A Message from the Dean

As a new academic year begins, I welcome new and returning graduate students to the University of Calgary. You are valued members of our University’s community as students, as researchers and as teachers. Your success – whether in the laboratory, the classroom or the community – is also our success, and we are committed to providing the training and support you need to achieve it. As a vibrant and growing research-intensive institution, the University of Calgary is committed to training the next generation of scholars, practitioners and professionals.

Many resources are available to you during the course of your graduate education. The faculty members in your program, notably your supervisor, should provide mentorship both in the substance of your area of study and in your development as a professional and scholar in your field. The Graduate Students’ Association, the Student Success Centre, the Centre for International Students and Study Abroad, and the Wellness Centre, and the My GradSkills program among others, provide a wide range of services and support for graduate students over the course of their degree programs. I encourage you to familiarize yourself with these resources and make use of the assistance they can provide. The Faculty of Graduate Studies provides leadership and support for excellence in graduate education. We are the faculty of registration for all graduate students; we also set admission and program standards, administer over $30 million annually in financial awards for graduate study, and promote uniform standards of excellence across programs.

You can contact us with questions about registration, fees, and scholarships, or to clarify the regulations contained in this Calendar. Students enrolled in thesis-based programs will complete their degree program by depositing their thesis with us. Please visit our offices (MacKimmie Tower 213) or contact us by telephone (403.220.4938) or e-mail (graduate@ucalgary.ca), and check our website for useful information (http://www.grad.ucalgary.ca/), including especially the Graduate Awards database.

Welcome from the Provost

Welcome to graduate studies at the University of Calgary! On behalf of the university, I offer my congratulations as you embark on the next phase of your academic journey. You are now part of a special and thriving campus community of over 5,800 full- and part-time graduate students in over 45 programs.

The University of Calgary is an institution on the rise, invigorated by our Eyes High vision. This vision defines a path that will see the University of Calgary become a global intellectual hub located in Canada’s most enterprising city. In this spirited, high-quality learning environment graduate students will thrive in programs that are focused and supported. The University of Calgary will celebrate its 50th anniversary in 2016 when we aim to be one of Canada’s top five research universities, fully engaging the communities we both serve and lead.

We are happy you have joined us. Our graduate students play a critical role in advancing the goals of the institution. We highly value graduate student engagement and contributions—and look forward to facilitating your potential while you are here.

Whether you are a returning student or someone who is new to our university, I hope that you will take full advantage of the opportunities offered to support your studies and research. These include the activities and services offered by the university, the Faculty of Graduate Studies, and those offered by the Graduate Students’ Association, who are keenly interested in helping ensure you have a wonderful experience while you are here.

I wish you great success as you work towards the completion of your graduate program, and look forward to meeting you at some point on campus.

Dru Marshall
Provost and Vice-President (Academic)
Message from the GSA President

As the outgoing President and a member of the graduate student community, I would like to welcome you with open arms to the University of Calgary. The Graduate Students’ Association (GSA) offers an abundance of experiences and support for the graduate student to accompany your student journey. I wish you academic success and hope you embrace the campus community and the support that is available to you.

It is an exciting time for the GSA as the association will be welcoming new executive members including a new president. We have worked relentlessly to maintain a high standard of conduct and representation, and look forward to maintaining these standards with the new executive board. It has been an absolute pleasure working with the GSA and representing the graduate student body over my term as president. I strongly encourage students to participate in the graduate student community and remember that the GSA operates for your well-being and altogether benefit. Keep an eye out for the weekly GSA News & Views and the Faculty of Graduate Studies GradPost newsletters for helpful information about services and opportunities throughout your graduate degree. I challenge you to embrace these new opportunities. Try something new by volunteering with the GSA and pursue your passions.

As the University of Calgary moves towards achieving its Eyes High objectives, each of you as graduate students of the University of Calgary play a pivotal role in the University’s goal to be one of the top five research universities in Canada. I look forward to seeing the strides we will make this year towards academic and personal excellence. The GSA knows that this cannot be done alone, and we are here to provide you with resources for academic and holistic support, as listed in the GSA section of the Graduate Calendar.

On behalf of the entire GSA executive, the GRC and all the GSA staff, welcome to the University of Calgary. We hope you have a wonderful and productive year. For more information, please check out our website at: http://www.gsa.ucalgary.ca.

Regards,

Sarah V. Akierman
GSA President 2013-15
Calendar Production

The University of Calgary extends its gratitude to all those dedicated individuals who contributed time and effort towards this Calendar.

Important Notice and Disclaimer
The material and information in this Calendar is compiled from academic and administrative office submissions and are time-sensitive. Every reasonable effort is made to ensure it is correct and accurate at the time of publication, but inaccuracies and errors may occur. If there is an inconsistency or conflict between the general academic regulations and policies published in the Graduate Calendar, and such regulations and policies as established by resolution of a Faculty or of the University General Faculties Council, the regulations and policies version as approved by the Faculty or the University General Faculties Council will prevail.
By the act of registration with the University of Calgary, each student shall be deemed to have agreed to be bound by the regulations and policies of the University and of the program in which that student is enrolled as well as any relevant Faculty policies and regulations.
Students are responsible for familiarizing themselves with the general information, rules and regulations contained in the Calendar, and with the specific information, rules and regulations of the Faculty or Faculties in which they are registered or enrolled or seek registration or enrolment, as well as the specific requirements of each degree, diploma or certificate sought. It is the student's responsibility to ensure that the courses chosen are appropriate to the program and graduation requirements.
Students should note that not every course listed in the Calendar is offered every year, nor does being admitted into a program guarantee space in any given course.
The University of Calgary has the responsibility and reserves the right to make changes in the information contained in the Calendar, in either its printed or electronic form, and will provide as much notice as administratively possible in effecting such change.
The University of Calgary does not accept, and hereby expressly disclaims, any and or all responsibility or liability to any person, persons or group, either direct or indirect, consequential or otherwise, arising out of any one or more of such changes and, specifically, the University hereby disclaims liability to any person who may suffer loss as a result of reliance upon any information contained in this Calendar.
The University of Calgary disclaims all responsibility and liability for loss or damage suffered or incurred by any student or other party as a result of delays in or termination of its services, courses, or classes by reason of force majeure, pandemics, public health emergencies, fire, flood, riots, war, strikes, lock-outs, damage to University property, financial exigency or other events beyond the reasonable control of the University. The University also disclaims any and all liability for damages arising as a result of errors, interruptions or disruptions to operations or connected with its operations or its campuses, arising out of computer failure or non-compliance of its computing systems.
The Graduate Calendar is available online in electronic form on the Faculty of Graduate Studies website at: http://grad.ucalgary.ca/. The online Calendar is the official University Calendar.

Faculty of Graduate Studies General Information
Introduction:
The mission of the Faculty of Graduate Studies at the University of Calgary is to work with graduate programs to aid them in attracting well-prepared students, supporting the students well while they are here, graduating a high percentage of them in reasonable time, and producing graduate degree holders who are well-respected contributors in their fields wherever they are employed. To achieve this, the Faculty works with programs in setting admission standards and program requirements, and in establishing supervisory and examination committees. The Faculty is also closely involved in the administration of over $30 million annually in financial awards for graduate study.
Graduate Students' Association (GSA)

The GSA represents the collective interests of over 6,000 graduate students to the university community, Calgary, and all levels of government. Facilitating a health and dental program, the association is dedicated to enhancing the well-being and student experience of all University of Calgary graduate students. The GSA owns and operates the Last Defence Lounge to enhance and contribute to the greater student experience. Find out more about your GSA at: http://www.gsa.ucalgary.ca.

GSA Membership

Graduate students registered as full- or part-time in the Faculty of Graduate Studies, including students in Credit Certificate and Diploma Programs, are deemed active members. Active members must pay the annual GSA fee becoming members of The Last Defence Lounge. The membership of the GSA consists of active members, affiliate, associate members and honorary members.

University of Calgary in Qatar Graduate Students' Association (UCQ GSA)

The UCQ GSA provides separate membership to, and represents graduate students at the University of Calgary in Qatar (UCQ) campus. UCQ GSA is affiliated with the GSA. The GSA is proud to extend our services, including Departmental Graduate Associations support, representation on University of Calgary committees, and representation in appeals to UCQ graduate students. Please note that although UCQ GSA is affiliated with the GSA, the memberships are separate and differ from other forms of GSA membership, and thus the GSA’s Collective Agreement and bargaining do not extend to UCQ GSA members.

GSA Executive

The affairs of the GSA are managed by an executive body titled the Board of Directors (BoD). This board is elected each spring for a one-year term. The positions include:

President: pres@gsa.ucalgary.ca
VP Academic: vpa@gsa.ucalgary.ca
VP Student Life: vpsl@gsa.ucalgary.ca
VP Finance & Services: vfps@gsa.ucalgary.ca

The five executives and their team of staff and student volunteers support our members and advance the Association goals. According to section D.3 (Graduate Calendar), GSA Executive are released from course, research, and teaching responsibilities in proportion to the expectations of their role with the GSA. As well, GSA Executive can qualify for an extra year of study without penalty (section D.6).

To serve our members, each executive is responsible for specifics aspects of your Associations:

The President is the official spokesperson and chief advocate of the Association. The President is responsible for leading the development and implementation of the GSA's strategic plan. This includes being the graduate students’ representative on the University of Calgary Board of Governors.

The Vice-President Academic is responsible for all academic matters affecting graduate students. This includes advocating the academic interests and concerns of graduate students as well as overseeing Graduate Assistantship (Non-) Teaching GA(N)Ts, GSA Awards, and joint oversight of the Ombudsperson.

The Vice-President External (VPExt) is the chief government relations officer of the Association. The VPExt is responsible for the GSA's government and community engagement. This includes being the graduate students’ representative on the University of Calgary Senate.

The Vice-President Student Life is responsible for all issues and matters relating to Departmental Graduate Student Associations (DGAs), oversight of the GSA's Last Defence Lounge (LDL), the GSA's international students' chair, and all member relations including communication and events.

The Vice-President Finance & Services (VPFPS) is responsible for all GSA services, including oversight of the GSA's Health & Dental plan, the GSA's employer liaison program (ELP), collaboration with My GradSkills and all student workshops; the VPFPS is also responsible for oversight of the GSA's finances including GSA's Quality Money allocation, and emergency student loans.

If you are interested in running for an executive position, visit www.gsa.ucalgary.ca/elections.

Volunteering Opportunities

The GSA offers a variety of opportunities to get involved with the university community. From one-time events to longer volunteer positions, there are many ways you can come out and make a difference. Throughout the year, there are small projects and events that you could help organize. Check out up-to-date opportunities at www.gsa.ucalgary.ca/volunteer or contact vpsl@gsa.ucalgary.ca.

Graduate Representative Council (GRC)

The Graduate Representative Council (GRC) meets regularly throughout the year to review and monitor GSA policies, practices and activities as reported by the BoD at each GRC meeting. In addition, it ratifies the GSA’s annual draft budget. GRC meetings are open to all graduate students to provide opportunity to new and returning graduate students to attend. The GRC recommends students to the University of Calgary Board of Governors to represent their department or college. The GRC is the only council that represents all graduate students, regardless of their department or college.

Departmental Graduate Associations (DGAs)

Through the GSA, each department of the university is able to form a Departmental Graduate Association (DGA). Some of the benefits of joining a DGA are: start-up grants, the ability to apply for group funding, and a discount for DGA functions at The Last Defence Lounge. Many departments already have DGAs and the GSA encourages you to join yours—not only because it allows you to network within your department, but it fosters a stronger sense of community for graduate students. If your department doesn’t have a DGA and you’d like to form one, the process is quite simple: just stop by the GSA main office for more information or visit: http://www.gsa.ucalgary.ca.

Graduate Student Orientation

Graduate Orientation is a free orientation session given for new September and January graduate student registrants. While it is not mandatory, the GSA highly recommends that all new graduate students attend—even if they are University of Calgary undergraduate alumni—in order to learn about the University of Calgary graduate program, the GSA, and countless other services and opportunities provided to graduate students. Plus, it gives graduate students a chance to meet other graduate students. For more information on Graduate Orientation, please visit: http://www.ucalgary.ca/orientation/graduates.

Graduate Student Representation (External and Internal)

GSA representatives, including both the GSA executive and GRC representatives, sit as full voting members on most major committees of the university. As well, graduate students at the University of Calgary belong to provincial and national student organizations, such as the Alberta Graduate Provincial Advocacy Council (GPAC), the Western Canadian Alliance of GSAs (WCA-GSA) and the Graduate Group of 15 (GU15).

The GSA Office and The Last Defence Lounge (LDL)

The GSA main office is located on the second floor of the MacKimmie Tower (MT 214) which houses all of the GSA's operations, including the health and dental plan. The Last Defence Lounge, a members-only lounge to which all members of the university community and their guests are welcome, is located on the third floor of the MacEwan Student Centre. Simply show your UCID to gain access to the lounge. There is no charge for membership. Please note, proof of age ID may also be required. For the latest lounge news, from events to daily specials, visit: http://www.lastdefencelounge.ca.
GSA Health & Dental Plan
The GSA provides its active members with access to a comprehensive extended Health and Dental Plan. Through enrolment in a graduate program at the university and paying of fees, active members are automatically enrolled in the GSA's extended Health & Dental plan. The plan encompasses a wide variety of coverage at competitive rates and allows students to access critical services—from antibiotics and psychiatry to naturopathy and dental work. Details are provided on the GSA website: http://gsa.ucalgary.ca/health.

GSA Services
The GSA provides many key services to graduate students, including the health & dental plan (details above) and access to numerous university services and resources. The GSA is also proud to run the Employer Liaison Program (ELP) to help graduate students attain their desired career goals – whether this means re-entering industry after graduation or continuing on with academe. To contact the ELP Coordinator email: careers@gsa.ucalgary.ca. The University of Calgary also has an Ombudsperson available as a neutral party to help guide students through University of Calgary policy and answer any questions they may have about their rights as students. To contact the University of Calgary Ombudsperson, email: ombuds@ucalgary.ca. Through the GSA, graduate students also have access to GSA bursaries and awards, various academic and professional skills workshops, and much, much more. To access a complete list of GSA services, visit the GSA website.

## Graduate Academic Schedule 2015-2016

Note: For a complete listing of dates applicable to the 2015 Summer Term, please refer to the Faculty of Graduate Studies website: [http://grad.ucalgary.ca/calendar](http://grad.ucalgary.ca/calendar).

### SEPTEMBER, 2015

- **1 Tuesday**: Fall Term begins.
- **1-5 Tuesday-Saturday**: Block Week.
- **5 Saturday**: Last day to withdraw from Fall Term Block Week courses.
- **7 Monday**: Labour Day. No classes. University closed.
- **8 Tuesday**: FALL TERM CLASSES BEGIN.
- **10 Thursday**: Last day to submit Application for Degree for all degrees and diplomas to be conferred at Fall (November) Convocation (see Graduation in Academic Regulations section of this calendar).
- **15 Tuesday**: First day to submit Application for Degree for all degrees and diplomas to be conferred at the Winter (February) 2016 Conferral of Degrees (see Graduation in Academic Regulations section of this calendar).
- **18 Friday**: Last day to drop Fall Term and Fall/Winter Term (Multi-Term) courses, resulting in no academic record.
- **21 Monday**: Last day to add or swap Fall Term or Fall/Winter Term (Multi-Term) courses.
- **21 Monday**: Last day to change registration from audit to credit or credit to audit.

### OCTOBER, 2015

- **3 Monday**: Last day to add or swap Fall Term or Fall/Winter Term (Multi-Term) courses.
- **3 Monday**: Last day to change registration from audit to credit or credit to audit.

### DECEMBER, 2015

- **15 Tuesday**: First day to submit Application for Degree for all degrees and diplomas to be conferred at the Winter (February) 2016 Conferral of Degrees (see Graduation in Academic Regulations section of this calendar).

### JANUARY, 2016

- **18 Friday**: Last day to drop Fall Term and Fall/Winter Term (Multi-Term) courses, resulting in no academic record.
- **18 Friday**: No refunds for Fall Term or Fall/Winter Term (Multi-Term) courses after this date.

### FEBRUARY, 2016

- **21 Monday**: Last day to add or swap Fall Term or Fall/Winter Term (Multi-Term) courses.
- **21 Monday**: Last day to change registration from audit to credit or credit to audit.

# Faculty of Graduate Studies

## Degrees Information

### Summary of Degree Programs

The Faculty of Graduate Studies administers programs leading to the degrees of:

- Doctor of Education (EdD)
- Doctor of Philosophy (PhD)
- Master of Architecture (MArch)
- Master of Arts (MA)
- Master of Biomedical Technology (MBT)
- Master of Business Administration (MBA)
- Master of Communications Studies (MCS)
- Master of Disability and Community Studies (MDCS)
- Master of Counselling (MC)
- Master of Education (MEd)
- Master of Engineering (MEng)
- Master of Environmental Design (MEDes)
- Master of Fine Arts (MFA)
- Master of Geographic Information Systems (MGIS)

### Combined Degree Programs

The Faculty of Graduate Studies has approved guidelines for Combined Degree Programs. A Combined Degree Program is a formal arrangement between two units offering programs whereby students may be registered simultaneously in two graduate programs (or in one master's program and one professional program such as JD or MD degrees) that normally admit students with undergraduate degrees. The University of Calgary presently offers the following combined degree programs: JD/MBA, JD/MPP, MBA/MPP, MBA/MSc, MBA/MMF, MBA/MD, MBA/MD/MSc, MBT/MBA, MSc/MMF, MBA/MD. The University of Calgary also provides opportunities for excellent doctoral students to undertake doctoral studies in collaboration with other universities nationally and internationally through the Doctoral Cotutelle Program. A doctoral cotutelle is a PhD degree designed, supervised, and examined by faculty from two universities and jointly awarded by both universities. Visit http://grad.ucalgary.ca/prospective/graduate-programs/cotutelle for more information.

Information and application packages are available from the relevant graduate programs.
Leaders In Medicine

The Leaders in Medicine program at the University of Calgary offers students the opportunity to earn simultaneously both a Doctor of Medicine (MD) degree and a graduate degree (PhD, MSc, MA, MBA, etc.). The objective of Leaders in Medicine is to train clinicians for a diverse range of careers ranging from academic medical research to the design, management and implementation of health care delivery systems. Individuals trained in Leaders in Medicine can expect to develop a unique academic approach to their clinical experiences as well as bring a clinical perspective to their research.

Students in Leaders in Medicine will be jointly enrolled in the MD program and in any of the graduate programs offered by the Faculty of Graduate Studies. Although the most common graduate programs participating in Leaders in Medicine are the eight offered by the Cumming School of Medicine (Biochemistry and Molecular Biology; Cardiovascular/Respiratory Sciences; Community Health Sciences; Gastrointestinal Sciences; Immunology; Medical Science; Microbiology and Infectious Diseases; Neuroscience), students from other programs, including Philosophy and Engineering, have taken part.

Students wishing to apply to Leaders in Medicine should have an excellent academic record and strong motivation towards a career in academic medicine. Previous research experience is highly desirable. Applicants must apply separately to the Cumming School of Medicine for the MD program and to the selected graduate program in the Faculty of Graduate Studies, and be recommended for admission by each program. Prospective applicants must also complete a supplemental application for the Leaders in Medicine program. Forms may be obtained from the Graduate Sciences Education Office (Cumming School of Medicine). Students normally apply for the combined degree program during the first two years of either the MD or the graduate program. Expected completion time is five years for the MD/Masters programs and seven years for MD/PhD programs. Maximum completion time is six years for the MD/Masters program and eight years for the MD/PhD program.

For more information, contact:
Leaders in Medicine, Health Sciences Centre, Room G321
Telephone: 403.210.9572
Fax: 403.210.8109
Email: mdgrad@ucalgary.ca
or visit the website: http://www.ucalgary.ca/jointMDPhD

Master of Social Work/Master of Business Administration (MSW/MBA)
The Master of Social Work/Master of Business Administration (MSW/MBA) program is designed to prepare students for competent and visionary management of human service organizations. This program is available only to full-time, course-based Master’s students in the Leadership in the Human Services specialization in the Faculty of Social Work. The combined program shortens the time for completion of the two degrees from three academic years to two 12-month years. See the program descriptions for the Faculty of Social Work and the Haskayne School of Business for further information.

Master of Biomedical Technology/Master of Business Administration (MBT/MBA)
The Master of Biomedical Technology/Master of Business Administration (MBT/MBA) program provides students with managerial skills as well as essential scientific skills and competencies for successful careers in biotechnology business. The combined degree program is targeted at graduate students who are interested in a dual skill set to prepare them for biotechnology jobs in industry, research and government at all levels from the bench to the boardroom. The combined degree allows students to obtain both degrees in a shorter time frame than would be possible taking each degree separately. See the program descriptions for the Master of Biomedical Technology program and the Haskayne School of Business for further information.

Juris Doctor/Master of Business Administration (JD/MBA)
The Juris Doctor/Master of Business Administration (JD/MBA) program enables students to complete an undergraduate degree in law while studying for a graduate degree in business. This program is open only to students enrolled in the Haskayne MBA program as full-time students. See the program descriptions for the Faculty of Law and the Haskayne School of Business for further information.

Juris Doctor/Master of Public Policy (JD/MPP)
The JD/MPP program is normally restricted to full-time study. It allows students to obtain both degrees in a significantly shorter time frame than if they are taken separately. Please consult the Public Policy program or the Law Program for more information.

Master of Business Administration/Master of Public Policy (MBA/MPP)
Students admitted to the MBA/MPP will focus on courses for the MBA during the first year and on MPP courses in year two. Typically, the remaining courses required will be completed in the first term of year three. Please consult the MBA Admissions Officer or the Public Policy Program Manager for more information.

Interdisciplinarity at University of Calgary

Interdisciplinary Specializations
Most graduate programs include some interdisciplinary work. The following interdisciplinary specializations have been formalized by the programs involved to facilitate the study and research capability:
Admissions

There is no general right of admission to Graduate Programs. Each department determines whether to recommend to the Faculty of Graduate Studies the admission of a particular applicant based not only on the applicant’s credentials but also on the availability of resources for supervision and research, departmental research objectives, program balance, and other such considerations. Admissions decisions are not subject to appeal.

A.1 Qualifications

Applicants must hold or obtain the following minimum qualifications before the Faculty will give consideration to admission:

1. A four-year baccalaureate degree or its equivalent from a recognized institution. Degrees and grades from foreign institutions are evaluated for their equivalency to those of the University of Calgary. A grade point average equivalent to 3.00 or better (on the University of Calgary four-point system) is required. This is based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents). Senior-level courses of appropriate content for the graduate program applied for and any graduate work may also be considered. Individual graduate programs may require a higher admission grade point average, which is set out in their calendar entries.

Admission requirements vary depending on the country where previous undergraduate and/or graduate degrees were earned. Visit International Admissions Requirements at http://grad.ucalgary.ca/prospective/international-students for further information on specific degree and grade point average requirements for the country where you earned your degree.

In most cases, a master’s degree or equivalent is required for admission to a doctoral program. See program listings for exceptions and details.

Note: In exceptional circumstances, individuals who do not meet formal academic requirements but who have significant life achievements may be considered for admission to some graduate programs. The candidate must provide the relevant graduate program with evidence demonstrating a potential to undertake successfully the proposed program of studies. Such candidates are advised to make early contact with the graduate program. In all such cases, the decision whether or not to admit rests with the Dean of the Faculty of Graduate Studies.

2. Proficiency in the English language is essential for the pursuit and successful completion of graduate programs at the University of Calgary. Prior to admission to the Faculty of Graduate Studies, an applicant whose primary language is not English may fulfill the English language proficiency requirement in one of the following ways:

a) By writing the Test of English as a Foreign Language (TOEFL) and obtaining a score of at least 550 (paper-based test) or 80 (Internet-based test)\(^1\). When requesting that official test results are forwarded to the University of Calgary, indicate the institution code 0813 and the code appropriate to the graduate program, as listed on the TOEFL web site.

b) By writing the Academic version of the International English Language Testing System (IELTS) and obtaining a minimum score of 7.0.

c) By writing the Michigan English Language Battery (MELAB) test and obtaining a minimum score of 80. The MELAB test includes a written composition, a listening test, and a test of grammar, vocabulary, and reading comprehension. An optional speaking test is also available. For information, visit www.cambridgemicigan.org/test-takers/tests/melab/.

d) By successfully completing the Tier 3 of the University of Calgary English for Academic Purposes (EAP) program and achieving a minimum grade of “B” in the EAP Tier 3 Academic Writing & Grammar and a minimum grade of “C” in both EAP Tier 3 Reading Comprehension & Proficiency and EAP Tier 3 Listening Comprehension & Oral Fluency. For information, see http://werkund.ucalgary.ca/ftp/.

e) By completing the Pearson Test of English (PTE) and obtaining a score of at least 59\(^1\). The department or graduate program may waive the English proficiency-testing requirement in certain circumstances, such as the possession of a baccalaureate degree or its academic equivalent from a recognized institution in which the language of instruction is English. Contact the graduate program to which you plan to apply for further information.

Students who do not meet admission standards and wish to pursue graduate work are advised to enrol in the equivalent of a full year (a minimum of graded 18 units or 3.0 full-course equivalents) at the senior undergraduate level in order to improve their academic record to acceptable admission standards (a grade of “B” or higher in every course). Students are advised to discuss this option with the appropriate graduate program before embarking on such a course. All such courses represent “make-up” work and cannot be used for advanced credit towards a graduate degree program. Successful completion of “make-up” work does not guarantee admission to a graduate program.

\(^1\)Some programs require scores higher than the Faculty of Graduate Studies minima. See program listings for specific details.

A.2 Application for Admission

Applications for admission to the Faculty should be submitted through the online application system at www.grad.ucalgary.ca.

No assurance can be given that applications received after the deadlines noted in the “Application Deadline” section of the appropriate program section of this Calendar will be processed in time to permit the applicant to register for the following session. Specific instructions for applicants are included with the application.

All applications to the Faculty of Graduate Studies of the University of Calgary must include the following:

a) A non-refundable application fee (http://grad.ucalgary.ca/prospective/admissions/application-fee) for each application to a graduate degree program. $100 for Canadian citizens or Permanent Residents, $130 for international students with a study permit.

b) Official transcripts from all post-secondary institutions you have attended. Original documents or certified true copies of each of your official transcripts and degree certificates, in the original sealed envelope, sent directly from the issuing University.

If original documents are not in English:

Original documents or certified true copies of each of your official transcripts and degree certificates in the original language, in the original sealed envelope, sent directly from the issuing University, and an English translation from the issuing University or a notarized word-for-word English translation of a duplicate copy of that original.

c) Official TOEFL, IELTS, PTE, MELAB, GMAT, GRE scores and/or other requirements of the program for which application is being made.

Please see program entries in this Calendar for any additional program requirements, including details on reference letters.

Normally, an appropriate letter of recommendation is one written by an independent individual who can provide an assessment of the applicant’s background and capabilities with respect to the prospective program. Letters from friends, family members, colleagues, people currently registered in a graduate degree program, or general reference letters that are not written in support of the person’s application to the particular graduate program are not acceptable. An applicant currently registered in a graduate degree program, or who has recently

Admissions

completed a graduate degree program, will normally submit one letter of reference from his/her program supervisor. Unless the applicant has been out of school for more than four years, at least one letter, and preferably both, should be by an academic. A reference from a non-academic source should come from a person who has had direct supervisory experience of the applicant.

All graduate programs have limited enrolment capacities. Meeting the minimum requirements does not guarantee admission. If at any time it is discovered that a student was admitted on the basis of falsified documents or information, the admission will immediately be declared null and void and future admission will be denied.

Note: Advanced credit must be requested at the time of application for admission. See A.6 Advanced Credit.

Students will not normally be permitted to register in a University of Calgary degree or diploma program while simultaneously working toward another degree or diploma at the University of Calgary or at another institution. Joint degree programs and cotutelle admissions are an exception to this regulation.

A.3 Admission Categories

Graduate students are admitted to the Faculty in one of the following categories:

Regular

Students may be admitted to a program leading to the master’s or doctoral degree, provided admission qualifications are met.

Interdisciplinary Degree

The Interdisciplinary Degree allows a qualified graduate student to pursue thesis-based research (Master’s, PhD) in an area that does not fit the traditional disciplinary requirements of only one graduate program. The requirements for the student’s program are individually tailored to meet his/her research interests. Research is carried out under the direction and guidance of a Supervisor, Co-Supervisor and Supervisory Committee whose research expertise is relevant to the disciplinary areas. The student should submit an application form and fee, along with official transcripts and letters of reference to the intended home graduate program. The application should meet the minimum Faculty of Graduate Studies requirements for admission. The prospective home program will work with the conjoint program to establish coursework and candidacy examination requirements. Parchments for the Interdisciplinary Degree will identify both the home and conjoint programs. Contact the prospective home graduate program for further details.

Cotutelle

Website: http://grad.ucalgary.ca/prospective/graduate-programs/cotutelle

A doctoral cotutelle is a single PhD degree jointly awarded by two universities with a transcript and parchment from each. It is designed, supervised and examined by faculty from both universities. Applicants must normally meet the PhD requirements of both universities. An agreed plan of study and support must be established at the outset. The primary institution may be University of Calgary or another partner institution. Cotutelle admission may be approved at the beginning of the degree or by transfer in the first two years of an existing PhD program.

Qualifying

A student who meets the qualifications for admission but lacks the necessary background for a graduate program in a chosen area of specialization may be admitted as a qualifying graduate student. A qualifying student is required to take more courses in a degree program than a regular graduate student. Upon satisfactory completion of a qualifying term or year, the student may be transferred to regular student status. Qualifying graduate students must be full-time registrants in either a master’s or a doctoral degree program. Qualifying status will not be granted for a period exceeding one year. A qualifying student in a thesis-based degree program will be assessed program fees during their qualifying term or year. Upon transfer to regular student status, program fees are assessed again. Note that time spent as a qualifying student does not count as time in the degree program and does not make the student eligible for assessment of continuing fees (see C.2 Tuition Fees). A qualifying student in a course-based program will pay tuition fees for the extra required courses on a per-course basis.

Conditional Admission for Language Upgrading

An international student may be offered admission into a graduate program conditional on successful completion of the English for Academic Purposes (EAP) program. In order to be admitted, the student must successfully complete Tier 3 of the EAP program by achieving a grade of “B” or higher in EAP 190 and a grade of “C” or better in all other EAP courses. Programs may require a higher level of achievement, which will be set out in the letter of conditional admission. Eligible students who are offered conditional admission must complete the EAP program within one year; after this time the conditional offer of admission is revoked.

Visiting

A student who is registered in a graduate degree program at another university that does not have an exchange agreement with the University of Calgary, and who wishes to engage in course work and/or research at the graduate level at the University of Calgary for credit at his/her home university, may be admitted as a visiting graduate student. A visiting student must submit a completed Visiting Student Application form, available at www.grad.ucalgary.ca/prospective, and the application fee. Visiting students pay all applicable general and tuition fees. Visiting students are normally permitted to spend a maximum of one year at the University of Calgary. It should be noted that admission as a visiting student does not guarantee later admission to a graduate program at the University of Calgary.

Exchange

General

The University of Calgary has reciprocal exchange agreements with other institutions. Graduate students from these institutions may engage in course or research work at the University of Calgary for credit at the home institution. Note that students with practicum requirements may not be eligible to apply for an exchange.

An exchange student must submit the appropriate application/approval form (http://grad.ucalgary.ca/current/managing-my-program/studying-at-another-university). An exchange student pays tuition fees at the home institution when this is written into the specific exchange agreement, and applicable general fees at the University of Calgary. If there is no reciprocal fee agreement, the exchange student pays applicable tuition and general fees at the University of Calgary. Exchange student status does not guarantee admission to graduate programs at the University of Calgary. An exchange student who wishes to apply to a graduate program at the University of Calgary must do so in the usual manner.

Western Deans’ Agreement

A graduate student registered in the Faculty of Graduate Studies at one university may apply for student status at a university covered under the Western Deans’ Agreement by completing the appropriate application which requires approval of the Graduate Program Director, and the Faculty of Graduate Studies at both the student’s home and host universities. See the Faculty of Graduate Studies website for a list of universities covered by The Western Deans’ Agreement.

Applications should be received in the Faculty of Graduate Studies at the host institution three months before the beginning of the term at the University of Calgary.

The student pays tuition and general fees at the home university and applicable general fees at the host institution.

The student is responsible for arranging for an official transcript to be sent from the host institution to the home institution when the course(s) has been completed.

Each home institution has regulations regarding the maximum number of transfer credits permitted. Further information is available at http://grad.ucalgary.ca/current/managing-my-program/studying-at-another-university/western-deans.

Canadian Graduate Student Research Mobility Agreement

The Canadian Graduate Student Mobility Agreement, initiated by the Canadian Association of Graduate Schools (CAGS), encourages graduate student mobility within Canada in order to foster the exchange of ideas, specialized training, research collaboration, and interdisciplinary. Graduate
students, who must be registered full-time and paying fees at a participating home university, may register as "visiting graduate research students" at another participating university. No tuition fees will be charged to visiting graduate research students under this agreement provided they are not taking courses at the host institution. Incidental fees may be charged. A faculty member at the host institution must agree to supervise and take responsibility for the visiting graduate research student during his/her stay. It is recognized that it is the responsibility of the visiting student to find a supervisor at the host institution.

For further information, see the Faculty of Graduate Studies website at http://grad.ucalgary.ca/current/managing-my-program/studying-at-another-university/cags.

A.4 Retention of Student Records
Graduate student files are kept electronically in the Faculty of Graduate Studies. All application documents submitted to the Faculty of Graduate Studies become the property of the University of Calgary and cannot be returned to the student.

When applying for admission to another program, an applicant who completed a graduate degree from the University of Calgary must submit original transcripts of post-secondary education institutions attended as required by the program or the Faculty of Graduate Studies, and appropriate letters of reference as required by the program.

