practical aspects of acquiring spectra, advanced interpretation and reporting spectral data.

Chemistry 655 3 units; H(3-0)

Advanced Organic Synthesis
A review of modern synthetic reactions and methods in the field of organic chemistry with emphasis on the recent literature.

Chemistry 657 3 units; H(3-0)

Theoretical Organic Chemistry
Theoretical principles of organic chemistry including: stereosemchemistry, molecular orbital calculations, pericyclic processes (Woodward-Hoffmann rules), and PMO theory.

Chemistry 659 3 units; H(3-0)

Selected Topics in Organic Chemistry
Courses are offered in major branches of organic chemistry, including: carbohydrate chemistry, stereochemistry, synthetic organic chemistry, biochemistry, biosynthesis of secondary metabolites, as well as other topics of current interest.

MAY BE REPEATED FOR CREDIT

Chemistry 669 3 units; H(3-0)

Selected Topics in Applied Chemistry
Courses are offered in such topics as electrochemistry, industrial catalysis, chemistry of energy sources, colloid and surface chemistry and polymer chemistry.

MAY BE REPEATED FOR CREDIT

Chemistry 681 3 units; H(3-0)

Crystallography
A general introduction to X-ray analysis of single crystals. Topics include: Geometry of the crystal lattice; diffraction of X-rays; Fourier synthesis; methods of structure solution; accuracy and precision of derived parameters.

Chemistry 689 3 units; H(3-0)

Selected Topics in Physical Chemistry
Courses are offered in such topics as dielectric properties, kinetics, molecular vibrations, fluorescence spectroscopy, X-ray diffraction.

MAY BE REPEATED FOR CREDIT

Chemistry 701 3 units; H

Independent Study
Independent study not directly related to the student’s thesis project normally under the direction of any chemistry faculty member. A course information sheet must be provided and a student report must be submitted on completion of the course.

Note: Multiple 701 courses can be offered in any one term. However, students may take this course for credit not more than twice.

MAY BE REPEATED FOR CREDIT

Chinese CHIN

Instruction offered by the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

All students wishing to take Chinese language courses for the first time must consult the School to be placed in an appropriate course. Native speakers are not eligible to take language courses, but are eligible to take Chinese Studies courses.

Junior Courses

Chinese 205 3 units; H(4-1)

Beginners' Chinese I
Basic concepts of the Chinese National Language. Reading and writing of characters, essentials of grammar, basic vocabulary, and oral drills on normal speech patterns.

Prerequisite(s): Consent of the School.

Note: Not open to students with credit in Chinese 30 or 35. Students wishing to take Chinese language courses for the first time must consult the School of Languages, Linguistics, Literatures and Cultures to be placed in an appropriate course.

Chinese 207 3 units; H(4-1)

Beginners' Chinese II
Continuation of Chinese 205.

Prerequisite(s): Chinese 205.

Chinese 229 3 units; H(2-2)

Intensive Beginners' Chinese
Intensive development of conversational skills and the pronunciation of the Chinese National Language. Enhanced training in vocabulary acquisition, grammar and writing. For students with a background in a Chinese dialect.

Prerequisite(s): Consent of the School.

Antirequisite(s): Credit for Chinese 229 and either 205 or 207 will not be allowed.

Chinese 279 3 units; H(1-2)

Reading and Writing Chinese
Introduction to the Chinese language for students who have a background in Mandarin and other Chinese dialects, but limited reading and writing ability. Students will learn to read and write characters, and acquire the essentials of basic vocabulary and grammar.

Prerequisite(s): Consent of the School.

Antirequisite(s): Credit for Chinese 279 and either 205 or 207 will not be allowed.

Senior Courses

Chinese 301 3 units; H(3-1)

Continuing Chinese I

Prerequisite(s): Chinese 207.

Antirequisite(s): Credit for Chinese 229 and 301 will not be allowed.
Courses of Instruction

Chinese 303 3 units; H(3-1)
Continuing Chinese II
Continuation of Chinese 301.
Prerequisite(s): Chinese 301.
Antirequisite(s): Credit for Chinese 303 and 229 will not be allowed.

Chinese 309 3 units; H(3-2)
Chinese Culture in an Immersion Setting
An introduction to contemporary Chinese culture and functional Chinese language.
Prerequisite(s): Consent of the School.
Note: Offered during Spring/Summer Intercession in the People's Republic of China. A supplementary fee will be assessed to cover additional costs associated with this course.

Chinese 311 3 units; H(3-1)
Chinese Language in an Immersion Setting I
A course in Chinese stressing the oral skills in an immersion environment.
Prerequisite(s): Consent of the School.
Corequisite(s): Chinese 309.
Note: Offered during Spring/Summer Intercession in the People's Republic of China. A supplementary fee will be assessed to cover additional costs associated with this course.

Chinese 313 3 units; H(3-1)
Chinese Language in an Immersion Setting II
A continuation of Chinese 311.
Prerequisite(s): Chinese 311.
Note: Offered during Spring/Summer Intercession in the People's Republic of China. A supplementary fee will be assessed to cover additional costs associated with this course.

Chinese 317 3 units; H(3-0)
Topics in Chinese Civilization
Distinctive features of Chinese civilization within the Asian context.
317.01. The Human-Animal Connection
317.02. Words, Hanzi, and Things
317.03. Iconic China
Note: Taught in English. May be repeated for a maximum credit of 6 units (1.0 full-course equivalent).

Chinese 331 3 units; H(3-0)
Intermediate Chinese I
An intermediate course giving equal emphasis to receptive and productive language skills.
Prerequisite(s): Chinese 303.
Antirequisite(s): Credit for Chinese 331 and 229 will not be allowed.

Chinese 333 3 units; H(3-0)
Intermediate Chinese II
A continuation of Chinese 331.
Prerequisite(s): Chinese 331.
Antirequisite(s): Credit for Chinese 333 and 229 will not be allowed.

Chinese 341 3 units; H(3-0)
Introduction to Chinese Literature
Introduction to Chinese literature through the reading and discussion of selected literary works.
Prerequisite(s): Chinese 303.

Chinese 353 3 units; H(3-0)
Introduction to Chinese Language and Linguistics
An overview of Chinese linguistics. Provides an introduction to linguistic concepts and topics to enhance understanding of the structure of the Chinese language.
Prerequisite(s): Chinese 207.
Note: Taught in English. Consent will be given to all students who are native speakers of Chinese, native speakers, and students whose Chinese proficiency is equivalent to the level of Chinese 207.

Chinese 355 3 units; H(3-0)
Chinese Literature in Translation
Introduces the literary tradition of China by means of reading the English translations of representative works. Examines the historical and cultural background, as well as literary forms and aesthetics.
Note: Taught in English.
MAY BE REPEATED FOR CREDIT

Chinese 357 3 units; H(3-0)
Topics in Chinese Film
Chinese film from the perspectives of film theory and political and cultural history. The course may concentrate on a specific director, a period, or a genre in Chinese film.
357.01. The New Waves
357.02. The Fifth Generation
357.03. Focus on a Filmmaker
357.04. Focus on a Genre
Note: Taught in English. May be repeated for a maximum credit of 6 units (1.0 full-course equivalent).

Chinese 363 3 units; H(3-0)
Chinese Language in the Cultural Context
Study of the use and function of the Chinese language in its cultural context.
Prerequisite(s): Chinese 207 or consent of the School.
Note: Consent will be given to all students who are native speakers of Chinese and students whose Chinese proficiency is equivalent to the level of Chinese 207.

Chinese 401 3 units; H(3-0)
Advanced Chinese Conversation
Development of Chinese oral communication skills through contemporary film, television programs and/or other audio materials with textbooks.
Prerequisite(s): Chinese 333.
Antirequisite(s): Credit for Chinese 401 and either 421 or 431 will not be allowed.

Chinese 403 3 units; H(3-0)
Advanced Readings and Writing in Modern Chinese
Development of Chinese reading and writing skills through newspapers, magazines, social commentary and/or literary works.
Prerequisite(s): Chinese 333.
Antirequisite(s): Credit for Chinese 403 and either 421 or 431 will not be allowed.

Chinese 407 3 units; H(3-0)
Selected Topics in Chinese Literature
Topics studied are listed in the Schedule Builder.
Prerequisite(s): Chinese 403 or 421.
MAY BE REPEATED FOR CREDIT

Chinese 461 3 units; H(3-0)
Japanese-Chinese Cultural Relations
Discussion of cultural relations and influences between Japan and China. Topics may include cultural identities and cross-influences, literary and artistic traditions, writing systems.
Prerequisite(s): Chinese 303 or higher (excluding Chinese 317 and Chinese 355).
Note: Knowledge of Japanese would be beneficial.

Chinese 561 3 units; H(3S-0)
Research Seminar
Engages senior students as members of a collaborative research team. Independent research, discussion, group presentations.
Prerequisite(s): One of Chinese 403, 421 or 431.
MAY BE REPEATED FOR CREDIT

Chinese 617 3 units; H(3-0)
Topics in Modern Chinese Literature
Examines specific authors, movements, periods, or movements within modern Chinese literature.
Prerequisite(s): Chinese 403 or 421.
MAY BE REPEATED FOR CREDIT

Civil Engineering ENCI

Courses of Instruction

Civil Engineering 311 3 units; H(3-1.5T-3/2)
Mechanics of Solids
Axial-force, shear-force and bending moment diagrams; stress and strain; stress-strain relations; elastic and plastic behaviour; elastic constants; simple statically indeterminate (one-degree) problems; review of moment of inertia, product of inertia and principal axes of inertia; elastic torsion of circular shafts; elastic and plastic bending about principal axes of beams with symmetrical cross-section; composite beams; shear stresses due to bending; Mohr’s circle for stress; thinned wall pressure vessels; deflection of beams by integration; Euler buckling.
Prerequisite(s): Engineering 202 and Mathematics 275 or Applied Mathematics 217.
Antirequisite(s): Credit for Civil Engineering 317 and Engineering 317 will not be allowed.

Civil Engineering 337 3 units; H(2-3)
Tools for Civil Engineering Design
A course utilizing computer tools to solve practical Civil Engineering problems. The course concentrates upon the use of spreadsheets, but also involves interaction with databases, computer graphics and computer programming for analysis, design and reporting. Problems will normally be derived from several core Civil Engineering sub-disciplines.
Prerequisite(s): Engineering 233.

Civil Engineering 402 3 units; H(3-2)
Hydraulics
Quantitative and qualitative investigation of pipe flow and free-surface fluid flow. Application of fundamental laws of mechanics to fluid flow, including conservation of mass, momentum, and energy, Use of theoretical and numerical analysis methods. Review of basic concepts of fluid motion; pressurized pipe network flow; open channel flow; uniform and non-uniform flow.
Prerequisite(s): Mechanical Engineering 341.
Civil Engineering ENCI

elastcity, fatigue, creep, shrinkage, durability, thermal deformation; introduction to fracture mechanics; Microstructure and fundamental principles underlying performance; mass transport processes, corrosion and phase transformations causing deterioration. Practical examples from different materials sectors: steel, aggregates, cement, Portland cement concrete, masonry, asphalt concrete, natural and synthetic polymers.

**Prerequisite(s):** Engineering 201 and one of Engineering 317 or Civil Engineering 317.

**Civil Engineering 423** 3 units; H(3-1T-2)

**Geotechnical Engineering I**

Identification and classification of soils; soil compaction; seepage; effective stress concept; stresses in a soil mass; settlement; one dimensional consolidation; shear stress and strength; introduction to slope stability; selected laboratory and design exercises with computer applications.

**Prerequisite(s):** Geology 471.

**Civil Engineering 451** 3 units; H(3-2T-1)

**Structural Engineering I**

**Prerequisite(s):** Civil Engineering 461.

**Corequisite(s):** Civil Engineering 413.

**Civil Engineering 461** 3 units; H(3-1.5T)

**Mechanics of Solids and Structures**

Analysis of statically determinate structures: reactions, member forces in trusses, bending moment, shearing force and axial force diagrams for frames; Introduction to indeterminate structures; Effects of moving loads, influence lines, Muller-Breslau principle; Determination of displacements using moment area theorems, energy theorems and virtual work; Maxwell’s theorem; Normal stresses in non-symmetric sections; principal axes, shear centre; plastic torsion of circular shafts, torsion of non-circular sections; Principal stresses, failure theories; Elasticity of columns.

**Prerequisite(s):** Engineering 317 or Civil Engineering 317.

**Civil Engineering 471** 3 units; H(3-2)

**Project Management I**

Introduces techniques that provide rational solutions to a range of project management decisions encountered in engineering projects. Students are expected to gain a detailed understanding of some of the techniques, tools and processes available and their application in planning and managing engineering and construction projects; The course covers project management fundamentals including project planning and scheduling techniques, cash flow forecasting, performance evaluations and decision analysis; Introduction to project operation research.

**Civil Engineering 473** 3 units; H(3-2)

**Transportation Engineering I**

Goals and objectives of urban and regional transportation planning; Introduction to transportation modes; Transportation demand models; Fundamentals of traffic flow theory; Shockwave theory; Car following models; Highway capacity and level of service; Roadway intersection design; Environmental and energy impacts of transportation.

**Prerequisite(s):** Engineering 319.

**Civil Engineering 481** 3 units; H(3-2)

**Environmental Engineering**

Analyze and develop civil engineering solutions, at a conceptual level, to human health and environmental problems associated with human activities, fundamental aspects of air, water and land pollution, water quality assessment and control, environmental aspects of non-renewable energy development, introduction to sustainability concepts in construction and transportation, solid waste management technologies, introduction to land pollution prevention and control.

**Prerequisite(s):** Chemistry 209 and Mechanical Engineering 341.

**Civil Engineering 502** 3 units; H(3-1)

**Civil Engineering Aspects of Sustainable Communities**

Definition of sustainability; global urbanization; emissions from transportation systems; economics of urban development from a civil infrastructure point of view, water/wastewater, land use/transporation; public transportation; travel demand management for sustainability; construction industry - energy use and emissions.

**Prerequisite(s):** Civil Engineering 473 and 481.

**Civil Engineering 504** 3 units; H(3-1)

**Uncertainty Concepts in Civil Engineering**

Fundamentals of uncertainty, risk, reliability and decision making in Civil Engineering applications. Probability as a measure of uncertainty based on frequency data, least presumptive methods and use of odds; Bayes’ Theorem; known probability distributions and how they apply to civil engineering problems. Advanced topics including applications of extreme value distributions, joint probability distributions and stochastic optimization. Risk as a function of both probability and disutility. Risk analysis through Bayesian Decision Theory.

**Prerequisite(s):** Engineering 319.

**Civil Engineering 508** 3 units; H(3-1)

**Environmental Aspects of Energy**

Environmental assessment and management in the energy sector. Ecological footprint introduction. Site investigation, field techniques and program implementation, remedial planning and design, cost and time analysis, physical, chemical and biological remediation techniques, biomass and waste to energy, use energy and emissions in transporta systems, energy efficiencies and emissions in building construction, assess problems with energy use from an environmental setting, develop and apply engineered solutions, ecological and environmental footprints of energy industries.

**Prerequisite(s):** Civil Engineering 481.

**Civil Engineering 513** 3 units; H(3-2T)

**Structural Concrete Materials and Design**

**Prerequisite(s):** Civil Engineering 451.

**Corequisite(s):** Civil Engineering 551.

**Civil Engineering 523** 3 units; H(3-1T-2)

**Geotechnical Engineering II**

Sub-surface investigations; soil shear strength, critical states and laboratory tests; shallow and deep foundations in sands and clays; bearing capacity and settlement of structures; lateral earth pressures and retaining structures; seepage analysis; slope stability analysis, selected laboratory design exercises, solution to slope stability and other problems using computer programs.

**Prerequisite(s):** Civil Engineering 423.

**Civil Engineering 551** 3 units; H(3-2T)

**Structural Engineering II**

**Prerequisite(s):** Civil Engineering 451.

**Civil Engineering 557** 3 units; H(3-2T)

**Structural Steel Design**

**Prerequisite(s):** Civil Engineering 451 and 551.

**Civil Engineering 565** 3 units; H(3-1)

**Project Management II**

Introduces fundamentals of engineering and construction management techniques, tools and processes. The course covers understanding of design and contract documents, estimating and cost control; project organizations, design of temporary facilities including formwork and safety related matters, construction processes, dispute resolution, social, economic and environmental impacts, regulatory requirements, project completion and commissioning.

**Prerequisite(s):** Civil Engineering 471.

**Civil Engineering 570** 6 units; F(0-4)

**Group Design Project**

Team design project applying engineering and project management principles to civil engineering design problems; Consideration of technical, resource allocation and business aspects of project; Development of project scope, design, specifications, scheduling and documentation; Elements of practical team management and leadership; Specific guidance provided by academic and industry advisors.

**Prerequisite(s):** Civil Engineering 402, 413, 423, 451, 461, 471, 473, and 481.

**Note:** Departmental consent will only be granted in exceptional cases if students are missing no more than one of the courses listed above. Concurrent enrolment in Civil Engineering 570 and one or more
of Internship 513.01, 513.02, 513.03, and 513.04 will not be allowed.

Civil Engineering 571 3 units; H(3-1)
Introduction to Road Safety
Theory and evidence in accident analysis and prevention. Topics include Haddon’s matrix, crash data analysis, traffic enforcement, road safety advertising, failure safety, road safety audits, vehicle safety and program evaluation.
Prerequisite(s): Civil Engineering 473 and Engineering 319.

Civil Engineering 575 3 units; H(3-1)
Transportation Engineering II
An introduction to the fundamentals of how various transportation systems are designed and operated. Topics to be covered include: public transit design and operation, highway engineering and design, airport design, traffic system design and operations, before and after studies and Intelligent Transportation Systems.
Prerequisite(s): Civil Engineering 473 and Engineering 319.

Civil Engineering 581 3 units; H(3-1)
Environmental Engineering II
Water and wastewater quantities and quality, water distribution and wastewater collection systems, hydraulic considerations, design of sanitary sewers, storm drainage systems, physical, chemical, and biological processes for water and wastewater treatment; aeriation, coagulation, flocculation, sedimentation, single and multi-media filtration, disinfection, activated sludge system and trickling filter, adsorption, reverse osmosis, membrane filtration, advanced oxidation, sludge processing and disposal, industrial wastewater and wastewater treatment, water conservation, reuse and recycling.
Prerequisite(s): Civil Engineering 481 and Mechanical Engineering 341.

Civil Engineering 595 3 units; H(3-1)
Special Topics
Current topics in Civil Engineering.
Prerequisite(s): Consent of the Department Head.
MAY BE REPEATED FOR CREDIT

Civil Engineering 597 3 units; H(0-5)
Civil Engineering Project I
Individual work on an assigned Civil Engineering topic under the supervision of a faculty member. The project will normally involve a literature review, theoretical or laboratory or field work. Submission of a mid-term progress report defended orally and a final report.
Prerequisite(s): Consent of the Department.

Graduate Courses
Registration in all courses requires the approval of the Department of Civil Engineering. For a more complete and listing of Environmental Engineering graduate courses look under Environmental Engineering.

Civil Engineering 611 3 units; H(3-1)
Bituminous Materials

Civil Engineering 615 3 units; H(3-0)
Rheology of Engineering Materials

Civil Engineering 617 3 units; H(3-0)
Fracture of Civil Engineering Materials
Cohesive strength; plasticity. Fracture mechanics in relation to structural steel, stress intensity, fracture toughness, energy release rate, LEFM, COD, J-integral, R-Curve, fatigue. Compressive fracture of concrete, masonry and rocks; cracking patterns, fracture theories, damage models, test methods and effects.

Civil Engineering 619 3 units; H(3-0)
Special Problems
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member. Students would be required to consider problems of an advanced nature.
MAY BE REPEATED FOR CREDIT

Civil Engineering 621 3 units; H(3-0)
Computer Analysis of Structures

Civil Engineering 623 3 units; H(3-0)
Behaviour and Design of Reinforced Concrete Members
Behaviour and strength of reinforced concrete members; materials; safety; design of members subjected to flexure, compression, compression and flexure including biaxial bending, shear, torsion; bond and anchorage; slender columns; deep beams; serviceability; rotation capacity; relation between results of research and current design codes.

Civil Engineering 625 3 units; H(3-0)
Behaviour and Design of Reinforced Concrete Bridges and Other Structures

Civil Engineering 633 3 units; H(3-0)
Fibre Reinforced Polymers for Construction and Repair of Structures
Properties and behaviour of various types of Fibre-Reinforced Polymers (FRP) materials. Limit States Design, procedures and design philosophy of structures reinforced or strengthened with FRP. Flexural and shear design, FRP systems for flexural and shear strengthening of structures. Axial strengthening of columns. Concrete prestressed with FRP. Durability and fire resistance, blast mitigation and repair using FRP. Case studies and field applications.

Civil Engineering 635 3 units; H(3-0)
Behaviour and Design of Prestressed Concrete Bridges and Other Structures
Flexural analysis and design of prestressed and partially prestressed concrete members based on stresses, deflections and strength. Design of members subjected to shear, torsion, compression or tension. Fire resistance. Composite members. Bond and anchorage zones. Prestressing losses and time-dependent deformations. Discussion of current design standards.

Civil Engineering 637 3 units; H(3-0)
Behaviour and Design of Prestressed Concrete Members
Flexural analysis and design of prestressed and partially prestressed concrete members based on stresses, deflections and strength. Design of members subjected to shear, torsion, compression or tension. Fire resistance. Composite members.

Civil Engineering 639 3 units; H(3-0)
Structural Dynamics
Numerical analysis of simple systems; rigorous analysis of one-degree systems; lumped mass multi-degree systems and structures with distributed mass and load; approximate analysis and de-
Courses of Instruction

Civil Engineering 641 3 units; H(3-0)
Seismic Analysis and Design
Introduction to seismology, ground movements, typical accelerograms. Response spectra for linear and non-linear responses, role of damping and inelastic behaviour. Equivalent lateral load for design, code requirements. Structural design concepts to mitigate seismic effects. Design of steel structures for earthquake motions. Design of concrete frames and walls for earthquake motions.
Prerequisite(s): Civil Engineering 639.

Civil Engineering 643 3 units; H(3-0)
Structural Masonry Design
Component materials and their properties, masonry properties, quality control, plain and reinforced masonry, beams, walls, slender walls, columns, load-moment interaction curves, concentrated load bearing, shear load distribution, shear walls, code provisions, building envelope, detailing, differential movement, geometric walls, prestressed masonry, arches.

Civil Engineering 645 3 units; H(3-0)
Risk Analysis
The objective of this course in engineering risk analysis and risk assessment is to familiarize students with the principles and techniques of quantitative risk analysis. Key focus points are the treatment of uncertainties, the attitude of conservatism, risk perception, the careful use of quantitative risk measures, and a discussion of the dangers tasks facing risk-based decision makers. Includes: Hazards, risk, risk analysis, risk assessment; risk measures; probability, uncertainty modelling, stochastic variables; using and misusing data, reliability, risk; risk assessment frameworks, models in health and environmental risk analysis, models in engineering risk analysis; risk perception, risk comparison; and practical case studies.

Civil Engineering 647 3 units; H(3-0)
Structural Reliability Analysis
Concept of rock, soil, failure, uncertainties, and engineering decision making. Techniques for reliability-based assessment of structural components and systems. Time-dependent structural reliability analysis including load, load effect, and resistance modelling. Code calibration using structural reliability assessment of existing structures. Applications focus on design and optimization of uncertain systems such as structures, soils, and infrastructure systems.

Civil Engineering 653 3 units; H(3-0)
Theory and Applications of the Finite Element Method
Conceptual framework of the finite element method with emphasis on applications to structural analysis: shape functions, continuity at nodes, numerical integration, matrix assembly. Scope of the method, use of basic equations of elasticity, displacement (stiffness) method of analysis. Sources of error and poor performance; mesh sensitivity; element types, their selection and behaviour. Applications in structural analysis, heat conduction and other non-structural problems; use of available finite element programs.

Civil Engineering 655 3 units; H(3-0)
Numerical Methods for Modelling Geomaterials
Methods of theoretical analysis for solving partial differential equations associated with Geotechnical and Structural Engineering. Variational Principles, Principle of Virtual Work and Galerkin Method. Theory of finite element and focus on its computer implementation for analysis of engineering problems. Typical applications include two- and three-dimensional stress analysis, seepage flow, and coupled fluid flow and solid deformation problems. Advanced topics: numerical strategies for solving material and geometric non-linearities (plasticity and large deformations), poro-elasticity and plasticity, strain localization, and presentation of other numerical techniques such as finite difference, boundary element, discrete element methods.

Civil Engineering 657 3 units; H(3-0)
Airport Planning and Engineering
Planning of airport systems; planning and design of the airfield; airspace capacity and delay; air traffic control; planning and design of the passenger terminal; analysis of airport operations.

Civil Engineering 659 3 units; H(3-0)
Sustainable Infrastructure
Sustainability and durability issues of structural materials; properties and uses of non-renewable and recycled materials; energy efficient design and green material selection; life cycle cost analysis. Constructability, Aesthetics, Infrastructure management, inventory, assessment/monitoring, performance and remaining service life. Preservation of existing infrastructure; repair and rehabilitation, strengthening and retrofitting to extend service life of structures. Structural composites: properties and applications to improve performance and sustainability of infrastructure.

Civil Engineering 665 3 units; H(3-0)
Fundamentals of Soil Behaviour
Principle of effective stress in saturated soil, unsaturated soil and clay. Engineering properties of soils. Soil strength and deformation characteristics of soils in static, cyclic, drained and/or undrained loading. Laboratory testing of soils. One-dimensional consolidation, poro-elastic deformation, swelling mechanism, time-dependent deformation and soil contamination in soils.

Civil Engineering 667 3 units; H(3-0)
Applied Rock Engineering
Engineering properties of intact rock and rock mass. Rock classification. Slope and underground excavation; groundwater flow in fractured rock; poro-elastic deformation analysis; hydraulic fracturing.

Civil Engineering 669 3 units; H(3S-3)
Permafrost Engineering
Development, characteristics and significance of permafrost, including the thermal and hydrological processes and resulting periglacial geomorphology and geotechnical implications. Contemporary topics in science and engineering of seasonally and perennially frozen ground.

Civil Engineering 671 3 units; H(3-0)
Advanced Foundation Engineering

Civil Engineering 673 3 units; H(3-0)
Constitutive Laws for Geomaterials
Definition of a continuous medium. Description of deformable continuous media; concepts of stress, strain and their invariants. Constitutive equations for geomaterials as a generic for soil, rock and concrete materials in civil engineering. Review of elasticity theory, introduction to yielding, plastic flow and failure phenomena in geomaterials. Limit analysis with applications to both geotechnical and structural engineering. Stress-strain behaviour for both cohesive and granular materials. Constitutive models based on critical state theory will be presented. Other topics such as strain localization and fracture phenomena may be included as appropriate.

Civil Engineering 689 3 units; H(3-0)
Advanced Project Management Practices and Principles
Advanced practices, tools and concepts in managing complex volatile or large projects. SMART project management based on best practices in diverse industries forms the basis of this course.

Civil Engineering 691 3 units; H(3-0)
Fundamentals of Project Management
Application of management principles to the project environment; planning, control, scope, time and cost processes; project organization and human resource issues. Students review aspects of a current major capital project and submit and defend a project report.

Civil Engineering 693 3 units; H(3-0)
Project Engineering Management
Role of the engineering manager in the project management team. The engineering firm, its organization and function; project development, engineering project control; design control; scope and estimate control; engineering interfaces with procurement and construction; engineering responsibility in project commissioning start-up and operations.

Civil Engineering 695 3 units; H(3-0)
Project Construction Management
Role of the construction manager in the project management team; project options for the management of construction; managing the contractor’s business; labour relations; claims; contractor(s) responsibility in project commissioning start-up and operations.

Civil Engineering 697 3 units; H(3-0)
Project Planning and Control
Strategic and tactical planning; planning for scope, quality, time and cost; selection and implementation of project management information system; economic and risk analysis; planning for construction labour relations.

Civil Engineering 699 3 units; H(3-0)
Law for Project Managers
Legal issues related to the effective management of projects. Introduction to the legal system and processes; environmental law; intellectual property non-disclosure; professional liability; contract law; strategic alliances; employment law; the builder’s lien act. Cases are reviewed and students are

Courses of Instruction

Communication and Culture 507
3 units; H(3S-0)

Collaborative Learning and Peer Mentoring
Study of learning theories and learning processes with practical experience through helping learners in a University of Calgary undergraduate course under the supervision of that course’s instructor. Activities may include facilitating discussion in classrooms or online, discussing topics for term papers, organizing and assisting study groups, or coaching peers in their oral presentation or writing skills.

Prerequisite(s): 48 units (8.0 full-course equivalents) and consent of the Department of Communication, Media and Film.
Antirequisite(s): Credit for Communication and Culture 507 and Science 511 will not be allowed.

Note: Prospective students must submit an application to the Department of Communication, Media and Film.

Communication and Culture 509
3 units; H(3S-0)

Research in Peer Mentoring and Higher Learning
Students continue to support peers in their learning processes using a facilitative, collaborative approach. As part of their mentoring hours, students will assist new peer mentors to grow into their roles. Students will conduct a textual and field research project related to their peer mentoring roles.

Prerequisite(s): Communication and Culture 507, or General Studies 507 and consent of the Department of Communication, Media and Film.

Note: Prospective students must submit an application to the Department of Communication, Media and Film.

Graduate Courses
Courses offered by the Graduate Program in the Department of Communication, Media and Film Studies in the Faculty of Arts are now listed in the Communication and Media (COMS) section of the calendar.

Communication and Media Studies COMS

Instruction offered by the Department of Communication, Media and Film Studies in the Faculty of Arts.

Note: Communication and Media Studies (COMS) courses were formerly named Communications Studies (COMS). For prerequisite purposes, all Communication and Media Studies (COMS) courses are equivalent to the former Communications Studies (COMS) courses with the same number.

Junior Courses

Communication and Media Studies 201
3 units; H(2-1)

Introduction to Communication and Media Studies
A general mapping of the field, with an emphasis on its breadth in the areas of media studies, communication of science and technology and rhetorical communication. General examination of how Communications Studies emerged during the twentieth century and how the field relates to issues of social and cultural change.

Antirequisite(s): Credit for Communication and Media Studies 201 and Communications Studies 201 will not be allowed.

Communication and Media Studies 203
3 units; H(2-1)

New Media
An introduction to the social, political, and cultural aspects of new media. Examines the social factors that influence the use of new media, as well as the effects of new media on different spheres of social life. Topics may include the historical development of new media; participatory cultures; copyright and Internet law; creative industries; and surveillance and governance in new media.

Antirequisite(s): Credit for Communication and Media Studies 203 and either Science, Technology, and Society 341 or Communications Studies 203 will not be allowed.

Senior Courses

Communication and Media Studies 313
3 units; H(3-0)

Communication Research Methods
A critical introduction to communication research methods. Students will explore, practice and critique selected quantitative and qualitative research methods and perspectives on the processes of knowledge production.

Prerequisite(s): Communication and Media Studies 201 or Communications Studies 201 or admission to Bachelor of Film Studies.
Antirequisite(s): Credit for Communication and Media Studies 313 and any of Communications Studies 313, Communication and Culture 313, General Studies 313, Development Studies 407, Northern Planning and Development Studies 407 or Women's Studies 313 will not be allowed.

Note: Students are recommended to take Communication and Media Studies 313 in their second year.

Communication and Media Studies 363
3 units; H(3-0)

Professional and Technical Communication
An introduction to professional and technical communication in diverse media. Examines the rhetorical dimensions of workplace settings as well as the process of planning, composing and delivering professional and technical communication for various audiences.

Prerequisite(s): 24 units.
Antirequisite(s): Credit for Communication and Media Studies 363 and Communications Studies 363 or Engineering 213 will not be allowed.

Note: Preference in enrolment is given to Majors and Minors in the Department of Communications, Media and Film Studies, majors in Geography, students enrolled in the Bachelor of Arts in Communication and Culture, the Haskayne School of Business and the Schulich School of Engineering. Most sections of this course will be offered online.

Communication and Media Studies 367
3 units; H(3-0)

Visual Communication and Culture
Critical study of images in society. Topics may include formal image analysis; theories of the image; the politics and ethics of visual representation; portraiture and identity; advertising images; spectacle and modern media; war and propaganda imagery; circulation and the networked image; iconoclasm and censorship.

Prerequisite(s): Communication and Media Studies 201.
Antirequisite(s): Credit for Communication and Media Studies 367 and Communications Studies 367 will not be allowed.

Communication and Media Studies 369
3 units; H(3-0)

Rhetorical Communication
An introduction to the basic principles of rhetorical theory, criticism and practice. Examines rhetorical perspectives on elements of communication such as argumentation, persuasion, audience, situation, genre and ethics. Students will apply rhetorical theory to the criticism of samples of public communication and will practice their rhetorical skills through in-class activities and assigned writing and oral presentations.

Prerequisite(s): Prerequisite or Corequisite: Communication and Media Studies 201 or Communications Studies 201.
Antirequisite(s): Credit for Communication and Media Studies 369 and either Communications Studies 361 or 369 will not be allowed.

Note: Preference in enrolment is given to Majors and Minors in Communication and Media Studies and the Bachelor of Communication and Media Studies.

Communication and Media Studies 371
3 units; H(2-1)

Critical Media Studies
Emphasizes major critical approaches and theoretical foundations of media studies research. Explores the contexts in which these theories arose, identifies their major strengths and weaknesses and analyzes how critical theory engages the social world. Areas covered include the Frankfurt School, structuralism and semiotics, cultural studies, post-structuralism and feminist media studies.

Prerequisite(s): Communication and Media Studies 201 or Communications Studies 201.
Antirequisite(s): Credit for Communication and Media Studies 371 and Communications Studies 371 will not be allowed.

Communication and Media Studies 381
3 units; H(2-1)

Communications History
A general survey of how various communication systems and practices developed through history and of the social contexts within which they emerged, transformed and adapted through time. Examines major technological developments in the history of human communication and uses theory to understand their origins and impacts on social organization and everyday life.

Antirequisite(s): Credit for Communication and Media Studies 381 and either Communications Studies 380 or 381 will not be allowed.

Communication and Media Studies 383
3 units; H(3-0)

Introduction to Public Relations
Public relations theory and practice, with a particular emphasis on Canadian examples. Focus on links between public relations and new media, ethical standards of practice, and ethical perspectives on public relations as well as on the development of practical skills.

Antirequisite(s): Credit for Communication and Media Studies 383 and either Communications Studies 383 or 483 will not be allowed.

Communication and Media Studies 393
3 units; H(3-0)

Critical Perspectives on Health and Science
Examines the construction and communication of health and science as socio-cultural phenomena
and investigates the ways in which health and science issues are communicated, represented and framed, particularly within contemporary media.

**Prerequisite(s):** Communication and Media Studies 201 or Communications Studies 201.

**Antirequisite(s):** Credit for Communication and Media Studies 393 and either Communications Studies 393 or Science, Technology and Society 421 will not be allowed.

<table>
<thead>
<tr>
<th>Communication and Media Studies 401</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Special Topics in Communication and Media Studies** Critical study of contemporary topics or issues related to communications media, technology, culture, or discourse. Past topics have included gaming, the music industry, feminism, video activism, propaganda, fan cultures, and women in sport.

**Antirequisite(s):** MAY BE REPEATED FOR CREDIT

<table>
<thead>
<tr>
<th>Communication and Media Studies 413</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Advanced Research Methods** An in-depth study of selected methods for social and cultural research. Students will design and carry out empirical research applying these methods.

**Prerequisite(s):** Communication and Media Studies 313 or Communications Studies 313.

**Antirequisite(s):** Credit for Communication and Media Studies 413 and Communications Studies 413 will not be allowed.

**Note:** This course is strongly recommended for students who intend to apply to Honours or graduate programs or to seek employment in research-intensive industries.

<table>
<thead>
<tr>
<th>Communication and Media Studies 435</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Communication and Canadian Society** Explores aspects of Canadian communication, including historical development, theoretical approaches, challenges posed by advances in technology, and policy questions such as media ownership, Canadian content requirements and the relationship between media and democracy.

**Prerequisite(s):** Communication and Media Studies 201 or Communications Studies 201.

**Antirequisite(s):** Credit for Communication and Media Studies 435 and either Communications Studies 335 or 435 will not be allowed.

<table>
<thead>
<tr>
<th>Communication and Media Studies 463</th>
<th>3 units; H(2-2)</th>
</tr>
</thead>
</table>

**Rhetorical Communication in Online Environments** Rhetorical theory, criticism, production and editing of professional communication in online environments (organizational websites and blogs, professional uses of social media, project management applications, collaborative writing applications, corporate and community discussion forums and intranets). Experiential learning through team projects that critique and develop an organization’s online content.

**Prerequisite(s):** One of Communication and Media Studies 363, 383, 369, Communications Studies 363, 383, or 369.

**Antirequisite(s):** Credit for Communication and Media Studies 463 and Communications Studies 463 will not be allowed.

<table>
<thead>
<tr>
<th>Communication and Media Studies 469</th>
<th>3 units; H(2-2)</th>
</tr>
</thead>
</table>

**Rhetorical History and Criticism** A study of rhetorical thought and action from selected periods and authors from the classical period to the modern age, with an emphasis on the interaction between rhetoric and philosophical, social and political change. Theories will be applied to the criticism of historical and contemporary public communication.

**Prerequisite(s):** Communication and Media Studies 369 or Communications Studies 369.

**Antirequisite(s):** Credit for Communication and Media Studies 469 and either Communications Studies 461 or 469 will not be allowed.

<table>
<thead>
<tr>
<th>Communication and Media Studies 473</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Popular Culture** Introduces critical tools for deconstructing and evaluating the social significance of popular cultural texts, including music, television, film, advertising, and viral content. Particular focus on audience reception as a key method for understanding fan practices and subcultures.

**Prerequisite(s):** Communication and Media Studies 371 or Communications Studies 371.

<table>
<thead>
<tr>
<th>Communication and Media Studies 475</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Media and Cultural Industries** Considers the role and nature of media and cultural industries, offering students understanding of their role in the production and circulation of popular culture and information. Industries typically examined are television, radio, newspapers and other print media, film, sound recording, book publishing and advertising.

**Prerequisite(s):** Communication and Media Studies 371 or Communications Studies 371.

<table>
<thead>
<tr>
<th>Communication and Media Studies 477</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Food Culture and Communication** A theoretical and experiential introduction to food cultures as processes and products of communication. Examines how food is constructed and represented through text, film, television, art, and tourism. Political and economic constructions of food culture, security, and sustainability will also be explored.

**Prerequisite(s):** Credit for Communication and Media Studies 475 and Communications Studies 475 will not be allowed.

<table>
<thead>
<tr>
<th>Communication and Media Studies 481</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Environmental Media and Communication** Examines the mutual entanglements of media, communication and the environment, with a particular focus on media representations of the environment and environmental risks. May also examine environmental issues related to communications technologies and global communications infrastructures.

**Antirequisite(s):** Credit for Communication and Media Studies 485 and Communication and Media Studies 401.46 will not be allowed.

<table>
<thead>
<tr>
<th>Communication and Media Studies 491</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Introduction to Acoustic Communications and Acoustic Ecology** Concepts, techniques and applications of the fields of Acoustic Communications (the ways in which speech and music convey meaning) and Acoustic Ecology (the effects of sound in natural and human environments). These interdisciplinary areas weave together communication theory, cognitive psychology, sociology, musicology, physical sciences, health sciences and aesthetics.

**Antirequisite(s):** Credit for Communication and Media Studies 491 and either Communications Studies 391 or Communication and Media Studies 401.12 will not be allowed.

**Note:** There is no scheduled tutorial or lab, but some field work (off campus) and research out of class time is required.

<table>
<thead>
<tr>
<th>Communication and Media Studies 501</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Research in Selected Topics** Supervised individual study of a special topic.

**Prerequisite(s):** Consent of the Department.

**Note:** Students who wish to propose a topic must secure a supervisor and have the topic approved by the Department at least two weeks prior to the first day of classes.

<table>
<thead>
<tr>
<th>Communication and Media Studies 502</th>
<th>3 units; H(3-0)</th>
</tr>
</thead>
</table>

**Political Economy of Communication** Examines power relations between public, government and commercial forces in communication. Looks at how media dynamics have shifted his-

Applications of these new media practices in relation to politics and activism.

Antirequisite(s): Credit for Communication and Media Studies 631 and Culture and Society 607 will not be allowed.

Communication and Media Studies 641 3 units; H(3S-0)
(formerly Communication and Culture 641)

**International Communication**

An examination of cultural/communication issues and practices in international contexts. Examines the role of media systems in processes of culture, development, and identity formation.

Antirequisite(s): Credit for Communication and Media Studies 641 and Communications Studies 641 will not be allowed.

Communication and Media Studies 643
3 units; H(3S-3)

**Methods in Film Studies**

An examination of key approaches to studying film, including its aesthetic, historical, and theoretical dimensions.

Communication and Media Studies 645
3 units; H(3S-0)

**Media and Democracy**

An examination of the role played by media in democratic systems past and present. Draws from classic and contemporary democratic theory to explore the changing positions of traditional and new media, focusing on the interrelationships of media, political institutions and citizenship.

Communication and Media Studies 647
3 units; H(3S-0)

**Communication and Health**

Critically exploring the concept of health through the lens of communication, examines cultural and media representations of health, along with questions of health and identity, health promotion and advocacy, health risk and regulation, and social movements.

Communication and Media Studies 711
3 units; H(3S-0)
(formerly Communication and Culture 711)

**Directed Studies**

A research project under the direction of a faculty member.

Antirequisite(s): Credit for Communication and Media Studies 711 and Communications Studies 711 will not be allowed.

MAY BE REPEATED FOR CREDIT

Communication and Media Studies 713
3 units; H(3S-0)
(formerly Communication and Culture 713)

**PhD Theory Seminar**

A seminar that enables PhD students to focus their research interests and to explore theories relevant to their areas of specialization.

Prerequisite(s): Admission to the Communication and Media Studies PhD program.

Antirequisite(s): Credit for Communication and Media Studies 713 and Communications Studies 713 will not be allowed.

Communication and Media Studies 717
3 units; H(3S-0)
(formerly Communication and Culture 717)

**Selected Topics in Communication, Media and Film**

A variety of communication, media and film topics based on faculty expertise.

MAY BE REPEATED FOR CREDIT

**Community Health Sciences MDCH**

Instruction offered by members of the Cumming School of Medicine.

Community Health Sciences 600 3 units; H(3-0)

**Introduction to Community Health Sciences**

An introduction to the Department as well as a general orientation to the education and research programs in Community Health.

Prerequisite(s): Admission to the Community Health Sciences or Public Health and Preventive Medicine program or consent of the program. Not available to Open Studies students.

Antirequisite(s): Credit for Community Health Sciences 600 and Medical Science 644 will not be allowed.

NOT INCLUDED IN GPA

Community Health Sciences 602 3 units; H(1-0)

**Practicum in Public Health and Preventive Medicine**

Clinical or field-based practicum for the Master of Community Medicine Program of the Community Health Sciences graduate program.

Prerequisite(s): Admission to the Master of Community Medicine specialization or the Public Health and Preventive Medicine program.

Antirequisite(s): Credit for Community Health Sciences 602 and Medical Science 649.01 will not be allowed.

NOT INCLUDED IN GPA

Community Health Sciences 603 3 units; H(1-0)

**Practicum in Health Care Epidemiology**

Clinical or field-based practicum for the Health Care Epidemiology specialization of the Community Health Sciences graduate program.

Prerequisite(s): Admission to the Community Health Sciences graduate program's Health Care Epidemiology specialization.

Antirequisite(s): Credit for Community Health Sciences 603 and Medical Science 649.02 will not be allowed.

NOT INCLUDED IN GPA

Community Health Sciences 604 3 units; H(1-0)

**Practicum in Community Health Sciences**

Clinical or field-based practicum for students in any specialization of the Community Health Sciences graduate program.

Prerequisite(s): Admission to the Community Health Sciences graduate program.

Antirequisite(s): Credit for Community Health Sciences 604 and Medical Science 649.03 will not be allowed.

NOT INCLUDED IN GPA

Community Health Sciences 605 3 units; H(3-1T)

**Biostatistics I: Essentials of Biostatistics**

Introduces the fundamental concepts of summarizing data and statistical inference, including graphical displays, hypothesis testing, p-values, and confidence intervals. Specific topics include comparisons of means and proportions, non-parametric tests, correlation and regression, confounding, sample size determination, and power calculations. Additional topics include a brief introduction to analysis of variance and covariance, logistic regression, and analysis of time-to-event data. Students gain hands-on experience analyzing data using STATA statistical software. Although this course uses STATA exclusively, much of the technical knowledge and some of the computing techniques are applicable to any statistical package.

Prerequisite(s): Admission to the Community Health Sciences graduate program or Public Health and Preventive Medicine program or consent of the program. Not available to Open Studies students.

Antirequisite(s): Credit for Community Health Sciences 610 and Medical Science 643.01 will not be allowed.

Community Health Sciences 611
3 units; H(3-2T)

(Veterinary Medicine 611)

**Biostatistics II: Models for Health Outcomes**

Extends the fundamental concepts to modelling health outcomes using modern regression analysis techniques. Logistic and linear regression models, and their extensions, are covered in detail. The rationale, formulation, and statistical assumptions underlying each regression technique are discussed. Methods for selecting and assessing models are included. Additional topics include a brief introduction to models used in the analysis of repeated measures, longitudinal studies, and time-to-event data. STATA statistical software is used to analyze data. Required course for Biostatistics and Epidemiology specializations.

Prerequisite(s): Community Health Sciences 610 or Medical Science 643.01 and admission to the Community Health Sciences graduate program. Not available to Open Studies students.

Antirequisite(s): Credit for Community Health Sciences 611 and Medical Science 643.02 will not be allowed.

Community Health Sciences 612
3 units; H(3-2T)

(Veterinary Medicine 612)

**Biostatistics III: Models for Repeated Measures Studies and Time-to-Events Studies**

Discusses techniques for analyzing data collected at more than one point in time (repeated measures) and time-to-event (survival) data. Topics include generalized linear models (GLM), generalized additive models (GAM), Poisson regression, generalized estimating equations (GEE), and proportional hazards models.
Courses of Instruction

hazards regression with time-varying covariates. STATA statistical software is used to analyze data.

**Prerequisite(s):** Admission to the Community Health Sciences graduate program and Community Health Sciences 611 or Medical Science 643.02 or consent of the program. Not available to Open Studies students.

**Antirequisite(s):** Credit for Community Health Sciences and Medical Science 643.03 will not be allowed.

**Community Health Sciences 626 3 units; H(3-0)**

**Meta-Analysis/Systematic Review in Medical Education**

To become familiar with the theory, research, and application of meta-analysis/systematic review as it applies to the completion of studies in education and health care with a focus on the discipline of medicine education. In particular, an emphasis will be placed on the principles of using statistical methods and techniques related to synthesizing studies in the measurement of a pre-determined and appropriate topic of interest to the participant.

**Prerequisite(s):** Admission to the Medical Education specialization of the Community Health Sciences graduate program or consent of the program.

**Antirequisite(s):** Credit for Community Health Sciences 626 and Medical Science 738 will not be allowed.

**Community Health Sciences 627 3 units; H(3-0)**

**Medical Education Assessment and Measurement**

Approaches to assessment and measurement within the context of competency-based medical education.

**Prerequisite(s):** Admission to the Medical Education specialization of the Community Health Sciences graduate program or consent of the program.

**Antirequisite(s):** Credit for Community Health Sciences 627 and Medical Science 739 will not be allowed.

**Community Health Sciences 628 3 units; H(3-0)**

**Teaching, Learning, and Curriculum Design**

Overview of context in which medicine is taught and learned, the theory related to learning and change, the key elements of curriculum design and evaluation, and examine traditional and innovative methods used to enhance student and practitioner knowledge, skills and attitudes.

**Prerequisite(s):** Admission to the Medical Education specialization of the Community Health Sciences graduate program or consent of the program.

**Antirequisite(s):** Credit for Community Health Sciences 628 and any of Community Health Sciences 623, 624 and 625 will not be allowed.

**Community Health Sciences 629 3 units; H(3-0)**

**Foundations of Practice and Science in Medical Education**

Foundational academic concepts in the science of medical education including an overview of the philosophy of science, history of medical education and medical education scholarship along with fundamental concepts in medical education scholarship such as ethics and professionalism, critical appraisal and academic leadership.

**Prerequisite(s):** Admission to the Medical Education specialization of the Community Health Sciences graduate program or consent of the program.

**Community Health Sciences 630 3 units; H(3-1)**

(formerly Community Health Sciences 621)

**Designing Medical Education Research**

Why and how of research in medical education including core components of research, ethical issues, project management, the research proposal, reviewing the literature, data collection and analysis, reports and dissemination.

**Prerequisite(s):** Admission to the Medical Education specialization of the Community Health Sciences graduate program or consent of the program.

**Community Health Sciences 631 3 units; H(3-0)**

**Implementation of Medical Education Research**

Technical aspects of conducting a study including writing questions, selecting methods that are aligned with the research questions and approaches to analyzing quantitative and qualitative data.

**Prerequisite(s):** Admission to the Medical Education specialization of the Community Health Sciences graduate program or consent of the program.

**Community Health Sciences 640 3 units; H(3-2T)**

**(Veterinary Medicine 640)**

**Fundamentals of Epidemiology**

Principles and methods of descriptive and analytic epidemiology. Emphasizes the underlying concepts and approaches of epidemiological research and critical appraisal of epidemiologic studies including: observational study designs and their vulnerabilities to bias, measures of frequency and association, basic methods for addressing sampling variability, confounding, and effect modification. Concepts related to causal judgment in epidemiology are also introduced.

**Prerequisite(s):** Admission to the Community Health Sciences graduate program or Public Health and Preventative Medicine program or consent of the program. Not available to Open Studies students.

**Corequisite(s):** Community Health Sciences 610.

**Antirequisite(s):** Credit for Community Health Sciences 640 and Medical Science 647.01 will not be allowed.

**Community Health Sciences 641 3 units; H(3-0)**

**Introduction to Clinical Trials**

An introduction to methodological issues in the design and conduct of randomized controlled trials. Topics include ethics, blinding, randomization, sample size determination, sequential designs, data monitoring, and the logistical and organizational aspects of single centre and multi-centre trials.

**Prerequisite(s):** Admission to the Community Health Sciences graduate program and Community Health Sciences 610 and 640 or Medical Science 643.01 and 647.01 or consent of the program.

**Antirequisite(s):** Credit for Community Health Sciences 641 and Medical Science 659.04 will not be allowed.

**Community Health Sciences 642 3 units; H(3-0)**

**Psychiatric Epidemiology**

An overview of the context, principles and methods of psychiatric epidemiology. Basic concepts of bias and random error will be applied specifically to problems encountered in conducting psychiatric epidemiological studies. An additional objective is for students to gain a basic understanding of psychiatric terminology and nosology, including a basic understanding of the clinical features of major diagnostic categories.

**Prerequisite(s):** Community Health Sciences 610 and 640 and admission to the Community Health Sciences graduate program or consent of the program. Not available to Open Studies students.

**Community Health Sciences 643 3 units; H(3-0)**

**Research in Health Care Epidemiology and Infection Control**

Emphasizes the research aspects of health care epidemiology and the application of basic epidemiologic and biostatistical techniques in the health care environment. The course uses an interdisciplinary approach and fosters the integration of knowledge and skills from the bench to the bedside and back.

**Prerequisite(s):** Admission to the Community Health Sciences graduate program or consent of the program.

**Antirequisite(s):** Credit for Community Health Sciences 643 and Medical Science 647.07 will not be allowed.

**Community Health Sciences 644 3 units; H(3-0)**

**Surveillance I: Data Handling for Infection Control**

Focuses on the skills needed for data handling related to infection control in various settings. The primary aims are: (1) to develop the skills to properly manage data using various tools and technology; (2) to use basic statistical tools to analyze data used in infection control; (3) to properly interpret and draw appropriate conclusions from data used in infection control.

**Prerequisite(s):** Admission to the Community Health Sciences graduate program or consent of the program.

**Antirequisite(s):** Credit for Community Health Sciences 644 and Medical Science 647.10 will not be allowed.

**Note:** This is an online course.

**Community Health Sciences 645 3 units; H(3-0)**

**Surveillance II: Principles of Surveillance**

Focuses on the practice of surveillance for Infection Prevention and Control in various settings. The primary aims are: (1) to be able to base surveillance on an appropriate rationale; (2) to understand and use various methods of surveillance; (3) to make recommendations and follow up on the results of surveillance; (4) to be able to evaluate a surveillance program and incorporate into quality improvement.

**Prerequisite(s):** Community Health Sciences 644 or Medical Science 647.10 and admission to the Community Health Sciences graduate program or consent of the program.

**Antirequisite(s):** Credit for Community Health Sciences 645 and Medical Science 647.11 will not be allowed.

**Note:** This is an online course.

**Community Health Sciences 646 3 units; H(3-0)**

**Introduction to Public Health Surveillance**

Surveillance is a public health function. Topics included in this online course include definition and overview of public health surveillance, indicators, frameworks and principles for the planning and evaluation of surveillance systems; analysis and interpretation of surveillance data; communication
of public health information; and legal and ethical issues relevant to surveillance systems.

Prerequisite(s): Community Health Sciences 610 and 640 or Medical Science 643.01 and 647.01 and admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 646 and Medical Science 647.12 will not be allowed.

Community Health Sciences 647 3 units; H(3-0)

Clinical Epidemiology
Designed for students who have some familiarity and experience in epidemiology, biostatistics and who have a background in clinical health care or related field. It focuses on the application of epidemiologic methods to clinical health issues.

Prerequisite(s): Community Health Sciences 610 and 640 or Medical Science 643.01 and 647.01 and admission to the Community Health Sciences graduate program with a clinical background or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 647 and Medical Science 647.15 will not be allowed.

Community Health Sciences 648 6 units; F(3-1.5)

Online Basic Infection Control
Focuses on providing novice Infection Control Professionals (ICPs) with the basic knowledge, tools and strategies needed to do infection control in a board range of health care environments from health care institutions to the community. The purpose of this entry to practice course is (1) to identify and describe the scope of infection prevention and control problems and issues for novice ICPs and (2) to examine and integrate their current expertise with the basic knowledge, tools and strategies needed to examine problems and develop practical solutions in Infection Control.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 648 and Medical Science 660 will not be allowed.

Note: This is an online course.

Community Health Sciences 649 3 units; H(3-0) (Medical Science 613.01)

Epidemiology of Infectious Diseases
Focuses on the episodes of epidemiology that are of particular relevance to infectious diseases. The course emphasizes the research aspects of infectious diseases epidemiology and how the basic techniques of epidemiology and biostatistics are applied in the communicable diseases.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Community Health Sciences 660 3 units; H(3-0)

Foundations of Health Services Research
An introduction to the fundamental concepts of health services research including topics related to health systems and methods in health services research, as well as evaluation of health systems performance, with emphasis on knowledge translation and health policy creation and analysis.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 660 and Medical Science 645.18 will not be allowed.

Community Health Sciences 661 3 units; H(3-0) (Economics 679)

Health Economics I
Application of basic concepts from economics to examination of health and health care policy issues, such as why we have the kind of health-care system we have, various aspects of health care reform, promotion of health, and evaluation of interventions.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 661 and Medical Science 679 will not be allowed.

Community Health Sciences 662 3 units; H(3-0)

Economic Evaluation
Designed for students interested in being able to critically interpret economic evaluation studies of health or health care interventions and beyond. The aim of the course is to introduce students to the concepts and methods of economic evaluation, provide an introduction to how it may serve as a useful tool in health and health care decision-making, and to enable students to critically appraise the economic evaluation literature.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 662 and Medical Science 659.08 will not be allowed.

Community Health Sciences 663 3 units; H(3-2)

Decision Analysis in Health Economic
Students will be introduced to the concepts of decision analysis and how it may serve as a useful tool in health care economics evaluation. Through attention to a clinical question or health care policy issue, students will develop the skills necessary to perform an economic evaluation to address it.

Prerequisite(s): Community Health Sciences 662 or Medical Science 659.08 and admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 663 and Medical Science 659.06 will not be allowed.

Community Health Sciences 664 3 units; H(3-0)

Administrative Data Analysis Methodology
Administrative data have been used widely for decision making and research. Analysis of the data requires knowledge of the data features and unique analytical skills since the data are not collected for research purposes. This course is designed to provide these skills. Through analyzing available administrative data, students will write manuscripts suitable for publications at peer-reviewed journals.

Prerequisite(s): Minimum grade of "B+" in Community Health Sciences 610 and 640 or Medical Science 643.01 and 647.01 and consent of the program.

Antirequisite(s): Credit for Community Health Sciences 664 and Medical Science 659.07 will not be allowed.

Note: Consent of the program must be obtained by September 30.

Community Health Sciences 665 3 units; H(3-0)

Leadership in Health Care Organizations
A foundation for developing management and leadership skills in health care organizations. The curriculum includes: fundamentals of leadership; formal and informal components of organizations; strategic, operational, financial and project planning; managing change and conflict; human resources; and evaluating organizational performance. A variety of learning opportunities are incorporated including: reading materials, student seminars, self-assessment tools, case studies, team assignments, guest speakers and class discussion.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 665 and Medical Science 645.10 will not be allowed.

Community Health Sciences 666 3 units; H(3-0)

Health Policy
An advanced level course focused on developing and deepening participants' understanding of critical policy issues affecting health and health services. The course will primarily review health policy in the context of Canadian populations and systems. However, a more global comparative frame of reference will be used to test, challenge and contrast both the historical and current underpinnings of health policy in Canadian jurisdictions.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 666 and Medical Science 645.15 will not be allowed.

Community Health Sciences 667 3 units; H(3-0)

Introduction to the Legal and Ethical Framework of Health Care in Canada
An introduction to two integrated aspects of health care in Canada: the legal dimensions and the ethical dimensions. No formal background or training in law or ethics is presupposed. Successful students will gain grounding in the ethical-legal complex of health care and health research in Canada.

Prerequisite(s): Admission to the Community Health Sciences graduate program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 667 and Medical Science 645.17 will not be allowed.

Community Health Sciences 680 3 units; H(3S-0)

Foundations of Population/Public Health
Students will learn, discuss, and interrogate foundational content in population health and public health. Foundational content includes history, structure, functions, concepts, theories, and debates. The course is structured with the first half focusing on public health and the second half focusing on population health.

Prerequisite(s): Admission to the Community Health Sciences graduate program or Public Health and Preventative Medicine program or consent of the program.

Antirequisite(s): Credit for Community Health Sciences 680 and Medical Science 651.04 will not be allowed.

<tr>
<td>Community Health Sciences 730 6 units; <strong>F(3S-0)</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Doctoral Medical Education Research Seminar</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>An exploration of medical education research as an emerging field with multiple overlapping disciplines, methods, philosophies, and ideologies.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong></td>
<td></td>
<td>Admission to the Medical Education Specialization in the PhD program in Community Health Sciences.</td>
</tr>
<tr>
<td>Community Health Sciences 740 3 units; <strong>H(3-2T)</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Advanced Epidemiology</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>An expansion on the understanding of causality and threats to validity in epidemiologic research. The focus will be on the assessment and control of bias, including selection, information and confounding. The concept of effect modification (interaction) will be appraised. Stratified analysis will be considered as a tool for the assessment and control of confounding and effect modification and will be applied to a variety of study designs including case-control, and cohort studies.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong></td>
<td></td>
<td>Community Health Sciences 640 or Medical Science 647.01 and registration in the Community Health Sciences graduate program. Consent of the program is required for all other students.</td>
</tr>
<tr>
<td><strong>Antirequisite(s):</strong></td>
<td></td>
<td>Credit for Community Health Sciences 740 and Medical Science 709 will not be allowed.</td>

Courses of Instruction

Community Rehabilitation 435 3 units; H(3-0)
Social Research in Disability, Health and Rehabilitation Disablement
An overview of research methods in community rehabilitation and disability studies. An introduction to the major design, analyses and knowledge transfer strategies in the field.
Prerequisite(s): 24 units (4.0 full-course equivalents) including at least one of Community Rehabilitation 205 or 209.
Antirequisite(s): Credit for Community Rehabilitation 435 and 425 will not be allowed.

Community Rehabilitation 471 3 units; H(3-0)
Community Rehabilitation Practice for Families and Their Children
Families with children with disabilities in the context of the family relationships, support networks, schools and communities.
Prerequisite(s): 24 units (4.0 full-course equivalents) including at least one of Community Rehabilitation 205 or 209 or admission to BCR or BCR-C.

Community Rehabilitation 473 3 units; H(3-0)
Social Justice and the Labour Force
Exploring the role of work for youth and adult with disabilities.
Prerequisite(s): 24 units (4.0 full-course equivalents) including at least one of Community Rehabilitation 205 and 207 or admission to BCR or BCR-C.

Community Rehabilitation 475 3 units; H(3-0)
Community Rehabilitation Practice and the Aging Process
Theoretical and practical issues as they relate to rehabilitation and community services for seniors with disabilities.
Prerequisite(s): 24 units (4.0 full-course equivalents) including at least one of Community Rehabilitation 205 and 207 or admission to BCR or BCR-C.

Community Rehabilitation 485 3 units; H(2T/2-10)
An Introduction to Community Rehabilitation Practice and Professional Conduct
Practical application of the basic principles of assessment, planning and intervention with individuals/groups. Professional development tutorials support 130 hours in community practicum.
Students taking both Community Rehabilitation 485 and 487 will choose a different human service realm for each practicum.
Prerequisite(s): 27 units (4.5 full-course equivalents).
Note: Prior completion of Community Rehabilitation 205 and 207 is strongly recommended.

Community Rehabilitation 487 3 units; H(2T/2-10)
Practicum in Rehabilitation Practice
Practical application of the basic principles of assessment, planning and intervention with individuals/groups. Supports professional development tutorials in community practicum.
Prerequisite(s): Community Rehabilitation 207.

Community Rehabilitation 536 3 units; H(3-0)
Adapting Curriculum in Schools K-12
A variety of practical strategies for developing meaningful curriculum modifications and instructional methods for students with disabilities. The strategies are premised on using collaborative team approaches to planning and implementing instructional programs for students. Involving families as a meaningful part of the learning team will also be emphasized.
Prerequisite(s): Admission to the BCR or BCR-C program.

Community Rehabilitation 537 3 units; H(3-0)
Inclusion and Challenging Behaviours
An examination and expansion of belief systems surrounding challenging behaviour. Participants will be offered opportunities to learn about successful strategies for supporting difficult students within a classroom as well as other settings.
Prerequisite(s): Admission to the BCR or BCR-C program.

Community Rehabilitation 538 3 units; H(3-0)
Ethics of Inclusion
Ethics of caring and inclusion and implications for educational reform. Topics include the ethics of inclusive teaching practices in regular classrooms, educational systems change and leadership.
Prerequisite(s): Admission to the BCR or BCR-C program.

Community Rehabilitation 541 3 units; H(3-0)
International Disability Research and Policy
Disability research and policy including human rights policy and law whereby the student learns to understand local, national and global perspectives.
Prerequisite(s): 54 units (9.0 full-course equivalents).

Community Rehabilitation 543 3 units; H(3-0)
Integrating the Arts
Principles, theories and applications of creative art techniques with varied populations. Of particular interest to rehabilitation practitioners working with persons who present behavioural challenges.
Prerequisite(s): 48 units (8.0 full-course equivalents) and admission to the BCR or BCR-C program.
Antirequisite(s): Credit for Community Rehabilitation 543 and 591.02 will not be allowed.

Community Rehabilitation 547 3 units; H(3-0)
Health Research, Emerging Technologies and Marginalized Groups
Provides an in-depth global outlook on new, envisioned and emerging sciences and technologies and their global impact on (a) disabled people and disability studies; (b) the concept and field of rehabilitation and identity of rehabilitation professionals; (c) the concept of health professionals. Also provides an understanding of how disability studies scholars and rehabilitation and health policy, systems and care delivery scholars and professionals can enrich the new, envisioned and emerging science and technology and governance of science and technology discourse.
Prerequisite(s): 48 units (8.0 full-course equivalents).

Community Rehabilitation 549 3 units; H(3-0)
Understanding Children with Autism
Introduces students to Autism Spectrum Disorders (ASD). Discussions of the biological bases for the disorders as well as historical perspectives will be covered. Current research will be investigated from a variety of perspectives and philosophies. This course will provide students with in-depth knowledge of techniques used to treat children with autism, both empirically validated and those currently in vogue. An overview of characteristics, assessment strategies, issues, and approaches related to children with autism will be provided.
Prerequisite(s): 48 units (8.0 full-course equivalents).

Antirequisite(s): Credit for Community Rehabilitation 549 and 591.30 will not be allowed.

Community Rehabilitation 553 3 units; H(3-0)
Health Foundations: Disability Across the Lifespan
Explores the concepts of community rehabilitation in the context of anatomy and physiology of disabling conditions and human development across the lifespan. Self-directed learning is based on case studies, exploring current literature, and online interactive group work and forum discussions.
Prerequisite(s): 24 units (4.0 full-course equivalents).

Antirequisite(s): Credit for Community Rehabilitation 553 and either 557 or 591.34 will not be allowed.

Community Rehabilitation 559 3 units; H(3-0)
Fetal Alcohol Syndrome and Community Rehabilitation
A disability studies approach to Fetal Alcohol Spectrum Disorder and how this approach can facilitate an understanding of individuals with FASD in view of the principles of community inclusion and social justice as these apply to family support, schooling, intervention, prevention and life-long supports.
Prerequisite(s): 24 units (4.0 full-course equivalents).

Antirequisite(s): Credit for Community Rehabilitation 559 and 591.42 will not be allowed.

Community Rehabilitation 569 3 units; H(3-0)
Recovery Models: Mental Health and Disability
Clinical and interprofessional skills for those working in recovery and consumer driven programs in Community Mental Health and Disability.
Prerequisite(s): 48 units (8.0 full-course equivalents).

Community Rehabilitation 583 3 units; H(3-1)
Community Development in Community Rehabilitation
A study of management, practice and leadership issues for professionals working in community development and interdisciplinary teams, as well as in private, non-profit and public community-based organizations and businesses. Partnerships and community action are examined as components of rehabilitation practice.
Prerequisite(s): 48 units (8.0 full-course equivalents).
Community Rehabilitation 591  3 units; H(2-1)
Advanced Study Topics in Community Rehabilitation
Advanced study topics in community rehabilitation.
Prerequisite(s): 54 units (9.0 full-course equivalents).
MAY BE REPEATED FOR CREDIT

Community Rehabilitation 594  3 units; H(2T/2-10)
Practicum I
Senior level program and management skills in partner agencies, associations and systems. Specifics to be negotiated with the student. Content on professional ethics will also be covered.
Prerequisite(s): 54 units (9.0 full-course equivalents) and enrolment in BCR, Minor in Community Rehabilitation and Disability Studies, Minor in Adapted and Therapeutic Physical Activity or Concentration in Community Rehabilitation and Disability Studies for Health and Society Majors in the Bachelor of Health Sciences program.
Antirequisite(s): Credit for Community Rehabilitation 594 and 589.01 will not be allowed.
Note: Course needs to be taken in combination with Community Rehabilitation 595 in the same academic year.

Community Rehabilitation 595  3 units; H(2T/2-10)
Practicum II
Senior level program and management skills in partner agencies, associations and systems. Specifics to be negotiated with the student. Content on professional ethics will also be covered.
Prerequisite(s): Community Rehabilitation 594.
Antirequisite(s): Credit for Community Rehabilitation 595 and 589.02 will not be allowed.
Note: Course needs to be taken in combination with Community Rehabilitation 594 in the same academic year.

Community Rehabilitation 597  3 units; H(2T/2-10)
Practicum I in Community Rehabilitation for Distance Learners
Students will complete a project in the area of program or service development (e.g. needs analysis, developing funding proposals, program evaluation). In the seminars, students will be supported in the completion of agency-based program development. Content on professional ethics will also be covered.
Prerequisite(s): Community Rehabilitation 597 and admission to the BCR-C distance program.
Note: Course is normally taken in combination with Community Rehabilitation 597 in the same academic year.

Graduate Courses
Community Rehabilitation 624  6 units; F(3-1S-3)
Specialization Theory and Practice: A Collaborative Inquiry Capstone
Students refine a topic of inquiry, prepare background working papers, invite reactions from stakeholders/experts and report on their experience to stakeholder audience, fellow students and faculty. This is not a research course but an opportunity for students to own their knowledge and find ways to share their experience and education with others in a collaborative manner.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Rehabilitation 630  3 units; H(3-1S)
Foundations and Futures of Disability and Community Studies
History, current issues, and futures of intervention, activism, and academic study related to disability. This will include the systems and changing roles of those traditionally served, professionals, the teams they generate and society.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 630 and 603.15 will not be allowed.

Community Rehabilitation 631  3 units; H(3-1S)
Politics of Inclusion and Exclusion of Disability and Community Studies
Current topics relevant to inclusion and exclusion will be reviewed. An examination of research in disability provides an opportunity for the student to learn, understand, and compare legislation, policy, and ethical frameworks that inform action. Frameworks of choice, respect, consultation, collaboration, and co-operation will be examined.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 631 and 603.12 will not be allowed.

Community Rehabilitation 632  3 units; H(3-0)
Leadership and Innovation
The changing personal, organizational, and societal leadership role and its importance for innovation in the field of disability and community studies.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 632 and 603.13 will not be allowed.

Community Rehabilitation 633  3 units; H(3-1S)
Social Construction: Health Capacity and Disability
A constructivist exploration of language, political structures, and sense of self to deepen the understanding of health capacity and disability.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 633 and 603.18 will not be allowed.

Community Rehabilitation 634  3 units; H(3-1S)
Appraisal of Social and Health Quantitative Research Methods
Provides students with experience in critically appraising a range of quantitative research methods and familiarizing them with a variety of bio-statistical approaches. A variety of frameworks will be used to critically appraise literature from students’ chosen field of study and examine and discuss the implications for evidence-based practice.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 634 and 603.16 will not be allowed.
Note: Pre-session requirements include reading of pre-session materials and participation in orientation session prior to online course delivery.

Community Rehabilitation 641  3 units; H(3-0)
Special Topics in International Disability Research and Policy
Selected topics in disability research and policy provide an opportunity for the student to learn, understand, and compare the policies in two or more countries.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Rehabilitation 650  3 units; H(3-0)
Adapting Curriculum and Instruction from K-12
A variety of practical strategies for developing meaningful curriculum and instructional methods for students with severe disabilities. The strategies are premised on using the content of typical community collaborative team approaches to planning and implementing programs for students. Involving parents as part of the Learning Team will be emphasized.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 650 and 691.04 will not be allowed.

Community Rehabilitation 651  3 units; H(3-0)
Challenging Behaviours in the Classroom: Inclusive Education
Examines and builds upon the participant’s belief systems about challenging behaviour. Participants will be offered opportunities to learn about successful strategies for supporting difficult students within a classroom setting.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 651 and 691.32 will not be allowed.
Courses of Instruction

Community Rehabilitation 652 3 units; H[3-0]

**Collaboration, Ethics, Management: Inclusive Education**
Each year a topic is negotiated with the education sector in partnership with provincial advocacy organizations.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 652 and 691.33 will not be allowed.

Community Rehabilitation 653 3 units; H[3-1S]

**Advanced Seminar: Assessment and Intervention for Families with Children with Special Needs**
Exploration of cognitive, social/emotional, motor, language/communication development and assessment of children with disabilities in the context of their families and communities.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 653 and 603.02 will not be allowed.

Community Rehabilitation 654 3 units; H[3-0]

**Health Research, Emerging Technologies and Marginalized Groups**
Provides an in depth view of the impact of new emerging technologies and the governance of science and technology and health research on social policy, disability studies, disability research and the lives of disabled people and other marginalized groups.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 654 and 691.42 will not be allowed.

Community Rehabilitation 655 3 units; H[3-0]

**Bioethics and People with Disabilities**
Provides an in depth view of the impact of bioethics on social policy, disability studies, disability research and the lives of disabled people.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 655 and 691.44 will not be allowed.

Community Rehabilitation 656 3 units; H[3-0]

**Career Development and Disabilities**
Exploration of career development issues such as occupational change, and integration back into the workforce because of disability experienced in adult life.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.
Antirequisite(s): Credit for Community Rehabilitation 656 and 603.03 will not be allowed.

Community Rehabilitation 676 6 units; F[3-1S-3]

**Consultation in Human Services and Systems**
Qualitative and quantitative evaluation research informs the design and implementation of a collaborative evaluation of a rehabilitation program, policy or system.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Rehabilitation 730 3 units; H[3S-0]

**Doctoral Pro-Seminar in Disability, Community and Rehabilitation**
This advanced professional seminar focuses on a critical examination of theoretical, methodological, and professional issues relevant to research in the domains of community rehabilitation and disability studies. The course is intended for PhD students preparing their dissertation research proposals as a final preparation for their Candidacy Exam.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other graduate students.

NOT INCLUDED IN GPA

**Comparative Literature COLT**
Instruction offered by members of the Faculty of Arts. Please contact the Arts Students’ Centre for specific details.

**Junior Course**

Comparative Literature 203 3 units; H[3-0]

Comparative World Literature from 1650

Formative texts of world literature from 1650 to the present.

**Senior Course**

Comparative Literature 399 3 units; H[3-0]

Studies in Comparative Literature

MAY BE REPEATED FOR CREDIT

**Computational Media Design CMDA**
Instruction offered by members of the Faculties of Arts, Environmental Design and Science.

**Graduate Courses**

Computational Media Design 601 3 units; H[3-0]

Special Topics in Computational Media Design

A study of topics related to computational media design.

MAY BE REPEATED FOR CREDIT

Computational Media Design 603 3 units; H[0-9]

Research Project in Computational Media Design

An independent research project in computational media design under the guidance of a faculty member.

MAY BE REPEATED FOR CREDIT

**Computer Engineering ENCM**
Instruction offered by members of the Department of Electrical and Computer Engineering in the Schulich School of Engineering.

**Senior Courses**

Computer Engineering 335 3 units; H[3-1T-1.5]

**Programming Fundamentals for Electrical Engineers**
Key features of the C programming language. Pointers, memory models and memory management. Manipulation of text files and binary files. Introduction to recursion. Introduction to object-based programming using a modern object-oriented language.
Prerequisite(s): Engineering 233.
Antirequisite(s): Credit for Computer Engineering 335 and 339 will not be allowed.

Computer Engineering 369 3 units; H[3-1T-1.5]

**Computer Organization**
Prerequisite(s): Electrical Engineering 335 and Computer Engineering 335 or 339 or Software Engineering for Engineers 337.

Computer Engineering 467 3 units; H[3-1T-2]

**Digital Electronic Circuits**
MOS transistor fundamentals (D.C. characteristics, large signal model, transient behaviour). Transistor level implementation of standard MOS logic gates. Other MOS logic blocks. MOS memory (static and dynamic). Interfacing various logic families. Introduction to integrated circuit design.
Prerequisite(s): Electrical Engineering 343 and 361.

Computer Engineering 501 3 units; H[3-1T-1]

**Principles of Computer Architecture**
Prerequisite(s): Computer Engineering 369 and 511.

Computer Engineering 507 3 units; H[3-1T]

**Computer Aided Design of Integrated Circuits**
Development of Computer-Aided Design (CAD) tools for digital circuits, algorithmic definition and design; partitioning, clustering, placement routing and timing techniques for digital circuits; applications in other areas of engineering.
Prerequisite(s): Electrical Engineering 353.
Antirequisite(s): Credit for Computer Engineering 507 and Electrical Engineering 519.38 will not be allowed.

Computer Engineering 509 3 units; H[3-2]

**Fundamentals of Biometric Systems Design**
Biometric systems, sensors and devices. Integration of Biometric-based hardware and software, Biometric applications.
Prerequisite(s): Electrical Engineering 327 or consent of the Department.
Antirequisite(s): Credit for Computer Engineering 509 and 519.36 will not be allowed.
Courses of Instruction

Computer Engineering 511 3 units; H(3-1T-3/2)

Embedded System Interfacing
Review of computer architecture; microcontrollers and their instruction sets; interfacing using common input/output devices, debugging and other software engineering practices, strategies for interrupt handling and exception handling; Interfacing using high level and assembly languages; software and hardware optimizations to achieve real time operations; real time operating systems; embedded real-time applications.

Prerequisite(s): Computer Engineering 369.

Computer Engineering 515 3 units; H(3-1T-3/2)

Digital Signal Processors
Review of microprocessor fundamentals. Comparison of basic system architectures for RISC, CISC and DSP processors, recent architectural innovations. Processor characteristics needed to match the requirements for typical DSP applications. Hardware and software optimization techniques including multiprocessors, register windows, super-scalar and other highly parallel instruction sets, critical timing paths, optimizing compilers and multi-processor operation. Fundamental comparison of custom and current commercial single chip DSP processor architectures. Elements of Hardware-Software co-design and development processes. Practical applications and laboratories.

Prerequisite(s): Computer Engineering 369.

Computer Engineering 517 3 units; H(3-1T)

Computer Arithmetic and Computational Complexity
Analyzing the complexity of computer arithmetic algorithms, fundamental issues concerning computational complexity problems with applications to engineering problems, including signal and image processing, cryptography and data mining.

Prerequisite(s): Computer Engineering 335 or 339 or Software Engineering for Software Engineers 337.

Antirequisite(s): Credit for Computer Engineering 517 and 519.34 will not be allowed.

Computer Engineering 519 3 units; H(3-2)

Special Topics in Computer Engineering
Current topics in computer engineering.

Prerequisite(s): Consent of the Department.

Note: Consent Department for announcement of topics.

MAY BE REPEATED FOR CREDIT

Computer Science CPSC

Instruction offered by members of the Department of Computer Science in the Faculty of Science.

Notes:
- Computer Science students should also see courses listed under Software Engineering.
- Computer Science 217, 231, 235 and Data Science 211 are each introductions to computer science that include a substantial introduction to programming and that are available for credit for Computer Science majors. Students interested in these courses should consult the department and program information for the Department of Computer Science when choosing which course to take.
- In several cases, credit is not allowed for Computer Science courses and various courses offered by the Faculty of Engineering. Students who have successfully completed Engineer-

ing courses should contact the Department of Computer Science for additional information.

Junior Courses

Computer Science 203 3 units; H(4-0)

Introduction to Problem Solving using Application Software
Introduction to computer fundamentals; contemporary topics, such as security and privacy, and the Internet and World Wide Web. Problem solving, analysis and design using application software such as spreadsheets.

Antirequisite(s): Not open to Computer Science majors.

Note: Basic familiarity with personal computers and commonly used software, including word processors, electronic mail and web browsers, will be assumed.

Computer Science 217 3 units; H(3-2T)

Introduction to Computer Science for Multidisciplinary Studies I
Introduction to problem solving, analysis and design of small-scale computational systems and implementation using a procedural programming language. For students wishing to combine studies in computer science with studies in other disciplines.

Antirequisite(s): Credit for Computer Science 217 and any of 215, 231, 235, Data Science 211, Computer Engineering 339 or Engineering 233 will not be allowed.

Note: See the statements at the beginning of the Computer Science entry.

Computer Science 219 3 units; H(4-2T)

Introduction to Computer Science for Multidisciplinary Studies II
Continuation of Introduction to Computer Science for Multidisciplinary Studies I. Emphasis on object oriented analysis and design of small-scale computational systems and implementation using an object oriented language. Issues of design, modularization and programming style will be emphasized.

Prerequisite(s): Computer Science 217 or Data Science 211.

Antirequisite(s): Credit for Computer Science 219 and any of 233, 235, Electrical Engineering 497 or Computer Engineering 493 will not be allowed.

Computer Science 231 3 units; H(3-2T)

Introduction to Computer Science for Computer Science Majors I
Introduction to problem solving, the analysis and design of small-scale computational systems, and implementation using a procedural programming language. For computer science majors.

Antirequisite(s): Credit for Computer Science 231 and any of 215, 217, 235 or Data Science 211 or Computer Engineering 339 or Engineering 233 will not be allowed.

Note: See the statements at the beginning of the Computer Science entry.

Computer Science 233 3 units; H(3-2T)

Introduction to Computer Science for Computer Science Majors II
Continuation of Introduction to Computer Science for Computer Science Majors I. Emphasis on object-oriented analysis and design of small-scale computational systems and implementation using an object oriented language. Issues of design, modularization, and programming style will be emphasized.

Prerequisite(s): Computer Science 231.

Antirequisite(s): Credit for Computer Science 233 and any of 219, 235, Electrical Engineering 497 or Computer Engineering 493 will not be allowed.

Computer Science 235 3 units; H(3-2T-2)

Advanced Introduction to Computer Science
An accelerated introduction to problem solving, the analysis and design of small-scale computational systems and implementation using both procedural and object oriented programming languages. Issues of design, modularization, and programming style will be emphasized.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Computer Science 235 and any of 216, 217, 219, 231, 233, Computer Engineering 339, 493 or Data Science 211 will not be allowed.

Note: See the statements at the beginning of the Computer Science entry.

Senior Courses

Computer Science 313 3 units; H(3-2T)

Introduction to Computability
An introduction to abstract models of sequential computation, including finite automata, regular expressions, context-free grammars, and Turing machines. Formal languages, including regular, context-free, and recursive languages, methods for classifying languages according to these types, and relationships among these classes.

Prerequisite(s): Mathematics 271 or 273; Philosophy 279 or 377; and one of Computer Science 219, 233 or 235.

Note: One of Computer Science 319 or 331 is strongly recommended as preparation for this course.

Computer Science 319 3 units; H(3-2T)

Data Structures, Algorithms, and Their Applications
Fundamental data structures, including arrays, lists, stacks, queues, trees, hash tables, and graphs. Algorithms for searching and sorting. Applications of these data structures and algorithms. For students wishing to combine studies in computer science with studies in other disciplines.

Prerequisite(s): One of Computer Science 219, 233, 235, Computer Engineering 335, 339 or Software Engineering for Engineers 337.

Antirequisite(s): Credit for Computer Science 319 and 331 will not be allowed. Computer Science majors are not permitted to register in this course.

Computer Science 329 3 units; H(3-2T)

Explorations in Information Security and Privacy
A broad survey of topics in information security and privacy, with the purpose of cultivating an appropriate mindset for approaching security and privacy issues. Topics will be motivated by recreational puzzles. Legal and ethical considerations will be introduced as necessary.

Prerequisite(s): One of Computer Science 217, 231, 235, Data Science 211 or Engineering 233.

Note: One of Mathematics 211, 213, 249, 251, 265, 271, 273, 275, 281 or Applied Mathematics 217 is recommended as preparation for this course.
Courses of Instruction

Computer Science 331  3 units; H(3-2T)

Data Structures, Algorithms, and Their Analysis
Fundamental data structures, including arrays, lists, stacks, queues, trees, hash tables, and graphs. Algorithms for searching and sorting, introduction to the correctness and analysis of algorithms. For computer science majors and those interested in algorithms design and analysis, information security, and other mathematically-intensive areas.

Prerequisite(s): Mathematics 271 or 273; and one of Computer Science 219, 233, 235 or Computer Engineering 339.

Antirequisite(s): Credit for Computer Science 331 and 319 will not be allowed.

Intermediate Information Structures
A continuation of Computer Science 319 or 331. Collision resolution in hash tables, search algorithms, advanced tree structures, strings. Advanced algorithmic tools for the storing and manipulation of information.

Prerequisite(s): Computer Science 319 or 331.

Computer Science 355  3 units; H(3-2T)

Computing Machinery I
An introduction to computing machinery establishing the connection between programs expressed in a compiled language, an assembly language, and machine code, and how such code is executed. Includes the detailed study of a modern CPU architecture, its assembly language and internal data representation, and the relationship between high-level program constructs and machine operations.

Prerequisite(s): One of Computer Science 219, 233 or 235.

Antirequisite(s): Credit for Computer Science 355 and 265 or Computer Engineering 369 will not be allowed.

Computer Science 359  3 units; H(3-2T)

Computing Machinery II
An introduction to hardware and microprocessor design, including the connection between gate-level digital logic circuits and sequential machines that can execute an algorithm and perform input and output.

Prerequisite(s): Computer Science 355 and Philosophy 279 or 377.

Antirequisite(s): Credit for Computer Science 359 and any of 325, 455 or Computer Engineering 415 will not be allowed.

Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Computer Science 399  3 units; H(3-0)

Special Topics in Computer Science
Exploration of various areas in Computer Science. Topics will vary from year-to-year. It will be offered as required to provide the opportunity for students to engage in additional areas in Computer Science. Before registration, consult the Department of Computer Science for topics offered.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Computer Science 405  3 units; H(3-0)

(formerly CPSC 499.01)

Software Entrepreneurship
Development of business models, building software prototypes and creation of pitch presentations to create a software-based business.

Prerequisite(s): Software Engineering 300.

Note: Taught in collaboration with the Haskayne School of Business.

Computer Science 409  3 units; H(3-0)

History of Computation
The history of computation from the earliest times to the modern era.

Prerequisite(s): Computer Science 355.

Computer Science 411  3 units; H(3-2T)

Compiler Construction
Introduction to compilers, interpreters, and the tools for parsing and translation. Lexical analysis, context free grammars and software tools for their recognition. Attribute grammars and their applications in translation and compiling.

Prerequisite(s): Computer Science 319 or 331.

Note: Computer Science 319 is strongly recommended as preparation for this course.

Computer Science 413  3 units; H(3-2T)

Design and Analysis of Algorithms I
Techniques for the analysis of algorithms, including counting, summation, recurrences, and asymptotic relations; techniques for the design of efficient algorithms, including greedy methods, divide and conquer, and dynamic programming; examples of their application; an introduction to tractable and intractable problems.

Prerequisite(s): Computer Science 319, 331; Mathematics 211 or 213; and one of Mathematics 249, 265 or 275.

Note: One of Mathematics 265 or 275 is highly recommended as preparation for this course, but not mandatory. Students who have credit for Computer Science 319 or 331 should contact the department for instructions on how to enrol in this course.

Computer Science 418  3 units; H(3-2T)

Introduction to Cryptography
The basics of cryptography, with emphasis on attaining well-defined and practical notations of security. Symmetric and public key cryptosystems; one-way and trapdoor functions; mechanisms for data integrity; digital signatures; key management; applications to the design of cryptographic systems. In addition to written homework, assessment will involve application programming; additional mathematical theory and proof-oriented exercises will be available for extra credit.

Prerequisite(s): Computer Science 319 and one of Mathematics 271, 273, 315 or Pure Mathematics 315.

Antirequisite(s): Credit for Computer Science 418 and any of Computer Science 429, 557, Mathematics 418, Pure Mathematics 329 or 418 will not be allowed.

Note: Students who have credit for Computer Science 319 instead of Computer Science 331 should contact the department for instructions on how to enrol in this course.

Computer Science 433  3 units; H(3-2T)

Artificial Intelligence
An examination of the objectives, key techniques and achievements of work on artificial intelligence in Computer Science.

Prerequisite(s): Computer Science 313 and Philosophy 279 or 377.

Note: Prior or concurrent completion of Computer Science 349 or 449 is strongly recommended as preparation for this course.

Computer Science 441  3 units; H(3-2T)

Computer Networks
Principles and practice in modern telecommunications, computer communications and networks. Layered communication protocols and current physical, data link, network and Internet protocol layers, circuit switching, packet switching, and an introduction to broadband multimedia networking.

Prerequisite(s): Computer Science 319 or 331; and one of Computer Science 325, 359 or Computer Engineering 369.

Antirequisite(s): Credit for Computer Science 441 and Electrical Engineering 573 will not be allowed.

Computer Science 449  3 units; H(3-2T)

(formerly Computer Science 349)

Programming Paradigms
Examination of the basic principles of the major programming language paradigms. Focus on declarative paradigms such as functional and logic programming. Data types, control expressions, loops, types of references, lazy evaluation, different interpretation principles, information hiding.

Prerequisite(s): Computer Science 319 or 331; and Philosophy 279 or 377.

Note: The prerequisite of Philosophy 279 or 377 is waived for engineering students in the Software Engineering program.

Computer Science 453  3 units; H(3-2T)

Introduction to Computer Graphics

Prerequisite(s): Computer Science 319 or 331; and Mathematics 211 or 213; and one of Mathematics 253, 267, 277, 283 or Applied Mathematics 219.

Computer Science 457  3 units; H(3-2T)

Principles of Operating Systems
An introduction to operating systems principles. Performance measurement; concurrent programs; the management of information, memory and processor resources.

Prerequisite(s): Computer Science 319 or 331; and one of Computer Science 325, 359 or Computer Engineering 369.

Note: Prior or concurrent completion of Computer Engineering 511 is strongly recommended for students in Computer Engineering or Software Engineering programs.

Computer Science 461  3 units; H(3-2T)

Information Structures
File architecture and manipulation techniques for various file types. Physical characteristics of current mass storage devices. Advanced data structures and algorithms for implementing various
Courses of Instruction

sequential and hierarchical file structures. File organization and design for various applications, file systems and other storage management techniques including website design.

**Prerequisite(s):** Computer Science 355 and one of 319 or 331.

**Computer Science 471** 3 units; H(3-2T)

**Data Base Management Systems**
Conceptual, internal and external data bases. Relational data base systems and SQL. The normal forms, data base design, and the entity-relationship approach.

**Prerequisite(s):** Computer Science 319 or 331.

**Antirequisite(s):** Credit for Computer Science 471 and Business Technology Management 331 will not be allowed.

**Computer Science 481** 3 units; H(3-2T)

**Human-Computer Interaction I**
Fundamental theory and practice of the design, implementation, and evaluation of human-computer interfaces. Topics include: principles of design; methods for evaluating interfaces with or without user involvement; techniques for prototyping and implementing graphical user interfaces.

**Prerequisite(s):** One of Software Engineering 300, 301 or Data Science 311.

**Computer Science 491** 3 units; H(3-2T)

**Techniques for Numerical Computation**
Elementary techniques for the numerical solution of mathematical problems on a computer, including methods for solving linear and non-linear equations, numerical integration, and interpolation.

**Prerequisite(s):** Computer Science 319 or 331; and Mathematics 211 or 213; and one of Mathematics 249, 251; 265, 275, 281 or Applied Mathematics 217.

**Antirequisite(s):** Credit for Computer Science 491 and any of Applied Mathematics 491, 493 or Engineering 407 will not be allowed.

**Computer Science 499** 3 units; H(3-0)

**Special Topics in Computer Science**
Exploration of various areas in Computer Science. Topics will vary from year-to-year. It will be offered as required to provide the opportunity for students to engage in additional areas in Computer Science. Before registration, consult the Department of Computer Science for topics offered.

**Prerequisite(s):** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

**Computer Science 501** 3 units; H(3-2T)

**Advanced Programming Techniques**
Theory and application of advanced programming methods and tools. Recent issues as well as those of an enduring nature will be discussed.

**Prerequisite(s):** Computer Science 349 or 449.

**Computer Science 502** 6 units; F(1-5)

**Research Project**
A substantial research project under the guidance of a faculty member. A report must be written and presented on completion of the course.

502.01 Project in Computer Science
502.02 Project in Theoretical Computer Science
502.03 Project in Computer Graphics
502.04 Project in Information Security
502.05 Project in Scientific Computation
502.06 Project in Software Engineering
502.07 Project in Human Computer Interaction
502.08 Project in Networks and Distributed Computing

**Prerequisite(s):** Consent of the Department.

**Antirequisite(s):** Credit for Computer Science 502 and any of 503, Software Engineering for Engineers 599 or 591 will not be allowed.

**Note:** Students intending to complete a research project in a specific area of computer science should register in the version of Computer Science 502 corresponding to that area, if such a course is available. Other students should register in Computer Science 502.01. Permission to register in Computer Science 502 is generally given only to students with a minimum GPA of 3.30 over the last 90 units (15 full-course equivalents). When demand exceeds capacity, registration in Computer Science 502 is limited to students in Honours programs in Computer Science.

**Computer Science 503** 3 units; H(1-5)

**Project**
A research project conducted under the guidance of a faculty member. A report must be presented on completion of the course.

503.01 Project in Computer Science
503.02 Project in Theoretical Computer Science
503.03 Project in Computer Graphics
503.04 Project in Information Security
503.05 Project in Scientific Computation
503.06 Project in Software Engineering
503.07 Project in Human Computer Interaction
503.08 Project in Networks and Distributed Computing

**Prerequisite(s):** Consent of the Department.

**Antirequisite(s):** Credit for Computer Science 502 and either 503 or Software Engineering for Engineers 599 will not be allowed.

**Note:** Students intending to complete a project in a specific area of computer science should register in the version of Computer Science 503 corresponding to that area, if such a course is available. Other students should register in Computer Science 503.01.

**Computer Science 511** 3 units; H(3-0)

**Introduction to Complexity Theory**
Time and space complexity; the classes P, LOGSPACE, PSPACE, and their nondeterministic counterparts; containments and separations between complexity classes; intractability and the theory of NP-completeness; complexity theories for probabilistic algorithms and for parallel algorithms.

**Prerequisite(s):** Computer Science 413.

**Antirequisite(s):** Credit for Computer Science 511 and 611 will not be allowed.

**Computer Science 513** 3 units; H(3-0)

**Computability**
Computable functions; decidable and undecidable problems; Church’s thesis and recursive functions.

**Prerequisite(s):** Computer Science 313.

**Note:** Computer Science 413 is strongly recommended as preparation for this course.

**Computer Science 517** 3 units; H(3-0)

**Design and Analysis of Algorithms II**
Advanced techniques for the design and analysis of deterministic and probabilistic algorithms; techniques for deriving lower bounds on the complexity of problems.

**Prerequisite(s):** Computer Science 413.

**Computer Science 518** 3 units; H(3-0)

**Introduction to Computer Algebra**
Fundamental problems, classical and modern algorithms, and algorithm design and analysis techniques of use in computer algebra. Integer and polynomial arithmetic. Additional problems in computer algebra, possibly including problems in computational linear algebra, factorization, and concerning systems of polynomial equations will be considered as time permits.

**Prerequisite(s):** Computer Science 413 and one of Mathematics 211 or 213.

**Antirequisite(s):** Credit for Computer Science 518 and Computer Science 667 will not be allowed.

**Note:** Computer Science 491 and Pure Mathematics 315 or Mathematics 315 are recommended as preparation for this course.

**Computer Science 519** 3 units; H(3-0)

**Introduction to Quantum Computation**
Introduction to quantum computing. Quantum algorithms, quantum search, quantum fourier transforms, quantum error correcting codes, quantum cryptography, nonlocality and quantum communication complexity, and quantum computational complexity.

**Prerequisite(s):** Computer Science 413 and one of Mathematics 311 or 313.

**Antirequisite(s):** Credit for Computer Science 519 and Computer Science 619 will not be allowed.

**Computer Science 521** 3 units; H(3-2T)

**Foundations of Functional Programming**

**Prerequisite(s):** Computer Science 313 and one of Computer Science 349 or 449.

**Computer Science 522** 3 units; H(3-2T)

**Introduction to Randomized Algorithms**
Techniques for the design and analysis of randomized algorithms; discrete probability theory; randomized data structures; lower bound techniques; randomized complexity classes; advanced algorithmic applications from various areas.

**Prerequisite(s):** Computer Science 413.

**Antirequisite(s):** Credit for Computer Science 522 and Computer Science 622 will not be allowed.

**Note:** Mathematics 321 or Statistics 321 is recommended as preparation for this course.
Courses of Instruction

Computer Science 525 3 units; H(3-0)

Principles of Computer Security
Security policies and protection mechanisms for a computing system, including such topics as design principles of protection systems, authentication and authorization, reference monitors, security architecture of popular platforms, formal modeling of protection systems, discretionary access control, safety analysis, information flow control, integrity, role-based access control. Legal and ethical considerations will be introduced.

Prerequisite(s): Computer Science 457 and one of Mathematics 271 or 273.

Antirequisite(s): Credit for Computer Science 525 and either 529 or 625 will not be allowed.

Note: Computer Science 529 is recommended as preparation for this course.

Network Systems Security
Attacks on networked systems, tools and techniques for detection and protection against attacks including firewalls and intrusion detection and protection systems, authentication and identification in distributed systems, cryptographic protocols for IP networks, security protocols for emerging networks and technologies, privacy enhancing communication. Legal and ethical issues will be introduced.

Prerequisite(s): Computer Science 441.

Antirequisite(s): Credit for Computer Science 526 and either 529 or 625 will not be allowed.

Note: Computer Science 529 and one of Pure Mathematics 329, Computer Science 418, Mathematics 318 or Pure Mathematics 418 are recommended as preparation for this course.

Computer Science 527 3 units; H(3-0)

Computer Viruses and Malware
Study of computer viruses, worms, Trojan horses, and other forms of malicious software. Countermeasures to malicious software. Legal and ethical issues, and some general computer and network security issues.

Prerequisite(s): Computer Science 313 and 457 and consent of the Department.

Antirequisite(s): Credit for Computer Science 527 and 627 will not be allowed.

Computer Science 528 3 units; H(3-0)

Spam and Spyware
Spam and other unsolicited bulk electronic communication, and spyware. Legal and ethical issues. Countermeasures and related security problems.

Prerequisite(s): Computer Science 313 and 457 and consent of the Department.

Antirequisite(s): Credit for Computer Science 528 and 628 will not be allowed.

Computer Science 530 3 units; H(3-2T)

Information Theory and Security
Information theoretic concepts such as entropy and mutual information and their applications to defining and evaluating information security systems including encryption, authentication, secret sharing and secure message transmission.

Prerequisite(s): One of Computer Science 219, 233 or 235, one of Mathematics 271, 273, 315, or Pure Mathematics 315, and one of Statistics 205 or 211 or 213 or 321 or Mathematics 321.

Antirequisite(s): Credit for Computer Science 530 and 630 will not be allowed.

Note: Computer Science 529 is recommended as preparation for this course.

Computer Science 531 3 units; H(3-0)

Systems Modelling and Simulation
An introduction to the modelling and simulation of stochastic systems; programming language issues; model and tool design; input data modelling; simulation experiments; and the interpretation of simulation results.

Prerequisite(s): Computer Science 457 and one of Mathematics 321 or Statistics 205 or 211 or 213 or 321.

Note: Mathematics 321 is recommended over Statistics 205 or 211 or 213 as preparation for this course. Computer Science 441 is also recommended as preparation for this course.

Computer Science 535 3 units; H(3-0)

Introduction to Image Analysis and Computer Vision

Prerequisite(s): One of Mathematics 311, 313, 331, 353, 376, Applied Mathematics 307, 311, Pure Mathematics 331.

Antirequisite(s): Credit for Computer Science 535 and 635 will not be allowed.

Computer Science 550 6 units; F(2-3)

Systems Administration
Topics and practices in systems administration and management. Required and optional administration duties and responsibilities. Moral and ethical conundrums, and legal responsibilities, in systems operation. Configuration and installation of operating systems and network and systems services.

Prerequisite(s): Computer Science 457 and consent of the Department.

Computer Science 559 3 units; H(3-0)

Introduction to Distributed Systems
Designing and implementing distributed systems that overcome challenges due to concurrent computation, failure of components in the system and heterogeneity of processors and communication channels.

Prerequisite(s): Computer Science 441 and 457.

Computer Science 561 3 units; H(3-2T)

Introduction to Distributed Algorithms
Basic problems in distributed systems such as symmetry breaking, consensus, resource allocation, and synchronization. The impact of system characteristics, such as models of communication, timing and failure, and of solution requirements, such as correctness and complexity criteria and algorithmic constraints, on the computability and complexity of these problems. Techniques for solving problems under different models will be emphasized.

Prerequisite(s): Computer Science 413.

Antirequisite(s): Credit for Computer Science 561 and 661 will not be allowed.

Computer Science 565 3 units; H(3-0)

Emergent Computing
An insight into a new mindset for programming as an emergent and evolutionary process of “breeding,” rather than constructing. Programs can evolve to perform specific tasks in a bottom-up fashion rather than being manually coded. Topics will include: decentralized agent-based program- ming, massive parallelism and interaction, evolution, swarm intelligence.

Prerequisite(s): Computer Science 433.

Computer Science 567 3 units; H(3-1T)

Foundations of Multi-Agent Systems
Modelling of agents and properties of multi-agent systems. Communication issues, including interaction and co-ordination concepts, forming and maintaining organizations, and competitive agent environments. Example systems; the implementation of a multi-agent system will be performed as the assignment.

Prerequisite(s): Computer Science 457 and 433.

Antirequisite(s): Credit for Computer Science 567 and 609 or Software Engineering 697 will not be allowed.

Computer Science 568 3 units; H(3-0)

Agent Communications
An examination of communication paradigms in multi-agent systems. A number of paradigms will be covered including simple protocols, BDI (Believe, Desire, Intention), and social commitments.

Prerequisite(s): Computer Science 433 and consent of the Department.

Antirequisite(s): Credit for Computer Science 568 and 662 will not be allowed.

Computer Science 571 3 units; H(3-0)

Design and Implementation of Database Systems
Implementation and design of modern database systems including query optimization, recovery, concurrency, integrity, and distribution.

Prerequisite(s): Computer Science 471.

Antirequisite(s): Credit for Computer Science 571 and 671 will not be allowed.

Computer Science 572 3 units; H(3-0)

(formerly Computer Science 599.77)

Fundamentals of Social Network Analysis and Data Mining
Introduction to data mining with emphasis on frequent pattern mining, clustering and classification, data collection, network construction, basic graph theory concepts and network analysis metrics, and case studies.

Prerequisite(s): Computer Science 571.

Antirequisite(s): Credit for Computer Science 572 and 672 will not be allowed.

Computer Science 575 3 units; H(3-0)

(formerly Computer Science 599.72)

Programming for Creative Minds
Design, develop and market apps. This course has a focus on developing, implementing and evaluating ideas in teams and gaining entrepreneurial skills for software development and marketing.

Prerequisite(s): Software Engineering 300.

Computer Science 577 3 units; H(3-0)

(formerly Computer Science 599.97)

Biometric Technologies

Prerequisite(s): Computer Science 453.
### Courses of Instruction

<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Computer Science 581</strong></td>
<td>3 units</td>
<td>H(3-2)</td>
</tr>
<tr>
<td><strong>Human-Computer Interaction II</strong></td>
<td>Intermediate and advanced topics and applications in human-computer interaction, to further one’s skills for designing highly interactive human-computer interfaces.</td>
<td>Consent of the Department.</td>
</tr>
<tr>
<td><strong>Introduction to Information Visualization</strong></td>
<td>Principles of information representation, presentation and interaction. Development of mappings from data to visual structures and exploration, navigation, cues, distortion and emphasis techniques.</td>
<td>Consent of the Department.</td>
</tr>
<tr>
<td><strong>Games Programming</strong></td>
<td>Standard techniques for the implementation of computer games. Standard multimedia programming environments and high performance multimedia. Special purpose rendering engines. Interactive control and feedback; modelling.</td>
<td>Consent of the Department.</td>
</tr>
<tr>
<td><strong>Fundamentals of Computer Animation</strong></td>
<td>Principles of traditional animation, key framing, parametric and track animation, free form deformation, inverse kinematics, dynamics, spring mass systems, particle systems, numerical integration, Lagrangian constraints, space time constraints, collisions, human animation, behavioural animation, metamorphosis, implicit animation techniques, animating liquids, gases and cloth, motion capture.</td>
<td>Consent of the Department.</td>
</tr>
<tr>
<td><strong>Software Engineering Project</strong></td>
<td>A software engineering project conducted under the guidance of a faculty member.</td>
<td>Consent of the Department.</td>
</tr>
<tr>
<td><strong>Special Topics in Computer Science</strong></td>
<td>New areas in Computer Science. It will be offered only as required. Before registration consult the Department of Computer Science for topics offered.</td>
<td>Consent of the Department.</td>
</tr>
<tr>
<td><strong>Special Topics in Computer Science</strong></td>
<td>Exploration of various areas in Computer Science. Topics will vary from year-to-year. It will be offered as required for the opportunity for students to engage in additional areas in Computer Science. Before registration, consult the Department of Computer Science for topics offered.</td>
<td>Consent of the Department.</td>
</tr>
<tr>
<td><strong>Graduate Courses</strong></td>
<td>Registration in all courses requires the approval of the Department of Computer Science. Computer Science students should also see courses listed under Software Engineering.</td>
<td></td>
</tr>
<tr>
<td><strong>Information Storage and Processing in Biological Systems</strong></td>
<td>Examination of complex biological systems; concepts and fundamentals of biological solutions to information storage and processing; modelling and computer simulation of biological systems; information storage in biological molecules; genetic networks; hierarchical organization of biological information processing in signal transduction, development, evolution, and ecology; biological control systems.</td>
<td></td>
</tr>
<tr>
<td><strong>Biological Computation</strong></td>
<td>Examination and modelling of biological networks; focus on the latest developments in biological computing and their theoretical backgrounds, such as: DNA computing; genomic algorithms; artificial chemistries; complex adaptive systems, chaos and fractals; immune system computing; gene regulatory networks; swarm intelligence systems.</td>
<td></td>
</tr>

### Special Topics in Computer Science
- **Courses of Instruction**
- **Graduate Courses**
- **Information Storage and Processing in Biological Systems**
- **Biological Computation**
- **Randomized Algorithms**

### Antirequisite(s)
- **Computer Science 453**
- **Computer Science 453** or equivalent is recommended as preparation for this course.
- **Computer Science 583** or 481 is strongly recommended.
- **Computer Science 589** and 689 will not be allowed.
- **Computer Science 591** and 691 will not be allowed.

### Antirequisite(s)
- **Computer Science 519** and 691 will not be allowed.
- **Computer Science 587** and 687 will not be allowed.
- **Computer Science 589** and 689 will not be allowed.
- **Computer Science 591** and 691 will not be allowed.

### Antirequisite(s)
- **Computer Science 453**
- **Computer Science 453** or equivalent is recommended as preparation for this course.
- **Computer Science 583** or 481 is strongly recommended.
- **Computer Science 589** and 689 will not be allowed.
complexity classes; advanced algorithmic applications from various areas.  

**Antirequisite(s):** Credit for Computer Science 622 and 522 will not be allowed.

**Computer Science 625** 3 units; (H-3-0)  

**Principles of Computer Security**  
Security policies and protection mechanisms for a computing system, including such topics as design principles of protection systems, authentication and authorization, reference monitors, security architecture of popular platforms, formal modelling of protection systems, discretionary access control, safety analysis, information flow control, integrity, role-based access control. Legal and ethical considerations will be introduced as necessary.  

**Antirequisite(s):** Credit for Computer Science 625 and 525 will not be allowed.

**Computer Science 626** 3 units; (H-3-0)  

**Network Systems Security**  
Attacks on networked systems, tools and techniques for detection and protection against attacks including firewalls and intrusion detection and protection systems, authentication and identification in distributed systems, cryptographic protocols for IP networks, security protocols for emerging networks and technologies, privacy enhancing communication. Legal and ethical issues will be introduced as necessary.  

**Antirequisite(s):** Credit for Computer Science 626 and 526 will not be allowed.

**Computer Science 627** 3 units; (H-3-0)  

**Computer Viruses and Malware**  
Study of computer viruses, worms, Trojan horses, and other forms of malicious software. Countermeasures to malicious software. Legal and ethical issues, and some general computer and network security issues.  

**Prerequisite(s):** Computer Science 313 and 457 or equivalents and consent of the Department.  

**Antirequisite(s):** Credit for Computer Science 627 and Computer Science 527 will not be allowed.

**Computer Science 628** 3 units; (H-3-0)  

**Spam and Spyware**  
Spam and other unsolicited bulk electronic communication, and spyware. Legal and ethical issues. Countermeasures, and related security problems.  

**Prerequisite(s):** Computer Science 313 and 457 or equivalents and consent of the Department.  

**Antirequisite(s):** Credit for Computer Science 628 and 528 will not be allowed.

**Computer Science 629** 3 units; (H-3-0)  

(Pure Mathematics 629)  

**Elliptic Curves and Cryptography**  
An introduction to elliptic curves over the rationals and finite fields. The focus is on both theoretical and computational aspects; subjects covered will include the study of endomorphism rings, Weil pairing, torsion points, group structure, and effective implementation of point addition. Applications to cryptography will be discussed, including elliptic curve-based Diffie-Hellman key exchange, El Gamal encryption, and digital signatures, as well as the associated computational problems on which their security is based.  

**Note:** Pure Mathematics 315 is recommended as preparation for this course.  

**Computer Science 630** 3 units; (H-3-2T)  

**Information Theory and Security**  
Information theoretic concepts such as entropy and mutual information, and their applications to defining and evaluating information security systems including encryption, authentication, secret sharing and secure message transmission.  

**Antirequisite(s):** Credit for Computer Science 630 and 530 will not be allowed.

**Computer Science 635** 3 units; (H-3-0)  

**Image Analysis and Computer Vision**  

**Antirequisite(s):** Credit for Computer Science 635 and 535 will not be allowed.

**Computer Science 641** 3 units; (H-3-0)  

**Performance Issues in High Speed Networks**  
An overview of current research in high speed networks. Topics covered will include the current Internet, the future Internet, wireless networks, optical networks, Asynchronous Transfer Mode (ATM), TCP/IP, network traffic measurement, web server performance, and mobile computing. Emphasis will be placed on network performance issues for next-generation Internet protocols and applications.  

**Computer Science 643** 3 units; (H-3-0)  

**Modern Wireless Networks**  
An introduction to the fundamentals and applications of wireless networks.  

**Computer Science 653** 3 units; (H-3-0)  

**Computational Geometry**  
Geometric searching, hull proximity and intersection data structures and algorithms and their complexity.  

**Note:** Computer Science 517 or equivalent is recommended as preparation for this course.

**Computer Science 657** 3 units; (H-3-0)  

**Modelling And Visualization of Plants**  

**Note:** Computer Science 453 or equivalent is recommended as preparation for computer science students taking this course.

**Computer Science 661** 3 units; (H-3-0)  

**Algorithms for Distributed Computation**  
Fundamental algorithmic problems in distributed computation; impact of communication, timing, failures and other characteristics on computability and complexity of solutions.  

**Antirequisite(s):** Credit for Computer Science 661 and 561 will not be allowed.

**Computer Science 662** 3 units; (H-3-0)  

**Agent Communications**  
An examination of communication paradigms in multi-agent systems. A number of paradigms will be covered including simple protocols, BDI (Believe, Desire, Intension), and social commitments.  

**Antirequisite(s):** Credit for Computer Science 662 and 568 will not be allowed.

**Computer Science 667** 3 units; (H-3-0)  

**Computer Algebra**  
Fundamental problems, classical and modern algorithms, and algorithm design and analysis techniques of use in computer algebra. Integer and polynomial arithmetic. Additional problems in computer algebra, possibly including problems in computational linear algebra, factorization, and concerning systems of polynomial equations will be considered as time permits.  

**Antirequisite(s):** Credit for Computer Science 667 and 518 will not be allowed.  

**Note:** Computer Science 413, 491 and Pure Mathematics 315, or equivalents, are recommended as preparation for this course.

**Computer Science 669** 3 units; (H-3-0)  

(Pure Mathematics 669)  

**Cryptography**  
An overview of the basic techniques in modern cryptography, with emphasis on fit-for-application primitives and protocols. Topics will include symmetric and public-key cryptosystems; digital signatures; elliptic curve cryptography; key management; attack models and well-defined notions of security.  

**Note:** Students should not have taken any previous course in cryptography.

**Computer Science 671** 3 units; (H-3-0)  

**Database Management Systems**  
Foundations of database applications and database systems, plus some advanced topics in data management systems will be introduced.  

**Antirequisite(s):** Credit for Computer Science 671 and 571 will not be allowed.

**Computer Science 672** 3 units; (H-3-0)  

(formerly Computer Science 601.77)  

**Fundamentals of Social Network Analysis and Data Mining**  
Introduction to data mining with emphasis on frequent pattern mining, clustering and classification, data collection, network construction, basic graph theory concepts and network analysis metrics, and case studies.  

**Antirequisite(s):** Credit for Computer Science 672 and either 572 or 589.77 will not be allowed.

**Computer Science 673** 3 units; (H-3-0)  

**Distributed Database Systems**  
Introduction to distributed database systems. Topics covered include: architecture, data design, query processing, transaction management, multithreading, object-oriented databases and advanced system issues.  

**Computer Science 675** 3 units; (H-3-0)  

**Datawarehouse Systems**  
Design, development and deployment of datawarehouses. Schemas, models, data organization, OLAP, tuning, data mining and architectural models may be discussed.
# Courses of Instruction

## Computer Science 681
3 units; H(3-0)

Research Methods in Human-Computer Interaction

Application of the theory and methodology of human-machine studies to real systems; theory and practice.

**Note:** Computer Science 481 or equivalent is recommended as preparation for this course.

## Computer Science 683
3 units; H(3-0)

Information Visualization: Theory and Practice

The theory and development of interactive visual representations of abstract data for the purpose of amplifying cognition. Topics covered can include representational issues, perceptual issues, visual literacy, spatial abstraction, and interaction issues.

**Note:** Computer Science 583 or equivalent is recommended as preparation for this course.

## Computer Science 687
3 units; H(3-2T)

Computer Animation

Principles of traditional animation, key framing, parametric and track animation, free form deformation, inverse kinematics, dynamics, spring mass systems, particle systems, numerical integration, Lagrangian constraints, space time constraints, collisions, human animation, behavioural animation, metamorphosis, implicit animation techniques, animating liquids, gases and cloth, motion capture.

Antirequisite(s): Credit for Computer Science 687 and 587 will not be allowed.

## Computer Science 689
3 units; H(3-0)

Modelling for Computer Graphics

Antirequisite(s): Credit for Computer Science 689 and 589 will not be allowed.

## Computer Science 691
3 units; H(3-0)

Rendering

Antirequisite(s): Credit for Computer Science 691 and 591 will not be allowed.

## Computer Science 695
3 units; H(3-0)

Data Management in Geographical Information Systems

Examination of advanced geometric algorithms for representation, analysis and visualization of Geographical Information Systems. Data structures such as progressive mesh, ROAM, multidimensional Delauney triangulation, quadtree and space partitioning. Algorithmic techniques such as incremental, divide and conquer, sweep-plane, and dimension reduction. Algorithms for surface simplification, culling, quality measurement and reduction.

## Computer Science 696
3 units; H(3-0)

Information Security Seminar

Topics in information security, such as security management, emerging threats, research frontiers using case studies and best practices.

Antirequisite(s): Credit for Computer Science 696 and 699 will not be allowed.

**Note:** This course is intended to help students identify a project topic for Computer Science 698 and meets for one and one-half hours per week during the Fall and Winter Terms.

## Computer Science 697
3 units; H(3-0)

Biometric Security

## Computer Science 698
6 units; F(3-0)

Information Security Project

An information security project conducted under the guidance of a faculty member. A report must be written and presented on completion of the course.

## Computer Science 699
3 units; H(3-0)

Research Methodology in Computer Science

An introduction to and survey of research areas and methods in Computer Science. Professional skills in computer science research such as reviewing, critical evaluation, and the preparation of research proposals.

Antirequisite(s): Credit for Computer Science 699 and 696 will not be allowed.

## Computer Science 701
3 units; H(3-0)

Research Topics in Computer Science

In-depth course on a focused current research topic in Computer Science. Involves a significant research component and requires substantial background knowledge.

MAY BE REPEATED FOR CREDIT

## Computer Science 767
3 units; H(3-0)

Advanced Topics in Multiagent Systems

An in-depth study of a selected subfield of multiagent systems including state-of-the-art research. This is a project-driven course.

Prerequisite(s): Computer Science 567 or 609.

## Computer Science 771
3 units; H(3-0)

Current Trends in Database Technology

Advanced topics chosen from Bioinformatics, Data mining, Mobile Databases, Spatial Databases and Web Databases. There is a large project component.

## Computer Science 781
3 units; H(3-0)

Advanced Topics in Human-Computer Interaction

The topics covered will change year-by-year depending on current advances in human computer interaction.

Prerequisite(s): Computer Science 481.

**Note:** Computer Science 581 or 681 or equivalent is highly recommended as preparation for this course.

## Computer Science 785
3 units; H(3-0)

Implicit Modelling

A detailed look at modelling using implicit and iso-surface techniques taking an in-depth review of the literature. Algebraic methods will be followed by skeletal models, field function design, modelling techniques, rendering and texture mapping. Polygonisation algorithms, ray tracing implicit, techniques for animation, meta-morphosis, precise contact modelling, deformation and warping. Algorithms and data structures and implementation details will be presented. Students will be expected to make a new contribution in their project and term paper.

## Computer Science 789
3 units; H(3-0)

Advanced Geometric Modelling

Current research topics including spline modelling, Subdivision Surfaces, multiresolution, wavelets, analysis of the subdivision surfaces and reverse subdivision.

---

### Co-operative Education COOP

#### Senior Courses

- **Co-operative Education 501**
  15 units; (4 months)

- **Co-operative Placement in Actuarial Science 501.01**
  Co-operative Placement in Actuarial Science I
  501.02. Co-operative Placement in Actuarial Science II
  501.03. Co-operative Placement in Actuarial Science III
  501.04. Co-operative Placement in Actuarial Science IV
  501.05. Co-operative Placement in Actuarial Science V
  **NOT INCLUDED IN GPA**

- **Co-operative Education 503**
  15 units; (4 months)

- **Co-operative Placement in Applied Chemistry 503.01**
  Co-operative Placement in Applied Chemistry I
  503.02. Co-operative Placement in Applied Chemistry II
  503.03. Co-operative Placement in Applied Chemistry III
  503.04. Co-operative Placement in Applied Chemistry IV
  503.05. Co-operative Placement in Applied Chemistry V
  **NOT INCLUDED IN GPA**

- **Co-operative Education 511**
  15 units; (4 months)

- **Co-operative Placement in Arts 511.01**
  Co-operative Placement in Arts I
  511.02 Co-operative Placement in Arts II
  511.03 Co-operative Placement in Arts III
  511.04 Co-operative Placement in Arts IV
  **NOT INCLUDED IN GPA**
Courses of Instruction

Co-operative Education 523 15 units; (4 months)

Co-operative Placement in Business
523.01. Co-operative Placement in Business I
523.02. Co-operative Placement in Business II
523.03. Co-operative Placement in Business III
523.04. Co-operative Placement in Business IV

NOT INCLUDED IN GPA

Co-operative Education 543 15 units; (4 months)

Co-operative Placement in Ecology
543.01. Co-operative Placement in Ecology I
543.02. Co-operative Placement in Ecology II
543.03. Co-operative Placement in Ecology III
543.04. Co-operative Placement in Ecology IV
543.05. Co-operative Placement in Ecology V

NOT INCLUDED IN GPA

Dance DNCE

Instruction offered by members of Dance in the School of Creative and Performing Arts in the Faculty of Arts. An audit and consent of Dance is necessary before students register in certain courses.

Junior Courses

Dance 201 3 units; H(2S-2)
Introductory Contemporary Dance I
Introductory study of the techniques of contemporary dance.
Prerequisite(s): Dance 201.
Note: Not open to Dance Majors. A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 205 3 units; H(2S-2)
Introductory Contemporary Dance II
Further introductory study of the techniques of contemporary dance.
Prerequisite(s): Dance 201.
Note: Not open to Dance majors. A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 209 3 units; H(2S-2)
Elementary Contemporary Dance I
Elementary study of the techniques of contemporary dance.
Prerequisite(s): Dance 205 and audition or admission to the Dance major.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 211 3 units; H(2S-2)
Introductory Jazz Dance
Introductory study of the techniques of jazz dance.

Dance 213 3 units; H(2S-2)
Introductory Jazz Dance II
Further introductory study of the techniques of jazz dance.
Prerequisite(s): Dance 211.
Note: Dance 213 and 223 will be offered in alternating years.

Dance 215 3 units; H(2S-2)
Hip Hop I
Introductory study of the techniques of hip hop.
Antirequisite(s): Credit for Dance 215 and either 315 or 343.01 will not be allowed.

Dance 217 3 units; H(2S-2)
Hip Hop II
Intermediate study of the techniques of hip hop.
Prerequisite(s): Dance 215.
Antirequisite(s): Credit for Dance 217 and either 317 or 343.05 will not be allowed.

NOT INCLUDED IN GPA

Dance 221 3 units; H(2S-2)
Introductory Ballet I
Introductory study of the techniques of ballet.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

NOT INCLUDED IN GPA

Dance 223 3 units; H(2S-2)
Introductory Ballet II
Further introductory study of the techniques of ballet.
Prerequisite(s): Dance 221.

NOTE: Dance 213 and 223 will be offered in alternating years.

NOT INCLUDED IN GPA

Dance 235 3 units; H(2S-2)
Safe Dance Practice and Complementary Training
Training principles and components of physical fitness in safe dance practice as they apply to training optimization and injury prevention in dance.
Prerequisite(s): Dance 207 and admission to the Dance program.

Dance 243 3 units; H(2S-2)
Dance in Popular Culture
Survey of social dance forms from World War I to present.

Dance 247 3 units; H(2S-2)
Personal Movement Vocabulary
Introduction to the creative process, focusing on the identification and conceptualization of personal movement preferences.
Prerequisite(s): Admission to the Dance major.

Dance 267 3 units; H(3-0)
Dance Aesthetics, Criticism and Analysis
Introduction to the practice of dance writing through an aesthetic-comparative, critical and analytic lens.
Prerequisite(s): Admission to the Dance major.

Dance 295 3 units; H(1-3)
Dance Performance Practicum I
Practical experience in dance performance.
Prerequisite(s): Consent of the Division Chair, Dance.
NOT INCLUDED IN GPA

Senior Courses

Dance 303 3 units; H(2S-4)

Principles of Technique
Reinforcement of the basic principles of contemporary dance in preparation for more advanced study.
Prerequisite(s): Dance 209 and audition.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.
Dance 305 3 units; H(2S-4)

Elementary Contemporary Dance III
This completes the elementary sequence in the techniques of contemporary dance.
Prerequisite(s): Dance 209 and audition.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 307 3 units; H(2S-4)

Intermediate Contemporary Dance I
Intermediate study of the techniques of contemporary dance.
Prerequisite(s): Dance 305. Audition required if Dance 305 was not completed in the previous term.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 309 3 units; H(3S-0)

Special Topics in Dance Theory I
Introductory study of topics in dance theory, including Canadian Dance History, Dance Aesthetics and Criticism, and Dance Ethnography.
Prerequisite(s): Consent of the Division Chair, Dance.
MAY BE REPEATED FOR CREDIT

Dance 311 3 units; H(2S-4)

Elementary Jazz Dance I
Elementary study of the techniques of jazz dance.
Prerequisite(s): Dance 211 and audition.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 313 3 units; H(2S-4)

Elementary Jazz Dance II
Further elementary study of the techniques of jazz dance.
Prerequisite(s): Dance 311. Audition required if Dance 311 was not completed in the previous term.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 321 3 units; H(2S-4)

Elementary Ballet I
Elementary study of the techniques of ballet.
Prerequisite(s): Dance 221 and audition.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 323 3 units; H(2S-4)

Elementary Ballet II
Further elementary study of the techniques of ballet.
Prerequisite(s): Dance 321. Audition required if Dance 321 was not completed in the previous term.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 331 3 units; H(2S-2)

Creative Process I: Improvisation
A practical study of movement improvisation as a critical component of creative process with emphasis on improvisation as a performance practice as well as a tool for creation.
Prerequisite(s): Dance 209 and 247.

Dance 333 3 units; H(2S-2)

Creative Process II: Solo Forms
A practical application of contemporary models of dance-making with a focus on articulating individualized movement language in the solo form.
Prerequisite(s): Dance 331.

Dance 341 3 units; H(3-0)

Early Dance History
Historical survey of dance: origins through the nineteenth century.
Antirequisite(s): Credit for Dance 341 and 241 will not be allowed.

Dance 343 3 units; H(2S-2)

Special Topics in Dance Practices I
Possible topics include Contact Improvisation, African Dance, Mixed Ability Dance, Site Specific Dance.
Prerequisite(s): One junior level dance course and consent of the Division Chair, Dance.
MAY BE REPEATED FOR CREDIT

Dance 345 3 units; H(3-0)

Twentieth-Century Dance History
Historical survey of western theatre dance.

Dance 347 3 units; H(3-0)

Modern and Contemporary Dance History
In-depth study of western modern and contemporary dance theatre practices with particular focus on twentieth century to present.
Prerequisite(s): Dance 267.

Dance 359 3 units; H(3-2)

Dance Anatomy
Functional anatomy of the skeletal and muscular systems as they apply to training optimization and injury prevention in dance.
Prerequisite(s): Dance 209 and 235.
Antirequisite(s): Credit for Dance 359 and 309.05 will not be allowed.

Dance 363 3 units; H(2S-2)

Dance Science
The scientific study of dance and the practical application of scientific principles to dance practice.
Prerequisite(s): Dance 235; and Kinesiology 259 or Dance 359; and two of Dance 205, 207, 209, 211, 221.
Antirequisite(s): Credit for Dance 363 and 463 will not be allowed.

Dance 365 3 units; H(2S-2)

Pilates Conditioning
Study of the Pilates method of conditioning utilizing the Pilates Reformer apparatus.
Prerequisite(s): Dance 235.

Dance 375 3 units; H(2S-2)

Complementary Dance Training Practices I
Study of complementary training practices for improving dance performance.
Prerequisite(s): Dance 235 and consent of the Division Chair, Dance.

Dance 391 3 units; H(2-1)

Dance and the Camera
An introduction to making dances for the camera incorporating composing dance for the frame, basic camera skills, story board organization, and basic editing skills, as well as viewing and analysis of dances on film and video.
Prerequisite(s): Dance 333.

Dance 395 3 units; H(1S-5)

Dance Performance Practicum II
Further practical experience in dance performance.
Prerequisite(s): Consent of the Division Chair, Dance.

Dance 397 3 units; H(1S-5)

Dance Performance Practicum III
Intermediate practical experience in dance performance.
Prerequisite(s): Consent of the Division Chair, Dance.
Corequisite(s): Prerequisite or Corequisite: Dance 395.

Dance 405 3 units; H(2S-4)

Intermediate Contemporary Dance II
Further intermediate study of the techniques of contemporary dance.
Prerequisite(s): Dance 307 and audition.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 407 3 units; H(2S-4)

Intermediate Contemporary Dance III
This completes the sequence of intermediate study of the techniques of contemporary dance.
Prerequisite(s): Dance 405. Audition required if Dance 405 was not completed in the previous term.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 411 3 units; H(2S-4)

Intermediate Jazz Dance I
Intermediate study of the techniques of jazz dance.
Prerequisite(s): Dance 313 and audition.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 413 3 units; H(2S-4)

Intermediate Jazz Dance II
Further intermediate study of the techniques of jazz dance.
Prerequisite(s): Dance 411. Audition required if Dance 411 was not completed in the previous term.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Dance 421 3 units; H(2S-4)

Intermediate Ballet I
Intermediate study of the techniques of ballet.
Prerequisite(s): Dance 323 and audition.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

<td></td>
</tr>
</tbody>
</table>

**Dance in Schools**

Content, planning, and teaching methodology in school dance.

Prerequisite(s): Admission to the Leadership in Pedagogy and Coaching Major.

**Data Science DATA**

Instruction offered by the members of the Faculty of Science, Haskayne School of Business and Cumming School of Medicine.

**Junior Courses**

</tr>
</tbody>
</table>

**Thinking with Data**

An introduction to tools and techniques for managing, visualizing, and making sense of data. Includes an introduction to data cleaning, basic statistics, exploratory visualization, sensemaking, and data presentation.

**Data Science 211 | 3 units                                    | H(2-3)  |                        |

**Programming with Data**

A hands-on introduction to basic coding skills, including core programming concepts and the fundamentals of reading, writing, and executing code – with a focus on data manipulation. Emphasizes important tools and practices for programming with data, including development environments, source control, and debugging.

Antirequisite(s): Credit for Data Science 211 and any one of Computer Science 215, 217, 231, 235, Computer Engineering 339 or Engineering 233 will not be allowed.

**Senior Courses**

**Computational Statistical Modelling**

Prerequisite(s): Data Science 201; one of Data Science 211, Computer Science 217, 231 or 235; and any of Statistics 205, 217, 327, Biology 315, Economics 395, Political Science 399, Psychology 300, Sociology 311, Engineering 319 or Linguistics 560.

Antirequisite(s): Credit for Data Science 305 and any one of Statistics 323, Psychology 301 or Sociology 315 will not be allowed.

**Data Science 311 | 3 units                                    | H(2-3)  |                        |

**Data Processing and Storage**

An introduction to fundamental data structures, including lists, stacks, trees, hash tables, and graphs, and their application for data processing, analysis, and storage. Covers the fundamental design and use of relational databases, with an emphasis on SQL.

Prerequisite(s): Data Science 201; one of Data Science 211, Computer Science 217, 231, 235 or Engineering 233.

Antirequisite(s): Credit for Data Science 311 and either Computer Science 319 or 331 will not be allowed.

**Data Science 501 | 3 units                                    | H(1-5-5) |                        |

**Data Science Capstone**

A substantial research project in the field of Data Science. The project will consist of all of the elements in the data cycle: collection, cleaning, exploratory analysis, statistical and computational analysis and presentation.

Prerequisite(s): One of Data Science 311 or Computer Science 471; and one of Data Science 305, Statistics 323, Biology 315, Sociology 315, Economics 395, Linguistics 560, Psychology 301 or 312.

</thead>
<tbody>
<tr>
<td>Data Science 601</td>
<td>3 units</td>
<td>H(3-0)</td>
<td></td>
</tr>
</tbody>
</table>

**Working with Data and Visualization**

An introduction to fundamental data science concepts including basic data organization, data collection, and data cleaning. Includes a review of basic programming concepts in Python, as well as an introduction to the fundamentals of data visualization and critical thinking with data. Also provides an introduction to data ethics, security, and privacy.

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Fundamental Data Science and Analytics, or the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 602 | 3 units                                    | H(3-0)  |                        |

**Statistical Data Analysis**

An introduction to the foundations of statistical inference including the application of probability models to data, as well as an introduction to simulation-based and classical statistical inference, and the creation of statistical models with R.

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Fundamental Data Science and Analytics, or the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 603 | 3 units                                    | H(3-0)  |                        |

**Statistical Modelling with Data**

An introduction to the creation of complex statistical models, including exposure to multivariate model selection, prediction, the statistical design of experiments and analysis of data in R.

Prerequisite(s): Data Science 602 and admission to the Post-baccalaureate Certificate in Fundamental Data Science and Analytics or the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 604 | 3 units                                    | H(3-0)  |                        |

**Big Data Management**

An introduction to data storage and manipulation at both desktop and cloud scales. Introduces core database concepts and provides a practical introduction to both SQL and NoSQL systems.

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Fundamental Data Science and Analytics or the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 605 | 3 units                                    | H(3-0)  |                        |

**Actionable Visualization and Analytics**

Introduces deeper tools, skills, and techniques for collecting, manipulating, visualizing, analyzing, and presenting a number of different common types of data. With a data life-cycle perspective, looks into data elicitation and preparation as well as the actual usage of data in a decision-making context. Introduces techniques for visualizing and supporting the interactive analysis and decision making on large complex datasets. Focus on critical thinking and good analysis practices to avoid cognitive biases when designing, thinking, analyzing, and making decisions based on data.

Prerequisite(s): Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 606 | 3 units                                    | H(3-0)  |                        |

**Statistical Methods in Data Science**

Design of surveys and data collection, bias and efficiency of surveys. Sampling weights and variance estimation. Multi-way contingency tables and introduction to generalized linear models with emphasis on applications.

Prerequisite(s): Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 607 | 3 units                                    | H(3-0)  |                        |

**Statistical and Machine Learning**

Advancement of the linear statistical model including introduction to data transformation methods, classification, model assessment and selection. Exposure to both supervised learning and unsupervised learning.

Prerequisite(s): Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 608 | 3 units                                    | H(3-0)  |                        |

**Developing Big Data Applications**

Provides advanced coverage of tools and techniques for big data management and for processing, mining, and building applications that leverage large datasets. Addresses database and distributed storage design for both SQL and NoSQL systems, and focuses on the application of distributed computing tools to perform data integration, apply machine learning, and build applications that leverage big data. Students will also examine the security and ethical implications of large-scale data collection and analysis.

Prerequisite(s): Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

**Data Science 611 | 3 units                                    | H(3-0)  |                        |

**Predictive Analytics**

Overview of the basic concepts and techniques in predictive analytics as well as their applications for solving real-life business problems in marketing, finance, and other areas. Techniques covered in this course include: decision trees, classification rules, association rules, clustering, support vector
Data Science 612 3 units; H(3-0)

**Decision Analytics**
Introduces fundamental concepts and modeling approaches to solve problems that are faced by decision makers in today’s fast-paced and data-rich business environment. Different decision alternatives are analyzed and evaluated with the use of computer models. Topics include the most commonly used applied optimization, simulation and decision analysis techniques. Extensive use will be made of appropriate computer software for problem solving, principally with spreadsheets.

**Prerequisite(s):** Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

---

Data Science 613 3 units; H(3-0)

**Introductory Data Analytics**
Introduction to new tools for data analytics that can be used to discover, collect, organize, and clean the data to make it ready for analysis. Emphasis is placed on software tools used to interact with data sources and provision of user skills to create business applications that encompass a variety of business data sources; such as customers, suppliers, markets, competitors, and regulators. Software packages used to clean and organize the data for analysis will be introduced, as well as software to enable users’ understanding of the data that is collected.

**Prerequisite(s):** Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

---

Data Science 614 3 units; H(3-0)

**Advanced Data Analytics**
Examination of tools and methods used in data analysis, including basic and advanced analytic tools, as well as machine learning techniques. One or more data analysis packages/programs are used to analyze different types of business data. Statistical and other analytic methods, such as data mining, machine learning and various techniques, and their application to business data analytics are explored.

**Prerequisite(s):** Data Science 613 and admission to the Post-baccalaureate Diploma in Data Science and Analytics.

---

Data Science 621 3 units; H(3-0)

**Advanced Statistical Modelling**
An introduction to the fundamental statistical methods used in health science including interpretation and communicating the results of these methods. Explores modelling using an epidemiological paradigm such as the assessment for modification and confounding. Introduces fundamental health research methods including study design and the evidence hierarchy.

**Prerequisite(s):** Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

---

Data Science 622 3 units; H(3-0)

**Machine Learning for Precision Health**
An introduction to the application of machine learning methods to problems in health data. The concepts of precision medicine and precision public health are introduced and the role of data science in these endeavors is explored, using real examples from health data.

**Prerequisite(s):** Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

---

Data Science 623 3 units; H(3-0)

**Big Data in Health**
Explores the synthesis and summary of large volumes of information into interpretable and compelling results. Software packages useful for visualization of data are examined, including software for geographic information systems, augmented reality, and infographics. Data Science software commonly used in health industry is examined. Fundamental design principles are introduced to guide the approach to data presentation, communication, and interpretation.

**Prerequisite(s):** Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

---

Data Science 624 3 units; H(3-0)

**Advanced Exploration and Visualization in Health**
Explores the synthesis and summary of large volumes of information into interpretable and compelling results. Software packages useful for visualization of data are examined, including software for geographic information systems, augmented reality, and infographics. Data Science software commonly used in health industry is examined. Fundamental design principles are introduced to guide the approach to data presentation, communication, and interpretation.

**Prerequisite(s):** Admission to the Post-baccalaureate Diploma in Data Science and Analytics.

---

**Development Studies DEST**

**Development Studies 201** 3 units; H(3-0)

**Introduction to Development Studies**
An interdisciplinary course focusing on development in both a northern and international context. Explores factors that shape development processes; introduces concepts and issues such as poverty; colonialism and self-determination; human ecology and sustainable development; and appropriate technology. Examines the origins, purposes, and performance of contemporary national and international institutions and their effect on people in different geographical and socio-economic contexts.

---

**Junior Course**

**Development Studies 201** 3 units; H(3-0)

**Development Studies 375** 3 units; H(3-0)

**Gender and Development**
Examines development from the critical perspective of the key role played by gender in development. Case studies from Canadian and international contexts will provide illustrative material for analyzing the issue of developmental politics and the gendered nature of development processes and practices.

**Prerequisite(s):** Development Studies 201 or Women’s Studies 201.

---

**Development Studies 393** 3 units; H(3-0)

**Theories and Applications of Development**
A study of development theories and applications through northern and international case studies. Examines practical manifestations of these theories and approaches in development planning, implementation, and praxis including Modernization theory; dependency theory; basic needs approach; neo-liberalism; the staple thesis; globalization; women in development; gender and development.

**Prerequisite(s):** Development Studies 201.

---

**Development Studies 401** 3 units; H(3-0)

**Special Topics in Development Studies**
An examination of selected topics in Development Studies.

**MAY BE REPEATED FOR CREDIT**

**Development Studies 403** 3 units; H(3-0)

**Sustainability and Human Ecology in the Circumpolar Arctic**
The history of northern development and resource management in Canada with emphasis on specific case studies involving sustainability and human ecology in the Circumpolar Arctic. The role of traditional environmental knowledge and its significance to northern development will be examined. Participatory research methodologies may be introduced.

**Prerequisite(s):** Development Studies 393 or Indigenous Studies 317.

**Antirequisite(s):** Credit for Development Studies 403 and either Northern Planning and Development 401 and 405 will not be allowed.

---

**Development Studies 405** 3 units; H(3-0)

**Environment and Development**
Critical engagement with sustainability through study of the intersections between environment and development, such as planning and development, management, and implementation, the political economy of environment, and political ecology. Topics may include political and economic systems, resource depletion, industrial agriculture, biodiversity, gender, hazards, traditional knowledge, and resistance.

**Prerequisite(s):** Development Studies 393 or Anthropology 313 or Indigenous Studies 317.

---

**Development Studies 485** 3 units; H(3S-0)

**International and Intercultural Communication**
Examines cross-cultural communication at the personal, organizational, societal, and international levels. Discusses the concept of “Globalization” and its implications for communication among different cultures; analyses various theoretical perspectives underlying intercultural communication; explores issues of power, identity and influence; examines intercultural encounters in the context of specific diversified settings; and helps students develop intercultural communication competence.

**Prerequisite(s):** Development Studies 393.

---

**Development Studies 501** 3 units; H(3-0)

**Research in Selected Topics**
Supervised individual study of a special topic.

**Prerequisite(s):** Consent of the Department.

**Note:** Students should contact the Department at least two weeks prior to the first day of classes to arrange an independent study course.

**MAY BE REPEATED FOR CREDIT**
Courses of Instruction

Development Studies 591 3 units; H(3S-0)

Critical Perspectives on Development Practice and Research
An interdisciplinary consideration of selected issues and methodologies in development, providing the critical perspective and skills needed to conceptualize, design, implement and effectively manage community development projects and programs.
Prerequisite(s): Development Studies 393 and admission to the Development Studies Program.

Development Studies 593 3 units; H(3S-0)

Honours Seminar in Development Studies
Current theoretical and methodological issues will be explored in a discussion-based seminar format, with the aim of development of a research project.
Prerequisite(s): Development Studies 393 and admission to the Development Studies Honours Program.

Drama DRAM

Instruction offered by members of Drama in the School of Creative and Performing Arts in the Faculty of Arts.

Junior Courses

Drama 203 3 units; H(3-0)

Creativity
From the economy to the environment and from politics to entertainment, creativity is an endlessly renewable resource that offers benefits for all citizens and may well be the most important human element for our future. Students from all disciplines can investigate the practices and processes of creativity and explore the ways in which it can help enrich their lives.

Antirequisite(s): Credit for Drama 203 and Fine Arts 203 will not be allowed.
Note: Attendance at selected arts events is mandatory. Students are responsible for the purchase of tickets. Affordability and accessibility will influence the selection of events. Drama majors and minors may not count this course towards their field requirements.

Drama 205 3 units; H(3-0)

Story
An exploration of the elements of story present in the arts and beyond. Story is an exciting, creative, dynamic and universal form of human expression with the potential to engage and inspire students from across departments and disciplines.

Antirequisite(s): Credit for Drama 205 and Fine Arts 205 will not be allowed.
Note: Attendance at selected arts events is mandatory. Students are responsible for the purchase of tickets. Drama majors and minors may not count this course towards their field requirements.

Drama 210 3 units; H(3S-2)

Introduction to Acting II
An introduction to the actor’s interpretation and performance of texts for the theatre.
Prerequisite(s): Drama 209.
Antirequisite(s): Credit for Drama 210 and 200 will not be allowed.

Drama 223 3 units; H(3-0)

Introduction to Theatre Production
An introduction to organizational principles of theatre production and technical theatre skills.
Antirequisite(s): Credit for Drama 223 and 222 will not be allowed.
Note: Participation on the production crews of Drama productions outside of scheduled class time is required. This course is required for all Drama majors, but is open to all undergraduate students for registration.

Drama 225 3 units; H(2-2)

Introduction to Scenography
An introduction to performance design and the disciplines within it: scenery, props, lighting, costumes and sound. Includes a study of the history of theatre design and space. Topics regarding contemporary notions of scenography will be explored, for example performance art, ritual, etc.
Antirequisite(s): Credit for Drama 225 and 222 will not be allowed.
Note: Attendance at two live theatre performances will be required. Additional costs may be incurred. This course is required for all Drama majors, but is open to all undergraduate students for registration.

Drama 242 3 units; H(3-0)

Introduction to the Study of Drama
An introduction to the study of drama, theatre and performance.
Antirequisite(s): Credit for Drama 242 and 240 will not be allowed.

Drama 243 3 units; H(3-0)

Introduction to the Practice of Drama
Continued study and practice of drama, theatre and performance.
Prerequisite(s): Drama 242.
Antirequisite(s): Credit for Drama 243 and 240 will not be allowed.

Senior Courses

The following listing is provided to assist students in their selection of related groups of Drama courses:

Acting and Directing
301, 302, 400, 411, 413, 500, 511, 513
Design and Technical
313, 317, 319, 320, 321, 381, 419, 421, 423, 481, 451, 457
Dramatic Literature, Criticism, History, Theory
345, 346, 347, 348, 345, 440, 455, 483, 540
Theatre for Young Audiences and Developmental/Performance Drama
365, 367, 460, 560
Senior Option Courses
371, 471, 571, 572, 573
Production Courses
391, 393, 491, 493

Drama 301 3 units; H(2S-4)

Intermediate Acting I
Further development of fundamental acting techniques and creative processes essential to the actor’s craft. Introduction of voice and movement components for the actor.
Prerequisite(s): Drama 200 or 210, audition and consent of Division Chair, Drama.
Antirequisite(s): Credit for Drama 301 and 300 will not be allowed.

Drama 302 3 units; H(2S-4)

Intermediate Acting II
Extension and deepening of techniques and approaches introduced in Drama 301. Introduction of voice and movement components for the actor.
Prerequisite(s): Drama 301.
Antirequisite(s): Credit for Drama 302 and 300 will not be allowed.

Drama 313 3 units; H(2S-2)

Scenography I
Basic scenography including set, props, lighting and costume design theory, process and technique for a variety of theatre forms and performance styles.
Corequisite(s): Prerequisite or Corequisite: Drama 319.
Antirequisite(s): Credit for Drama 313 and either 415 or 417 will not be allowed.

Drama 317 3 units; H(2S-2)

Introduction to Stage Sound
Basic principles of sound for the theatre: recording, reinforcement and reproduction techniques and methods used in creating a production design.
Prerequisite(s): Drama 223 and 225.
Note: This course meets for two hours per week during the Fall and Winter Terms.

Drama 319 3 units; H(2S-2)

Graphics and Model Building for Theatre
An introduction to graphic and model building techniques for the theatre designer.
Prerequisite(s): Drama 223 and 225.

Drama 320 3 units; H(2S-2)

Introduction to Lighting Design
Basic principles of lighting for live performance including conceptualization of the lighting approach, techniques in communication and skills in execution of a performance.
Corequisite(s): Prerequisite or Corequisite: Drama 319.
Antirequisite(s): Credit for Drama 320 and 315 will not be allowed.

Drama 321 3 units; H(2S-2)

Stage Management
Principles of stage management; a stage management project related to one of the presentations in Drama’s season of plays.
Prerequisite(s): Drama 223 and 225.
Note: This course meets for two hours per week during both the Fall and Winter Terms.

| **Advanced Topics in Scenography** | Possible topics include, but are not limited to: Scenic Art and Digital Techniques, Advanced Make-up and Prosthetics, Textile Manipulation, Projected Media for Live Performance, Advanced Scenic Painting, Advanced Lighting Design, Wear-
 Courses of Instruction

Earth Science EASC

356

able Electronics and the Stage, Design for Devised Theatre, Professional Practice.

Prerequisite(s): Drama 313.

MAY BE REPEATED FOR CREDIT

Drama 483  3 units; H(3S-0)

Advanced Topics in Theatre Studies

Advanced study in various topics related to theatre studies. Possible topics include, but are not limited to: sexual politics, gender, and the theatre, modernism in theatre studies, contemporary theories of performance.

Prerequisite(s): Drama 346.

MAY BE REPEATED FOR CREDIT

Drama 491  3 units; H(0-6)

Performance Practicum III

Further practical experience in theatrical production.

Prerequisite(s): Drama 393 and consent of the Division Chair, Drama.

Note: Students must submit an application and identify a supervisor before being considered for this course.

Drama 493  3 units; H(0-6)

Performance Practicum IV

Further practical experience in theatrical production.

Prerequisite(s): Drama 491 and consent of the Division Chair, Drama.

Note: Students must submit an application and identify a supervisor before being considered for this course.

Drama 500  6 units; F(3S-6)

Advanced Acting II

Advanced research and performance of roles in a variety of formats and styles with full integration of physical, vocal and textual components, including preparation for professional practice. Performance for live audiences will be required.

Prerequisite(s): Drama 400 and consent of the Division Chair, Drama.

Drama 511  3 units; H(2S-3)

Directing II

Advanced directorial processes from ideas through presentation and documentation.

Prerequisite(s): Drama 410 or 411 and 413 and consent of the Division Chair, Drama.

Antirequisite(s): Credit for Drama 511 and 510 will not be allowed.

Drama 513  3 units; H(2S-3)

Directing, Design and Dramaturgy

Advanced collaboration on respectively design-, director-, and dramaturgy-led processes of inquiry and creation.

Prerequisite(s): Drama 511 or 419 or both 346 and 573, successful application and consent of the Division Chair, Drama.

Antirequisite(s): Credit for Drama 513 and 510 will not be allowed.

Drama 517  3 units; H(2S-2)

Scenography IV

Advanced set, props, lighting, and costume design theory, process and technique for a variety of theatre forms and performance styles.

Prerequisite(s): Consent of the Division Chair, Drama.

Note: This course will provide students with an opportunity to practice scenography in connection to a live performance in the Drama season.

Drama 540  6 units; F(4S-0)

Seminar in Drama IV

Critical study at an advanced level of the dramatic metaphor as presented in Drama’s season of plays; intensive focus on the historical period and theatrical genre of one or two of the season’s plays especially.

Prerequisite(s): Drama 440.

Drama 560  6 units; F(2S-2)

Performance Creation III

Independent research, creation and facilitation of original solo or group performances.

Prerequisite(s): Drama 460.

Drama 564  6 units; F(2S-2)

Drama Education

Research into the nature and function of drama education across a variety of age levels and learning environments. Practical experience in structuring learning activities, developing classroom controls and facilitating creative process and performance may be included.

Prerequisite(s): Drama 360 or 362 or both 365 and 367; and admission to the Drama or Drama Education program.

Note: This course is open to other students with permission of the Division Chair.

Drama 571  3 units; H(2-0)

Directed Studies I

Independent research under the direction of a faculty member.

Prerequisite(s): Consent of the Division Chair, Drama.

MAY BE REPEATED FOR CREDIT

Drama 572  6 units; F(2-0)

Directed Studies II

Independent research under the direction of a faculty member.

Prerequisite(s): Consent of the Division Chair, Drama.

MAY BE REPEATED FOR CREDIT

Drama 573  3 units, H(3S-0)

Dramaturgy

Theory and core principles of dramaturgy.

Prerequisite(s): Consent of the Division Chair, Drama.

Antirequisite(s): Credit for Drama 573 and either Drama 571.23 or 571.30 will not be allowed.

Graduate Courses

Drama 605  3 units; H(4S-0)

Methods in Theatre Research

Methods in research in the four areas of specialization in the MFA Theatre program.

Note: Required of all students enrolled in the MFA Theatre program.

Drama 607  3 units; H(2S-2)

Director, Designer, and Mise-en-scene

Advanced collaborative methods and techniques for directors, designers and dramaturges, leading to the creation of a mise-en-scene for selected plays of varying styles and genres.

Drama 610  6 units; F(2S-3)

Selected Problems in Directing

Drama 623  3 units; H(2S-2)

Seminar in Scene Design

MAY BE REPEATED FOR CREDIT

Drama 625  3 units; H(2S-2)

Seminar in Costume Design

MAY BE REPEATED FOR CREDIT

Drama 627  3 units; H(2S-2)

Seminar in Lighting Design

MAY BE REPEATED FOR CREDIT

Drama 629  3 units; H(2S-2)

Seminar in Technical Direction

MAY BE REPEATED FOR CREDIT

Drama 647  3 units; H(3S-0)

Studies in Modern Drama I

Studies in the literature, history, theory and criticism of drama, theatre and performance from the late nineteenth century to the mid-twentieth century.

Drama 649  3 units; H(3S-0)

Studies in Modern Drama II

Studies in the literature, history, theory and criticism of drama, theatre and performance from the mid-twentieth century to the present.

Drama 651  3 units; H(2S-0)

Directed Studies

MAY BE REPEATED FOR CREDIT

Drama 660  6 units; F(2S-3)

Seminar and Practicum in Performance Creation

Drama 671  3 units; H(3S-0)

Selected Problems in Playwriting I

Drama 673  3 units; H(3S-0)

Selected Problems in Playwriting II

Earth Science EASC

Instruction offered by members of the Department of Geography in the Faculty of Arts.

Senior Courses

Earth Science 401  3 units; H(2-3)

Methods in Earth Science

An introduction to field and laboratory methods used in earth surface processes research. Field excursions may involve travel and will provide the basis for laboratory exercises.

Prerequisite(s): Consent of Program Co-ordinator.

Note: A supplementary fee may be assessed to cover additional costs associated with this course.

MAY BE REPEATED FOR CREDIT
Courses of Instruction

Earth Science 501 3 units; H(3-3)

Research Project in Earth Science
An original research project that focuses on earth surface processes and may target local, regional, or global issues. Participation will be exposed to oral and written communication, field sampling techniques and strategies, laboratory techniques, strategies and limitations, and relevant statistical analysis and graphic communication.

Prerequisite(s): Consent of the Program Coordinator

MAY BE REPEATED FOR CREDIT

East Asian Language Studies EALS

Instruction offered by members of the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

Senior Course

East Asian Language Studies 501 3 units; H(3-0)

Topics in the East Asian Language Studies
A research-oriented course that will allow students to synthesize their learning in East Asian languages and cultures and bring it to bear on a particular subject in Chinese and/or Japanese, or on the relation between East Asian languages and their respective cultures. Students will meet with the instructor individually and regularly in order to discuss their respective research projects.

Prerequisite(s): Consent of the School.

Note: Open only to majors in East Asian Language Studies.

East Asian Studies EAST

Instruction offered by the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

East Asian Studies 201 3 units; H(3-0)

Understanding Contemporary East Asia
An introductory exploration of the cultures of China, Japan, and Korea that outlines their shared characteristics as well as highlighting their differences. Subjects covered include physical environment, history, philosophy, social and political order, economy, and arts.

Antirequisite(s): Credit for East Asian Studies 201 and 317 will not be allowed.

Senior Course

East Asian Studies 531 3 units; H(3-0)

Issues and Methods in East Asian Studies
Contemporary social, philosophical, economic, political and/or international issues within East Asia and methodologies for analysis of the basis for interactions among East Asian countries will be presented in-depth.

Prerequisite(s): East Asian Studies 201 and one of Chinese 317 or Japanese 317.

Antirequisite(s): Credit for East Asian Studies 531 and East Asia 500 will not be allowed.

Ecology ECOL

Instruction offered by members of the Department of Biological Sciences in the Faculty of Science.

†Limited amounts of non-scheduled class time involvement will be required for these courses.

Senior Courses

Ecology 413 3 units; H(140 hours)

Field Course in Ecology
An examination of ecological principles and techniques through field exercises, including studies of terrestrial and aquatic populations, communities and ecosystems. The course is held at the Kanazawa Centre for Environmental Research in the two weeks immediately prior to the commencement of the Fall Term.

Prerequisite(s): Biology 313 and 315.

Note: A supplementary fee will be assessed to cover additional costs associated with this course.

†Ecology 417 3 units; H(3-3)

Aquatic Communities and Ecosystems
Community composition and dynamics at the various trophic levels of aquatic ecosystems. Temporal and spatial changes in community composition, physical and chemical conditions, and their effects on the ecosystem. There will be a full week-end field trip, normally during the first or second week of the term.

Prerequisite(s): Biology 313 and one of Biology 315 or Environmental Science 401.

Ecology 419 3 units; H(3-3)

Terrestrial Communities and Ecosystems

Prerequisite(s): Biology 313 and one of Biology 315 or Environmental Science 401.

Ecology 425 3 units; H(3-3)

Quantitative Biology II
Quantitative analysis as applicable to ecological research. Methodologies and models will be presented and analyzed. Particular emphasis will be placed on experimental design, regression analysis, and the study of spatial dispersion.

Prerequisite(s): Biology 313 and 315.

†Ecology 429 3 units; H(3-3)

Ecology of Individuals
Ecological and evolutionary perspectives on physiology and behaviour. This course focuses on the influences on resource acquisition, maintenance, growth, and reproduction and their implications for survival and fertility.

Prerequisite(s): Biology 313 and 315.

Note: There is a week-end field trip scheduled after the start of classes.

Ecology 439 3 units; H(3-3)

Ecology of Populations
A conceptual and practical treatment of population ecology including: population growth, demography, life histories, population dynamics, competition, predation and mutualism.

Prerequisite(s): Ecology 425.

Ecology 501 3 units; H(0-3)

Ecological and Evolutionary Applications
A class project course in which students apply their understanding of ecological and evolutionary concepts and their analytical skills to investigate selected problems in detail. Project topics vary from year-to-year and will include fundamental and applied problems. Formal written and oral reports will be presented as a necessary component of the course.

Prerequisite(s): Ecology 425, 429 and one of 417 or 419; and 75 units (12.5 full-course equivalents).

Note: Prior or concurrent completion of Biology 401, Ecology 419 and 439 are strongly recommended. Ecology 501 is intended to draw on experience gained throughout the Ecology program, and should be taken by students in the final year of the program.

Ecology 507 3 units; H(0-8) or H(3-0)

Special Problems in Ecology
Independent research or reading project that may include seminars, lectures, term papers and training in theoretical and/or laboratory methods.

Prerequisite(s): 54 units (9.0 full-course equivalents) and consent of the Department.

Note: Students completing a typical course sequence in their program would normally be eligible to enrol in their third or fourth year. After consultation with a departmental faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be signed by the course supervisor before a student can register.

MAY BE REPEATED FOR CREDIT

Ecology 527 3 units; H(3-1T)

Ecology of Fishes
The ecology of fishes with an emphasis on freshwater systems. Fish will be used as models for examining ecological principles and theory at various levels of organization including physiological, behavioural, population and community ecology. Topics covered include: morphology, systematics, foraging, bioenergetics, life history strategies, population dynamics and the role of fish in aquatic food webs.

Prerequisite(s): Biology 313 and one of Ecology 417 or Zoology 477.02.

Ecology 528 6 units; F(0-8)

Independent Studies in Ecology
Original and independent thought, practical research and the completion of written and oral reports.

Prerequisite(s): 72 units (12 full-course equivalents) and consent of the Department.

Note: After consultation with a departmental faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be signed by the course supervisor before a student can register.

MAY BE REPEATED FOR CREDIT

Ecology 529 3 units; H(3-0)

Molecular Ecology and Evolution
Molecular Ecology utilizes population genetics, phylogenetics, and genomics to address questions in ecology, evolution, behaviour and conservation. Topics will include principal and emerging molecular techniques for characterizing and analyzing genetic variation to test quantitative predictions from ecological and evolutionary theory.

Prerequisite(s): Biology 311 and 313.

Ecology 530 6 units; F(0-8)

Honours Research Project in Ecology
Research project under the direction of one or more faculty members in the Department of Biological Sciences. Formal written and oral reports must be presented on completion of this course.
Courses of Instruction

Open only to Honours Ecology students or Honours Biological Sciences students.

Prequisite(s): 72 units (12 full-course equivalents) and consent of the Department.

Note: After consultation with a departmental faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be signed by the course supervisor before a student can register.

Graduate Courses
Enrolment in any graduate course requires consent of the Department.

Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599. 600-level courses are available with permission to undergraduate students in the final year of their programs.

Economics ECON
Instruction offered by members of the Department of Economics in the Faculty of Arts.

Junior Courses

Economics 201 3 units; H(3-1T)

Principles of Microeconomics
Principles of consumption, production, exchange: market and firm equilibrium under different competitive conditions. These principles are applied to various contemporary problems in the Canadian economy, such as the changing structure of agriculture, foreign ownership and control, and pollution.

Economics 203 3 units; H(3-1T)

Principles of Macroeconomics
National income determination, the monetary and banking system, and elementary fiscal and monetary policies. Contemporary problems of unemployment, inflation, economic growth, business cycles and the international economy.

Corequisite(s): Prerequisite or Corequisite: Economics 201.

Economics 209 (Engineering 209) 3 units; H(3-1T)

Engineering Economics
The basic tools and methodology of engineering economic studies. Topics include investment decisions, theory of replacement, economies of scale, externalities, social decision making and government regulation. Examples are drawn from engineering projects.

Prerequisite(s): Registration in the Faculty of Engineering with second-year standing or higher. If not registered in the Schulich School of Engineering, consent of the Department of Economics. If required for APEGA, consent of the Schulich Undergraduate Studies Office.

Senior Courses

Economics 301 3 units; H(3-1T)

Intermediate Economic Theory - Microeconomics I
Demand, production and costs in a market economy. Pricing in perfectly and imperfectly competitive markets.

Economics 303 3 units; H(3-1T)

Intermediate Economic Theory - Macroeconomics I
Introduction to the analysis of macroeconomic issues including the causes of recessions and unemployment, the determination of exchange rates, and the effects of government policies.

Economics 311 3 units; H(3-0)

Computer Applications in Economics
Use of spreadsheets for economics applications, including project evaluation with financial-economic functions, oil and gas prospect evaluation, investment portfolio management with database functions, database retrieval, and various topics in micro- and macro-economics.

Economics 321 3 units; H(3-0)

The Global Trading System
Introduction to the theory of international trade; provides a basis for examining Canadian trade policy, and regional and world trade institutions such as the WTO and NAFTA. Topics include: tariffs, non-tariff barriers and enhancements, countervail and anti-dumping action, multinational enterprises and international joint ventures.

Economics 323 3 units; H(3-0)

Natural Gas Markets

Economics 325 3 units; H(3-0)

The North American Oil Industry
An introduction to the crude oil industry in North America, focusing on exploration, development, and production. Topics include Canadian and US oil policies, environmental policy, industry taxation, and royalty regimes.

Economics 327 3 units; H(3-0)

Petroleum Economics
A non-technical introduction to the economics of petroleum production, crude oil markets, and refining economics. A focus on global crude oil and refined product markets.

Economics 329 3 units; H(3-0)

Electricity Markets
Economic analysis of the deregulated electric power industry including the pricing of power, energy and capacity, power supply and demand, market structure, market architecture, and the design and testing of market rules.

Economics 337 3 units; H(3-0)

Development Economics
An introduction to developing economies: the meaning, significance and purpose of economic development, major theories of economic development, economic problems of developing countries.

Economics 339 3 units; H(3-0)

Canadian Economic History
The growth and development of the Canadian economy in relation to the endowment of natural resources, changing market conditions and technology, and Canadian public policy.

Economics 341 3 units; H(3-0)

Money and Banking
Operation of financial markets and institutions: the principles of money creation, interest rate determination, and central banking.

Economics 345 3 units; H(3-0)

Economic Analysis of Law
An introduction to the relationship between law and economics. Economic theory will be used to analyze property and tort law.

Economics 349 3 units; H(3-0)

The Economics of Social Problems
Contribution that economic analysis can make to the understanding of selected current social issues such as poverty, aging, crime, drug abuse and discrimination.

Economics 353 3 units; H(3-0)

Chinese Economy
Survey of the economic institutions and processes shaping the Chinese economy, including but not limited to fiscal and monetary policy, financial institutions and financial sector reforms, the restructuring of state-owned enterprises, and the provision of social welfare.

Economics 355 3 units; H(3-0)

Canadian Public Finance
Examination of the institutions behind and economic rationale for Canadian government policy relating to public expenditures and taxation. Topics include the history and present structure of government spending and taxation, tax expenditures, the budgetary process, inter-jurisdictional issues, and program design.

Prerequisite(s): Economics 201 and 203.

Antirequisite(s): Credit for Economics 353 and Economics 399.02 will not be allowed.

Economics 599.03 3 units; H(3-0)

Advanced Behavioural Ecology
Current problems and recent research in areas of particular significance. Topics will vary from year-to-year.

Note: Offered during even-odd dated academic years.

Courses of Instruction

Economics 611 3 units; H(3-0)
Special Topics in Economics
Topics will vary from year-to-year. Consult the timetable or the Department for the topics available in a given year.
MAY BE REPEATED FOR CREDIT

Economics 615 3 units; H(3-0)
Econometrics
Provides a foundation of econometric theory relevant for empirical work in economics. Covers classical estimation and inference procedures, including linear regression, linear instrumental variables, differences-in-differences, and linear panel data techniques. Also covers the problem of causality and identification in empirical economics.
Prerequisite(s): Admission to the Master of Arts Economics program or permission of the Department.

Economics 619 3 units; H(3-0)
Empirical International Trade
Examines issues from the economic literature on international trade. Focuses on quantitative and empirical analysis. Specific topics include the factor content of trade, firm level and multinational behavior, empirical testing of political economy determinants of protection, and assessing the environmental impact of trade agreements.

Economics 621 3 units; H(3-0)
International Trade
Focuses on the microeconomic aspects of international economics with emphasis on general equilibrium models commonly employed in international economics. Specific topics covered include theories of international specialization and exchange, trade policy and economic welfare, international factor movement, trade and growth, under both perfect competition and imperfect competition, and selected problems of trade policy in the international trading system.

Economics 627 3 units; H(3-0)
Energy Economics
Applies the tools of microeconomics, institutional economics, and econometrics to energy markets and policies. Focuses on empirical studies of the energy business including markets for natural gas, crude oil, gasoline, electricity and coal.

Economics 633 3 units; H(3-0)
Labour Economics
Emphasizes empirical implementation of theoretical models through the use of data and econometrics. Topics include labor supply theory, search theory, wage determination theories, and numerical methods for the estimation of dynamic models.

Economics 635 3 units; H(3-0)
Regulatory Economics
An in-depth study of regulatory economics, defined as price and entry regulation. Price and entry regulation occurs when the state restricts who can provide services and approves the terms of service. A considerable part of the course will address regulatory restructuring in network industries, with case studies on electricity reform, local telecommunications, and pipelines.

Economics 641 3 units; H(3-0)
Financial Economics
A review of the main themes of financial economics and an introduction of a number of frontier ideas that have marked the recent evolution of the discipline. The main focus is on asset pricing and the application of financial econometrics to modeling and prediction of financial data.

Economics 649 3 units; H(3-0)
Empirical Public Economics
Focuses on empirical research on the economics of the public sector, including material on taxation, public expenditures and social insurance. Gives a broad overview of this growing field and prepares for research in public economics.
Antirequisite(s): Credit for Economics 649 and 611.48 will not be allowed.

Economics 651 3 units; H(3-0)
Redistribution and Social Insurance
A focus on the economics of public expenditure programs designed to redistribute income or to provide social insurance against risks faced by households.

Economics 653 3 units; H(3-0)
Public Revenue Analysis
A focus on the revenue side of public finance, primarily in the form of taxation. The equity and efficiency aspects of different taxes are considered, as is optimal tax design. Possible topics include the taxation of labour and capital, the impact taxation on savings and risk taking, and environmental and resource taxation.

Economics 655 3 units; H(3-0)
Cost/Benefit Analysis
Theoretical and applied aspects of the use of cost-benefit techniques and applied welfare analysis in the evaluation of investment projects and public policies.

Economics 657 3 units; H(3-0)
Microeconomic Theory
Introduction to advanced microeconomic theory. Topics include consumer theory, theory of the firm, general equilibrium, uncertainty, game theory, and informational economics.
Prerequisite(s): Admission to the Master of Arts Economics program.
Note: Students in other departments can take this course with permission of the Department of Economics.

Economics 659 3 units; H(3-0)
Macroeconomic Theory
Introduction to the analysis of macroeconomics at an advanced level. Provides an overview of theories addressing the major questions of macroeconomic phenomena. Some coverage of applied topics, such as economic growth and government policy.
Prerequisite(s): Admission to the Master of Arts Economics program.
Note: Students in other departments can take this course with permission of the Department of Economics.

Economics 661 3 units; H(3-0)
Behavioural Economics
Survey of research incorporating psychological evidence into economics. Topics include fairness, altruism, prospect theory, self-control, biases in probabilistic judgment, mental accounting, and the relationship between markets, incentives, and attention and various cognitive processes.

Economics 667 3 units; H(3-0)
Industrial Organization
A focus on market power: its acquisition, maintenance, and exercise. Both theory and application, with an emphasis on how industrial organization does, and should, inform competition policy and antitrust law, will be examined.

Economics 669 3 units; H(3-0)
Empirical Industrial Organization
Firm behaviour in oligopolistic markets, as well as consumer and firm behaviour in environments with asymmetric information. Strong emphasis on combining economic models with econometric techniques to answer economic questions. Models of demand and supply, discrete static and dynamic games, production function estimation, single agent dynamic models and matching models.
Antirequisite(s): Credit for Economics 669 and 611.71 will not be allowed.

Economics 675 3 units; H(3-0)
Natural Resource Economics
Examines economic models of the structure and nature of natural resource industries and their interaction with the rest of the economy. Includes non-renewable and renewable resources and applies methods from capital theory, growth theory, public economics, and industrial organization to the study of natural resources.

Economics 677 3 units; H(3-0)
Environmental Economics
Environmental economics describes the ways in which people interact with their natural environment and the policies that best achieve society’s goals in this context. Topics vary from year-to-year and may include benefit-cost analysis, non-market valuation, choice of policy instruments, environmental taxation, trade growth and the environment, global warming and international environmental treaties.

Economics 679 3 units; H(3-0)
Economics of Public Policy (Community Health Sciences 661)

Health Economics
An overview of topics in health economics. An introduction to economic principles and techniques used in analyzing and planning health policy, in particular the delivery of health services, and for understanding the health behaviour of individuals.

Economics 691 1.5 units; Q(3-0)
Research Methods I
Survey of research methods in economics. For course-based MA students.

Economics 693 1.5 units; Q(3-0)
Research Methods II
Survey of research methods in economics. For course-based MA students.

Economics 695 3 units; H(3-0)
Research Methods III
Master’s research project. Identify an interesting and feasible research question, carry out an extensive literature review of the problem area, develop an economic/econometric model to address the problem, identify and collect appropriate data for empirical research.
Prerequisite(s): Admission into the Master of Arts Economics (course-based) program.
Antirequisite(s): Credit for Economics 695 and 611.55 will not be allowed.
Courses of Instruction

Economics 697 3 units; H(3-0)

Research Methods IV
Master’s research project. Continuing from Research Methods III, the economic/econometric model is fully developed with specific attention to identification issues and testable hypotheses. Appropriate econometric analyses, validation and testing are carried out, leading to a research paper reporting on the problem, the model and the results.
Prerequisite(s): Admission into the Master of Arts Economics (course-based) program.
Antirequisite(s): Credit for Economics 697 and 611.57 will not be allowed.

Economics 705 3 units; H(3-0)

Advanced Econometrics I
Devoted to rigorous treatment of asymptotic theory as it applies to econometric practice. Provides a detailed treatment of the theory and practice of classical estimation procedures, including linear regression and instrumental variables, Maximum Likelihood, the General Method of Moments, as well as an extension to simulation-based methods. The theory of hypothesis testing is also covered.
Prerequisite(s): Economics 615 and admission to the PhD program in Economics.

Economics 707 3 units; H(3-0)

Advanced Microeconomic Theory I
Introduction to advanced microeconomic theory. Topics include consumer theory, theory of the firm, and general equilibrium.

Economics 709 3 units; H(3-0)

Advanced Macroeconomic Theory I
Introduction to the basic structure of the dynamic general equilibrium framework that forms the backbone of most modern macroeconomics research. Selected topics include growth, business cycles, and monetary and labor economics.

Economics 711 3 units; H(3-0)

Independent Study
MAY BE REPEATED FOR CREDIT

Economics 715 3 units; H(3-0)

Advanced Econometrics II
Focuses on the problem of causality and identification of treatment effects in empirical work in Economics. Topics include but are not limited to randomized trials, causality, instrumental variables, difference in differences, regression discontinuity designs. Students are introduced to empirical applications of these different approaches.
Prerequisite(s): Economics 705.

Economics 717 3 units; H(3-0)

Advanced Topics in Econometrics
Studies cutting edge econometric tools used to evaluate the impacts of policies, extrapolate their effects to new environments, and predict the effects of policies that have never been tried. Methods from both the structural and treatment effect paradigms of policy evaluation will be considered.
Prerequisite(s): Economics 705.

Economics 723 3 units; H(3-0)

Trade, Growth and the Environment I
Covers relevant theoretical work on the environmental consequences of trade liberalization and economic growth, and the relationship between resource use and globalization, focusing on newly published research. Participants are expected to present and discuss research. The specific choice of topics will be made based on research interests of the class.
Antirequisite(s): Credit for Economics 723 and 611.10 will not be allowed.

Economics 725 3 units; H(3S-0)

Trade, Growth and the Environment II
Covers relevant empirical work on the environmental consequences of trade liberalization and economic growth, and the relationship between resource use and globalization, focusing on newly published research. Participants are expected to present and discuss research. The specific choice of topics will be made based on research interests of the class.

Economics 757 3 units; H(3-0)

Advanced Microeconomic Theory II
Building on Economics 707, a comprehensive treatment of game theory, the economics of uncertainty and information, and the theory of incentives will be introduced. Other topics may be included as time and interest allow.
Prerequisite(s): Economics 707.

Economics 759 3 units; H(3-0)

Advanced Macroeconomic Theory II
Building on Economics 709, a survey of the ideas, controversies, and techniques that constitute modern macroeconomics. The principal issues it covers lie at the heart monetary and fiscal policy and of such important social problems as business cycles and unemployment. The empirical study of key issues raised in theoretical and political debates is also emphasized.
Prerequisite(s): Economics 709.

Economics 791 1.5 units; Q(1.5-0)

PhD Research Workshop
Survey of research methods in economics.
Prerequisite(s): Admission to the PhD program in Economics.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Education EDUC

Additional graduate education courses are offered under the course headings Educational Psychology (EDPS) and Educational Research (EDER).
Instruction offered by members of the Werklund School of Education and by others.

Junior Courses

Education 101 3 units; H(3-0)

English Academic Success
Students will relate their own life story and experiences to the wider human condition by reading a variety of literary texts and through writing in a variety of literary forms. Assignments will present opportunities for students to develop a critical understanding of literature in a personal context.
Prerequisite(s): Admission to Bridging to Community-based BEd stream in the Bachelor of Education (Community-based) program, or consent of the program.

Note: Completion of this course meets the University of Calgary’s ELA 30-1 admission requirement.
GRADED, NOT INCLUDED IN GPA, NO CREDIT TOWARDS DEGREES

Education 201 3 units; H(3-0)

Introduction to Educational Studies
An introduction to the breadth and complexity of educational studies. Unique among academic domains, educational studies not only arises in the intersections of many other fields – including psychology, sociology, anthropology, and a range of disciplinary domains – it must also be responsive to a rapidly changing world.
Note: All Concurrent and Four-Year BEd students must successfully complete Education 201 before taking 400-level Education courses.

Education 205 3 units; H(4-0)

Reading Educational Research
Focusing on students’ reading skills, this course continues to develop awareness of academic language genres, formal versus informal language use, and the development of critical thinking and logical argumentation skills. Continuing development of study skills and approaches that foster long-term academic success are integrated into course materials.
Prerequisite(s): Admission to Bridging to Community-based BEd stream in the Bachelor of Education (Community-based) program, or consent of the program.

Education 207 3 units; H(3-0)

How Children Learn to Read
Examines how young children learn to read through their world of daily experiences.

Education 209 3 units; H(3-0)

Supporting Children’s Reading
Students will explore strategies for promoting reading development through integrated experiential learning opportunities.

Education 211 3 units; H(4-0)

Academic Writing in Education
Focusing on students’ writing skills, this course develops awareness of academic language genres, formal versus informal language use, as well as the skills required for researching and referencing academic work in written texts. The development of study skills and approaches that foster long-term academic success are integrated with academic language skills development.

Education 213 3 units; H(3-0)

How Children Learn to Write
Examines how young children learn to write through their world of daily experiences.

Education 215 3 units; H(3-0)

Supporting Children’s Writing
Students will explore strategies for promoting writing development through integrated experiential learning opportunities.

Senior Courses

Education 305 3 units; H(3-1T)
(Mathematics 305)

Inside Mathematics
An exploration of the usually tacit elements of mathematical concepts and processes, the course focuses on strategies for unpacking concepts and for sustained engagement in inquiry.
Prerequisite(s): Mathematics 211 or 213; and 271 or 273.
Note: This course will be co-taught by scholars from the Faculty of Science and Werklund School of Education.
Education 307 3 units; H(3-0)

Integrating Arts Education
A preparation for artists and educators to design effective learning in, about, and through the arts. Discipline-specific knowledge and technique in and about art, dance, drama, and music will be acquired in a studio environment, and applied through an interdisciplinary, collaborative lab. Learner outcomes include interdisciplinary planning skills, aesthetic awareness, critical and analytical thinking, and inter-arts competencies.

Education 309 3 units; H(3-0)

Early Childhood Development
An examination of the science of early childhood and early brain development that accounts for the physical, cognitive, emotional, and social development of young children from birth to age eight, and a consideration of the implications with respect to children's healthy development and effective educational practices in the early school years.

Education 311 3 units; H(3-0)

Language and Literacy, Learning in the Classroom
An introduction to perspectives on the ways children and adolescents become "literate," examining language and literacy from a development perspective and children's literature from a genre perspective.

Education 420 3 units; H(3-0) (formerly Education 401)

Issues in Learning and Teaching
Presents an overview of the central issues related to the nature of learning and teaching for those preparing for the teaching profession. Themes include: the nature of learning; current realities in society; patterns of growth and development; and the changing dynamics of the teaching profession.

Education 427 3 units; H(3S-0)

Science, Technology, Engineering and Mathematics (STEM)
An introduction to key elements of STEM Education, including curriculum, pedagogy, standards and assessment. Participants will learn how to engage students and integrate STEM topics across all subject areas.

427.01 STEM Early Childhood Education
427.02 STEM Elementary Route
427.03 STEM Secondary Route
427.04 STEM K-12 (Community-Based pathways only)

Prerequisite(s): Admission to the corresponding route.

Education 430 3 units; H(3S-0) (formerly Education 403)

Pragmatics of Learning and Teaching
Examines the concomitant requirements within which teachers operate. The major components that will be addressed include the ways in which teachers work within the parameters of prescribed curricula and assessment requirements, follow system and school policies, participate in team teaching and school culture, and reflect one's work, values and goals.

Corequisite(s): Education 440.

Education 435 3 units; H(3S-0) (formerly Education 404)

Literacy, Language and Culture
The orienting principle is that every teacher is a teacher of reading. Includes a focus on the necessary for teachers across all disciplines and grades to attend to dimensions of language development, linguistic diversity, and literacy learning in their classrooms.

Education 440 3 units; H(0-3) (formerly Education 405)

Field Experience I
Students will participate in Educational Rounds in school settings within and outside of their areas of specialization under the guidance of their university field instructor and the partner school leadership team. They will explore the organization of learning in the school and the perspective of the learner and the teacher.

NOT INCLUDED IN GPA

Education 445 3 units; H(2-1) (formerly Education 406)

Individual Learning: Theories and Applications
Covers contemporary theories regarding the nature of individual learning. Students will examine the ways educators guide and support learning, design effective learning experiences, and understand underpinning factors related to individual learning. The application of these theories will be examined using examples that demonstrate and exemplify individual learning.

Prerequisite(s): Education 440.

Education 450 3 units; H(3S-0) (formerly Education 407)

Diversity in Learning
Includes key topics in inclusive education from an interdisciplinary perspective. The development and conception of diversity of learning will be examined from historical and contemporary perspectives. Building upon this foundation, students will consider the multiple and contested ways in which diversity of learning has been conceived, implemented and evaluated in schools.

Prerequisite(s): Education 440.

Education 456 3 units; H(3S-0) (formerly Education 555)

Assessment
An array of topics related to assessment to help students develop a professional level of knowledge, skills and attitudes in relation to the philosophy, theory and pedagogical application of assessment practices for K-12 education.

Prerequisite(s): Education 440.

Education 460 3 units; H(3S-0) (formerly Education 409)

Specialization I
Introduction on enacting pedagogy in each of the teachable subject areas in the program and pedagogical content knowledge in each area. Includes disciplinary ways of knowing, doing and being; understanding the Alberta Programs of Study; designing for deep understanding of learners.

460.01 Specialization I Elementary Early Childhood Education
460.02 Specialization I Elementary English Language Arts
460.03 Specialization I Elementary English Language Arts
460.04 Specialization I Elementary Fine Arts
460.05 Specialization I Elementary French
460.06 Specialization I Elementary Inclusive Education
460.07 Specialization I Elementary Mathematics
460.08 Specialization I Elementary Physical Education

460.09 Specialization I Elementary Science
460.10 Specialization I Elementary Second Languages
460.11 Specialization I Elementary Social Studies
460.12 Specialization I Elementary English Language Arts
460.13 Specialization I Elementary Fine Arts
460.14 Specialization I Elementary French
460.15 Specialization I Secondary Mathematics
460.16 Specialization I Secondary Physical Education

460.17 Specialization I Secondary Science
460.18 Specialization I Secondary Second Languages
460.19 Specialization I Secondary Social Studies
460.20 Specialization I K-12 Social Studies (Community-Based pathways only)
460.21 Specialization I K-12 English Language Arts (Community-Based pathways only)
460.22 Specialization I K-12 Mathematics (Community-Based pathways only)
460.23 Specialization I K-12 Science (Community-Based pathways only)

Prerequisite(s): Education 440 and admission to the teachable subject area.

Education 465 3 units; H(0-3) (formerly Education 411)

Field Experience II
This block field experience will have major focus on the complexities of individual learning. Prospective teachers will have the opportunity to follow individual students through various classrooms within their assigned schools under the guidance of their university field instructors and partner school leadership teams.

Prerequisite(s): Education 440.

NOT INCLUDED IN GPA

Education 520 3 units; H(3S-0) (formerly Education 502)

Interdisciplinary Learning
Students will be introduced to new knowledge building experiences that deepen their understanding of the interdisciplinary nature of learning and practice in schools and societies. Particular attention will address how teachers integrate ideas to connect learning and knowledge between subject specializations in attending to complex forms of learning and understanding, and how teachers understand their agency and leadership roles in concert with the responsibility that accompanies it.

Prerequisite(s): Education 465.

Education 525 3 units; H(3-0) (formerly Education 503)

Ethics and Law in Education
An introduction to the historical genesis and institutional structure of Alberta’s system of education; an understanding of its legal underpinnings; an opportunity for dialogue; on current major issues in education; and discussion involving ethical decision-making surrounding educational issues.

Prerequisite(s): Education 465.

Education 530 3 units; H(3S-0) (formerly Education 505)

Indigenous Education
Students will be introduced to the national and international experiences and advances of Indigenous peoples as related to education. Particular attention will be given to understanding the histories and diversity of the First Nations, Métis
Courses of Instruction

and inuit peoples of Canada and the concomitant implications that this has for education policy and practice.

Prerequisite(s): Education 465.

Education 535
(formerly Education 506) 3 units; H(3S-0)

Specialization II
Deepens students’ knowledge on enacting pedagogy in each of the specializations in the program and their pedagogical content knowledge in each specialization.

535.01 Specialization II Elementary Early Childhood Education
535.02 Specialization II Elementary English Language Learners
535.03 Specialization II Elementary English Language Arts
535.04 Specialization II Elementary Fine Arts
535.05 Specialization II Elementary French
535.06 Specialization II Elementary Inclusive Education
535.07 Specialization II Elementary Mathematics
535.08 Specialization II Elementary Physical Education
535.09 Specialization II Elementary Science Specialization
535.10 Specialization II Elementary Second Languages
535.11 Specialization II Elementary Social Studies
535.12 Specialization II Secondary English Language Arts
535.13 Specialization II Secondary Fine Arts Specialization
535.14 Specialization II Secondary French Specialization
535.15 Specialization II Secondary Mathematics
535.16 Specialization II Secondary Physical Education
535.17 Specialization II Secondary Science Specialization
535.18 Specialization II Secondary Second Languages
535.19 Specialization II Secondary Social Studies (Community-Based pathways only)
535.20 Specialization II K-12 Social Studies (Community-Based pathways only)
535.21 Specialization II K-12 English Language Arts (Community-Based pathways only)
535.22 Specialization II K-12 Mathematics (Community-Based pathways only)
535.23 Specialization II K-12 Science (Community-Based pathways only)

Prerequisite(s): Education 465 and admission to the teachable subject area.

Education 540
(formerly Education 508) 3 units; H(0-3)

Field Experience III
This team-oriented block practicum is founded upon the principles of collaborative learning. It includes structures and supports that promote positive interdependence, individual accountability, equal participation, and simultaneous interaction.

Prerequisite(s): Education 465.

NOT INCLUDED IN GPA

Education 546 3 units; H(3S-0)

Design-based Thinking
An exploration of key concepts and theories underpinning design thinking. Topics covered include production pedagogy, user-centered design, and principles of design thinking. The course offers tools to incorporate elements of design thinking into effective classroom teaching in a variety of subject areas

546.01 Design-based Thinking Early Childhood Education
546.02 Design-based Thinking Elementary Route
546.03 Design-based Thinking Secondary Route
546.04 Design-based Thinking K-12 (Community-Based pathways only)

Prerequisite(s): Education 540 and admission to the corresponding route.

Antirequisite(s): Credit for Education 546 and 545 or 550 will not be allowed.

Education 551
3 units; H(1-2)

Comprehensive School Health and Wellness
A healthy school community supports the wellness of all its members and healthy students make better learners. Within the broader evidence-based comprehensive school health framework, this course provides the theoretical foundations, research base, community resources, and experiential learning to create the capacity for future teachers to be health champions.

551.01 Comprehensive School Health and Wellness Early Childhood Education
551.02 Comprehensive School Health and Wellness Elementary Route
551.03 Comprehensive School Health and Wellness Secondary Route
551.04 Comprehensive School Health and Wellness K-12 (Community-Based pathways only)

Prerequisite(s): Education 540 and admission to the corresponding route.

Education 556
(formerly Education 455)
3 units; H(3S-0)

Professional Learning
Focuses on adult education perspectives on lifelong learning and the teaching profession. It emphasizes how novice teachers understand and encourage their learning, and the impacts of that learning on their teaching practice. Theoretical frameworks, philosophical underpinnings and reflections on experiences of adult learning will be explored.

556.01 Professional Learning Early Childhood Education
556.02 Professional Learning Elementary Route
556.03 Professional Learning Secondary Route
556.04 Professional Learning K-12 (Community-Based pathways only)

Prerequisite(s): Education 540 and admission to the corresponding route.

Education 560
(formerly Education 513)
6 units; F(0-6)

Field Experience IV
In this extended block field experience, students will have an opportunity to work one-on-one to lead a class with a mentor teacher. They will be under the guidance of their university advisors and partner school leadership teams.

Prerequisite(s): Education 540.

NOT INCLUDED IN GPA

Education 570
6 units; F(0-6)

Field Experience for Certification
Students will participate in an extended block field experience to lead a class with a mentor teacher.

Students will be supervised by their University field instructors and partner teachers.

Note: Restricted to students who require Alberta provincial certification or students who have received permission to register from the Associate Dean.

NOT INCLUDED IN GPA

Educational Psychology EDPS

Instruction is offered by members of Graduate Programs in Education.

Notes:
- Additional graduate education courses are offered under the course headings Educational Research (EDER) and undergraduate courses are offered under the course heading Education (EDUC).
- Only Psychology courses may be used to fulfill the requirements for the Major or Minor in Psychology.

Graduate Courses

Note: Graduate courses within Graduate Programs in Education: Educational Psychology can be taken only with consent of Graduate Programs in Education, and in specific cases additional requirements may be necessary (see below).

Educational Psychology 602
3 units; H(3S-0)

Counselling Theories and Professional Practice
Engages students in a critical evaluation of a range of contemporary counselling theories and helps them begin to develop a description of their own emerging theory.

Antirequisite(s): Credit for Educational Psychology 602 and any of Educational Psychology 681, Applied Psychology 602 or Campus Alberta Applied Psychology 601 will not be allowed.

Educational Psychology 604
3 units; H(3-0)

Professional Ethics in Applied Psychology
Ethical, legal and professional knowledge to inform practice in educational, counselling and mental health contexts.

Antirequisite(s): Credit for Educational Psychology 604 and any of Educational Psychology 614, Educational Psychology 603 or Campus Alberta Applied Psychology 603 will not be allowed.

Educational Psychology 606
3 units; H(3S-0)

Methods of Inquiry in Professional Practice
Helps students critically analyze other research efforts and in the process learn how to think through their own research questions in a critically evaluative manner.

Antirequisite(s): Credit for Educational Psychology 606 and Applied Psychology 606 will not be allowed.

Educational Psychology 608
3 units; H(3S-0)

Introduction to Statistical Analyses
An introductory course on descriptive and inferential statistics designed to give students with minimal statistical background sufficient competence to conduct basic statistical procedures. Topics will include: displaying data; measures of central tendency, variability, and correlation; regression analysis and prediction; probability; parameter estimation; and analysis of variance. Emphasis will be on understanding basic concepts, using software to conduct analyses, and interpretation of results.

Antirequisite(s): Credit for Educational Psychology 608 and either Applied Psychology 608 or
Courses of Instruction

- Educational Psychology 609 3 units; H(3-2)
  - Research Design in Statistics II
  
- Educational Psychology 610 3 units; H(3-0)
  - Research Methodology in Counselling
  
- Educational Psychology 611 3 units; H(3-2)
  - Qualitative Research Methodologies

- Educational Psychology 612 3 units; H(3-0)
  - Research Methods in School Psychology

- Educational Psychology 615 3 units; H(3-0)
  - Theoretical and Clinical Foundations of Assessment

- Educational Psychology 616 3 units; H(3S-0)
  - Assessment Theory and Practices

- Educational Psychology 617 3 units; H(3-3)
  - Psychological Assessment of Adults

- Educational Psychology 618 3 units; H(3-2)
  - Multivariate Design and Analysis

- Educational Psychology 619 3 units; H(3-0)
  - Counselling Girls and Women

- Educational Psychology 621 3 units; H(2-2)
  - Creating a Working Alliance

- Educational Psychology 622 3 units; H(3S-0)
  - Developing and Sustaining a Working Alliance with Clients

- Educational Psychology 623 3 units; H(3-0)
  - Theory in Counselling

- Educational Psychology 624 3 units; H(3-0)
  - Cultural and Social Justice Issues in Professional Practice

- Educational Psychology 625 3 units; H(3-0)
  - Cultural Influences on Professional Practice

- Educational Psychology 626 3 units; H(3-0)
  - Group Interventions and Processes

- Educational Psychology 627 3 units; H(3-1)
  - Group Processes in Applied Psychology

- Educational Psychology 629 3 units; H(3S-2)
  - Theory and Applications: Selected Topics

- Educational Psychology 630 3 units; H(3-0)
  - Foundations of Career Counselling

- Educational Psychology 631 3 units; H(3-0)
  - Theories of Career Development

- Educational Psychology 632 3 units; H(3S-0)
  - Career Development and Services for Organizational Settings

Notes:
- Not open to Open Studies students.
- MAY BE REPEATED FOR CREDIT
- Credit for Educational Psychology 609 will not be allowed.
- Credit for Educational Psychology 615 will not be allowed.
- Credit for Educational Psychology 621 will not be allowed.
- Credit for Educational Psychology 629 will not be allowed.
- Credit for Educational Psychology 631 will not be allowed.

Prerequisites:
- Educational Psychology 609 and either Educational Psychology 605 or Applied Psychology 605 will not be allowed.
- Educational Psychology 610 and any of Applied Psychology 605 or Educational Psychology 605 or Campus Alberta Applied Psychology 617 will not be allowed.
- Educational Psychology 611 and Applied Psychology 611 will not be allowed.
- Educational Psychology 614 and Applied Psychology 614 will not be allowed.
- Educational Psychology 615 and Applied Psychology 615 will not be allowed.
- Educational Psychology 616 and either Applied Psychology 616 or Campus Alberta Applied Psychology 616 will not be allowed.
- Educational Psychology 617 and Applied Psychology 617 will not be allowed.
- Educational Psychology 618 and Applied Psychology 618 will not be allowed.
- Educational Psychology 619 and Applied Psychology 619 will not be allowed.
- Educational Psychology 621 and Applied Psychology 621 will not be allowed.
- Educational Psychology 622 and either Applied Psychology 622 or Campus Alberta Applied Psychology 622 will not be allowed.
- Educational Psychology 623 and Applied Psychology 623 will not be allowed.
- Educational Psychology 624 and Applied Psychology 624 will not be allowed.
- Educational Psychology 625 and any of Applied Psychology 625, Educational Psychology 625 or Campus Alberta Applied Psychology 625 will not be allowed.
- Educational Psychology 626 and Applied Psychology 626 will not be allowed.
- Educational Psychology 627 and either Educational Psychology 627 or Campus Alberta Applied Psychology 627 will not be allowed.
- Educational Psychology 629 and either Educational Psychology 629 or Applied Psychology 629 will not be allowed.
- Educational Psychology 630 and any of Applied Psychology 631, Educational Psychology 631 or Campus Alberta Applied Psychology 631 will not be allowed.
- Educational Psychology 631 and either Educational Psychology 631 or Applied Psychology 631 will not be allowed.
counselling and human resources development professionals.

Prerequisite(s): Educational Psychology 602, 603, 622 and 625

Antirequisite(s): Credit for Educational Psychology 632 and either Applied Psychology 632 or Campus Alberta Applied Psychology 627 will not be allowed.

Educational Psychology 633 3 units; H(2-2)

Career Counselling
Laboratory and field experiences in career counselling.

Prerequisite(s): Educational Psychology 631.

Antirequisite(s): Credit for Educational Psychology 633 and either Applied Psychology 633 or Campus Alberta Applied Psychology 623 will not be allowed.

Educational Psychology 634 3 units; H(3S-0)

Multicultural Career Development and Counselling
Increasing cultural diversity requires career development practitioners to examine the ways that their services are designed and delivered. Designed to enable students to deliver culturally responsive career counselling services to diverse populations.

Prerequisite(s): Educational Psychology 636 and 646.

Antirequisite(s): Credit for Educational Psychology 636 and either Applied Psychology 634 or Campus Alberta Applied Psychology 629 will not be allowed.

Educational Psychology 635 3 units; H(3-0)

Advanced History, Theory, and Practice in Psychology
Course examines the history of psychological concepts in Western culture, major theoretical systems and research approaches, and the foundational assumptions of contemporary perspectives in psychology.

Prerequisite(s): Admission to a graduate program in Educational Psychology or Educational Research.

Antirequisite(s): Credit for Educational Psychology 635 and Applied Psychology 635 will not be allowed.

Educational Psychology 636 3 units; H(3S-0)

Systemic Approaches to Community Change
Provides students with a theoretical and practical basis to work as effective community change agents in a broad range of sectors. An examination of comprehensive guidance in schools provides a foundation for exploring key concepts pertinent to developing and implementing comprehensive services in a variety of contexts, and in the process, gaining a better understanding of communities, and building their strengths and capacities.

Antirequisite(s): Credit for Educational Psychology 636 and either Applied Psychology 636 or Campus Alberta Applied Psychology 625 will not be allowed.

Educational Psychology 637 3 units; H(3-0)

Relationship Counselling
Review of theory and systems in marriage and family counselling. Structured observation activities.

Corequisite(s): Prerequisite or Corequisite: Educational Psychology 640 or consent of Graduate Programs in Education.

Antirequisite(s): Credit for Educational Psychology 637 and Applied Psychology 637 will not be allowed.

Educational Psychology 638 3 units; H(3S-0)

Counselling Interventions for Client Change
Combines a theoretical and practical focus to develop a framework from which to plan and implement client change interventions in a variety of contexts.

Prerequisite(s): Educational Psychology 602 and 622.

Antirequisite(s): Credit for Educational Psychology 638 and either Applied Psychology 638 or Campus Alberta Applied Psychology 615 will not be allowed.

Educational Psychology 639 3 units; H(2-2)

Counselling Interventions
Theory and practice in planning and implementing client change interventions; the application of counselling interventions in laboratory experiences.

Prerequisite(s): Educational Psychology 621 and 623 or consent of Graduate Programs in Education.

Antirequisite(s): Credit for Educational Psychology 638 and Applied Psychology 639 will not be allowed.

Educational Psychology 640 6 units; F(2-7)

Practicum in Counselling Psychology
Supervised counselling experience and related seminars.

Prerequisite(s): Educational Psychology 621, 623, 625 or consent of Graduate Programs in Education.

Corequisite(s): Prerequisites or Corequisites: Educational Psychology 614, 615, 639 and 695.

Antirequisite(s): Credit for Educational Psychology 640 and Applied Psychology 640 will not be allowed.

Note: Not open to Open Studies students.

NOT INCLUDED IN GPA

Educational Psychology 641 3 units; H(3-0)

Development, Learning and Cognition - Child and Adolescent
The interactions of development, learning and cognition in childhood and adolescence.

Antirequisite(s): Credit for Educational Psychology 641 and Applied Psychology 641 will not be allowed.

Educational Psychology 642 3 units; H(3S-0)

Counselling Practicum I
Provides an opportunity for professional development and supervised practice in a general counselling setting. Students will be involved in direct work with clients under the supervision of a qualified professional.

Prerequisite(s): Educational Psychology 602, 604, 616, 622, 624, and 638.

Antirequisite(s): Credit for Educational Psychology 642 and either Applied Psychology 642 or Campus Alberta Applied Psychology 611 will not be allowed.

NOT INCLUDED IN GPA

Educational Psychology 643 3 units; H(3-0)

Development, Learning and Cognition - Adult
The interactions of development, learning and cognition in childhood and adulthood.

Antirequisite(s): Credit for Educational Psychology 643 and Applied Psychology 643 will not be allowed.

Educational Psychology 644 3 units; H(3S-0)

Counselling Practicum II
Provides an opportunity for professional development and supervised practice in a specialized counselling context. Students will be involved in direct work with clients under the supervision of a qualified professional. The practicum allows students to actively explore issues encountered in working with a specialized client population or area of practice.

Antirequisite(s): Educational Psychology 616, 638 and 642.

Antirequisite(s): Credit for Educational Psychology 644 and either Applied Psychology 644 or Campus Alberta Applied Psychology 619 will not be allowed.

NOT INCLUDED IN GPA

Educational Psychology 646 3 units; H(3S-0)

Processes of Learning
Addresses the essential features of major theories of learning and presents current research in each area of learning. Students will discover how the principles of learning relate to their own learning and behaviour, and how the principles can be used to understand the behaviour of others and enhance counselling practice.

Antirequisite(s): Credit for Educational Psychology 646 and either Applied Psychology 646 or Campus Alberta Applied Psychology 631 will not be allowed.

Educational Psychology 648 3 units; H(3S-0)

Lifespan Human Development
Introduces a comprehensive view of human development across the lifespan, drawing on the major theoretical positions. Developmental themes are discussed in terms of their application to typical and atypical human development in children, adolescents and adults.

Antirequisite(s): Credit for Educational Psychology 648 and either Applied Psychology 648 or Campus Alberta Applied Psychology 633 will not be allowed.

Educational Psychology 650 3 units; H(3-0)

Family and Social Bases of Behaviour
Examines theoretical perspectives and contemporary research on socialization processes in childhood and adolescence, with particular emphasis on family and peer interpersonal relations. Students will explore the connections between family and the education system including parent involvement in schools.

Antirequisite(s): Credit for Educational Psychology 650 and Applied Psychology 650 will not be allowed.

Educational Psychology 651 3 units; H(3-0)

Disorders of Learning and Behaviour
Focuses on childhood and adolescent disorders through an examination of theories, diagnostic and associated features and disorders, prevalence, de-
Courses of Instruction

Cognitive, memory, and neuropsychological assessment primarily through the use of individually administered standardized tests.

Prerequisite(s): Admission to a graduate program in Educational Psychology.

Antirequisite(s): Credit for Educational Psychology 657 and Applied Psychology 657 will not be allowed.

Financial Psychology 658 3 units; H(3-0)

Interventions to Promote Cognitive, Academic, and Neuropsychological Well-Being

Focuses on evidence-based interventions aimed at promoting cognitive, academic, and neuropsychological development in children and youth.

Prerequisite(s): Admission to a graduate program in Educational Psychology.

Antirequisite(s): Credit for Educational Psychology 658 and Applied Psychology 658 will not be allowed.

Financial Psychology 659 3 units; H(3-3)

Academic Assessment and Intervention

Academic and language assessment and intervention primarily through the use of individually administered standardized tests and evidence-based interventions aimed at promoting academic and language development in children and youth.

Prerequisite(s): Educational Psychology 665 and admission to a graduate program in Educational Psychology.

Antirequisite(s): Credit for Educational Psychology 659 and Applied Psychology 659 will not be allowed.

Educational Psychology 660 3 units; H(3-0)

Social, Emotional, and Behavioural Assessment

Grounded in biocognitive systems perspective and developmental and resiliency frameworks, course focuses on the comprehensive assessment of children and youth referred for social, emotional, and behavioural concerns.

Prerequisite(s): Admission to a graduate program in Educational Psychology.

Antirequisite(s): Credit for Educational Psychology 660 and Applied Psychology 660 will not be allowed.

Educational Psychology 661 3 units; H(3-0)

Psychological Foundations of Student Exceptionality

Major trends, developments, theoretical foundations, and current practices and challenges relative to the education of students with diverse learning needs.

Prerequisite(s): Admission to a graduate program in Educational Psychology.

Antirequisite(s): Credit for Educational Psychology 661 and Applied Psychology 661 will not be allowed.

Educational Psychology 662 3 units; H(2-15)

School Psychology Practicum I

Provides supervised experience to develop competencies aligned with the practice of school psychology, including consultation, assessment, and intervention. Adherence to all provincial and national ethical and professional guidelines is expected.

Prerequisite(s): Educational Psychology 614, 665, 659, 669 and admission to a graduate program in Educational Psychology with specialization in School and Applied Child Psychology program.

NOT INCLUDED IN GPA

Educational Psychology 663 3 units; H(2-15)

School Psychology Practicum II

Provides supervised experience to further develop and refine school psychologist competencies. Administration of evidenced-based intervention strategies will be also required. Adherence to all provincial and national ethical and professional guidelines is expected.

Prerequisite(s): Educational Psychology 662 and admission to a graduate program in Educational Psychology.

NOT INCLUDED IN GPA

Educational Psychology 664 3 units; H(3S-0)

Psychological Approaches to Health

Focuses on how human psychology and human health intersect and is organized according to core principles and skills that guide the practice of health psychology. Will orient students to contemporary theories and models of health, illness, and health promotion, and their relevance in a variety of settings.

Prerequisite(s): Educational Psychology 602, 624, and 610.

Antirequisite(s): Credit for Educational Psychology 664 and either Applied Psychology 664 or Campus Alberta Applied Psychology 635 will not be allowed.

Educational Psychology 665 3 units; H(3-3)

Cognitive Assessment and Intervention

The theory and practice of intellectual/cognitive, and memory assessment primarily through the use of individually administered standardized tests and evidence-based interventions aimed at promoting cognitive, academic, and neuropsychological development in children and youth.

Prerequisite(s): Admission to a graduate program with specialization in School and Applied Child Psychology.

Corequisite(s): Educational Psychology 653.

Educational Psychology 666 3 units; H(3-3)

Assessment of Students with Exceptional Learning Needs

Theory and practice in school-based academic and social-emotional assessment techniques and strategies for use with students with diverse learning needs. Laboratory and field experiences.

Prerequisite(s): Admission to a graduate program with specialization in School and Applied Child Psychology.

Antirequisite(s): Credit for Educational Psychology 667 and either Educational Psychology 652 or Applied Psychology 652 will not be allowed.

Educational Psychology 667 3 units; H(3S-0)

Theory and Practice of Clinical Supervision

Intended for students to learn the process of clinical supervision and as a result become better consumers of supervision, more effective supervisors, and more able to evaluate their current and future development and involvement in supervisory roles.

Prerequisite(s): Credit for Educational Psychology 668 and either Applied Psychology 668 or Campus Alberta Applied Psychology 661 will not be allowed.

Educational Psychology 668 3 units; H(3S-0)

Social-Emotional Assessment and Intervention

Focuses on the theory and practice of social, emotional, and behavioural assessment and on evidence-based interventions to enhance the men-
tal health and behavioural well-being of children and youth.

Prerequisite(s): Educational Psychology 665 and admission to a graduate program with specialization in School and Applied Child Psychology.

Educational Psychology 670 3 units; H(3S-0)

Final Project Portfolio
Students complete a culminating independent project in their area of specialization to satisfy the degree requirements.

Prerequisite(s): Educational Psychology 602, 604, 610, 616, 622, 624, 626, 630, 638, 642, 646, 648, and 664.

Antirequisite(s): Credit for Educational Psychology 670 and either Applied Psychology 670 or Campus Alberta Applied Psychology 693 will not be allowed.

Educational Psychology 671 3 units; H(1-3)

Practicum in School-based Interventions for Children and Youth with Exceptional Learning Needs: I
Practicum in educational interventions for children and adolescents with special learning needs. Focus on general assessment, analysis, intervention, and strategies in applied settings.

Prerequisite(s): Educational Psychology 661.

Antirequisite(s): Credit for Educational Psychology 671 and Applied Psychology 671 will not be allowed.

Educational Psychology 672 3 units; H(3S-0)

Counselling Exceptional Children
Intended to help students enhance their awareness and understanding of major trends, developments, theoretical foundations, and current practices and challenges in counseling and providing consultation for special needs children and adolescents.

Antirequisite(s): Credit for Educational Psychology 672 and either Applied Psychology 672 or Campus Alberta Applied Psychology 641 will not be allowed.

Educational Psychology 673 3 units; H(3-3)

Practicum in School-based Interventions for Children and Youth with Exceptional Learning Needs: II
Advanced practicum in educational interventions for children and adolescents with special learning needs. Focus on specialized assessment, analysis, interventions, and strategies in applied settings.

Prerequisite(s): Educational Psychology 671.

Antirequisite(s): Credit for Educational Psychology 673 and Applied Psychology 673 will not be allowed.

Educational Psychology 674 3 units; H(3-0)

Interventions to Promote Socio-emotional and Behavioural Well-Being
Focus on strategies to enhance the socio-emotional and behavioural well-being of children and youth who exhibit significant emotional and behavioural needs in school and community settings.

Prerequisite(s): Educational Psychology 660.

Antirequisite(s): Credit for Educational Psychology 674 and Applied Psychology 674 will not be allowed.

Educational Psychology 675 3 units; H(1-14)

Practicum in Cognitive and Neuropsychological Assessment and Intervention
This 200-hour practicum provides opportunities to develop competencies in cognitive and neuropsychological assessment and interventions within an approved setting.

Prerequisite(s): Educational Psychology 651, 654 and 657.

Antirequisite(s): Credit for Educational Psychology 675 and Applied Psychology 675 will not be allowed.

NOT INCLUDED IN GPA

Educational Psychology 676 3 units; H(1-14)

Practicum in Social, Emotional, and Behavioural Assessment
A supervised practicum in social, emotional, and behavioural assessment. Students will undertake comprehensive social, emotional, and behavioural assessment with children and youth presenting with various developmental disorders. Students will undertake this practicum experience within the Werklund School of Education’s Integrated Educational Services office (ISE).

Prerequisite(s): Educational Psychology 674.

Antirequisite(s): Credit for Educational Psychology 676 and Applied Psychology 676 will not be allowed.

Educational Psychology 677 3 units; H(3-0)

Play Therapy Theory and Process
The theoretical foundations and basic orientation necessary to understand and use play as therapy are outlined, along with the developmental underpinnings of play in children and the basic principles upon which child-centred play therapy is built.

Antirequisite(s): Credit for Educational Psychology 677 and Applied Psychology 677 will not be allowed.

Educational Psychology 678 3 units; H(3S-0)

Art Therapy History
Art therapy is examined from a broad perspective, from its beginnings as a treatment for mentally or emotionally disturbed people, to its development as a distinct profession in North America and Europe. The works of key authors are covered, along with their theoretical approaches and current trends in the field. Students will learn how the foundations of art therapy are incorporated by many disciplines, with applications in many settings.

Prerequisite(s): Educational Psychology 642, 616, and 638.

Antirequisite(s): Credit for Educational Psychology 678 and either Applied Psychology 678 or Campus Alberta Applied Psychology 661 will not be allowed.

Educational Psychology 679 3 units; H(3-0)

Fundamentals of Solution-Oriented Therapy
Provides a working knowledge of the theory and practice of solution-oriented therapy and related models.

Antirequisite(s): Credit for Educational Psychology 679 and Applied Psychology 679 will not be allowed.

Educational Psychology 680 3 units; H(3S-0)

Counselling Graduate Practicum: Selected Topics
Graduate Practicum: Selected Topics.

Antirequisite(s): Credit for Educational Psychology 680 and either Applied Psychology 680 or Campus Alberta Applied Psychology 695 will not be allowed.

MAY BE REPEATED FOR CREDIT

Educational Psychology 681 3 units; H(3-0)

Theories and Skills of Counselling
An introduction to the major theories of counselling as well as counselling micro-skills and interviewing skills.

Prerequisite(s): Admission to Educational Psychology graduate program or consent of Graduate Programs in Education.

Antirequisite(s): Credit for Educational Psychology 681 and Educational Psychology 692 will not be allowed.

Not included in GPA

Educational Psychology 682 3 units; H(3-3)

Special Topics: Counselling
Graduate Seminar: Special Topics.

Antirequisite(s): Credit for Educational Psychology 682 and either Applied Psychology 682 or Campus Alberta Applied Psychology 691 will not be allowed.

MAY BE REPEATED FOR CREDIT

Educational Psychology 683 3 units; H(3-0)

Consultation in School Psychology
Examines the purpose and skills of consultation, evaluation issues, and strategies in consultation as well as the role of school psychologists relative to multidisciplinary school teams, school-based problems solving, and student development and learning.

Prerequisite(s): Admission to Educational Psychology graduate program or consent of Graduate Programs in Education.

Educational Psychology 684 3 units; H(3-0)

Advanced Seminar in the Domains of School Psychology Leadership and Function in the Schools
Provides an advanced study of the domains and functions of school and applied child psychologists. Constituting the final course within the MEd program, students are required to demonstrate a comprehensive understanding of and competency in the ten domains identified by the National Association of School Psychologists as central to the school psychology profession. For each of the ten domains, students will complete a case study requiring the integration of theory, research, and skills.

Prerequisite(s): Admission to the MEd program with specialization in School and Applied Child Psychology program.

Antirequisite(s): Credit for Educational Psychology 684 and Applied Psychology 684 will not be allowed.

Note: Open only to students enrolled in the MEd School and Applied Child Psychology program who have completed all other course work prior to enrolment.

Educational Psychology 685 3 units; H(3-0)

Child and Adolescent Counselling
Introduces the theory and practice of counselling in school-based settings and fosters student development of rudimentary counselling and psychotherapy skills for school-based service delivery.

Prerequisite(s): Admission to Educational Psychology graduate program or consent of Graduate Programs in Education.
Courses of Instruction

Educational Psychology 686  3 units; H(3S-0)

Counselling Graduate Seminar: Selected Topics
Graduate Seminar: Selected Topics.
Antirequisite(s): Credit for Educational Psychology 686 and Applied Psychology 686 will not be allowed.
MAY BE REPEATED FOR CREDIT

Educational Psychology 687  3 units; H(3-0)

Developmental Psychopathology
An examination of the history of psychopathology and abnormal psychology, and the DSM-V. An empirical and theoretical scope will be used to approach childhood disorders including issues with classification, etiology, and developmental course.
Prerequisite(s): Admission to Educational Psychology graduate program or consent of Graduate Programs in Education.
Antirequisite(s): Credit for Educational Psychology 687 and Educational Psychology 651 will not be allowed.

Educational Psychology 688  3 units; H(3-0)

Cognitive and Affective Bases of Behaviour
A survey of cognitive development in the first two decades of life. Topics may include biological bases of cognition, perception, memory, motivation, emotion, learning, language and motor.
Prerequisite(s): Admission to Educational Psychology graduate program or consent of Graduate Programs in Education.

Educational Psychology 689  3 units; H(3-0)

Cognitive Assessment
A focus on the history, theory and practice of cognitive assessment. This course also focuses on report writing and multicultural assessment within the context of cognitive evaluation.
Prerequisite(s): Educational Psychology 653 and 654 and admission to the School and Applied Child Psychology graduate program.
Antirequisite(s): Credit for Educational Psychology 689 and either Educational Psychology 665 or 657 will not be allowed.

Educational Psychology 690  3 units; H(3-0)

School-based Intervention and Consultation
An exploration of school systems, evidence-based interventions, and theories of consultation.
Prerequisite(s): Educational Psychology 696 and admission to the School and Applied Child Psychology graduate program.
Antirequisite(s): Credit for Educational Psychology 690 and either Educational Psychology 658 or 683 will not be allowed.

Educational Psychology 691  1.5 units; Q(1.5S-0)

Graduate Seminar: Selected Topics
Applied course in program planning, design, and evaluation for counselling contexts.
Antirequisite(s): Credit for Educational Psychology 691 and Applied Psychology 691 will not be allowed.
MAY BE REPEATED FOR CREDIT

Educational Psychology 692  6 units; F(3S-0)

Graduate Seminar: Selected Topics
Antirequisite(s): Credit for Educational Psychology 692 and Applied Psychology 692 will not be allowed.
MAY BE REPEATED FOR CREDIT

Educational Psychology 693  3 units; H(3S-0)

Graduate Seminar: Selected Topics
Antirequisite(s): Credit for Educational Psychology 693 and Applied Psychology 693 will not be allowed.
MAY BE REPEATED FOR CREDIT

Educational Psychology 694  6 units; F(1S-3)

Graduate Practicum: Selected Topics
Antirequisite(s): Credit for Educational Psychology 694 and Applied Psychology 694 will not be allowed.
MAY BE REPEATED FOR CREDIT

Educational Psychology 695  3 units; H(1S-3)

Graduate Practicum: Selected Topics
Supervised counselling field experience.
Prerequisite(s): Admission to a graduate program in Educational Psychology.
Antirequisite(s): Credit for Educational Psychology 695 and Applied Psychology 695 will not be allowed.
MAY BE REPEATED FOR CREDIT

Educational Psychology 696  3 units; H(3S-0)

Social, Emotional, and Behavioural Assessment and Intervention
A focus on the assessment and intervention of children and youth who exhibit significant social, emotional, and behavioural needs in school and community settings.
Prerequisite(s): Educational Psychology 602 or 681 and admission to the School and Applied Child Psychology graduate program.
Antirequisite(s): Credit for Educational Psychology 696 and any of Educational Psychology 660, 669 or 674 will not be allowed.

Educational Psychology 697  3 units; H(1-14)

Practicum in Academic & Cognitive Assessment
With a focus on academic and cognitive functioning, this practicum provides supervised experience to develop competencies aligned with the practice of school psychology including consultation, assessment, and intervention.
Prerequisite(s): Educational Psychology 652, 654, 687, and 689 and admission to the School and Applied Child Psychology graduate program.
Antirequisite(s): Credit for Educational Psychology 697 and Educational Psychology 662 will not be allowed.
MAY BE REPEATED FOR CREDIT

Educational Psychology 698  6 units; F

Pre-Master’s Internship in School and Applied Child Psychology
Within this 1200 hour full-time internship, Masters level interns will have opportunities to demonstrate under supervision their ability to apply their knowledge to develop specific skills needed for effective school psychological service delivery and integrate competencies that address various domains of professional preparation and practice in school psychology.
Prerequisite(s): Admission to the MEd with specialization in School and Applied Psychology and consent of the Training Director.
Antirequisite(s): Credit for Educational Psychology 698 and Applied Psychology 698 will not be allowed.
Note: All MEd coursework must be completed before starting the internship.

Advanced Theories in Measurement
This advanced seminar course focuses on a variety of topics and issues related to measurement in the social, educational, and behavioural sciences. As we progress through the course, we will cover topics critical to measurement; including principles of scale development (e.g., item writing, scaling), and validity theory (e.g., construct representation and validation). This course is strongly recommended for anyone planning to pursue applied, clinical, or research studies/careers involving the use of tests and/or measures.
Prerequisite(s): Educational Psychology 618 and admission to a doctoral program in Educational Psychology.
Antirequisite(s): Credit for Educational Psychology 701 and Applied Psychology 701 will not be allowed.

Advanced Seminar in Applied Psychology
Doctoral seminar on issues in applied psychology. Dissertation development.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.
Antirequisite(s): Credit for Educational Psychology 703 and Applied Psychology 703 will not be allowed.

NOT INCLUDED IN GPA

Educational Psychology 701  3 units; H(3-0)

Advanced Research Design, Psychometrics and Statistics in Applied Psychology
Provides intensive exposure to sophisticated quantitative techniques relevant to research design, psychometrics, and statistics such as structural equation modelling (SEM), item-response theory (IRT), and hierarchical linear modelling (HLM).
Prerequisite(s): Educational Psychology 618 and admission to a doctoral program in Educational Psychology.
Antirequisite(s): Credit for Educational Psychology 701 and Applied Psychology 701 will not be allowed.

Educational Psychology 702  3 units; H(3-0)

Advanced Seminar in Special Education I
Advanced study of theoretical, empirical, and practical issues affecting individuals with exceptional learning needs.
Prerequisite(s): Educational Psychology 661 and admission to a doctoral program in Educational Psychology.
Antirequisite(s): Credit for Educational Psychology 705 and Applied Psychology 705 will not be allowed.

NOT INCLUDED IN GPA

Educational Psychology 703  3 units; H(3-0)

Advanced Seminar in Applied Psychology
Doctoral seminar on issues in applied psychology. Dissertation development.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.
Antirequisite(s): Credit for Educational Psychology 703 and Applied Psychology 703 will not be allowed.

NOT INCLUDED IN GPA

Educational Psychology 705  3 units; H(3-0)

Advanced Seminar in Special Education I
Advanced study of theoretical, empirical, and practical issues affecting individuals with exceptional learning needs.
Prerequisite(s): Educational Psychology 661 and admission to a doctoral program in Educational Psychology.
Antirequisite(s): Credit for Educational Psychology 705 and Applied Psychology 705 will not be allowed.
Courses of Instruction

Educational Psychology 709  3 units; H(3-0)

Advanced Seminar in Applied Learning and Developmental Psychology
Advanced study of theory and practice in human development and learning.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Educational Psychology 731  3 units; H(3-0)

Advanced Clinical Supervision in Applied Psychology
Provides students with formal training in clinical supervision with the intent of raising an awareness of supervision models, as well as a conceptual framework and vocabulary for thinking through their supervision practice.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Advanced Seminar in School and Applied Child Psychology
Seminar series that links theory and research with practice in the school psychology domains of professional competence.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Educational Psychology 741  3 units; H(3-2)

Advanced Professional Skills and Issues
Focuses on providing knowledge and developing skills in the areas of consultation, supervision, and program development and evaluation across the lifespan.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Educational Psychology 742  6 units; F(2-7)

Advanced Practicum in Counselling
Advanced practicum in counselling psychology, and related seminars.
Prerequisite(s): Admission to a doctoral program in Educational Psychology with specialization in Counselling Psychology.

Educational Psychology 746  3 units; H(2-15)

Advanced Doctoral Practicum in Clinical Assessment and Supervision
Provides opportunities to apply and develop clinical knowledge and skill as well as best-practice approaches to supervision.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Educational Psychology 762  3 units; H(3-0)

Advanced Neuropsychological Assessment and Intervention
Builds advanced understanding of neuropsychological approaches to assessment and intervention and the use of the cognitive hypothesis testing model to formulate and test hypotheses.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Educational Psychology 763  3 units; H(3-2)

School- and Clinical-Based Interventions
Introduces behavioural, social, emotional, and counselling interventions with a particular focus on their application to school and clinical settings for use with children and adolescents.
Prerequisite(s): Educational Psychology 685 and admission to a doctoral program in Educational Psychology.

Educational Psychology 764  3 units; H(3-2)

Advanced Research Statistics
Provides instruction in advanced statistical methods. Topics include, but are not limited to, multilevel/growth curve modeling, structural equation modeling, and topics related to the measurement of growth and change and the use of advanced statistical software.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Educational Psychology 766  3 units; H(2-15)

School-Based Practicum
This advanced practicum will provide students with specialized assessment, intervention, analysis, and strategies in school settings under the supervision of registered school psychologists.
Prerequisite(s): Admission to a doctoral program in Educational Psychology.

Educational Psychology 792  6 units; F(1S-3)

Advanced Practicum: Selected Topics
Supervised counselling and school applied child psychology field experience intended to enhance the professional practice skills of students.
Prerequisite(s): Admission to a doctoral program in Educational Research.

Educational Psychology 794  6 units; F(1S-3)

Advanced Practicum: Selected Topics
Supervised counselling and school applied child psychology field experience intended to enhance the professional practice skills of students.
Prerequisite(s): Admission to a doctoral program in Educational Research.

Educational Psychology 798  6 units; F

Pre-Doctoral Internship in School and Applied Child Psychology
The internship is a full-time commitment over the course of one calendar year or half-time over the course of two consecutive calendar years. The full-time and half-time experiences each provide, at a minimum, 1,600 hours of supervised experience involving the theory and practice of evaluations, consultation, interventions, research, and related activities within an approved school, clinic, or other human service agency.
Prerequisite(s): Admission to the doctoral program in Educational Research with specialization in School and Applied Child Psychology and consent of the Training Director.

Educational Psychology 799  3 units; H(3S-0)

Graduate Seminar: Selected Topics
Prerequisite(s): Admission to a doctoral program in Educational Research.

Educational Psychology 809  6 units; F

Graduate Seminar: Selected Topics
Prerequisite(s): Admission to a doctoral program in Educational Research.

<td>Educational Research 649</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Special Topics in English Language Education</strong></td>
<td>Explores a variety of theoretical perspectives and discourses in English Language Education. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 651</td>
<td>Educational Research 651</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Philosophy of Education</strong></td>
<td>Philosophical topics in the context of education. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 653</td>
<td>Educational Research 653</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Sociology of Education</strong></td>
<td>Sociological topics in the context of education. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 655</td>
<td>Educational Research 655</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Comparative Education</strong></td>
<td>Topics in comparative education. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 657</td>
<td>Educational Research 657</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Culture and Gender Studies</strong></td>
<td>Culture and gender topics in the context of education. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 659</td>
<td>Educational Research 659</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>History of Education</strong></td>
<td>Historical topics in the context of education. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 664</td>
<td>Educational Research 664</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Language and Literacy: Theory and Research</strong></td>
<td>The exploration of ideas, issues, and questions related to and beyond the notions of language and literacy, and how they intersect. An introduction to the principles of language learning from cognitive, socio-cultural, and critical perspectives. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 667</td>
<td>Educational Research 667</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Second Language Reading and Writing</strong></td>
<td>Research and practice in second language reading and writing; instructional techniques for specific audiences; theories of reading and writing. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 668</td>
<td>Educational Research 668</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Theory and Research in Languages and Diversity</strong></td>
<td>Topics include the acquisition, use, learning and teaching of language(s) and literacy in a variety of settings. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 669</td>
<td>Educational Research 669</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Aspects of Second Language and Culture</strong></td>
<td>Introduction to research and issues on various aspects of second language and culture. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 671</td>
<td>Educational Research 671</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Conceptualizing Educational Technology</strong></td>
<td>Seminar to familiarize students with the terrain of educational technology. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 673</td>
<td>Educational Research 673</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Instructional Design</strong></td>
<td>Integration of theory and practice associated with the selection and sequencing of content across the instructional spectrum and the matching of instructional strategies to characteristics of learners and content. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 675</td>
<td>Educational Research 675</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Principles of Instructional Development</strong></td>
<td>Topics include the examination of a variety of instructional development models, the systems approach to developing instruction, front-end analysis and needs assessment, risk analysis, constraint analysis, resource allocation, task analysis, and evaluation. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 677</td>
<td>Educational Research 677</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Distributed Learning</strong></td>
<td>Examination of distributed teaching and learning processes in educational systems with attention to computer mediated teaching and communication and integrated instructional design methodologies. Other topics include media selection, online teambuilding, social context issues, and leadership of distributed learning organizations. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 679</td>
<td>Educational Research 679</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Special Topics in Educational Technology</strong></td>
<td>Examination of current topics and issues in educational technology and related areas. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 681</td>
<td>Educational Research 681</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Studying Curriculum</strong></td>
<td>Curriculum research, theory, and practice with particular reference to curriculum aims, content, organization and change. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 683</td>
<td>Educational Research 683</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Curriculum Development, Implementation and Assessment</strong></td>
<td>Making sense of what happens when curriculum policy becomes reality and affects students, teachers, parents and politicians. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 684</td>
<td>Educational Research 684</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Contemporary Themes in Critical Pedagogy and Social Justice</strong></td>
<td>Explores the relationship between structural inequalities, education and curriculum theory. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 685</td>
<td>Educational Research 685</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>
<tr>
<td><strong>Interpretive Curriculum Discourses</strong></td>
<td>The field of interpretive work in curriculum theory. MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Educational Research 687</td>
<td>Educational Research 687</td>
<td>3 units; H(3-0)</td>
<td></td>
</tr>

</table>
Courses of Instruction

**Electrical Engineering Design and Technical Communications**
Fundamentals of electrical and computer engineering design, testing, and product development; critical thinking and problem solving skills development; electrical engineering standards, regulatory issues, project management, and leadership. Effective and efficient writing will be emphasized. Case studies and projects may be drawn from a range of electrical and computer engineering areas.

**Prerequisite(s):** Electrical Engineering 300, 327 and 343.

**Probability and Random Variables**
Expressing engineering data and systems in terms of probability, introduction to probability theory, discrete and continuous random variables, functions of random variables, goodness-of-fit testing, hypothesis testing and stochastic processes. Applications chosen from electrical engineering.

**Prerequisite(s):** Electrical Engineering 327.

**Antirequisite(s):** Credit for Electrical Engineering 419 and either Engineering 319 or Biomedical Engineering 319 will not be allowed.

**Electrical Engineering 441** 3 units; H(3-1.5T)

**Control Systems I**

**Compensation design techniques. Introduction to multi sensor state feedback compensator design. Overview of digital control systems and industrial controllers.**

**Prerequisite(s):** Electrical Engineering 327.

**Digital Systems Design**
Design, implementation and testing of a digital system. Mask programmable and field programmable technology. Logic design for integrated systems. Design for testability. Real versus ideal logic design. CAD tools for digital systems design: simulation, synthesis and fabrication.

**Prerequisite(s):** Electrical Engineering 353 and 361 and Engineering 225.

**Electrical Engineering 469** 3 units; H(3-1T-3/2)

**Analog Electronic Circuits**
BJT biasing, load-line analysis, BJT as amplifier and switch, small-signal model, single-stage and two-stage small-signal BJT amplifiers, current sources and current steering, differential pair and multistage BJT amplifiers, BJT power amplifiers, operational amplifier circuits.

**Prerequisite(s):** Electrical Engineering 361.

**Electrical Engineering 471** 3 units; H(3-1T-3/2)

**Introduction to Communications Systems and Networks**
Introduction to communications systems and networks. Analog communications concepts including filtering and analog modulation. Sampling and digital communications concepts including binary baseband/passband modulation, matched filter detection. Telecommunications and data network fundamentals including network protocol architectures, design and performance.

**Prerequisite(s):** Electrical Engineering 327.

**Electrical Engineering 475** 3 units; H(3-2T)

**Electromagnetic Fields and Applications**
Electrostatic and magnetostatic fields and applications; applications of vector calculus for electromagnetics; introduction to Maxwell’s equations for time-varying fields; plane wave propagation.

**Prerequisite(s):** Physics 259 and Mathematics 375 or Applied Mathematics 307.

**Electrical Engineering 476** 3 units; H(3-1T-3/2)

**Electromagnetic Waves and Applications**
Plane wave propagation, reflection, and refraction; transmission line theory and applications; introduction to scattering parameters, matching networks, Smith charts; propagation in waveguides; cavities and resonant modes; advanced topics.

**Prerequisite(s):** Electrical Engineering 475.

**Electrical Engineering 487** 3 units; H(3-1T-3/2)

**Electrical Engineering Energy Systems**
Fundamental of energy resources and electric power generation, transmission and distribution; steady-state models for generators, load, transformers, and transmission lines; three phase systems, per unit representation; transmission line parameters; power flow analysis.

**Prerequisite(s):** Engineering 225.

**Electrical Engineering 489** 3 units; H(3-1T-3/2)

**Modelling and Control of Electric Machines and Drives**
Principles of electromechanical energy conversion. Rotating Machines (DC, Synchronous and Induction machines), Synchronous Generator voltage and power control, motor drive systems.

**Prerequisite(s):** Engineering 225.

**Electrical Engineering 500** 6 units; F(1-3)

**Computer, Electrical, and Software Engineering Team Design**
Preliminary and detailed engineering design and implementation of an engineering system that applies engineering knowledge to solving a real-life problem. The emphasis is on the design process as it is associated with electrical, computer and software engineering, design methodology, general design principles for engineers, teamwork and project management.

**Prerequisite(s):** Fourth-year standing or above.

**Antirequisite(s):** Credit for Electrical Engineering 500 and either 583 or 589 will not be allowed.

**Electrical Engineering 503** 3 units; H(3-2)

**Computer Vision**
Introduction to the fundamentals of image processing and computer vision. Image/video acquisition and raw data matrix manipulation; image processing operations and compression methods; object detection, isolation, and classification; 3D tracking and ego-motion with projective transformations.

**Prerequisite(s):** Electrical Engineering 327 and Computer Engineering 335 or 339 or Software Engineering for Engineers 337.

**Electrical Engineering 514** 3 units; H(3-1T)

**Introduction to Nanotechnology**
Introduction to nanotechnology, limits of smallness, quantum nature of the nanoscale materials, Nanotechnology device fabrication and characterization techniques, Nanotechnology applications, Nanotechnology safety.

**Prerequisite(s):** Electrical Engineering 361.

**Electrical Engineering 519** 3 units; H(3-2) or H(3-0)

**Special Topics in Electrical Engineering**
Current topics in electrical engineering.

**Prerequisite(s):** Consent of the Department.

**Note:** Consult Department for announcement of topics.

**MAY BE REPEATED FOR CREDIT**

**Electrical Engineering 525** 3 units; H(3-2)

**Neuro-Fuzzy and Soft Computing**
Neural networks: neuron models and network architectures; preceptors; Widrow-Hoff learning and the backpropagation algorithm; associative memory and Hopfield networks; unsupervised learning. Fuzzy systems: basic operations and properties of fuzzy sets; fuzzy rule generation and defuzzification of fuzzy logic; fuzzy neural networks. Applications in areas such as optimization, signal and image processing, communications, and control. Introduction to genetic algorithms and evolutionary computing. Introduction to chaos theory.

**Prerequisite(s):** Electrical Engineering 327.

**Electrical Engineering 529** 3 units; H(3-2)

**Wireless Communications Systems**
Overview of terrestrial wireless systems including system architecture and industry standards; propagation characteristics of wireless channels; modern wireless communications; cellular system planning and engineering; fading mitigation techniques in wireless systems; multiple access techniques for wireless systems.

**Prerequisite(s):** Electrical Engineering 471 and one of Engineering 319 or Electrical Engineering 419.

**Electrical Engineering 541** 3 units; H(3-1T-3/2)

**Control Systems II**
Introduction to sampled-data control systems, discretization of analog systems, discrete-time signals and systems, causality, time-invariance, z-transforms, stability, asymptotic tracking, space-state models, controllability and observability, pole assignment, deadbeat control, state observers, observer-based control design, optimal control.

**Prerequisite(s):** Electrical Engineering 441.

**Electrical Engineering 559** 3 units; H(3-2/2)

**Analog Filter Design**
This class deals with the theory and design of active filters, for audio-frequency applications, using op amps. It consists, basically, of two phases. Phase I deals with the realization of a given transfer function using cascade of first and/or second-order RC-op amps circuits. In phase II, the transfer functions of filters are studied in combination with frequency-response approximations such as Butterworth, Chebyshev, Inverse-Chebyshev, Cauer (or Elliptic) and Bessel-Thompson.

**Prerequisite(s):** Electrical Engineering 469 and 471.
Courses of Instruction

Electrical Engineering 562 3 units; H(3-0)

Photovoltaic Systems Engineering
Prospect of photovoltaics in Canada; solar radiation; fundamentals of solar cell; photovoltaic system design; grid connected photovoltaic systems; mechanical and environmental considerations.

Prerequisite(s): Electrical Engineering 361.

Electrical Engineering 563 3 units; H(3-2)

Biomedical Signal Analysis
Introduction to the electrocardiogram, electroencephalogram, electromyogram, and other diagnostic signals. Computer techniques for processing and analysis of biomedical signals. Pattern classification and decision techniques for computer-aided diagnosis. Case studies from current applications and research.

Prerequisite(s): Electrical Engineering 327.

Digital Integrated Electronics
Semiconductor devices, modelling of CMOS switching, CMOS logic families, performance and comparison of logic families, interconnect, semiconductor memories, design and fabrication issues of digital IC’s.

Prerequisite(s): Computer Engineering 467.

Electrical Engineering 567 3 units; H(3-2/2)

CMOS Analog Circuit Design
Introduction to CMOS very large-scale integrated (VLSI) circuit design. Review of MOS transistor theory and operation. Introduction to CMOS circuits, CMOS processing, VLSI design methods and tools. CMOS subsystem and system design for linear integrated circuits.

Prerequisite(s): Electrical Engineering 469 and Computer Engineering 467.

Antirequisite(s): Electrical Engineering 567 and 519.47 will not be allowed.

Electrical Engineering 569 3 units; H(3-1T-3/2)

Electronic Systems and Applications
Introduction to electronic systems; the four elements of electronic monitoring systems; system modelling; sensors; amplifiers; noise characterization; power supplies; frequency conditioning; active filters; analog to digital conversion and anti-aliasing requirements; multichannel data acquisition; real-time conditioning of signals; real-time control.

Prerequisite(s): Electrical Engineering 469.

Electrical Engineering 571 3 units; H(4-1.5/2)

Digital Communications

Prerequisite(s): Electrical Engineering 471 and one of Engineering 319 or Electrical Engineering 419.

Electrical Engineering 573 3 units; H(3-1T)

Computer Networks
Overview of the network protocol stack. Reliable communications over a link; medium access; packet routing; the transport and application layers. Data and network security; Internet and telecommunications packet network architectures.

Mathematical network analysis and network performance software tools. Prerequisite(s): Engineering 319 or Electrical Engineering 419.

Antirequisite(s): Credit for Computer Science 441 and Electrical Engineering 573 will not be allowed.

Electrical Engineering 574 3 units; H(3-2/2)

Microwave Engineering
Modelling and analysis of lumped and distributed RF networks; analysis and design of passive structures; impedance matching networks; S parameters; linear modelling of transistors. Power, noise and distortion calculations for communication transceivers, analysis and design of wireless radio link and satellite communication link. Theory, analysis and design of small signal amplifiers, low noise and balanced amplifiers. Prototyping using printed circuit board technology, introduction to Computer Aided Design (CAD) tools and Computer Aided Testing Equipment.

Prerequisite(s): Electrical Engineering 476.

Antirequisite(s): Credit for Electrical Engineering 574 and 519.49 will not be allowed.

Electrical Engineering 575 3 units; H(3-1T-3/2)

Radio-frequency and Microwave Passive Circuits
Study and design of radio-frequency and microwave passive circuits such as filters, couplers, splitters, combiners, isolators, circulators; advanced transmission lines; antenna fundamentals; network analysis; advanced topics.

Prerequisite(s): Electrical Engineering 476.

Electrical Engineering 584 3 units; H(3-2)

Electrical Power Systems in Commercial and Institutional Buildings
Electrical engineering design and practice applied to the building industry; Power Distribution Components. Types of power distribution systems. Uninterruptible Power Supply and Standby power systems, Bonding and Grounding, Ground Fault Protection, Light and optics, Measurement of light, lighting engineering, and quality of visual environments is discussed. Overview of basic requirements of the National and Alberta Building Code, and the Canadian Electrical Code that most impact design including rules for life safety systems and installation procedures and requirement.

Prerequisite(s): Electrical Engineering 487.

Antirequisite(s): Credit for Electrical Engineering 584 and 519.53 will not be allowed.

Electrical Engineering 585 3 units; H(3-2/2)

Introduction to Power Electronics

Prerequisite(s): Electrical Engineering 469.

Electrical Engineering 586 3 units; H(3-2)

Power System Protection
Power System Protection philosophy, Short circuit calculation, Protective relay design fundamentals and design principles, Over-current relay co-ordination, Relay input sources, System Grounding, generator protection, Transformer Protection, Transmission line protection.

Prerequisite(s): Electrical Engineering 487.

Antirequisite(s): Credit for Electrical Engineering 586 and 519.50 will not be allowed.

Electrical Engineering 587 3 units; H(3-1T-3/2)

Power Systems Analysis
Advanced power flow studies including decoupled, fast decoupled and DC power flow analysis, distribution factors and contingency analysis, transmission system loading and performance, transient stability, voltage stability, load frequency control, voltage control of generators, economics of power generation.

Prerequisite(s): Electrical Engineering 487.

Electrical Engineering 591 3 units; H(0-6)

Undergraduate Research Thesis I
A directed studies research project in an area of interest, directed by a project advisor/faculty member. Includes an independent student component covering the scientific process, ethics, review of literature, and writing scientific proposals and manuscripts. Projects may involve experimental, analytical or computer modelling studies.

Prerequisite(s): Admission to Electrical or Software Engineering and consent of the project supervisor and course co-ordinator(s).

Electrical Engineering 592 3 units; H(0-6)

Undergraduate Research Thesis II
A directed studies research project intended for students who have completed a suitable Electrical Engineering 592 project and wish to continue the assigned project by completing a more extensive investigation. The course culminates with a written thesis and presentation. Projects may involve experimental, analytic and computer modelling studies.

Prerequisite(s): Electrical Engineering 592, admission to Electrical or Software Engineering and consent of the project supervisor and course co-ordinator(s).

Electrical Engineering 593 3 units; H(3-1T-2/2)

Digital Filters

Prerequisite(s): Electrical Engineering 327.

Electrical Engineering 594 3 units; H(0-6)

Undergraduate Research Thesis III
A directed studies research project intended for students who have completed a suitable Electrical Engineering 592 project and wish to continue the assigned project by completing a more extensive investigation. The course culminates with a written thesis and presentation. Projects may involve experimental, analytic and computer modelling studies.

Prerequisite(s): Electrical Engineering 592, admission to Electrical or Software Engineering and consent of the project supervisor and course co-ordinator(s).

Electrical Engineering 597 3 units; H(3-1T-3/2)

Power Systems Operation and Markets
Power system operation and economic load dispatch, concept of marginal cost, Kuhn-Tucker’s conditions of optimum, unit commitment, hydrothermal co-ordination, power flow analysis, optimal power flow, probabilistic production simulation, power pools and electricity markets, market design, auction models, power system reliability, primary and secondary frequency control and AGC, steady-state and transient stability, power sector financing and investment planning.

Prerequisite(s): Electrical Engineering 487, 489 or 587.

| Individual Engineering Design Project II | | | | **Notes:**
| | | | | 1. Students registering in this course should have a background in electromagnetics and basic microwave engineering.
| | | | | 3. Prerequisite(s): Consent of the Department.
| Electrical Engineering 601 | 3 units; H(3-0) |       |                   |
| Prerequisite(s): | Electrical Engineering 487 or consent of the Department. |
| Electrical Engineering 602 | 3 units; H(3-1) |       | (formerly Software Engineering for Engineers 619.71) |
| Virtual Environments and Applications | | | | Introduction to virtual reality (VR) technologies; Characterization of virtual environments; hardware and software; user interfaces; 3D interaction; research trends. Applications: medicine, manufacturing, oil and gas reservoirs, the arts, and education.
| Electrical Engineering 603 | 3 units; H(3-0) |       |                   |
| Electrical Engineering 604 | 3 units; H(3-1) |       |                   |
| System Design of Wireless Transceivers | | | | Linear and nonlinear system analysis. Radio architectures – super-heterodyne, low intermediate frequency, direct conversion, sub-sampling; receiver system analysis and design; transmitter system analysis and design. Applications of transceiver system design to satellite and wireless communications.
| Prerequisite(s): | Electrical Engineering 327 and 471. |
| Antirequisite(s): Credit for Electrical Engineering 604 and 619.38 will not be allowed. |
| Electrical Engineering 606 | 3 units; H(3-0) |       |                   |
| Antirequisite(s): Credit for Electrical Engineering 606 and 619.68 will not be allowed. |
| Electrical Engineering 609 | 1.5 units; Q(3-1) |       |                   |
| Special Topics | | | | Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member.
| MAY BE REPEATED FOR CREDIT | | | | **Notes:**
| Electrical Engineering 611 | 3 units; H(3-0) |       |                   |
| Digital Systems | | | | Introduction to digital system design for mask programmable and field programmable gate arrays. CMOS digital logic design. Flip-flop timing and metastability. Design for testability. CAD tools for digital systems design.
| Electrical Engineering 613 | 3 units; H(3-0) |       |                   |
| Nonlinear Microwave Engineering | | | | Theory, design and optimization of RF power amplification systems for wireless and satellite communication applications. A detailed treatment of linear and non-linear characterization and modeling of amplifiers/transmitters from device to system level perspective. Theory of operation as well as design techniques of linear amplifiers (class A, AB, B, C), switching mode amplifiers (class E, D and F) and balanced amplifiers are presented. Linearization and power efficiency enhancements techniques of power amplifiers/transmitters are also covered.
| Prerequisite(s): Electrical Engineering 574 or consent of the Department. |
| Antirequisite(s): Credit for Electrical Engineering 613 and 619.22 will not be allowed. |
| Electrical Engineering 615 | 3 units; H(3-0) |       | (formerly Electrical Engineering 619.16) |
| Non-linear Control | | | | Non-linear systems; phase portraits, equilibrium points, and existence of solutions. Lyapunov stability definitions and theorems. Non-linear control design; feedback linearization, sliding modes, adaptive control, backstepping and approximate-adaptive control. Frequency domain stability analysis using describing functions.
| Electrical Engineering 617 | 3 units; H(3-0) |       |                   |
| RF Integrated Circuit Design | | | | Introduction to complementary metal oxide semiconductor (CMOS) wireless communication circuits; computer-aided design; impedance matching concepts; passive circuit elements in monolithic circuits; radio frequency integrated circuit building blocks.
| Prerequisite(s): Electrical Engineering 567 or 647. |
| Antirequisite(s): Credit for Electrical Engineering 617 and 619.31 will not be allowed. |
| Electrical Engineering 619 | 3 units; H(3-1) or H(3-0) |       |                   |
| Special Problems | | | | Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member.
| MAY BE REPEATED FOR CREDIT | | | | **Notes:**
| Electrical Engineering 623 | 3 units; H(3-1) |       |                   |
| Prerequisite(s): Consent of the Department. |
| Electrical Engineering 625 | 3 units; H(3-0) |       |                   |
| Estimation Theory | | | | Fundamentals of estimation theory as applied to general statistical signal processing applications such as communication systems, image processing, target and position tracking, and machine learning. Estimator fundamentals including probability density functions, Cramer Rao bounds, Fisher information, linear and nonlinear regression, sufficient statistics, maximum likelihood estimation, minimum mean square error, least squares, Bayesian estimators and concepts. Statistical tracking filters such as Kalman filter and particle filter.
| Electrical Engineering 627 | 3 units; H(3-0) |       |                   |
| Antennas | | | | Foundations of theory and practice of modern antennas. Topics covered will include: theoretical background, antenna parameters, simple radiators, antenna array theory, wire antennas, broadband antennas, microstrip antennas, aperture radiators, base station antennas, antennas for mobile communications, antenna measurements.
| Note: Students registering in this course should have a background in electromagnetics and basic microwave engineering. |
| Electrical Engineering 629 | 3 units; H(3-0) |       |                   |
| Advanced Logic Design of Electronic and Nanoelectronic Devices | | | | Two-level and multi-level logic synthesis; flexibility in logic design; multiple-valued logic for advanced technology; multi-level minimization; Binary Decision Diagrams, Word-level Decision Diagrams, sequential and combinational equivalence checking; technology mapping; technology-based transformations; logic synthesis for low power, optimizations of synchronous and asynchronous circuits, logical and physical design from a flow perspective; challenges of design of nanoelectronic devices.
| Electrical Engineering 631 | 3 units; H(3-0) |       |                   |
| Prerequisite(s): Electrical Engineering 649. |
| Electrical Engineering 633 | 3 units; H(3-0) |       |                   |
| Note: A senior undergraduate course in wireless communications is suggested as preparation for this course. |

Courses of Instruction

**Energy and Environment, Engineering ENEE**

**Electrical Engineering 691** 3 units; H(3-0)

**Integrated Micro and Nanotechnology Sensory Systems**

Integrated circuits for sensing. The physical process of sensing photons and ions. The circuitry of signal amplification. Considerations for integrated circuit implementation. Solid state sensors and development in CMOS technology. Analog to Digital conversion in sensory arrays. Technology scaling and impact. Low voltage and implications regarding signal processing. Other types of sensors such as pH sensing. MEMS technology and applications. Integrated Light sources. System examples.

**Antirequisite(s):** Credit for Electrical Engineering 691 and 619.26 will not be allowed.

**Electrical Engineering 693** 3 units; H(3-0)

**Restructured Electricity Markets**

Basics of power systems economics, vertically integrated power monopolies, models of competition, market design and auction mechanisms, players in restructured electricity markets, generation scheduling in restructured electricity markets, perspective of large consumers, transmission operation in competitive power markets, transmission rights, the need for ancillary services in electricity markets, procurement and pricing of ancillary services, transmission and generation expansion in competitive markets.

**Prerequisite(s):** Electrical Engineering 587 or 601 or consent of the Department.

**Electrical Engineering 695** 3 units; H(3-1T)

**Applied Mathematics for Electrical Engineers**

Understanding of vector spaces and function spaces; eigenvalues and eigenvectors in both the linear algebraic and differential equation sense; special functions in mathematics; advanced methods for solutions of differential equations.

**Prerequisite(s):** Electrical Engineering 327.

**Antirequisite(s):** Credit for Electrical Engineering 695 and either 519.42 or 619.95 will not be allowed.

**Electrical Engineering 697** 3 units; H(3-2)

**Digital Image Processing**

Image formation and visual perceptual processing. Digital image representation. Two dimensional Fourier transform analysis. Image enhancement and restoration. Selected topics from: image reconstruction from projections; image segmentation and analysis; image coding for data compression and transmission; introduction to image understanding and computer vision. Case studies from applications and research.

**Prerequisite(s):** Electrical Engineering 327.

**Graduate Project**

Individual project in the student’s area of specialization under the guidance of the student’s supervisor.

**Note:** Open only to students in the MEng Courses Only Route.

**Energy and Environment, Engineering ENEE**

Instruction offered by members of the Schulich School of Engineering.

**Senior Courses**

**Energy and Environment, Engineering 355** 3 units; H(3-2T)

**Introduction to Energy and the Environment**

History of energy technologies, energetics of natural systems and agriculture, formation, extraction, and transformations of fossil fuels, renewables such as biomass, solar and wind; and the electricity system, environmental impacts of energy systems, technical options for transforming energy systems to reduce environmental impacts.

**Prerequisite(s):** Admission to the Energy Management Concentration (Haskayne School of Business) or the Engineering Energy and Environment Specialization (Schulich School of Engineering) or the Energy Sciences Concentration (Faculty of Science) or the Energy Engineering Program (Schulich School of Engineering).

**Energy and Environment, Engineering 501** 3 units; H(3-1T)

**Pollution Prevention and Control for Energy Industry**

**Prerequisite(s):** Third-year standing, or higher, in the Schulich School of Engineering.

**Energy and Environment, Engineering 503** 3 units; H(3-1T)

**Life Cycle Assessment**

Concepts of life cycle analysis. Applications to energy utilization, environmental consequences, sustainable development, environmental process analysis, and optimization. Inventory, impact and improvement analyses of energy systems. LCA Model development and utilization. Human health and safety considerations.

**Prerequisite(s):** Third-year standing, or higher, in the Schulich School of Engineering.

**Energy and Environment, Engineering 505** 3 units; H(3-1T)

**Effluent Treatment Processes for Energy Industry**

Application of fundamental engineering concepts to develop process design specifications for various unit operations and separation processes used for the treatment of gaseous (air), aqueous (wastewater) and solid effluents from mining, exploration, production, transportation and utilization of carbon-based energy sources.

**Prerequisite(s):** Chemical Engineering 331 or Mechanical Engineering 341, as well as third-year standing, or higher, in the Schulich School of Engineering.

**Energy and Environment, Engineering 507** 3 units; H(3-1T)

**Introduction to Sustainable Development**

**Antirequisite(s):** Third-year standing, or higher, in the Schulich School of Engineering.

**Energy and Environment, Engineering 519** 3 units; H(3-1T)

**Special Topics in Energy and Environment**

Current advanced topics in Energy and Environment.

**Prerequisite(s):** Consent of the CEEER Director or designate, as well as third-year standing, or higher, in the Schulich School of Engineering.

**MAY BE REPEATED FOR CREDIT**

**Energy and Environment, Engineering 573** 3 units; H(3-1T)

**Engineering Aspects of Sustainable Communities**

Ecological footprint, life cycle assessment, sustainable construction, energy efficiency in buildings, intelligent and sustainable transportation, control of water/air pollution from mobile and stationary sources, energy from waste.

**Prerequisite(s):** Third-year standing, or higher, in the Schulich School of Engineering.

**Energy and Environment, Engineering 575** 3 units; H(3-1T)

**Alternative Energy Systems**

An overview of alternative energy systems including hydroelectric, wind, solar (thermal, concentrating, and photovoltaic), distributed generation using gas turbines. Energy system performance quantified using thermodynamic, fluid mechanic, and heat transfer analysis.

**Prerequisite(s):** Engineering 311, as well as, third-year standing, or higher, in the Schulich School of Engineering.

**Energy and Environment, Engineering 577** 3 units; H(3-1T)

**Electrical Transmission System Planning and Operation**

Electricity markets, carbon markets, optimal operation of electricity systems, environmental impacts of transmission networks, regulatory issues.

**Prerequisite(s):** Third-year standing, or higher, in the Schulich School of Engineering.

**Energy and Environmental Systems EESS**

**Graduate Courses**

**Energy and Environmental Systems 601** 3 units; H(3-1T)

**Introduction to Energy and Environmental Systems**

The course provides a structured overview to the interactions of energy systems and the environment. The lectures are taught collaboratively by several EESS faculty. The course aims to foster a unified, scientific understanding of energy flows and transformations in industrial society and the natural world; a scientific overview of some of the most important links between energy and environmental systems; and an introduction to the
Courses of Instruction

**Energy Engineering ENER**

Instruction offered by members of Schulich School of Engineering.

**Junior Courses**

**Energy Engineering 200** 3 units; H(3-3)

**Engineering Design and Innovation**

An interdisciplinary course involving the application of engineering principles, design innovation tools and sustainability tools, life-cycle assessment, and leadership concepts through a sequence of team-based design projects.

**Prerequisite(s):** Admission to the BSc Energy Engineering program.

**Antirequisite(s):** Credit for Energy Engineering 200 and Engineering 200 will not be allowed.

**Energy Engineering 240** 3 units; H(4-3)

**Introductory Dynamics for Energy Engineering**

Calculus with applications to dynamics. Kinematics of particles undergoing rectilinear and curvilinear motion. Analysis of the kinetics of particles by direct use of Newton’s laws of motion, work and energy methods, and impulse and momentum methods.

**Prerequisite(s):** Admission to the BSc Energy Engineering program.

**Energy Engineering 260** 3 units; H(3-2)

**Statics for Energy Engineering**

Engineering Statics topics: force vectors; equilibrium of a particle in two and three dimensions; force system resultants; equilibrium of a rigid body in two and three dimensions; trusses; frames and machines. Vector and linear algebra methods and applications to static engineering mechanics.

**Prerequisite(s):** Admission to the BSc Energy Engineering program.

**Senior Courses**

**Energy Engineering 300** 3 units; H(3-3)

**Engineering Design and Energy Policy**

Introduction to the mechanical, petroleum, and energy engineering profession, fundamentals of energy engineering design, testing, and product development; problem solving skills development; oil and gas standards, intellectual property protection, project management; regulatory issues; public policy. Case studies and projects may be drawn from a range of energy engineering areas.

**Prerequisite(s):** Admission to the BSc Energy Engineering program.

**Energy Engineering 340** 3 units; H(3-3)

**Dynamics for Energy Engineering I**

**Prerequisite(s):** Energy Engineering 240 and admission to the BSc Energy Engineering program.

**Energy Engineering 350** 3 units; H(3-3)

**Computing Tools for Energy Engineers**

The application of computer tools to solve practical Energy Engineering problems; fundamentals of engineering computing including algorithm development; selection of appropriate tools, documentation of solutions, and verification and interpretation of results; applications using engineering analysis and spreadsheet tools; numerical methods; fundamentals of engineering graphics and computer-aided design including technical drawing conventions used in the energy industry, dimensioning and tolerances; applications using Computer-Aided Design (CAD) software.

**Prerequisite(s):** Admission to the BSc Energy Engineering program.

**Energy Engineering 360** 3 units; H(3-2)

**Mechanics of Materials for Energy Engineering**

**Prerequisite(s):** Energy Engineering 240, 260 and admission to the BSc Energy Engineering program.

**Energy Engineering 400** 3 units; H(3-3)

**Engineering Design and Economics**

Design of chemical and oil & gas processing units and plants; cost estimates and chemical process economics; identifying market needs and commercialization considerations; Safety and environmental considerations in process design; critical thinking and problem solving skills development; case studies and projects may be drawn from a range of energy engineering areas.

**Prerequisite(s):** Energy Engineering 300 and admission to the BSc Energy Engineering program.

**Energy Engineering 425** 3 units; H(3-1T-2)

**Electricity, Magnetism and Electrical Circuits**

Electric charges and electric current; Ohm’s Law, Kirchhoff’s Laws, application to simple circuits. Definitions of electric and magnetic fields. Introduction to circuit theory: DC circuits, amplifiers, operational amplifiers, single and three phase AC circuits. Introduction to basic electronic devices. Applications of mathematics to circuit analysis including solving systems of linear equations, first order derivatives and integrals, and complex numbers and arithmetic.

**Prerequisite(s):** Energy Engineering 240 and 260 and admission to the BSc Energy Engineering program.

**Energy Engineering 460** 3 units; H(3-1T)

**Dynamics for Energy Engineering II**

Planar kinematics and kinetics of rigid bodies; work, energy, impulse and momentum of rigid bodies; kinematics, statics, and dynamics of planar mechanisms; design of cams, gears, and gear trains.

**Prerequisite(s):** Energy Engineering 240 and 260 and admission to the BSc Energy Engineering program.

**Energy Engineering 480** 3 units; H(3-1T-3/2)

**Energy Engineering Fluid Mechanics**

Basic principles of mechanics of fluids; properties of fluids; fluids at rest; manometers and other pressure measuring devices; dimensional analysis; the laws of conservation of mass and momen-
Courses of Instruction

Energy Management ENMG

Overview of the Alberta Oil and Gas Industry
Provides an understanding of the upstream petroleum industry and will focus on the development of petroleum resources by Alberta-based corporations. Analysis of shale gas and oil development will be included.

Prerequisite(s): Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents) including Energy Management 301.

Energy Management 403
3 units; H(3-0)

Energy Management 465
3 units; H(3-0)

Oil and Gas Marketing
Practical introduction to crude oil (light and heavy) and natural gas marketing. Marketing of refined oil products is not covered.

Prerequisite(s): Admission to the Haskayne School of Business and Finance 317.

Energy Management 487
3 units; H(3-0)

Energy Risk Management
Provides an overview of key issues related to energy risk management. Some of the key topics to be addressed are: managing pricing risks associated with changing market conditions and deregulation; tools used to manage volatility, including futures and options for energy risk management; environmental risk management, and risk financing for the energy sector.

Prerequisite(s): Admission to the Haskayne School of Business and Finance 317.

International Energy Projects
A focus on international energy development, energy contracts, sustainable development, and the management of environmental and corporate social responsibility issues.

Prerequisite(s): Admission to the Haskayne School of Business.

Engineering ENGG

Instruction offered by members of Schulich School of Engineering.

Junior Courses

Engineering 200
3 units; H(3-1S-3)

Engineering Design and Communication
An interdisciplinary course involving the application of engineering principles, design, communications, leadership and project management concepts through a sequence of team-based design projects.

Antirequisite(s): Credit for Engineering 200 and any of Engineering 251, 253 or Energy Engineering 200 will not be allowed.

Engineering 201
3 units; H(1.5T-3/2)

Behaviour of Liquids, Gases and Solids
An introduction to the behaviour of fluids and solids; phase transformations, the phase rule and phase diagrams. Ideal and real gases; equations of state and their engineering applications; simple kinetic theory; transport properties of fluids. Liquid state; vapor pressure; shear behaviour; flow of fluids in pipelines. Solids; crystalline and non-crystalline structure; non-equilibrium solid phases; electrical and thermal conductivity; dislocations; stress and strain; creep; fracture.

Antirequisite(s): Credit for Engineering 201 and either Engineering 251 or 253 will not be allowed.

Engineering 225
3 units; H(4-3/2)

Fundamentals of Electrical Circuits and Machines
Current, voltage and power; Kirchhoff’s current and voltage laws; capacitors; electricity and magnetism fundamentals applied to circuit elements and machines; inductors; topics in electrical circuits and systems; instrumentation; circuit design, DC and AC circuit analysis methods; DC and AC machines; first order circuits and transient analysis.

Antirequisite(s): Credit for Engineering 225 and any of Engineering 325, Biomedical Engineering 327 or Electrical Engineering 341 will not be allowed.

Engineering 233
3 units; H(3-2)

Computing for Engineers
Overview of computer systems. Functions of software components: operating systems, editors, compilers. Programming in a high-level language: selection and loop structures, routines, array and record types, text file operations. Introduction to object-based programming: use of class libraries and construction of simple classes.

Antirequisite(s): Credit for Engineering 233 and any of Computer Science 217, 231, 235, or Computer Engineering 339 will not be allowed.

Senior Courses

Engineering 311
3 units; H(3-1.5T-3/2)

Engineering Thermodynamics
Energy, thermodynamic systems, properties and state, temperature and the zeroth law, equilibrium, properties of the pure substance, equations of state. Work, reversibility, heat, first law, specific heats, entropy, ideal gas, flow systems, Entropy and the second law, Carnot cycle, thermodynamic temperature scale, process efficiencies, cycles, calculation of entropy change, exergy analysis.

Prerequisite(s): Engineering 201 and one of Mathematics 275 or Applied Mathematics 217 or Energy Engineering 240.
Courses of Instruction

Engineering 317 3 units; H(3-1.5T-3/2)

Mechanics of Solids
Axial-force, shear-force and bending moment diagrams; stress and strain; stress-strain relations; elastic and plastic behaviour; elastic constants; simple statically indeterminate (one-degree) problems; review of moment of inertia, product of inertia and principal axes of inertia; elastic torsion of circular shafts; elastic and plastic bending about principal axes of beams with symmetrical cross-section; composite beams; shear stresses due to bending; Mohr’s circle for stress; thin-walled pressure vessels; deflection of beams by integration; Euler buckling.
Prerequisite(s): Engineering 202 and Mathematics 275 or Applied Mathematics 217.

Engineering 319 3 units; H(3-1.5T)
Probability and Statistics for Engineers
Presentation and description of data, introduction to probability theory, Bayes’ theorem, discrete and continuous probability distributions, estimation, sampling distributions, tests of hypotheses on means, variances and proportions, simple linear regression and correlation. Applications are chosen from engineering practice.
Prerequisite(s): Mathematics 277 or Applied Mathematics 219 or Energy Engineering 240.
Antirequisite(s): Credit for Engineering 319 and Biomedical Engineering 319 will not be allowed.
Note: Credit towards degree requirements will be given for only one of Engineering 319, Political Science 399, Psychology 300, 301, 312, Sociology 311, Statistics 205, 213 and 217, 227; that one being a course(s) appropriate to the particular degree program.

Engineering 349 3 units; H(3-1.5T)
Dynamics
Prerequisite(s): Engineering 202 and Mathematics 275 or Applied Mathematics 217; and Mathematics 277 or Applied Mathematics 219.

Engineering 391 1.5 units; Q(1-0)
Advanced Topics I
Special topics in engineering and engineering complementary studies.
Prerequisite(s): Consent of the Associate Dean (Academic & Planning).
MAY BE REPEATED FOR CREDIT

Engineering 393 3 units; H(3-0)
Advanced Topics II
Special topics in engineering and engineering complementary studies.
Prerequisite(s): Consent of the Associate Dean (Academic & Planning).
MAY BE REPEATED FOR CREDIT

Engineering 407 3 units; H(3-2T)
Numerical Methods in Engineering
The theory and use of numerical computational procedures to solve engineering problems. Methods for: solution of non-linear equations, solution of simultaneous linear equations, curve fitting, solution of the algebraic eigenvalue problem, interpolation, differentiation, integration, solution of ordinary differential equations and solution of partial differential equations are included. The tutorial includes the application to elementary problems and the computer solution of comprehensive engineering problems.
Prerequisite(s): Engineering 233 and Mathematics 375 or Applied Mathematics 307.

Engineering 481 3 units; H(3-1.5S)
Technology and Society
An interpretive course on the interrelationship between technology and society. The first part of the course surveys significant historical developments within disciplinary areas such as energy, materials, production processes, structures, transport, communications, and computation. Sequence within each area: discovery, development, application, impact, future. Social and economic consequences are also considered. The latter part of the course explores contemporary problems of society and technology.
Note: Available to students registered in other faculties as well as third-year or fourth-year engineering students. This course does not presuppose any formal background in Engineering or Science.

Engineering 501 3 units; H(0-4)
Senior Capstone Design Project I
A team-based design course in which students apply the knowledge and skills acquired in earlier courses while refining their skills in teamwork and project management. Students work towards innovative, solutions to industry-sponsored design projects, and engage in individual critical reflection on their course activities, team performance, and on their growth as an engineering designer within their undergraduate program.
Prerequisite(s): Fourth-year standing or above.
Note: Engineering 501 and 502 are a required two-course sequence that shall be completed in the same academic year.

Engineering 502 3 units; H(0-4)
Senior Capstone Design Project II
A continuation of the capstone design project, where student teams build on their design work in Part I.
Prerequisite(s): Engineering 501.
Note: Engineering 501 and 502 are a required two-course sequence that shall be completed in the same academic year.

Engineering 503 3 units; H(0-4)
Entrepreneurial Capstone Design Project I
A team-based design course in which students apply the knowledge and skills acquired in earlier courses while refining their skills in teamwork and project management. Students work towards innovative solutions to design projects with an entrepreneurial focus, and engage in individual critical reflection on their course activities, team performance, and on their growth as an engineering designer within their undergraduate program.
Prerequisite(s): Fourth-year standing or above.
Note: Engineering 503 and 504 are a required two-course sequence that shall be completed in the same academic year.

Engineering 504 3 units; H(0-4)
Entrepreneurial Capstone Design Project II
A continuation of the entrepreneurial capstone design project, where student teams build on their design work in Part I.
Prerequisite(s): Engineering 503.
Note: Engineering 503 and 504 are a required two-course sequence that shall be completed in the same academic year.

Engineering 513 3 units; H(3-0)
The Role and Responsibilities of the Professional Engineer in Society
Prerequisite(s): Third-year standing or above.

Project Management for Engineers
Covers the application of project management principles such as planning, scope development, design, procurement, construction, commissioning and start-up to engineering projects. Class reviews aspects of a current major engineering projects and case studies.

Engineering 517 3 units; H(3-0)

Engineering Safety
Introduction to Professional Responsibility, Risk Management and Identification, Process Safety Management. Incident Investigation and Reporting; Engineering Ethics and Public Safety; Key national safety codes, standards and regulations, Business case for safety, and common best practices, fundamentals of Crisis and Emergency Management, change management to successful incorporation of safety into teams and the design process; Engineering Discipline specific Engineering Safety Management including Electrical Safety, Chemical Safety, Fire, Dust Hazard and Explosions, and Biological Risks.

Engineering 519 3 units; H(3-2) or H(3-0)

Special Topics in Engineering
Current topics in Engineering.
Prerequisite(s): Consent of the student’s department.
MAY BE REPEATED FOR CREDIT

Engineering 521 3 units; H(3-1.5T)
Art and Engineering
Focuses on history, concepts, contemporary issues, and techniques of engineering in art. Topics may include Arithmetic and Geometry, Proportion, Formalism, Symmetry, Computation, Geometric Abstraction, and Mathematics as they relate to historical, theoretical and critical contexts in Art. Students will gain experience and a working knowledge of concept development and construction of an engineering-inspired art project.

Engineering 523 3 units; H(3-1.5T)
Bio-inspired Engineering
Engineering can take inspiration from nature to develop new products, processes, and systems, or improve existing designs. Topics in this course include design by analogy, functional biology, principles and techniques of biomimicry and bio-inspired engineering methods, and bio-inspired computation. Students will gain experience and a working knowledge of ideation, concept development and will model and create a bio-inspired engineering project.

Engineering 599 3 units; H(0-6)
Individual Engineering Project
Individual work on an assigned Engineering project under the supervision of a faculty member. The project will normally involve a literature review,
Courses of Instruction

theoretical work, and laboratory or field work. Engineering Communications, including written reports, logbooks and oral presentations.

Prerequisite(s): Consent of the project supervisor and the student's department.

Graduate Courses

Engineering 601 1.5 units; Q(3S-0)

Professional Development I

Topics covered include: health and safety, communication styles, supervisory relationships and respect in the lab, presentation skills including presentation planning and voice projection, reference gathering and management, awareness of plagiarism, and writing abstracts.

NOT INCLUDED IN GPA

Engineering 603 1.5 units; Q(3S-0)

Professional Development II

Topics covered include: presentation skills, skills for writing scientific manuscripts, peer review process, defense and candidacy, engineering design, intellectual property, and networking basics.

NOT INCLUDED IN GPA

Engineering 681 3 units; H(3-2)

Engineering Tools

The theory and use of numerical computational procedures to solve engineering problems.

Engineering 682 3 units; H(3-0)

Sustainability

Explores the interaction between resources and the environment. Technical and environmental aspects within the environment and energy cycle for project evaluation and management.

Antirequisite(s): Credit for Engineering 682 and Civil Engineering 693 will not be allowed.

Engineering 683 3 units; H(3-3)

Innovation and Entrepreneurship

Definitions, contexts, language, dynamics, historical and contemporary examples of Engineering Innovation and Entrepreneurship; innovation process from a multidisciplinary perspective; Engineering inventive processes.

Engineering 684 3 units; H(3-3)

Introduction to Project Management

Application of management principles to the project environment; planning, control, scope, time and cost processes; project organization and human resource issues. Students review aspects of a current major capital project and submit and defend a project report.

English 203 3 units; H(3-0)

Introductory Seminar

An intensive introduction to the field of English emphasizing critical reading and writing as well as discussion. Expectations for writing and research will be higher than in other junior English courses.

Antirequisite(s): English 201.

Note: Enrolment may be limited to declared English majors and minors.

English 205 3 units; H(1.5-1.5S)

Foundations: Shakespeare

Selected works of William Shakespeare, with instruction in critical writing.

Antirequisite(s): Credit for English 205 and 311 will not be allowed.

English 265 3 units; H(1.5-1.5S)

Introductory Creative Writing

Instruction in the rudiments of craft for poetry, scripts, and fiction, emphasizing the centrality of reading and revision to literary composition.

Note: Does not count toward the "Creative Writing concentration" transcript designation. Primarily intended for students planning to take further courses in Creative Writing.

Senior Courses

English 302 6 units; F(3-0)

Introduction to Contemporary Theory

An examination of the claims and assumptions of a range of contemporary critical practices, such as formalism, structuralism, deconstruction, feminism and gender studies, new historicism, psychoanalytic criticism, and cultural and ideological critique. Includes sustained engagement with original theoretical texts.

Prerequisite(s): 6 units of English.

Note: Students with prior credit in English 302 will not be allowed to take 303.

English 303 3 units; H(3-0)

Theories for Reading

An examination of contemporary critical and cultural theories and their practical applications to reading. Students will learn models of critical reading and gain experience applying them to a variety of literary and cultural texts.

Antirequisite(s): Credit for English 303 and 302 will not be allowed.

Note: Students with prior credit in English 303 will not be allowed to take 303. Students are permitted to take English 303 prior to 302.

English 305 3 units; H(1.5-1.5S)

Literature Before 1700

A survey of representative works of literature in English from the Middle Ages through 1700.

Prerequisite(s): 6 units of English.

Antirequisite(s): Credit for English 305 and 340 will not be allowed.

English 307 3 units; H(1.5-1.5S)

Literature After 1700

A survey of representative works of literature in English from 1700 to the Present.

Prerequisite(s): 6 units of English.

Antirequisite(s): Credit for English 307 and 340 will not be allowed.

English 309 3 units; H(3-0)

Literature and the Environment

An examination of the field of nature writing, environmental literature and ecological literary criticism.

Antirequisite(s): Credit for English 309 and any of 383, 387.03 or 387.30 will not be allowed.

English 311 3 units; H(3-0)

Shakespeare and Performance

A consideration of Shakespeare's plays that pairs representative works with stage and/or film adaptations.

Antirequisite(s): Credit for English 311 and 205 will not be allowed.

English 322 3 units; H(3-0)

Comics

An examination of the formal, historical, and social aspects of comics (comic strips, comic books, and graphic novels). Topics to be examined include the historical development of the comic form; formal analysis of the properties of comics; and the significance of comics in the contemporary media landscape.

Antirequisite(s): Credit for English 322 and 388.04 will not be allowed.

English 335 3 units; H(3-0)

Creative Writing and Reading Like a Writer

Introduction to reading from a writerly perspective as an early but important step in the development of writing practice.

English 336 3 units; H(3-0)

Introduction to Creative Writing Practice

An introduction to the elements of creative writing as the basis of an artistic practice.

336.01 Poetry
336.02 Fiction
336.03 Popular Writing
336.04 Across the Genres

Antirequisite(s): Credit for English 364 and 336.01 will not be permitted; credit for English 336.02 and 366 will not be permitted.

English 351 3 units; H(3-0)

Poetry: Reading and Analysis

A study of poetic forms in English from a wide range of historical periods, social contexts, and national literatures. Through textual analysis and close reading, acquaints students with the characteristic techniques of prosody and basic poetic terminology, giving detailed attention to tropes and figures along with other poetic concepts such as form, tone, diction, implication, and point of view.

Note: This course cannot be used by Majors or Honours students to fulfill historical breadth requirements.

English 353 3 units; H(3-0)

Drama: Reading and Analysis

A study of dramatic literature in English from a wide range of historical periods, social contexts, and national literatures. Through textual analysis and close reading, acquaints students with the characteristic techniques of dramaturgy and basic theatrical terminology, giving detailed attention to the formal conventions of literature written to be performed on stage.

Note: This course cannot be used by Majors or Honours students to fulfill historical breadth requirements.
English 361 3 units; H(3-0)

**Gender and Sexuality in Literature**

Reading and analysis of gender and sexuality in literature. Topics may include queer theory, feminism and women’s writing; masculinity; trans-gender fictions and theory; gender and sexuality across regions, cultures, and/or historical periods; intersectionality with, for instance, critical race theory, disability studies, and/or indigeneity.

Antirequisite(s): Credit for English 361 and any of 317, 384 or 389 will not be allowed.

English 372 3 units; H(3-0)

**Canadian Literature**

A broad historical survey of Canadian writing from its origins to the present. An introduction to major writers and creative voices in Canada, as well as to significant critical and cultural ideas that have developed about this nation’s literature.

English 376 3 units; H(3-0)

**North American Indigenous Literatures**

An overview of writing by North American Indigenous Peoples with a focus on authors from Canada.

Antirequisite(s): Credit for English 376 and 385 will not be allowed.

English 378 3 units; H(3-0)

A comparative overview of literature from a range of regions around the world. May include an examination of post-colonial, diasporic, and globalization theories.

Antirequisite(s): Credit for English 378 and 391 will not be allowed.

English 381 3 units; H(3-0) (Linguistics 381)

**The History of English**

An examination of important changes and stages in the history of English including its Indo-European and Germanic origins and a consideration of Modern English grammar and orthography from a historical perspective.

Prerequisite(s): Linguistics 201.

English 382 3 units; H(3-0)

**Topics in American Literature**

MAY BE REPEATED FOR CREDIT

English 387 3 units; H(3-0)

**Current Topics in English Studies**

Selected topics attantive to current and emergent research directions in the discipline.

MAY BE REPEATED FOR CREDIT

English 388 3 units; H(3-0)

**Topics in Reading Popular Culture**

Selected topics in popular culture across media, genres, time, and regions. Examination of popular texts as sites of cultural meaning and socio-political intervention and learn to discuss their significance. Topics may include fan culture; television; film; music; performance; adaptation; the intersection of high and low culture; gaming; food; social media; and sport.