A.5 Offer of Admission
An offer of admission to a graduate program shall specify the program to which the student is admitted in terms of available programs as specified in this Calendar. Any more detailed terms of admission applying to a particular offer shall be specified in the offer. Graduate programs will supply a program specification including the terms of admission to the Faculty of Graduate Studies when recommending that a student be admitted or admitting on behalf of the Faculty of Graduate Studies, and will ensure that copies of any documents cited in the specification are lodged with the Faculty of Graduate Studies.

The program specification shall include any full-time requirements, and other relevant program components. It shall also include any offer of funding and any conditions related to that funding, from the program.

An offer of admission to a prospective student who will attend for a qualifying year must include the courses the prospective student is expected to take to upgrade his or her background to enter the program proper. The offer must include the information that these courses, and the tuition paid during the qualifying year, will not count toward the degree program. No fee credit is given for courses that are taken as a qualifying student.

A student may request that the graduate program defer admission for up to one full year. Deferral is not automatic, and terms of the offer of admission may change. The request must be endorsed by the Graduate Program Director, and the prospective supervisor, where applicable.

If, during a student’s program, a change in the program is mutually agreed upon by the student and the graduate program, the program may be changed from that specified as part of the offer of admission, but such variation will not come into effect until it is approved by the Faculty of Graduate Studies. The Change of Program or Status form must be completed and submitted to the Faculty of Graduate Studies for approval (http://grad.ucalgary.ca/current/managing-my-program/registration).

A.6 Advanced Credit
Courses for which advanced credit is being sought must be from a recognized institution and not have been used for any degree or diploma accreditation. They must be graded, graduate-level courses, and the graded level of performance must be equivalent to a "B" grade or higher standing at the University of Calgary.

Advanced credit is not normally given for courses taken more than five years before admission to the current graduate degree program or for courses taken for the purposes of qualifying for admission.

Course-based programs: The student must request advanced credit in writing at the time of application for admission. This request must be endorsed by the Graduate Program Director and submitted to the Faculty of Graduate Studies with the admission recommendation. The total of advanced credit and transfer credit may not exceed either one-third of the program or 12 units (two full-course equivalents), whichever is less.

Thesis-based programs: Application for credit should be made to the graduate program at the time of admission, so that the graduate program can take previous work into account when specifying a student’s program.

A.7 Readmission
A student who withdrew or was withdrawn from program and wishes to be readmitted to the program must apply for readmission to the graduate program, with submission of official transcripts for any academic work done since departure and a fee of $180. If readmission is granted, program requirements and completion time will be stipulated in the offer of readmission. Assessment of requirements for degree completion will take into consideration the relevance of work completed during the initial registration and current program requirements.

A fee assessment, taking into account the completed and remaining requirements and time in the student’s program, will be made as part of the offer of readmission. Unless a student’s registration is active, the student may not participate in University activities towards a degree such as attendance in a course, conducting research in a laboratory, teaching and receiving paid support.

A.8 Reactivation
A student who has been withdrawn for failure to register and who wishes to reactivate his/her registration, must submit a Faculty of Graduate Studies Application for Reactivation of Registration (http://grad.ucalgary.ca/current/managing-my-program/registration) and a $180 fee. The student’s supervisor and Graduate Program Director must sign the registration form, indicating their willingness to reinstate the student. Reactivation may only take place within four months of the student’s annual registration month, and the student will be responsible for fees for the entire term. If the student wishes to return to program after the four-month period has passed, the student must apply for readmission for the next session to which the program will admit students (see A.7 Readmission). Unless a student’s registration is active, the student may not participate in University activities towards a degree such as attendance in a course, conducting research in a laboratory, teaching and receiving paid support.
Awards and Financial Assistance for Graduate Students

The University of Calgary is very proud of its graduate student awards program. In addition to recognizing academic achievement, scholarships are important in helping to bridge the gap between the rising cost of attending university and limited student income. Attracting top national and international students to the University of Calgary continues to be a very high priority.

We are extremely pleased that our donors share our commitment to graduate student awards, and we appreciate the financial support offered by all of our valued donors.

Full-time students registered in a graduate degree program at the University of Calgary are eligible for awards and financial assistance.

Scholarship information, application forms and instructions are found on the graduate award website and through the searchable awards database at http://grad.ucalgary.ca/awards.

Additional information is available from your program. Because the award list is published a considerable time before the opening of the session, the university reserves the right to make whatever changes circumstances may require, including cancellation or addition of particular awards.

B.1 University Assistantships

University graduate assistantships are governed by the Collective Agreement between the Governors of the University of Calgary and the Graduate Students’ Association. Each year teaching units have varying numbers of graduate assistantships available to be awarded on the basis of merit. Students interested in such appointments should contact their graduate program administrator for information about eligibility, application deadlines and procedures. The stipends indicated are subject to change without notice. Appointments are available from most units in which graduate programs are offered. Categories of appointment include Graduate Assistantships (Teaching and Non-Teaching).

Graduate Assistantships (GA, Teaching/Non-teaching)

A Graduate Assistantship (Teaching) is an appointment made to assist with the instructional responsibilities of departments or faculties. Graduate Assistantships (Non-Teaching) is an appointment made to assist with the instructional responsibilities of departments or faculties. GA(NT) is appointed to provide teaching or instructional service, which might encompass lecturing assistance, laboratory supervision, office hours, grading assignments, tutorial direction, assistance in preparation of demonstration and instructional aids, and other related academic duties.

A Graduate Assistantship (Non-Teaching) is an appointment made to assist departments and/or professors with non-teaching responsibilities. The duties of a GA(NT) may include, for example, collecting research data, interviewing research subjects, bibliographic work or general research services. Remuneration paid to graduate assistants must comply with the Collective Agreement or the regulations of the agency providing the funds. The stipend is listed in the Collective Agreement.

Research Assistantships (Scholarship)

A graduate student employed as a research assistant builds academic experience by assisting with a research project, with duties similar to those described above for a Graduate Assistantship (Non-Teaching). Research assistant appointments are funded from the research support accounts for university faculty who select and recommend graduate students for such appointments. The stipends vary. This type of support is arranged directly between graduate students and their prospective supervisors.

B.2 Project Employment

This is funded from a research account to provide a direct service in connection with a faculty member’s research. This research is normally not related to the student’s program or area of research. The service provided is normally supervised by someone other than the student’s supervisor and is treated as regular employment.

B.3 Sessional Instructorships

A department or faculty may appoint a graduate student as a sessional instructor to teach a course as Instructor of Record. Sessional instructor appointments are Term Certain Appointments covered under the Collective Agreement between the Governors of the University of Calgary and the University of Calgary Faculty Association (http://www.ucalgary.ca/hr/). Normally, a student may not be a sessional instructor for more than one 3 unit or 6 unit course (one half course or one full course) at any one time.

B.4 Faculty of Graduate Studies Scholarships (FGSS)

To be eligible for a Faculty of Graduate Studies scholarship, students must be registered full-time in the Faculty of Graduate Studies in a thesis program at the University of Calgary. Graduate programs allocate these awards, and students should check with the program administrator for application procedures.

B.5 Graduate Students’ Association Bursaries

The Graduate Students’ Association makes available bursaries of up to $1,000 per year to students who at the time of tenure will be registered in a graduate program at the University of Calgary and can demonstrate financial need. Application forms are available from the Graduate Students’ Association, MacKinnie Tower, Room 214, telephone 403.220.5997. Contact the GSA office for further information.

B.6 Government Financial Assistance

The provincial and federal governments make assistance available to students in the form of loans. Students must be Canadian citizens or permanent residents of Canada and provide sufficient evidence that financial assistance is essential to enable the student to continue her/his education. The amount of assistance varies. Students should contact their provincial funding office directly to obtain detailed information about the student loans, grants and bursaries offered through their province. Links to the out of province government loan websites are available from the Student Awards and Financial Aid website: www.ucalgary.ca/awards/.

B.7 International Students

International students planning to do graduate work at the University of Calgary are eligible to apply for graduate assistantships and FGS scholarships. International students are also eligible to apply for a number of Canadian scholarship programs. Detailed information is found on the graduate award website at http://grad.ucalgary.ca/awards/.

B.8 Awards Offered by Government, Industry and Others

Many foundations, companies, professional organizations and other agencies offer financial support to graduate students. A number of these awards are listed on the table below, with more detailed information available on the Graduate Students’ Association website at http://grad.ucalgary.ca/awards/.

Table of Contents

B.1 University Assistantships .......................... 19

Awards and Financial Assistance

of international, national and provincial organizations award scholarships and fellowships, tenable at this and other universities. Details about many of these awards are available from the graduate award website at http://grad.ucalgary.ca/awards.

B.9 University Research Grants - Committee (URGC) - Thesis/Dissertation Research Grants

The University Research Grants Committee recognizes that there are instances where standard funding for thesis research available through a program or faculty may not be adequate to meet certain special needs that are essential to the completion of a particular thesis research project.

The primary purpose of the URGC Thesis/Dissertation Research Grant program is to assist graduate students with exceptional or unanticipated costs that are essential to the completion of their thesis/dissertation projects, but that could not reasonably be anticipated when their project was approved. The expenses must be beyond the means of the student, laboratory or department. These awards are not intended to provide basic project funding. These awards are competitive. To be eligible, applicants must be registered full-time in a research (thesis) based program leading to a master’s or doctoral degree from the University of Calgary. Graduate students applying for Thesis/Dissertation Research Grants must have their thesis/dissertation project approved by the department.

An application guide and the application form may be found at http://www.ucalgary.ca/research/researchers/forms-and-resources/forms.

Further information is available through the Office of Research Services, MacKinnie Tower (MT) 3rd Floor, telephone 403.220.6354.

B.10 Conference Travel Grant

Graduate Student Travel awards are made to assist graduate students in presenting the results of their thesis research at significant scientific or scholarly meetings, and equally, to provide students with an opportunity to gain experience in conference presentation and to meet colleagues in universities and industries who will be of importance to their future career.

Canadian and permanent residents will apply through the Faculty of Graduate Studies. Information and the application form may be found at http://grad.ucalgary.ca/awards.

International students will apply through the Office of Research Services, MacKinnie Tower (MT) 3rd Floor, telephone 403.220.6354.

B.11 Awards in the Faculty of Graduate Studies

The Faculty of Graduate Studies Scholarship Committee awards the scholarships and bursaries listed here.

Details of all awards administered by the Faculty of Graduate Studies can be found on the graduate awards website and in the searchable graduate award database at http://grad.ucalgary.ca/awards.

Scholarships are awarded on the basis of academic standing and demonstrated potential for advanced study and research. Normally, master’s students in the first two years of program and doctoral students in the first four years of program are eligible to hold scholarships. If, in the opinion of the Graduate Scholarship Committee, a suitable candidate cannot be found, it reserves the right not to award any one or any number of scholarships in any year. Unless otherwise stated, awards are for one year only. The value and terms of the awards are subject to change without notice.

For off-campus tenure of awards, written requests, endorsed by the supervisor and graduate program director, for off-campus tenure of awards should be submitted to the dean of Graduate Studies.

Notification of award is sent electronically to successful candidates as soon as possible after the adjudication. All award winners are asked to accept or decline the offer through the Student Centre as soon as possible and no later than the deadline stated in the notification of award. All award payments begin in September unless otherwise stated in the terms of reference.

Should it become known that a student is unqualified for any reason, the university reserves the right to terminate the award(s) and funds already paid out must be returned.

The following payment schedule applies to all awards in the Faculty of Graduate Studies, unless the terms of reference of the award specify otherwise.

<table>
<thead>
<tr>
<th>Amount of Award</th>
<th>Payment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to $2,500</td>
<td>One lump sum payment</td>
</tr>
<tr>
<td>$2,501 to $6,000</td>
<td>Paid in equal monthly installments over four months</td>
</tr>
<tr>
<td>$6,001 to $10,000</td>
<td>Paid in equal monthly installments over eight months</td>
</tr>
<tr>
<td>Awards over $10,000</td>
<td>Paid in equal monthly installments over twelve months</td>
</tr>
</tbody>
</table>

If a student has a successful final oral examination during the tenure of a scholarship, the award will be terminated at the end of the month in which the thesis is submitted to the Faculty of Graduate Studies, unless otherwise specified in the terms of reference of the award, or at the date of the termination of the award, whichever comes first.

No student can receive a total of more than the minimum Tri-Council scholarship value (currently $17,500 for master’s and $20,000 for doctoral) from awards made in the Graduate Award Competition and Program Recommended Awards.

A student holding external awards with a total value equal to or greater than the minimum Tri-Council scholarship is not eligible for funding from the Graduate Award Competition and Program Recommended Awards.

A student who is awarded both a University of Calgary scholarship (or combination of awards) and an external award equal to or greater than the amount stated above must take up the external award at the earliest possible date and decline the University of Calgary scholarship(s) effective on that same date. In such a case, a student may include the offer of the forfeited award on a curriculum vitae.

Travel awards and funds awarded by programs from their Graduate Student Support allocation are not subject to this limit. Program recommended awards in a program with an approved fee differential are not subject to the limits described above and may be combined for an individual student, up to the minimum Tri-Council amount plus the difference between the tuition charged and regular base tuition.

Before accepting other forms of awards or remuneration, especially those involving service, students must check with the Graduate Scholarship Office, to ensure that acceptance of the award does not affect the holder’s full-time registration status.

Students holding multiple year funding must submit a Scholarship Progress Report to the Faculty of Graduate Studies Scholarship Office not later than the end of the eleventh month of the registration year.

Graduate Scholarship Office
University of Calgary
MacKimmie Tower, Room 213
2500 University Drive NW
Calgary AB T2N 1N4

**Important note**: Scholarship payments cannot be made if the student has not registered for the upcoming academic year. Students who have been awarded scholarships and other awards should register as soon as possible to ensure timely payment.
Fees and Expenses

C.1 Fees
All graduate students pay both general and tuition fees each year. The tuition fees listed below are effective 1 May 2015 to 30 April 2016, and are subject to change without notice.

C.2 Tuition Fees
All students are assessed tuition fees. Tuition and general fees must be paid no later than the deadline date indicated for the annual registration month. For information on how to pay your fees, please visit the Enrolment Services website at http://www.ucalgary.ca/registrar/fees.

Thesis-Based Students
All students in the first year of a thesis-based degree (master’s or doctoral) program are assessed program fees, except for MBA thesis-based students, who are assessed program fees in both the first and second years (see C.4 Program-Specific Fees).

All students in a Doctor of Philosophy degree are assessed program fees until the term immediately following successful completion of a candidacy exam (Spring/Summer are counted as one term). In all subsequent years, students will be assessed continuing fees. All program and continuing fees are pro-rated over four terms: one-third in Fall, one-third in Winter, one-sixth in Spring and one-sixth in Summer as posted on the FGS website at: http://grad.ucalgary.ca/current/tuition.

The fees below apply to all thesis-based programs except for those specified in C.4 Program-Specific Fees.

Students in course-based programs are assessed tuition fees by course, based on the level of the course. Some programs may charge additional program fees, refer to the Program-Specific Fee table.

Please note that differential fees are assessed for MBA courses offered by the Hasayne School of Business, for undergraduate courses in the Faculty of Medicine and for undergraduate courses in the Faculty of Law. All students who take these courses are required to pay the differential fee. Students in thesis programs who take courses with differential fee assessments will be required to pay the differential fee assessment in addition to their normal program or continuing fees.

These fees apply to all course-based programs except for those specified in C.4 Program-Specific Fees.

<table>
<thead>
<tr>
<th>Course-based Tuition</th>
<th>Canadian/Permanent Residents</th>
<th>International Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>Graduate 3 units (half course) fee</td>
<td>$730.50</td>
<td>$1,658.28</td>
</tr>
<tr>
<td>Graduate 6 units (full course) fee</td>
<td>$1,461.00</td>
<td>$3,316.56</td>
</tr>
</tbody>
</table>

Students who audit courses pay half the above course fees. For courses with a differential fee assessment, for example, MBA courses, a student who audits a course pays half the current course fee and half the current differential fee.

International Students
Students who are not Canadian citizens or permanent residents of Canada are required to pay a differential fee. The required additional fees must be paid at the same time as the regular tuition and general fees.

International students whose immigration status changes will be required to provide proof of the new status before a change in fee assessment will be made. A change in a student’s immigration status will not alter the student’s fee assessment unless appropriate notification is submitted to Faculty of Graduate Studies on or before the deadline date for payment of fees for the current term.

Academic Staff, Postdoctoral Fellows and Visiting Scholars (not to be interpreted as visiting students) are eligible to audit courses without payment of fees, and are not required to seek admission to the University, but must obtain written permission from the instructor of the course on a “Permission to Audit” form obtainable from Enrolment Services. Such audits will not be recorded on an official transcript. Academic staff and visiting scholars who wish to have an audit course recorded on an official transcript must pay the regular audit course fees.

C.3 General Fees
All graduate students are assessed general fees, which are subject to change without notice, each year.

General fees are assessed yearly and on a per term basis. See the “General Fees” charts on page 24 for more information.

Late Charges
Students who do not register by the posted deadline will be assessed a late registration fee of $60.00.

Students who make course changes (i.e., additions or substitutions) after the posted deadline will be assessed a fee of $60.00 for each Change of Registration form.

C.4 Program-Specific Fees
In addition to the program-specific fees listed below, courses offered off-campus or through distance delivery methods may have tuition charges that differ from the normal tuition policy. Please see the Program-Specific Fees Chart on page 25.

All fees below are annual (per 12 month year) unless stated otherwise. For additional information on fees and payment plans please see: http://grad.ucalgary.ca/current/tuition.

C.5 Transfers between Course-based and Thesis-based Master’s Programs
A student transferring from a thesis-based route to a course-based route within a program will be assessed according to the tuition policy for course-based programs from the first term of registration in the course-based program.

A student who has completed 15 units (2.5 full-course equivalents) or fewer in a course-based route will be assessed program fees for one year from the date of transfer to a thesis route within the program. Continuing fees will be assessed for subsequent years. A student who has completed 18 units (3.0 full-course equivalents) or more in a course-based route will be assessed continuing fees from the date of transfer into a thesis-based route within the program.

<table>
<thead>
<tr>

*All Spring/Summer services are available May 1st and expire on August 31st. SUMMER registrants will be charged the Spring/Summer amount in July; all other registrants will be charged the Spring/Summer amount in May. For additional information on fees and payment plans please see: http://grad.ucalgary.ca/current/tuition.

C.6 Courses Taken Extra-to-Program

A student in a thesis-based or a course-based program who wishes to take a course that is extra to his/her degree program will be assessed extra fees per course in addition to the regular graduate tuition assessment. For more information, see D.1 Registration.

Any appeals regarding fee assessment must be made to the Senior Director, Strategic Operations (graduate@ucalgary.ca) within six months of the fee assessment.

C.7 Fee Adjustments and Refunds

Students have until the posted deadline dates to make course additions and deletions without penalty. Please refer to the Academic Schedule for these dates.

Students who make course changes after the posted deadline will be assessed a $60.00 late fee for each Change of Course Registration form processed.

After the fee payment deadline, a student may withdraw from a course up to the last day of lectures, but no refund of any portion of the tuition fees will be made.

Thesis-based students who withdraw from individual courses will not have any changes made to their fee assessment for the year.

Thesis-based students who withdraw from program will have tuition fees assessed to the end of the term in which they withdraw. If the student withdraws from program before the fee payment deadline, the tuition fees for that term will be refunded.

General fees are not refunded following the fee payment deadline.

C.8 Payment and Collection of Fees

For information on how to pay your fees, please visit http://www.ucalgary.ca/registrar/fees.

Graduate students receiving funding through the University of Calgary may apply for a Payment Plan which arranges the fee payment to be spread over a period of time. For more information and eligibility, visit: http://grad.ucalgary.ca/current/tuition.

Students may pay their fees by online banking, cheque, money order, debit card or cash. Visit the Enrolment Services website for further information: http://www.ucalgary.ca/registrar/fees.

- If fees are paid from some form of student assistance, it is the responsibility of the student to advise the Fee Advisor and to produce a letter from the source of the assistance as confirmation. This must be done before the fee payment deadline to avoid penalty. For a list of other options for payment of fees, such as Sponsorship, or Scholarships or Bursaries, please visit: http://www.ucalgary.ca/registrar/fees/loans_otherfunding.

- If fees are to be paid from government student loans, Enrolment Services must certify the loan funding and remit any tuition owing to the University of Calgary on or before the term fee deadline in order for fees to be deferred for thirty days beyond the fee deadline. For more information please visit: http://www.ucalgary.ca/registrar/fees/loans_otherfunding.

- Students receiving disbursement of their student loan in one installment may have both Fall and Winter Term fees deducted from the single installment plus any other outstanding debts appearing on the student account. Students receiving disbursement of their loan in two installments will have Fall Term fees deducted from the first installment and Winter Term fees deducted from the second installment.

If financial assistance is refused, fees must be paid by the term fee deadline, and may accrue late interest if not paid on time. It should be noted that students will not have their registration cancelled if financial assistance is refused and such students will be liable for all tuition and general fees owing for the term.

General fees must be paid no later than the term fee deadline indicated in the Academic Schedule for the student’s annual registration term. All program and continuing fees are pro-rated over four terms as follows:

1/3 in Fall
1/3 in Winter
1/6 in Spring
1/6 in Summer
C.9 Delinquent Student Accounts
This policy applies to any student enrolled in a graduate program at the University of Calgary. A student who is having difficulty meeting his/her financial obligations is encouraged to consult with Enrolment Services, or the Wellness Centre.
Any student with an overdue debt to any unit of the University of Calgary, including any administrative department and the Graduate Students' Association, will not be allowed to register or receive transcripts of grades, and may be denied access to other University services until the outstanding account is settled in full, or in exceptional circumstances, an acceptable arrangement has been made.

*The Government approved market modifier for the MBA program was implemented in Fall of 2011 with MBA students admitted in or after Fall 2011 being assessed the higher of the fees as noted above. Students who are enrolled in a program other than MBA taking MBA courses offered by the Haskayne School of Business will be assessed the MBA Course fee differential with market modifier beginning Fall 2011 regardless of year in program.

**Effective May 1, 2015: approved $300.00 applies to new incoming MBA students phased in over two years at $150/year.

For additional information on fees and payment plans please see: [http://grad.ucalgary.ca/current/tuition](http://grad.ucalgary.ca/current/tuition).
The general regulations apply to all graduate students. Regulations specific to particular degree programs are outlined in the individual program, found in the Program Descriptions section.

 Notices of any changes in regulations are available from the program office. It is the student's responsibility to be familiar with the regulations and deadlines of the Faculty of Graduate Studies as stated in this Calendar, in their graduate program's Handbook and, for thesis-based students, in the Thesis Guidelines (http://grad.ucalgary.ca/current/thesis).

Notes:
1. Students are advised to consult with their Graduate Program Director and Graduate Program Administrator regarding all aspects of their graduate programs.
2. All graduate students registering or re-registering must contact their supervisors and programs to discuss their programs of study within the first two weeks of their annual registration month.
3. This Calendar provides a listing of all graduate courses. Course offerings will be determined annually and are subject to the availability of instructors and student interest and in some instances are only offered in alternate years. Students should consult a current timetable before registering.

D.1 Registration
Each year of the program, each graduate student must register using the Student Centre at https://my.ucalgary.ca. Students must register annually, at the time of the anniversary or their first registration, and before the deadline for that term. All graduate students register for a twelve month period beginning on the anniversary or their first registration, and be required to withdraw from program. Students enrolled in thesis-based master's or doctoral programs will be considered full-time unless the program Calendar entry allows for part-time registration and specific approval is given to an individual student. Unless a student's registration is active, the student may not participate in University activities towards a degree such as attendance in a course, conducting research in a laboratory, teaching and receiving paid support.

D.1.1 Course Selection and Registration
A complete guide to registration is available online at http://grad.ucalgary.ca/current/managing-my-program/registration.

Students should always consult with their graduate program and supervisor, if applicable, concerning course selection. Refer to the deadlines in the Academic Schedule at the beginning of this Calendar.

Following registration, it is the student's responsibility to verify course registration and fee assessment using the Student Centre https://my.ucalgary.ca.

D.1.2 Auditing Courses
Students wishing to audit courses must consult with their graduate program and complete a Change of Course Registration form, available at http://grad.ucalgary.ca/current/managing-my-program/registration.

D.1.3 Continuous Registration
Students must maintain continuous registration and pay the appropriate fees until all degree requirements have been completed. A student who does not register by the appropriate deadline date will be withdrawn for failure to register. Information about readmission or reactivation appears in sections A.7 and A.8 of this Calendar.

Students in course-based programs must take a minimum of 3 units (0.5 full-course equivalent) per registration year. If a student in a course-based program does not take a minimum of 3 units (0.5 full-course equivalent) during a registration year, the student will be required to withdraw from program. It is expected that students in course-based programs will complete at least half of the required courses in the first two years of the program.

D.1.4 Course Withdrawal
A graduate student may withdraw from a course in which he/she is registered via the Student Centre at https://my.ucalgary.ca. A graduate student may withdraw from a course in which he/she is registered via the Student Centre at https://my.ucalgary.ca. A graduate student may withdraw from a course in which he/she is registered via the Student Centre at https://my.ucalgary.ca. A graduate student may withdraw from a course in which he/she is registered via the Student Centre at https://my.ucalgary.ca. A graduate student may withdraw from a course in which he/she is registered via the Student Centre at https://my.ucalgary.ca.

Note: All withdrawals after the posted last day to drop courses will be recorded on the student transcript.

D.1.5 Courses Taken Extra-to-Program
A student in a thesis-based or a course-based program may request to take a course that is extra to his/her degree program. Extra-to-program courses will not count toward the current graduate degree, but students should be aware that they will be included in all grade point average calculations on the transcript.

Registration in any course is subject to departmental approval. For information on fees, see Fees and Expenses.

D.2 Transfer Credit
Students currently registered in a graduate degree program at the University of Calgary may receive credit for one or more courses taken at other recognized institutions, if approved by the graduate program and the Faculty of Graduate Studies. Program and Faculty of Graduate Studies' approval of these arrangements must be obtained before the courses begins.

Courses: Transfer credit and any advanced credit received upon entrance to the program may not exceed one third of the program or 12 units (2.0 full-course equivalents), whichever is less. In order to receive transfer credit, students must arrange for official transcripts showing the courses taken and grades achieved to be sent from the other institution to the Faculty of Graduate Studies. Courses for which transfer credit is being sought must be from a recognized institution and not have been used for any degree or diploma accreditation. They must be graded, graduate-level courses, and the graded level of perfor-
D.3 Student Status

D.3.a) Research-Based Programs

Research-based programs include thesis-based programs and research master’s programs. Research master’s include a significant research component, and would normally be considered acceptable preparation for a PhD program. Some course-based MA and MSc programs are considered research master’s programs. These are designated as such in the program’s calendar entry.

Students registered in research master’s and doctoral programs will be considered full-time unless their program formally offers a part-time option, by listing the option under their respective program entry in this calendar and approves the student for a part-time registration status.

It is understood that full-time students will normally work an average of 40 hours per week on program-related activities. Program-related activities include course work, systematic reading, laboratory or other research work related to the production of thesis proposals and/or defence of thesis and thesis proposals, field work, and study for candidacy examinations.

D.3.b) Course-Based Programs

D.3.b) i. Course Work Minima

Course-based graduate programs normally consist of at least 36 units (6.0 full-course equivalents) taken at the graduate level. Audited courses do not count towards the fulfillment of program requirements.

D.3.b) ii. Full-time Students

Students will be considered full-time if they enrol in 18 units (3.0 full-course equivalents) or more per annual registration.

D.3.b) iii. Part-time Students

In order to remain eligible for part-time status, students may enrol in no more than 15 units (2.5 full-course equivalents) per annual registration.

Enrolment in additional courses will require a change in status to full-time enrolment.

Part-time enrolment status must be approved by the graduate program.

D.3.c) Change of Registration or Status

A change from part-time to full-time status will require program approval indicating satisfactory progress for full-time registration. It will also require that students pay the full-time general fees for the full year retroactive to their annual registration term.

Changes to full-time/part-time status subsequent to the posted deadline must be submitted to the Faculty of Graduate Studies on a Change of Program or Status form. Forms are available on the Faculty of Graduate Studies website at: http://grad.ucalgary.ca/current/managing-my-program/registration.

Course changes after the posted deadline must be done on a Faculty of Graduate Studies Change of Course Registration form and a $60 late registration fee will be charged. Forms are available on the Faculty of Graduate Studies website at: http://grad.ucalgary.ca/current/managing-my-program/registration.

Registration to audit a course must be done on a Faculty of Graduate Studies Change of Course Registration form.

D.3.d) Fees and Registration Status for GSA Executives

Students volunteering in an executive role with the Graduate Students’ Association (GSA) shall be registered as a full-time student and noted as having GSA responsibilities for the length of their term with the GSA. During their term with the GSA, executives are released from course, research, and teaching responsibilities in proportion to the expectations of their role with the GSA. Related funding may be deferred.

While holding an executive role with the GSA, students shall pay continuing fees regardless of time in the program.

D.4 Program Transfers

Program transfers must take place before a student’s third annual registration. Students should consult the supervisor and Graduate Program Director. Current time in program will be credited; course credit is given at the discretion of the program.

It is the student’s responsibility to check the fee implications of the transfer.

Doctoral students who have transferred from another institution must complete their program’s candidacy requirements. Exceptions may be made if the graduate program gives credit for an equivalent requirement successfully completed at another university.

D.5 Withdrawals

A student wishing to withdraw from the Faculty of Graduate Studies should complete a Graduate Withdrawal form, available at http://grad.ucalgary.ca/current/managing-my-program/withdrawal.

Fees for subsequent terms will be cancelled upon withdrawal notification.

When a student withdraws from the Faculty of Graduate Studies, it is the student’s responsibility to ensure that all outstanding fees are paid.

After a required withdrawal from a graduate program at the University of Calgary, a student may not apply to another graduate program at the University of Calgary until a year after the final decision to require withdrawal has been made.

Students under academic review (e.g., for academic misconduct) will not be permitted to withdraw during the review process.

D.6 Time Limits

Students in research- and thesis-based master’s programs must complete all degree requirements within four registration years; students in course-based master’s programs must complete all degree requirements within six registration years. It is expected that students completing a master’s degree on a full-time basis will complete the degree within half the time allowed.

Students in doctoral programs must complete all degree requirements within six registration years. It is expected that most candidates will complete requirements within four years.

D.6.a) Program Extensions

If a student needs longer than the regulation time allowed to complete a program, an extension to program may be granted on the basis of a recommendation from the Graduate Program Director that specifies the grounds for the extension and provides a detailed schedule for the completion of the program. Forms can be found on the Faculty of Graduate Studies website at: http://grad.ucalgary.ca/current/managing-my-program/registration.

D.6.a) i. Program Extensions for GSA Executive Members

Graduate programs must take the service by GSA Executive members into consideration in assessing the student’s progress in the annual progress report. On request, the Faculty of Graduate Studies will grant GSA Executive members extensions to time in program of up to one year per year in office.

D.7 Leave of Absence

If a student is unable to maintain continuous registration, he/she should apply for a leave of absence. Leaves of Absence are granted for reasons including, but not limited to:

- Bereavement
- Care-giving responsibilities
- Maternity
- Medical requirements
- Military service
- Parental responsibilities
- Political service

Leaves of absence may be granted for a minimum of one term and up to one year. Such requested leaves must be approved by the student’s home graduate program. Proper documentation must be supplied when applicable (e.g., medical leaves).

Any requests for renewal beyond a year must be approved by the Faculty of Graduate Studies. The total length of leave time with renewal must not exceed two (2) years for master’s, graduate certificates and graduate diploma’s students and three (3) years for doctoral students. During a leave of absence, a student is not expected to work on their graduate program. The time on leave will not count as time in program, i.e., a doctoral student who completes two years and then takes a one year leave of absence,
will still have four years to complete degree requirements.

Application for a leave of absence should be made in advance of the anticipated leave, or as soon as possible after the event necessitating the leave occurs. While it often is difficult to anticipate the need for a leave, it is helpful if the beginning and end of the leave coincide with the beginning and end dates of a term. All supporting documents (e.g., medical notes) need to be submitted along with the request form.

During an approved leave of absence of up to one year, Faculty of Graduate Studies (FGS) administered scholarship funding is deferred until the student returns to full-time registration. Students should be aware that supervisory and/or funding arrangements other than FGS-administered scholarships cannot in general be guaranteed on return from a leave. It is the student’s responsibility to ensure that the proposed leave is compatible with the regulations of any granting agency from which funding would normally be received during the leave period, and that such agencies are informed of the proposed leave. Students on student loan programs should clarify the consequences that a leave will have on their repayment status; information about education financing in Alberta can be found at http://www.alis.gov.ab.ca/ec/fo/studentsfinance/students-finance.html.

International students should consult the International Student Centre and immigration authorities regarding their immigration status during the proposed leave. Information on fee assessments during an approved leave can be found at http://grad.ucalgary.ca/current/managing-my-program/

D.7 a) Leave of Absence Procedure

The student should discuss the leave and its implications with the supervisor and any other appropriate people, e.g., members of the supervisory committee.

1. If it is a first-time request, and the total length of the leave is less than one year, submit the completed and signed Application for Leave of Absence form to the student’s home graduate program for approval. (See http://grad.ucalgary.ca/current/managing-my-program/leave),

2. If the total length of the leave on the student’s record is beyond a year, or if this is not a first-time request, the application must be approved by the Faculty of Graduate Studies. The completed and signed Application for Leave of Absence form must be forwarded to the Faculty of Graduate Studies for approval.