MAY BE REPEATED FOR CREDIT

English 393 3 units; H(3-0)

**Speculative Fiction I: Science Fiction**

Survey of the genre of science fiction, from its origins to the present

English 395 3 units; H(3-0)

**Speculative Fiction II: Fantasy**

A survey of the genre of fantasy literature. May include works from a range of historical and national contexts.

English 396 3 units; H(3-0)

**Literature for Young People**

A historical survey of children’s and young adult literature from its origins to the present day.

English 399 3 units; H(3-0)

**Detective Fiction**

A survey of the genre of detective fiction. May include works from a range of historical and national contexts.

English 401 3 units; H(3-0)

**Old English Language and Prose Literature**

A study of the language of the Anglo-Saxons through reading of prose texts.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 403 3 units; H(3-0)

**Old English Poetry**

Reading and analysis of Old English poetry in the original language.

Prerequisite(s): English 401.

English 405 3 units; H(3-0)

**Middle English Literature: The Canterbury Tales**

A study of Geoffrey Chaucer’s Canterbury Tales in its social, cultural and historical contexts. Texts will be read in the original language and the course will include instruction in Middle English.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 406 3 units; H(3-0)

**Middle English Literature: Selected Works**

A study of selected works of Middle English poetry, prose and drama (excluding Geoffrey Chaucer’s Canterbury Tales) in their social, cultural and historical contexts. Texts will be read in the original language and the course will include instruction in Middle English.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 410 3 units; H(3-0)

**Renaissance Literature and Culture I**

A study of representative literary works from the reign of Henry VIII to Elizabeth I. Will be examined in their cultural and historical contexts. May include works by such authors as John Skelton, Sir Thomas More, Thomas Wyatt, Christopher Marlowe, Elizabeth I, Edmund Spenser, and William Shakespeare.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 411 3 units; H(3-0)

**Renaissance Literature and Culture II**

A study of representative literary works from the reigns of James I, and Charles I, and the English Civil War will be examined in their cultural and historical contexts. May include works by John Donne, George Herbert, Mary Wroth, Amelia Lanyer, Andrew Marvell and John Milton.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 412 3 units; H(3-0)

**Early English Drama**

A study of representative dramatic works from the emergence of the genre to 1660 will be examined in their relevant historical contexts. Includes texts from the medieval, Tudor, and Elizabethan periods.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 413 3 units; H(3-0)

**Shakespeare and his Contemporaries**

An examination of the drama of the seventeenth century, examining works written for both public and private theatres as well as for court performance. Will include plays from major writers of the period such as William Shakespeare, Ben Jonson, and Thomas Middleton.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 422 3 units; H(3-0)

**Advanced Studies in Comics**

Considers the role and nature of comics (comic strips, comic books, graphic novels) as a distinct form. Topics may include the influence of comics genres; the relationship of comics to other art forms (including literature); major authors; and distinct historical or national cartooning traditions.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

MAY BE REPEATED FOR CREDIT

English 426 3 units; H(3-0)

**Selected Topics in Contemporary Theory**

Advanced study in contemporary literary or cultural theory with a focus on a particular school, author, or approach.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

Antirequisite(s): Credit for English 426 and 483 will not be allowed.

English 429 3 units; H(3-0)

**Eightheenth-Century Poetry**

An examination of the major poetic forms of the long eighteenth century with an emphasis on tradition and innovation in poetic techniques. Includes such authors as John Wilmot, Earl of Rochester; John Dryden; Aphra Behn; Alexander Pope; Jonathan Swift; Samuel Johnson; Thomas Gray; Stephen Duck; Ann Yearsley; Mary Collier; Mary Leapor; and Phillis Wheatley.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

MAY BE REPEATED FOR CREDIT

English 431 3 units; H(3-0)

**Restoration Voices**

An exploration of the diverse literary and cultural productions of England during the years 1660-1700 with an emphasis on both court and common spheres. Topics may include the reopening of the theatres; professional women writers; transatlantic conversations and encounters with indigeneity; newspapers and broadsides; comedy and satire; medicine and science; political and religious dissent; sexuality and gender; town versus country debates; and coffee house culture.

Prerequisite(s): 12 units of courses labelled English at 300 level or above.

</table>
Courses of Instruction

English 495 3 units; H(3-0)

Studies Across Literary History
A historical or transhistorical examination of a literary theme, genre, form, and/or writing and publication practice.
Prerequisite(s): 12 units of courses labelled English at 300 level or above.

English 499 3 units; H(3-0)

Topics in a Selected Author
Advanced study of a selected author. A close look at one writer’s oeuvre in social, historical, or theoretical contexts.
Prerequisite(s): 12 units of courses labelled English at 300 level or above.
MAY BE REPEATED FOR CREDIT

English 504 6 units; F(3S-0)

Honours Project
Capstone seminar for English Honours students focusing on research methods and professional issues. Supports and includes the writing of the Honours thesis.
Prerequisite(s): 6 units of English at the 400 level, admission to the English Honours program and consent of the Department.
Note: Students are advised to consult with the English Department for information and advice by January 31 of the year in which they plan to register in English 504. See the departmental website for more information.

English 508 3 units; H(3S-0)

Advanced Seminar in a Literary Genre
An in-depth examination of a select literary genres in a critical context. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 509 3 units; H(3S-0)

Advanced Seminar in Canadian Literature
An in-depth examination of a topic in Canadian literature in its critical context. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 515 3 units; H(3S-0)

Advanced Seminar in Global/Indigenous Contexts
Advanced study of a particular topic in post-colonial, transnational, diasporic, and/or indigenous literary studies, with an emphasis on theoretical context. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 517 3 units; H(3S-0)

Advanced Seminar in Theoretical and Cultural Studies
An in-depth examination of a topic involving advanced theoretical inquiry. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 519 3 units; H(3S-0)

Advanced Seminar in a Historical Topic
An in-depth examination of historical literary or cultural texts in a critical context. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 520 3 units; H(3-0)

Community Engagement Through Literature
Combines classroom and community-based learning undertaken in association with the Calgary Public Library or other associated non-profit organizations that promote engagement with literature.
Prerequisite(s): Consent of the Department.
Note: Enrolment to this course is by application and subject to departmental approval.

English 523 3 units; H(3S-0)
(formerly English 521)

Advanced Seminar in Book and Digital Culture
Advanced topics in book history, digital humanities, and new media.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 525 3 units; H(3S-0)

Advanced Seminar in a National or Transnational Literature
An in-depth examination of a national or transnational author, genre, or issue in a critical context. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 527 3 units; H(3S-0)

Advanced Seminar in a Selected Author
An in-depth examination of a selected author in a critical context. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 529 3 units; H(3S-0)

Advanced Seminar in Popular/Experimental Genres
An in-depth examination of works or author that operate outside the traditional literary canon. May include the study of such topics as new or emergent literary forms; the cultural products of fan or digital culture; comics; bestselling genres such as true crime, fantasy, or romance; art books; and formally experimental literature in a historical or contemporary context. Students will learn to develop research questions and conduct original research.
Prerequisite(s): 6 units of English at the 400 level.
MAY BE REPEATED FOR CREDIT

English 591 3 units; H(3S-0)

Studies in Creative Writing: Poetry
A close examination and discussion of the student’s own work, with emphasis on advanced technique.
Prerequisite(s): Consent of the Department.
Note: One month before the class begins, prospective students must submit a portfolio of their own work for evaluation before consent to register for this course will be given. Details of this procedure are available from the Department of English.
MAY BE REPEATED FOR CREDIT

English 594 3 units; H(3-0)

Studies in Creative Writing: Prose Fiction
A close examination and discussion of the student’s own work, with emphasis on advanced technique.
Prerequisite(s): Consent of the Department.
Note: One month before the class begins, prospective students must submit a portfolio of their own work for evaluation before consent to register for this course will be given. Details of this procedure are available from the Department of English.
MAY BE REPEATED FOR CREDIT

English 598 6 units; F(3-0)

The Book-Length Manuscript
A close examination and discussion of the student’s own work, with emphasis on advanced technique.
Prerequisite(s): Consent of the Department.
Note: One month before the start of classes, prospective students must submit a portfolio of their own work for evaluation before consent to register for this course will be given. Details of this procedure are available from the Department of English. Recommended preparation for English 598 is dependent on genre.
MAY BE REPEATED FOR CREDIT

Graduate Courses

English 603 3 units; H(3S-0)

Topics in Genre
Specialized study of a topic involving a single genre or multiple genres.
MAY BE REPEATED FOR CREDIT

English 605 3 units; H(3S-0)

Topics in National or Transnational Literatures

Courses of Instruction

Entrepreneurship and Innovation 735  
3 units; H(3-0)

Cultivating Entrepreneurship and Innovation
Designed to leverage innovative and effective ideas so as to take advantage of opportunities, effectively incorporate innovation and entrepreneurship throughout the organization, and create an environment where new ideas that add value must be an organizational priority.

Prerequisite(s): Admission to the Doctor of Business Administration program.

Entrepreneurship and Innovation 781  
3 units; H(3-0)

Introduction to Entrepreneurship
An experience-based course covering the prestart-up stage of business development through group projects and case studies designed to provide experience-based skill development in creativity, idea generation, and feasibility analysis.

Entrepreneurship and Innovation 783  
3 units; H(3-1)

Opportunity Development
A project- and case-based course designed to explore concepts of opportunity development.

Entrepreneurship and Innovation 785  
3 units; H(3-0)

Venture Development
A project-based course designed around the formation of business concepts in the formalization of a business plan.

Entrepreneurship and Innovation 789  
3 units; H(3-0)

Applied Business Analysis
Approaches to advising new and existing ventures on effective venture development. Projects will involve the student conducting analysis of several ventures and providing advice to them.

Prerequisite(s): Marketing 601 or consent of the Haskayne School of Business.

Entrepreneurship and Innovation 797  
3 units; H(3-0)

Seminar in Entrepreneurship and Innovation
Study and discussion of current research literature and contemporary issues on topics related to Entrepreneurship and Innovation.

MAY BE REPEATED FOR CREDIT

Environmental Design EVDS
The following list of courses, offered by members of the Faculty of Environmental Design and members of other departments in the University, is specific to this academic year. Students are advised that some of the courses listed below may not be offered every year depending upon circumstances. Students should consult with the EVDS Graduate Program Administrator before registering in the following courses.

Environmental Design 401  3 units; H(3-0)

Introduction to Environmental Design
An examination of the central concepts of environmental design, delivered in an online format. Topics include: the natural, built and human environments, and interdisciplinary issues.

Environmental Design 523  3 units; H(3-0)

Sustainability in the Built Environment
The principle of sustainability recognizes people as temporary stewards of their environments, working toward a respect for natural systems and a higher quality of life. Examination of the built environment and the tools to achieve a stable and balanced and a regenerative ecosystem in a process of responsible consumption, wherein waste is minimized and the built environment interacts with natural environments and cycles. Healthful interior environments, resource efficiency, ecologically benign materials, renewable energies and social justice issues are examined. 

Prerequisite(s): Credit for Environmental Design 520 or Architectural Studies 423 will not be allowed.

Environmental Design 583  3 units; H(3-0)

Special Topics in Environmental Design
Thematic inquiry and design related to environmental design topics.

MAY BE REPEATED FOR CREDIT

Environmental Design 597  1.5 units; Q(3-0)

Special Topics in Environmental Design
Thematic inquiry and design related to environmental design topics.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Environmental Design 601  3 units; H(3-0)

Conceptual Bases of Environmental Design
Conceptual frameworks in Environmental Design and theories related to design and environment that influence environmental design thinking, research, and practice.

Note: Students are strongly encouraged to complete Environmental Design 601 prior to entering their second registration year.

Environmental Design 603  3 units; H(0-8)

Introduction to Design Thinking
Foundation concepts in design and form making involving a sequence of progress skill building, visual and spatial thinking and problem solving exercises.

Antirequisite(s): Credit for Environmental Design 603 and Environmental Design Architecture 580 will not be allowed.

Environmental Design 616  3 units; H(3-0)

Urban Infrastructure and Land Use
Acquaints students with the key infrastructure systems of a city. Examines current policies, standards and practices, challenges, and innovations in the following infrastructure sectors: water, sewage, waste management, open space, energy, transportation, and communication. Discusses the relationship between infrastructure systems and land use, and its impacts on quality of life, economic development, spatial structure, and the environment. Emphasis is given to green infrastructure development. The course also examines various financial and institutional frameworks for delivering infrastructure systems, and how they vary across different contexts.

Environmental Design 620  6 units; F(0-8)  
(formerly Environmental Design 618)

Urban Design Studio
This studio aims to further develop skills in conceptualization and visualization through consideration of contemporary urban design issues. It includes documentation and analysis of urban form and process, and explores site planning and design of the public realm. Issues of local and regional identity and sustainability inform the approach of the studio.

Prerequisite(s): Environmental Design Planning 636 or Environmental Design Landscape 667.

Environmental Design 621  3 units; H(3-0)

Health in the Built Environment
Concepts of health in an environmental context; historic approaches to preventative medicine; medical basis of building-related illness; case studies in indoor air quality; strategies for prescription and design of healthy indoor environments.

Environmental Design 622  3 units; H(3-0)

Real Estate Development and Finance
Focuses on the principles of real estate development and finance. Provides hands-on experience through real-world simulations and case studies. Goal is for students to gain a basic understanding of the planning process in real estate development, including private public partnerships, and development impacts. Introduces fundamental tools for
conducting an economic and fiscal analysis of real estate proposals. Students will have an opportunity to develop a pro forma as part of a risk assessment. Other topics include the use of GIS for location studies and market assessment.

Environmental Design 624 3 units; H(3-0)

Impact Assessment and Risk Management
EIA is the process of identifying, predicting, evaluating and mitigating the environmental effects of development proposals prior to major decision-making. Biophysical, economic and social impact assessment will be reviewed in an integrated, interdisciplinary approach which will include lectures, studies of methodologies, theory and practical problems, and discourse with practitioners. Federal and various Provincial environmental impact assessment policies and procedures will be critically analyzed.

Environmental Design 628 3 units; H(3-0)

Housing and Neighbourhood Change
Considers urban growth management, affordable housing, suburban growth and inner-city redevelopment, infrastructure development patterns, as well as current municipal goals regarding density and intensification and precedents/best practices. Theoretical understanding and practical insights into these issues through an assessment of the social, economic, and spatial aspects related to housing and neighbour change.

Environmental Design 630 3 units; H(3-0)

Geography of Crime
Introduces the fields of environmental criminology and the social and geographic aspects of crime. Explores the reasons why certain neighbourhoods, and certain features of neighbourhoods, tend to promote or discourage criminal activity. Special emphasis is placed upon the relationship between crime and the environment, crime prevention, spatial dynamics of crime, the criminality of place and the decision processes involved in criminal events. Ethical considerations and privacy aspects will be addressed throughout.

Prerequisite(s): Admission to the Certificate in Designing Smart and Secure Communities.

Environmental Design 632 3 units; H(3-0)

Designing Safe Communities
Based on the established training curriculum for certification of the SAFE Design Council, with supplementary material to increase the theoretical foundations of the topics. The SAFE Design Standard® begins with the assessment of the risk posed to a site by outside factors, and then includes an assessment of site access points, wayfinding and signage, pathways and roadways, barriers and fencing, visibility and illumination, mechanical and electronic security, and other design elements intended for controlling access and movement within a building or site.

Prerequisite(s): Environmental Design 630.

Environmental Design 634 3 units; H(3-0)

Designing Smart Communities
Provides an introduction to the emerging field of Smart Communities, showcasing groups and individuals that have made a conscious and deliberate effort to use information and communications technology (ICT) to transform the community’s life and work in significant and fundamental ways. Smart Communities may be physical or virtual, and the content of this course is about the creative use of ICT infrastructure than merely building it. The social, economic, technical, design and ethical aspects of Smart Communities will all be considered.

Prerequisite(s): Environmental Design 630.

Environmental Design 636 3 units; H(3-0)

Integrative Project
A capstone project course involving an independent, guided research project, which builds on student interests and faculty expertise. The projects may be completed individually or in small groups. The course will involve an initial face-to-face project definition session, online mentoring throughout the project, and final presentations on lessons learned and future research directions.

Prerequisite(s): Environmental Design 630, 632 and 634.

Environmental Design 640 6 units; F(0-6)
(formerly Environmental Design 623)

Regional Planning Studio
An overview of the history and theory of regional planning and an overview of regional planning institutional frameworks and issues in a Canadian regional planning context. Understanding current regional planning issues and institutional, legislative and policy frameworks in a Canadian land use planning context related to growth management, resource extraction, infrastructure and services, transportation, strategic planning, water and airshed management. A review and examination of regional land use planning and policy tools and role of regional planners in inter-jurisdictional and transboundary government and public-private stakeholder engagement mechanisms. Preparation of a plan.

Prerequisite(s): Environmental Design Planning 636 or Environmental Design Landscape 667.

Environmental Design 643 3 units; H(3-0)

Field Studies
Introduction to the architecture, urban landscape, planning issues, design culture and other relevant faculty topics in an international setting. Specific destination and itinerary in any given year are dependent on availability and interest. Through a week long field trip students will learn about the built and natural environment of the selected city and its context.

Prerequisite(s): Admission to Environmental Design graduate degree program.

Environmental Design 650 3 units; H(3-0)

Theories of Sustainable Urban Design
Covers contemporary urban design history as well as seminal urban design theory. Also includes a review of the most up-to-date research in sustainable urban design, including its relationship to public health, global warming and adaptability to climate change trends.

Prerequisite(s): Admission to the Certificate in Sustainable Urban Design.

Environmental Design 652 6 units; F(0-6)

Site/Context Analysis and Sustainable Design Studio
Introduces the student to an analytical and comprehensive approach for understanding a project’s site and context. Provides the student with tools and methods for the implementation of a sustainable urban design proposal in different climatic, environmental and cultural settings.

Prerequisite(s): Environmental Design 650.

Environmental Design 654 3 units; H(3-0)

Green Infrastructure and Land Use
Acquaints the student with the latest knowledge and technology in green urban infrastructure and sustainable practices of land use planning, including aspects of winter city design. Includes various site visits to state-of-the-art infrastructure facilities and lectures from invited experts.

Prerequisite(s): Environmental Design 652.

Environmental Design 656 6 units; F(0-6)

Advanced Urban Design Studio
Provides the opportunity for the integration of all the knowledge acquired in Environmental Design 650, 652 and 654. Includes the development of a comprehensive sustainable urban design proposal based on site and context analysis. The project site will be situated in Calgary and will involve local community advocates, developers, planners and engineers.

Prerequisite(s): Environmental Design 654.

Environmental Design 660 3 units; H(3-0)

Principles of Historic Conservation
Provides a foundation to historic conservation. Focuses on principles and theories pertaining to preservation and restoration practices; recognition of architectural periods, styles, and construction methods in context of the evolution of cultural landscapes; the definition of significance and integrity in buildings and districts; strategies by which buildings and their settings have been preserved and used; and methods of reading and interpreting the cultural environment. Also includes a review of the most up-to-date research in heritage conservation.

Environmental Design 662 3 units; H(3-0)

Heritage Conservation Policy and Planning
This practice-based course prepares students to act in some capacity as manager, architect, planner, and policy maker for historic sites and buildings. Provides an overview of the aspects of heritage conservation related to policy and planning. Reviews preservation policy and jurisdictional issues within a community development context, addresses complex social equity considerations associated with historic designation, examines economic incentives, and explores preservation philosophy and historic impact assessments. Includes visits to heritage sites and lectures from invited experts.

Environmental Design 664 3 units; H(3-0)

Sustainability and Historic Preservation
Examines the role of historic preservation in the context of pragmatic, social, economic and environmental imperatives of sustainable community development. Topics to be addressed include a range of historic examples of sustainable cultural practices, building envelope assessments, pathology and retrofit of heritage buildings, current trends of adaptive reuse of historic sites and case studies of effective implementation of heritage legislation in historic buildings. Although grounded in international experience and precedents, the course emphasizes relevance to western Canadian history and regional building traditions. Includes visits to heritage sites and lectures from invited experts.

Environmental Design 666 3 units; H(3-0)

Advanced Heritage Conservation Project
Provides an opportunity to work in an interdisciplinary manner to address real issues related to heritage conservation. Includes the development of a comprehensive heritage conservation proposal based on site and context analysis of a site in Alberta. The project will use the framework of the Historic Places Initiative (Identify, Protect and Preserve) to document buildings, districts and cultural landscapes and to interpret their historical and architectural significance. An identification component will consider heritage resource documentation
and evaluation; a Protection component will review
heritage legislation, regulatory frameworks, and
incentive programs; and a Preservation component
will examine standards and guidelines, and preser-
vation strategies and techniques.

Environmental Design 671 3 units; H(3-0)

Urban Design Theory
Intended to provide students with an introduction
to theories, concepts, methods and contemporary
issues in urban design. The course consists of lect-
ures, case studies, seminars and short projects.

Environmental Design 675 3 units; H(3-0)

Urban Systems
Provides a general overview of urban history,
development and planning traditions. Lectures and
field studies give a chronological overview of
urban, architectural and design history and the
inter-relation to political programs, economic and
strategic planning as well as cultural nationalism.
The course will extract a number of more general
issues about contemporary cities for debate.

Prerequisite(s): Admission to Environmental Design graduate degree program.

MAY BE REPEATED FOR CREDIT

Environmental Design 683 3 units; H(3-0)

Advanced Special Topics in Environmental Design
Thematic inquiry and design related to environ-
mental design topics.

MAY BE REPEATED FOR CREDIT

Environmental Design 697 1.5 units; Q(3-0)

Advanced Special Topics in Environmental Design
Thematic inquiry and design related to environ-
mental design topics.

MAY BE REPEATED FOR CREDIT

Environmental Design 703 1.5 units; Q(0-3)

Directed Study in Environmental Design
Thematic research, readings or design studio pro-
ject related to environmental design topics.

Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Environmental Design 711 3 units; H(0-8)

Theoretical Basis for Interdisciplinary Intervention and Design
Comparisons and contrasts among disciplinary,
multidisciplinary and interdisciplinary intervention
and research. Focus on interdisciplinary teamwork
knowledge and skills, on the ability to integrate
research into professional real world contexts and
on the ability to communicate research results
effectively. This course is open only to students
registered in a PhD program.

Environmental Design 723 3 units; H(0-6)

Interdisciplinary Intervention in Environmental Design
Interdisciplinary teams will tackle client-based real
world environmental design problems; interven-
tion strategies and design as a problem-solving
approach to complex urban, ecological, social, and
technological interactions will be addressed.

723.02. Sustainable Futures and Planning Scenarios
723.03. People and Technology

Environmental Design 753 3 units; H(3-0)

Research Skills and Critical Thinking
Exploration of the research process in an envi-
ronmental design context and using design as a
method of research. Design of innovative research
methods appropriate for environmental design
research. Development of skills in research design and
critical thinking while writing a research proposal.

MAY BE REPEATED FOR CREDIT

Environmental Design 783 3 units; H(0-3)

Directed Study in Environmental Design
Thematic research, readings or design studio pro-
ject related to urban design, architecture, envi-
ronmental design topics.

Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Environmental Design 793 3 units; H(0-8)

Workshop in Environmental Design
Instruction and supervised experience in the use of
tools and equipment for the development of study
models, prototypes and graphic material related to
student projects.

Prerequisite(s): Consent of the Faculty.

Environmental Design 797 3 units; H(3-0)

Preceptorship
A Preceptorship is a study and training arrange-
ment made between a student and an employer or
an equivalent supervisor which has specific
educational objectives, a method of evaluation,
and is an integral part of a student’s Program of
Studies. Preceptorships offer a number of benefits:
acquiring skills and knowledge which may be
better obtained outside the University; develop-
ing first-hand experience of professional design
practice; preparing for more focused studies in the
Faculty; and conducting research.

Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Environmental Design Architecture EVDA
Instruction offered by members of the Faculty of
Environmental Design.

Environmental Design Architecture courses are
only open to students in the Master of Architecture
program or with consent of the instructor. Priority
will be given to students in the MArch program.

Environmental Design Architecture 511 3 units; H(3-0)

Building Science and Technology I
Functioning of the building enclosure: demonstra-
tion of the behaviour of building elements and their
sub-assemblies under differential temperature and
pressure stresses; fundamentals of acoustics; nature
and use of building materials; response of building
materials to climatic cycles radiation, precipitation, heating and cooling.

Antirequisite(s): Credit for Environmental Design Architecture 511 and Architectural Studies 449 will not be allowed.

Environmental Design Architecture 523 3 units; H(3-0)

History of Architecture and Human Settlements
A survey history of architecture and human settle-
ment from the prehistoric times until the pres-
present. The first course addresses the premodern
traditions of the major world cultures. The second
course explores the traditions of the Western world
from the beginning of the Italian Renaissance until
the present. The courses will examine the changes
in world view that have altered the course of
architecture through the study of selected works of
architecture and urbanism.

Antirequisite(s): Credit for Environmental Design Architecture 523 and Architectural Studies 457 will not be allowed.

Environmental Design Architecture 541 3 units; H(0-8)

Graphics Workshop I
A skill building course with instruction and super-
vised experience in basic drafting, sketching and
rendering; principles of perspective, drawing and
presentation conventions. A variety of instruction
may be offered to accommodate the varied level of
student development.

Corequisite(s): Environmental Design Architecture 580.

Antirequisite(s): Credit for Environmental Design Architecture 541 and Architectural Studies 451 will not be allowed.

Environmental Design Architecture 543 3 units; H(0-8)

Graphics Workshop II
Instruction and supervised experience in drafting,
sketching and rendering; drawing and presenta-
tion conventions. Builds on Environmental Design Architecture 541. A variety of instruction may be
offered to accommodate the varied level of student
development.

Prerequisite(s): Environmental Design Architecture 541 and 580 or consent of the Faculty.

Corequisite(s): Environmental Design Architecture 582.

Antirequisite(s): Credit for Environmental Design Architecture 580 and Architectural Studies 453 will not be allowed.

Environmental Design Architecture 580 6 units; F(0-8)
(formerly Environmental Design 503)

Studio I – Design Thinking
Foundation concepts in design and form making
involving a sequence of progress skill building,
visual and spatial thinking and problem-solving
exercises.

Corequisite(s): Environmental Design Architecture 541.

Antirequisite(s): Credit for Environmental Design Architecture 580 and Architectural Studies 484 will not be allowed.

Environmental Design Architecture 582 6 units; F(0-8)

Studio II in Architecture
An introduction to the application of ordering
principles of architecture and to the numerous lay-
ers that contribute to the quality of inhabitation of
place and space through design, Issues explored
include the formal, the experiential and the theo-
Courses of Instruction

Graduate Courses

Environmental Design Architecture 611
3 units; H(3-0)

Building Science and Technology II
Theory and principles of structural, foundation and building service systems. Application of building science principles to building structure and enclosure, examination of the types and manufacture of building elements and the application of building components to specific problems in architecture.

Environmental Design Architecture 613
3 units; H(3-0)

Structures for Architects I
Fundamentals of Structural Analysis including the characteristics and performance of the various components of structures; the terminology and notation necessary for effective teamwork with structural engineering consultants; and basic design calculations for simple structures.

Environmental Design Architecture 615
3 units; H(3-0)

Environmental Control Systems
Approaches to the design of heating, cooling, and ventilation systems for buildings. Issues in system design such as energy efficiency and indoor air quality.

Environmental Design Architecture 617
1.5 units; Q(3-0)

Architectural Lighting Design
Fundamentals of light and visual perception. Approaches to the design of non-uniform and uniform lighting systems for buildings. Issues in system design such as human satisfaction, performance and energy efficiency. Development of skills in the selection and design of lighting systems.

Environmental Design Architecture 619
3 units; H(3-0)

Structures for Architects II
Advanced structural systems for buildings including: structural connections and composite structures; system characteristics and architectural intent; and case studies in contemporary building structures.

Environmental Design Architecture 621
3 units; H(3-0)

Introduction to Design Theories
The contemporary cultural, social, and philosophical arenas in which architecture exists are examined through lectures, readings and seminars.

Environmental Design Architecture 661
3 units; H(3-0)

Architectural Professional Practice
The nature of the building industry, stakeholders and many of the participants and their responsibilities. Brings together the theoretical framework of the architect’s role in society with the practicality of managing a practice. Project management and office administration, trends, liabilities and systems for project control such as building economics; cost analysis and estimating techniques; and cost controls during design and construction.

Environmental Design Architecture 665
1.5 units; Q(3-0)

Leadership in Architecture
The practice of architecture deals with complex design requirements, diverse groups of people, changing processes, evolving contexts, and a range of modes of production. This course introduces students to a broad set of contemporary themes around the concept of leadership and architecture.

Environmental Design Architecture 682
6 units; F(0-8)

Intermediate Architectural Design Studio
An intermediate design studio in which students work on projects defined by the instructor. Topics may vary from year-to-year and are determined by the creative interests of the faculty assigned to the course. Enrolment may be limited.

682.02 Intermediate Studio
682.04 Comprehensive Design Studio

Environmental Design Architecture 703
3 units; H(0-3)

Directed Study in Architecture
Research and readings in architecture and design related to the Senior Research Studio in Architecture.

MAY BE REPEATED FOR CREDIT

Environmental Design Architecture 782
6 units; F(0-8)

Senior Research Studio in Architecture
A research design studio in which students collaborate with design faculty in exploring projects that engage contemporary issues defining the built and natural environments.

MAY BE REPEATED FOR CREDIT

Environmental Design Landscape EVDL
Instruction offered by members of the Faculty of Environmental Design.

Environmental Design Landscape 603
3 units; H(2-2)

Site Technology I: Grading and Landform
Provides a working knowledge of grading, landform and storm water management systems and techniques. Covers fundamentals and advanced technologies including GPS grading and landform manipulation.

Environmental Design Landscape 605
3 units; H(2-2)

Site Technology II: Construction and Materials
Provides a working knowledge of landscape construction methods and materials through practical application of theories and techniques via a design project.

Environmental Design Landscape 607
3 units; H(2-2)

GIS for Landscape Architecture
Application of GIS modeling techniques to landscape planning, design and management issues. Advanced consideration of GIS for spatial planning and application to studio and research projects.

Environmental Design Landscape 609
3 units; H(0-3)

Advanced Digital Design, Representation and Communication for Landscape Architecture
Digital media offers a variety of tools and techniques to experiment, communicate and visualize their ideas and to collaborate with colleagues, allied professionals, and the public. Provides instruction in current methods and techniques of digital media used in the research and practice of landscape architecture, as well as state-of-the-art communication, collaboration and visualization hardware and software.

Environmental Design Landscape 629
3 units; H(3-0)

Landscape Architecture History and Theory
An introduction to the history, theory and contemporary issues of landscape architecture. Develop a critical awareness of major conceptual frameworks, and the socio-political contexts in which they developed, both conceptually and in realized projects.

Environmental Design Landscape 639
3 units; H(2-2)

Green Infrastructure/Winter City Design
An introduction to the systems of urban and regional resource management through targeted green infrastructure projects, particularly in a winter city context. Provides background on current methods, the state-of-the-art, and research and development that will shape future technologies. Identifies contemporary approaches, socio-cultural and ecological concepts for using plant material in landscapes, green roofs and biomass.

Environmental Design Landscape 643
3 units; H(3-0)

Professional Practice and Project Management for Landscape Architecture
An introduction to the professional practice of landscape architecture. Includes the legal and ethical frameworks for practice, as well as project management.

Environmental Design Landscape 645
3 units; H(3-0)

Plants in the Landscape
Introduces students to plant taxonomy, plant identification, and planting design. Covers both natural and designed landscapes, and focuses on plant materials appropriate in the context of Calgary and region.

**Environmental Design Landscape 667**

An integration of skills and processes developed to this point in the program through an investigation into a topical, issue-based problem, and development of solution(s) in a landscape context. Corequisite(s): Environmental Design Planning 625.

**Environmental Design Landscape 668**

An integration of skills and processes developed to this point in the program through an investigation into a topical, issue-based problem, and development of solution(s) in a landscape context. Corequisite(s): Environmental Design Landscape 677.

**Environmental Design Landscape 676**

An introduction to landscape planning and design at the regional scale. Particular emphasis on the interrelationships between biophysical (i.e., ecological, geological) systems and anthropogenic (i.e., social, political, economic) systems and processes as agents of landscape transformation, and determinants of form.

**Environmental Design Landscape 777**

A research-oriented project studio that explores contemporary themes in landscape architecture. Centres on a real world problem or project; involves analysis of issues and context, and the formulation of a comprehensive design solution involving advanced methods, techniques and practices.

**Environmental Design Planning 602**

Introduction offered by members of the Faculty of Environmental Design. Environmental Design Planning courses are only open to students in the Master of Planning program or with consent of the instructor.

**Graduate Courses**

**Environmental Design Planning 611**

Environment planning and design. Emphasizes sense of place, human behaviour/built form relationships and sustainability. Completion of series of progressively complex site planning projects. Skills development in hand and computer-aided drawing to describe, document and analyze urban form and processes and to develop physical plans. Corequisite(s): Environmental Design Planning 602.

**Environmental Design Planning 621**

Introduction to urban design practice. Emphasizes sense of place, human behaviour/built form relationships and sustainability. Completion of series of progressively complex site planning projects. Skills development in hand and computer-aided drawing to describe, document and analyze urban form and processes and to develop physical plans. Corequisite(s): Environmental Design Planning 602.

**Environmental Design Planning 625**

Introduction to urban design practice. Emphasizes sense of place, human behaviour/built form relationships and sustainability. Completion of series of progressively complex site planning projects. Skills development in hand and computer-aided drawing to describe, document and analyze urban form and processes and to develop physical plans. Corequisite(s): Environmental Design Planning 602.

**Environmental Design Planning 626**

Introduction to urban design practice. Emphasizes sense of place, human behaviour/built form relationships and sustainability. Completion of series of progressively complex site planning projects. Skills development in hand and computer-aided drawing to describe, document and analyze urban form and processes and to develop physical plans. Corequisite(s): Environmental Design Planning 602.

**Environmental Design Planning 627**

Introduction to urban design practice. Emphasizes sense of place, human behaviour/built form relationships and sustainability. Completion of series of progressively complex site planning projects. Skills development in hand and computer-aided drawing to describe, document and analyze urban form and processes and to develop physical plans. Corequisite(s): Environmental Design Planning 602.

**Environmental Design Planning 632**

Planning and Public Engagement Overview of key principles and theories, and contemporary issues and tools of participation and public engagement as it applies to planning. Consideration of public engagement, facilitation, negotiation and conflict resolution processes from the point of view of community activists, city planners, developers and planning/design professionals. Development and implementation of public engagement plans.

**Environmental Design Planning 633**

Project Management for Planners Principles, techniques and tools of project management. Development, administration, monitoring and evaluation of implementation plans, including financial aspects are discussed. Project risk analysis and management.

**Environmental Design Planning 634**

Project Management for Planners Principles, techniques and tools of project management. Development, administration, monitoring and evaluation of implementation plans, including financial aspects are discussed. Project risk analysis and management.

**Environmental Design Planning 635**

Analytic Methods for Planners Approaches to identify, gather and critically analyze strategic information needed to assess planning situations and support decision-making. Focuses on both quantitative and qualitative planning methods. Techniques to present information effectively.

**Environmental Design Planning 636**

Community Planning Studio Introduction to land use planning and development issues. Provides a step-by-step introduction to community planning processes and essential planning policies to create development that is economically feasible, socially inclusive and environmentally sustainable. Corequisite(s): Environmental Design Planning 625.

**Environmental Design Planning 644**

Advanced Professional Planning Studio An advanced studio exploring contemporary themes in planning and professional planning practice. Centres on a real world problem or client project; involves analysis, synthesis, and formulation of a planning or urban design solution. Culminates in a professional report and presentation. Corequisite(s): Environmental Design Planning 625; 636 or 637 and one of Environmental Design 618, 620, 623 or 640.
Courses of Instruction

Environmental Engineering
ENEN

Instruction and services offered by Centre for Environmental Engineering Research & Education (CEERE), Schulich School of Engineering.

Graduate Courses

Environmental Engineering 603 3 units; H(3-0)

Principles of Environmental Engineering

Environmental Engineering 605 3 units; H(3-0)

Environmental Chemistry and Microbiology
Chemistry of organic and inorganic contaminants in the environment. Natural chemical cycles in the biosphere, geosphere, hydrosphere and atmosphere, and consequences of anthropogenic disturbances. Aquatic, atmospheric and soil chemistry. The fate of hazardous, refractory and heavy metal pollutants in the environment. Introductory toxicological chemistry and atmospheric chemistry. Analytical techniques for contaminants in air, water, energy and soil. Introductory microbiology: characteristics and classification of microorganisms, kinetics and mathematical models of microbial growth, applications in environmental engineering. Introduction to ecology.

Environmental Engineering 619 3 units; H(3-0)

Special Topics
New courses on specialized topics relevant to environmental engineering. It may also be offered to doctoral degree students to enable them to pursue advanced studies in particular areas under the direction of a faculty member, which must be arranged and approved prior to registration.

MAY BE REPEATED FOR CREDIT

Environmental Engineering 620 3 units; H(3-0)

Water Quality
Water quality parameters, indicators of water pollution, pesticides, nutrients and other contaminants in water, fate and distribution of effluents in water bodies, water treatment options.

Environmental Engineering 621 3 units; H(3-0) (Chemical Engineering 701)

Experimental Design and Error Analysis
Statistical analysis and design of engineering experiments. Random variables and sampling distributions; estimation and hypothesis testing; concepts of central tendency, variability, confidence level; correlation, regression and variation analysis; robust estimation; experiments of evaluation; experiments of comparison; factorial experiments (analysis of variance); experimental designs (including randomization, replication, blocking and analysis of covariance).

Antirequisite(s): Credit for Environmental Engineering 621 and Chemical Engineering 701 will not be allowed.

Environmental Engineering 623 3 units; H(3-0)

Air Dispersion Modelling

Environmental Engineering 625 3 units; H(3-0)

Computational Methods for Environmental Engineering
Taylor series, numerical integration. Linear and non-linear algebraic equations and solvers. Ordinary and partial differential equation: finite difference methods; explicit, implicit and Crank-Nicholson methods. Finite difference, finite element or finite volume numerical approximations. Initial and boundary value problems. Boundary conditions, discretization considerations, and design of approximations, accuracy and error reductions. Applications in environmental engineering, such as pollutant dispersion and transport, will be discussed.

Antirequisite(s): Credit for Environmental Engineering 625 and any of Chemical Engineering 639, Civil Engineering 743 or Mechanical Engineering 631 will not be allowed.

Environmental Engineering 627 3 units; H(3-0)

Contaminant Transport

Environmental Engineering 631 3 units; H(3-0)

Spatial Statistics for Environmental Modelling
Spatial statistics for topological, geometric and geographic properties. Spatial statistical models for data having an explicit spatial distribution. Basic and advanced methods in geo-spatial statistics for point, area and continuous variables. All levels (from visual to analytical) of possible spatial analysis techniques are examined for each type of variable and application in environmental modelling are used to illustrate the concepts.

Environmental Engineering 633 3 units; H(3-0)

Fuzzy Logic for Environmental Engineering

Environmental Engineering 635 3 units; H(2-2) (Geomatics Engineering 583)

Environmental Modelling
Nature and purpose of environmental modelling: the top-down and the bottom-up approaches; typology of environmental models; definition of fundamental concepts; steps involved in designing and building a model; calibration, verification and validation of models; scale dependency; sensitivity analysis; characteristics, architecture and functioning of selected environmental models.

Environmental Engineering 637 3 units; H(3-0) (Geomatics Engineering 637)

Earth Observation for the Environment
An introduction to environmental earth observation systems, in particular to satellite platforms. Topics include: discussion of physical principles; imaging system geometries; radiometric corrections, including calibration and atmospheric correction; spatial filtering for noise removal and information extraction; geometric corrections, including rectification and registration; fusion of multi-dimensional datasets; and application of satellite images in addressing selected environmental issues.

Antirequisite(s): Credit for Environmental Engineering 637 and Geomatics Engineering 657 or 655 will not be allowed.

Environmental Engineering 641 3 units; H(3-0) (Chemical Engineering 643)

Air Pollution Control Engineering
Introduction to air quality and air pollution. Energy and air pollution. Fossil fuel combustion and related air pollution. Industrial air pollution control. Control of particulate matter. Control of VOCs, SOx, and NOx. Adsorption, absorption and biofiltration of air pollutants. GHG emission control. Recent advances on related topics.

Antirequisite(s): Credit for Environmental Engineering 641 and Chemical Engineering 643 will not be allowed.

Environmental Engineering 643 3 units; H(3-0)

Air Pollutant Sampling and Characterization

Environmental Engineering 651 3 units; H(3-0)

Solid Waste Engineering

Environmental Engineering 653 3 units; H(3-0) (Civil Engineering 747)

Contaminated Soil Remediation
Overview of soil remediation engineering. Contaminant partitioning in air, water and gas phases. Phases of site assessments, Physical and chemical treatment processes, soil vapour extraction, air sparging, soil flushing, thermal desorption and incineration, solidification and stabilization, vitrification, biological treatment processes, bioremediation kinetics, ex situ and in situ techniques. Liquid phase bioremediation as it pertains to soil remediation.

Antirequisite(s): Credit for Environmental Engineering 653 and Civil Engineering 747 will not be allowed.

Environmental Engineering 655 3 units; H(3-0) (Civil Engineering 745)

Hazardous Waste and Contaminated Sites Management
Integrated waste management. Functional and fundamental properties of hazardous waste. Toxicological properties of contaminants. Contami-
Courses of Instruction

Environmental Engineering 661 3 units; H(3-0) (Chemical Engineering 645)

Industrial and Produced Wastewater Treatment
Sources and characterization of industrial wastewater; Treatment objectives and regulations. Unit process design. Physical/chemical treatment including sedimentation, coagulation, filtration, absorption, adsorption, ion exchange, membrane processes and pH adjustment.

Antirequisite(s): Credit for Environmental Engineering 665 and Civil Engineering 745 will not be allowed.

Environmental Engineering 661 3 units; H(3-0) (Chemical Engineering 645)

Biological Processes for Wastewater Treatment
Specialized biological wastewater treatment processes for removal of impurities not effectively removed by conventional secondary wastewater treatment systems, such as nutrients (e.g., nitrogen and phosphorus), residual organics, residual solids, bacteria and viruses. Wetlands, Activated Sludge Modelling. Biological nutrient removal. Sludge management. Disinfection.

Antirequisite(s): Credit for Environmental Engineering 663 and Civil Engineering 741 will not be allowed.

Environmental Engineering 663 3 units; H(3-0) (Civil Engineering 741)

Wastewater Issues for the Oil and Gas Industry

Antirequisite(s): Credit for Environmental Engineering 665 and Chemical Engineering 665 will not be allowed.

Environmental Engineering 665 3 units; H(3-0) (Chemical Engineering 665)

Environmental Science ENSC 393

Topical issues in environmental science including climate change, aquatic systems, agriculture, forestry, mining, energy, endangered species, and protected areas contextualized within the framework of law, policy, economics, sustainability, and the precautionary principle.

Environmental Science 201 3 units; H(3-0)

Environmental Science Field Course I
An introduction to the common field techniques in quantifying air, land and water quality, as well as data analysis and report writing. A field portion is held in the two weeks prior to the start of the regular Fall Term, partly based at the Biogeosciences Institute's Barrier Lake Field Station.

Prerequisite(s): Geography 339 or Biology 315 or Statistics 327 and admission to the Environmental Science program.

Note: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. A supplementary fee will be assessed to cover additional costs associated with this course.

Environmental Science 501 3 units; H(160 hours)

Environmental Science Field Course II
The focus will be on disturbances to aquatic and terrestrial ecosystems. Site visits and data collection will be conducted to appropriate areas that have either undergone or are undergoing industrial disturbance to assess impacts. The course is held for two weeks immediately prior to the start of the regular Fall Term.

Prerequisite(s): Environmental Science 401 and admission to the Environmental Science program.

Note: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. A supplementary fee will be assessed to cover additional costs associated with this course.

Environmental Science 502 3 units; H(160 hours)

Environmental Science 201 3 units; H(3-0)

Environmental Science 401 3 units; H(160 hours)

Environmental Assessment and Hearings
An introduction to federal and provincial environmental impact assessment (EIA), which is implicit in much of Environmental Science 401, 501 and 502.

Prerequisite(s): Admission to the Environmental Science program.
### Courses of Instruction

<table>
<thead>
<tr>
<th>Environmental Science 504</th>
<th>6 units; F(0-9)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Research Project in Environmental Science</strong></td>
<td>An independent study or research project under the supervision of one or more faculty members in the Environmental Science program. Originality is emphasized and laboratory and/or field studies are encouraged. Formal written and oral reports will be presented as a necessary component of this course.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Consent of the Environmental Science Program Director.</td>
<td><strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>
</tbody>
</table>

| Special Problems in Environmental Science | A research project under the supervision of one or more faculty members in the Environmental Science program. Formal written and oral reports will be presented as a necessary component of this course. |
| **Prerequisite(s):** Consent of the Environmental Science Program Director. | **MAY BE REPEATED FOR CREDIT** |

### Film 307 3 units; H(2-3)
**Topics in Cinema and Gender Studies**
Topics will explore the representation of gender and sexuality in cinema. Topics might include: Images of Women in the American 1940s, Lesbian Images in Current Cinema, The Queer 1950s, Comparative Images of Women in American and French Cinema, etc.

<table>
<thead>
<tr>
<th>Film 321 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>History of Popular Cinema</strong></td>
</tr>
<tr>
<td>An assessment of the various ways in which the history of film production can be approached, including the development of filmmaking technologies, evolutions in cinematic style and narrative traditions, particularly as they relate to popular cinema, and changing industrial practices.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 201.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Film 323 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Issues in Film History</strong></td>
</tr>
<tr>
<td>An introduction to key concepts in cinematic historiography. Emphasis will be placed upon non-traditional or non-canonical films and their relationship to dominant histories of filmmaking.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 201.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Film 331 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Film Theory up to 1950</strong></td>
</tr>
<tr>
<td>An introduction to theoretical perspectives on film before the mid-twentieth century. Connects film with broader debates on aesthetics, medium specificity, genre, and realism. Includes theories developed in the first half of the twentieth century related to Silent Film, Formalism, Montage, Critical Theory, and Auteur theories.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 201.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Film 333 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Film Theory after 1950</strong></td>
</tr>
<tr>
<td>An introduction to theoretical perspectives on film developed since the mid-twentieth century, specifically Structuralism, Linguistics, Psychoanalysis, Feminism, Post-structuralism, Cultural Studies, Post-colonialism and Queer Theory.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 201.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Film 351 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Canadian Film</strong></td>
</tr>
<tr>
<td>An introduction to key historical and theoretical aspects of Canadian film. Topics will include the study of Canadian film auteurs, documentary and social change, feature film genres, and the role of government regulations. Explores the central themes and issues facing Canadian filmmakers and audiences.</td>
</tr>
<tr>
<td><strong>Antirequisite(s):</strong> Credit for Film 351 and Canadian Studies 331 will not be allowed.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Film 401 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Topics in Film Theory</strong></td>
</tr>
<tr>
<td>Topics will be organized around particular theorists, schools of theory, historical issues in film culture, or contemporary thought on film. Topics may include: Psychoanalysis and/as Film Theory; Kaja Silverman and Teresa de Lauretis; Modernism and Post-modernism; Feminist Film Theory; Queer Theory and Film; Post-colonial Theory and Film; Semiotics.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 331 or 333.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Film 403 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Topics in the Director’s Cinema</strong></td>
</tr>
<tr>
<td>Topics will examine the distinctive style and concerns of a particular director or directors.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 201.</td>
</tr>
</tbody>
</table>

**MAY BE REPEATED FOR CREDIT**

<table>
<thead>
<tr>
<th>Film 405 3 units; H(2-3)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Advanced Topics in Film Genre</strong></td>
</tr>
<tr>
<td>Topics will be organized around a specific film generic tradition.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 201 and one of 305 or 321.</td>
</tr>
</tbody>
</table>

**MAY BE REPEATED FOR CREDIT**

<table>
<thead>
<tr>
<th>Film 407 3 units; H(0-4)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Experiential Learning in Film</strong></td>
</tr>
<tr>
<td>Provides the opportunity to combine interests in film studies research with experiential learning opportunities in the community and workplace (internships, paid employment, approved film production training or volunteer position).</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> Film 201, admission to the BA in Film Studies or the Bachelor of Film Studies and consent of the Department.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Film 409 3 units; H(2-3) or H(3-0)</th>

</table>
| Explores the genre of experimental film and video. Particular emphasis will be given to the history and evolution of works in this genre with attention to
Courses of Instruction

Canadian contributions and the impact of digital and new media.

Prerequisite(s): One of Film 321, 331 or 333.

Film 501 3 units; H(0-1T)
Research in Selected Topics in Film Studies
Supervised individual study of a special topic.
Prerequisite(s): Consent of the Department.
Note: Students who wish to propose a topic must secure a supervisor among the Film instructors and have the topic approved by the Department at least two weeks prior to the first day of classes.
MAY BE REPEATED FOR CREDIT

Film 509 3 units; H(2-3)
Advanced Special Topics in Film Studies
Selected topic in film studies suitable for advanced studies in the degree. Topic may be historical, theoretical or analytical in emphasis.
Prerequisite(s): 6 units of Film at the 400 level.
MAY BE REPEATED FOR CREDIT

Film 591 3 units; H(2-3)
Senior Seminar in Film Studies
Explores the variety of ways in which film and the technologies of motion pictures connect with social life with reference to a specific topic. Completion of a major project that will integrate understanding of film theory, history and genres.
Prerequisite(s): Admission to the BA in Film Studies and 78 units (13.0 full-course equivalents), of which 6 units (1.0 full-course equivalent) must be taken from Film 321, 323, 331, or 333.

Film 595 3 units; H(2S-0)
Honours Seminar
Individual research and seminar activities (e.g., critiques, presentations, and peer reviews of drafts) to produce a proposal and a paper to be used as the basis for the honours thesis.
Prerequisite(s): Admission to BA Honours Film Studies.
Antirequisite(s): Credit for Film 595 and Film 590 or Communication and Media Studies 590 will not be allowed.

Film 597 3 units; H(0-1)
Honours Thesis
Supervised individual research and preparation of an honours thesis. Incorporating material from the Film 595 final paper, to complete the honours thesis.
Prerequisite(s): Film 595 and admission to BA Honours in Film Studies.
Antirequisite(s): Credit for Film 597 and Film 590 or Communication and Media Studies 590 will not be allowed.

Graduate Courses
For graduate courses, please see the listing in the Communication and Media Studies (COMS) section.

Finance FNCE
Instruction offered by members of the Haskayne School of Business.

Senior Courses

Finance 317 3 units; H(3-3T)

Financial Management
An introduction to the allocation of financial capital, from a theoretical as well as a practical perspective. The course builds on a modern understanding of how risk, time horizon, and market imperfections each affect the value of real and financial assets. Topics include time value of money, the risk-return trade-off, financial investing, corporate financing, and corporate investing.
Prerequisite(s): Admission to the Haskayne School of Business, 30 units (5.0 full-course equivalents) including Mathematics 249 or 251 or 265 or 281, Economics 201 and 203, Statistics 213 and 217, Accounting 217 or 317, and Business and Environment 291 or Management Studies 217.
Antirequisite(s): Credit for Finance 317 and either 341 or 343 will not be allowed.

Finance 341 3 units; H(3-0)

Canadian Business Finance
An introduction to business financial management practices in Canada including investment decision, capital markets, and sources, uses and costs of capital over short, intermediate and long run situations.
Prerequisite(s): 30 units (5.0 full-course equivalents).
Antirequisite(s): Credit for Finance 341 and 317 will not be allowed.

Note: Not available for credit toward the Bachelor of Commerce degree. Preference in enrolment is given to students who have declared a Management and Society Minor.

Finance 343 3 units; H(3-3T)

Personal Financial Management
An introduction to personal financial management practices in Canada. Topics discussed may include goal setting, personal financial statements, the mathematics of personal finance, taxation, general and life insurance, retirement planning, investments, and estate planning. Completion of the course should enable students to properly prepare and plan their personal financial future.
Prerequisite(s): 30 units (5.0 full-course equivalents).
Antirequisite(s): Credit for Finance 343 and either 317 or 477 will not be allowed.

Note: Not available for credit toward the Bachelor of Commerce degree. Preference in enrolment is given to students who have declared a Management and Society Minor.

Finance 443 3 units; H(3-0)

Security Analysis and Investments
A comprehensive exploration of security analysis and investments aimed at advancing understanding of financial markets, valuation techniques, and portfolio selection under various investment objectives. Topics such as capital allocation, diversification, security (stock, bond, derivatives) valuation, and market efficiency are covered.
Prerequisite(s): Admission to the Haskayne School of Business and Finance 317.

Finance 445 3 units; H(3-0)

Futures and Options
A study of financial contracts for which the payoffs are contingent upon or derived from the value of a commodity and the price of a stock. These contracts are used extensively for hedging and speculative purposes. They also provide useful information for forecasts of the underlying economic variable in a process called “price discovery.”
Prerequisite(s): Admission to the Haskayne School of Business, Finance 317 and 443.

Finance 447 3 units; H(3-0)

Capital Budgeting
Capital investment policies, real options, required rate of return calculation, tax factors, risk analysis, buy versus lease, abandonment considerations.
Prerequisite(s): Admission to the Haskayne School of Business, Finance 317 and 451.

Finance 449 3 units; H(3-0)

Trading and Market Data Management
Introduction to accessing data feeds as they are used by professional financial market traders and analysts. Data for stock, bond, futures and options markets, accounting statements and securities commission filings, as well as real-time and historical news events and analysis will be studied.
Prerequisite(s): Admission to the Haskayne School of Business, Finance 317 and consent of the Haskayne School of Business.
Antirequisite(s): Credit for Finance 449 and Management Studies 559.15 will not be allowed.

Note: Enrolment is strictly limited by the Haskayne School of Business.

Finance 451 3 units; H(3-0)

Corporate Finance
A deeper understanding of topics such as capital budgeting, capital structure, valuation, payout policy, and financing decisions.
Prerequisite(s): Admission to the Haskayne School of Business and Finance 317.

Finance 461 3 units; H(3-0)

International Finance
A study of the forces affecting the financial environment of the corporate sector which appear to stem from requirements in the international sector. Balance-of-payments problems, exchange rates, currency risk hedging techniques, international reserve creations and transfers are some of the major elements studied.
Prerequisite(s): Admission to the Haskayne School of Business, Finance 317 and 443.

Finance 463 3 units; H(3-0)

Portfolio Theory and Management
Analysis of the major aspects of the grouping of financial assets. Portfolio analysis and its application to portfolio management, capital market theory and the measurement of financial performance in the presence of risk.
Prerequisite(s): Admission to the Haskayne School of Business, Finance 317 and 443.

Finance 465 3 units; H(3-0)

Mergers and Acquisitions
A study of the economic theory and practical issues around takeover and takeover defense strategies. Valuation issues, corporate restructuring, corporate governance, and methods of ensuring congruence between management and shareholder goals are also discussed.
Prerequisite(s): Admission to the Haskayne School of Business, Finance 317 and 451.
Antirequisite(s): Credit for Finance 465 and 559.01 will not be allowed.

### Finance 795 3 units; H(3-0)

**Advanced Seminar in Finance**

**Prerequisite(s):** Consent of the Haskayne School of Business.

**MAY BE REPEATED FOR CREDIT**

### Doctoral Seminars in Finance 3 units; H(3S-0)

**Doctoral Seminars in Finance**

- **799.01. Theory of Finance**
- **799.02. Empirical Methods in Finance**
- **799.03. Topics in Finance**
- **799.04. Financial Engineering**
- **799.05 Theory of Corporate Finance**
- **799.06 Asset Pricing**
- **799.07 Topics in Asset Pricing and Corporate Finance**

### Fine Arts FINA

Instruction offered by the Faculty of Arts. Please contact the Arts Students’ Centre for specific details.

#### Junior Course

**Fine Arts 201** 3 units; H(3-0)

**Introduction to the Fine Arts**
A survey of major issues in the fine arts. An overview of the interactions among the arts; the arts and society; an introduction to criticism and aesthetics; technical aspects of the individual arts.

#### Senior Courses

**Fine Arts 501** 3 units; H(3-0)

**Topics in Fine Arts: Comparative Studies and Critical Theory**
Topics may include aesthetic theory, theory and/or history of collaborative arts, critical theory, and the history of criticism.

**Prerequisite(s):** One full senior course in any of Art, Dance, Drama or Music or consent of the Faculty.

**MAY BE REPEATED FOR CREDIT**

**Fine Arts 503** 3 units; H(2-2)

**Topics in Fine Arts: Collaborative Production Projects**
An experiential learning course, in which students collaborate to produce works combining elements from among the programs in studio art, acting and directing, design, dance, music composition and performance.

**Prerequisite(s):** One full senior course in any of Art, Dance, Drama or Music or consent of the Faculty.

**MAY BE REPEATED FOR CREDIT**

### Graduate Courses

**Fine Arts 601** 3 units; H(0-3)

**Studies at the Banff Centre**
Interdisciplinary fine arts studies. Although the Banff Centre does not provide credit course instruction, students with advanced experience in art, dance, drama or music at the Banff Centre may apply for graduate-level credit from the University of Calgary.

**Prerequisite(s):** Consent of the Faculty.

**MAY BE REPEATED FOR CREDIT**

**NOT INCLUDED IN GPA**

**Fine Arts 603** 3 units; H(3-0)

**Topics in Fine Arts: Interdisciplinary Seminar**
Interdisciplinary seminar in the advanced study and interpretation of the interrelationships between music, the fine arts, and the history of ideas, using a theme-oriented approach.

**Note:** This is a required course in the PhD program for Music Education, Composition and Musicology.

**MAY BE REPEATED FOR CREDIT**

### French FREN

**Programme offert par L’École de langues, linguistique, littératures et cultures de la Faculté des Arts.**
Les étudiants de langue maternelle française et ceux dont le niveau d’études dans ces langues est supérieur à celui du diplôme de fin d’études secondaires (y compris les étudiants provenant d’un programme bilingue ou d’immersion) doivent obligatoirement consulter le Département pour se faire diriger vers le cours conforme(s) à leur niveau. Les locuteurs natifs ne peuvent se faire créditer des cours de langue ni par équivalence (“advanced credit”) ni par évaluation spéciale (“special assessment”).

Instruction offered by members of the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

French-speaking students or students with some prior knowledge of the language (including graduates of a bilingual or immersion program) must consult the School to be placed in a course corresponding to their level of linguistic competence. Native speakers are not eligible to take language courses by special assessment or to receive advanced credit for them.

#### Junior Courses

**French 209** 3 units; H(3-1)

**Beginners’ French I**
Basic elements of the French language, including training in comprehension, speaking, reading and writing of French.

**Antirequisite(s):** Credit for French 209 and any of 30, 31, or 311 will not be allowed

**Note:** Students starting in French 209 must complete at least 54 units (9.0 full-course equivalents) to fulfill the requirements for French Majors as specified in Faculty of Arts section 4.28.1.

**French 211** 3 units; H(3-1)

**Beginners’ French II**
A continuation of French 209.

**Prerequisite(s):** French 20 or French 209.

**Antirequisite(s):** Credit for French 211 and either 20 or 31 will not be allowed

**Note:** Students starting in French 211 must complete at least 51 units (8.5 full-course equivalents) to fulfill the requirements for French Majors as specified in Faculty of Arts section 4.28.1.

**French 213** 3 units; H(3-1)

**Intermediate French**
Further development of abilities in spoken and written French. Review of French grammar along with extensive oral and written practice.

**Prerequisite(s):** One of French 211, 30, or N30.

**Antirequisite(s):** Credit for French 213 and any of 215, 217 or 225 will not be allowed.

**French 225** 3 units; H(3-1)

**La Grammaire par les textes I**
Apprentissage des structures grammaticales et logiques du français contemporain avec lectures de morceaux choisis de textes de la francophonie mondiale.

**Prerequisite(s):** Prérequis: French 30N ou 30S ou 31 (ou équivalents), ou French Language Arts 30, ou French 213.

**Antirequisite(s):** Anti-prérequis: Les étudiants qui ont pris le cours French 315 ne peuvent s’inscrire en French 225.

---

**French 799.02. Empirical Methods in Finance**

**Prerequisite(s):** French 20 or French 209.

**Antirequisite(s):** Credit for French 211 and either 20 or 31 will not be allowed

**Note:** Students starting in French 211 must complete at least 51 units (8.5 full-course equivalents) to fulfill the requirements for French Majors as specified in Faculty of Arts section 4.28.1.

**French 799.03. Topics in Finance**

**Prerequisite(s):** Consent of the Haskayne School of Business.

**MAY BE REPEATED FOR CREDIT**

**French 799.04. Financial Engineering**

**French 799.05 Theory of Corporate Finance**

**French 799.06 Asset Pricing**

**French 799.07 Topics in Asset Pricing and Corporate Finance**

---

**French 799.01. Theory of Finance**

**French 799.02. Empirical Methods in Finance**

**French 799.03. Topics in Finance**

**French 799.04. Financial Engineering**

**French 799.05 Theory of Corporate Finance**

**French 799.06 Asset Pricing**

**French 799.07 Topics in Asset Pricing and Corporate Finance**

---

**French 799.01. Theory of Finance**

**French 799.02. Empirical Methods in Finance**

**French 799.03. Topics in Finance**

**French 799.04. Financial Engineering**

**French 799.05 Theory of Corporate Finance**

**French 799.06 Asset Pricing**

**French 799.07 Topics in Asset Pricing and Corporate Finance**

---

**French 799.01. Theory of Finance**

**French 799.02. Empirical Methods in Finance**

**French 799.03. Topics in Finance**

**French 799.04. Financial Engineering**

**French 799.05 Theory of Corporate Finance**

**French 799.06 Asset Pricing**

**French 799.07 Topics in Asset Pricing and Corporate Finance**
### Courses of Instruction

#### French 227
3 units; H(3-1)

**La Grammaire par les textes II**

Suite du cours French 225 et mise en pratique des structures acquises.

**Prerequisite(s):** Prérequis: French 225.

**Antirequisite(s):** Anti-prérequis: Les étudiants qui ont pris French 315 ou 317 ne peuvent s’inscrire en French 227.

French 291
3 units; H(3-0)

**Francophonie: Langue et Culture I**

Étude de la langue et de la culture des pays francophones, y compris la France, le Canada et les pays d’Afrique, des Caraïbes et d’Asie. Introduction aux sources et aux outils de recherche nécessaires pour cette étude et pour la production de travaux écrits et oraux.

**Prerequisite(s):** Prérequis: French 30N ou 30S ou 31 (ou équivalents), ou French Language Arts 30, ou French 213.

**Antirequisite(s):** Anti-prérequis: Les étudiants qui ont pris le cours French 215 ne peuvent s’inscrire en French 291.

#### Senior Courses

**Ne sont admissibles aux cours avancés que les étudiants qui possèdent déjà une connaissance suffisante de la langue française. En cas de doute, prière de consulter le Département.**

Senior courses are open only to students who have a sufficient knowledge of French. Students who are in doubt about their level of knowledge should consult the School.

French 329
3 units; H(3-0)

**Expression écrite et orale**

Grammaire avancée. Perfectionnement de techniques d’expression écrite et orale. Introduction à la recherche.

**Prerequisite(s):** Prérequis: French 227.

**Antirequisite(s):** Anti-prérequis: Les étudiants qui ont pris le cours French 415 ne peuvent s’inscrire en French 329.

French 339
3 units; H(3-0)

**Concepts littéraires**

**Prerequisite(s):** Prérequis: French 227.

French 343
3 units; H(3-2)

**Cinéma de langue française**

Introduction à l’analyse de films en français.

**Prerequisite(s):** Prérequis: French 227.

French 353
3 units; H(3-0)

(Anciennement French 359)

**Histoire littéraire**

Aperçu chronologique des périodes, mouvements et écoles des littératures de langue française, accompagné d’études de textes.

**Prerequisite(s):** Prérequis: French 227.

French 369
3 units; H(3-0)

**Introduction à la linguistique française**

Initiation à l’approche scientifique (objectif et systématique) du langage humain. Fonctions du langage et rôle des linguistes. Concepts de base de la linguistique: langue, langage, parole, synchronie vs diachronie; signifiant vs signifié; paradigmatique vs syntagmatique; double articulation; phonèmes, monèmes. Différents domaines de la linguistique.

**Prerequisite(s):** Prérequis: French 227.

French 391
3 units; H(3-0)

**Francophonie: langue et culture II**

**Prerequisite(s):** Prérequis: French 227.

French 393
3 units; H(3-0)

**Français professionnel**

Cours de langue française sur objectifs spécifiques et à visée professionnelle. Idéal pour les domaines aussi variés que les affaires, le tourisme, le droit, la médecine, les sciences, les relations internationales, la traduction, etc. Le format et le contenu peuvent varier d’une année à l’autre.

**Prerequisite(s):** Prérequis: French 227.

**MAY BE REPEATED FOR CREDIT**

French 399
3 units; H(3-0)

**Langue française, littérature et culture**

Étude des aspects de la langue française, de la littérature et de la culture. Les supports utilisés incluent les textes authentiques, la BD, la chanson, les médias, etc. Exemples de sujets traités: le monde francophone, l’histoire de la langue française, etc. Le format et le contenu peuvent varier d’une année à l’autre.

**Prerequisite(s):** Prérequis: French 227.

**MAY BE REPEATED FOR CREDIT**

French 439
3 units; H(3-0)

**Le Canada francophone**

Panorama de la littérature canadienne de langue française.

**Prerequisite(s):** Prérequis: French 329, plus six autres unités (deux autres demi-cours) de français de niveau 300.

French 449
3 units; H(3-0)

**Littérature francophones**

Panorama des productions littéraires de langue française en Afrique, au Maghreb et aux Antilles.

**Prerequisite(s):** Prérequis: French 329, plus six autres unités (deux autres demi-cours) de français de niveau 300.

French 453
3 units; H(3-0)

**Littérature du Moyen-Âge et de la Renaissance**

Panorama de la littérature française du Moyen-Âge et de la Renaissance.

**Prerequisite(s):** Prérequis: French 329, plus six autres unités (deux autres demi-cours) de français de niveau 300.

French 457
3 units; H(3-0)

**Littérature du 18e siècle**

Panorama de la littérature française du 18e siècle.

**Prerequisite(s):** Prérequis: French 329, plus six autres unités (deux autres demi-cours) de français de niveau 300.

French 459
3 units; H(3-0)

**Littérature du 19e siècle**

Panorama de la littérature française du 19e siècle.

**Prerequisite(s):** Prérequis: French 329, plus six autres unités (deux autres demi-cours) de français de niveau 300.

French 463
3 units; H(3-0)

**Littérature des 20e-21e siècles**

Panorama de la littérature française des 20e-21e siècles.

**Prerequisite(s):** Prérequis: French 329, plus six autres unités (deux autres demi-cours) de français de niveau 300.

French 489
3 units; H(3-0)

**Aspects de la linguistique française**

489.01. Phonologie
489.02. Morphologie
489.03. Syntaxe
489.04. Sémantique
489.05. Lexicologie

**Prerequisite(s):** Prérequis: French 369 plus six autres unités (deux autres demi-cours) de français de niveau 300.

**Antirequisite(s):** Anti-prérequis: Les étudiants qui ont pris le cours French 349 ne peuvent s’inscrire en French 489.01 (Phonologie).

French 499
3 units; H(3-0)

**Langue française, littérature et culture II**

Étude des aspects de la langue française, de la littérature et de la culture. Les thèmes de ce cours seront abordés à l’aide de méthodes novatrices.

**Prerequisite(s):** Prérequis: French 329, plus six autres unités (deux autres demi-cours) de français de niveau 300.

**MAY BE REPEATED FOR CREDIT**

French 511
3 units; H(3-0)

**Théories critiques**

Présentation de certaines théories contemporaines qui ont cours en études littéraires et culturelles. Le format et le contenu peuvent varier d’une année à l’autre.

**Prerequisite(s):** Prérequis: Neuf unités (trois demi-cours) de français de niveau 400.

Note: Remarque: Ce cours est obligatoire pour les étudiants inscrits au programme du baccalauréat spécialisé (“Honours”) de français.

**MAY BE REPEATED FOR CREDIT**

French 525
3 units; H(3-0)

**Études indépendantes: apprentissage expérimental**

Stage de recherche sous la direction de professeurs du Département ou stage en milieu francophone. Rapport de fin de stage rédigé en français.

**Prerequisite(s):** Prérequis: Autorisation du Département après remise par l’étudiant d’une proposition écrite avant le 1er décembre précédent immédiatement le cours.

Note: Remarque: Ce cours sera offert en hiver seulement pour permettre aux étudiants (a) de prendre les dispositions nécessaires avant le 1er décembre et (b) de recevoir l’approbation du Département.

**NOT INCLUDED IN GPA**
Courses of Instruction

French 539  3 units; H(3-0)
Étude spécialisée du Canada français
Séminaire sur des sujets avancés dans le domaine de la langue, de la littérature ou de la culture du Canada français. Le format et le contenu peuvent varier d’une année à l’autre.
Prerequisite(s): Prérequis: Neuf unités (trois demi-cours) de français de niveau 400.

Exemples de sujets traités: l’histoire des idées, la littérature française du Moyen Âge, l’autobiographie, l’écriture des femmes de langue française, le criollo dans les écrits de langue fran-

Geography GEOG

Geography 205  3 units; H(3-2)
The Physical Environment
Introduction to the physical elements of the environment such as weather, climate, hydrology, landforms, soils, vegetation, and the processes producing variations of these elements on the surface of the earth. The social implications of environmental change, disasters, and hazards are emphasized.
Prerequisite(s): Pure Mathematics 30 or Mathematics 30-1 or equivalent or Mathematics 2 (offered by Continuing Education).
Note: This course is intended as a foundation for advanced courses in Geography. Student looking for a general interest Geography course are advised to enrol in Geography 206 or 213.

Geography 211  3 units; H(3-0)
Geography of World Affairs
Focuses on the major culture regions of the world and also individual countries. Emphasis on the characteristics, distribution, inter-relationships and comparisons of the major culture and physical phenomena of these areas, i.e., population, political situation, economy, language, religion and environment. Some historical developments in each of these areas are presented for perspective, but the major emphasis is on the background for understanding contemporary world affairs.

Geography 231  3 units; H(3-3)
Introduction to Geospatial Methods
An introduction to cartography, remote sensing, geographic information systems, and descriptive spatial statistics.
Prerequisite(s): Pure Mathematics 30 or Mathematics 30-1 or equivalent or Mathematics 2 (offered by Continuing Education).
Note: This course is intended as a foundation for advanced courses in Geography. Student looking for a general interest Geography course are advised to enrol in Geography 206 or 213.

Geography 251  3 units; H(3-2)
The Human Environment
The study of people, their origins, culture, technology, economy and impact on the environment. The manner in which people attempt to impose order upon the surface of the earth. Concepts of relative location are introduced with particular regard to
Courses of Instruction

both the external orientation and the internal organization of urban areas.

Note: This course is intended as a foundation for advanced courses in Geography. Student looking for a general interest Geography course are advised to enrol in Geography 205 or 213.

Geography 253 3 units; H(3-0) (Urban Studies 253)

Introduction to Cities
A broad introductory survey, from diverse perspectives, of the processes that shape cities and urban life.

Senior Courses

Geography 305 3 units; H(3-2)
Weather and Climate
Physical principles of meteorology and climatology. Weather development in relation to different scales of atmospheric circulation. Elements of synoptic and dynamic climatology as determinants of characteristics and the distribution of climates. Laboratory work emphasizes North American examples.
Prerequisite(s): Geography 211.

Geography 307 3 units; H(3-2)
Landform Processes and Morphology
A systematic study of the physical processes that shape the Earth’s surface.
Prerequisite(s): Geography 211.

Geography 311 3 units; H(3-0)
Natural Events and Human Disasters
Explores how various Earth processes create hazards for humans in different regions. Topics may include earthquakes, volcanic eruptions, tsunamis, floods, landslides, hurricanes, drought, famine and disease. Lectures will focus on: the causes of dangerous natural events, how the physical geography of a region affects its vulnerability, historic human impacts, and how people in different regions perceive and mitigate risk from these events.
Prerequisite(s): Credit for Geography 311 and 397.07 will not be allowed.

Geography 313 3 units; H(3-2)
Soils and Vegetation
Soil: physical, chemical and biological properties, and the environmental and spatial relationships of vegetation patterns.
Prerequisite(s): Geography 211.

Geography 315 3 units; H(3-0)
Global Water Resources
Distributions of fresh water in space and time at regional and global scales. Emphasis on inter-relationships of water, humans and natural ecosystems and impacts on water quality and quantity. Introductory-level exploration of twenty-first century challenges linked to the development of fresh water resources in the global environment.

Geography 317 3 units; H(3-0)
Animal Geography
Explores the socio-spatial relationships between humans and animals, with the goal of elucidating the ecological, economic, political, social, and cultural pressures shaping these relations, and the conflicts arising from human-animal interactions. Inter-species bonds and emotional lives of animals are also covered.

Geography 321 3 units; H(3-0)
Geography and Our Environment
Environmental and resource issues, with emphasis on topics such as sustainability, ethics, planning; policy and decision making; and management strategies. Case examples highlight issues in resource sectors such as freshwater, oceans, parks and wildlife, tourism and recreation, forests and energy.

Geography 333 3 units; H(3-3)
Remote Sensing and Raster GIS
Basic instruction in the use and interpretation of remote sensing imagery. Basic principles of raster display, computation and analysis. Identification, interpretation and mapping of both physical and cultural landscape features.
Prerequisite(s): Geography 231.

Geography 339 3 units; H(3-2)
Analytical Methods in Geography I
Introduction to quantitative research methodology, sampling and survey design in geography. Covers the background analytical techniques for an understanding of geographic literature. Examples will involve the use of statistical computer packages.
Prerequisite(s): Geography 231.

Geography 340 3 units; H(3-0)
Qualitative Methods in Human-Environmental Research
Introduction to qualitative research methods and research design in human geography and environmental geography.
Prerequisite(s): One of Geography 205, 251, 253; Urban Studies 253.

Geography 341 3 units; H(3-0)
Introduction to Economic Geography
Theories, concepts and techniques of economic geography with emphasis on policy issues relating to Canadian examples at the urban, regional, and national levels.
Prerequisite(s): One of Geography 251, 253, Urban Studies 253.

Geography 351 3 units; H(3-0)
Urban Social Geography
Concepts of urban geography with particular reference to intra-urban social issues.
Prerequisite(s): One of Geography 251, 253, Urban Studies 253.

Geography 357 3 units; H(3-3)
Concepts of GIS
The technical and theoretical foundations of Geographic Information Systems (GIS). Explorations of data types and structures, metadata, data input and manipulation, analytical basics, and visualization techniques will be carried out in lecture and laboratory. Emphasis on vector-based GIS analysis.
Prerequisite(s): Geography 231 or both 333 and 339.

Geography 361 3 units; H(3-2)
Cultural Geographies
Examination of how cultural processes (ways of doing, thinking, representing, creating, relating) inform environment – society interactions.
Prerequisite(s): One of Geography 251, 253, Urban Studies 253.

Geography 365 3 units; H(3-0)
Political Geography
Spatial study of political systems, structures and processes, and their relationship to geographic factors.
Prerequisite(s): One of Geography 251, 253, Urban Studies 253.

Geography 367 3 units; H(3-2)
Population Geography
Spatial distribution of population, including density composition and characteristics; patterns of migration and settlement in selected areas.
Prerequisite(s): One of Geography 251 or 253 or Urban Studies 253.

Geography 371 3 units; H(3-0)
Latin America
A survey of the physical, cultural and historical geography of Latin America.
Prerequisite(s): Any course in Geography.

Geography 377 3 units; H(3-0)
Sub-Saharan Africa
Dimensions and underlying causes of issues facing African peoples: the colonial legacy, fragile environment, cultural and political diversity, population growth, resource development, urbanization, and economic challenges.
Prerequisite(s): Any course in Geography.

Geography 381 3 units; H(3-0)
Canada
The regional geography of Canada. The physical framework of Canada and its significance in Canada’s historical development. The concept of the geographic region, the patterns and characteristics of these regions, with selected detailed studies.
Prerequisite(s): Any course in Geography.

Geography 391 3 units; H(80 hours)
Geographic Field Studies
An introduction to field research techniques and topics in physical and human geography. Lectures and projects will provide an introduction to a range of geographic disciplines. Field exercises will normally be conducted away from Calgary for about ten days before Fall Term.
Prerequisite(s): One of Geography 211, 251, 253, Urban Studies 253, Geology 201, 209; and consent of the Department.

Note: Enrolment in Geography 391 may be limited. Preference for registration is given to Majors in Geography, Earth Science and Environmental Science. A supplementary fee will be assessed to cover additional costs associated with this course.

Geography 392 3 units; H(3-7)
Overseas Field Studies in Physical and Environmental Geography - Part I
Field research and reconnaissance survey of techniques applied to regions outside North America. Group travel-study combined with formal instruction and seminars.
Prerequisite(s): Consent of the Department.

Note: A supplementary fee will be assessed to cover additional costs associated with this course.
MAY BE REPEATED FOR CREDIT
Courses of Instruction

Geography 393 3 units; H(3-7)
Overseas Field Studies in Physical and Environmental Geography - Part II
Field research and reconnaissance survey techniques applied to regions outside North America. Group travel-study combined with formal instruction and seminars.
Corequisite(s): Geography 392.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.
MAY BE REPEATED FOR CREDIT

Geography 394 3 units; H(3-7)
Overseas Field Studies in Social and Economic Geography - Part I
Field research and reconnaissance survey techniques applied to regions outside North America. Group travel-study combined with formal instruction and seminars.
Prerequisite(s): Consent of the Department.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.
MAY BE REPEATED FOR CREDIT

Geography 395 3 units; H(3-7)
Overseas Field Studies in Social and Economic Geography - Part II
Field research and reconnaissance survey techniques applied to regions outside North America. Group travel-study combined with formal instruction and seminars.
Corequisite(s): Geography 394.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.
MAY BE REPEATED FOR CREDIT

Geography 397 3 units; H(3-0)
Regional Geography of Selected World Areas
Selected regional geographies. A survey of the physical, cultural and historical geography of a world region.
Antirequisite(s): Credit for Geography 397.01 and 379 will not be allowed; 397.02 and 387 will not be allowed; 397.03 and 389 will not be allowed.
Note: A previous course in geography is strongly recommended as preparation for this course.
MAY BE REPEATED FOR CREDIT

Geography 403 3 units; H(2-2)
Oceanography
Oceanic circulation, marine biogeochemistry and atmosphere-ocean interactions as controls of climate. Focus on the role of the marine cryosphere at regional, hemispheric and global scales. Interaction of the oceans with landforms, the hydrologic cycle, climate, and people. Laboratory activities to develop field research and analytical skills applicable to all fields of physical geography.
Prerequisite(s): Geography 305.

Geography 407 3 units; H(3-0)
Wind Science
Physical laws governing wind processes in the upper atmosphere and the planetary boundary layer. Topics include: global wind patterns, boundary layer wind flow, pollution, wind energy, wind erosion, and wind storms.
Prerequisite(s): Geography 305.

Geography 411 3 units; H(3-3)
Fluvial Geomorphology
Contemporary theory in fluvial geomorphology. Topics include channel flow, sediment transport, stream morphology, channel pattern, channel networks, sedimentation and channel response to human and natural environmental change.
Prerequisite(s): Geography 307.

Geography 413 (Archaeology 413)
3 units; H(3-2)
Soil Characteristics and Formation
Characteristics of soils and the processes and factors of soil formation. Soil development related to geomorphic materials, geomorphic events, anthropogenic sources, and erosional and depositional landscapes.
Prerequisite(s): Geography 313.

Geography 415 3 units; H(3-2)
Hydrology
The physical basis of water utilization and management. Elements of the hydrologic cycle - precipitation, ground water and stream flow. Techniques for estimating water yield and renewal potential in drainage basins.
Prerequisite(s): Geography 305 or 307, and 339; or a course in Statistics by consent of the Department.

Geography 417 3 units; H(3-3)
Biogeography and Conservation
A multidisciplinary area of contemporary science that examines the distribution (past and present) of animals and plants, causes of variation in species types, abundance and survival across the globe with an emphasis on human impact on species (e.g. road fragmentation, disease, climate change) and mitigation. The discipline forms a critical link between the earth sciences (geology and geography) and life sciences (biology). Experiential learning is supported through field-based and geospatial labs.
Prerequisite(s): Geography 313.

Geography 421 3 units; H(3-0)
Renewable Resources, Natural Environments and Sustainability
Sustainability approaches and praxis in renewable resources and natural environments; case studies and research projects in topics such as urban natural areas, wilderness parks and reserves, freshwater resources and fisheries.
Prerequisite(s): Geography 321.

Geography 425 3 units; H(3-0)
Critical Approaches to Development: Theory and Applications
A critical approach to meanings of economic and social development and the theories of development from a spatial perspective. Other areas of study include: population and health dynamics, gender and development, rural development, industrialization, formal and informal economies, foreign aid, trade and debt, community development. Case studies from Latin America, Asia and Africa.
Prerequisite(s): Geography 351 or 365.

Geography 429 3 units; H(3-0)
Tourism, Recreation and Environmental Management
Issues in tourism, recreation and environmental management in urban and rural settings; sustainable tourism; cultural and heritage tourism; adventure and eco-tourism; parks and green spaces. Uses case studies and original research opportunities.
Prerequisite(s): Geography 321.

Geography 433 3 units; H(3-3)
Remote Sensing
Principles of earth resource analysis using digital images collected from instruments on airborne and spaceborne platforms. The full range of the electromagnetic spectrum currently used in remote sensing. Emphasis will be given to complementing conventional data and methods with automated techniques.
Prerequisite(s): Geography 333 and 339.

Geography 437 3 units; H(3-3)
Cartography and Geographic Visualization
The role of geography and geographic visualization is explored both theoretically and practically in the communication of spatial data. Topics will relate to major issues in advanced map design and spatial data interaction with examples from the urban, cultural and environmental settings. Sample approaches will be critically examined within lectures and laboratories.
Prerequisite(s): Geography 231; and one of Geography 333 or 357.

Geography 439 3 units; H(3-2)
Analytical Methods in Geography II
Methods for the analysis of temporal, spatial and multivariate data sets. Emphasis is placed on data sets relating to geographic phenomena, resource utilization and environmental problems, with examples from the geographic literature. Examples will involve the use of computer packages.
Prerequisite(s): Geography 339.

Geography 451 3 units; H(3-0)
Urban and Environmental GIS
The role of Geographic Information Systems in environmental research and management is explored both theoretically and practically. Topics will relate to major issues within the urban and environmental fields. Advanced analytical approaches will be critically examined within lecture and laboratories.
Prerequisite(s): Geography 341.

Geography 457 3 units; H(3-3)
Urban Systems Development
A critical review of the geographical principles of urban growth and uneven development in the context of local, regional and global urban systems. Topics may include urbanization processes under capitalism, city-regions, global city networks, returns to urban agglomeration, inter-spatial competition, and transnational movements of capital and labour.
Prerequisite(s): Geography 341.

Geography 463 3 units; H(3-0)
Cities, Poverty and Development
Analysis of the explosive growth and geographical character of Third World cities. Topics normally include: rural-urban migration, development theory and urbanization, housing, formal/informal labour market, service and food provision, social and political conflict. Case studies from Latin America, Asia and Africa.
Prerequisite(s): Geography 351 or 365.

Geography 465 3 units; H(3-0)
Science, Nature, Politics
Examines competing claims about knowledge, authority and expertise that occur in environmental
and other science-based controversies. Introduces core concepts and debates surrounding risk, uncertainty, and democratic engagement in technoscientific contexts, with a focus on the shifting role of citizens and, more generally, publics, in geography, environmental decision-making and urban planning. Science, Technology and Society (STS) frameworks will evaluate how avenues for public engagement are understood and constructed in relation to fundamental societal issues.

**Prerequisite(s):** 60 units (10.0 full-course equivalents).

**Geography 470** 3 units; H(3-0)

**Behavioural Geography**

An approach to human geography that studies and explains human behaviour in geographical space as a function of normative, descriptive, and prescriptive models of human judgment and decision-making. Focus on how humans perceive the environment around them in both physical and behavioural terms, and how they use this information when making judgments and choices that lead to behaviour. Includes material on environmental decision support.

**Prerequisite(s):** Geography 251 and 60 units (10.0 full-course equivalents).

**Geography 479** 3 units; H(3-0) (Anthropology 479)

**Housing and Society**

Examines interactions between housing and social organization in cross-cultural context. Emphasizes the varied types of built form, their cultural meanings, implications for social life within households and for society more broadly, and their political and economic consequences. Pays particular attention to contemporary housing problems such as homelessness and urban sprawl.

**Prerequisite(s):** Geography 351 or Anthropology 379.

**Geography 503** 3 units; H(3-0)

**Climate Change**

Overview of global climate dynamics and the interactions between ocean, atmosphere, biosphere, cryosphere, and biogeochemical cycles. Examination of climate change in Earth’s past, present, and future, scrutinizing both natural and anthropogenic influences on the global climate system.

**Prerequisite(s):** Geography 305.

**Geography 507** 3 units; H(3-3)

**Glacial Geomorphic Systems**

Contemporary theories for the formation of glacial landforms and sediments are evaluated. Topics include glacial mechanics, erosion, deposition, and hydrology. Timing and dynamics of glaciation and deglaciation are addressed.

**Prerequisite(s):** Geography 307.

**Note:** Geography 411 is strongly recommended.

**Geography 509** (formerly Geography 409) 3 units; H(3-3)

**Permafrost**

Development, characteristics and significance of permafrost, including the thermal and hydrological processes and resulting periglacial geomorphology and geotechnical implications.

**Prerequisite(s):** Geography 305 and 307.

**Geography 516** (formerly Geography 515) 3 units; H(3-3)

**Ecohydrology**

Linkages between physical, chemical and biological processes influencing hydrology in headwater catchments. Application of process-based knowledge to problems of water quality management and ecosystem reclamation.

**Prerequisite(s):** Geography 415.

**Geography 519** 3 units; H(3-2)

**Landscape Ecology**

Concepts and methods for examining the spatial pattern of natural and managed landscapes and their effects on ecological processes. Applications in land management and biological conservation will also be considered.

**Prerequisite(s):** One of Geography 313 or Biology 313 and one of Geography 339 or Biology 315.

**Note:** At least one of the following is also strongly recommended: Geography 417, 421, 517, or Ecology 419, 439, 501.

**Geography 521** 3 units; H(3-0)

**The Urban Environment**

Urban environments and their construction as a reflection of human needs and non-human constituents, systems of production and distribution, urban policy, infrastructure, and design are considered from the perspectives of both physical and human geography. Critical examination of anthropocentric notions of duality, space, place, and ‘the other’ frame the examination of human management practices and non-human nature. Topics may include the explosion of monocultures and exotic species, heightened human-wildlife conflict, altered hydrological systems, air pollution, changing environments of infectious disease, and toxic waste.

**Prerequisite(s):** 6 units (1.0 full-course equivalent) from Geography 317, 321, 351, 417, 421, 451.

**Geography 522** 3 units; H(3-0)

**Topics in Politics of the Environment**

Key issues in environmental policy, focusing on the power and interest mechanisms that determine environmental resource access and sustainable use. Case-specific applications explore the dynamic roles of the global and the local including international development paradigms, indigenous resource rights, common-pool resource management, powerful policy networks, and local communities struggling in between.

**Prerequisite(s):** Geography 321 plus one of 361, 421, 425, 429.

**MAY BE REPEATED FOR CREDIT**

**Geography 529** 3 units; H(3-0)

**Research and Planning for Tourism and Recreation Resources**

Research and techniques in analysis, planning and management of tourist and recreational resources. Usually involves a major case study/field research project.

**Prerequisite(s):** Geography 421 or 429 and consent of the Department.

**MAY BE REPEATED FOR CREDIT**

**Geography 533** 3 units; H(2-3)

**Topics in Geospatial Analysis**

Advanced topics of current interest in one or more of remote sensing, geographic information science and spatial statistics. Chosen topics vary by term and focus on integrating raster and vector systems.

**Prerequisite(s):** Any two of Geography 433, 439, 457 and consent of the Department.

**Note:** Students should consult the Department before registering to learn what topics will be covered in a given year.

**MAY BE REPEATED FOR CREDIT**

**Geography 553** 3 units; H(3-0)

**Globalization and the City**

Introduction to the social, cultural, political and economic forces operating on a global scale that increasingly shape the dynamics of cities. Emphasis is placed on social and cultural hybridity, translocal interaction, geographies of social and economic polarization, and the scalar politics and regulation of globalization.

**Prerequisite(s):** One of Anthropology 379, 387, Economics 365, Geography 341, 351, or Sociology 353.

**Geography 565** 3 units; H(3-0)

**Urban Political Geography**

An examination of how urban spatial relations shape, and are shaped by, political institutions, organizations, and social movements. Themes may include the politics of urban growth, urban environmental justice, urban sustainability, place-based politics, and multi-scalar politics.

**Prerequisite(s):** Geography 351 or 451.

**Geography 567** 3 units; H(3-3)

**Introduction to Programming in Geographic Information Systems**

Introduction to computer programming for customizing and automating a GIS. Topics include object-oriented programming techniques, advanced geoprocessing, scripting, and automation using a programming language such as Python or Visual Basic.

**Prerequisite(s):** Geography 357.

**Note:** Geography 457 is recommended.

**Geography 591** 3 units; H(3-7)

**Overseas Field Studies in Physical and Environmental Geography**

Field research and reconnaissance survey techniques applied to regions outside North America. Individual and group travel-study combined with formal instruction and seminars.

**Prerequisite(s):** Consent of the Department.

**Antirequisite(s):** Credit for Geography 591 and 590 will not be allowed.

**Note:** A supplementary fee will be assessed to cover additional costs associated with this course.

**MAY BE REPEATED FOR CREDIT**

**Geography 593** 3 units; H(3-7)

**Overseas Field Studies in Social and Economic Geography**

Field research and data collection techniques applied to geographical phenomena in regions outside North America. Periods of individual and group travel-study are interspersed with formal instruction and seminars.

**Prerequisite(s):** Consent of the Department.

**Antirequisite(s):** Credit for Geography 593 and 592 will not be allowed.

**Note:** A supplementary fee will be assessed to cover additional costs associated with this course.

**MAY BE REPEATED FOR CREDIT**

Courses of Instruction

403

Geography GEOG
Geology GLGY

Instruction offered by members of the Department of Geoscience in the Faculty of Science.

Students interested in taking geology courses are urged to read the advice in the Faculty of Science Program section of this Calendar.

Junior Courses

Geology 201 3 units; H(3-3)

Principles of Geoscience
Composition and internal structure of the Earth; surface processes; internal processes and global tectonics; rocks and minerals, topographic and geologic maps.

Antirequisite(s): Credit for Geology 201 and either 209 or 471 will not be allowed.

Geology 202 3 units; H(3-3)

Applications of Geoscience
Applications of geology and geophysics to the study of earthquakes, volcanoes and other geologic hazards; natural resources; environmental management; human impact on the Earth and global change.

Prerequisite(s): Geology 201.

Antirequisite(s): Credit for Geology 202 and 203 will not be allowed.

Geology 209 3 units; H(3-0)

Introduction to Geology
Basic concepts regarding the major features of Earth; its rock and mineral composition, processes controlling erosion, deposition and surface structures; formation of mountains, ocean basins and continents; internal structure of the Earth and plate tectonics.

Antirequisite(s): Credit for Geology 209 and 201 will not be allowed.

Note: Not open for credit to Honours, Majors or Minors in Geology, Geology (Petroleum Geology Concentration), Applied and Environmental Geology, Geophysics, Environmental Science (Geology Concentration) or Natural Sciences (Geoscience Concentration).

Senior Courses

Geology 301 3 units; H(3-0)

Geology of the Mountain Regions of Western Canada
Selected topics encountered in introductory physical geology will be pursued in greater depth in order to explain the geology of Western Canadian Mountain Parks and adjacent areas.

Prerequisite(s): Geology 201 or 209.

Geology 305 3 units; H(2-1T)

Introduction to Dinosaurs
Biology, evolution, and extinction of dinosaurs; geographic and temporal distribution, habitats, and ecology of the various dinosaur groups; preservation, exploration, collection, preparation, and identification of dinosaur fossils.

Geology 307 3 units; H(3-0)

Geological History of Life
The history of life from the earliest records to the present. Fossils, geological time, extinction, basic paleontology. The rise and development of various animals and plants including dinosaurs, mammals and humans.

Geology 308 3 units; H(3-0)

Geology and Human Health
An overview of human health issues related to geologic phenomena. Examples of possible topics include medical geology, heavy metals in groundwater, effects of volcanic eruptions, effects of asbestos-type minerals, acid mine drainage and soil nutrient deficiencies.

Prerequisite(s): Geology 201 or 209.

Geology 313 3 units; H(3-3)

Mineralogy
The chemical and physical properties of the common minerals in the context of the common rock types; introduction to crystallography; optical properties of minerals; introduction to mineral associations and rock textures in hand samples and thin sections; introduction to analytical techniques (XRD, electron microprobe, etc.).

Prerequisite(s): Geology 201; Geology 202 or 203; Chemistry 201 or 211; Mathematics 249 or 251 or 265 or 275 or Applied Mathematics 217; Physics 211 or 221.

Antirequisite(s): Credit for Geology 313 and 423 will not be allowed.

Geology 323 3 units; H(3-3)

Geochemical Processes
Focus is on chemical processes taking place in geological settings with emphasis on the abundance relationships of the elements in the Earth and the processes governing the differentiation, migration and distribution of the elements. Discussions include mineral, rock and aqueous chemistries; applications of radiogenic and stable isotopes; thermodynamics and phase diagrams; biogeochemistry and organic geochemistry; analytical techniques; applications and case studies.

Prerequisite(s): Geology 313; Chemistry 201 or 211; Chemistry 203 or 213.

Geology 333 3 units; H(3-3)

Igneous, Metamorphic and Ore Rocks and Processes
Origin, identification, classification and interpretation of igneous and metamorphic rocks. Including common rock types, mineral assemblages and textures in hand samples and thin section, volcanic and plutonic processes and conditions, thermo-chemical conditions of metamorphic rock formation, introduction to ore deposits and ore minerals in hand sample, Canadian examples of ore deposits, tectonic settings of igneous, metamorphic and ore rocks.

Prerequisite(s): Geology 313; Chemistry 201 or 211; Chemistry 203 or 213.

Antirequisite(s): Credit for Geology 333 and 311 will not be allowed.

Geology 337 3 units; H(96-120 hours)

Introduction to Geologic Field Methods
Study of various rock types and sediment exposures focusing on recognition and description of rock types, construction of geological maps and cross-sections and measurement of stratigraphic sections. Field skills will include map interpretation, navigation, and measuring planar and linear features. Field exercises will normally be conducted off campus for about 12-15 days during August before the Fall Term of third year.

Prerequisite(s): Geology 333 or 311; and Geology 343 or 341; and Geology 381 and admission to programs in Geology or Geophysics or Applied Environmental Geology or Environmental Science (Geology concentration) or Natural Sciences (Geoscience concentration) and consent of the Department.

Note: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course.

Geology 343 3 units; H(3-3)

3D Geologic Structures and Methods
Methods of 3D geologic data collection, manipulation and interpretation. Special emphasis on maps and cross sections and the geometric methods and data types used to understand and work with 3D geologic relationships. Course will emphasize hands-on exercises and teach the application of: geologic maps, subsurface data; relative dating; cross-cutting relations, and 3D visualization of the architecture of geological bodies and surfaces and their relationship to causative processes.

Prerequisite(s): Geology 381.

Geology 353 3 units; H(3-3)

Surficial Systems
Overview of the geomorphologic and hydrologic processes that operate on and just beneath the Earth’s surface. Includes hydrology (precipitation, evaporation, soil water, ground water, and their interaction in watersheds), surface processes (erosion, weathering, rivers, glaciers, Quaternary geology, landforms); engineering properties of surface materials; applications (including aggregates and water as resources, geotechnical issues, water quality, etc.).

Prerequisite(s): Geology 201; and 202 or 203; Chemistry 203 or 213; Physics 211 or 221 and 223; Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219.

Antirequisite(s): Credit for Geology 353 and 373 will not be allowed.

Geology 377 3 units; H(3-3)

Petroleum Engineering Geology
The principles and methods of physical geology with special emphasis on their application to the exploitation of oil and gas. Laboratory: properties of minerals and rocks, analysis and interpretation of surface and subsurface maps, interpretation of borehole logs and core, properties of sedimentary rocks.

Antirequisite(s): Credit for Geology 377 and 201 will not be allowed. This course is not open to Geology majors.

Note: This course is restricted to engineering students.

Geology 381 3 units; H(3-3)

Sedimentary Rocks and Processes
Origin, identification, classification and interpretation of sediments, siliciclastic, carbonate and evaporate rocks. Study of sediment/rock components (minerals), fossils and textures in hand sample and thin section; sedimentary structures and processes; introduction to depositional environments; burial, lithification and diagenesis; applications, including introduction to basin anal-
A maximum of 6 units may be taken. This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course.

MAY BE REPEATED FOR CREDIT

Fields

Field study of geologically complex geological problems. Involves independent mapping and report writing. Field exercises will normally be conducted away from Calgary for about 10-12 days preceding the Fall Term or following the Winter Term.

Prerequisite(s): Geology 337 and 381; one of Geology 311 or 333; one of Geology 341 or 343 and admission to the Geology or Applied and Environmental Geology programs and consent of the Department.

Antirequisite(s): Credit for Geology 435 and either Geology 437 or 439 will not be allowed.

Note: A maximum of 6 units may be taken. This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. It may occur outside Canada. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course.

MAY BE REPEATED FOR CREDIT

Courses of Instruction

Geology 411 3 units; H(80-100 hours)

Field Techniques in Hydrogeology

Entails a week at a hydrogeology field site in Alberta or British Columbia. Hydrogeology and geotechnical techniques will be demonstrated and will involve hands-on participation by students. After the field work, students will conduct extensive analysis and interpretation of data gathered during the field session, complete exercises and prepare a written report. The course normally runs for two to three weeks following Winter Term Final Examinations or prior to the Fall Term.

Prerequisite(s): Geology 401 and consent of the Department.

Antirequisite(s): Credit for Geology 441 and 639 will not be allowed.

Note: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course.

Geology 415 3 units; H(3-3)

Structural Geology

Mechanical principles involved in the deformation of rocks; classification of tectonic structures in stratified and non-stratified rocks; manipulation of structural data and its predictive use. Includes basic kinematics, dynamics, rheology, and descriptive structural geology. Also includes a strong lab component emphasizing 3D problem solving, structural analysis, and the use of geologic data sets to construct geologic cross-sections.

Prerequisite(s): Geology 343.

Antirequisite(s): Credit for Geology 445 and 341 will not be allowed.

Geology 463 3 units; H(3-3)

Siliciclastic Sedimentology

Depositional and diagenetic facies models applied to main depositional settings for siliciclastic sedimentary rocks, based on both modern and ancient examples. Investigation of the linkages between provenance, deposition, stratigraphic stacking and diagenesis of siliciclastic rocks, and how these factors affect the quality of subsurface fluid reservoirs.

Prerequisite(s): Geology 313, 323 and 381 and one of 341 or 343.

Antirequisite(s): Credit for Geology 483 and 461 will not be allowed.

Geology 471 3 units; H(3-3)

Geology, Engineering, and the Environment

The principles and methods of physical geology with special emphasis on their application in dealing with civil engineering and environmental problems. Laboratory: properties of minerals and rocks, analysis and interpretation of geological maps, photogeology and seismic refraction in site investigation problems.

Antirequisite(s): Credit for Geology 471 and 201 will not be allowed.

Note: This course is restricted to engineering students. Students who have completed this course may visit the Undergraduate Science Centre to have Geology 471 used in lieu of Geology 201 for prerequisite purposes.

Geology 475 3 units; H(3-0)

The Geological Record of Global Change

Geochemical relationships among the atmosphere, hydrosphere, and lithosphere will be examined. Topics include the carbon cycle, chemical weathering, mid-ocean ridge hydrothermal activity, past changes in seawater chemistry, stable isotopes, climate change.

Prerequisite(s): Geology 201, and 202 or 203; Chemistry 201 or 211; Chemistry 203 or 213; Mathematics 249 or 251 or 265 or 275 or 281 or Applied Mathematics 217.

Geology 483 3 units; H(3-3)

Carbonate Sedimentology

Prerequisite(s): Geology 323 and 381; one of 491 or 493; and one of 431 or 343.

Antirequisite(s): Credit for Geology 483 and either 461 or 583 will not be allowed.

Geology 493 3 units; H(3-3)

Evolution of Earth Through Life and Time

Prerequisite(s): Geology 381.

Antirequisite(s): Credit for Geology 493 and 491 will not be allowed.

Geology 505 3 units; H(3-3)

Contaminant Hydrogeology

Chemical and biological processes in surface water and groundwater systems. Topics include: water quality, contaminant transport and dispersal, fluid-sediment interactions, remediation of contamination. Techniques will include the use of geochemical models, numerical modelling of contaminant migration, and examination of case studies.

Prerequisite(s): Geology 401 or 601 and Geology 403 or 503.

Antirequisite(s): Credit for Geology 505 and 609 will not be allowed.

Geology 509 3 units; H(0-9)

Independent Study

A written report based on independent study. Originality is emphasized, laboratory and field studies are encouraged.

Prerequisite(s): Science 311; consent of the Department and of a departmental faculty member.

MAY BE REPEATED FOR CREDIT

Geology 510 6 units; F(0-9)

Senior Thesis

A written report based on extensive independent study. Originality is emphasized, laboratory and field studies are encouraged.

Prerequisite(s): Science 311; consent of the Department and of a departmental faculty member who will act as a supervisor.

Geology 523 3 units; H(3-3)

Advanced Mineralogy

Crystal chemistry of important mineral groups. Relations between structure, property, and composition. Common structure types and their use in understanding complex minerals. Elements of
symmetry, space groups, X-ray diffraction techniques, and introduction to crystal structure determination and refinement using experimental data sets and extensive use of computers. Emphasis is on the interpretation and application of results to solving problems in Earth Sciences.

Prerequisite(s): Geology 313 or 423 and 78 units (13 full-course equivalents).

**Geology 527**
3 units; H(3-3)

**Ore Deposits**
Processes of formation of metallic ore and diamond ore deposits. Classification of ores based on petrogenetic association. Introduction to ore microscopy.

Prerequisite(s): Geology 431 and 433; or Geology 443.

Note: A week-end field trip will be run in September.

**Geology 535**
3 units; H(3-2S)

**Early Earth Evolution**
Geological evolution in the early stages (Precambrian) of Earth's history including planetary accretion, core formation, evolution of mantle and differentiation of bulk silicate earth, evolution of continental crust and its tectonic mechanisms, evolution of continental mantle lithosphere, evolution of atmosphere and hydrosphere, geologic record of early life, etc. Current geochemical and geodynamic models that attest to these events in the geological record will be explored.

Prerequisite(s): Geology 431 and 433; or Geology 443.

Antirequisite(s): Credit for Geology 535 and 599.18 will not be allowed.

**Geology 537**
3 units; H(80-100 hours)

**Advanced Field Methods**
Field study of geological problems using advanced methods. Field exercises will normally be conducted away from Calgary for about 10-12 days.

Prerequisite(s): Geology 333 or 311; Geology 381; Geology 435; Geology 445 or 341 and consent of the Department.

Note: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. It may occur outside Canada. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course.

**Geology 541**
3 units; H(3-3)

**Advanced Structural Geology**
Structural features of complexly folded strata: advanced fold and fault analysis; simple statistical analysis of data; structural analysis; applications to exploration and exploitation; cross-sections and balancing; advanced map interpretation; tectonics; neotectonics.

Prerequisite(s): Geology 445 or 341 and 78 units (13 full-course equivalents).

Antirequisite(s): Credit for Geology 541 and 641 will not be allowed.

Note: There may be a week-end field excursion during the term.

**Geology 543**
3 units; H(3-3)

**Advanced Igneous and Metamorphic Petrology**
Advanced study of igneous and/or metamorphic petrology, and integration with structure, geochronology and tectonics. Applications to problems in earth science. Includes use of microscopy and geochemistry, as well as possible application of instrumental methods.

Prerequisite(s): Geology 431 and 433; or Geology 443.

**Geology 545**
3 units; H(80-100 hours)

**Petroleum Geology Field School**
Description and analysis of sedimentary rocks in the field with the objective of recognizing and developing analog models for basin- and field-scale subsurface fluid reservoirs. Consideration of the range of factors affecting reservoir quality e.g. depositional settings, stratigraphy, diagenesis, deformation, etc. Field School will normally be conducted away from Calgary for about 10-12 days preceding the Fall Term or following the Winter Term.

Prerequisite(s): Geology 435 and consent of the Department.

Note: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course.

**Geology 555**
3 units; H(3-2S)

**Global Tectonics**
Global aspects of plate tectonics and regional geology through time. Application of fundamental stratigraphic and structural principles. Contributions of geophysics, geochemistry, experimental and theoretical petrology to the modern plate tectonic model. Analysis and interpretation of major structural provinces as they relate to plate boundary interactions.

Prerequisite(s): Geology 431 or 443, and Geology 493 or 491.

**Geology 561**
3 units; H(3-3)

**Sequence Stratigraphy**
Integrated approach to the study of genetic stratigraphic sequences and their bounding surfaces, linked to facies analysis of clastic and carbonate successions. Principles of sequence stratigraphy and applications to petroleum reservoirs.

Prerequisite(s): Geology 343 or 341; and Geology 381; and 78 units (13 full-course equivalents).

**Geology 571**
3 units; H(3-3)

**Engineering Geology**

Prerequisite(s): Geology 353 and 445.

**Geology 577**
3 units; H(3-3)

**Introduction to Petroleum Geology**
Fundamental concepts of petroleum geology from deposition/migration of source rocks to hydrocarbon generation, migrate on and accumulation. Principles of hydrocarbon production, introduction of atmosphere and hydrosphere, geologic evolution of continental mantle lithosphere, evolution of continental crust and its tectonic mechanisms, accretion, core formation, evolution of mantle lithosphere, evolution of atmosphere and hydrosphere, geologic record of early life, etc. Current geochemical and geodynamic models that attest to these events in the geological record will be explored.

Prerequisite(s): Geology 431 and 433; or Geology 443.

Antirequisite(s): Credit for Geology 535 and 599.18 will not be allowed.

**Geology 579**
3 units; H(3-3)

**Basin Analysis**

Prerequisite(s): Geology 445 or 341; and 463 or 483 or 461; and 493 or 491; and Geophysics 351 or 355.

Antirequisite(s): Credit for Geology 579 and 595.05 will not be allowed.

**Geology 581**
3 units; H(3-3)

**Advanced Petroleum Geology**
Principles and applications of the characterization of petroleum systems, reservoirs and their fluids with a focus on unconventional resources. Methods of reservoir characterization, log analysis, subsurface mapping and the evaluation of reservoir heterogeneity with respect to geological characteristics and fundamental fluid flow related reservoir and fluid properties. Also examines subsurface CO2 storage and other routes to eliminating CO2 emissions from fossil fuel use as well as looking at the role of geoscience in energy recovery innovation and technology development.

Prerequisite(s): Geology 577.

Antirequisite(s): Credit for Geology 581 and any of 575, 589.01, 589.02, 589.07, 589.08, 591, 595.01, 596, 689.01, 689.02, 689.07, 689.08, 694.01, 694.03, 696 will not be allowed.

**Geology 587**
3 units; H(3-3)

**Invertebrate Paleobiology**
Advanced study of selected groups of invertebrate fossil groups, micro- and macrofossils, with extensive presentation of various aspects related to morphology, fossilization, taxonomy, classification, biostratigraphical distribution, evolution, extinction, and industry applications. The lab component includes direct study on each of the fossil groups and advanced biostratigraphy exercises.

Prerequisite(s): Geology 493 or 491; or Geology 202 or 203 and Zoology 375.

**Geology 597**
3 units; H(3-3)

**Geostatistics**
Statistical analysis of spatial data, multivariate data analysis, regression, variogram analysis, kriging, co-kriging and stochastic simulation.

Prerequisite(s): Mathematics 253 or 267 or 283 or Applied Mathematics 219 and Mathematics 211 and 78 units (13 full-course equivalents).

Antirequisite(s): Credit for Geology 597 and 697 will not be allowed.

**Geology 599**
3 units; H(3-3)

**Contemporary Topics in Geology**
Courses are offered in contemporary topics in areas such as geochemistry, hydrogeology, mineralogy, paleontology, petroleum geology, petrology, and geologic evolution of continental crust and its tectonic mechanisms, accretion, core formation, evolution of mantle lithosphere, evolution of atmosphere and hydrosphere, geologic record of early life, etc. Current geochemical and geodynamic models that attest to these events in the geological record will be explored.

Prerequisite(s): Geology 431 and 433; or Geology 443.

Antirequisite(s): Credit for Geology 535 and 599.18 will not be allowed.

**MAY BE REPEATED FOR CREDIT**

**Graduate Courses**
Graduate students are urged to read the Geoscience Department section in the Graduate Studies calendar. Only where appropriate to a student's program may graduate credit be received for.
courses numbered 500-599. Courses numbered 600 are available to fourth-year students who obtain Departmental approval and who have credit for the prerequisite courses.

**Geology 601** 3 units; H(3-2)

**Advanced Physical Hydrogeology**
An advanced treatment of topics covered in Geology 401.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Geology 601 and 401 will not be allowed.

**Geology 602** 3 units; H(3-3)

**Advanced Aqueous Geochemistry and Environmental Microbiology**
An advanced treatment of Aqueous Geochemistry and Environmental Microbiology.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Geology 602 and either of 403 or 699.10 will not be allowed.

**Geology 605** 3 units; H(3-2T)

**Groundwater Flow and Transport Modelling**
Review of the partial differential equations and boundary conditions that describe groundwater flow and transport. Introduction to numerical methods. The course emphasizes the practical aspects of building groundwater and transport models using computer exercises and a groundwater modelling project.
Prerequisite(s): Geology 401 or 601.

**Geology 607** 3 units; H(3-0)

**Advanced Physical Hydrology**
Coverage of more advanced topics in the physical hydrology of surface and subsurface waters including land-atmosphere exchange, vadose zone processes, and watershed hydrology.
Prerequisite(s): Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219 and Geography 415 and Geology 401.

**Geology 609** 3 units; H(3-3)

**Advanced Contaminant Hydrogeology**
An advanced treatment of topics covered in Geology 505.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Geology 609 and 505 will not be allowed.

**Geology 611** 3 units; H(2-2)

**Groundwater Resource Management**
Advanced topics related to groundwater resource development and management, including exploration methods, aquifer test analysis, aquifer-aquifard systems, groundwater recharge, and the role of models. Fundamental issues related to regional integrated management of water resources.
Prerequisite(s): Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219 and Geology 401 or Geography 415.

**Geology 615** 3 units; H(0-6)

**Advanced Laboratory Methods in Geoscience**
An overview of analytical methods (XRD, SEM, FESFM, EPMA, XRF, ICP-MS, MS, organic geochemical analyses, etc.) in geoscience and their applications. The course will provide the theoretical background of the techniques as well as opportunities for practical experience. Particular emphasis will be placed on analytical techniques available within the department.
Prerequisite(s): Consent of the Department.
Note: Students must complete appropriate safety training prior to commencing lab related work.

**Geology 623** 3 units; H(3-3)

**Modern Diffraction and Scattering Techniques**
Space groups and principles of X-ray, neutron, and electron diffraction and their applications. Crystal structure determination and refinement using single crystal and Rietveld methods. X-ray and neutron scattering techniques (using the Pair Distribution Function, PDF) to examine local disorder in nano-materials and glasses. Phase transition and structural evolution with pressure, temperature, and composition. Analyses of experimental data sets and extensive use of computers.
Prerequisite(s): Geology 523.

**Geology 633** 3 units; H(3-3)

**Advanced Petrologic Methods**
Theoretical and applied problems in petrology, including some or all of numerical techniques in petrology, phase equilibria, geothermometry and geobarometry, kinetics in petrology, physics and chemistry of magmatic processes. Laboratory will consist of petrographic study of rock suites.
Prerequisite(s): Geology 543.

**Geology 637** 3 units; H(80-100 hours)

**Advanced Geoscience Field Studies**
Application of advanced concepts and/or methods to field problems of current interest.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Geology 633 and any of 435, 537 or 545 will not be allowed.
Note: A maximum of 6 units may be taken.

MAY BE REPEATED FOR CREDIT

**Geology 639** 3 units; H(80-100 hours)

**Field Laboratory in Groundwater Hydrogeology**
Entails a week at a hydrogeology field site in Alberta or British Columbia. Hydrogeology and geotechnical techniques will be demonstrated and will involve hands-on participation by students. After the field work, students will conduct extensive analysis and interpretation of data gathered during the field session, complete exercises and prepare a written report. Relative to Geology 441, Geology 639 requires more sophisticated analyses of data and additional exercises.
Prerequisite(s): Geology 401 or 601 and consent of the Department.
Antirequisite(s): Credit for Geology 639 and 441 will not be allowed.
Note: This course has limited enrolment. This course occurs in rugged field conditions and will not be allowed.

**Geology 641** 3 units; H(3-3)

**Advanced Structural Methods**
Analysis of mesoscopic and megascopic structural data; the construction and analytical use of cross-sections, subsurface maps and 3-dimen-

sional models; structural analysis of the Canadian Cordillera.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Geology 641 and 541 will not be allowed.
Note: There may be a week-end field excursion during the term.

**Geology 647** 3 units, H(2-2T)

**Geology Well Log Applications**
Geological applications of petrophysical well logs and integration with core descriptions and core analysis data. Derivation of reservoir properties from single-well and multi-well studies.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Geology 647 and any of Geology 449, 699.71, or Geophysics 449 will not be allowed.

**Geology 655** 3 units; H(3-0)

**Unconventional Gas Reservoir Characterization and Evaluation**
Overview of the unique storage and production mechanisms associated with coiled methane, tight gas and shale gas reservoirs; adsorbed gas storage and modelling; gas-in-place determination and volumetric reserves estimation; material balance techniques; fracture and matrix flow mechanisms; completion/stimulation methods; reservoir characterization methods including core analysis, rate-transient and pressure-transient analysis; exploration and development concepts.
Prerequisite(s): Petroleum Engineering 523 or consent of the Department.
Antirequisite(s): Credit for Geology 655 and 699.37 will not be allowed.

**Geology 660** 3 units; H(3-3)

**Advanced Sequence Stratigraphy**
Concepts and application of sequence stratigraphy to seismic, outcrops, cores, and well logs, with a focus on siliciclastic depositional systems.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Geology 660 and either of 561 or 699.34 will not be allowed.

**Geology 663** (Physics 663) 3 units; H(2-1)

**Applications of Stable Isotopes**
Application of stable isotope techniques with special focus on Hydrogeology, Geology and Environmental Sciences. The use of isotopes to understand the water, carbon, nitrogen and sulphur cycles is demonstrated. Topics include hydrology, paloeclimates, geothermometry, fossil fuels exploitation, restoration and recovery, pollutant tracing, food webs, forensic investigations, among others.
Prerequisite(s): Consent of the Department.

**Geology 675** 3 units; H(3-0)

**Advanced Topics in Dinosaur Paleontology**
Topics related to the paleobiology, paleoecology, and paleoenvironments of the Dinosaur will be covered.
Prerequisite(s): Consent of the Department or enrolment in a paleontology-based graduate program.

**Geology 683** 3 units; H(3-3)

**Advanced Carbonate Sedimentology**
Advanced coverage of carbonate sedimentology, including the origin of carbonate sediments,
Courses of Instruction

modern and ancient, and their depositional and diagenetic environments.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Geology 683 and either Geology 483 or 699.02 will not be allowed.

Geology 691 3 units; H(3-2)

Geological Applications of Well Logs
Geological applications of petrophysical well logs and integration with core descriptions and core analysis data. Derivation of reservoir properties from single-well and multi-well studies.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Geology 691 and any of Geology 699.71, 449, 649, Geophysics 449, or 649 will not be allowed.

Geology 697 3 units; H(3-3)

Advanced Geostatistics
Advanced treatment of the topics covered in Geol 597.

Prerequisite(s): Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219 and Mathematics 211.

Antirequisite(s): Credit for Geology 697 and 597 will not be allowed.

Note: Completion of Mathematics 331 and/or Statistics 357 or 327 is recommended prior to taking this course.

Geology 698 6 units; F(3-0)
(Chemical Engineering 698)

Reservoir Characterization for Field Development
A team-based, integrated reservoir description experience working with geophysical, geological, petrophysical, and engineering data to produce a field development plan.

Prerequisite(s): Chemical Engineering 621 and Geology 697 and Organizational Behaviour and Human Resources 789.

Note: This course is intended for graduate students in the Master of Science in Geology or Geophysics with a specialization in Reservoir Characterization.

Geology 699 3 units; H(3-3) or H(3-0)

Selected Topics in Geology
Courses are offered in specific topics in areas such as geochemistry, hydrogeology, mineralogy, paleontology, petroleum geology, petrology, quantitative geology, sedimentology, structural geology, and surficial geology.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Geology 701 3 units; H(0-6)

Advanced Independent Study
A written report based on laboratory and field studies is required.

Note: Open only to graduate students in the Department of Geoscience.

Geology 703 3 units; H(0-6)

Readings in Geology
A written report based on a literature review is required.

Note: Open only to graduate students in the Department of Geoscience.

Geology 705 3 units; H(3-0)

Graduate Skills in Geoscience
Provides incoming graduate students with an overview of professional skills that are key to success in graduate school and beyond. Presentation skills, writing scientific manuscripts, the peer review process, defense and candidacy exams, intellectual property and innovation, and networking basics.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Geology 705 and 699.56 will not be allowed.

Geology 707 3 units; H(2-2)

Geology and Geophysics of Western Canada
Topics include stratigraphy, sedimentology, structure, petrology, geophysics and economic geology. Laboratories contain a field component.

Note: Open only to graduate students in the Department of Geoscience and compulsory for beginning doctoral students in Geology.

Geology 733 3 units; H(0-3)

Analytical Methods in Petrology
Topics may include scanning electron microscopy, electron probe, X-ray diffraction and X-ray fluorescence.

Geomatics Engineering ENGO

Instruction offered by members of the Department of Geomatics Engineering in the Schulich School of Engineering.

Senior Courses

Geomatics Engineering 319 3 units; H(3-1.5T-2)

Introduction to Probability, Statistics, and Estimation
Presentation and description of data, introduction to probability theory, Bayes' theorem, discrete and continuous probability distributions, theory of errors and adjustment of observations. Familiarization with geomatics engineering methodology and estimation. The least squares method for linear parametric and conditional models.

Prerequisite(s): Mathematics 211 and 277.

Geomatics Engineering 327 3 units; H(3-1.5T)

Spectral Analysis in Geomatics
Continuous signals and systems and their properties. Frequency analysis and Fourier series. The continuous Fourier transform (CFT) and its properties. Convolution, correlation and power spectral density functions. Discrete signals and systems and their properties. The discrete Fourier transform (DFT), The two-dimensional CFT and DFT. Applications of spectral analysis in geodesy, remote sensing, digital imaging, positioning and navigation.

Prerequisite(s): Mathematics 375 or Applied Mathematics 307.

Antirequisite(s): Electrical Engineering 327.

Geomatics Engineering 333 3 units; H(3-2)

Computing for Geomatics Engineers

Prerequisite(s): Engineering 233.

Geomatics Engineering 343 3 units; H(3-3)

Fundamentals of Surveying
Llevelling: differential and trigonometric levelling. Angular, Distance measurements by taping and EDM. Precision and accuracy of survey observations. Computations: traversing and area, the first and second geodetic problem on the plane, trig sections, intersections, three-point resection and co-ordinate transformations. Route surveying: horizontal and vertical curves, earthwork computations. Routine procedures: setting out straight lines and right angles; measurement with obstructions. Setting out surveys. Topographic surveys.

Prerequisite(s): Engineering 319 or Geomatics Engineering 319.

Geomatics Engineering 351 3 units; H(3-3)

Introduction to Geospatial Information Systems
Introduction to Geospatial Information Systems and Geographic Information Science, Georelational vector data model, object-based vector data model, raster data model, map projections, geodetic datums, co-ordinate systems, georeferencing, database design and management, query language, geometric transformations, vector data analysis, raster data analysis, spatial interpolation, terrain modelling and analysis, triangulated irregular network data model, path and network analysis.

Prerequisite(s): Engineering 233.

Geomatics Engineering 363 3 units; H(3-1.5T-2)

Estimation and Statistical Testing
Least squares method: parametric, condition and combined cases. Linearization. Problem formulation and solution; error propagation, analysis of trend, problems with a priori knowledge of the parameters, step-by-step methods, combination of models, sequential solution methods, summation of normals. Introduction to univariate and multivariate statistical testing applied to geomatics engineering problems. Sampling distributions, tests of hypotheses on means, variances, proportions, and residuals.

Prerequisite(s): Geomatics Engineering 319 and 333.

Geomatics Engineering 401 3 units; H(1-2T-3)

Geomatics Engineering Design and Communication
Design and implementation of topographic surveys: survey specifications, equipment calibration, reconnaissance, design of survey control points, resection, traversing, differential levelling, and mapping. Error analysis, error figures and error visualization using a graphical approach. Principles of cartography: design, constraints and planning, generation and production of maps including scale, contours, and co-ordinate grids. UTM and 3TM co-ordinates. Digital cartography: computer-aided survey mapping and digital data generation. Communication of geomatics engineering information: technical reports, field notes, and graphical data representation.

Prerequisite(s): Geomatics Engineering 343 and one of Geomatics Engineering 361 or 363.

Note: Field work prior to the start of classes will be required.

Geomatics Engineering 419 3 units; H(3-3)

Geomatics Networks
A systematic approach to "Geomatics Network Analysis and Optimal Design", which are two of the most important processes in establishing a
Courses of Instruction

Geomatics Engineering 443  3 units; H(2-4)

Geomatics Engineering Surveys
Instrument systems and procedures for engineering and geodetic surveys: precise levels, high-precision theodolites, GPS. Determination of measurement instruments, gyro-theodolites. Heighting, triangulation, instrument calibration, observation procedures and reductions, introductory deformation analysis, error analysis, survey computations, map projection computations.

Prerequisite(s): Geomatics Engineering 343 and one of Geomatics Engineering 361 or 363.

Corequisite(s): Geomatics Engineering 103 or 401.

Geomatics Engineering 451  3 units; H(3-3)

Design and Implementation of Geospatial Information Systems
Overview of Geographical Information Systems from a computing perspective. Topics include: Fundamental Database Concepts: relational algebra, UML modelling, and SQL; Fundamental Spatial Concepts: Geometry, Euclidean Space, topological space, set notations, point set topology, and base graph theory; Models for Geospatial Information: object models and field models; Representations and Algorithms for GIS: computational complexity, discretization algorithms, topological data models and algorithms, TIN model, and computational geometry algorithms for GIS; Spatial Access Methods: B-Tree, Quadtree, and R-Tree; and Architectures; centralized and decentralized architectures.

Prerequisite(s): Geomatics Engineering 351.

Corequisite(s): Geomatics Engineering 421, 431 and Geomatics Engineering 363 or Geomatics Engineering 423.

Geomatics Engineering 465  3 units; H(3-3)

Satellite Positioning
Satellite orbit motion and Kepler’s laws. Description of GPS signal structure and derivation of observables. Characteristics of instrumentation. Analysis of atmospheric, orbital and other random and non-random effects. Derivation of mathemati- cal models used for absolute and differential static and kinematic positioning. Pre-analysis methods and applications. Concept of Kalman filtering applied to kinematic positioning. Ambiguity resolution procedures Overview of modern GNSS; GNSS augmentation and high-sensitivity receivers Introduction to inertial navigation.

Prerequisite(s): Geomatics Engineering 361 or 363; and 421; and one of 103 or 401.

Corequisite(s): Geomatics Engineering 423.

Geomatics Engineering 500  6 units; F(1-5)

Geomatics Engineering Project
Principles of project management and applications in geomatics projects. Group project, under the supervision of a faculty member, on an assigned Geomatics Engineering topic. The project will normally involve a literature review, theoretical work, and laboratory or field work.

Prerequisite(s): One of Engineering 213, Communications Studies 363 or Strategy and Global Management 217.

Corequisite(s): Geomatics Engineering 501.

Geomatics Engineering 501  3 units; H(152 hours)

Field Surveys
Field exercises include: instrument calibration, cadastral retracement, determination of astronomic azimuth, conventional control survey for deformation analysis, real time kinematic surveying, geodetic control using static GPS, precise levelling, hydrographic surveying, and geographic information systems and data management. This course adopts a team-based learning approach and emphasis is placed on practical professional experience, planning, and logistic for field survey operations. Each team is required to produce a field work report for each field activity, and each student is responsible for a chapter, detailing one of the exercises, of the primary team report describing all of the work accomplished by the team during the course. The course concludes with a half-day seminar that focuses on the practice and profession of Land Surveying.

Prerequisite(s): Geomatics Engineering 419, 435, 455, 465; and 103 or 401; and one of 451 or 443.

Note: A two-week field camp will be held at the Biogeoscience Institute at Barrier Lake prior to the start of the Fall Term lectures. Students will be assessed a supplementary fee to cover the costs of the field camp.

Geomatics Engineering 531  3 units; H(2-2)

Advanced Photogrammetric and Ranging Techniques
Geometry and orientation of multi-image networks, self-calibrating bundle adjustment, direct versus indirect geo-referencing, 3D point cloud generation via structure-from-motion approaches, geometry of line cameras, principles of active imaging sys- tems, mathematics of LiDAR mapping (registration and calibration), 3D point-cloud manipulation (feature extraction, segmentation and classification), photogrammetry and LiDAR data integration and fusion.

Prerequisite(s): Geomatics Engineering 421, 431 and 435.

Geomatics Engineering 545  3 units; H(2-3)

Hydrographic Surveying
Water levels and flow. Underwater acoustics including velocity and system parameters. Sonar and echosounder systems. Acoustic positioning concepts. Vertical positioning and datums. Types of surveys and specifications. Practical examples and survey data processing.

Prerequisite(s): Geomatics Engineering 361 or 363; and 465.

Geomatics Engineering 551  3 units; H(2-2)

Advanced Geospatial Topics
Progress in research, development and applications in the field of geospatial technologies; importance of geospatial knowledge and evolution of geospatial technologies in the last decades; focus on six major geospatial technologies that characterize the so-called Geospatial Revolution;

### Prerequisites

- Geomatics Engineering 435 and one of Geomatics Engineering 327 or Electrical Engineering 327.
- Geomatics Engineering 455 and Geomatics Engineering 456.
- Geomatics Engineering 419 and 443.
- Geomatics Engineering 465 and Geomatics Engineering 466.
- Geomatics Engineering 361 or 363.
- Geomatics Engineering 501.
- Geomatics Engineering 559.
- Geomatics Engineering 569.
- Geomatics Engineering 579.
- Geomatics Engineering 583.
- Geomatics Engineering 585.
- Geomatics Engineering 587.
- Geomatics Engineering 599.
- Geomatics Engineering 601.
- Geomatics Engineering 605.
- Geomatics Engineering 607.
- Geomatics Engineering 609.
- Geomatics Engineering 615.
- Geomatics Engineering 617.
- Geomatics Engineering 623.

### Course Descriptions

- **Digital Imaging and Applications**: An introduction to digital image processing (IP) and computer vision (CV) concepts, methods and algorithms which will enable the students to implement IP/CV systems or use IP/CV software with emphasis on remote-sensing and photogrammetry applications and problem solving. Course components include: image formation and intensity transformation, filtering in the spatial and frequency domain, colour image processing, feature detection and matching, image restoration, image segmentation, mathematical morphology and multi-source image/data fusion.

- **Survey Law and Practice**: Review of legislation, standards of practice and case law affecting property interests, property boundaries and boundary surveys. Evidence and boundary survey principles, riparian rights, title to land; Canada lands; Aboriginal rights; inter-jurisdictional boundaries; law of the sea. Reforms in the surveying profession. Field exercises may take place off campus over week-ends.

- **Environmental Modelling**: Nature and purpose of environmental modelling; the top-down and the bottom-up approaches; typology of environmental models; definition of fundamental concepts; steps involved in designing and building a model; calibration, verification and validation of models; scale dependency; sensitivity analysis; characteristics, architecture and functioning of selected environmental models.

- **Graduate Project**: Individual project in the student’s area of specialization under the guidance of the student’s supervisor. A written proposal, one or more written progress reports, and a final written report are required. An oral presentation is required upon completion of the course.

### Note

Open only to students in the course-based route MEng.
Geomatics Engineering 625  3 units; H(3-2)
Advanced GNSS Theory and Applications

Geomatics Engineering 629  3 units; H(3-0)
Advanced Estimation Methods and Analysis

Geomatics Engineering 633  3 units; H(3-0)
Atmospheric Effects on Satellite Navigation Systems
Theoretical and observed aspects of radio wave propagation in the ionosphere and troposphere, with an emphasis on L-band (GPS) signals. Fundamentals of absorption, attenuation, depolarization, and defraction will be covered, in addition to characteristics and physical properties of the propagation medium and atmospheric constituents. The impact of such effects, and methods of mitigation, will be interpreted with respect to satellite navigation applications.

Geomatics Engineering 637  3 units; H(3-0)
(Enviromental Engineering 637)
Earth Observation for the Environment
An introduction to environmental earth observation systems in particular to satellite platforms. Topics include: discussion of physical principles, including governing equations; imaging system geometries; radiometric corrections, including calibration and atmospheric correction; spatial filtering for noise removal and information extraction; geometric corrections, including rectification and registration; fusion of multi-dimensional datasets (i.e., multispectral, multi-temporal, multi-resolution, and point-source ground data); and application of satellite images in addressing selected environmental issues.

Antirequisite(s): Credit for Geomatics Engineering 637 and any of Geomatics Engineering 619.04, Environmental Engineering 637 or 619.05 will not be allowed.

Geomatics Engineering 638  3 units; H(2.5-1)
GNSS Receiver Design
Global Navigation Satellite System signal structure, overview of receiver architecture, measurements, antenna design, receiver front-end, reference oscillator, sampling and quantization, phase lock loops, frequency lock loops and delay lock loops, tracking loop design and errors, signal acquisition and detection, interference effects.

Geomatics Engineering 639  3 units; H(3-0)
Advanced Topics in Digital Image Processing
Review of basic digital imaging; advanced topics in multispectral or hyperspectral analysis, multiresolution analysis, image segmentation, image transformation, data fusion, pattern recognition or feature matching; current research applications especially in geomatics.

Geomatics Engineering 642  3 units; H(3-0)
Optical Imaging Metrology
Optical imaging methods for precise close-range measurement. Photogrammetric techniques with emphasis on the bundle adjustment. Photogrammetric data set definition, network design and quality measures. Principles of laser ranging and laser scanning. Imaging distortions, sensor modelling and system self-calibration for a variety of imaging sensors including digital cameras, panoramic cameras, 3D laser scanners and 3D range cameras. Automated point cloud processing methods; registration, modelling and segmentation. Selected case studies.

Geomatics Engineering 645  3 units; H(3-0)
Spatial Databases and Data Mining
Comprehensive overview of spatial database management systems and issues related to spatial data mining. The topics that will be covered include: overview of spatial databases, spatial concepts and data models, spatial query languages, spatial storage and indexing, spatial networks, spatial data mining, and trends in spatial databases.

Note: Background in programming and statistics is required.

Geomatics Engineering 658  3 units; H(3-0)
Geocomputation
Overview of the fundamental concepts, approach- es, techniques, and applications in the field of Geocomputation. Topics being discussed include Geocomputation, Computational intelligence, Complex Systems theory, Cellular automata modelling, Multi-agent system modelling, Calibration and validation of dynamic models, Scale, Artificial neural network, Data mining and knowledge discovery, Geovisualization, and Post-normal science. Individual projects involving the application of Geocomputational techniques and models are conducted.

Geomatics Engineering 667  3 units; H(3-0)
Advanced Topics in Photogrammetry
Overview of aerial triangulation procedures (strip triangulation, block adjustment of independent models, bundle block adjustment, automatic aerial triangulation, direct versus indirect orientation). Mapping from space (modelling the perspective geometry of line cameras, epipolar geometry for line cameras), Multi-sensor aerial triangulation (integrating aerial and satellite imagery with navigation data). Photogrammetric products (Digital Elevation Models, ortho-photos). The role of features in photogrammetric operations (utilizing road network captured by terrestrial navigation systems in various orientation procedures).

Geomatics Engineering 675  3 units; H(3-0)
Spatial Statistics
Spatial phenomena and spatial processes. Spatial data analysis and the importance of spatial data in scientific research. Methods will range from exploratory spatial data analysis through to recent developments such as nonparametric semivariograms, geostatistical estimation, generalized linear mixed models, estimation and modelling of nonstationary covariances, and spatio-temporal processes.

Geomatics Engineering 681  3 units; H(3-0)
(Geophysics 681)
Advanced Global Geophysics and Geodynamics
Elasticity, figure of the Earth, Earth structure and seismology, gravity and its temporal variations, isostasy, tides, Earth rotation and orientation, time, plate flexure, glacial rebound, continental drift, geodetic observation methods for geodynamics.

Geomatics Engineering 691  3 units; H(3-0)
Polarimetric Synthetic Aperture Radar
Introduction to image formation with polarimetric synthetic aperture radar (POLSAR), theory of polarimetric electromagnetic waves, polarimetric scattering from targets, POLSAR data models, speckle filtering, data decomposition, classification, and segmentation.

MAY BE REPEATED FOR CREDIT

Geomatics Engineering 693  3 units; H(3-0)
Cadastral Information Systems
Cadastral Systems, cadastral data, land registration, data structures and schemas for land administration information, ISO standards, evolutionary models, land tools, effectiveness metrics.

Geomatics Engineering 694  3 units; H(3-0)
Advanced Topics in Sensor Web and Internet of Things
Overview of the sensor web architecture and algorithms, with a focus on Internet of Things. The topics that will be covered include: sensor web data management, sensor web search and discovery, sensor web server design and implementation, interoperability issues, sensor-based analytics and visualization, introduction to sensor networks, and trends in sensor web and Internet of Things.

Geomatics Engineering 697  3 units; H(3-0)
Directed Studies
Individual project study conducted under the guidance of a faculty member and intended to familiarize the student with the literature and techniques that are required for their research program, but are not available in regular courses.

Prerequisite(s): Consent of the Department Head or Associate Head Graduate Studies.

MAY BE REPEATED FOR CREDIT

Geomatics Engineering 698  3 units; H(3S-0)
Professional Development Seminar
This professional development seminar aims at providing relevant skills to be a successful graduate student and to make a smooth transition to a rewarding professional career. In addition to efficient communication, this will place an emphasis on research methodologies such as formulating research problems, preparing a scholarship application, writing a paper for publication, and defending a thesis. How to prepare for a successful interview in industry or academia and the required process for becoming a professional engineer will also be discussed.

NOT INCLUDED IN GPA

Geomatics Engineering 699  3 units; H(3-0)
Special Studies
Focus on advanced studies in specialized topics that are not offered in the regular graduate curriculum of the Department.

MAY BE REPEATED FOR CREDIT
Courses of Instruction

Geophysics GOPH

Instruction offered by members of the Department of Geoscience in the Faculty of Science.

Senior Courses

Geophysics 351 3 units; H(3-3)

Introduction to Geophysics
The key geophysical concepts and methods that are used to study the Earth and solve various geoscientific problems. Includes: earthquake seismology, gravity and magnetism, figure of the Earth, isostasy, heat flow, reflection and refraction seismology, radioactivity and geochronology, geodynamics, applications and case studies.

Prerequisite(s): Geology 201, and 202 or 203; Mathematics 253 or 257 or 283 or Applied Mathematics 219; Physics 211 or 221, and 223.

Antirequisite(s): Credit for Geophysics 351 and 359 will not be allowed.

Geophysics 355 3 units; H(3-3)

Exploration Geophysics
An introduction to refraction seismic, reflection seismic, gravity and magnetic methods applied to exploration for hydrocarbons, and their use in engineering studies.

Prerequisite(s): Geology 201; Geology 202 or 203; Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219; Physics 211 or 221, and 223.

Antirequisite(s): Credit for Geophysics 355 and 365 will not be allowed.

Geophysics 375 3 units; H(3-0)

Natural Disasters and Critical Earth Phenomena
Causes of disasters such as earthquakes, tsunami, volcanic eruptions, mud flows, landslides, avalanches, flooding, tornadoes and hurricanes, and other critical phenomena such as sinkholes, ozone depletion and radiation, carbon dioxide and global warming, El Nino, toxic natural materials and pollution, and extraterrestrial impacts. Surveys of historic disasters and their effects on life on Earth. Methods of prediction and prevention of disasters and precautions for the mitigation of their effects.

Note: A non-major course for students in all faculties. Not available as a course in the Field of Geophysics.

Geophysics 419 3 units; H(3-3)

Computational Methods for Geophysicists
Topics in numerical analysis emphasizing geophysics applications. Topics will include error analysis, Taylor series, root finding algorithms, linear system solver algorithms, LU decomposition, curve fitting, numerical differentiation and integration, numerical solution of ODEs, introduction to PDE solvers.

Prerequisite(s): Geophysics 351 or 355; Computer Science 217 or 231 or 235; Mathematics 211 and 331.

Antirequisite(s): Credit for Geophysics 419 and any of 619, 599.09 or 699.09 will not be allowed.

Geophysics 453 3 units; H(3-3)

Mining Geophysics
Electromagnetic, resistivity, induced polarization, self-potential, radiometric and gravity methods applied to problems in the search for metallic mineral deposits.

Prerequisite(s): Geology 201, Physics 223, Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219, and Mathematics 211.

Geophysics 457 3 units; H(3-3)

Physical Properties of Rocks
Physical properties of minerals and rocks, their relationship to geophysical measurements and surveys.

Prerequisite(s): Geophysics 351 or 355 or 359; Mathematics 331 or 367 or 377; Physics 321.

Geophysics 509 3 units; H(0-9)

Independent Study
A written report based on independent study. Originality is emphasized, laboratory and field studies are encouraged.

Prerequisite(s): Consent of the Department and of a Departmental faculty member who will act as a supervisor.

MAY BE REPEATED FOR CREDIT

Geophysics 517 3 units; H(3-3)

Time Series Analysis and 1D Data Processing
Analysis of geophysical time series, especially real and synthetic seismic signals, is introduced using theoretical concepts and their practical application in a computational lab using commercial computational software.

Prerequisite(s): Geophysics 355, 359, and Applied Mathematics 415.

Geophysics 547 3 units; H(3-3)

Gravity and Magnetics
The nature of the magnetic and gravitational fields of the earth. Theory and applications of the gravity and magnetic methods of geophysical exploration.

Prerequisite(s): Geophysics 351 or 355 or 359; Mathematics 331 or 367 or 377; and Applied Mathematics 415.

Geophysics 549 3 units; H(60-70 hours)

Field School
Seismic, gravity, magnetic, electromagnetic, resistivity, induced polarization and topographic surveys will be conducted prior to the Fall Term.

Prerequisite(s): Geophysics 355, 453 and 457, admission to the Major or Honours program in Geophysics and consent of the Department.

Note: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course. Data collected will be processed during Fall Term tutorials.

Geophysics 551 3 units; H(3-3)

Seismic Theory and Methods
Seismic wave propagation theory; various techniques of exploration seismology.

Prerequisite(s): Geophysics 355, Physics 321, 323, Mathematics 211, Applied Mathematics 415, and Mathematics 331 or 367 or 377.

Geophysics 557 3 units; H(3-3)

Multidimensional Data Analysis and Processing
Analysis and processing of 2D and 3D seismic data is explored using theoretical and practical techniques of multidimensional data analysis and processing.

Prerequisite(s): Geophysics 517.

Geophysics 559 3 units; H(3-2)

Geophysical Interpretation
Analysis and integration of geophysical and geological data. Qualitative and quantitative interpretation, industrial case studies.

Prerequisite(s): Geophysics 351 or 355, and 78 units (13.0 full-course equivalents).

Geophysics 565 3 units; H(3-3)

(formerly Geophysics 465)

Environmental Applications of Geophysics
Application of geophysical methods such as resistivity, electromagnetics, and ground penetrating radar to investigations of geological, geotechnical, hydrological, and environmental problems. Small-scale high resolution applications of other geophysical methods (seismic, gravity, magnetics).

Prerequisite(s): Mathematics 249 or 251 or 265 or 275 or 281 or Applied Mathematics 217 and 78 units (13.0 full-course equivalents).

Antirequisite(s): Credit for Geophysics 565 and either 365 or 465 will not be allowed.

Geophysics 599 3 units; H(3-3)

Contemporary Topics in Geophysics
Courses are offered in contemporary topics in areas such as seismology, gravity and magnetics, electrical and electromagnetic methods, exploration and environmental geophysics, and integrated geophysical methods.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Graduate students are urged to read the Geoscience Department section in the Graduate Studies calendar. Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599. Courses numbered 600 are available to fourth-year students who obtain Departmental approval and who have credit for the prerequisite courses.

Geophysics 619 3 units; H(3-3)

Advanced Computational Methods for Geophysicists
Review of important mathematical models in geophysics (Poisson equation, acoustic wave equation, elastic wave equation) and typical boundary conditions for elliptical and parabolic partial differential equations. Numerical solutions using finite difference, finite volume and finite element methods. Programming of numerical methods, and introduction to nonlinear optimization/inversion algorithms. Course includes an independent term project.

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Geophysics 619 and Geophysics 699.09 will not be allowed.

Geophysics 645 3 units; H(3-0)

Seismic Wave Propagation
Seismic body and surface waves, reflection, refraction, diffraction, anelasticity, anisotropy, ray methods, point and line source solutions to the equation of motion, finite-difference methods and numerical methods for seismic waves, additional topics depending on current research interests.

Prerequisite(s): Geophysics 551.

Geophysics 657 3 units; H(3-0)

Seismic Signal Analysis
Advanced methods of seismic data analysis in exploration and production geophysics. Topics
include velocity analysis, polarization filtering, median filtering, migration, inversion and tomography.

**Geophysics 665** 3 units; H(3-0)

**Theoretical Seismology**
Seismic ray theory, inverse theory, full-wave methods, matrix methods, numerical methods, additional topics depending on current research interests.

Prerequisite(s): Geophysics 551.

**Geophysics 667** 3 units; H(3-0)

**Introduction to Microseismic Methods**
Use of microseismic methods as surveillance technology during hydraulic-fracture treatment of tight reservoirs. Methods for acquiring, processing and interpreting microseismic data. Methods for picking events, determining hypocenter location and magnitude, and interpreting the stimulated rock volume.

Prerequisite(s): Consent of the Department.

**Geophysics 669** 3 units; H(3-0)

**Global Seismology**
An introduction to theory and practice of global seismology. Topics include: seismograph systems, global wave propagation, moment tensors, shearwave splitting, surface waves, receiver functions, seismic tomography and teleseismic receiver functions.

Prerequisite(s): Admission to the graduate program in geophysics.

**Geophysics 671** 3 units; H(3-0)

**Inverse Theory and Applications I**
An introduction to the mathematical and numerical techniques of geophysical inversion. Topics include: least squares, singular value decomposition, and Tikhonov regularization. Development of numerical codes to solve real inverse problems is stressed.

Prerequisite(s): Admission to the graduate program in geophysics.

**Geophysics 673** 3 units; H(3-0)

**Inverse Theory and Applications II**
Multidimensional real-world inverse problems, such as constrained seismic, gravity, or resistivity inversion. Fourier, maximum entropy, Bayesian approaches and iterative solution techniques such as Kaczmarz and conjugate gradient are covered.

Prerequisite(s): Consent of the Department.

**Geophysics 681 (Geomatics Engineering 681)**

**Advanced Global Geophysics and Geodynamics**
Elasticity, figure of the Earth, Earth structure and seismology, gravity and its temporal variations, isostasy, tides, Earth rotation and orientation, time, plate flexure, glacial rebound, continental drift, geodetic observation methods for geodynamics.

**Geophysics 687** 3 units; H(3-0)

**Theory of Seismic Imaging**
The theories of wave propagation in acoustic and elastic media are used to develop the major algorithms used in seismic imaging (migration). Green’s theorem, Huygen’s principle, Kirchhoff diffraction theory, raytracing, wavetracking, multidimensional Fourier analysis, and Radon transforms are explored.

Note: Elementary knowledge of vector calculus and partial differential equations is assumed.
### Courses of Instruction

#### German 349 3 units; H(3-0)
**German Studies Research Methods**
Introduction to research questions and research methods in German studies through case-study application.

Prerequisite(s): Consent of the School.

Note: Taught in English. German 333 is recommended as preparation for this course.

#### German 353 3 units; H(3-0)
**Structure of German**
Development of a structural understanding of the German language through an introduction to linguistic analysis, including research questions and research methods in German linguistics.

Prerequisite(s): German 333.

#### German 357 3 units; H(3-3) or H(3-0)
**Topics in Film**
German film from the perspectives of film theory and political and cultural history. May concentrate on a specific director, a period, or a genre in German film.

Note: Taught in English.

MAY BE REPEATED FOR CREDIT

#### German 359 3 units; H(3-0)
**German Texts in Translation**
Study of literary and cultural texts within the rich tradition of Germany’s Dichter und Denker (poets and philosophers).

Note: Taught in English.

MAY BE REPEATED FOR CREDIT

#### German 369 3 units; H(3-0)
**Telling Stories: Exploring German Literature**
An introduction to historical and contemporary literary and cultural texts in German.

Prerequisite(s): German 349.

#### German 413 3 units; H(3-0)
**Intermediate German: Speaking and Listening**
Targeted focus on aural/oral communication skills in a variety of contexts and media. Corresponds to B1.2 of the Common European Framework of Reference.

Prerequisite(s): German 333.

#### German 415 3 units; H(3-0)
**Intermediate German: Reading and Writing**
Targeted focus on reading strategies, interpretive skills, and the production of a variety of texts. Corresponds to B1.2 of the Common European Framework of Reference.

Prerequisite(s): German 333.

#### German 451 3 units; H(3-0)
**Cross-Cultural Explorations**
Cross-cultural comparison of events, cultural patterns, historical periods, or social movements which find a parallel in more than one of the cultural traditions represented in the School.

Note: Taught in English.

MAY BE REPEATED FOR CREDIT

#### German 467 3 units; H(3-0)
**Advanced German Linguistics**
In-depth exploration of topics in German linguistics.

467.01. Synchronic Linguistics
467.02. Diachronic Linguistics
467.03. Language Acquisition

Prerequisite(s): German 353.

#### German 469 3 units; H(3-0)
**Culture Change: Concepts and Critique**
In-depth exploration of topics in German culture, with an approach to texts and representations that incorporates new directions in cultural criticism.

469.01. Memory and Memorials
469.02. Counter Cultures
469.03. (Trans)Nationalism
469.04. Media and Intermediality

Prerequisite(s): Consent of the School.

#### German 497 3 units; H(3-0)
**Inter-Cultural Immersion Experience**
Independent study course. Project with Inter-cultural theme, derived from an immersion experience at an advanced level, most likely abroad.

Prerequisite(s): Consent of the School.

NOT INCLUDED IN GPA

#### German 501 3 units; H(3-0)
**Advanced German**
Students will increase their overall proficiency, enhance their intercultural communication competencies, and review key grammatical concepts. Corresponds to B2.1 of the Common European Framework of Reference.

Prerequisite(s): German 413 or 415.

#### German 503 3 units; H(3-0)
**Senior Projects in Language**
Students will integrate theory and practice in the use of German through a variety of class projects. Designed to expand and refine overall linguistic and intercultural competence. Corresponds to B2 of the Common European Framework of Reference.

Prerequisite(s): German 501.

MAY BE REPEATED FOR CREDIT

#### German 551 3 units; H(3-0)
**Independent Study**
Research project developed in consultation with and under supervision of instructor.

Prerequisite(s): Consent of the School.

MAY BE REPEATED FOR CREDIT

#### German 561 3 units; H(3-0)
**New Research Directions in German Studies**
Centred on a professor’s current research project, the course will engage senior students as members of a collaborative research team. Independent research, discussion, group presentations.

Prerequisite(s): 3 units (0.5 full-course equivalent) in German 469 and consent of the School.

MAY BE REPEATED FOR CREDIT

#### German 591 3 units; H(0-3T)
**Honours Project**
The Honours project for Honours students in their final year.

Prerequisite(s): Consent of the School.

#### Graduate Courses
Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

#### German 627 3 units; H(3S-0)
**Seminar in German Literature and Culture**
Selected topics in literary history.

MAY BE REPEATED FOR CREDIT

#### German 629 3 units; H(3S-0)
**Seminar in German Language and Linguistics**

MAY BE REPEATED FOR CREDIT

#### German 631 3 units; H(3S-0)
**Seminar in German Language Pedagogy**

MAY BE REPEATED FOR CREDIT

#### German 696 6 units; F(1-0)
**Bibliography, Research Methods and Grant Proposal Writing**

Note: Required of all graduate students who have not had an equivalent course.

NOT INCLUDED IN GPA

#### German 699 3 units; H(3-0)
**Conference Course**
Meets the needs of individual students. It may include a general or specific linguistic topic; or the detailed study of an author, period, genre; or any literary problem not dealt with in the honours or graduate courses listed above.

MAY BE REPEATED FOR CREDIT

#### Greek GREK

Instruction offered by members of the Department of Classics and Religion in the Faculty of Arts.

Note: For courses on Greek Literature in translation, Greek History, Art, Archaeology, etc., see Greek and Roman Studies (GRST).

Note on Course Sequence and Prerequisites:
The normal sequence is Greek 201, 203, 301, 303, 401 and/or 403, 551.

#### Junior Courses

#### Greek 201 3 units; H(3-1T)
**Ancient Greek I**
This course for beginners provides the first steps towards reading classical and New Testament Greek texts.

#### Greek 203 3 units; H(3-1T)
**Ancient Greek II**
Continuation of Greek 201.

Prerequisite(s): Greek 201.

#### Senior Courses

#### Greek 301 3 units; H(3-0)
**Ancient Greek III**
Completes the study of basic grammar, vocabulary and translation skills.

Prerequisite(s): Greek 203.

#### Greek 303 3 units; H(3-0)
**Intermediate Readings in Classical and New Testament Greek**

Prerequisite(s): Greek 301.
Courses of Instruction

Greek 401 3 units; H(3-0)
Readings in Greek Prose
Readings will normally be selected according to genres, such as Historiography, Oratory, Philo-

sophic and Didactic Prose, and the Novel.
Prerequisite(s): Greek 303.
MAY BE REPEATED FOR CREDIT
Greek 403 3 units; H(3-0)
Readings in Greek Poetry
Readings will normally be selected according to
genres, such as Epic, Tragedy, Comedy and Lyric.
Prerequisite(s): Greek 303.
MAY BE REPEATED FOR CREDIT

Directed Studies in Greek
Readings may be selected from any genre of
Greek text at an advanced level.
Prerequisite(s): Consent of the Department.
Note: Students in Greek and Roman Studies or
Ancient and Medieval History are encouraged to
pursue areas such as paleography, epigraphy, and
Christian texts.
MAY BE REPEATED FOR CREDIT

Graduate Courses
Greek 601 3 units; H(3S-0)
Graduate Seminar
MAY BE REPEATED FOR CREDIT
Greek 602 3 units; H(3-1T)
Introductory Ancient Greek for Graduate
Students
Introduction to grammar, vocabulary and transla-
tion skills.
Greek 602.01 Ancient Greek I
Greek 602.02 Ancient Greek II
Prerequisite(s): Greek 602.01 must be taken before
Greek 602.02.
Antirequisite(s): Credit for Greek 602 and either
Greek 201 or 203 will not be allowed.
Greek 604 3 units; H(3-0)
Intermediate Ancient Greek for Graduate
Students
Consolidation of grammar, vocabulary and transla-
tion skills.
MAY BE REPEATED FOR CREDIT
Greek 607 1.5 units; Q(0-1T)
Directed Studies
MAY BE REPEATED FOR CREDIT

Greek and Roman Studies

Instruction offered by members of the Department of Classics and Religion in the Faculty of Arts.
For courses in the ancient Greek and Latin lan-
guages see listings under Greek and Latin.
Note: Undergraduate courses under this heading do
not require any knowledge of Greek or Latin.
Courses at both the 200-level (designed for first-
year students) and 300-level are survey courses
with no prerequisites. The research topics courses
Greek and Roman Studies 413-457 (except Greek
and Roman Studies 431) do not have specific
prerequisites, but students are strongly advised to
have taken at least two 300-level Greek and Ro-
man Studies courses with grades of at least "C-
" before enrolling in them.

Junior Courses

Greek and Roman Studies 205 3 units; H(3-0)
Introduction to Greece and Rome
A historical survey from the eighth century BCE to
the fourth century CE.
Greek and Roman Studies 209 3 units; H(3-0)
Classical Mythology and Literature
An introduction to Greek and Roman myths as
presented in classical literature and art, and to their
artistic context.
Greek and Roman Studies 211 3 units; H(1-2)
Technical Terms of Medicine and the Life
Sciences
The Greek and Latin elements of modern medical
and life-sciences terminology, with a brief introd-
uction to their history and cultural background.

Senior Courses

Greek and Roman Studies 305 3 units; H(3-0)
(Religious Studies 305)
Greek Religion
A survey of religious beliefs and practices in the
pre-Christian Greek world.
Prerequisite(s): One of Greek and Roman Studies
205, 209, Religious Studies 201, 205, or 273.
Greek and Roman Studies 306 3 units; H(3-0)
Greek Religion
A survey of religious beliefs and practices in the
pre-Christian Roman world.
Prerequisite(s): One of Greek and Roman Studies
205, 209, Religious Studies 201, 205, or 273.
Greek and Roman Studies 309 3 units; H(3-0)
Comparative Mythology
An examination of Greek and Roman myths in
comparison with myths of other cultures and
societies.
Greek and Roman Studies 311 3 units; H(3-0)
Sport in Ancient Greece and Rome
A survey of sports practised in Greece and Rome
and the role of sport as a cultural, political and
historical phenomenon.
Greek and Roman Studies 313 3 units; H(3-0)
The Ancient Novel and Its Predecessors
A survey of ancient Greek and Roman "novels" or
romances, with reference to their roots in epic
poetry and New Comedy.
Greek and Roman Studies 315 3 units; H(3-0)
Women and the Family in the Greek and Roman
World
A survey of the lives, social roles and representa-
tions of women based on documentary evidence,
literature and art. Emphases may vary from term-
to-term.
Note: This course is acceptable for credit towards
a Major in History (subject to History program
regulations).
Greek and Roman Studies 317 3 units; H(3-0)
Humorous Prose: From Rome to the
Renaissance
A survey of ancient, medieval and Renaissance
humorous prose, with reference to their roots in
classical literature.

Greek and Roman Studies 321 3 units; H(3-0)
Ancient Technology
A survey of major technologies in antiquity (metall-
urgy, agriculture, hydraulics, pottery, textiles,
transportation, writing, construction) with special
emphasis on the technological achievements of the
Bronze Age and the cultures of Greece and
Rome.
Greek and Roman Studies 323 3 units; H(3-0)
Ancient Medicine and the Mind
A survey of ancient science and medicine, with
special emphasis on early conceptions of the hu-
mankind, thought and knowledge.
Greek and Roman Studies 325 3 units; H(3-0)
Greek Art and Architecture
A survey of Greek art and architecture from the
Bronze Age to the Hellenistic period.
Greek and Roman Studies 327 3 units; H(3-0)
Roman Art and Architecture
A survey of Roman art and architecture from the
Etruscans to the beginning of the Christian Empire.
Greek and Roman Studies 335 3 units; H(3-0)
The Ancient Near East to Alexander the Great
History of the Near East from the tenth to the
fourth century BCE.
Greek and Roman Studies 337 3 units; H(3-0)
Early Greece
Early Greece from the late Bronze Age to the
Persian Wars.
Note: This course is acceptable for credit towards
a Major in History (subject to History program
regulations).
Greek and Roman Studies 339 3 units; H(3-0)
History of Classical Greece
History of the Greek world from the Persian Wars
to the conquests of Alexander the Great.
Note: This course is acceptable for credit towards
a Major in History (subject to History program
regulations).
Greek and Roman Studies 341 3 units; H(3-0)
History of Rome's Expansion into the
Mediterranean to 30 BCE
The expansion of Rome into an empire to the time
of Augustus.
Note: This course is acceptable for credit towards
a Major in History (subject to History program
regulations).
Greek and Roman Studies 345 3 units; H(3-0)
Rome: The Late Republic and Early Empire
History of Rome from 133 BCE to 180 CE.
Note: This course is acceptable for credit towards
a Major in History (subject to History program
regulations).
Greek and Roman Studies 347 3 units; H(3-0)
Late Roman Antiquity
History of the Roman and Byzantine world from
180 to 565 CE.
Note: This course is acceptable for credit towards
a Major in History (subject to History program
regulations).

</table>
Courses of Instruction

Health and Society HSOC

Instruction offered by members of the Cumming School of Medicine.
Contact - BHSc Office

Junior Course

Health and Society 201 3 units; H(3-0)
Introduction to Health and Society
Introduction to public health, emphasizing the contributions of social research from several disciplinary traditions (anthropology, economics, epidemiology, geography, political science, psychology, and sociology). Students practice and refine several skill sets, including: library research, public speaking, teamwork, leadership and academic writing.

Senior Courses

Health and Society 301 3 units; H(3-0)
Determinants of Health
A broad-based, interdisciplinary overview of models of the determinants of health. Includes an analysis of evidence of the relative influence of environmental factors, health services, lifestyles and health behaviours, social and economic factors, biological predispositions, and the mechanisms involved in the societal uptake of various conceptions.
Prerequisite(s): Health and Society 201 or consent of the Department.

Health and Society 311 3 units; H(3-0)
Health Services and Health Systems
Introduction to the Canadian health system, the health policy process, institutions and providers in the health system, health care insurance, financing and delivery of health care, population and public health, a systems approach to health in a national and international perspective.
Prerequisite(s): Health and Society 201 or consent of the Department.

Health and Society 401 3 units; H(3-0)
Foundations of Social Science Method
An examination of some philosophical principles underlying and debates involving methodology in the social sciences. Consideration will be given to features both common to the social sciences as well as to those which distinguish them. Where appropriate, applications to health phenomena will be emphasized.
Prerequisite(s): Health and Society 201 and third year or higher in the BHSc Honours or Health and Society minor program or consent of the Department.

Health and Society 403 3 units; H(3-0)
Advanced Topics in Social Determinants of Health
Social determinants of health are key to understanding and intervening on health and disease in populations. This course builds on the understanding of the social determinants of health by exploring a few of these in greater depth. Topics will vary, but may include racism, sexism and gender identity, Indigenous health inequities, or the built environment. Students will engage with research from a number of social science disciplines to explore the complexities and nuances that shape health inequities in a variety of environments in which people live and work. Case studies and contemporary events will be used to illustrate the interplay between a select few social determinants and health inequities each semester.
Prerequisite(s): Health and Society 301.

Health and Society 408 6 units; F(6-0)
Health Research Methods and Research field practicum
An introduction to the research methods utilized in the Health Sciences. Students will begin to develop the knowledge and skills necessary to conduct research in the Health and Society field. The importance of research design, qualitative, quantitative and mixed methods and the theoretical constructs that inform these approaches will be emphasized.
Prerequisite(s): Medical Science 308 and admission to the BHSc Honours program.

Health and Society 591 3 units; H(3S-0)
Advanced Seminar in Health and Society
An advanced seminar involving critical analysis of contemporary health issues. Topics vary from year-to-year, but are always drawn from the current academic literature, from the public policy arena, and/or from the popular media.
Prerequisite(s): Health and Society 401 and registration in the BHSc Honours Health and Society major.

History HTST

Instruction offered by members of the Department of History in the Faculty of Arts.

History Table for Requirements 2 and 3

*May be counted with the approval of the Program Coordinator when the topic is appropriate.

Junior Courses

History 200 3 units; H(3-0)
Events and Ideas that Shook the World
Designed for non-history majors, this course introduces students to the historical craft through a series of short lecture sequences that focus on specific events, ideas, and individuals that changed the course of world history.
Note: May not count towards the field for Majors, Honours or Minors in History.

History 201 3 units; H(3-0)
The History of Europe
Selected topics may include formation and breakdown of political structures: cultural, social, and technological continuity and change; development of religious and secular belief systems; interactions among cultures. Course content will vary each session. Please consult the History Department for more specific information.

History 202 3 units; H(3-0)
An Introduction to Military History
Significant events and themes in military history.

History 203 3 units; H(3-0)
(formerly History 301)
The World to 1500
The development and rise of civilizations, their divergent and interacting patterns of belief, social and political organization and material and cultural life.

History 204 3 units; H(3-0)
The World, 1500-1800
The political, economic, cultural, ecological and social connections among world regions.
Antirequisite(s): Credit for History 204 and 205 will not be allowed.

History 209 3 units; H(3-0)
The History of China
A survey of thought in China from the cultural heroes to the present, with emphasis on philosophies, humanism, and ideologies. Topics covered include Shang religion, Confucianism, Taoism, Mohism, minor schools of thought, Legalism, Buddhism, Neo-Confucianism, Qing textual studies, republicanism, nationalism, Marxism-Leninism and the late twentieth-century reformist movements.

History 211 3 units; H(3-0)
Canada: Origins to 1867
An introduction to the dynamic themes in early Canadian history. Special attention will be devoted to social, economic, and political development, White-Aboriginal relations and the settlement of the Maritimes and the Canadas, and the opening of the West.

History 213 3 units; H(3-0)
Canada Since 1867
Themes in the development of the Canadian nation from Confederation to the present, with particular attention to federal-provincial relations, economic development, social movements, and western political protest.

migration to the island, government, society, inter-

ent, emphasizing pre-Chinese aboriginal history,

(formerly History 385)

History 404 3 units; H(3-0)

Military History of Africa

Explores the history of warfare and military struc-
tures in Africa from earliest times to the present. In-
formed by what is often called the "New Military
History," discussion takes place within the context
of broader social, cultural, economic and political
developments.

History 406 3 units; H(3-0)

The Mongol World Empire

The rise of Chinggis Khaghan (Genghis Khan) in
early thirteenth-century Eurasia, the growth and
conquests of the Mongol world empire, and the in-
dividual khanates of Yuan dynasty China, the Gold-
en Horde in Russia, the Il Khanate in the Middle
East, and the Chagadai Khanate in Inner Asia.

History 408 3 units; H(3-0)

The Global 1960s

Examines social, cultural, and political change in
"the long 1960s" from a global perspective.

History 410 3 units; H(3-0)

Topics in Great Cities of the World

An augmented experiential learning course where
students integrate their own observations and ex-
perience with scholarly readings in a "Great City.
" The regional and theoretical focus of the class will
vary with the subject city.

Prerequisite(s): Consent of the Department.

Note: Course is normally offered as a study abroad
in Summer Term (Spring/Summer). A supplemen-
tary fee will be assessed to cover additional costs
associated with this course.

MAY BE REPEATED FOR CREDIT

History 412 3 units; H(3-0)

Russia and the Soviet Union

A short introduction to pre-nineteenth-century
Russian history and a survey of the history of
Russia and the Soviet Union in the nineteenth and
twentieth centuries, finishing with a brief examina-
tion of post-Soviet Russia.

Prerequisite(s): One 300 level History course or
Russian 317.

Antirequisite(s): Credit for History 412 and 411.02
will not be allowed.

History 413 3 units; H(3-0)

policy in Canada from the colonial period to the
present. Themes may include the relationship be-
tween citizens and government, changing percep-
Courses of Instruction

History 456 3 units; H(3-0)
The United States in the Era of Depression and WWII, 1900 to 1945
The history of the United States from the dawn of the twentieth century through World War II, a turbulent period of wars and economic depression at the end of which the U.S. had emerged as a global superpower. Major themes include the rise of liberal reform; the experience of the U.S. in two world wars; the interplay of race, class, and gender in shaping American identity; and the economics of boom and bust culminating in the Great Depression and wartime boom of the 1940s.

History 460 3 units; H(3-0)
The United States Civil War Era
The political, economic and social history of the United States in the decades leading up to the Civil War, the military conflict itself and the aftermath of war.

History 461 3 units; H(3-0)
From the Pueblo Uprising to Wounded Knee: A History of American-Indian Conflicts
Military and political clashes between tribal groups, colonial governments, and the U.S. government from the late 1400s to the late twentieth century, focusing on causal factors and eventual socio-political consequences.

History 462 3 units; H(3-0)
Topics in United States Political History
Aspects of the history of American politics from the Revolution to the twentieth century. Emphasis on the process of governing; elections and party politics; legal and constitutional affairs.

History 463 3 units; H(3-0)
The United States Since 1945
The political, social, economic, and cultural dimensions of the United States from 1945 to the present. Major themes include the role of U.S. as a global superpower during the Cold War and after; the contest between liberalism and conservatism in American politics; the social movements of the 1960s and 1970s and their lasting impact; suburbanization and consumer culture; and the transition to a post-industrial economy.

History 464 3 units; H(3-0)
From Colonies to Nation: Making the United States
Explores the creation of the United States from its colonial origins through the Early National Period. Topics may include the political, military, diplomatic, legal, cultural and socio-economic challenges faced by the new nation.

History 467 3 units; H(3-0)
Mexican History
The history of Mexico from the founding of Mexico’s most important colony, New Spain, to the present.

History 471 3 units; H(3-0)
The Military in Latin America
The history of warfare and the armed forces in Latin America from colonial times to the present. Emphasis upon modern wars, militarism, the rise of caudillos, and the impact of the military on society.

History 472 3 units; H(3-0)
Latin American Revolutions
Thematic treatment of social revolutions in twentieth-century Latin America.

History 473 3 units; H(3-0)
History of Crime and Criminal Justice in England
Crime and the development of the criminal courts and jurisdictions, the police, punishments, and correctional institutions, from medieval to modern times. Attention will be given to the relationship of criminality to moral attitudes and socio-economic conditions, and to the historic role of crime and punishment in local communities, society and the state.

History 476 3 units (3-0)
A Cultural History of Biomedical Sciences
Explores changing concepts about life, biology, and medicine from the European Renaissance to the twentieth century. Topics may include the rise of natural history, genetics, molecular biology, and neuroscience.

History 483 3 units; H(3-0)
World War I
An examination of the nature and course of the First World War (1914-1918), with an emphasis on the Western Front. Topics will include the historiography of the war, strategy and tactics, the impact of technology, and the effect of the war on the nations involved.

History 485 3 units; H(3-0)
World War II
The nature, course and short-term results up to 1950 of the Second World War in its global dimensions. The political as well as the military side of the Allied/Axis conflict will be studied.

History 486 3 units; H(3-0)
History of Air Power
An examination of the nature and development of air power across the world. Topics may include: technology; tactics; doctrine; the relationship between air power, weapons of mass destruction and precise attacks; the limits to air power and its role in war, peace, and deterrence.

History 487 3 units; H(3-0)
Brazilian History since 1500
Economic development, political institutions, social and cultural trends, and the interaction between men and women and the environment.

History 488 3 units; H(3-0)
Great Britain as a Great Power, 1690 - 1970
A study of British military, diplomatic and imperial history between 1690 and 1970, with a focus on the roots of Britain’s power.

History 489 3 units; H(3-0)
Espionage and the State, 500 BCE to 1939
The rise of modern intelligence services in the West. Changes in the role, importance and technology of intelligence will be assessed. The contribution of intelligence to political and military strategy in selected conflicts will be examined.

History 490 3 units; H(3-0)
Espionage and the State, 1939 to the Present
Intelligence during the Second World War, the Cold War, and afterward. Changes in the role, importance and technology of attention will be assessed. The contribution of intelligence to political systems, international relations and military operations will be assessed.

Antirequisite(s): Credit for History 490 and 489.02 will not be allowed.

History 491 3 units; H(3-0)
Diplomatic History
A history of international relations and foreign policies of states in Europe and the world.

History 493 3 units; H(3-0)
Topics in History
Selected topics in social, cultural, political, or military history. Previous topics have included the Vietnam War, the North American Petroleum Industry.

MAY BE REPEATED FOR CREDIT

History 494 3 units; H(3-0)
International History of Energy
Twentieth-century history of energy in an international context. Topics may include international relations and political economy focusing on governments, international institutions, and multinational corporations and the role of energy in international conflict and co-operation.

History 495 3 units; H(2-3)
Film and History
Film as a historical document, in particular as a source of social and intellectual history. Topics include: the role of film at moments of decisive historical change; the content and dissemination of political ideologies and social values; film as a source of propaganda; changing attitudes to minority groups; preservation of historical detail.

History 496 3 units; H(3S-0)
(formerly History 498)
Historical Methods and Philosophies of History
A seminar for honours students on the interrelations between the philosophies of history and historical methodology.

Prerequisite(s): History 300 and admission to Honours degree program.

500-Level Courses
Note: Preference in enrolment will be given to Majors in History, Ancient and Medieval History Majors, and graduate students in History.

History 510 3 units; H(3S-0)
(formerly History 509)
Religion, Politics, and Culture in Early Modern Europe
Examines the nature of late medieval religion, the social impact of the Reформations, religious violence and co-existence, and the nature and practice of royal absolutism.

Prerequisite(s): History 300 and 323 or 325, 326 or 327.

History 511 3 units; H(3S-0)
(formerly History 501)
Topics in Gender and Sexuality in History
An examination of gender theory and history with an emphasis on issues of sexuality. Topics and geographic concentrations will vary.

| The Latin American nations in world affairs with special reference to their intellectual, economic, and political relations with Europe, North America,
Courses of Instruction

Africa, and the Pacific Rim. Themes will be drawn from the sixteenth to the twentieth centuries.

Prerequisite(s): History 300.

History 591 3 units; H(3S-0)

Direced Reading and Research
The analysis of historical problems and the use of primary sources. The content of each course will reflect the interests of the instructor.

Prerequisite(s): History 300 and consent of the Department.

MAY BE REPEATED FOR CREDIT

History 593 3 units; H(3-0)

Selected Topics in History
Topics will vary from year-to-year, and will be announced in advance.

Prerequisite(s): History 300.

MAY BE REPEATED FOR CREDIT

History 597 3 units; H(3-0)

Honours Directed Reading
Directed readings for Honours students in their third or fourth year.

Prerequisite(s): History 300.

Antirequisite(s): Credit for History 597 and 596 will not be allowed.

History 598 6 units; F(3-0)

Honours Writing Seminar
The Honours Essay for Honours students in their fourth year.

Prerequisite(s): History 300.

Note: Students will work under the supervision of a faculty member, and are also expected to participate in sessions throughout the year that will normally be facilitated by the Honours Advisor.

Graduate Courses

Note: Only a limited number of these 600-level courses will be offered in any one year. Students may obtain further information from the Department.

Graduate students outside of the department are required to have department approval to register for any of the following courses:

History 601 3 units; H(3-0)

Topics in Imperial History
MAY BE REPEATED FOR CREDIT

History 603 3 units; H(3-0)

Topics in Religious History
MAY BE REPEATED FOR CREDIT

History 607 3 units; H(3-0)

Topics in Western Canadian History
MAY BE REPEATED FOR CREDIT

History 623 3 units; H(3-0)

Topics in Canadian History
An examination of crucial issues in Canada’s political, economic, social and cultural history.

MAY BE REPEATED FOR CREDIT

History 633 3 units; H(3-0)

Topics in Modern European History
MAY BE REPEATED FOR CREDIT

History 637 3 units; H(3-0)

Topics in Military History
MAY BE REPEATED FOR CREDIT

History 639 3 units; H(3-0)

Topics in History of Science
Topics may include the scientific revolution, science and religion, and the reception of scientific ideas.

MAY BE REPEATED FOR CREDIT

History 645 3 units; H(3-0)

Topics in U.S. History
MAY BE REPEATED FOR CREDIT

History 647 3 units; H(3-0)

Topics in Latin American History
MAY BE REPEATED FOR CREDIT

History 651 3 units; H(3S-0)

Research Essay I
In consultation with their supervisor, the student completes an essay modelled on a scholarly research article, to be evaluated on use of primary sources, historiographical framing, and argumentation.

History 653 3 units; H(3S-0)

Research Essay II
In consultation with their supervisor, the student completes an essay modelled on a scholarly research article, to be evaluated on use of primary sources, historiographical framing, and argumentation.

History 655 3 units; H(3-0)

Classics of Strategy

Prerequisite(s): Credit for History 637 and 639 will be required.

History 657 3 units; H(3-0)

Topics in Legal History
MAY BE REPEATED FOR CREDIT

History 675 3 units; H(3-0)

Selected Topics in History
MAY BE REPEATED FOR CREDIT

History 690 3 units; H(3-0)

Historiography and the Theories of History
MAY BE REPEATED FOR CREDIT

History 691 3 units; H(3-0)

Conference Course in Special Topics
Note: Open only to graduate students.

MAY BE REPEATED FOR CREDIT

History 791 3 units; H(3S-0)

Advanced Seminar in Historiographical Interpretations

Humanities HUMN

Instruction offered by members of the Faculty of Arts. Please contact the Arts Students’ Centre for specific details.

Junior Courses

Humanities 200 6 units; F(1-2)

Humanist Perspectives on Human Issues
Introduction to central issues and research methods in the Humanities, using primary source material from literature, religion, philosophy, and the arts. Texts will be studied from a variety of disciplinary and interdisciplinary perspectives. Tutorials will offer opportunities for discussion and instruction in academic writing and basic research methods.

Senior Courses

Humanities 305 3 units; H(3-0)

The Human Situation I
Examines various views concerning human nature, the human situation, and human responsibilities. Requires intensive reading of a moderate number of works of a literary, philosophical, or religious character that express such views.

Humanities 307 3 units; H(3-0)

The Human Situation II
A continuation of Humanities 305.

Prerequisite(s): Humanities 305.

Indigenous Languages INDL

Offered by the Division of Linguistics in the School of Languages, Literatures and Cultures in the Faculty of Arts.

Junior Courses

Indigenous Languages 205 3 units; H(3-0)
(formerly Native Languages 205)

Indigenous Language I
Primary emphasis on the acquisition of conversational skills and vocabulary. Different Indigenous languages may be offered from time to time.

Indigenous Languages 207 3 units; H(3-0)
(formerly Native Languages 207)

Indigenous Language II
Continuation of Indigenous Languages 205, with special attention to grammatical structures and written materials.

Prerequisite(s): Indigenous Languages 205 or equivalent proficiency (in the same language).

Note: See Schedule Builder for specific offerings.

Indigenous Studies INDG

Instruction offered by members of the Faculties of Arts and Social Work as part of the Major in International Indigenous Studies or the Minor in Indigenous Studies. Please contact the Arts Students’ Centre for specific details.
Junior Courses

Indigenous Studies 201 3 units; H(3-0)

Introduction to Indigenous Studies
A multi-disciplinary, theoretical and empirical overview of the situations, perspectives, and aspirations of selected Indigenous peoples with a focus on the Canadian context.

Senior Courses

Indigenous Studies 303 3 units; H(3-0)

Indigenous Ways of Knowing I
An introduction to various Indigenous peoples ways of knowing (epistemology) with a special emphasis on the contextualization of knowledge-building. Deals with various aspects of building knowledge, such as listening, reflection, protocol, and experience.

Prerequisite(s): Credit for Indigenous Studies 303 and any of Indigenous Studies 203, Social Work 203, Social Work 553.30 or Social Work 553.33 will not be allowed.

Note: Normally offered during Block Week. Pre-term study and field trip(s) are normally required and students will be required to cover field trip costs. Priority will be given to International Indigenous Studies majors and minors.

Indigenous Studies 305 3 units; H(3-0)

Indigenous Ways of Knowing II
An examination of the nature and relations of being (ontology) and specific responsibilities in cultural context. Integration of components of Indigenous ways of knowing. International comparison of Indigenous ways of knowing.

Antirequisite(s): Credit for Indigenous Studies 305 and any of Indigenous Studies 205, Social Work 205, Social Work 553.31 or Social Work 553.34 will not be allowed.

Note: Normally offered in Block Week during Spring/Summer Intersession. Pre-term study and field trip(s) are normally required and students will be required to cover field trip costs. Priority will be given to International Indigenous Studies majors and minors.

Indigenous Studies 311 3 units; H(3-0)

Indigenous Governance
Principles that would establish which legitimate and lasting Aboriginal self-government are examined from both an urban and rural perspective. Examines the mechanisms that are being developed to meet political aspirations of Aboriginal peoples: Métis, Inuit, First Nations. Identifies key governance challenges facing Aboriginal communities.

Prerequisite(s): One of Anthropology 213, Canadian Studies 311, History 345, Indigenous Studies 201, or Sociology 307.

Indigenous Studies 312 3 units; H(3-0)
(formerly Indigenous Studies 311 and 313)

Cultural Immersion Field Course
Experience of ceremonial and cultural activities, with a focus on four themes: living values; spirituality; health and healing; and roles, responsibilities, and respect.

Prerequisite(s): One of Indigenous Studies 217, 317 or 303.

Note: Normally offered during Block Week in Spring/Summer Intersession. It may involve rugged field conditions and varying weather for which students must be prepared and equipped. Students will be required to cover field trip costs. Registration closes one month before course begins. Pre-session study may be required.

Indigenous Studies 317 3 units; H(3-0)
(formerly Indigenous Studies 217)

Ecological Knowledge
Experiential exploration, consideration, and application of Indigenous ecological knowledge, philosophies, and contemporary issues.

Note: Some field trip(s) are normally required. Students may be required to cover field trip costs.

Indigenous Studies 343 3 units; H(3-0)

Indigenous Law in Canada
Examination of the special legal and constitutional principles, provisions and instruments that have an impact on Indigenous individuals, governments and organizations. Topics covered may include aboriginal rights, treaty rights, self-government, fiduciary duties, the Royal Proclamation of 1763, the Indian Act, the 1982 Constitution, and pivotal court decisions.

Prerequisite(s): One of Anthropology 213, Canadian Studies 311, History 345, Indigenous Studies 201, or Sociology 307.

Indigenous Studies 397 3 units; H(3-0)

Special Topics in Canadian Indigenous Studies
Selected themes in Canadian Indigenous studies.

MAY BE REPEATED FOR CREDIT

Indigenous Studies 399 3 units; H(3-0)

Special Topics in International Indigenous Studies
Selected themes in International Indigenous studies. May focus on Indigenous peoples of only one country.

MAY BE REPEATED FOR CREDIT

Indigenous Studies 401 3 units; H(3-0)

Research in Selected Themes in International Indigenous Studies
Various themes in the area of International Indigenous Studies. May focus on special interest and need. Normally the course will have a research component.

Prerequisite(s): Consent of the program coordinator.

Indigenous Studies 407 3 units; H(3-0)

Comparative International Indigenous Communities
Social, economic, and political comparisons between selected Indigenous communities throughout the world.

Prerequisite(s): One of Anthropology 213, 337, Canadian Studies 311, History 345, Indigenous Studies 201, or Sociology 307.

Indigenous Studies 415 3 units; H(3-0)
(formerly Indigenous Studies 315)

Indigenous Ethics and Protocol
Examines principles underlying Indigenous ethics and academic and local research protocols including Indigenous ways of knowing, Indigenous methodologies, notions of relationship, spirituality, community, and responsibility in academic research, teaching and learning when collaborating with Indigenous peoples.

Prerequisite(s): Indigenous Studies 303 and one of Anthropology 213, Canadian Studies 311, History 345, Indigenous Studies 201, or Sociology 307.

Indigenous Studies 502 3 units; H(3-0)

Selected Topics in Canadian Indigenous Studies
Investigation of selected topics in Indigenous issues in Canada.

Prerequisite(s): 60 units (10.0 full-course equivalents), including one course in Indigenous Studies.

Antirequisite(s): Credit for Indigenous Studies 502 and 501 will not be allowed.

MAY BE REPEATED FOR CREDIT

Indigenous Studies 503 3 units; H(3-0)

Selected Topics in International Indigenous Studies
In-depth investigation of selected topics in international Indigenous issues.

Prerequisite(s): 60 units (10.0 full-course equivalents), including one course in Indigenous Studies.

MAY BE REPEATED FOR CREDIT

Information Security ISEC

Information Security 601 3 units; H(3-0)

Applied Cryptography
The basics of cryptographic algorithms and protocols including encryption and authentication algorithms and key establishment protocols. Security evaluation in computational and information theoretic settings, and attacks on cryptographic applications and systems.

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Network Security.

Information Security 603 3 units; H(3-0)

Network Security

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Network Security.

Information Security 605 3 units; H(3-0)

System and Application Security

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Software Security.

Information Security 621 3 units; H(1-3-2T)

Ethical Hacking Laboratory
Offensive security, including technical and social methods. Legal and ethical frameworks as well as best practices. Automation and tool use, and defensive techniques.

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Network Security.
Courses of Instruction

Information Security 623 3 units; H(1-3-2T)

Software Security Laboratory
Practices and tools for preventing vulnerabilities in the software development life cycle, including threat modelling, secure coding idioms and secure design patterns, static analyzers for detecting vulnerabilities, fuzzing and other quality assurance practices.

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Software Security.

Information Security 625 3 units; H(1-3-2T)

Mobile and Smart Device Security Laboratory
Architecture of common smartphone platforms and Internet-of-Things environments. Selected topics on threat modelling, penetration testing, and security-aware design for smartphones, home automation, wearables, vehicles and industrial control systems.

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Software Security.

Information Security 641 3 units; H(3-0)

Governance and Risk Management

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Network Security or the Post-baccalaureate Certificate in Software Security.

Information Security 643 3 units; H(3-0)

Policies, Standards and Programs

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Network Security or the Post-baccalaureate Certificate in Software Security.

Information Security 645 3 units; H(3-0)

Incident Management and Forensics

Prerequisite(s): Admission to the Post-baccalaureate Certificate in Network Security or the Post-baccalaureate Certificate in Software Security.

International Foundations Program IFPX

International Foundations Program 150 6 units; F(4-0)
(Formerly English for Academic Purposes Program 150)

Foundational Academic Writing and Grammar I
Develop basic writing and grammar skills of standard written English. The focus is placed on the development of simple and compound sentences. Students will also learn appropriate use of modifiers, noun phrases, past and future verb tenses, repositions, comparatives, articles, spelling, punctuation and work on expanding their range of academic vocabulary.

Prerequisite(s): Admission to IFP Bridging Qatar campus.

Corequisite(s): International Foundations Program 153 and 157.

NOT INCLUDED IN GPA

International Foundations Program 160 6 units; F(4-0)
(Formerly English for Academic Purposes Program 160)

Foundational Academic Writing and Grammar II
Develop writing fluency through study and practice of compound and complex sentence patterns used in standard written English. The main focus will be the process of paragraph analysis and composition. A also integrates aspects of complex grammar structures and their appropriate usage.

Prerequisite(s): International Foundations Program 150, 153, and 157 or admission to IFP Bridging Qatar campus.

Corequisite(s): International Foundations Program 163 and 167.

NOT INCLUDED IN GPA

International Foundations Program 163 3 units; H(4-0)
(Formerly English for Academic Purposes Program 163)

Foundational Reading Comprehension and Proficiency I
Emphasizes the development of academic literacy skills. Instruction will be focused on recognition of word pair analogies, common idiomatic expressions, and higher-level vocabulary. Students will also learn about inference, context clues, and predicting meaning from their readings, as well as multiple genres of reading materials in fiction and non-fiction.

Prerequisite(s): International Foundations Program 150, 153, and 157 or admission to IFP Bridging Qatar campus.

Corequisite(s): International Foundations Program 160 and 167.

NOT INCLUDED IN GPA

International Foundations Program 167 3 units; H(4-0)
(Formerly English for Academic Purposes Program 167)

Foundational Listening Comprehension and Oral Fluency I
A continuation of the development of listening comprehension and speaking skills. Focus will be placed on the development of pronunciation skills, public speaking, formal class presentations, appropriate use of verbal and non-verbal communication techniques, and development of interviewing strategies. Listening strategies and exercises will
focus on comprehension of live or recorded audio instructions and stories.

**Prerequisite(s):** International Foundations Program 150, 153, and 157 or admission to IFP Bridging Qatar campus.

**Corequisite(s):** International Foundations Program 160 and 163.

**NOT INCLUDED IN GPA**

**International Foundations Program 230**
1.5 units; Q(3-0)

**Foundational Academic Reading and Writing for Business Studies**
Develop academic skills in reading and writing pertinent to business studies. Facilitate the acquisition of reading comprehension skills in order to extract meaning from academic listening events. Focus on speaking skills to structure ideas and produce short texts.

**Prerequisite(s):** Admission to IFP Pathways with Haskayne School of Business.

**NOT INCLUDED IN GPA**

**International Foundations Program 235**
1.5 units; Q(3-0)

**Academic Listening and Speaking Skills for Business Studies**
Develop academic skills in listening and speaking pertinent to business studies. Facilitate the acquisition of listening comprehension skills in order to extract meaning from academic listening events. Focus on speaking skills to structure ideas and produce short texts.

**Prerequisite(s):** Admission to IFP Pathways with Haskayne School of Business.

**NOT INCLUDED IN GPA**

**International Foundations Program 236**
1.5 units; Q(3-0)

**Academic Reading and Writing for Business Studies**
Foster academic skills in reading and writing pertinent to business studies. Develop reading comprehension skills to evaluate and incorporate meaning. Focus on speaking skills to communicate and report ideas in academic business settings.

**Prerequisite(s):** International Foundations Program 230.

**NOT INCLUDED IN GPA**

**International Foundations Program 237**
1.5 units; Q(3-0)

**Academic Listening and Speaking Skills for Business Studies**
Develop academic skills in listening and speaking pertinent to business studies. Facilitate the acquisition of listening comprehension skills in order to extract meaning from academic listening events. Focus on speaking skills to communicate and report ideas in academic business settings. Foster academic skills in listening and speaking pertinent to business studies. Develop listening comprehension skills to construct meaning through integrated and multimodal academic listening events. Focus on speaking skills for persuasion through meaning-driven interaction in academic business settings.

**Prerequisite(s):** International Foundations Program 235.

**NOT INCLUDED IN GPA**

**International Foundations Program 240**
3 units; H(3-0)

**Introduction to Academic Writing for STEM**
Focuses on refining essay structure and mastering chronological, comparison and contrast essays. Includes development of personal style, coherence and cohesion in writing on STEM topics. Principles of citation and referencing will be reinforced to further develop their academic integrity.

**Prerequisite(s):** International Foundations Program 240.

**NOT INCLUDED IN GPA**

**International Foundations Program 242**
3 units; H(3-0)

**Intermediate Language and Skills Development**
Develops academic reading, listening and speaking abilities through practice and use. Complementing this, a continuing focus on the development of critical thinking and logical argumentation skills as well as study and learning strategy development.

**Prerequisite(s):** Admission to IFP Pathways with the Faculty of Science.

**NOT INCLUDED IN GPA**

**International Foundations Program 246**
3 units; H(3-0)

**Intermediate Academic Writing for STEM**
Focuses on refining essay structure and mastering chronological, comparison and contrast essays. Includes development of personal style, coherence and cohesion in writing on STEM topics. Principles of citation and referencing will be reinforced to further develop their academic integrity.

**Prerequisite(s):** Admission to IFP Pathways with the Faculty of Science.

**NOT INCLUDED IN GPA**

**International Foundations Program 248**
3 units; H(3-0)

**Academic Success in STEM**
Assists new students in understanding university study requirements, and establishing beneficial study techniques. Through STEM language and educational tasks, students will develop approaches to academic success including critical thinking, logical argumentation, time management, goal setting, and self-reflection.

**Prerequisite(s):** Admission to IFP Pathways with the Faculty of Science.

**NOT INCLUDED IN GPA**

**International Foundations Program 250**
3 units; H(3-0)

**Introduction to Academic Written Communication for Engineering**
Introductory scientific writing skills including reading in scientific texts to develop research skills, sense of audience, tone, register, organization patterns, grammar and mechanical concepts, and vocabulary, with a focus on lab reports.

**Prerequisite(s):** Admission to IFP Pathways with Schulich School of Engineering.

**NOT INCLUDED IN GPA**

**International Foundations Program 257**
3 units; H(3-0)

**Introduction to Academic Oral Communication for Engineering**
Academic oral language skills in technical/scientific contexts including presentations, group problem solving, creating lecture notes, and pronunciation, as well as effective study skills and habits.

**Prerequisite(s):** Admission to IFP Pathways with Schulich School of Engineering.

**NOT INCLUDED IN GPA**

**International Foundations Program 270**
6 units; F(4-0)

**Academic Writing and Grammar I**
Designed for low to high intermediate students of English as an additional language. A focus on skills required for writing academic paragraphs, from brainstorming ideas to the final written product. The paragraph writing will progress to essay writing through the course requiring the more precise use of language for description, opinion and explanation. Writers will practice their critical thinking skills as they analyze and evaluate the topic-related issues and develop their own ideas and ways to express them.

**Prerequisite(s):** International Foundations Program 160 or program placement.

**NOT INCLUDED IN GPA**

**International Foundations Program 273**
3 units; H(4-0)
(formerly English for Academic Purposes Program 173)

**Reading Comprehension and Proficiency I**
Designed for low to high intermediate students of English as an additional language. Students will use a variety of strategies to read academic and non-academic text to build vocabulary in context, and to understand how authors structure language to communicate information and opinion in different types of compositions. Students will practice their critical thinking skills as they analyze and evaluate the readings and express their own ideas.

**Prerequisite(s):** International Foundations Program 163 or program placement.

**NOT INCLUDED IN GPA**

**International Foundations Program 277**
3 units; H(4-0)
(formerly English for Academic Purposes Program 177)

**Listening Comprehension and Oral Fluency I**
Designed for mid-level to high intermediate English as a second language students. Students will practice and develop their listening skills covering a wide range of academic topics in a variety of presentation styles. Improving pronunciation and practicing communication skills for a variety of settings along with the development of critical thinking.

**Prerequisite(s):** International Foundations Program 167 or program placement.

**NOT INCLUDED IN GPA**

**International Foundations Program 280**
6 units; F(4-0)
(formerly English for Academic Purposes Program 167)

**Academic Writing and Grammar II**
To improve high intermediate to low advanced students’ academic writing skills. Refine the essay structure with a focus on mastering the chronological, comparison and contrast essays. Emphasis will be placed upon the sequence of steps in the writing process. Students will learn varied sentence types, more sophisticated writing techniques, advanced grammar, research topics, and documenting academic references.

**Prerequisite(s):** International Foundations Program 270 or program placement.

**NOT INCLUDED IN GPA**

Courses of Instruction

**International Foundations Program 283**

Readings Comprehension and Proficiency II

For high intermediate to low advanced students to continue to refine their reading skills within themebased chapters. Students will build academic vocabulary, study word derivitives, and will increase their ability to use an advanced English dictionary. Students will learn and use critical thinking strategies to respond to texts and articles through discussion, debate and written assignments. In addition, students will begin to explore academic journals of interest to their future studies.

**Prerequisite(s):** International Foundations Program 273 or program placement.

**NOT INCLUDED IN GPA**

**International Foundations Program 297**

Master the listening and speaking skills necessary for undergraduate study. Lectures from a variety of disciplines will be analyzed so that students can develop valuable comprehension strategies, including preparing for a lecture and taking effective notes. Academic discussions about complex, abstract and detailed topics covered in the lectures will be held in order to analyze, problem-solve and make decisions. Oral presentation techniques, pronunciation and critical thinking strategies will be further explored by the students.

**Prerequisite(s):** International Foundations Program 287 or program placement.

**NOT INCLUDED IN GPA**

**International Foundations Program 332**

Develop advanced writing skills while reviewing organizational patterns for multi-disciplinary academic essays. Advanced grammatical and mechanical concepts are fostered. Students will develop an understanding of the process approach to writing, appropriate referencing, documenting, summarizing and summarizing. Critical thinking strategies will be promoted in order for students to create individual conclusions about issues.

**Prerequisite(s):** International Foundations Program 286 or program placement.

**NOT INCLUDED IN GPA**

**International Foundations Program 340**

Reading Comprehension and Proficiency II

Develop advanced reading skills and effective reading strategies for the genres of text found at the undergraduate level. These tests will be used for obtaining information and building vocabulary. Students will employ critical thinking strategies in order to reach independent conclusions and respond analytically.

**Prerequisite(s):** International Foundations Program 286 or program placement.

**NOT INCLUDED IN GPA**

**International Foundations Program 342**

Advanced Language and Skills Development

Continues to develop academic reading, listening and speaking abilities through practice and use. Complementing this, a continuing focus on advanced critical thinking and logical argumentation skills as well as consolidation of effective study and learning strategy development skills.

**Prerequisite(s):** International Foundations Program 242.

**NOT INCLUDED IN GPA**

**International Foundations Program 346**

Technical Writing

Focuses on strengthening ability to write clearly and concisely in science disciplines, including documenting processes, steps and procedures, descriptions and discussions of results with visuals such as tables and graphs. Special attention paid to written coherence and proofreading skills.

**Prerequisite(s):** International Foundations Program 340.

**NOT INCLUDED IN GPA**

**International Foundations Program 350**

Advanced Academic Written Communication for Engineering

Advanced scientific and technical communication for extensive writing tasks in the Schulich School of Engineering. Students will develop scientific and technical writing, design research skills and information literacy, critically analyze data, enrich vocabulary focused on scientific contexts, and foster critical thinking and synthesis of information.

**Prerequisite(s):** International Foundations Program 250.

**NOT INCLUDED IN GPA**

**Advanced Academic Oral Communication Skills for Engineering**

Advanced academic oral language and academic communication skills for use in the Schulich School of Engineering. Participants will develop skills for communication in technical contexts, and develop fluency, accuracy and clarity. Tasks will include research on extended lectures, research and critical thinking, presentations, discussion leading and group problem-solving.

**Prerequisite(s):** International Foundations Program 257.

**NOT INCLUDED IN GPA**

**International Foundations Program 451**

Introduction to Academic Written Communication for Engineering

Basic scientific writing skills and written academic communication expectations for use in engineering contexts. Focus will include how to read scientific texts, developing research skills, written communication contexts, grammar and mechanical concepts, and audience, as well as developing academic and scientific vocabulary.

**Prerequisite(s):** Consent of the Department.

**NOT INCLUDED IN GPA**

**International Foundations Program 455**

Introduction to Academic Oral Communication Skills for Engineering

Participants will develop their English speaking and listening skills for use in engineering contexts through participation in academic presentations, note-taking, and group problem solving scenarios.

**Prerequisite(s):** Consent of the Department.

**NOT INCLUDED IN GPA**

**International Foundations Program 459**

Introduction to Academic Culture and Communication

An introduction to the academic culture and communication expectations for study including physical and online infrastructure, as well as improve
language skills necessary to navigate university entrance and commence studies.

Prerequisite(s): Consent of the Department.
NOT INCLUDED IN GPA

**International Foundations Program 559**
3 units; H(3-0)

**Advanced Academic Communication for Engineering**
Participants will develop writing for scientific reports, technical writing, and applications, and develop reading skills for identifying bias, synthesizing information, vocabulary acquisition and researching. Presentation skills, as well as note-taking and questioning strategies, will also be practiced.

Prerequisite(s): Consent of the Department.
NOT INCLUDED IN GPA

**Graduate Courses**

**International Foundations Program 651**
3 units; H(3-0)

**Advanced Academic Written Communication for Engineering**
Facilitate the synthesis of written discourse adhering to the characteristics of academic language in the Master of Engineering program. Focus on writing and research skills required for graduate level academic studies.

Prerequisite(s): Admission to IFP Pathways Master of Engineering program, or consent of the program.
NOT INCLUDED IN GPA

**International Foundations Program 655**
3 units; H(3-0)

**Advanced Academic Oral Communication for Engineering**
Facilitate applied language skills for communication in the Master of Engineering program. Focus on oral communication skills required for graduate level academic studies.

Prerequisite(s): Admission to IFP Pathways Master of Engineering program, or consent of the program.
NOT INCLUDED IN GPA

**International Foundations Program Business IFPB**
Students must be admitted into the IFP Pathways with Haskayne School of Business or receive consent of the IFP office to enrol in these courses.

**International Foundations Program Business 201**
1 unit; (1-0)

**Language Enrichment for Economics 201**
English language support for IFP Pathways students taking Economics 201. Facilitate the development of language and academic skills in conjunction with the course outcomes of Economics 201.

Prerequisite(s): Admission to IFP Pathways with Haskayne School of Business.
Corequisite(s): Economics 201.
NOT INCLUDED IN GPA

**International Foundations Program Business 213**
1 unit; (1-0)

**Language Enrichment for Management Studies 213**
English language support for IFP Pathways students taking Management Studies 213. Facilitate the development of language and academic skills in conjunction with the course outcomes of Management Studies 213.

Prerequisite(s): Admission to IFP Pathways with Haskayne School of Business.
Corequisite(s): Management Studies 213.
NOT INCLUDED IN GPA

**International Foundations Program Business 217**
1 unit; (1-0)

**Language Enrichment for Strategy and Global Management 217**
English language support for IFP Pathways students taking Strategy and Global Management 217. Facilitate the development of language and academic skills in conjunction with the course outcomes of Strategy and Global Management 217.

Prerequisite(s): Admission to IFP Pathways with Haskayne School of Business.
Corequisite(s): Strategy and Global Management 217.
NOT INCLUDED IN GPA

**International Foundations Program Business 227**
1 unit; (1-0)

**Fundamental Academic Communication**
Introduction of academic culture and communication expectations for the study in the Haskayne School of Business, including physical and online infrastructure, as well as, improving language skills necessary to navigate university entrance and commence studies.

Prerequisite(s): Admission to IFP Pathways with Haskayne School of Business.
NOT INCLUDED IN GPA

**International Foundations Program Engineering IFPE**
Students must be admitted into the IFP Pathways with Schulich School of Engineering or receive consent of the IFP office to enrol in these courses.

**International Foundations Program Engineering 200**
1 unit; (1-0)

**Adjunct for Engineering 200**
English language support for IFP Pathway students taking Engineering 200. Focus on language and study skills for the successful completion of Engineering 200. Simplifying and personalizing class notes; and developing skills to critically analyze and synthesize content of the above course.

Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Engineering 200.
NOT INCLUDED IN GPA

**International Foundations Program Engineering 201**
1 unit; (1-0)

**Adjunct for Engineering 201**
English language support for IFP Pathway students taking Engineering 201. Focus on language and study skills for the successful completion of Engineering 201. Simplifying and personalizing class notes; and developing skills to critically analyze and synthesize content of the above course.

Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Engineering 201.
NOT INCLUDED IN GPA

**International Foundations Program Engineering 202**
1 unit; (1-0)

**Adjunct for Engineering 202**
English language support for IFP Pathway students taking Engineering 202. Focus on language and study skills for the successful completion of Engineering 202. Simplifying and personalizing class notes; and developing skills to critically analyze and synthesize content of the above course.

Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Engineering 202.
NOT INCLUDED IN GPA

**International Foundations Program Engineering 209**
1 unit; (1-0)

**Adjunct for Chemistry 209**
English language support for IFP Pathway students taking Chemistry 209. Focus on language and study skills for the successful completion of Chemistry 209. Simplifying and personalizing class notes; and developing skills to critically analyze and synthesize content of the above course.

Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Chemistry 209.
NOT INCLUDED IN GPA

**International Foundations Program Engineering 211**
1 unit; (1-0)

**Adjunct for Mathematics 211**
English language support for IFP Pathway students taking Mathematics 211. Focus on language and study skills for the successful completion of Mathematics 211. Simplifying and personalizing class

notes; and developing skills to critically analyze and synthesize content of the above course.
Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Mathematics 211.
NOT INCLUDED IN GPA

International Foundations Program
Engineering 225
1 unit; (1-0)

Adjunct for Engineering 225
English language support for IFP Pathway students taking Engineering 225. Focus on language and study skills for the successful completion of Engineering 225. Simplifying and personalizing class notes; and developing skills to critically analyze and synthesize content of the above course.
Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Engineering 225.
NOT INCLUDED IN GPA

International Foundations Program
Engineering 275
1 unit; (1-0)

Adjunct for Mathematics 275
English language support for IFP Pathway students taking Mathematics 275. Focus on language and study skills for the successful completion of Mathematics 275. Simplifying and personalizing class notes; and developing skills to critically analyze and synthesize content of the above course.
Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Mathematics 275.
NOT INCLUDED IN GPA

Adjunct for Mathematics 277
English language support for IFP Pathway students taking Mathematics 277. Focus on language and study skills for the successful completion of Mathematics 277. Simplifying and personalizing class notes; and developing skills to critically analyze and synthesize content of the above course.
Prerequisite(s): Admission to IFP Pathways with Schulich School of Engineering.
Corequisite(s): Mathematics 277.
NOT INCLUDED IN GPA

Graduate Courses

International Foundations Program
Engineering 621
1 unit; (1-0)

Language Enrichment for Petroleum Engineering 621
English language support for IFP Pathways students taking Petroleum Engineering 621. Facilitate the development of language and academic skills in conjunction with the course outcomes of Petroleum Engineering 621.
Prerequisite(s): Admission to IFP Pathways in the Master of Engineering program, or consent of the program.
Corequisite(s): Petroleum Engineering 621.
NOT INCLUDED IN GPA

International Foundations Program
Engineering 682
1 unit; (1-0)

Language Enrichment for Engineering 682
English language support for IFP Pathways students taking Engineering 682. Facilitate the development of language and academic skills in conjunction with the course outcomes of Engineering 682.
Prerequisite(s): Admission to IFP Pathways in the Master of Engineering program, or consent of the program.
Corequisite(s): Engineering 682.
NOT INCLUDED IN GPA

International Foundations Program
Engineering 683
1 unit; (1-0)

Language Enrichment for Engineering 683
English language support for IFP Pathways students taking Engineering 683. Facilitate the development of language and academic skills in conjunction with the course outcomes of Engineering 683.
Prerequisite(s): Admission to IFP Pathways in the Master of Engineering program, or consent of the program.
Corequisite(s): Engineering 683.
NOT INCLUDED IN GPA

International Foundations Program
Engineering 684
1 unit; (1-0)

Language Enrichment for Engineering 684
English language support for IFP Pathways students taking Engineering 684. Facilitate the development of language and academic skills in conjunction with the course outcomes of Engineering 684.
Prerequisite(s): Admission to IFP Pathways in the Master of Engineering program, or consent of the program.
Corequisite(s): Engineering 684.
NOT INCLUDED IN GPA

International Relations INTR

Senior Courses

International Relations 301
3 units; H(3-0)
A Multidisciplinary Survey of International Relations
A survey of International Relations integrating the approaches applied in various Social Sciences disciplines.
Prerequisite(s): Admission to the International Relations program.

International Relations 501
3 units; H(3-0)
Advanced Seminar in International Relations
An integrative seminar on selected themes from the International Relations field.
Prerequisite(s): International Relations 301 and third- or fourth-year, admission to the International Relations program and completion of at least 60 units (10.0 full-course equivalents).

Directed Study in International Relations
Study of a particular topic under the direct supervision of a faculty member.
Prerequisite(s): Admission to the International Relations program, and consent of the Program Co-ordinator.
Note: Students wishing to register in this course must submit to the Program Co-ordinator a detailed statement by the instructor of the work to be carried out.

MAY BE REPEATED FOR CREDIT

Internship INTE

Senior Courses

Internship 503
15 units; (4 months)
Internship in Computer Science
503.01. Internship in Computer Science I
503.02. Internship in Computer Science II
503.03. Internship in Computer Science III
503.04. Internship in Computer Science IV

Internship 513
15 units; (4 months)
Internship in Engineering
513.01. Internship in Engineering I
513.02. Internship in Engineering II
513.03. Internship in Engineering III
513.04. Internship in Engineering IV

NOT INCLUDED IN GPA

Courses of Instruction

Internship 591 15 units (4 months)

Professional Theatre Internship

Internship experience with a local professional theatre organization.

591.01. Professional Theatre Internship I
591.02. Professional Theatre Internship II

Prerequisite(s): Admission to BFA Drama, 90 units (15 full-course equivalents) and consent of the Division Chair, Drama.

Antirequisite(s): Credit for Internship 591 or any of Drama 590, 591 or 593 will not be allowed.

NOT INCLUDED IN GPA

Graduate Courses

Internship 601 1.5 units

Graduate Internship (Thesis-based, full-time)

Students registered full-time in a thesis-based master's or doctoral program who undertake an approved full-time internship (of 21 hours/week or more) should register in this course during the term that coincides with the internship. This course cannot be used to substitute for other course requirements for a graduate degree program. Not available to students enrolled in programs with their own internship or co-op course. To comply with Canada Immigration regulations, this course is not available to international students unless their proposed internship is outside Canada or is a Mitacs internship.

601.01 Graduate Internship I
601.02 Graduate Internship II
601.03 Graduate Internship III

Prerequisite(s): Consent of the Faculty of Graduate Studies.

NOT INCLUDED IN GPA

Internship 602 1.5 units

Graduate Internship (Thesis-based, part-time)

Students registered in a thesis-based master's program who undertake an approved part-time internship (of 20 hours/week or less) should register in this course during the term that coincides with the internship. This course cannot be used to substitute for other course requirements for a graduate degree program. Not available to students enrolled in programs with their own internship or co-op course. To comply with Canada Immigration regulations, this course is not available to international students unless their proposed internship is outside Canada or is a Mitacs internship.

602.01 Graduate Internship I
602.02 Graduate Internship II
602.03 Graduate Internship III

Prerequisite(s): Consent of the Faculty of Graduate Studies.

NOT INCLUDED IN GPA

Internship 603 1.5 units

Graduate Internship (Course-based, full-time)

Students registered in a course-based master's program who undertake an approved part-time internship (of 20 hours/week or less) should register in this course during the term that coincides with the internship. This course cannot be used to substitute for other course requirements for a graduate degree program. Not available to students enrolled in programs with their own internship or co-op course.

603.01 Graduate Internship I
603.02 Graduate Internship II
603.03 Graduate Internship III

Prerequisite(s): Consent of the Faculty of Graduate Studies.

NOT INCLUDED IN GPA

Interprofessional Health Education IPHE

Senior Courses

Interprofessional Health Education 501 3 units; H(3-0)
(Interprofessional Health Education 601)

Interprofessional Practice in Mental Health

Students from different helping professions come together to examine selected issues of interprofessional practice in the area of mental health and co-occurring addictive disorders, focusing on the experience of mental illness, treatment alternatives, practice implications, advocacy and policy issues, and future challenges and change. Incorporates in-class and field experiences with consumers and families, employers and professionals, services and organizations.

Prerequisite(s): Consent of the instructor(s).

Interprofessional Health Education 604 1.5 units

Graduate Internship (Course-based, part-time)

Students registered in a course-based master's program who undertake an approved part-time internship (of 20 hours/week or less) should register in this course during the term that coincides with the internship. This course cannot be used to substitute for other course requirements for a graduate degree program. Not available to students enrolled in programs with their own internship or co-op course.

604.01 Graduate Internship I
604.02 Graduate Internship II
604.03 Graduate Internship III

Prerequisite(s): Consent of the Faculty of Graduate Studies.

NOT INCLUDED IN GPA

Interprofessional Health Education 503 3 units; H(3-0)
(Interprofessional Health Education 603)

Interprofessional Practice in Addictions

Students from different helping professions come together to examine aspects of addictions assessment, treatment and recovery, and issues of co-occurring mental health disorders in an interprofessional context. Studies include the complex array of treatments, programs and supports available in a Canadian context, and critical examination of the ancillary issues of community care, and other support services that are required for successful recovery and relapse prevention for those with addictive disorders and co-occurring mental health issues.

Prerequisite(s): Consent of the instructor(s).

Interprofessional Approaches to Assessment, Diagnosis and Treatment in Mental Health and Addictions: The Major Disorders - Part A

Complex facets of assessment and diagnosis (using DSM classification system) of depressive, anxiety, psychotic and alcohol disorders. Team investigation of treatment programs and supports available within a Canadian context.

Prerequisite(s): Consent of the instructor(s).

Interprofessional Health Education 605 3 units; H(3-2)

Interprofessional Approaches to Assessment, Diagnosis and Treatment in Mental Health and Addictions: Personality Disorders and Special Populations - Part B

Complex facets of assessment and diagnosis of personality disorders, developmental disorders, special populations and addictive disorders. Team investigation of treatment programs and supports available within a Canadian context.

Prerequisite(s): Consent of the instructor(s).

Interprofessional Health Education 607 3 units; H(3-2)
### Italian ITAL

**Junior Courses**

**Italian 201**
- 3 units; H(3-1)
- *Beginners' Italian I*
  - This course, designed for students with no previous knowledge of the language, provides training in the comprehension, speaking, reading, and writing of Italian.
  - Antirequisite(s): Credit for Italian 201 and 30 will not be allowed.

**Italian 203**
- 3 units; H(3-1)
- *Beginners' Italian II*
  - A continuation of Italian 201.
  - Prerequisite(s): Italian 30, Italian 201 or equivalent.

**Senior Courses**

**Italian 301**
- 3 units; H(3-1T)
- *Second-Year Italian I*
  - An intensive course in reading, writing, and oral practice.
  - Prerequisite(s): Italian 203.

**Italian 303**
- 3 units; H(3-1T)
- *Second-Year Italian II*
  - Further development of communicative skills in Italian (listening, speaking, writing, reading), as well as the study of cultural issues in the Italian world with emphasis on reading.
  - Prerequisite(s): Italian 301.

**Italian 305**
- 3 units; H(3-1)
- *Introduction to Textual Analysis*
  - Development of critical thinking and communicative skills through the analysis of selected literary and non-literary texts.
  - Prerequisite(s): Italian 301.

**Italian 307**
- 3 units; H(3-1)
- *Communication*
  - Study of different types of communication (print and electronic media, correspondence, business). Analysis of relevant aspects of Italian contemporary life.
  - Prerequisite(s): Italian 301.

**Italian 309**
- 3 units; H(3-1)
- *Civilization: Culture and the Arts*
  - Aspects of Italian civilization and contemporary cultural issues in Italian Studies.
  - Prerequisite(s): Italian 203.

**Italian 317**
- 3 units; H(3-0)
- *Italian Culture and Literature*
  - A survey of Italian culture, inclusive of literary and non-literary texts, film, and popular culture. Topics such as Italian history and immigration, Italian cities, Italian food and fashion, and Italian Canadian literature and traditions, in Calgary and elsewhere are covered.
  - Note: Taught in English.
  - MAY BE REPEATED FOR CREDIT

**Italian 401**
- 3 units; H(3-1T)
- *Third-Year Italian I*
  - A course in composition and conversation for advanced students in Italian. Selected readings from literary texts.
  - Prerequisite(s): Italian 303 and 3 units of Italian at the senior level.

**Italian 403**
- 3 units; H(3-1T)
- *Third-Year Italian II*
  - Intensive study of Italian grammar with the goal of attaining greater proficiency in written and oral communication. Grammatical analysis, vocabulary enrichment and development of conversation skills dealing with cultural issues.
  - Prerequisite(s): Italian 303 and 3 units of Italian at the senior level.

**Italian 405**
- 3 units; H(3-0)
- *Selected Works in Italian Literature*
  - Introduction to Italian literature with particular emphasis on the novel and poetry.
  - Prerequisite(s): Italian 303 and 3 units of Italian at the senior level.
  - MAY BE REPEATED FOR CREDIT

**Italian 407**
- 3 units; H(3-0)
- *Performance as Cultural Expression*
  - Study of Italian theatre, opera and drama as well as popular forms of cultural expression such as festival, music and figurative art.
  - Prerequisite(s): Italian 303 and 3 units of Italian at the senior level.

**Italian 409**
- 3 units; H(3-2)
- *Italian Culture through Cinema*
  - Significant social, cultural and historical issues in Italian society through the medium of film.
  - Prerequisite(s): Italian 303 and 3 units at the senior level.

**Italian 499**
- 3 units; H(3-0)
- *Topics in Italian Studies I*
  - Selected topics in Italian language, literature or civilization.
  - Prerequisite(s): Italian 303 and 3 units at the senior level.
  - MAY BE REPEATED FOR CREDIT

**Italian 501**
- 3 units; H(3-0)
- *Interdisciplinary Study of Italian Culture*
  - Capstone project in Italian studies. Analytical discussion of selected topics each related to students' field of concentration.
  - Prerequisite(s): Italian 303 and 3 units at the senior level and consent of the instructor.

**Italian 502**
- 3 units; H(3-0)
- (formerly Italian 503)
- *Advanced Textual Analysis*
  - Discussion of selected topics in Italian language, literature or culture. Course designed to develop writing skills. Review of writing strategies, spelling, punctuation, expository and argumentative techniques, using various original sources taken from journalistic, scientific, and literary texts as well as from other media.
  - Prerequisite(s): Italian 303 and 3 units at the senior level.
  - MAY BE REPEATED FOR CREDIT

**Italian 597**
- 3 units; H(0-3T)
- *Directed Reading*
  - Directed reading for students in their third or fourth year. Qualified students will undertake research projects in their specified field of interest under the supervision of a faculty member.
  - Prerequisite(s): Consent of the School.
  - MAY BE REPEATED FOR CREDIT

**Italian 599**
- 3 units; H(3S-0)
- *Topics in Italian Studies II*
  - A seminar course for advanced students.
  - Prerequisite(s): Italian 303 and 3 units at the senior level.
  - MAY BE REPEATED FOR CREDIT

### Japanese JPNS

**Junior Courses**

**Japanese 201**
- 3 units; H(3-0)
- *Introduction to Japanese Popular Culture*
  - An introduction to the major forms of popular visual and material culture from Japan in the twentieth and twenty-first centuries.
  - Note: Taught in English.

**Japanese 205**
- 3 units; H(4-1)
- *Beginners' Japanese I*
  - Basic concepts of modern Japanese. Reading and writing of characters, essentials of grammar, basic vocabulary, and oral drills on normal speech patterns.
  - Antirequisite(s): Credit for Japanese 205 and 30 will not be allowed.
Courses of Instruction

Japanese 207 3 units; H(4-1)
Beginners' Japanese II
Continuation of Japanese 205.
Prerequisite(s): Japanese 30 or Japanese 205.

Senior Courses

Japanese 301 3 units; H(3-1)
Continuing Japanese I
Prerequisite(s): Japanese 207.

Japanese 303 3 units; H(3-1)
Continuing Japanese II
Continuation of Japanese 301.
Prerequisite(s): Japanese 301.

Japanese 309 3 units; H(3-2)
Topics in Japanese Culture in an Immersion Setting
Introduction to contemporary Japanese culture through research projects and life experience.
309.01. Wisdom, Imagination, and Creation
309.02. Longing, Memory, and Inheritance
Prerequisite(s): Consent of the School.
Corequisite(s): Japanese 311 and 313.
Note: This course is given during Spring/Summer Intersession in Japan. A supplementary fee will be assessed to cover additional costs associated with this course.

Japanese 311 3 units; H(3-1)
Japanese Language in an Immersion Setting I
Stresses oral skills and cultural understanding in an immersion setting. While the focus will be on speaking and aural comprehension, reading and writing will also be introduced.
Prerequisite(s): Japanese 207.
Corequisite(s): Japanese 309 and 313.
Note: This course is given during Spring/Summer Intersession in Japan. A supplementary fee will be assessed to cover additional costs associated with this course.

Japanese 313 3 units; H(3-1)
Japanese Language in an Immersion Setting II
A continuation of Japanese 311.
Corequisite(s): Japanese 309 and 311.
Note: This course is given during Spring/Summer Intersession in Japan. A supplementary fee will be assessed to cover additional costs associated with this course.

Japanese 317 3 units; H(3-0)
Topics in Japanese Civilization
Distinctive features of Japanese civilization within the Asian context.
317.01. Japanese Civilization
317.02. Japanese Cultural History Through Film
317.03. Japanese Cultural History in the Present Day
Note: Taught in English.

Japanese 323 3 units; H(3-0)
Critical Approaches to Manga and Anime
A critical introduction to Japanese manga (print comics) and anime (animation) in the twentieth and twenty-first centuries.
Note: Taught in English.

Japanese 325 3 units; H(3-0)
Japanese Video Games and Gaming Culture
A critical introduction to the history, analysis, and social impact of video games from Japan and Japanese gaming culture worldwide.
Note: Taught in English.

Japanese 327 3 units; H(3-0)
Modern Japanese Literature in Translation
An introduction to the literature and literary history of modern Japan, with readings drawn from various literary genres, from 1868 to the present.
Note: Taught in English.

Japanese 331 3 units; H(3-0)
Intermediate Japanese I
An intermediate course giving emphasis to both writing and oral skills. Some of the more difficult aspects of modern Japanese grammar will be studied.
Prerequisite(s): Japanese 303.

Japanese 333 3 units; H(3-0)
Intermediate Japanese II
A continuation of Japanese 331.
Prerequisite(s): Japanese 331.

Japanese 341 3 units; H(3-0)
Introduction to Japanese Literature
Reading and discussion of selected works of modern Japanese literature.
Prerequisite(s): Japanese 303.

Japanese 441 3 units; H(3-0)
Advanced Conversational Japanese
Intensive development of aural and oral skills in Japanese through discussion of selected topics using a variety of authentic media. The focus will be on developing conversational abilities and vocabulary.
Prerequisite(s): Japanese 331.

Japanese 451 3 units; H(3-0)
Japanese Through Contemporary Texts
Language practice and cultural analysis through the study of contemporary Japanese texts. Authentic material will be selected from documents and textbooks. Students will be able to improve their reading skills while enhancing their knowledge of Japanese culture.
Prerequisite(s): Japanese 331.

Japanese 461 3 units; H(3-0)
Japanese-Chinese Cultural Relations
Discussion of cultural relations and influences between Japan and China. Topics may include cultural identities and cross-influences, literary and artistic traditions, and writing systems.
Prerequisite(s): Japanese 303 or higher (excluding Japanese 317).
Note: Knowledge of Chinese would be beneficial.

Japanese 471 3 units; H(3-0)
Introduction to Classical Japanese
Basic introduction to classical Japanese language, including core grammar structures, sample masterpieces, and handwriting.
Prerequisite(s): Japanese 331.

Kinesiology KNES

Introduction to Research in Kinesiology
An introduction to research in kinesiology with an emphasis on understanding the research process, including basic statistical knowledge, and its relationship to critical thinking. Practical application of concepts through direct involvement in individual and group projects.
Prerequisite(s): Biology 30 and Chemistry 30.
Note: Students are responsible for completing a Get Active Questionnaire (GAQ – formerly PAR-Q) and obtain medical clearance if required.

Kinesiology 201 3 units; H(2-3)
Activity: Essence and Experience
Participate in various activities and movement patterns and the study of the fundamental factors that influence the activities we choose and the way we move.
Prerequisite(s): Biology 30.

Kinesiology 203 3 units; H(2-2)
Activity: Health, Fitness, and Performance
Fundamentals of exercise physiology are used in a variety of theoretically supported activities to experience the benefits of exercise and an understanding of exercise prescription and evaluation.
Prerequisite(s): Biology 30, Chemistry 30, and Mathematics 30-1.

Kinesiology 213 3 units; H(2-1)
Introduction to Nutrition
Provides students with a basic understanding of the role of nutrition in health and fitness.
Prerequisite(s): Kinesiology 259.

Kinesiology 244 3 units; H(2-1)
(formerly Kinesiology 245)
Introduction to Socio-Cultural Aspects of Sport
An introduction to thinking critically about the relationship between sport and the larger social context, with an emphasis on social norms, politics, ethics, and historical perspectives.
Antirequisite(s): Credit for Kinesiology 244 and either Kinesiology 303.44 or Sociology 399 will not be allowed.

Kinesiology 251 3 units; H(3-1/3)
Introduction to Human Motor Control and Learning
An introduction to principles underlying motor control and learning.
Prerequisite(s): Biology 30.
Courses of Instruction

Kinesiology 253  3 units; H(3-1/3)
*Introduction to Exercise and Sport Psychology*
An introduction to the psycho-social concepts underlying an understanding of human behaviour in physical activity, sport, and health.

Kinesiology 259  3 units; H(3-2)
*Human Anatomy and Physiology I*
The instructional approach is a combination of systematic and regional anatomy and physiology with some surface anatomy and radiologic considerations. General cell physiology, bone anatomy, neurophysiology and muscular physiology, as well as skeletal structure, types of connective tissues, structure of joints and muscles of the axial and appendicular skeleton will be covered. Laboratories utilize human tissue materials, anatomical models, charts, and prospected cadavers and cadaver specimens.

Prerequisite(s): Biology 30, Chemistry 30, and Mathematics 30-1 or 30-2.
Antirequisite(s): Credit for Kinesiology 259 and any of Biology 305, Medical Science 404, Nursing 221, Zoology 269, 461 or 463 will not be allowed.

Kinesiology 260  3 units; H(3-2)
*Human Anatomy and Physiology II*
The instructional approach is a combination of systematic and regional anatomy and physiology with some surface anatomy and radiologic considerations. Physiology and anatomy of the cardiovascular, pulmonary, endocrine, renal and gastrointestinal systems as well as anatomy of the reproductive and integumentary systems and special senses will be covered. Laboratories utilize human tissue materials, anatomical models, charts, and prospected cadavers and cadaver specimens.

Prerequisite(s): Kinesiology 259.
Antirequisite(s): Credit for Kinesiology 260 and any of Biology 305, Medical Science 404, Nursing 222, Zoology 269, 461 or 463 will not be allowed.

Kinesiology 263  3 units; H(3-1T)
*Quantitative Biomechanics*
Basic principles of force system analysis, impulse-momentum, work-energy and particle kinematics applied to biological structures, including extensive mathematical analyses.

Prerequisite(s): Kinesiology 259.
Corequisite(s): Prerequisite or Corequisite: Kinesiology 201 and 260.

Senior Courses

Kinesiology 303  3 units; H(3-0)
*Special Topics in Kinesiology*
MAY BE REPEATED FOR CREDIT

Kinesiology 311  3 units; H(2-1)
*Leadership Foundations*
Contemporary leadership best practices with a focus on physical activity, pedagogy and sport coaching. Linking leadership theory with critical reflection.

Prerequisite(s): Admission to the Faculty of Kinesiology.
Antirequisite(s): Credit for Kinesiology 311 and 211 will not be allowed.

Kinesiology 321  3 units; H(3-0)
*Foundations of Instruction*
The fundamental principles of creating an effective learning environment in an instructional activity setting.

Prerequisite(s): Kinesiology 201 and admission to the Leadership in Pedagogy and Coaching major.

Kinesiology 323  3 units; H(3-2)
*Integrative Human Physiology*
This course builds upon fundamental principles of human systems physiology, with a focus on how the integration of these physiological systems provides the means by which our bodies maintain homeostasis from the systemic down to the cellular level.

Prerequisite(s): Kinesiology 260 and admission to the Faculty of Kinesiology.
Antirequisite(s): Credit for Kinesiology 323 and any of Biology 305, Medical Science 404, Zoology 269, 461, or 463 will not be allowed.

Kinesiology 330  3 units; H(2-2)
*Flexibility and Relaxation Techniques*
Study of joint flexibility, relaxation techniques, and stress management and their importance to physical fitness, human performance, wellness, and health.

Prerequisite(s): Kinesiology 260 or Zoology 269.

Kinesiology 331  3 units; H(3-0)
*Foundations of Coaching*
The fundamental principles of creating an effective training environment for the developing athlete.

Prerequisite(s): Kinesiology 201.

Kinesiology 335  3 units; H(2-2)
*Active Living Outdoors*
Emphasizing a “fit-for-life” philosophy, this course explores the health providing benefits of selected self-propelled outdoor activities. Students are required to participate in activity experiences on campus.

Prerequisite(s): Kinesiology 203.
Note: Students may incur additional costs for equipment rental.

Kinesiology 339  3 units; H(3-0)
*Natural Environments, Wellness, and Health*
An exploration of how physical activity in natural, outdoor environments leads to enhanced physical fitness, wellness, and health. Safe practices in these environments will be examined in conjunction with practices that help maintain the ecological integrity of natural and wild environments.

Prerequisite(s): Kinesiology 201.

Kinesiology 343  3 units; H(3-0)
*Canadian Sport History*
The sources and development of sporting activity in Canadian society.

Prerequisite(s): One of Kinesiology 244, 245 or 303.44.

Kinesiology 344  3 units; H(3-0)
*Gender, Sexuality, and Sport*
Informed by feminist theoretical perspectives, exploring the different ways that sport functions to reproduce and challenge dominant ideas about gender and sexuality.

Prerequisite(s): One of Kinesiology 244, 245 or 303.44 and admission to the Faculty of Kinesiology.

Kinesiology 351  3 units; H(3-0)
*Foundations of Neural Control of Movement*
An examination of the nervous system and its role in controlling movement. Emphasis is placed on understanding the basic anatomy and neurophysiology of the central and peripheral nervous systems. Topics include the properties of individual neurons and neural circuits that support human movement. This basic understanding is supplemented by discussion of neurological injuries, diseases and disorders that compromise human movement.

Prerequisite(s): Kinesiology 251 and 260.

Kinesiology 355  3 units; H(3-0)
*Human Growth and Development*
The physiological, anatomical, emotional and social changes in human growth and development, with a view to the planning and selection of appropriate programs in physical education, sport, and dance.

Prerequisite(s): Kinesiology 260.
Corequisite(s): Prerequisite or Corequisite: Kinesiology 323.

Kinesiology 363  3 units; H(3-1/4)
*Biomechanics of Biological Materials*
Functional characteristics of muscle, bone, cartilage, tendon, ligament, and joints as they relate to movement and loading of the locomotor system.

Prerequisite(s): Kinesiology 263 and Statistics 205 or 213.

Kinesiology 365  3 units; H(3-0)
*Sensorimotor Neuroscience*
An examination of how human movement is coordinated by the nervous system, beginning with a review of relevant neuroanatomy and neurophysiology. An emphasis is placed on contemporary scientific techniques throughout.

Prerequisite(s): Kinesiology 251 and 260.
Antirequisite(s): Credit for Kinesiology 365 and 503.44 will not be allowed.

Kinesiology 367  3 units; H(2-1T-1)
*Adapted Physical Activity*
An examination of specific problems within the psychomotor domain and the related delivery systems for their identification and remediation.

Prerequisite(s): Kinesiology 260.

Note: Laboratory consists of a required practicum.

Kinesiology 369  3 units; H(3-0)
*Physical Activity, Health, and Aging*
Aging and its impact on neuromotor performance, fitness, health, and patterns of participation in physical activity and recreational pursuits.

Corequisite(s): Prerequisite or Corequisite: Kinesiology 355.

Kinesiology 371  3 units; H(3-2)
*Scientific Basis of Prevention and Care of Athletic Injuries*
Responsibilities of physical educators with respect to their role in the prevention and care of athletic injuries.

Prerequisite(s): Kinesiology 260 and admission to the Faculty of Kinesiology.
Antirequisite(s): Credit for Kinesiology 371 and 372 will not be allowed.
Kinesiology 372 3 units; H(3-1/3)

Foundations of Sport Medicine
An introduction to the common medical issues and injuries that affects the athlete related to sport and exercise.
Prerequisite(s): Kinesiology 260 and admission to the Faculty of Kinesiology.
Antirequisite(s): Credit for Kinesiology 372 and 371 will not be allowed.

Kinesiology 373 3 units; H(3-3)
(formerly Kinesiology 473)

Exercise Physiology
The physiology of muscular exercise, physical conditioning, and training. The course will cover aspects of the nervous, muscular, cardiovascular, and respiratory systems and also present the material in the context of the effects of exercise on an integrated system. Short- and long-term adaptations to exercise will be examined relative to health and human activity.
Prerequisite(s): Kinesiology 203, 213, 323 and admission to the Faculty of Kinesiology.
Note: Students are responsible for completing a Get Active Questionnaire (GAQ – formerly PAR-Q) and obtaining a medical clearance if required.

Kinesiology 375 3 units; H(2-2/2)

Tests and Measurements in Kinesiology
Establishment of tests, criteria for selection of tests, measurement devices used to evaluate physiological status, human growth, and skill levels in physical activity programs.
Prerequisite(s): Kinesiology 203 and 213 and admission to the Faculty of Kinesiology.
Note: Students are responsible for completing a Get Active Questionnaire (GAQ – formerly PAR-Q) and obtain medical clearance if required.

Kinesiology 377 3 units; H(3-0)

Sport Injury Prevention
Concepts of sport injury prevention, basic research design and methods used in prevention research, multifactorial nature of sport injury and development and plan to apply the fundamentals of sport injury including primary, secondary and tertiary prevention.
Prerequisite(s): Kinesiology 371 or 372.
Antirequisite(s): Credit for Kinesiology 377 and 503.55 will not be allowed.

Kinesiology 381 3 units; H(2-2)

Computer Applications in Kinesiology
An introduction to the use of the computer in kinesiology which involves hands-on experiences with selected software packages.

Kinesiology 391 3 units; H(1-1)

Practicum
Practical experiences with children and youth in instructional programs of physical activity.
Prerequisite(s): Kinesiology 321 and admission to the Leadership in Pedagogy and Coaching program.
Note: Students must consult with the Leadership in Pedagogy and Coaching Co-ordinator in order to obtain required documentation to comply with the legal requirements for placement in schools.

Kinesiology 393 1.5 units; Q(2-2)

Research Seminar I
Students attend, discuss, and critique a series of research seminars in the Human Performance Laboratory.
Prerequisite(s): Kinesiology 213 and 263 and admission to the Faculty of Kinesiology.

Kinesiology 395 1.5 units; Q(2-2)

Research Seminar II
Students attend, discuss, and critique a series of research seminars in the Human Performance Laboratory.
Prerequisite(s): Kinesiology 393.

Kinesiology 396 3 units; H(3-0)

Health and Exercise Psychology
An examination of psychological issues related to health, exercise, and physical activity.
Prerequisite(s): Kinesiology 253.

Kinesiology 397 3 units; H(3-0)

Sport Psychology
An analysis of personality and social psychological variables affecting the athlete/coach in the context of sport.
Prerequisite(s): Kinesiology 395.

Kinesiology 403 3 units; H(3-0)

Health Promotion
Exploration of the relationships between health, disease, and the benefits associated with physical activity and the various factors that can promote and maintain healthy lifestyle change.
Prerequisite(s): Kinesiology 321 and admission to the Leadership in Pedagogy and Coaching program.

Kinesiology 413 3 units; H(3-0)

Motivation in Physical Activity, Exercise and Sport
Concepts related to motivation in physical activity, sport, and exercise settings. Antecedents, consequences, and processes of motivated behaviour are examined from theoretical, empirical, and applied perspectives.
Prerequisite(s): Kinesiology 397 or 399.
Antirequisite(s): Credit for Kinesiology 413 and 503.41 will not be allowed.

Kinesiology 420 15 units

Work Term in Kinesiology
Extensive unpaid work term focused on experiential learning in the field of Kinesiology. Students are required to complete 60 to 72 hours in a workplace setting, distributed evenly over the duration of the term.
Prerequisite(s): 60 units (10 full-course equivalents) completed, admission to and consent of the Faculty of Kinesiology.

Kinesiology 433 3 units; H(3-0)

Health and Physical Activity
Exploration of the relationships between health, disease, and the benefits associated with physical activity and the various factors that can promote and maintain lifestyle change. Students will be required to complete a personal health report based on the following laboratory components: (1) blood lipid profile (a fasting blood draw), (2) nutritional record (dietary record analyzed), (3) health risk analysis (an online risk assessment) and risk factor concept (summary 1 - 3 with the inclusion of family/genetic background).
Prerequisite(s): Kinesiology 323.

Kinesiology 435 3 units; H(3-0)

Volleyball Coaching Theory
Prerequisite(s): Kinesiology 331 and consent of the Faculty.

Kinesiology 437 3 units; H(3-0)

Advanced Nutrition
An examination of current nutritional strategies for sport performance and diet-related chronic diseases. Critical analysis of a wide variety of dietary supplements will be included.
Prerequisite(s): Kinesiology 237 and 373.

Kinesiology 441 3 units; H(0-4)

Practicum A
Unpaid practicum placement focused on experiential learning in the field of Kinesiology. Students are required to complete 60 to 72 hours in a workplace setting, distributed evenly over the duration of the term.
Prerequisite(s): 60 units (10 full-course equivalents) completed, admission to and consent of the Faculty of Kinesiology.

Kinesiology 443 3 units; H(0-4)

Practicum B
Practicum placement in kinesiology or related field.
Prerequisite(s): Kinesiology 441 and consent of the Faculty.

Kinesiology 444 3 units; H(3-0)

Critical Perspectives on the Body
Critical considerations of the relationship between the body and historical, cultural, and political context.
Prerequisite(s): Kinesiology 344.

Kinesiology 445 3 units; H(0-4)

Practicum C
Practicum placement in kinesiology or related field.
Prerequisite(s): Kinesiology 443 and consent of the Faculty.

Kinesiology 451 3 units; H(3-0)

Advanced Topics in Human Motor Control and Learning
A comprehensive examination of the nervous system and its role in learning and controlling movements. Topics include the properties of individual neurons and neural circuits and how their function is altered by motor learning. The course also covers contemporary methods and theories used to understand how humans learn and perform motor actions.
Prerequisite(s): Kinesiology 351.
Courses of Instruction

Kinesiology 460  3 units; H(0-2-7)
Laboratory Practicum: Anatomy
Detailed planning and anatomical dissection of human cadavers.
Prerequisite(s): Kinesiology 260, admission to and consent of the Faculty of Kinesiology.
Antirequisite(s): Credit for Kinesiology 460 and 593.61 will not be allowed.

NOT INCLUDED IN GPA

Kinesiology 463  3 units; H(3-1)
Advanced Techniques in Biomechanics
Exploring basic concepts of analysis and modelling in biomechanics, including numerical implementation and solution.
Prerequisite(s): Kinesiology 363 and admission to the Faculty of Kinesiology.

Kinesiology 465  3 units; H(3-0)
Adaptation to Environmental Stress
Physiological effects of temperature and humidity fluctuations; principles of heat generation, conservation and transfer; acute and chronic effects of hypothermia and hyperbarometric pressures; special dietary considerations; and associated physiological implications will be examined.
Corequisite(s): Prerequisite or Corequisite: Kinesiology 323.

Kinesiology 466  6 units; F(0-6)
Biomechanics Research Project
A capstone course where students assimilate their knowledge by designing and conducting a biomechanics research project.
Prerequisite(s): Kinesiology 363 and 393 and admission to the Biomechanics major.
Corequisite(s): Prerequisites or Corequisites: Kinesiology 395 and 463.

Kinesiology 469  3 units; H(3S-0)
Topics in Sport Medicine
An examination of current medical topics in sport medicine as they relate to the athlete. The topics will include common medical problems and drugs in sport.
Prerequisite(s): Kinesiology 323 and one of 371 or 372.

Kinesiology 475  3 units; H(3-0)
Physiology of Athletic Performance
The physiological factors and principles of training affecting performance will be reviewed and challenged on the scientific basis of experimental evidence.
Prerequisite(s): Kinesiology 373.

Kinesiology 479  3 units; H(3-3)
Advanced Fitness Appraisal and Exercise Prescription
Advanced knowledge and skills necessary to assess physical fitness status of apparently healthy individuals, including cardiorespiratory fitness, muscular strength and endurance, body composition, and flexibility. Interpretation of fitness test results, development of appropriate exercise prescriptions, and communication skills necessary for effective counselling.
Prerequisite(s): Kinesiology 373 and consent of the Faculty.
Note: Students are responsible for completing a Get Active Questionnaire (GAQ – formerly PAR-Q) and obtain medical clearance if required.

Kinesiology 485  3 units; H(3-0)
Skeletal Muscle Properties
The structural organization, neural control, contractile consequences, and determinants of energy cost of contraction of skeletal muscle will be studied in detail.
Prerequisite(s): Kinesiology 373.

Kinesiology 487  3 units; H(3-0)
The Olympic Games
A critical analysis of the modern Olympic Games.

Kinesiology 490  6 units; F(3-0)
Interpretation of Research and Research Project
Instruction in critical enquiry, critical appraisal, research design, and includes the successful completion of an independent research project in publication format.
Prerequisite(s): Statistics 205 or 213, admission to the Kinesiology Honours program and consent of the Faculty.

Kinesiology 491  3 units; H(1-3)
Practicum II
Additional practical experiences with children and youth in instructional programs of physical activity.
Prerequisite(s): Kinesiology 391 and admission to the Leadership in Pedagogy and Coaching program and consent of Pedagogy Co-ordinator.
Note: Students must consult the Leadership in Pedagogy and Coaching Co-ordinator in order to obtain required documentation to comply with the legal requirements for placement in schools.

Kinesiology 493  3 units; H(3-0)
Epidemiology of Health and Physical Activity
An examination of physical activity/disease relationships through application of population based methods including research design and interpretation of studies. The content will assist the student in identifying the quality and extent of research supporting the relationships between health, disease, and habitual physical activity and fitness.
Prerequisite(s): Kinesiology 433 and 373.

Kinesiology 495  3 units; H(3-0)
Physiological Aspects of Aging, Disease, and Physical Activity
An examination of the interaction between aging, age-associated disease (e.g., cardiovascular disease) and physical activity. The major emphasis will be on the physiological processes involved.
Prerequisite(s): Kinesiology 355 and 373.

Kinesiology 497  3 units; H(3-0)
Cancer and Exercise Review and Reviews
Examination of current literature and issues in cancer and exercise research.
Prerequisite(s): Kinesiology 397.
Antirequisite(s): Credit for Kinesiology 497 and 503.07 will not be allowed.

Kinesiology 499  3 units; H(3-0)
Applied Sport Psychology
Focus on applied sport psychology techniques and strategies to optimize performance, with the intent to bridge sport psychology research related work with professional practice.
Prerequisite(s): Kinesiology 399.

Kinesiology 503  3 units; H(3-0)
Special Topics in Kinesiology
An examination of selected special topics in kinesiology and related subjects.
Prerequisite(s): Admission to and consent of the Faculty of Kinesiology.

MAY BE REPEATED FOR CREDIT

Kinesiology 504  3 units; H(0-3)
Directed Study
Intensive self-directed study of selected topics in Kinesiology.
Prerequisite(s): Admission to and consent of the Faculty of Kinesiology.

MAY BE REPEATED FOR CREDIT

Kinesiology 569  3 units; H(3-1)
Rehabilitation Through Recreational Activities
Issues around planning and implementing recreation, health, and wellness programs for persons with disability including advocacy, planning principles, creativity, learning techniques, and teamwork.
Prerequisite(s): Kinesiology 367 or admission to the BCR program.

Kinesiology 593  3 units; H(0-4)
Senior Practicum
An opportunity for students to gain personalized, applied research and/or work experience in kinesiology or related fields.
Prerequisite(s): Admission to and consent of the Faculty of Kinesiology.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Graduate Courses

Kinesiology 603  3 units; H(3-0)
Special Topics
Intensive study of selected topics in human physical activity and related subjects as follows: Applied Sport Psychology; Biomechanics; Cognitive Science; Vision and Motor Behaviour; Exercise and Health Physiology; Health and Exercise Psychology; Motor Learning; Multi-Media Applications in Learning; Neuro-Motor Psychology; Nutrition, Metabolism and Genetics; Sport and Exercise Psychology; Sport History; Sport Medicine; Sport Sociology.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

MAY BE REPEATED FOR CREDIT

Kinesiology 604  3 units; H(0-3)
Directed Study
Intensive self-directed study of selected topics in Kinesiology.
Prerequisite(s): Admission to and consent of the Kinesiology graduate program.

MAY BE REPEATED FOR CREDIT

Kinesiology 605  1.5 units; Q(2S-0)
Nutrition for Performance and Active Living
Nutritional requirements for sport performance and active living, including an overview of basic nutritional principles. Designed to use current research findings as a basis to examine the role of nutrition in sport performance. Nutrition for an active lifestyle will also be examined.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.
Kinesiology 606 6 units; F(3T-3)
Practical Skills for Applied Exercise Physiology
To develop practical skill and techniques associated with applied exercise physiological measurement vs. measurements in the areas of body composition, cardiorespiratory and musculoskeletal fitness.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 609 3 units; H(3-1T)
Statistical Techniques in Kinesiology
Basic concepts of statistical analysis as they apply to research methods used in various disciplines in kinesiology.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.
Antirequisite(s): Credit for Kinesiology 609 and 603.84 will not be allowed.

Kinesiology 611 3 units; H(3-0)
Research Methods in Kinesiology
An overview of research methods including study design, data collection, measurement, interpretation of data, scientific writing, and critical appraisal of the literature relevant to kinesiology.
Prerequisite(s): One graduate course in Biostatistics or Statistics (including Kinesiology 609, Medical Science 643.01, Psychology 615, or equivalent) and admission to a Graduate Program in Kinesiology.

Kinesiology 615 1.5 units; Q(2S-0)
Seminar in Applied Exercise Physiology I
Lectures and seminar presentations, discussion and critique of current research in applied exercise physiology and related subjects.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 617 1.5 units; Q(2S-0)
Seminar in Applied Exercise Physiology II
Lectures and seminar presentations, discussion and critique of current research in applied exercise physiology and related subjects. Focus on chronic disease.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 637 3 units; H(3-0)
Nutrition for Physically Active Populations
The nutritional requirements of specific athletic and/or physically active groups such as cardiac rehabilitation patients and child athletes.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 663 3 units; H(3-0)
(Mechanical Engineering 663) (Medical Science 663)
Advanced Muscle Mechanics and Physiology
A look at problems associated within muscle mechanics and contractility. Also the use of muscle mechanics as a scientific discipline to critically learn and evaluate the scientific process. Basic anatomy and physiology of muscle contraction including the cross-bridge theory, and the force-length, force-velocity and force-time relationships of actively and passively contracting muscles will also be covered.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 673 3 units; H(3-3)
Exercise Physiology
Topics in exercise physiology will include the effects of exercise on muscle, metabolism, hormones, respiration, and the cardiovascular system. Nutrition, body composition, ergogenic aids, and environmental factors will also be examined.
Prerequisite(s): Kinesiology 373 and admission to a Graduate Program in Kinesiology.

Kinesiology 691 3 units; H(1T-8) (formerly Kinesiology 690)
Practicum I
The practicum will consist of multiple experiences in applied physiology environments.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 692 3 units; H(1T-8) (formerly Kinesiology 690)
Practicum II
The practicum will consist of multiple experiences in applied physiology environments.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 697 1.5 units; Q(2S-0)
Exercise and Sport Psychology
Addresses the determinants and consequences of exercise and sport engagement within clinical and athletic populations. The focus will be on the translation of research to practice, with hands-on skills and effective practice guidelines shared with the students.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

Kinesiology 703 3 units; H(3-0)
Special Topics
Intensive study of selected topics in Kinesiology as follows: Applied Sport Psychology; Biomechanics; Exercise and Health Physiology; Health and Exercise Physiology; Motor Learning; Multi-Media Applications in Learning; Neuro-Motor Psychology; Nutrition, Metabolism and Genetics; Physiology of Skeletal Muscle; Sport and Exercise Psychology; Sport History; Sport Medicine; Sport Sociology.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

MAY BE REPEATED FOR CREDIT

Kinesiology 704 3 units; H(0-3)
Directed Study
Intensive self-directed study of selected topics in Kinesiology.
Prerequisite(s): Admission to a Graduate Program in the Faculty of Kinesiology and consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Kinesiology 715 1.5 units; Q(2S-0)
Seminar in Applied Exercise Physiology III
An advanced level of presentation and critical appraisal of research in applied physiology. Students will assume a leadership role in a seminar setting.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

NOT INCLUDED IN GPA

Kinesiology 717 1.5 units; Q(2S-0)
Seminar in Applied Exercise Physiology IV
An advanced level of presentation and critical appraisal of research in applied physiology. Students will assume a leadership role in a seminar setting.
Prerequisite(s): Admission to a Graduate Program in Kinesiology.

NOT INCLUDED IN GPA

Kinesiology 773 3 units; H(3-3)
Integrative Exercise Physiology
The effects of exercise on the complex physiological interactions between different systems in the human body.
Prerequisite(s): Kinesiology 673 and admission to a Graduate Program in Kinesiology.

Kinesiology 775 3 units; H(3-3)
Clinical Exercise Physiology
Exercise for clinical populations: exercise assessment and prescription for disease modification.
Prerequisite(s): Kinesiology 773 and admission to a Graduate Program in Kinesiology.

Kinesiology 785 3 units; H(3-3)
Training Strategies for Health and Sport
The science of improving health and athletic performance with appropriate periodized stress and recovery.
Prerequisite(s): Kinesiology 773 and admission to a Graduate Program in Kinesiology.

Language LANG

Language 200 3 units; H(3-0)
Introduction to Second Language Learning
Introduction to the process of language learning with a focus on the development of learning strategies. Specific examples will be drawn from ancient and modern languages offered at the University of Calgary.

Senior Course

Language 300 3 units; H(3-0)
Introduction to Translation Studies
Basics of translation theory and practice for students with sufficient second language background. Establishes a common critical vocabulary to discuss issues in translation.
Prerequisite(s): Consent of the School.
Note: This course is intended for students with intermediate proficiency in the target language.

Language 400 3 units; H(3-0)
Advanced Translation Studies
An in-depth study of the field of translation with a focus on the notions of aesthetics, comparative stylistics, grammar, and literary forms. The applied focus of the course will be on a high-quality translation along with a critical reflection on its production.
Prerequisite(s): Language 300.

Language 451 3 units; H(3-0)
Cross-Cultural and Cross-Linguistic Explorations
Cross-cultural and cross-linguistic comparisons of events, cultural patterns or phenomena, histori-
Courses of Instruction

Language 500 3 units; H(3-0)
Cross-Cultural and Cross-Linguistic Research Projects
Cross-linguistic and -cultural analysis through group projects focusing on case studies.
Prerequisite(s): Consent of the School.

Language 599 3 units; H(3-0)
Topics in the Study of Language
Topics will reflect developments in current research in second language acquisition and learning.
Prerequisite(s): Consent of the School.
MAY BE REPEATED FOR CREDIT

Graduate Courses
Language 605 3 units; H(3-0)
Second Language Learning and Pedagogy
Theoretical and practical overview of the processes involved in acquiring a second language, with a focus on naturalistic language acquisition and on classroom strategies and classroom language learning.
Prerequisite(s): Consent of the School.

Language 615 3 units; H(3-0)
Second Language Learning and Technology
Theoretical and practical aspects of incorporating technology into the language classroom. A general overview in the context of theories of second language acquisition of using the web, electronic mail, online chat discussion, and videoconferencing as tools in language teaching/learning; students will also learn to create their own websites and web activities for teaching.
Prerequisite(s): Consent of the School.

Language 625 3 units; H(3-0)
Second Language Learning and Cultural Understanding
An introduction to the interdisciplinary nature of "culture" as it pertains to second language teaching and learning.
Prerequisite(s): Consent of the School.

Language 699 3 units; H(3-0)
Research Seminar in Second Language Learning
Centred round a professor's current research project, the course will engage students as members of a collaborative research team that will serve as a practical exposure to research methods in the area of second language learning and acquisition.
Prerequisite(s): Consent of the School.
MAY BE REPEATED FOR CREDIT

Languages, Literatures and Cultures LLAC
Instruction offered by members of the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

Languages, Literatures and Cultures 601 3 units; H(3-0)
Additional Language Pedagogy
An introduction to the field of second language teaching and learning with a historical overview of the field. Presents concepts from the related fields of applied linguistics, psychology and education. Students will have the opportunity to observe university language courses, analyze language textbooks, and develop a statement of teaching philosophy.
Prerequisite(s): Admission to the LLAC graduate program.

Latin LATI
Instruction offered by members of the Department of Classics and Religion in the Faculty of Arts.
Note: For courses in Latin Literature in translation, Roman History, Art, Archaeology, etc., see Greek and Roman Studies.

Note on Sequence and Prerequisites: The normal sequence is Latin 201, 203, 301, 303, 401 and/ or 403, 551. Latin 205, 207 are alternatives to Latin 201, 203, and are designed primarily for Science and Engineering students.

Junior Courses
Latin 201 3 units; H(3-1T)
Latin I
This course for beginners provides the first steps towards reading Latin texts.

Latin 203 3 units; H(3-1T)
Latin II
Continuation of Latin 201.
Prerequisite(s): Latin 201 or 205.

Latin 205 3 units; H(4-0)
The Latin of Science I
An introduction to Latin through ancient, medieval and modern scientific texts, designed for students in the Sciences and Engineering.
Note: Credit for Latin 205 and 201 will not be allowed.
Latin American Studies LAST

Instruction offered by the Department of History in the Faculty of Arts.

Junior Courses

Latin American Studies 211  3 units; H(3-0)
Latin America: People, Places and Popular Culture
An introduction to Latin America, one of the most diverse and dynamic regions in the world. What is the origin of this diversity? How does this diversity manifest itself in today's places and cultures? An interdisciplinary approach is taken to answering these questions, as the course material integrates archaeology, history, political science, economics, geography, anthropology, and cultural studies to introduce students to the region.

Antirequisite(s): Credit for Latin American Studies 211 and 201 will not be allowed.

Senior Courses

Latin American Studies 301  3 units; H(0-3)
Field Study in Latin America
An experiential learning course, designed to provide a framework for the student's empirical learning experience during the Latin American Studies Field School. Provides a forum for the sharing of cross-cultural experiences among the students, as they analyze and reflect on the realities of life in Latin America. Students will be expected to live with a local family during the Field School, to take an active part in discussions, and to participate in events and field trips.

Antirequisite(s): Consent of the Program Coordinator.
Note: Normally offered during the Spring or Summer Intersession.

NOT INCLUDED IN GPA

Latin American Studies 303  3 units; H(3-0)
Latin American Field Research
In a Latin American field setting, this course guides students in integrating their own observations and experiences with scholarly readings on themes of relevance and importance to the particular setting. Attention is paid to the archaeological and historical contexts as well as present day economic, political, and social issues of Latin America. The regional and theoretical focus of the material will vary according to the location at which the course is given.

Antirequisite(s): Consent of the Program Coordinator.
Note: Normally offered during the Spring or Summer Intersession.

Latin American Studies 311  3 units; H(3-0)
Critical Contemporary Issues in Latin America
An analysis of critical issues that provides students with a framework for understanding Latin America today. Examines themes of contemporary importance, which may include human rights, indigenous issues, energy, the environment, democratization, poverty and inequality, social movements, migration, and the region's relationship with the United States.

Antirequisite(s): Credit for Latin American Studies 311 and 203 will not be allowed.

Latin American Studies 401  3 units; H(3S-0)
Integrative Seminar in Latin American Studies
An advanced seminar involving research on a special Latin American topic integrating a variety of disciplinary and interdisciplinary perspectives (e.g. political science, anthropology, geography, cultural studies).

Prerequisite(s): Latin American Studies 201 or 211; and 203 or 311, and 48 units (8.0 full-course equivalents).

MAY BE REPEATED FOR CREDIT

Law LAW

Instruction offered by members of the Faculty of Law.

For course descriptions and details of the transition from the old to the new curriculum, consult the electronic Faculty of Law Calendar available at law.ucalgary.ca.

First Year Curriculum

All courses are compulsory.

Law 400  5 units; F(3-0)
Constitutional Law
The basic elements of Canadian constitutional law. The nature of constitutions and constitutional processes; principles of constitutional interpretation; constitutional amendment; Federal-Provincial distribution of legislative powers including the federal general power, natural resources and public property, provincial property and civil rights, trade and commerce, provincial taxation, transportation, communications, and criminal law; the Canadian Charter of Rights and Freedoms including principles of limitation, remedies, interpretation, application, fundamental freedoms, democratic and language rights, mobility rights, legal rights, equality rights, and aboriginal people's rights.

Law 402  5 units; F(3-0)
Contracts
A legal and policy analysis of the basic principles and fundamental concepts of the law of contracts as they relate to commercial and consumer transactions. The formation of contracts including offer and acceptance, and consideration; estoppel; privity; terms of contract, including exemption clauses; standard form contracts; bailment; mistake, misrepresentation and unconscionability; termination, including the doctrine of frustration; breach and remedies for breach; dispute resolution processes. Emphasis is placed not only on a knowledge of rules and principles, their historical derivation, rationale, efficacy and social validity, but also upon their creative use to both avoid and resolve disputes.

Law 403  3 units; H(3-0)
Legislation
The fundamentals of the legislative process: policy development, legislative drafting, public bill processes, statutory interpretation. The interaction of law and policy in the development of legislation and statutory interpretation. Substantive law connections are made with other first year courses. The functions of the lawyer within these processes are examined, including issues of professional responsibility. The course is taught through performance-based learning methods with emphasis on drafting.

Law 404  5 units; F(3-0)

Property
An examination of the fundamental concepts of property law and the types of property interests recognized by Anglo-Canadian law. The historical, evolution of property concepts; the basic concepts of possession, ownership and title; estates and other interests in land such as joint and concurrent ownership, easements, covenants, licences, mortgages, future interests and perpetuities; the landlord and tenant relationship; the land titles system of registration of title to land; the social constraints upon property use and disposition; and property rights of aboriginal peoples.

Law 406  5 units; F(3-0)

Torts
An analysis and critique of the law of torts, primarily the law of negligence, with personal injury as the main focus, although other torts will also be introduced. The nature of tort law and its process; an anatomy of the law of negligence - the nature and extent of liability, defences, remedies, and the assessment of damages; intentional torts; economic torts; strict liability; bailment; the impact of private insurance on the tort system; alternative forms of compensation.

Law 407  4 units; H(3-0)

Foundations in Law and Justice I
An introduction to: legal methods, systems and institutions; sources of law; legal and judicial reasoning; legal analysis, including case analysis and problem-solving skills; critical perspectives on the law, including legal theory and history; the role of the lawyer in system(s) of laws; access to justice. The course is taught on an intensive basis in the first three weeks of law school to provide students with foundational analytical and critical skills for the subsequent curriculum, and using performance-based learning methods.

Note: This course is graded CR, D or F.

Law 408  4 units; H(3-0)

Foundations in Law and Justice II
The fundamentals of legal research, writing, communication and advocacy, including: developing research strategies; identification and assessment of legal and non-legal information appropriate to a legal problem or issue; drafting of memorandum and/or facts; oral advocacy, including moot; legal communication, including client interviewing and counselling. This course is taught on an intensive basis in the first three weeks of Winter Term using performance-based learning methods.

Law 410  5 units; F(3-0)
Crime: Law and Procedure
An anatomy of criminal conduct and the law's treatment of it utilizing a limited range of criminal offences. The designation of human conduct as criminal and a consideration of the social, cultural and political forces involved; the development of the criminal process in English common law, its translation to Canada and embodiment in the Criminal Code; the substantive elements of a criminal offence including both the physical and mental elements; the common law and code defences; procedural, tactical, ethical and evidential problems associated with criminal prosecution at both the pre-trial and trial stages; the sentencing process; the position at law of the victim.
Second and Third Year Curricula

Full-time students must take a minimum of 31 units to a maximum of 36 in each of their second and third years, including a minimum of 12 units to a maximum of 18 per session.

500-Level Courses

Law 503 3 units; H(3-0)

Administrative Law
This course introduces students to the general structure of administrative decision-making in Canada: how public administrators obtain power and how that power is exercised both at the level of individual adjudication and at the level of the establishment of public policy. It also introduces students to the checks which courts place on the exercise of administrative power. The course discusses the procedures that courts require of administrative agencies and public officials as well as the substantive grounds on which courts may review the decisions of administrative agencies and public officials.

Law 505 3 units; H(3-0)

Civil Procedure
A detailed examination of issues which arise in the progress of a civil action from first meeting the client through to judgment in the Alberta Court of Queen’s Bench. The Alberta Rules of Court are set in the context of the values underlying them. What sort of civil litigation system do we want? What sort of system do we in fact have? Particular attention is paid to the linkages between the apparently discrete components of the process as set out in the Rules, linkages at the levels of both the underlying values and of actual practice. The use of procedures under the Rules to anticipate and resolve evidence problems that might arise at trial is stressed. Interprovincial and international aspect of the civil litigation process are also considered.

Law 507 3 units; H(3-0)

Evidence
An examination of the fundamental concept of evidence law, including the traditional rules as compared to the emerging principled approach, and such core and primary topics as: the adversary system; relevance and discretionary exclusion; privilege; burdens of proof; character evidence; judicial notice; competence and competency; examination of witnesses; hearsay; opinion evidence.

Law 508 4 units; H(3-0)

Negotiation
Instruction in dispute resolution theory and practice with a focus on negotiation, mediation and topics such as collaborative law and judicial dispute resolution, and application of those processes to a substantive area of law. Taught in a three week intensive format through performance-based learning methods. Evaluation will include a mock negotiation and written exercises such as the preparation of a client-consulting memo in the substantive area.

Note: This course is graded CR, D or F.

MAY BE REPEATED FOR CREDIT

Law 509 3 units; H(3-0)

Business Associations
The common forms of business organization, including the law of agency, partnerships, limited partnerships, and corporations, with a focus on the corporation and the rights and responsibilities of shareholders and directors. Topics will include fiduciary relationships in a commercial context.

Law 510 3 units; H(3-0)

Ethical Lawyering
An introduction to issues of legal ethics and professional responsibility. Students should become competent at ethical reasoning in the context of legal practice. To achieve this goal the course covers selected topics in the "law of lawyering" (e.g. the Law Society of Alberta’s Code of Professional Conduct) but also address the general question of what it means to be an ethical lawyer. Students are expected to develop their awareness of the various moral values underlying the legal system, and to practice how to weigh and apply those values and the law of lawyering, to ethical problems. The course also covers selected topics relating to the regulation of lawyers’ ethics.

Law 511 3 units; H(3-0)

Criminal Process
A survey and critical examination of core aspects of criminal process law. A focus on legislation relating to jurisdiction and modes of trial including obligations of and options available to prosecution and accused. Other topics include arrest, search and seizure, investigative detention, and right to counsel and silence, all within the context of the Charter of Rights and Freedoms.

Law 515 3 units; H(3-0)

Family Law
An analysis of the legal principles affecting the rights and responsibilities of the members of the family. Topics include constitutional issues, marriage, marriage contracts, common law marriage, child neglect and abuse, custody and access, guardianship, adoption, separation, divorce, nullity, spousal and child maintenance, and matrimonial property. Stress is placed on the process of family law and the appropriate role for lawyers and judges.

Law 519 3 units; H(3-0)

Jurisprudence
A critical inquiry into the nature and functions of law and justice, including natural law, legal positivism, sociological jurisprudence, legal realism, and contemporary theorists.

Law 521 3 units; H(3-0)

Real Estate Transactions
An examination of the estate transactions. Topics include the purchase and sale of property, mortgaging and other ways to finance land transactions, commercial leasing arrangements, and the Land Titles Act as it relates to land development.

Law 525 3 units; H(3-0)

Bankruptcy and Restructuring Law
Receivership, consumer and commercial arrangements and bankruptcy under the Bankruptcy Act and the Company Creditors Arrangements Act.

Law 527 3 units; H(3-0)

Basic Tax Law
The basic language and concepts of taxation and identification of taxation issues. Topics include the unit of taxation, the meaning and taxation of income, taxation of benefits, the type and scope of deductions available for business income, and the taxation of capital gains including gains (and losses) on taxpayer assets.

Law 529 3 units; H(3-0)

Biotechnology and the Law
The legal, ethical, and policy issues relating to biotechnology. Topics include genetically modified foods, animals and plants, synthetic genomics, animal-human combinations, xenotransplantation, human cloning, pharmacogenetics, biofuels, assisted human reproduction, stem cells, tissue engineering, genetic therapy, and genetic enhancement.

Law 530 3 units; H(3-0)

Mining Law
The law governing the exploration, financing and development of minerals in Canada. Topics include mining legislation; title; aboriginal rights, including the duty to consult; environmental obligations; mining agreements; and, international transactions.

Law 531 3 units; H(3-0)

Environmental Law
Legal theories, concepts, principles, and processes relevant to environmental protection. Topics include ecological and ethical dimensions, jurisdictional issues, common law rights and remedies, environmental assessment, public participation, contaminated sites, enforcement and compliance, economic approaches, endangered species and protected spaces, land use planning, and environmental dispute resolution.

Law 533 3 units; H(3-0)

Wills and Estates
The preparation, execution, interpretation, and administration of wills; testamentary capacity; alteration, revocation and republication of wills; intestate succession; dependants’ relief; and estate administration.

Law 535 3 units; H(3-0)

Secured Transactions
The modern law of secured transactions and the financing of personal property, with a focus on Alberta’s Personal Property Security Act. Other topics include Bank Act security, the Farm Implement Act, and the Fair Trading Act.

Law 536 3 units; H(3-0)

International Criminal Law
The law related to international and transnational crimes. Topics may include crimes against humanity, war crimes, genocide, aggression, extradition, terrorism, human trafficking, drug trafficking, cybercrime, state sovereignty and immunity, money laundering, and organized crime.

Law 537 3 units; H(3-0)

Sale of Goods
The sale and supply of goods, including an examination of the provincial Sale of Goods Act, consumer protection issues, and the Vienna International Sales Convention.

Law 543 3 units; H(3-0)

Intellectual Property Law
Intellectual property, including the law of patents, copyrights, and trade-marks.

Law 547 3 units; H(3-0)

Human Rights Law
A survey of national and provincial human rights laws and practice as distinct from the Charter of Rights and Freedoms, and an introduction to the main international and transnational human rights instruments and standards.

Law 549 3 units; H(3-0)

International Law
The elements of public international law, including sources, the role of customary law, the law of trea-
Course Code: Law LAW

439

Courses of Instruction

- **Law 551** 3 units; H(3-0)
  - Unjust Enrichment
  - An examination of the practical and theoretical implications arising from the application of economic reasoning to law. Topics include the economic method of legal analysis, the scope of its application, and the major critical responses in both traditional legal fields of economic influence (such as tort, contract and corporate law) and more novel areas (such as family and criminal law).

- **Law 552** 3 units; H(3-0)
  - Law and Economics
  - The ways in which literary studies inform law and legal analysis, and the ways in which law and legal themes have informed literature.

- **Law 553** 3 units; H(3-0)
  - Insurance Law
  - The various types of insurance (e.g. fire, life, sickness and accident, motor vehicle, and liability). Topics include the nature and formation of the insurance contract, the role of insurance agents, insurable interest, misrepresentation and non-disclosure, and the rights of third parties against the insurer.

- **Law 554** 3 units; H(3-0)
  - Critical Legal Theories
  - An examination of critical theoretical perspectives on the nature and functions of law, and of the possibilities and limitations of law as a strategy for social change. Perspectives may include feminist legal theories, critical race theories, post-colonial theories, Aboriginal legal theories, critical disability theories, queer theories, and post-modernism.

- **Law 555** 3 units; H(3-0)
  - Employment Law
  - The law governing non-unionized workplaces in Canada. Topics include constitutional jurisdiction, defining the employment relationship and employer/employee status, the employment contract, implied rights and obligations, termination, reasonable notice of dismissal, constructive dismissal, cause for summary dismissal, human rights, and employment standards legislation.

- **Law 556** 3 units; H(3-0)
  - International Human Rights and Humanitarian Law
  - International human rights law, covering the main global instruments (such as the International Covenant, as well as the regional human rights systems of the Americas and Europe), with an introduction to the principles and concepts of International Humanitarian Law. Topics include women’s human rights, death penalty, massive human rights violations, human rights and counter-terrorism, the rights of the child, the rights of indigenous peoples and minorities, and the role of non-state actors.

- **Law 557** 3 units; H(3-0)
  - Commercial Arbitration Law
  - Private (between individuals) and mixed (investor/state) arbitration. Coverage includes domestic and international arbitration rules, including UNCITRAL and International Centre for the Settlement of Investment Disputes (ICSIID) rules.

- **Law 558** 3 units; H(3-0)
  - Civil Procedure
  - The examination of civil procedure, focusing on the principles and practices of civil litigation in Canada. Topics include jurisdiction, the court process, evidence, discovery, pleading, and remedies.

- **Law 559** 3 units; H(3-0)
  - Aboriginal Law
  - The law governing the relationship between the Crown and Aboriginal peoples, with a focus on Treaty negotiation, Treaties, and the regulation of collection and credit agencies.

- **Law 560** 3 units; H(3-0)
  - Water Law
  - Water resources and management, including the historical and current legal and policy frameworks governing surface and groundwater rights. Topics include responses to scarcity, alternative water management models and plans, industrial use and re-use of water, wetlands, protection of aquatic resources, aboriginal water rights, economic instruments, water as a human right, watershed approaches, and inter-jurisdictional or international issues.

- **Law 561** 3 units; H(3-0)
  - Internet Law
  - The Internet as a technology, a place for social interaction, and a marketplace. Topics include Internet governance, network neutrality, end to end and layered principles, the domain name system, peer production and distribution, information security and privacy, ISP regulation, regulation of Internet content, electronic commerce, VOIP regulation, and anti-circumvention law.

- **Law 562** 3 units; H(3-0)
  - Intellectual Property Law
  - The law governing the protection of intellectual creations, with a focus on copyright, trademarks, patents, and trade secrets.

- **Law 563** 3 units; H(3-0)
  - Tax Law
  - Principles of tax law, including income tax, sales tax, and payroll taxes. Topics include the economic and distributive effects of taxes, auditing and legal compliance, and political economy.

- **Law 564** 3 units; H(3-0)
  - Environmental Law
  - The law governing the use and management of natural resources, including environmental protection, pollution control, and conservation.

- **Law 565** 3 units; H(3-0)
  - Criminal Law
  - The law governing criminal conduct, including the principles of criminal responsibility, defenses, and penalties.

- **Law 566** 3 units; H(3-0)
  - Family Law
  - The law governing family relationships, including marriage, divorce, and child custody.

- **Law 567** 3 units; H(3-0)
  - Law and Economics
  - An examination of the practical and theoretical implications arising from the application of economic reasoning to law. Topics include the economic method of legal analysis, the scope of its application, and the major critical responses in both traditional legal fields of economic influence (such as tort, contract and corporate law) and more novel areas (such as family and criminal law).

- **Law 568** 3 units; H(3-0)
  - Public Law
  - The law governing the behavior of public officials and public bodies, with a focus on government accountability, public sector management, and environmental regulation.

- **Law 569** 3 units; H(3-0)
  - Legal Theory, Selected Topics
  - Critical examination of the main theoretical writings in a major doctrinal area or group of doctrinal areas, such as private law (tort, contract and unjust enrichment); public law (criminal, Constitutional and administrative law); tort; contract; evidence; property; Constitutional; or criminal law.

- **Law 570** 3 units; H(3-0)
  - Unjust Enrichment
  - The remedies available to the unsecured creditor for the collection of debts and the protections offered to debtors, including prejudgment remedies, garnishment, execution against real and personal property, fraudulent preferences and conveyances, and the regulation of collection and credit agencies.

- **Law 571** 3 units; H(3-0)
  - Oil and Gas Law
  - The upstream oil and gas industry. Topics include ownership of oil and gas and split estates; coalbed methane; the legal character of the private oil and gas lease; the anatomy of the various clauses of the oil and gas lease; and Crown disposition systems, including the Alberta (conventional and oil sands) and federal legislation and related policy questions.

- **Law 572** 3 units; H(3-0)
  - Public Lands and Natural Resources Law
  - The protection, exploitation, and management of Crown-owned lands and renewable and non-renewable natural resources (other than oil and gas, and including forestry, rangeland, minerals, wildlife, fisheries, wilderness, recreational, and heritage). Discussion of the nature of public ownership, public and private values, economic approaches, and inter-jurisdictional management.

- **Law 573** 3 units; H(3-0)
  - Remedies
  - Judicial remedies at common law and equity for tort and breach of contract, including personal injury and property damage. Themes include compensating loss, disgorging gain, and punishing civil wrong; prohibiting and compelling defendant compensating loss, disgorging gain, and punishing injury and property damage. Themes include discussing with a supervising Judge.

- **Law 574** 3 units; H(3-0)
  - Tax Policy
  - Principles of tax policy (efficiency, equity, and simplicity) and applications related to income, sales, and payroll taxes. Topics include the economic and distributive effects of taxes, auditing and legal compliance, and political economy.

- **Law 575** 3 units; H(3-0)
  - Legal Theory, Selected Topics
  - Critical examination of the main theoretical writings in a major doctrinal area or group of doctrinal areas, such as private law (tort, contract and unjust enrichment); public law (criminal, Constitutional and administrative law); tort; contract; evidence; property; Constitutional; or criminal law.

- **Law 576** 3 units; H(3-0)
  - Unjust Enrichment
  - The remedies available to the unsecured creditor for the collection of debts and the protections offered to debtors, including prejudgment remedies, garnishment, execution against real and personal property, fraudulent preferences and conveyances, and the regulation of collection and credit agencies.

- **Law 577** 3 units; H(3-0)
  - Law and Economics
  - An examination of the practical and theoretical implications arising from the application of economic reasoning to law. Topics include the economic method of legal analysis, the scope of its application, and the major critical responses in both traditional legal fields of economic influence (such as tort, contract and corporate law) and more novel areas (such as family and criminal law).

- **Law 578** 3 units; H(3-0)
  - Law and Literature
  - The ways in which literary studies inform law and legal analysis, and the ways in which law and legal themes have informed literature.

- **Law 579** 3 units; H(3-0)
  - Legal Theory, Selected Topics
  - Critical examination of the main theoretical writings in a major doctrinal area or group of doctrinal areas, such as private law (tort, contract and unjust enrichment); public law (criminal, Constitutional and administrative law); tort; contract; evidence; property; Constitutional; or criminal law.

- **Law 580** 3 units; H(3-0)
  - Unjust Enrichment
  - The remedies available to the unsecured creditor for the collection of debts and the protections offered to debtors, including prejudgment remedies, garnishment, execution against real and personal property, fraudulent preferences and conveyances, and the regulation of collection and credit agencies.

- **Law 581** 3 units; H(3-0)
  - Law and Economics
  - An examination of the practical and theoretical implications arising from the application of economic reasoning to law. Topics include the economic method of legal analysis, the scope of its application, and the major critical responses in both traditional legal fields of economic influence (such as tort, contract and corporate law) and more novel areas (such as family and criminal law).