D.7 b) Maternity Leave

In the case of a maternity leave which interrupts funding, the Faculty of Graduate Studies will provide funding for up to 4 months at the rate of $1,000 per month for those months in which no other funding is being received. Thus, if a student is receiving 1 month of maternity leave pay under the GSA Collective Agreement, the Faculty of Graduate Studies will pay for 3 months.

Submission of a Leave of Absence form with maternity leave submitted as the reason for the leave, will trigger a review by the Faculty of Graduate Studies of the student’s eligibility for these funds.

E. Combined Degrees

Combined Degree Programs

A Combined Degree Program is a formal arrangement between two units offering programs whereby approved students may be registered simultaneously in two programs. The requirements for both degrees must be completed before the student can graduate. The University of Calgary presently offers the following combined degree programs: JD/MBA, JD/MPP, MBA/MPP, MSW/MBA, MBT/MBA, MSc/MBA, PhD/MBA, MD/Master’s degree, and MD/PhD. Information and application packages are available from the relevant graduate programs.

F. Interdisciplinary Degrees

The Interdisciplinary Degree allows a qualified graduate student to pursue thesis-based research (Master’s, PhD) in an area that does not fit the traditional disciplinary requirements of only one graduate program. The requirements for the student’s program are individually tailored to meet his/her research interests. Research is carried out under the direction and guidance of a Supervisor, Co-Supervisor, and Supervisory Committee whose research expertise is relevant to the disciplinary areas. The student should submit an application form and fee, along with official transcripts and letters of reference to the intended home graduate program. The application must meet the minimum Faculty of Graduate Studies requirements for admission. The prospective home program will work with the conjoint program to establish coursework and candidacy examination requirements. Parchments for the Interdisciplinary Degree will identify both the home and conjoint programs. Contact the prospective home graduate program for further details.

G. Academic Standing

</table>

G.2 Student Standing

Course-Based

Normally, a student who displays poor academic standing will be required to withdraw from the program unless the program recommends otherwise, and said recommendation is approved by the Dean of Graduate Studies. Poor academic standing is defined by any one, or combination, of the following conditions:

1. A student who receives a “C+” or lower in any one course.

2. A student who does not maintain an annual GPA of at least 3.00 calculated each year at the time of their registration anniversary.

When any instance of poor academic standing arises, the Program must submit a notice informing the Dean of Graduate Studies of its recommendation. If the program permits the student to retake a failed course, the second grade will replace the initial grade in the calculation of the GPA, and both grades will appear on the transcript.

A student must have a cumulative GPA of at least 3.00 in order to graduate. A graduate program may recommend to the Faculty of Graduate Studies that a student be required to withdraw for lack of satisfactory progress in either course work or research.

The Faculty of Graduate Studies, after consultation with the graduate program and/or supervisory committee concerned, may initiate the withdrawal of a student. Final grades may be accessed through the online Student Centre at https://my.ucalgary.ca.

G.3 Student Progress

Thesis-Based

Graduate students are expected to maintain adequate progress. This includes timely completion of required course work, progress to candidacy according to the program’s candidacy timeline, and steady and meaningful work on the thesis. Supervisors/graduate programs should ensure, through annual progress reports and otherwise, that the student is informed in writing about concerns regarding progress.

Poor academic standing is defined by any one, or combination, of the following conditions:
1. A student who receives a "C+" or lower in any one course.
2. Thesis-based students who do not maintain a GPA of at least 3.00 within the last 12 months (calculated in the May reviewing period) are considered to be in poor academic standing.

Annual Student Progress Report
Each thesis-based graduate student must file an annual progress report with his or her graduate program, typically during the month of May every year (the time may vary by program). Delinquent students may be denied registration.

The annual progress report is accessed from the Student Centre at https://my.ucalgary.ca.

H. Language
Except in certain courses in the language departments, the language of instruction at the University of Calgary is English. Delivery of any University of Calgary program in a language other than English requires approval from the Academic Planning and Priorities Committee.

Theses must be submitted in English, except when explicitly permitted in the program's thesis guidelines and related to the student's program of study.

I. Supervision
I.1 Appointment of Supervisor
I.1.1 Graduate students in thesis-based programs are required to have a Supervisor throughout the duration of their program. All members' eligibility to supervise is set out in the University of Calgary Graduate Student Supervision Policy.
I.1.2 Postdoctoral Scholars are not eligible to serve as Supervisors.
I.1.3 At time of admission, a Supervisor or an interim Supervisor must be appointed.
I.1.4 A student admitted as a special case admission must have an approved Supervisor before admission.
I.1.5 The Graduate Program Director must appoint a permanent Supervisor no later than twelve months after first registration.
I.1.6 Within two months of the appointment of a permanent Supervisor, the Graduate Student and Supervisor must complete the Student-Supervisor Checklist and file their signed copies with their program office. The relationship between Supervisor and the Graduate student is an academic one, conducted in a professional manner and in accordance with the Faculty of Graduate Studies Conflict of Interest Policy and the University of Calgary Integrity in Scholarly Activity Policy.

I.2 Appointment of Co-Supervisor
I.2.1 If a student's Supervisor does not hold full Supervisory Privileges (see University of Calgary Graduate Student Supervision Policy) the Graduate Program Director must appoint a Co-Supervisor, in consultation with the Supervisor and the student.
I.2.2 If not required under I.2.1, the Graduate Program Director may appoint a Co-Supervisor if recommended by the Supervisor and with the agreement of the student.
I.2.3 Postdoctoral Scholars are not eligible to serve as Co-Supervisors.
I.2.4 When a Co-Supervisor is appointed, all relevant documentation must be signed by both the Supervisor and the Co-Supervisor.

I.3 Continuity of Supervision
I.3.1 Graduate students should expect continuity of supervision through their graduate program (see University of Calgary Graduate Student Supervision Policy).
I.3.2 Graduate students have a responsibility to maintain strong working relationships with their Supervisors as set out in Best Practices for Graduate Students.
I.3.3 In cases where Graduate students are unwilling to accept the supervision provided or have chosen to pursue research topics other than those indicated at the time of admission, the Graduate Program and the Faculty of Graduate Studies have no responsibility to agree to alternate supervisory arrangements if they cannot be reasonably accommodated.
I.3.4 Only under exceptional circumstances, students may request permission from the Faculty of Graduate Studies to change Supervisors (refer to Request to Change Supervisor).
I.3.5 It is the role of the Graduate Program Director (or delegate) and the Faculty of Graduate Studies to try to mediate conflicts between students and Supervisors in order to maintain the continuity of the Supervisory relationship (see Guidelines for Resolving Conflicts Between Graduate Students and Supervisors).

I.4 Financial Commitments to Students at Time of Admission
I.4.1 Financial support promised in writing by Supervisor is contingent upon a student's continued registration and progress in a graduate program. Expectations should be clearly stated in the offer of funding that comes from the Graduate Program.
I.4.2 It is the collective responsibility of the Supervisor(s), the Graduate Program(s) and the Faculty of Graduate Studies to ensure that financial commitments are met (see University of Calgary Graduate Student Supervision Policy Sections 4.20-22).

I.5 Composition of the Supervisory Committee: Master's and Doctoral
I.5.1 The Supervisory Committee should be constituted by the Supervisor in consultation with the Student. It will normally consist of the Supervisor and Co-Supervisor, if applicable, and two members. The composition must be approved by the Graduate Program Director (or delegate) and sent to the Faculty of Graduate Studies for information.
I.5.1.1 Master's students do not require a Supervisory Committee unless required by the program or requested by the Graduate Program Director (or delegate).
I.5.1.2 Doctoral students require a Supervisory committee, which should be appointed as soon as possible, but no later than three months after the appointment of the permanent Supervisor or fifteen months after the initial registration.
I.5.2 For both Master's and Doctoral Supervisory committees:
I.5.2.1 Members may be external to the Graduate Student's program.
I.5.2.2 At least one of the members of the Supervisory Committee should have had Supervisory experience at the doctoral level.
I.5.2.3 Postdoctoral Scholars are eligible to serve as committee members. A Postdoctoral Scholar whose Supervisor is on the student's Supervisory committee is not eligible to serve as a member of the examination committee. In this case, an additional member who is eligible to serve as an examiner must be included in the Supervisory committee.
I.5.2.4 Persons who are not Board appointees of the University of Calgary may serve on the Supervisory committee with the approval of the Dean of Graduate Studies.

J. Candidacy
J.1 Admission to Candidacy
Admission to candidacy for the doctoral degree is a judgment by the faculty members in the graduate program that the student is prepared to successfully complete the requirements of the doctoral degree program. Subject to any extension allowances, doctoral students must complete all candidacy requirements within 28 months of first registration. Those students who have transferred from a Master's program must complete all candidacy requirements within 36 months of the first registration in that Master's program.

Each graduate program specifies its requirements for candidacy in its Candidacy Requirements document. To be admitted to candidacy, the student must successfully:
1. Complete course requirements for his/her program as set out in the program’s Calendar entry. Graduate Program Directors have the authority to require additional courses or waive course requirements for students in consultation with the Supervisor and Supervisory Committee (where applicable).

2. Complete any other program-specific candidacy requirements such as language or seminar requirements, as set out in the program’s Calendar entry.

3. Complete a written thesis proposal that is examined and approved by the Supervisory Committee (and additional examiners, if required by the Program).

4. Pass one or more Field of Study examination(s) to demonstrate knowledge in their field of study, as required by the Graduate Program.

**J.2 Candidacy Examination Outcomes**

In their Candidacy Requirements, programs will establish what constitutes a “pass” on each examination component (i.e., grade assigned, unanimity of the committee, etc.). If, for any component related to J.I.4 above, the examination committee requires that a student undertake remedial work, that remedial work must be completed before the student can be admitted to candidacy. Once a student has been admitted to candidacy, s/he cannot be required to undertake additional course work (excluding courses mandated as post-candidacy requirements in program Calendar entries).

A student who fails any component related to J.I.3 and J.I.4 above will be allowed to re-take the examination within six months of the failed examination. The second failure of a candidacy component will result in a student being required to withdraw. In the case of failed outcomes, students have the right to appeal. Students must appeal directly to the Faculty of Graduate Studies (see N.2 Appeals Against Faculty of Graduate Studies Rulings).

**J.3 Program Candidacy Requirements**

Each graduate program offering a doctoral degree will establish its own Candidacy Requirements document, within the framework set out in J.1 Admission to Candidacy. Each graduate program must require at least one oral examination and one written component on either the thesis proposal or examination committee before research can begin. Failure to obtain appropriate approvals prior to conducting research may result in an outcome of “fail” on the thesis examination. Graduate students must check with their departments or graduate programs, and review the Research Ethics site at http://www.ucalgary.ca/research/ethics for information about the ethics approval process.

**K. Theses**

Every graduate student in a thesis-based program must complete a thesis that makes an original scholarly contribution based on research conducted while in program.

Complete information on the formatting, printing, submission and distribution of the thesis is contained in the Faculty of Graduate Studies Thesis Guidelines, available at http://grad.ucalgary.ca/current/thesis. If required by the program, the student is responsible for the costs of printing and binding the required number of copies of the thesis, and for having the required number of copies bound.

Students must continue to pay the appropriate tuition and general fees until all degree requirements, including the submission of the thesis to the Faculty of Graduate Studies, have been completed.

**K.1 Quality of Thesis**

**Doctoral**

The doctoral thesis must reflect a significant contribution to knowledge, must contain evidence of a critical understanding of the relevant literature, and must employ appropriate research methodology. It is expected that the material embodied in the thesis must be of high quality and reflects the standards of the discipline.

**Master’s**

The thesis must demonstrate that the candidate is acquainted with the published literature in the subject of the thesis, that appropriate research methodology has been used, and that appropriate levels of critical analysis have been applied.

**K.2 Integrity in Scholarly Activity**

The University’s policy governing Integrity in Scholarly Activity applies to all thesis work. Plagiarism and fabrication or falsification of research data will be considered academic misconduct. (See Plagiarism/Cheating/Other Academic Misconduct in the University Calendar).

**K.3 Research and Ethics**

All research involving human participants, animals or biohazards must first be reviewed and approved by the appropriate certification committee before research can begin. Students must check with their departments or graduate programs and review the Research Ethics site at http://www.ucalgary.ca/research/ethics for information about the ethics approval process.

**K.4 Intellectual Property**

The student holds the copyright on the thesis, but ownership of Intellectual Property included in the thesis is governed by the University of Calgary Intellectual Property Policy. In the case of manuscript-based thesis, co-authored publications may be included (see K.5 Form and Style).

**K.5 Form and Style**

The general form and style of thesis may differ from program to program, but a thesis must be a cohesive document.

In consultation with the Supervisor, students may choose to compose their theses using the traditional thesis style or the manuscript-based thesis style. The thesis must conform to the requirements and regulations described in the Thesis Guidelines, available at http://grad.ucalgary.ca/current/thesis.

Students may hire an editor to copyedit their theses, unless their program’s calendar entry prohibits copyediting. Students who choose to hire an editor must comply with the regulations set out in the Thesis Guidelines. The thesis must conform to all relevant legislation and policy governing copyright.

**K.6 Public Release of Theses**

Theses are normally made public via the University of Calgary Online Theses Repository. Under certain circumstances, the Dean of Graduate Studies may approve Thesis Withhold (see Thesis Withhold Regulations, available at http://grad.ucalgary.ca/current/thesis withhold).

**K.7 Copyediting**

Students may hire an editor to copyedit their theses, unless their program’s calendar entry prohibits copyediting. The student, supervisor and editor must abide by the following regulations:

1. Prior to hiring a copy editor, permission from the supervisor(s) must be obtained. An agreement outlining the permitted scope of editing must be signed by the student and the supervisor(s).

2. A disclosure statement is required in the thesis (e.g., a sentence in the preface or acknowledgment stating that the thesis has been professionally edited).

3. Under no circumstances should the copyediting alter the content, structure or contribution of the thesis.

Students must check their program’s regulations in the Faculty of Graduate Studies Calendar to see if copyediting is permitted before hiring a copy editor.

**L. Thesis Examinations**

**L.1 Purpose**

The purpose of the thesis oral examination is not only to defend independently the thesis, but also to serve as confirmation of the student’s knowledge of the research topic within the context of his or her field of study. In order to safeguard and promote the quality of the graduate education, all students in thesis-based graduate programs must defend their theses in an oral examination before the degree may be granted. The Dean of Graduate Studies may waive this requirement in exceptional circumstances.

**L.2 Scheduling**

2.1 It is the responsibility of the Supervisor to schedule the thesis oral examination,
to recommend all examining committee members to the Graduate Program Director for approval, and to conform to the timelines set out in Thesis and Thesis Examination Administrative Processes (see http://grad.ucalgary.ca/current/managing-my-program/examinations). Under no circumstances are students permitted to make arrangements for an examination.

2.2 The examination committee, which is approved by the Faculty of Graduate Studies, is convened to make a recommendation of the final outcome of the examination to the Dean of Graduate Studies.

2.3 No changes in the composition of examination committees may be introduced without prior approval from the Faculty of Graduate Studies.

2.4 With the exception of 2.6, the doctoral examination cannot be scheduled until all members of the Supervisory Committee have reviewed the student’s research, including a relevant written sample of the material related to the thesis, or the draft thesis document, as required by the graduate program, and have provided written consent that the examination can be scheduled. The Supervisor’s signature on the Notice of Examination Form acknowledges that the entire thesis meets the minimum standard (see K.1 Quality of Thesis). An indication that the thesis is ready to defend does not commit a member of the supervisory committee to voting “pass” on the thesis at the final oral examination.

2.5 With the exception of 2.6, the Master’s examination cannot be scheduled until the Supervisor has reviewed the student’s research and the entire draft of the thesis document, as required by the graduate program. When Supervisory Committees are required, both the Supervisor and the Committee members must review the student’s research, including a relevant written sample of the material related to the thesis, or the draft thesis document, as required by the graduate program. The Supervisor’s signature on the Notice of Examination Form acknowledges that the entire thesis meets the minimum standard (see K.1 Quality of Thesis). An indication that the thesis is ready to defend does not commit a member of the supervisory committee to voting “pass” on the thesis at the final oral examination.

2.6 A student who has successfully completed all Faculty of Graduate Studies and program requirements has the right to submit and defend a thesis even if doing so may be contrary to the advice of the Supervisor and Supervisory Committee (where applicable).

L.3 Composition of the Examination Committee

The Composition of the Committee must be recommended by the Graduate Program Director and approved by the Dean of Graduate Studies.

L.3.1 Neutral Chair (Doctoral, Master’s)

The oral thesis examination is chaired by a neutral member of the academic staff appointed by the Graduate Program Director. The Neutral Chair is not a member of the examination committee and may not vote or question the student. The Neutral Chair’s responsibility is to ensure that the examination is conducted in a fair and orderly fashion.

L.3.2 Non-Board Appointments (Doctoral, Master’s)

The Faculty of Graduate Studies may approve qualified persons who are not Board appointees of the University of Calgary to serve on thesis oral examination committees.

L.3.3 Doctoral Oral Thesis Examination Committee

The examination committee will consist of:

a. the Supervisor Committee,

b. an Internal Examiner: a member of the University of Calgary academic staff whom programs may require to be external to the program,

c. an External Examiner: external to the University,

d. other members (at the discretion of the Dean of Graduate Studies).

A Post-doctoral Associate whose Supervisor is on the supervisory committee is not eligible to serve as an additional member of the examination committee.

L.3.4 Internal and External Examiners

Both the internal and external examiners normally must:

a. have well-established research reputation

b. have expertise in the area of the student’s research

c. have experience in evaluating theses at the graduate level

d. have experience in supervising to completion at the graduate level

e. not be a close personal friend of the Supervisor

f. not have collaborated with Supervisor in past five years

g. not be closely related to, or have worked with the candidate

In addition, the external examiner normally

a. must not have been a supervisor in the candidate’s graduate program in the past three years

b. must not have served as external examiner in candidate’s program in the past two years.

L.3.5 Master’s Oral Thesis Examination Committee

The examination committee should consist of:

a. the Supervisor

b. Supervisory Committee, where applicable,

c. an additional member of the University of Calgary academic staff,

d. an Internal Examiner: a member of the University of Calgary academic staff whom programs may require to be external to the program, or an external member who fits the criteria outlined in L.3.4 Internal and External Examiners.

If there is a formal Supervisory Committee, only one additional Internal Examiner or external examiner is required.

If there is a Co-Supervisor, but not a formal Supervisory Committee, an additional member of the University of Calgary academic staff and an Internal Examiner or external examiner are required.

L.4 Conflict of Interest

The examination committee must be seen as impartial and conflicts of interests must be avoided and disclosed. See Graduate Studies Conflict of Interest Policy at http://grad.ucalgary.ca/current/policies-forms/conflict-interest.

L.5 Rescheduling of Thesis Examinations

A scheduled examination may be cancelled under exceptional circumstances with the approval of the Dean of Graduate Studies.

L.6 Cancellation of Thesis Examinations

All examinations must be conducted according to the procedures described in Thesis and Thesis Examination Administrative Processes, available at http://grad.ucalgary.ca/graduate-regulations/thesis.

The Oral Examination

1) The examination begins when the thesis is distributed to the examiners, at least three weeks prior to the date of the oral examination. The thesis may not be discussed amongst the examination members (with the exception of the Supervisor and/or Co-Supervisor) or the student. The student may not submit revisions while the examination is in progress.

2) The oral examination is normally open to the public but only members of the examination committee may question the student.

3) The oral examination questioning will not normally exceed two hours.

4) The thesis oral examination may be preceded by a separate public seminar, which will not include any questioning by members
of the examination committee. If no public seminar preceded the examination the student may be offered an opportunity to give a brief (15 minute) presentation summarizing the thesis in addition to the two-hour examination time.

5) Before the oral examination begins, all members of the examination committee must submit their written and signed examination reports to the Neutral Chair. Written reports are confidential and will not be communicated to the student or other members of the examination committee before the examination committee’s recommendation has been finalized by completing the final examination form.

6) Examiners, either in person or via teleconference, must be present during the entire questioning process (see Examination Guidelines at http://grad.ucalgary.ca/current/managing-my-program/examinations).

7) All examiners must be given the opportunity to question the student and the questions must be relevant to the thesis document.

8) Prior to the oral examination, if an examiner suspects that academic misconduct has occurred in the thesis, he/she must contact the Dean of Graduate Studies immediately. The examination will then be suspended until such time as the Dean (or designate) is able to determine whether academic misconduct has occurred and what penalties will be applied. Depending on the determination, the examination may proceed as scheduled, be rescheduled, or be cancelled.

9) Any procedural irregularities must be reported to the Dean of the Graduate Studies within 5 working days of the examination date, regardless of the outcome of the examination.

L.8 Recommendations at the Conclusion of an Examination

Recommendation to the Dean of Graduate Studies must be unanimous. If it is not unanimous, the Dean of Graduate Studies will decide the outcome of the thesis and the oral examination. The Examination Committee must recommend the outcome of the examination by indicating one the following in each component:

L.8.1 Thesis

a) Unanimous pass with no or minor revisions involves stylistic changes and/or minor additions or clarifications; these must be correctable within one month from the date of the examination. The Supervisor will inform the student of the necessary corrections. The Supervisor will withhold his/her signature until satisfied with the revisions, if required.

b) Unanimous pass with major revisions normally requires more than changes in style and will typically involve clarification of textual materials, the qualification of research findings, conclusions, or limited additions to the text. Major Revisions normally must be completed and submitted to Faculty of Graduate Studies within six months from the date of examination. One or more examiners may withhold his/her signature until satisfied with the revisions.

c) Unanimous fail. Student to be permitted one re-take. No decision made on the oral examination.

d) Failure to reach unanimous decision.

L.8.2 Oral Examination

a) Unanimous pass.

b) Unanimous fail. If a unanimous fail was reached on the oral examination and the thesis was a pass, the oral component must be re-taken within six months from the date of examination.

c) Failure to reach unanimous decision.

In the case of a failed thesis, whether by committee or Dean’s decision, one re-take will be allowed and a new defence will be required. In view of the magnitude of the revisions required, the re-take oral examination must be held no sooner than six months and no later than twelve months from the date of the first examination.

The composition of the examination committee normally will remain the same. Upon the recommendation of the Graduate Program Director and approval of the Faculty of Graduate Studies, an examiner may be replaced.

M. Graduation

The deadline dates for Convocation requirements are set out in the Academic Schedule. Students are strongly encouraged to review these dates.

M.1 Application for Graduation

All students who expect to have their degrees or diplomas conferred must complete an online Application for Graduation, available through the Student Centre at https://my.ucalgary.ca. Students who do not complete an Application for Graduation before the posted deadlines will not be cleared to graduate. The deadlines for degree conferment are January 15 for Winter, March 31 for Spring and September 10 for Fall.

At the time of the application, students will also be asked if they wish to attend the Convocation Ceremony (http://www.ucalgary.ca/registrar/grad).

M.2 Convocation Requirements

In order to be cleared to graduate, thesis-based students must successfully pass a final thesis oral examination, submit an electronic copy of the thesis to the University of Calgary Theses Repository, the Vault: http://theses.ucalgary.ca, a University of Calgary Partial Copyright Licence, and a Department Recommendation for Convocation Clearance form to the Faculty of Graduate Studies, and fulfill graduate program requirements for the submission of thesis copies.

If a student has not been cleared to graduate before the student’s next annual registration date, the student must register. If the student fails to register, the student will be withdrawn for failure to register.

When the student subsequently applies for re-admission to graduate, the student will be assessed fees retroactive to the date of withdrawal.

N. Appeals

The University recognizes that there are instances when a student may wish to challenge University decisions about grades or academic policy. When a dispute arises, every effort should be made to resolve the issues informally rather than resort to a formal appeal. If, however, a formal appeal is necessary, the student should follow the Appeals Procedures that are described below.

Appeals for reappraisal of graded term work, reappraisal of final grades, and other academic appeals are pursued through the teaching Faculty (the Faculty offering the course).

The Faculty of Graduate Studies Appeals Committee hears appeals against rulings by the Dean of Graduate Studies, or designate. Students may obtain help in understanding the appeals process and in writing appeal letters from the Student Ombuds Office. For more information, visit www.ucalgary.ca/provost/students/ombuds.

N.1 Reappraisal of Graded Term Work

A student who feels that a piece of graded term work (term paper, essay, test, etc.) has been unfairly graded may have the paper re-graded as follows. The student shall discuss the work with the instructor within fifteen days of being notified about the mark or of the item’s return to the class. If not satisfied, the student shall immediately take the matter to the head of the department offering the course who will arrange for a reassessment of the work within the next fifteen days. Students in faculties without a departmental structure should take the matter to the Dean or the appropriate associate/assistant Dean of the Faculty offering the course. The result of that reassessment should be given to the student in writing.

The reappraisal of term work may cause the grade to be raised, lowered or to remain the same. There is no limit to the number of times that a student may request a reappraisal of term work.

N.1.A) Teaching Faculty Appeals Committee

Reappraisal of term work is generally settled at the departmental level. If the student is not satisfied with the decision and wishes to appeal, the student shall address a letter of appeal to the Dean of the Faculty offering the course within fifteen days of the unfavourable decision. In the letter, the student must clearly and fully state the decision being appealed, the grounds for appeal and the remedies being sought, along with any special circumstances that warrant an appeal of the reappraisal. The student should include as much written documentation as possible.

At this stage the Dean of the Faculty offering the course, at his or her discretion, may attempt to resolve the situation without proceeding to the Faculty Appeals Committee.
Academic Regulations

If the matter is not resolved to the student’s satisfaction, the appeal letter will be sent to the Faculty Appeals Committee.

The teaching Faculty Appeals Committee will not hear the appeal if the appeal letter does not detail the decision being appealed, grounds for appeal and outcome sought by the student, or if the chair of the Faculty Appeals Committee decides that sufficient grounds do not exist. If the appeal is to be heard and if the student has not already received a copy, the student is advised to request from the Dean’s office, a copy of the principles and procedures that govern the Faculty Appeals Committee for that Faculty. The procedures will detail the composition of the committee, the right of the student to have an advocate at the hearing, how the hearing will be conducted, and other information.

The Faculty Appeals Committee will report its decision to uphold or deny the appeal in writing to the Dean of the Faculty, the Registrar and the appellant as quickly as possible.

N.1.B) Reappraisal of a Final Grade

In the reappraisal of a final grade, the only elements that will be considered are the grading of the final examination, if any, together with a recalculation of the weighted components that make up the final mark. An exception may occur when an instructor evaluates a piece of graded term work or other component at the end of the session; that grade may also be considered in a reappraisal of final grade.

A student wishing a reappraisal of an individual final grade should first attempt to examine the final examination at the department or faculty office. Then the student shall obtain a Request for Reappraisal of Final Grade form from the Registrar’s Office (http://www.ucalgary.ca/registrar/forms_students). On that form the student is required to indicate exactly what error was made in marking the examination, and/or in computing the final grade and where the error can be found. The form will not be processed and the reappraisal will not take place unless the student provides a detailed rationale that outlines where and for what reason an error is suspected.

Students wishing a reappraisal of a final grade (excluding Law courses) must submit their request by the following dates: Fall Session - March 1, Winter Session - June 30, Spring Session - August 15, Summer Session - October 15.

The reappraisal form shall be sent/brought to the Registrar who shall forward it to the department head or Dean of the Faculty offering the course. Reappraisals of final grades are dealt with by the head of the academic unit in consultation with members of staff. Normally, the department/faculty will respond to a Request for Reappraisal of Final Grade within thirty days of its initiation. After the reappraisal is completed, the department shall return the form to the Registrar who shall inform the student in writing of the result of any request for reappraisal.

Students should be aware that the grade being reappraised may be raised, lowered or may remain the same. A student may request a reappraisal of final grade only twice in one academic year (July 1 - June 30).

Procedures for appealing a final grade reappraisal beyond the departmental level are detailed above in Appeals - Faculty Appeals Committee, and are the same for a final grade as for a piece of graded term work.

N.2 Appeals Against Faculty of Graduate Studies

Faculty of Graduate Studies Appeals Committee

If a student wishes to appeal a Faculty of Graduate Studies ruling (such as, but not limited to, the requirement to withdraw for academic reasons, the denial of continued registration, the denial of the right to graduate, specific requirements by the Faculty for the completion of a degree/course of study), the student shall address a letter of appeal to the Faculty of Graduate Studies Appeals Committee within fifteen days of the unfavourable decision.

In the letter of appeal, the student must clearly and fully state the ruling/decision being appealed, the grounds for appeal and the remedies being sought, together with all supporting evidence or documentation, if any. Mere dissatisfaction with a ruling is not sufficient grounds for an appeal.

In the process of deciding to initiate an appeal, the student may seek the assistance of the Student Ombuds Office.

If the appeal letter does not detail the decision being appealed, the grounds for appeal and the outcome sought by the student, or if the Chair of the Faculty Appeals Committee decides that sufficient grounds do not exist, the appeal will not be heard. If the appeal is to be heard and the student has not already received a copy, the student is advised to request from the Chair of the office, a copy of the principles and procedures that govern the Faculty Appeals Committee. These procedures will detail the composition of the committee, the right of the student to have an advocate at the hearing, how the hearing will be conducted, and other information.

This information can be found on the Faculty of Graduate Studies website: http://grad.ucalgary.ca/current/managing-my-program/appeal.

The Faculty Appeals Committee shall report, in writing, its decision to uphold or deny the appeal, to the Dean of Graduate Studies and the appellant as quickly as possible.

Please see the Faculty of Graduate Studies website for additional details on the procedures for appeals to the Faculty of Graduate Studies Appeals Committee: http://grad.ucalgary.ca/current/managing-my-program/appeal.

N.3 General Faculties Council’s Student Academic Appeals Committee

Procedures for appealing a final grade reappraisal beyond the Faculty Appeals Committee level are detailed below and are the same for a final grade as for a piece of graded term work.

General Faculties Council’s Student Academic Appeals Committee hears appeals of decisions made by Faculty Appeals Committees on matters of academic concern to students. The General Faculties Council’s Committee will hear an appeal only if there is reason to believe that the Faculty Appeals Committee showed bias, unfair procedures, or if there is substantial new evidence that could not have been presented to a Faculty Appeals Committee. Grades obtained in courses completed by the student in the appeals process will not be considered as new evidence. Before the General Faculties Council’s Committee will accept an appeal, the chair of that committee must be satisfied that departmental and Faculty appeals procedures have been fully utilized.

Students wishing to make an appeal to the Student Academic Appeals Committee must do so within fifteen days of the unfavourable decision from the Faculty Appeals Committee. A letter of appeal should be sent to the General Faculties Council’s Committee (Administration Building, Room 127), and must indicate the decision being appealed, the grounds for appeal (i.e., alleged bias, alleged unfair procedures, or substantial new information), and the remedies being sought by the student, together with all supporting documentation. The appeal letter should also state the levels of appeal that have already been utilized.

The General Faculties Council’s Committee will not hear the appeal if the chair decides that sufficient grounds do not exist.

A student whose appeal is to be heard by the General Faculties Council’s Committee is entitled to obtain from the Secretary to General Faculties Council the principles and procedures governing the General Faculties Council’s Committee. These procedures will detail the composition of the committee, the right of the student to have an advocate, how the hearing will be conducted and other information.

The committee will normally give fifteen days written notice of a hearing to the appellant and to the head of the academic unit against whose office the appeal is being made. Normally, the General Faculties Council’s Committee will hear an appeal within thirty days of its acceptance. The chair of the General Faculties Council’s Committee will convey the committee’s findings in writing to the appellant, the respondent, the Secretary to General Faculties Council and the Registrar.

For more specific information and other principles governing student academic appeals, the Secretary to General Faculties Council should be consulted.

N.4 Academic Appeals

1. The Appeals Process - In the case of appeal of a grade, the appeal should be to the Appeals Committee of that Faculty offering the course. A student who is placed on probation, suspended, or expelled from the Faculty of Graduate
Academic Regulations

Studies, may appeal that decision, or any other Faculty of Graduate Studies ruling, to the Faculty of Graduate Studies Appeals Committee. The appeal, which must be initiated within fifteen days of the receipt of the letter from the Dean or his/her delegate, shall be in writing, addressed to the chairperson of the appropriate committee, and shall state specifically (a) the decision which is being appealed, (b) the grounds for the appeal, (c) the remedy being sought.

2. Sufficient Grounds - A student must satisfy the Appeals Committee that there are sufficient grounds for appeal. The principles applicable to an appeal to a Faculty Committee are those of fairness as set down in relation to the Student Academic Appeals Committee of General Faculties Council that are filed with the Secretary to General Faculties Council. It is recognized that the specific procedures used to attain fairness may vary from one Faculty to another.

3. Appeal from a Faculty Appeals Committee - Where a student is unsuccessful in an appeal to a Faculty Appeals Committee, he/she may appeal that decision to the Student Academic Appeals Committee of General Faculties Council, subject to the principles and procedures of the General Faculties Council’s Committee as approved by General Faculties Council and filed with the Secretary to General Faculties Council.

4. Notification to the Registrar - When an appeal has been lodged by a student, the Registrar shall be notified by the chairperson of the Faculty Appeals Committee or General Faculties Council’s Committee, as the case may be, of that fact, and of the disposition of the case by that body.

5. The Position of a Student Launching an Appeal Against Suspension or Expulsion - Where a student’s appeal against suspension or expulsion is accepted for hearing and is under consideration by an appeals committee, a student shall be granted tentative registration and permitted to attend classes. If the appeal succeeds, the student will be officially registered and assessed fees retroactively to the beginning of the session.

6. The Position of a Student Whose Appeal Against Suspension or Expulsion is Unsuccesful - In cases in which the student has been allowed to attend classes pending the disposition of an appeal and the appeal fails, the original date of the suspension or expulsion stands.

7. The Effect on a Student’s Permanent Record - Where a student has been suspended, expelled or placed on disciplinary probation and does not launch an appeal within fifteen days, or his/her appeal is unsuccessful, the notation “suspended or expelled from or placed on disciplinary probation by the Faculty of Graduate Studies, for academic misconduct” will be entered on the student’s permanent record upon receipt of such notice by the Registrar from the Dean of the Faculty.