- **Law 582** 3 units; H(3-0)
  - Law and Literature
  - The ways in which literary studies inform law and legal analysis, and the ways in which law and legal themes have informed literature.

- **Law 583** 3 units; H(3-0)
  - Water Law
  - Water resources and management, including the historical and current legal and policy frameworks governing surface and groundwater rights. Topics include responses to scarcity, alternative water management models and plans, industrial use and re-use of water, wetlands, protection of aquatic resources, aboriginal water rights, economic instruments, water as a human right, watershed approaches, and inter-jurisdictional or international issues.

- **Law 584** 3 units; H(3-0)
  - Indigenous Peoples and the Law
  - The law governing the relationship between indigenous peoples and settler society. Topics include recognition of aboriginal laws and custom, self-determination and other applicable principles of international law, self-government, common law recognition of aboriginal title, treaties, the honour of the Crown, the fiduciary duty of the Crown, the Crown’s duty of consultation and accommodation,
Courses of Instruction

Constitutional protection of aboriginal and treaty rights, application of provincial laws, the Indian Act, land surrenders, and exemptions from seizure and taxation.

Law 595  3 units; H(3-0)
(formerly Law 609)

Canadian Legal History
Migration of European law in the colonial context and its impact in pre-Confederation Canada (settled and conquered colonies); the role of trading companies, particularly the Hudson’s Bay Company; the impact of the United States both before and after Confederation; Confederation and the development of Canadian legal culture and law. Jurisdictions may include British Columbia, Alberta, Ontario, Quebec, and Nova Scotia.

Law 596  3 units; H(3-0)
(formerly Law 679)

Feminist Legal Theory
A critical inquiry into the nature and function of law from a variety of different perspectives within feminist legal theory. Topics include the role of rights and of legal discourse, and the possibilities and limitations of law as a strategy for social transformation.

Law 597  3 units; H(3-0)
(formerly Law 665)

International Trade Law
The public law framework for international trade, with emphasis on the WTO and NAFTA. Topics include national treatment, most favoured nation treatment, anti-dumping and countervail actions, and dispute resolution.

Law 598  3 units; H(3-0)
(formerly Law 643)

Trusts
The concept of the trust and its development in equity and its relationship to other legal concepts. Topics include the various types of trusts; constituting, administering and terminating the trust; trustee duties and powers; variation of trusts; breach of trust; and the doctrine of tracing.

Law 599  3 units; H(3-0)

Legal Practice, Selected Topics
A variety of subject matters related to the practice of law.

MAY BE REPEATED FOR CREDIT

600-Level Courses

Law 601  3 units; H(3-0)

Advanced Criminal Law
An in-depth examination of case authorities, primarily through an examination of case authorities, certain concepts in criminal law the understanding of which is essential for a criminal practitioner. Topics covered may include mens rea, sexual offences, assault, sentencing, conspiracy, driving offences, and identification.

Law 602  4 units; H(3-0)

Advocacy
A development of core competencies through the practice of advocacy. Each student will apply legal knowledge, critical analysis, communication and resolution skills as well as ethical understanding, to trial fundamentals situated in real trial scenarios. Participants will choose to represent parties in either a civil or criminal trial.

Note: This course is graded CR, D or F.

MAY BE REPEATED FOR CREDIT

Law 605  3 units; H(3-0)

Oil and Gas Contracts
Selected problems in oil and gas law including industry contracts (pooling, farmout, joint operating agreements); fiduciary duties; and title review.

Corequisite(s): Prerequisite or Corequisite: Law 571.

Law 607  3 units; H(3-0)

Advanced Legal Research
This course builds on legal research instruction in the first year of the program and affords further opportunities to learn and practice research skills. The course provides instruction in research methodology, citation, print and electronic research/databases, covering case law, statute law, texts, periodicals and web-based materials.

Law 612  3 units; H(3-0)

Advanced Private Law
Advanced issues in private law (property, contract, tort, unjust enrichment and equity), including contemporary controversies over appropriate rights and remedies when different causes of action either converge or intersect.

Corequisite(s): Prerequisite or Corequisite: Law 402, 406 and 551.

Law 613  3 units; H(3-0)

Conflict of Laws
The doctrines and rules governing legal disputes cutting across provincial or national boundaries. Topics include jurisdiction, distinctions between substantive and procedural rules, the recognition and enforcement of foreign judgments, domicile, proof of foreign law, and the choice of law rules relating to private law (torts, contracts, property, succession and family law).

Law 615  3 units; H(3-0)

Advanced Civil Procedure
The strategic use of the Alberta Rules of Court in civil proceedings with reference to related legislation and ethical requirements. Topics include commencement of proceedings, interlocutory and ex parte applications, discovery of persons and records, trial preparation, and the roles of the court.

Corequisite(s): Prerequisite or Corequisite: Law 505.

Law 617  3 units; H(3-0)

The renewable energy and energy efficiency sectors. Topics include federalism, wind, small hydro, solar, biomass etc., energy conservation and demand side management, and access to energy infrastructure.

Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 618  3 units; H(3-0)

Corporate Finance Law
Legal aspects of corporate finance transactions, including applicable regulatory frameworks. Topics may include equity and debt financing, secured transactions, assess and/or share purchase and sale agreements, and takeover bids.

Corequisite(s): Prerequisite or Corequisite: Law 509.

Law 619  3 units; H(3-0)

Estate Planning
Personal dispositions of property, both inter vivos and on death, to achieve estate and succession planning objectives. Topics include trusts, corporations, wills, life insurance, buy-sell arrangements, income splitting, estate freezing, and tax deferral plans.

Corequisite(s): Prerequisite or Corequisite: Law 527.

Law 621  3 units; H(3-0)

Corporate Governance and Litigation
The principal concepts in corporate governance and their evolution in Canada; the Sarbanes-Oxley Act of 2002 and the related rules of the U.S. Securities and Exchange Commission and the New York Stock Exchange; the securities regulatory response of Canada to the adoption of Sarbanes-Oxley in the United States; and other current topics in corporate governance.

Corequisite(s): Prerequisite or Corequisite: Law 505 and 509.

Law 623  3 units; H(3-0)

Environmental Impact Assessment Law
Environmental impact assessment (EIA) law and practice in Canada. Topics include the role of EIA in the regulatory process and as a planning tool, federalism, triggers, equivalency, harmonization, joint assessment, implementation of assessment decisions, adaptive management, strategic environmental assessment, the role of traditional knowledge, and public participation.

Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 624  3 units; H(3-0)

Environmental Law and Ethics
The ethical underpinning of environmental law, with a consideration of various views, including the land ethic, deep and shallow ecology, instrumental and utilitarian approaches, and inherent value.

Law 625  3 units; H(3-0)

Intellectual Property Transactions
Intellectual property transactions and strategies in a variety of industries in energy, information technology, and life sciences. Topics include open source IP, IP governance, management and best practices, valuation, ownership, improvements, co-ownership and collaboration, patent pools and standard setting organizations, software licensing and IT transactions, licensing, infringement management, and warranties.

Corequisite(s): Prerequisite or Corequisite: Law 543.

Law 626  3 units; H(3-0)

International Development Law
The role of law in promoting social and economic growth, with a focus on the role of law as an instrument of development and the dialogue between the developed and less developed worlds through international agreements. Topics include the rules of international trade and finance, intellectual property, the environment and natural resources, and the war on terrorism.

Corequisite(s): Prerequisite or Corequisite: One of Law 549, 597 or 565.

Law 627  3 units; H(3-0)

International Environmental Law
The customary and treaty law rules applicable to global and transboundary environmental issues. Topics include air pollution, climate change, inter-
national wildlife law and trade, the international chemical agreements liability regimes, and shared resources.

Law 628 3 units; H(3-0)

International Investment Law
Investor protection in customary law and treaties, in particular NAFTA Chapter 11, bilateral investment treaties (BITs), and the Energy Charter; the main disciplines, including national treatment, most favourite nation treatment, fair and equitable treatment, and the rules pertaining to expropriation; soft law norms pertaining to investment; and relevant domestic law, including the Investment Canada Act.
Corequisite(s): Prerequisite or Corequisite: Law 549 or 597.

Law 630 3 units; H(3-0)

International Petroleum Transactions
International business transactions in the context of the petroleum industry, including the various forms of state agreements; confidentiality agreements; study and bidding agreements; international joint operating agreements; agency agreements; and participation agreements; with attention to the key legal, business and ethical issues raised in negotiations.

Law 631 3 units; H(3-0)

International Tax Law
The tax implications of both inbound and outbound investment and implications for structuring affiliates, with consideration of international tax treaties and foreign tax credit mechanisms.
Corequisite(s): Prerequisite or Corequisite: Law 527.

Law 634 3 units; H(3-0)

Law of Species and Spaces
The principal federal and provincial laws governing the management of biological diversity, including protected area legislation and endangered species legislation. Explores the constitutional and common law fundamentals of wildlife law as well as contemporary disputes about species protection, ecosystem-level land management, and game ranch operations.
Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 636 3 units; H(3-0)

Municipal Law
The legal position of local governments, including cities and regional governments. Topics include the powers of Municipal Councils and Districts, the duties and responsibilities of elected and appointed municipal officials, conflicts of interest, elections, the regulation and licensing of businesses, proprietary and contractual powers, tort and the public body, subdivision, land use planning, and the role of the courts.
Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 637 3 units; H(3-0)

Energy Law
An overview of energy regulation, focusing on competition and pricing. Topics include the theory and process of energy regulation, regulatory jurisdiction, judicial review of energy regulation, regulation of natural gas and electricity prices, market restructuring, and deregulation. The course will familiarize students with the legal issues that arise when the legislature and regulators respond to market failures, and/or protect the public interest, in the provision of natural gas and electricity services.
Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 641 3 units; H(3-0)

Oil and Gas and Mining Taxation
The resource regime rules of the Income Tax Act as applied to the oil and gas and mining sectors. Topics include: operations subject to the resource regime; the treatment of property costs and common industry expenditures (i.e. applicable “tax pools” and their characteristics); resource industry “subsidies” (e.g. flow-through share financing, investment tax credits); the avoidance provisions (e.g. the successor rules); and the treatment of foreign operations of a Canadian resident taxpayer.
Corequisite(s): Prerequisite or Corequisite: Law 697.

Law 645 3 units; H(3-0)

Pollution Control and Waste Management Law
The provincial and federal pollution control regimes for air and water pollution and for the handling, storage, treatment, and disposal of hazardous and non-hazardous wastes. Topics include federalism; regulatory and non-regulatory approaches to pollution from “point” and “non-point” sources; cumulative pollutant loads; the “precautionary” and “polluter pays” principles; and liability for contaminated sites.
Corequisite(s): Prerequisite or Corequisite: Law 503 and 531.

Law 647 3 units; H(3-0)

Regulatory Theory and the Law
The main theories that explain or justify government regulation, including correction for market failure, political economy or public choice, and deliberative democracy. The relationship between those theories and the development and implementation of regulatory legislation, regulation, and public policy.
Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 648 3 units; H(3-0)

Securities Law
The regulation of capital market participants; the issuance of, and trades in, securities of companies, with an emphasis on Alberta and the National Instruments enacted by the Canadian securities regulator; the theory of securities regulation; as well as enforcement and compliance.

Law 650 3 units; H(3-0)

Business Skills for Lawyers
The non-legal skills required by lawyers working in-house or with business clients. Topics may include reading and analyzing financial statements; understanding cash flow models; business valuation; negotiation; capital markets; crisis management; project management.

Law 653 3 units; H(0-3)

Directed Research
A supervised research project involving the in-depth examination of a legal problem or area of concern not normally covered in a substantive or procedural course and which provides the basis for an article, research paper, brief, memorial, draft legislation, etc. Admission to this course depends on the availability of supervising faculty.
Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Law 656 3 units; H(3-0)

Mergers and Acquisitions
Key legal and financial concepts for mergers and acquisitions. Topics may include structuring transactions, the required legal documentation, security legislation, director and officer responsibilities, negotiations, financing, defensive tactics, due diligence, employment and other issues.

Law 663 3 units; H(3-0)

Dispute Resolution Clinical
Interest-based, consensus-building dispute resolution processes to enhance understanding of dispute resolution theory, which will be applied through placements drawing on the mentorship of lawyers and dispute resolution practitioners engaged in court-annexed or private mediation, facilitation, collaborative law, and other processes.
Corequisite(s): Prerequisite or Corequisite: Law 508.

Note: This course is graded CR, D or F.

Law 667 3 units; H(3-0)

Advanced Public Law
Selected issues in constitutional law at the advanced level. Topics may include constitutional amendment, comparative approaches to rights, comparative federalism, the role of international law in constitutional interpretation, the legitimacy of judicial review, evidentiary issues in constitutional litigation, the role of social movements, and strategic litigation in securing constitutional rights.
Prerequisite(s): Law 400.

Law 673 3 units; H(3-0)

Jessup Moot
Preparation for and participation in the Philip C. Jessup International Law Moot Competition.
Prerequisite(s): Consent of the Faculty.

Law 674 3 units; H(3-0)

Business Venture Clinic
A clinical seminar where students work with startup companies and entrepreneurs. Students may prepare memos and drafts of business agreements. Students receive feedback on their written work from practicing lawyers.
Note: This course is graded CR, D or F.

Law 677 3 units; H(3-0)

Canadian Corporate/Securities Law Moot
The development of appellate advocacy and other lawyering skills in the context of corporate and securities law in Canada.
Prerequisite(s): Consent of the Faculty.

Law 678 3 units; H(3-0)

The Gale Cup Moot
The development of appellate advocacy and other lawyering skills in the context of preparation for and participation in the national Gale Cup Moot.
Prerequisite(s): Consent of the Faculty.

Law 683 3 units; H(3-0)

Advanced Family Law
Selected topics in family law, including matrimonial property; division of pensions; international family law; and the law relating to children, including regulatory aspects (e.g. child welfare).
Corequisite(s): Prerequisite or Corequisite: Law 515.
**Courses of Instruction**

### Law 685
3 units; H(3-0)

**Business Clinical**
The skills employed by a corporate solicitor in the context of one or more transactions. Skills covered may include drafting, negotiating, research, advocacy, and transaction management, in simulated or real transactions.

**Corequisite(s):** Prerequisite or Corequisite: Law 509.

**Note:** This course is graded CR, D or F.

### Law 686
3 units; H(3-0)

**Clinical Theory**
An opportunity to explore and reflect on what it means to be a good lawyer. Topics include the formation of professional identity and legal, ethical and practical issues in poverty law.

**Corequisite(s):** Law 688.

### Law 687
3 units; H(3-0)

**Criminal Justice Clinical**
A clinical seminar in elements of criminal law covering topical, practical, and ethical issues in the practice of criminal law. Three short placements with Crown and defence lawyers and a provincial court judge.

**Corequisite(s):** Law 686.

**Note:** This course is graded CR, D or F.

### Law 688
3 units; H(3-0)

**Clinical Practice**
Advanced experiential learning in a clinic setting. Students learn how to effectively manage clients and files while developing interviewing, counselling and advocacy skills in a variety of areas.

**Corequisite(s):** Law 686.

**Note:** This course is graded CR, D or F.

### Law 689
3 units; H(3-0)

**Family Law Clinical Seminar**
A clinical seminar in elements of family law practice. The clinical experience may be obtained through simulated exercises, supervised handling of files and/or placements. Topics include Chambers advocacy, marital dispute consultations and drafting of a settlement.

**Corequisite(s):** Prerequisite or Corequisite: Law 515.

**Note:** This course is graded CR, D or F.

### Law 690
3 units; H(3-0)

**Western Canada MacIntyre Cup Trial Competition**
The development of trial advocacy and other lawyering skills in the context of preparation for and participation in the Western Canada Trial Competition. Credit for this competition does not preclude credit for the Sopinka Cup.

**Prerequisite(s):** Consent of the Faculty.

### Law 691
3 units; H(3-0)

**Natural Resources, Energy and Environmental Law Clinical**
A clinical seminar involving placements in any one of the following practice areas: energy law, resources law, water law, and environmental law.

**Corequisite(s):** Prerequisite or Corequisite: One of Law 531, 571, 573, 583 or 637.

**Note:** This course is graded CR, D or F.

### Law 692
2 units; H(2-0)

**Selected Topics I**
A variety of subject areas, either doctrinal or theoretical.

**MAY BE REPEATED FOR CREDIT**

### Law 693
3 units; H(3-0)

**Selected Topics II**
A variety of subject areas, either doctrinal or theoretical.

**MAY BE REPEATED FOR CREDIT**

### Law 694
4 units; H(4-0)

**Selected Topics III**
A variety of subject areas, either doctrinal or theoretical.

**MAY BE REPEATED FOR CREDIT**

### Law 695
3 units; H(3-0)

**External Competitions**
The development of advocacy and other lawyering skills in the context of preparation for and participation in an external competition not otherwise the subject of a course. A written component is generally required.

**Prerequisite(s):** Consent of the Faculty.

### Law 696
3 units; H(3-0)

**Clinical Studies**
Participation in a clinical experience not otherwise the subject of a clinical course.

**Prerequisite(s):** Consent of the Faculty.

**Note:** This course is graded CR, D or F.

### Law 697
3 units; H(3-0)

**Corporate Tax**
The provisions of the Income Tax Act applicable to corporations and their shareholders. Topics include the classification of corporations for tax purposes, the taxation of corporate income, the taxation of corporate distributions, and the taxation of various types of corporate reorganizations.

**Corequisite(s):** Prerequisite or Corequisite: Law 509 and 527.

### Law 698
3 units; H(3-0)

(formerly Law 539)

**Immigration and Refugee Law**
Basic principles, policies, and procedures governing immigration and refugee law. Topics include refugee law and status; selection and admission of immigrants; inadmissible and removable classes; exemptions and minister's permits; and appeals and judicial review in the federal court, including Charter issues.

**Corequisite(s):** Prerequisite or Corequisite: Law 503.

### Law 699
3 units; H(3-0)

(formerly Law 517)

**Labour Law**
The law governing unionized workplaces in Canada. Topics include freedom of association, the status of participants, union organization and certification, unfair labour practices, collective bargaining, the collective agreement and arbitration, industrial conflict, the duty of fair representation, and interaction between the labour law regime and the common-law of employment.

**Corequisite(s):** Prerequisite or Corequisite: Law 503.

### Law 700-Level Courses

### Law 703
3 units; H(3-0)

**Graduate Seminar in Legal Research and Methodology**
Preparation for developing, researching and writing a thesis or major research paper. The distinctive nature of legal scholarship and its professional context will be explored. Students will be introduced to specific research techniques and to the challenges of comparative and cross-cultural work.

**Prerequisite(s):** Admission to the LLM program or consent of the Graduate Director.

### Law 705
3 units; H(0-3)

**Graduate Seminar in Legal Theory**
An exploration of schools of legal theory, with the goal of helping students situate their graduate research within one or more of those approaches to legal scholarship. The seminar is structured around a series of readings describing different theoretical approaches and applying these approaches to areas of research.

**Prerequisite(s):** Admission to the LLM program or consent of the Graduate Director.

### Law 706
5 units; F(0-5)

**Major Research Paper**
Under the supervision of a member of the Faculty of Law or other suitable person appointed by the Graduate Co-ordinator, students will complete a major research paper, approximately 50 to 60 pages (15,000 – 18,000 words) in length. The paper must reflect extensive research on a topic in natural resources, energy or environmental law, and it must propose a solution to a problem or present a critical evaluation of an issue in this area of law. The paper will be evaluated on a Pass/Fail basis by the supervisor and one other person appointed by the Graduate Co-ordinator. In the event of disagreement between the supervisor and the other appointee, the Graduate Co-ordinator shall determine whether the paper is a pass or fail after reading the paper and then consulting with the supervisor and other appointee.

**Prerequisite(s):** Admission to the LLM program or consent of the Graduate Director.

### Law and Society LWSO

Instruction offered by the Department of Sociology in the Faculty of Arts.

### Junior Courses

### Law and Society 201
3 units; H(3-0)

**Introduction to Legal Studies**
Overview of the role of law in society. Examination of different concepts of law. Study of legal rules, institutions, processes and personnel in social context. Discussion of construction and exercise of the power of law. Emphasis on Canadian law and legal system.

### Law and Society 203
3 units; H(3-0)

**Introduction to Legal Knowledge**
Examination of the philosophy and science of law as tools of social engineering. Students will be introduced to tort, contract, property and criminal law and will review different schools of thought and legal movements specific to these areas of law. Current legal developments (including decided Canadian cases) will be covered to illustrate how concepts such as risk, negligence, neighbour principle, contractual obligations, offer and acceptance, consideration, remedies and punishment play out in contemporary Canadian society.
Senior Courses

Law and Society 313 3 units; H(3-0)

Research Methods in Law and Society
Research and writing methods including legal research basics, legal analysis, qualitative strategies in socio-legal studies, academic writing, and academic methodology.
Prerequisite(s): Law and Society 201.

Law and Society 335 3 units; H(3-0)

Equality Issues
An examination of the ability of the law to guarantee equality. Issues of gender, racial and class equality will be explored. Topics may include employment law, civil law, criminal law, reproductive rights and family law. All material is studied as it pertains to the Canadian legal culture.

Law and Society 377 3 units; H(3-0)

Self-Regulation
Examines how individuals and groups create, maintain, and follow non-legal codes of conduct and, in turn, regulate themselves and society. Students will be introduced to concepts of self-governance and moral regulation found in social manners, community standards, religious beliefs, as well as, consciously "legislated" group mechanisms such as professional codes of conduct, mission statements, and corporate governance practices.
Prerequisite(s): Law and Society 201.

Law and Society 401 3 units; H(3-0)

Special Topics in Law and Society
An examination of selected topics in Law and Society.

MAY BE REPEATED FOR CREDIT

Law and Society 413 3 units; H(3-0)

Liberalism
An examination of the fundamental conceptions of rights and freedoms in the works of J.S. Mill and twentieth- and twenty-first-century philosophers. The treatment of these concepts in contemporary law and their role in contemporary legal and social issues are explored as well.
Prerequisite(s): Law and Society 201, 60 units (10.0 full-course equivalents) and admission to the Law and Society program.
Antirequisite(s): Credit for Law and Society 413 and 412 will not be allowed.
Note: Preference in enrolment is given to students who have completed at least 90 units. Registration for students who have completed fewer than 90 units but more than 60 units will open on a date specified by Enrolment Services.

Law and Society 415 3 units; H(3-0)

Socio-legal Issues in Contemporary Liberal Societies
An examination of the ways in which fundamental premises of liberal legalism, such as fairness, equality, and individual liberty, intersect with each other and with other key social values and premises. May include privacy, the nature of the rights attached to property, the different understandings of democracy operating in different countries, and the extent to which the state should support religion.
Prerequisite(s): Law and Society 413, 60 units (10.0 full-course equivalents) and admission to the Law and Society program.
Antirequisite(s): Credit for Law and Society 415 and 412 will not be allowed.
Note: Registration for students who have completed fewer than 90 units but more than 60 units will open on a date specified by Enrolment Services.

Law and Society 425 3 units; H(3-0)

Law and Technology
Examines the relationship between law and legal institutions on the one hand, and science and technology on the other. Through close readings of texts and in-depth class discussion, students will investigate thematic issues such as the role of law in regulating science and technology; challenges to law raised by scientific discoveries and new technologies; and the influence of science and technology on law and legal institutions.
Prerequisite(s): 48 units (8.0 full-course equivalents).

Directed Reading
Supervised individual study of a special topic.
Prerequisite(s): Consent of the Department.
Note: Students must contact the Department of Sociology at least two weeks prior to the first day of classes to arrange an independent study course. May be counted only twice towards the major field requirements in Law and Society.

Law and Society 501 3 units; H(0-3T)

Law and Technology Honours Thesis and Seminar
Students will conduct an independent research project under the direction of a supervisor. In this seminar, students will discuss and present their projects and other topics relevant to conducting research.
Prerequisite(s): 3 units (0.5 full-course equivalent) from Communications Studies 313, Geography 340, History 300, Sociology 313, Political Science 399 or Psychology 312; admission to the Law and Society Honours program; and consent of the Department.

Law and Society 590 6 units; F(3S-0)

MAY BE REPEATED FOR CREDIT

Law and Society Honours Thesis and Seminar
Students will conduct an independent research project under the direction of a supervisor. In this seminar, students will discuss and present their projects and other topics relevant to conducting research.
Prerequisite(s): Law and Society 413 and 412, 90 units (15.0 full-course equivalents) and admission to the Law and Society major.
Note: Students may be required to attend court proceedings outside of class time.

Integrative Seminar
An advanced seminar integrating philosophical, theoretical, social, and legal approaches to understanding the relationship between law and society.
Prerequisite(s): Law and Society 413 and 415, 90 units (15.0 full-course equivalents) and admission to the Law and Society major.

Law and Society 591 3 units; H(3S-0)

Linguistics LING

Introduction to Linguistics I
Introduction to the scientific study of language, including the analysis of word, sentence, and sound structure, and the exploration of language as a human, biological, social, and historical phenomenon.
Antirequisite(s): Credit for Linguistics 201 and either 205 or 207 will not be allowed.

Linguistics 202 3 units; H(3-0)

Introduction to Linguistics II
Scientific study of language, focusing on language in historical and social contexts. Topics include: writing systems, language change, language acquisition, language families and areas, sociolinguistics, psycholinguistics, and bilingualism.
Prerequisite(s): Linguistics 201.
Antirequisite(s): Credit for Linguistics 203 and 205 or 207 will not be allowed.

Linguistics 221 3 units; H(3-0)

(formerly Linguistics 321)
Modern English Grammar
A comprehensive exploration of contemporary English, based on modern linguistic analysis, but also includes traditional grammatical terminology, as well as language change, attitudes to language varieties and problems in usage.

Linguistics 223 3 units; H(3-0)

Language and Advertising
An investigation of the nature of persuasive messages from the perspective of linguistic theory. Topics may include truth and falsity, implication, ambiguity, and context-dependence.

Linguistics 225 3 units; H(3-0)

Languages, Linguistics, Literatures and Cultures in Canada
Survey and analysis of the varieties of English currently spoken in the world, including various dialects, especially Canadian and American, and English-based pidgins and creoles.

Linguistics 227 3 units; H(3-0)

Rap Linguistics
The leading music genre known as rap is dominated by language. How this creatively flourishing art-form relates to language science. An examination of the manipulation of sounds, words, grammar, and meaning in rap, and what it reveals about language in the mind and in society.

Senior Courses

Linguistics 301 3 units; H(3-0)

Syntax I
Introduction to syntax. Emphasis on tree-drawing and basic argumentation skills. Topics may include: syntactic categories; grammatical, thematic, and structural relations; syntactic movement.
Prerequisite(s): Linguistics 201.

Linguistics 303 3 units; H(3-0)

Phonology I
Theory and practice of phonological analysis: the classical phoneme; distinctive features and their organization; methods of analysis; underlying and surface representations; rules and derivations.
Prerequisite(s): Linguistics 201.
Note: Linguistics 341 should be taken either before or concurrently with Linguistics 303.

Linguistics 309 3 units; H(3-0)

Language and Power
The nature of the linguistic resources used to create, enhance and justify positions of dominance or subordination, or to influence and persuade populations. Examples drawn from the discourse...

MAY BE REPEATED FOR CREDIT
Courses of Instruction

Linguistics 519 3 units; H(3-0)  
(Philosophy 519)  

**Formal Semantics of Natural Language**  
Central issues in the logical semantics of natural language, focusing on topics such as quantification, scope, and the interpretation of pronouns.  
Prerequisite(s): Philosophy 279 or 377. Philosophy 371 or Linguistics 319 recommended.  
Antirequisite(s): Credit for Linguistics 509 will not be allowed.

Linguistics 531 3 units; H(3-0)  

**Survey of Indigenous Languages of the Americas**  
A survey of the indigenous languages of the Americas, including classifications of language families and structural analysis of selected languages.  
Prerequisite(s): Linguistics 301 or 303.  
MAY BE REPEATED FOR CREDIT

Linguistics 551 3 units; H(3-0)  

**Linguistic Analysis**  
Linguistic analysis of a language or language family.  
Prerequisite(s): Linguistics 301 or 303.  
MAY BE REPEATED FOR CREDIT

Linguistics 553 3 units; H(3-0)  

**Topics in Historical Linguistics**  
An advanced course in the theory of historical linguistics.  
Prerequisite(s): Linguistics 453.  
MAY BE REPEATED FOR CREDIT

Linguistics 560 3 units; H(3-0)  

**Statistics for Linguistic Research**  
Introduction to basic statistical concepts, methods of analysis, and quantitative modelling techniques, with a focus on their application to the unique properties of language research and linguistic data.  
Prerequisite(s): Consent of the Linguistics Division of the School.

Linguistics 571 3 units; H(3-0)  

**Corpus and Experimental Methods for Syntax and Semantics**  
Introduction to programming methods for the development and searching of text corpora, as well as the design and implementation of studies using open source software. Study design will be introduced through critical reading of studies covering a range of syntactic and semantic phenomena.  
Prerequisite(s): Linguistics 319 and 401.

Linguistics 598 6 units; F(3S-0)  

**Independent Research**  
Open only to Honours students who are in the last year of their program. Students are expected to carry out a specific research project under the supervision of a staff member and submit a thesis acceptable to the Linguistics Division of the School.

Linguistics 599 3 units; H(3S-0)  

**Conference Course**  
Directed research in areas of special interest to advanced students.  
Prerequisite(s): Consent of the Linguistics Division of the School.  
MAY BE REPEATED FOR CREDIT

**Graduate Courses**  
Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599. Admission to all 600-level courses is with consent of the School in addition to any other prerequisites which may be stated.

Linguistics 600 1.5 units; Q(2-0)  

**Introduction to Graduate Studies in Linguistics**  
This course provides an introduction to areas of research and theoretical orientations in which faculty in this department specialize, as well as to research and professional skills.  

Linguistics 605 3 units; H(3-0)  

**Field Methods**  
Prerequisite(s): Consent of the program.  
MAY BE REPEATED FOR CREDIT

Linguistics 611 3 units; H(3-0)  

**Advanced Syntactic Analysis**  
An advanced course in syntactic theory with focus on analytical and critical skills required for conducting syntactic research.  
Prerequisite(s): Consent of the program.

Linguistics 613 3 units; H(3-0)  

**Advanced Phonological Analysis**  
An advanced course in phonological theory with focus on analytical and critical skills required for conducting phonological research.  
Prerequisite(s): Linguistics 403 and consent of the program.

Linguistics 631 3 units; H(3-0)  

**Topics in Linguistic Theory**  
Seminar in any area of theoretical linguistics, including phonetics, phonology, morphology, syntax, and semantics.  
631.01. Phonetics  
631.02. Phonology  
631.03. Morphology  
631.04. Syntax  
631.05. Semantics  
Prerequisite(s): Consent of the program.  
Note: Consult the program regarding topics offered in any given year as topics vary. Not offered every year.

Linguistics 633 3 units; H(3-0)  

**Topics in Language Acquisition**  
Seminar in language acquisition.  
633.01. First Language Acquisition  
633.02. Second Language Acquisition  
Prerequisite(s): Consent of the program.  
Note: Consult the program regarding topics offered in any given year as topics vary. Not offered every year.

Linguistics 635 3 units; H(3-0)  

**Analysis of a Language or Language Family**  
Seminar in the analysis of a selected language or language family.  
Prerequisite(s): Consent of the program.  
Note: Consult the program regarding topics offered in any given year as topics vary. Not offered every year.  
MAY BE REPEATED FOR CREDIT

Linguistics 651 3 units; H(3-0)  

**Topics in Historical Linguistics**  
Seminar in historical linguistics.  
Note: Consult the program regarding topics offered in any given year as topics vary. Not offered every year.  
MAY BE REPEATED FOR CREDIT

Linguistics 660 3 units; H(3-0)  

**Quantitative Modelling of Linguistic Data**  
Introduction to basic statistical concepts, methods of analysis, and quantitative modelling techniques, with a focus on their application to the unique properties of language research and linguistic data.  
Prerequisite(s): Consent of the program.

Linguistics 697 3 units; H(3S-0)  

**Thesis Research Development**

Linguistics 699 3 units; H(3S-0)  

**Conference and Reading Course**  
MAY BE REPEATED FOR CREDIT

Linguistics 797 1.5 units; Q(2-0)  

**Senior Doctoral Seminar**  
A forum for discussing and presenting candidacy paper research, thesis research, and conference presentations/publications in preparation.  
NOT INCLUDED IN GPA

**Management Studies MGST**

Instruction offered by members of the Haskayne School of Business.

**Junior Course**

Management Studies 217 3 units; H(3-0)  

**Introduction to Business Analytics**  
Introduction to data representation and analysis. Students will think critically about business problems, gather, evaluate, analyze and synthesize relevant data, and create insightful models to improve the quality of decisions. Communicating and presenting quantitative analysis to lead managerial decision making will be emphasized while continuing to advance both individual and group leadership skills.  
Prerequisite(s): Admission to the Haskayne School of Business.  
Antirequisite(s): Credit for Management Studies 217 and Business and Environment 291 will not be allowed.

**Senior Courses**

Management Studies 301 3 units; H(3-0)  

**Research Methodologies**  
Introduction to how research is being done in the field of business, through critical exploration of research language, ethics and approaches. Quantitative, qualitative and mixed methods approaches presented by faculty researchers. Students experiment with various research methods, identify problems, develop hypotheses and research questions, specify variables and choose from various research design tools such as experiments, survey, content analysis, focus groups and in-depth interviews.  
Prerequisite(s): Admission to the Haskayne School of Business Bachelor of Commerce (Honours) program.
### Management Studies 359 3 units; H(3-0)

**Selected Topics in Management**
Examination of selected topics in management.

**Prerequisite(s):** 24 units (4.0 full-course equivalents). For certain topics consent of the Haskayne School of Business and/or admission to the Haskayne School of Business will also be required.

**Note:** For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

**MAY BE REPEATED FOR CREDIT**

### Management Studies 391 3 units; H(3-3T)

**Business Analytics**
Business Analytics uses data, information technology, statistical analysis, and quantitative methods to build models that help managers gain improved insight about their business processes and make better, fact-based decisions. Analysis of complex business problems and application of higher-level modelling techniques including optimization, simulation, decision analysis, queuing theory and forecasting.

**Prerequisite(s):** Admission to the Haskayne School of Business, Mathematics 149 or 265 or 265 or 281, Statistics 217. Management Studies 217 and Strategy and Global Management 217.

### Management Studies 451 3 units; H(3-0)

**Corporate Governance and Ethical Decision-Making**
Develop an increased awareness of the importance of corporate governance systems and strong financial decision making systems in developing effective business enterprises. Specific emphasis on the resolution of agency problems, the role of the board of directors, compensation systems and financial modelling.

**Prerequisite(s):** Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents) including Finance 317.

**Antirequisite(s):** Credit for Management Studies 451 and any of Business and Environment 291, Management Studies 491, 493 or 495 will not be allowed.

### Management Studies 453 3 units; H(3-0)

**Ethical Leadership**
Apply a variety of different leadership frameworks to problems and develop an understanding of when various frameworks are most applicable. Critical thinking skills will be honed using film, short cases, readings, class discussions, and written opinion. Identify components of leadership behaviours and explore the complex interaction between leaders and members in the context of different ethical quandaries. Witness, experience, and “consume” leadership as it progresses from individual to team to organizational to community levels.

**Prerequisite(s):** Admission to the Haskayne School of Business and 84 units (14.0 full-course equivalents) including Organizational Behaviour and Human Resources 317.

**Antirequisite(s):** Credit for Management Studies 453 and any of Business and Environment 291, Management Studies 491, 493 or 495 will not be allowed.

### Management Studies 501 3 units; H(3-0)

**Capstone Applied Research Project I**
Preparation for conducting an applied research project. Focus is on practical research issues such as choosing appropriate applied research topics, designing a research question, and applying the appropriate research methods. Development of the applied research project through identification of a potential client or organization and a field expert to work with.

**Prerequisite(s):** Admission to the Haskayne School of Business Bachelor of Commerce (Honours) program and Management Studies 301.

### Management Studies 503 3 units; H(3-0)

**Capstone Applied Research Project II**
Continuation of work on the applied research project. Knowledge production and dissemination of insights from research. Analysis of data and communication of results to business and university stakeholders. Preliminary development of insights using collected data, critical evaluation of the project limitations and contribution, and delivery of results in an Honours undergraduate thesis.

**Prerequisite(s):** Admission to the Haskayne School of Business Bachelor of Commerce (Honours) program, Management Studies 301 and 501.

### Management Studies 511 3 units; H(3-0)

**Leadership Skills: Student Business Start-up**
Provides general management skills through hands-on facilitation of a new business start-up. Teaching business basics to elementary school students and guiding them through the stages of a business, running and shut-down phases of a fundraising business.

**Prerequisite(s):** Admission to the Haskayne School of Business, consent of the Haskayne School of Business and 90 units (15.0 full-course equivalents).

### Management Studies 559 3 units; H(3-0)

**Selected Topics in Management**
Examination of selected topics in management.

**Prerequisite(s):** Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents). For certain topics, consent of the Haskayne School of Business will also be required.

**Note:** For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

**MAY BE REPEATED FOR CREDIT**

### Management Studies 571 3 units; H(3-3T)

**Management of International Trade**
Concepts and skills required to conduct international transactions in goods and services, including contracts, transportation, financing, insurance, customs clearance, compliance with import/export regulations and dispute resolution.

**Prerequisite(s):** Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

### Management Studies 597 3 units; H(3-0)

**Directed Study in Management Studies**
In-depth study in one of the functional areas of business.

**Prerequisite(s):** Admission to and consent of the Haskayne School of Business and 60 units (10.0 full-course equivalents).

**Note:** May be repeated once for credit.

### Graduate Courses

### Management Studies 611 3 units; H(3-0)

**Managerial Economics**
Introduction to economic models for business decision making. Models from microeconomics are applied to provide insight in understanding costs, pricing, industry structure, and competitive interaction. Information economics is used to illustrate principal-agent problems that commonly arise in a business context. Macroeconomic models of supply and demand are applied to illustrate how government policy affects inflation and exchange rates.

### Management Studies 613 3 units; H(3-0)

**Managerial Decision Modelling**
The transformation of raw data into useful information for decision-making. Quantitative models are implemented with spreadsheets to develop skills in generating managerial insight from data and in dealing with uncertainty. Topics covered include basic probability and statistics, decision trees, regression analysis, optimization, and simulation.

### Management Studies 703 3 units; H(3-0)

**Philosophy of Science for Business Administration**
Examines processes of development and discussion of theories, with a focus on business management research. Exploration of three main questions: (i) what is the role of theory in science; (ii) what makes good management theories; and (iii) how can theories in management or related disciplines be developed and tested. Classical philosophy of science, management research papers focused on scientific theory and explanation, and prescriptive studies with strategies or methods for theory development in management and related disciplines, are reviewed.

**Prerequisite(s):** Admission to the Doctor of Business Administration program.

### Management Studies 705 3 units; H(3-3)

**Critical Research Assessment**
Development of skills associated with the evaluation and use of extant research. Emphasis is on the critical reading of methods and results sections of experimental and non-experimental research papers. Discussions regarding the appropriateness and limitations of the methodologies utilized, and statistical treatment of the data, will facilitate an understanding of research contributions. Studies using experimental and non-experimental design are included.

**Prerequisite(s):** Admission to the Doctor of Business Administration program.

### Management Studies 709 3 units; H(3-0)

**Qualitative Research Methods**
Development of skills to conduct qualitative research in the context of business. Focus on research design and the processes of collecting and analyzing qualitative data as well as drawing conclusions and reporting research findings. Specific emphasis is given to case study research, ethnographic, and focus group research. Grounded theory, action research, narrative, and discursive research is also introduced.

**Prerequisite(s):** Admission to the Doctor of Business Administration program.

### Management Studies 711 3 units; H(3-0)

**Quantitative Design and Analysis**
Development of skills associated with the design and implementation of experimental and non-experimental research. Specific emphasis on questionnaire design and psychometric properties, multiple regression, logistic regression, discriminant function analysis, factor analysis and structural equation modelling. Focus is on building capacity to conduct quantitative research.

**Prerequisite(s):** Admission to the Doctor of Business Administration program.

</table>
Courses of Instruction

Management Studies 795 3 units; H(1-0) (formerly Management Studies 792)

Research Development
Development of research skills through participation in a well-defined project under the direct supervision of an experienced researcher.
Prerequisite(s): Management Studies 781 or 783.

Management Studies 797 3 units; H(3-0)

Directed Graduate Study in Management
Coverage of various topics on the basis of student and faculty interest.
Prerequisite(s): Consent of the Haskayne School of Business.
MAY BE REPEATED FOR CREDIT

Management Studies 799 3 units; H(3-0)

Topics in Management Studies
Coverage of various topics on the basis of student and faculty interests.
Prerequisite(s): Consent of the Haskayne School of Business.
MAY BE REPEATED FOR CREDIT

Manufacturing Engineering ENMF

Instruction offered by members of the Department of Mechanical and Manufacturing Engineering in the Schulich School of Engineering.

Senior Courses

Manufacturing Engineering 417 3 units; H(3-3)

Manufacturing and Production Processes
The role and characterization of manufacturing technology within the manufacturing enterprise. Overview of deformation processes, joining processes, consolidation processes, material-removal processes, and material alteration processes. Process selection and planning.
Prerequisite(s): Engineering 200.

Manufacturing Engineering 501 3 units; H(3-2)

Modelling and Simulation of Manufacturing Systems
General modelling of production systems. Spreadsheet modelling for capacity analysis. Fundamentals of discrete-event simulation including key concepts; simulation world views; the simulation study life cycle. Modelling and programming aspects of discrete-event simulation including: verification and validation; simulation animation; interfacing simulation software with other systems. Statistical aspects of discrete-event simulation including: random number and random variate generation; input process modelling; output analysis; variance reduction techniques. Applications of discrete-event simulation to the design and analysis of manufacturing systems.
Prerequisite(s): Engineering 319.

Manufacturing Engineering 503 3 units; H(3-2)

Computer-Aided Design and Manufacturing
Hardware and software for computer-aided design and manufacturing (CAD/CAM) systems. Geometric modelling, transformation and visualization. Modelling of freeform curves and surfaces. Programming for computer numerically controlled (CNC) machining. Integration of CAD/CAM systems. Applications in motion analysis, structure analysis, optimization, rapid prototyping, reverse engineering and virtual engineering.
Prerequisite(s): Manufacturing Engineering 417 and Mechanical Engineering 337.
Antirequisite(s): Credit for Manufacturing Engineering 503 and 401 will not be allowed.

Manufacturing Engineering 509 3 units; H(3-2)

Advanced Manufacturing Systems

Manufacturing Engineering 514 3 units; H(3-2)

Integrated Manufacturing Systems
Fundamentals of integrated and competitive manufacturing. Manufacturing and operations strategy. Topics in production and operations management including: product planning and control systems; inventory management systems; process analysis and improvement; quality management systems.

Manufacturing Engineering 517 3 units; H(3-2)

Experimental Design and Analysis
Introduction to statistical Design of Experiments (DOE) techniques for efficient data collection, analysis and interpretation. Analysis of Variance (ANOVA), including blocking and nesting, in full and fractional factorial designs to understand sources of variation in performance. Robust design, including classical response surface and Taguchi techniques, to minimize effects of environmental factors on performance variability. Applications to product and process improvement.
Prerequisite(s): Engineering 319.

Manufacturing Engineering 527 3 units; H(2-2/2)

Project Engineering

Manufacturing Engineering 529 3 units; H(3-2)

Introduction to Microelectromechanical Systems
Microelectromechanical systems (MEMS) and devices including microsensors and microactuators. Principles of operation, material properties, fabrication techniques including surface and bulk micromachining, IC-derived microfabrication techniques, sensing and actuation principles, sensor dynamics issues, circuit and system issues, packaging, calibration and testing. Illustrative examples include (1) micromachined inertial sensors and actuators for manufacturing processes, (2) microactuator arrays for “smart surfaces,” (3) biosensors for medical applications, and (4) transducers for aerospace applications.

Manufacturing Engineering 533 3 units; H(3-2/2)

Computer-Based Control for Industrial Automation
Antirequisite(s): Credit for Manufacturing Engineering 533 and 515 will not be allowed.

Graduate Courses

Manufacturing Engineering 605 3 units; H(3-0)

Planning and Control of Computer Integrated Manufacturing
Advanced techniques for the design, planning, and control of integrated manufacturing systems. Course elements include: a framework for manufacturing planning and control; data flow and structured modelling methodologies; hierarchical models of manufacturing; cellular manufacturing organization; databases and communications; forecasting, demand management, capacity planning and master production scheduling; materials requirements planning, manufacturing resource planning, Just-in-Time manufacture, and Optimized Production Technology; control of independent demand and inventory items; production activity control, shop floor control, scheduling, order release and dispatching; simulation in planning and control.

Manufacturing Engineering 607 3 units; H(3-0)

Total Quality Management

Manufacturing Engineering 609 3 units; H(3-0)

Design and Analysis of Experiments
Statistical Design of Experiments (DOE) techniques for efficient data collection, analysis and interpretation. Analysis of Variance (ANOVA), including blocking and nesting, in full and fractional factorial designs. Robust design, including classical response surface and Taguchi techniques. Applications to product and process improvement.

Manufacturing Engineering 618 3 units; H(3-0)

Manufacturing Optimization
Application of operations research techniques in manufacturing engineering: linear manufacturing optimization problems; transportation, assignment and transshipment problems; dynamic manufacturing programming problems; network problems; manufacturing decision problems.
Antirequisite(s): Credit for Manufacturing Engineering 618 and 619.18 will not be allowed.

Manufacturing Engineering 619 3 units; H(3-0)

Special Problems in Manufacturing Engineering
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member. Students would be required to consider problems of an advanced nature.
MAY BE REPEATED FOR CREDIT

Manufacturing Engineering 621 3 units; H(3-0)

Optimization Methods with Robotics Applications
Designed for graduate and senior undergraduate students interested in advanced topics in robotics. Based on the students’ research topics, contents may vary. These include: fundamental theory in robotics, mathematical toolbox for optimization, differential kinematics, kinematics and actuation redundancy, optimal control, co-operating
Miscellaneous

Marine Science MRSC

Most formal courses in Marine Science are offered at the Bamfield Marine Sciences Centre that is owned by the Western Canadian Universities Marine Sciences Society. The Centre is situated in Bamfield on the Pacific Coast of Vancouver Island, B.C. Instructors are drawn generally from the staffs of the participating universities (University of Alberta, University of Calgary, University of British Columbia, Simon Fraser University, University of Victoria).

Appropriate courses at the 300 level (or higher) in Biology, Plant Biology (Botany) and/or Zoology are prerequisite to these courses.

Each six unit (full) course will last six weeks (plus four days travelling time) with an average of 50 hours weekly of lectures, laboratories, tutorials and field trips.

Fall Program: The Western Canadian Universities Marine Sciences Society offers an integrated program of courses in Marine Biology at the Bamfield Marine Sciences Centre. Attendance at the program requires residence at Bamfield Marine Sciences Centre for an entire Fall Term. Details are available from the Department of Biological Sciences.

University of Calgary students must apply to and be accepted by the Centre before they are permitted to register for the Marine Science courses at the University of Calgary. For further information students should consult the Department of Biological Sciences.

†Numbers in parentheses are the course numbers listed by the Bamfield Marine Sciences Centre. In many cases these courses have been renumbered to fulfill University of Calgary requirements. The courses listed below are not necessarily offered every year. Other courses and specific titles in special topics courses will be offered yearly.

Students are requested to check current listings in the Department of Biological Sciences.

Senior Courses

Marine Science 321 3 units; H(3-0)

Introduction to Marine Science

Exploring the ocean environment, marine organisms, marine ecosystems and the impact of humans on the sea.

Prerequisite(s): Any two of Biology 231, 233, 241 and 243.

Note: This course is offered on the main campus and not at the Bamfield Marine Sciences Centre.

Marine Science 420 6 units; F(3-3)

Marine Phylogy

A survey of the marine algae, with emphasis on the benthic forms in the vicinity of the Bamfield Marine Sciences Centre. Includes lectures, laboratory work, field collecting, identification and observation. The study of living specimens is emphasized both in the laboratory and in the field.

Prerequisite(s): Consent of the Department.

Marine Science 430 6 units; F(3-3)

Marine Ecology

An analytical approach to biotic associations in the marine environment. Opportunities will be provided for study of the intertidal realm in exposed and protected areas and of beaches and estuaries in the vicinity of the Bamfield Marine Sciences Centre; plankton studies and investigations of the subtidal and benthic environments by diving and dredging are envisaged.

Prerequisite(s): Consent of the Department.

Marine Science 440 6 units; F(3-3)

(Marine Science 4111†)

Comparative Invertebrate Embryology

A study of developmental patterns in marine representatives of most major and minor invertebrate phyla. Lecture topics will include fertilization and embryonic development as well as larval structure, behaviour and metamorphosis. Laboratory work will include methods and techniques of obtaining and handling of gametes, preparation and maintenance of larval cultures and observations on development. Various pelagic larvae collected from the plankton will be studied and some experimental work will be included.

Prerequisite(s): Consent of the Department.

Marine Science 450 6 units; F(3-3)

(Marine Science 4351†)

Introduction to Biological Oceanography

The biology of the oceans; supporting coverage of relevant physics and chemistry; plankton biology, community structure and life histories and influencing environmental factors. Collections will be made from sheltered inlets through Barkley Sound to offshore waters; field and laboratory studies of plankton organisms.

Prerequisite(s): Consent of the Department.

Marine Science 451 3 units; H(3-3)

(Marine Science 450†)

Principles of Aquaculture

An interdisciplinary introduction to the principles underlying the commercial cultivation of aquatic plants and animals emphasizing marine systems. The course will include working site-visits to a range of commercial farms and Research and Development facilities.

Prerequisite(s): Biology 243 and consent of the Department.

Marine Science 500 6 units; F(0-6)

(Marine Science 400†)

Directed Studies

Directed studies under the supervision of a member of the faculty. Involves a research project approved by the supervisor in the field of interest of the student, and will be designed to take maximum advantage of the laboratory and/or field opportunities offered by the Bamfield Marine Sciences Centre.

Prerequisite(s): Consent of the Department.

Marine Science 501 3 units; H(3-3)

(Marine Science 402†)

Special Topics in Marine Biology

This course will be offered, as opportunities arise, by distinguished scientists visiting at the Bamfield Marine Sciences Centre who are prepared to offer a course extending over a 3 week period.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Marine Science 502 6 units; F(300 hours)

(Marine Science 401†)

Special Topics in Aquaculture

Examination of the culture techniques for selected groups of aquatic plants, animals or microorganisms. Participants will be expected to complete a project which examines some aspect of applied science relevant to commercial culture.

Prerequisite(s): Marine Science 451 and consent of the Department.

MAY BE REPEATED FOR CREDIT

Marine Science 503 3 units; H(3-3)

(Marine Science 454†)

Special Topics in Aquacultural Applied Science

Examination of the principles underlying the application of selected areas of scientific information to commercial aquaculture. Participants will be expected to complete a written project.

Prerequisite(s): Marine Science 451 and consent of the Department.

MAY BE REPEATED FOR CREDIT

Marine Science 505 3 units; H(3-3)

(Marine Science 460†)

Directed Studies

Directed studies under the supervision of a member of the faculty. Involves a research project approved by the supervisor in the field of interest of the student, and will be designed to take maximum advantage of the laboratory and/or field opportunities offered by the Bamfield Marine Sciences Centre.

Prerequisite(s): Consent of the Department.

Marine Science 509 3 units; H(0-6)

(Marine Science 470†)

Directed Research in Aquaculture

Design and execution of a research project in the field of aquaculture under the supervision of a scientist working in association with the Bamfield Sciences Centre. A written report is a requirement.

Prerequisite(s): Marine Science 451 and consent of the Department.

Marine Science 511 3 units; H(3-0)

(Marine Science 480†)

Papers and Seminar in Marine Science

The purpose of this course is to provide a forum for students to integrate the knowledge they are obtaining from the other courses in this program. It will be a combination of presentations by resident and visiting researchers followed by discussion, discussion of original papers selected by the
Courses of Instruction

instructor(s), and short critiques of original papers by each student.

Prerequisite(s): Consent of the Department.

Students are expected to have completed at least 54 units (9 full-course equivalents) of a Biology program. Others may be admitted by permission of the instructor in consultation with the Bamfield Marine Sciences Centre.

Marine Science 515 3 units; H(3-3)
(Marine Science 415†)

Structure and Function in Marine Animals

This course will use marine invertebrates and vertebrates to explore the structural plans of animals in a functional framework. Rather than providing a comprehensive survey of diversity in the animal kingdom, specific taxa will be chosen that exemplify specific systems (e.g., respiratory, skeletal, nervous, etc.). The major taxa will be discussed together with minor groups that have peculiarities that are of general biological importance. This course will combine the disciplines of classification, evolution, morphology, biomechanics, physiology and biochemistry. The emphasis placed on each discipline will depend on the interests of the instructor. Field work will be integrated with the laboratory exercises.

Prerequisite(s): Consent of the Department.

Students are expected to have completed at least 54 units (9 full-course equivalents) of a Biology program and to have successfully completed introductory courses in organismal diversity, physiology, cell biology and/or biochemistry. Others may be admitted by permission of the instructor in consultation with the Bamfield Marine Sciences Centre.

Marine Science 525 3 units; H(3-3)
(Marine Science 425†)

Ecological Adaptations of Seaweeds

An exploration of morphological, physiological, genetic and reproductive adaptations of seaweeds to their natural and man-altered environments. Daily lectures and laboratory exercises will complement frequent field observations.

Prerequisite(s): Consent of the Department.

Students are expected to have completed at least 54 units (9 full-course equivalents) of a Biology program and to have successfully completed courses in organismal diversity, introductory genetics, cell biology and/or biochemistry. Others may be admitted by permission of the instructor in consultation with the Bamfield Marine Sciences Centre.

Marine Science 537 3 units; H(3-3)
(Marine Science 437†)

Population and Community Ecology of Marine Organisms

An introduction to the concepts of marine plant, animal and community ecology. Emphasis will be on organism/physical and chemical environmental interactions, organisam interactions, and concepts of biological diversity. Daily lectures and laboratory exercises will be complemented by frequent field excursions.

Prerequisite(s): Consent of the Department.

Students are expected to have completed at least 54 units (9 full-course equivalents) of a Biology program. Statistics is recommended. Others may be admitted by permission of the instructor in consultation with the Bamfield Marine Sciences Centre.

Marine Science 540 6 units; F(3-3)
(Marine Science 440†)

Biology of Marine Birds

A study of the interrelationship of birds and the marine environment. Lectures will emphasize the systematics and ecological relationships, behaviour, life histories, movements and conservation of marine birds. Census techniques and methods of study of marine birds in the field will be considered. Seabird identification, classification, morphology, plumage and moult will be examined in the laboratory.

Prerequisite(s): Zoology 377 and consent of the Department.

Marine Science 544 6 units; F(3-3)
(Marine Science 445†)

Biology of Marine Mammals

A survey course covering systematics and distribution of marine mammals, their sensory capabilities and physiology, with special emphasis on the Cetacea. The course will include field work in the vicinity of Barkley Sound and will include an independent field study.

Prerequisite(s): Zoology 377 and consent of the Department.

Marine Science 546 6 units; F(3-3)
(Marine Science 446†)

Comparative Ethology

A comparative study of marine animals (vertebrate and invertebrate) emphasizing behavioural description, underlying physiological mechanisms, the biological significance of behaviour and behavioural evolution. The course will include independent laboratory and field studies.

Prerequisite(s): Zoology 375, 377, Biology 313, and consent of the Department.

Antirequisite(s): Credit for Zoology 567 and Marine Science 546 will not be allowed.

Note: Completion of Zoology 461 and either 463 or 465 prior to this course will be of definite advantage.

Marine Science 572 6 units; F(3-3)
(Marine Science 410†)

Marine Invertebrate Zoology

A survey of the marine phyla emphasizing natural history, morphology and systematics of the invertebrate fauna. The course will include lectures, laboratory work, field collection, identification and observation. The study of living specimens is emphasized both in the laboratory and in the field.

Prerequisite(s): Consent of the Department.

Marine Science 574 6 units; F(3-3)
(Marine Science 412†)

Biology of Fishes

Classification, physiology, ecology, behaviour and zoogeography of fishes with particular emphasis on those in the marine environment of the British Columbia coast. Involves some field projects.

Prerequisite(s): Consent of the Department.

Marine Science 582 6 units; F(3-3)
(Marine Science 413†)

Biology of Marine Molluscs

An advanced course of selected topics emphasizing functional morphology, ecology and evolution. Field trips will be undertaken to survey the representative molluscs of the Barkley region. Students will be expected to complete an independent field or laboratory study of selected molluscs.

Prerequisite(s): Marine Science 572/410 and consent of the Department.

Graduate Courses

Enrolment in any graduate course requires consent of the Department.

600-level courses are available with permission to undergraduate students in the final year of their programs.

Special Graduate Courses: Each year the Western Canadian Universities Marine Biological Society offers short (one-week) intensive courses especially for graduate students interested in Marine Biology. Topics vary from year-to-year. Details are available from the Department of Biological Sciences.

Marine Science 600 6 units; F(3-3)
(Marine Science 500†)

Directed Studies

A course of directed studies under the supervision of a member of faculty, involving a research project approved by the supervisor. Each study will be designed to take maximum advantage of laboratory and/or field opportunities offered by the Bamfield Marine Sciences Centre.

Prerequisite(s): Consent of the Department.

Marine Science 601 3 units; H(3-3)
(Marine Science 502†)

Special Topics (3 weeks)

Courses of a specialized nature offered, as opportunities arise, by distinguished scientists visiting the Bamfield Marine Sciences Centre.

Prerequisite(s): Consent of the Department.

Marine Science 602 6 units; F(3-3)
(Marine Science 501†)

Special Topics (6 weeks)

Courses of a specialized nature offered, as opportunities arise, by distinguished scientists visiting the Bamfield Marine Sciences Centre.

Prerequisite(s): Consent of the Department.

Marketing MKTG

Instruction offered by members of the Haskayne School of Business.

Senior Courses

Marketing 317 3 units; H(3-0)

Foundations of Marketing

An introductory marketing course designed for management students to introduce the principles and practices of marketing. Topics will cover basic marketing concepts, societal issues, and the decision-making process of marketers in developing marketing strategies and plans. The focus of the course will be on the implementation of specific product, pricing, distribution and communication strategies for specific market situations.

Prerequisite(s): Admission to the Haskayne School of Business, and 30 units (5.0 full-course equivalents) including Business and Environment 291 or Strategy and Global Management 217.

Antirequisite(s): Credit for Marketing 317 and 341 will not be allowed.

Marketing 341 3 units; H(3-0)

Introduction to Marketing

An introductory marketing course designed for non-Management students to introduce the broad principles and practices of marketing from both an organizational and societal perspective. Topics will cover basic marketing concepts, societal issues, and the decision process of marketers in
developing, pricing, promoting and distributing their products.

**Antirequisite(s):** Credit for Marketing 341 and 317 will not be allowed.

**Note:** Not available for credit towards the Bachelor of Commerce degree. Preference in enrolment is given to students who have declared a Management and Society Minor.

**Marketing 431** 3 units; H(3-0)

**Retail Management**
A strategic approach to the retail industry. Managing the retail operation, including site selection, store design, consumer behaviour in retail situations, buying, inventory management, and visual merchandising. The role of retailing in the global economy.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 433** 3 units; H(3-0)

**Business-To-Business Marketing**
Marketing management and theory applied to the purchase of products and services by organizations. Topics include industrial market dynamics, organizational buying behaviour, relationship development, technology, and the importance of innovation.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 435** 3 units; H(3-0)

**Marketing Communications**
Evaluations of the roles of various communication tools including advertising, sales promotion, personal selling and public relations.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 449** 3 units; H(3-0)

**Sales Management**
Strategic and managerial aspects of professional selling and sales force management. Topics include sales forecasting, recruitment, training, motivation, compensation and territory management, CRM, integration of technology, sales professionalism/ethics.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 465** 3 units; H(3-0)

**Marketing Research**
Understanding how to conduct and evaluate research for management decision making. Emphasis on research design, measurement concepts, sample design, field work, statistical concepts, data analysis and reporting research findings. Practical application by doing a field research study.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 467** 3 units; H(3-0)

**International Marketing**
A course on the environment and basic principles underlying the design and implementation of marketing strategies across national and cross-cultural boundaries. Topics will follow the decision process of international marketers in researching the environment, planning the entry strategy and designing their activities on product, distribution, promotion and pricing.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 477** 3 units; H(3-0)

**Product Management**
An in-depth examination of product management issues facing organizations. This includes strategic innovation, product portfolio, new product/service development, brand management, and diffusion of technology.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 479** 3 units; H(3-0)

**Management of Marketing Channels**
Development and maintenance of relationships between firms and their channel partners with an emphasis on the competitive advantage that such relationships offer. Topics include strategic channel design, channel evaluation, the role of channel partners in product/service development demand forecasting, pricing for competitive advantage and inventory control.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 483** 3 units; H(3-0)

**Buyer Behaviour**
Study of factors influencing buyer decision making and purchase behaviour. Topics include buyer motivation, personality, learning, and attitudes as well as the influence of culture, social class, groups, and situational contexts on buyers.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 487** 3 units; H(3-0)

**Services Marketing**
Application of the managerial practices and theory related to services marketing. Topics include management and measurement of service quality, service recovery. The linking of customer measurement to performance measurement, and cross-function issues through integration of marketing with disciplines such as operations and human resources.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Marketing 493** 3 units; H(3-0)

**Strategic Marketing**
Marketing strategy is explored in the context of overall corporate strategy. Integrates the aspects of the market mix into formal planning systems. The focus of the course is on strategic responses to changing customer needs and competitive activities.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Corequisite(s):** Marketing 465.

**Marketing 559** 3 units; H(3-0)

**Selected Topics in Marketing**
Investigation of selected topics in Marketing.

Prerequisite(s): Admission to the Haskayne School of Business and Marketing 317.

**Graduate Courses**

**Marketing 601** 3 units; H(3-0)

**Marketing Management**
An introductory course on marketing management with an emphasis on the marketing concept as the focus of business strategy. The decision variables as well as functional frameworks used by marketing managers are emphasized by concentrating on the relationship between business and consumers.

**Marketing 735** 3 units; H(3-0)

**Marketing Communications**
Evaluation of strategic roles of a variety of communication disciplines – such as advertising, direct response advertising, sales promotion and public relations – and how companies combine those disciplines to provide clarity, consistency, and maximum impact.

Prerequisite(s): Marketing 601.

**Marketing 741** 3 units; H(3-0)

**Business-To-Business Marketing**
Management issues in the marketing of products and services to business, government and industrial customers. Topics include organizational buying behaviour, industrial market segmentation, demand analysis and sales forecasting, development and implementation of an industrial marketing mix.

Prerequisite(s): Marketing 601.

**Marketing 761** 3 units; H(3-0)

**Buyer Behaviour**
Study of factors influencing buyer decision-making processes and purchase behaviours, with implications for marketing practice.

Prerequisite(s): Marketing 601.

**Marketing 763** 3 units; H(3-0)

**Marketing Research**
Study of research as a process for gathering market information to aid problem solving. Steps in the research process reviewed include problem definition, research design, data collection, data analysis and report preparation.

Prerequisite(s): Marketing 601.

**Marketing 783** 3 units; H(3-0)

**Services Marketing and Management**
Study of processes and practices relevant to strategic firms using service for competitive advantage. Focuses on the integration of marketing, operations, and human resources from the consumer’s perspective.

Prerequisite(s): Marketing 601.

**Marketing 785** 3 units; H(3-0)

**New Venture Marketing**
Within the context of high-potential, high growth ventures, examines four pillars of new product/new business opportunity. How to create value for the customer, solve significant problems through product and service design, measure sustainable financial value, and assess fit of new ideas with entrepreneur/organization. Emphasis on discovering market opportunities and exploring product or service feasibility.

Prerequisite(s): Marketing 601.
Courses of Instruction

Marketing 789 3 units; H(3S-0)
Seminar in Marketing Management
Intensive study and discussion of current literature and research with respect to selected, advanced topics in marketing.
Prerequisite(s): Marketing 601 or consent of the Haskayne School of Business.
MAY BE REPEATED FOR CREDIT
Marketing 793 3 units; H(3-0)
Strategic Marketing
Strategic market planning in a corporate context. Developing marketing strategies and understanding implementation. Examining the market management process.
Prerequisite(s): Marketing 601.
Marketing 795 3 units; H(3-0)
International Marketing
Design and implementation of marketing strategies across countries. Focuses on the global marketing environment and decision issues on foreign market entry, local marketing and global management of marketing activities.
Prerequisite(s): Marketing 601.
Marketing 797 3 units; H(3S-0)
Advanced Seminar in Marketing
Prerequisite(s): Consent of the Haskayne School of Business.
MAY BE REPEATED FOR CREDIT
Marketing 799 3 units; H(3S-0)
Doctoral Seminars in Marketing
MAY BE REPEATED FOR CREDIT

Mathematics MATH

Instruction offered by members of the Department of Mathematics and Statistics in the Faculty of Science.
Notes:
- For listings of related courses, see Actuarial Science and Statistics.
- Not all Senior courses are offered every year.
- Effective Fall 2018, all Applied Mathematics and Pure Mathematics courses have been renamed as Mathematics with a change in course number in some cases. Please refer to the descriptions of the individual Mathematics courses for details. Students enrolled in any program that requires any Applied Mathematics or Pure Mathematics course should use the corresponding Mathematics course as replacement.

Mathematics 177 0.75 units; E(16 hours)
Further Topics from Mathematics 277
Vector functions and differentiation, curves and parameterization, functions of several variables, partial differentiation, differentiability, implicit functions, extreme values.
Prerequisite(s): Mathematics 211 and 267.
Note: Designed to rectify a deficiency for those students whose Calculus I and II courses covered all the topics from Mathematics 265 and 267 but did not cover some of the topics on the calculus of functions of several variables from Mathematics 277.
NOT INCLUDED IN GPA

Junior Courses
Note: Students who have not studied mathematics for some time are strongly advised to review high school material thoroughly prior to registering in any junior level mathematics course.

Mathematics 205 3 units; H(3-1)
Mathematical Explorations
A mathematics appreciation course. Topics selected by the instructor to provide a contemporary mathematical perspective and experiences in mathematical thinking. May include historical material on the development of classical mathematical ideas as well as the evolution of recent mathematics.
Prerequisite(s): Mathematics 30-1, Mathematics 30-2, or Mathematics 2 (offered by Continuing Education).

Mathematics 209 3 units; H(3-2)
Applied and Computational Linear Algebra for Energy Engineers
System of Linear Equations with Applications, Matrices and Matrix Operations, Determinants, Vectors in Two and Three – Space with Geometrical Applications. Emphasis on applications and computer techniques. Students will complete a software-based project.
Prerequisite(s): Admission to the Energy Engineering Program.

Mathematics 211 3 units; H(3-1)
Linear Methods I
Prerequisite(s): A grade of 70 per cent or higher in Mathematics 30-1. (Alternatives are presented in C. Mathematics Competency Equivalents in the Academic Regulations section of this Calendar).
Antirequisite(s): Credit for Mathematics 211 and 213 will not be allowed.

Mathematics 213 3 units; H(3-1)
Linear Algebra I
Systems of equations and matrices, vector spaces, subspaces, bases and dimension, linear transformations, determinants, eigenvalues and eigenvectors.
Prerequisite(s): A grade of 80 per cent or higher in Mathematics 30-1.
Antirequisite(s): Credit for Mathematics 213 and 211 will not be allowed.

Mathematics 249 3 units; H(4-1)
Introductory Calculus
Prerequisite(s): A grade of 70 per cent or higher in Mathematics 30-1. (Alternatives are presented in C. Mathematics Competency Equivalents in the Academic Regulations section of this Calendar).
Antirequisite(s): Not open to students with 50 per cent or higher in Mathematics 31 or a grade of "C" or higher in Mathematics 3 offered through University of Calgary Continuing Education, except with special departmental permission. Credit for Mathematics 249 and either 265 or 275 will not be allowed.

Mathematics 265 3 units; H(3-1)
University Calculus I
Limits, derivatives, and integrals; the calculus of exponential, logarithmic, trigonometric and inverse trigonometric functions. Applications including curve sketching, optimization, exponential growth and decay, Taylor polynomials. Fundamental theorem of calculus. Improper integrals. Introduction to partial differentiation.
Prerequisite(s): A grade of 70 per cent or higher in Mathematics 30-1; and a grade of 50 per cent or higher in Mathematics 31 or a grade of "C" or higher in Mathematics 3 offered through University of Calgary Continuing Education. (Alternatives to Mathematics 30-1 are presented in C. Mathematics Competency Equivalents in the Academic Regulations section of this Calendar).
Antirequisite(s): Credit for Mathematics 265 and either 249 or 275 will not be allowed.
Note: This course provides the basic techniques of differential calculus as motivated by various applications. Students performing sufficiently well in a placement test may be advised to transfer directly to Mathematics 267.

Mathematics 267 3 units; H(3-1)
University Calculus II
Sequences and series, techniques of integration, multiple integration, applications; parametric equations.
Prerequisite(s): One of Mathematics 249, 265 or 275.
Antirequisite(s): Credit for Mathematics 267 and 277 will not be allowed.

Mathematics 271 3 units; H(3-T-1)
Discrete Mathematics
Prerequisite(s): Mathematics 211 or 213.

Mathematics 273 3 units; H(3-T-1)
Numbers and Proofs
Introduction to proofs. Functions, sets and relations. The integers: Euclidean division algorithm and prime factorization; induction and recursion; integers mod n. Real numbers: sequences of real numbers; completeness of the real numbers; open and closed sets. Complex numbers.
Prerequisite(s): A grade of 80 per cent or higher in Mathematics 30-1. (Alternatives are presented in C. Mathematics Competency Equivalents in the Academic Regulations section of this Calendar).

Mathematics 275 3 units; H(3-T-1.5)
Calculus for Engineers and Scientists
Calculus of functions of one real variable; derivative and Riemann integral; Mean Value Theorem; the Fundamental Theorem of Calculus; techniques
of integration; Applications; Improper integrals; Power series, Taylor series.

**Prerequisite(s):** A grade of 70 per cent or higher in Mathematics 30-1; and credit in Mathematics 31 or Mathematics 3 offered through University of Calgary Continuing Education. Alternatively, admission to the Faculty of Engineering including credit in Mathematics 30-1; and Mathematics 31 or Mathematics 3 offered through University of Calgary Continuing Education.

**Antirequisite(s):** Credit for Mathematics 275 and either 249 or 265 will not be allowed.

**Mathematics 277** 3 units; H(3-1T-1.5)

*Multivariable Calculus for Engineers and Scientists*
Calculation of functions of several real variables; differentiation, implicit functions, double and triple integrals; applications; Vector-valued functions; derivatives and integrals; parametric curves.

**Prerequisite(s):** Mathematics 211 and 275.

**Antirequisite(s):** Credit for Mathematics 277 and 267 will not be allowed.

**Mathematics 307** 3 units; H(3-1T) (formerly Mathematics 421)

*Complex Analysis I*
Complex numbers and functions, differentiation, Cauchy-Riemann equations, line integration, Cauchy’s theorem and Cauchy’s integral formula. Taylor's theorem, the residue theorem, applications to computation of definite integrals.

**Prerequisite(s):** Mathematics 267.

**Antirequisite(s):** Credit for Mathematics 307 and 423 will not be allowed.

**Mathematics 311** 3 units; H(3-1T)

**Linear Methods II**
Vector spaces and subspaces. Linear independence, matrix representations of linear transformations, Gram-Schmidt orthogonalization.

**Prerequisite(s):** Mathematics 211 or 213.

**Antirequisite(s):** Credit for Mathematics 311 and 313 will not be allowed.

**Mathematics 313** 3 units; H(3-1T)

*Linear Algebra II*
Diagonalization, canonical forms, inner products, orthogonalization, spectral theory.

**Prerequisite(s):** Mathematics 213.

**Antirequisite(s):** Credit for Mathematics 311 and 313 will not be allowed.

**Mathematics 315** 3 units; H(3-1T)

*Algebra I*
Basic ring theory: rings and fields, the integers modulo n, Polynomial rings, polynomials over the integers and rationals, homomorphisms, ideals and quotients, principal ideal domains, adjoining the root of an irreducible polynomial; basic group theory: groups, examples including cyclic, symmetric, alternating and dihedral groups, subgroups, cosets and Lagrange’s theorem, normal subgroups and quotients, group homomorphisms, the isomorphism theorems, further topics as time permits, e.g., group actions, Cayley’s theorem.

**Prerequisite(s):** Mathematics 271 or 273.

**Antirequisite(s):** Credit for Mathematics 315 and Pure Mathematics 317 will not be allowed.

**Note:** (formerly Pure Mathematics 315)

**Mathematics 318** 3 units; H(3-0) (formerly Pure Mathematics 418)

*Introduction to Cryptography*
The basics of cryptography, with emphasis on attaining well-defined and practical notions of security. Symmetric and public-key cryptosystems; one-way and trapdoor functions; mechanisms for data integrity; digital signatures; key management; applications to the design of cryptographic systems. Assessment will primarily focus on mathematical theory and proof-oriented homework problems; additional application programming exercises will be available for extra credit.

**Prerequisite(s):** Mathematics 271 or 273.

**Antirequisite(s):** Credit for Mathematics 318 and any of Pure Mathematics 329, Computer Science 418, 429, or 557 will not be allowed.

**Mathematics 319** 3 units; H(3-1T) (formerly Pure Mathematics 319)

*Transformation Geometry*

**Prerequisite(s):** Mathematics 211 or 213; and one other 200-level course from the Field of Mathematicians.

**Mathematics 322** 3 units; H(3-0) (formerly Pure Mathematics 423)

*Differential Geometry*
Curvature, connections, parallel transport, Gauss-Bonnet theorem.

**Prerequisite(s):** Mathematics 271 or 273; Mathematics 367 or 377; Mathematics 375 or 376.

**Mathematics 325** 3 units; H(3-1T) (formerly Applied Mathematics 425)

*Introduction to Optimization*

**Prerequisite(s):** Mathematics 307 or 313; one of Mathematics 367, 377 or 331.

**Mathematics 327** 3 units; H(3-0) (formerly Pure Mathematics 427)

*Number Theory*
Divisibility and the Euclidean algorithm, modular arithmetic and congruences, quadratic reciprocity, arithmetic functions, distribution of primes.

**Prerequisite(s):** Mathematics 271 or 273.

**Mathematics 331** 3 units; H(3-1T)

*Advanced Calculus for the Natural Sciences*

**Prerequisite(s):** Mathematics 267 or 277; Mathematics 211 or 213.

**Antirequisite(s):** Credit for Mathematics 331 and either 367 or 377 will not be allowed.

**Note:** This course is not part of the Field of Mathematics.

**Mathematics 335** 3 units; H(3-1T)

**Analysis I**
Functions, countable and uncountable sets. The axioms and basic topology of the real numbers. Convergence of sequences, limits of functions, continuity and uniform continuity. Differentiability and the mean value theorem. The Riemann integral and the fundamental theorem of calculus. Series and convergence tests.

**Prerequisite(s):** Mathematics 267 or 277; Mathematics 271 or 273.

**Antirequisite(s):** Credit for Mathematics 335 and 355 will not be allowed.

**Mathematics 355** 3 units; H(3-1T)

*Enriched Analysis I*
Functions, countable and uncountable sets. The axioms and basic topology of the real numbers. Convergence of sequences, limits of functions, continuity and uniform continuity. Differentiability and the mean value theorem. The Riemann integral and the fundamental theorem of calculus. Series and convergence tests.

**Prerequisite(s):** Mathematics 267 or 277; Mathematics 271 or 273.

**Antirequisite(s):** Credit for Mathematics 355 and 357 will not be allowed.

**Mathematics 361** 3 units; H(3-1T) (formerly Mathematics 411)

**Linear Spaces with Applications**
Canonical forms. Inner product spaces, invariant subspaces and spectral theory. Quadratic forms.

**Prerequisite(s):** Mathematics 311 or a grade of “B+” or higher in Mathematics 213; Mathematics 267 or 277.

**Antirequisite(s):** Credit for Mathematics 361 and 313 will not be allowed.

**Mathematics 367** 3 units; H(3-1T)

**University Calculus III**
Functions of several variables; limits, continuity, differentiability, partial differentiation, applications including optimization and Lagrange multipliers. Vector functions, line integrals and surface integrals, Green’s theorem, Stokes’ theorem. Divergence theorem. Students will complete a project using a computer algebra system.

**Prerequisite(s):** Mathematics 267 or 277; Mathematics 211 or 213.

**Antirequisite(s):** Credit for Mathematics 367 and either 331 or 377 will not be allowed.

**Mathematics 371** 3 units; H(3-0) (formerly Pure Mathematics 471)

*Combinatorics and Graph Theory*
Counting techniques, generating functions, inclusion-exclusion, introduction to graph theory.

**Prerequisite(s):** Mathematics 271 or 273; and one of Mathematics 249, 265 or 275.
Courses of Instruction

Mathematics 375 3 units; H(3-1.5T)
**Differential Equations for Engineers and Scientists**
Definition, existence and uniqueness of solutions; first and higher order equations and applications; Homogeneous systems; Laplace transform; partial differential equations of mathematical physics.
Prerequisite(s): Mathematics 277 or both Mathematics 267 and 177.
Antirequisite(s): Credit for Mathematics 375 and either 376 or Applied Mathematics 311 will not be allowed.

Mathematics 376 3 units; H(3-1T)
(formerly Applied Mathematics 311)
**Differential Equations I**
Classification of ordinary differential equations, first and second order equations with applications, series solutions about regular points and singular points, special functions, Laplace transform.
Prerequisite(s): Mathematics 267 or 277.
Antirequisite(s): Credit for Mathematics 376 and 375 or Applied Mathematics 307 will not be allowed.

Mathematics 377 3 units; H(3-1.5T)
**Vector Calculus for Engineers and Scientists**
Review of calculus of functions of several variables. Vector fields, line integrals, independence of path, Green's theorem; Surface integrals, divergence theorem, Stokes' theorem; applications; curvilinear co-ordinates; Laplace, diffusion and wave equations in three dimensional space.
Prerequisite(s): Mathematics 375.
Antirequisite(s): Credit for Mathematics 377 and either 331 or 367 will not be allowed.

Mathematics 383 3 units; H(3-1T)
(formerly Applied Mathematics 481)
**Introduction to Mathematical Finance**
An introduction to the fundamental concepts of mathematical finance in an elementary setting. Topics include: risk, return, no arbitrage principle; basic financial derivatives: options, forwards and futures contracts, risk-free assets, time value of money, zero coupon bonds; risky assets, binomial tree model, fundamental theorem of asset pricing; portfolio management and capital asset pricing model; no arbitrage pricing of financial derivatives; hedging.
Prerequisite(s): Statistics 321.

Mathematics 391 3 units; H(3-1T)
(formerly Applied Mathematics 491)
**Numerical Analysis I**
Interpolation and approximation, numerical integration and differentiation, numerical methods for the solution of non-linear equations, systems of linear equations and the eigenvalue problem, introduction to a scientific computing software.
Prerequisite(s): Mathematics 211 or 213; Mathematics 267 or 277; and one of Computer Science 217, 231, 235 or Data Science 211.
Antirequisite(s): Credit for Mathematics 391 and Computer Science 491 will not be allowed.

Mathematics 401 3 units; H(3-0)
**Special Topics**
Higher level topics which can be repeated for credit.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT
### Courses of Instruction

#### Mathematics 501
3 units; H(3-0)

**Measure and Integration**
Abstract measure theory, basic integration theorems, Fubini’s theorem, Radon-Nikodym theorem, Lp Spaces, Riesz representation theorems.

**Prerequisite(s):** Mathematics 445 or 447; and 3 units of Mathematics in the Field of Mathematics at the 400 level or higher.

**Antirequisite(s):** Credit for Mathematics 501 and any one of Mathematics 601, Pure Mathematics 501 or 601 will not be allowed.

#### Mathematics 502
3 units; H(3-0)
(formerly Pure Mathematics 503)

**Topics in Mathematics**
Topics will be chosen according to the interests of instructors and students.

**Prerequisite(s):** Any two Mathematics courses in the Field of Mathematics at the 400 level or above.

**MAY BE REPEATED FOR CREDIT**

#### Mathematics 503
3 units; H(3-0)
(formerly Applied Mathematics 503)

**The Mathematics of Wavelets, Signal and Image Processing**
Continuous and discrete Fourier transforms, the Fast Fourier Transform, wavelet transforms, multi-resolution analysis and orthogonal wavelet bases, and applications.

**Prerequisite(s):** One of Mathematics 391, Applied Mathematics 491, Computer Science 491 or Geophysics 419; 6 units of Mathematics in the Field of Mathematics at the 400 level or above.

#### Mathematics 505
3 units; H(3-0)
(formerly Applied Mathematics 505)

**Calculus on Manifolds**
Integral and differential calculus on manifolds including tensor fields, covariant differentiation, Lie differentiation, differential forms, Frobenius’ theorem, Stokes’ theorem, flows of vector fields.

**Prerequisite(s):** Mathematics 445 or 447; and one of Mathematics 375, 376 or Applied Mathematics 311.

#### Mathematics 511
3 units; H(3-0)
(formerly Pure Mathematics 511)

**Algebra III**
Linear algebra: Modules, direct sums and free modules, tensor products, linear algebra over modules, finitely generated modules over PID’s, canonical forms, computing invariant factors from presentations; projective, injective and flat modules.

**Prerequisite(s):** One of Mathematics 313, 351, 411, 431 or Pure Mathematics 431; 3 units of Mathematics in the Field of Mathematics at the 400 level or higher.

**Antirequisite(s):** Credit for Mathematics 511 and either 507 or Pure Mathematics 611 will not be allowed.

#### Mathematics 515
3 units; H(3-0)
(formerly Pure Mathematics 415)

**Foundations**
Set theory, mathematical logic, and category theory. Topics covered will vary based on interests of students and instructor.

**Prerequisite(s):** Mathematics 431 or Pure Mathematics 431; 3 units of Mathematics from the Field of Mathematics at the 400 level or above.

#### Mathematics 516
3 units; H(1.5-3)

**Senior Project**
A capstone course intended for Mathematics students in the final year of study (excluding those in the honours program or the statistics concentration). Students will investigate scientific or social issues by applying mathematical methods acquired in previous mathematics courses. A final project will be submitted at the end of the term and its contents summarized in a presentation.

**Prerequisite(s):** 6 units in the Field of Mathematics at the 400 level or above.

**Antirequisite(s):** Credit for Mathematics 516 and 518 will not be allowed.

#### Mathematics 518
3 units; H(1.5-3)

**Honours Thesis**
A capstone course intended for Honours Mathematics students in their final year of study. Students will produce and present a substantial thesis under the supervision of faculty. The emphasis is on how to address theoretical or real world scientific or social issues by applying the various mathematical methods acquired in the earlier years in a unified and appropriate way.

**Prerequisite(s):** 6 units in the Field of Mathematics at the 400 level or above.

**Antirequisite(s):** Credit for Mathematics 518 and 516 will not be allowed.

**Note:** This course extends over the Fall and Winter Terms. Students will meet regularly with their thesis supervisors during the terms. Students submit a thesis, and the course culminates in a series of student presentations. A grade of "B" or higher is required for the Honours program. Students are advised to consult with the Undergraduate Director for information and advice before registration into the course. Students earning an Honours degree in Mathematics along with a concentration in Statistics must complete both Mathematics 518 and Statistics 517.

#### Mathematics 521
3 units; H(3-0)

**Complex Analysis II**

**Prerequisite(s):** One of Mathematics 307, 421 or 423; Mathematics 445 or 447; 3 units of Mathematics in the Field of Mathematics at the 400 level or above.

#### Mathematics 525
3 units; H(3-0)

**Introduction to Algebraic Topology**
An introduction to the algebraic invariants that distinguish topological spaces. Specifically, the course focuses on the fundamental group and its applications, and homology. Students will be introduced to the basics of homological algebra.

**Prerequisite(s):** Mathematics 431 or Pure Mathematics 445; Mathematics 445 or 447.

#### Mathematics 527
3 units; H(3-0)
(formerly Pure Mathematics 527)

**Computational Number Theory**
An investigation of major problems in computational number theory, with emphasis on practical techniques and their computational complexity. Topics include basic integer arithmetic algorithms, finite fields, primality proving, factoring methods, algorithms in algebraic number fields.

**Prerequisite(s):** Mathematics 431 or Pure Mathematics 431; Mathematics 429 or Pure Mathematics 429 or Mathematics 327 or Pure Mathematics 427.

**Antirequisite(s):** Credit for Mathematics 527 and either Pure Mathematics 527 or 643 will not be allowed.

#### Mathematics 545
3 units; H(3-0)

**Analysis III**
Sequences and series of functions; Lebesgue integration on the line, Fourier series and the Fourier transform, pointwise convergence theorems, distributions and generalized functions.

**Prerequisite(s):** Mathematics 445 or 447; 3 units of Mathematics in the Field of Mathematics at the 400 level or above.

**Antirequisite(s):** Credit for Mathematics 545 and 603 will not be allowed.

#### Mathematics 581
3 units; H(3-0)
(formerly Applied Mathematics 581)

**Stochastic Calculus for Finance**

**Prerequisite(s):** Mathematics 383 or Applied Mathematics 481; 6 units of Mathematics in the Field of Mathematics at the 400 level or above.

**Antirequisite(s):** Credit for Mathematics 581 and Applied Mathematics 681 will not be allowed.

#### Mathematics 583
3 units; H(3-0)
(formerly Applied Mathematics 583)

**Computational Finance**
Review of financial asset price and option valuation models; model calibration; tree-based methods; finite-difference methods; Monte Carlo simulation; Fourier methods.

**Prerequisite(s):** Mathematics 381 or Applied Mathematics 481; Mathematics 413 or Applied Mathematics 413; Mathematics 493 or Applied Mathematics 493.

**Antirequisite(s):** Credit for Mathematics 583 and Applied Mathematics 683 will not be allowed.

**Graduate Courses**
Note: Consent of the Department is a prerequisite for all Mathematics graduate courses.

#### Mathematics 600
1.5 units; Q(3S-0)

**Research Seminar**
A professional skills course, focusing on the development of technical proficiencies that are essential to succeed as practicing mathematicians in academia, government, or industry. The emphasis is on delivering professional presentations and using modern mathematical research tools. A high level of active student participation is required.

**MAY BE REPEATED FOR CREDIT**

**NOT INCLUDED IN GPA**
Courses of Instruction

Mathematics 601 3 units; H(3-0)

Measure and Integration
Abstract measure theory, basic integration theorems, Fubini’s theorem, Radon-Nikodym theorem, Lp spaces, Riesz representation theorem.

Antirequisite(s): Credit for Mathematics 601 and either Mathematics 501 or Pure Mathematics 501 will not be allowed.

Mathematics 603 3 units; H(3-0)

Analysis III
Sequences and series of functions; Lebesgue integration on the line, Fourier series and the Fourier transform, pointwise convergence theorems, distributions and generalized functions.

Antirequisite(s): Credit for Mathematics 603 and either Mathematics 545 or Pure Mathematics 545 will not be allowed.

Mathematics 605 3 units; H(3-0)

Differential Equations III

Antirequisite(s): Credit for Mathematics 605 and Applied Mathematics 605 will not be allowed.

Mathematics 607 3 units; H(3-0)

Algebra III
A sophisticated introduction to modules over rings, especially commutative rings with identity. Major topics include: snake lemma; free modules; tensor product; hom-tensor duality; finitely presented modules; invariant factors; free resolutions; and the classification of finitely generated modules over principal ideal domains. Adjunct functors play a large role. The course includes applications to linear algebra, including rational canonical form and Jordan canonical form.

Antirequisite(s): Credit for Mathematics 607 and any of Pure Mathematics 511, 607 or 611 will not be allowed.

Mathematics 617 3 units; H(3-0)

Functional Analysis
Introduction to Hilbert and Banach spaces, linear operators, weak topologies, and the operator spectrum.

Antirequisite(s): Credit for Mathematics 617 and Applied Mathematics 617 will not be allowed.

Mathematics 621 3 units; H(3-0)

Complex Analysis

Antirequisite(s): Credit for Mathematics 621 and 521 will not be allowed.

Mathematics 625 3 units; H(3-0)

Introduction to Algebraic Topology
Introduction to the algebraic invariants that distinguish topological spaces. Focuses on the fundamental group and its applications, and homology. Introduction to the basics of homological algebra.

Antirequisite(s): Credit for Mathematics 625 and either Mathematics 525 or Pure Mathematics 507 will not be allowed.

Mathematics 627 3 units; H(3-0)

Algebraic Geometry
The objective of this course is to provide an introduction to modern algebraic geometry sufficient to allow students to read research papers in their fields which use the language of schemes. Topics will include Spectra of rings; the Zariski topology; affine schemes; sheaves; ringed spaces; schemes; morphisms of finite type; arithmetic schemes; varieties; projective varieties; finite morphisms, unramified morphisms; etale morphisms.

Mathematics 631 3 units; H(3-0)

Discrete Mathematics
Discrete Geometry: Euclidean, spherical and hyperbolic n-spaces, trigonometry, isometries, convex sets, convex polytopes, (mixed) volume(s), classical discrete groups, tilings, isoperimetric inequalities, packings, coverings. Graph Theory: connectivity; trees; Euler trails and tours; Hamilton cycles and paths; matching; edge colourings; vertex colourings; homomorphisms; plane and planar graphs; extremal graph theory and Ramsey theory. 631.01. Discrete Geometry 631.03. Graph Theory

Mathematics 635 3 units; H(3-0)

Geometry of Numbers
The interplay of the group-theoretic notion of lattice and the geometric concept of convex set, the lattices representing periodicity, the convex sets geometry. Topics include convex bodies and lattice points, the critical determinant, the covering constant and the inhomogeneous determinant of a set, Star bodies, methods related to the above, and homogeneous and inhomogeneous forms.

Mathematics 637 3 units; H(3-0)

Infinite Combinatorics
An excursion into the infinite world, from Ramsey Theory on the natural numbers, to applications in Number Theory and Banach Spaces, introduction to tools in Model Theory and Logic, fascinating homogeneous structures such as the rationals and the Rado graph, and possibly further explorations into the larger infinite world.

Mathematics 641 3 units; H(3-0)

Number Theory
Algebraic Number Theory: an introduction to number fields, rings of integers, ideals, unique factorization, the different and the discriminant. The main objective to the course will be to prove the finiteness of the class number and Dirichlet’s Unit Theorem.

Analytic Number Theory: students will learn tools to aid in the study of the average behaviour of arithmetic functions, including the use of zeta functions, to prove results about the distribution of prime numbers.

641.01. Algebraic Number Theory 641.03. Analytic Number Theory

Mathematics 643 3 units; H(3-0)

Computational Number Theory
An investigation of major problems in computational number theory: integer factorization, primality proving, factoring methods, algorithms in algebraic number fields.

Mathematics 647 3 units; H(3-0)

Modular Forms
Modular forms and automorphic representations and their L-functions. Modularity Theorem from two perspectives. Classical Perspective on Modular Forms: introduction to modular curves as moduli spaces for elliptic curves and as differential forms on modular curves. A study of L-functions attached to modular forms and the modularity theorem.

An Introduction to Automorphic Representations: introduction to the Langlands Programme. A study of partial L-functions attached to automorphic representations and known instances of the Langlands Correspondence.

647.01. Classical Perspective on Modular Forms 647.03. An Introduction to Automorphic Representations

Mathematics 651 3 units; H(3-0)

(formerly Applied Mathematics 603)

Topics in Applied Mathematics
Topics will be chosen according to the interests of the instructors and students.

MAY BE REPEATED FOR CREDIT

Mathematics 653 3 units; H(3-0)

(formerly Pure Mathematics 603)

Topics in Pure Mathematics
Topics will be chosen according to the interest of the instructors and students.

MAY BE REPEATED FOR CREDIT

Mathematics 656 3 units; H(3-0)

Scientific Modelling and Computation I
The Convex Optimization: an introduction to modern convex optimization, including basics of convex analysis and duality, linear conic programming, robust optimization, and applications.

Scientific Computation: an introduction to both the methodological and the implementation components underlying the modern scientific computations with the natural emphasis on linear algebra, including modern computing architecture and its implications for the numerical algorithms.

Numerical Differential Equations: fundamentals of solving DEs numerically addressing the existence, stability and efficiency of such methods.

661.01. Convex Optimization 661.03. Scientific Computation 661.05. Numerical Differential Equations

Mathematics 663 3 units; H(3-0)

Applied Analysis
Interior Point Methods: exposes students to the modern IPM theory with some applications, to the extent that at the end of the course a student should be able to implement a basic IPM algorithm.

Theoretical Numerical Analysis: provides the theoretical underpinnings for the analysis of modern numerical methods, covering topics such as linear operators on normed spaces, approximation theory, non-linear equations in Banach spaces. Fourier analysis, Sobolev spaces and weak formulations of elliptic boundary value problems, with applications to finite difference, finite element and wavelet methods.

Differential Equations: essential ideas relating to the analysis of differential equations from a functional analysis point of view. General topics include Hilbert spaces and the Lax-Milgram’s theorem, variational formulation of boundary value prob-
Courses of Instruction

Mechanical Engineering 671 3 units; H(3-0)
Introduction to Quantum Information
Focus on the mathematical treatment of a broad range of topics in quantum Shannon theory. Topics include quantum states, quantum channels, quantum measurements, completely positive maps, Neumann's theorem, Stinespring dilation theorem, Choi-Jamiolkowski isomorphism, the theory of majorization and entanglement, the Peres-Horodecki criterion for separability, Shannon's noiseless and noisy channel coding theorems, Lieb's theorem and the strong subadditivity of the von Neumann entropy, Schumacher's quantum noiseless channel coding theorem, and the Holevo-Schumacher-Weinstein theorem.

Mathematics 669 3 units; H(3-0)
Scientific Modelling and Computation II
Wavelet Analysis: covers the design and implementation of wavelet methods for modern signal processing, particularly for one- and two-dimensional signals (audio and images).
Mathematical Biology: introduction to discrete models of mathematical biology, including difference equations, models of population dynamics and the like. Topics include stability of models described by difference equations, continuous spatially homogeneous processes and spatially distributed models.
669.01. Wavelet Analysis
669.03. Mathematical Biology

Mathematics 681 3 units; H(3-0)
(formerly Applied Mathematics 681)
Stochastic Calculus for Finance
Martingales in discrete and continuous time, risk-neutral valuations, discrete- and continuous-time (B,S)-security markets, the Cox-Ross-Rubinstein formula, Wiener and Poisson processes, Itô's formula, stochastic differential equations, Girsanov's theorem, the Black-Scholes and Merton formulas, stopping times and American options, stochastic interest rates and their derivatives, energy and commodity models and derivatives, value-at-risk and risk management.
Prerequisite(s): Applied Mathematics 481.
Antirequisite(s): Credit for Mathematics 681 and any of Mathematics 581, 681, or Applied Mathematics 681 will not be allowed.

Mathematics 683 3 units; H(3-0)
(formerly Applied Mathematics 683)
Computational Finance
Basic computational techniques required for expertise in quantitative finance. Topics include basic econometric techniques (model calibration), tree-based methods, finite-difference methods, Fourier methods, Monte Carlo simulation and quasi-Monte Carlo methods.
Prerequisite(s): Credit for Mathematics 683 and any one of Mathematics 583, Applied Mathematics 683, or Applied Mathematics 583 will not be allowed.

Mathematics 685 3 units; H(3-0)
Stochastic Processes
Stochastic processes are fundamental to the study of mathematical finance, but are also of vital importance in many other areas, from neuroscience to electrical engineering. Topics to be covered:

Antirequisite(s): Credit for Mathematics 685 and Statistics 761 will not be allowed.

Mathematics 691 3 units; H(3-0)
Advanced Mathematical Finance I
Topics include specific areas of mathematical finance and build on Mathematics 681.
Lévy Processes (LP): fundamental concepts associated with LP such as infinite divisibility, the Lévy-Khintchine formula, the Lévy-Itô decomposition, subordinators, LP as time-changed Brownian motions, and also dealing with semi-groups and generators of LP, the Ito formula for LP, the Girsanov theorem, stochastic differential equations driven by LP, the Feynman-Kac formula, applications of LP and numerical simulation of LP.
Credit Risk: corporate bond markets, modelling the bankruptcy risk of a firm, and understanding how corporate bonds are priced.
961.01. Lévy Processes
961.03. Credit Risk
Prerequisite(s): Mathematics 681.

Mathematics 693 3 units; H(3-0)
Advanced Mathematical Finance II
Topics include specific areas of mathematical finance and build on Mathematics 681 and 683.
693.01. Lévy Processes
693.03. Credit Risk
Prerequisite(s): Mathematics 681.

Mechanical Engineering 311
3 units; H(3-1.5T-3/2)
Mechanics of Deformable Solids I
Prerequisite(s): Engineering 102; and Mathematics 275 or Applied Mathematics 217.
Antirequisite(s): Credit for Mechanical Engineering 317 and Engineering 317 will not be allowed.

Mechanical Engineering 337 3 units; H(3-2)
Computing Tools for Engineering Design
Application of high-level software to the solution of design problems. Evaluation and validation of alternate solution approaches. Numeric and symbolic computation, visualization, data analysis, model-based analysis. Topics will be derived from real engineering problems.
Prerequisite(s): Engineering 233.

Mechanical Engineering 339 3 units; H(3-2)
Engineering Graphics and CAD
Prerequisite(s): Engineering 233.

Mechanical Engineering 341 3 units; H(3-1.5T-3/2)
Fundamentals of Fluid Mechanics
Basic principles of mechanics of fluids. Fluid statics: forces on surfaces, buoyancy, stability. Continuity, energy and momentum equations applied to control-volume analysis. Dimensional analysis and physical similarity. Introduction to external flows and flow through pipes. Applications to a variety of problems in mechanical engineering.
Prerequisite(s): Engineering 201 and 349; and one of Mathematics 277 or Applied Mathematics 219.

Mechanical Engineering 421 3 units; H(3-1T-3/2)
Materials I
Fundamentals of materials science with emphasis on the structure of materials and structure/property relationships: atomistic models; equilibrium phase diagrams; kinetics and non-equilibrium transformation diagrams; thermal-mechanical processing; microstructure formation and control; ductility mechanisms; material selection; and an introduction to fracture.
Prerequisite(s): Engineering 311.

Mechanical Engineering 461 3 units; H(3-1T-3/2)
Foundations of Mechatronics
Modelling analysis and design of dynamic systems, including mechanical, electrical, electro-mechanical, fluid, thermal, and mixed systems. Response of linear time-invariant systems to time and frequency outputs. Performance analysis and design to meet performance specifications Analy-
Courses of Instruction

Mechanical Engineering 471 3 units; H(3-2/2) Heat Transfer
Prerequisite(s): Engineering 311; and one of Mechanical Engineering 341 or Energy Engineering 480.

Mechanical Engineering 473 3 units; H(3-1T) Fundamentals of Kinematics and Dynamics of Machines
Prerequisite(s): Engineering 349.

Mechanical Engineering 479 3 units; H(3-1T-3/2) Mechanics of Deformable Solids II
Prerequisite(s): Mechanical Engineering 317 or Engineering 317.

Mechanical Engineering 485 3 units; H(3-2) Mechanical Engineering Thermodynamics
Review of fundamentals; thermodynamic properties; flow and non-flow processes; Carnot cycle; Rankine cycle including reheat and regeneration. Engine gas cycles including simple gas turbines; gas turbines with reheat, intercooling and heat exchange. Reciprocating air compressors and expanders. Applications of humidity considerations; heat-pump and refrigeration cycles and their performance criteria. Combustion processes, chemical equilibrium, dissociation.
Prerequisite(s): Engineering 311.

Mechanical Engineering 493 3 units; H(3-1T) Machine Component Design
Introduction to the principles of machine component design. Design for stiffness, strength, and endurance. Surface contacts, wear, and lubrication. Tolerances and fits. Design and selection of mechanical elements such as shafts, bolted joints, welded joints, hydrodynamic bearings, ball and roller bearings, gears, belts, brakes, clutches, and springs.
Prerequisite(s): Mechanical Engineering 317 or Engineering 317.

Mechanical Engineering 495 3 units; H(3-1T-3/2) Fluid Mechanics
Control volume methodology for multi-dimensional systems as applied to conservation principles (mass, linear and angular momentum); Navier-Stokes equations applied to pipe and boundary layer flows; basic principles of potential flow theory and aerodynamics and an introduction to compressible flow (convergent-divergent channels and normal shocks).
Prerequisite(s): Engineering 311 and Mechanical Engineering 341.

Mechanical Engineering 505 3 units; H(3-2/2) Robotics
Prerequisite(s): Mechanical Engineering 473 or Energy Engineering 460.

Mechanical Engineering 519 3 units; H(3-2) Special Topics in Mechanical Engineering
Advanced topics in Mechanical Engineering.
Prerequisite(s): Consent of the Department.

Mechanical Engineering 521 3 units; H(3-2/2) Materials II
Fundamentals and applications of materials science to engineering design: welding metallurgy; deformation and strength behaviour of real materials; failure analysis; fibre reinforced composites; fracture mechanics; fatigue; and creep.
Prerequisite(s): Mechanical Engineering 421.
Note: Completion of Mechanical Engineering 479 and 493 prior to this course will be of definite advantage.

Mechanical Engineering 538 6 units; F(1-4) Mechanical Engineering Design Methodology and Application
Preliminary and detailed engineering design of a product or system with the emphasis on the design process as it is associated with mechanical and manufacturing engineering. Topics include design methodology and general design principles for engineers, project management, decision making processes, reliability and robust design, embodiment, detailed drawing and product life cycle design. A team-based design project may be sponsored by industry or the Department. Also, an emphasis is given to project management and technical communication, including presentations to a committee from the Department and/or industry.
Prerequisite(s): Mechanical Engineering 421, 461, 471, 473, 479, 485, 493 and Manufacturing Engineering 417.
Note: Concurrent enrolment in Mechanical Engineering 538 and one or more of Internship 513.01, 513.02, 513.03, and 513.04 will not be allowed.

Mechanical Engineering 547 3 units; H(3-2) Finite Element Method
Prerequisite(s): Mechanical Engineering 479.

Mechanical Engineering 560 6 units; F(1-3) Mechatronics Design Laboratory
A hands-on laboratory experience in the design and analysis of microprocessor-controlled electro-mechanical components. Emphasis will be on laboratory projects in which teams of students will configure, design, and implement mechatronic systems. Laboratories cover topics such as aliasing, quantization, electronic feedback, power amplifiers, digital logic, encoder interfacing, and motor control leading to prototyping and design of commercially viable products. Lectures will cover comparative surveys, operational principles, and integrated design issues associated with the spectrum of mechanism, electronics, and control components.
Prerequisite(s): Mechanical Engineering 461.

Mechanical Engineering 583 3 units; H(3-2) Mechanical Systems in Buildings
Prerequisite(s): Mechanical Engineering 471; and one of Mechanical Engineering 485 or Energy Engineering 560.

Mechanical Engineering 585 3 units; H(3-1T-3/2) Control Systems
Modelling of physical systems; feedback control; stability; performance specification in the time and frequency domains; root locus plots; Proportional/Integral/Derivative (PID) control and dynamic compensation.
Prerequisite(s): Mechanical Engineering 461.

Mechanical Engineering 587 3 units; H(3-0) Continuum Mechanics
Kinematics of deformation, concept of stress, balance of mass, linear momentum, angular momentum and energy. Thermodynamics of continua. Constitutive equations for viscous fluids and nonlinear elastic solids.
Prerequisite(s): Mechanical Engineering 479 and 493.
Antirequisite(s): Credit for Mechanical Engineering 587 and Mechanical Engineering 519.09 will not be allowed.

Mechanical Engineering 595 3 units; H(3-1T-3/2) Gas Dynamics
Fundamentals of one-dimensional gas dynamics. Isentropic and non-isentropic flows, applications of dynamical similarity to shock waves. Oblique shocks, supersonic nozzles, flows with friction or heat transfer. Introduction to computational fluid dynamics (CFD).
Prerequisite(s): Mechanical Engineering 495.

Mechanical Engineering 597 3 units; H(3-1T-3/2) Turbomachinery
Performance of turbomachines, machine selection, Reynolds number and scale effects. Two-dimensional flow in turbomachines, degree of reaction and vector diagrams; flow irreversibilities and loss coefficients; pump, compressor and turbine efficiencies. Design of pumps, fans, centrifugal
Courses of Instruction

### Prerequisite(s): Mechanical Engineering 485 and 495.

**Mechanical Engineering 599** 3 units; H(3-2/2)

**Vibrations and Machine Dynamics**

**Prerequisite(s): Mechanical Engineering 473 or Energy Engineering 460.**

Courses of Instruction

**Mechanical Engineering 638** 3 units; H(3-0)

Failure and Fracture Mechanics in the Pipeline Industry
Covers the basic theory of failure and fracture mechanics in sufficient depth to allow its application to pipeline design, material requirements and integrity assessment. Overview of brittle and ductile fracture, fatigue and environmental processes, design basics, fracture mechanics theory, fracture mechanics testing, inspection issues, material issues, crack propagation and arrest, fitness for purpose methods, structural integrity assessment and material requirements.

**Antirequisite(s):** Credit for Mechanical Engineering 638 and 619.74 will not be allowed.

**Mechanical Engineering 639** 3 units; H(3-0)

**Numerical Methods for Computational Fluid Dynamics**

**Mechanical Engineering 640** 3 units; H(3-0)

**Stress Corrosion Cracking of Materials**
Fundamentals of stress corrosion cracking (SCC) of materials and the factors contributing to SCC from environmental, metallurgical and mechanical sources. Various testing techniques to study and/or evaluate SCC will also be discussed.

**Antirequisite(s):** Credit for Mechanical Engineering 640 and 619.90 will not be allowed.

**Mechanical Engineering 641** 3 units; H(3-0)

Advanced Control Systems
Introduction to multivariable systems; state space models; analysis of linear systems; stability; Cayley-Hamilton theorem; controllability and observability; state feedback control; pole placement designs; introduction to linear quadratic control and estimation; Kalman filtering; separation theorem and duality; performance specifications; controller reduction concepts; introduction to robust control.

**Mechanical Engineering 643** 3 units; H(3-0)

**Optimal and Adaptive Control**
Discrete time and sampled-data system models and properties; discrete time domain controller design principles; system identification using least-squares analysis; self-tuning control; indirect adaptive control; model reference adaptive control; sliding mode control in continuous and discrete time; optimal design of sliding mode controllers; sensitivity functions and their role in control theoretical performance specification; robust stability and robust performance objectives; Kharitonov stability.

**Mechanical Engineering 650** 3 units; H(3-0)

Mobile Robotics
Overview of unmanned vehicles, mobile robot locomotion systems, wheeled rovers, walking machines, mobile-manipulators, mobile robot sensors and actuators, simulation, modelling and analysis of mobile robot behavior, robot-environment interaction analysis, 3D navigation techniques and localization, mobile robot simulation tools.

**Prerequisite(s):** Mechanical Engineering 505.

**Mechanical Engineering 653** 3 units; H(3-0)

Advanced Continuum Mechanics
Review of linear algebra and tensor analysis; kinematics of the deformation; deformation and strain tensors; stress rates; balance equations and equations of motion; stress principle; stress power and conjugated stress-strain couples; stress rates; elements of Lagrangian and Hamiltonian Mechanics for discrete and continuum systems; thermo-mechanics and constitutive theory; isotropic and anisotropic hyperelasticity; composite materials.

**Mechanical Engineering 660** 6 units; F(0-3) (Mechanical Engineering 560)

**Mechatronics Design Laboratory**
A hands-on laboratory experience in the design and analysis of processor-controlled electro-mechanical components. Laboratory projects in which teams will configure, design, and implement mechatronic systems. Alasing, quantization, electronic feedback, power amplifiers, digital logic, encoder interfacing, and motor control leading to prototyping and design of commercially viable products. Lectures will cover comparative surveys, operational principles, and integrated design issues associated with mechanical, electrical and control components.

**Mechanical Engineering 663** 3 units; H(3-0) (Medical Science 663)(Kinesiology 663)

Advanced Muscle Mechanics and Physiology
A look at problems associated within muscle mechanics and contractility. Also the use of muscle mechanics as a scientific discipline to critically learn and evaluate the scientific process. Basic anatomy and physiology of muscle contraction including the cross-bridge theory, and the force-length, force-velocity and force-time relationships of actively and passively contracting muscles will also be covered.

**Prerequisite(s):** Consent of the Faculty.

**Mechanical Engineering 665** 3 units; H(3-0)

**Elements of Materials Engineering**
Covers a variety of material aspects and provides a fundamental understanding of Materials Science and Engineering. Emphasizes the understanding of advanced dislocation theory and its application in intrinsically disordered systems; design and performance of metals. Fundamentals of material strengthening mechanisms are covered. Practical aspects that are relevant to material uses and failures, such as environmental-induced cracking, creep, fatigue, strain aging and corrosion, are discussed. Typical surface analysis techniques for material characterization are introduced.

**Mechanical Engineering 667** 3 units; H(3-0)

Fracture Mechanics
Basic fracture theory, failure criteria, overview of fracture mechanics, brittle and ductile failure, crack tip parameters, geometric considerations, methods of analysis, fracture toughness and testing standards. Applications in design, fatigue subcritical crack growth, creep and impact.

**Mechanical Engineering 669** 3 units; H(3-0)

Fatigue of Materials

**Mechanical Engineering 683** 3 units; H(3-0)

Applications of 3D Rigid Body Mechanics in Biomechanics
Applications of 3D motion analysis and rigid body mechanics to musculoskeletal system locomotion, and movement. Experimental, theoretical and numerical methods for optical motion imaging, 3D analysis of joint kinematics and kinetics, joint angle representations, prediction of joint forces, data analysis and filtering, error propagation, inverse and forward dynamics approaches, and applications to clinical and orthopaedic engineering.

**Mechanical Engineering 685** 3 units; H(3-3) (Medical Science 685)

Biomechanics of Human Movement

**Prerequisite(s):** Consent of the Faculty.

**Antirequisite(s):** Credit for Mechanical Engineering 685 and either Medical Science 685 and Kinesiology 685 will not be allowed.

**Mechanical Engineering 698** 6 units; F(0-4)

Graduate Project
Individual project in the student’s area of specialization under the guidance of the student’s supervisor. A written proposal, one or more written progress reports, and a final written report are required. An oral presentation is required upon completion of the course. Open only to students in the MEng (courses only) program.

**Mechanical Engineering 708** 3 units; H(4-0)

Turbulence
Provides an overview of turbulence in incompressible flow of Newtonian fluids. Topics include: the nature of turbulence; classical methods of analysis (Reynolds-averaging, spectral representations); the concept of scales; a review of isotropic and homogeneous turbulence; the energy cascade and the role of vorticity in turbulence canonical flows: boundary layers, jets, wakes and mixing layers; modern views of turbulence including coherent motions and inter-scale energy transfer.

Note: Students are expected to be familiar with basic mathematical concepts including vector calculus, Gauss’ theorem, Cartesian tensor notation, and basic fluid mechanical concepts, such as wakes, boundary layers, and jets. Basic knowledge in continuum mechanics is an asset.

**Mechanical Engineering 713** 3 units; H(3S-0)

Research Seminar II
Students will develop written and oral communication skills required to disseminate their technical research results and to receive formative feedback on performance.

NOT INCLUDED IN GPA

Medical Graduate Education

MDGE
Courses of Instruction

Graduate Courses

Medical Graduate Education 601
1 unit (13 hours)

Clinical Trials
Review of clinical trials strategies and the regulations around them. An emphasis will be placed on regulatory obligations and current trends.
Prerequisite(s): Admission to the Master of Biomedical Technology program or consent of the program.

Medical Graduate Education 602
1 unit (13 hours)

Communication, Marketing and Sales
Introduction to effective strategies for communication to diverse audiences of investors, corporations and clients in the biomedical technology sector, plus consideration of optimal marketing and sales approaches with appropriate channel selection.
Prerequisite(s): Admission to the Master of Biomedical Technology program or consent of the program.

Medical Graduate Education 603
1 unit (13 hours)

Business Case Studies
Real life presentations by corporate executives with an emphasis on strategic planning at the highest level, with examples of successes, failures and works in progress. Critical evaluation of publicly traded biotechnology corporations.
Prerequisite(s): Admission to the Master of Biomedical Technology program or consent of the program.

Medical Graduate Education 604
1 unit (13 hours)

Business Integration
Integrating lessons learned in prior business modules and extrapolating to the corporate environment, plus business pitches.
Prerequisite(s): Admission to the Master of Biomedical Technology program or consent of the program.

Medical Graduate Education 605
1 unit (13 hours)

Regulatory Affairs
Coverage of the key regulations necessary for biopharmaceutical and medical device manufacturing, how to apply to the regulatory agencies and the consequences of non-compliance in regulatory affairs.
Prerequisite(s): Admission to the Master of Biomedical Technology program or consent of the program.

Medical Graduate Education 606
1 unit (13 hours)

Tumour Immunology and Immunotherapy
Introductory topics in tumour immunobiology and immunotherapy will be covered. Fundamental and translational topics including, tumour immunogenicity, tumour immune surveillance and editing, immune escape, active immunotherapy, passive immunotherapy, virotherapy and viral vaccines, therapies targeting immunosuppressive mechanisms, and personalized immunotherapy.
Prerequisite(s): Consent of the program.

Medical Graduate Education 623
1 unit (13 hours)

Cell Cycle Regulation in Cancer and Aging
The links between cancer and aging, the experimental definition of the cell cycle, major events in G0, G1, S, G2, M, drivers and regulators of the cell cycle including oncogenes and tumour suppressors, cyclins, CDKs, CDIs and links to the cell cycle through tumour suppressors will be covered. An overview of biological and replicative aging including recent developments regarding the role of epigenetic modifications in cancer and aging.
Prerequisite(s): Consent of the program.

Medical Graduate Education 624
1 unit (13 hours)

Epigenetics and Chromatin Dynamics
Fundamentals of eukaryotic chromatin assembly, dynamic chromatin regulation and post-translational modifications that comprise epigenetics. DNA methylation, histone post-translational modifications, histone variants, regulatory siRNA, nucleosome remodelling and higher-order chromatin organization. Cancer and disease-associated epigenetic alterations will be discussed in detail.
Prerequisite(s): Consent of the program.

Medical Graduate Education 625
1 unit (13 hours)

DNA Damage Signalling and Repair
DNA repair pathways, highlighting the cellular responses to ionizing radiation will be covered, including: base excision repair, mismatch repair, nucleotide excision repair, and DNA single strand and double strand break repair. The relationship of replication stress and telomere maintenance to genomic instability in a cancer context will be covered.
Prerequisite(s): Consent of the program.

Medical Graduate Education 626
1 unit (13 hours)

Cancer Cell Biology - Fundamentals and Current Topics
An advanced discussion-based format featuring analysis of the current literature in cancer cell biology with an emphasis on developmental systems. Background in cancer cell biology and signal transduction is essential. Topics include stem cells, cell polarity and migration, endocytosis and mitochondrial biogenesis, and are selected based on the student’s research project to enhance their learning experience.
Prerequisite(s): Consent of the program.

Medical Graduate Education 627
1 unit (13 hours)

Cancer Cell Invasion, Metastasis and Angiogenesis
Angiogenesis, cell invasion and metastasis will be discussed from molecular, cell biological and clinical perspectives. Methods of experimental modelling of metastatic behaviour and angiogenesis, as
well as their respective advantages and limitations will be discussed. There will be lab demonstration of available in vitro and in vivo invasion/metastasis/angiogenesis models.
Prerequisite(s): Consent of the program.

Medical Graduate Education 629 1 unit (13 hours)

Signal Transduction Pathways and Cancer
Fundamental principles of receptor-mediated and intracellular signalling pathways that have implications in cancer biology. Topics focus on receptor tyrosine kinases, serine/threonine kinase receptors and G-protein-coupled receptors.
Prerequisite(s): Consent of the program.

Medical Graduate Education 630 1 unit (13 hours)

Ethics of Data Analysis and Clinically-Oriented Research
Issues of scientific ethics as it relates to cancer research. Students learn how clinical trials involving human subjects and issues are designed to gain ethical approval, as well as issues surrounding genomic data analysis and use. The topics of unethical data manipulation, detecting falsified data, experimental replicates and typical cancer research assays will be covered.
Prerequisite(s): Consent of the program.

Medical Graduate Education 631 1 unit (13 hours)

Neural Development
Fundamental principles of central nervous system development. The course encompasses the first unit of Medical Science 619.01, which is a core course for all Neuroscience graduate students. It will cover basic principles of neural induction and neurogenesis, regionalization of the neural tube, neuronal migration, circuit formation (axons and dendrites), neurodevelopmental disorders, and model organisms.
Prerequisite(s): Consent of the program.

Medical Graduate Education 632 1 unit (13 hours)

Principles of Light Microscopy
Fundamentals of standard wide-field fluorescence microscopy as well as confocal and multiphoton techniques. Key concepts such as the optical light path, spatial resolution, and sampling will be emphasized. In addition, students will have the opportunity to assemble basic bright-field and fluorescence microscopes using optical “lego”.
Prerequisite(s): Consent of the program.

Medical Graduate Education 633 1 unit (13 hours)

Advanced Techniques in Optical Microscopy
Advanced techniques in optical microscopy covered through a combination of lectures and activities. Topics include total internal reflection (TIRF) microscopy, superresolution, light sheet techniques and other rapidly developing technologies. Also includes one or more selected topics in targeted illumination including fluorescence recovery after photo activation (FRAP).
Prerequisite(s): Medical Graduate Education 632 or consent of the program.

Medical Graduate Education 634 1 unit (13 hours)

Digital Imaging for Optical Microscopy
The concept of the digital image and its relevance to optical microscopy will be introduced. The workflow from image acquisition to image analysis and presentation of data for publication will be covered. Good practices and pitfalls will be emphasized at every step. Students will gain experience in image processing and analysis using the standard open source package FIJI.
Prerequisite(s): Medical Graduate Education 632 or consent of the program.

Medical Graduate Education 651 1 unit (13 hours)

Microbial Virulence Factors
Virulence factors used by microbial pathogens to cause disease. Topics include microbial adherence mechanisms, toxigenic infections, virulence factor secretion systems, microbial gene expression.
Prerequisite(s): Medical Science 611, Cellular, Molecular and Microbial Biology 431, or consent of the program.

Medical Graduate Education 652 1 unit (13 hours)

Microbial Interactions at Epithelial Surfaces
Strategies used by microbial pathogens to target mucosal surfaces, and their contribution to disease. Topics include microbial disruption of epithelial barrier function, interactions with the host microbiome, microbial adaptation to host defenses, and invasion and intracellular survival strategies.
Prerequisite(s): Medical Science 611, Cellular, Molecular and Microbial Biology 431, or consent of the program.

Medical Graduate Education 653 1 unit (13 hours)

Antimicrobials and Resistance
Mechanism of action of antimicrobials, and resistance genes. Topics will also include transmission of resistance and discovery of new antimicrobials.
Prerequisite(s): Medical Science 611, Cellular, Molecular and Microbial Biology 431, or consent of the program.

Medical Graduate Education 654 1 unit (13 hours)

Infection and Immunity
Interactions with microbial pathogens with the innate and adaptive immune systems. Topics include immune evasion, pathogen clearance, and vaccine development.
Prerequisite(s): Consent of the program.

Medical Graduate Education 655 1 unit (13 hours)

Autoimmunity and Immunodeficiency
Advanced course focusing on the cellular and molecular mechanisms of systemic and organ-specific autoimmunity, acquired immunodeficiencies including those in the context of organ transplantation, and immunomodulatory therapies.
Prerequisite(s): Consent of the program.

Medical Graduate Education 755 1 unit (13 hours)

Directed Studies
Lectures, seminars, term papers or training in theoretical and/or laboratory methods at the advanced level in the medical sciences.
Prerequisite(s): Consent of the program.

MAY BE REPEATED FOR CREDIT

Medical Graduate Education 799 1 unit (13 hours)

Topics in Medical Sciences
Prerequisite(s): Consent of the program.

MAY BE REPEATED FOR CREDIT

Medical Physics MDPH

Medical Physics 623 3 units; H(3-0)

Radiological Physics and Radiation Dosimetry
Photon and electron interactions, charged particle and radiation equilibrium, cavity theory, absolute and relative dosimetry, calibration protocols.
Prerequisite(s): Consent of the Department.

Medical Physics 625 3 units; H(3-0)

Radiation Oncology Physics
Clinical photon and electron beams, brachytherapy, treatment planning, radiation therapy devices, special techniques.
Prerequisite(s): Medical Physics 623 and consent of the Department.

Medical Physics 632 1.5 units; Q(0-1.5)

Clinical Rotation in Radiation Oncology Physics
Clinical observation of radiotherapy for cancer. Students observe the treatment process, including immobilization, CT simulation and radiotherapy treatment. Treatments observed include conventional radiotherapy, intensity modulated radiotherapy, total body irradiation, stereotactic radiosurgery, brachytherapy.
Prerequisite(s): Medical Physics 623 and consent of the Department.

NOT INCLUDED IN GPA

Medical Physics 633 3 units; H(1-3)

Radiation Oncology Physics Laboratory
Absorption dose determination, dose descriptors, photon beam modelling, quality control.
Prerequisite(s): Medical Physics 623 and consent of the Department.

Medical Physics 637 3 units; H(3-0)

Anatomy and Statistics for Medical Physicists
Anatomy, physiology, probability, statistical inference, hypothesis testing, regression models, clinical trials, survival analysis.
Prerequisite(s): Consent of the Department.

Medical Physics 638 3 units; H(3-0)

Imaging for Radiation Oncology Physics
An overview of the imaging modalities used for Radiation Oncology including: CT, MRI, planar X-ray,
Courses of Instruction 463

nuclear medicine and ultrasound. Course will cover basic physics, instrumentation and application.

Prerequisite(s): Consent of the Department.

Medical Physics 639 3 units; H(3-0)

Radiobiology and Radiation Safety for Medical Physicists
Cell kinetics, cell survival curves, radiation pathology, fractionation, radiation safety, shielding calculations.

Prerequisite(s): Consent of the Department.

Medical Physics 711 3 units; H(0-8)

Clinical Competency I
Consists of rotations through areas of clinical physics under the supervision of adjunct faculty. Objectives are set, in conjunction with the student, at the commencement of the three rotations comprising this course. Student performance is evaluated by the course mentors at the conclusion of each rotation and by a final oral examination.

Prerequisite(s): Consent of the Department.

Medical Physics 712 3 units; H(0-8)

Clinical Competency II
Consists of rotations through more complex areas of clinical physics under the supervision of adjunct faculty. Objectives are set, in conjunction with the student, at the commencement of the three rotations comprising this course. Student performance is evaluated by the course mentors at the conclusion of each rotation and by a final oral examination.

Prerequisite(s): Medical Physics 711 and consent of the Department.

Medical Physics 721 3 units; H(0-8)

Clinical Projects I
Includes completion of multiple clinical projects in the disciplines of external beam radiotherapy, stereotactic radiosurgery, brachytherapy, and treatment planning. These clinical projects aim to build the student’s understanding of implementing advanced technologies in a radiotherapy clinic. Projects have clearly defined objectives established by mutual agreement between the student and project supervisor. The project culminates in written reports and oral presentations.

Prerequisite(s): Consent of the Department.

Medical Physics 722 3 units; H(0-8)

Clinical Projects II
Includes completion of multiple clinical projects in the disciplines of external beam radiotherapy, stereotactic radiosurgery, brachytherapy, and treatment planning. These clinical projects aim to build the student’s understanding of implementing advanced technologies in a radiotherapy clinic. Projects have clearly defined objectives established by mutual agreement between the student and project supervisor. The project culminates in written reports and oral presentations.

Prerequisite(s): Medical Physics 721 and consent of the Department.

Medical Physics 731 3 units; H(2T-0)

Radiation Oncology Physics Tutorials
Requires the student to prepare written answers to pre-set questions published by the Canadian College of Physicists in Medicine as part of the certification process in Radiation Oncology Physics.

Prerequisite(s): Consent of the Department.

Medical Physics 741 3 units; H(1-4)

Treatment Planning
Designed to nurture knowledgeable and clinically competent treatment planning physicists. Develops background understanding of the mechanisms of dose calculation and radiation delivery. As well, site specific treatment planning is a focus to ensure students are ready to practice as clinically competent medical physicists. The practical component allows the resident to train under the direct supervision of physicists and dosimetrists.

Prerequisite(s): Consent of the Department.

Medical Science 203 3 units; H(3-2T)

Developing Health Research Literacy I
Students will be introduced to the interdisciplinary scope of health research through reading and writing assignments. Students will learn the basics of academic research enquiry and practice academic writing and presentation skills through individual and team assignments.

Prerequisite(s): Admission to the BHSc Honours program.

Medical Science 205 3 units; H(3-0)

Developing Health Research Literacy II
Students will develop their critical thinking skills and their ability to write logically, well-argued research papers. Students will learn the fundamentals of logical reasoning as well as how to analyze theoretical issues in science, medicine, and philosophy.

Prerequisite(s): Medical Science 203 and admission to the BHSc Honours program.

Medical Science 307 3 units; H(3-0)

Science, Philosophy and Society
A survey of underlying ideas concerning the objectives, methods, ambitions and responsibilities of the natural and social sciences.

Prerequisite(s): Second-year or higher in the BHSc Honours program or consent of the instructor.

Medical Science 308 6 units; F(6-0)

Interdisciplinary Research Approaches
An introduction to the questions, methods and research techniques used across the different majors of Biomedical Sciences, Bioinformatics and Health and Society. Sessions will support the development of a broad perspective on health issues and introduce students to the history and the rules governing the ethical conduct of science and research on humans.

Prerequisite(s): Medical Science 205 and admission to the BHSc Honours program.

Medical Science 321 3 units; H(3-0)

Introduction to Immunology
This introductory course is designed to expose students to the study of how the immune system encounters, recognizes, and responds to various infectious and pathogenic conditions. Emphasis will not solely focus on how components of the immune system interact with each other to generate an effective host response but also will be placed on how this immune response may be used to generate new therapies for human disease, how evolving and emerging pathogens interact with, and challenge the immune system, and how our knowledge of immunity has impacted society.

Prerequisite(s): Biochemistry 393.

Antirequisite(s): Medical Science 341 and Biology 311 will not be allowed.

Medical Science 341 3 units; H(3-2T)

Principles of Human Genetics
Introduction to principles in human genetics including Mendelian and chromosomal basis of inheritance, chromosomal abnormalities, pedigree analysis, mutations, and molecular, metabolic, population and clinical genetics. Studies of model organisms and genomics will be included as required. Incorporates problem-based learning to establish analytical skills in genetics.

Prerequisite(s): Biology 241 and 243 and enrolment in the BHSc Honours program or consent of the instructor.

Antirequisite(s): Credit for Medical Science 341 and Biology 311 will not be allowed.

Medical Science 347 3 units; H(0-4)

Independent Studies in Health Sciences
Guided work fostering independent thought, practical research and the completion of written reports for first- and second-year BHSc students. After consultation with a Departmental faculty member who will supervise the chosen problem, an approval form obtained from the BHSc Office must be signed by the Associate Dean (UMHE) before a student can be registered.

Prerequisite(s): First- or second-year standing and consent of the BHSc program.

Medical Science 401 3 units; H(3-0)

Bioinformatics
This introductory course will familiarize students with algorithms and computational techniques for bioinformatics applications. Topics to be covered include algorithm and search engines for the analysis of nucleic acid and protein sequences and structures; machine learning techniques for biological data analysis; systems biology approaches for computational modelling.

Prerequisite(s): 6 units (1.0 full-course equivalent) in Computer Science at the 300 level or Medical Science 341 and 351 or 6 units (1.0 full-course equivalent) in Biological Sciences at the 300 level or consent of the instructor.

</table>
Courses of Instruction

Medical Science 509 3 units; H(3-3)

Proteomics
An introductory course to familiarize students with techniques used for protein identification and proteome analysis, including one and two-dimensional gel electrophoresis, mass spectrometry and the databases and search engines used in the identification of expressed proteins.

Prerequisite(s): Biochemistry 443 and Medical Sciences 351 or Biology 331.

Medical Science 515 (Biology 515)

Cellular Mechanisms of Disease
The cellular and molecular mechanisms underlying basic human disease processes and how these can be influenced by lifestyle and environmental factors. The ways in which this knowledge can be used in the context of diagnosis of disease.

Prerequisite(s): Biochemistry 393 and one of Biology 331 or Medical Science 351.

Medical Science 517 3 units; H(3-1T)

Introduction to Biotechnology Business and Profession
An overview of the biotechnology sector from several perspectives: product development, regulatory, intellectual property, market analysis, and finance. This course will include two modules. The first is a series of lectures by faculty and local entrepreneurs to provide the necessary background for the assignments in the second module. The second module will include student-selected case studies and an analysis of a small biotechnology company.

Prerequisite(s): Medical Science 351 or consent of the instructor.

Medical Science 519 3 units; H(3-0)

Advanced Bioinformatics
Designed to develop student ability to perform bioinformatics analyses of datasets and develop their knowledge of the current literature. The course will emphasize careful study of recent methodologies for chromatim immunoprecipitation followed by sequencing (ChIP-seq) dataset analysis. The course will include lectures, literature review sessions and a self-directed bioinformatics research project.

Prerequisite(s): Medical Science 401 and at least one of Computer Science 217, 219, 231 or 233; or consent of the instructor.

Medical Science 521 3 units; H(3-3)

Human Anatomy
An inquiry-based exploration of clinically significant human anatomy. The course will follow a systems-based approach, and will make use of multiple learning formats. Each week, the instructor will lead classroom and laboratory sessions that explore an anatomical system from developmental, functional, and clinical perspectives.

Prerequisite(s): Fourth-year standing in the BHSc program or consent of the instructor.

Medical Science 528 6 units; F(0-6)

Independent Studies in Medical Science
Original and independent thought, practical research and the completion of written and oral reports. After consultation with a faculty member who will supervise the chosen problem, an approval form obtained from the BHSc Office must be signed by the Associate Dean (BHSc) before a student can be registered.

Prerequisite(s): Consent of the BHSc program.

Medical Science 535 3 units; H(3-0)

Psychosocial Oncology
Focuses on developing the understanding in health care practitioners of the central concepts related to caring for cancer patients and their families.

Prerequisite(s): Consent of the instructor.

Antirequisite(s): Consent of the instructor.

Medical Science 541 3 units; H(3-1T)

Advanced Genetics I
Historical papers will illustrate the foundations of modern genetic principles. Topics including the chromosomal theory of inheritance, the role of pairing and recombination for chromosomal disjunction during meiosis, cyto genetics, the nature of dominant mutations, genetic screens and genetics analysis of developmental pathways. Material covered is drawn from model organisms and humans.

Prerequisite(s): Medical Science 341 or Biology 311 or consent of the instructor.

Medical Science 543 3 units; H(3-0)

Advanced Genetics II
An advanced course in molecular genetic analysis. Topics will vary from year-to-year, but may include identification of the structure, transmission, mutation and molecular pathology of human genes, the use of experimental organisms (chick, fish, fly, mouse, worm) to model human genetic diseases, and molecular studies of human populations and evolution. The focus will be upon applied molecular genetics with recurring emphasis on the themes of relevance to issues in health and society.

Prerequisite(s): Medical Science 341 or Biology 311, and Medical Science 402 or consent of the instructor.

Note: Previous completion of Medical Science 541 is suggested but not required.

Medical Science 545 3 units; H(3-0)

Genomics
Examine the strategies and techniques, including massively parallel sequencing, used in genomic and genetic studies. Review how model systems and genome editing are used to establish the functional consequences of genomic variation. Students can expect to gain a comprehensive understanding and broad appreciation of the significance of genomic information in context of rare and common human diseases, and genome biology.

Prerequisite(s): Medical Science 408 or Cellular, Molecular and Microbial Biology 413 or consent of the instructor.

Medical Science 561 3 units; H(3-0)

(Cellular, Molecular and Microbial Biology 561)

Cancer Biology
Advances in methodology and in theoretical concepts have permitted continuing breakthroughs in our understanding of the organismal, cellular and molecular biology of cancer cells, and in the development of novel strategies for cancer prevention, diagnosis and treatment. These advances will be presented in a comprehensive overview of cancer including issues of demographics and incidence, causation and detection, origins and progression and therapeutic approaches. Emphasis will be placed on the cell and molecular biology of cancer and on the interaction of the cancer cell with the host organism.

Prerequisite(s): Biochemistry 443, Medical Science 351 or Biology 331, and Cellular, Molecular and Microbial Biology 411.

Medical Science 565 3 units; H(3-0)

(Cellular, Molecular and Microbial Biology 565)

Advanced Topics in Pathogenic Microbiology
Provides a fuller understanding of bacterial diseases using a systems approach and illustrating key paradigms via the consideration of specific pathogens. Topics include: strategies for bacteria surviving host immune responses, bacterial invasion strategies, opportunistic infections, disease Pathogenesis, and antibiotic resistance, challenges of dealing with emerging infections. Lectures, small group interactive sessions, specified readings.

Prerequisite(s): Cellular, Molecular and Microbial Biology 343 and 431.

Medical Science 567 3 units; H(3-0)

(Cellular, Molecular and Microbial Biology 567)

Advanced Topics in Immunology
New and emerging themes in immunology, with an emphasis on disease processes such as inflammation in the gut, kidney and lung. Topics include: innate immunity, the inflammasome, sterile inflammation, process and mechanism of immune cell recruitment in different tissues, T cell biology, B cell biology, regulatory immune cells, mucosal immunity, airways responses to virus, mechanisms of food allergies, inflammatory bowel disease. Lectures, small group interactive sessions, specified readings.

Prerequisite(s): Cellular, Molecular and Microbial Biology 527 or Medical Science 521.

Medical Science 569 3 units; H(3-1T)

Advanced Topics in Physiology
Designed for undergraduates with a general understanding of human physiology who wish to pursue advanced topics in a physiological system(s). The physiological system offered will vary from year-to-year and students should contact the instructor for more information prior to enrolling in the course. There will be a review and then build on basic physiological principles through a series of lectures and/or discussion groups. An examination of the specified area of physiology in depth by introducing students to research methodologies and pathological processes.

Prerequisite(s): Medical Science 404 or Zoology 465 or consent of the instructor.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Medical Science 603 3 units; H(3-1)

(Biology 603)

Biological of Laboratory Animals
Based on the Canadian Council of Animal Care Syllabus "Basic Principles of Laboratory Animal Science for Research Scientists." In addition to the study of common, research, farm and exotic animals, topics covered include ethical considerations, regulation and legislation, animal models, animal facilities and husbandry, hazard control, surgery, anaesthesiology, euthanasia and post-mortem examinations. Practical sessions will provide experience in handling and restraint of specific laboratory animals, injections, blood collection, anaesthesiology and surgery.

Prerequisite(s): Consent of the Faculty.

Note: Enrolment in this course is restricted to graduate students who will do research utilizing animals.
Medical Science 604 6 units; F(3-3)

**Integrative Human Physiology**

Physiology is the study of how living organisms function and encompasses the integration of processes from molecules to the whole-organism. Designed to provide the student with fundamental principles and concepts about the normal function of the major human organ systems. At the end of this course, the student should be well equipped to apply their acquired knowledge to solve complex physiological problems related to integrative human physiology.

**Prerequisite(s):** Consent of the Faculty.

Medical Science 605 3 units; H(3-0)

**Information Storage and Processing in Biological Systems**

Examination of complex biological systems; concepts and fundamentals of biological solutions to information storage and processing: modelling and computer simulation of biological systems; information storage in biological molecules; genetic networks; hierarchical organization of biological information processing in signal transduction, development, evolution, and ecology; biological control systems.

**Prerequisite(s):** Consent of the Faculty.

Medical Science 609 3 units; H(3-0)

**Gene Expression**

Genetic control and cellular basis of development. Topics include an introduction to the major genetic model organisms, the regulation of gene expression and pattern formation by developmental signals, and the cellular basis of cell signalling, cell and tissue polarity, and morphogenesis.

609.02. Genes and Development

**Prerequisite(s):** Consent of the program. A strong background in undergraduate genetics and developmental biology is recommended.

Medical Science 611 3 units; H(3-0)

(formerly Medical Science 612)

**Medical Microbiology**

The basic principles of medical microbiology and the pathogenesis of infectious disease and of clinically important microbial pathogens including bacteria, viruses, parasites and fungi. Recent concepts will be described and students will be expected to present and critically discuss research advances of their choosing from the current research literature.

**Prerequisite(s):** Cellular, Molecular and Microbiological Sciences 343 or consent of the Faculty.

Medical Science 613 3 units; H(3-0)

**Advanced Studies in Microbiology**

Specialized topics including basic principles of infection; spread, prevention and control of infectious diseases; mechanisms of and approaches to study bacterial pathogenesis; mechanism, methodology and modelling of gene expression.

613.01. Epidemiology of Infectious Diseases

613.05. Regulation of Gene Expression in Bacteria

**Prerequisite(s):** Medical Science 612 or Cellular, Molecular and Microbiological Biology 421 or 521 or consent of the Faculty.

Medical Science 619 3 units; H(4-2)

**Neurosciences**

Introductory neuroscience courses covering aspects of cellular, molecular, and systems physiological, neuroanatomy, and neurodevelopment.

619.01. Cellular, Molecular and Developmental Neurosciences

619.02. Systems Neuroscience and Neuropathology

**Prerequisite(s):** Must be registered in the Neuroscience Graduate Program. Consent of instructor(s) is required for all other students.

**Note:** Not open to undergraduate students.

Medical Science 620 3 units; H(3-0)

**Topics in Systems Physiology**

Designed for students undertaking research in physiology or related disciplines with only limited prior exposure to the discipline. Introduces and discusses fundamental and current issues in physiology ranging from the basic physiological systems through to translational clinical topics. Emphasizes the basic physiological mechanisms with emphasis on the role of the autonomic nervous system. Subject areas will include basic physiology of the cardiovascular, respiratory, gastrointestinal, renal, endocrine and reproductive systems.

**Prerequisite(s):** Consent of the Faculty.

Medical Science 621 3 units; H(3-0)

**Principles of Drug Action**

The action of chemicals and drugs on biological systems ranging from subcellular particles to the intact organism.

621.01. Basic Principles of Pharmacology

**Prerequisite(s):** Zoology 461, Medical Science 404 and Medical Science/Biology 501, or consent of the Faculty.

Medical Science 622 3 units; H(3S-0)

**Neurobiology of Mental Illness**

Students are exposed to up-to-date research regarding the neurobiological theories of various mental illnesses (such as depression, anxiety disorders, schizophrenia, etc.). The seminar format will involve discussion in both research and review articles. The focus of discussion will be on both preclinical research and clinical studies that shed insight into the neurobiology of mental illnesses or their treatments.

**Prerequisite(s):** Medical Science 619.02 and registration in a Cumming School of Medicine graduate program. Consent of instructor(s) is required for all other students.

**Note:** Open to Psychology graduate students and Psychiatry residents with consent of instructor.

Medical Science 623 3 units; H(3-1T)

**Respiratory Science and Critical Illness**

Respiratory physiology; including topics such as cellular, morphology, mechanics, control of breathing, and respiratory muscles, necessary to an understanding of respiration and respiratory failure. As well, core physiology and molecular biology underlying critical illness.

623.01. Pulmonary Mechanics and Gas Exchange

623.02. Physiology of Respiration and Critical Illness

623.03. Respiratory Science: Basic

623.04. Respiratory Science: Applied

**Prerequisite(s):** Zoology 463 or 465 or consent of the Faculty.

Medical Science 624 3 units; H(2-2)

(formerly Medical Science 751.42)

**Neuroanatomy**

Detailed introduction to neuroanatomy using Homo sapiens as the primary experimental species but relying on other vertebrates for additional details. Detailed anatomic aspects of each major brain region, along with major connections and functions related to those regions will be presented. Laboratories will examine gross specimens, virtual microscopic images, and other anatomic images.

**Prerequisite(s):** Medical Science 619.02 or consent of the instructor.

Medical Science 629 3 units; H(3-0)

**Cardiovascular Dynamics**

Includes topics such as basic physiologic mechanisms including excitation-contraction coupling, mechanics, energetics, and cardiovascular control; major diseases entities as a means of illustrating pathologic alterations in normal physiologic mechanisms; or a systematic in-depth examination of the chemicals that affect the cardiovascular system.

629.01. Cardiovascular Physiology

629.02. Cardiovascular Pathophysiology

629.03. Cardiovascular Pharmacology

**Prerequisite(s):** Consent of the Faculty.

Medical Science 631 3 units; H(3-0)

**Muscle Physiology**

Contractile processes, excitation-contraction coupling, the control of contraction and energetics in smooth, cardiac and skeletal muscle. Molecular studies of the contractile process and of the process of excitation contraction coupling.

**Prerequisite(s):** Consent of the Faculty.

Medical Science 633 3 units; H(3-0)

**The Kidney**

Advanced courses detailing the functional organization of the kidney at all levels, from cell to intact organism. Topics encompass basic physiological principles and their relevance to experimental medicine and therapeutics, as well as the study of disease processes, which impact kidney function.

633.01. Renal Physiology

633.02. Renal Pathophysiology

633.03. History of Renal Physiology

**Prerequisite(s):** Medical Science 604 or consent of the Faculty.

Medical Science 635 3 units; H(3-0)

**Psychosocial Oncology**

A seminar-based course focusing on the possible causes of psychosocial problems in cancer patients and families (medical, psychological and social) and also on how patients and families are helped through the difficult transitions resulting from a cancer diagnosis, treatment, recurrent disease, and end of life care.

**Prerequisite(s):** Consent of the Faculty.

**Antirequisite(s):** Credit for Medical Science 635 and 535 will not be allowed.

**Note:** This course is open to health professionals and researchers, and to advanced undergraduate students in relevant disciplines.

Medical Science 636 3 units; H(3-1T)

**Advanced Topics in Physiology**

Provides a general understanding in physiological systems and will present advanced topics in specified physiological system(s) for further depth of understanding. Review and build on basic
physiological principles through a series of lectures and discussion groups and will examine a specified area of physiology in-depth by introducing students to research methodology and pathological processes in the system.

**Prerequisite(s):** Medical Science 404 or Zoology 463 or consent of the instructor.

**Antirequisite(s):** Credit for Medical Science 569 and Medical Science 636 will not be allowed.

### Medical Science 637 3 units; H(3-0)

**Gastrointestinal Physiology**  
Physiology of the gastrointestinal (GI) tract at all levels from the cell to the intact system. Medical Science 637.01 has three components: 1) An introductory series of lectures covering the basic physiological principles of the regulation of the GI tract and the individual organs that comprise it or are associated with it; 2) Extended directed tutorials conducted online through D2L. Topics will be selected to reflect the needs and interests of the enrolled students; 3) A written term paper on a subject of the students’ own choice and pre-approved by the course co-ordinator that will also be presented orally to the class.

**Prerequisite(s):** Consent of the faculty.

### Medical Science 638 3 units; H(4-0)

**Mucosal Pathophysiology**  
Focuses on the physiology and pathophysiology of the gastrointestinal tract, lung and other mucosal tissues. A particular emphasis will be placed on inflammatory processes in these tissues, and how they contribute to symptom generation and tissue dysfunction. Involves independent research on the part of the students, small group sessions, written assignments and class presentations.

**Prerequisite(s):** Consent of the faculty.

### Medical Science 639 3 units; H(3-0)

**Immunology**  
Introductory and advanced courses in immunology that cover humoral and cellular immunity and the inflammatory response at the cellular, molecular, and whole organism level. Basic mechanisms that lead to immunity or to inflammatory responses. The contribution of immunological and inflammatory processes in the immunopathogenesis of disease.

**Prerequisite(s):** Consent of the faculty.

### Medical Science 640 3 units; H(3-1T)

**Introduction to Immunology**  
Introductory immunology for graduate students who have no background in immunology in their undergraduate studies. It provides a comprehensive overview of the immune responses: antibodies, antigen interaction, antibody structure, genetics and synthesis, cellular immunology, MHC, phagocytosis, and tolerance. Using this basic understanding of fundamental immune processes the involvement of the immune response in autoimmune, hypersensitivity, tissue rejection, tumor immunology, vaccine production, viral, bacterial, fungal and parasitic infections will be discussed. Additionally, methods for the study of immunology will be covered.

**Prerequisite(s):** Consent of the faculty.

**Antirequisite(s):** Credit for Medical Science 640 and Cellular, Molecular and Microbial Biology 527 will not be allowed.

**Note:** This course will share lectures with Cellular, Molecular and Microbial Biology 527 with an additional separate tutorial.

### Medical Science 641 3 units; H(3-0)

**Genetics**  
Advanced courses that provide in-depth coverage of the research discipline of genetics, including the areas of cytogenetics, genomics, metabolic genetics, mouse genetics, population genetics, and human and medical genetics.

641.01. Advanced Genetics I  
641.02. Advanced Human Cytogenetics  
641.03. Advanced Genetics II  
641.04. Genomics

**Prerequisite(s):** Consent of the instructor.

### Medical Science 663 3 units; H(3-0)

**Kinesiology 663 (Mechanical Engineering 663)**  
**Advanced Muscle Mechanics and Physiology**  
A look at problems associated within muscle mechanics and contractility. Also the use of muscle mechanics as a scientific discipline to critically learn and evaluate the scientific process. Basic anatomy and physiology of muscle contraction including the cross-bridge theory, and the force-length, force-velocity and force-time relationships of actively and passively contracting muscles will also be covered.

**Prerequisite(s):** Consent of the faculty.

### Medical Science 670 6 units; F(0-6)

**Practicum in Biomedical Technology**  
A six unit (full) course carried out in an academic or industrial setting for a period of at least twelve weeks. Students have an opportunity to apply the principles and methods of investigation learned during the Master of Biomedical Technology program and carry out related research. Practicum projects can be focused on any of the following aspects of the commercialization process: patent filing, research and development, business development, manufacturing to clinical trials, marketing and sales.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program.

**Note:** Completion of all other course requirements in Master of Biomedical Technology program is normally required prior to registration for this course. Exceptions must be approved by the Graduate Director.

### Medical Science 671 3 units; H(0-6)

**Techniques in Medical Science**  
Introduction to the theory of operation of electronic devices commonly used in biomedical studies including principles of amplifiers and filters, micro- and patch electrode techniques and computer-laboratory interfacing.

**Prerequisite(s):** Consent of the faculty.

**May be repeated for credit**

### Medical Science 673 3 units; H(3S-0)

**Careers in Biotechnology**  
A series of talks and workshops designed to provide students with practical knowledge of the biotechnology industry. In collaboration with the University of Calgary Career Services, the course covers personal and professional development planning, resume writing, networking, negotiation and interviewing skills and job search strategies specifically for the biotechnology field. This course runs during the fall and winter block weeks with additional retreat days throughout the year.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of instructor(s) is required for all other students.

**Note:** Admission to the Master of Biomedical Technology program is normally required for enrollment in this course.

**Not included in GPA**

### Medical Science 674 6 units; F(3-0)

**Integrated Systems Course**  
The principles of molecular and cellular biology, pathology, physiology, pharmacology, microbiology and immunology as applied to new diagnostics, vaccines or therapeutics. Lectures in the two courses are in parallel and fully integrated. Both courses are required components of the MBT program. The goal of the course, with emphasis on cellular and molecular mechanisms in health and disease, is to provide students with the skills to interface with individuals in these disciplines in the biotechnology industry. Complemented by special lectures that provide industry perspectives in these disciplines.

674.01. Physiological and Pharmacological Aspects of Therapeutics Development  
674.02. Molecular Cell Biology of Diagnostic and Vaccine Development

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of instructor(s) is required for all other students.

### Medical Science 675 3 units; H(2-3T)

**Bioinformatics Resources for the Biologist**  
Intended for biologists who wish to improve their bioinformatics analysis capabilities by learning just a small amount of query and programming syntax. The focus is on practicality rather than programming theory. The course explores how to use existing tools (on the command-line and on the Web) to gather and process large datasets all at once, rather than doing many individual analyses manually.

**Note:** No prior programming experience is required.

### Medical Science 676 3 units; H(2.5-1)

**Scripting and Database Querying for Molecular Biologists**  
Intended for biologists who wish to improve their bioinformatics analysis capabilities by learning just a small amount of query and programming syntax. The focus is on practicality rather than programming theory. The course explores how to use existing tools (on the command-line and on the Web) to gather and process large datasets all at once, rather than doing many individual analyses manually.

**Note:** No prior programming experience is required.

### Medical Science 677 3 units; H(1-6)

**Directed Study in Biomedical Technology**  
Lectures, seminars, term papers or training in theoretical and/or laboratory methods at the advanced level in biomedical technology or medical sciences.

**Prerequisite(s):** Consent of both the faculty member who will supervise and the MBT faculty member who will co-supervise the chosen study and must be registered in the Master of Biomedical Technology program.

**May be repeated for credit**
### Courses of Instruction

**Medical Science 678** 3 units; H(1-3T-6)

**Project in Biomedical Technology**

Students will conduct both business and laboratory-based projects throughout the year. The business-based aspect will include running a business, doing market research for companies or working with their business mentor. The laboratory-based aspect will include new diagnostics development and validation. This course will cover basic principles of project management as well as biotech lab theory and practical aspects covered via tutorials, journal club and laboratory sessions. There will be a combination of monthly meetings, lectures, lab tutorials, commercial technology reviews, tours, demos, and practical labs.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of instructor(s) is required for all other students.

**Medical Science 679** 3 units; H(2-2)

**Fundamentals of Bioinformatics**

Fundamental techniques and current research in bioinformatics are explored. Topics covered will include large-scale programmatic data access via data-marts and genome browsers, visualization, statistical techniques, and analysis of sequence and omics datasets.

**Prerequisite(s):** Registration in the Bioinformatics specialization of the Biochemistry and Molecular Biology graduate program or consent of the instructor.

**Note:** This course assumes some computational background including programming or scripting ability.

**Medical Science 685** 3 units; H(3-3)

**Biomechanics of Human Movement**

**Prerequisite(s):** Consent of the Faculty.

**Antirequisite(s):** Credit for more than one of Medical Science 685, Mechanical Engineering 685 and Kinesiology 685 is not allowed.

**Medical Science 689** 3 units; H(3-0)

**Medical Imaging**

Introduction to the theory and practical applications of medical imaging. Specific courses focus on an overview of modern diagnostic imaging techniques (689.01), as well as advanced study of specific techniques including magnetic resonance imaging (689.02) and medical image processing (689.03), and molecular imaging (689.04).

689.01. Medical Imaging Techniques

689.02. Advanced Magnetic Resonance Imaging

689.03. Advanced Medical Image Processing

689.04. Advanced Molecular Imaging

689.10. Medical Imaging Theory

689.11. Medical Imaging Applications

689.99. Medical Imaging Project

**Prerequisite(s):** Consent of the Faculty.

**Note:** Medical Science 689.01 is the core course and should be taken prior to taking any of the advanced Medical Science 689 courses. Courses are open to students registered in the Medical Imaging specialization, other interested graduate students in the fields of medicine, engineering, and science and to appropriately prepared undergraduate students enrolled in computer engineering, electrical engineering, and physics.

**Medical Science 701** 3 units; H(3-0)

**Advanced Topics in Reproductive Health**

A series of topics, ranging from basic sciences to clinical topics (including ethical issues) to increase awareness and comprehension regarding current issues in reproductive health.

**Prerequisite(s):** Consent of course co-ordinator and student’s supervisor, if applicable.

**Note:** Interest in reproductive health/reproductive biology is essential.

**Medical Science 703** 3 units; H(2-6)

**Human Anatomy: Concepts, Exploration and Teaching**

Introductory course for graduate students with an interest in mammalian morphology to human cadaver dissection, human anatomy concepts and teaching strategies within the medical professional curriculum. Weekly lectures and discussions supplement a cadaver dissection-based course intended for students interested in pursuing an academic career in medically related fields.

**Prerequisite(s):** Should have some previous experience with dissection. Consent of the instructors.

**Medical Science 706** 3 units; H(3-0)

**Theory and Practice of Family Therapy**

Overview of different family therapy approaches focusing on systemic assessment and systemic intervention through therapeutic interviewing. The development of student knowledge and skills in family therapy utilizing social constructionist, narrative, systemic, collaborative, and pro-feminist ideas while fostering the professional identity of the therapist.

706.01. Theory and Practice of Family Therapy I: Systemic Approaches

706.02. Theory and Practice of Family Therapy II: Post-modern Approaches

**Prerequisite(s):** Must be registered in the Cumming School of Medicine graduate programs. All others will require consent of the instructor.

**Medical Science 707** 3 units; H(2S-12)

**Family Therapy Practicum**

The development of conceptual and experiential expertise in working therapeutically with families.

707.01. Family Therapy I

707.02. Family Therapy II

**Prerequisite(s):** Consent of the Faculty.

**NOT INCLUDED IN GPA**

**Medical Science 708** 3 units; H(3-0)

**Theory and Practice of Interprofessional Psychosocial Oncology**

Provides graduate students with a multidisciplinary introduction to the field of psychosocial oncology. Emphasis will be placed on understanding and interpreting the experience of cancer informed by theory, evidence and illness narratives. Case-based learning in small interprofessional groups will allow students to explore a variety of key learning themes relevant to psychosocial oncology including distress assessment, depression, anxiety, adjustment and coping, sexuality, loss and grief. Attention to diversity will be integrated throughout the course.

**Prerequisite(s):** Consent of the instructor.

**Note:** Must have an undergraduate degree in a relevant domain (including, but not limited to medicine, psychology, nursing, social work, spiritual care/theology). This is an online course.

**Medical Science 710** 3 units; H(3-0)

**Business and Careers in Biotechnology**

An overview of the biotechnology sector from several perspectives: product development, regulatory, intellectual property, market analysis and finance. This course will include series of lectures and discussions to provide both the necessary background about the biotechnology industry and an understanding of careers in the biotechnology industry.

**Prerequisite(s):** Must be a registered graduate student in a thesis-based Masters or Doctoral program.

**Medical Science 713** 3 units; H(0-3T)

**Topics in Mountain Medicine and High Altitude Physiology**

A tutorial-based course focused on high altitude medicine and physiology. The aim of the course is to introduce the students to the physiological adaptations of, and pathophysiology associated with, the hypoxia of altitude. Students will be introduced to several diseases associated with the hypoxia of high altitude (i.e., Acute Mountain Sickness; High Altitude Pulmonary Edema, High Altitude Cerebral Edema), and the pathophysiology underlying these diseases.

**Prerequisite(s):** Consent of the instructor.

**Medical Science 721** 3 units; H(3-0)

**Biochemistry and Molecular Biology**

Discussions and presentations in a small group format will highlight historical and recent developments in analysis of eukaryotic genomes and control of gene expression, chromosome structure, translation, protein structure, proteomics, regulatory networks and related technologies and their applications to the study of human diseases. Additional learning objectives relate to the critical assessment of published literature as well as the development of research proposal writing and presentation skills.

**Prerequisite(s):** Must be registered in the Biochemistry and Molecular Biology Graduate Program. Consent of the instructor is required for all other students.

**Medical Science 722** 3 units; H(4-0)

**The Blood Vessel**

Modular course offering advanced knowledge at the cellular, molecular, and whole organism levels including the hormonal regulation of the vascular system, the interaction between endothelium and smooth muscle in the blood vessel, the molecular mechanisms underlying smooth muscle contraction and relaxation, differentiation and dedifferentiation, and the pathogenesis of vascular diseases including hypertension and atherosclerosis. Drug treatments for vascular diseases and their molecular mechanisms will also be covered.

722.01. Vascular Biology

722.02. Vascular Pharmacology

**Prerequisite(s):** Open to graduate students registered in the Cumming School of Medicine graduate programs. All other students require consent of instructor.

**Antirequisite(s):** Credit for Medical Science 722.01 and 722.02 will not be allowed.

**Medical Science 740** 6 units; F(3T-0)

**Smooth Muscle Structure Function**

An inquiry-based approach used to provide students with a broad background for the study of smooth muscle and to introduce students to...
current trends in the field. Students will also be introduced to the spectrum of research on smooth muscle ongoing at the University of Calgary. The subjects to be included range from the molecular biology and biochemistry of individual proteins to the function and regulation of integrated smooth muscle systems. A number of methodological approaches that are being used for the study of smooth muscle will also be discussed.

Prerequisite(s): Consent of the instructor.

Medical Science 744 6 units; F(3-0)

Human Pathology
The principles of basic pathology, including cellular responses to injury, inflammation, tissue reaction, hemodynamic, basic genetics, and neoplasia are taught through a series of interactive lectures and seminars which are applied to examine the human system and the diseases that affect it.

Prerequisite(s): Must be registered in the Pathologists’ Assistant Master’s graduate program or the Pathologists’ Assistant specialization of the Medical Science graduate program. Consent of instructor is required for all other students.

Medical Science 745 3 units; H(3-0)

Human Histology
Normal histology of the human body and how it relates to the pathological mechanisms of function and disease will be discussed and presented in small group format.

Prerequisite(s): Must be registered in the Pathologists’ Assistant Master’s graduate program or the Pathologists’ Assistant specialization of the Medical Science graduate program. Consent of instructor is required for all other students.

Medical Science 746 3 units; H(3-0)

Integrated Pathologists’ Assistant Skills
A series of discussions and workshops to solidify the knowledge gained throughout the Pathologists’ Assistant Master’s program that will provide practical knowledge of the Pathologists’ Assistant profession, in particular focusing on laboratory management skills, quality control and quality assurance, and the legal and accreditation requirements for medical laboratories.

Prerequisite(s): Must be registered in the Pathologists’ Assistant Master’s graduate program. Consent of instructor is required for all other students.

Medical Science 747 3 units; H(0-3)

Pediatric Pathology Practicum
Practical training in the technical skills of grossing a surgical specimen from the pediatric population in a safe and appropriate manner. Secondary goals include skill development in quality management, ancillary techniques, frozen section cutting, and medical photography.

Prerequisite(s): Must be registered in the Pathologists’ Assistant Master’s graduate program or the Pathologists’ Assistant specialization of the Medical Science graduate program. Consent of instructor is required for all other students.

Medical Science 748 3 units; H(0-3)

Surgical Pathology Practicum
The primary goal is the technical skills of grossing a surgical specimen in a safe and appropriate manner. Secondary goals include skill development in quality management, ancillary techniques, frozen section cutting, and medical photography.

Prerequisite(s): Must be registered in the Pathologists’ Assistant Master’s graduate program or the Pathologists’ Assistant specialization of the Medical Science graduate program. Consent of instructor is required for all other students.

Medical Science 749 3 units; H(0-3)

Autopsy Pathology Practicum
Hands on rotation that will train students how to perform autopsies under the supervision of a pathologist. Knowledge from anatomy, physiology, histology, and human pathology will be incorporated in the training.

Prerequisite(s): Must be registered in the Pathologists’ Assistant Master’s graduate program or the Pathologists’ Assistant specialization of the Medical Science graduate program. Consent of instructor is required for all other students.

Pathologists’ Assistant Research Project
Guided work with practical research, encouraging independent thought and collaboration with pathologists and clinical colleagues. Requires completion of written reports and oral presentation on research performed.

Medical Science 750 3 units; H(0-4)

Note: Students are required to take both Medical Science 749.01 and Medical Science 749.02.

Medical Science 751 3 units; H(3-0)

Topics in Medical Science
751.07. The Physiological Development of the Fetus and Newborn
751.09. Ion Channel Diseases
751.31. Joint Injury and Disease Biomechanical Focus
751.43. Orientation and Clinical Rotations for Pathologists’ Assistants

Prerequisite(s): Consent of the Faculty.

Medical Science 755 3 units; H(1-6)

Directed Study
Lectures, seminars, term papers or training in theoretical and/or laboratory methods at the advanced level in the medical sciences.

Prerequisite(s): Consent of the Faculty.

Note: Submission of application is required to set up directed study topic. Forms available from the Graduate Science Education Office in the Cumming School of Medicine.

MAY BE REPEATED FOR CREDIT

Medicine MDCN

Instruction offered by members of the Cumming School of Medicine.

First Year Courses

Medicine 320 (172 hours)

Medical Skills
The medical skills required by students learning to optimize the physical, mental, emotional, and social well-being of patients (and self). Components include Communication, Physical Examination, Collaborative Practice, Clinical Correlations, Ethics, Global Health, Well Physician, and Procedural Skills.

NOT INCLUDED IN GPA

Medicine 330 (24 hours)

Family Medicine Clinical Experience
Provides experience for early exposure to the discipline of Family Medicine and provide a real patient clinical learning environment that students can practice their expanding patient assessment skills and enable them to integrate their accumulating knowledge. Students are matched with a Family Medicine Physician in a community, continuity of care urban or rural practice. All students attend orientation to FMCE prior to the clinical placement. Specific learning objectives relate to the practice of Family Medicine, how to document the patient encounter in an accurate SOAP note format and include specific clinical presentations that link with other concurrent courses.

NOT INCLUDED IN GPA

Medicine 340 (76 hours)

Population Health
Students will learn about concepts of health and disease as they apply to populations, communities and individual patients. The determinants of health and the distribution of disease within and between populations will be explored. The roles of health promotion, health protection and disease prevention will be presented. Students will learn about the evolution and function of the Canadian health-care system in the context of current and historic challenges and international alternatives. Basic epidemiology and biostatistics as they apply to the core concepts of the course will be covered. Community experience with individuals and social/medical agencies is a core part of this course.

NOT INCLUDED IN GPA

Medicine 350 (256 hours)

Introduction to Medicine, Blood and Gastrointestinal Course
Integrated clinical presentations related to the blood and gastro-intestinal systems. Students will learn how to diagnose, investigate and manage patients presenting with such clinical presentations as fever, anemia, bruising and bleeding, weight loss, difficulty swallowing, abdominal pain, jaundice, diarrhea, etc. General principles of medicine as a whole will be presented, including concepts of history and physical examination taking, as well as principles of investigations such as test sensitivity, specificity, positive and negative predictive value. This course will also introduce fundamental concepts of anatomy, histology, pathology and radiology. An approach to problems in infectious
Courses of Instruction

diseases and information regarding self-protection equipment and skills is provided.

**NOT INCLUDED IN GPA**

**Medicine 360** (148 hours)

**Integrated Musculoskeletal and Dermatology Course**
Integrated clinical presentations related to the musculoskeletal system and dermatology. Students will learn how to diagnose, investigate, and manage clinical presentations such as painful limb, joint pain, fractures and dislocations, skin lesions, etc.

**NOT INCLUDED IN GPA**

**Medicine 370** (224 hours)

**Integrated Cardiovascular and Respiratory Course**
Integrated clinical presentations related to the cardiovascular and respiratory systems. Students will learn how to diagnose, investigate and manage clinical presentations such as chest pain, loss of consciousness, palpitations, shock, heart murmur, shortness of breath, cough, sore throat, etc.

**NOT INCLUDED IN GPA**

**Second Year Courses**

**Medicine 402** (4 weeks)

**Second Year Elective**
The student selects an area of medicine of particular interest for more in depth study. Studies may be done in centres other than Calgary. Students are encouraged to consider experiences in developing world nations through the International Electives Program. All experiences must be evaluated by a preceptor.

**NOT INCLUDED IN GPA**

**Medicine 410** (224 hours)

**Integrated Renal-Electrolyte and Endocrine-Metabolic Course**
Integrated clinical presentations related to the renal and endocrine systems. Students will learn how to diagnose, investigate and manage clinical presentations such as acute and chronic renal failure, generalized oedema, hypotension, abnormal electrolytes, neck mass, abnormalities of blood lipids, diabetes, etc.

**NOT INCLUDED IN GPA**

**Medicine 420** (68 hours)

**Medical Skills**
The medical skills required by students learning to optimize the physical, mental, emotional, and social well-being of patients (and self). Components include Communication, Physical Examination, Collaborative Practice, Clinical Correlations, Ethics, Global Health, Well Physician and Procedural Skills.

**NOT INCLUDED IN GPA**

**Medicine 430** (24 hours)

**Family Medicine Clinical Experience**
This one-on-one experience will provide an opportunity for early exposure to the discipline of Family Medicine and provide a real patient clinical learning environment for students to practice their expanding patient assessment skills and enable them to integrate their accumulating knowledge. This course is a continuation of Medicine 330 offered in Year 1. Students are matched with a Family Medicine Physician and will spend one day per month in their clinical practice. Specific learning objectives relate to the practice of Family Medicine and also include specific clinical presentations that link with other concurrent courses.

**NOT INCLUDED IN GPA**

**Medicine 440** (92 hours)

**Applied Evidence-Based Medicine**
Provides an opportunity to explore in depth an area of particular interest to each student. Students under the supervision of a preceptor may complete a research project. Others may pursue a clinical experience utilizing critical appraisal skills to address questions related to prognosis, investigation and/or treatment. Alternatively, students may pursue supervised electives in such areas as History of Medicine, Pathology, Health Economics, Community Health, Palliative Care, Rehabilitation Medicine, etc. Concepts of clinical informatics and evidence-based medicine (including critical appraisal) will also be presented.

**NOT INCLUDED IN GPA**

**Medicine 450** (188 hours)

**Integrated Neurosciences, Special Senses and Aging Course**
Integrated clinical presentations related to the neurosciences system, special senses and aging. Students will learn how to diagnose, investigate and manage clinical presentations such as muscle weakness, head and spinal injuries, gait disturbance, dizziness, speech and language disturbance, seizures, acute confusion, headache, dementia, falls, dying patient, visual loss, double vision, ear pain, hearing loss, etc.

**NOT INCLUDED IN GPA**

**Medicine 460** (188 hours)

**Children and Women’s Health**
Integrated clinical presentations related to reproductive medicine and paediatrics. Students will learn how to diagnose, investigate and manage pregnancy, contraception, pelvic pain, infertility, breast mass, the well and unwell newborn, childhood communicable diseases (including disease such as pharyngitis, otitis media), genetics, etc.

**NOT INCLUDED IN GPA**

**Medicine 470** (76 hours)

**Psychiatry**
Students will learn how to diagnose, investigate and manage clinical presentations such as substance abuse and drug addiction, suicidal behaviour, panic and anxiety, psychosis, mood disorders, personality disorders, etc.

**NOT INCLUDED IN GPA**

**Medicine 480** (30 hours)

**Integrative Course**
Students work in small groups with a tutor and standardized patients (actors) to further improve their skills in interviewing, communication, physical examination, diagnosing and patient management. Basic science and clinical information across organ systems are integrated with an emphasis on clinical problem-solving ability.

**NOT INCLUDED IN GPA**

**Medicine 490** (40 hours)

**Introduction to Clinical Practice**
Skills required for a clinical practice such as teamwork skills, motivational interviewing, cognitive biases, resiliency, documentation, fluid administration, x-ray interpretation, ECG interpretation, prescription writing, and ear, nose and throat technique.

**NOT INCLUDED IN GPA**

**Third Year Courses**
The third and final year is called the Clinical Clerkship. The total period of studies in the Clinical Clerkship constitutes 56 weeks. During this time, students work on hospital wards, in ambulatory care clinics and doctors’ offices as well as in the Emergency Room. All students will spend from 6 to 10 weeks in community hospitals in Southern Alberta learning Family Medicine as well as some specialties. During the clerkship students rotate through a variety of specialties spending from 2-10 weeks in each. These specialties include: Family Medicine, Internal Medicine, Surgery, Psychiatry, Paediatrics, Emergency Medicine, Anaesthesia, and Obstetrics and Gynaecology. Students also have 12 weeks of elective experience chosen from the courses listed below (Medicine 514). During this time students will apply the knowledge learned in the first 2 years and their clinical skills toward the solution of the most common clinical presentations. Students will evaluate patients and properly manage their medical problems by conducting a comprehensive medical history and thorough physical examination, formulating accurate hypotheses as to the causes and solution of their clinical problems, formulating an appropriate management plan to deal effectively with the problems. Students will demonstrate the fundamental concepts of disease prevention and health promotion for individual patients and incorporate them into treatments plans as appropriate. Students will communicate and interact effectively with patients, families, medical staff and others involved in the delivery of health services. During this time students will accept increasing responsibility in patient care as the final year advances. Students will be working with multi-disciplinary clinical teams of nurses, physiotherapists, residents and faculty. Students will develop and apply both ethical principles and standards in all aspects of medical practice and will exhibit appropriate personal and interpersonal professional behaviours. In the clerkship, as in the whole of the curriculum, it will be clear that physicians can serve patients to the highest possible standards only if they continually acquire new knowledge and skills for as long as they practice medicine.

**Participation in Outreach Rotations:** The clerkship program includes several community centres such as Medicine Hat, Lethbridge, Red Deer, and rural sites such as Brooks, Fort Macleod and Pincher Creek, etc. Students should expect to do from 5–10 weeks of their clinical clerkship outside the city of Calgary except in unusual circumstances.

**Notes:**

- There are two weeks set aside in January of the third year for students to attend the National Resident Interview Period for their residency application within the process of the Canadian Residency Matching Service (CaRMS).
- Up to 30 students per year may have the opportunity to achieve the objectives and evaluation requirements of the above stated disciplines in the University of Calgary Longitudinal Integrated Clerkship (UCLIC) an experience consisting of:
  - 32 weeks in a longitudinal rural preceptorship
  - 12 weeks of urban medicine (4 weeks Internal Medicine, 4 weeks Paediatrics, 4 weeks Surgery)
  - 12 weeks electives.

**Medicine 502** (6 weeks)

**Family Medicine**
During this 6-week block the learning experience will consist of mostly clinical experience in a community setting. Common clinical problems associated with family medicine will be emphasized. The four principles of Family Medicine as identified by
the College of Family Physicians of Canada will be highlighted.

502.01. Family Medicine
502.99. Family Medicine
NOT INCLUDED IN GPA

Medicine 504 (10 weeks)

Internal Medicine
During this 10-week block, clerks will develop their diagnostic and problem-solving skills by participating in a variety of clinical experiences and formal teaching rounds. The clinical experiences will consist of a 4-week Medical Teaching Unit rotation, and three 2-week rotations on a more outpatient/consultative subspecialty, or one 4-week ICU rotation and one 2-week outpatient/consultative subspecialty. Formal teaching sessions include weekly bedside teaching, clinical Pharmacology, medical emergencies and “case of the week” rounds.

504.01. Internal Medicine
504.99. Internal Medicine
NOT INCLUDED IN GPA

Medicine 506 (6 weeks)

Surgery
This 6-week rotation covers a wide-range of surgical problems and specialties. Subsequently, students will rotate through 1. A 3-week General Surgery rotation and a 3-week Orthopedic Surgery rotation; OR 2. A 3-week General Surgery rotation and one 2-week rotation in either Orthopedic Surgery, Plastic Surgery or Urologic Surgery along with one 1-week selective in either Urology, Vascular Surgery, Thoracic Surgery, Neurosurgery, Otolaryngology or Trauma Surgery.

506.01. Surgery
506.99. Surgery
NOT INCLUDED IN GPA

Medicine 508 (6 weeks)

Paediatrics
This 6-week rotation will provide clerks with a learning experience in paediatric medicine, emphasizing clinical skills and problem solving pertaining to common paediatric problems. The experience will build upon knowledge and skills (including history-taking and physical examination of newborns, infants, children, adolescents) previously gained in the first two years of the medical undergraduate curriculum, and will prepare the student for subsequent residency. The experiences shall be broad-based involving both ambulatory and hospital-based patients, and shall include newborn care, and care of children and adolescents up to the age of 18 years.

508.01. Paediatrics
508.99. Paediatrics
NOT INCLUDED IN GPA

Medicine 510 (6 weeks)

Psychiatry
This 6-week rotation will develop the students’ understanding of the psychiatric patient. Four weeks of the rotation is spent in Adult Psychiatry and two weeks in Child Psychiatry. Students will develop clinical skills in psychiatry in order to perform a psychiatric assessment and to demonstrate the basic principles of management of psychiatric clinical presentations with integration of basic knowledge obtained from the non-clinical setting. Clerks will perform a variety of assessments including: child and adolescent behavioural and learning assessments, elderly cognitive function, risk of fall, and competency assessments, safety assessments for suicide, abuse, and mental status examinations. They will order appropriate investigations including: collateral information, diagnostic imaging, laboratory and psychological and other functional assessments, etc.

510.01. Psychiatry
510.99. Psychiatry
NOT INCLUDED IN GPA

Medicine 512 (6 weeks)

Obstetrics and Gynaecology
During this 6-week block clerks will receive a broad exposure to women’s health and focus on details essential to the practice of Obstetrics and Gynaecology. Clerks will experience direct patient care in both outpatient and inpatient settings, spend a 5-week block at either a community hospital in Calgary or Medicine Hat Regional hospitals, or at a tertiary care hospital. Clerks will develop history taking and physical examinations skills appropriate to obstetrics and gynaecology patients and will participate in deliveries. Fetal assessment, maternal fetal medicine, and oncology. Women’s health problems, obstetric and gynecological, breast care, neonatal care, infertility and urogynaecology will also be covered during this rotation.

512.01. Obstetrics and Gynaecology
512.99. Obstetrics and Gynaecology
NOT INCLUDED IN GPA

Medicine 514 (12 weeks)

Clerkship Electives
During these mandatory 12 weeks of clerkship, clerks will choose electives from the range of potential medical domains. Twelve weeks of mandatory elective time must be completed during the clerkship year with a minimum of two weeks on any one elective block.

NOT INCLUDED IN GPA

Medicine 515 (up to 54 weeks)

Extended Clerkship Electives
During extended clerkship student are required to complete mandatory weeks of clerkship electives based on the decision by the Student Academic Review Committee (SARC). Clerks will choose electives from the range of potential medical domains. Mandatory elective time must be completed during the extended clerkship year with a minimum of two weeks on any one elective block.

515.01. Clerkship Elective 2-20 weeks
515.02. Clerkship Elective 21-40 weeks
515.03. Clerkship Elective 41-54 weeks
NOT INCLUDED IN GPA

Medicine 516 (2 weeks)

Anaesthesia
During this 2-week rotation, students work daily with a preceptor in the hospital setting. In addition, four areas of anaesthesia will be covered: procedural skills, resuscitation, pharmacology as well as an overview of anaesthesia topics including: preoperative assessment, pain management and others. Clerks will practice intravenous cannulation, bag and mask ventilation, jaw thrust, laryngeal mask and airway insertion and airway and endotracheal intubation in a controlled setting.

516.01. Anaesthesia
516.99. Anaesthesia
NOT INCLUDED IN GPA

Medicine 520 (60 hours)

Comprehensive Clinical Skills Curriculum for Clerkship
To ensure that our curriculum is comprehensive, and consistent with the curricular format of the first two years, we have identified all the “must see” clinical presentations and designed learning experiences to ensure that each of these presentations is covered in at least one of the following formats: simulation, standardized patients, or virtual patients. The curriculum will run over a 48-week period. The curriculum will include a combination of didactic, small groups and simulation learning experience, and we will evaluate learning outcomes using a combination of summative and formative evaluations.

NOT INCLUDED IN GPA

Medicine 522 (2 weeks)

Emergency Medicine
During this two-week rotation, students will experience a minimum of six shifts in an urban emergency room at three teaching sites. During this rotation, students will experience the varied diagnostic and therapeutic challenges offered by emergency medicine, including the assessment and management of life threatening illness. The clerks will have access to all elements of health-care delivery, including discharge planning, outpatient referrals, and direct interaction with consultants, ambulatory care and inpatient facilities, as well as diagnostic imaging. This type of integrated experience will provide the training physician with a unique and invaluable exposure to outpatient care not normally seen on the more typical inpatient rotations.

522.01. Emergency Medicine
522.99 Emergency Medicine
NOT INCLUDED IN GPA

Museum and Heritage Studies MHST

Instruction offered by the Department of Art in the Faculty of Arts.

Junior Course

Museum and Heritage Studies 201
3 units; H(3-0)

Introduction to Museum and Heritage Studies
Introduces the field of Museum and Heritage Studies by examining heritage sites, museums, art galleries, zoos, natural parks and others. Traditional institutions will be examined along with new forms, including virtual museums.

Note: Students may be required to attend off-campus events outside of class time.

Senior Courses

Museum and Heritage Studies 331
3 units; H(3-0)

Collections and Exhibitions in Museum and Heritage Institutions
Examines the nature of collecting, curating, exhibiting and interpreting material and non-material culture in museums and heritage institutions.

Prerequisite(s): Museum and Heritage Studies 201.

Note: Students may be required to attend off-campus events outside of class time. Enrolment preference is given to students registered in the Museum and Heritage Studies Minor program.

Museum and Heritage Studies 333 3 units (3-0)

Ethics in Museum and Heritage Studies
Introduction to ethics in museums and heritage studies. An examination of some recent museums and heritage resources crises. Also museum/heritage processes including the acquisition of artifacts, exhibitions and the representation of
indigenous and other minority peoples, interpretation, the appropriateness of conservation, and museum management.

Prerequisite(s): Museum and Heritage Studies 201.

Museum and Heritage Studies 401 3 units; H(3-0)

Topics in Museum and Heritage Studies
An examination of selected topics in Museum and Heritage Studies.

Prerequisite(s): Museum and Heritage Studies 201 or consent of Program Co-ordinator.

MAY BE REPEATED FOR CREDIT

Museum and Heritage Studies 433 3 units; H(0-3S)

Management and Planning in Museum and Heritage Institutions
Examines theoretical and practical issues relating to the management of museum and heritage resources. Topics may include: exhibition planning, human resources, ethics and social responsibility, fundraising, minor collections, and audience development etc.

Prerequisite(s): Museum and Heritage Studies 201.

Corequisite(s): Prerequisite or Corequisite: Museum and Heritage Studies 331.

Note: Students may be required to attend off-campus events outside of class time. Preference is given to students registered in the Museum and Heritage Studies Minor program.

Museum and Heritage Studies 501 3 units; H(3-0)

Research in Selected Topics
Supervised individual study of a special topic.

Prerequisite(s): Consent of the Program Co-ordinator.

Note: Students should contact the Program Coordinator well in advance of the first day of classes to arrange an independent study course.

MAY BE REPEATED FOR CREDIT

Museum and Heritage Studies 533 3 units; H(0-6)

Practicum
Placement at a museological or heritage institution.

Corequisite(s): Prerequisites or Corequisites: Museum and Heritage Studies 433 and consent of the Museum and Heritage Studies Program Co-ordinator.

Note: This should be the last course students take in the program, grounding their theoretical knowledge and helping to launch careers. Students must contact the Museum and Heritage Studies Program Co-ordinator at least three weeks prior to the start of classes to arrange for placement at a host institution.

NOT INCLUDED IN GPA

Music MUSI

Instruction offered by members of Music in the School of Creative and Performing Arts in the Faculty of Arts.

BMUS students may count no more than 6 units (1.0 full-course equivalent) from Music 301, 302, 304, 305, 401, 402 and 405 as Open Options toward their degree.

Music 105 0 units; H(0-2)

Music Listening
Practical experience in music listening. Concert attendance, exposure to live music performances, and understanding music in its intended context. Music students must receive credit for all four courses in order to graduate.

105.01. Music Listening I
105.02. Music Listening II
105.03. Music Listening III
105.04. Music Listening IV

Prerequisite(s): Admission to a BMus program, the BA (Music) program or the BA Honours (Music) program.

NOT INCLUDED IN GPA

Music 127 3 units; H(0-3)

Class Piano
Functional approach to the piano.

Prerequisite(s): Admission to a BMus program.

Antirequisite(s): Credit for Music 127 and Music Performance 271 will not be allowed.

Note: May not be used for credit towards any degree program.

NOT INCLUDED IN GPA

Junior Courses

Music 203 3 units; H(3-0)

Jazz History
Directed listening and analysis of jazz forms from the early beginnings of jazz to the present. Styles examined range from Early Jazz to Jazz-Rock Fusion. Major figures considered include: Louis Armstrong, Duke Ellington, Count Basie, Lester Young, Charlie Parker, Miles Davis and John Coltrane.

Antirequisite(s): Credit for Music 203 and Music History and Literature 281 will not be allowed.

Music 209 3 units; H(3-0)

Introduction to Music Theory for Non-Majors
Introduction to the materials of music through development of both aural and written skills.

Antirequisite(s): Credit for Music 209 and Music Theory and Composition 209 will not be allowed.

Note: Open to all students. Not available for credit toward BMus, BA (Music) and Music Minor programs.

Music 211 3 units; H(3-0)

Materials of Music
Investigation of the fundamental processes of music through analytical and written exercises.

Prerequisite(s): Successful completion of the Music Theory Diagnostic exam.

Antirequisite(s): Credit for Music 211 and Music Theory and Composition 201 will not be allowed.

Note: The diagnostic exam is given in March and during the Fall Block Week each year. Contact the School of Creative and Performing Arts for more information.

Music 213 3 units; H(3-0)

Diatonic Harmony
Part-writing and analysis with an emphasis on diatonic harmony and modulation in the music of the eighteenth century.

Prerequisite(s): Music 211 or Music Theory and Composition 201.

Antirequisite(s): Credit for Music 213 and Music Theory and Composition 203 will not be allowed.

Music 221 3 units; H(1-3)

Performance Practicum I
Applied instruction in instrument or voice.

Prerequisite(s): Admission to the BMus program.

Antirequisite(s): Credit for Music 221 and Music Performance 291 will not be allowed.

Note: Students not admitted to the BMus program may register with an audition and consent of the Division Chair, Music. A supplementary fee will be assessed to cover additional costs associated with this course.

Music 233 3 units; H(1-3)

Performance Practicum II
Continuation of applied instruction in instrument or voice.

Prerequisite(s): Music 221 or Music Performance 291 and admission to the BMus program.

Antirequisite(s): Credit for Music 223 and Music Performance 293 will not be allowed.

Note: Students not admitted to a BMus program may register with an audition and consent of the Division Chair, Music. A supplementary fee will be assessed to cover additional costs associated with this course.

Music 255 3 units; H(0-6)
(formerly Music Theory and Composition 221)

Musicianship I
Development of skills in rhythm, intonation and sight-singing. Performance of two-part contrapuntal exercises with diatonic modulation.

Prerequisite(s): Admission to the Music major or minor.

Note: Students not admitted to a Music major or minor may register by audition and consent of the Division Chair, Music. This course meets for three hours per week during the Fall and Winter Terms.

Music 231 3 units; H(3-0)
(formerly Music History and Literature 201)

Medieval and Renaissance Music
Music from antiquity to 1600.

Prerequisite(s): Admission to the Music major or minor.

Note: Students not admitted to the Music major or minor may register by audition and consent of the Division Chair, Music.

Music 233 3 units; H(3-0)
(formerly Music History and Literature 205)

Baroque Music
Music from 1600 to 1750.

Prerequisite(s): Music 231 or Music History and Literature 201.

Music 255 3 units; H(3-0)

Introduction to Music Technology
An exploration of current technology for music making and appreciation including recording hardware and software, MIDI-based devices for integration with sound systems and interactive/media performance, audio file formats, score preparations and basic audition theory.

Senior Courses

Music 301 3 units; H(3-0)
(formerly Music History and Literature 309)

Music and Popular Culture
Survey and specific examination of popular music and culture, ranging from classical styles to rock, within a historical and sociological context. The course will examine the meaning and messages of
popular music, and its impact on present-day culture. Topics may include The Beatles and Rolling Stones, Rock and Roll, Black Music, jazz, music and media, blues, Sinatra, Broadway and others.

Music 302 3 units; H(3-0) (formerly Music History and Literature 309)

Music in Popular Culture: Performers Study of the impact of performers on the history of commercial music, focusing on selected performers such as The Beatles, Rolling Stones, Led Zeppelin, James Brown or Jimi Hendrix.

Music 303 3 units; H(3-0) (formerly Music History and Literature 309.28)

World Music Detailed ethno-musicological examination of non-western traditions.

Music 304 3 units; H(3-0) (formerly Music History and Literature 309)

Music in Popular Culture: Musical Theatre Study of music and its relation to popular theatre (opera, musicals) in a historical context through the examination of selected works and their relation to popular culture, popular song and/ or jazz.

Note: The Spring Intersession offering of this course is normally a travel-study course.

Music 305 3 units; H(3-0) (formerly Music History and Literature 311)

Composers and Musical Cultures In-depth study of selected composers, their music, and their relationship to intellectual history (i.e. Mozart and the French Revolution), and/or examination of specific western and non-western musical cultures (i.e. Music in India, Music in post-war Germany) and their impact. Attendance at relevant musical concerts and lectures may be required.

Music 309 3 units; H(3-0) (formerly Music History and Literature 311)

The Art of Music Listening An introduction to the sensuous and structural elements of music, leading to a greater appreciation for the art of music in a global multi-cultural context.

Note: Music Majors and Minors (except Sonic Arts Minors) may not use the course for credit towards their programs.

Music 311 3 units; H(3-0) (formerly Music History and Literature 311)

Chromatic Harmony Part-writing and analysis with an emphasis on chromatic harmony and modulation in the music of the nineteenth century.

Prerequisite(s): Music 213 or Music Theory and Composition 203.

Music 313 3 units; H(3-0) (formerly Music Theory and Composition 303)

Materials of Twentieth-Century Music Compositional and analytical approaches to post-tonal music from the twentieth century to the present.

Prerequisite(s): Music 311 or Music Theory and Composition 301.

Music 321 3 units; H(1-3) (formerly Music Performance 391)

Performance Practicum III Continuation of applied instruction in instrument or voice.

Prerequisite(s): Music 223 or Music Performance 293 and admission to the BMus program. Students not admitted to a BMus program may register with an audition and consent of the Division Chair, Music.

Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Music 323 3 units; H(1-3) (formerly Music Performance 393)

Performance Practicum IV Continuation of applied instruction in instrument or voice.

Prerequisite(s): Music 321 or Music Performance 391 and admission to the BMus program. Students not admitted to a BMus program may register with an audition and consent of the Division Chair, Music.

Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Music 325 3 units; H(0-6) (formerly Music Theory and Composition 321)

Musicianship II Further development of skills in rhythm, intonation and sight-singing. Performance of two-part contrapuntal exercises with chromatic modulation. Introduction to atonal exercises.

Prerequisite(s): Music 225 or Music Theory and Composition 221.

Note: This course meets for three hours per week during the Fall and Winter Terms.

Music 327 3 units; H(1-3) (formerly Music Performance 395)

Second Instrument Study Applied instruction on second instrument or voice.

327.01 Second Instrument Study I
327.02 Second Instrument Study II
327.03 Second Instrument Study III
327.04 Second Instrument Study IV
327.05 Second Instrument Study V
327.06 Second Instrument Study VI
327.07 Second Instrument Study VII
327.08 Second Instrument Study VIII

Prerequisite(s): Open to Music Majors with consent of the Division Chair, Music.

Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Music 329 3 units; H(0-3) (formerly Music Theory and Composition 385)

Jazz Musicianship Musicianship in the jazz idiom, stressing the aural perception of jazz scales and modes, seventh-chord and harmonic extensions, common chord progressions and jazz rhythms.

Prerequisite(s): Music 211 or Music Theory and Composition 201.

Note: Open to both Music Majors and Minors.

Music 331 3 units; H(3-0) (formerly Music History and Literature 301)

Classical and Romantic Music Music from 1750 to 1870.

Prerequisite(s): Music 233 or Music History and Literature 203.

Music 333 3 units; H(3-0) (formerly Music History and Literature 305)

Late Romantic and Modern Music Music from 1870 to the present.

Prerequisite(s): Music 331 or Music History and Literature 301.

Music 334 3 units; H(3-0)

Music History and Literature I Music from antiquity to 1789.

Prerequisite(s): School of Creative and Performing Arts 290.

Music 336 3 units; H(3-0)

Music History and Literature II Music from 1789 to the present.

Prerequisite(s): Music 334.

Music 341 3 units; H(3-0) (formerly Music Theory and Composition 391)

Composition I Basic compositional techniques, and study of selected twentieth-century compositions.

Prerequisite(s): Music 213 or Music Theory and Composition 203.

Music 343 3 units; H(3-0) (formerly Music Theory and Composition 393)

Composition II Continued study of compositional techniques and study of selected twentieth-century compositions.

Prerequisite(s): Music 341 or Music Theory and Composition 391.

Music 351 3 units; H(3-0) (formerly Music Theory and Composition 379)

Sonic Arts An introduction to the creative use of computers and digital media in sonic arts.

Music 355 3 units; H(3-0) (formerly Music Theory and Composition 361)

Sound Recording An introduction to the practice and theory of sound and music recording.

Music 401 3 units; H(3-0) (formerly Music History and Literature 307)

Music and the Humanities Study of the interrelationship of music and the humanities in a broad cultural and historical framework. Content may vary from year-to-year. Intended for non-majors.

Music 402 3 units; H(3-0)

Topics in Popular Music Selected topics examining commercial music from a critical perspective. Topics may include the examination of the work of specific creators or performers, the recording industry, the impact of specific instruments (guitar, percussion, electronic media, etc.), or cross-cultural influences.

MAY BE REPEATED FOR CREDIT
### Courses of Instruction

**Music 403**  3 units; H(3-0)

**Topics in World Music**
Selected topics examining World Music from a historical, sociological, analytical or performative perspective. Topics may include the study of a particular musical tradition and repertoire or the study of an instrument or performance practice that appears among many traditions (for example, hand-drumming).

**Note:** Music Majors and Minors may use this course for credit toward their programs.

**MAY BE REPEATED FOR CREDIT**

**Music 405**  3 units; H(3-0)

**Topics in Musical Culture**
Selected topics examining the relationship between composers and or performers and a musical culture, focusing on repertoire (for example piano music, art song, or orchestral music of a specific era), aesthetic or technical approach (such as sonic arts or improvisation), or artistic milieu (such as fin de siecle Paris or post-1960’s Montréal).

**MAY BE REPEATED FOR CREDIT**

**Music 415**  3 units; H(3-0)
(formerly Music Theory and Composition 471)

**Form and Analysis**
Investigations into hierarchical relations in music. Study of how various levels of musical structure relate in order to form a whole.

**Prerequisite(s):** Music 313 or Music Theory and Composition 303.

**Music 417**  3 units; H(3-0)
(formerly Music Theory and Composition 473)

**Advanced Harmonic Analysis**
Investigation of the expanded harmonic resources and analytical systems used by composers from the late nineteenth century to the present.

**Prerequisite(s):** Music 313 or Music Theory and Composition 303.

**Music 421**  3 units; H(1-3)
(formerly Music Performance 491)

**Performance Practicum V**
Continuation of applied instruction in instrument or voice.

**Prerequisite(s):** Music 323 or Music Performance 393 and admission to the BMus (Composition, Music History and Theory, or Integrated Studies) program. Students not admitted to the stated BMus programs may register with an audition and consent of the Division Chair, Music.

**Note:** A supplementary fee will be assessed to cover additional costs associated with this course.

**Music 423**  3 units; H(1-3)
(formerly Music Performance 493)

**Performance Practicum VI**
Continuation of applied instruction in instrument or voice.

**Prerequisite(s):** Music 421 or Music Performance 491 and admission to the BMus (Composition, Music History and Theory, or Integrated Studies) program. Students not admitted to the stated BMus programs may register with an audition and consent of the Division Chair, Music.

**Note:** A supplementary fee will be assessed to cover additional costs associated with this course.

**Music 427**  3 units; H(4S-0)
(formerly Music Performance 469)

**Professional Seminar in Music Performance I**
Practical experience in music performance in a team teaching master class format.

**Prerequisite(s):** Music 323 or Music Performance 393, and admission to the BMus (Performance) program.

**Corequisite(s):** Music 462.

**Note:** This course meets for two hours per week during the Fall and Winter Terms.

**Music 429**  3 units; H(2-2)
(formerly Music Performance 481)

**Topics in Jazz Improvisation**
Topics in jazz improvisation, stressing improvisational tools, melody, rhythm, and ear development for the blues progression.

**Prerequisite(s):** Music 211 or Music Theory and Composition 201 and admission to the music major or minor.

**Music 441**  3 units; H(1-2)
(formerly Music Theory and Composition 491)

**Composition III**
Advanced creative work with an emphasis upon either chamber music composition or studio composition.

**Prerequisite(s):** Music 343 or Music Theory and Composition 393 and consent of the Division Chair, Music.

**Music 443**  3 units; H(1-2)
(formerly Music Theory and Composition 493)

**Composition IV**
Continued advanced creative work with an emphasis upon either chamber music composition or studio composition.

**Prerequisite(s):** Music 441 or Music Theory and Composition 491 and consent of the Division Chair, Music.

**Music 445**  3 units; H(3-0)
(formerly Music Theory and Composition 475)

**Counterpoint**
Practical study of contrapuntal technique, including species counterpoint and eighteenth-century counterpoint.

**Prerequisite(s):** Music 313 or Music Theory and Composition 303.

**Music 447**  3 units; H(3-0)
(formerly Music Theory and Composition 477)

**Orchestration**
Practical study of instrumentation and scoring, including orchestral and wind ensemble textures.

**Prerequisite(s):** Music 313 or Music Theory and Composition 303.

**Music 451**  3 units; H(3-0)
(formerly Music Theory and Composition 479)

**Electroacoustic Music**
Practical study of electroacoustic and computer music with an emphasis on creative work in the medium.

**Music 453**  3 units; H(3-0)
(formerly Music Theory and Composition 481)

**Computer Applications in Music**
Use of computers in music composition, performance, education and interdisciplinary media.

**Music 462**  3 units; H(1-4)
(formerly Music Performance 498)

**Junior Performance Project**
Applied instruction in instrument or voice in connection with junior recital.

**Prerequisite(s):** Admission to the BMus (Performance) program.

**Note:** A supplementary fee will be assessed to cover additional costs associated with this course.

**Music 511**  3 units; H(3-0)
(formerly Music Theory and Composition 575)

**Selected Topics in Theory and Composition**
Advanced topics in music theory and composition selected from such subjects as: analysis of tonal or post-tonal music, rhythmic analysis, acoustics, critical approaches to music theory, electroacoustic music, orchestration, counterpoint and fugue.

**Prerequisite(s):** One of Music 415, 417, 445, 447, 451 or one 400-level Music Theory and Composition course.

**MAY BE REPEATED FOR CREDIT**

**Music 513**  3 units; H(3S-0)
(formerly Music Theory and Composition 577)

**Seminar in Theory and Composition**
Creative and analytic approaches to the study of selected repertoires with an emphasis upon contemporary music.

**Prerequisite(s):** One of Music 415, 417, 445, 447, 451 or one 400-level Music Theory and Composition course.

**MAY BE REPEATED FOR CREDIT**

**Music 521**  3 units; H(1-3)
(formerly Music Performance 591)

**Performance Practicum VII**
Continuation of applied instruction in instrument or voice.

**Prerequisite(s):** Music 423 or Music Performance 493 and admission to the BMus (Composition, Music History and Theory, or Integrated Studies) program. Students not admitted to the stated BMus programs may register with an audition and consent of the Division Chair, Music.

**Note:** A supplementary fee will be assessed to cover additional costs associated with this course.

**Music 523**  3 units; H(1-3)
(formerly Music Performance 593)

**Performance Practicum VIII**
Continuation of applied instruction in instrument or voice.

**Prerequisite(s):** Music 521 or Music Performance 591 and admission to the BMus (Composition, Music History and Theory, or Integrated Studies) program. Students not admitted to the stated BMus programs may register with an audition and consent of the Division Chair, Music.

**Note:** A supplementary fee will be assessed to cover additional costs associated with this course.

**Music 525**  3 units; H(3-0)
(formerly Music Performance 571)

**Topics in Music Performance**
Various topics such as applied music literature, piano, wind or string pedagogy, or vocal pedagogy, phonetics.

**Prerequisite(s):** Admission to the BMus or BA(Music) Program and consent of the Division Chair, Music.

**MAY BE REPEATED FOR CREDIT**
Courses of Instruction

Music 527 3 units; H(4S-0)
(formerly Music Performance 569)

Professional Seminar in Music Performance II
Continued practical experience in music performance in a team teaching master class format.
Prerequisite(s): Music 427 or Music Performance 469, and admission to the BMus (Performance) program.
Corequisite(s): Music 562.
Note: This course meets for two hours per week during the Fall and Winter Terms.

Music 531 3 units; H(3-0)
(formerly Music History and Literature 551)

Research Techniques and Bibliography of Music
Exploring the basic reference materials and techniques for musical research in all areas.
Prerequisite(s): Music 333 or 336 or Music History and Literature 305.

Music 533 3 units; H(3-0)
(formerly Music History and Literature 571)

Selected Topics in Musicology
A specific musical medium or genre: may include chamber music literature, symphonic literature, dramatic literature and program music.
Prerequisite(s): Music 333 or 336 or Music History and Literature 305.
MAY BE REPEATED FOR CREDIT

Music 535 3 units; H(3-0)
(formerly Music History and Literature 573)

Studies in the Music of Selected Composers
Specific composers or groups of composers; may include Beethoven, Debussy, the Second Viennese School, etc.
Prerequisite(s): Music 333 or 336 or Music History and Literature 305.
MAY BE REPEATED FOR CREDIT

Music 551 3 units; H(3-0)
(formerly Music Theory and Composition 505)

Networked Music Performance
Investigation of music performance on high-speed networks.

Music 560 6 units; F(1-4)
(formerly Music History and Literature 596, 598, Music Theory and Composition 596, 598)

Senior Project
Major research or creative project in an area of musical study.
Prerequisite(s): Consent of the Division Chair, Music.

Music 561 3 units; H(3-0)
(formerly Music History and Literature 555, Music Theory and Composition 555, Music Performance 555)

Independent Study
Individual study in a selected area of music.
Prerequisite(s): Consent of the Division Chair, Music.
MAY BE REPEATED FOR CREDIT

Music 562 6 units; F(1-4)
(formerly Music Performance 598)

Senior Performance Project
Applied instruction in instrument or voice in conjunction with a Senior Recital.
Prerequisite(s): Admission to the BMus (Performance) program, Music 313 or Music Theory and Composition 303, and Music 333 or 336 or Music History and Literature 305.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Graduate Courses

Music 611 3 units; H(3-1)
(formerly Music Theory and Composition 673)

Selected Topics in Theory and Composition
Various topics (master's level).

Music 613 3 units; H(3S-0)
(formerly Music Theory and Composition 671)

Seminar in Theory and Composition
Advanced creative and analytic approaches to the study of selected repertoire with an emphasis upon contemporary music.
MAY BE REPEATED FOR CREDIT

Music 615 3 units; H(3-0)
(formerly Music Theory and Composition 675)

Pedagogy of Music Theory
Refining ideas about music theory and its teaching, while developing and strengthening teaching skills.
Note: Required course for all PhD (Composition) students.

Music 621 3 units; H(2-3)
(formerly Music Performance 691)

Advanced Performance Practicum I
Applied instruction in instrument or voice.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Music 623 3 units; H(2-3)
(formerly Music Performance 693)

Advanced Performance Practicum II
Continuation of Music 621.
Prerequisite(s): Music 621 or Music Performance 691.
Note: A supplementary fee will be assessed to cover additional costs associated with this course.

Music 625 3 units; H(3-0)
(formerly Music Performance 671)

Topics in Music Performance
Various topics such as applied music literature, applied pedagogy, accompanying, phonetics and others.
MAY BE REPEATED FOR CREDIT

Music 629 3 units; H(0-3)
(formerly Music Performance 657)

Studies at the Banff Centre
Advanced music studies.
Note: Although the Banff Centre does not provide credit course instruction, students with advanced experience in music at the Banff Centre may apply for graduate-level credit from the University of Calgary.
MAY BE REPEATED FOR CREDIT

Music 631 3 units; H(3-0)
(formerly Music History and Literature 651)

Research Techniques and Bibliography of Music
Exploring the basic reference materials and techniques for musical research at the graduate level.
Note: Required course for all MMus and MA (Musicology) students.

Music 633 3 units; H(3-0)
(formerly Music History and Literature 671)

Selected Topics in Musicology
Various topics such as history of music theory, analysis, notation, or performance practice may be offered. Consult the timetable for current topic.
MAY BE REPEATED FOR CREDIT

Music 641 3 units; H(2-2)
(formerly Music Theory and Composition 695)

Composition

Music 645 3 units; H(2S-2)
(formerly Music Theory and Composition 691)

Composition Seminar
Prerequisite(s): Consent of the Division Chair, Music.

Music 651 3 units; H(3-0)
(formerly Music Theory and Composition 685)

Selected Topics in Electroacoustic Music
Advanced topics in computer music selected from such subjects as: analysis, theory and aesthetics of electroacoustic repertoire, computer programming and software design, interactivity, performance practice and interpretation, sound morphology, sound spatialization, sound synthesis, soundscape studies, tele-media.
MAY BE REPEATED FOR CREDIT

Music 653 3 units; H(3-0)
(formerly Music Theory and Composition 681)

Projects in Computer Music
Individual and collaborative creative and research projects in computer music.
MAY BE REPEATED FOR CREDIT

Music 661 3 units; H(3-0)
(formerly Music History and Literature 655, Music Theory and Composition 655, Music Performance 655)

Independent Study
Individual study in a selected area of music.
MAY BE REPEATED FOR CREDIT

Music 711 3 units; H(3-0)
(formerly Music Theory and Composition 775)

Advanced Topics in Theory and Composition
Various topics (doctoral level).
MAY BE REPEATED FOR CREDIT

Music 733 3 units; H(3-0)
(formerly Music History and Literature 771)

Selected Topics in Musicology
Various topics in the field of Musicology (doctoral level).
MAY BE REPEATED FOR CREDIT
### Courses of Instruction

#### Music Education MUED

**Music 741** 3 units; H(3-0)  
(formerly Music Theory and Composition 795)

**Composition**  
Individual study in musical composition (doctoral level).  
MAY BE REPEATED FOR CREDIT

**Music 751** 3 units; H(3-0)  
(formerly Music Theory and Composition 785)

**Advanced Topics in Electroacoustic Music**  
Advanced topics in computer music selected from such subjects as: interactively, tele-media, sound morphology, sound spatialization, analysis, theory and aesthetics, performance practice and interpretation, computer programming and software design, sound synthesis, soundscape studies.  
MAY BE REPEATED FOR CREDIT

**Music 753** 3 units; H(3-0)  
(formerly Music Theory and Composition 781)

**Advanced Projects in Computer Music**  
Individual and collaborative creative and research projects in computer music.  
MAY BE REPEATED FOR CREDIT

**Music 761** 3 units; H(3-0)  
(formerly Music Theory and Composition 755)

**Independent Study**  
Individual study in a selected area of music (doctoral level).  
MAY BE REPEATED FOR CREDIT

**Music Education 413** 3 units; H(3-0)

**Vocal Music in the School I**  
Introduction to a comprehensive vocal program for elementary and secondary classrooms, including teaching methods and materials.  
Prerequisite(s): Music Education 333.

**Music Education 415** 3 units; H(3-0)

**Vocal Music in the School II**  
Continuation of Music Education 413. Musical and practical aspects of vocal music in the classroom, including teaching skills, curriculum and appropriate teaching strategies.  
Prerequisite(s): Music Education 413.

**Music Education 417** 3 units; H(3-2) or H(3-0)

**Topics in Music Education**  
Various topics such as advanced band techniques and literature, choral techniques and literature, philosophy and foundation of music education or jazz for the classroom.  
Prerequisite(s): Music Education 333.  
MAY BE REPEATED FOR CREDIT

**Music Education 555** 3 units; H(3-0)

**Independent Study**  
Individual study in a selected music education area.  
Prerequisite(s): Consent of the Division Chair, Music.  
MAY BE REPEATED FOR CREDIT

**Graduate Courses**

**Music Education 655** 3 units; H(3-0)

**Independent Study**  
Individual study in a selected music education area.  
Prerequisite(s): Consent of the Division Chair, Music.  
MAY BE REPEATED FOR CREDIT

**Music Education 671** 3 units; H(3-0)

**Selected Topics in School Music**  
Selected topics with emphasis upon practical application relevant to the field of music education. Various topics are regularly offered under this title, such as early childhood, Kodaly pedagogy, administration of school music programs and techniques of school music supervision.  
Prerequisite(s): Consent of the Division Chair, Music.  
MAY BE REPEATED FOR CREDIT

**Music Education 695** 3 units; H(2-4)

**Practicum in School Music I**  
Practical application of teaching techniques studied in graduate level school music courses. Will include various topics such as early childhood, Kodaly, choral and instrumental.  
Prerequisite(s): Music Education 697.

**Practicum in School Music II**  
Continuation of Music Education 695.  
Prerequisite(s): Consent of the Division Chair, Music.  
MAY BE REPEATED FOR CREDIT

**Music Education 771** 3 units; H(3-0)

**Selected Topics in Music Education**  
Selected topics with emphasis upon practical application relevant to the field of Music Education. Possible topics may include early childhood musical development, Kodaly pedagogy, folk music studies, choral and instrumental pedagogy and the role of new technologies within the discipline.  
Prerequisite(s): Consent of the Division Chair, Music.  
MAY BE REPEATED FOR CREDIT

**Music Performance MUPF**

Instruction offered by members of Music in the School of Creative and Performing Arts in the Faculty of Arts.  
Students are cautioned that notwithstanding the given prerequisite, registration in any of the performing ensembles is subject to the approval of the ensemble director.  
Further information on ensembles is available at scpuf.ucalgary.ca/music/welcome-music.

**Junior Courses**

**Music Performance 201** 3 units; H(0-6)

**Chamber Choir**  
Performing experience in the Chamber Choir.  
Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.  
NOT INCLUDED IN GPA

**Music Performance 203** 3 units; H(0-6)

**Women’s Choir**  
Performing experience in the Women’s Choir.  
Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.  
NOT INCLUDED IN GPA

**Music Performance 205** 3 units; H(0-6)

**University Chorus**  
Performing experience in the University Chorus.  
Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.  
NOT INCLUDED IN GPA

**Music Performance 211** 3 units; H(0-6)

**Symphonic Band**  
Performing experience in the Symphonic Band.  
Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.  
NOT INCLUDED IN GPA

**Music Performance 213** 3 units; H(0-6)

**Wind Ensemble**  
Performing experience in the Wind Ensemble.  
Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course.
Courses of Instruction

This course normally meets for three hours per week during the Fall and Winter Terms.

NOT INCLUDED IN GPA

Music Performance 215 3 units; H(0-6)

University Orchestra
Performing experience in the University Orchestra.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

NOT INCLUDED IN GPA

Music Performance 221 3 units; H(0-6)

Collegium Musicum
Performance of instrumental and vocal music written before 1750.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

Music Performance 223 3 units; H(0-6)

Vocal Jazz Ensemble
Performance of popular vocal literature.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

Music Performance 225 3 units; H(0-6)

Instrumental Jazz Ensemble
Performance in a jazz combo or band.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

Music Performance 227 3 units; H(0-6)

New Music Ensemble
Performance of chamber music written since 1960.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

Music Performance 229 3 units; H(0-6)

World Music Ensemble
Performing experience of various world music traditions.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

Music Performance 241 3 units; H(0-4)

Chamber Music
Performance of music for small ensembles.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

Music Performance 245 3 units; H(0-6)

Voice Lab
Performance projects involving vocal music (opera, art song, music theatre, baroque, new music), and an exploration of interarts and interdisciplinary connections through performance creation.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

NOT INCLUDED IN GPA

Music Performance 301 3 units; H(0-6)

Chamber Choir
Performing experience in the Chamber Choir.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 303 3 units; H(0-6)

Women’s Choir
Performing experience in the Women’s Choir.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 305 3 units; H(0-6)

University Chorus
Performing experience in the University Chorus.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 311 3 units; H(0-6)

Symphonic Band
Performing experience in the Symphonic Band.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 313 3 units; H(0-6)

Wind Ensemble
Performing experience in the Wind Ensemble.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 315 3 units; H(0-6)

University Orchestra
Performing experience in the University Orchestra.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 321 3 units; H(0-6)

Chamber Music
Performing music for small ensembles.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 323 3 units; H(0-6)

New Music Ensemble
Performing experience in the New Music Ensemble.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 327 3 units; H(0-6)

World Music Ensemble
Performing experience in the World Music Ensemble.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 341 3 units; H(0-4)

Chamber Music
Performing of music for small ensembles.

Note: Students are required to audition during the first week of classes in September. Students who are unsuccessful will be removed from the course. This course normally meets for three hours per week during the Fall and Winter Terms.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Music Performance 345 3 units; H(0-6)

Voice Lab
Performance projects involving vocal music (opera, art song, music theatre, baroque, new music), and
Courses of Instruction

Nanoscience NANS

Instruction offered by members of the Faculty of Science.

Senior Courses

Nanoscience 301 3 units; H(3-0)

Introduction to Nanoscience and Nanotechnology

Functional definitions of nanoscience and nanotechnology. Understanding/predicting the behaviour of nanomaterials. Investigation of nanomaterials whose properties depend on size. Exploration of a building up approach to design and fabrication of functional nanomaterials. Examination of applications of nanoscience and nanotechnology in society.

Prerequisite(s): 18 units (3.0 full-course equivalents) in courses offered by the Faculty of Science.

Nanoscience 401 3 units; H(3-3/2)

Design in Nanoscience

The fundamental understanding of Nanoscience gained in Nanoscience 301 will be extended and applied to designing experiments and simulations to test hypotheses regarding Nanoscience.

Prerequisite(s): Nanoscience 301.

Nanoscience 443 3 units; H(3-0-1T)

Quantum World of Nanoscience

Using nanotechnology examples, the fundamentals of quantum mechanics that are relevant to nanoscience and nanotechnology are covered.

Prerequisite(s): Applied Mathematics 217 or Mathematics 275 or Mathematics 249, 251 or 265 or 281 and Mathematics 211 or 213 and Physics 223 and 255.

Antirequisite(s): Credit for Nanoscience 443 and Physics 543 will not be allowed.

Nanoscience Methods

This lab/tutorial course will place the students in a nanotechnology setting. Students will design and execute self-directed projects and will present results to their peers.

Prerequisite(s): Nanoscience 401.

Note: Open only to Nanoscience Concentrators or Minors, or by consent of the Program Director.

Nanoscience 502 6 units; F(0-6)

Nanoscience Methods

This lab/tutorial course will place the students in a nanotechnology setting. Students will design and execute self-directed projects and will present results to their peers.

Prerequisite(s): Nanoscience 401.

Nanoscience 403 3 units; H(3-0-1T)

Medical Applications

The use of nanoscience and nanotechnology principles for medical applications in diagnostics and therapy will be explored in lectures, student presentations and group projects.

Prerequisite(s): Nanoscience 401.

Nanoscience 599 3 units; H(3-0)

Special Problems in Nanoscience and Nanotechnology

A discussion of current topics in Nanoscience and Nanotechnology. This seminar course will place the student in a setting where best practices of scientific presentation are imparted through giving presentations related to Nanoscience.

Prerequisite(s): Nanoscience 301.

MAY BE REPEATED FOR CREDIT

Neuroscience NEUR

Instruction and services offered by members of the Cumming School of Medicine and the Faculties of Science and Arts.

Junior Course

Neuroscience 201 3 units; H(3-0)

Introduction to Neuroscience

A survey of clinical, cognitive, behavioural, systems, cellular and molecular neuroscience, with emphasis on applied, translational, and basic research.

Prerequisite(s): Biology 30 and admission to the Neuroscience program.

Senior Courses

Neuroscience 301 3 units; H(160 hours)

Neuroscience Field Course

Introductory ethology and behavioural neuroscience research. Hypothesis generation, experimental design, data collection and analysis, techniques, and experimentation.

Prerequisite(s): Biology 231 or 241 and Neuroscience 201 and admission to the Neuroscience program.

Note: Students are in residence at the Barrier Lake Field Station during Spring Intersession for a substantial part of the course. A supplementary fee will be assessed to cover additional costs associated with this course. Students will require consent of the department to drop this course.

Neuroscience 321 3 units; H(3-0)

How the Brain Works

An introduction to the fundamentals of brain function for students outside of the Neuroscience program. Students completing this course will be able to describe the molecular, cellular and systems underpinnings of nervous systems. Students will be able to discuss the functioning of brain systems underlying sensation, cognition, behaviour, and disease.

Antirequisite(s): Not open to students in the Neuroscience program. Credit for Neuroscience 321 and Psychology 375 will not be allowed.

Neuroscience 401 3 units; H(0-6)

Advanced Neuroscience Laboratory

Advanced neurophysiological, behavioural, molecular biological, and histological techniques used to investigate nervous system function will be covered. The course is delivered in the form of hypothesis-driven research projects.

Prerequisite(s): Zoology 461 and admission to the Neuroscience program.

Neuroscience 411 3 units; H(3-0)

Cellular and Systems Neuroscience

Structure and function of the nervous system examined through neurochemistry, intracellular signal transduction, mechanisms of communication, and functional organization of the nervous system at the cellular and systems levels.

Prerequisite(s): Zoology 461 and admission to the Neuroscience program, or a minimum grade of "B+" in Zoology 461.

Note: This course is offered as part of an honours program.

Neuroscience 421 3 units; H(3-0)

Neuroscience: History, Ethics and Society

An exploration of topics in the history of neuroscience, aspects of ethics as they apply to studies of the brain and how neuroscience fits into society.

Prerequisite(s): 48 units (8.0 full-course equivalents) and admission to the major in Neuroscience, Biological Sciences, Health Sciences or Psychology.

Neuroscience 474 3 units; H(3-0)

Neuroscience 474 (Psychology 474)

Neuroscience of Learning and Memory

An examination of learning and memory from a neuroscience perspective. Molecular, cellular, systems level, and behavioural approaches will be applied to themes such as consolidation, amnesia, and pathological processes.

Prerequisite(s): Psychology 375; 301 or 312; and admission to the Neuroscience Honours program.

Neuroscience 475 3 units; H(3-0)

Psychology 475

Drugs and Behaviour

The behavioural effects of drugs specifically employed to affect the nervous system, as seen...
in the treatment of mental disorders, behavioural disorders, and other conditions such as Parkinson’s, Huntington’s and Alzheimer’s diseases. Neuro-pharmacologic agents will be discussed as they relate to the biochemistry and physiology of putative neurotransmitters.

Prerequisite(s): Psychology 375; 301 or 312; and admission to the Neuroscience Program.

Neuroscience 477
(Psychology 477)
3 units; H(3-0)

Sleep and Biological Rhythms
Behaviours are temporarily co-ordinatated and occur in a rhythmic fashion. The most obvious rhythmic behaviour humans engage in is sleeping. We spend one-third of our lives asleep. This course will survey the behavioural, physiological, and clinical aspects of sleep and biological rhythms.

Prerequisite(s): Psychology 375; 301 or 312; and admission to the Neuroscience Honours program.

Neuroscience 478
(Psychology 478)
3 units; H(3-3)

Behavioural Neuroscience
An examination of the neural underpinnings of behaviour. Experimental approaches, neural mechanisms, and health implications will be explored through both lecture material and laboratory exercises.

Prerequisite(s): Psychology 375; 301 or 312; and admission to the Neuroscience Program.

Neuroscience 479
(Psychology 479)
3 units; H(3-0)

Human Neuropsychology
Integration of the literature on human brain damage with the evidence from animal research. Topics include developmental neuropsychology; cognitive deficits associated with frontal, parieto-occipital, and temporal lobes; origins and mechanisms in the determination of cerebral dominance; disorders of learning and memory; long-term effects of cerebral lesions.

Prerequisite(s): Psychology 375; 301 or 312; and admission to the Neuroscience program.

Neuroscience 500
6 units; F(1-8)

Honours Thesis in Neuroscience
Research project undertaking critical assessment of data collected testing and hypothesis derived from the literature. To be conducted under the direction of one or more faculty members from departments participating in the Neuroscience program. Formal written and oral reports must be presented on completion of the course.

Prerequisite(s): 75 units (12.5 full-course equivalents) and admission to the Neuroscience program.

Neuroscience 506
6 units; F(0-6)

Special Topics in Neuroscience
Lectures, seminars, term papers and training in theoretical and/or laboratory methods.

Prerequisite(s): 60 units (10.0 full-course equivalents) and admission to the Neuroscience program.

MAY BE REPEATED FOR CREDIT

Neuroscience 507
3 units; H(0-6)

Special Topics in Neuroscience
Lectures, seminars, term papers and training in theoretical and/or laboratory methods.

Prerequisite(s): 60 units (10.0 full-course equivalents) and admission to the Neuroscience program.

MAY BE REPEATED FOR CREDIT

Neuroscience 511
3 units; H(2-1S)

Neuroscience Seminar
Students will attend the weekly Hotchkiss Brain Institute seminars. Following each seminar, students will discuss the presentation under the tutelage of a moderator familiar with the field of enquiry.

Prerequisite(s): 75 units (12.5 full-course equivalents) and admission to the Neuroscience program.

Neuroscience 521
(Psychology 521)
3 units; H(3-0)

Cognitive and Clinical Neuroscience
An examination of how the human central nervous system controls higher order, complex behaviours. Experimental and clinical evidence for the neurobiological regulation of memory, language, attention, perception and emotion will be evaluated.

Prerequisite(s): Psychology 375; 301 or 312; and admission to the Neuroscience program.

Neuroscience 531
(Psychology 531)
3 units; H(3-0)

Nervous System Development
This course covers the fundamental principles of the development of nervous systems, integrating anatomical, cellular, molecular, genetic and behavioural approaches.

Prerequisite(s): Psychology 475 or Neuroscience 475; and admission to the Neuroscience program.

Nursing NURS

Instruction offered by members of the Faculty of Nursing.

Courses are restricted to students admitted to the Faculty of Nursing.

Note: Where applicable, Clinical Practice courses must be taken concurrently with the theoretical components.

Junior Courses

Nursing 201
3 units; H(3-0)

Introduction to Nursing
Basic concepts of nursing, individual, family, community, health, environment, and the relationships among them. Historical development of the nursing profession, its unique position within the healthcare system, and the roles of various health-care providers.

Corequisite(s): Nursing 223 and 207.

Nursing 203
3 units; H(0-3)

Foundations for Nursing Practice
Development of skills applicable to nursing practice.

Note: Students must obtain a grade of “C” or better to proceed with program.

Nursing 205
3 units; H(3-0)

Therapeutic Interventions
Nursing therapeutics and pharmacology in wellness and illness states across the lifespan.

Corequisite(s): Nursing 209 and 211.

Nursing 207
3 units; H(3-0)

Nursing Inquiry

Corequisite(s): Nursing 201 and 223.

Nursing 209
3 units; H(104 hours)

Nursing Practice
Continuing development of skills for nursing practice with opportunity to apply assessment, psychomotor and communication skills in the helping relationship.

Prerequisite(s): Nursing 201, 203 and current CPR Basic Cardiac Life Support.

Corequisite(s): Nursing 205 and 211.

NOT INCLUDED IN GPA

Nursing 211
3 units; H(2-3)

Health Assessment
Knowledge and basic skills needed to complete a health history and a holistic assessment of healthy individuals. Students will practice health assessment skills on each other.

Prerequisite(s): Nursing 201, 207, 221, 223 and current CPR Basic Cardiac Life Support.

Corequisite(s): Nursing 222 and 224.

Note: Students must obtain a grade of “C” or better to proceed with program.

Nursing 213
3 units; H(80 hours in Spring Intersession)

Consolidation Practicum I
Integration of learning and continuing development of professional relationships with individuals and families experiencing health challenges in selected settings.

Prerequisite(s): Nursing 211, 221, 222, 224 and current CPR Basic Cardiac Life Support.

Corequisite(s): Nursing 227.

NOT INCLUDED IN GPA

Nursing 221
3 units; H(3-2)

Human Anatomy and Physiology I
The use of lecture and laboratory approaches to introduce students to the study of the human body. It begins with introductory concepts related to terminology and basic chemical processes, then examines cellular physiology and tissues, and subsequently reviews the integumentary, skeletal, muscular, and nervous systems.

Prerequisite(s): Biology 30.

Antirequisite(s): Credit for Nursing 221 and either Zoology 269 or Kinesiology 259 will not be allowed.

Note: The laboratory component of the course generally parallels and reinforces lecture concepts through the use of tutorials, models, histological slides and computer simulations. Open only to students in the Bachelor of Nursing Program offered by the Qatar Faculty.

Nursing 222
3 units; H(3-2)

Human Anatomy and Physiology II
A review of some of the important concepts from Human Anatomy and Physiology I and then examines the endocrine, cardiovascular, respiratory, digestive, urinary and reproductive systems. Physiological processes that contribute to body defences (the immune system) as well as metabolism and temperature regulation are also covered.

Prerequisite(s): Nursing 221.

Antirequisite(s): Credit for Nursing 222 and either Zoology 269 or Kinesiology 260 will not be allowed.

Note: The laboratory component of the course generally parallels and reinforces lecture concepts through the use of tutorials, models, histological slides and computer simulations. Open only to students in the Bachelor of Nursing Program offered by the Qatar Faculty.
Courses of Instruction

Nursing 223 3 units; H(3-2S-2)

**Foundational Concepts in Nursing Practice I**
This theory and experiential course introduces health care concepts foundational to nursing practice. Students apply basic therapeutic nursing skills that support health in laboratory, simulation, and practice settings.
Prerequisite(s): Current CPR Basic Life Support.
Corequisite(s): Nursing 201, 207 and 221.
Antirequisite(s): Credit for Nursing 223 and 203 will not be allowed.

Nursing 224 3 units; H(3-2S-2)

**Foundational Concepts in Nursing Practice II**
This theory and experiential course builds on learning about health care concepts foundational to nursing practice from Nursing 223. Students build their basic therapeutic nursing skills that support health in laboratory, simulation, and practice settings.
Prerequisite(s): Nursing 223 and current CPR Basic Life Support.
Corequisite(s): Nursing 211 and 222.
Antirequisite(s): Credit for Nursing 224 and 209 will not be allowed.

Nursing 227 3 units; H(3-2)

**Nursing Therapeutics for Alterations in Health I**
This theory and experiential course provides an integrated view of the pathology of injury and disease and pharmacological interventions for the nurse. Foundational concepts of pathophysiology and pharmacology are introduced.
Prerequisite(s): Nursing 211 and 222.
Antirequisite(s): Credit for Nursing 227 and 205 will not be allowed.

Nursing 285 3 units; H(3-0)

**The Discipline and Profession of Nursing I: Foundational Professional Concepts**
The study of concepts foundational to the profession and discipline of nursing. Exploration of concepts of complexity, transition, social justice, ethic of caring, health promotion and principles of population health. Emphasis on understanding the social commitments and contributions made by nursing within its professional scope of practice. Includes an overview of the Canadian health-care system.
Corequisite(s): Nursing 287, 288 and 289.

Nursing 287 3 units; H(3-0)

**The Science of Health II: Communities and Populations**
Determinants of health, health indices, principles and methods of epidemiology, and population-based health management are emphasized. Conduct of health surveys and use of population-based health data to identify health risk are addressed. Integration of concepts of microbiology and risk elevation related to ages and stages of the lifespan. Basic tenets of the meaning of evidence-based practice will be introduced.
Corequisite(s): Nursing 285, 288 and 289.

Nursing 288 3 units; H(3-0)

**Supporting Health I: Communities and Populations**
Focus on a broad understanding of health and the basic frameworks and principles of population health promotion, primary health care and upstream thinking. Explores how health can be created and supported in a society. Emphasis on developing communication and relationship building skills to work effectively in a group or a team. Strategies to assess protect and promote the health of groups and communities.
Corequisite(s): Nursing 285, 287 and 289.

Nursing 289 6 units; F(247 hours)

**Integrating Nursing Roles & Practices I: Learning, Praxis and Scholarship in the Practicum Setting**
Integration and application of theoretic knowledge in simulated and nursing practice settings. Develop skills and competencies in nursing of groups, communities, and populations within a collaborative practice model.
Prerequisite(s): Current CPR Health Care Provider Level (HCP).
Corequisite(s): Nursing 285, 287 and 288.

**NOT INCLUDED IN GPA**

Nursing 285, 287, 288 and 289.

**Senior Courses**

Nursing 301 3 units; H(3-0)

**Adult Health Theory**
Focus on expanding the theoretical understanding of the adult experiencing complex acute and chronic illness.
Prerequisite(s): Nursing 213 (BNRT students only).
Corequisite(s): Nursing 302.

Nursing 302 6 units; F(208 hours within one term)

**Adult Health Practice**
Managing care from a holistic and interdisciplin ary perspective for more acutely and chronically ill patients with a primary focus on the adult in acute medical/surgical settings.
Prerequisite(s): Nursing 213 (BNRT students only), 327 and current CPR Basic Cardiac Life Support.
Corequisite(s): Nursing 301.

**NOT INCLUDED IN GPA**

Nursing 301, 302.

Nursing 303 3 units; H(3-0)

**Psychiatric/Mental Health Theory**
Exploration of concepts related to individuals and families experiencing mental health and illness.
Prerequisite(s): Nursing 213 (BNRT students only).
Corequisite(s): Nursing 305.

Nursing 305 3 units; H(128 hours within one term)

**Psychiatric/Mental Health Practice**
Application of concepts, values, and skills with individuals, groups, and families experiencing mental health and illness.
Prerequisite(s): Nursing 213 (BNRT students only) and current CPR Basic Cardiac Life Support.
Corequisite(s): Nursing 303.

**NOT INCLUDED IN GPA**

Nursing 303, 305.

Nursing 307 3 units; H(3-0)

**Nursing of Families**
Exploration of family nursing theory, models, and relational nursing practices which involve and support families within a variety of nursing practice contexts.
Prerequisite(s): Nursing 213 (BNRT students only).

Nursing 309 3 units; H(3-0)

**Nursing Research**
Overview of research methodologies with emphasis on the critique of research and its use in nursing practice.
Note: Completion of a statistics course is strongly recommended prior to taking Nursing 309.

Nursing 311 3 units; H(3-0)

**Pathophysiology**
An overview of human pathophysiological concepts at the cellular, organ and systems level.
Prerequisite(s): Nursing 221 and 222.
Antirequisite(s): Credit for Nursing 311 and 312 will not be allowed.

Nursing 385 3 units; H(3-0)

**The Discipline and Profession of Nursing II: Inter-Professional Practice and Professional Accountability**
Concepts of inter-professional practice and its core competencies are introduced. Examination of the contributions of nursing and nursing sensitive outcomes. Full scope nursing roles in interprofes sional and interprofessional teams are explored, in particular as pertains to the complex healthcare needs of families in transition and at risk. Of primary focus is exploration of the scholarly and research foundations of the profession as the basis of the professional role of a Registered Nurse.
Prerequisite(s): Nursing 285, 287, 288 and 289.
Corequisite(s): Nursing 387, 388 and 389.

Nursing 387 3 units; H(3-0)

**The Science of Health II: Families in Transition**
Holistic models addressing bio/psycho/social/spiritual/cultural dimensions of family health processes are addressed. Focus on the epidemiological, physiological, pathology, and mental health knowledge that underlies the assessments of key family transitional periods. Young and senior families are highlighted.
Prerequisite(s): Nursing 285, 287, 288 and 289.
Corequisite(s): Nursing 383, 388, and 389.

Nursing 388 3 units; H(3-0)

**Supporting Health II: Families in Transition**
Focus on how health, inclusive of mental health and wellness, is created and supported in families. The study of how health can be enhanced or compromised in important transition periods across the lifespan - from young to senior families. Examination of the manner in which nursing practice and health education serve to enhance family health.
Prerequisite(s): Nursing 285, 287, 288 and 289.
Corequisite(s): Nursing 385, 387 and 389.

Nursing 389 6 units; F(247 hours)

**Integrating Nursing Roles and Practices II: Learning, Praxis and Scholarship in the Practicum Setting**
Integration and application of theoretic knowledge in simulated and nursing practice settings. Develop skills and competencies in nursing families in transitional periods across the lifespan. Focus
Courses of Instruction

Nursing 401  
3 units; H(3-0)  
Community Health Theory  
Exploration of concepts related to the focus of the community as a client. Public health, populations at risk for physical and psychosocial disruptions in health, environmental health, cultural health patterns and beliefs, group dynamics and communications with groups.  
Prerequisite(s): Nursing 285, 287, 288 and 289 and current CPR Health Care Provider Level (HCP).  
Corequisite(s): Nursing 385, 387, and 388.  
NOT INCLUDED IN GPA

Nursing 402  
6 units; F(208 hours)  
Community Health Practice  
Application of concepts, values, and skills with the community as the focus of care. Experiences are drawn from a variety of rural and urban settings.  
Prerequisite(s): Nursing 213 (BNRT students only) and current CPR Basic Cardiac Life Support.  
Corequisite(s): Nursing 401.

Nursing 403  
3 units; H(5-0)  
Childbearing/Childrearing Families - Theory  
Maternity and child health with family as context; the role of nursing pertinent to wellness patterns and alterations in health in these populations.  
Prerequisite(s): Nursing 213 (BNRT students only) and 327.  
Corequisite(s): Nursing 404.

Nursing 404  
6 units; F(208 hours within one term)  
Childbearing/Childrearing Families - Practice  
Facilitating and assisting childbearing and childrearing families to identify and respond to needs related to health promotion, health maintenance, and illness intervention in a variety of nursing practice settings.  
Prerequisite(s): Nursing 213 (BNRT students only), 327 and current CPR Basic Cardiac Life Support.  
Corequisite(s): Nursing 403.  
NOT INCLUDED IN GPA

Nursing 405  
3 units; H(3-0)  
Issues in Professional Practice  
The nursing role related to the dynamics of the nursing profession and the health-care system; nursing and contemporary health issues.  
Prerequisite(s): Nursing 301, 302, 303 and 305.

Nursing 406  
6 units; F(160 hours within one term)  
Consolidation Practicum II  
Consolidation experience which includes theory and practice opportunities, and prepares students for the final year and selected area of focus.  
Prerequisite(s): All Nursing courses with the exception of Nursing 307, 309 or 405 and senior Nursing options, and current CPR Basic Cardiac Life Support.  
NOT INCLUDED IN GPA

Nursing 411  
3 units; H(3-0)  
Nursing Scholarship  
An inquiry-based approach to issues and trends in nursing scholarship.  
Prerequisite(s): Nursing 421.

Nursing 421  
3 units; H(3-0)  
Nursing of Families  
Nursing of families in a variety of settings and clinical populations.  
Prerequisite(s): A course in human anatomy and physiology, and current CPR Basic Rescuer Certificate.  
Corequisite(s): Nursing 441.

Nursing 441  
3 units; H(3-3)  
Health Assessment  
Assessment of individuals in health and illness including nursing examination. Students will be expected to practice assessment skills in a clinical/laboratory setting.  
Prerequisite(s): Nursing 421.

Nursing 461  
3 units; H(4-0)  
Pathophysiology  
Selected pathophysiological concepts and their relationship to human systems with an opportunity to explore an area of pathophysiology in depth.  
Prerequisite(s): A course in human anatomy and physiology.

Nursing 485  
3 units; H(3-0)  
The Discipline and Profession of Nursing III: Furthering Inquiry and Scholarship in Nursing  
Focus on strategies for the development of evidence-informed nursing practice. Examination of strategies to critique and facilitate the use of evidence for practice. Introduction to basic quantitative and qualitative methods used in nursing research.  
Prerequisite(s): Nursing 385, 387, 388, 389.

Nursing 487  
3 units; H(3-0)  
The Science of Health III: People Experiencing Life-Threatening Health Challenges  
Theoretical understanding of the holistic experience of acuity and life-threat for individuals and families is presented. Epidemiology, pathophysiology, diagnostic studies, complex physical and other nursing assessments relevant to common chronic health challenges, including mental health disorders.  
Prerequisite(s): Nursing 385, 387, 388, 389.

Nursing 495  
3 units; H(3-0)  
Understanding the Challenges of Leadership and Systems of Care  
This course explores knowledge related to the current health-care system, systems of care responsive to the needs of clients with chronic health disruptions, and nursing roles of leadership and delegation. Evidence examining the efficacy of systems of care and the efficacy of nursing roles, practices, and contributions are highlighted. Examination of selected approaches to nursing research.  
Prerequisite(s): Nursing 485, 487, 488 and 489.

Nursing 497  
3 units; H(3-0)  
The Science of Health IV: People Experiencing Chronic Health Challenges  
Experience of living with chronic health challenges, including common complications. Epidemiology, pathophysiology, diagnostic studies, complex physical and other nursing assessments relevant to common chronic health challenges, including mental health disorders. A holistic perspective is taken to examine the challenges of ongoing health management faced by populations of chronically ill individuals and their families.  
Prerequisite(s): Nursing 485, 487, 488 and 489.

Nursing 499  
3 units; H(3-0)  
Supporting Health IV: People With Chronic Health Challenges  
Nursing practices in caring for the chronically ill. A focus on practices to achieve healthful transitions and preservation of quality of life are emphasized. Common treatment modalities are presented including nursing therapeutics and pharmacological approaches to management of common chronic diseases. Tertiary prevention is emphasized and concepts and approaches to ongoing health assessment, health education, self-management, harm reduction, support, restoration, and palliation are addressed.  
Prerequisite(s): Nursing 485, 487, 488 and 489.

Practicum Setting  
Practicum Setting  
III: Learning, Praxis and Scholarship in the Practicum Setting  
Integration and application of theoretic knowledge in simulated and nursing practice settings. Long-term nursing care of individuals, families and populations with chronic health challenges. Implementation of effective therapeutic relationships, complex assessments, reasoned clinical decision-making, client and family health educa-
### Courses of Instruction

- **Nursing 301, 302, 303, 305, 401, 402, 403, 404.**

- **Nursing 305.**

- **Nursing 501.**

- **Advanced Concepts in Nursing Practice**
  Leadership, management, and change within the context of nursing and health care. Exploration of strategies for transition to the graduate role and responsibilities inherent in being a nursing professional.

- **Prerequisite(s):** Nursing 301, 302, 303, 309, 401, 402, 403, and 404.

- **Nursing 502.**

  - **6 units; F(328 hours within one term)**
  - **Senior Clinical Practicum**
    Synthesis, application and further acquisition of knowledge, skills, and attitudes in a selected nursing practice setting. Emphasis on complexity of nursing care with clients (individuals, families and/or aggregates). Selection of focus area will be made through consultation with faculty.

  - **Prerequisite(s):** All required Nursing courses except Nursing 501 (BNRT students only) and current CPR Basic Cardiac Life Support.

  - **Corequisite(s):** Prerequisite or Corequisite: Nursing 501.

- **Nursing 503.**

  - **3 units; H(3-0)**

- **Selected Topics in Nursing**

- **Courses provide an in-depth exploration of nursing related to a clinical population and quality care topic.**

- **MAY BE REPEATED FOR CREDIT**

- **Nursing 517.**

  - **3 units; H(3-0)**

- **Philosophy and Practice in Palliative Care**

- **Examination of the philosophy of palliative/hospice care, taught by faculty from many disciplines. An important focus includes the students’ self-exploration of their own beliefs, values, and attitudes about life, illness, death, and dying, and how this self-exploration shapes interactions with those we care for.**

- **Nursing 531.**

  - **3 units; H(3-2)**

- **Community Health Nursing Theory**

  - **Concepts and models related to population-focused nursing with emphasis on community, health promotion, team building, assessment strategies, and planning approaches.**

- **Nursing 533.**

  - **3 units; H(128 hours within one term)**

- **Community Health Nursing Clinical Practice**

  - **Application and synthesis of concepts and models related to population-focused nursing.**

  - **Prerequisite(s):** Nursing 531, current CPR Basic Cardiac Life Support, and proof of current, active nurse registration.

  - **Antirequisite(s):** Credit for Nursing 533 and 532 will not be allowed.

- **Nursing 537.**

  - **3 units; H(3-0)**

- **Nursing Leadership and Management**

  - **Professional and interpersonal relationships in nursing practice with an emphasis on leadership, interdisciplinary collaboration, and the management of nursing care at macro and micro levels.**

- **Nursing 539.**

  - **3 units; H(3-0)**

- **Research in Nursing**

  - **Concepts and process necessary for critiquing research and application to nursing practice.**

  - **Note:** Completion of a statistics course is strongly recommended prior to taking Nursing 539.

- **Nursing 543.**

  - **3 units; H(128 hours within one term)**

- **Senior Practicum**

  - **Synthesis and application of theoretical concepts within a selected area of practice with emphasis on further development of self-directed skills and professional attitudes.**

  - **Prerequisite(s):** Nursing 441 and 533, current CPR Basic Cardiac Life Support, and proof of current, active nurse registration.

  - **Antirequisite(s):** Credit for Nursing 543 and 542 will not be allowed.

- **Nursing 585.**

  - **3 units; H(3-0)**

- **The Discipline and Profession of Nursing V: Preparing for Professional Role Transition**

  - **This course focuses on the integration of senior students into the environment of professional nursing practice with an evidence-informed emphasis on the essentials of leadership, relational and practice ethics, effective inter and intra-professional collaboration, communication and conflict management for the purpose of facilitating a healthy transition to the role of a new graduate professional nurse within a contemporary healthcare climate.**

  - **Prerequisite(s):** Nursing 495, 497, 498, 499.

  - **Corequisite(s):** Nursing 589 and two Senior Nursing Option courses.

- **Nursing 589.**

  - **6 units; F(247 hours)**

- **Integrating Nursing Roles and Practices V: Learning, Praxis and Scholarship in the Practicum Setting**

  - **This focused clinical experience, supported by two corequisite substantive nursing option theory courses, is aimed at refining critical thinking and competent use of theoretic frameworks and evidence to support clinical reasoning processes including: comprehensive assessment, holistic analysis and interpretation of client data, and competence and confidence in clinical decision-making. Students will choose a focused area of nursing practice.**

  - **Prerequisite(s):** Nursing 495, 497, 498, 499 and current CPR Basic Cardiac Life Support.

  - **Corequisite(s):** Nursing 585 and two Senior Nursing Option courses.

- **Nursing 599.**

  - **15 units (2.5 full-course equivalents) (378 clinical hours)**

- **Integrating Nursing Roles and Practices VI: Transition to Nursing Practice**

  - **Synthesis, application and further acquisition of knowledge, skills, and attitudes in a selected nursing practice setting. Emphasis on complexity of nursing care with clients (individuals, families, and aggregates). Selection of focus area will be made through consultation with faculty.**

  - **Prerequisite(s):** Nursing 585 and 589, two Senior Nursing Option courses and current CPR Health Care Provider Level (HCP).

- **Nursing 603.**

  - **3 units; H(156 hours)**

- **Independent Supervised Clinical Practicum**

  - **Prerequisite(s):** Consent of the Faculty.

  - **MAY BE REPEATED FOR CREDIT**

- **Nursing 605.**

  - **3 units; H(3-0)**

- **Philosophical Knowledge and Advanced Nursing Practice**

  - **Exploration of the philosophical knowledge of advanced nursing practice. A process of critical analysis, reflection and inquiry into the various philosophical approaches, ways of knowing, theories concepts and paradigms leading to a philosophically informed analysis of the knowledge practices activated during the conduct of nursing work.**

  - **Prerequisite(s):** Consent of the Faculty.

- **Nursing 607.**

  - **3 units; H(39 hours)**

- **Independent Guided Study**

  - **Prerequisite(s):** Consent of the Faculty.

  - **MAY BE REPEATED FOR CREDIT**

- **Nursing 609.**

  - **3 units; H(3-1)**

- **Applied Statistics for Nursing Research**

  - **The understanding of the conceptual basis, use, and pitfalls of common bio statistical methods used in the analyses of data, as well as, being able to analyze data using computer software.**

- **Prerequisite(s):** Consent of the Faculty.

- **Nursing 611.**

  - **3 units; H(3-0)**

- **Theoretical Knowledge and Advanced Nursing Practice**

  - **Introduction to substantive theory related to advanced nursing practice. As students identify their population focus they will examine frameworks for advanced nursing practice that inform their care for individuals, families and communities of practice.**

  - **Prerequisite(s):** Consent of the Faculty.

- **Nursing 617.**

  - **3 units; H(3-0)**

- **Philosophy and Practice in Palliative Care**

  - **Examination of the philosophy of palliative/hospice care, taught by faculty from many disciplines. An important focus includes the students’ self-exploration of their own beliefs, values, and attitudes about life, illness, death, and dying, and how this self-exploration shapes interactions with those we care for.**

  - **Prerequisite(s):** Consent of the Faculty.

- **Nursing 621.**

  - **3 units; H(3-0)**

- **Quantitative Designs and Analysis**

  - **Critical analysis of nursing research. Emphasis on the study of research designs appropriate to clini-**
Courses of Instruction

Nursing NURS 483

Nursing 623 3 units; H(3-0)
(formerly Nursing 601.23)

Hermeneutic Phenomenology
Inquiry into the philosophical and historical influences that have shaped hermeneutic phenomenology as an approach to nursing and health care. Exploration of interpretive practices essential to the conduct of hermeneutic research.
Prerequisite(s): Consent of the Faculty.

Nursing 627 1.5 units; Q(18 hours)

Academic Scholarly Writing
An intensive two-day writing workshop with additional pre-course reading and writing. Students will prepare for the course by reading texts and writing scholarly accounts that may be based in their nursing practice.
Prerequisite(s): Consent of the Faculty.

Nursing 629 1.5 units; Q(18 hours)

Evidence-Informed Nursing
Building on foundations of critical inquiry by emphasizing the evaluation and interpretation of qualitative and quantitative research, students develop an enhanced ability to use systematic reviews and research-based innovations in making evidence-based decisions for client care, nursing knowledge and organizational or system improvement.
Prerequisite(s): Consent of the Faculty.

Nursing 633 3 units; H(3S-8)

Leadership in Advanced Nursing Practice and Practicum I
A critical examination of theories and principles of leadership and leadership development as it relates to individual leadership practices, leading multidisciplinary teams, and leadership within the broader health system. Students will explore and discuss the influence of leaders and leadership on the health-care workplace, on client/population outcomes, and the health-care system. In the practicum project students will utilize evidence to assess their leadership skills and competencies, and how they relate to the development and evaluation of their practicum project.
Prerequisite(s): Nursing 605 and 611.

Nursing 634 6 units; F(2S-8)

Advanced Nursing Practice: Practicums II and III
The purpose of clinical practicums II and III is to follow through with the project that was proposed in Nursing 633 including: implementing the study, analyzing and interpreting the findings, writing and submitting the paper for publication and/or presenting the paper at a conference.
Prerequisite(s): Nursing 633.

Nursing 642 6 units; F(5S2-180 within 8-week block)

Nurse Practitioner Practicum I and Role Integration
Building on the foundational knowledge of advanced pathophysiology, advanced health assessment and pharmacology, this course provides an opportunity for students to begin to acquire advanced knowledge and skills related to clinical diagnosis, decision-making and management of commonly presented acute and chronic health problems. Additionally this course will address issues related to nurse practitioner role integration.
Prerequisite(s): Nursing 661, 663 and 665 or consent of the Faculty, registration in Post-Master's NP Diploma program or the integrated MN/NP program.

Nursing 644 6 units; F(525-180 within 8-week block)

Nurse Practitioner Practicum II
Diagnostic and management skills related to care of patients. Further development of skills in clinical history taking, physical assessment, and diagnostic testing.
Prerequisite(s): Nursing 642.

Nurse Practitioner Practicum III
Learning opportunities and practice experience with emphasis on clinical diagnosis, diagnostic imaging, laboratory tests, differential diagnosis, and patient management.
Prerequisite(s): Nursing 644.

Nurse Practitioner Practicum IV
Consolidation of components of NP role in specialty focus.
Prerequisite(s): Nursing 646.

Nursing 661 3 units; H(4S-0)

Advanced Pathophysiology and Therapeutics
Study of pathophysiological phenomena and therapeutics at an advanced level. Classes will be a combination of didactic presentations, seminars and case studies. Students are invited to explore morbidity and mortality in the Canadian population in general and in their area of focus in particular.
Prerequisite(s): Consent of the Faculty.

Nursing 663 3 units; H(3S-0)

Pharmacotherapeutics in Advanced Nursing Practice
Principles of drug action, pharmacokinetics and pharmacotherapeutics in the context of advanced nursing practice. Opportunity to investigate pharmacotherapeutics specific to student's individual client populations.
Prerequisite(s): Consent of the Faculty.

Nursing 665 3 units; H(3S-3)

Advanced Health Assessment
Builds upon fundamental health assessment skills to provide a solid foundation for advanced assessment. Focuses on history taking physical examination, diagnostic reasoning and clinical judgment, as well as selected diagnostic skills necessary for advanced practice.
Prerequisite(s): Consent of the Faculty.

Nursing 683 3 units; H(3S-0)

Qualitative Designs and Analysis
Exploration of research methods based primarily on inductive reasoning. Methods, issues and techniques of sampling, data collection, analysis, and interpretation will be explored. Experience will be provided in data collection, management, and analysis.
Prerequisite(s): Consent of the Faculty.

Nursing 701 3 units; H(3-0)

Doctoral Special Topics
Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Nursing 705 3 units; H(3-0)

Philosophy of Science in Nursing
Exploration of major philosophical positions and their contributions to the generation and evaluation of knowledge. Examination of the development and evolution of nursing knowledge.
Prerequisite(s): Consent of the Faculty.

Nursing 707 3 units; H(39 hours)

Directed Study
Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Nursing 711 3 units; H(2S-0)

Doctoral Scholarship in Nursing
Focus on development of a nurse scientist. Seminar discussions will address launching a viable and fundable program of research, grantsmanship, managing multidisciplinary research teams, and establishing a record of publication and dissemination.
Prerequisite(s): Consent of the Faculty.

Nursing 721 3 units; H(3-0)

Advanced Quantitative Research Methods
Opportunities for developing nurse scientists and other health professional doctoral students to increase understanding of, and ability to utilize, quantitative research methods for scientific inquiry. Focuses on identifying issues/dilemmas arising during the research process and methods to address these challenges.
Prerequisite(s): Nursing 621.

Nursing 723 3 units; H(3-0)

Hermeneutic Phenomenology
Inquiry into the philosophical and historical influences that have shaped hermeneutic phenomenology as an approach to nursing and health care research. Exploration of interpretive practices essential to the conduct of hermeneutic research.

Nursing 733 3 units; H(2S-0)

Doctoral Thesis Seminar
Opportunity for students to discuss development of their thesis proposal with a focus on the question, design, ethical considerations, and funding.
Prerequisite(s): Nursing 705 and one graduate level advanced research course.

Nursing 769 3 units; H(3-0)

Contemporary Issues in Health Care
Theoretical examination of concepts and research for increasing the availability and accessibility of health care. Appraisal of the relationships among leadership, policy and practice issues from a multidisciplinary perspective.
Prerequisite(s): Consent of the Faculty.
Courses of Instruction

Nursing 783 3 units; H(3-0)

Advanced Qualitative Research Methods
Exploration of the philosophical foundations and practice of qualitative research methods in health care inquiry. Emphasis on interpretive assumptions, and practices relevant to the conduct of qualitative research.

Prerequisite(s): Nursing 683.

Operations Management OPMA

Instruction offered by members of the Haskayne School of Business.

Senior Courses

Operations Management 301 3 units; H(3-0)

Introduction to Operations and Supply Chain Management
A survey of the decision processes in production and operations management and their relationship to other business functions. Topics include project planning and scheduling, inventory management, quality management, capacity planning, facilities layout, and supply chain management.

Prerequisite(s): Any 200-level Mathematics or Statistics 213 (or equivalent, including Statistics 201), and Entrepreneurship and Innovation 201.

Antirequisite(s): Credit for Operations Management 301 and 317 will not be allowed.

Note: Not available for credit toward the Bachelor of Commerce degree. Preference in enrolment is given to students who have declared a Management and Society Minor.

Operations Management 317 3 units; H(3-0)

Fundamentals of Operations and Supply Chain Management
Introduction to the wide applicability, broad scope, strategic importance and major decisions of operations management, as well as important interactions with other functional areas. Topics covered include the design, control and improvement/innovation of business and other processes, project planning and control, quality management, statistical quality control, inventory management, just-in-time systems, and supply chains.

Prerequisite(s): Admission to the Haskayne School of Business, Business and Environment 291 or Management Studies 217, and Statistics 213.

Antirequisite(s): Credit for Operations Management 317 and 301 will not be allowed.

Operations Management 401 3 units; H(3-0)

Production Planning and Control
An in-depth treatment of inventory and production within an organization. Topics covered include inventory control, sales and operations planning, materials requirements planning, and lean processes. Recent advances in manufacturing may also be discussed.

Prerequisite(s): Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391.

Operations Management 403 3 units; H(3-0)

Managing Quality in Products and Services
An in-depth treatment of quality management practices and techniques for products and services. Topics and techniques covered include designing and assuring quality, quality issues in the supply chain, statistical quality measurement, and continuous process and quality improvement.

Prerequisite(s): Admission to the Haskayne School of Business and Operations Management 317.

Operations Management 405 3 units; H(3-0)

Service Operations Management
The management of service businesses from both a qualitative and quantitative perspective. Topics may include service design and performance measurement, service quality and recovery, managing people in service industries, service demand forecasting, scheduling, managing lineups, yield management, network optimization, and the role of information technology. Industry examples include travel and hospitality, professional services, retail, communication and transportation and banking.

Prerequisite(s): Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391.

Operations Management 407 3 units; H(3-0)

Project Management
The management of projects in a variety of settings such as software development and installation, disaster relief, new product development, advertising campaigns and financial auditing are examined. Material from the organizational, planning, technical, financial, informational, and logistical aspects of project management will emphasize the interdisciplinary nature of projects. Use of commercial computer software for planning and scheduling projects is learned.

Prerequisite(s): Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391.

Operations Management 409 3 units; H(3-3T)

Computer Simulation for Business
Companies encounter numerous problems that are characterized by uncertainties for which they need to find a solution. Simulation provides a means for imitating the behaviour of real-life situations in a computer environment, allowing for “what-if” analyses of different scenarios. Hands-on experience in creating simulation models and obtaining reliable results for decision making with the use of different simulation techniques is gained.

Prerequisite(s): Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391.

Operations Management 411 3 units; H(3-0)

Field Investigation in Operations Management
Field investigation concerned with operational improvements with an off-campus organization. Students work in teams on a single project. Both oral and written reports are required.

Prerequisite(s): Admission to the Haskayne School of Business, and 60 units (10.0 full-course equivalents) including Operations Management 317, Management Studies 391 and two 400-level Operations Management or Supply Chain Management courses.

Operations Management 415 3 units; H(3-1T)

Prescriptive Models in Business Analytics
Identification of data requirements for analytical decision-making. Case studies used throughout to develop insight for decision making while dealing with incomplete and ambiguous data. Introduction to VBA-enabled spreadsheet modelling to design and implement optimization models without with uncertainty as well as advanced Monte Carlo simulation.

Prerequisite(s): Admission to the Haskayne School of Business and Management Studies 391.

Operations Management 419 3 units; H(3-0)

Predictive Models in Business Analytics
Decision making with big data and predictive analytics methods. Students learn to describe and visualize business data, as well as to make predictions and classifications with data. Methods include regression models, regression trees, association rules and cluster analysis.

Prerequisite(s): Admission to the Haskayne School of Business, Management Studies 217 and Statistics 217.

Operations Management 559 3 units; H(3-0)

Selected Topics in Operations Management
Investigation of selected topics in Operations Management.

Prerequisite(s): Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391. For certain topics, consent of the Haskayne School of Business will also be required.

Note: For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Operations Management 601 3 units; H(3-0)

Operations Management
Management of the production and/or service delivery system of the organization in concert with marketing, human resources, finance, and information systems. Management decision making on a continuum from day-to-day operating decisions such as quality control to long-term strategic decisions such as capacity planning. Topics covered in the course may include operations strategy, project management and inventory and supply chain management.

Operations Management 715 3 units; H(3-0)

Management Science Using Spreadsheets
The modeling and analysis of quantitative problems from a variety of fields within business, with emphasis on insight for decision making. Use of optimization, simulation, decision analysis, and other techniques in spreadsheets. Spreadsheet engineering as an approach to reducing spreadsheet errors. Case studies are used to develop skill in dealing with incomplete and ambiguous information.

Prerequisite(s): Management Studies 613.

Operations Management 719 3 units; H(3-0)

Project Procurement and Logistics
Project procurement and logistics management in engineering, construction management and manufacturing, both nationally and internationally. Topics include fundamentals of procurement management, preparation of request for proposals, the selection of bidders, the evaluation of bids, supplier selection, contract management, control of inventory, handling of material flow and management of housing, logistics strategy and global issues.

Prerequisite(s): Business and Environment 691.
Courses of Instruction

Operations Management 731 3 units; H(3-0)

**Decision-Making for Outcome Optimization**
Evaluates the use of decision tools for analysis and synthesis to optimize decision-making in different types of businesses. Tools explored include mathematical programming, computer simulation, decision analysis, forecasting and queuing theory. Theoretical treatment is considered, as well as practical model application to support managerial decision-making.

**Prerequisite(s):** Admission to the Doctor of Business Administration program.

Operations Management 743 3 units; H(3-0)

**Simulation of Operational Systems**
Simulation provides a means for imitating the behaviors of real-world situations in the computer environment, allowing for ‘what-if’ analyses of different scenarios. The emphasis is on hands-on experience in transforming a real situation into a simulation model and obtaining reliable results. The course will focus on discrete-event simulation, with the introduction of other techniques such as advanced Monte Carlo simulation.

**Prerequisite(s):** Operations Management 601 and Management Studies 613.

Operations Management 745 3 units; H(3-0)

**Operations Planning and Supply Chain Management**
Case studies of real-world situations calling for appropriate state-of-the-art models and solution methods for the design, planning, control and improvement of supply chain operations. The main concepts and terminology in the domain of supply chain management are explored and then applied to a given situation.

**Prerequisite(s):** Operations Management 601 and Management Studies 613.

Operations Management 797 3 units; H(3S-0)

**Advanced Seminar in Operations Management**
Prerequisite(s): Consent of the Haskayne School of Business.

**MAY BE REPEATED FOR CREDIT**

Operations Management 799 3 units; H(3S-0)

**Doctoral Seminars in Operations Management**
799.01 Strategic Research Issues
799.02 Tactical Research Issues
799.03 Operational Research Issues

---

**Organizational Behaviour and Human Resources OBHR**
Instruction offered by members of the Haskayne School of Business.

**Senior Courses**

**Organizational Behaviour and Human Resources 317 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 317)

**Organizational Behaviour**
Examines individual, interpersonal and group processes to explain behaviour in organizations to better predict employee behaviour, and to interpret how context influences such behaviour. Topics may include motivation, groups and teams, decision-making, personality, power and influence, negotiation, leadership and stress.

**Prerequisite(s):** Admission to the Haskayne School of Business, and Business and Environment 291 or Strategy and Global Management 217.

**Antirequisite(s):** Credit for Organizational Behaviour and Human Resources 317 and 321 will not be allowed.

**Organizational Behaviour and Human Resources 321 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 321)

**Foundations in the Organizational Behaviour and Human Resources**
Energies, skills and abilities of people to meet the challenge of today’s organizations; diagnostic skills to recognize and analyze organizational problems; the linkage between effective management of people and goal accomplishment for organizations; current challenges in organizational forms, diverse environments and cultures; foundation for further study of Organizational Behaviour and Human Resources concepts.

**Antirequisite(s):** Credit for Organizational Behaviour and Human Resources 321 and 317 will not be allowed.

**Note:** Not available for credit towards the Bachelor of Commerce degree. Preference in enrolment is given to students who have declared a Management and Society Minor.

**Organizational Behaviour and Human Resources 401 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 401)

**Competitive Advantage Through People**
Analysis of the interdependencies and theoretical foundations of staffing and development programs, design and administration of reward and compensation systems and performance management programs from the orientation of professional human resources management.

**Prerequisite(s):** Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317.

**Organizational Behaviour and Human Resources 403 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 403)

**Organizational Analysis and Change**
Analysis of process of designing and structuring organizations and experience in the planning of design strategies as a response to change and innovation in the internal and external environment of the organizations.

**Prerequisite(s):** Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317.

**Organizational Behaviour and Human Resources 405 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 405)

**Labour Relations**
Examination of the nature and role of labour relations in the resolution of issues affecting employers, employees and the public interest.

**Prerequisite(s):** Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317.

**Organizational Behaviour and Human Resources 407 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 407)

**Rationality and Decisions**
An overview of key concepts in the decision sciences including normative, descriptive and prescriptive models of judgment and choice. This course emphasizes real-world applications of different decision making and decision support models.

**Prerequisite(s):** Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317.

**Organizational Behaviour and Human Resources 421 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 421)

**Interpersonal Behaviour**
Focus on increasing self-awareness, self-understanding and presentation of self. Interpersonal skills development necessary for group effectiveness and team management provide basis for performance leadership. Format involves learning in small groups.

**Prerequisite(s):** Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317.

**Organizational Behaviour and Human Resources 449 3 units; H(3-1T)**
(formerly Human Resources and Organizational Dynamics 449)

**Arbitration of Employment Disputes**
Workplace dispute resolution using arbitration. Topics include discipline, drug testing, surveillance, dress codes, discrimination, absenteeism, employment contracts. Emphasis on legal principles in employment arbitration, data base research, and advocacy skills using simulations, case law and guest speakers.

**Prerequisite(s):** Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317.

**Organizational Behaviour and Human Resources 451 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 451)

**Lifetime Planning and Career Assessment**
Persons demonstrate competency in personal and career development by their ability to take personal responsibility for the quality of their lives. Assess skills and values and plan for personal and career development after graduation.

**Prerequisite(s):** Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317.

**Organizational Behaviour and Human Resources 493 3 units; H(3-0)**
(formerly Human Resources and Organizational Dynamics 493)

**Business Negotiations**
The major concepts and theories of bargaining and negotiation; the dynamics of interpersonal and intergroup conflict; analysis of bargaining and conflict relationships and exploration of individual bargaining styles. Application to a variety of negotiation situations. Use of simulations and written assignments.

**Prerequisite(s):** Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents) including Organizational Behaviour and Human Resources 317.
Organizational Behaviour and Human Resources 550 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 559)

Selected Topics in Management and Organizations
Examination of selected topics in management and organizations.
Prerequisite(s): Admission to the Haskayne School of Business and Organizational Behaviour and Human Resources 317. For certain topics, consent of the Haskayne School of Business will also be required.

Note: For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

MAY BE REPEATED FOR CREDIT
Graduate Courses

Organizational Behaviour and Human Resources 601 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 601)

Organizational Behaviour
Evidence-based approach to leadership and organizational behaviour. Begins with self-assessment and then uses experiential learning to develop leadership techniques, including: motivation, team processes, negotiation, and decision-making.

Organizational Behaviour and Human Resources 631 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 631)

Managing Human Resources from a Strategic Perspective
Integrated coverage of human resource management theory, practice and research as it applies to the strategic management of organizations.
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 691 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 691)

Project Team Building and Interpersonal Skills
Leadership style and behaviour; interpersonal effectiveness and self-awareness; project teams; group dynamics; organizational change; application to the project environment.
Prerequisite(s): Admission to the MEng Program (Project Management specialization). Not open to students in the MBA Program.

Organizational Behaviour and Human Resources 721 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 721)

Advanced Leadership
Examines leadership theories relevant to advanced leadership (e.g., ethical leadership, humble leadership, charismatic leadership). Delves into concepts that leaders must consider when making decisions and implementing strategy (e.g., power, influence, change-management).
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 723 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 723)

Organizational Change and Development
Diagnosing organizational situations where the need for change exists and facilitating such changes. Utilization of behavioural science knowledge for organizational problem-solving.
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 725 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 725)

Organizational Analysis and Design
Application of knowledge of organizational theory and behaviour to organizational analysis and design. Emphasis will be placed on the acquisition of the required analysis and design skills based on an understanding of how organizations are structured, how they function and their relationships with their environment.
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 727 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 727)

Competitive Advantage Through People
Analysis of the interdependencies and theoretical foundations of staffing and development programs, design and administration of reward compensation systems and performance management programs from the orientation of professional human resources management.
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 729 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 729)

Workplace Issues
Examination of the employment relationship, with a focus on controversial and significant topics in the workplace. Coverage may include: unjust dismissal; drug and alcohol testing; computer and Internet policies; privacy and surveillance; impact of unions; disability and accommodation; and workplace violence. Modular format with modules customized to meet student interests.
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 731 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 731)

LifeWork Planning and Career Assessment
Persons demonstrate competency in personal and career development by their ability to take personal responsibility for the quality of their lives. Students will clarify their competencies and values and plan for dealing with the challenges faced by mature adults.
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 733 3 units; H(3-0)

Leadership for Change
Focuses on understanding and developing the skills required to lead and sustain the process of change in oneself and others and being able to mobilize and harness the energy of multiple stakeholders in a constantly changing environment, moving the collective in a positive direction.
Prerequisite(s): Admission to the Doctor of Business Administration program.

Organizational Behaviour and Human Resources 741 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 741)

Managerial Decision Making
Examines how decisions are made in organizations and how these decisions can be made more effectively, particularly at the top management and board levels. Decision making in current business contexts are explored by way of simulations, case analyses, discussions, debates and written assignments.

Organizational Behaviour and Human Resources 745 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 745)

Cross-Cultural Leadership and Human Resources Management
Leadership of human resources in a cross-cultural and international context; the nature of cultural differences; influence on organizational processes and practices such as communication, leadership, decision-making, team dynamics, staffing, performance management and organizational design, and implications for those holding international managerial roles.

Organizational Behaviour and Human Resources 789 3 units; H(3S-0)
(formerly Human Resources and Organizational Dynamics 789)

Seminar in the Management of Human Resources
Intensive study and discussion of current literature, research and issues with respect to selected topics in the management of human resources.
Prerequisite(s): Organizational Behaviour and Human Resources 601 or consent of the Haskayne School of Business.

MAY BE REPEATED FOR CREDIT

Organizational Behaviour and Human Resources 793 3 units; H(3-0)
(formerly Human Resources and Organizational Dynamics 793)

Business Negotiations
The major concepts and theories of negotiation; the dynamics of interpersonal and intergroup conflict; analysis of negotiation strategies and individual styles. Application to a broad range of business negotiations. Use of simulations and written assignments.
Prerequisite(s): Organizational Behaviour and Human Resources 601.

Organizational Behaviour and Human Resources 797 3 units; H(3S-0)
(formerly Human Resources and Organizational Dynamics 797)

Advanced Seminar in Organizational Behaviour and Human Resources
Prerequisite(s): Consent of the Haskayne School of Business.

MAY BE REPEATED FOR CREDIT
Courses of Instruction

Organizational Behaviour and Human Resources 790 3 units; H(3S-0) (formerly Human Resources and Organizational Dynamics 799)

Doctoral Seminars in Organizational Behaviour and Human Resources
- 799.01. Organizational Behaviour
- 799.02. Organization Theory
- 799.03. Industrial Relations
- 799.05. Interorganizational Relationships: Creating and Managing Strategic Alliances

Petroleum Engineering ENPE

Instruction offered by members of the Department of Chemical and Petroleum Engineering and the Department of Mechanical and Manufacturing Engineering in the Schulich School of Engineering.

Senior Courses

Petroleum Engineering 313 3 units; H(3-1T-2/2)

Introduction to Flow in Porous Media
- Fluid flow in porous media: pore structure; porosity and absolute permeability; Darcy’s Law and single phase flow; immiscible and miscible fluid flow; wettability; multiphase flow and relative permeability; pore level analysis of two-phase displacement and integration of these properties with geological information; application of fundamental principles to hydrocarbon recovery from petroleum reservoirs.

Corequisite(s): Chemical Engineering 331 and admission to the Oil & Gas or Chemical Engineering with Petroleum Minor program.

Antirequisite(s): Credit for Petroleum Engineering 313 and Petroleum Engineering 513 will not be allowed.

Petroleum Engineering 423 3 units; H(3-1)

Oil and Gas Engineering Process Development
- Design of oil and gas processing units and plants; cost estimates and oil and gas process economics; optimization techniques; introduction to linear programming; safety and environmental considerations in process design.

Corequisite(s): Chemical Engineering 315 and admission to the Oil and Gas Engineering program.

Antirequisite(s): Credit for Petroleum Engineering 423 and Chemical Engineering 423 will not be allowed.

Petroleum Engineering 429 3 units; H(3-1)

Reservoir Engineering
- Review of petroleum fluid properties and flow in porous media; reserve estimation using volumetric and material balance methods in gas, gas-condensate and oil reservoirs; discussion of reservoir drive mechanisms; aquifer models; decline analysis; routine and special core analysis; PVT data and equation of state modelling; single phase flow in reservoirs; introduction to well testing; introduction to reservoir modelling; introduction to reservoir recovery processes.

Corequisite(s): Engineering 311, Petroleum Engineering 313 and Geology 377 and admission to the Oil & Gas or Chemical Engineering with Petroleum Minor program.

Antirequisite(s): Credit for Petroleum Engineering 429 and 523 will not be allowed.

Petroleum Engineering 505 3 units; H(3-1)

Surface Production Operations
- Oil and gas treating process equipment, design and operation. Two-phase and three-phase separators, heat treating units. Fluid gathering and distribution systems. Pumps and compressors. Flow measurement and production testing. Natural gas dehydration and sweetening. Produced water treatment and disposal.

Prerequisite(s): Chemical Engineering 427.

Petroleum Engineering 507 3 units; H(3-1)

Well Logging and Formation Evaluation
- Fundamentals of wireline well logging and the log interpretation techniques for oil and gas wells. Basic reservoir petrophysical parameters. Types of well logging devices; physics of operation and response characteristics of various well logging tools. Application of well logs for integrated petroleum reservoir management.

Prerequisite(s): Third-year standing, or higher, in Chemical Engineering or Oil & Gas Engineering.

Petroleum Engineering 509 3 units; H(3-1)

Well Testing
- Basic theory and current techniques for well testing. Drawdown and build up tests; diffusivity equation and various boundary conditions and flow regimes; superposition; single-rate and multi-rate testing; effect of boundaries; derivative analysis; fractured wells, fractured reservoirs, and other flow models; wellbore dynamics; type curve matching; advanced decline curve analysis. Computer aided analysis and hands on experience in the computer laboratory.

Prerequisite(s): Petroleum Engineering 429 or 523.

Petroleum Engineering 511 3 units; H(3-4)

Design for Oil and Gas Engineering I
- Team design project applying principles of project engineering and management to the recovery and processing of hydrocarbons. Petroleum design considerations will include; detailed reservoir characterization; well test analysis; recovery and production forecasting; preliminary drilling, completions and facilities design, and economic evaluation.

Prerequisite(s): Chemical Engineering 315, 427; Chemical Engineering 425; Petroleum Engineering 423; Petroleum Engineering 429 or 523 and admission to the Oil & Gas or Chemical Engineering with Petroleum Minor program.

Antirequisite(s): Credit for Petroleum Engineering 511 and Chemical Engineering 511 will not be allowed.

Note: Petroleum Engineering 511 and 531 are a required two-course sequence that shall be completed in the same academic year.

Petroleum Engineering 513 3 units; H(3-1)

Flow in Porous Media
- Fundamentals of fluid flow in porous media: pore structure; porosity and absolute permeability; Darcy’s Law and single phase flow; immiscible and miscible fluid flow; wettability; multiphase flow and relative permeability. Concepts applied to hydrocarbon reservoirs and fluid migration in soils including; characterization of pore space, pore level modelling of porous media, routine and advanced core analysis. Similarities and differences between hydrocarbon reservoirs and soils.

Corequisite(s): Third-year standing, or higher, in Chemical Engineering or Oil & Gas Engineering.

Antirequisite(s): Credit for Petroleum Engineering 511 and Chemical Engineering 513 will not be allowed.

Petroleum Engineering 515 3 units; H(3-2)

Drilling and Well Completions
- An introduction to drilling; overview of petroleum engineering geology; basic rock properties. Fluid flow in porous media. Drilling rig types, components and selection; overview of drilling operations; drilling fluids and mud systems; drilling hydraulics; casing design and casing seat selections; cementing; formation damage, well completions. Special topics including; directional drilling; blowout control; logging and coring; hole stabilization; frac treatment and cost control; underbalanced drilling; coiled tubing drilling; offshore operations, environmental aspects.

Prerequisite(s): Engineering 311; Chemical Engineering 317 or Engineering 311 and Chemical Engineering 331 or Mechanical Engineering 341.

Corequisite(s): Petroleum Engineering 429 or 523.

Antirequisite(s): Credit for Petroleum Engineering 515 and 521 will not be allowed.

Note: Priority will be given to students in the BSc Oil & Gas Engineering. All students are expected to attend the course field trip(s).

Petroleum Engineering 519 3 units; H(3-0)

Special Topics
- Current advanced topics in Petroleum Engineering.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Petroleum Engineering 521 3 units; H(3-1)

Introduction to Drilling Engineering
- Introduction to the physics of flow in porous media; overview of drilling operations; equipment; relevant processes and procedures; basic completion operation; environmental aspect of drilling and completion operations.

Prerequisite(s): Engineering 311; Chemical Engineering 317 or Engineering 317 or Energy Engineering 360; and Chemical Engineering 331 or Mechanical Engineering 341 or Energy Engineering 480.

Corequisite(s): Petroleum Engineering 429 or 523.

Antirequisite(s): Credit for Petroleum Engineering 521 and 515 will not be allowed.

Petroleum Engineering 523 3 units; H(3-1)

Introduction to Reservoir Engineering
- Basic concepts of fluid flow in porous media; important reservoir rock and fluid properties affecting productivity; reserve estimation using volumetric and material balance methods in gas, gas-condensate and oil reservoirs; discussion of different reservoir drive mechanisms; aquifer models; decline analysis; Darcy’s Law and single phase flow through porous media. Introduction to well testing, solution of radial diffusivity equation corresponding to infinite-acting and pseudo-steady state flow of slightly compressible fluids and real gases.

Prerequisite(s): Engineering 311 and one of Chemical Engineering 331, or Mechanical Engineering 341 or Energy Engineering 480.

Antirequisite(s): Credit for Petroleum Engineering 523 and 429 will not be allowed.

Petroleum Engineering 525 3 units; H(3-1)

Waterflooding and Enhanced Oil Recovery
- Review of rock-fluid properties; trapping and mobilization of residual oil; displacement theory; linear waterflood calculations; viscous fingering; flood patterns and sweep efficiency considerations; characterization of reservoir heterogeneity; analytical waterflood prediction models; black-oil reservoir simulation models; design engineering aspects of waterflooding; and overview of enhanced recovery methods.