Where a student is suspended or expelled prior to the completion of the session, the symbols RW (required to withdraw) will be entered in the grade column on the student’s record in the courses in which he or she was registered for that session, except for the course(s) in which an “F” grade has been given as a penalty. Where a student is suspended after the completion of a session the final grade will be entered on the student’s record in the courses in which he or she was registered for that session except for the course(s) in which an “F” grade has been given as a penalty. A student’s record will be cleared of the notation “placed on disciplinary probation for academic misconduct” when the probationary period has been completed, or upon completion of a degree program, or after three years have elapsed, whichever comes first. A student’s record will be cleared of the notation “suspended for academic misconduct” at the time of readmission to the same Faculty, upon readmission to and completion of a degree program in another Faculty, or after three years have elapsed, whichever comes first. At the time the record is cleared of the notation, the “RW” symbols will be changed to “W”, but any “F” grades, as given because of plagiarism, cheating or other academic misconduct, will remain “F’s. A student’s record will not be cleared of the notation “expelled for academic misconduct.” These regulations also apply to students on probation, suspension or expulsion for non-academic misconduct (see below).

N.5 Further Information About Other Appeals and Petitions to the University

It is expected that the procedures outlined above will be sufficient to deal with any student appeal. Students should note, however, that the current University Act, Section 45(2) states: “Subsection (1) does not take away or impair the right of any student or group of students to petition any of the governing bodies of the University in respect of any matter, but such petition shall be in writing and shall be transmitted to the governing body through the president of the university.” The Board of Governors has approved principles and guidelines to guide its Student Discipline Appeal Committee in considering student petitions. However, the Board of Governors recognizes that the General Faculties Council is the final body of appeal with respect to academic matters including, but not limited to, grades, examinations, refusal of continued registration, or the requirement to withdraw from the University for academic reasons. The Student Discipline Appeal Committee will not attempt to evaluate the merits of any course or program grade, or of any other decision relating to an academic matter. The Board of Governors and the Student Discipline Appeal Committee of the Board of Governors do not have any jurisdiction to determine petitions received from students pursuant to section 26(1) and 31(1) of the Post-Secondary Learning Act, where the petitions are in relation to courses offered and marked at an educational institution other than the University of Calgary, notwithstanding that the course may be credited toward a University of Calgary degree program.

A petition to the Board of Governors must be forwarded in writing to the University Secretary. The nature of the petition and the remedies sought by the petitioner(s) shall be clearly stated in a letter, and all supporting evidence or background materials included. If the Student Discipline Appeal Committee finds that the case has merit, the matter may be returned directly to the appropriate jurisdiction for a rehearing. In the case of substantially academic matters, referral will be to General Faculties Council for its determination as to the appropriate level of jurisdiction. The Student Discipline Appeal Committee may allow a hearing if it accepts jurisdiction in the matter and deems the facts to warrant such a hearing.

The Student Discipline Appeal Committee will not hear a petition for any remedy that may be obtained through existing appeal procedures within the University before those appeal procedures have been fully utilized, nor will academic decisions be set aside on the basis of minor irregularities in procedure.

In the case of a petition challenging a decision of the University body on procedural grounds such as breaches of natural justice or fairness, the Student Discipline Appeal Committee will normally refer the issue back to the level of appropriate jurisdiction for a rehearing and new determination of the question. In the case of a petition challenging a decision in which the student is denied permission to register, the student shall not be registered while the petition is before the Board.

For more specific information on the principles and procedures governing student petitions to the Board of Governors, the Secretary to the Board of Governors should be consulted.

N.6 Continued Registration While Under Appeal

Students who appeal academic decisions to the teaching Faculty Appeals Committee or the General Faculties Council’s Student Academic Appeals Committee have the right to continue their registration and to attend classes during the appeal process. The student is required to pay all fees. If the appeal fails, the student’s registration will be cancelled, regardless of the date, and all fees refunded in full. Students petitioning the Board of Governors are not permitted to register while under petition.

0. Statement of Intellectual Honesty

Intellectual honesty is the cornerstone of the development and acquisition of knowledge.
Academic Regulations

Knowledge is cumulative and advances are predicated on the contributions of others. In the normal course of scholarship these contributions are apprehended, critically evaluated, and form a foundation for further inquiry. Intellectual honesty demands that the contribution of others be acknowledged. To do less is to cheat. To pass off contributions and ideas of another as one’s own is to deprive oneself of the opportunity and challenge to learn and to participate in the scholarly process of acquisition and development of knowledge. Not only will the cheater or intellectually dishonest individual be ultimately his/her own victim but also the general quality of scholarly activity will be seriously undermined.

It is for these reasons that the University insists on intellectual honesty in scholarship. The control of intellectual dishonesty begins with the individual’s recognition of standards of honesty expected generally and compliance with those expectations.

With respect to student work in a course, it is the responsibility of the instructor to specify the academic requirements of the course.

P. Statement on Principles of Conduct

This statement applies to all members of the University community – including students, faculty, administrators, any category of staff, practicum supervisors, examiners, and volunteers. This statement applies in all situations where the persons are acting in their University capacities, whether or not on the University’s property. It also applies to visitors or any other persons on University property, and to persons with whom the University contracts for services.

All members of the University community have a responsibility to familiarize themselves with the Statement on Principles of Conduct and to conduct themselves accordingly. For more information, visit http://www.ucalgary.ca/odepd/protected-disclosure/u-cs-policies-procedures.

Q. Student Misconduct

A single offence of cheating, plagiarism, or other academic misconduct, on academic work may lead to disciplinary probation or a student’s suspension or expulsion from the Faculty if it is determined that the offence warrants such action.

For more information, see the Student Misconduct section in the University Calendar.

R. Academic Misconduct - Criminal Offence

Where there is a criminal act involved in plagiarism, cheating or other academic misconduct, e.g., theft (taking another student’s paper from his/her possession, or from the possession of a Faculty member without permission), breaking and entering (forcibly entering an office to gain access to papers, grades or records), forgery, impersonation and conspiracy (impersonating another student by agreement and writing his/her paper) and other such offences under the Criminal Code of Canada, the University may take legal advice on the appropriate response and, where appropriate, refer the matter to the police, in addition to or in substitution for any action taken under these regulations by the University.

S. Non-Academic Misconduct Policy

The goal of this policy is to provide a clear and transparent process for managing and addressing non-academic misconduct and to do so in a manner that is centralized and follows the principles of natural justice.

The primary objective is to ensure that appropriate Student behaviour is maintained in a diverse educational environment. For more information, visit http://ucalgary.ca/centre.

T. Integrity in Scholarly Activity

In addition to its regulations dealing with student academic misconduct, the University has a policy and procedures governing the scholarly integrity of members of the University’s Faculty and persons holding postdoctoral fellowships or their equivalent. The policy and procedures are titled Integrity In Scholarly Activity and apply to both teaching and research. For more information, visit http://www.ucalgary.ca/odepd/protected-disclosure/u-cs-policies-procedures.

U. Sexual Harassment

The University of Calgary recognizes its moral and legal responsibilities to protect its students, staff and Faculty against sexual harassment and has established a Sexual Harassment Policy and related procedures to deal with this serious issue. For more information, visit http://www.ucalgary.ca/odepd/resources.

V. Policy of Support for Persons with Life Threatening Communicable Illnesses

The University recognizes that persons suffering from life threatening communicable illnesses have a right and a responsibility to continue in their regular work or academic pursuits as long as they are capable of carrying out the duties and obligations associated with those pursuits; and recognizes that individuals who contract a life threatening communicable illness, including AIDS, are entitled to continue in their employment or studies provided that the health, safety and well being of others are not endangered.

The University is guided in the application of this policy by current research findings and medical advice relevant to the individual case.

All members of the University community are urged to recognize the responsibility they have for ensuring that those with such illnesses are treated in a caring and supportive manner.

W. Vacation

Graduate students are entitled to two weeks of annual vacation. The two weeks of vacation do not include statutory holidays or days designated by the University as closed.

W.1 Vacation Time and Scholarships

Graduate students holding twelve month scholarships are entitled to two weeks of vacation during the twelve month period. The two weeks of vacation do not interrupt the payment of the scholarship.

W.2 Vacation Time and Employment

In keeping with the Alberta Employment Standards Code and the Alberta Employment Standards Regulations, graduate students employed by the university or by a member of the academic staff at the university, are entitled to two weeks of vacation after twelve months of employment or prior to competing a full twelve months of employment if the employer agrees. In the case of graduate student employees who have already received payment in lieu of vacation (for example, as a graduate assistant/teaching/non-teaching), the time off will be without pay.

See the GSA Collective Agreement, available at www.gsa.ucalgary.ca/assistantships, for more information.
5. Program/Course Requirements
In addition to the Faculty requirements, the Department requires:

Master of Arts
Candidates for the MA degree are normally required to complete a minimum of 12 units (2.0 full-course equivalents) in Anthropology at the 600 level. At the discretion of the Graduate Committee, students with deficient background may be required to take a total of 15 units (2.5 full-course equivalents) of course work in Anthropology. The following courses are required of all master’s students: Anthropology 803, 605, 611 or 613, 631 or 635.

Doctor of Philosophy
a) A specialization of either primatology, or social and cultural anthropology.
b) Anthropology 701, a reading course in the student’s substantive area. Beyond that, the supervisory committee will individually tailor each student’s course requirements to the student’s particular needs.
c) For social and cultural anthropology, fieldwork outside the student’s broad cultural milieu for a minimum of one year. Students in primatology will be required to collect primary data via experimental and/or observational research on wild or captive primate populations for a period of not less than twelve months.
d) Demonstrated proficiency in a language other than English. Normally, in the course of the doctoral program, competent faculty in other Departments will evaluate the student’s linguistic competence, principally in reading and writing.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599, which are considered undergraduate courses.

8. Time Limit
Expected completion time is two years for the Master of Arts degree and four years for the Doctor of Philosophy degree. Maximum completion time is four years for the Master of Arts degree and six years for the doctoral degree.

9. Supervisory Assignments
A supervisor is assigned to each student upon entering the program.
10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the Department requires:

Candidacy
The doctoral candidacy examination has a written and an oral component, and examines areas of knowledge determined by the supervisory committee in consultation with the student. Questions on the research proposal will not be included in the oral candidacy examination.

Thesis Examination
Final thesis oral examinations are open.

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee
The Internal Examiner must be external to the home program.

11. Research Proposal Requirements
Students are required to submit and successfully defend a research proposal fourteen months after initial registration. The defence is open to interested faculty members and graduate students of the Anthropology Department.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance in the form of research and teaching assistantships is available to qualified students. Information on awards can be obtained from the Department office or in the Awards and Financial Assistance section of this Calendar. All students are strongly encouraged to seek external financial assistance for the program, as the Department of Anthropology and Archaeology cannot guarantee the availability of financial assistance.

Students applying for the Graduate Awards Competition scholarships must submit their applications to the Department by January 25.

14. Other Information
For information about the rules and regulations, and the facilities available to anthropology graduate students, please contact the Graduate Administrator at nethier@ucalgary.ca.

15. Faculty Members/Research Interests
Faculty members and their research interests can be found at http://antharky.ucalgary.ca or by contacting the Graduate Administrator Nicole Ethier at nethier@ucalgary.ca.

Archaeology ARKY
Contact Information
Location: Earth Sciences Building, Room 620
Program number: 403.220.7131
Fax: 403.284.5467
Email address: nethier@ucalgary.ca
Web page URL: http://antharky.ucalgary.ca

1. Degrees and Specializations Offered
- Doctor of Philosophy (PhD)
- Master of Arts (MA), thesis-based

Specialization:
- Biological Anthropology (Interdisciplinary)*
  *See the Calendar section on Interdisciplinary Specializations for further information.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

a) A specimen of relevant written work (an honours essay, term paper, or seminar essay bearing the grade and initials of the supervising professor, the analysis chapter of a Master of Arts thesis or a published article where the applicant is the sole or senior author).

b) A concise statement setting forth the reasons for wishing to pursue graduate work in this department.

c) An up-to-date curriculum vitae.

d) A 3.30 grade point average in the last two years of program or over the last 60 units (10 full-course equivalents).

e) Two letters of reference from individuals able to evaluate academic potential.

3. Application Deadline
The deadline for the submission of complete applications is January 15 for September admission.

4. Advanced Credit
The Department does not normally give advanced credit.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

Master of Arts
a) Normally, 12 units (2.0 full-course equivalents) including one of the following, as determined by the student’s evaluation committee: Archaeology 615 or 617.

b) One of: Archaeology 615 or 617.

c) Two courses, which may include: Anthropology 605, Archaeology 601, a course in human osteology, or other courses as determined by the student’s evaluation committee.

d) One of: Archaeology 625, 627, 631, 633, 635.

e) A season of fieldwork or the equivalent.

Doctor of Philosophy
a) Normally, 18 units (3.0 full-course equivalents) in Archaeology.

b) For those without a Master of Arts degree, normally 24 units (4.0 full-course equivalents).

Note: The number of courses required of each student may vary according to each student’s particular needs as determined by the supervisory committee.

c) Unless previously satisfied, Archaeology 601 and one of the following: Archaeology 615 or 617.

d) Two of: Archaeology 625, 627, 631, 633, 635.

e) Anthropology 605 or its equivalent.

Other courses will be required as determined by the student’s evaluation committee.

f) A research proposal approved by a committee consisting minimally of three members of his or her supervisory committee, and by the Graduate Program Director. This must be submitted within twenty months of entering the program.

g) A reading ability in a foreign language acceptable to the Department. The student’s supervisory committee will decide the manner of demonstrating this ability.

Requirements (a) through (g) must be completed before sitting the written and oral components of the candidacy examination.

h) Normally, two seasons of fieldwork.

However, students specializing in laboratory-based topics, like physical anthropology, may substitute an approved program of laboratory work for one of the fieldwork seasons.

6. Additional Requirements
During the first two weeks in program, each student will undergo an evaluation. This is not an examination but an assessment of academic background. The specific regulations and procedures covering evaluations and examinations are on file in the Department Office and available to students. It is the responsibility of every student to become familiar with these regulations.

Fieldwork may be counted towards fulfillment of the full-time study and research requirement.

7. Credit for Undergraduate Courses
Normally only courses at the 500 level or higher may be taken for credit toward a graduate program. No more than two courses may be at the 500 level.

8. Time Limit
Expected completion time is two years for the Master of Arts degree and four years for the Doctor of Philosophy degree. Maximum completion time is four years for the Master of Arts degree and six years for the doctoral degree.

9. Supervisory Assignments
The Department assigns an interim advisor to each student upon arrival. At any time before the end of the first year of studies, each student must select a faculty member...
to serve as supervisor. The interim advisor may become the supervisor.

Doctoral supervisory committees may be appointed at any time during the first year of studies, but no later than three months after the appointment of the supervisor. The supervisor, in consultation with the student, selects the committee.

10. Required Examinations
Questions on the research proposal will not be included in the oral candidacy examination.

Thesis Examination
Final thesis oral examinations are open. In addition to the Faculty of Graduate Studies requirements, the Department requires: Scheduling of the Examination
All members of the supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.
Composition of the Committee
The Internal Examiner must be external to the home program.

11. Research Proposal Requirements
Within twenty months of entering the program, the student, with the supervisor’s advice, develops a thesis research proposal. This is then transmitted to the student’s supervisory committee for agreement and to the Graduate Program Director for approval and placed on file.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance in the form of research and teaching assistantships may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.

Students applying for Graduate Award Competition scholarships must submit their applications to the Department by January 25.

Funding is provided to students so that they can concentrate on their courses and research. Therefore, a graduate student is not allowed to work for more than 15 hours a week while holding departmental funding. Failure to abide by this policy will result in a decrease in or cancellation of departmental funding.

14. Other Information
The Department has laboratories equipped for anthropometric and osteological analysis, faunal analysis, and microbotanical and geoarchaeological research. A number of teaching and comparative archaeological and zooarchaeological collections are maintained. Field equipment including survey, photographic and camping equipment is available.

15. Faculty Members/Research Interests
The active research interests of current faculty members can be found at http://antharky.ucalgary.ca or by contacting the Graduate Administrator Nicole Ethier at nethier@ucalgary.ca.

Note: Individual specializations are also listed in the Department’s Graduate Brochure, published annually, and available upon request from the Department.

Art ART

Contact Information
Location: Art Building 612
Program number: 403.220.6260
Fax: 403.289.7333
Email address: artgrad@ucalgary.ca
Web page URL: http://art.ucalgary.ca/

1. Degrees and Specializations Offered
Master of Fine Arts (MFA), thesis-based
Students applying for the MFA degree offered by the Department of Art may choose to identify one of the following formal specializations:
Specializations:
• Sculpture
• Printmaking
• Photography
• Painting
• Drawing
• Media art and technology

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

a) A four-year Bachelor of Fine Arts degree or equivalent qualification.
b) A portfolio of 20 recent works presented in jpeg format on disk.
c) A three to five page written statement of intent.
d) Two reference letters.

3. Application Deadline
The deadline for the submission of complete applications is January 15 for September admission.

4. Advanced Credit
Not applicable.

5. Program/Course Requirements
The program core for all Master of Fine Arts students is a minimum of 24 units (4.0 full-course equivalents). Within the first twelve months of the program each student must complete 6 units (1.0 full-course equivalent) 600-level studio course; 3 units (0.5 full-course equivalent) 600-level graduate seminar, and Art 601 and 605. Three units (0.5 full-course equivalent) 600-level graduate seminar and 6 units (1.0 full-course equivalent) 600-level studio course must be completed in the second twelve months of the program. In some circumstances, the Department may require a student to complete more than the mandatory 24 units (4.0 full-course equivalent).

6. Additional Requirements
Additional requirements for the Master of Fine Arts degree include an exhibition of the student’s work, a supporting paper, and an oral examination.

7. Credit for Undergraduate Courses
Not applicable.

8. Time Limit
Expected completion time for the Master of Fine Arts degree is two years. Maximum completion time is four years.

9. Supervisory Assignments
Each new student is assigned an interim advisor to assist in the planning of the academic program and in orienting the student to the Department’s physical and academic resources. A permanent supervisor is appointed by January 1 of the first academic year of registration. The approval of a permanent supervisor, by the Graduate Program Director, is made after consultation with the student. Supervisors work closely with students in all phases of the program; they have the principal responsibility in assessing the student’s performance, and advising the Department Head of the student’s progress.

10. Required Examinations
Thesis Examination
Final thesis oral examinations are open. In addition to the Faculty of Graduate Studies requirements, the Department requires: Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s progress. The approval of the permanent supervisor, by the Graduate Program Director, is made after consultation with the student. Supervisors work closely with students in all phases of the program; they have the principal responsibility in assessing the student’s performance, and advising the Department Head of the student’s progress.

11. Research Proposal Requirements
Not applicable.

12. Special Registration Information
The program requires an initial registration as a full-time graduate student for two consecutive years. A minimum of twenty-four months of full-time study is usually necessary to complete the degree requirements.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on
awards see the Awards and Financial Assistance section of this calendar. Students applying for scholarships must submit their applications to the Department of Art by January 15.

14. Other Information
The Department has extensive facilities for drawing, painting, sculpture, digital and silver-based photography, printmaking, and media arts.

15. Faculty Members/Research Interests
Faculty members and their research interests can be found at http://art.ucalgary.ca/contact-us/directory.

Biological Sciences BISI
Contact Information
Location: Biological Sciences Building, Room 186
Program numbers: 403.220.6623 and 403.220.7790
Fax: 403.289.9311
Email address: biograd@ucalgary.ca
Web page URL: http://www.bio.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based
Specializations:
• Biochemistry
• Biophysical Chemistry
• Cell Biology
• Developmental Biology
• Ecology
• Environmental Microbiology
• Evolutionary Biology
• Molecular Microbiology
• Physiology
• Structural Biology
• Host-Pathogen Interactions
• Energy and Environmental Systems (Interdisciplinary Specialization)*

*See the Calendar section on Interdisciplinary Specializations for further information.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Science requirements, the Department requires:

a) A minimum grade point average of 3.20 on a four-point scale during the last two full years or equivalent.

b) For students required to provide proof of proficiency in English; a TOEFL score of 580 (paper-based) or 92 (Internet-based test), or an IELTS score of 7.5, or a MELAB score of 82, or a PTE score of 64.

3. Application Deadline
Deadlines for submission of complete applications for students with international transcripts:
- May 1 for September admission
- September 1 for January admission
- January 1 for May admission

Deadlines for submission of complete applications for students with Canadian or U.S. transcripts:
- June 1 for September admission
- October 1 for January admission
- March 1 for May admission

4. Advanced Credit
Not applicable.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Science requirements, the Department requires:

a) Completion of a minimum of 6 units (1.0 full-course equivalent) for both the Master of Science and doctoral programs. Students transferring from the MSc program to the PhD program will be required to take a minimum of 3 units (0.5 full-course equivalent) in addition to work already completed. Please note that graduate courses must be chosen in consultation with the supervisor and approved by the Graduate Program Director. Course requirements may include courses offered by other Departments.

b) Completion of the appropriate number of Biology 601 Research Seminar courses in addition to (a) above.

c) Presentation of a Departmental Pre-Defense seminar on the results of the thesis research.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
At least one-half of a graduate student's coursework must be at the 600 level or higher.

Only when appropriate to a student's program may graduate credit be received for courses numbered 500-599, which are considered undergraduate courses. Courses below the 500 level will not be accepted for graduate credit.

8. Time Limit
Expected completion time is two years for the Master of Science degree and four years for the Doctor of Philosophy degree. Maximum completion time is four years for the Master of Science degree and six years for the Doctor of Philosophy degree.

9. Supervisory Assignments
Applicants must contact faculty members directly regarding supervision of their graduate program, prior to submitting an application. The Department does not accept students unless at least one faculty member has indicated a willingness to act as supervisor. For both MSc and PhD programs, the supervisor, in consultation with the student, selects a Supervisory Committee consisting of the supervisor and at least two other faculty members whose research experience will be beneficial to the student's graduate program.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the Department requires:

Candidacy
Doctoral Candidacy Examinations have a written component followed by an oral component. Doctoral candidates are given three weeks to complete a critical review essay and either a simulated research proposal or a focused essay, as determined by the Examination Committee. All written and oral components of the Candidacy Examination will focus on the student's field of specialization, as identified previously by the Examination Committee. One week after the submission of the written answers, the oral component will take place. The oral candidacy exam will be based on the written essays and general research knowledge. Questions on the research proposal will not be included in the oral candidacy examination.

Thesis examination
Final Thesis Examinations are required at both the Master of Science and doctoral level. A public “Exit” Seminar preceding the examination is required.

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student's research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner must be external to the home program.

11. Research Proposal Requirements
Master of Science students must present a written research proposal to their supervisory committee no later than six months after initial registration in program. Doctoral
students must present a written research proposal no later than twelve months after initial registration in program.

12. Special Registration Information
A request to transfer from the Master of Science program to the doctoral program may be made no later than twenty-four months after initial registration. Students who transfer will be required to take one additional 3 units (0.5 full-course equivalent), regardless of course work completed before the transfer, and are expected to meet the 36-month deadline for the candidacy examination.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Students applying for the Open Scholarship Competition must submit their scholarship applications to the Department of Biologial Sciences by the appropriate deadline. Please contact georges@ucalgary.ca for further information.

14. Other Information
None.

15. Faculty Members/Research Interests
The research interests of current faculty members can be found at http://bio.ucalgary.ca/research/index.html.

Biomedical Engineering BMEN

Contact Information
Location: ENA 121C
Program number: 403.220.3835
Fax: 403.210.8119
Email address: bmegrad@ucalgary.ca
Web page URL: http://www.ucalgary.ca/bme/graduate

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based
Master of Engineering (MEng), thesis-based

Specialization:
• Medical Imaging (Interdisciplinary)*

* MSc and PhD degrees only. See the Calendar section on Interdisciplinary Specializations for further information.

The curriculum is designed for students with degrees in Engineering, Medicine, Physical Sciences, or Life Sciences. Background experience and qualifications, as well as areas of interest of the applicants will be taken into account at the time of admission. The appropriateness of the undergraduate preparation of the applicant must be supported by the proposed supervisor(s). Students in the MSc and PhD degree programs are normally considered full-time.

2. Admission Requirements
In addition to Faculty of Graduate Studies, the program requires: minimum GPA requirements are 3.00 for the MEng (thesis-based) program, 3.20 for the MSc program, and 3.50 for the PhD program, all on a four-point scale.

For admission to the MEng (thesis-based) program, students must provide two reference letters with their application package.

For admission to the MEng (thesis-based) program, students must have an approved four-year undergraduate degree in engineering.

MEng (thesis-based), MSc and PhD students can only be accepted upon identification of one or more approved Biomedical Engineering Graduate Program supervisors who are willing to supervise and fund the applicant (funding for MSc and PhD students only).

International students are required to demonstrate proficiency in the English language, in accordance with the guidelines of the Faculty of Graduate Studies. All students must meet the admission requirements of both the Faculty of Graduate Studies and the Biomedical Engineering Graduate Program.

Transfer of appropriately qualified MSc students directly into the PhD program is encouraged. Students wishing to transfer must do so between 8 and 16 months of first registration. For transfer, a minimum GPA of 3.50 is required (over a minimum of 9 units (1.5 full-course equivalents)), including Biomedical Engineering 600 (or 612) and 614. In addition, a research proposal, approved by the supervisory committee, must be submitted to the Biomedical Engineering Graduate Program. Applications for transfer must be supported by both the supervisor and the supervisory committee.

3. Application Deadline
Students applying for MSc and PhD programs may be admitted for September, January, or May. Students applying for the MEng (thesis-based) program may be admitted for September start only. For all programs, deadlines are three months prior to the start of the semester (i.e., June 1 for September admission, etc.) for students holding a degree from a recognized Canadian or U.S. University, and six months prior to the start of the semester (i.e., March 1 for September admission, etc.) for students holding a degree from another recognized international University.

4. Advanced Credit
Credit may be granted with approval of the Biomedical Engineering Graduate Program. Advanced standing will not be granted for Biomedical Engineering 600, 602 or 604.

5. Program/Course Requirements
Master of Science/Doctoral of Philosophy
For a Master of Science (MSc) degree, all students are required to take a minimum of 12 units (2.0 full-course equivalents) as approved by the Biomedical Engineering Graduate Program. This must include Biomedical Engineering 600, 602 and 604.

For a Doctor of Philosophy (PhD), two further courses (6 units) are required beyond the Master of Science requirements. For students who transfer from an MSc program, 18 units (3.0 full-course equivalents) at the graduate level are required beyond the BSc, or equivalent, degree. All PhD students are required to take Biomedical Engineering 600, 602 and 604.

All students may choose other courses from the listing of Additional Courses or approved courses from other departments (see website for most recent information: http://www.ucalgary.ca/bme/graduate). Other relevant courses, not on the Additional Course list or Program’s website, require the approval of the supervisor and the Biomedical Engineering Graduate Program. Students may be required to take senior undergraduate courses as deemed by their Supervisory Committee, but graduate credit will only be granted for senior undergraduate courses as approved by the Biomedical Engineering Graduate Program.

In addition to the course requirements, all MSc and PhD students are required to complete a research project and to submit a written thesis in compliance with the regulations of the Faculty of Graduate Studies.

Medical Imaging Specialization
This specialization is open to MSc and PhD students and requires completion of a course sequence in Medical Imaging plus additional specialization requirements (see MEDI entry). MSc students must take a minimum of two courses (the MEDI core and a MEDI foundational course). PhD students must take three courses (including the MEDI core, a MEDI foundational and a MEDI elective course). PhD students previously completing the MSc Specialization in Medical Imaging will be required to complete one elective course in medical imaging. These requirements are in addition to the core program requirements of the BME Graduate Program. The Medical Imaging courses are counted towards BME Graduate Program elective courses.

Master of Engineering (thesis-based)
For a Master of Engineering (thesis-based), normally 24 units (4.0 full-course equivalents) are required, in accordance with the rules of the Biomedical Engineering Graduate Program and the Faculty of Graduate Studies.

All Master of Engineering (thesis-based) students are required to take Biomedical Engineering 600, 602 and 604 plus a project management course at the graduate level (usually Civil Engineering 691), a health economics course at the graduate level (usually Economics 679) and a clinical trials and bio-manufacturing course at the graduate level (usually Medical Science 669). Two of the remaining four courses must be chosen from the Additional Courses approved by the Biomedical Engineering Graduate Program for Master of Engineering (thesis-based).
Program Descriptions

students (see website for most recent information: http://www.ucalgary.ca/bme/graduate). The remaining two courses must include at least one Biomedical Engineering or Engineering course.

In addition to the course requirements, all Master of Engineering (thesis-based) students are required to complete a research project and to submit a written thesis in compliance with the regulations of the Faculty of Graduate Studies.

Core Courses
1. Biomedical Engineering 600 – Biomedical Engineering Foundations
2. Biomedical Engineering 602 – Biomedical Engineering Core I
3. Biomedical Engineering 604 – Biomedical Engineering Core II

Additional Courses in Theme 1: Bioelectrical Engineering
1. Electrical Engineering 663 – Numerical Electromagnetic Field Computation
2. Electrical Engineering 631 – System Identification and Parameter Estimation
3. Electrical Engineering 665 – Bioelectromagnetism

Additional Courses in Theme 2: Biomechanics
1. Biomedical Engineering 619.02 – Special Topics in Biological Tissue System Mechanics
2. Civil Engineering 651 – Finite Element Modelling
3. Civil Engineering 653 – Theory and Application of the Finite Element Method
4. Mechanical Engineering 653 – Continuum Mechanics
5. Mechanical Engineering/Kinesiology/Medical Science 663 – Advanced Biomechanics (Muscle)

Additional Courses in Theme 3: Cell and Tissue Engineering (Biomaterials)
1. Chemical Engineering 659 – Advanced Cell and Tissue Engineering

Additional Courses in Theme 4: Medical Imaging
1. Electrical Engineering 697 – Digital Image Processing
2. Medical Science 689.01 – Medical Imaging Techniques
3. Medical Science 689.02 – Advanced Magnetic Resonance Imaging
4. Medical Science 689.03 – Advanced Medical Image Processing

5. Medical Science 689.04 – Advanced Molecular Imaging

Additional Biomedical Engineering related courses may be listed under other departmental listings - see website for most recent information: http://www.ucalgary.ca/bme/graduate.

Courses are listed by theme, but students are not restricted to taking courses from within a theme. The supervisor and supervisory committee should be consulted for course selection. Courses not listed under Additional Courses or on the list at http://www.ucalgary.ca/bme/graduate require the approval of the Biomedical Engineering Graduate Program. Directed studies courses require approval of the Biomedical Engineering Graduate Program.

6. Additional Requirements
Not applicable.

7. Credit for Undergraduate Courses
Graduate credit may be given for 500-level courses. No more than 3 units (0.5 full-course equivalent) of credit will be allowed in MSc/PhD or MEng (thesis-based) program as approved by the supervisory committee, and the Biomedical Engineering Graduate Program.

8. Time Limit
In accordance with the Faculty of Graduate Studies regulations, the expected completion time for the MEng (thesis-based) degree is 18 months, for the MSc is 24 months and for the Ph.D is 48 months. Students transferring from the MSc to the PhD program are expected to complete studies within 60 months. Funding in the MSc and PhD programs may not be available after these expected completion times.

9. Supervisory Assignments
MSc and PhD students need a supervisor for admission to the program. The Supervisory Committee should be selected jointly by the student and supervisor immediately upon entry into the MSc or PhD program and approved by the Biomedical Engineering Graduate Program. MEng (thesis-based) students will choose a supervisor in consultation with the Biomedical Engineering Graduate Program for admission to the program. The Supervisory Committee consists of the supervisor, co-supervisor (if appropriate), and two other members who normally hold academic appointment at the University of Calgary. Appointment of individuals who do not hold academic appointments at the University of Calgary is possible but requires the support of the Biomedical Engineering Graduate Program and the prior approval of the Faculty of Graduate Studies.

The supervisory committee will advise on course selection and research topic for the student. The supervisory committee will usually be cross-disciplinary, as required by the student’s research topic and deemed necessary by the supervisor in consultation with the Biomedical Engineering Graduate Program. The supervisory committee will recommend transfer to the PhD program for MSc students and certify the background preparation for PhD students prior to scheduling of the candidacy exam. All students will follow the guidelines of the Biomedical Engineering Graduate Program regarding supervision, frequency of committee meetings, course changes, thesis or project proposals, candidacy examinations, etc. as outlined in the Student Handbook. Membership on candidacy and examination committees requires the approval of the Biomedical Engineering Graduate Program.

10. Required Examinations
Scheduling of the Thesis Examination (MEng (thesis-based) and MSc, PhD)
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

MSc and MEng (thesis-based) Thesis Examination
In addition to Faculty of Graduate Studies regulations, the Biomedical Engineering Graduate Program requires the examining committee to consist of a minimum of five voting members: the supervisor (and co-supervisor if appropriate) and Supervisory Committee, one Internal Examiner, and one other member. The Internal Examiner must be external to the Biomedical Engineering Graduate Program. At least one of either a) the Supervisory Committee (excluding supervisor and co-supervisor) or b) the other member, must be a Biomedical Engineering Graduate Program Approved Supervisor.

The student shall make a public thirty minute presentation (20 minute presentation plus 10 minutes for questions) of his/her thesis research, normally immediately before the oral examination. Examining committee members should attend this presentation but should refrain from asking questions. The maximum allowable two-hour examination period does not include the time spent on student presentation.

Doctoral Candidacy Examinations
A written research proposal will be required before the oral candidacy exam can be completed. Prior to the oral candidacy exam, the supervisory committee must review and approve the written research proposal and assess the appropriateness of background preparation of the student. The oral candidacy exam must be completed within 16 months of first registration as a PhD student for direct entry with an MSc, and within the first 20 months for students who transfer from an MSc to PhD program.

In addition to Faculty of Graduate Studies regulations, the Biomedical Engineering Graduate Program requires the examining committee to consist of a minimum of four voting members: the Supervisory Committee members (excluding the supervisor and co-supervisor, if appropriate), one Internal Examiner, and one other member. The Internal Examiner must be external to the Biomedical Engineering Graduate Program. At least one of either a) the Supervisory Committee (excluding supervisor and co-supervisor) or
b) the other member, must be a Biomedical Engineering Graduate Program Approved Supervisor.

The student’s background knowledge in biomedical engineering and in-depth knowledge in his/her chosen research specialization is examined. The student may make a presentation (no longer than 15 minutes) at the beginning of the oral candidacy examination. The oral candidacy examination is to focus on two areas: 1) the proposed research project, and 2) the preparation of the candidate and the ability of the candidate to carry out research at the doctoral level. Note that the supervisor and co-supervisor are non-voting members of the Doctoral Candidacy Committee.

11. Research Proposal Requirements

Doctoral students must present a written research proposal to the supervisor and to the Biomedical Engineering Graduate Program no later than twelve months after initial registration. Current practice is for MSc and PhD students to enrol in Biomedical Engineering 604 (formerly Biomedical Engineering 614), which requires completion and oral presentation of a research proposal. The proposal, with an approval of the supervisor and the co-ordinator of Biomedical Engineering 604, must be sent to the Biomedical Engineering Graduate Program to be placed in the student’s file.

Doctoral Thesis Examination

The examining committee consists of a minimum of six voting members: the Supervisory Committee members (including the supervisor and co-supervisor, if appropriate), one Internal Examiner, one member external to the University of Calgary (External examiner), and one other member. The External Examiner must be external to the Biomedical Engineering Graduate Program. At least one of either a) the Supervisory Committee (excluding supervisor and co-supervisor) or b) the other member, must be a Biomedical Engineering Graduate Program Approved Supervisor.

The student shall make a public sixty minute presentation (45 minute presentation plus 15 minutes for questions) of his/her thesis research. The immediate oral examination. Examing committee members should attend this presentation but should refrain from asking questions during the presentation. The maximum allowable two-hour examination period does not include the time spent on student presentation.

12. Special Registration Information

None.

13. Financial Assistance

Students in MEng (thesis-based) programs do not receive funding, but may be eligible for awards or financial assistance. For information on awards, see the Awards and Financial Assistance section of this Calendar.

14. Other Information

A Master of Science, Master of Engineering, or Doctor of Philosophy in Biomedical Engineering does not entitle graduates to a designation of Professional Engineer. The title of Engineer, or Professional Engineer, is restricted to those who are members of a Provincial engineering association.

Please see the Biomedical Engineering Graduate Program website for the latest version of the Handbook of Policies and Procedures at http://www.ucalgary.ca/bme/graduate.

15. Faculty Members/Research Interests

Faculty members in this program are based in the Schulich School of Engineering, the Cumming School of Medicine and the faculties of Kinesiology, Veterinary Medicine and Science. Many Biomedical Engineering faculty are cross-appointed to multiple departments. Information about Biomedical Engineering faculty research can be found at http://www.ucalgary.ca/bme/graduate.

Chemistry CHEM

Contact Information

Location: Science A Building, Room 229
Program number: 403.220.6252
Fax: 403.284.1372
Email address: gradinfo@chem.ucalgary.ca
Web page URL: http://www.chem.ucalgary.ca/

1. Degrees and Specializations Offered

Master of Science (MSc), thesis-based PhD and MSc programs are available for full-time study only.

For a list of supported research areas, please see section 15.

2. Admission Requirements

In addition to Faculties of Graduate Studies and Science admission requirements, the Department requires:

Master of Science and Doctor of Philosophy

a) Two reference letters with reference forms. Letters and forms must bear the referee’s signature and the letter must be printed on official letterhead from the referee’s institution and sent in a sealed envelope or from an institutional email account. The reference form is available from http://www.ucalgary.ca/chem/grad/apply.

An appropriate letter of recommendation is one written by an individual who can provide an assessment of the applicant’s background and capabilities with respect to our department. An applicant currently registered in a graduate degree program, or who has recently completed a graduate degree program, must submit one letter of reference from his/her program supervisor.

b) For applicants required to prove proficiency in English, a TOEFL score of 580 (paper-based) 93 (Internet-based test), an IELTS score of 7.5, a MELAB score of 83, or a PTE score of 64.

Master of Science

For applicants with a Bachelor of Science (BSc) degree:

a) A four-year degree or its equivalent.

b) An admission grade point average of 3.00 or better on a four-point scale.

Doctor of Philosophy

For applicants with a Bachelor of Science (BSc) degree:

a) A four-year Honours degree or its equivalent.

b) An admission grade point average of 3.70 or better on a four-point scale.

For applicants with a Master of Science (MSc) degree:

a) A Master of Science degree recognized by the Faculty of Graduate Studies.

b) An admission grade point average of 3.30 or better on a four-point scale.

3. Application Deadline

Deadlines for submission of complete applications for students with international transcripts:

March 1 for September admission
July 1 for January admission
November 1 for May admission

Deadlines for submission of complete applications for students with Canadian transcripts:

July 1 for September admission
November 1 for January admission
March 1 for May admission

4. Advanced Credit

Advanced credit for graduate courses taken as an unclassified student, or qualifying student may be given for courses in which the student obtains a grade of “B” or higher. A reduction in course requirements may be given for students who completed graduate courses at other institutions. This will be determined on program entry and after consultation with the research supervisor and the graduate office.

5. Program/Course Requirements

In addition to Faculties of Graduate Studies and Science requirements, the Department requires:

Master of Science

a) Nine units (1.5 full-course equivalents) at the 500 level or above. Normally a minimum of 6 units (1.0 full-course equivalent) will be Chemistry courses.

Doctor of Philosophy

a) Twelve units (2.0 full-course equivalents) at the 500 level or above, for students entering with a four-year Honours BSc degree or
Communication and Culture CMCL

1. Degrees and Specializations
Offered

- Doctor of Philosophy (PhD)
- Master of Arts (MA), thesis-based
- Master of Communications Studies (MCS), course-based

The MA and MCS degrees may be completed on a full-time or a part-time basis.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Graduate program in Communication and Culture requires:

**Master of Arts**

- A statement of research intent (250-500 words).
- Two samples of written work.
- A detailed curriculum vitae.
- A completed baccalaureate degree in Communications Studies, Culture Studies or related field.
- Two Reference Letters and two completed Reference Forms.

**Master of Communications Studies**

The Department is not currently accepting applications to the Master of Communications Studies.

- A statement of research intent (250-500 words).
- Two samples of written work.
- A detailed curriculum vitae.
- A completed baccalaureate degree in Communications Studies or related field.
- Two Reference Letters and two completed Reference Forms.

**Note:** Master’s students must take 9 units (1.5 full-course equivalents) in each of fall and winter terms in the first year of their program to be considered full-time. There is no assurance of consideration for funding for part-time students.

**Doctor of Philosophy**

- A statement of research intent (500-1000 words).
- Two samples of written work.
- A detailed curriculum vitae.
- Completed baccalaureate and master’s degrees in Communications Studies, Culture Studies, or equivalent.
- Two Reference Letters and two completed Reference Forms.

3. Application Deadline
The deadline for the submission of complete applications is January 15 for September admission.

4. Advanced Credit
Advanced credit may be granted to students admitted to the MCS and PhD programs.

5. Financial Assistance

- Assistantships and Trust funded Assistantships are available in students' theses.
- Assistantships are available beyond twenty-eight months in a program.
- Assistantship funding is normally available to all qualified students in the form of Teaching Assistantships and Trust funded Assistantships. Assistantship funding is normally available beyond twenty-eight months in a master’s program.
- Financial assistance is normally available to each student, the supervisory committee and one additional member of the Department will meet with the student to decide the sub-discipline on which the student will be examined during the candidacy exam. The written component will consist of the finalized version of the research proposal, which is to be submitted 30 days before the oral examination. The proposal is limited to 25 pages (10 on background, 10 on proposed work, and 5 on original extensions of the work). Feedback on the proposal will be provided to the student prior to the oral examination; however, the assessment of the candidate’s overall performance will be determined by the oral examination only.

6. Special Registration Information

- None.

7. Credit for Undergraduate Courses

- All credit courses taken at the 200 level or higher and only where appropriate to a student’s program will graduate credit be given for courses numbered 500–599, which are considered undergraduate courses.
- In addition to course prerequisites, consent of the department is required.

8. Time Limit

- Expected completion time is two years for the Master of Science degree and four for the Doctor of Philosophy degree. Maximum completion time is four years for the Master of Science degree and six years for the doctoral program.

9. Supervisory Assignments

- Students are assigned an interim advisor (currently the Graduate Director) upon first registration in a program and must choose a permanent supervisor before the fifth month in program.
- Students in both the MSc and PhD programs must also choose two additional faculty members to serve as supervisory committee members.

10. Required Examinations

- In addition to the Faculty of Graduate Studies requirements, the Department requires:

**Candidacy**

- Doctoral students are required to complete written and oral candidacy examinations.
- Further details may be obtained from the Department’s Handbook of Graduate Studies available at: http://www.ucalgary.ca/chem/handbook.
- The oral examination component will include questions on the research proposal.

**Thesis Examination**

**Scheduling of the Examination**

Before an examination can be scheduled, all members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis.

**Composition of the Committee**

The Internal Examiner may be internal to the home program.

**Thesis examinations are open.**

11. Research Proposal Requirements

- Students will submit a draft research proposal two to four months before the oral candidacy examination. Within one week of receiving the proposal, the supervisory committee and one additional member of the Department will meet with the student to decide the sub-discipline on which the student will be examined during the candidacy exam.
- The written component will consist of the finalized version of the research proposal, which is to be submitted 30 days before the oral examination. The proposal is limited to 25 pages (10 on background, 10 on proposed work, and 5 on original extensions of the work).
- Feedback on the proposal will be provided to the student prior to the oral examination; however, the assessment of the candidate’s overall performance will be determined by the oral examination only.

12. Special Registration Information

- None.

13. Financial Assistance

- Financial assistance is normally available to all qualified students in the form of Teaching Assistantships and Trust funded Assistantships.
- Assistantship funding is not normally available beyond twenty-eight months in a master’s program.
- Financial assistance is normally available to students numbered 500–599, which are considered undergraduate courses.
- In addition to course prerequisites, consent of the department is required.

8. Time Limit

- Expected completion time is two years for the Master of Science degree and four for the Doctor of Philosophy degree. Maximum completion time is four years for the Master of Science degree and six years for the doctoral program.

9. Supervisory Assignments

- Students are assigned an interim advisor (currently the Graduate Director) upon first registration in a program and must choose a permanent supervisor before the fifth month in program.
- Students in both the MSc and PhD programs must also choose two additional faculty members to serve as supervisory committee members.

10. Required Examinations

- In addition to the Faculty of Graduate Studies requirements, the Department requires:

**Candidacy**

- Doctoral students are required to complete written and oral candidacy examinations.
- Further details may be obtained from the Department’s Handbook of Graduate Studies available at: http://www.ucalgary.ca/chem/handbook.
- The oral examination component will include questions on the research proposal.

**Thesis Examination**

**Scheduling of the Examination**

Before an examination can be scheduled, all members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis.

**Composition of the Committee**

The Internal Examiner may be internal to the home program.

**Thesis examinations are open.**

11. Research Proposal Requirements

- Students will submit a draft research proposal two to four months before the oral candidacy examination. Within one week of receiving the proposal, the supervisory committee and one additional member of the Department will meet with the student to decide the sub-discipline on which the student will be examined during the candidacy exam. The written component will consist of the finalized version of the research proposal, which is to be submitted 30 days before the oral examination. The proposal is limited to 25 pages (10 on background, 10 on proposed work, and 5 on original extensions of the work).
- Feedback on the proposal will be provided to the student prior to the oral examination; however, the assessment of the candidate’s overall performance will be determined by the oral examination only.

12. Special Registration Information

- None.

13. Financial Assistance

- Financial assistance is normally available to all qualified students in the form of Teaching Assistantships and Trust funded Assistantships.
- Assistantship funding is not normally available beyond twenty-eight months in a master’s program and fifty-two months in a doctoral program.
- For further information on awards, see the Awards and Financial Assistance section of this calendar.

14. Other Information

- None.

15. Faculty Members/Research Interests

- These areas do not constitute formal divisions, and the thesis research may cut across the traditional lines.
- The faculty members in the Department and their specific research interests can be found at http://www.chem.ucalgary.ca.

Fax: 403.210.8164
Email address: gradprog@ucalgary.ca
Web page URL: http://commfilm.ucalgary.ca/graduate

**1. Degrees and Specializations Offered**

- Doctor of Philosophy (PhD)
- Master of Arts (MA), thesis-based
- Master of Communications Studies (MCS), course-based

The MA and MCS degrees may be completed on a full-time or a part-time basis.

**2. Admission Requirements**

In addition to Faculties of Graduate Studies and Arts requirements, the Graduate program in Communication and Culture requires:

**Master of Arts**

- A statement of research intent (250–500 words).
- Two samples of written work.
- A detailed curriculum vitae.
- A completed baccalaureate degree in Communications Studies, Culture Studies or related field.
- Two Reference Letters and two completed Reference Forms.

**Master of Communications Studies**

The Department is not currently accepting applications to the Master of Communications Studies.

- A statement of research intent (250–500 words).
- Two samples of written work.
- A detailed curriculum vitae.
- A completed baccalaureate degree in Communications Studies or related field.
- Two Reference Letters and two completed Reference Forms.

**Note:** Master’s students must take 9 units (1.5 full-course equivalents) in each of fall and winter terms in the first year of their program to be considered full-time. There is no assurance of consideration for funding for part-time students.

**Doctor of Philosophy**

- A statement of research intent (500–1000 words).
- Two samples of written work.
- A detailed curriculum vitae.
- Completed baccalaureate and master’s degrees in Communications Studies, Culture Studies, or equivalent.
- Two Reference Letters and two completed Reference Forms.

**3. Application Deadline**

The deadline for the submission of complete applications is January 15 for September admission.

**4. Advanced Credit**

Advanced credit may be granted to students admitted to the MCS and PhD programs.
Approval of the Graduate Program Director is required. Advanced credit is not available to MA applicants.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Graduate Program in Communication and Culture requires the following:

**Master of Arts (18 units or 3.0 full-course equivalents)**
a) Nine units (1.5 full-course equivalents): Communication and Culture 601, 613 and 615.
b) Nine units (1.5 full-course equivalents) electives.
c) Three units (0.5 full-course equivalent) of the electives may be selected from other graduate programs; 3 units (0.5 full-course equivalent) of the electives may be Communication and Culture 711, Directed Studies.

**Master of Communications Studies (30 units or 5.0 full-course equivalents)**
a) Nine units (1.5 full-course equivalents): Communication and Culture 601, 605, and 615.
b) Fifteen units (2.5 full-course equivalents) electives.
c) Three units (0.5 full-course equivalent) of the electives may be selected from other graduate programs; 3 units (0.5 full-course equivalent) of the electives may be Communication and Culture 711, Directed Studies.

d) Six units (1.0 full-course equivalent): Communication and Culture 790, Master’s Project.

**Doctor of Philosophy (18 units or 3.0 full-course equivalents)**
a) Nine units (1.5 full-course equivalents): Communication and Culture 601, 615 or equivalent, and 713.
b) Nine units (1.5 full-course equivalents) electives.
c) Three units (0.5 full-course equivalent) of the electives may be selected from other graduate programs; 3 units (0.5 full-course equivalent) of the electives may be Communication and Culture 711, Directed Studies.

Note: PhD students who can show that they have taken Communication and Culture 601 or equivalent may substitute an elective.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Credit for undergraduate courses toward a master’s program will be given only in the case of the course being developed for graduate-level work. Students in the doctoral program will not be given credit for undergraduate courses.

8. Time Limit
Expected completion time is two years of full-time study or three years of part-time study for the Master of Arts degree and the Master of Communications Studies degree; and four years for the Doctor of Philosophy degree. Maximum completion time is four years for the Master of Arts degree, and six years for the Master of Communications Studies and Doctor of Philosophy degrees.

9. Supervisory Assignments
An interim advisor is assigned by the program in the first year. The student must choose a thesis supervisor by the beginning of the second year.

**Master of Communications Studies**
The Program Director or designate is the assigned interim advisor for the first two years of the student’s program for full-time and part-time students. The Program Director or designate is the supervisor for part-time students continuing past two years in the program. In the student’s Communication and Culture 790 project year, the project supervisor may or may not be the permanent supervisor of record.

**Doctor of Philosophy**
By June of the first year in program, the student must submit his/her proposed field of research and the name of his/her proposed supervisor for approval by the program. The supervisory committee must be appointed no later than three months after the appointment of the supervisor.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the Department requires:

**Candidacy**
Doctoral candidacy examinations have a written and an oral component. Students have three weeks to write papers in three areas relevant to their proposed research. The student’s supervisory committee sets the areas and the examination questions in consultation with the candidacy committee. The oral examination takes place one week after the completion of the written papers.

**Thesis Examination**

**Scheduling of the Examination**
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

**Composition of the Committee**
The Internal Examiner may be internal to the home program.

**11. Research Proposal Requirements**
Students whose research involves human subjects must receive approval from the University of Calgary Conjoint Faculties Research Ethics Board before beginning data collection.

**Master of Arts** – Thesis supervisor must approve proposal.

**Master of Communications Studies** – Project supervisor(s) must approve proposal.

**Doctor of Philosophy** – In consultation with the supervisory committee, before the candidacy examinations, each doctoral student is required to submit a preliminary thesis proposal that may serve as an additional basis for questioning. A more detailed, Final Thesis Proposal (including an Application for Ethics Approval where relevant), approved by the supervisory committee must be submitted to the graduate director within six months of the successful completion of the candidacy examination.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the awards and financial assistance section of this calendar (http://www.grad.ucalgary.ca/awards).

Students applying for the Graduate Awards Competition must submit their applications to the Department of Communication, Media and Film Graduate Programs Office by January 15.

14. Other Information
Inquiries concerning specific questions about the program and degree requirements should be directed to: Department of Communication, Media and Film, Graduate Programs, Social Sciences 222, University of Calgary, 2500 University Drive NW, Calgary, Alberta, Canada T2N 1N4.

15. Faculty Members/Research Interests
The active research interests of current faculty can be found at http://commfilm.ucalgary.ca/grad/facultyexpertise.

Note: Courses that are considered electives will be offered on the basis of student needs and contingent upon the availability of staff resources.

---

**Communications Studies**

**COMS**
Effective September 1, 2013, the Communication Studies program was replaced by graduate program in Communication and Culture. Please refer to the new program entry for further information.

---

**Computational Media Design CMD**

**Contact Information**
Location: Information and Communications Technology Building, Room 602
Program number: 403.220.7495
Fax: 403.284.4707
Email address: cmd@ucalgary.ca
Web page URL: http://www.cmd.ucalgary.ca

**1. Degrees and Specializations Offered**
Doctor of Philosophy (PhD)
Master of Science (MSc)
These degrees are offered jointly through the Department of Computer Science, Faculty of Science; Faculty of Environmental Design;
and Department of Art and School of Creative and Performing Arts, Faculty of Arts. Students may register in the MSc and PhD programs as part-time students only with permission from the CMD Steering Committee.

2. Admission Requirements

In addition to Faculty of Graduate Studies admission requirements, the CMD program requires two reference letters dated within twelve months of the date of application and:

Master of Science
a) While applicants from any discipline will be considered, undergraduate degrees in Computer Science, Arts, Music, or Design are favoured. Starting CMD with a background in one area is possible, but background in two areas is preferred.

b) For applicants required to provide proof of proficiency in English, a TOEFL score of 600 (paper-based) or 100 (Internet-based test), or an IELTS score of 7.5 or a minimum MELAB score of 84 or above is required.

c) For students applying with degrees from outside Canada, GRE scores are required. GRE General score of at least 600 verbal and 750 quantitative and either 720 analytical (old test format) or 5.5 (new test format). 

d) A single page statement of interest. This is not a proposal but a declaration of interest in interdisciplinary research in art, design, music and computer science.

e) Applicants must submit a portfolio that provides up to ten examples of their research and creative work. This may include any combination of academic publications and reports, images, video, audio recordings, musical scores, documentation of installations, and written works. Applicants may provide a URL to portfolio items that cannot be uploaded through the application system.

f) A demonstrated interest in interdisciplinary research in art, design, music and computer science.

Doctor of Philosophy
a) All the admission requirements for a Master of Science (above).

b) A master’s degree from a recognized institution. For exceptional students applying directly to the PhD program with a bachelor degree, all the requirements for a Master of Science (above) apply, plus demonstrated exceptional research and/or creative ability. These direct entry students will be considered on a case-by-case basis.

c) A curriculum vitae.

3. Application Deadline

Deadlines for the submission of complete applications:
1 February for September admission
1 May for January admission

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements

Graduate courses must be chosen in consultation with the supervisor(s) and approved by the CMD Director. Students are required to achieve a grade of at least "B" in all courses taken to fulfill CMD course requirements.

Seminar Requirement: Students are required to give a CMD seminar presentation on a topic related to their graduate research/creative practice.

Master of Science
a) Course Requirement:
• Computational Media Design Research Methodology (3 units or 0.5 full-course equivalent).
• One Computer Science graduate-level (3 units or 0.5 full-course equivalent).
• One graduate-level from Art, Environmental Design or Music (3 units or 0.5 full-course equivalent), and
• Two additional graduate-level courses (6 units or 1.0 full-course equivalent), for a total of 15 units (2.5 full-course equivalents).

• Additional courses can be required based on a case-by-case basis.

b) Supervision as specified in section 9.

c) A Master’s Thesis Proposal as specified in section 11.

d) Master’s Thesis.

e) Master’s Thesis Oral Examination as specified in section 11.

Doctor of Philosophy
a) Course Requirements: At least three graduate-level courses (9 units or 1.5 full-course equivalents) must be taken while the student is enrolled as a PhD student in Computational Media Design at the University of Calgary.

b) Breadth Requirements:
• Computational Media Design Research Methodology (3 units or 0.5 full-course equivalent).
• Two Computer Science graduate-level courses (6 units or 1.0 full-course equivalent).
• Two graduate-level courses (6 units or 1.0 full-course equivalent) from Art, Environmental Design and/or Music, and
• Three additional graduate-level courses (9 units or 1.5 full-course equivalents), for a total of 24 units (4.0 full-course equivalents).

c) An alternative breadth program that satisfies the student, the supervisor(s), the supervisory committee, and the CMD Director may be proposed in special cases.

d) Supervision as specified in Section 9.

e) PhD Candidacy examination as specified in Section 10.

6. Additional Requirements

None.

7. Credit for Undergraduate Courses

Undergraduate courses will not be considered for advanced standing in the CMD program. Permission that at most 3 units (0.5 full-course equivalent) at the 500 level be included as part of the course work requirement must be sought. This must be recommended by the supervisor(s) and approved by the CMD Director on the appropriate form.

8. Time Limit

MSc maximum time: 4 years; expected completion time 2 years.
PhD maximum time: 6 years; expected completion time 4 years.

9. Supervisory Assignments

For simplifying the explanations in this document and for the purposes of CMD requirements, Arts (Art and Music) and Environmental Design are considered as one unit and referred to as Arts and Design. Generally, students are admitted to a specific research area and supervisor. Sometimes students are admitted to a specific lab or research area only, and are assigned an interim advisor.

Appointment of the Supervisor(s): CMD students will have an interim supervisor and interim co-supervisor appointed on their acceptance letter. Between the supervisor and the co-supervisor the disciplines of Computer Science and Arts and Design will be covered. Students may seek a change in research area or supervisor after admission. The student must find a permanent supervisor and a permanent co-supervisor within six months of the start of the program. Such a change must be satisfactory to the student, and supported by the supervisors.
and must be approved by the CMD Director. The role of the supervisor is to take responsibility for overall guidance, instruction, and research/creative practice supervision. The role of the co-supervisor in this case is to provide supplementary guidance, instruction and research stimulation on a regular and extensive basis.

Doctoral Supervisory Committee: Composition of the Doctoral Supervisory Committee. The Doctoral Supervisory Committee should be constituted by the supervisor and co-supervisor in consultation with the student and must be approved by the CMD Director and sent to the Faculty of Graduate Studies for confirmation. It will consist of the supervisor and co-supervisor, and two additional members. The two additional committee members may be external to the student’s program. At least one of the members of the Supervisory Committee should have had supervisory experience at the doctoral level. Exceptions to this will be considered on an individual basis.

10. Required Examinations
In addition to the general Faculty of Graduate Studies Thesis and Thesis Examination Regulations, the following program policies apply:

Final thesis oral examinations are open examinations.

Master’s Thesis Examination
This exam will be conducted as specified by the Faculty of Graduate Studies. A thesis component that describes research conducted and/or body of creative work completed is required to complete the PhD in the CMD program. The thesis will set the research/ creative work in its literary and new media context and present evidence that the work is worthy of either publication or external recognition. Graduating students will have to demonstrate skills in expertise in Computer Science and Arts and Design. CMD encourages research and creative work that incorporates aspects of both Computer Science and Art and Design, thus there is recognition for and appreciation of a thesis that represents an interdisciplinary balance between the fields.

Scheduling of the Examination
The Supervisor and Co-Supervisor must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the CMD program. The CMD program membership includes the set of faculty members actively engaged in the program and the supervisor/co-supervisors academic units (i.e., the Department of Computer Science within the Faculty of Science, Department of Art and School of Creative and Performing Arts within the Faculty of Arts, or Faculty of Environmental Design).

PhD Candidacy Examination
The CMD PhD Candidacy Examination is composed of:

a) A Reading List: The scope of the candidacy exam is defined by a reading list. This reading list is prepared by the student and the student’s supervisor(s) in consultation with the student’s supervisory committee. This reading list must be approved at least two months before the written oral candidacy examinations. The reading list may contain, but is not limited to, relevant literature, musical scores, musical performances, and works of art.

b) A Research Proposal (see section 11).

c) A Written Exam: The CMD written examinations are taken by the candidate after course work is completed, and after approval of the doctoral proposal, and before the oral candidacy examination. The CMD written exam must be approved by the CMD Director, and consists of a take-home examination (normally 6-10 days).

d) A Candidacy Oral Exam: The candidate’s reading list, completed written exam, together with research proposal, must be submitted to the examination committee at least 10 working days in advance of the candidacy exam. These documents form the basis for the candidacy oral exam. The examination committee consists of the supervisory committee, plus one examiner from the CMD faculty membership, that is the set of faculty members actively engaged in the CMD program, and one examiner from outside the CMD membership at the supervisory/co-supervisors academic units (i.e., the Department of Computer Science within the Faculty of Science, Department of Art and School of Creative and Performing Arts within the Faculty of Arts, or Faculty of Environmental Design).
Specialization:
- Software Engineering (MSc students only)*

*The specialization is offered jointly through the Department of Computer Science and the Department of Electrical and Computer Engineering.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Science requirements, the department requires two appropriate letters of reference dated within twelve months of the date of application and:

Master of Science
a) An undergraduate background of either:
A four-year bachelor's degree or equivalent in Computer Science from a recognized institution with a minimum GPA of 3.30 in the last two years (i.e., last 60 units or 10 full-course equivalents) of the undergraduate program
OR
A four-year bachelor's degree or equivalent from a recognized institution with a minimum GPA of 3.30 in the last two years (i.e., last 60 units or 10 full-course equivalents) of the undergraduate program.

In addition, candidates must have an undergraduate course at the 3rd or 4th year level in each of the following computer science areas:
- Theory of Computation
- Software Engineering
- Systems (Operating Systems, Compilers, Distributed Systems, Networking)
- Application (Artificial Intelligence, Graphs, Databases, etc.)

The cumulative GPA for these courses must be at least 3.30.

Post-degree Computer Science courses may be considered in calculating the GPA. Exceptions to the GPA requirements may be considered for students with either:
- Demonstrated research excellence, or
- GRE General scores of at least 600 verbal and 750 quantitative and either 720 analytical (old test format) or 5.5 (new test format).

b) For applicants required to provide proof of proficiency in English, a TOEFL score of 600 (paper-based test) or 100 (Internet-based test), or an IELTS score of 7.5 or above, or a MELAB score of 84 or above, or a PTE score of 70 or above.

c) For students applying with degrees from outside Canada, GRE scores are generally expected and will be considered.

Master of Science degree with a Specialization in Software Engineering (thesis-based)
Students applying for entry to the Master of Science with a specialization in Software Engineering will be assessed on qualification as in (a) above, but with a GPA of 3.00 and at least three years relevant experience in the software industry following the bachelor's degree.

Doctor of Philosophy
For students applying with a Master of Science degree, all the requirements for a Master of Science (above) apply, plus a thesis-based Master of Science degree from a recognized institution with a minimum GPA of 3.30.

For exceptional students applying with a Bachelor of Science degree, all the requirements for a Master of Science (above) apply, plus a four-year Honours degree or its equivalent from a recognized institution with a minimum GPA of 3.70 and demonstrated research ability.

3. Application Deadline
The deadline for completed applications is February 1 for September admission, and May 1 for January admission. Late applications may be accepted from those who are Canadian citizens or permanent residents or who have been awarded major scholarships if places are available.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
Graduate programs must be chosen in consultation with the supervisor and approved by the Computer Science Graduate Affairs Committee. In addition to the Faculties of Graduate Studies and Science requirements, the Department requires:

Master of Science (thesis-based)
a) Course Requirements: Computer Science 699, plus:
b) Twelve units (2.0 full-course equivalents) of additional courses. At least 6 units (1.0 full-course equivalent) must be graduate-level computer science courses (labelled CPSC or SENG) and at most 3 units (0.5 full-course equivalent) can be an undergraduate course numbered at the 500 level.

We recommend that students who are considering continuing on to a doctoral program or entering certain career paths, select courses outside the Approved SENG list that demonstrate some breadth across Computer Science (see PhD Breadth Requirements for courses).

c) Seminar Requirement: Students are required to give a department seminar presentation on a topic related to their graduate research.

Doctor of Philosophy
a) Course Requirements: Students will be required to have achieved at least a grade of "B" in at least 24 units (4.0 full-course equivalents) beyond the requirements for an undergraduate degree before completion of the PhD degree. At least 9 units (1.5 full-course equivalents) of these must be taken while the student is enrolled as a PhD student in Computer Science at the University of Calgary. Of the 24 units (4.0 full-course equivalents), at least 18 units (3.0 full-course equivalents) must be graduate-level courses, with the remaining 12 units (2.0 full-course equivalents) being either graduate-level courses or advanced (500-level) undergraduate courses. At least 12 units (2.0 full-course equivalents) of the required courses must be taken from a degree-granting Computer Science Department. In addition to the above courses, Computer Science 699 or equivalent experience is required and does not count toward the minimum 24 units (4.0 full-course equivalents) courses above.

b) Breadth Requirements: The above courses must be taken from multiple research areas. Not more than 3.0 full-course equivalents six courses in one research area is counted toward the minimum 24 units (4.0 full-course equivalents). Courses in the intersection of two or more areas are counted in the area with the most completed course credits. The current research areas are: Artificial Intelligence and Multi-Agent Systems, Bioinformatics and Biological Computations, Computer Graphics, Computer Vision and Image Processing, Database, HCI and Visualization, Networks and Systems, Security, Theory and Foundations, Scientific Computing, Software Engineering, Other areas in Computer Science, External to Computer Science. Courses outside Computer Science must be approved by the student’s supervisor. Credits for courses external to the Department of Computer Science are only given on condition that no Computer Science course which covers similar content is counted toward the required eight courses. These courses will be counted toward the appropriate areas in Computer Science.

c) Seminar Requirement: Students are required to give a department seminar presentation on a topic related to their graduate research.

6. Additional Requirements
None.
7. Credit for Undergraduate Courses
For MSc programs, at most 3 units (0.5 full-course equivalent) at the 500 level may be taken as part of the course work requirement. This must be recommended by the supervisor and approved by the Graduate Director.

For PhD programs, at most 6 units (1.0 full-course equivalent) at the 500 level may be taken as part of the course work requirement; at most one of these taken while registered in the current PhD program. This must be recommended by the supervisor and approved by the Graduate Director on the normal Doctor of Philosophy Course Approval Form (form available from the Department).

8. Time Limit
Expected completion time is two years for thesis-based Master of Science. Expected completion time for doctoral students entering with a master's degree is four years, and five years for a student transferring to the doctoral program without a master's degree.

9. Supervisory Assignments
Generally, students are admitted to a specific research area and supervisor. Sometimes students are admitted to a specific lab or research area only and are assigned an interim advisor. In the latter case, the student must find a permanent supervisor within six months of the start of the program. Students may seek a change in research area or supervisor after admission. Such a change must be satisfactory to the student, and to the proposed new supervisor. Provided this change meets any current supervisory load constraints, this change will be supported and approved by the Graduate Program Director.

Doctoral students select their supervisory committee members in consultation with their permanent supervisors.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the department requires:
Candidacy
There is an oral candidacy examination in the doctoral program within the first 28 months of the program but after all course requirements are fulfilled. The scope of the oral candidacy exam is defined by a reading list, the candidate’s research proposal, and a single-authored scientific paper on a topic approved by the supervisory committee. The reading list is prepared by the student’s supervisor in collaboration with the supervisory committee, and given to the student at least two months before the oral candidacy exam. The candidate must have written the scientific paper while enrolled in the PhD program. The supervisory committee must have approved the paper before the oral candidacy exam is scheduled. The candidate’s research proposal together with the reading list and the scientific paper must be submitted to the examination committee when the oral candidacy exam is scheduled (at least one month before the oral candidacy exam). The oral candidacy exam may include questions from the scientific paper, the proposal, and the reading list.
Thesis Examination
Final thesis examinations are open.
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.
Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
At the master's level research proposal requirements are determined by the supervisor.
At the doctoral level, a research proposal must be approved by the student’s supervisory committee before the oral candidacy exam is scheduled. The research proposal will contain an abstract, a literature survey (including an analysis of the literature), an overview of the proposed research, a plan for completing the proposed research, and references.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards see the Awards and Financial Assistance section of this Calendar. Successful applicants may be offered departmental teaching assistantships and/or research assistantships in their offer letter.
Students should contact the department for information on scholarship deadlines.

14. Other Information
None.

15. Faculty Members/Research Interests
Information on faculty research interests may be found at: http://www.cpsc.ucalgary.ca/Research/.

Culture and Society CUSP
Effective September 1, 2013, the Culture and Society program was replaced by graduate program in Communication and Culture. Please refer to the new program entry for further details.

Drama DRAM
Contact Information
Location: Craigie Hall D 100
Program number: 403.220.5313
Fax: 403.282.6925
Email address: dramgs@ucalgary.ca

Web page URL: http://scp.a.ucalgary.ca/studentsalumni/drama-students/drama-graduate

1. Degrees and Specializations Offered
Master of Fine Arts (MFA) (thesis-based)
Students will generally be accepted and registered on a full-time basis. Part-time registration will be considered on an individual basis.
Specializations:
- Directing
- Design/Technical
- Playwriting
- Theatre Studies

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, Drama requires:
a) A baccalaureate degree that has clearly included a major emphasis in the study of drama with study at the undergraduate level in the proposed area of specialization. Deficiencies of background may be corrected during a year of study as a qualifying student.
b) A written application including a biographical outline of the applicant’s studies and experience in theatre and a statement of intent outlining proposed projects in Drama. When the applicant intends to study in the Design/Technical specialization, a portfolio of drawings and design work is required. Applicants to the Playwriting specialization must submit a portfolio of original creative writing. Applicants to the Theatre Studies specialization must submit samples of their written work. Directing applicants must submit a selected portfolio that might include reviews, photographs and/or video clips of productions directed.
c) Two letters of reference.

3. Application Deadline
The deadline for the submission of complete applications is January 15 for September admission. In exceptional circumstances, at the discretion of the Graduate Committee, January admission may be possible. Inquiries should be addressed to the Graduate Director and all admission materials submitted to Drama by October 15 for consideration.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, Drama also specifies the following requirements:
All candidates must take a minimum of 24 units (4.0 full-course equivalents) of
graduate courses, including Drama 605. All candidates must complete a thesis.
Courses required for specific specializations are described below:

a) **Directing** candidates must enrol in Drama 610, 647 and 649 in the first year.
b) **Design/Technical** candidates must enrol in at least four of the decentralized series that includes Drama 623, 625, 627 and 629. Candidates must complete, to the satisfaction of an examining committee, a portfolio and an oral review relating to their design work at the completion of the first 18 units (3.0 full-course equivalents). Details concerning the portfolio and procedures to be followed in case of failure are on file in the Drama office.
c) **Playwriting** candidates must enrol in Drama 671 and 673 in the first year. Drama 647 and 649 are also required courses.
d) **Theatre Studies** candidates must enrol in Drama 647 and 649 in the first year.

6. Additional Requirements

a) For **Directing** candidates, the thesis will consist of the direction of a full-length play and a supporting paper that reflects critically on the production and on the process of its creation.
b) For **Design/Technical** candidates, the thesis will consist of the design of a full-length production in two of the following areas: scene design, costume design, light design, sound design. Technical Direction may serve as one of the areas. Pictorial material and a supporting paper that reflects critically upon the production and the process of its creation are also required.
c) For **Playwriting** candidates, the thesis will consist of a full-length play and a supporting paper that reflects critically on the play and the process of its creation.
d) For **Theatre Studies** candidates, the thesis will be a substantial scholarly research paper that may be in some cases informed by a creative performance project.

7. Credit for Undergraduate Courses

Drama may give credit for undergraduate courses at the 500 level at the discretion of the supervisor and graduate committee. No more than half of a student’s program may be done at the undergraduate level.

8. Time Limit

The Master of Fine Arts degree must be completed within four years.

9. Supervisory Assignments

The graduate committee assigns a supervisor after discussion with the student.

10. Required Examinations

**Thesis Examination**

Final thesis oral examinations are open. In addition to Faculty of Graduate Studies regulations for thesis examination, the Department requires:

*Composition of the Committee*

The Internal Examiner must be external to the home program.

---

11. Research Proposal Requirements

**Research proposals** are formulated by the student in consultation with the supervisor and approved by the graduate committee. The committee will follow the University’s policies on ethical conduct in research in its review of proposals.

12. Special Registration Information

None.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of the Graduate Calendar. Students applying for scholarships must submit their applications to Drama by February 1.

14. Other Information

None.

15. Faculty Members/Research Interests

The interests and research specialties of the staff can be found at http://scpa.ucalgary.ca.

---

**Economics ECON**

**Contact Information**

Location: Social Sciences Building, Room 454
Program number: 403.220.6064
Fax: 403.282.5262
Email address: econgrad@ucalgary.ca
Web page URL: http://econ.ucalgary.ca/

1. Degrees and Specializations Offered

- **Doctor of Philosophy (PhD)**
- Master of Arts (MA), thesis-based and course-based

There is a requirement of full-time study for the course-based and thesis-based Master of Arts and doctoral programs.

2. Admission Requirements

In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

**Master of Arts**

a) A minimum of 24 units (4.0 full-course equivalents) of economics courses. These must include the equivalent of Economics 395/495/497 (econometrics), Economics 387/389 (mathematics for economists), Economics 557 (senior microeconomics), and Economics 559 (senior macroeconomics), with at least a "B" average in senior economics courses.
b) Three reference letters.

d) Successful completion and examination of the MA thesis (in accord with examination procedures of the Faculty of Graduate Studies).

**Master of Arts (course-based)**

The departmental academic requirements for the course-based Master of Arts degree are comparable to those for the thesis-based Master of Arts specified above. The differences in the course-based program are:

a) The thesis requirement is replaced by additional 12 units (2.0 full-course equivalents) of graduate courses (making a total of 30 units or 5.0 full-course equivalents).
b) The maximal number of courses from a related discipline is increased to 9 units (1.5 full-course equivalents) of the elective graduate courses in Economics.

c) A research paper. The topic may be a limited empirical research project, a critical review of the literature in a particular area, or a critical analysis of a theoretical or important policy problem. This paper is completed through Economics 695 and 697.

d) An exit requirement consisting of a research defence in an open conference (at the end of Economics 687) and if unsuccessful a comprehensive written examination.

**Doctor of Philosophy**

The Department of Economics requires that doctoral students take 36 units (6.0 full-course equivalents). Required courses include two courses each in econometrics, Economics 615 and 715, microeconomic theory, Economics 707 and 757, and macroeconomic theory, Economics 709 and 759. In addition, students must take 18 units (3.0 full-course equivalents) in "field" areas. Doctoral students must also write a second-year research paper. See the department website for further information. Students are also recommended to take a non-credit one-week course in the Fall Session Block Week (the week prior to the start of classes) of the first year in Mathematical Economics. The Department allows for the possibility that master's-level courses and course work taken at other institutions may be substituted for some of the required doctoral courses. Decisions concerning course substitutions and the transferability of graduate courses from other institutions are made on a case-by-case basis. Students are advised that the field of study exams in microeconomics and macroeconomics, which are required of all doctoral students, include material from the core courses listed above.

6. **Additional Requirements**

None.

7. **Credit for Undergraduate Courses**

Credit is not given for undergraduate courses.

8. **Time Limit**

Expected completion time for students studying on a full-time basis is two years for the Master of Arts thesis-based and one year course-based, and five years for the Doctor of Philosophy. Maximum completion time is four years for the Master of Arts (thesis-based and course-based) and six years for the Doctor of Philosophy.

9. **Supervisory Assignments**

The process by which students are matched with supervisors is an informal one, based on mutual research interest.

10. **Required Examinations**

**Doctor of Philosophy**

In addition to the Faculty of Graduate Studies requirements, the Department requires:

- **Candidacy**
  - To enter into candidacy, students must successfully complete all required courses, the microeconomics and macroeconomics comprehensive field of study exams, the second-year paper requirement, and the written thesis proposal with oral exam. Students who do not pass their candidacy requirements by the twenty-eighth month of their program may be required to withdraw from the program. A full description of all candidacy requirements is available at: http://econ.ucalgary.ca/graduate/resources-current-students.

- **Thesis Examination**
  - **Scheduling of the Examination**
    - All members of the Supervisory Committee must have reviewed the student's research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.
  - **Composition of the Committee**
    - The Internal Examiner may be internal to the home program.

11. **Research Proposal Requirements**

Doctoral students are required to have a thesis proposal approved by their thesis committee at their thesis proposal oral examination.

12. **Special Registration Information**

Not applicable.

13. **Financial Assistance**

Financial assistance is available to qualified students. For information on awards, please see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their applications to the Department by February 1.

To be eligible for funding beyond the first year, a student must pass field of study exams in microeconomics and macroeconomics by the beginning of classes of their second year. To be eligible for funding beyond the Fall Term of the third year, a student must receive a passing grade on their second-year research paper and their oral thesis proposal by the beginning of Winter Term in their third year.

14. **Other Information**

Graduate students must obtain a grade standing of "B" or better in graduate course work. A grade of "B-" or less will trigger a departmental review of the student's suitability for the graduate program and may result in a loss of funding.

15. **Faculty Members/Research Interests**

The active research interests of the current faculty can be found at: http://econ.ucalgary.ca/contact-us/directory.
social bases of behaviour, and (iv) individual behaviour.

c) One senior undergraduate or one graduate course in the historical and scientific foundations of general psychology.

d) If all of the prerequisite courses for admission to the PhD program in Counselling Psychology have not been completed at the time of application, students who have up to 12 units (2.0 full-course equivalents) in deficiencies may still be admitted, but the prerequisite courses will need to be completed before the doctoral candidacy examination.

e) A typed curriculum vitae and a concise rationale (500 words or less) for the application.

f) Three references, including two academic references, one of which is normally from the former thesis advisor.

3. Application Deadline

The deadline for the submission of complete applications to all programs is December 1 for September admission.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/ diploma or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements

In addition to the Faculty of Graduate Studies requirements, the degree program requires the following:

Students who have completed the prerequisites in the areas of (a) biological bases of behaviour, (b) cognitive-affective bases of behaviour, (c) social bases of behaviour, (d) individual behaviour, (e) historical and scientific foundations of general psychology, and (f) the courses and thesis, are required to complete:

a) Twelve units (2.0 full-course equivalents) at the doctoral-level normally including: Educational Psychology 731, 742, and 3 units (0.5 full-course equivalent) in research methods.

b) A non-credit research seminar.

c) Candidacy examination.

d) Dissertation.

e) A twelve-month full-time internship: Educational Psychology 788.

Students who are deficient in prerequisites will be required to take additional courses in their programs once admitted. A student may be deficient in up to 12 units (2.0 full-course equivalents), which must be completed before the PhD candidacy examination.

Course content addresses theory, research, and practice in the domains identified by the Canadian Psychological Association (CPA) for accreditation of doctoral programs in professional psychology.

Detailed information on program and core course requirements can be obtained from the Werklund School of Education's Graduate Programs Office.

6. Additional Requirements

Applied experience is an asset.

7. Credit for Undergraduate Courses

Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit

The Doctor of Philosophy degree should be completed in four years. Maximum completion time allowed for the Doctor of Philosophy degree is six years.

9. Supervisory Assignments

An interim advisor is assigned to each first-year student in a thesis-based program. Students are responsible for initiating discussions with potential permanent supervisors and are expected to have finalized supervisory arrangements by their second annual registration.

10. Required Examinations

In addition to the Faculty of Graduate Studies requirements, the program requires:

Candidacy

Candidacy must be completed within 28 months from the program start date. Admission to candidacy is an acknowledgement that a student is fully prepared to devote his/her full attention to the dissertation research. For admission to candidacy, the Faculty of Graduate Studies requires that (1) all mandatory course work has been completed, (2) an oral candidacy examination has been successfully passed, and (3) a dissertation research proposal has been approved by the student's Supervisory Committee. For further information, please consult the Graduate Programs in Education website: http://werklund.ucalgary.ca/gpe/programs/doctor-philosophy-phd-counselling-psychology under program requirements.

Thesis

The doctoral thesis is the focus of the degree program. In consultation with the supervisor, the student should formulate an appropriate thesis topic as early as possible in the program because the thesis proposal affects the choice and number of courses needed in order to complete the program.

Thesis Examination

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student's draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements

Information on research proposals is available through the interim advisor/ supervisor.

Ethics approval is required for all research projects involving the use of human subjects, before data collection begins. In order to submit an ethics application, students must complete Ethical Conduct for Research Involving Humans: A Concise, Online Tutorial, http://www.ucalgary.ca/research/research-services-office-rso/ethics-compliance/tcp52-core-tutorial, and attach the certificate issued upon completion to the ethics application form.

To initiate the ethics approval process, the student must submit a copy of the application (available on the Research Services website) to the Conjoint Faculties Research Ethics Board or the Conjoint Health Research Ethics Board.

12. Special Registration Information

None.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.

Students applying for scholarships for September admission must submit their scholarship applications to the Graduate Programs in Education office by the preceding February 1.

Graduate Programs in Education also provides assistance for students through teaching assistantships, graduate research scholarships and other scholarships. Application forms and deadline information for these awards can be obtained from Graduate Programs in Education.

14. Other Information

For further information contact Graduate Programs in Education, http://werklund.ucalgary.ca/gpe/.

15. Faculty Members/Research Interests

Research interests of faculty members and adjunct faculty can be found at: http://werklund.ucalgary.ca/contact-us/directory/1-46929.
student will be required to take additional courses within the doctoral degree to ensure equivalent training but these prerequisite courses will need to be completed before the doctoral candidacy examination.

b) A typed curriculum vitae and a concise rationale (500 words or less) for the application.

c) Three references, including two academic references, one of which is normally from the former thesis advisor.

Additional Requirements:

d) A list of any academic awards, achievements, honours or other distinctions you have received. Itemize the monetary amount and the total.

e) A list of all publications and conference presentations you have on your résumé and specify whether the work was peer reviewed or non-reviewed.

f) Information about any financial support for your degree in the form of an award, sponsorship, or other. Please indicate the dollar amount and duration of the support, and when it is to start.

g) A list of any professional school psychology experience you have had (employment or volunteer). Please specify full-time or part-time and for how long. If part-time, please specify how many hours per week.

h) A short statement of your research experience (approximately 200 words) with respect to your previous research experience and the research you would like to pursue in this degree.

3. Application Deadline

The deadline for the submission of complete applications is December 1 for September admission.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements

In addition to the Faculty of Graduate Studies requirements, the degree program requires the following:

a) A minimum of 33 units (5.5 full-course equivalents) at the doctoral-level, comprised of 21 units (3.5 full-course equivalents) of content courses and 12 units (2.0 full-course equivalents) of practicum courses (normally Educational Psychology 691, 731, 732, 760, 761.XX, 761.XX, 761.XX, 762, 764, 766, 621, 798);

b) Comprehensive examination;

c) Candidacy;

d) A twelve-month (min. 1600 hours) full-time internship; and

e) Dissertation.

Students entering the degree following completion of a master’s degree outside the degree may be required to take additional Master’s courses to ensure equivalency to the Master of Science degree in School and Applied Child Psychology at the University of Calgary. A student may be deficient in no more than 6 units (1.0 full-course equivalent), which must be completed before the doctoral candidacy.

Detailed information on core course requirements can be obtained from the Werklund School of Education, Graduate Programs in Education website http://werklund.ucalgary.ca/gpe/.

Note: First year students are assigned an interim advisor who will assist with course selection.

6. Additional Requirements

Applied experience is an asset. PhD students are expected to undertake clients from the University of Calgary Integrated Services Clinic (formerly known as UCAPES) and supervise MSc students in the on-campus practicum courses under the guidance of a qualified professional.

7. Credit for Undergraduate Courses

Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit

The Doctor of Philosophy degree should be completed in four years. Maximum completion time allowed for the Doctor of Philosophy degree is six years.

9. Supervisory Assignments

Students are responsible for initiating discussions with potential permanent supervisors and are expected to have finalized supervisory arrangements by their second annual registration.

10. Required Examinations

In addition to the Faculty of Graduate Studies requirements, the program requires:

Candidacy

Candidacy must be completed within 28 months from the program start date. The required Comprehensive Examination must be completed before the candidacy. Admission to candidacy is an acknowledgement that a student is fully prepared to devote his/her full attention to the dissertation research. For admission to candidacy, the Faculty of Graduate Studies requires that (1) all mandatory course work has been completed, (2) an oral candidacy examination has been successfully passed, and (3) a dissertation research proposal has been approved by the student’s Supervisory Committee. For further information, please consult the Graduate Programs in Education website.

Counselling Psychology (MSc)

1. Degrees and Specializations Offered

Master of Science (MSc) Counselling Psychology - on campus
2. Admission Requirements

In addition to the Faculty of Graduate Studies requirements, entry requirements for the CP Master of Science program include:

a) A four-year undergraduate degree with a minimum grade point average of 3.00 over the courses taken during the last two years of study.

b) Normally, a minimum of 18 units (3.0 full-course equivalents) in Educational Psychology and/or Psychology. This must include:
   • Two undergraduate statistics courses (Note: For those who completed a psychology degree at the University of Calgary, Psychology 312 acts as an equivalent);
   • A senior undergraduate psychology or educational psychology course in the area of Communication Skills in Guidance and Counselling, or its equivalent, Communication Skills – Interpersonal and Verbal Facilitation;
   • A senior undergraduate Psychology or Educational Psychology course in each of learning theory, developmental psychology, and personality theory.

c) A curriculum vita and a concise rationale for the application (500 words or less).

d) Two academic references one of which is from the undergraduate honours supervisor, if applicable.

e) One optional supplementary practice supervisor reference.

f) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based) or 92 (Internet-based test) or a MELAB score of 82 or an IELTS score of 7.0. The test must have been taken within the last two years. Proficiency may also be met by successful graduation from Level III of the English for Academic Purposes (EAP) program.

3. Application Deadline

The deadline for the submission of complete applications is December 1 for September admission.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements

In addition to the Faculty of Graduate Studies requirements, the MSc Counselling Psychology program requires the following:

a) Forty-eight units (8.0 full-course equivalents) at the 600 level (including 500 hours of practicum experience equivalent to 9 units or 1.5 full-course equivalents); Educational Psychology 614, 609, 618 or 611, 615, 617 or 682.01, 621, 623, 627, 631, 640, 641 or 643, 691.04 and 691.05, 695.06, and 3 units (0.5 full-course equivalent) of electives from Educational Psychology 637, 639, 693.35 and 693.43.

b) A thesis.

c) A non-credit research seminar.

Course content addresses theory, research, and practice in the domains identified by the CPA Standards for Accreditation of Counselor Education Programs.

Detailed information on core course requirements can be obtained from the Graduate Programs in Education website http://werklund.ucalgary.ca/gpe/.

6. Additional Requirements

Applied experience is an asset.

7. Credit for Undergraduate Courses

Graduate Programs in Education do not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit

The Master of Science requires two years of full-time study to complete. Maximum time allowed for completion of the Master of Science degree is four years.

9. Supervisory Assignments

An interim advisor is assigned to each first-year student in a thesis-based program. Students are responsible for initiating discussions with potential permanent supervisors and are expected to have finalized supervisory arrangements by their second annual registration.

10. Required Examinations

In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements

Information on research proposals is available through the interim advisor/supervisor. Ethics approval is required for all research projects involving the use of human subjects, before data collection begins. School and Applied Child Psychology (MSc)

1. Degrees and Specializations Offered

Master of Science (MSc) School and Applied Child Psychology - on campus

2. Admission Requirements

In addition to Faculties of Graduate Studies and Education requirements, entry requirements for the Master of Science degree in School and Applied Psychology specialization include:

a) Honours degree in Psychology (or equivalent) is preferred, however applicants with a degree in Psychology and previous experience in the Psychological field will be considered, with a grade point average of 3.00 (equivalent to a “B” or 70 per cent in many universities) over the courses taken during the last two years of study.

b) A curriculum vita and statement of research and professional interests including the specification of a prospective research supervisor from among current faculty.

c) Two academic references, one of which is normally from the undergraduate honours supervisor, if applicable.

d) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based) or 92 (Internet-based test) or a MELAB score of 82 or an IELTS score of 7.0. The test must have been taken within the last two years. Proficiency may also be met by successful graduation from Level III of the English for Academic Purposes (EAP) program.

e) Prior to admission, the most promising applicants may be interviewed to evaluate their understanding of and motivation for...
entry into the field of School and Applied Child Psychology.

Additional Requirements:
f) A short statement of intent (approximately 500 words) indicating your reasons for wanting to pursue graduate work in this degree.
g) A list of any academic awards, achievements, honours or other distinctions you have received. Itemize the dollar amount and duration of the support, and when it is to start.
h) A list of all publications and conference presentations you have on your résumé and specify whether the work was peer reviewed or non-peer reviewed.
i) Information about any financial support for your degree in the form of an award, sponsorship, or other. Please indicate the dollar amount and duration of the support, and when it is to start.
j) A list of all professional school psychology experience you have had (employment or volunteer). Please specify full-time or part-time and for how long. If part-time, please specify how many hours per week.
k) A short statement of your research experience (approximately 200 words) with respect to your previous research experience and the research you would like to pursue in this degree.

3. Application Deadline
The deadline for the submission of complete applications is December 1 for September admission.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies and Education requirements, the MSc SACP degree program requires the following:
a) Forty-two units (7.0 full-course equivalents) are practicum courses.
b) A thesis.

6. Additional Requirements
Applied experience is an asset.

7. Credit for Undergraduate Courses
Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit
The Master of Science requires two years of full-time study to complete. Maximum completion time is four years.

9. Supervisory Assignments
An interim advisor is assigned to each first-year student in a thesis-based program. Students are responsible for initiating discussions with potential permanent supervisors and are expected to have finalized supervisory arrangements by their second annual registration.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

a) A total of 45 units (7.5 full-course equivalents) in Psychology or Educational Psychology, including one course each in human development and learning.

b) Two references; either academic or practical.
c) Two references; either academic or practical.
d) Paid employment or volunteer work in counselling-related and research-related roles will be an asset.
e) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based) or 92 (Internet-based test) or a MELAB score of 82 or an IELTS score of 7.0. The test must have been taken within the last two years. Proficiency may also be met by successful graduation from Level III of the English for Academic Purposes (EAP) program.

3. Application Deadline
The deadline for the submission of complete applications is December 1 for September admission.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring grade point average to a required level for admission.
Program Descriptions

Content Courses:
- Educational Psychology 602: Counselling Theories and Professional Practice
- Educational Psychology 604: Professional Ethics in Applied Psychology
- Educational Psychology 610: Research Methodology in Counselling
- Educational Psychology 616: Assessment Theory and Practice
- Educational Psychology 622: Developing and Sustaining a Working Alliance with Clients
- Educational Psychology 624: Cultural and Social Justice Issues in Professional Practice
- Educational Psychology 626: Group Interventions and Processes
- Educational Psychology 630: Foundations of Career Counselling
- Educational Psychology 638: Counselling Interventions for Client Change
- Educational Psychology 646: Processes of Learning
- Educational Psychology 648: Lifespan Human Development
- Educational Psychology 664: Psychological Approaches to Health
- Educational Psychology 670: Final Project Portfolio

Practicum Courses:
- Educational Psychology 642: Counselling Practicum I
- Educational Psychology 644: Counselling Practicum II

6. Additional Requirements

Applied experience is an asset.
Applicants to the Master of Counselling should have reasonable computer literacy because portions of the program are delivered online.

7. Credit for Undergraduate Courses

Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit

The Master of Counselling can be completed in three years of full-time study, but students may take up to six years to complete the degree on a part-time basis.

9. Supervisory Assignments

An academic advisor is assigned to students in the course-based Master of Counselling.

10. Required Examinations

None.

11. Research Proposal Requirements

None.

12. Special Registration Information

None.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements

In addition to the Faculty of Graduate Studies requirements, the MEd SACP program requires a total of 60 units (10 full-course equivalents), inclusive of a minimum of 600 practicum hours and a 1200 hour internship:

a) SACP specialization courses: Educational Psychology 602, 604, 635, 650, 651, 652, 654, 656, 657, 658, 660, 674, 675, and 676.

b) Three required research courses: Educational Psychology 612.01, 612.02, and 612.03.

c) Final Project Portfolio: Educational Psychology 684 is the students’ capstone course and is evaluated as an exit portfolio. Educational Psychology 684 must be taken as the final course (or concurrently with final courses) prior to the internship.

d) Internship: Educational Psychology 698 A/B – equivalent to 6 units (1.0 full-course equivalent).

Detailed information on core course requirements can be obtained from Graduate Programs in Education website.

6. Additional Requirements

Applied experience is an asset.
Applicants to the Master of Education in School and Applied Child Psychology should have reasonable computer literacy as portions of the programs are delivered online.

7. Credit for Undergraduate Courses

Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit

The Master of Education School and Applied Child Psychology program can be completed in three years of full-time study but students may take up to six years to complete the degree on a part-time basis.

9. Supervisory Assignments

An academic advisor is assigned to students in the course-based Master of Counselling program.

10. Required Examinations

None.

11. Research Proposal Requirements

None.

12. Special Registration Information

None.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.
Students applying for scholarships for September admission must submit their scholarship applications to the Graduate Programs in Education office by the preceding February 1.

Graduate Programs in Education also provides assistance for students through teaching assistantships, graduate research scholarships and other scholarships. Application forms and deadline information for these awards can be obtained from Graduate Programs in Education.

1. Degrees and Specializations Offered

Degrees Offered
Graduate Programs in Education offers Doctor of Philosophy (PhD), Doctor of Education (EdD), Master of Arts (MA), Master of Science (MSc), and Master of Education (MED) degrees in six areas of Specialization, as noted below. The Doctor of Philosophy degree program is normally intended to prepare scholars for careers in research and teaching. The Doctor of Education degree program is normally intended for practicing professionals in education-related situations. The Master of Arts and Master of Science are equivalent thesis-based research degrees that prepare students for further research. The Master of Education is a course-based professional degree.

Specializations Offered
Adult Learning
This Specialization is informed by a rich heritage rooted in a commitment to human, community and social development. As a hub of interdisciplinarity, the focus of graduate studies within this Specialization is on adult learning and adult education. Our graduate students draw from multiple and diverse contexts and interest areas, which include: traditional post-secondary and continuing education; business and industry; NGOs; community development and international organizations. (PhD, EdD, MA, MED)

Curriculum and Learning
Graduate students will have opportunities to understand how interpretive disciplines in curriculum theories of learning offer meaningful and potentially transforming ways of thinking about schooling, knowledge, research, teaching/learning, and the nature of pedagogical relationships. Curriculum and Learning encompass issues of content, context, and teaching in both formal and non-formal educational settings. Students can explore contemporary themes of curriculum and learning, including issues of globalization, gender, culture, power, traditions of wisdom, ecology in education, and the ideas and practices of social justice, examined from social, cultural, historical, political, discursive, ecological and other interpretive perspectives. (PhD, EdD, MA, MSc, MED)

Interdisciplinary Studies
This Specialization is informed by an academic shift from a generalist notion of interdisciplinarity, in which a single individual is expected to have a mastery of a range of domains, towards one understood in terms of teams of specialists with varied, but compatible and complementary expertise. Upon becoming familiar in two Specialization topic areas, this Specialization area provides graduate students with competencies to connect and integrate these topic areas. (MED)

Languages and Diversity
Contemporary society is marked by linguistic and cultural diversity. Educational Studies in Languages and Diversity at the graduate level prepares students to understand and conduct research on various dimensions of linguistic and cultural diversity, especially as they relate to the acquisition, use (sociolinguistics), teaching, and learning of languages. Other topics of interests are language policies, bilingualism, language assessment, multiliteracy, identities and so on. This Specialization is opened to applicants from a broad array of regions/countries. This program will be of interest to prospective educators and researchers in the areas of English as an Additional Language (EAL), English as a Second Language (ESL), Education francophone, French as a second language, Bilingual and Multilingual Education, and all other topics related to languages. (PhD, EdD, MA, MED)

Leadership
This Specialization prepares researchers and practitioners for the analysis and resolution of issues and problems related to educational policy and leadership specifically related to: the direction and management of schools; school systems; post-secondary institutions; and both governmental bodies and non-governmental organizations concerned with public and private education. Graduates in this Specialization will be well placed to pursue administrative and research-related careers with an understanding of organizational change in the field of educational leadership and policy. (PhD, EdD, MA, MED)

Technology
As our theories about knowledge change in concert with rapid advancements in educational technology, graduate students in educational technology need to consider the cultural, social, political and economic implications for learners and for learning in diverse contexts. Educational technology seeks to balance the practice of education and research in education; as a hands-on, minds-on discipline that emphasizes knowing and doing, our graduate programs provide active learning and mentoring opportunities that engage students with both the cognitive and technological tools of their discipline. Graduate students will develop in-depth competency in educational research methods, comprehensive understanding of the educational technology field and its research methods, and be able to propose, design and carry out supervised research and inquiry in the field of educational technology. (PhD, EdD, MA, MED)

Graduate Programs Online
Graduate Programs in Education offers online graduate programs via the web and other multi-media components to local, regional, national, and international communities. Programs include thesis-based Doctor of Education (EdD), and course-based Master of Education (MED), Graduate Diploma and Graduate Certificate. Topics within each of these are offered in direct response to the needs of working professionals in a variety of settings, including administrators, program directors, and deans in colleges and institutes of technology.

Contact: gpe@ucalgary.ca or 403.220.5675 or toll free in Canada (877) 623-0292.

Doctor of Philosophy (PhD)

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD) – on campus
Please note: This degree requires a two year residency. Students must be available during the day to attend research seminars, courses, and to perform teaching and research related duties at the university campus for the first two years of their program.

2. Admission Requirements
In addition to the Faculty of Graduate Studies admission requirements, Graduate Programs in Education requires:

a) A thesis-based master's degree in an appropriate field. Outstanding applicants holding master's degrees without thesis may be considered.

b) A minimum grade point average of 3.50 on a four-point scale in a master's degree program.

c) A written statement indicating the applicant’s reasons for wishing to pursue a graduate program.

d) Where appropriate, candidates will be expected to have, or to obtain, relevant practical experience in their area of specialization.

e) For applicants required to prove proficiency in English, a TOEFL score of 580...
Program Descriptions

Education Graduate Programs

Admission Portfolio
Applicants to the Doctor of Philosophy program are encouraged to submit an Admission Portfolio containing examples of their work. The purpose of the Admission Portfolio is to give applicants the opportunity to provide additional documentation that demonstrates their suitability and qualification for doctoral studies. The Admission Portfolio is particularly relevant for program applicants who do not hold a thesis-based master’s degree.

The Doctoral Admission Portfolio may contain the following:

a) Thesis (if applicable).
b) Reports.
c) Research grants or scholarships.
d) Articles.
e) Curriculum documents.
f) Non-print materials, (e.g. multimedia).
g) Evidence of relevant prior learning (see below).
h) Personal statement documenting research skills and interests.

The Doctoral Admission Portfolio must include a Table of Contents and an Executive Summary that outlines the contents of the Portfolio.

Relevant Prior Learning Considerations
In exceptional circumstances, individuals who do not meet formal academic requirements but who have significant life achievements may be considered for admission to the program. The candidates must provide Graduate Programs in Education with evidence demonstrating a potential to undertake successfully the proposed program of studies. Such candidates are advised to make early contact with Graduate Programs in Education, and supply additional supporting documents as part of their application package, such as:

a) Evidence of personal continuing education/training.
b) Results in these continuing education efforts.
c) Experience in a field related to the aspired degree.
d) Evidence of successful management of people, resources, finances, situations.
e) Increasing or varying responsible positions in organizations related to the aspired degree.
f) Work-related products, e.g. reports, programs of learning or training, handbooks, videos, manuals, workshops, seminars.
g) Evidence of personal growth in knowledge, understanding, management skills, and intellectual resources.

h) Evidence of innovation.
i) Evidence of leadership, co-ordination.

3. Application Deadline
The deadline for the submission of complete applications to all programs is December 1 for September admission.

4. Advanced Credit
The applicant must make advanced credit request as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma, or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements
In addition to the requirements of the Faculty of Graduate Studies, Graduate Programs in Education requires that students be available on campus for the first two years of their program.

a) Nine units (1.5 full-course equivalents) of 600- or 700-level courses in research methods;

b) Additional graduate courses or seminars as required by the student’s Specialization (see below);

c) Candidacy examination; and

d) Dissertation.

- Adult Learning requires 9 units (1.5 full-course equivalents) selected from Educational Research 735 and any additional courses as determined by the supervisor in consultation with the student.
- Curriculum and Learning requires Educational Research 782, and 6 units (1.0 full-course equivalent) selected from either Educational Research 784 or 786.
- Languages and Diversity requires 9 units (1.5 full-course equivalents) selected from Educational Research 768.
- Technology requires Educational Research 771, and 6 units (1.0 full-course equivalent) at the 700 level in technology.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit
Expected completion time for full-time students is four years with a maximum completion time of six years.

9. Supervisory Assignments
A supervisor is normally appointed at the time of admission.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires

Candidacy
Candidacy must be completed within 28 months from the program start date.

Admission to candidacy is an acknowledgement that a student is fully prepared to devote his/her full attention to the dissertation research. For admission to candidacy, the Faculty of Graduate Studies requires that (1) all mandatory course work has been completed, (2) an oral candidacy examination has been successfully passed, and (3) a dissertation research proposal has been approved by the student’s Supervisory Committee. For further information, please consult the Graduate Programs in Education website.

Thesis
The Doctoral thesis is the focus of the degree program. In consultation with the supervisor, the student should formulate an appropriate thesis topic as early as possible in the program because the thesis proposal affects the choice and number of courses needed in order to complete the program.

Information on research proposals is available through the interim advisor/supervisor. Ethics approval is required for all research projects involving the use of human subjects, before data collection begins. In order to submit an ethics application, students must complete Ethical Conduct for Research Involving Humans: A Concise, Online Tutorial, http://www.ucalgary.ca/research/research-services-foe-rose/ethics-compliance/tcp2-core-tutorial, and attach the certificate issued upon completion to the ethics application form.

To initiate the ethics approval process, the student must submit a copy of the application (available on the Research Services website) to the Conjoint Faculties Research Ethics Board or the Joint Health Research Ethics Board.

Thesis Examination
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
Consult the Graduate Programs in Education website.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their applications to Graduate Program in Education by February 1.

14. Other Information
For further information contact Graduate Programs in Education, http://werklund.ucalgary.ca/gpe/.
Doctor of Education (EdD)

1. Degrees and Specializations Offered
Doctor of Education (EdD) – blended/online

2. Admission Requirements
In addition to the Faculty of Graduate Studies admission requirements, Graduate Programs in Education requires:
a) A course or thesis-based master’s degree in an appropriate field.
b) A minimum grade point average of 3.50 on a four-point scale in a master’s degree program.
c) A written statement indicating the applicant’s reasons for wishing to pursue a graduate program.
d) Candidates will be expected to have, or obtain, relevant practical experience in their area of specialization.
e) For applicants required to prove proficiency in English, a TOEFL score of 580 (paper-based), 93 (Internet-based test), a MELAB score of 82 or an IELTS score of 7.0. The test must have been taken within the last two years. Proficiency may also be met by successful graduation from Level III of the English for Academic Purposes (EAP) program.
f) Two reference letters.

Admission Portfolio
Applicants to the Doctor of Education program are encouraged to submit an Admission Portfolio containing examples of their work. The purpose of the Admission Portfolio is to give applicants the opportunity to provide additional documentation that demonstrates their suitability and qualification for doctoral studies. The Admission Portfolio is particularly relevant for program applicants who do not hold a thesis-based master’s degree.
The Doctoral Admission Portfolio may contain the following:
a) Thesis (if applicable).
b) Reports.
c) Research grants or scholarships.
d) Articles.
e) Curriculum documents.
f) Non-print materials, e.g., multimedia.
g) Evidence of relevant prior learning (see below).
h) Personal statement documenting research and professional skills and interests.
The Doctoral Admission Portfolios must include a Table of Contents and an Executive Summary that outlines the contents of the Portfolio.

Relevant Prior Learning Considerations
In exceptional circumstances, individuals who do not meet formal academic requirements but who have significant life achievements may be considered for admission to the program. The candidates must provide Graduate Programs in Education in evidence demonstrating a potential to undertake successfully the proposed program of studies. Such candidates are advised to make early contact with Graduate Programs in Education, and supply additional supporting documents as part of their application package, such as:
a) Evidence of personal continuing education/training.
b) Results in these continuing education efforts.
c) Experience in a field related to the aspired degree.
d) Evidence of successful management of people, resources, finances, situations.
e) Increasing or varying responsible positions in organizations related to the aspired degree.
f) Work-related products, e.g., reports, programs of learning or training, handbooks, videos, manuals, workshops, seminars.
g) Evidence of personal growth in knowledge, understanding, management skills, and intellectual resources.
h) Evidence of innovation.
i) Evidence of leadership, co-ordination.

3. Application Deadline
The deadline for the submission of complete applications to all programs is December 1 for July admission.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma, or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements
The EdD is a three-year cohort-based program consisting of:
a) Course work;
b) Candidacy examination; and
c) Dissertation.
Year 1 - is designed primarily to develop students’ competencies as critical consumers of educational research, and skills to conduct practitioner-inquiry. As outlined within the program to which the student has applied, first year students must complete:
a) Six units (1.0 full-course equivalent) in research: Participatory Methodology in Education (Educational Research 701.09), and either Design-Based Research (Educational Research 701.07) or Action Research (Educational Research 701.08).
b) Six units (1.0 full-course equivalent) in the Specialization area to which the student has applied.
Year 2 - is designed to engage students in an in-depth analysis of an identified problem of practice through diverse academic disciplines (e.g., leadership, adult learning, etc.). Specialization coursework exposes students to context specific best practices and cutting edge research and emphasizes the application of theory and research to practice within collaboratories of practice. As outlined within the program to which the student has applied, students must complete:
a) Six units (1.0 full-course equivalent) in the Specialization area.
b) Six units (1.0 full-course equivalent) in Specialization’s Collaboratory of Practice (Educational Research 707 and 708).
c) Candidacy examination.
Year 3 - is designed to support students in synthesizing their Year 2 inquiry projects into a dissertation. Students work collaboratively with faculty and practitioners from their field to complete a dissertation that addresses a contemporary issue in education. As outlined within the program to which the student has applied, students must complete:
a) Ethics approval (see below);
b) Dissertation Seminar I;
c) Dissertation Seminar II; and
d) Doctoral Dissertation.

Ethics approval is required for all research projects involving the use of human subjects, before data collection begins. In order to submit an ethics application, students must complete Ethical Conduct for Research Involving Humans: A Concise, Online Tutorial, http://www.ucalgary.ca/research/research-services-office-rso/ethics-compliance/tcpas2-core-tutorial, and attach the certificate issued upon completion to the ethics application form.
To initiate the ethics approval process, the student must submit a copy of the application (available on the Research Services website) to the Conjoint Faculties Research Ethics Board or the Conjoint Health Research Ethics Board.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit
Expected completion for students in the EdD program is three years with a maximum completion time of six years.

9. Supervisory Assignments
An interim supervisor is normally appointed at the time of admission.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:
Candidacy
A portfolio will be prepared by the student to demonstrate his/her knowledge of the Field of Study and preparedness to conduct research in this field. The portfolio consists of three components:
15. Faculty Members/Research Interests
Current faculty members and their areas of interest can be found at http://worklund.ucalgary.ca/contact-us/directory/1-46929.

Master of Arts or Master of Science (MA/MSc)

1. Degrees and Specializations Offered
Master of Arts or Master of Science – on campus

Please note: This degree requires a one year residency. Students must be available during the day for research seminars, courses and research related duties for the first year of their program.

2. Admission Requirements
In addition to the Faculty of Graduate Studies admission requirements, Graduate Programs in Education requires:

a) A written statement indicating the applicant’s reasons for wishing to pursue a graduate program.

b) For students required to prove proficiency in English, a TOEFL score of 580 (paper-based) or 93 (Internet-based test), a MELAB score of 82 or an IELTS score of 7.0. The test must have been taken within the last two years. Proficiency may also be met by successful graduation from Level III of the English for Academic Purposes (EAP) program.

c) Two reference letters.

d) Admission to Technology Specialization requires a 3.50 GPA.

3. Application Deadline
The deadline for the submission of complete applications to all programs is December 1 for September admission.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma, or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements
In addition to the requirements of the Faculty of Graduate Studies, Graduate Programs in Education requires students to be available on campus for the first year of their program.

a) Six units (1.0 full-course equivalent) 600-level courses in research methods, one of which must be Educational Research 603.26;

b) Additional graduate courses or seminars as required by the student’s Specialization (see below):

c) A non-credit research seminar; and
d) A dissertation.

Additional graduate courses or seminars as required by Specializations as follows:

- Adult Learning – 12 units (2.0 full-course equivalents) from Educational Research 635 and any additional courses as determined by the supervisor in consultation with the student.

- Curriculum and Learning – 9 units (1.5 full-course equivalents) selected from: Educational Research 682, 687, 688; and 6 units (1.0 full-course equivalent) as determined by the supervisor in consultation with the student from either Educational Research 689 or 693 or equivalent.

- Languages and Diversity – 9 units (1.5 full-course equivalents) from Educational Research 668 and any additional courses as determined by the supervisor in consultation with the student.

- Technology – 18 units (3.0 full-course equivalents) within the Specialization consisting of the following: 6 units (1.0 full-course equivalent) (Educational Research 679.31 and 671); and 12 units (2.0 full-course equivalents) selected from the Technology course offerings; and any additional courses as determined by the supervisor in consultation with the student.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit
Expected completion time for full-time students is two years in thesis-based master’s programs. Maximum completion time is four years for thesis-based master’s programs.

9. Supervisory Assignments
An interim supervisor is normally appointed at the time of admission.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
Research Proposals are due to qualified students. For information on part of the candidacy process.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this calendar.

Students applying for scholarships must submit their applications to Graduate Programs in Education by February 1.
12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their applications to the Graduate Programs in Education by February 1.

14. Other Information.
For further information contact Graduate Programs in Education, http://werklund.ucalgary.ca/gpe/.

15. Faculty Members/Research Interests
Current faculty members and their areas of interest can be found at http://werklund.ucalgary.ca/contact-us/directory/1-46929.

Master of Education (MEd)
There are two distinct routes toward the Master of Education (MEd) degree: 1) Master of Education: Specialization route and 2) Master of Education: Interdisciplinary route.

**Master of Education: Specialization Route**

1. Degrees and Specializations Offered
Master of Education: Specialization Route
The MEd, Specialization Route, is a course-based degree program which provides students with a systematic understanding of knowledge, and a critical awareness of current problems and/or new insights, much of which is at, or informed by, the forefront of their academic discipline, field of study or area of professional practice in one specialization area.

For current topic areas being offered and program delivery format, please consult the website http://werklund.ucalgary.ca/gpe/.

2. Admission Requirements
In addition to the Faculty of Graduate Studies admission requirements, Graduate Programs in Education requires:
   a) A University of Calgary four-year baccalaureate degree or an equivalent degree from a recognized institution. Degrees and grades from foreign institutions are evaluated for their equivalency to those of the University of Calgary.
   b) A minimum GPA of 3.00 (on the University of Calgary four-point system). This is based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents).
   c) A written statement indicating the applicant’s reasons for pursuing a graduate program in Graduate Programs in Education.
   d) Candidates will be expected to have a minimum of two years of teaching experience or alternative professional experience.

3. Application Deadline
February 1 for a July admission.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma, or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements
The MEd Specialization route is a two-year, cohort-based, course-based program.
   a) A minimum of three research courses consisting of: Educational Research 603.21 (Research Methodology in Education), Educational Research 603.24 (Program & Practice Evaluation), and Educational Research 603.23 (Writing Educational Research); and
   b) Twenty-seven units (4.5 full-course equivalents) as outlined in the student’s area of Specialization.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit
Expected completion time is two years. Maximum completion time is six years for a course-based master’s program.

9. Supervisory Assignments
An academic advisor is assigned to students in the course-based Master of Education program.

10. Required Examinations
None.

11. Research Proposal Requirements
None.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their applications to Graduate Programs in Education by February 1.

14. Other Information
For further information contact Graduate Programs in Education, http://werklund.ucalgary.ca/gpe/.

15. Faculty Members/Research Interests
Current faculty members and their areas of interest can be found at http://werklund.ucalgary.ca/contact-us/directory/1-46929.

**Master of Education: Interdisciplinary Route**

1. Degrees and Specializations Offered
Master of Education: Interdisciplinary Route
The MEd, Interdisciplinary Route, is a course-based degree program consisting of 60 units (10 full-course equivalents). A direct entry into a 24 unit (4.0 full-course equivalents) Graduate Diploma may be possible.
with the approval of Graduate Programs in Education.

2. Admission Requirements
In addition to the Faculty of Graduate Studies admission requirements, the Office of Graduate Programs in Education requires:

a) A University of Calgary four-year baccalaureate degree and an equivalent degree from a recognized institution. Degrees and grades from foreign institutions are evaluated for their equivalency to those of the University of Calgary.

b) A minimum GPA of 3.00 (on the University of Calgary four-point system). This is based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents).

c) For students required to prove proficiency in English, a TOEFL score of 580 (paper-based) or 93 (Internet-based test), a MELAB score of 82 or an IELTS score of 7.0 is required. The test must have been taken within the last two years. Proficiency may also be met by successful graduation from Level III of the English for Academic Purposes (EAP) program.

3. Application Deadline
Normally March 15 for a July start date; however, please note that there may be instances that vary from these dates. Students should consult the Graduate Program in Education website http://werklund.ucalgary.ca/gpe/ for specific application deadlines and start dates. Students following the MEd Interdisciplinary laddering structure route must apply at each stage; first, to the Graduate Certificate, then to the Graduate Diploma and finally to the MEd, within 5 years between each stage.

4. Advanced Credit
The applicant must make advanced credit requests as part of the application process. Credit will not be given for course work taken as part of another completed degree/diploma, or for courses taken to bring grade point average to a required level for admission.

5. Program/Course Requirements
Topics for the Graduate Certificate and Graduate Diploma courses are designed in response to the professional community and therefore change year to year. For topics being offered for Graduate Certificates and Graduate Diplomas, please consult the Graduate Programs in Education website http://werklund.ucalgary.ca/gpe/interdisciplinary-med.

The final year of the Interdisciplinary MEd is a prescribed one-year course-based program consisting of:

a) Nine units (1.5 full-course equivalents) in research, consisting of: Educational Research 603.21 (Research Methodology in Education), Educational Research 603.24 (Program & Practice Evaluation), and Educational Research 603.23 (Writing Educational Research); and

b) Six units (1.0 full-course equivalent), Educational Research 692 (Collaboratory of Practice).

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Graduate Programs in Education does not normally accept undergraduate courses for credit toward graduate degrees.

8. Time Limit
The expected completion time is one year for each of the program components in the laddering structure to a maximum of two years for the Graduate Certificate, Graduate Diploma and Master of Education. Students taking more than one year to complete the four courses within a topic area will be required to pay continuing fees.

9. Supervisory Assignments
An academic advisor is assigned to students in the course-based Master of Education program.

10. Required Examinations
None.

11. Research Proposal Requirements
None.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their applications to Graduate Programs in Education by February 1.

14. Other Information
For further information contact Graduate Programs in Education, http://werklund.ucalgary.ca/gpe/.

15. Faculty Members/Research Interests
Current faculty members and their areas of interest can be found at http://werklund.ucalgary.ca/contact-us/directory/1-46929.

2. Admission Requirements
Requirements for admission to the Bridge to Teaching Certificate include:

a) A four-year baccalaureate degree in Education or an equivalent degree from a recognized institution, with a grade point average of at least 3.00 or equivalent.

c) Language Proficiency Requirement:
   i. An overall score of 93 with a minimum score of 27 in the speaking component on TOEFL (the Internet-based Test of English as a Foreign Language); OR
   ii. A minimum overall band average of 8.0 with no band below 7.0 on the International English Language Test System (IELTS—Academic Module); OR
   iii. Graduation from Tier 3 of the English for Academic Purposes Program (EAP) at the University of Calgary with a 3.00 GPA.

d) One official transcript from all post-secondary institutions attended.

e) A successful interview with the Program Coordinator for Bridge to Teaching.

Note: Completion of English for Academic Purposes for Teachers is highly recommended prior to program start (see http://werklund.ucalgary.ca/eap/ for more information). Exceptions may be granted by the Associate Dean, Graduate Programs in Education, and the Program Coordinator.

3. Application Deadline
The deadline for submission of complete applications is May 1 for September admission. For program information and application procedures, please visit the Graduate Programs in Education website at: http://werklund.ucalgary.ca/gpe/.

4. Advanced Credit
N/A.

5. Program Requirements
A total of 18 course credits including 10 weeks of practicum.

Required Courses:

Semester 1
Educational Research 696.01 Innovation in Education
Educational Research 696.02 Teaching in Alberta I
Educational Research 696.03 Practicum Seminar I

Semester 2
Educational Research 696.04 Learning with Technology
Educational Research 696.05 Teaching in Alberta II
Educational Research 696.06 Practicum Seminar II
Notes:
- Failure to attend the term to which a student has been admitted will result in the admission being rescinded.
- Failure to successfully complete the practicum component will result in withdrawal from the program.

General Notes:
- Completion of the Bridge to Teaching Certificate may not fulfill the requirements for teacher certification in Alberta.
- The Bridge to Teaching courses are recognized by the Professional Standards Branch of Alberta Education as fulfilling the requirements for 18 credits in Education coursework at the advanced level, and 10 weeks of supervised student teaching placement (practicum) in an Alberta classroom.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
N/A.

8. Time Limit
Expected completion time is eight (8) months.

Engineering Programs ENGG

Contact Information
Location: Schulich School of Engineering, Room C202
Program number: 403.220.5738
Fax: 403.284.3697
Email address: schulich@ucalgary.ca
Web page URL: http://schulich.ucalgary.ca/graduate

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based
Master of Engineering (MEng), thesis and course-based

Areas: Chemical and Petroleum, Civil, Electrical and Computer, Geomatics, and Mechanical and Manufacturing Engineering.

In addition, the Schulich School of Engineering offers PhD, MSc, and MEng degrees with interdisciplinary specializations in Environmental Engineering and Energy & Environment.

The University of Calgary and the University of Alberta offer a joint Biomedical Engineering Program. Further information on all programs and specializations is provided under individual separate listings in this Calendar.

Master's thesis and doctoral graduate students are normally admitted as full-time students. The Head of the Department or designate may however, approve requests for registration as part-time or transfer from a full-time to a part-time status.

2. Admission Requirements
The Schulich School of Engineering has established common minimum student admission requirements for all its graduate programs, with the exception of students with project management background entering the Manufacturing Engineering program. Departments and graduate programs may have additional requirements over and above those of the Schulich School of Engineering.

In addition to the Faculty of Graduate Studies requirements, the Schulich School of Engineering minimum requirements are as follows:

Master's Programs
a) BSc degree or equivalent.
b) A minimum admission grade point average of 3.00 on a four-point scale or equivalent.
c) Holders of BSc or equivalent degrees in Science, Medicine, Kinesiology or other Engineering, if accepted, may be required to take additional senior undergraduate engineering courses. These courses will not be counted for credit toward their graduate program. Holders of bachelor’s degrees from disciplines other than Engineering, Science, Medicine or Kinesiology are required to complete a minimum of 30 units (5.0 full-course equivalents) make-up undergraduate engineering courses with a minimum GPA of 3.00 on a four-point scale before admission.
d) Two reference letters.

In exceptional circumstances, students who do not meet the entrance requirements (but have BSc degrees in the same or equivalent Engineering discipline and a GPA of at least 2.70) may be considered for admission after upgrading requirements have been met. These include a minimum of 18 units (3.0 full-course equivalents) make-up courses, or 9 units (1.5 full-course equivalents) make-up courses if they have acceptable industrial experience, with a minimum grade of 3.00 on a four-point scale in each course. At least 12 or 6 units (2.0 or 1.0 full-course equivalents) of these courses, respectively, must be graduate-level courses.

d) Two reference letters.

3. Application Deadline
See departmental, program and specialization sections.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process, in consultation with the proposed supervisor and the Graduate Director. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission. Students who receive advanced course credit when admitted to a master's program may be able to accelerate the completion of their degree.

5. Program/Course Requirements
The Schulich School of Engineering has established common minimum program/course requirements for all its graduate programs. Departments and graduate programs may have additional requirements over and above those of the Schulich School of Engineering.

In addition to Faculty of Graduate Studies requirements, the Schulich School of Engineering minimum requirements are as follows:

Master of Engineering (course-based)
A minimum of 30 units (5.0 full-course equivalents), of which at least 18 units (3.0 full-course equivalents) must be graduate courses.

Master of Engineering (thesis-based)
A minimum of 12 units (2.0 full-course equivalents) graduate courses.

Master of Science
A minimum of 12 units (2.0 full-course equivalents) graduate courses.

Doctor of Philosophy
A minimum of 6 units (1.0 full-course equivalent) graduate courses beyond the Master of Science course requirements. For students who transfer from an MSc program, 18 units (3.0 full-course equivalents) graduate courses beyond the BSc, or equivalent, degree.

All Degree Programs
After consultation with the supervisor and the Graduate Director, courses outside the Department or the University may be approved towards the degree requirements.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
See Section 5.

8. Time Limit
Typical completion times are two years for full-time students in a master's program and three to four years in a doctoral program. The Master of Engineering (course-based) can be completed in one year. Maximum completion times are four years for a Master of Science and a Master of Engineering (thesis-based), and six years for a Master of Engineering (course-based) or doctoral program.
9. Supervisory Assignments
Supervisors and supervisory committees are assigned according to the Faculty of Graduate Studies regulations (see Academic Regulations) and are approved by the Department Head or the Graduate Director.

10. Required Examinations
The Schulich School of Engineering has established common minimum examination requirements for all its graduate programs. Departments and graduate programs may have additional requirements over and above those of the Schulich School of Engineering.

In addition to the Faculty of Graduate Studies requirements, the Schulich School of Engineering minimum requirements are as follows:

MEng (course-based) Comprehensive Examination
None.

MSc and MEng (thesis-based) Final Oral Examination
The thesis examination is oral.

Composition of the Committee
The examining committee consists of: the Supervisor, an additional member of the University of Calgary academic staff, and Internal Examiner who may be internal to the home program. If applicable, the Co-Supervisor will also be part of the committee. The examination is chaired by a neutral chair (non-voting), proposed by the Department Head or Graduate Director. The examining committee must be approved by the Faculty of Graduate Studies.

The student shall make a public twenty-minute presentation of his/her thesis research, normally immediately before the oral examination. Examining committee members should attend this presentation but should refrain from asking questions during the presentation. The maximum allowable two-hour examination period does not include the time spent on student presentation. Thesis oral examinations are open.

11. Research Proposal Requirements
See departmental, program and specialization sections.

12. Special Registration Information
None.

13. Financial Assistance
Thesis-based candidates are typically admitted with financial support provided by an interested supervisor, the department, or an official organization. MEng students are typically admitted without funding from the program. For information on awards, see the Awards and Financial Assistance section of this Calendar.

14. Other Information
Students enrolled in any of the engineering graduate programs may opt, in addition to their normal required course load, to undertake an international project outside Canada. The duration of the project should be between 4 and 6 months. Upon successful completion (on a credit/fail basis) of Engineering 689, the statement “International Graduate Internship Project” will appear on the parchment. The course is not repeatable for credit.

15. Faculty Members/Research Interests
See departmental, program and specialization sections.

---

**Engineering, Chemical and Petroleum ENCH**

**Contact Information**
Location: Schulich School of Engineering, Room B212
Program number: 403.220.4802
Fax number: 403.284.4852
Email address: chemandpetenggrad@ucalgary.ca
Web page URL: http://www.eng.ucalgary.ca/chemical/

1. Degrees and Specializations Offered
- Master of Science (MSc), thesis-based
- Master of Engineering (MEng), thesis-based and course-based

For registration status of thesis-based graduate students, see “Engineering Programs”.

**Specializations**:
- Chemical Engineering
- Petroleum Engineering
- Biomedical Engineering (thesis-based only)
- Environmental Engineering (Interdisciplinary)*
- Energy and Environment (Interdisciplinary)*
- Energy and Environmental Systems (Interdisciplinary, thesis-based only)*

The following specializations are offered only to course-based MEng degrees:
- Petroleum Reservoir Engineering
- Petroleum Exploration Engineering
- Reservoir Characterization (Interdisciplinary)*

*See the Calendar section on Interdisciplinary Specializations for further information.

2. Admission Requirements
In addition to the requirements of the Faculty of Graduate Studies and the Schulich School of Engineering, the Department requires:

**Master of Engineering with Specialization in Petroleum Engineering**
- A bachelor’s degree in Chemical, Oil and Gas, or Petroleum Engineering

Exceptionally, students with a bachelor’s degree in another branch of Engineering and substantial experience in the petroleum industry may be considered for admission.

**Doctor of Philosophy**
See “Engineering Programs”.

3. Application Deadline

**Deadlines for submission of complete applications for admission to MEng thesis-based, MSc and PhD:**
- September admission: March 15 (International applicants), July 15 (Canadian and Permanent Resident applicants)
- January admission: July 15 (International applicants), November 15 (Canadian and Permanent Resident applicants)
May admission: November 15 (International applicants), March 15 (Canadian and Permanent Resident applicants).

Deadlines for submission of complete application for admission to MEng course-based:
September and January admission: March 15 (All applicants)

4. Advanced Credit
See "Engineering Programs".

5. Program/Course Requirements
See "Engineering Programs".

6. Additional Requirements
The Department has established core courses for the following specializations:
- Petroleum Engineering specialization: Chemical Engineering 621, 629, 647, 657, 677, 701 and 703.
All Master of Science students in the Chemical Engineering, Petroleum Engineering and Biomedical Engineering specializations must complete at least two of the core courses of their specialization. All doctoral students in these specializations must have completed at least four of the core courses of their specialization before proceeding to the candidacy examination.

All Master of Science students in the Environmental Engineering specialization and the Energy and Environment specialization must complete at least one of the core courses in their specialization. All doctoral students in these specializations must have completed at least two of the core courses in their specialization before proceeding to the candidacy examination. Requirements for these specializations are listed under the corresponding sections.

All Master of Science students in the Energy and Environmental Systems specialization must complete at least one of the core chemical engineering courses. All doctoral students in this specialization must have completed at least two of the core chemical engineering courses before proceeding to the candidacy examination.

All Master of Science and doctoral students in the Chemical Engineering, Petroleum Engineering, and Biomedical Engineering specialization are required to register and participate in the Research Seminar course (Chemical Engineering 601) for each of the first two terms of their degree program and must also present one research seminar in Chemical Engineering 601. Course requirements for their students registered in the EES specialization are listed under the Energy and Environmental Systems section of the Calendar.

For more details, students must refer to the guidelines for the Research Seminar course. Requirements for other specializations are listed under the corresponding sections. For Master of Engineering course-based students, at least 60 per cent of the courses must be from the declared area of specialization.

7. Credit for Undergraduate Courses
Not applicable.

8. Time Limit
See "Engineering Programs".

9. Supervisory Assignments
All students are required to have a supervisor before the second annual registration. For students in the Master of Science and Doctor of Philosophy degree programs, a supervisor is normally appointed at the time of admission.

10. Required Examinations
All final thesis oral examinations involve a public seminar/presentation before the oral examination. PhD candidacy examination will not involve questions on the research proposal but will include questions on background knowledge needed to carry out the proposed research. See "Engineering Programs".

11. Research Proposal Requirements
Doctor of Philosophy
A research proposal must be submitted to and approved by the supervisory committee before the candidacy examination.

12. Special Registration Information
None.

13. Financial Assistance
See "Engineering Programs".

14. Other Information
See "Engineering Programs".

15. Faculty Members/Research Interests
The current research interests of the academic staff can be found at http://www.eng.ucalgary.ca/ench/node/73, or from the Department.
November 1 for online application, November 30 for supporting documentation, for May admission

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
Note: If the student does not consult the supervisor before selecting courses, Department approval may be withheld.
In addition to Faculty of Graduate Studies and the Schulich School of Engineering requirements, the Department normally requires:

Master of Science
a) A minimum of 12 units (2.0 full-course equivalents) and a maximum of 24 units (4.0 full-course equivalents).
b) Research and thesis work as major components of the program.

Master of Engineering (thesis-based)
a) A minimum of 18 units (3.0 full-course equivalents) and a maximum of 24 units (4.0 full-course equivalents), no more than 6 units (1.0 full-course equivalent) of which can be senior undergraduate courses.
b) A thesis related to original analysis and/or design.

Master of Engineering (course-based)
a) A minimum of 30 units (5.0 full-course equivalents) and a maximum of 6 units (1.0 full-course equivalent) of which can be senior undergraduate courses.

Doctor of Philosophy
a) A minimum of 18 units (3.0 full-course equivalents) beyond the baccalaureate.
b) A minimum of 6 units (1.0 full-course equivalent) and a maximum of 18 units (3.0 full-course equivalents) beyond the master’s degree.
c) A detailed research proposal.
d) A candidacy exam which has both a written and oral component. The written component will be a four hour open book exam usually held a week prior to the oral exam.

6. Additional Requirements
All Masters of Science and Doctoral students must complete the research seminar courses in Civil Engineering, Civil Engineering 605 and 607. These courses are in addition to the “Program/Course Requirements”. All graduate students who require access to Civil Engineering laboratories are required to complete a Workplace Hazardous Materials Information Systems (WHMIS) course and other required safety training courses before gaining access to the laboratories.

7. Credit for Undergraduate Courses
See Section 5.

8. Time Limit
See “Engineering Programs”.

9. Supervisory Assignments
See “Supervisors/Advisors” in the General Regulations section of this calendar.

10. Required Examinations
See “Engineering Programs”.

11. Research Proposal Requirements
A detailed research proposal will be required for PhD students.

12. Special Registration Information
Not applicable.

13. Financial Assistance
See “Engineering Programs”.

14. Faculty Members/Research Interests
Information about faculty members and their research interests may be found at http://www.schulich.ucalgary.ca/enci/faculty.

Engineering, Electrical and Computer ENEL
Contact Information
Location: ICT Building, Room 402
Program number: 403.220.5806
Fax: 403.282.6855
Email address: ecegapp@ucalgary.ca
Web page URL: http://schulich.ucalgary.ca/departments/electrical-and-computer-engineering/

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based Master of Engineering (MEng), thesis and course-based Specializations:
• Software Engineering*
• Energy and Environment (Interdisciplinary)**
• Environmental Engineering (Interdisciplinary)**
• Energy and Environmental Systems (Interdisciplinary)**

For a list of other supported research areas, please see section 15.

2. Admission Requirements
In addition to Faculty of Graduate Studies and the Schulich School of Engineering requirements, the Department requires:

Master of Engineering and Master of Science
A bachelor’s degree in electrical engineering or computer engineering.

Master of Science, Specialization in Software Engineering
a) At least one year of experience in software development.
b) Background knowledge in C or C++.
c) Knowledge of object-oriented design and human-computer interaction.

Note: Applicants with degrees in other disciplines may be considered, but additional undergraduate courses in electrical engineering may be required prior to admission.

Doctor of Philosophy
A master’s degree in electrical engineering, computer engineering, or software engineering.

Note: Transfer to the doctoral program without completing the master’s degree may be approved for exceptional students whose BSc degrees are in electrical engineering, computer engineering or software engineering.

3. Application Deadline
The preferred starting date for all graduate degrees is September.

Deadlines for submission of complete applications:
January 31 for September admission
April 30 for January admission

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission or for grades below "B".

5. Program/Course Requirements
In addition to Faculty of Graduate Studies and the Schulich School of Engineering requirements, the Department requires:

Master of Engineering (course-based)
a) Thirty to 36 units (5.0-6.0 full-course equivalents) of which at least 21 units (3.5 full-course equivalents) must be graduate courses in the Department of Electrical and Computer Engineering.

Students are encouraged to include Electrical Engineering 698 - Graduate Project in their programs. Normally Electrical Engineering 698 is taken as the last course, or concurrently with the last courses of the program. A copy of the Procedures and Guidelines is found on the departmental website.

Master of Engineering (thesis-based)
a) Normally, 12-21 units (2.0-3.5 full-course equivalents) at the graduate level.
Master of Science
a) Normally, 12-21 units (2.0-3.5 full-course equivalents) at the graduate level of which at least 9 units (1.5 full-course equivalents) must be in the area of specialization.

Master of Science, Specialization in Software Engineering
a) Twelve units (2.0 full-course equivalents) selected from a specified list of courses.
b) An applied software engineering project written up as a Master of Science thesis and examined by an examination committee as specified in the Faculty regulations.

Doctor of Philosophy
a) Normally, 18 to 27 units (3.0 to 4.5 full-course equivalents) at the graduate level beyond the bachelor’s degree, or 6 to 15 units (1.0 to 2.5 full-course equivalents) at the graduate level beyond the master’s degree with no fewer than half the courses in the Departmental program.
b) A written and an oral candidacy examination.

6. Additional Requirements
While studying full-time in the MSc or PhD program:
a) Students will be required to attend only two semesters of Electrical Engineering 605/607 at the beginning of their graduate studies program.
b) Students in the PhD program who completed the course in the MSc program will not be required to take the Electrical Engineering 605/607 for the second time.
c) Students who are required to take Electrical Engineering 605/607 must successfully present two seminars.

7. Credit for Undergraduate Courses
Where appropriate, and with approval of the supervisor and the Department, fourth year undergraduate courses (a maximum of 6 units or 1.0 full-course equivalent) for the Master of Science and 3 units or 0.5 full-course equivalent for Doctor of Philosophy) may be taken for credit toward the MSc or PhD degree, but will not count in the course requirements of the program, which only include graduate courses. For the MEng (course-based) degree, 9 to 15 units (1.5 to 2.5 full-course equivalents) of fourth year undergraduate courses may be taken for credit and count toward the course requirements, if graduate course requirements are met. See Section 5.

8. Time Limit
Expected completion time is 20 months of full-time study for the Master of Science and four years for the Doctor of Philosophy. The maximum completion time is four years for the Master of Science and the Master of Engineering (thesis-based) and six years for the Master of Engineering (course-based) and the Doctor of Philosophy.

9. Supervisory Assignments
In all programs, a supervisor to provide guidance to the student is normally selected at the time of admission.

10. Required Examinations
For details on required examinations, see “Engineering Programs”, section 10. In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student's research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The internal examiner may be internal to the home program.

11. Research Proposal Requirements
Master of Science and Master of Engineering (thesis-based)
As required by the supervisor.

Doctor of Philosophy
The research proposal is approved during the candidacy examination.

12. Special Registration Information
None.

13. Financial Assistance
See “Engineering Programs”.

14. Other Information
Students enrolled in any of the engineering graduate programs may opt, in addition to their normal required course load, to undertake an international project outside Canada. The duration of the project should be between four and six months. Details of research, courses, and financial assistance and other information are on the Departmental website.

15. Faculty Members/Research Interests
In addition to the official specializations listed in section 1, students enrolled in the Master of Science and Doctor of Philosophy degree programs in the Department may also conduct research in the following areas: Telecommunications, VLSI and Microelectronics, Image Processing, Computer Engineering, Power Electronics, Control Systems, Power Systems and Biomedical Engineering.

The active research interests of individual faculty members can be found at http://schulich.ucalgary.ca/departments/electrical-and-computer-engineering/research-areas.

Engineering, Geomatics ENGO

Contact Information
Location: Schulich School of Engineering, Room E228
Program number: 403.220.4979
Fax: 403.284.1980

Email address: graduate@geomatics.ucalgary.ca
Web page URL: http://www.geomatics.ucalgary.ca/

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based
Master of Engineering (MEng), thesis and course-based

Specializations:
• Positioning, navigation and wireless location
• Earth observation
• Digital imaging systems (offered jointly with Biomedical Engineering)
• GIScience and land tenure
• Energy and Environmental Systems (Interdisciplinary)*
• Environmental Engineering (Interdisciplinary)*

*See the Calendar section on Interdisciplinary Specializations for further information

2. Admission Requirements
See “Engineering Programs”.
All programs are available to both full-time and part-time students.

3. Application Deadline
Complete applications may be submitted any time up to and including January 1 for January admission, May 1 for May admission, July 1 for July admission and, September 1 for September admission, but applicants should allow up to four weeks for processing their application. Shorter processing times may be possible if a potential supervisor has been identified.

In addition, international students should allow for the time required to apply for, and be granted, a Canadian student permit prior to their arrival. Please note that the time needed to obtain a Canadian study visa varies largely between country of origin and applicants are therefore encouraged to contact the Canadian Embassy in their respective countries to determine conservative processing times for this, including any medical examinations that may be necessary. At the discretion of the supervisor, successful applicants who are unable to obtain a study visa in time may be allowed to defer their start date to a later time.

4. Advanced Credit
See “Engineering Programs”.

5. Program/Course Requirements
In addition to Faculty of Graduate Studies requirements and the Schulich School of Engineering, the Department requires:

Master of Engineering (course-based)
See “Engineering Programs”.

Master of Engineering (thesis-based)
a) A minimum of 12 units (2.0 full-course equivalents) at the graduate level.
b) Complete the professional development seminar (Geomatics Engineering 698).
c) A thesis related to original engineering analysis or design.

**Master of Science**

a) A minimum of 12 units (2.0 full-course equivalents) at the graduate level.
b) Complete the professional development seminar (Geomatics Engineering 698).
c) A thesis related to original engineering research.

**Doctor of Philosophy**

a) A minimum of 9 units (1.5 full-course equivalents) at the graduate level beyond the Master of Science course requirements. For students who transfer from a Master of Science to a doctoral program, a minimum of 6 units (1.0 full-course equivalent) at the graduate level beyond the Master of Science course requirements.
b) Complete the professional development seminar (Geomatics Engineering 698).
c) A written and an oral candidacy examination based on the graduate course work.
d) A thesis related to advanced original engineering research.

**Independent Study Courses**
Course-based Master of Engineering students can have no more than three independent study courses count towards their degree requirements.

Thesis-based Master of Engineering students and Doctor of Philosophy students can have no more than one independent study course count towards their degree requirements. Students who transfer from the Master of Science to the Doctor of Philosophy program can have no more than two independent study courses count towards their degree requirements.

**6. Additional Requirements**
None.

**7. Credit for Undergraduate Courses**
Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599, which are considered undergraduate courses.

**8. Time Limit**
See “Engineering Programs”.

**9. Supervisory Assignments**
For thesis-based master’s, or Doctor of Philosophy programs, see “Engineering Programs”. For course-based master’s programs, all students will be assigned an advisor at the time of registration.

**10. Required Examinations**

**Master’s Programs**
See “Engineering Programs”.

**Doctoral Programs**

Doctoral Candidacy Examination

The candidacy examination has a written and an oral component. The student’s background knowledge in the field of Geomatics Engineering and in-depth knowledge in his/her chosen research specialization is examined.

The written examination is an open book examination of no longer than 6 cumulative hours. It consists of a comprehensive examination in the candidate’s field of specialization and of a general examination in at least one of the other graduate streams in Geomatics Engineering, referred to as major and minor parts in the following. The major part will usually be of three hours duration and will count for 2/3 of the mark of the written component. The minor part will last one- and a half hours and will count for 1/3 of the mark of the written component. Passing marks in both the major and the minor parts are required to pass the written examination. A recommended reading list for the written examination will be made available to the student upon request.

The oral examination will further test the candidate’s knowledge of his/her field of study in particular, and of geomatics in general, in addition to providing an opportunity to clarify, defend and extend answers in the written examination. Although the purpose of the candidacy exam is not to examine or approve the student’s research proposal, questions on the research proposal may be included in the oral candidacy exam to assess the background knowledge and preparedness of the student to conduct doctoral research of high quality in his/her field of study.

Doctoral Thesis Examination
See “Engineering Programs”.

**11. Research Proposal Requirements**

**Master of Engineering (thesis-based)**

A thesis proposal accepted by the supervisor is required no later than 16 months after initial registration. Contents of the thesis, reflecting an applied approach to a problem, should contain new elements of engineering principles and applications.

The thesis proposal should include the following:
1. Statement of the problem.
2. Research objectives.
3. Literature review.
4. Methodology and procedures.
6. Proposed time schedule.
7. Bibliography and references.

**Doctor of Philosophy**

The doctoral thesis proposal requirements, including the outline of the proposal’s contents, are the same as those for the Master of Engineering (thesis-based). The thesis topic, however, should deal with original theoretical or practical research in Geomatics Engineering.

**12. Special Registration Information**

None.

**13. Financial Assistance**
See “Engineering Programs”.

**14. Other Information**

See “Engineering Programs”.

In addition, the Department offers a designated set of graduate courses in each of the five specialization areas. Additional graduate courses are offered as Special Studies and Project courses. The Department also offers a Distinguished International Lecturer Series, which consists of approximately four to five courses offered annually by invited professors and researchers.

**15. Faculty Members/Research Interests**

Information about the Department’s research areas may be found at http://www.geomatcs.ucalgary.ca/research/.

---

**Engineering, Mechanical and Manufacturing ENME**

**Contact Information**
Location: Mechanical Engineering Building, Room 506
Program number: 403.220.4153/3541
Fax: 403.282.8406
Email address: gradenme@ucalgary.ca
Web page URL: http://www.schulich.ucalgary.ca/Mechanical/

**1. Degrees and Specializations Offered**

Doctor of Philosophy (PhD)
Master of Science (MSc) thesis-based
Master of Engineering (MEng), thesis and course-based

The MEng program may be completed on a full-time or a part-time basis.

**Specializations:**
- Pipeline Engineering
- Engineering, Energy & Environment (Interdisciplinary Specialization)*
- Environmental Engineering (Interdisciplinary Specialization)*
- Energy & Environmental Systems (Interdisciplinary, thesis-based only)*

Further information on the Pipeline Engineering specialization may be found at www.schulich.ucalgary.ca/PEC. See section 15 for other supported areas of research.

*See the Calendar section under Interdisciplinary Specializations for further information.

**2. Admission Requirements**

In addition to the Faculty of Graduate Studies and the Schulich School of Engineering
minimum requirements, the Department’s requirements are as follows:

**Master’s Programs (MSc and MEng)**

a) BSc degree or equivalent.
b) A minimum admission grade point average of 3.00 on a four-point scale or equivalent.
c) The admission requirements for both the MEng program and MSc program are the same.

**Doctor of Philosophy**

See “Engineering Programs”.

**3. Application Deadline**

Deadlines for submission of complete applications (review of applications received after the deadline is not guaranteed):

- **International Applicants and Domestic Applicants (Canadian Citizens and Permanent Residents) with consideration of financial support:**
  - January 15 for September admission
  - May 1 for January admission

Applicants who meet this deadline will be considered for entrance scholarships.

- **Domestic Applicants (Canadian Citizens and Permanent Residents) without financial support:**
  - June 1 for September admission
  - October 1 for January admission

**4. Advanced Credit**

See “Engineering Programs”.

**5. Program/Course Requirements**

In addition to Faculty of Graduate Studies and the Schulich School of Engineering minimum requirements, the Department requires:

- **Master of Engineering (course-based)**
  - Thirty units (5.0 full-course equivalents), no more than 12 units (2.0 full-course equivalents) of which can be senior undergraduate courses (500-level).

- **Master of Engineering (thesis-based)**
  - a) At least 15 units (2.5 full-course equivalents), of which 6 units (1.0 full-course equivalent) may be taken from outside the Department. No more than 3 units (0.5 full-course equivalent) can be a senior graduate course (500-level).
  - b) In addition to the 15 units (2.5 full-course equivalents), thesis-based students must also receive credit in ENME/ENMF 613 Research Seminar. To receive credit in this course, students must attend designated seminars and present once at the annual Mechanical Engineering Graduate Student Conference in the Winter Term.

- **Master of Science**
  - a) At least 15 units (2.5 full-course equivalents), of which 6 units (1.0 full-course equivalent) may be taken from outside the Department. Not more than 3 units (0.5 full-course equivalent) can be a senior undergraduate course (500-level).
  - b) One course to be selected from Mechanical Engineering 631 - Numerical Methods for Engineers or Mechanical Engineering 633 - Mathematical Techniques for Engineers. 
  - c) In addition to the 15 units (2.5 full-course equivalents), thesis-based students must also receive credit in ENME/ENMF 613 Research Seminar. To receive credit in this course, students must attend designated seminars and present once at the annual Mechanical Engineering Graduate Student Conference in the Winter Term.

**Doctor of Philosophy**

a) Twenty-one to 30 units (3.5 to 5.0 full-course equivalents) at the graduate level, of which 6 units (1.0 full-course equivalent) may be taken from outside the Department. No more than 3 units (0.5 full-course equivalent) can be a senior undergraduate course (500-level).

- (For students who transfer from an MSc program, 6 to 18 units (1.0 to 3.0 full-course equivalents) beyond the master’s degree are required.)
  - b) One course to be selected from Mechanical Engineering 631 – Numerical Methods for Engineers or Mechanical Engineering 633 – Mathematical Techniques for Engineers.
  - c) In addition, thesis-based students must also receive credit in ENME/ENMF 713 Research Seminar. To receive credit in this course, students must attend designated seminars and present one at the annual Mechanical Engineering Graduate Student Conference in the Winter Term.
  - d) One additional presentation at the Mechanical Engineering Graduate Student Conference in the Winter Term must be completed in partial fulfillment of the degree requirement.

**Note:** Further details of Departmental requirements are listed in the Department’s Graduate Studies Guidebook.

**6. Additional Requirements**

- None.

**7. Credit for Undergraduate Courses**

See Section 5 for details.

**8. Time Limit**

See “Engineering Programs”.

**9. Supervisory Assignments**

MEng students in the department require a supervisor. See “Engineering Programs”.

**10. Required Examinations**

See “Engineering Programs”.

In addition to the Faculty of Graduate Studies and Schulich School of Engineering requirements, the program requires: 

**Thesis Examination**

**Scheduling of the Examination**

All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

**Composition of the Committee**

The Internal Examiner must be external to the home program.

**11. Research Proposal Requirements**

None beyond the Faculty of Graduate Studies requirements.

**12. Special Registration Information**

None.

**13. Financial Assistance**

The MEng program is self-funded. See “Engineering Programs”.

**14. Other Information**

Students may hire an editor to copyedit their theses subject to the conditions outlined in Section 1.7 of the Faculty of Graduate Studies Thesis/Dissertation Guidelines. See “Engineering Programs”.

**15. Faculty Members/Research Interests**

Research is supported in the following areas: applied mechanics, automation, control, robotics and nano MEMS, biomechanics, design, manufacturing systems, materials and manufacturing processes, thermofluids, energy systems and environment. Active research programs and research interests of current faculty can be found at http://www.schulich.ucalgary.ca/mechanical/research.

---

**1. Degrees and Specializations Offered**

- Doctor of Philosophy (PhD)
- Master of Arts (MA), one year course-based or two year thesis-based. Both the one-year and two –year MA programs include significant independent research. One year course-based MA program is SSHRC-eligible and is appropriate for students who intend to proceed to doctoral studies.
- Under special circumstances, students may be considered for part-time status. Please consult the Department of English for more information.

**Specialization:**
- Literature in English
- A Creative Writing option is also available.

**2. Admission Requirements**

In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

- **Master of Arts**
  - a) A University of Calgary Honours degree or its equivalent in English (60 units or 10 full-course equivalents in English).
b) A Statement of Intent.
c) A 5-10 page sample of critical writing; for creative writing applicants, an additional 10-page sample of creative writing.
d) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 600 (paper-based), 100 (Internet-based test), a MELAB score of 84, an IELTS score of 7.5, or a PTE score of 70.
e) Two reference letters.

Doctor of Philosophy
a) A Master of Arts Degree in English or its equivalent.
b) A Statement of Intent.
c) A 5-10 page sample of critical writing; for creative writing applicants, an additional 10-page sample of creative writing.
d) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 600 (paper-based), 100 (Internet-based test), a MELAB score of 84, an IELTS score of 7.5 or a PTE score of 70.
e) Two reference letters.

3. Application Deadline
Online applications must be complete and supporting documents (with the exception of letters of reference and official transcripts) received in the department by December 15th. Letters of reference and official transcripts will be received until January 10th. We recommend you allow at least 15 business days for mailing any supporting documents. Please note: the Department of English only has one application deadline and admits only for September.

4. Advanced Credit
Application for advanced credit must be made to the Department Head at the time of admission.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department normally requires:

Master of Arts (one-year course-based with research project)
a) Twenty-one units (3.5 full-course equivalents) in English at the 600 or 700 level beyond the Honours BA, which must meet the

Historical Distribution Requirement:
1. at least 3 units (0.5 full-course equivalent) in literature from the twentieth century and after, AND
2. at least 3 units (0.5 full-course equivalent) in literature from one of the four areas listed below:
   i. Medieval literature
   ii. Early Modern literature
   iii. Restoration and eighteenth-century literature
   iv. Romantic literature and Victorian literature
b) English 710 (includes a final major research project of approximately 50 pp).
c) English 691 or its equivalent.

Master of Arts (two-year thesis-based)
a) Eighteen units (3.0 full-course equivalents) in English at the 600 or 700 level beyond the Honours BA, which must meet the

Historical Distribution Requirement
1. at least 3 units (0.5 full-course equivalent) in literature from the twentieth century and after, AND
2. at least 3 units (0.5 full-course equivalent) in literature from one of the four areas listed below:
   i. Medieval literature
   ii. Early Modern literature
   iii. Restoration and eighteenth-century literature
   iv. Romantic literature and Victorian literature
b) English 691 or its equivalent.
c) A scholarly and/or critical thesis (approximately 100 pp) approved by the Faculty of Graduate Studies.

Doctor of Philosophy
a) Thirty-six units (6.0 full-course equivalents) in English at the 600, 700, or 800 level beyond the Honours BA or 18 units (3.0 full-course equivalents) in English beyond the MA, which must meet the

Historical Distribution Requirement:
1. at least 6 units (1.0 full-course equivalent) in literature from the twentieth century and after, AND
2. at least 9 units (1.5 full-course equivalents) in literature from one of the four areas, of which 6 units (1.0 full-course equivalent) must be from i, ii, iii:
   i. Medieval literature
   ii. Early Modern literature
   iii. Restoration and eighteenth-century literature
   iv. Romantic literature and Victorian literature
b) English 691 or its equivalent.
c) A demonstrated reading knowledge of a language other than English. Students are encouraged to establish competency in a language that contains a body of texts relevant to their program of study. This can be discussed with the Graduate Director.

6. Additional Requirements
All students must attend an orientation session.

Master of Arts
Knowledge of one language other than English is a great asset and an advantage for future Doctoral studies. Students are encouraged to establish competency in a language that contains a body of texts relevant to their program of study. This can be discussed with the Graduate Director.

7. Credit for Undergraduate Courses
With the approval of the Department, all graduate students may take for credit up to 6 units (1.0 full-course equivalent) at the 500 level (excluding English 504).

8. Time Limit
Expected completion time is up to twelve months for the course-based (with research project) Master of Arts, two years for the thesis-based Master of Arts and four years for the Doctor of Philosophy degrees. Maximum completion time is two years for the course-based (with research project) Master of Arts, four years for the thesis-based Master of Arts and six years for the Doctor of Philosophy degrees.

9. Supervisory Assignments
Master of Arts
Students are initially assigned an interim advisor to give them time to familiarize themselves with faculty members’ research before securing a permanent supervisor.

Thesis-based: By March 1 of the first year, each student must submit a proposed field of research and the name of a proposed supervisor to the Graduate Executive Committee for approval.

Course-based: By June 1, students will approach a faculty member, normally one with whom they have completed (or are completing) a graduate course, to request supervision for their capstone research project.

Doctor of Philosophy
For the first eight months of the program, students are assigned an interim advisor to give them time to familiarize themselves with faculty members’ research before securing a permanent supervisor.

By April 30 of the first year, each student will submit the name of a proposed supervisor...
11. Research Proposal Requirements

11. Research Proposal Requirements

Master of Arts

Thesis-based: By May 1, or no later than eight months after initial registration, each student must submit a thesis proposal with the form Registration of MA Thesis Topic to the Graduate Executive Committee. Further details are available from the department. Course-based: By June 15 students will prepare a proposal of two pages plus bibliography and submit it to the Graduate Program Office for approval.

Doctor of Philosophy

By September 30 of the second year, each student must submit a short thesis proposal on the form Initial PhD Thesis Research Proposal and Supervisory Committee to the Graduate Executive Committee. The student must submit a Final PhD Thesis Proposal and Bibliography form along with a final thesis proposal and bibliography to the doctoral supervisory committee within three months of successful completion of the candidacy examinations. Further details are available from the department.

12. Special Registration Information

Students must register for courses by the end of June. Continuing students and new students who are able to do so should consult the course instructors before they register or as soon as they arrive on campus. Final approval to enter a course is given by the Head or Associate Head of the Department.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships are advised to have their applications to the Department by December 15.

14. Other Information

None.

15. Faculty Members/Research Interests

Detailed information about faculty members and their research interests may be found at http://english.ucalgary.ca/contact-us/directory.

Location: Professional Faculties 2182
Program number: 403.220.6601
Fax: 403.284.4399
Email address: evdinfo@ucalgary.ca; and evdsphd@ucalgary.ca
Web page URL: http://evds.ucalgary.ca

1. Degrees and Specializations Offered

Doctor of Philosophy (PhD)

Master of Environmental Design (MEdes), thesis-based
Master of Planning (MPlan), course-based
Master of Architecture (MArch), course-based
Master of Landscape Architecture (MLA), course-based

Specialization:

- Energy and Environmental Systems (Interdisciplinary, MEdes and PhD only)*
- Contact the Faculty for more information.
- See the Calendar section on Interdisciplinary Specializations for further information.

2. Admission Requirements

In addition to Faculty of Graduate Studies requirements, the Faculty of Environmental Design requires:

Applicants are required to prove proficiency in English, a TOEFL score of 600 (paper-based); or 100 (Internet-based test); or an IELTS score of 7.5.

Doctor of Philosophy

a) An admission grade point average (GPA) above 3.50 on a four-point scale.
b) A research proposal that describes the nature of the thesis research the applicant expects to undertake. This will be used by an admissions committee as an indicator of the applicant’s ability to conduct doctoral-level research and to determine if adequate supervisory resources are available. Only if such resources are available will the student be admitted. Please note that this research statement (maximum of 1500 words) must include the following sections: Background, research questions, literature review, research methodology, intellectual merit of the proposed research, and broader impacts of the proposed research. The research statement should also indicate if ethics approval is required to carry out the proposed research.
c) A funding plan that demonstrates that financial resources are available for the entire program of study.
d) Three reference letters.

Master of Environmental Design (MEdes)

Applications are encouraged from a variety of academic backgrounds (including first professional degrees in architecture, landscape architecture, planning and design) or a combination of undergraduate degree and work-related experience.

In addition to Faculty of Graduate Studies requirements, the Faculty of Environmental Design requires:

a) A clear, concise and substantive statement of interest (1,000 to 1,500 words), which informs the Admissions Committee of:
   - The applicant’s reasons for pursuing the MEdes degree
   - How the applicant’s specific educational background and professional and personal experience relates to their proposed thesis project
   - The applicant’s thesis research interests and ideas to clarify the applicant’s supervisory needs
b) At least one example of the applicant’s previous academic or professional work such as a written essay, published research paper, major academic paper, thesis, design project, or consulting report.

In addition, applicants may submit a portfolio that provides examples of or illustrates the applicant’s design work, professional work, research, creative thinking, community action, planning products, or graphics and visual communication.

If any of the work submitted involved collaboration with others, the applicant should clearly identify their individual contributions. The examples of work and (if applicable) portfolio should be submitted in digital form (portable document .PDF files), uploaded by the applicant to their Student Centre, upon submission of their online application.

c) A funding plan that demonstrates that financial resources are available for the entire program of study.

d) Three reference letters.

Master of Planning (MPlan)

Admission to the Master of Planning is a competitive process. Applicants must meet minimum Faculty of Graduate Studies requirements (including a 3.00 GPA and English proficiency). In addition to Faculty of Graduate Studies requirements, the Faculty of Environmental Design requires:

a) A clear, well-written, statement of intent which describes the applicant’s interest in planning and how the applicant’s specific educational background and professional or personal experience relates to Planning as a field of study.

b) At least one example of the applicant’s previous academic or professional writing, such as a written essay, published research paper, major academic paper, design project or consulting report.

A portfolio should be submitted that includes examples of the applicant’s design work or design thinking, including creative work or ideas, community action, planning or design products, or graphics and visual communication.

The requirements for digital portfolio submissions are found in the Faculty of Environmental Design website at: http://evds.ucalgary.ca/content/master-planning-mplan-admissions.

The portfolio will be submitted in digital form (portable document .PDF files), uploaded by the applicant to their Student Centre upon submission of their online application.

c) Three reference letters.

Master of Landscape Architecture (MLA)

Contact the Faculty for more information.

3. Application Deadline

Doctor of Philosophy

The deadline for the submission of complete applications is February 1 for September admission.

Normally students begin their programs in September.

Master’s Programs

Applications are accepted from September 1 through January 15 for September admission. There is no January admission. Please note that new admissions to any of the master’s degree programs may be limited in number on an annual basis.

4. Advanced Credit

A student may apply for advanced credit for previous courses that have not been used to satisfy the requirements of any other degree or diploma program. The applicant must make advanced credit requests as part of the admission process. Advanced credit will not be given for courses taken more than five years prior to admission application. Credit will not be given for courses taken to bring the grade point average to a required level for graduate studies admission. Advanced credit may not exceed 12 units (2.0 full-course equivalents) or one third of the program whichever is less.

Course Exemptions: Students registered in a graduate degree program may receive an exemption from a specific course if they can demonstrate successful completion of an equivalent course. Before being eligible for an exemption, the student must provide original transcripts, course outlines and samples of course assignments which will be assessed for academic equivalency. Courses for which exemptions are being sought must be from a recognized institution, and they must be graded courses with a minimum grade of “B-”. Students granted an exemption from a course may be required to take another, equally-weighted, course to satisfy credit-hour requirements for their program.

Program Transfers: A student at the University of Calgary may request a transfer to another program of equivalent level. Any course taken in the initial program may be transferred to the new program, depending on its applicability to the receiving program.

5. Program/Course Requirements

In addition to Faculty of Graduate Studies requirements, students admitted to any of the Faculty’s graduate programs (MArch, MPlan, MEDes, PhD) are expected to complete Environmental Design 601 Conceptual Bases of Environmental Design as a core course. Additionally, the Faculty of Environmental Design requires:

Doctor of Philosophy

a) Completion of 6 units (1.0 full-course equivalent) electives at the graduate level that are relevant to their area of research, chosen in consultation with their supervisor. The PhD Program Director must approve these courses.

b) Additional course work when recommended by the student’s interim advisor or supervisor.

Fieldwork and research performed off-campus may be counted towards fulfillment of the full-time study and research requirement.

Master of Environmental Design (MEDes)

The Master of Environmental Design is an interdisciplinary degree concerned with designing, planning, managing, and studying human activities in the built and natural environments. The degree is thesis-based and driven by the student’s Program of Study, developed in consultation with their supervisor. For students with an appropriate professional background, the degree provides the opportunity to pursue research in a specific area of interest. Therefore, a clear statement of design or research interest in one of the areas of faculty research expertise is of particular importance in the admissions process. Students are admitted from a variety of backgrounds, but normally are in possession of professional design or planning degrees, post-professional design degrees, or significant work experience in a related field.

An individual student Program of Study (POS) will be submitted by all students for approval by the MEDes Program Director prior to their second term registration. The POS must include the following academic requirements:

a) Required Courses:

Environmental Design 601 (3 units): Conceptual Bases of Environmental Design

Environmental Design 753 (3 units): Research Skills and Critical Thinking
b) A minimum of 6 units (1.0 full-course equivalent) of electives.

c) A thesis proposal approved by the supervisor. If there is a supervisory committee, the committee has to approve the research proposal. The approved student thesis proposal must form part of the POS for approval.

d) Satisfactory Faculty of Graduate Studies student progress reports must be submitted annually by the student and the supervisor.

Master of Planning (MPlan)

The Master of Planning program is designed to provide graduates with the core competencies required for certification by the Canadian Institute of Planners and its affiliate, the Alberta Professional Planners Institute. The Master of Planning Program has been granted accreditation by the Canadian Institute of Planners for the period of 2013/14 through 2017/18.

An individual Program of Study (POS) is required by all students for approval by the MPlan Graduate Program Director by May 31 of their first registration year. The POS must include the following academic requirements, totalling at least 51 units (8.5 full-course equivalents):

a) Core required courses:
   - Environmental Design 601 (3 units)
   - Environmental Design Planning 621 (3 units)
   - Environmental Design Planning 625 (3 units)
   - Environmental Design Planning 626 (3 units)
   - Environmental Design Planning 627 (3 units)
   - Environmental Design Planning 631 (3 units)
   - Environmental Design Planning 633 (3 units)
   - Environmental Design Planning 637 (3 units)
   - Environmental Design Planning 644 (6 units)

b) One of the following Planning Technology courses (or approved equivalent), the other of which may be taken as elective credit:
   - Environmental Design Planning 602 (3 units)
   - Environmental Design Planning 611 (3 units)

  c) One of the following Planning Studio courses (or approved equivalent), the other of which may be taken as elective credit:
     - Environmental Design 623 (3 units)
     - Environmental Design 618 (3 units)

  d) Fifteen units (2.5 full-course equivalents) of elective credit, six (1.0 full-course equivalents) of which must be from the following courses:
     - Environmental Design 616 (3 units)
     - Environmental Design 622 (3 units)
     - Environmental Design 624 (3 units)
     - Environmental Design 628 (3 units)
     - Environmental Design 671 (3 units)

Note: The course-based Master of Planning program is available for part-time study.

Master of Architecture (MArch)

The MArch is a first professional degree in Architecture accredited by the Canadian Architectural Certification Board (CACB). The MArch is a two year course-based degree with a Foundation year for those applicants without a design-related four year undergraduate degree. After its last review in 2011, the University of Calgary Master of Architecture professional program was accredited for another six years by the CACB. This is the maximum period for which programs can be accredited between reviews. Under NAFTA, this means that accredited Canadian degrees are fully recognized in the USA and vice versa. In Canada, all provincial associations recommend a degree from an accredited professional degree program as a prerequisite for licensure. The CACB, which is the sole agency authorized to accredit Canadian professional degree programs in architecture, recognizes two types of accredited degrees, the Bachelor of Architecture and the Master of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on the degree of conformance with established educational standards. Master's degrees may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree. A student Program of Study (POS) may be required by all students for approval by the MArch Graduate Co-ordinator. Successful completion of the MArch must include the following academic requirements:

a) Core required courses:
   - Foundation Year
     - Environmental Design Architecture 511 (3 units)
     - Environmental Design 523 (3 units)
     - Environmental Design Architecture 523.01 (3 units)
     - Environmental Design Architecture 523.02 (3 units)
     - Environmental Design Architecture 541 (3 units)
     - Environmental Design Architecture 543 (3 units)
     - Environmental Design Architecture 580 (6 units)
     - Environmental Design Architecture 582 (6 units)

b) One of the following Planning Technology courses (or approved equivalent), the other of which may be taken as elective credit:
   - Environmental Design Architecture 543 (3 units)
   - Environmental Design Architecture 546 (3 units)
   - Environmental Design Architecture 547 (3 units)
   - Environmental Design Architecture 550 (3 units)
   - Environmental Design Architecture 551 (3 units)
   - Environmental Design Architecture 552 (3 units)
   - Environmental Design Architecture 553 (3 units)

  c) One of the following Planning Studio courses (or approved equivalent), the other of which may be taken as elective credit:
     - Environmental Design 619 (3 units)
     - Environmental Design Architecture 615 (1.5 units)
     - Environmental Design Architecture 617 (1.5 units)
     - Environmental Design Architecture 619 (3 units)
     - Environmental Design Architecture 621 (3 units)
     - Environmental Design Architecture 661 (3 units)
     - Environmental Design Architecture 682.02 (6 units)

First (M1) and Second (M2) Year

   - Environmental Design Architecture 682.04 (6 units)
   - Environmental Design Architecture 782 A (6 units)
   - Environmental Design Architecture 782 B (6 units)

b) One of the following block-week courses:
   - Environmental Design Block 697.64 Gillmor Theory Seminar (1.5 units)
   - Environmental Design Block 697.65 Somerville Design Charrette (1.5 units)
   - Environmental Design Block 697.66 Taylor Workshop (1.5 units)
   - Environmental Design Block 697.77 make-Calgary Design Charrette (1.5 units)

Note: Upon completion of the requirement, any of the courses listed in b) may be taken or repeated for elective credit.

c) One of the following Urbanism Theory courses:
   - Environmental Design 671 (3 units)
   - Environmental Design 675 (3 units)

  d) Twelve units (2.0 full-course equivalents) of elective credit, of which at least 9 units (1.5 full-course equivalents) must be from a list approved by the Associate Dean, Academic-Architecture, circulated annually before commencement of the registration year.

Master of Landscape Architecture (MLA)

Contact the Faculty for more information.

6. Additional Requirements

A laptop computer is required for all students. Visit the website for further details: http://evds.ucalgary.ca/content/master-architecture-march-admissions.

7. Credit for Undergraduate Courses

Doctor of Philosophy

Not given.

Master of Environmental Design / Master of Planning

Only undergraduate courses numbered 500-599 may be considered for graduate-level credit and are subject to approval by the Program Director.

Master of Architecture

With the exception of Foundation year courses, only undergraduate courses numbered 500-599 may be considered for graduate-level credit and are subject to approval by the Program Director.

8. Time Limit

Students registered in the Master of Environmental Design (thesis-based) program must complete all degree requirements within four registration years.

Students registered in either the Master of Architecture or Master of Planning (course-based) programs must complete all degree requirements within six registration years. However, it is expected that these students will enrol on a full-time basis and complete the degree requirements within two registration years (excluding the Foundation year in the Master of Architecture program).
Students registered in the PhD program must complete all degree requirements within six registration years. However, it is expected that these students will enrol on a full-time basis and complete the degree requirements within four registration years.

9. Supervisory Assignments

Doctor of Philosophy

At the time of admission, each student will be assigned a supervisor. The supervisor will recommend a program of courses that must be approved by the PhD Program Director. During the first year of studies, the student, with the advice of the supervisor, will prepare a thesis proposal and propose the other members of a supervisory committee for approval by the PhD Program Director.

Master of Environmental Design

Upon admission, each MEDES student will be assigned a supervisor appropriate to their admissions statement of intent and thesis research area who may assist with POS development and thesis proposal development.

Master of Planning

Upon admission, each MPlan student will be advised by the office of the Associate Dean regarding POS development.

Master of Architecture

Upon admission each MArch student will be assigned a program advisor to assist with program requirements and planning.

10. Required Examinations

In addition to the Faculty of Graduate Studies requirements, the program requires:

Doctor of Philosophy

Candidacy

Doctoral students are required to complete both a written and an oral candidacy examination. The written candidacy examination normally consists of a set of four questions set by the supervisory committee and taken in the second year of the program (or possibly the third year for students entering the program without a master’s degree), after the completion of course work and after approval of the doctoral thesis proposal.

At least six months before the written examination, the supervisory committee will prepare a written outline of the material to be covered in the exam, a recommended reading list and a draft examination schedule. Normally, the student will be given two weeks to complete the written candidacy papers. The period during which the written examination and the oral examination are conducted must not exceed one month.

The written papers will form the basis of the oral candidacy examination although questions may extend beyond the written papers to areas outlined in the notice of candidacy examination.

Thesis Examination

Final thesis oral examinations are open.

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

Master of Environmental Design

Thesis Examination

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

Master of Planning

Successful completion of course requirements.

Master of Architecture

Successful completion of course requirements.

11. Thesis Proposal Requirements

Doctor of Philosophy

Approval of the thesis proposal by the supervisory committee and the PhD Program Director is required as noted in the “Supervisory Assignments” above. Thesis Proposals should clearly describe the project in terms of Title, Objectives, Background, Methodology and Expected Outcomes, and must include an explicit interventionist or problem-solving component.

Master of Environmental Design

Final thesis proposals will be individually approved by the supervisor. Thesis Proposals should clearly describe the project in terms of Title, Objectives, Background, Methodology and Expected Outcomes, and must include an explicit interventionist or problem-solving component.

12. Convocation Information

In addition to Faculty of Graduate Studies submission requirements, all PhD and Master of Environmental