Prerequisite(s): Petroleum Engineering 523 or 429.
Courses of Instruction

Petroleum Engineering 531 3 units; H(2-6)

Design for Oil and Gas Engineering II
Team Design Project continuing from Petroleum Engineering 511. Detailed design of large scale development and commercial exploitation of a petroleum resource. Topics considered will include: reservoir simulation; drilling and completion design; specification of petroleum processing equipment such as heaters, heat exchangers, contacting and separating equipment; safety and environmental issues; economic evaluation.

Prerequisite(s): Petroleum Engineering 511.
Note: Petroleum Engineering 511 and 531 are a required two-course sequence that shall be completed in the same academic year.

Petroleum Engineering 533 3 units; H(3-1)

Petroleum Production Engineering

Prerequisite(s): Petroleum Engineering 523 or 429.

Petroleum Engineering 543 3 units; H(3-0)

Geological Characterization of Oil and Gas Reservoirs
Static model for field development. Review of petroleum reservoir geology, geological depositional environments, petrophysical and geostratigraphical analysis, and reserves estimation. Emphasis on data analysis and integration for a model suitable for reservoir simulation.

Prerequisite(s): Petroleum Engineering 523 or 429.
Corequisite(s): Petroleum Engineering 507.

Petroleum Engineering 551 3 units; H(2-4/2)

Petroleum Engineering Laboratory
Experiments on Fluid Flow in Oil & Gas production. Measurement of porous rock and fluid properties, such as relative permeability, fluid dispersion, fluid phase behaviour and viscosity, unstable fluid displacement.

Prerequisite(s): Chemical Engineering 427, Petroleum Engineering 313 or 513 and 429 or 523.
Antirequisite(s): Credit for Petroleum Engineering 551 and Chemical Engineering 551 will not be allowed.

Petroleum Engineering 555 3 units; H(3-1T)

Oil and Gas Field Safety and Equipment
Review of safety issues, blow outs, fire and other hazards, hydrate formation and decomposition, H2S and other toxic gases, safety standards, impact of petroleum operations on the environment, handling and safe transportation and disposal of petroleum wastes.

Petroleum Engineering 561 3 units; H(3-1T)

Fuel Science and Technology

Petroleum Engineering 563 3 units; H(3-1T)

Corrosion in Engineering Applications

Petroleum Engineering 571 3 units; H(3-1T)

Unconventional Oil Production
Description and analysis of heavy oil geology and heavy oil recovery technologies. Discussion of heavy oil production mechanisms and methods, recovery process design, transportation, facilities, marketing, economics, and environmental issues.

Prerequisite(s): Petroleum Engineering 429 or 523.
Antirequisite(s): Credit for Petroleum Engineering 571 and 519.01 will not be allowed.

Petroleum Engineering 573 3 units; H(3-1T)

Tight Oil and Unconventional Gas Exploitation
Overview of tight gas and unconventional gas resources (tight gas, shale gas, tight oil, shale oil, coal bed methane, and natural gas hydrates) in a ‘Total Petroleum System’. Geological aspects, drilling, completion and stimulation methods; reservoir characterization by petrophysics and well test analysis; forecasting methods; environmental and regulatory issues; economics and cost drivers.

Prerequisite(s): Petroleum Engineering 429 or 523.
Antirequisite(s): Credit for Petroleum Engineering 573 and 519.02 will not be allowed.

Graduate Courses

Petroleum Engineering 621 3 units; H(3-1)

Applied Reservoir Engineering
Basic reservoir engineering principles including fluid flow in porous media, rock and fluid properties; estimation of recovery under different operating conditions.

Note: This course does not count towards the degree requirements of MSc and PhD students.

Petroleum Engineering 622 3 units; H(3-1)

Subsurface Production Operations
Analysis of fluid flow from the formation to the surface including inflow performance, wellbore hydraulics, multiphase flows and well stimulation techniques.

Note: This course does not count towards the degree requirements of MSc and PhD students.

Petroleum Engineering 623 3 units; H(3-1)

Reservoir Analysis and Description
Data analysis and integration for reservoir modeling and simulation.

Note: This course does not count towards the degree requirements of MSc and PhD students.

Petroleum Engineering 624 3 units; H(3-1)

Enhanced Oil Recovery
Introduction to water and polymer flooding, miscible displacements and surfactant flooding with focus on case studies.

Note: This course does not count towards the degree requirements of MSc and PhD students.

Petroleum Engineering 625 3 units; H(3-0)

Natural Gas Engineering
Basic principles of natural gas production and processing including properties of natural gases, vapour-liquid equilibrium and separation techniques.

Note: This course does not count towards the degree requirements of MSc and PhD students.

Petroleum Engineering 626 3 units; H(3-0)

Economic Analysis of Petroleum Systems
Basic principles of analyzing the profitability and risk of petroleum projects including project selection, investment ranking, budgeting and portfolio development.

Antirequisite(s): Credit for Petroleum Engineering 628 and Chemical Engineering 687 will not be allowed.

Petroleum Engineering 627 3 units; H(3-0)

Drilling Engineering
Overview of modern drilling technologies and techniques including drilling hydraulics, directional drilling, drilling fluid properties and selection, well control and completion methods.

Antirequisite(s): Credit for Petroleum Engineering 627 and either Chemical Engineering 889 or Chemical Engineering 619.91 will not be allowed.

Petroleum Land Management PLMA

Instruction offered by members of the Haskayne School of Business.

Senior Courses

Petroleum Land Management 475 3 units; H(3-1.5T)

Introduction to Petroleum Land Management
Petroleum land management including both technical and economic considerations in the search for and development and marketing of oil and gas resources. A field trip and/or simulation exercise may be required.

Prerequisite(s): Admission to the Haskayne School of Business, the Bachelor of Commerce Petroleum Land Management concentration, and 60 units (10.0 full-course equivalents) including Business and Environment 395.

Corequisite(s): Petroleum Land Management 477.
Note: One 200-level course in Geology is recommended.

Petroleum Land Management 477 3 units; H(3-1.5T)

Introduction to Oil and Gas Agreements
The concepts of ownership in the Canadian oil and gas industry, including Crown and freehold leases, basic oil and gas agreements, and assignment documentation.

Prerequisite(s): Admission to the Haskayne School of Business, the Bachelor of Commerce Petroleum Land Management concentration, and 80 units (10.0 full-course equivalents) including Business and Environment 395.

Corequisite(s): Petroleum Land Management 475.
Note: One 200-level course in Geology is recommended.
Courses of Instruction

Philosophy PHIL

Instruction offered by members of the Department of Philosophy in the Faculty of Arts.

Illustrative Philosophy Course Groupings

This listing is provided to assist students in their selection of related groups of Philosophy courses. Detailed descriptions of all courses and sections of courses may be obtained from the Department Office.

Introductory:

- 201, 249†, 259, 264†, 279†

History of Philosophy:

- 301, 303, 305, 307, 309, 311, 401, 403, 405, 407, 408†, 408†, 411, 501, 505, 507

Moral Philosophy:

- 249†, 313†, 314, 329†, 330, 345, 347, 397, 449, 451, 547, 549

Legal Philosophy, and Social and Political Philosophy:

- 313†, 325, 329†, 425, 453, 525, 553

Metaphysics and Philosophy of Mind:

- 383, 395, 407†, 408†, 423, 483, 523, 583

Logic:

- 279†, 377, 379, 479, 579

Philosophy of Logic, Philosophy of Language:

- 307†, 407†, 408†, 471, 571

Epistemology and Philosophy of Science:

- 264†, 361, 367, 461, 467, 517, 561, 565, 567

Other Courses:

†Courses which appear in more than one category.

Junior Courses

Philosophy 201 3 units; H(3-1T)

Mind, Matter and God

An introduction to philosophy through discussion of selected topics such as skepticism, perception, personal identity, free will and determinism, God.

Philosophy 249 3 units; H(3-1T)

Moral Philosophy

Philosophy 259 3 units; H(3-1T)

Sex, Love and Death

Topics to be addressed may include the nature of sex, love, and death, the relation between sex and love, sexual ethics, sexual perversion, sexual harassment and pornography, abortion, suicide, euthanasia and the value of life.

Philosophy 264 3 units; H(3-1T)

How Do We Know?

An investigation of belief, knowledge, and error in everyday life and the sciences, including discussion of the nature of knowledge; patterns of valid reasoning and sources of error; the influence of bias on belief and knowledge; scientific reasoning and theory building; the distinction between science and pseudo-science.

Philosophy 279 3 units; H(3-1T)

Logic I

Sentential and first-order logic from both deductive and semantic points of view. Some elementary metamathematics.

Antirequisite(s): Credit for Philosophy 279 and 377 will not be allowed.

Senior Courses

Philosophy 301 3 units; H(3-0)

The Classical Period

The study of a selection of philosophers from the Pre-Socratic, through Plato and Aristotle, to the Hellenistic and Roman philosophers.

Philosophy 303 3 units; H(3-0)

The Medieval and Renaissance Period

The study of a selection of philosophers from Augustine to Montaigne, such as Boethius, Abelard, Ibn Rushd, Maimonides, Aquinas, Ockham, and Erasmus.

Philosophy 305 3 units; H(3-0)

The Seventeenth and Eighteenth Centuries

The study of a selection of philosophers from Descartes to Kant.

Philosophy 307 3 units; H(3-0)

Nineteenth- or Twentieth-Century Analytic Philosophy

A study of some major analytic philosophers, such as Frege, Russell, Moore, Wittgenstein, Carnap, Marcus, Kripke, and/or Quine.

Philosophy 309 3 units; H(3-0)

(formerly Philosophy 369)

Hegel to Nietzsche

A study of nineteenth-century European philosophers, such as Fichte, Schelling, Hegel, Feuerbach, Marx, Kierkegaard, Schopenhauer and/or Nietzsche.

Philosophy 311 3 units; H(3-0)

(formerly Philosophy 469)

Twentieth-Century Continental Philosophy

A study of twentieth-century Continental philosophers such as Husserl, Heidegger, Sartre, Merleau-Ponty, Adorno, Marcuse, Habermas, Foucault, Derrida, Kristeva and/or Irigaray.

Philosophy 313 3 units; H(3-0)

Bioethics

A critical and analytical examination of ethical and legal problems arising in and about health care. May include euthanasia, abortion, the conditions for the withdrawal of treatment, the physician-patient relationship, research on human subjects, genetic engineering. The practical applications of ethical and legal theory are emphasized.

Philosophy 314 3 units; H(3-1T)

Information Technology Ethics

A critical and analytical examination of ethical and legal problems arising in and about information technology. May include hacking, online privacy, intellectual property rights, artificial intelligence, globalization and regulation issues, cheating in online games, and others.

Philosophy 315 3 units; H(3-0)

Philosophy in Literature

Introduction to various philosophical problems, theories and points of view as found in works of lit-
erature from classical times to the present. Authors may include Homer to Orwell and Huxley.

**Philosophy 317** 3 units; H(2-3)

**Philosophy and Film**
Introduction to various philosophical problems, theories and points of view as found in works of film.

**Philosophy 325** 3 units; H(3-0)

**Law and Morality**
An introduction to legal and political philosophy including the nature of legal authority and political and social theory.

*Antirequisite(s):* Credit for Philosophy 325 and 319 will not be allowed.

**Philosophy 329** 3 units; H(3-0)

**Business Ethics**
A critical and analytical examination of some central moral problems that arise in and for business with emphasis on the details of the particular problems studied and the conceptual and other tools needed to understand and resolve or solve such problems. May include the moral responsibilities and rights of corporations and their officers, codes of business ethics, and conflicts of responsibilities and rights.

**Philosophy 330** 3 units; H(3-0)

**Philosophy of Money**
An examination of the historical and contemporary philosophical issues surrounding money, such as metaphysics of value, the justice of wealth distribution, and the ethics of wealth and charity.

*Antirequisite(s):* Credit for Philosophy 330 and 399.02 will not be allowed.

**Philosophy 331** 3 units; H(3-0)

**Philosophy of Religion**
A philosophical examination of the fundamental concepts of religious thinking.

*Prerequisite(s):* Religious Studies 205 or a previous course in Philosophy.

**Philosophy 333** 3 units; H(3-0)

**Aesthetics**
An examination of the criteria and concepts employed in aesthetic evaluation.

**Philosophy 335** 3 units; H(3-0)

**Asian Philosophy**
Considers traditional philosophical topics such as metaphysics, epistemology, logic, ethics, aesthetics, political philosophy, and environmental philosophy as they are dealt with in Asian traditions or texts, as well as topics that are more specific to Asian traditions, such as actionless action, sageshood, karma, rebirth, enlightenment/liberation, egoism, and attachment.

**Philosophy 337** 3 units; H(3-0)

**Philosophy, Feminism and Gender**
Study of social and political issues arising from philosophical considerations of gender including the intersection of gender and race with attention to feminist analyses of gender. May include feminist methodology as well as gender issues in such areas as knowledge and science, language, ethics and political theory.

**Philosophy 345** (formerly Philosophy 447) 3 units; H(3-0)

**Issues in Environmental Ethics**
A philosophical examination of how humans conduct themselves in relation to other living species and the natural environment. May include: obligations to future generations; animal liberation theories; population policy; pollution; the value of species diversity and species preservation; biocentric and holistic ethical theories of environment; ethical dimension of environmental policy formation.

**Philosophy 347** 3 units; H(3-0)

**Contemporary Moral Problems**
A critical and analytical examination of current moral issues, such as authority, religion in society, suicide, sexual morality, abortion, the legal enforcement of morality, justice.

**Philosophy 359** 3 units; H(3-0)

**Existentialism**
An investigation of existentialist treatments of agency, religion, subjecthood, death, and despair. May include Kierkegaard, Nietzsche, Dostoeyevsky, Camus, Kafka, Sartre, and de Beauvoir.

**Philosophy 361** 3 units; H(3-0)

**Evidence**
An investigation of philosophical perspectives on evidence, such as the nature of evidence, whether and how much evidence is required for reasonable belief and action, what sort of evidence might be required for moral, scientific, religious, or mathematical belief, and the role of evidence in medical, legal, political, and social contexts.

**Philosophy 367** 3 units; H(3-0)

**Science and Philosophy**
Examination of the fundamental principles of scientific enquiry, such as scientific explanation, theory, prediction and confirmation.

**Philosophy 377** 3 units; H(3-0)

**Elementary Formal Logic**
Sentential and first-order logic, with identity and descriptions, from both deductive and semantic points of view. Completeness, compactness, decidability for sentential logic.

*Antirequisite(s):* Credit for Philosophy 377 and 279 will not be allowed.

**Philosophy 379** 3 units; H(3-0)

**Logic II**
Introduction to the metatheory of logical systems. Completeness, compactness, Löwenheim-Skolem, and undecidability theorems for first-order logic. Preview of non-standard models, second-order logic, and Gödel’s first incompleteness theorem.

*Prerequisite(s):* Philosophy 279 or 377.

**Philosophy 383** 3 units; H(3-0)

**Philosophy and Psychology**
A study of topics such as thought, emotions, action and the will, mind-body identity, personal identity, and theories about the nature of mind.

*Antirequisite(s):* Credit for Philosophy 383 and 381 will not be allowed.

**Philosophy 396** 3 units; H(3-0)

**Mind and World**
An intensive study of selected topics in philosophy of mind, metaphysics and epistemology. Intended for philosophy majors, including students in the history and philosophy of science program.

*Prerequisite(s):* Admission to the Philosophy major and consent of the department.

**Philosophy 397** 3 units; H(3-0)

**Value Theory**
An intensive study of selected topics in value theory.

*Prerequisite(s):* Admission to the BA or BA Honours in Philosophy or in Religious Studies and Applied Ethics and consent of the Department.

**Philosophy 399** 3 units; H(3-0)

**Topics in Philosophy**
A detailed examination of a topic or tradition in European or Anglo-American philosophy.

**MAY BE REPEATED FOR CREDIT**

**Philosophy 401** 3 units; H(3-0)

**A Classical Philosopher**
A study of the writings of a philosopher from the classical period.

*Prerequisite(s):* Two previous courses in Philosophy one of which must be Philosophy 301, 303, 305, 307, 309 or 311.

**MAY BE REPEATED FOR CREDIT**

**Philosophy 403** 3 units; H(3-0)

**A Medieval or Renaissance Philosopher**
A study of the writings of a philosopher from the medieval or renaissance period.

*Prerequisite(s):* Two previous courses in Philosophy one of which must be Philosophy 301, 303, 305, 307, 309 or 311.

**MAY BE REPEATED FOR CREDIT**

**Philosophy 405** 3 units; H(3-0)

**A Seventeenth- or Eighteenth-Century Philosopher**
A study of the writings of a seventeenth- or eighteenth-century philosopher.

*Prerequisite(s):* Two previous courses in Philosophy, one of which must be Philosophy 301, 303, 305, 307, 309 or 311.

**MAY BE REPEATED FOR CREDIT**

**Philosophy 407** 3 units; H(3-0)

**A Nineteenth- or Twentieth-Century Philosopher**
A study of the writings of a nineteenth- or twentieth-century philosopher.

*Prerequisite(s):* Two previous courses in Philosophy, one of which must be Philosophy 301, 303, 305, 307, 309 or 311.

**MAY BE REPEATED FOR CREDIT**

**Philosophy 408** 3 units (3-0)

**A Philosopher in the Continental Tradition - Nineteenth Century to Present**
A study of the writings of a philosopher from the European tradition, emphasizing the influences of and on other philosophers and movements within the tradition.

*Prerequisite(s):* One of Philosophy 309, 311, 333, 359 or Religious Studies 363 and an additional 3 units (0.5 full-course equivalent) in Philosophy.

**MAY BE REPEATED FOR CREDIT**

Courses of Instruction

**Philosophy 547** 3 units; H(3-0)

*Advanced Topics in Applied Ethics*
An intensive investigation of one or more issues in applied ethics.

Prerequisite(s): Two previous courses in Philosophy, one of which must be Philosophy 249, 397, 425, 449 or 453 and at least one of which must be at the 400 level, or higher.

MAY BE REPEATED FOR CREDIT

**Philosophy 549** 3 units; H(3-0)

*Advanced Topics in Ethics*
An intensive investigation of one or more issues in normative ethical theory or meta-ethics.

Prerequisite(s): Two previous courses in Philosophy, one of which must be Philosophy 249, 397, 425, 449 or 453 and at least one of which must be at the 400 level, or higher.

MAY BE REPEATED FOR CREDIT

**Philosophy 553** 3 units; H(3-0)

*Advanced Topics in Political Philosophy*
An intensive investigation of one or more issues in political philosophy.

Prerequisite(s): Two previous courses in Philosophy, one of which must be 249, 397, 425, 449 or 453 and at least one of which must be at the 400 level, or higher.

MAY BE REPEATED FOR CREDIT

**Philosophy 561** 3 units; H(3-0)

*Advanced Topics in Epistemology*
An investigation of one or more issues in epistemology.

Prerequisite(s): Two previous courses in Philosophy at least one of which must be at the 400 level and one of which must be one of Philosophy 201, 395, 421, 423, 461, 463, 467, 481 or 483.

MAY BE REPEATED FOR CREDIT

**Philosophical Topics in the Sciences**
A study of philosophical issues arising in a particular area of science, such as philosophy of biology, philosophy of social sciences, and philosophy of physics.

Note: This course is intended for students who have already done advanced work either in philosophy or in one of the sciences.

MAY BE REPEATED FOR CREDIT

**Philosophy 567** 3 units; H(3-0)

*Advanced Topics in Philosophy of Science*
An intensive study of one or more issues in the philosophy of science.

Prerequisite(s): Two previous courses in Philosophy, one of which must be 201, 395, 421, 423, 461, 463, 467, 481 or 483 and one of which must be at the 400 level, or higher.

MAY BE REPEATED FOR CREDIT

**Philosophy 571** 3 units; H(3-0)

*Advanced Topics in Philosophy of Logic and Philosophy of Language*
An intensive study of one or more issues in the philosophy of logic or language.

Prerequisite(s): Two previous courses in Philosophy, one of which must be either Philosophy 279 or 377, and one of which must be at the 400 level, or higher.

MAY BE REPEATED FOR CREDIT

**Philosophy 579** 3 units; H(3-0)

*Advanced Topics in Logic*
An investigation of one or more issues in logic.

Prerequisite(s): Philosophy 279 or 377.

MAY BE REPEATED FOR CREDIT

**Philosophy 583** 3 units; H(3-0)

*Advanced Topics in Philosophy of Mind*
An investigation of one or more issues in philosophy of mind.

Prerequisite(s): Two previous courses in Philosophy at least one of which must be at the 400 level and one of which must be one of Philosophy 201, 395, 421, 423, 461, 463, 467, 481 or 483.

MAY BE REPEATED FOR CREDIT

**Philosophy 590** 6 units; F(0-3)

*Honours Thesis*
A year-long development of the honours thesis, under close supervision of a faculty member.

Prerequisite(s): Admission to the Honours program and consent of the Department.

MAY BE REPEATED FOR CREDIT

**Philosophy 595** 3 units; H(3-0)

*Directed Reading*
Directed reading for students in their third or fourth years.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

**Philosophy 597** 3 units; H(3S-0)

*Honours Seminar*
An introduction to the writing of the honours thesis, in which all those enrolled in the Philosophy 590 share their work with each other.

Prerequisite(s): Consent of the Department.

Corequisite(s): Philosophy 590.

MAY BE REPEATED FOR CREDIT

**Philosophy 599** 3 units; H(3-0)

(formerly Philosophy 589)

*Advanced Topics in Philosophy*
An in-depth investigation into a selected topic in Philosophy.

Prerequisite(s): Two previous courses in Philosophy, at least one of which must be at the 400 level or above.

MAY BE REPEATED FOR CREDIT

**Philosophy 601** 3 units; H(3-0)

*Seminar in Selected Problems*
MAY BE REPEATED FOR CREDIT

**Philosophy 603** 3 units; H(3-0)

*Graduate Proseminar*
MAY BE REPEATED FOR CREDIT

**Philosophy 609** 3 units; H(3-0)

*Topics in the History of Philosophy*
MAY BE REPEATED FOR CREDIT

**Philosophy 623** 3 units; H(3-0)

(formerly Philosophy 621)

*Topics in Metaphysics*
MAY BE REPEATED FOR CREDIT

**Philosophy 627** 3 units; H(3-0)

*Topics in the Philosophy of Religion*
MAY BE REPEATED FOR CREDIT

**Philosophy 649** 3 units; H(3-0)

*Topics in Ethics*
MAY BE REPEATED FOR CREDIT

**Philosophy 653** 3 units; H(3-0)

*Topics in Social and Political Philosophy*
MAY BE REPEATED FOR CREDIT

**Philosophy 661** 3 units; H(3-0)

(formerly Philosophy 663)

*Topics in Epistemology*
MAY BE REPEATED FOR CREDIT

**Philosophy 667** 3 units; H(3-0)

*Topics in Philosophy of Science*
MAY BE REPEATED FOR CREDIT

**Philosophy 671** 3 units; H(3-0)

*Topics in Philosophical Logic and the Philosophy of Language*
MAY BE REPEATED FOR CREDIT

**Philosophy 677** 3 units; H(3-0)

*Metalogic*
Introduction to the metatheory of logical systems. Completeness, compactness, Lowenheim-Skolem, and undecidability theorems for first-order logic. Preview of non-standard models, second-order logic, and Godel’s first incompleteness theorem.

NOT INCLUDED IN GPA

**Philosophy 679** 3 units; H(3-0)

*Topics in Logic*
MAY BE REPEATED FOR CREDIT

**Philosophy 683** 3 units; H(3-0)

(formerly Philosophy 681)

*Topics in the Philosophy of Mind*
MAY BE REPEATED FOR CREDIT

**Philosophy 691** 3 units; H(3-0)

*Topics in Philosophical Analysis*
MAY BE REPEATED FOR CREDIT

**Philosophy 695** 3 units; H(3-0)

*Graduate Directed Reading*
MAY BE REPEATED FOR CREDIT

---

**Physical Education PHED**

Instruction offered by members of the Faculty of Kinesiology.

Students should also see course listings under the headings Dance Education, and Kinesiology.

**Senior Courses**

**Physical Education 321** 3 units; H(1-3)

*Games I*
Games and sports suited to the needs of children and youth in schools.

Prerequisite(s): Kinesiology 201, 321 and admission to the Leadership in Pedagogy and Coaching Major.
Courses of Instruction

Physics PHYS

**Physical Education 333** 3 units; H(1-3)

**Gymnastics and Track and Field**
Dominant movement patterns in gymnastic activities and the run-jump-throw skills of track and field.

**Prerequisite(s):** Kinesiology 201 and 321 and admission to the Leadership in Pedagogy and Coaching Major.

**Physical Education 349** 3 units; H(1-3)

**Activities in Alternative Environments**
Fundamental principles of creating an effective learning environment in the school Physical Education Alternative Environments setting (K to Grade 12).

**Prerequisite(s):** Kinesiology 201 and admission to the Leadership in Pedagogy and Coaching Major.

**Corequisite(s):** Kinesiology 321.

**Physics 106**

**Module M6 Thermal Physics**
Thermal Physics. Gas laws; kinetic theory of gases; temperature; internal energy; specific heat; energy transfer; laws of thermodynamics; PVT diagrams.

**Prerequisite(s):** Consent of the Department.

**Note:** For students intending to major in Biological Sciences, Chemistry, Geology, or Geophysics.

**Physics 223** 3 units; H(3-3)

**Introductory Electromagnetism, and Thermal Physics**
Electrical forces and energy. Static electric fields due to point charges. Parallel-plate capacitor. Simple DC circuits. Lorentz force. Static magnetic fields generated by electric currents. Electromagnetic induction. Gas Laws; kinetic theory of gases; temperature, thermal energy, specific heat; energy transfer; laws of thermodynamics; PVT diagrams.

**Prerequisite(s):** Physics 211 or 221 or 227.

**Note:** For students intending to major in Biological Sciences, Chemistry, Geology, or Geophysics.

**Physics 227** 3 units; H(3-2-T)

**Classical Physics**
Kinematics and statics of rigid bodies; conservation laws; rotational mechanics.

**Prerequisite(s):** A grade of 70 per cent or higher in Physics 30; 50 per cent or higher in Mathematics 31; and 75 per cent or higher in Mathematics 30-1 or Pure Mathematics 30 or a grade of "B" or 70 per cent or better in Mathematics 2 (offered by Continuing Education).

**Antirequisite(s):** Credit for Physics 221 and 211 will not be allowed. Students may not register in, or have credit for, Physics 221 if they have previous credit for Physics 227 or are concurrently enrolled in Physics 227.

**Note:** Prior completion of or concurrent registration in Mathematics 277 is highly recommended.

**Physics 303** 3 units; H(3-0)

**Quantum Mysteries and Paradoxes**
Aims to explain basic quantum phenomena for students outside the physical sciences. Topics covered may include wave-particle duality, quantum interference, as well as the paradoxes of entanglement and quantum nonlocality. Applications such as quantum cryptography and quantum teleportation are discussed, as are the philosophical interpretations of the quantum picture of the world.

**Note:** The course makes limited use of high-school algebra. Not intended for Physics majors and will not count in the field of Physics.

**Physics 321** 3 units; H(3-2T)

**Harmonic Motion, Waves, and Rotation**

**Prerequisite(s):** Physics 211 or 221 and Mathematics 211 or 213 and Mathematics 267 or 275 or Applied Mathematics 217.

**Antirequisite(s):** Credit for Physics 321 and 227 will not be allowed.

**Physics 323** 3 units; H(3-3/2)

**Optics and Electromagnetism**

**Prerequisite(s):** Physics 211 or 221 or 227 and 223; and Applied Mathematics 217 or Mathematics 249 or 251 or 265 or 275.

**Antirequisite(s):** Credit for Physics 323 and either 255 or 259 will not be allowed.

**Note:** Prior completion of or concurrent registration in Mathematics 277 is highly recommended.
### Courses of Instruction

<table>

<tr>
<th>Course Code</th>
<th>Title</th>
<th>Units</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Physics 325</strong></td>
<td>3 units; H(3-3)</td>
<td></td>
<td><strong>Modern Physics</strong></td>
</tr>
<tr>
<td></td>
<td>Origins of quantum mechanics, a historical perspective. Concepts of wave mechanics and applications. Nuclear physics and radioactivity. Topics include: Special Theory of Relativity, Electromagnetic waves, Blackbody radiation, Photod Electric Effect, X-rays and Bragg Diffraction, Compton Scattering, Atomic Structure, The Bohr Model, Atomic Spectra, Applications of the Schrödinger Wave Equation, Radioactivity, Nuclear Stability, Nucleosynthesis, Structure of the Nucleus, Elementary Particles.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 211 or 221 or 227; and 293 or 255 or 259 or 355; and Mathematics 211 or 213; and Mathematics 249 or 251 or 265 or 275 or Applied Mathematics 217. <strong>Antirequisite(s):</strong> Credit for Physics 325 and 209 will not be allowed.</td>
</tr>
<tr>
<td><strong>Physics 341</strong></td>
<td>3 units; H(3-2/2)</td>
<td></td>
<td><strong>Classical Mechanics I</strong></td>
</tr>
<tr>
<td></td>
<td>Forced and damped harmonic oscillations with real and complex numbers; anharmonic oscillators; central force motion and scattering; non-ideal frames; 2- and 3-body problems; applications of linear differential equations and complex numbers.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 227 or 321 or a grade of “A-” or higher in either Physics 211 or 221; and Mathematics 211 or 213; and one of Applied Mathematics 219 or Mathematics 253 or 267 or 277 or 283. <strong>Note:</strong> Prior completion of or concurrent registration in Physics 343 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 343</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Classical Mechanics II</strong></td>
</tr>
<tr>
<td></td>
<td>Rotating frames of reference; general rotations of rigid bodies; moment of inertia tensor; eigenvalues and eigenvectors; Lagrangian and Hamiltonian mechanics; potential theory and tides; perturbation theory.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 341. <strong>Antirequisite(s):</strong> Credit for Physics 365 and 369 will not be allowed. <strong>Note:</strong> Required for Electrical Engineering students. Open to all other engineering students, excluding geomatics.</td>
</tr>
<tr>
<td><strong>Physics 365</strong></td>
<td>3 units; H(3-3/2)</td>
<td></td>
<td><strong>Acoustics, Optics and Modern Physics (for students in Engineering)</strong></td>
</tr>
<tr>
<td></td>
<td>Wave motion as applied to acoustics and physical optics. Wave-particle duality applied to light and matter; electron energy levels of atoms and crystals.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Applied Mathematics 219 or Mathematics 277; and Physics 259. <strong>Antirequisite(s):</strong> Credit for Physics 365 and 369 will not be allowed. <strong>Note:</strong> Required for Electrical Engineering students. Open to all other engineering students, excluding geomatics.</td>
</tr>
<tr>
<td><strong>Physics 369</strong></td>
<td>3 units; H(3-3/2)</td>
<td></td>
<td><strong>Acoustics, Optics and Radiation (for students in Engineering)</strong></td>
</tr>
<tr>
<td></td>
<td>Wave motion as applied to acoustics, geometric and physical optics, and radiant energy transfer. Traditional and modern applications.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Applied Mathematics 219 or Mathematics 277; and Physics 259. <strong>Antirequisite(s):</strong> Credit for Physics 369 and 365 will not be allowed. <strong>Note:</strong> Required for Geomatics Engineering students. Open to all other engineering students, excluding electrical.</td>
</tr>
<tr>
<td><strong>Physics 371</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Introduction to Energy</strong></td>
</tr>
<tr>
<td></td>
<td>Energy and power will be discussed. Sources of energy such as wind power, solar power, nuclear power, geothermal energy and fossil fuels and related limitations will be considered. Generation and distribution of electricity will be discussed.</td>
<td></td>
<td><strong>Note:</strong> Some previous exposure to physics, e.g., Science 10, is strongly recommended. Not intended for Physics majors and will not count in the field of Physics. <strong>Phys 375</strong></td>
</tr>
<tr>
<td></td>
<td>Geometrical Optics: lenses, mirrors, and other basic optical components. Wave motion. Description of light as a wave. Fermat’s principle. Refraction, scattering, interference, diffraction, and polarization. Optical instruments (including telescopes and microscopes). Lasers and fibre optics if time allows.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 255; and one of Applied Mathematics 219 or Mathematics 253 or 267 or 277 or 283. <strong>Prerequisite(s):</strong> Applied Mathematics 217. <strong>Note:</strong> Prior completion of or concurrent registration in Applied Mathematics 433 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 381</strong></td>
<td>3 units; H(1-3)</td>
<td></td>
<td><strong>Computational Physics I</strong></td>
</tr>
<tr>
<td></td>
<td>Solution of problems associated with the analysis of physical systems, using digital computers, high level programming languages, and mathematical computation systems.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Computer Science 217 or 231; and Physics 227 or a grade of “A-” or higher in Physics 211 or 221. <strong>Note:</strong> Prior completion of or concurrent registration in Physics 343 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 397</strong></td>
<td>3 units; H(2-1T-3)</td>
<td></td>
<td><strong>Applied Physics Laboratory I</strong></td>
</tr>
<tr>
<td></td>
<td>Basic laboratory electronics, vacuum systems, and optical devices. Introduction to experimental control, data collection, and analysis. Fundamentals of error analysis and error propagation.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 227 and one of Physics 223 or 255 or 259. <strong>Antirequisite(s):</strong> Credit for Physics 397 will not be allowed.</td>
</tr>
<tr>
<td><strong>Physics 443</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Quantum Mechanics I</strong></td>
</tr>
<tr>
<td></td>
<td>Basic postulates of quantum mechanics and their physical interpretation. Schrödinger’s time-dependent and time-independent equations. Single particle in a potential field. Basic applications of quantum mechanics to atomic, molecular, optical, nuclear, and solid state physics, as well as quantum information science.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 325 and 343 and Mathematics 311. <strong>Note:</strong> Prior completion of or concurrent registration in Mathematics 367 or 377 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 449</strong></td>
<td>3 units; H(3-1T-0)</td>
<td></td>
<td><strong>Statistical Mechanics I</strong></td>
</tr>
<tr>
<td></td>
<td>State-counting; classical distributions; origins and role of entropy; equilibrium; microcanonical, canonical, and grand canonical ensembles; concepts of work, heat, and temperature; equations of state; heat capacity; equipartition theorem; engines; laws of thermodynamics; non-equilibrium systems; Maxwell-Boltzmann distribution; enthalpy and free energies.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 325 and 343; and one of Applied Mathematics 219 or Mathematics 253 or 267 or 277. <strong>Antirequisite(s):</strong> Credit for Physics 449 and 455. <strong>Note:</strong> Prior completion of or concurrent registration in Geomatics Engineering 475 will not be allowed.</td>
</tr>
<tr>
<td><strong>Physics 451</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Statistical Mechanics II</strong></td>
</tr>
<tr>
<td></td>
<td>Gibbs’ paradox; bosons and fermions; quantum counting; classical-quantum transition; blackbody radiation; phase transitions; fluctuations and critical phenomena; complex systems; self-organized criticality; cellular automata.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 449. <strong>Antirequisite(s):</strong> Credit for Physics 455 and Electrical Engineering 475 will not be allowed. <strong>Note:</strong> Prior completion of or concurrent registration in Applied Mathematics 433 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 455</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Electromagnetic Theory II</strong></td>
</tr>
<tr>
<td></td>
<td>Macroscopic Maxwell equations. Scalar and vector potentials. Electrostatics and magnetostatics. Dielectric and magnetic properties of materials. Superconductors.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 255 or 323; and Applied Mathematics 309 or Mathematics 353 or 377. <strong>Antirequisite(s):</strong> Credit for Physics 455 and Electrical Engineering 476 will not be allowed. <strong>Note:</strong> Prior completion of or concurrent registration in Applied Mathematics 433 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 457</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Electromagnetic Theory III</strong></td>
</tr>
<tr>
<td></td>
<td>Electromagnetic wave solutions to Maxwell’s equations, in vacuum and in conducting media. Waveguides. Electromagnetic radiation from accelerated charges. Relativistic formulation of electrodynamics.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 455 and Applied Mathematics 433 or Mathematics 433. <strong>Antirequisite(s):</strong> Credit for Physics 457 and Electrical Engineering 476 will not be allowed.</td>
</tr>
<tr>
<td><strong>Physics 481</strong></td>
<td>3 units; H(1-3)</td>
<td></td>
<td><strong>Computational Physics II</strong></td>
</tr>
<tr>
<td></td>
<td>Solution of problems associated with the analysis of physical systems, using digital computers, high level programming languages, and mathematical computation systems.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 381; and one of Physics 325 or Chemistry 373. <strong>Note:</strong> Prior completion of or concurrent registration in Physics 443 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 497</strong></td>
<td>3 units; H(2-6)</td>
<td></td>
<td><strong>Applied Physics Laboratory II</strong></td>
</tr>
<tr>
<td></td>
<td>Intermediate laboratory electronics. AC circuit theory and semiconductor devices, including operational amplifiers. Digital sampling theory and frequency-domain signal processing. Computer automation of experimental control, data collection, and analysis, including error analysis and error propagation.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 397. <strong>Antirequisite(s):</strong> Credit for Physics 497 will not be allowed.</td>
</tr>
<tr>
<td><strong>Physics 501</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Special Relativity</strong></td>
</tr>
<tr>
<td></td>
<td>Lorentz transformations in classical mechanics; relativistic kinematics; spacetime diagrams; relativistic energy and momentum conservation; Geometrical interpretation; applications of relativistic kinematics; four-vector formalism and tensors; applications, primarily to relativistic electrodynamics.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 325 and 457; and one of Mathematics 353 or 377 or Applied Mathematics 309. <strong>Antirequisite(s):</strong> Credit for Physics 501 will not be allowed. <strong>Note:</strong> Prior completion of or concurrent registration in Applied Mathematics 433 is highly recommended.</td>
</tr>
<tr>
<td><strong>Physics 507</strong></td>
<td>3 units; H(3-0)</td>
<td></td>
<td><strong>Solid State Physics</strong></td>
</tr>
<tr>
<td></td>
<td>Crystal structure. Classification of solids and their bonding. Fermi surface. Elastic, electric and magnetic properties of solids.</td>
<td></td>
<td><strong>Prerequisite(s):</strong> Physics 443 or Chemistry 373; and Physics 449 and 455. <strong>Note:</strong> Prior completion of or concurrent registration in Electrical Engineering 476 will not be allowed.</td>
</tr>
</tbody>
</table>
Physics 509 3 units; H(3-0)

Plasma Physics
Occurrence of plasmas in nature, single particle motion, plasmas as fluids, waves in plasmas, diffusion, resistivity, equilibrium and stability, kinetic theory of plasmas, non-linear effects.

Prerequisite(s): Physics 343 and 455.

Physics 521 3 units; H(3-0)
Non-linear Dynamics and Chaos
Introduction to non-linear dynamical systems: Phase space representation, bifurcations, normal forms, non-linear oscillators, deterministic chaos, attractors, fractals, universality, renormalization, and synchronization.

Prerequisite(s): Applied Mathematics 433 and Physics 381 and 449.

Physics 543 3 units; H(3-0)
Quantum Mechanics II
Theory of angular momentum and applications, perturbation theory and applications, identical particles. Introduction to relativistic wave equations.

Prerequisite(s): Physics 443 or Chemistry 373.

Physics 561 3 units; H(3-1)
Stable and Radioactive Isotope Studies, Fundamentals
A multidisciplinary course. Topics include nucleosynthesis, radioactive decay, isotope exchange phenomena, kinetic isotope effects, tracer techniques, molecular spectra and instrumentation.

Prerequisite(s): Consent of the Department.

Physics 575 3 units; H(3-3)

Optics

Prerequisite(s): Physics 325, 457 and Applied Mathematics 433.

Antirequisite(s): Credit for Physics 575 and 471 will not be allowed.

Physics 577 3 units; H(3-0)

Implementations of Quantum Information
Proposals and realizations of quantum information tasks including quantum computation, quantum communication, and quantum cryptography in optical, atomic, molecular, and solid state systems.

Prerequisite(s): Physics 455, 543; and one of Mathematics 367 or 377.

Antirequisite(s): Credit for Physics 577 and 677 will not be allowed.

Physics 581 3 units; H(1-3)
(formerly Physics 535)

Computational Physics III
Solution of problems associated with the analysis of physical systems, using digital computers, high level programming languages, and mathematical computation systems (e.g., Maple, Macsyma).

Prerequisite(s): Physics 443 or Chemistry 373; and Physics 481 and 455.

Note: A knowledge of a high level programming language (C, C++, Fortran or Pascal) is highly recommended.

Physics 593 3 units; H(3-0) or H(0-6)

Topics in Contemporary Physics
Topics will be from the research areas of staff members.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Physics 597 3 units; H(1-6)
Senior Physics Laboratory
Selected advanced experiments. Where possible, students may choose those experiments most suited to their interests. Development of technical and computer-based skills, technical writing and presentation skills.

Prerequisite(s): Physics 325 and 497.

Physics 598 6 units; F(0-9)
Honours Research Thesis
Each student will be assigned a project in consultation with a supervisor. Written reports and oral presentations are required.

Prerequisite(s): Physics 443 and 449 and 455 and consent of the Department.

Physics 599 3 units; H(0-9)
Senior Research Thesis
Each student will be assigned a project in consultation with a supervisor. Written reports and oral presentations are required.

Prerequisite(s): Consent of the Department.

Note: A maximum of 6 units may be taken.

MAY BE REPEATED FOR CREDIT

Graduate Courses
Only where appropriate to a student's program may graduate credit be received for courses numbered 500-599.

Physics 603 3 units; H(3-0)
Experimental Methods of Physics
Instrumentation for physical experiments. General philosophy of experimentation; signal processes; signal processing methods; instrument design and control; data acquisition and storage; specific detection methods.

Physics 605 3 units; H(3-0)
Advanced Data Analysis
Methods of extraction of significant information from experimental data degraded by noise. Parametric and non-parametric statistical methods; curve fitting; spectral analysis; filtering, sampling, convolution and deconvolution techniques.

Physics 609 3 units; H(3-0)
Advanced Classical Mechanics

Note: It is expected that a student’s background will include Physics 343 or equivalent.

Physics 611 3 units; H(3-0)
Statistical Physics

Note: It is expected that a student’s background will include Physics 449 or equivalent.

Physics 613 3 units; H(3-0)

Electrodynamics
Interaction between charged particles and the electromagnetic field in relativistic formulation. Scattering and energy losses of charged particles. Radiation by charged particles.

Note: It is expected that a student’s background will include Physics 457 and 501 or equivalents.

Physics 615 3 units; H(3-0)
Non-Relativistic Quantum Mechanics
Mathematical formalism of quantum mechanics. Topics may include addition of angular momenta, Clebsch-Gordan coefficients, Wigner-Eckart theorem; charged particles in electric and magnetic fields; quantum operators; approximation methods; scattering; quantum non-locality, Einstein-Podolsky-Rosen paradox, Bell’s theorem.

Note: It is expected that a student’s background will include Physics 543 or equivalent.

Physics 617 3 units; H(3-0)

Relativistic Quantum Mechanics
Klein-Gordon and Dirac equations; Dirac spinor and the adjoint spinor; charge (C), parity (P) and time (T) transformations and CPT symmetry; relativistic corrections to atomic spectra.

Note: It is expected that a student’s background will include Physics 543 or equivalent.

Physics 619 3 units; H(3-0)

Statistical Physics II
Topics of equilibrium and non-equilibrium critical phenomena and methods to study fluctuating systems selected from the following list of topics: Perculation, scaling theory, phase transitions, Landau-Ginzburg theory, lattice models, Monte Carlo methods, renormalization group, self-organized criticality, theory of random graphs; Brownian motion, random walks and diffusion, Fokker-Planck-Equation, Markov processes, stochastic differential equations, first passage times.

Prerequisite(s): Physics 611.

Note: It is expected that a student’s background will include Physics 481 or its equivalent.

Physics 621 3 units; H(3-0)

Nonlinear Dynamics and Pattern Formation
Topics: Introduction to pattern formation and self-organization in nature: Reaction-diffusion systems, hydrodynamical systems, bistable media, excitable and oscillatory media, stability analysis, bifurcations, pattern selection, amplitude equations and normal forms, fronts, traveling waves, topological defects, spiral waves, spatiotemporal chaos, defect-mediated turbulence, spatiotemporal point processes.

Note: It is expected that a student’s background will include Physics 451, 481 and 521 or equivalents.

Physics 629 3 units; H(3-0)

Gravitation
An introduction to Einstein’s theory of gravitation. Applications to the solar system, black holes, and cosmology.

Note: It is expected that a student’s background will include Physics 501 or equivalent.

Physics 663 3 units; H(2-1)
(Geology 663)

Applications of Stable Isotopes
Application of stable isotope techniques with special focus on Hydrogeology, Geology and Environmental Sciences. The use of isotopes to
Courses of Instruction

understand the water, carbon, nitrogen and sulphur cycles is demonstrated. Topics include hydrology, paleoclimates, geothermometry, fossil fuels exploration and recovery, pollutant tracing, food webs, forensic investigations, among others.

Prerequisite(s): Consent of the Department.

Physics 671 3 units; H(3-0)

Atomic and Molecular Spectroscopy
Atomic structure and spectra. Rotational, vibrational and electronic spectra of diatomic molecules, including microwave, infrared, Raman and visible/ultraviolet spectroscopic techniques. Hund’s coupling cases. Polyatomic molecular spectroscopy. Examples from astronomy and upper atmosphere/space physics.

Physics 673 3 units; H(3-0)

Quantum and Non-linear Optics

Physics 675 3 units; H(3-0)

Special Topics in Laser and Optical Sciences
Lectures by Physics and Astronomy, Chemistry, Engineering, and/or Medicine staff on current research topics in laser science and modern optical techniques.

MAY BE REPEATED FOR CREDIT

Physics 677 3 units; H(3-0)

Implementations of Quantum Information
Proposals and realizations of quantum information tasks including quantum computation, quantum communication, and quantum cryptography in optical, atomic, molecular, and solid state systems.

Prerequisite(s): Consent of the Department.

Physics 691 1.5 units; Q(2S-0)

Scientific Communication Skills
Required, multi-component, program of courses for all graduate students in the Department of Physics and Astronomy designed to assist students in improving their scientific oral and written communication skills. Each student must complete a minimum of three terms of Physics 691 during each graduate course, although the normal load is four terms, and additional terms may be required of students on an as-need basis. The components of Physics 691 are:

691.11. Effective Scientific Speaking for MSc Students
691.12. Graduate Seminar for MSc Students I
691.13. Effective Scientific Writing for MSc Students
691.14. Graduate Seminar for MSc Students II
691.16. Graduate Seminar for MSc Students III
691.18. Graduate Seminar for MSc Students IV
691.21. Effective Scientific Speaking for PhD Students
691.22. Graduate Seminar for PhD Students I
691.23. Effective Scientific Writing for PhD Students
691.24. Graduate Seminar for PhD Students II
691.26. Graduate Seminar for PhD Students III
691.28. Graduate Seminar for PhD Students IV

Effective Scientific Speaking courses provide instruction on preparing and presenting quality scientific oral presentations, including discussions of the aspects of quality presentations and exercises aimed at improving student speaking skills, and will be taken by graduate students in their first Fall Term in program. Effective Scientific Writing courses provide instruction on preparing quality scientific papers, as well as exercises aimed at improving students’ writing skills, and will be taken during students’ second Fall Term in program. The Graduate Seminar courses will be run each winter, and provide all students enrolled in each course the opportunity to present one or two scientific talks, as well as to provide peer feedback to other students in the course. At the end of each Graduate Seminar term, the course instructor(s) will identify those students who have reached an acceptable level of scientific speaking competency and exempt these students from any further Physics 691 Graduate Seminar courses for their current degrees.

MAY BE REPEATED FOR CREDIT

Physics 697 3 units; H(3-0) or H(0-6)

Topics in Contemporary Physics
Topics will be from the research areas of staff members.

MAY BE REPEATED FOR CREDIT

Physics 699 3 units; H(0-9)

Project in Physics
Each student will select a project in consultation with a staff member. The project may be experimental or theoretical in nature. A written report and an oral presentation are required.

Physics 701 3 units; H(0-9)

Independent Study
Each student will select a topic of study in consultation with a staff member. The topic will be in the research area of the staff member. This course may not be used to meet the regular course requirements in the MSc and PhD programs.

MAY BE REPEATED FOR CREDIT

Plant Biology PLBI

Instruction offered by members of the Department of Biological Sciences in the Faculty of Science.

Senior Courses

Plant Biology 327 3 units; H(3-3) (formerly Botany 327)

Systematics and Diversity of Plants
The diversity, form and function of plants ranging from algae, bryophytes (non-vascular land plants) and psilophytes to the angiosperms. Examples chosen to understand the origin of land plants and their subsequent evolution leading to highly diversified flowering plants.

Prerequisite(s): Biology 371 or 233.

Plant Biology 401 3 units; H(3-0) (formerly Botany 401)

Plant Biotechnology
The theory, application and history of plant biotechnology. Plant genome structure and the regulation of gene expression. Transcript, protein and metabolic profiling. Recombinant gene transfer into the plant genome. Biotechnological approaches to crop improvement, soil remediation and value-added traits.

Prerequisite(s): Biology 331, 371 or 233 and one of Biochemistry 341 or 393.

Plant Biology 403 3 units; H(3-3) (formerly Botany 303)

Plant Physiology
An integrative examination of the major physiological and metabolic processes in plants from the cellular to the whole-plant level. Emphasis on internal and external controls of growth and development; photosynthesis; nutrient assimilation; plant hormone metabolism and action; and stress physiology.

Prerequisite(s): Biology 371 or 233.

Plant Biology 421 3 units; H(3-3) (formerly Botany 321)

Plant Cell Biology and Anatomy
Study of plants at the cell and tissue level. Focus is on subcellular organization and dynamics, and on the structural and functional roles of cell and tissue systems. Lab sessions will emphasize brightfield and fluorescence microscopy imaging.

Prerequisite(s): Biology 371 or 233.

Plant Biology 507 3 units; H(0-8) or H(3-0) (formerly Botany 507)

Special Problems in Plant Biology
Research or reading project that may include seminars, lectures, term papers and training in theoretical and/or laboratory methods.

Prerequisite(s): 54 units (9.0 full-course equivalents) and consent of the Department.

Note: Students completing a typical course sequence in their program would normally be eligible to enrol in their third or fourth year. After consultation with a departmental faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be signed by the course supervisor before a student can register.

MAY BE REPEATED FOR CREDIT

Plant Biology 528 6 units; F(0-8) (formerly Botany 528)

Independent Studies in Plant Biology
Original and independent thought, practical research and the completion of written and oral reports.

Prerequisite(s): 72 units (12 full-course equivalents) and consent of the Department.

Note: After consultation with a departmental faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be signed by the course supervisor before a student can register.

MAY BE REPEATED FOR CREDIT

Plant Biology 530 6 units; F(0-8) (formerly Botany 530)

Honours Research Project in Plant Biology
Research project under the direction of one or more faculty members in the Department of Biological Sciences. Formal written and oral reports must be presented on completion of this course. Open only to Honours Botany students or Honours Biological Sciences students.

Prerequisite(s): 72 units (12 full-course equivalents) and consent of the Department.

Note: After consultation with a department faculty member who will supervise the chosen problem, a permission form obtained from the department office or website must be completed before a student can register.
**Plant Biology 541**
(formerly Botany 541)

3 units; H(3-3)

**Taxonomy of the Seed Plants**
A study of plants in relation to classification, phylogeny, evolution and identification. Students are required to make a plant collection of fifty plant specimens for identification in the laboratory. It is recommended that the collection be made in the preceding summer.

**Prerequisite(s):** Botany 327 or Plant Biology 327.

**Plant Biology 543**
(formerly Botany 543)

3 units; H(3-3)

**Plant Signaling and Development**
Physiology, biochemistry, molecular and cellular aspects of plant growth and development. Emphasis on the co-ordinated regulation of gene expression, cell-cell communication, and signalling during development. Discussion on the methods used to study development, such as mutants of Arabidopsis and other model systems.

**Prerequisite(s):** Biology 331 and one of Botany 303 or 321 or Plant Biology 403 or 421.

**Graduate Courses**
Enrolment in any graduate course requires consent of the Department. Only when appropriate to a student's program may graduate credit be received for courses numbered 500-599. 600-level courses may be repeated for credit and their application to plant biology research. **MAY BE REPEATED FOR CREDIT**

**Plant Biology 633**
3 units; H(3-0)

**Current Topics in Plant Biology**
Topics include: plant genomics, biotechnology, biochemistry, cell biology, development and evolutionary biology. Emphasis is on technical advances and their application to plant biology research.

**Political Science POLI**

Instruction offered by members of the Department of Political Science in the Faculty of Arts.

**Political Science Table of Principal Fields**
For use in selecting courses to meet principal field requirements:

**Political Science 302**
3 units; H(3-0)

**Topics in Politics**
Introductory examination of a topic in Political Science with a Canadian Politics, Comparative Politics, International Relations, or Political Theory focus. **MAY BE REPEATED FOR CREDIT**

**Political Science 310**
6 units; F(3-0)

**History of Political Thought**
An introduction to some of the most profound attempts to think about the meaning, limits, and possibilities of political life through an examination of selected central texts within the history of Western political philosophy.

**Political Science 321**
3 units; H(3-0)

**Politics and Government in Canada**
An examination of institutions and political processes in Canada. Significant attention is paid to key institutions such as Parliament, the executive, federalism, the Constitution, and the courts. Emphasis is also placed on the way that political processes are shaped by these and other institutions.

**Political Science 343**
3 units; H(3-1T)

**Law, Politics, and the Judicial Process**
The judicial system as a branch of government and as part of the political process. Focus on the Canadian judiciary within a comparative context.

**Political Science 345**
3 units; H(3-0)

**Indigenous Governance**
An examination of the institutions and logics of Indigenous governance structures in Canada. Emphasis will be placed on understanding how indigenous modes of governance contrast with institutions created by non-Indigenous politicians and bureaucrats. Attention will be paid to kinship, gender relations, war and conflict, and treaty land management.

**Political Science 357**
3 units; H(3-0)

**Introduction to Public Policy Analysis**
An introduction to themes and methods in public policy studies. The practical and normative problems facing governments in initiating, formulating, enacting, and implementing policy will be discussed. May include case studies.

**Political Science 359**
3 units; H(3-0)

**Introduction to Comparative Politics**
An introduction to the central concepts, problems, and approaches that comprise the field of comparative politics. Emphasis may also be placed on key analytical challenges, competing methods, and basic governance systems in selected parts of the world.

**Political Science 369**
3 units; H(3-0)

**Governments and Politics of the Middle East**
A survey and analysis of the organization and functioning of governments and politics of the contemporary Middle East, with emphasis on the social and economic environments which influence them.

**Political Science 371**
3 units; H(3-0)

**Governments and Politics of Africa**
Political institutions of selected African states. The influence of class and tribal structure; political parties; elections, the source and nature of ideologies; and economic and social policies.

**Political Science 379**
3 units; H(3-0)

**The Politics of Development**
A comparative survey of contemporary approaches to development theory and economics such as: modernization, neo-liberalism, post-development, critical globalism, gender and development, environment and development. Issues treated include poverty, cultural diversity, sustainability, and the role of state, market, NGOs, and science and technology.

**Political Science 381**
3 units; H(3-0)

**Introduction to International Relations**
The structures and processes of international relations and foreign policy.

**Political Science 397**
3 units; H(3-0)

**Introduction to Research Methods**
Introduction to the questions, strategies and rationales of political science research methods. Emphasis on the practical and theoretical advantages and disadvantages of quantitative, qualitative, and mixed-methods approaches.

<td></td>
<td>Indigenous Politics: An introduction to historical and contemporary socio-political issues associated with indigenous peoples and state-society relations. Prerequisite(s): 3 units in Political Science.</td>
</tr>
<tr>
<td>Political Science 425</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>City Government: A study of both institutions and political processes relating to city politics. Prerequisite(s): Political Science 310.</td>
</tr>
<tr>
<td>Political Science 426</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Federalism: Theoretical and empirical examination of federalism in Canada and other selected states. Prerequisite(s): Political Science 310.</td>
</tr>
<tr>
<td>Political Science 427</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Government and Politics of Alberta: An analysis of the institutions and processes of Alberta’s government as well as activities in selected policy areas. The examination will include historical as well as contemporary references. Prerequisite(s): Political Science 310.</td>
</tr>
<tr>
<td>Political Science 428</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Comparative Provincial Politics: An analysis of provincial politics in Canada focusing on the distinctive political environments as well as similarities and differences in provincial political cultures, party systems and elections, and selected policy areas. Prerequisite(s): Political Science 321.</td>
</tr>
<tr>
<td>Political Science 429</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Electoral Behaviour: An examination of how and why citizens engage with their governments. Topics may include individual and group influences on citizen participation, electoral choice, and political behaviour in Canada and other democracies. Prerequisite(s): One of Political Science 321 or 399.</td>
</tr>
<tr>
<td>Political Science 430</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Public Opinion: An investigation of theories of public opinion in representative democracies and of survey techniques employed in their examination. A portion of the course will normally be devoted to developing and administering a public opinion survey. Prerequisite(s): 3 units in Political Science.</td>
</tr>
<tr>
<td>Political Science 431</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Canadian Political Parties: An examination of political parties and party systems in Canada. Party history is reviewed and attention is given to issues relating to organization, finance, representation and electoral competition. Prerequisite(s): Political Science 321.</td>
</tr>
<tr>
<td>Political Science 432</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Selecting and Removing Political Leaders: An examination of the processes political parties use to choose and remove their leaders. The focus is on Canadian parties with comparisons to selected parties in other countries. Prerequisite(s): Political Science 321.</td>
</tr>
<tr>
<td>Political Science 433</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Urban Policy and Governance: Examination of policy issues in Canadian cities, with a special focus on domains involving complex governance challenges. Emphasis on the consequences of policy governance for urban public policy, political authority, and democratic accountability. Prerequisite(s): Political Science 310.</td>
</tr>
<tr>
<td>Political Science 435</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Canada and World Politics: An analysis and evaluation of Canada’s role on the international scene; main objectives of Canadian foreign policy; security and defence policies; Canada’s participation in universal international organizations; the influence of Canada as a middle power upon world events. Prerequisite(s): Political Science 310.</td>
</tr>
<tr>
<td>Political Science 439</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Strategic Studies: An analysis of the causes of war, the meaning of security and defence in the post-Cold War era, including the use and control of military force. Prerequisite(s): Political Science 310.</td>
</tr>
<tr>
<td>Political Science 440</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Campaigns and Elections: Explores election campaigns in Canada through case studies of key elements such as the selection of candidates, the building of campaign teams and the strategies and tactics parties use to elect candidates and win general elections. Prerequisite(s): Political Science 321 and 345.</td>
</tr>
<tr>
<td>Political Science 444</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Constitutional Law and Politics: The law and politics of the Canadian constitution, including the Charter of Rights and Freedoms, the federal division of powers, and responsible parliamentary government. Prerequisite(s): Political Science 321 and 343.</td>
</tr>
<tr>
<td>Political Science 447</td>
<td>3 units; H(3-0)</td>
<td></td>
<td>Comparative Public Policy: An examination of a range of public policy issues from a comparative perspective. Topics include social policy, family policy, immigration and multiculturalism, and environmental policy across the advanced industrialized democracies. Prerequisite(s): Political Science 357 or 359.</td>
</tr>
</tbody>
</table>
Political Science 451 3 units; H(3-0)
Political Administration
Theories of public administration and their practical application in Canada and selected countries.
Prerequisite(s): Political Science 321.

Political Science 453 3 units; H(3-0)
(formerly Political Science 553)
Women and Politics
An examination of current trends in women’s political participation in Canada and around the world. Topics may include: women’s political behaviour, women’s political representation, and women’s movements’ engagement with political institutions.
Prerequisite(s): Political Science 359 or 321.

Political Science 455 3 units; H(3-0)
Protest, Rebellion, and Revolution
A study of the origins, processes, and outcomes of peaceful and violent forms of political protest, rebellion and revolution. Cases may include historical and contemporary examples from around the world.
Prerequisite(s): Political Science 359.

Political Science 463 3 units; H(3-0)
Politics of Post-Industrial States
Comparative analysis of the political dynamics of post-industrial states. Focus on problems associated with post-industrialization and on explanations for political stability and change.
Prerequisite(s): Political Science 359.

Political Science 464 3 units; H(3-0)
European Politics
An introduction to the governments and politics of the states and societies of Europe, including the importance of their membership in the European Union.
Prerequisite(s): Political Science 359.

Political Science 465 3 units; H(3-0)
Chinese Politics
An introduction to the politics of the Chinese communist party-state. Topics may include: the Mao era leadership debates on socialist development; the post-Mao reforms of Deng Xiaoping and his successors; and the emerging challenges associated with market reforms and China’s integration into the global capitalist economy.
Prerequisite(s): Political Science 359.

Political Science 469 3 units; H(3-0)
Middle East: Contemporary Political Problems
An in-depth analysis of selected political, economic and social problems and issues affecting individual nations and the area in general.
Prerequisite(s): Political Science 369.

Political Science 470 3 units; H(3-0)
Genocide
An introduction to comparative genocide studies. Examines the causes, structures, and dynamics of genocide and mass violence.
Prerequisite(s): One of Political Science 359 or 381 or Law and Society 201.

Political Science 471 3 units; H(3-0)
Africa: Contemporary Political Problems
An analysis of political problems in selected political systems of Africa. Topics will include the politics of rural development, political elites and the state in Africa, political institutions, constraints on development, and urban politics.
Prerequisite(s): Political Science 371 or African Studies 301.

Political Science 473 3 units; H(3-0)
States Regimes Latin America
An analysis of how selected Latin American states and societies are addressing both old and new problems such as the transitions from and legacies of dictatorship, political and criminal violence, as well as the construction of democratic institutions and inclusive citizenship.
Prerequisite(s): Political Science 359.

Political Science 477 3 units; H(3-0)
(formerly Political Science 377)
American Politics
A study of the institutions and processes of American politics.
Prerequisite(s): Political Science 359.

Political Science 479 3 units; H(3-0)
International Relations of the Contemporary Arab World
An examination of the Arab regional system, with emphasis on regional interaction, regional organizations, and external linkages. The specific cultural, political, ideological, and strategic characteristics of the system will be analyzed.
Prerequisite(s): Political Science 369.

Political Science 481 3 units; H(3-0)
(formerly Political Science 571)
The Politics of Human Rights
An analysis of the origins, evolution, and contemporary politics of human rights. Topics may include the philosophic and religious roots of human rights; international and domestic human rights laws; and struggles to promote and protect human rights in specific contexts around the world.
Prerequisite(s): One of Political Science 310, 359, 381.

Political Science 483 3 units; H(3-0)
(formerly Political Science 383)
International Law
The basic concepts, principles, and functions of international law.
Prerequisite(s): Political Science 381.

Political Science 485 3 units; H(3-0)
Global Political Economy
Analysis of the politics of international economic relations. Topics may include the politics of trade and money relations, energy, multinational corporations, and the New International Economic Order.
Prerequisite(s): Political Science 381.

Political Science 487 3 units; H(3-0)
(formerly Political Science 385)
International Organizations
An analysis of international governmental organizations with main emphasis on the United Nations and selected regional organizations.
Prerequisite(s): Political Science 381.

Political Science 491 3 units; H(3-0)
U.S. Security Policy
Examination of U.S. security policy, with emphasis on how it is made and on contemporary security issues the U.S. faces.
Prerequisite(s): Political Science 381.

Political Science 502 3 units; H(3-0)
Advanced Topics Seminar in Politics
Advanced seminar on a topic in political science with a Canadian politics, comparative politics, international relations, or political theory focus.
Prerequisite(s): 3 units in Political Science at the senior level.
MAY BE REPEATED FOR CREDIT

Political Science 503 3 units; H(3-0)
Selected Topics in Political Theory
Content of the course will vary from year-to-year.
Prerequisite(s): Political Science 310.
MAY BE REPEATED FOR CREDIT

Political Science 505 3 units; H(3S-0)
Sexual Ethics
An examination of attempts to theorize those things associated with human sexuality using works of historical and contemporary political philosophy. Topics may include: the nature of love and friendship, the good of marriage, limits of sexuality, and the place of justice, equality, and shame.
Prerequisite(s): Political Science 310.

Political Science 506 3 units; H(3S-0)
Social and Global Justice
An examination of contemporary theories and debates in social and global justice. Topics may include: the redistribution-recognition dilemma, multiculturalism, intersectionality, identity/post-identity politics, globalization, transnationalization, and post-Westphalian approaches to governance and democracy.
Prerequisite(s): Political Science 310, 379, 381, 481 or 417.

Political Science 515 3 units; H(3S-0)
Advanced History of Political Thought
An intensive study of selected major political thinkers within the history of political thought.
Prerequisite(s): Political Science 310.

Political Science 519 3 units; H(3S-0)
Interpretation and War
An examination of the philosophical justifications offered to defend the use of military force, based particularly on the analysis of texts in the history of Western political philosophy.

Political Science 521 3 units; H(3S-0)
Canadians Federalism
An examination of the dynamics of Canadian Federalism including relations among provinces and between provinces and the federal government.
Prerequisite(s): One of Political Science 321, 426, 427 or 428.

Political Science 523 3 units; H(3S-0)
Canada and the Circumpolar World
An examination of critical national and international issues in the circumpolar world.
Prerequisite(s): Political Science 381.

Political Science 524 3 units; H(3S-0)
Advanced Seminar in Indigenous Politics in Canada
Engagement with the contributions made by Indigenous scholars to rethinking Canadian politics. Emphasis on Indigenous scholars’ critiques of colonialism and settler-colonialism in Canada, and
Political Science 525  3 units; H(3-0)

Energy Politics in Alberta
An examination of energy politics in Alberta. Topics may include the federal-provincial dimensions of energy politics and policymaking, environmental politics, and the economic dimensions of energy policy.
Prerequisite(s): Political Science 321.

Political Science 531  3 units; H(3-0)

Parties, Elections and Representation
An examination of political parties and elections in both established and emerging democracies as a means of understanding the nature of political representation in modern representative democracies.
Prerequisite(s): Political Science 431.

Political Science 543  3 units; H(3-0)

Law and Armed Conflict
An examination of key texts and topics concerning the evolution, conceptualization, codification, and practical application of the laws of armed conflict. Topics may include the historical and philosophical development of the customary and codified laws of armed conflict, military law and military training and education, and the use of law to punish and deter war crimes.
Prerequisite(s): Political Science 343 or 483.

Political Science 551  3 units; H(3-0) (History 551)

Women in Canadian Politics
A political history of women in Canada in the twentieth and twenty-first centuries. Topics include campaigns for suffrage, legal personhood and equality rights, women’s political activism, the evolution of public policy concerning women, and the participation of women in public life.
Prerequisite(s): Political Science 321.

Political Science 554  3 units; H(3S-0)

Women and Public Policy
An examination of the impact of public policies on gender relations from a comparative perspective. Topics may include family and social policies, gender and the workplace, reproductive rights, and gender-based violence.
Prerequisite(s): Political Science 357, 359, or 453.

Political Science 561  3 units; H(3S-0)

Government and Politics of the European Union
An examination of the politics of the European Union. May be offered as a seminar or in preparation for and participation in a model European Council Meeting.
Prerequisite(s): One of Political Science 359, 381, or 464.

Political Science 565  3 units; H(3S-0)

Indigenous Politics in the Global South
Advanced examination of the competing theoretical explanations for the sudden and unexpected rise of Indigenous peoples as key political actors in countries of the Global South. May include Indigenous rights struggles in Africa, Asia, and Latin America.
Prerequisite(s): Political Science 359 or Indigenous Studies 407.

Political Science 569  3 units; H(3S-0)

Selected Topics in Middle East Politics
Emphasis will be on foreign-policy development and application in the Middle East.
Prerequisite(s): Political Science 369 and one 400-level course in comparative politics or international relations.

Political Science 575  3 units; H(3-0)

Intelligence and Policy
An examination of the role and limits of intelligence in policymaking.
Prerequisite(s): Political Science 381.

Political Science 579  3 units; H(3-0)

Political Economy of Development
Third World development projects, programs, and policies in Africa, Asia and Latin America, intended to raise the standard of living and enhance political participation.
Prerequisite(s): Consent of the Department.

Political Science 581  3 units; H(3S-0)

Selected Topics in International Law and Organizations
An advanced seminar on international order and on co-operative and competitive efforts by states and other international actors to create, maintain and change that order.
Prerequisite(s): Political Science 483 or 487.

Political Science 585  3 units; H(3-0)

Nonproliferation Regimes
An analysis of the politics of the international regimes governing the control of weapons of mass destruction, including case studies of states that pose challenges to these regimes.
Prerequisite(s): Political Science 381.

Political Science 587  3 units; H(3-0)

International Ethics
An examination of ethical reasoning and moral norms in political decision making, institutions, and processes in international politics. Topics such as justice in relation to war and terrorism, sovereignty, intervention and human rights, globalization and global poverty, and the environment may be analyzed.
Prerequisite(s): Political Science 381 or 310.

Political Science 590  3 units; H(3S-0) (formerly Political Science 499)

Honours Seminar
An examination of classic works in political science.
Prerequisite(s): Admission to Political Science Honours program and completion of 75 units.

Political Science 591  3 units; H(3-0)

(for formerly Political Science 500 and 504)

Honours Thesis
Preparation of an honours thesis under the supervision of a faculty member who will assign the final grade.
Prerequisite(s): Political Science 590.
Political Science 631  3 units; H(3-0)

Political Science 633  3 units; H(3S-0)

Political Science 641  3 units; H(3-0)

Political Science 643  3 units; H(3-0)

Political Science 651  3 units; H(3-0)

Political Science 653  3 units; H(3S-0)

Political Science 655  3 units; H(3S-0)

Political Science 661  3 units; H(3-0)

Political Science 663  3 units; H(3-0)

Political Science 665  3 units; H(3S-0)

Political Science 671  3 units; H(3-0)

Political Science 673  3 units; H(3-0)

Political Science 675  3 units; H(3-0)

Political Science 681  3 units; H(3-0)

Political Science 683  3 units; H(3-0)

Political Science 684  3 units; H(3-0)

Political Science 685  3 units; H(3-0)

Political Science 688  3 units; H(3S-0)

Political Science 689  3 units; H(3-0)

Political Science 691  3 units; H(3-0)

Political Science 693  3 units; H(3-0)

Political Science 695  3 units; H(3-0)

Political Science 697  3 units; H(3-0)

Political Science 699  3 units; H(3-0)

Qualitative Analysis in Political Science
An introduction to qualitative research methods in Political Science. Topics may include qualitative methodology, elite interviewing, focus groups, content analysis, case studies and qualitative data analysis.

Prerequisite(s): Political Science 691.

Political Science 715  3 units; H(3-0)

Special Topics in Political Theory
MAY BE REPEATED FOR CREDIT

Political Science 721  3 units; H(3-0)

Special Topics in Canadian Politics
MAY BE REPEATED FOR CREDIT

Political Science 723  3 units; H(3-0)

Special Topics in Public Law
MAY BE REPEATED FOR CREDIT

Political Science 725  3 units; H(3-0)

Special Topics in Public Administration
MAY BE REPEATED FOR CREDIT

Political Science 741  3 units; H(3-0)

Special Topics in Public Policy
MAY BE REPEATED FOR CREDIT

Political Science 755  3 units; H(3-0)

Special Topics in International Relations
MAY BE REPEATED FOR CREDIT

Political Science 771  3 units; H(3-0)

Scope and Methods in Political Science
Advanced seminar covering various approaches, topics, methods and theories employed in the discipline of political science.

MAY BE REPEATED FOR CREDIT

Each year, depending on the needs of students, a number of 600- and 700-level graduate courses are offered from the foregoing list. In addition to the numbered and titled courses shown above, the Department offers a selection of advanced level graduate courses specifically designed to meet the needs of individuals or small groups of students. These courses are numbered in the series 800.01 to 899.99. Such offerings are, however, contingent upon the availability of staff resources.

Psychology PSYC
Instruction offered by members of the Department of Psychology in the Faculty of Arts.

Junior Courses
Psychology 200  3 units; H(3-0)

Principles of Psychology I
Fundamental terminology, procedures, findings, and theories related to basic psychological processes.

Antirequisite(s): Credit for Psychology 200 and 205 will not be allowed.

Note: Psychology 200 is a prerequisite for almost all senior-level Psychology courses.
Psychology 201 3 units; H(3-0)

Principles of Psychology II
Fundamental terminology, procedures, findings, and theories related to individual, social, and abnormal behaviour.

Antirequisite(s): Credit for Psychology 201 and 205 will not be allowed.

Psychology 203 3 units; H(3-0)

Psychology for Everyday Life
Designed for non-Psychology majors. Provides students with an understanding of the key theories, research methods, and discoveries of psychology, with an emphasis on developing the knowledge and skills necessary to be effective consumers of psychological theory and research. Through a focus upon issues that arise in everyday life, this course will demonstrate some of the ways in which psychology can be of use to students in their personal and professional lives.

Psychology 204 3 units; H(3-0)

Human Sexuality
Examination of contemporary knowledge and attitudes toward human sexuality, relying on theoretical and empirical psychological research. Multiple perspectives are presented, including psychosocial, cross-cultural, and psychobiological. Sexuality across the life span is examined, including issues pertaining to sexual differentiation, intimacy and communication, gender role development, varieties of sexual relationships and behaviour, and legal and ethical issues.

Senior Courses
Note: Registration in 400- and 500-level Psychology courses is restricted to Psychology Majors.

Psychology 300 3 units; H(3-2)

Research Methods and Data Analysis in Psychology I
Research methods in psychological research, with an introduction to data analysis.

Prerequisite(s): One of Mathematics 30-1, 30-2, 31, Pure Mathematics 30, Applied Mathematics 30, or Mathematics 2 (offered by Continuing Education); 70 per cent or higher on the Mathematics Diagnostic Test (offered by the Mathematics and Statistics Department); Psychology 200 and one of Psychology 201 or Neuroscience 201.

Antirequisite(s): Credit for Psychology 300 and 312 will not be allowed. Credit towards degree requirements will be given for only one of Psychology 300 and Data Science 305, Engineering 319, Political Science 399, Sociology 311, Statistics 205, 213, 217, 327; that one being a course appropriate to the degree program.

Psychology 301 3 units; H(3-2)

Research Methods and Data Analysis in Psychology II
An integration of research methods and statistics in psychological research, with an emphasis on conducting and interpreting inferential statistical techniques.

Prerequisite(s): Psychology 300.

Antirequisite(s): Credit for Psychology 301 and 312 will not be allowed. Credit towards degree requirements will be given for only one of Psychology 300 and Engineering 319, Political Science 399, Sociology 311, Statistics 205, 213, 217, 327; that one being a course appropriate to the degree program.

Psychology 305 3 units; H(3-0)

History of Psychological Thought
The roots of psychological thought in Western culture, and the relationship between theories of human nature and changing social institutions.

Prerequisite(s): Psychology 200 and 201.

Psychology 321 3 units; H(3-0)

Industrial and Organizational Psychology
Understanding and predicting behaviour and attitudes within an organizational setting. Topics normally include: personnel selection, attraction to organizations and job choice, person-organization fit, organizational culture, motivation and decision-making, employee attitudes, deviant behaviour in organizations, leadership, team behaviour, and personality in the workplace.

Prerequisite(s): Psychology 200 and 201.

Antirequisite(s): Psychology 321 and one of Applied Psychology 311 or 313 will not be allowed.

Psychology 345 3 units; H(3-0)

Social Psychology
Social psychological approaches to understanding social influence, social perception and cognition, attitudes and group dynamics.

Prerequisite(s): Psychology 200 and 201.

Psychology 349 3 units; H(3-0)

Language Development
Research into language development in typically developing children, with consideration of environmental and other factors that influence acquisition. Consideration also given to atypical language development.

Prerequisite(s): Psychology 200 and 201.

Antirequisite(s): Credit for Psychology 349 and Linguistics 331 will not be allowed.

Psychology 351 3 units; H(3-0)

Developmental Psychology
An examination of psychological development through childhood and adolescence.

Prerequisite(s): Psychology 200 and 201.

Psychology 353 3 units; H(3-0)

Psychology of Aging
Examines theory and research related to psychological processes during adulthood and aging. Topics may include life-span developmental theories and methods; biological processes; sensory, perceptual and cognitive processes; personality and social processes; life transitions, mental health issues, and dying.

Prerequisite(s): Psychology 200 and 201.

Psychology 365 3 units; H(3-0)

Cognitive Psychology
A survey of research and theory in cognitive psychology. Research in pattern recognition, attention, memory, language, thinking, and other cognitive abilities is explored, with discussion of associated brain mechanisms.

Prerequisite(s): Psychology 200 and 201.

Antirequisite(s): Credit for Psychology 365 and Applied Psychology 411 will not be allowed.

Psychology 369 3 units; H(3-0)

Sensation and Perception
The psychological and physiological bases of sensory and perceptual processes, including vision, audition, taste, smell, touch, proprioception, and basic psychophysics. Provides a background for advanced courses in sensory and perceptual processing, human factors, and environmental psychology.

Prerequisite(s): Psychology 200 and 201.

Psychology 375 3 units; H(3-0)

Brain and Behaviour
The neural basis of learning, memory, language and thinking, as well as pathological, sexual, aggressive, and emotional behaviour that arises from neural and hormonal malfunctioning.

Prerequisite(s): Psychology 200.

Psychology 383 3 units; H(3-0)

Personality
Approaches to the study of personality.

Prerequisite(s): Psychology 200 and 201.

Psychology 385 3 units; H(3-0)

Abnormal Psychology
Abnormal behaviour and experiences, their causes and treatment throughout the lifespan.

Prerequisite(s): Psychology 200 and 201.

Psychology 400 3 units; H(0-3)

Conducting Research
Students will learn to apply appropriate research methods to answer research questions, to collect and analyze data, and to interpret and report research findings.

400.01. Abnormal Psychology
400.02. Applied Psychology
400.03. Brain and Behaviour
400.04. Cognitive Psychology
400.05. Developmental Psychology
400.06. Industrial-Organizational Psychology
400.07. Sensation and Perception
400.08. Social Psychology

Prerequisite(s): Admission to the Psychology major or Honours program and: 01: Psychology 300, 301, 385; 02: Psychology 300, 301, 03: Psychology 300, 301, 375; 04: Psychology 300, 301, 365; 05: Psychology 300, 301 and one of 349 or 353 or 352; 06: Psychology 300, 301 and one of 321 or 383; 07: Psychology 300, 301, 369; 08: Psychology 300, 301, 345.

Antirequisite(s): Credit towards degree requirements will be given for only one of Psychology 400.01, 400.02, 400.03, 400.04, 400.05, 400.06, 400.07, 400.08.

Psychology 405 3 units; H(3-0)

Contemporary Theories in Psychology
An analysis of what constitutes a “theory,” “model” and “explanation” in psychology as a science. Survey of major theoretical positions in twentieth-century psychology.

Prerequisite(s): Psychology 200 and 201, one senior course in Psychology, and admission to the Psychology major or Honours program.

<th>Course Code</th>
<th>Title</th>
<th>Units</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Psychology 407</td>
<td>Psychometrics&lt;br&gt;Theory and application of methodological and statistical issues in psychological assessment. Topics include: theories of psychological measurement, scale development, item analysis, item bias, reliability, validity, and test fairness.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program. Antirequisite(s): Credit for Psychology 407 and Applied Psychology 307 will not be allowed.</td>
</tr>
<tr>
<td>Psychology 411</td>
<td>Design and Analysis in Psychological Research&lt;br&gt;Experimental design problems and techniques for analysis of psychological data.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 415</td>
<td>Qualitative Inquiry in Psychology&lt;br&gt;Qualitative approaches to psychological research such as phenomenology, grounded theory, and discourse analysis. Specific topics include research interviews, ethics, and evaluating qualitative research.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 417</td>
<td>Tests and Individual Differences&lt;br&gt;Individual differences and psychological testing including the description, use, evaluation and development of typical tests, as well as discussion of important issues in human difference.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 425</td>
<td>Human Factors&lt;br&gt;Application of psychological research and theory to people-system relationships and the work environment; display and control devices, design and evaluation of the built environment, human skills and limitations, work schedules, safety, and research methods in human factors engineering.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 427</td>
<td>Environmental Psychology&lt;br&gt;The theory and data pertaining to the relationship between human behaviour and the physical environment, both natural and built. Particular emphasis is placed on the implications of current knowledge for the management of the human-environment interface. A research project is an integral part of the course.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 429</td>
<td>Adolescence&lt;br&gt;An in-depth examination of the physical, cognitive, emotional, and social changes occurring during adolescence, drawing upon theory and relevant research.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program. Antirequisite(s): Credit for Psychology 429 and 355 will not be allowed.</td>
</tr>
<tr>
<td>Psychology 430</td>
<td>Psychophysiology in Health Research&lt;br&gt;An examination of the impact of emotions on physiological activity and risk for disease, including coronary heart disease, ulcers, asthma, cancer and other immune-related disorders, with an emphasis on the discussion and understanding of empirical research. Hands-on experience with psychophysiological measurement equipment and procedures commonly used in stress research will be provided.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 431</td>
<td>Current Issues in Psychopathology&lt;br&gt;Discussion of current developments and controversies in the assessment, etiology, and treatment of psychopathology. Emphasis will be on teaching students how to strengthen their critical thinking skills using controversial issues in the fields of abnormal and clinical psychology as a basis for discussion and debate.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301, 385 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 433</td>
<td>Clinical Psychology&lt;br&gt;Assessment and treatment problems in clinical settings.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301, 385 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 435</td>
<td>Behaviour Modification&lt;br&gt;Current behaviour change procedures for children and adults. Practical considerations involved in the selection, implementation, maintenance, and evaluation of behaviour modification programs.</td>
<td>3 units; H(3-2)</td>
<td>Prequisite(s): Psychology 300, 301, 385 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 437</td>
<td>Health Psychology&lt;br&gt;Health psychology involves the discipline and principles of psychology and human behaviour in understanding how the mind, body, and behaviour interact in health and disease. Class topics include psychosocial models of health and disease, stress and coping, health enhancing and health damaging behaviours, pain management, and a variety of specific behaviour-related medical illnesses (e.g., heart disease, cancer, insomnia).</td>
<td>3 units; H(3-0) &lt;br&gt;(formerly Psychology 330)</td>
<td>Prequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 439</td>
<td>Psychology of Gender&lt;br&gt;An analysis of psychological theory and research on gender situated within the interdisciplinary field of gender studies. Topics include the meaning of gender, psychological development and gender, and gender and interpersonal relationships.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300 and 301; one of 345 or 351 and admission to the Psychology major or Honours program. Antirequisite(s): Credit for Psychology 439 and 347 will not be allowed.</td>
</tr>
<tr>
<td>Psychology 442</td>
<td>Intergroup Relations&lt;br&gt;In-depth exploration of intergroup relations from a social psychological perspective. Theory and research about the processes involved in stereotyping, prejudice, and discrimination.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301, 345, and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 443</td>
<td>Interpersonal Relationships&lt;br&gt;Application of social psychological theory and methodology to a variety of topics in the area of interpersonal relationships such as attraction, close relationships, interpersonal conflict, communication, and power. Course projects will be an integral part of the course.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301, 345 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 444</td>
<td>Psychology of Morality&lt;br&gt;An exploration of the origins and nature of moral conduct from the perspective of psychological theory and research. Examination of the naturalistic basis for why people care about morality, behave morally or not, and the psychological bases of moral judgment. Topics may include the evolutionary basis for morality, moral intuitionism, moral development, and moral judgment.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program. Antirequisite(s): Credit for Psychology 445 and 447.08 will not be allowed.</td>
</tr>
<tr>
<td>Psychology 447</td>
<td>Advanced Topics in Personality or Social Psychology&lt;br&gt;An examination of current research topics in personality or social psychology or gender.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program. Note: Students are advised to consult with the Department regarding the topic and recommended prerequisites for the course in a given term. MAY BE REPEATED FOR CREDIT.</td>
</tr>
<tr>
<td>Psychology 449</td>
<td>Social-Personality Development&lt;br&gt;Socialization processes and behaviours from birth to adolescence; observational learning, altruism, moral development, sex-roles, dependency, emotional development, and social motivation.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301, 351 and admission to the Psychology major or Honours program.</td>
</tr>
<tr>
<td>Psychology 451</td>
<td>Cognitive Development&lt;br&gt;Current and classic research in the area of cognitive development is explored. Topics may include sensory and perceptual development, language acquisition, symbolic representation, concept formation, memory, and social-cognitive development. Laboratory projects involve methodologies used in research with children.</td>
<td>3 units; H(3-0)</td>
<td>Prequisite(s): Psychology 300, 301, 351 and admission to the Psychology major or Honours program or to the minor in Speech-Language Sciences for Linguistics Majors.</td>
</tr>
</tbody>
</table>
Courses of Instruction

Psychology 455 3 units; H(3-0)
Sensory, Perceptual, and Cognitive Aspects of Aging
Basic research and contemporary issues in the age-related changes in sensation, perception, attention, learning and memory, intelligence and problem-solving.
Prerequisite(s): Psychology 300, 301, 353 and admission to the Psychology major or Honours program.

Psychology 457 3 units; H(3-0)
Social and Clinical Aspects of Aging
Stability and change in the later years of life with a focus on social and clinical areas of aging.
Prerequisite(s): Psychology 300, 301, 353 and admission to the Psychology major or Honours program.

Psychology 459 3 units; H(3-0)
Developmental Psychopathology
A critical examination of developmental psychopathology during childhood and adolescence with an emphasis on the characteristics of the disorders, their determinants, and outcomes. Current theories and research, and recent trends in intervention and prevention will be emphasized.
Prerequisite(s): Psychology 300, 301, 351, 385 and admission to the Psychology major or Honours program.

Psychology 463 3 units; H(3-0)
Memory
Current memory research is explored. Topics include how memories are encoded, and retrieved. Laboratory projects introduce methodologies used in memory research.
Prerequisite(s): Psychology 300, 301, 365 and admission to the Psychology major or Honours program.

Psychology 467 3 units; H(3-0)
(Linguistics 467)
Experimental Psycholinguistics
Exploration of the cognitive, neuropsychological, and social processes that underlie language abilities, with reference to linguistic theory.
Prerequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program or to the minor in Speech-Language Sciences for Linguistics Majors.
Antirequisite(s): Credit for Psychology 467 and either Linguistics 339 or 439 will not be allowed.

Psychology 469 3 units; H(3-0)
Vision
A systematic examination of vision and its role in our interactions with the natural environment. Topics may include: the physics of light; optics; eye and retina; visual pathways and visual brain; perception of colour, space, change and motion; visual development and aging; art and vision; visual disorders; and recovery from blindness.
Prerequisite(s): Psychology 300, 301, 369 and admission to the Psychology major or Honours program.

Psychology 471 3 units; H(3-0)
Auditory Cognitive Neuroscience
Exploration of auditory perception from an auditory cognitive neuroscience perspective, using music and speech as domains of inquiry. Focus on acoustics, psychophysics, cognitive psychology, cognitive development, neurophysiology, and neuropsychology. Includes hands-on exercises in sound manipulation and experimentation.
Prerequisite(s): Psychology 300, 301, 369 and admission to the Psychology major or Honours program or to the minor in Speech-Language Sciences for Linguistics Majors or the Concentration in Speech-Language Sciences for Linguistics Majors.

Psychology 473 3 units; H(3-0)
Evolution and Human Behaviour
An examination of the scientific synthesis of evolutionary biology and modern psychology, which offers a novel approach to such issues as short-term and long-term human mating strategies, short-term sexual conflicts, conflict between the sexes, parental investment, aggression, and social dominance.
Prerequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.

Psychology 474 3 units; H(3-0)
(Neuroscience 474)
Neurobiology of Learning and Memory
An examination of learning and memory from a neuroscience perspective. Molecular, cellular, systems-level, and behavioural approaches will be applied to themes such as consolidation, amnesia, and pathological processes.
Prerequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program.

Psychology 475 3 units; H(3-0)
(Neuroscience 475)
Drugs and Behaviour
The behavioural effects of drugs specifically employed to affect the nervous system, as seen in the treatment of mental disorders, behavioural disorders, and other conditions such as Parkinson’s, Huntington’s and Alzheimer’s diseases. Neuro-pharmacologic agents will be discussed as they relate to the biochemistry and physiology of putative neurotransmitters.
Prerequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program.

Psychology 477 3 units; H(3-0)
(Neuroscience 477)
Sleep and Biological Rhythms
Behaviours are temporally co-ordinated and occur in a rhythmic fashion. The most obvious rhythmic behaviour humans engage in is sleeping; we spend one-third of our lives asleep. This course will survey the behavioural, physiological, and clinical aspects of sleep and biological rhythms.
Prerequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program.

Psychology 478 3 units; H(3-3)
(Neuroscience 478)
Behavioural Neuroscience
An examination of the neural underpinnings of behaviour. Experimental approaches, neural mechanisms, and health implications will be explored through both lecture material and laboratory exercises.
Prerequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program.

Psychology 479 3 units; H(3-0)
(Neuroscience 479)
Human Neuropsychology
Integration of the literature on human brain damage with the evidence from animal research. Topics include developmental neuropsychology; cognitive deficits associated with frontal, parietooccipital, and temporal lobes; origins and mechanisms in the determination of cerebral dominance; disorders of learning and memory; long-term effects of cerebral lesions.
Prerequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program or to the minor in Speech-Language Sciences for Linguistics Majors.

Psychology 481 3 units; H(3-0)
Advanced Topics in Organizational Psychology
Students will be expected to critically evaluate current theory, research, and practice in the field of Organizational Psychology with content emphasizing primary readings. Student presentations, project work, and debates will emphasize the implications for linking knowledge and practice.
481.01. Leadership and Motivation
481.02. Teams and Teamwork
481.03. Workplace Attitudes and Individual Differences
Prerequisite(s): Psychology 300 and 301; one of 321 or 421 or 423 and admission to the Psychology major or Honours program.

Psychology 483 3 units; H(3-0)
Advanced Topics in Personnel Psychology
Students will be expected to critically evaluate current theory, research, and practice in the field of Personnel Psychology with content emphasizing primary readings. Student presentations, project work, and debates will emphasize the implications for linking knowledge and practice.
483.01. Personnel Selection
483.02. Personnel Recruitment and Job Choice
483.03. Performance Management
Prerequisite(s): Psychology 300 and 301; one of 321 or 421 or 423 and admission to the Psychology major or Honours program.

Psychology 491 3 units; H(3-0)
Cross-Cultural Cognition
Theory and research on the interaction of culture and human cognition. Topics include cross-cultural research in perception, language processing, memory, concepts, and reasoning.
Prerequisite(s): Psychology 300, 301, 365 and admission to the Psychology major or Honours program.

Psychology 493 3 units; H(3-0)
Psychology and Law
Consideration of the contributions of psychological theory and research to the understanding of crime investigation, courtroom dynamics, and the legal system. Specific topics may include eyewitness testimony, police practices, judge and jury decision making, lie detection and confessions, and expert testimony. Topics will be discussed from the perspectives of social and cognitive psychology.
Prerequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.

Psychology 495 3 units; H(3-0)
Consumer Psychology
Consideration of the psychological concepts used to understand the processes involved in consumer
behaviour. Specific topics may include research methodology, individual and group influences, marketing strategies, and consumer decision making. Topics will be discussed from the perspectives of cognitive and social psychology.

Prerequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.

Antirequisite(s): Credit for Psychology 495 and Marketing 493 will not be allowed.

Psychology 497 3 units; H(3-0)

Consciousness
An exploration of the origin, nature, and function of consciousness as informed by research on conscious and unconscious processes, psychological disorders, neuropsychological case studies, consciousness-altering drugs, hypnosis, meditation, state-dependent memory, sleep, and dreams.

Prerequisite(s): Psychology 300 and 301; one of 365 or 375 and admission to the Psychology major or Honours program.

Psychology 499 1.5 units; Q(0-1.5)

Research Experience in Psychology
Students acquire research experience working under the supervision of a faculty member. Assignments may include literature search, materials preparation, data collection, data organization and management, and data analysis.

499.01 Research Experience I
499.02 Research Experience II

Prerequisite(s): Psychology 300 and 301; 18 units (3.0 full-course equivalents) in Psychology, admission to the Psychology major or Honours program, and consent of the Department.

Note: An application is required and it is the student’s responsibility to find a research supervisor.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Psychology 501 3 units; H(3S-0)

Honours Topics Seminar in Psychology
Selected topics from one or more areas in psychology.

Prerequisite(s): Psychology 300, 301, admission to the Psychology Honours program and consent of the Department.

Note: May be repeated once for credit with the consent of the Department. Students should consult the Department concerning topics and recommended preparation for a given term.

Psychology 502 3 units; H(3-2)

Selected Topics in Psychology with Lab
Selected topics from one or more areas in psychology.

Prerequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.

Note: Students are advised to consult with the Department regarding the topic and recommended preparation for the course in a given term.

MAY BE REPEATED FOR CREDIT

Psychology 503 3 units; H(3-0)

Selected Topics in Psychology
Selected topics from one or more areas in psychology.

Prerequisite(s): Psychology 300, 301 and admission to the Psychology major or Honours program.

Note: Students are advised to consult with the Department regarding the topic and recommended prerequisites for the course in a given term.

MAY BE REPEATED FOR CREDIT

Psychology 504 6 units; F(3-3)

Research in Psychology
Research project in psychology conducted under the supervision of a faculty member.

Prerequisite(s): Psychology 300, 301, admission to the Psychology major or Honours program and consent of the Department.

MAY BE REPEATED FOR CREDIT

Psychology 505 3 units; H(3-3)

Research in Psychology
Research project in psychology conducted under the supervision of a faculty member.

Prerequisite(s): Psychology 300, 301, admission to the Psychology major or Honours program and consent of the Department.

MAY BE REPEATED FOR CREDIT

Psychology 506 3 units; H(3-0)

Cognitive and Clinical Neuroscience
An examination of how the human central nervous system controls higher order, complex behaviours. Experimental and clinical evidence for the neurobiological regulation of memory, language, attention, perception and emotion will be evaluated.

Prerequisite(s): Psychology 300, 301, 375 and admission to the Psychology major or Honours program.

Psychology 531 3 units; H(3-0)

Nervous System Development
This course will cover the fundamental principles of the development of nervous systems, integrating anatomical, cellular, molecular, genetic, and behavioural approaches.

Prerequisite(s): Psychology 475 and admission to the Psychology major or Honours program.

Psychology 585 3 units; H(3-0)

Advanced Themes in Psychopathology
Examination of assessment, phenomenology, etiology, and/or treatment of common psychological disorders. Course will cover few disorders in greater detail.

Prerequisite(s): Psychology 300, 301, 385, 433 and admission to the Psychology major or Honours program.

Psychology 591 3 units; H(3-0)

Advanced Themes in Cognitive Psychology
A detailed examination of current research topics in cognitive psychology. Topics may include one or more of the following: human memory, thinking, attention, language processing, and computer modeling.

Psychology 598 6 units; F(3S-6)

Honours Thesis and Seminar
Research project under the direction of a member of the Department. In the seminar, students will present and discuss their projects and other topics of current relevance.

Prerequisite(s): Admission to the Psychology Honours degree program.

MAY BE REPEATED FOR CREDIT

Graduate Courses

Psychology 601 3 units; H(3-0)

History and Systems of Psychology
History of psychological concepts in Western culture, major theoretical systems of twentieth-century psychology, foundational assumptions of theories in contemporary psychology.

Prerequisite(s): Consent of the Department.

Psychology 607 3 units; H(3-0)

Advanced Research Design and Methodology in Psychology
Survey of advanced topics in the conduct of psychological research including issues in philosophy of science; origins of research ideas; validity and reliability; measurement; experimental, quasi-experimental, and non-experimental designs; survey research; specialized methods such as computer simulation, psychophysiological methods, event-sampling, online data collection, and cognitive procedures; and ethics.

Prerequisite(s): Consent of the Department.

Psychology 611 3 units; H(3-3)

Advanced Qualitative Inquiry in Psychology
Qualitative research designs and historical research in psychology. Advanced study of selected qualitative approaches in psychology to include research design, methods, and analysis. Specific topics covered include foundations of qualitative research, evaluation and practical techniques including computerized analysis.

Prerequisite(s): Consent of the Department.

Psychology 613 3 units; H(3-3)

Signal and Systems Analysis in Behavioural Research
Application of signal and systems analysis to behavioural neuroscience and psychophysics.

Prerequisite(s): Consent of the Department.

Psychology 615 3 units; H(3-3)

Analysis of Variance
Applications of the general linear model to research design and analysis. Topics include analysis of variance, regression, and analysis of covariance.

Prerequisite(s): Consent of the Department.

Psychology 617 3 units; H(3-3)

Multivariate Data Analysis
Multivariate techniques and design issues, including canonical correlation, discriminant analysis, multivariate analysis of variance, multivariate regression, principal components analysis and factor analysis.

Prerequisite(s): Consent of the Department.

Psychology 619 3 units; H(3-3)

Special Topics in the Design of Psychological Research

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Psychology 620 3 units; H(3-0)

Advanced Topics in Brain and Cognitive Sciences
An advanced survey of some of the fundamental issues and recent developments in the Brain and/or Cognitive Sciences. Topics will vary.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Courses of Instruction

Psychology 750 1.5 units; Q(3S-0)
Advanced Seminar in Clinical Psychology
A doctoral-level seminar in advanced topics in the practice of clinical psychology.
750.01. Psychopharmacology
750.02. Neuropsychology
750.05. Diversity Issues in Clinical Psychology
750.06. Clinical Geropsychology
750.09. Addictions
750.10. Health Psychology
750.11. Eating Disorders
750.12. Consultation/Supervision
Prerequisite(s): Admission to the Clinical Psychology graduate program.
NOT INCLUDED IN GPA

Psychology 751 3 units; H(3-0)
Special Topics in Adult Psychopathology
A specialized topic in the area of adult psychopathology. Course offerings will vary from year-to-year and may include such topics as: schizophrenia, substance abuse, suicide, mental health delivery systems, or computer applications in clinical psychology.
MAY BE REPEATED FOR CREDIT

Psychology 760 6 units; F(1-7)
Specialty Practicum in Clinical Psychology I
Supervised training experience in an approved clinical setting. Provides in-depth exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Prerequisite(s): Admission to the Clinical Psychology graduate program.

Psychology 762 6 units; F(1-7)
Specialty Practicum in Clinical Psychology II
Supervised training experience in an approved clinical setting. Provides advanced in-depth exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Prerequisite(s): Admission to the Clinical Psychology graduate program.
MAY BE REPEATED FOR CREDIT

Psychology 765 3 units; H(1-7)
Practicum in Clinical Psychology
Supervised training experience in an approved clinical setting. Provides exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Prerequisite(s): Admission to the Clinical Psychology graduate program.
MAY BE REPEATED FOR CREDIT

Psychology 798
Pre-Doctoral Internship in Clinical Psychology
A full calendar year, full-time (or two-years, half-time) supervised training experience in an approved clinical setting. Intensive exposure to various professional issues, the opportunity to work with a diverse range of clinical populations and problems, and advanced training in the use of specific psychological assessment and intervention strategies.
Prerequisite(s): Admission to the Clinical Psychology graduate program.
MAY BE REPEATED FOR CREDIT

Public Policy PPOL

Public Policy 601 3 units; H(3-0)
Foundations I
This preparatory course covers the foundations necessary to understand and apply economic analysis and it covers selected topics relevant to the core courses listed below.
NOT INCLUDED IN GPA

Public Policy 603 3 units; H(3-0)
Foundations II
This preparatory course covers the foundations of basic empirical analysis, including quantitative and qualitative research methods.
NOT INCLUDED IN GPA

Public Policy 605 3 units; H(3-0)
Markets and Public Policy
The role of markets in the allocation of resources and the determination of income. Sources of market failure, and the appropriate public policy response to those failures, are examined. Students learn how private firms make decisions, and how they respond to policy initiatives.

Public Policy 607 3 units; H(3-0)
Politics and Collective Choice
How public policy issues emerge and how they are developed, refined, and influenced by the political process. The roles and influences of NGOs, interest groups, the media, political parties, and social protest on the development of new public policies are examined from the perspective of several disciplines. The importance of agenda setting, management and planning, policy reform and the organizational resistance to change is examined. Models of rational actors and bureaucratic behaviour are explored.

Public Policy 609 3 units; H(3-0)
Decision Analysis
The focus is on the foundations, applications and use of quantitative methods commonly used in decision making in the public and private sectors. Included are methods such as impact analysis, cost-benefit analysis, surveys, game theory and risk management tools.

Public Policy 611 3 units; H(3-0)
Independent Study
Supervised individual study in a selected public policy area.
MAY BE REPEATED FOR CREDIT

Public Policy 613 3 units; H(3-0)
Effective Writing and Research Skills
Development of skills for writing high quality documents in a professional setting. Defining, designing and executing applied, policy-oriented research.

Real Estate Studies REAL

Real Estate Studies 317 3 units; H(3-0)
Real Estate Development and Urbanization
Fundamentals of the real estate industry from bare land to built form, including land development and regulatory body approval acquisition. Exploration of the context of city building, including topics such as the conflict between use value and exchange value of land, political economy of space,
Courses of Instruction

globalization trends, sustainability, gentrification and social movements.

Prerequisite(s): Admission to the Haskayne School of Business and 54 units (9.0 full-course equivalents).

Antirequisite(s): Credit for Real Estate Studies 317 and either Management Studies 559.17 or 559.22 will not be allowed.

Real Estate Studies 427 3 units; H(3-0)

Real Estate Investment and Analysis
Introduction to the instruments, techniques, and institutions of real estate finance, sources of funds and mortgage risk analysis. Residential and commercial real estate contracting fundamentals are also covered. Examination of the risk and rewards when investing in and financing both commercial and residential real estate deals. Concepts include investment, financing, site analysis, appraisals, lending, and management of real estate portfolios and corporate real estate.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents) including Finance 317.

Antirequisite(s): Credit for Real Estate Studies 427 and either Management Studies 559.19 or 559.20 will not be allowed.

Real Estate Studies 437 3 units; H(3-0)

Land Development and Planning
Introduction to the urban planning process and what is required to gain government approvals for land development proposals, from small-scale redevelopment projects to large-scale complete new communities. Topics will include: an overview of planning legislation; municipal processes and timelines; the risks and costs associated with planning approvals; stakeholder engagement; developing political acumen; and new trends in managing growth and achieving sustainability goals.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Antirequisite(s): Credit for Real Estate Studies 437 and Management Studies 559.23 will not be allowed.

Real Estate Studies 447 3 units; H(3-0)

Real Estate Legal and Operating Environment
Foundation of legal, regulatory and stakeholder issues affecting real estate. Topics include: real estate transactions, real estate brokerage, real property ownership interests, illegal discrimination in residential and commercial transactions, and other legal transactions involving real estate, such as sales and leases. Challenges within approvals processes based on governmental relations and stakeholder perceptions are also a focus.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents) including Business and Environment 395.

Real Estate Studies 457 3 units; H(3-0)

Real Estate Marketing
Marketing is essential to the success of any real estate development project. In this course, students review the role that marketing plays at each step in the development process, gain an understanding of changing real estate markets, and learn how to utilize market research information, develop and manage a marketing program, create unique project identities, and undertake an effective advertising and communications program.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents) including Marketing 317.

Real Estate Studies 567 3 units; H(3-0)

Project-Based Capstone
Opportunity to use classroom learnings in an applied setting through engagement with four distinct sectors of the real estate industry. Sectors may include: commercial developers, brokerage firms, residential developers (greenfield and infill), municipal government and consulting firms. On-site instruction at representative companies will be provided. Completion of projects will be based on site experiences.

Prerequisite(s): Admission to the Haskayne School of Business, Bachelor of Commerce Real Estate Studies concentration, Real Estate Studies 317 and 427.

Graduate Courses

Real Estate Studies 717 3 units; H(3-0)

Real Estate Investment and Analysis
Structure and operations of the Canadian mortgage and asset-backed securities markets. Topics include instruments, techniques, and institutions of real estate finance, sources of funds, mortgage risk analysis, and fundamentals of residential and commercial real estate contracting. Examination of the risks and rewards when investing in and financing both commercial and residential real estate deals. Concepts include investment, financing, site analysis, appraisals, lending, and management of real estate portfolios and corporate real estate.

Prerequisite(s): Admission to the Masters in Business Administration and Finance 601.

Antirequisite(s): Credit for Real Estate 717 and either Management Studies 789.03 or 789.05 will not be allowed.

Real Estate Studies 727 3 units; H(3-0)

Land Development and Planning
Introduction to urban planning. Topics will include planning legislation, municipal processes and timelines, the risks and costs associated with planning approvals, stakeholder engagement, developing political acumen, and new trends in managing growth and achieving sustainability goals.

Prerequisite(s): Admission to the Masters in Business Administration.

Antirequisite(s): Credit for Real Estate 727 and Management Studies 789.09 will not be allowed.

Real Estate Studies 737 3 units; H(3-0)

Legal and Operating Environment
Foundation of legal, regulatory and stakeholder issues affecting real estate. Topics will include real estate transactions, real estate brokerage, real property ownership interests, illegal discrimination in residential and commercial transactions, and other legal transactions involving real estate, such as sales and leases. Governance models, legislation, policies and by-laws in relation to the business of real estate and land development.

Prerequisite(s): Admission to the Masters in Business Administration.

Real Estate Studies 747 3 units; H(3-0)

Real Estate Marketing
Coverage includes real estate marketing programs based on theoretical principles, an understanding of changing real estate markets, marketing methods, research approaches and marketing program development.

Prerequisite(s): Admission to the Masters in Business Administration and Marketing 601.

Real Estate Studies 757 3 units; H(3-0)

Fundamentals of Real Estate Development and Urbanization
Topics include the process of developing land and gaining approvals from regulatory bodies in the real estate industry, learning how to go from bare land to built form. Exploration of the context of city building, including topics such as the conflict between use value and exchange value of land, political economy of space, globalization trends, sustainability, gentrification and social movements.

Prerequisite(s): Admission to the Masters in Business Administration.

Antirequisite(s): Credit for Real Estate 757 and either Management Studies 789.04 or 789.08 will not be allowed.

Real Estate Studies 767 3 units; H(3-0)

Advanced Real Estate Development
Opportunity to use classroom learnings in an applied setting through a re-development plan for designated site(s), complete with supporting market and financial analyses. The course may include site visits.

Prerequisite(s): Admission to the Masters in Business Administration and Real Estate 717 and 727.

Antirequisite(s): Credit for Real Estate 767 and either Management Studies 789.12 or Environnemental Design 683.69 will not be allowed.

### Courses of Instruction

**Religious Studies 335** 3 units; H(3-0)

**Ritual and Religion**
A major form of religious expression is the various practices and rituals performed by individuals and the community. Various ritual theories and approaches will be examined along with different examples of religious ritual expressions.

**Religious Studies 338** 3 units; H(3-0)

**Atmosphere**
A consideration of various historical and thematic critiques of religion, including the development of modern agnosticism, atheism and in recent times, the ‘new atheism’.

**Religious Studies 339** 3 units; H(3-0)

**Transformations of Religion in Africa**
Nature of religion through a study of religious transformations in Africa.

**Religious Studies 341** 3 units; H(3-0)

**New Religious Movements**
An examination of the beliefs, practices and developments of new religious movements of both Eastern and Western origins (e.g. Krishna Consciousness, Transcendental Meditation, Unification Church, Children of God, etc.).

**Religious Studies 343** 3 units; H(3-0)

**Religion and Social Morality**
Critical examination of social theories of religion and religious perspectives on ethical issues of social, economic, and political consequence in contemporary cultures.

**Religious Studies 344** 3 units; H(3-0)

**The Bible as Literature**
An exploration of the various literary genres that make up the sixty-six books of the Bible, understood as a compilation of human literature reflecting millennia of communal struggle, vision, and engaged reception.

**Religious Studies 345** 3 units; H(3-0)

**God and Transcendence**
Comparative and theoretical discussion of various traditions, Eastern and Western, regarding the object of religious belief and devotion.

**Religious Studies 346** 3 units; H(3-0)

**Chaos, Demons and Monsters**
An examination of religious depictions of supernatural evil agents and forces in the light of their role in the experience of good/evil, suffering/happiness, and existence/death.

**Religious Studies 348** 3 units; H(3-0)

**Religion, Empire and Colonialism**
An examination of the complex interplay of religious traditions and imperial projects. The development of religion in response to engagement with other cultures, religions and traditions brought on by colonialism, as well as the religious construction and categorization of these others, will be considered through comparative, historical, literary and/or thematic lenses. Modern responses to colonialism as well as discussions of multiculturalism and immigration may be discussed as they relate to religion.

**Religious Studies 349** 3 units; H(3-0)

**Religion and Politics**
A study of the complex relationship between religion and politics, including nationalism and political religions. Topics may include the origin of apartheid in South Africa, Black Theology, the rise of the New Christian Right in America, Hindu and Islamic political movements, and various forms of Fascism including the Nazi movement.

**Religious Studies 353** 3 units; H(3-0)

**Islam in the Modern World**
Reform, revivalist and sectarian movements and significant thinkers in Modern Islam.

**Religious Studies 357** 3 units; H(3-0)

**Islam**
A survey of the basic religious ideas, texts, figures, and practices in Islam, including their historical development.

**Religious Studies 359** 3 units; H(3-0)

**East Asian Religious Traditions**
The history, doctrines and literature of the major religious traditions of China, Korea and Japan.

**Religious Studies 360** 3 units; H(3-0)

**Buddhist Practice Traditions**
an introduction to different kinds of meditation practices in Buddhist traditions, through their historical trajectories and their related devotional and ritual aspects. The material is organized according to principal contemporary areas (Vipassana, Chan/Zen/Son, Pureland, Tibetan).

**Religious Studies 363** 3 units; H(3-0)

**Cross-Cultural Philosophy of Religion**
Comparative study of philosophical issues of religious interest arising from diverse cultures.

**Religious Studies 367** 3 units; H(3-0)

**Comparative Studies in Western Religions**
A comparative and critical examination of a specific topic within Judaism, Christianity, and Islam. Possible topics include: Material Culture, Pilgrimage, and Scriptural Exegesis.

**Religious Studies 369** 3 units; H(3-0)

**Introduction to Judaism**
An introduction to the major practices, beliefs, institutions and religious literature of the Jewish religion, as developed from antiquity to modern times.

**Religious Studies 373** 3 units; H(3-0)

**Topics in Religious Studies**
Topics may include an overview of a specific religious tradition, an examination of religious expressions in a particular context, a thematic study of a religion or religions, or a methodological approach to the study of religion.

**Religious Studies 377** 3 units; H(3-0)

**Research and Critical Inquiry in Religious Studies**
Systematic instruction in research methods, academic writing, and the practice of critical analysis in the field of Religious Studies. Besides practical instruction, students will be introduced to a variety of methods and theories used in the academic study of religion.

**Prerequisite(s):** Admission to Religious Studies major or minor.

**Religious Studies 381** 3 units; H(3-0)

**Gender, Sex and Religion**
An examination of the complex interrelationship between understandings and constructions of gender, sexuality and Religion as they arise in the context of several religious traditions.

**Antirequisite(s):** Credit for Religious Studies 381 and 373.09 will not be allowed.

**Religious Studies 383** 3 units; H(3-0)

**From Jesus to Christ**
The study of formative Christianity up to 200 CE in its political, social and religious contexts.

**Religious Studies 385** 3 units; H(3-0)

**Pagans and Christians**
Examination of the evolution of ancient ‘pagan’ (Greek and Roman non-Christian) and early Christian religions from 200-800 CE, exploring their similarities, differences, and interactions, and situating them in their social, economic, cultural, and political context.

**Religious Studies 387** 3 units; H(3-0)

**Christian Monks, Mystics and Reformers**
An overview of medieval Christian monasticism and mysticism, including female mystics such as Margery Kempe and Julian of Norwich, as well as humanists such as Erasmus, and early modern Protestant and Catholic Reformers.

**Religious Studies 389** 3 units; H(3-0)

**Christian Responses to Modernity**
Examines various Christian responses to modernity from 1600 CE, including German Pietism, English Puritanism, John Wesley and early Evangelicalism, Protestant Liberalism, Vatican II and modern Roman Catholicism, Liberation Theology, and inter-religious dialogue.

**Religious Studies 397** 3 units; H(3-0)

**Religion and Science**
The relationship between religion and science with emphasis on contemporary discussions regarding the intersection of religious thought and theories in the natural sciences.

**Religious Studies 398** 3 units; H(3-0)

**Religion and the Environment**
The intersection of religion with popular culture is explored through specific topics.

**Religious Studies 399** 3 units; H(3-0)

**Religion in Popular Culture**
The intersection of religion with popular culture is explored through specific topics.

**Antirequisite(s):** May be counted only once towards the major Field requirements in Religious Studies.

**Religious Studies 417** 3 units; H(3-0)

**Recent Religious Thought**
Detailed examination of a selected writer, topic, or intellectual current in recent religious thought.

**Prerequisite(s):** 3 units in Nature of Religion at the 300 level (see Table of Streams at beginning of Department offerings).

**May be repeated for credit**

#### Introduction to Risk Management and Insurance

Overview of the risk management process and risk management methods. Examines both business and personal risk management. Covers the basics of property, liability, auto and life insurance.

**Prerequisite(s):** Admission to the Haskayne School of Business or the Actuarial Science program, and 30 units (5.0 full-course equivalents) including Economics 201.

### Risk Management and Insurance 439

#### Protecting your Family and Wealth

Examines the role that life and health insurance plays in securing individuals' financial futures, whether ensuring family security, or preserving the value produced by the time and energy spent building a business. Topics include wealth transfer to the next generation as well as protection of income and assets. The best fit for different types of policies available at different stages in life will also be examined.

**Prerequisite(s):** Admission to the Haskayne School of Business or the Actuarial Science program, and Finance 317 or Risk Management and Insurance 317.

### Risk Management and Insurance 449

#### Employee Benefits and Social Insurance

The nature of employee benefits as a major component of the compensation package. Group life and group health insurance, pensions and other retirement programs, workers' compensation, unemployment insurance, social security and other social insurance plans. Insurer group operations, reinsurance and the legal aspects of employee benefits and social insurance programs.

**Prerequisite(s):** Admission to the Haskayne School of Business or the Actuarial Science program, and Finance 317 or Risk Management and Insurance 317.

### Risk Management and Insurance 559

#### Selected Topics in Risk Management and Insurance

Combines a fundamental understanding of insurance and risk management with current issues confronting the insurance industry and risk managers.

**Prerequisite(s):** Admission to the Haskayne School of Business and Risk Management and Insurance 317. For certain topics, consent of the Haskayne School of Business will also be required.  

**Note:** For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

**MAY BE REPEATED FOR CREDIT**

### Risk Management and Insurance 579

#### Advanced Topics in Risk Management and Insurance

A study of the various methods used to finance the operational risks of commercial enterprises. Key topics addressed are: loss forecasting, insurance, alternative risk financing, reinsurance and environmental risk management.

**Prerequisite(s):** Admission to the Haskayne School of Business and Risk Management and Insurance 317.

#### Graduate Course

</tr>
</tbody>
</table>

(formerly Finance 763)

#### Managing Risks and Disasters

Risk management strategies with emphasis on the management of operational and hazard risks. Topics include risk identification and assessment; organizational responsibility for risk management; risk mitigation; risk financing; crisis management, and business continuity planning.

**Prerequisite(s):** Consent of the Haskayne School of Business.

### Romance Studies ROST

Instruction offered by members of the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

#### Junior Course

<table>

</tbody>
</table>

#### Russian 497

**Inter-Cultural Immersion Experience II**
Independent study course. Project with inter-cultural theme, derived from an immersion experience at an advanced level, most likely abroad.

**Prerequisite(s):** Russian 397 and consent of the School.

**Note:** Permission to enrol requires a faculty member’s agreement to sponsor the course of study. NOT INCLUDED IN GPA

</tr>
</tbody>
</table>

#### Russian 561

**Research Seminar**
Centred on a professor’s current research project, the course will engage senior students as members of a collaborative research team. Independent research, discussion, group presentations, dissemination of results in an appropriate venue.

**Prerequisite(s):** Consent of the School.

**Note:** May not be offered every year.

**MAY BE REPEATED FOR CREDIT**

</thead>
<tbody>
<tr>
<td>Russian 591</td>
<td>3</td>
<td>H(0-3T)</td>
<td>Honours Project</td>
</tr>
</tbody>
</table>

#### Russian 591

**Honours Project**
A research paper or creative project for honours students in their final year on a topic chosen in consultation with their supervisor.

**Prerequisite(s):** Consent of the School.
School of Creative and Performing Arts SCPA

Instruction offered by members of Drama in the School of Creative and Performing Arts in the Faculty of Arts.

Junior Course

School of Creative and Performing Arts 290
3 units; H(3-0)

History and the Performing Arts
The history of dance, drama and music through an interarts lens, focusing on works and ideas across time periods and art forms.
Prerequisite(s): Admission to one of BA Dance, BFA Drama, BA (Dance)/BKin, BFA Drama, BFA (Drama Education)/BEd, BA Music, BA Honours Music, or BMus.

Senior Courses

School of Creative and Performing Arts 399
3 units; H(3-0)
Approaching Interdisciplinarity
An introduction to the challenges and opportunities of interdisciplinary exchange and collaboration in the arts.
Prerequisite(s): School of Creative and Performing Arts 290.

School of Creative and Performing Arts 401
3 units; H(3-0)
Performing Arts Management
Introduction to politics, strategies, and practices of marketing and fundraising as they apply to non-profit performing arts companies.
Prerequisite(s): 9 units in courses labelled Dance, Drama, Music, Music Performance or School of Creative and Performing Arts.

School of Creative and Performing Arts 499
3 units; H(3-0)
Interdisciplinary Praxis
Intermediate development of theory and practice of interdisciplinary exchange and collaboration in the arts.
Prerequisite(s): School of Creative and Performing Arts 399.

School of Creative and Performing Arts 501
3 units; H(2-2)
Topics in Inter-Arts Collaborations
Experiential or lecture-based work that crosses the disciplinary boundaries of Dance, Drama and Music.
Prerequisite(s): Consent of the School.
MAY BE REPEATED FOR CREDIT

School of Creative and Performing Arts 503
6 units; F(0-7)
Travel Study
An international perspective on performance and culture that crosses the disciplinary boundaries of Dance, Drama and Music.
Prerequisite(s): Consent of the School.
MAY BE REPEATED FOR CREDIT

Science SCIE
Instruction offered by members of the Faculty of Science.

Science 301
3 units; H(3-1T)
Research Design and Statistical Analysis
A focus on the management, analysis, interpretation and communication of research results. Students will also examine and critique research design using examples from the primary literature in a multidisciplinary context.
Prerequisite(s): 24 units (4.0 full-course equivalents) and admission to the Natural Sciences Program.

Science 311
3 units; H(3-1T)
Writing and Reviewing Scientific Reports
Elements of writing and reviewing scientific reports, use and enhancement of library skills, ethical principles of reviewing reports, and exposure to the literature of science. Papers and reviews will be transmitted electronically.
Prerequisite(s): Any 200-level course offered by the Faculty of Science.
Note: Only declared Majors in Chemistry, Applied Chemistry, Geology, Applied and Environmental Geology, Petroleum Geology or the Geosciences program will be admitted prior to the date registration restrictions are lifted.

Science 317
3 units; H(3-2T)
(formerly Science 507.17)
Energy Transformations
Discusses the heat engines that harness fuels to power the developed world. Includes where energy comes from and how that energy is converted into useful forms for transmission, distribution and use; informed by an overview of thermodynamics.
Prerequisite(s): One of Physics 211, 221 or 227; and one of Physics 223, 225 or 259.

Science 331
3 units; H(3-0)
Scientific Explorations
Students will develop a well-rounded perspective and appreciation of science by investigating the nature of scientific inquiry and critically assessing key historical and contemporary achievements in science.

Science 403
3 units; H(3-0)
Science in Society
Exploration of the interaction among science and non-science areas in various ways including by written and oral presentations.
Prerequisite(s): 54 units (9.0 full-course equivalents) and admission to the Natural Sciences program.

Science 421
3 units; H(3-2T)
Fundamentals of Nuclear Energy Production
The science behind nuclear energy production including nuclear reactions, reactor design, waste disposal and historical and proposed accidents.
Prerequisite(s): Engineering Energy and Environment 355 and Physics 223 or 255, or one of Physics 301, 323, or 325.

Science 423
3 units; H(3-2T)
Fundamentals of Fuel Cells
Study of science and technology of next generation alternative energy conversion and storage technologies. Includes fundamental aspects of fuel cells, basic electrochemistry, classification of fuel cells, fuel cell performance curves, thermodynamics and kinetics of fuel cells, reforming, electrodes and electrolytes. Understanding the chemical and physical property relationships of fuel cell materials.
Prerequisite(s): Engineering Energy and Environment 355; Physics 223 or 255.

Science 427
3 units; (3-2T)
(formerly Science 507.27)
Principles of Solar Power
Discusses solar power in its various forms, including photovoltaics and solar thermal technologies.
Prerequisite(s): Engineering Energy and Environment 355; one of Physics 211, 221 or 227; and one of Physics 223, 225 or 259.

Science 501
3 units; H(3-0)
Project Course in Natural Sciences
Intended to achieve integration and interdisciplinarity within the Natural Sciences program.
Prerequisite(s): 75 units (12.5 full-course equivalents) and admission to the Natural Sciences program.

Science 502
6 units; F(0-9)
Research Project in Natural Sciences
A comprehensive research project under the direction of staff member(s) in the Faculty of Science. Research projects may be disciplinary or interdisciplinary in nature. Interdisciplinary projects may involve more than one Science discipline or a Science discipline combined with a non-Science discipline.
Prerequisite(s): Admission to the Natural Sciences Honours program and consent of the Director.
Science 507 3 units; H(3-0) or H(3-3)

**Experiential Learning in Science - Special Topics**
Lectures, seminars, tutorials and/or research project leading to a focused examination of a topic from interdisciplinary perspective.

Prerequisite(s): Consent of the Faculty.
Note: Students should contact the USC Specialized Programs Office regarding this course.
MAY BE REPEATED FOR CREDIT

Science 510 6 units; F

**Field Placement**
Students spend one term as an intern in a government, non-profit or private-sector organization under the auspices of an agency or organization that has a Co-operation Agreement with the University of Calgary.

Prerequisite(s): Consent of the Faculty of Science and acceptance to a program offered by the agency or organization that has a Co-operation Agreement with the University of Calgary.

Science 511 3 units; H(3-0)

**Peer Mentoring and Collaborative Learning in Science**
Students (peer mentors) gain theoretical knowledge of peer mentoring, practical facilitation of instruction and experience to support peers in their learning. Grounded knowledge of science-based learning theories, peer mentors will encourage and motivate learning, convey enthusiasm for course material, and provide support for active learning in and out of the classroom.

Prerequisite(s): Consent of the Faculty.
Antirequisite(s): Credit for Science 511 and either Science 507.18 or Communication and Culture 507 will not be allowed.
Note: This course includes a 40-hour practicum as a Peer Mentor in your host class. Students should contact the USC Specialized Programs Office regarding consent to register.

†Science 529 3 units; H(3-0)

**Project Course in Sustainable Energy, Environment and Economy**
Intended to achieve integration across the interdisciplinary energy, environment and economy programs.

Prerequisite(s): 75 units (12.5 full-course equivalents) and admission to the Energy and Environment Specialization, the Energy Management Concentration or the Energy Science Concentration.

Science 531 3 units; H(3-2T)

**Principles of Hydroelectric Energy**
An introduction to the scientific fundamentals of hydroelectric energy production. Includes an examination of the technologies and potential for developing hydroelectricity, along with the environmental, societal, and economic issues surrounding its development.

Prerequisite(s): Engineering Energy and Environment 355.

Science 533 3 units; H(3-2T)

**Principles of Geothermal Energy**
The scientific principles governing geothermal energy development for both low and high temperature systems, and related technical, environmental and socioeconomic issues.

Prerequisite(s): Engineering Energy and Environment 355.

Graduate Courses

Science 601 3 units; H(3-0)

**Theory and Practice of University Teaching and Learning in STEM**
Current educational theory and practice relating to university teaching and learning in STEM will be explored and critically evaluated. Students will critically evaluate their teaching beliefs and broaden their knowledge and skills through a combination of discussion, microteaching opportunities and a capstone project involving the design of a teaching unit.

Prerequisite(s): Admission to a MSc or PhD program in the Faculty of Science and consent of the instructor.
NOT INCLUDED IN GPA

Science 603 3 units; H(0-3)

**STEM Teaching Development**
Design and delivery of a unit of a course within the student’s area of specialization and under the guidance of a faculty member. Course and curriculum design elements are emphasized through the production of a detailed lesson plan, strategy for assessment and evaluation of the success of the teaching unit. The importance of reflective practice and mentorship to the teaching function is stressed through reflective essays and group discussions. Experiences will be shared through a symposium poster presentation.

Prerequisite(s): Science 601.

NOT INCLUDED IN GPA

Slavic SLAV

Slavic 356 3 units; H(3-0)

**Perspectives on Eastern Europe**
Selected significant contemporary issues in East-European cultures through the lens of literature, visual arts, drama, music, and film.

Note: Taught in English.

MAY BE REPEATED FOR CREDIT

Social Work SOWK

Social Work 300 6 units; F(6-0)

**Generalist Practice in Context Theme Course**
Examination of the professional use of self in relation to the knowledge, values, and skills pertaining to the practice of generalist social work practice in rural, remote, and Aboriginal communities.

Social Work 301 3 units; H(1S-2T)

**Generalist Practice in Context Portfolio Project**
Individual preparation of a self-directed portfolio as an expression of the student's own understanding of generalist social work practice in relation to the local context. The student’s prior learning experiences will be incorporated in the development of the project.

Corequisite(s): Prerequisite or Corequisite: Social Work 300.

Social Work 302 6 units; F(6-0)

**Research in Context Theme Course**
An introduction to knowledge generation relevant to generalist social work practice. Foundational concepts and approaches of various research methodologies will be introduced as ways of knowledge building to inform practice and influence policy, particularly within rural, remote and Indigenous contexts.

Social Work 303 3 units; H(1S-2T)

**Practice With Individuals in Context**
Focuses on interviewing and counselling skills from a generalist social work perspective. Emphasis will be given to skill development, critical reflection, practice evaluation, and practical application within rural, remote and Indigenous contexts.

Social Work 304 6 units; F(6-0)

**Diversity and Oppression Theme Course**
Examines diversity, colonization, oppression, and intergroup relations associated with the practice of social work in rural, remote, and Indigenous communities. Anti-oppressive frameworks will be introduced for understanding the processes associated with social justice.

Social Work 305 3 units; H(1S-2T)

**Diversity and Oppression Portfolio Project**
Individual preparation of a self-directed portfolio as an expression of the student’s own critical analysis of diversity, oppression, and social justice in relation to the local context. Honouring the student’s prior learning experiences by acknowledging and incorporating aspects of that learning in the development of the project.

Corequisite(s): Prerequisite or Corequisite: Social Work 304.

Social Work 306 6 units; F(6-0)

**Social Work Methods Course**
Examines various perspectives and theoretical approaches relating to the development, maintenance, and application of empowering relationships in generalist social work practice. Particular emphasis will be placed on local applications in rural, remote, and Indigenous organizations and communities.

Social Work 307 3 units; H(1S-2T)

**Practice Skills in Context**
Focuses on theory and practice relating to social work with individuals, families and groups in diverse communities. Particular emphasis will be paid to skill development, critical analysis and
practical application within rural, remote and indigenous contexts.

Social Work 355 3 units; H(3S-0)

Research in Context
Students will be introduced to basic research methodology and data analysis within a reflective practitioner model of practice. They will be asked to identify research concepts, methods and skills that promote enquiry-based practice and that enable them to read and apply findings from research. The focus of the course will be on thinking of research as an integral component of practice.

Social Work 361 3 units; H(3S-0)

Professional Use of Self
Focuses on the examination and integration of theoretical and practical understandings of professional social work practice. Topics covered include: critical thinking; ethical decision-making; knowledge of the associations to which social work professionals belong; professional writing; and self-care.

Social Work 363 3 units; H(3S-0)

Human Development and Environments
Explores the nature of human behaviour and development in diverse environments and contexts (personal, community, social, and environmental) and explores the implications for social work practice and theory.

Social Work 365 3 units; H(3S-0)

Critical Approaches to Social Work Practice
Provides theoretical frameworks, including anti-oppressive social work concepts, as a foundation for reflective professional generalist social work.

Social Work 371 3 units; H(3S-0)

Social Work and Diversity
Students will critically examine the issues of diversity and the power relations that form common links among the experiences of oppression and marginalization in Canadian society.

Social Work 383 3 units; H(3S-0)

Social Policy and Social Justice
Provides an understanding of Canadian social policy, its impact on social justice and how it influences social work practice.

Note: University Transfer route only.

Social Work 391 3 units; H(3S-0)

Practice and Evaluation with Individuals
An introduction to theories and skills for communicating with people in a professional social work context. Generic interviewing and basic counseling skills from a generalist perspective of social work practice will be developed.

Note: University Transfer route only.

Social Work 393 3 units; H(3S-0)

Practice and Evaluation with Families
An introduction to theories and skills for family-centred social work practice with families. There will be an emphasis on diversity in relation to family development issues, the stresses families face, family assessment techniques, and theories and practices of family intervention.

Note: University Transfer route only.

Social Work 395 3 units; H(3S-0)

Practice and Evaluation with Groups
An introduction to theories and skills for working with groups within a context of practice and assessment frameworks.

Note: University Transfer route only.

Social Work 397 3 units; H(3S-0)

Practice and Evaluation with Communities
An introduction to theories and skills about community practice. The focus will be on understanding the basic value, ethical, strategic, evaluative and political issues involved in working for community change.

Note: University Transfer route only.

Social Work 399 3 units; H(3S-0)

Practice and Evaluation with Organizations
An introduction to theories and skills in the study of human service organizations. Examines organizational dynamics and how this impacts on professional practice, relationships with clients, and the potential for organizational change.

Note: University Transfer route only.

Social Work 410 6 units; F(300 hours within one term)

Practicum I
Application of conceptual framework, experience, knowledge and skills within a specific practice setting.

Prerequisite(s): All required 300 level Social Work courses.

NOT INCLUDED IN GPA

Social Work 411 3 units; H(3S-0)

Integrative Seminar I
Integration of theory and practice within the context of the field practicum.

Prerequisite(s): All required 300 level Social Work courses.

Corequisite(s): Social Work 410.

Social Work 412 6 units; F(400 hours within one term)

Practicum II
Application of professional theory and skills in supervised social work practice settings.

Prerequisite(s): All required 300 level Social Work courses. University Transfer Route: Social Work 410 and 411.

NOT INCLUDED IN GPA

Social Work 413 3 units; H(3S-0)

Integrative Seminar II
Advanced integration of concepts, perspectives and skills with experiences, developing conceptual frameworks of practice.

Prerequisite(s): All required 300 level Social Work courses. University Transfer Route: Social Work 410 and 411.

Corequisite(s): Social Work 412.

Social Work 551 3 units; H(3S-0)

Selected Topics: Social Work Interventions
Focuses on theory and practice related to social work interventions.

MAY BE REPEATED FOR CREDIT

Social Work 553 3 units; H(3S-0)

Selected Topics: Fields of Practice
Examines contexts, theories, practice models and skill development in specialized fields of practice.

MAY BE REPEATED FOR CREDIT

Social Work 555 3 units; H(3S-0)

Selected Topics: Practice with Selected Populations
Explores contexts, theories and practice models in working with specific populations.

MAY BE REPEATED FOR CREDIT

Social Work 557 3 units; H(3S-0)

Selected Topics: Contexts for Practice
Examines social work practice in specific contexts.

MAY BE REPEATED FOR CREDIT

Graduate Courses
Note: Not all options are offered every academic year. The number of options will vary across the programs and program locations.

Social Work 600 3 units; H(3S-0)

Advanced Social Work Theory, Policy and Practice I
Examines the role and relationship of social work to the broad field of social welfare, including its development and current practice in historical, economic, political, social and cultural contexts. Theoretical and ethical foundations of social work practice are examined and assessed as a means to facilitating change.

Prerequisite(s): Admission to the MSW program or the Post-Baccalaureate Certificate in Advanced Social Work Practice.

Social Work 602 3 units; H(3S-0)

Advanced Practice, Research and Evaluation in Social Work I
Application of social work theories to practice, assess personal values and ethical dilemmas to develop their own professional practice model. Development of understanding of social work research through examining various approaches (qualitative and quantitative), paradigms, and methods.

Prerequisite(s): Admission to the MSW program or the Post-Baccalaureate Certificate in Advanced Social Work Practice.

Social Work 604 3 units; H(3S-0)

Advanced Social Work Theory, Policy and Practice II
Examines concepts of social justice, culture, identity, oppression and “differences.” Explores the influences of public policy on the lives, relationships, and well-being of individuals, families, groups and communities. Development of understanding of the policy-making process and the role of social workers in shaping policy.

Prerequisite(s): Admission to the MSW program or the Post-Baccalaureate Certificate in Advanced Social Work Practice.

Social Work 606 3 units; H(3S-0)

Advanced Practice, Research and Evaluation in Social Work II
Integration of concepts of social justice, social action, and anti-oppressive practice into all levels of a professional practice model. Engagement in social action towards to development and implementation of more equitable social policies and practices. Development and dissemination of
knowledge and the evaluation of practice through conducting social work research.

**Prerequisite(s):** Admission to the MSW program or the Post-Baccalaureate Certificate in Advanced Social Work Practice.

Examines issues of diversity, culture, power and oppression in organizational and community practice. The changing roles of leadership in complex systems and changing contexts will be examined. Explores the influences of policy on the human service organization and the practice of leadership in this setting.

**Prerequisite(s):** Admission to the MSW Leadership in the Human Services specialization or the Post-Baccalaureate Certificate in Leadership in the Human Services.
### Social Work 645  3 units; H(3S-0)

**Issues in Social Work Research**

An overview of social work research topics and issues.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 646  3 units; H(3S-0)

**Advanced Practice and Research in Leadership in the Human Services II**

Enhancement of skills in facilitation, building trust, managing conflict, and fostering relationships in working with individuals, groups and communities. Integration of practice-based research to inform best practices, policy development and social change.  
**Prerequisite(s):** Admission to the MSW Leadership in the Human Services specialization or the Post-Baccalaureate Certificate in Leadership in the Human Services.

### Social Work 651  3 units; H(3S-0)

**Policy as Context for Clinical Work**

Policies and their impacts on the delivery of clinical work will be examined.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 653  3 units; H(3S-0)

**Comparative Approaches to Change**

Various clinical change applications will be examined and critiqued.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 655  3 units; H(3S-0)

**Thesis Research**

An introduction to preparing a thesis proposal.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 657  3 units; H(3S-0)

**Clinical Social Work Applications**

Specific issues involved in the effective application of clinical approaches will be studied.  
**Prerequisite(s):** Social Work 653 and admission to the Master of Social Work program, or consent of the Faculty.

### Social Work 659  3 units; H(3S-0)

**Evidence and Clinical Practice**

Research as utilized in the clinical arena will be the focus of this course.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 660  3 units; H(262.5 hours)

**Advanced Practicum and Seminar I**

Direct and indirect Social Work practice opportunities with professional supervision in student’s area of specialization or interest.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.  
**Corequisite(s):** Social Work 662.  
**NOT INCLUDED IN GPA**

### Social Work 662  3 units; H(262.5 hours)

**Advanced Practicum and Seminar II**

Direct and indirect Social Work practice opportunities with professional supervision in student’s area of specialization or interest.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.  
**Corequisite(s):** Social Work 660.

### Social Work 664  3 units; H(3S-0)

**Field and Research Integration Seminar I**

Focuses on understanding and integrating the role of research and evidence in professional practice. Seeks to develop student’s capacity to engage in research and evaluation, and then integrate these models into their own practices.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 665  3 units; H(3S-0)

**Influencing Policy Development**

Focuses on leadership in policy practice and in particular policy advocacy at all levels of policy (i.e., organizational, community, and provincial or national levels).  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 667  3 units; H(3S-0)

**Leadership Theories in Action**

Directed toward helping prepare leaders for “best practice” across the range of sectors and roles in which human service leaders work.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 668  3 units; H(3S-0)

**Field and Research Integration Seminar II**

Seeks to integrate program content across student’s area of specialization, and is focused on preparation and presentation of a capstone exit requirement.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 669  3 units; H(3S-0)

**Leading Organizations and Communities**

A practical course that will emphasize networked and collaborative approaches to leadership in a global context.  
**Prerequisite(s):** Social Work 667 and admission to the Master of Social Work program, or consent of the Faculty.

### Social Work 671  3 units; H(3S-0)

**Social Policy**

Explores social welfare policy in Canada and in a globalizing world, the current roles of social welfare policy, and the roles they should have.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 673  3 units; H(3S-0)

**International Social Development**

Examines issues in international social development. There will be an emphasis on analysis of the social forces and conditions giving rise to different models of social development, and on what each of these alternative models tends to produce in terms of social welfare policies and programs.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 675  3 units; H(3S-0)

**Advanced International Social Work Modules**

This set of modules will give students tools for social change.  
**Prerequisite(s):** Social Work 673 and admission to the Master of Social Work program, or consent of the Faculty.

### Social Work 677  3 units; H(3S-0)

**Social Work Research for International and Community Methods**

International and Community Development Research is designed to provide methodological knowledge and skills specifically oriented to community-based practice abroad or in Canada.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 679  3 units; H(3S-0)

**Special Topics Seminar I**

Selected topics related to area of specialization or interest.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.  
**MAY BE REPEATED FOR CREDIT**

### Social Work 682 0.75 units; E(3S-0)

**Special Seminar II**

Selected topics related to an area of specialization or interest.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.  
**MAY BE REPEATED FOR CREDIT**

### Social Work 693  3 units; H(3S-0)

**Research as a Foundation for Leadership**

This course will provide students with a working understanding for the study and nature of the theoretical and practical issues underlying the application of the research process to professional and leadership practice.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.

### Social Work 695  3 units; H(3S-0)

**Becoming an Evidence-Based Leader**

Extends students’ abilities to identify, assess, and utilize research knowledge as a problem-solving tool in social work.  
**Prerequisite(s):** Social Work 693 and admission to the Master of Social Work program, or consent of the Faculty.

### Social Work 696  6 units; F(525 hours within two consecutive terms)

**Advanced Practicum**

Direct and indirect Social Work practice opportunities with professional supervision in student’s area of specialization or interest.  
**Prerequisite(s):** Admission to the Master of Social Work program or consent of the Faculty.  
**NOT INCLUDED IN GPA**

### Social Work 697  3 units; H(3S-0)

**Diversity, Oppression and Social Justice**

Critical examination of the issues of diversity and the power relations that form common links among
Courses of Instruction

Social Work 699 3 units; H(3S-0)

Special Topics Seminar
Advanced selected topics related to area of specialization or interest.
Prerequisite(s): Admission to the Master of Social Work program or consent of the Faculty.

May be repeated for credit

Social Work 721 3 units; H(3S-0)

Integrative Research Colloquia
A concluding course offered as final component of student’s course work. Allows doctoral students and the instructor to engage in a series of research colloquia, thereby facilitating critical analysis, feedback and synthesis of materials covered and skills learned in other course work. This process will help students to develop conceptual and methodological skills.
Prerequisite(s): Admission to the Social Work PhD program.

Note: Social Work 721 can only be taken once all other required (core and option) courses have been completed.

Social Work 741 3 units; H(3S-0)

Research Foundations: Epistemology and Professional Knowledge-Building
An exploration of major philosophical issues that have shaped social work’s diverse approaches to knowledge building and research methods. The relevance of this exploration to the student’s area of interest is emphasized.
Prerequisite(s): Admission to the Social Work PhD program or consent of the Faculty.

Social Work 743 3 units; H(3S-0)

Theory, History and Philosophy: Values, Ethics and Professional Beliefs
An exploration of the philosophical and ideological issues that have been historically important to the profession with respect to its conception of its ethics, mandate and practices. The relevance of this exploration to the student’s area of interest is emphasized.
Prerequisite(s): Admission to the Social Work PhD program or consent of the Faculty.

Social Work 745 3 units; H(3S-0)

Research Methods I: Quantitative
Quantitative methodological and design options in social work research.
Prerequisite(s): Admission to the Social Work PhD program or consent of the Faculty.

Social Work 747 3 units; H(3S-0)

Research Methods II: Qualitative
Qualitative methodological and design options in social work research.
Prerequisite(s): Admission to the Social Work PhD program or consent of the Faculty.

Social Work 749 3 units; H(3S-0)

Quantitative Data Analysis
Statistical analysis of quantitative data.
Prerequisite(s): Admission to the Social Work PhD program or consent of the Faculty.

Social Work 799 3 units; H(3S-0)

Special Topics Seminar
Advanced selected topics related to the PhD focus area.
Prerequisite(s): Admission to the Social Work PhD program or consent of the Faculty.

May be repeated for credit

Sociology 701 3 units; H(3-0)

Introductory Sociology
Sociology as a discipline examines how the society in which we live influences our thinking and behaviour. An introduction to sociology through the study of society, social institutions, group behaviour and social change.

Sociology 705 3 units; H(3-0)

Canadian Society
An examination of the major institutions of Canadian society. Consideration given to the diversity of the Canadian population and to the dynamics of contemporary patterns of social change.

Antirequisite(s): Credit for Sociology 205 and Social Sciences 292 will not be allowed.

Note: This course is not a substitute for Sociology 201.

Sociology 706 3 units; H(3-0)

Sociology of Gender
A sociological exploration of the ways genders are constructed and how they play-out at the level of individuals and institutions, and in diverse social contexts.
Prerequisite(s): Sociology 201.

Sociology 707 3 units; H(3-0)

Sociology of First Nations in Canada
The dynamics of Native Indian groups’ relations with each other and the larger society. Topics include decolonization and relations with the state, demography, Indian organizations, Indian nationalism and nation-building, power, social class and public policy.
Prerequisite(s): Sociology 201.

Sociology 309 3 units; H(3-0)

Alberta Society
A historical and contemporary overview of First Nations’ life in Canada. Introduces the student to the Indian Act, treaties, economic development, education, demography, urbanization, popular culture and other topics.
Prerequisite(s): Sociology 201.

Sociology 311 3 units; H(3-0)

Introductory Social Statistics I
Univariate and bivariate statistics for survey data. Topics include cross tabular analysis, the normal distribution, confidence intervals for means, hypothesis testing, Chi-squared and F distributions and bivariate linear regression analysis. In labs statistical software to analyze survey data will be used.
Prerequisite(s): Sociology 201.

Antirequisite(s): Credit towards degree requirements will be given for only one of Sociology 311 and Engineering 319, Political Science 399, Psychology 300, 301, 312, Statistics 205, 213, 217, 327; that one being a course appropriate to the degree program.

Sociology 313 3 units; H(3-0)

Introductory Social Research Methods
Research processes including problem definition, data collection and analyses; quantitative and qualitative strategies.
Prerequisite(s): Sociology 201.

Sociology 315 3 units; H(3-3)

Introductory Social Statistics II
Multivariate statistics for survey data; and measurement issues in quantitative research. Topics include reliability, multivariate tabular analysis, multiple regression, dummy variable regression, statistical interaction and path analysis. In labs statistical software to test measurement and causal models will be used.
Prerequisite(s): Sociology 311.

Sociology 321 3 units; H(3-0)

Sociology of Health and Illness
Introduction to social factors influencing health, illness, and medicine. Topics covered may include the organization of medical institutions and occupations, the socialization of medical professionals, the social construction of illness, social determinants of health, and comparative health-care systems and policy.
Prerequisite(s): Sociology 201.

Sociology 325 3 units; H(3-0)

Introduction to Deviance and Social Control
The presentation and analysis of theories of criminality and of non-criminal deviance, methods to uncover the incidence of deviance and criminality, a survey of forms of deviant and criminal behaviours, and the social and institutional responses to them.
Prerequisite(s): Sociology 201.

Sociology 327 3 units; H(3-0)

Introduction to Criminal Justice
Introduction to the field of criminal justice in Canada from a sociological perspective. May include: examination of the definitions of crime; crime measurement; institutional responses to crime by the police, the courts and correctional services; and alternatives to the justice model.
Prerequisite(s): Sociology 201.

Antirequisite(s): Sociology 201.

Sociology 327 and 427 will not be allowed.

Sociology 331 3 units; H(3-0)

Classical Sociological Theory
The development of sociological theory from the nineteenth century to the Second World War.
Prerequisite(s): Sociology 201.
Courses of Instruction

Sociology 333 3 units; H(3-0)
Contemporary Sociological Theory
The development of sociological theory from the Second World War to the present.
Prerequisite(s): Sociology 331.

Sociology 341 3 units; H(3-0)
Social Psychology
A wide range of interdependent individual and social topics that influence our thinking, feeling, and behaviour. Topics may include social cognition, perception, social experience, group behaviour, social interaction, and emotions.
Prerequisite(s): Sociology 201.
Antirequisite(s): Credit for Sociology 341 and Psychology 345 will not be allowed.

Sociology 345 3 units; H(3-0)
Mass Communication
A critical, theoretically-informed look at what it means to live in a society in which the forms and content of mass media_mass communication – and our uses of them – shape our lives in significant ways.
Prerequisite(s): Sociology 201.

Sociology 353 3 units; H(3-0)
Urban Sociology
Discusses the impact of urbanization on social relations by analyzing city living in historical and global perspective but also through local issues such as density and neighbourhoods. Provides a sociological perspective on issues that cities are facing today.
Prerequisite(s): Sociology 201.

Sociology 355 3 units; H(3-0)
Population and Society
Introduction to social demography – the study of population size, composition and processes (fertility, mortality and migration). Focuses on both empirical and theoretical relationships between demography, social change and structured inequality.
Prerequisite(s): Sociology 201.

Sociology 365 3 units; H(3-0)
Social Stratification
Introduction to the sociological study of social inequalities and stratification and the major theoretical explanations of social inequalities.
Prerequisite(s): Sociology 201.

Sociology 371 3 units; H(3-0)
Sociology of Families
A sociological examination of family life in all its multiple and changing forms. Topics may include key transitions and common practices in family life; gender, sexuality and family life, and family life in cross-cultural context.
Prerequisite(s): Sociology 201.

Sociology 373 3 units; H(3-0)
Sociology of Aging
Social and institutional factors associated with aging in modern society.
Prerequisite(s): Sociology 201.

Sociology 375 3 units; H(3-0)
Sociology of Ethnicity and Racialization
Introduction to the forms of ethnic and racial dynamics in selected cases around the world. Such concepts as identity, ethnicity, race, racialization, racism, assimilation, integration, pluralism, colonialism, post-colonialism, transnationalism and diasporas are examined in theoretical and cross-national contexts.
Prerequisite(s): Sociology 201.

Sociology 377 3 units; H(3-0)
Sociology of Religion
An introduction to the theories and concepts utilized by sociologists to interpret religious behaviour and the organization of religion.
Prerequisite(s): Sociology 201.

Sociology 393 3 units; H(3-0)
Sociology of Work
A sociological perspective for gaining a better understanding of the meaning and nature of work. Provides an overview of core concepts and current topics fundamental to understanding work in society.
Prerequisite(s): Sociology 201.

Sociology 399 3 units; H(3-0)
Sociology of Sport
Organized around the theme of social problems in sport, examines sports-related behaviour, consumption, and sponsorship. A variety of approaches shows how sport is socially constructed and embodies different meanings for different groups of people.
Prerequisite(s): Sociology 201.
Antirequisite(s): Credit for Sociology 399 and Kinesiology 244 will not be allowed.

Sociology 401 3 units; H(3-0)
Advanced Topics in Sociology
A variety of specialized sociological topics are explored at an advanced level.
Prerequisite(s): Sociology 313.
MAY BE REPEATED FOR CREDIT

Sociology 403 3 units; H(3-0)
Special Topics in Gender Relations
Selected themes and issues in the sociology of gender relations. Topics such as illness, consumer society, environmental risk, compassion, homelessness, poverty and identity have recently been explored.
Prerequisite(s): Sociology 303 and 313.
Note: May be used for credit toward the concentration in Gender, Family and Work a maximum of twice.
MAY BE REPEATED FOR CREDIT

Sociology 405 3 units; H(3-0)
Special Topics in Canadian Social Structure
A macro-level examination of Canadian social structure including a socio-developmental analysis of selected Canadian institutions such as bilingualism, regionalism, multiculturalism, multinational corporations, and ethnic stratification. Critical examination of sociological models for the study of Canadian society.
Prerequisite(s): Sociology 313.
MAY BE REPEATED FOR CREDIT

Sociology 407 3 units; H(3-0)
(formerly Sociology 401.15)
Sociology of the Body
Considers aspects of the lived body and the body as object of social construction, modification, and regulation.
Prerequisite(s): Sociology 313 and 321.
Courses of Instruction

Science, biomedicine, bureaucracy, social service administration and professional occupations.

Prerequisite(s): Sociology 331 and 333.

Sociology 443
3 units; H(3-0)
Special Topics in Social Psychology
An advanced study of social processes and interactions of persons in groups with some methodological considerations.
Prerequisite(s): Sociology 341 and 313.
MAY BE REPEATED FOR CREDIT

Sociology 445
3 units; H(3-0)
(formerly Sociology 401.36)
Visual Sociology
Visual representation in contemporary society. Social Practices of making and using Visual images, such as photographs. The use of visual methods in sociological research.
Prerequisite(s): Sociology 313, 331, and 333.

MAY BE REPEATED FOR CREDIT

Sociology 453
3 units; H(3-0)
Special Topics in Urban Sociology
Critical analysis of theories of urban institutional and ecological characteristics. Emphasis is on comparative data derived from a sample of world cities.
Prerequisite(s): Sociology 313 and 353.

MAY BE REPEATED FOR CREDIT

Sociology 461
3 units; H(3-0)
Worker Movements and Labour Unions
A social movement perspective on working class struggle and accommodation in capitalist societies. Historical and contemporary movements will be considered, with an emphasis on Canada.
Prerequisite(s): Sociology 313 and one of 331, 333, or 365.

Sociology 467
3 units; H(3-0)
Ethnic Relations in Canada
An introduction to the structure and form of ethnic (racial) group relations in Canada. Contemporary relations will be analyzed from a historical perspective.
Prerequisite(s): Sociology 313 and 375.

Sociology 471
3 units; H(3-0)
Special Topics in the Sociology of Families
Selected themes and issues in the sociology of families.
Prerequisite(s): Sociology 371 and 313.
Note: May be used for credit toward the concentration in Gender, Family and Work a maximum of twice.
MAY BE REPEATED FOR CREDIT

Sociology 475
3 units; H(3-0)
Special Topics in Race and Ethnic Relations
Advanced analysis of selected themes and issues in race and ethnic relations within the framework of theory and research.
Prerequisite(s): Sociology 313 and 375.
MAY BE REPEATED FOR CREDIT

Sociology 487
3 units; H(3-0)
Sociology of Development
A study of the process of change and modernization in the developing areas of the world.
Prerequisite(s): Sociology 313 and one of 331, 333.

Sociology 493
3 units; H(3-0)
Special Topics in the Sociology of Work
Selected themes and issues in the sociology of work. May include gender and work, families and work, and the sociology of organizations.
Prerequisite(s): Sociology 313 and 393.
Note: May be used for credit toward the concentration in Gender, Family and Work a maximum of twice.
MAY BE REPEATED FOR CREDIT

Sociology 499
1.5 units; Q(3S-0)
Field School/Seminar in Sociology
A variety of specialized topics explored through concentrated learning opportunities. May include urban issues, the self in society, settlement and immigration, and disorder and crime.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 501
3 units; H(0-3T)
Directed Reading
Independent study of a variety of advanced topics under the supervision of a member of the department.
Prerequisite(s): Sociology 315, and 333 and at least 6 units (1.0 full-course equivalent) Sociology at the 400 level, and consent of the Department.
Note: May be counted only twice towards the major field requirements in Sociology.
MAY BE REPEATED FOR CREDIT

Sociology 590
6 units; F(3S-0)
Sociology Honours Thesis and Seminar
Students will conduct an independent research project under the direction of a supervisor. In the seminar, students will discuss and present their projects and other topics relevant to conducting research.
Prerequisite(s): Sociology 313, admission to the Sociology Honours program and consent of the Department.

Graduate Courses

Sociology 601
3 units; H(3S-0)
Seminar in Special Topics in Sociology
Arranged for various topics of Sociology on the basis of special interest and need.
Prerequisite(s): Consult Department for assignment to Faculty member.
MAY BE REPEATED FOR CREDIT

Sociology 602
6 units; F(3S-0)
Master’s Seminar in Professional Sociology

NOT INCLUDED IN GPA

Sociology 603
3 units; H(3S-0)
Seminar in Sociology of Health and Illness
Prerequisite(s): Consent of the Department.

Sociology 611
3 units; H(3S-3)
Social Statistics: The General Linear Model
Multiple regression with applications to sociological research, with topics such as regression diagnostics, categorical predictors, non-linear relationships, logistic regression, and testing of mediation and moderation.
Prerequisite(s): Consent of the Department. (Sociology 311 and 315 normally required.)

Sociology 613
3 units; H(3S-0)
Seminar in Quantitative Research Methods
Advanced study in the theory and practice of quantitative research methods. Topics may include the logic of causality, mixed methods designs, sampling, measurement, survey construction and implementation.
Prerequisite(s): Sociology 313.

Sociology 615
3 units; H(3S-0)
Seminar in Qualitative Research Methods
Advanced study in the theory and practice of qualitative research methods. Topics may include participant observation, in-depth interviews, narrative analysis, conversation and discourse analysis, autoethnography, archival research, and feminist research methods.
Prerequisite(s): Sociology 313. Sociology 413 is recommended.

Sociology 625
3 units; H(3S-0)
Seminar on Deviant Behaviour
Prerequisite(s): Sociology 325.

Sociology 631
3 units; H(3S-0)
Seminar in Sociological Theory
Prerequisite(s): Sociology 331 and 333 or equivalents.

Sociology 653
3 units; H(3S-0)
Seminar on Urban Sociology
Prerequisite(s): Sociology 353.

Sociology 667
3 units; H(3S-0)
Seminar on Ethnic Relations
Prerequisite(s): Sociology 375.

Sociology 671
3 units; H(3S-0)
Seminar on Families, Relationships, and Personal Life
Prerequisite(s): Sociology 471.

Sociology 677
3 units; H(3S-0)
Seminar in Sociology of Gender Relations
Prerequisite(s): Consent of the Department.

Sociology 699
1.5 units; Q(0-3)
Special Topics in Sociology
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 701
3 units; H(3S-0)
Doctoral Seminar in Sociology
Seminar on selected topics. Consult Department for details.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 702
6 units; F(3S-0)
Doctoral Seminar in Professional Sociology
Prerequisite(s): Consent of the Department.
NOT INCLUDED IN GPA
Courses of Instruction

Sociology 705 1.5 units; Q(3S-0)
Selected Topics in Advanced Methodological Issues
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 711 1.5 units; Q(3S-3)
Selected Topics in Advanced Quantitative Methods
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 715 1.5 units; Q(3S-0)
Selected Topics in Advanced Qualitative Methods
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 731 3 units; H(3S-0)
Doctoral Seminar in Sociological Theory
Prerequisite(s): Consent of the Department.

Software Engineering SENG

Instruction offered by members of the Department of Computer Science in the Faculty of Science and the Department of Electrical and Computer Engineering in the Schulich School of Engineering.

Senior Courses

Software Engineering 300 3 units; H(3-2T)
Introduction to Software Engineering
Introduction to the development and evolution of software. Covers key conceptual foundations as well as key methods and techniques used in the different phases of the software lifecycle. Emphasis on both technical and soft skills needed for high quality software and software-based products developed in teams.
Prerequisite(s): Computer Science 319 or 331.
Antirequisite(s): Credit for Software Engineering 300 and any of Software Engineering 301, 311, 403, 411, Computer Science 301, 333, 451 or Software Engineering for Engineers 480 will not be allowed.

Software Engineering 401 3 units; H(3-2)
Software Architecture
Software architectures and design for non-functional software properties. Introduction to program comprehension skills including analysis of existing architectures.
Prerequisite(s): Software Engineering 300 or 301 or Software Engineering for Engineers 480.
Antirequisite(s): Credit for Software Engineering 401 and 443 will not be allowed.

Software Engineering 437 3 units; H(3-2)
Software Testing
Concepts, methods, techniques, processes, and tools for software testing.
Prerequisite(s): Software Engineering 301 or Software Engineering for Engineers 480.

Software Engineering 438 3 units; H(3-2)
Software Testing, Reliability, and Quality
Concepts, methods, techniques, processes, and tools for software testing. The principles, processes, and applications of software reliability and software quality assurance.
Prerequisite(s): Software Engineering 300, 301 or Software Engineering for Engineers 480.

Software Engineering 471 3 units; H(2-3)
(formerly Software Engineering for Engineers 471)
Software Requirements Engineering
Introduction to elicitation, modelling, expression and validation of the requirements. Techniques and methodologies for requirements engineering. Applications of requirements engineering to the management of the software development lifecycle.
Prerequisite(s): Computer Science 319 or 331 or Software Engineering for Engineers 400.

Software Engineering 499 3 units; H(3-2)
Introductory Topics in Software Engineering
Special topics at an introductory level on software development methods, technologies, or tools.
Prerequisite(s): Consent of either the Department of Electrical and Computer Engineering or the Department of Computer Science.
Note: Consult Department (Computer Science or Electrical and Computer Engineering) for details regarding offerings in the upcoming academic year.
MAY BE REPEATED FOR CREDIT

Software Engineering 501 3 units; H(3-2)
Advanced Topics in Software Engineering
Special topics at an advanced level on software development methods, technologies, or tools.
Prerequisite(s): Consent of either the Department of Electrical and Computer Engineering or the Department of Computer Science.
Note: Consult Department (Computer Science or Electrical and Computer Engineering) for details regarding offerings in the upcoming academic year.
MAY BE REPEATED FOR CREDIT

Software Engineering 511 3 units; H(3-2)
Software Process and Project Management
Analysis of methods, tools, and techniques for software process improvement and software project management as an effort to achieve quality software products.
Prerequisite(s): Software Engineering 300 or 301 or 403 or Software Engineering for Engineers 480.

Software Engineering 513 3 units; H(3-2)
Web-Based Systems
An overview of software engineering methods and technologies for developing web-based software systems.
Prerequisite(s): Software Engineering 300 or 301 or Software Engineering for Engineers 480.

Software Engineering 515 3 units; H(3-2)
Agile Software Engineering
Investigation and application of agile software development practices.
Prerequisite(s): One of Software Engineering 401, 403, 411, or 443.

Software Engineering 521 3 units; H(3-2)
Software Reliability and Software Quality
The principles, processes, and applications of software reliability and software quality assurance.
Prerequisite(s): Software Engineering 437 or 421.
Antirequisite(s): Credit for Software Engineering 521 and 637 will not be allowed.

Software Engineering 523 3 units; H(3-2T)
Formal Methods
Software specification, verification, and validation using a mathematically rigorous technique.
Prerequisite(s): Software Engineering 300 or 301 or Software Engineering for Engineers 480.

Software Engineering 533 3 units; H(3-2)
(formerly Software Engineering for Engineers 533)
Software Performance Evaluation
Analyzing quality requirements of large-scale software. Performance analysis, testing, and tuning techniques. Evaluating software scalability. Capacity planning methodologies. Issues related to safety, security, and availability of software.
Prerequisite(s): Computer Science 457 and one of Software Engineering 300 or 301 or Software Engineering for Engineers 480.

Software Engineering 541 3 units; H(3-2T)
(formally Software Engineering 531)
Fundamentals of Software Evolution and Reuse
Phenomena and approaches involved in the evolution and reuse of large-scale software, including design for modifiability and tool support. Strengths and weaknesses of industrially-current techniques as well as recent research results.
Prerequisite(s): Software Engineering 300 or 301 or Software Engineering for Engineers 480.
Antirequisite(s): Credit for Software Engineering 541 and 641 will not be allowed.

Graduate Courses

Software Engineering 605 1.5 units; Q(3-1)
Industrial Topics in Software Engineering
A study of practical approaches of industrial relevance to students specializing in Software Engineering.
Note: Consult Department (Computer Science or Electrical and Computer Engineering) for details regarding offerings in the upcoming academic year.
MAY BE REPEATED FOR CREDIT

Software Engineering 607 3 units; H(3-1)
Special Topics in Software Engineering
A study of problems of particular interest to students specializing in Software Engineering.
Note: Consult Department (Computer Science or Electrical and Computer Engineering) for details regarding offerings in the upcoming academic year.
MAY BE REPEATED FOR CREDIT

Software Engineering 609 1.5 units; Q(3-1)
Special Topics in Software Engineering
A study of problems of particular interest to students specializing in Software Engineering.
Note: Consult Department (Computer Science or Electrical and Computer Engineering) for details regarding offerings in the upcoming academic year.
MAY BE REPEATED FOR CREDIT
Software Engineering 480 3 units; H(3-1T-2)

**Principles of Software Design**
Brief overview of typical software development lifecycles. Systematic methods for designing large-scale, quality software. Concepts such as abstraction, modularity, and software modeling will be covered. Designing for non-functional properties of software will be introduced. Emphasis on individual skills.

Prerequisite(s): Software Engineering for Engineers 409 and Computer Engineering 369.
Antirequisite(s): Credit for Software Engineering for Engineers 480 and any of Software Engineering 300, 301, 411, Computer Science 301, 333, or 451 will not be allowed.

Software Engineering for Engineers 519 3 units; H(3-2)

**Special Topics in Software Engineering**
Current topics in software engineering.

Prerequisite(s): Consent of the Department.
Note: Consult Department for announcement of topics.

MAY BE REPEATED FOR CREDIT

Software Engineering for Engineers 545 3 units; H(3-2)

**Introduction to Virtual Reality**
Introduce VR technologies. Emphasize on engineering methodologies of creating VR systems. Characterize VR systems, hardware and software, user 3D interaction, and VR applications and future.

Prerequisite(s): Software Engineering for Engineers 409.
Antirequisite(s): Credit for Software Engineering for Engineers 545 and 519.45 will not be allowed.

Graduate Courses
Registration in all courses requires the approval of the Department of Electrical and Computer Engineering.

Software Engineering for Engineers 603 3 units; H(3-0)

**Modelling and Measurement of Software Performance**
Performance-oriented review of computer systems; methodologies to evaluate software performance; fundamental performance laws; performance prediction using queuing network models; discrete event simulation of computer system performance, simulation input and output analysis; performance testing, monitoring and benchmarking; workload characterization; software performance engineering.

Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for Software Engineering for Engineers 603 and 619.02 will not be allowed.

Software Engineering for Engineers 604 3 units; H(3-0)

**Theoretical Foundations of Software Engineering**
Explores formal principles of software engineering based on the common recognition that software engineering is not constrained by any physical laws as we know. The transdisciplinary foundations of software engineering are presented from the facets of information, computing, mathematics, cognitive, and management sciences, software engineering philosophies; engineering, mathematical, computational, management science, cognitive informatics, computational intelligence foundations and approaches of software engineering. As a re-
South Asian Studies SAST

Software Engineering for Engineers 606 3 units; H(3-0)

Software Engineering Fundamentals
Methodological foundation of software development principles from requirements analysis to software design and architecture.
Prerequisite(s): Software Engineering for Engineers 409 or consent of the Department.
Antirequisite(s): Credit for Software Engineering for Engineers 406 and Software Engineering for Engineers 619.16 will not be allowed.

Software Engineering for Engineers 619 3 units; H(3-1) or H(3-0)

Special Topics
A study of problems of particular interest to students specializing in Software Engineering.
MAY BE REPEATED FOR CREDIT

South Asian Studies SAST

Instruction offered under the direction of the Faculty of Arts. Please contact the Arts Students' Centre for specific details.

Junior Course

South Asian Studies 203 3 units; H(3-0)
(formerly South Asian Studies 315)

Understanding South Asia
The roots of ancient civilization; society, resources and environment; racial, ethnic and cultural diversities; philosophic and religious traditions; arts and aesthetics; historical bases of tradition and modernity; role of education in social development; ideological differences and economic development. Primary focus on India, Sri Lanka, Pakistan, Bangladesh, Bhutan and Nepal.

Senior Courses

South Asian Studies 303 3 units; H(3-0)
(formerly South Asian Studies 415)

Contemporary Indian Society and Culture
This interdisciplinary course will discuss the culture and society of India today. Emphasis will be on casteism, communalism, religion, regionalism, globalization, ethnicity, class and gender in Indian society.
Prerequisite(s): South Asian Studies 203 or 315.

South Asian Studies 499 3 units; H(3-0)

Topics in South Asian Studies
Investigation of themes and methodologies related to the study of South Asian civilizations. A single theme, multiple themes or the study and application of one or more methods employed in Asian Studies may be offered. Themes/methods will vary among offerings.
499.01. Methods in South Asian Studies
499.02. Contemporary Issues in South Asia
499.03. Topics in the History of South Asia
Prerequisite(s): One of South Asian Studies 203, 303, 315 or 415.

South Asian Studies 531 3 units; H(3-0)

Supervised Research in South Asian Studies
An interdisciplinary, inquiry-based course in which students will pursue a supervised, independent research project on a topic from social, philosophico-political, economic, political and/or international issues within South Asia and analysis of the basis for interactions among South Asian countries and across the Pacific will be presented in-depth.
Prerequisite(s): One of South Asian Studies 203, 303, 315 or 415 and consent of the Program Coordinator.
Antirequisite(s): Credit for South Asian Studies 531 and South Asian Societies 500 will not be allowed.

Space Physics SPPH
Instruction offered by members of the Department of Physics and Astronomy in the Faculty of Science.
Note: For listings of related courses, see Astronomy, Astrophysics, Medical Physics and Physics.

Graduate Course

Space Physics 671 3 units; H(3-0)

Physics of the Magnetosphere
Physics of the interaction between the earth's magnetic field and the fields and plasmas of the surrounding interplanetary environment. Topics include magnetic field models and co-ordinate systems, reconnection, current flow in the magnetosphere, substorms, and particle acceleration.
Prerequisite(s): Note: It is expected that a student's background will include Physics 509 and 555 or equivalent.

Spanish SPAN
Instruction offered by members of the School of Languages, Linguistics, Literatures and Cultures in the Faculty of Arts.

French, Italian and Spanish-speaking students or students with previous knowledge of these languages (including graduates of a bilingual or immersion program) must consult the School to be placed in a course corresponding to their level of linguistic competence. Native speakers are not eligible to take language courses by special assessment or to receive advanced credit for them.

To register in Senior Courses (300 level and above), students must have completed Spanish 203 or 205, or have obtained the consent of the School.

Junior Courses

Spanish 201 3 units; H(3-1)

Beginners' Spanish I
A comprehensive course for students with no prior knowledge of Spanish, focused on listening, speaking, reading, and writing skills having to do with immediate needs in everyday situations. Emphasis on intercultural awareness of Spanish-speaking cultures.
Antirequisite(s): Credit for Spanish 201 and 30 will not be allowed.

Spanish 203 3 units; H(3-1)

Beginners' Spanish II
Development of listening, speaking, reading, and writing skills on familiar topics and topics of personal interest. Emphasis on intercultural awareness of Spanish-speaking cultures.
Prerequisite(s): Spanish 30 or 201.
Antirequisite(s): Credit for Spanish 203 and 205 will not be allowed.

Spanish 205 6 units; F(8-2)

Intensive Spanish
A challenging task-oriented course, intended for students exiting high school with Spanish 30 or equivalent. Spanish 201 or previous knowledge of Spanish. Prepares students to transition to Spanish 303.
Prerequisite(s): Spanish 30 or 201.
Antirequisite(s): Credit for Spanish 205 and either 203 or 301 will not be allowed.

Senior Courses

Spanish 301 3 units; H(3-1T)

Intermediate Spanish I
Advances the development of the three major modes of communication: interactional, interpretative, and presentational, with emphasis on intercultural understanding of Spanish-speaking cultures.
Prerequisite(s): Spanish 203.
Antirequisite(s): Credit for Spanish 301 and 205 will not be allowed.

Spanish 303 3 units; H(3-1T)

Intermediate Spanish II
Advances the development of the three major modes of communication: interactional, interpretative, and presentational, with emphasis on intercultural understanding of Spanish-speaking cultures, enabling communication on a variety of topics and comprehension and discussion of more complex texts and ideas.
Prerequisite(s): Spanish 301 or 205.

Note: Normally Spanish 303 and Spanish 323 are taken concurrently.

Spanish 321 3 units; H(3-0)

Contemporary Hispanic Cultures
Study of current issues in the Hispanic world as seen through various media sources such as newspapers, magazines, television and especially the web. Introduction to tools and resources for such study. Extensive reading, written work and oral presentations.
Prerequisite(s): Spanish 203 or 205.
Antirequisite(s): Not open to students with credit in 400-level Spanish courses or higher.

Spanish 323 3 units; H(3-0)

Introduction to Textual Analysis and Composition
Focus on all forms of communication in Spanish, including journalistic, scientific, literary texts and other media, with emphasis on critical reading as well as analytical written assignments.
Prerequisite(s): Spanish 301 or 205.
Antirequisite(s): Not open to students with credit in 400-level Spanish courses or higher.

Note: Normally Spanish 303 and Spanish 323 are taken concurrently.

Spanish 405 3 units; H(3-0)

High-Intermediate Spanish
Development of reading skills through selected online materials or books. Increased emphasis on accurate pronunciation and ability to communicate in a more spontaneous Spanish as well as in written form. Review of selected grammatical struc-
courses, vocabulary enrichment and development of conversation skills dealing with cultural issues.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

Spanish 407 3 units; H(3-0)

Critical Thinking in Spanish
Designed to develop students’ critical thinking skills and academic writing proficiency. Further development of reading and writing skills, through the analysis of selected texts and constant practice in writing expository and argumentative essays from outline to completion. Writing is seen as a process that includes many states of development, revision and editing.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

Spanish 421 3 units; H(3-0)

Introduction to Hispanic Prose
Analysis of selected Spanish and Spanish-American novels, short stories and essays, with an emphasis on literary analysis and literary history.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

Spanish 423 3 units; H(3-0)

Introduction to Hispanic Poetry and Drama
Analysis of Spanish and/or Spanish-American poetry and plays, with an emphasis on literary analysis and literary history.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

Spanish 437 3 units; H(3-0)

Spanish and Latin American Short Story
The analysis and interpretation of shorter fictional forms in Spain and Latin America, progressing from basic narrative techniques to the broad range of critical approaches to literary works. Strong emphasis will be placed on the understanding of the Hispanic cultures through literature and the development of critical thinking.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

Spanish 441 3 units; H(3-0)

Women’s Perspectives
Literary, artistic and other cultural works produced by Spanish, Latin American, Caribbean and Latina women. A variety of topics and disciplines (film, art, photography, philosophy, etc.) will be examined. Class material will include theoretical and critical texts, primarily from feminism. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

Spanish 471 3 units; H(3-2)

Hispanic Cinema
Study of Spanish, Latin American, Caribbean and Chicano cinema in its historical, political, and social context. Examines a variety of topics (national and gender identities, construction of myths, relations of cinema to popular culture, relations of cinema and literature, etc.). Use of contemporary theories of cinematographic expression. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

MAY BE REPEATED FOR CREDIT

Spanish 473 3 units; H(3-0)

Hispanic Cultures
Overview of Hispanic history, literature and art. Use of essays, journalism, films and electronic media for classroom discussion. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

MAY BE REPEATED FOR CREDIT

Spanish 475 3 units; H(3-0)

Topics in Spanish Language
Topics in Spanish phonology, dialectology, and other general aspects of the Spanish language. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

Spanish 499 3 units; H(3-0)

Topics in Hispanic Studies
Discussion of selected topics in Hispanic language, literature or culture.

Prerequisite(s): Spanish 303 and 3 units of Spanish at the 300 level or above.

MAY BE REPEATED FOR CREDIT

Spanish 505 3 units; H(3-0)

Advanced Spanish
Advanced course in Spanish language and culture with particular emphasis on composition, vocabulary building and linguistic accuracy. Includes a capstone project to combine the knowledge and skills learned in the Spanish the Major with other areas of concentration. It may include readings and enhancement of learning through other media.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 523 3 units; H(3-0)

Translation
Introduction to the theory and practice of translation from Spanish into English and from English into Spanish. Format and content of course may vary from year-to-year to include other languages in addition to English.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 533 3 units; H(3-0)

Uses of Spanish as a Second Language
Introduction to basic issues related to the teaching of Spanish as a second language. In special circumstances the theoretical component may be taught in English. The practical component may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 553 3 units; H(3-0)

(formerly Spanish 433)

Spanish American Literature after 1900
A survey of Spanish American literature in its cultural and historical context. Includes the study of indigenous voices, literature of the conquist, as well as the colonial period and the major authors of the nineteenth century. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 555 3 units; H(3-0)

Spanish American Literature to 1900
Study of the major movements and authors of the twentieth century. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 557 3 units; H(3-0)

Current Trends in Hispanic Studies
In-depth study of literary and cultural issues which could include marginalization, identity, nationalism, the emergence of silenced voices, or other new developments. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 563 3 units; H(3-0)

Medieval Literature
Representative works of literature in the Spanish language from the tenth to the fifteenth centuries.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Antirequisite(s): Credit for Spanish 563 and 565 will not be allowed.

Spanish 567 3 units; H(3-0)

Early Modern Literature
Representative works of literature in the Spanish language from the sixteenth to the seventeenth centuries. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Antirequisite(s): Credit for Spanish 567 and 565 will not be allowed.

Spanish 571 3 units; H(3-0)

Art and Literature
Study of the interrelations of the visual arts and literature, using as its reference Hispanic literary texts and works of art. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 573 3 units; H(3-2)

Critical Analysis of Hispanic Cinemas
In-depth study of Hispanic Cinemas, including genres, movements, histories, industrial mechanisms of distribution, and cultural reception, in consolidated, developing and emerging film industries. Content can be organized based on region (Chicano/a, Mexican, Spanish cinema, etc.); topic (identity, transnationalism, women’s cinema, etc.); genre (road movie, documentary, border cinema, auteur cinema, etc.); filmmakers and/or by identifiable traditions (cine de la movida, Nuevo cine latinoamericano, Nuevo cinemas, etc.). Use of contemporary theories and study of cinematographic techniques.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 581 3 units; H(3-0)

(formerly Spanish 481)

Spanish Literature and Culture from the Eighteenth Century to the Spanish Civil War
Survey of major works and cultural movements from the eighteenth century to the early twentieth century. Focus on reading and analytical skills.
Courses of Instruction

Format and content of the course may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 583 3 units; H(3-0)
Spanish Literature and Culture from the Spanish Civil War to the Present
Interdisciplinary course stressing the relationship between various cultural manifestations and their socio-political background. Format and content of course may vary from year-to-year.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Spanish 593 3 units; H(3-0)
Literary Theory
An introduction to modern literary theory and its various schools of thought, with application to works of Hispanic literature.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

Note: This course is mandatory for students registered in the Spanish Honours Program.

MAY BE REPEATED FOR CREDIT

Spanish 598 6 units; F(0-3T)
Honours Thesis
Students carry out a research project under the supervision of a faculty member and submit a thesis written in Spanish.

Prerequisite(s): Admission to Spanish Honours program and completion of 75 units (12.5 full-course equivalents).

MAY BE REPEATED FOR CREDIT

Advanced Topics in Hispanic Studies
A specialized course for advanced students. Course may function as a seminar or as a directed readings course.

Prerequisite(s): Spanish 405 and 9 units (1.5 full-course equivalents) in Spanish at the 400 level.

MAY BE REPEATED FOR CREDIT

Graduate Courses
Note: The School will give graduate credit for 500-level courses in cases it deems exceptional. This option is subject to the approval of the School. Graduate students taking a 500-level course for graduate credit will be asked to complete additional requirements.

Spanish 601 3 units; H(3-0)

Literary and Cultural Theory
MAY BE REPEATED FOR CREDIT

Spanish 613 3 units; H(3-0)
Critical Analysis of Medieval Texts
MAY BE REPEATED FOR CREDIT

Spanish 615 3 units; H(3-0)
Golden Age Literature
MAY BE REPEATED FOR CREDIT

Spanish 617 3 units; H(3-0)
Theatre and Performance in the Nineteenth or Twentieth Centuries
MAY BE REPEATED FOR CREDIT

Spanish 619 3 units; H(3-0)
Post-Franco Literature, Art and Film
MAY BE REPEATED FOR CREDIT

Statistics STAT

Introduction to Probability
A calculus-based introduction to probability theory and applications. Elements of probabilistic modeling, Basic probability computation techniques. Discrete and continuous random variables and distributions. Functions of random variables, Expectation and variance, Multivariate random variables, Conditional distributions, Covariance, Conditional expectation, Central Limit Theorem, Applications to real-world modelling.

Prerequisite(s): Mathematics 267 or 277.

Antirequisite(s): Credit for Statistics 321 and Engineering 319 will not be allowed. Not available to students who have previous credit for one of Statistics 321 or Engineering 319 or are concurrently enrolled in Statistics 321 or Engineering 319.

Senior Courses

Statistics 321 3 units; H(3-1T)
(formerly Mathematics 321)

Introduction to Statistical Inquiry
The systematic progression of statistical principles needed to conduct a statistical investigation culminating in parameter estimation, hypothesis testing, statistical modelling, and design of experiments.

Prerequisite(s): Mathematics 30-1 or Mathematics 2 (offered by Continuing Education) or registration in the Faculty of Nursing.

Antirequisite(s): Credit for Statistics 205 and any one of Statistics 211, 213, 217, 327, Political Science 399, Psychology 300, 301, 312, or Sociology 311 will not be allowed. Students may not register in, or have credit for, Statistics 205 if they have previous credit for one of Statistics 321 or Engineering 319 or are concurrently enrolled in Statistics 321 or Engineering 319.

Statistics 213 3 units; H(3-1)

Introduction to Statistics I
Collection and presentation of data, introduction to probability, including Bayes' law, expectations and distributions. Properties of the normal curve, introduction to estimation and hypothesis testing.

Prerequisite(s): Mathematics 30-1 or Mathematics 2 (offered by Continuing Education).

Antirequisite(s): Credit for Statistics 213 and any one of Statistics 205, Statistics 327, Political Science 399, Psychology 300, 301, 312, or Sociology 311 will not be allowed. Not available to students who have previous credit for one of Statistics 321 or Engineering 319 or are concurrently enrolled in Statistics 321 or Engineering 319.

Statistics 217 3 units; H(3-1)

Introduction to Statistics II

Prerequisite(s): Statistics 213.

Antirequisite(s): Credit for Statistics 217 and any one of Statistics 205, 327, Political Science 399, Psychology 300, 301, 312, or Sociology 311 will not be allowed. Not available to students who have previous credit for one of Statistics 321 or Engineering 319 or are concurrently enrolled in Statistics 321 or Engineering 319.

Junior Courses

Students requiring one course (3 units) in Statistics should take Statistics 205.

Statistics 205 3 units; H(3-1T)

Art, Film and Literature in the Spanish Avant-Garde
MAY BE REPEATED FOR CREDIT

Spanish 621 3 units; H(3-0)

Spanish American Literature and Culture to 1900
MAY BE REPEATED FOR CREDIT

Spanish 623 3 units; H(3-0)

Spanish Civil War to the Present
MAY BE REPEATED FOR CREDIT

Spanish 625 3 units; H(3-0)

Spanish 627 3 units; H(3-0)

Avant-Garde Movements in Spanish America
MAY BE REPEATED FOR CREDIT

Spanish 631 3 units; H(3-0)

Popular Culture
MAY BE REPEATED FOR CREDIT

Spanish 633 3 units; H(3-0)

Writings in Exile
MAY BE REPEATED FOR CREDIT

Spanish 635 3 units; H(3-0)

Literature and the Visual Arts in Hispanic Culture
MAY BE REPEATED FOR CREDIT

Spanish 637 3 units; H(3-0)

Spanish 639 3 units; H(3-0)

Hispanic Female Voices
MAY BE REPEATED FOR CREDIT

Spanish 641 3 units; H(3-0)

Hispanic Cinema
MAY BE REPEATED FOR CREDIT

Spanish 643 3 units; H(3-0)

Special Topics in Hispanic Culture, Language or Literature
MAY BE REPEATED FOR CREDIT

Notes:
- Not every 400- and 500-numbered Statistics course is offered every year. Check with the divisional office to plan for the upcoming cycle of offered courses.
- Credit towards degree requirements will be given for only one of Engineering 319, Political Science 399, Psychology 300, 301, 312, Sociology 311, Statistics 205, 213/217, 327; that one being a course(s) appropriate to the degree program.
- For listings of related courses, see Actuarial Science, and Mathematics.
Courses of Instruction

Statistics 323 3 units; H(3-1T)
(formerly Mathematics 323)

Introduction to Theoretical Statistics
Statistics and their distributions. Introduction to statistical inference through point estimation and confidence interval estimation of a population parameter. Properties of statistics including unbiasedness and consistency in estimation. Single parameter hypothesis testing, Type I and Type II error. Multi-parameter estimation through confidence interval estimation and hypothesis testing. The analysis of bivariate data through simple linear regression, including inferences on the parameters of the linear model and the analysis of variance. Chi-square test of independence and goodness of fit test.

Prerequisite(s): Statistics 321.
Antirequisite(s): Credit for Statistics 323 and Data Science 305 will not be allowed.

Statistics 327 3 units; H(3-1)

Statistics for the Physical and Environmental Sciences

Prerequisite(s): One of Mathematics 249, 265 or 275.
Antirequisite(s): Credit for Statistics 327 and any one of Statistics 205, 213, 217, Political Science 399, Psychology 300, 301, 312, or Sociology 311 will not be allowed.

Note: Statistics 327 is not available to students who have previous credit for one of Statistics 321 or Engineering 319 or are concurrently enrolled in Statistics 321 or Engineering 319.

Statistics 421 3 units; H(3-0)

Mathematical Statistics
An advanced examination of core concepts in mathematical statistics, including the multivariate normal distribution, limit distributions, sufficient statistics, completeness of families of distributions, exponential families, likelihood ratio tests, chi-square tests, and the analysis of variance. Additional topics and examples relating to sequential tests, non-parametric methods, Bayesian statistical modelling, and the general linear model may also be explored.

Prerequisite(s): Statistics 323.

Statistics 423 3 units; H(3-1T)

Statistical Analysis of Sample Survey

Prerequisite(s): One of Statistics 217, 323, 327, Data Science 305, Engineering 319, Psychology 300, 301, 312, or Sociology 311.
Note: This course is not part of the Field of Mathematics.

Statistics 425 3 units; H(3-1T)

Statistical Design and Analysis of Experiments
Introduction to the design of experiments and the statistical analysis of data. Analysis of variance in the response variable and adequacy of the model. Multiple comparisons methods. Extensions to completely randomized block, Latin-squares, and factorial experimental design. Introduction to nested and split-plot design, with emphasis on statistical software usage.

Prerequisite(s): One of Statistics 217, 323, 327, Data Science 305, Engineering 319, Psychology 300, 301, 312, or Sociology 311.
Note: This course is not part of the Field of Mathematics.

Statistics 429 3 units; H(3-1T)

Linear Models and Their Applications

Prerequisite(s): Statistics 323 or Data Science 305, and Mathematics 211 or 213.

Statistics 431 3 units; H(3-1T)

Introduction to Biostatistics
Fundamental topics in biostatistics, including descriptive statistics, graphical presentation of data, analysis of variance (ANOVA), study designs, contingency tables, measures of association, tests of significance, categorical data analysis, regression, time to event data analysis.

Prerequisite(s): Statistics 323 or Data Science 305.

Statistics 505 3 units; H(3-1T)

Time Series Analysis
An introduction to the theory and tools to conduct time series analysis, with an emphasis on model-fitting and forecasting using a software. Stationarity, white noise, autocorrelation, partial autocorrelation, and linear predictor. Stationary ARIMA models, seasonality and trends. Model fitting, diagnostics and forecasting. Additional topics may include state space models, spectral analysis of time series, and GARCH models.

Prerequisite(s): Statistics 429.

Statistics 507 3 units; H(3-0)
(formerly Statistics 407)

Introduction to Stochastic Processes

Prerequisite(s): Statistics 321.

Statistics 517 3 units; H(3-1)

Practice of Statistics
A capstone course intended for students in their final year of study. The emphasis is on how to address real-world scientific and social issues by applying the various statistical methods acquired in the earlier years in a unified and appropriate way. This involves method selection, data handling, statistical computing, consulting, report writing and oral presentation, teamwork, and ethics.

Prerequisite(s): Two of Statistics 423, 425, 429 and 505.
Antirequisite(s): Credit for Statistics 517 and either 513 or 515 will not be allowed.

Statistics 519 3 units; H(3-0)

Bayesian Statistics
Fundamentals of Bayesian inference, single and multivariable models, hierarchical models, regression models, generalized linear models, advanced computational methods, Markov chain Monte Carlo.

Prerequisite(s): Statistics 323; and Mathematics 267 or 277.
Antirequisite(s): Credit for Statistics 519 and 619 will not be allowed.

Statistics 523 3 units; H(3-0)

Non-parametric Statistics

Prerequisite(s): Statistics 323.
Note: May not be offered every year. Consult the department for listings.

Statistics 525 3 units; H(3-0)

Applied Multivariate Analysis

Prerequisite(s): Statistics 323.
Antirequisite(s): Credit for Statistics 525 and 625 will not be allowed.
Note: May not be offered every year. Consult the department for listings.

Statistics 529 3 units; H(3-1)

Special Topics in Applied Statistics
Content of the course will vary from year-to-year. Consult the Department for information on choice of topics.

Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Statistics 531 3 units; H(3-1)

Monte Carlo Methods and Statistical Computing
Introduction to statistical computing: random numbers generation; Monte Carlo methods (variance reduction technique; computation of definite integrals); Optimization; Numerical integrations.

Prerequisite(s): Statistics 323; Mathematics 267 or 277.

Statistics 533 3 units; H(3-1T)
(formerly Statistics 433)

Survival Models
Nature and properties of survival models; methods of estimating tabular models from both complete and incomplete data samples including actuarial, moment and maximum likelihood techniques; estimations of life tables from general population data; Kaplan-Meier estimator and Nelson-Allan estimator; the accelerated failure time model; the Cox proportional hazards model; model building and high-dimensional survival data analysis.

Prerequisite(s): Statistics 323.
Antirequisite(s): Credit for Statistics 533 and 633 will not be allowed.

Statistics 541 3 units; H(3-1T)

Categorical Data Analysis
Description and inference for binomial and multinomial observations using proportions and odds ratios; multi-way contingency tables; generalized linear models for discrete data; logistic regression for binary responses; multi-category logit models for nominal and ordinal responses; loglinear mod-
Graduate Courses

Note: Consent of the department is required for all graduate Statistics courses. Some 500- and 600-level statistics courses may have concurrent lectures. Extra work in these courses (e.g., extra assignments, advanced examination questions, a term project) will be required for credit at the 600 level.

Statistics 600 1.5 units; Q(3S-0)
(Formerly Statistics 621)

Research Seminar
A professional skills course, focusing on the development of technical proficiencies that are essential for students to succeed in their future careers as practicing statistician in academia, government, or industry. The emphasis is on delivering professional presentations and using modern statistical research tools. A high level of active student participation is required.

MAY BE REPEATED FOR CREDIT NOT INCLUDED IN GPA

Statistics 601 3 units; H(3-0)

Topics in Probability and Statistics
The content of this course is decided from year-to-year in accordance with graduate student interest and instructor availability. Topics include but are not restricted to: Advanced Design of Experiments, Weak and Strong Approximation Theory, Asymptotic Statistical Methods, the Bootstrap and its applications, Generalized Additive Models, Order Statistical Inference and Monte Carlo methods, Robust Statistics, Statistics for Spatial Data, Statistical Process Control, Time Series Models.

Prerequisite(s): Consent of the Department.

MAY BE REPEATED FOR CREDIT

Statistics 603 3 units; H(3-1)
(Formerly Statistics 601.14)

Applied Statistics for Nursing Research
Descriptive statistics; probability theory; statistical estimation/inference; power analysis; regression analysis; analysis of variance; logistic regression analysis; non-parametric tests; factor analysis; discriminant analysis; Cox's Proportional Hazard Model.

Prerequisite(s): Statistics 321 or consent of the Department.

Statistics 619 3 units; H(3-0)

Bayesian Statistics
Fundamentals of Bayesian inference, single and multiparameter models, hierarchical models, regression models, generalized linear models, advanced computational methods, Markov chain Monte Carlo.

Prerequisite(s): Statistics 323 or Mathematics 323; Mathematics 267 or 277 or 353 or 381; or consent of the Department.

Antirequisite(s): Credit for Statistics 619 and 519 will not be allowed.

Statistics 625 3 units; H(3-0)

Multivariate Analysis

Prerequisite(s): Consent of the Department.

Antirequisite(s): Credit for Statistics 625 and 525 will not be allowed.

Statistics 631 3 units; H(3-0)

Computational Statistics
Unconstrained optimization methods, simulation and random number generation, Bayesian inference and Monte Carlo methods, Markov chain Monte Carlo, non-parametric inference, classical inference and other topics. An emphasis will be placed on computational implementation of algorithms.

Statistics 633 3 units; H(3-0)

Survival Models
Advanced topics in survival models such as the product limit estimator, the Cox proportional hazards model, time-dependent covariates, types of censorship.

Prerequisite(s): Statistics 421 or consent of the Department.

Antirequisite(s): Credit for Statistics 633 and 533 will not be allowed.

Statistics 635 3 units; H(3-0)

Generalized Linear Models
Exponential family of distributions, binary data models, loglinear models, overdispersion, quasi-likelihood methods, generalized additive models, longitudinal data and generalized estimating equations, model adequacy checks.

Prerequisite(s): Statistics 421 or 429 or consent of the Department.

Statistics 637 3 units; H(3-0)

Non-linear Regression
Topics include but are not restricted to selections from: linear approximations; model specification; various iterative techniques; assessing fit; multivariate parameter estimation; models defined by systems of differential equations; graphical summaries of inference regions; curvature measures.

Prerequisite(s): Statistics 421 or 429 or consent of the Department.

Statistics 641 3 units; H(3-0)

Statistical Learning
Introduction and Linear Regression; Classification; Regularization; Model Assessment and Selection; Support Vector Machines; Unsupervised Learning; Tree-Based Methods; Other Topics (e.g., Neural Networks, Graphical Models, High-Dimensional Data).

Antirequisite(s): Credit for Statistics 641 and 543 will not be allowed.

Statistics 701 3 units; H(3-0)

Theory of Probability I
Probability spaces, integration, expected value, laws of large numbers, weak convergence, characteristic functions, central limit theorems, limit theorems in Rd, conditional expectation, introduction to martingales.

Statistics 703 3 units; H(3-0)

Theory of Probability II
Stopping times, renewal theory, martingales, almost sure convergence, Radon-Nikodym derivatives, Doob's inequality, square integrable martingales, uniform integrability, Markov chains, stationary measure, Birkhoff's Ergodic Theorem, Brownian motion, stopping times, hitting times, Doob's theorem, Brownian bridge, laws of the iterated logarithm.

Prerequisite(s): Statistics 701.

Statistics 721 3 units; H(3-0)

Statistical Inference
Statistical models, likelihoods, maximum likelihood estimation, likelihood ratio, Wald and score tests, confidence intervals, bounds and regions, Bayesian estimation and testing, basic large sample theory, estimating equations, jackknife, bootstrap and permutation.

Statistics 723 3 units; H(3-0)

Theory of Hypothesis Testing
Likelihood ratio (LR), union-intersection, most powerful, unbiased and invariant tests, Neyman-Pearson Lemma, Karlin-Rubin Theorem, confidence interval (CI), pivotal quantities, shortest length and shortest expected length CI, uniformly most accurate CI, confidence region, simultaneous CI, large-sample tests (Wald's, score, LR tests), Bayesian hypothesis testing, analysis of variance and linear models.

Prerequisite(s): Statistics 721.

Strategic Studies STST

Courses of Instruction

Strategic Studies 601 3 units; H(4 months)

MSS First Term Co-operative Education
Strategic Studies first term co-operative education work placement.

Prerequisite(s): Admission to the co-operative education option of the MSS program.

NOT INCLUDED IN GPA

Strategic Studies 602 3 units; H(4 months)

MSS Second Term Co-operative Education
Strategic Studies second term co-operative education work placement.

Prerequisite(s): Admission to the co-operative education option of the MSS program.

Strategic Studies 603 3 units; H(3-0)

Questions and Methods
A Block Week introduction to research design and methods in Military and Strategic Studies. Introduces the field, its history, major methodologi-
cal debates and challenges of interdisciplinary research.

Prerequisite(s): Admission to Military and Strategic Studies graduate program.

NOT INCLUDED IN GPA

Strategic Studies 609 3 units; H(3-0)

The Canadian Military in the Second World War
An examination of the political parameters imposed by the Canadian government, the quality of Canadian leadership, and the "fit" between British forms of military organization and the fighting quality of Canadian soldiers, sailors and airmen.

Strategic Studies 611 3 units; H(3-0)

Canadian Military Studies
Canadian military studies, excepting the two world wars. Topics will include the evolution of Canadian defence policy, past or present, the development and evolution of the Canadian Forces or any of its main elements (army, navy or air force), Canadian military operability with the military forces of Allied nations, and the relationship between Canadian foreign policy and the use of the Canadian military.

Strategic Studies 613 3 units; H(3S-0)

The Canadian Military in the First World War
The development and operational achievements of the Canadian Expeditionary Force, wartime civil-military relations and conscription politics.

Antirequisite(s): Credit for Strategic Studies 613 and History 520 will not be allowed.

Strategic Studies 649 3 units; H(3-0)

Special Topics in Military and Strategic Studies
MAY BE REPEATED FOR CREDIT

Strategic Studies 651 3 units; H(3-0)

Reading Seminar
Prerequisite(s): Consent of the Graduate Coordinator.
MAY BE REPEATED FOR CREDIT

Strategic Studies 653 3 units; H(3-0)

Research Seminar
Prerequisite(s): Consent of the Graduate Coordinator.
MAY BE REPEATED FOR CREDIT

Strategic Studies 655 3 units; H(3-0)

(Classics of Strategy
Strategic thought from Sun Tzu to Clausewitz, Mahan to Corbett. Analyzes the writings of classic strategic thinkers and then, by way of case studies, examines their theories as they pertain to military and political planners from the Peloponnesian War to the present.

Strategic Studies 657 3 units; H(3-0)

Intelligence: Information Operations; and "Command, Control, Communications and Computers"
An assessment of the history of intelligence, information operations, and command systems for military and diplomatic institutions as well as contemporary theory and practice related to these issues.

Strategic Studies 659 3 units; H(3-0)

Sea Power
The meaning of sea power and an assessment of how modern states use it. An analysis of the writings of major naval strategic thinkers and case-study examination of the application of those theories from Nelson to the present.

Strategic Studies 662 3 units; H(3S-0)

Advanced Studies in Canadian Arctic Security
The Canadian Arctic is an emerging area of concern due to changes scarcely imaginable even a few years ago. Examines the nature of some of these changes – e.g. climate change and the northern seas' dramatically changing ice conditions, growing recognition of the region's resource wealth, and evolving international relations in the circumpolar region – and what they mean for Canadian Arctic Security.

Strategic Studies 663 3 units; H(3S-0)

Wars – Causes and Aftermaths
An examination of the complexity and experience of conflict and war as well as the broader institutions that govern post-conflict recovery and transition in the twentieth and twenty-first centuries. Special attention will be paid to the methodological complexities of studying violence.

Strategic Studies 751 3 units; H(3-0)

Reading Seminar
Prerequisite(s): Consent of the Graduate Coordinator.
MAY BE REPEATED FOR CREDIT

Research Seminar
Prerequisite(s): Consent of the Graduate Coordinator.
MAY BE REPEATED FOR CREDIT

Strategic Studies 803 3 units; H(3-0)

International Business Regulation
International business regulations are examined, and their impact on a firm's international strategies are analyzed. Exploration of how multinational enterprises must simultaneously adapt to the external/regulatory environments of their home country and multiple host countries.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Strategic Studies 809 3 units; H(3-0)

Cross-Cultural Management
Introduction to the challenges posed by managing in international environments and across cultural boundaries. Emphasis is placed on understanding the nature of cultural differences; the influence of these differences on organizational processes including leadership, teams, communication, ethics and conflict resolution; their impact on human resource practices including staffing and performance management; and implications for those holding international managerial roles.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Antirequisite(s): Credit for Strategy and Global Management 409 and Management Studies 559.26 will not be allowed.

Strategic Studies 813 3 units; H(3-0)

East Asia in the World Economy
Investigation of how firms become international and achieve superior performance in the international business environment, with an emphasis on Asia. Exploration of opportunities and contemporary issues for doing business in the diverse countries of Asia. Similarities and differences in business practices among Asian countries are studied. International business concepts and strategies for doing business in Asia are considered.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Strategic Studies 843 3 units; H(3-0)

Business in BRIC Markets
Introduction to complexities facing multinationals when operating in emerging markets, particularly Brazil, Russia, India and China. Exploration of institutional contexts and consumer cultures in each of the BRIC countries, and the impact of the above on strategy. Comparison of multinationals enterprises from emerging economies versus companies from developed economies, in terms of international strategies, challenges and opportunities.

Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Strategy and Global Management 403 3 units; H(3-0)

Strategy and Global Management 405 3 units; H(3-0)

Strategy and Global Management 407 3 units; H(3-0)

Strategy and Global Management 409 3 units; H(3-0)

Strategy and Global Management 415 3 units; H(3-0)

Strategy and Global Management 453 3 units; H(3-0)

Strategy and Global Management 455 3 units; H(3-0)

Strategy and Global Management 457 3 units; H(3-0)

Strategy and Global Management 459 3 units; H(3-0)

Strategy and Global Management 461 3 units; H(3-0)

Strategy and Global Management 463 3 units; H(3-0)

Strategy and Global Management 465 3 units; H(3-0)

Strategy and Global Management 467 3 units; H(3-0)

Strategy and Global Management 469 3 units; H(3-0)

Strategy and Global Management 471 3 units; H(3-0)

Strategy and Global Management 473 3 units; H(3-0)

Strategy and Global Management 475 3 units; H(3-0)

Strategy and Global Management 477 3 units; H(3-0)

Strategy and Global Management 479 3 units; H(3-0)

Strategy and Global Management 503 3 units; H(3-0)

Strategy and Global Management 505 3 units; H(3-0)

Strategy and Global Management 507 3 units; H(3-0)

Strategy and Global Management 509 3 units; H(3-0)

Strategy and Global Management 511 3 units; H(3-0)

Strategy and Global Management 513 3 units; H(3-0)

Strategy and Global Management 515 3 units; H(3-0)

Strategy and Global Management 517 3 units; H(3-0)

Strategy and Global Management 519 3 units; H(3-0)

Strategy and Global Management 521 3 units; H(3-0)

Strategy and Global Management 523 3 units; H(3-0)

Strategy and Global Management 525 3 units; H(3-0)

Strategy and Global Management 527 3 units; H(3-0)

Strategy and Global Management 529 3 units; H(3-0)
Strategy and Global Management 559 3 units; H(3-0)

Selected Topics in Strategy and Global Management
Examination of selected topics in Strategy and Global Management.
Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents). For certain topics, consent of the Haskayne School of Business will also be required.

Note: For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

MAY BE REPEATED FOR CREDIT

Strategy and Global Management 571 3 units; H(3-0)

Business Under NAFTA
Legal, political, economic and social considerations important to Canadian firms pursuing the US and/or Mexican markets, including the implications of the North American Free Trade Agreement.
Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Strategy and Global Management 573 3 units; H(3-0)

International Strategic Management
A focus on why and how firms internationalize and the strategic challenges facing firms that operate within an international business environment. The course covers key concepts, theories and perspectives in international management. These are critiqued, contextualized and applied to particular firm level cases.
Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Strategy and Global Management 577 3 units; H(3-0)

Co-ordinating Global Business
Applies international business theory to the practical operational challenges faced by international managers with a focus on functional implications throughout the entire value chain of the firm’s cross-border activities.
Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents).

Strategy and Global Management 579 3 units; H(3-0)

Field Investigation in International Business
Research project based on a live “case”. Student groups are presented with a case of a real-world local multinational company facing an international strategy issue, conduct primary and secondary research, analyze impediments, and apply knowledge and skills gained to provide action-able recommendations for managers in charge of international strategy. Final projects may be submitted as IVEY teaching cases in cooperation with interested faculty.
Prerequisite(s): Admission to the Haskayne School of Business and 60 units (10.0 full-course equivalents) including one of Finance 461, Marketing 467, Strategy and Global Management 371, 403, 405, 407, 409, 571, 573, 577 or 579.

Strategy and Global Management 591 3 units; H(3-0)

Advanced Strategic Management Tools
Re-examination of the main tools used in strategy analysis with a unique triple focus on: 1) inclusion only of tools that are actionable and lead to outcomes with clear management implications; 2) critical assessment of the ‘limits’ associated with applying each tool (boundary conditions; weaknesses; danger of wrong interpretation of results; unexpected negative spill-over effects; etc.); and 3) discussion of the most recent insights from the scholarly and practitioner oriented literatures, emphasizing dynamics.
Prerequisite(s): Admission to the Doctor of Business Administration program.

Strategy and Global Management 725 3 units; H(3-0)

Strategic Management II
Prerequisite(s): Strategy and Global Management 601 or consent of the Haskayne School of Business.

Strategy and Global Management 795 3 units; H(3-0)

Qualitative Research in Strategy and Organizations
Processes of collecting, analyzing, and reporting qualitative data, as well as inducing theory from them. Application to the area of Strategy and Organizations is emphasized. Focus on various approaches to qualitative research and on developing competence in conducting it.
Prerequisite(s): Consent of the Haskayne School of Business.

Strategy and Global Management 797 3 units; H(3-0)

Advanced Seminar in Strategy and Global Management
Prerequisite(s): Consent of the Haskayne School of Business.

- 799.02. Corporate and Competitive Strategy
- 799.03. Current Topics in Strategic Management
- 799.04. Business Environment
- 799.05. Interorganizational Relationships: Creating and Managing Strategic Alliances

**Supply Chain Management SCMA**

*Instruction offered by members of the Haskayne School of Business.*

### Senior Courses

**Supply Chain Management 451 3 units; H(3-0)**

**Supply Chain Management Analysis**

Current issues confronting supply chain managers are examined. Topics include contract theory, risk, sustainability and supply chain modelling. The role of supply chain management in the overall strategy and performance of the firm is explored. Students analyze real-world cases and develop suitable solutions to improve supply chain operations.

**Prerequisite(s):** Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391.

**Supply Chain Management 453 3 units; H(3-0)**

(formerly Operations Management 417)

**Procurement Management**

An in-depth analysis of strategic procurement practices for competitive advantage, cost management, contractual negotiations and supplier development. Strategic implications of supply processes, outsourcing, and supplier relations are discussed.

**Prerequisite(s):** Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391.

**Supply Chain Management 455 3 units; H(3-0)**

(formerly Operations Management 417)

**Logistics Management**

Logistics entails some of the major operations of supply chains. The objective of this course is to introduce the general concepts and analytical tools of logistics management from a supply chain perspective.

**Prerequisite(s):** Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391.

**Antirequisite(s):** Credit for Supply Chain Management 455 and Operations Management 559.05 will not be allowed.

**Supply Chain Management 559 3 units; H(3-0)**

**Selected Topics in Supply Chain Management**

Investigation of selected topics in Supply Chain Management.

**Prerequisite(s):** Admission to the Haskayne School of Business, Operations Management 317 and Management Studies 391. For certain topics, consent of the Haskayne School of Business will also be required.

**Note:** For more information on topics and prerequisite requirements, see Class Notes in the Course Search.

MAY BE REPEATED FOR CREDIT

### Sustainability Studies SUST

**Instruction offered by members of the Faculties of Environmental Design and members of other Departments of the University.**

<table>

<th><strong>Credits</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>201 (formerly University 207)</td>
<td>3 units; H(3-0)</td>
</tr>
</tbody>
</table>

**Exploring Sustainability**

Examines principles, practices, obstacles and opportunities pertaining to sustainability. Potential issues to be explored include: Sustainability; Origins, Principles and Practices; Sustainable Development; Planning for Sustainability: The Campus, The City and Beyond; Resource Audits and Sustainability; Corporations and Responsibility; Government and Governance: Climate Change.

<table>
<thead>
<tr>
<th><strong>Sustainability Studies 401</strong></th>
<th><strong>Credits</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>3 units; H(3S-0)</td>
<td></td>
</tr>
</tbody>
</table>

**Sustainability Research Methods**

Understanding sustainability research, research processes, mixed methods, quantitative and qualitative approaches to data collection and analysis, etc. This will help students to identify their research projects and to become well prepared to conduct applied research projects.

**Prerequisite(s):** Sustainability Studies 201 or University 207.

**Antirequisite(s):** Credit for Sustainability Studies 401 and University 401.30 will not be allowed.

<table>
<thead>
<tr>
<th><strong>Sustainability Studies 403</strong></th>
<th><strong>Credits</strong></th>

<td></td>
</tr>
</tbody>
</table>

**Sustainability Research Project**

Students develop applied research projects to engage in experiential learning with partners both on and off-campus.

**Prerequisite(s):** Sustainability Studies 201 or University 207.

**Sustainability Studies 501** 3 units; H(3S-0)

**Capstone in Sustainability Studies**

Emphasizes reflection and integration through experiential learning experiences from research projects and applied problem solving. Students will apply the lessons learned through reflective writing, presentations, case studies, and career goals development.

**Prerequisite(s):** Sustainability Studies 403 and enrolment in the embedded Certificate in Sustainability Studies.

<table>

<tbody>
<tr>
<td>3 units; H(0-6)</td>
<td></td>
</tr>
</tbody>
</table>

**Directed Studies**

Supervised independent study of a specific topic.

**Prerequisite(s):** Consent from the Academic Co-ordinator of Sustainability Studies.

**Note:** Students should contact the Academic Co-ordinator of Sustainability Studies, at least two weeks before the start of classes to arrange an independent study course.

MAY BE REPEATED FOR CREDIT

### Sustainable Energy Development SEDV

**Instruction offered by members of the Faculties of Environmental Design, Law, Schulich School of Engineering and the Haskayne School of Business.**

**Note:** Enrolment is limited to students admitted to the MSc in Sustainable Energy Development program, or approved by the Director of the Sustainable Energy Development Program.

<table>
<thead>
<tr>
<th><strong>Sustainable Energy Development</strong></th>
<th><strong>Credits</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>601</td>
<td>3 units; H(3-0)</td>
</tr>
</tbody>
</table>

**Energy Systems I: Non-Renewable Energy**

Interactions between non-renewable energy resources and the environment; exploration, production and exploitation of energy resources, including conventional and unconventional oil and gas, coal, and nuclear; technical, economic and environmental and policy aspects of production transportation and use of non-renewable energy.

**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program.

**Sustainable Energy Development 603** 3 units; H(3-0)

**Energy Systems II: Renewable Energy**

Renewable energy sources, such as: wind, hydro, solar photovoltaic, solar heat collection, geothermal, biomass, cogeneration; system level physical modelling; steady-state turbine operation; introductory thermodynamics; economic tools, such as levelized cost of energy analysis.

**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program.

**Sustainable Energy Development 605** 3 units; H(3-0)

**Indigenous Peoples and Sustainability in Energy Development**

In-depth analysis of indigenous peoples and ecological sustainability in relation to energy development. Systems ecology, ecological economics, cultural anthropology, Indigenous rights and ethics provide theoretical foundations for sustainable development in global context of indigenous peoples with primary focus on Canadian indigenous peoples. Historical and legal-political context addresses treaties, policy and land-use including duty to consult and accommodate with emphasis on reconciliation.

**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program.

**Sustainable Energy Development 607** 3 units; H(3-0)

**Water Pollution and its Impact on the Energy Sector**

Water pollution, water chemistry, water and wastewater treatment methods, water usage and reuse options, municipal and industrial water treatment, water energy nexus, water requirements and pollution as related to the energy sector.

**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program.

**Sustainable Energy Development 609** 3 units; H(3-0)

**Air Pollution and its Impact on the Energy Sector**

Population growth and energy options; meteorological parameters, physical and chemical properties of the atmosphere; nature of pollutants present: anageneric-made sources; stationary and mobile; generation, methods of control and effects of photochemical smog; global warming; particulates, acid rain gases, carbon monoxide, hydrocarbons and their emission control; pollution monitoring and instrumentation; environmental

#### Capstone Project I: Research Design

Identification of potential capstone project research questions that are anchored in energy, environment and one other aspect of the student’s choice; development of research designs and skills to determine the feasibility of investigating potential research questions, narrowing options, and advancing the best option into a short proposal.

**Prerequisite(s):** Admission to the Sustainable Energy Development Program.

**Antirequisite(s):** Credit for Sustainable Energy Development 640 and 625 will not be allowed.

#### Capstone Project II: Proposal Development

Writing a comprehensive proposal designed to answer a research question. Seeking approval from a supervisor with expertise on the chosen topic, with guidance from the course instructor. Verbally presenting the research question and convincing the audience of its importance. Continuing investigation of the research question with progress reports submitted to both the supervisor and the course instructor.

**Prerequisite(s):** Admission to the Sustainable Energy Development Program and Sustainable Energy Development 640.

**Antirequisite(s):** Credit for Sustainable Energy Development 641 and 625 will not be allowed.

### Tourism Management TOUR

Instruction offered by members of the Haskayne School of Business.
Senior Courses

Tourism Management 309 3 units; H(3-0)
Introduction to Leisure, Tourism and Society
An interdisciplinary introduction to the concepts, methods and practices of leisure, recreation and tourism studies.
Prerequisite(s): Admission to the Haskayne School of Business and 30 units (5.0 full-course equivalents).
Antirequisite(s): Credit for Tourism Management 309 and 409 will not be allowed.

Tourism Management 409 3 units; H(3-0)
Travel and Tourism Management
Economic, social, cultural, political, and technological dimensions of tourism, in particular changing travel markets, industry structure, evolving issues and problems.
Prerequisite(s): 60 units (10.0 full-course equivalents).
Antirequisite(s): Credit for Tourism Management 409 and 309 will not be allowed.
Note: Not available for credit toward the Bachelor of Commerce program. Preference in enrolment is given to students who have declared a Management and Society Minor.

Transportation Studies TRAN

Instruction offered collaboratively by members of the Departments of Economics, Geography, and Political Science in the Faculty of Arts and the Department of Civil Engineering in the Schulich School of Engineering.

Senior Courses

Transportation Studies 301 3 units; H(3-0) (formerly Transportation Science 301)
Transportation Systems and Analysis
An introduction to sources of data and methods of analysis for describing and analyzing transportation systems. Transportation systems will be treated at the municipal, provincial and federal levels and on a modal basis.

Transportation Studies 303 3 units; H(3-0)
Introduction to Transportation Studies
Provides a critical foundation for understanding transportation systems in their modern context, with a particular emphasis on a broad, policy-focused exploration. Topics include the role of various transportation modes in Canada’s development as a nation, the current status of Canadian transportation modes, and challenges facing the transportation system.

Transportation Studies 473 3 units; H(3-2) (formerly Transportation Science 473)
Introduction to Transportation Planning
Goals and objectives of urban and regional transportation planning; the transportation planning process; trip generation, trip distribution, modal split, traffic assignment; transportation surveys and data collection; fundamentals of traffic flow; capacity and level of service; urban transportation technology; computer simulation models of urban transportation; environmental impacts; transportation systems management; energy considerations; pedestrian movement systems; urban goods movement; impact of transportation system on city growth; urban transportation policy and financing in Canada.
Prerequisite(s): Transportation Studies 301 or both Engineering 319 and Civil Engineering 371; or consent of the instructor.

Transportation Studies 499 3 units; H(5-0) (formerly Transportation Science 499)
Group Project in Transportation Issues
Students will work in groups to examine real-world transportation problems identified by the instructor. Methodology will be based on knowledge acquired in Transportation Studies 301.
Prerequisite(s): Transportation Studies 301 and consent of the Program.

Transportation Studies 503 3 units; H(3-2)
Decision Support Systems in Transportation Planning
An exploration of the history of decision support in transportation planning from theory to application, including a critical exploration of the 1980's through to modern spatial and aspatial approaches, with an emphasis on critically understanding the decision-support techniques of modern transportation planning. Students will use modern decision-support software tools.
Prerequisite(s): Transportation Studies 303.

Transportation Studies 511 3 units; H(3-0)
Selected Topics in Transportation Economics
Topics may vary from year-to-year. Provides students with in-depth coverage of transportation issues in a specific sector or region in Canada and relies heavily on microeconomic analysis. Consult the Transportation Studies Program Director for topics available in a given year.
Prerequisite(s): Economics 301, 357 and one of 315 or 395; or consent of the Transportation Studies Director.
MAY BE REPEATED FOR CREDIT

Transportation Studies 513 3 units; H(3-0)
Selected Topics in Transportation Policy
Analysis of government’s role in regulating, financing, and managing transportation infrastructure and operations. Comparison of cases in Asia, North America, and Europe will highlight the challenges and opportunities of making transportation more sustainable. Consult the Transportation Studies Program Director for the topics to be explored in a given year.
Prerequisite(s): Political Science 357, and one of 447 or 451 or consent of the instructor.
MAY BE REPEATED FOR CREDIT

Transportation Studies 599 3 units; H(5-0) (formerly Transportation Science 599)
Independent Research in Transportation Issues
Individual work on an assigned topic concerning a practical transportation issue under the supervision of a faculty member. The project will normally involve a literature review and the application of theoretical analysis to an actual problem encountered by practitioners. Submission and defence of a midterm progress report and a final report are included.
Prerequisite(s): Consent of Program.

University UNIV

Instruction offered by the University and individual Faculties depending on the topic(s) being covered.

Junior Courses

University 201 3 units; H(3-0.5S)
Global Challenges Inquiry I
Students will engage in inquiry-based learning to explore solutions to a complex, socially relevant problem using knowledge, evidence, and methods from multiple disciplines, under the guidance of University of Calgary experts. Examples of problems include poverty, water and food security, child health, racial conflict, and gender discrimination.
Prerequisite(s): Completed fewer than 18 units at the time of registration.
Note: Students with AP or IB credit or in second year may seek consent to enrol from the Director of the College of Discovery, Creativity, and Innovation. A day-long Global Challenges Conference during Block Week is a required component of this course and must be completed to earn a passing grade. The 0.5 seminar hours account for the day-long conference. Because the conference is mandatory, registration in the course is closed the day previous to the conference. Students who have completed more than 18 units at the time of registration may seek consent to enrol.

University 203 3 units; H(3-2.5S)
Global Challenges Inquiry II
Students will continue to engage in inquiry-based learning to explore solutions to a complex, socially relevant problem using knowledge, evidence, and methods from multiple disciplines, under the guidance of University of Calgary experts.
Prerequisite(s): University 201 and completed fewer than 18 units at the time of registration.
Note: Students must register in the same section of 203 in which they were registered in University 201 in the Fall Term. A one-week Global Challenges Conference held during Block Week is a required component of this course and must be completed to earn a passing grade. The 2.5 seminar hours account for the week-long conference. Because the conference is mandatory, registration in the course is closed the day previous to the start of the conference. Students who have completed more than 18 units at the time of registration may seek consent to enrol.

University 205 3 units; H(3-0)
Effective Learning Strategies
Theories, research and practice regarding learning and thinking in adult learners. The importance of metacognition, attention, memory, emotions, motivation and attitudes to learning will be discussed. Students will apply the theory and research to their own learning experiences.
Antirequisite(s): Credit for University 205 and Educational Psychology 205 will not be allowed.

Senior Courses

University 301 3 units; H(3S-0)
The Poisoned Pen
Consideration of poisons from two different perspectives, science and literature. Using a problem-based approach, students will not only learn what makes a poison effective but also the essence of good story-telling.

University 401 3 units; H(3-0)
Topics in Interdisciplinary Studies
The focused examination of a topic from a variety of interdisciplinary perspectives.
MAY BE REPEATED FOR CREDIT
## Courses of Instruction

### University Exchange UNEX

- **Topics in Exchange I**
  - University Exchange 200 3 units; H(3-0)
  - Prerequisite(s): Consent of the student’s faculty.
  - MAY BE REPEATED FOR CREDIT
  - NOT INCLUDED IN GPA

- **Topics in Exchange II**
  - University Exchange 300 3 units; H(3-0)
  - Prerequisite(s): Acceptance into an exchange program.
  - MAY BE REPEATED FOR CREDIT
  - NOT INCLUDED IN GPA

- **Topics in Exchange III**
  - University Exchange 400 3 units; H(3-0)
  - Prerequisite(s): Acceptance into an exchange program.
  - MAY BE REPEATED FOR CREDIT
  - NOT INCLUDED IN GPA

- **Topics in Exchange IV**
  - University Exchange 500 3 units; H(3-0)
  - Prerequisite(s): Acceptance into an exchange program.
  - MAY BE REPEATED FOR CREDIT
  - NOT INCLUDED IN GPA

### Senior Courses

- **Urban Studies UBST**
  - Instruction offered by the Department of Geography in the Faculty of Arts.

#### Junior Course

- **Urban Studies 253** 3 units; H(3-0)
  - (Geography 253)

#### Senior Courses

- **Urban Studies 311** 3 units; H(3-0)
  - **The Gendered City**
    - Introduction to urban gender issues from historical and spatial perspectives. Issues such as the gendering of urban design and planning, daily urban activities, urban labour markets, urban politics, gentrification, suburbanization, and identity construction in urban places are addressed.
  - Prerequisite(s): Urban Studies 253 or Geography 253.
  - MAY BE REPEATED FOR CREDIT

- **Urban Studies 313** 3 units; H(3-3)
  - **The City in Film**
    - Introduction to the representation of cities in film. Theoretical understandings of urban processes are linked to urban experiences as portrayed in urban film. Topics may include changing urban form, suburbanization, economic restructuring, racial conflict, community formation, urban politics, and more. May focus on particular cities around the world.
  - Prerequisite(s): One of Urban Studies 253, Anthropology 379, Geography 253, 351, Sociology 353.

### University 501

- **Experiential Learning**
  - An application of theory in a community or workplace setting.
  - Prerequisite(s): Consent of the Program Coordinator.
  - Note: Consent of the Program Coordinator.
  - MAY BE REPEATED FOR CREDIT

### Urban Studies 500

- **Overseas Field School in Sustainable Urbanism Part I**
  - Field research focusing on urban sustainability themes in regions outside North America. Group travel-study combined with formal instruction and seminars.
  - Prerequisite(s): Consent of the Program Coordinator.

- **Urban Studies 591** 3 units; H(3-3)
  - **Capstone in Urban Studies**
    - Capstone course applying the broad interdisciplinary training of the Urban Studies Program to selected problems in urban studies. Collaborative research and analysis is stressed.
  - Prerequisite(s): 90 units (15.0 full-course equivalents) and admission to the Urban Studies Major or Minor.
Clinical Presentations I
A series of integrated clinical presentations applied to a range of problems faced in veterinary medicine in individuals, groups, and populations of animals. Students develop analytic and non-analytic diagnostic reasoning skills, and use foundational knowledge from discipline courses to help understand clinical presentations.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 335 (3-0)(3 credits)
Animal Behaviour and Welfare
Fundamental concepts of behaviour and welfare are examined. Emphasis is placed on understanding normal animals and abnormal behaviour, and the effects of husbandry practices on behaviour and welfare of production and companion animals. Wildlife behaviour, particularly at the interface with human activities, is addressed. Legislations and societal changes regarding animal welfare are discussed.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 400 (3-0)(3 credits)
Introduction to Nutrition
Presents fundamental concepts pertaining to function, metabolism, requirements, and sources of nutrients and energy for production and companion animals. Feeds and ingredients used in animal diets are also examined.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 345 (3-0)(0.75 credits)
Introduction to Veterinary Medicine
Students explore how people associate with animals, the issues that arise from these associations and the roles that veterinarians play in these contexts. Students observe animals as companions, in sport, for food, and in research. The structure and function of the major livestock industries and the roles that veterinarians occupy within those industries are examined.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 360 (54 hours)(2 credits)
Second Year Curriculum
All courses are compulsory.

Veterinary Medicine 400 (3-0)(3 credits)
Clinical Presentations II
Building on Veterinary Medicine 300, students continue to develop analytic and non-analytic diagnostic reasoning skills. These skills include developing schemata and differential diagnoses lists, making decisions about using appropriate diagnostic tests, interpreting and integrating data from those tests, and using foundational knowledge to diagnose common clinical presentations.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 405 (0-6)(5 credits)
Clinical Skills II
Building on Veterinary Medicine 305, students develop skills in basic surgical principles, clinical examination of relevant body systems, clinical and anatomic pathology, and parasitology. Students also gain hands-on experience in practical clinical intervention, case management, and disease prevention.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 407 (1.5-1.5)(3 credits)
Professional Skills II
Building on Veterinary Medicine 307, professional skills competencies and knowledge are enhanced with additional focus on small business management skills, relationship-centered practice and self-care. Legal issues regarding veterinary practice are discussed. Research and informatics skills are used to identify knowledge gaps, generate testable hypotheses, and design experiments.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 410 (1.5-0)(0.75 credits)
Basic Surgical Principles
A comprehensive introduction to general veterinary surgery principles across species. Provides students with a foundation in the basic principles of veterinary surgery, including principles of surgical planning, techniques, and outcomes.

Veterinary Medicine VETM
Instruction and services offered by the Faculty of Veterinary Medicine.

First Year Curriculum
All courses are compulsory.

Veterinary Medicine 300 (3-0)(3 credits)

Clinical Presentations I
A series of integrated clinical presentations applied to a range of problems faced in veterinary medicine in individuals, groups, and populations of animals. Students develop analytic and non-analytic diagnostic reasoning skills, and use foundational knowledge from discipline courses to help understand clinical presentations.
Prerequisite(s): Consent of the Department.

Veterinary Medicine 305 (0-6)(5 credits)
Clinical Skills I
A series of clinically-oriented learning experiences aimed at developing competence in individual animal and herd physical examinations and reporting. Students develop basic skill sets in clinical intervention, patient management, and disease prevention. Experience is gained in diagnostic procedures.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 307 (1.5-1.5)(3 credits)
Professional Skills I
Professionalism, applied economics and business, clinical communication skills, ethics and jurisprudence, and research in veterinary medicine are explored. Students will begin to formulate competencies in these areas and in stewardship, clinical reasoning and small business management. The concepts of the healthy veterinarian and self-management are introduced.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 320 (1-4)(5 credits)
Anatomy and Histology
Provides a foundation in comparative anatomy of production and companion animals. Histology and embryology are integrated throughout. Guided and task-driven dissections are supplemented with pro-sections of live animals, and medical imagery. Clinically relevant structures and the three-dimensional relationships of organs are emphasized.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 321 (3-0)(3.5 credits)
Physiology
Provides a foundation in fundamental and comparative physiological concepts for each body system. Physiological concepts are reinforced through clinical presentations of production and companion animals. Emphasis placed upon formulating how, and why, a disturbance affecting one particular body system manifests in a particular way.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 322 (3-0)(1.5 credits)

Animal Behaviour and Welfare
Fundamental concepts of behaviour and welfare are examined. Emphasis is placed on understanding normal animals and abnormal behaviour, and the effects of husbandry practices on behaviour and welfare of production and companion animals. Wildlife behaviour, particularly at the interface with human activities, is addressed. Legislations and societal changes regarding animal welfare are discussed.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 323 (3-0)(1.5 credits)

Animals, Health, and Society
Roles of veterinarians in promoting, and contributing to, animal, human and ecosystem health are discussed. Emphasis is placed on determinants of health, and the interactions of animals, humans and the environment. Demonstrates how laws, policies and management decisions are applied to foster healthy animals, ecosystems and human-animal interactions.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 324 (3-0)(1 credit)
Genetics and Molecular Biology
Fundamental concepts of genetics and molecular biology are explored in the context of cellular biology and animal health. Applications of molecular biology tools in veterinary medicine are addressed. Relevant examples from veterinary medicine are used to explain foundation principles.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 342 (3-0)(1.5 credits)
Pathologic Basis of Disease
Morphologic and functional changes in cells, tissues and organs as a result of disease are discussed. Students are introduced to safe, systematic approaches to performing post-mortem examinations and learn to recognize and describe common gross and microscopic lesions using appropriate medical terminology. Emphasis is placed on the understanding of basic disease mechanisms.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 343 (3-0)(1.5 credits)
Immunology
Students will gain a working knowledge of the immune system and its role in health and disease. Emphasis is placed on achieving an understanding of major immunological concepts and vaccinology and their implications in veterinary medicine.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 344 (3-0)(0.75 credits)
Principles of Epidemiology
Introduction to epidemiological concepts including types of epidemiologic studies, measures of disease frequency and association, epidemic and infectious disease dynamics, principles of evidence-based medicine, and the relationships between population and individual animal medicine. Provides foundational skills relevant to population medicine.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 345 (3-0)(0.75 credits)
Introduction to Nutrition
Presents fundamental concepts pertaining to function, metabolism, requirements, and sources of nutrients and energy for production and companion animals. Feeds and ingredients used in animal diets are also examined.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 360 (54 hours)(2 credits)
Second Year Curriculum
All courses are compulsory.

Veterinary Medicine 400 (3-0)(3 credits)
Clinical Presentations II
Building on Veterinary Medicine 300, students continue to develop analytic and non-analytic diagnostic reasoning skills. These skills include developing schemata and differential diagnoses lists, making decisions about using appropriate diagnostic tests, interpreting and integrating data from those tests, and using foundational knowledge to diagnose common clinical presentations.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 405 (0-6)(5 credits)
Clinical Skills II
Building on Veterinary Medicine 305, students develop skills in basic surgical principles, clinical examination of relevant body systems, clinical and anatomic pathology, and parasitology. Students also gain hands-on experience in practical clinical intervention, case management, and disease prevention.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 407 (1.5-1.5)(3 credits)
Professional Skills II
Building on Veterinary Medicine 307, professional skills competencies and knowledge are enhanced with additional focus on small business management skills, relationship-centered practice and self-care. Legal issues regarding veterinary practice are discussed. Research and informatics skills are used to identify knowledge gaps, generate testable hypotheses, and design experiments.
Prerequisite(s): Admission to the Doctor of Veterinary Medicine (DVM) Program.

Veterinary Medicine 410 (1.5-0)(0.75 credits)
Basic Surgical Principles
A comprehensive introduction to general veterinary surgery principles across species. Provides students with a foundation in the basic principles of veterinary surgery, including principles of surgical planning, techniques, and outcomes.
Courses of Instruction

**Veterinary Medicine 420** (3-0)(1.5 credits)

**Health Management**
Building on Veterinary Medicine 344, introduces additional epidemiological concepts used in veterinary medicine. These concepts include appropriate use and choice of diagnostic tests, developing a structured approach for investigating disease outbreaks, exploring strategies and effectiveness for treating and controlling disease, and developing evidence-based practice.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 421** (3-0)(2.25 credits)

**Systemic Pathology**
Building on Veterinary Medicine 342, uses a species-specific approach to review common disease conditions. Students identify and describe common gross and microscopic lesions and formulate a morphologic diagnosis. Disease pathogenesis, tissue sampling, sample submission, and the value of ancillary diagnostic testing, and communicating post-mortem findings are emphasized.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 422** (3-0)(1.5 credits)

**Virology**
Fundamental knowledge on the nature of viruses and prions are imparted through clinical, cellular and molecular analysis of important diseases of animals and, if inter-transmissible, humans. Students learn to develop diagnostic plans and understand principles of laboratory diagnostic testing. Implementation of intervention measures for viral and prion infections and diseases are discussed.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 423** (3-0)(1.5 credits)

**Bacteriology**
Introduction to fundamental principles of bacteriology, and bacterial diseases of domestic animals. Provides an understanding of how bacteria interact with the environment and the animal host, and how bacterial virulence mechanisms lead to animal diseases. Diagnosis of bacterial infections, and matching of appropriate preventative and control measures with different pathogens are discussed.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 424** (3-0)(1.5 credits)

**Parasitology**
Introduction to fundamental principles of parasitism in domestic and wild animals. Emphasis is placed on understanding the occurrence, transmission and impacts of parasites, and diagnosis of parasitic diseases of clinical, trade, and zoonotic importance in North America.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 440** (3-0)(1.5 credits)

**Public Health and Risk Analysis**
The roles of animals as sources of public health hazards and as sentinels for public health risk are examined. Students apply systems thinking to identify how zoonotic diseases and food safety hazards emerge, spread and are controlled. Public health strategies related to veterinary issues are applied to identify options for the prevention and control of hazards and reduction of health risks.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 442** (3-0)(1.5 credits)

**Clinical Pathology**
Students develop a systematic approach to the use, evaluation and correct interpretation of routine clinical pathology tests. Integration of laboratory results with the patient’s clinical presentation is emphasized. Correct interpretation of routine laboratory tests, communication of results, and appropriate integration of lab tests into decision-making in daily practice are covered.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 443** (3-0)(1.5 credits)

**Clinical Pharmacology and Toxicology**
Effective and safe use of drugs in veterinary medicine. Basic principles of pharmacology, including mechanisms of action, for the major drug classes. Clinical toxicology principles that apply to common poisonings and adverse drug reactions.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 444** (3-0)(0.75 credits)

**Diagnostic Imaging**
Introduction to principles and uses of common diagnostic imaging modalities. The theoretical basis behind each imaging technology, the acquisition of quality images, and the ability to interpret and describe normal and abnormal findings are emphasized. Control measures for working safely with diagnostic imaging equipment are examined.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 450** (3-0)(0.75 credits)

**Selected Topics in Areas of Emphasis I**
Students select from two of the Faculty’s four major areas of emphasis: production animal health or equine health.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 451** (3-0)(0.75 credits)

**Selected Topics in Areas of Emphasis II**
Students select from two of the Faculty’s four major areas of emphasis: ecosystem and public health, or investigative medicine.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 461** (27 hours)(0.75 credits)

**Outbreak Investigation**
Building on Veterinary Medicine 420, students further develop the framework for investigating outbreaks of disease. Students investigate a series of simulated outbreaks, applying steps to determine whether an outbreak exists, establishing a case definition, describing the epidemiology of the disease, generating and testing hypotheses, and communicating their findings.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 462** (27 hours)(0.75 credits)

**Field Experiences in Areas of Emphasis**
Students select a field experience in one of the Faculty’s four major areas of emphasis: production animal health, equine health, ecosystem and public health, or investigative medicine.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 500** (3-0)(3 credits)

**Clinical Presentations III**
Building on Veterinary Medicine 300 and 400, students continue their development of diagnostic reasoning skills and problem management in veterinary medicine. Students synthesize comprehensive treatment plans that take into account therapeutic approaches, outcomes, feasibility, economics, client expectations, compliance, public health, regulations, and the environment.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 505** (0-6)(7 credits)

**Clinical Skills III**
Building on Veterinary Medicine 305 and 405, students gain experience in clinical evaluations, routine anaesthesia and surgery. Diagnostic and therapeutic skills, practical clinical intervention, case management, and disease prevention knowledge and skills are further developed.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 507** (1.5-1.5)(3 credits)

**Professional Skills III**
Building on Veterinary Medicine 307 and 407, students participate in a class research project, integrating research, informatics, communication, and clinical skills. Students will develop professional skills necessary for dealing with challenging issues in veterinary medicine. The concept of the healthy veterinarian and self-management will be expanded.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 520** (3-0)(2.25 credits)

**Advanced Health Management**
Provides an overview of diagnosing, managing, and preventing common disorders that occur at a population level. Emphasis is placed upon application of evidence-based medicine to make a herd diagnosis and control, and prevent the problem.
### Courses of Instruction

**Veterinary Medicine 541** (3-0)(1.5 credits)

**Theriogenology**
Provides knowledge and skills to develop clinical competence in managing the reproductive health of production and companion animals. Students integrate knowledge from various disciplines to diagnose and manage clinical issues pertaining to the reproductive health of animals on an individual or herd basis.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 542** (3-0)(0.75 credits)

**Emergency and Critical Care**
Veterinary emergency and critical care, with emphasis on how to recognize and implement therapy in the unstable patient.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 550** (3-0)(0.75 credits)

**Zoological Medicine**
Provides the foundational knowledge needed for diagnosing, treating and preventing common diseases in non-traditional companion animal and wildlife species.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 551** (3-0)(0.75 credits)

**Laboratory Animal Medicine**
Provides an introduction to laboratory animal medicine and disease, roles of the laboratory animal veterinarian and animal care committees, and the involvement of animals in research and teaching.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 561** (27 hours)(1 credit)

**Ecosystem and Public Health Field Course**
Topics include: Research Integrity; Ethics; Grants and Grant Writing; Verbal and Written Communication; Research Findings; Career Development; and Career Options in the Health Sciences. Based on the Canadian Council on Animal Care Syllabus "Basic Principles of Laboratory Animal Biology of Laboratory Animals" and "Principles of Animal Care and Use in Research, Testing and Education." In addition to the study of common, research, farm and exotic animals, topics to be covered include ethical considerations, regulation and legislation, animal models, animal facilities and husbandry, hazard control, surgery, anaesthesiology, euthanasia and post-mortem examinations. Practical sessions will provide experience in handling and restraint of animals.

**Veterinary Medicine 582** (10 weeks)(10 credits)

**Production Animal Health**
Students choose from a variety of rotations that enable concentration within Production Animal Health.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 583** (10 weeks)(10 credits)

**Ecosystem and Public Health**
Students choose from a variety of rotations that enable concentration within Ecosystem and Public Health.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 584** (10 weeks)(10 credits)

**Equine Health**
Students choose from a variety of rotations that enable concentration within Equine Health.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 585** (10 weeks)(10 credits)

**Investigative Medicine**
Students choose from a variety of rotations that enable concentration within Investigative Medicine.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 586** (10 weeks)(10 credits)

**Clinical Enrichment**
Students select elective rotations from a range of practicum experiences in veterinary medicine in order to expand or deepen their knowledge and skills.

**Prerequisite(s):** Admission to the Doctor of Veterinary Medicine (DVM) Program.

**Veterinary Medicine 587** (10 weeks)(10 credits)

**Clinical Enrichment**
Students select elective rotations from a range of practicum experiences in veterinary medicine in order to expand or deepen their knowledge and skills.

**Prerequisite(s):** Consent of the Faculty.

**NOT INCLUDED IN GPA**

**Veterinary Medicine 601** 3 units; H(3-0)

**Professional Skills in Health Science Research**
Enrollment in these courses is not open to DVM students. Please consult the Graduate Studies calendar for additional details and requirements for students in other graduate programs.

**Veterinary Medicine 603** (3 units; H(3-1)

**Biological of Laboratory Animals**

Based on the Canadian Council on Animal Care Syllabus "Basic Principles of Laboratory Animal Science for Research Scientists." In addition to the study of common, research, farm and exotic animals, topics to be covered include ethical considerations, regulation and legislation, animal models, animal facilities and husbandry, hazard control, surgery, anaesthesiology, euthanasia and post-mortem examinations. Practical sessions will provide experience in handling and restraint of animals.
specific laboratory animals, injections, blood collection, anaesthesiology and surgery.

Note: Enrolment in this course is restricted in the first instance to graduate students who will do research utilizing animals.

Veterinary Medicine 605 3 units; H(3-1T) (Community Health Sciences 605)
Introduction to Biostatistical Methods
Analysis and design of research related to biological sciences. Emphasis is placed upon formulating good research questions, evaluating the appropriateness of different statistical methods for analyzing results, and performing and interpreting such statistical analyses. Statistical analyses will be carried out using modern statistical software.
Prerequisite(s): Consent of the Faculty.

Veterinary Medicine 610 3 units; H(3-2T) (Community Health Sciences 610)
Biostatistics I: Essentials of Biostatistics
Introduces the fundamental concepts of summarizing data and statistical inference, including graphical displays, hypothesis testing, p-values, and confidence intervals. Specific topics include comparisons of means and proportions, non-parametric tests, correlation and regression, confounding, sample size determination, and power calculations. Additional topics include a brief introduction to analysis of variance and covariance, logistic regression, and analysis of time-to-event data. Students gain hands-on experience analyzing data using STATA statistical software. Although this course uses STATA exclusively, much of the technical knowledge and some of the computing techniques are applicable to any statistical package.
Prerequisite(s): Admission to the Veterinary Medical Sciences graduate program.

Veterinary Medicine 611 3 units; H(3-2T) (Community Health Sciences 611)
Biostatistics II: Models for Health Outcomes
Extends the fundamental concepts to modelling health outcomes using modern regression analysis techniques. Logistic and linear regressions, and their extensions, are covered in detail. The rationale, formulation, and statistical assumptions underlying each regression technique are discussed. Methods for selecting and assessing models are included. Additional topics include a brief introduction to models used in the analysis of repeated measures, longitudinal studies, and time-to-event data.
Prerequisite(s): Veterinary Medical Sciences 610.

Veterinary Medicine 640 3 units; H(3-2T) (Community Health Sciences 640)
Fundamentals of Epidemiology
Principles and methods of descriptive and analytic epidemiology. Emphasizes the underlying concepts and approaches of epidemiological research and critical appraisal of epidemiologic studies including: observational study designs and their vulnerabilities to bias, measures of frequency and association, basic methods for addressing sampling variability, confounding, and effect modification. Concepts related to causal judgment in epidemiology are also introduced.
Prerequisite(s): Admission to the Veterinary Medical Sciences graduate program or consent of the Faculty.
Corequisite(s): Veterinary Medicine 610.
Note: Not available to Open Studies students.

Veterinary Medicine 690 3 units; H(3-0)
Directed Study
Lectures, seminars, term papers and/or other training directed to one or only a few students in theoretical and/or laboratory methods at the advanced level in veterinary medical sciences. These courses are offered when no other suitable alternatives are available.
Prerequisite(s): Consent of the Faculty.
Note: An approval form may be obtained from the Office of Research and Graduate Education, and must be signed by the VMS Graduate Program Director before a student can register.
MAY BE REPEATED FOR CREDIT

Veterinary Medicine 701 3 units; H(3-0)
Advanced Topics in Reproductive Health
A series of topics, ranging from basic sciences to clinical topics (including ethical issues) to increase awareness and comprehension regarding current issues in reproductive health.
Prerequisite(s): Research interest in reproductive health/reproductive biology. Consent of course coordinator and student’s supervisor, if applicable.

Veterinary Medicine 702 3 units; H(3-0)
Advanced Topics in Stem Cell Biology and Regenerative Medicine
Provides a comprehensive overview of stem cell biology in the context of embryonic development and adult tissue maintenance. Students will gain an appreciation for embryonic versus adult stem cells and how these pluripotent or multipotent cells may be utilized in regenerative medicine (i.e. treatment of congenital defects, diseases or injury).
Prerequisite(s): Students not enrolled in the VMS graduate program will require consent of the instructor.

Veterinary Medicine 721 3 units; H(3-0)
Wildlife Parasitology: Principles and Techniques
Students will learn about the ecology of parasites in wildlife populations with emphasis on impacts of parasitism, invasive species, and conservation issues. This is taught through a series of seminars, critical evaluation and discussion of the literature, and independent and group projects. Laboratory sessions include on parasitology techniques for surveillance and research.
Prerequisite(s): Consent of the instructor.
Note: This course may not be offered every year. Please contact vmgrad@ucalgary.ca for information.

Veterinary Medicine 740 3 units; H(3-2T) (Community Health Sciences 740)
Advanced Epidemiology
An expansion on the understanding of causality and threats to validity in epidemiologic research. The focus will be on the assessment and control of bias, including selection, information and confounding. The concept of effect modification (interaction) will be appraised. Stratified analysis will be considered as a tool for the assessment and control of confounding and effect modification and will be applied to a variety of study designs including case-control, and cohort studies.
Prerequisite(s): Veterinary Medical Sciences 640 or consent of the Faculty.

Women’s Studies WMST

Courses of Instruction

Women’s Studies WMST

Veterinary Science 201 3 units; H(3-0)
Talking Gender and Sexuality
An interdisciplinary and intersectional examination of the social and cultural constructions of gender and sexuality. Uses a series of case studies involving historical events and current affairs to discuss how ideas about gender and sexual identity shape our social systems, cultural expression, and political values. The Canadian context is emphasized.

Senior Courses

Women’s Studies 303 3 units; H(3-0)
Topics in Feminism
Explores key issues in feminist theory and activism, including relevant related issues in gender, sexuality, race and others.
MAY BE REPEATED FOR CREDIT

Women’s Studies 305 3 units; H(3-0)
Topics in Gender and Sexuality
Explores key issues in gender and sexuality studies.
MAY BE REPEATED FOR CREDIT

Women’s Studies 311 3 units; H(3-0)
Theorizing Gender and Sexuality
Explores contemporary approaches to theorizing gender and sexuality, with attention to their historical bases. Includes consideration of feminist, queer, trans, and intersectional theories.

Women’s Studies 315 3 units; H(3-0)
Methods for Gender and Sexuality Research
Explores the scholarly and political implications of engaging in research on gender and sexuality by examining key feminist, queer, trans, and intersectional methods.

Women’s Studies 401 3 units; H(3-0)
Special Topics in Feminist, Gender, and Sexuality Studies
An in-depth exploration of a specific area of research interest in feminist, gender or sexuality studies.
Prerequisite(s): 3 units (0.5 full-course equivalent) in courses labelled Women’s Studies.
MAY BE REPEATED FOR CREDIT

Women’s Studies 405 3 units; H(3S-0)
Praxis Seminar
Reflection upon best practices and theoretical paradigms for feminist, gender, and sexuality activism. Activist/volunteer work, outside of class-time, will be required.
Prerequisite(s): 3 units (0.5 full-course equivalent) in courses labelled Women’s Studies.

Women’s Studies 501 3 units; H(3-0)
Independent Research
Supervised individual study of a special topic. Intended primarily for students in Women’s Studies programs.
Prerequisite(s): Consent of the Department.
Note: Students wishing to register in this class must first consult with the Department, and are
Courses of Instruction

Zoology ZOOL

Instruction offered by members of the Department of Biological Sciences in the Faculty of Science. 
†Limited amounts of non-scheduled class time involvement will be required for these courses.

Junior Course

Zoology 269  
Introduction to Human Anatomy and Physiology
The structure and function of human organ systems with emphasis on homeostasis. 
Prerequisite(s): Biology 30.
Antirequisite(s): Credit for Zoology 269 and any of Biology 305, Medical Science 404, 604, Zoology 461, 463, Kinesiology 259, 260 or 323 will not be allowed.
Note: Open only to students enrolled in the UC-Qatar Nursing program.

Senior Courses

Zoology 401  
(formerly Zoology 375)
An Introduction to Invertebrate Zoology
Natural history and diversity of invertebrates, which include sponges, corals, jellyfish, snails, octopuses, insects, crustaceans, sea stars, and various worms. Emphasis on how free-living and parasitic organisms feed, move, reproduce, and survive in marine, freshwater, and terrestrial habitats. 
Prerequisite(s): Biology 371 or 233

Zoology 403  
(formerly Zoology 379)
An Introduction to Vertebrate Zoology
Systematics, natural history and biology of vertebrates, including fishes, amphibians, reptiles, birds and mammals. Laboratory work will emphasize the identification and morphology of native taxa as well as basic techniques of biological systematics. 
Prerequisite(s): Biology 371 or 233.
Antirequisite(s): Credit for Zoology 403 and either Zoology 477.01 or 477.02 will not be allowed.

Zoology 435  
3 units; H(3-3)
Entomology
Introduction to the insects, with emphasis on diversity, evolution, structure/function relationships, behaviour, and ecology. 
Prerequisite(s): Biology 371.

Zoology 461  
3 units; H(3-3/2)
Animal Physiology I
Study of control mechanisms in nerves, sensory organs, muscles and endocrine glands. 
Prerequisite(s): Biology 331 or Neuroscience 301.
Antirequisite(s): Credit for Zoology 461 and any of Biology 305, Medical Science 404, 604, Zoology 269, Kinesiology 259, 260 or 323 will not be allowed.
Note: Prior completion of Physics 211 or 221; and 223; and Biochemistry 341, 393 or Chemistry 351 is strongly recommended.

Zoology 463  
3 units; H(3-3/2)
Animal Physiology II
Study of body fluids and hemostasis, body defence systems, reproductive physiology, respiration, circulation, excretion, gastrointestinal physiology and thermoregulation. 
Prerequisite(s): Zoology 461.
Antirequisite(s): Credit for Zoology 463 and any of Biology 305, Medical Science 404, 604, Zoology 269, Kinesiology 259, 260 or 323 will not be allowed.

Zoology 507  
3 units; H(0-8) or H(3-0)
Special Problems in Zoology
Independent research, lectures, seminars, term papers and training in theoretical and/or laboratory methods. 
Prerequisite(s): 54 units (9.0 full-course equivalents) and consent of the Department.
Note: Consult the departmental website for registration information.

MAY BE REPEATED FOR CREDIT

Zoology 515  
3 units; H(3-3)
Comparative Vertebrate Anatomy
The structural, functional, developmental and evolutionary relationships of the organs and systems of the vertebrates. Laboratory work will emphasize the dissection, identification and homologies of structures in various vertebrates. 
Prerequisite(s): Zoology 379 or 403.
Antirequisite(s): Credit for Zoology 515 and 377 will not be allowed.

Zoology 528  
6 units; F(0-6)
Independent Studies in Zoology
Original and independent thought, practical research and the completion of written and oral reports. 
Prerequisite(s): Biology 315, 72 units (12.0 full-course equivalents) and consent of the Department. 
Note: Consult the departmental website for registration information.

MAY BE REPEATED FOR CREDIT

Zoology 530  
6 units; F(0-8)
Honours Research Project in Zoology
Research project under the direction of one or more faculty members in the Department of Biological Sciences. Formal written and oral reports must be presented on completion of this course. Open only to Honours Zoology students or Honours Biological Sciences students. 
Prerequisite(s): Biology 315, 72 units (12.0 full-course equivalents) and consent of the Department. 
Note: Consult the departmental website for registration information.

Zoology 567  
3 units; H(3-0)
Animal Behaviour
Offered from an evolutionary and ecological perspective. Development of ethological ideas; interaction of genotype and environment in ontogeny of behaviour; role of behaviour in dealing with environmental challenges. 
Prerequisite(s): Biology 313 and one of Biology 371, Ecology 429, Zoology 375, 377, 401 or 477.
Antirequisite(s): Credit for Zoology 567 and Marine Science 546 will not be allowed.

Zoology 571  
3 units; H(3-2)
Palaeobiology of Vertebrates
Evolutionary trends in the major groups of vertebrates from both neontological and palaeontological viewpoints. The interpretation of palaeontological data and their applicability to our understanding of evolution, systematics and palaeoecology. 
Prerequisite(s): One of Zoology 377, 379 or 403.
Antirequisite(s): Credit for Zoology 571 and either Zoology 571.01 or 571.02 will not be allowed.
Note: Prior completion of Geology 201 or 209 is strongly recommended.

Zoology 575  
3 units; H(3-0)
Advanced Topics in Animal Biology
Prerequisite(s): Biology 313.
MAY BE REPEATED FOR CREDIT

Zoology 576  
(formerly Zoology 475)
The Invertebrates
Collaborative research experience in invertebrate zoology, with emphasis on discovering, describing, and classifying diversity using zoological collections, systematic theory, and phylogenetic methods. 
Prerequisite(s): One of Zoology 375, 401 or 435. 
†Zoology 577  
3 units; H(3-3)
Mammalogy
A detailed examination of the evolution, morphology, physiology, ecology and behaviour of mammals. 
Prerequisite(s): Biology 313 and one of Zoology 379, 463 or 477.01.

Zoology 581  
3 units; H(3-3)
(formerly Zoology 483)
Principles in Parasitism
An introduction to protozoan, helminth, and arthropod parasites of animals; principles of host and parasite adaptations, host defence, disease and epidemiology. A series of web-based laboratory exercises emphasizes morphology, life cycles and systematics of parasites. This course may be delivered via video-broadcasting facilities. 
Prerequisite(s): Cellular, Molecular and Microbial Biology 343 or Zoology 375 or 401.
Zoology 595  3 units; H(3-0)

Evolutionary Perspectives in Neurobiology
Explores form, function and performance of invertebrate and vertebrate neurons and nervous systems through examination of physical, biochemical, metabolic, (neuro)physiological and behavioural constraints and trade-offs.

Prerequisite(s): Zoology 461.
Antirequisite(s): Credit for Zoology 595 and Neuroscience 541 will not be allowed.

Zoology 597  3 units; H(3-0)

Principles of Endocrinology
General and molecular aspects of endocrine physiology. Topics will include the mechanisms of hormone action (receptor occupancy and transduction of signal), current techniques in endocrinology, synthesis and release of hormones, and the functional role of different endocrine organs. Lectures will include examples from lower vertebrates and invertebrates to emphasize comparative aspects.

Prerequisite(s): Zoology 463.

Graduate Course

Zoology 697  3 units; H(3-1T)

Advanced Topics in Comparative Endocrinology
The principles of endocrinology will be provided through the lecture component of Zoology 597, and this will be augmented with additional reading, term papers and seminars in comparative endocrinology.

Prerequisite(s): Zoology 463.
Antirequisite(s): Credit for Zoology 697 and 597 will not be allowed.
About the University of Calgary

The University of Calgary is a co-educational, non-denominational government supported institution possessing the right of conferring degrees, other than degrees in Divinity, within the Province of Alberta. It is a member of the Association of Commonwealth Universities and of Universities Canada.

The University of Calgary is Canada’s leading next-generation university – a living, growing and youthful institution that embraces change and opportunity with a can-do attitude. Located in the nation’s most enterprising city, the university is making tremendous progress on our journey to become one of Canada’s top five research institutions, grounded in innovative learning and teaching and fully integrated with the community of Calgary.

As a comprehensive academic and research institution, the University of Calgary inspires and supports discovery, creativity and innovation across all disciplines. Through the Taylor Institute for Teaching and Learning, the university takes the lead in educational innovation by researching the most effective methods for engaging students, by supporting faculty to be the best teachers they can be and by providing some of the most innovative learning spaces available anywhere in North America.

The University of Calgary attracts and nurtures the talent that drives new knowledge creation, improves lives and better our world. In this rich learning environment, the university serves over 31,000 students in more than 200 undergraduate, graduate and professional degree programs, and provides the community with diverse lifelong learning opportunities. International study, volunteer, work, and research programs provide global context while promoting diversity and excellence in learning, teaching and research.

The University of Calgary stands out among Canadian universities in how it actively engages students in leadership development in all areas – the arts, athletics, science, medicine, engineering, volunteerism and business. It is also a leader in sustainability with its set of values embraced by the campus through teaching, leadership and campus operations.

Research and Education

As a member of the U15 leading research-intensive universities in Canada, the University of Calgary is ranked one of the Top 10 research universities in the country. As a comprehensive research institution, the university houses 73 Canada Research Chairs and more than 50 research institutes and centres working to find solutions to some of the most challenging problems facing society today. It has over 1,800 academic staff actively engaged in research, scholarship and teaching in Canada and around the world.

Innovation, discovery and learning are at the heart of all that we do. Our relentless pursuit of quality in our teaching and research programs is guided by our mission to contribute to the well-being of the people of Alberta, Canada and the world. Research brings significant benefits provincially, nationally and internationally, and is the foundation of Alberta’s economic and social vitality. Interdisciplinary research is core to the university’s teaching and research mandate.

The university offers a high quality undergraduate education that is characterized by the synthesis of research, teaching and learning. We mean to enhance the undergraduate learners’ experience by using a student-centred focus that maximizes opportunities to provide a distinctive learning experience that fully integrates the features of a research university. The university is broadening opportunities for students to take inquiry-based courses that lead to greater critical thinking skills, increased exposure to undergraduate research and greater access to leading edge scholars.

International study, volunteer, work, and research programs give graduates global context while promoting diversity and innovation in teaching and research.

Students at the University of Calgary are officially recognized for their involvement in campus activities outside of the classroom. The co-curricular record is an initiative that encourages and fosters a campus culture of volunteerism and community involvement amongst its students.

The University of Calgary stands out among Canadian universities in how it actively engages students in leadership development in all areas – the arts, athletics, science, medicine, engineering, volunteerism and business. It is also a leader in sustainability – living a set of values embraced by the campus through teaching, leadership, and campus operations.

Our efforts are to raise our global profile, enhance the quality of our undergraduate and graduate programs, promote innovation and excellence in scholarly activity and provide significant returns and tangible benefits to our community and economy.

Facilities

The MacEwan Student Centre, Taylor Family Digital Library, the Taylor Institute for Teaching and Learning serve as hubs of scholarly and leisure activity on main campus. There is also a museum and art gallery, four performance theatres, two childcare centres and residences for single students and students with families. The university recently expanded the Engineering Complex and created new residences.

The Cumming School of Medicine and the Faculty of Veterinary Medicine are located on the south campus adjacent to the Foothills Hospital. Satellite institutes of the university include the Kananaskis Biogeoscience Institute, located a short drive from the city on the eastern slopes of the Rocky Mountains, the Rothney Astrophysical Observatory, located in the foothills south of the city, and a campus in Doha, Qatar, offering internationally accredited nursing degrees to students in the Middle East.

Development of the university’s west campus is currently taking place, and is the site of the Alberta Children’s Hospital.

The University of Calgary features some of the finest athletic facilities in the country. The Olympic Oval is an international speedskating facility and houses the Canadian Sport Institute, a high-performance training centre and two Olympic-sized rinks where the reigning women’s gold-medal hockey team trains. There are also tennis courts, a triple gymnasium, a yoga studio, an Olympic-size swimming pool, weight rooms, logging tracks, an Outdoor Centre offering equipment rentals, courses and instruction, and a huge indoor climbing wall. Nearby is the home of the Dinos football team, McMahon Stadium.

Governance

The University of Calgary has two governing bodies:

- The Board of Governors is the corporate body charged with the management and control of the university, its property, revenue, business and affairs.
- The General Faculties Council (GFC) is responsible for the academic affairs of the university, subject to the authority of the Board of Governors.

Each faculty has a Faculty Council empowered to determine the faculty’s programs of
The University of Calgary combines the best of long-established university traditions with Calgary’s frontier spirit of originality and innovation. Our logo was designed to reflect bold thinking and a connection with the origins of Calgary. The logo has two components: the crest and the wordmark. The crest represents and respects our historical heraldry while the more contemporary wordmark reflects our focus on the future. The university also has an official Coat of Arms, which represents and respects our historical roots. The Coat of Arms consists of a shield, an escroll containing the motto and the wordmark in vertical format. The shield consists of two parts, the upper part (the chief) separated from the lower (the base) by an arched line symbolizing the Chinook arch. The ground colour of the chief is scarlet, commemorating the North West Mounted Police under whose influence Western Canada was settled. Upon this colour is a pair of open books bound in gold. Between the books is a white rose, symbolic of Alberta. The ground colour of the base is gold, indicative of golden sunshine or golden grain. Upon this is a black bull’s head with red horns and crossed staves bearing red flags, reminiscent of the family crest of Lt. Col. J.F. Macleod, the NWMP officer who founded Fort Calgary. Below the shield, printed on an escroll, is the university’s motto, “Mo shuile togam suas” (translated as “I will lift up mine eyes”), rendered in Gaelic uncial letters. The scroll is white; the draped ends are red. They were granted to the university in 1966 by Lord Lyon King of Arms at Edinburgh.

The University of Calgary has an official tartan that incorporates the university’s official colours of red and gold in its design. It was designed by Jim Odell, a University of Calgary Education and Fine Arts graduate and accredited in 2001 ceremony presided over by Duncan Paisley of Westerlea, President of the Scottish Tartans Society and director of the Register of All Publicly Known Tartans.

**Official Colours**

- The university has two official colours: red and gold.

**Tartan**

- The University of Calgary has an official tartan that incorporates the university’s official colours of red and gold in its design. It was designed by Jim Odell, a University of Calgary Education and Fine Arts graduate and accredited in 2001 ceremony presided over by Duncan Paisley of Westerlea, President of the Scottish Tartans Society and director of the Register of All Publicly Known Tartans.

**The Mace**

Certain formal occasions involve the use of special regalia, the significance of which is now symbolic but most of which has practical origins. In early times the mace was used first as a weapon to protect and second as a symbol of authority. The mace carried into Convocation is a symbol of the authority of the Chancellor. It represents the Crown and the authority vested in the Chancellor to grant degrees. It is always carried in front of the Chancellor at Convocation. One interesting tradition in the use of maces is that if the real authority (the Queen) was present in person, the mace would be inverted.

**Administration and Governance**

For information about senior administration and administrative departments, please visit: ucalgary.ca/about/our-organization/governance-and-leadership.

**Historical Highlights**

For more, see: ucalgary.ca/about/our-story/our-history.

1922
- Calgary Normal School (formerly Alberta Normal School) relocates onto the Institute of Technology and Art campus (now SAIT).
1945
- The Normal School becomes a southern extension of the University of Alberta Faculty of Education.
1946
- Citizens form the Calgary University Committee.
1947
- The Calgary Branch of the University of Alberta offers the first two years of a Bachelor of Education degree. A.L. Doucette is appointed the first director. Land is set aside in Hounsfield Heights for an eventual university.
1950
- The Board of Governors at the University of Alberta sells all land south of 24th Avenue because the Calgary Branch of the University of Alberta would never grow large enough to use it.
1951
- First years of the BA and BSc are offered.
1953
- First year of BComm is offered.
1957
- The name changes to University of Calgary (UAC). By now the first years of the BSc (Eng) and BPE are offered.
1958
- Sod-turning for the present campus. The Department of Public Works begins leveling the land.
1960
- The new campus opens with two new buildings, Arts and Science A. McMahon Stadium opens. M.G. Taylor is appointed principal.
1961
- The name changes to University of Alberta, Calgary. The first physical education building opens.
1962
- The 80-acre research park is designated. Campus patrol arrives. Full degree study is offered.
1963
- Students begin a drive for autonomy from the University of Alberta.
1964
- H.S. Armstrong is appointed President. Name changes to University of Alberta at Calgary. The football Dinos begin to play.
1965
- On May 1 UAC is granted academic and financial autonomy. The residence complex, Calgary Hall (now Craigle Hall), Science B and the Meteorological Station are completed. The Faculty of Engineering and the Division of Continuing Education are founded.
1966
- The Universities Act passes, creating the University of Calgary. F.C. Manning is appointed as the first Chair of the Board of Governors. The Senate and School of Social Welfare are established.
1967
- The first convocation is held March 29.
- The first recipient of a degree, Doctor of The University of Calgary, is Lester B. Pearson.
- Faculties of Business and Fine Arts are established.
1969
- A.W.R. Carrothers is named President. School of Nursing is established.
- The Social Sciences Building, Mathematical Sciences Building and Physical Plant open.
1970
- General Faculty Council is renamed General Faculties Council.
- First students are admitted to the Faculty of Medicine.
1971
- Faculty of Environmental Design is established.
- Four year degree programs begin.
- Dinnies Den opens as the first pub on campus.
1974
- W.A. Cochrane is named President.
1975
- Faculty of Law is established.
1976
- Faculty of Arts and Science is divided into the University College and the Faculties of Science, Social Science, and Humanities. Day Care Centre opens. Arc-
1978
• Norman E. Wagner is named President.

1979
• The Canadian Institute of Resources Law is established.

1981
• The University College becomes the Faculty of General Studies.
• The University of Calgary Press is established.

1982
• The University of Calgary is selected as the 1988 Olympic Games venue for the athletes’ village and speed-skating events.

1984
• A $17 million supercomputer is acquired.

1985
• Calgary Hall is re-named Craig Hall in memory of former Vice-President (Academic) Peter Craigie.

1988
• The Winter Olympics come to campus.
• Murray Fraser is named President.

1991
• The university celebrates its 25th anniversary.

1992
• NASA space shuttle Columbia blasts off carrying a University of Calgary science experiment.

1993
• The university raises more than $45 million in its first national fundraising campaign. Students commit $2.2 million to the Building on the Vision campaign.

1994
• The University of Calgary hosts the 1994 Learned Societies Conference in June and welcomes a record 8,100 delegates representing 105 societies and conferences from 24 countries.

1995
• Site dedication ceremony held for the new Rozsa Centre.

1996
• Terry White is appointed President.

1997
• The university launches U of C 101 - a four-day orientation session for new students and the first program of its kind in Canada.

1999
• Largest Information Commons of its kind in North America opens in MacKimmie Library.
• New 400-bed Cascade Hall residence welcomes students.

2001
• Dr. Harvey P. Weingarten is appointed as seventh President and Vice-Chancellor of the University of Calgary.

2003
• The Libin Cardiovascular Institute of Alberta is created with a $15-million gift from the Alvin and Mona Libin Foundation and a $5-million donation by David and Gail O’Brien helped launch a world-class undergraduate educational centre in the Faculty of Medicine.

2004
• Allan Markin, chairman of Canadian Natural Resources, donates $18 million to establish an Institute for Public Health.

2005
• Seymour Schulich donates $25 million to the university’s engineering faculty. The faculty is renamed the Schulich School of Engineering in honour of the donation.

2006
• The university marked its 40th anniversary with a series of celebrations touching on almost every area of the campus community.

2007
• Official opening of a branch campus called University of Calgary-Qatar, will bring state-of-the-art nursing education, in Qatar’s capital city of Doha.

2008
• University of Calgary launches Canada’s fifth veterinary program in the new Faculty of Veterinary Medicine.

2010
• Elizabeth Cannon, Dean of the Schulich School of Engineering, is officially selected as the University of Calgary’s eighth president and vice-chancellor.

2011
• Taylor Family Digital Library (TFDL) opens January 2011.
• The new Energy Environment and Experimental Learning (EEEL) Building opens.

2013
• The Taylor family donates $40 million to establish the Taylor Institute for Teaching and Learning.
• The Faculty of Education is re-named Werklund School of Education in recognition of Dr. David P. Werklund’s $25 million donation.

2014
• The University of Calgary is named the number one university in Canada under the age of 50 and ranked as one of the top ten young international universities.
• The Faculty of Medicine is re-named the Cumming School of Medicine in honour of a $100 million donation from Geoffrey Cumming.

2015
• Two new residences: Aurora Hall (for undergraduate students) and Crowsnest Hall (for graduate students) open on main campus.

2016
• The University of Calgary marked its 50th Anniversary as an autonomous institution.

Research Centres, Groups and Affiliations
The University of Calgary is a comprehensive academic and research institution, with a mission to discover new knowledge and translate our discoveries into applications that provide benefits to our society and global communities. It is the creation of new knowledge in all forms that distinguishes us as a research university. For more information on research at the University of Calgary refer to: ucalgary.ca/research/

Institutional Strategies
Refer to https://www.ucalgary.ca/about/our-strategy for information on the University of Calgary’s institutional vision and strategy. To view the Eyes High document: https://www.ucalgary.ca/about/our-strategy/our-strategies-and-plans.

Alcohol Policy (Use of)
The Use of Alcohol policy deals with the consumption of alcoholic beverages on the campus and at University functions. No one may bring or consume liquor on campus except as permitted under the University’s Institution License from the Alberta Gaming and Liquor Commission. Details regarding the University’s liquor policy may be obtained from Risk Management & Insurance under Policies and Guidelines. See Special Events & Use of Alcohol: ucalgary.ca/riskmgmt/home/policies-procedures-handbooks-legislation/alcohol-policy-use. If there are concerns about student misconduct, please refer to: ucalgary.ca/conduct/.

Smoking Policy
The University strives to provide a safe and healthy work, learning and living environment for all staff, faculty, students and visitors. Smoking is not permitted indoors nor within 7.5 metres of building entrances and air intake vents. Please respect everyone’s right to clean air and a healthy environment. For details see the Smoking Policy at: ucalgary.ca/policies/files/policies/smoking-policy.

Scent-Free Awareness
There is a growing understanding that the health of some people is adversely affected by exposure to scented products. There are members of our community who may not be able to use facilities such as study spaces, libraries, theatres, classrooms, and work spaces due to the presence of scented personal care products. Please see the website ucalgary.ca/safety/indoor for information about the health effects related to scented personal care products and alternatives that you can choose.
Glossary of Terms

The following is a glossary of terms often encountered by students. This list is not intended to be exhaustive.

**Academic Program:** A set of courses, a number of which may be mandatory and of a specialized nature, leading toward a particular degree.

**Academic Year:** Begins on the first day of July and ends the last day in June. The University operates three academic sessions during the year.

**Blended Learning:** A combination of face-to-face and online delivery of material.

**Baccalaureate:** An undergraduate degree awarded by the University upon the successful completion of an academic program. Commonly referred to as a bachelor’s degree.

**Change of Program:** Students in a program may elect to pursue a different program within their Faculty or enter a new program in a different Faculty. A Change of Program may be completed through the online Student Centre via MyUofC.

**Co-operative Education/Internship:** The process of education which formally integrates academic study with work experience in co-operating employer organizations. The following Faculties offer certain programs in Co-op or Internship education: Arts, Haskayne School of Business, Medicine, Schulich School of Engineering and Science.

**Corequisite:** A course the content of which is integrated with that of another course such that the courses must be taken simultaneously.

**Course:** A unit of instruction that will be recorded on the student transcript with a final letter grade. Courses can have different credit or unit values.

**Course Numbering System:** Junior courses - courses numbered from 100-299. Senior courses - courses numbered from 300-599. Courses numbered 600 and above are normally restricted to students completing graduate programs. Normally a "full" course (6 units) is offered for twenty-six weeks; a "half" course (3 units) or less is offered for thirteen weeks.

**Cross-listed Courses:** Courses that are listed under two Departments and can be taken for credit from either Department, but not both. The credit is determined by the student’s registration.

**Deadline:** A date by which specific actions/requirements must be satisfied such as drop/add or fee payment deadline. Deadlines are enforced at the University of Calgary.

**Deferred Final Examinations:** Examinations scheduled by the Registrar for students unable to write regularly scheduled final examinations for reasons of illness, domestic affliction or religious conviction.

**Deferred Term Work:** A temporary extension of time granted at the discretion of Dean of the Faculty offering the course for completion of course requirements. Permission for Deferred Term Work is granted for reasons of illness, domestic affliction or religious conviction.

**Discipline:** A subject of study within a Department or Faculty.

**Elective:** Another word for option. Degree Navigator uses the term elective.

**Field:** A set of courses identifying the main area of study of a degree program.

**Full Course:** A course offered over two consecutive sessions for a total of twenty-six weeks and are equivalent to 6 units. These courses are denoted by an “F” in the Schedule of Classes.

**Full-Course Equivalent (FCE):** In addition to units, degree requirements can be listed in terms of full-course equivalents; most degree programs require 120 units or 20 full-course equivalents. A full-course equivalent may consist of one full course (6 units) or two half courses (3 units each).

**Full-Time Student:** Those students in a degree program who are registered in three or more courses or 9 units each Fall or Winter Term. The minimum for Summer Term is at least two courses or 6 units per Spring or Summer Intersession.

**GPA:** Abbreviation for grade point average.

**Grade Point:** Positive numerical value given to an alphabetical letter grade used in assessment of academic performance such as in the calculation of grade point averages. See “Undergraduate Grading System” in this Calendar for details.

**Half Course:** A course offered over one session for a total of thirteen weeks and is equivalent to 3 units. These courses are denoted by an “H” in the Schedule of Classes.

**Half-Course Equivalent (HCE):** In addition to units, degree requirements can be listed in terms of half-course equivalents; most degree programs require 120 units or 40 half-course equivalents.

**Internship:** See Co-operative Education/Internship above.

**Major:** The primary area of specialization in either a General or Honours program. Details of course and grade point average requirements are given in Faculty program sections of this Calendar.

**Minor:** A secondary area of specialization completed by a student in a subject outside the “Major” area. Minor program requirements are described in Faculty program sections of this Calendar.

**Open Studies:** A student who is permitted to register in credit courses, but who is not admitted to a program leading to a degree or diploma. This has also previously been known as an Unclassified Student.

**Option:** A course, acceptable within the academic program but chosen at the discretion of the student.

**Part-Time Student:** Those students in a degree program who are registered in no more than two courses or 6 units each Fall or Winter Term. For Summer Term it is a maximum of one course or 3 units per Spring or Summer Intersession.

**Prerequisite:** A prior requirement for entry into a course. Where a course is specified as a prerequisite, pass standing in the course is required unless a specific grade is indicated.

**Probation:** A trial period for a student whose registration is subject to academic conditions. Failure to satisfy these conditions may result in the student being required to withdraw from the University.

**Registration:** The selection of courses once a student has been admitted to the University.

**Suspended Program:** A program (major or minor) that is no longer accepting students. It may be going under review and may be permanently terminated.

**Term:** The University offers three terms during the year as follows - Fall Term (13 weeks from September to December), Winter Term (13 weeks from January to April), Summer Term (12 weeks from May to August). The University may also use “session” or “semester” in the same sense.

**Transfer Credit:** Courses completed at other post-secondary institutions and accepted for credit towards a degree program at the University of Calgary.

**Transfer Student:** Transfer students are those who have attended any post-secondary institution.

**Tuition Fees:** Fees paid for enrollment in courses.

**Unclassified Student:** see Open Studies.

**Unit:** A value, or weighting, assigned to a course counting towards a degree or diploma. The term “credit” is also used. In 2007 the University of Calgary implemented a new computer system where the “unit” became the primary measurement of course weighting. Previously, courses were known as Full, Half, Quarter and Eighth Courses. Generally, these were converted as a full course = 6 units, a half course = 3 units, a quarter course = 1.5 units and an eighth course = 0.75 units. There are remnants of this system throughout the Calendar. Most degree programs require 120 units (20 full courses or FCE).

**Visiting Student:** A visiting student is a student who has not been formally admitted to the University but who, as a bonafide student of another accredited degree granting institution, is permitted to take courses for credit at the University of Calgary to be applied to a degree program at the student’s home institution.

**Withdrawal:** The formal procedure, according to regulations laid down by the University, of withdrawing from a course or courses, or from the University.
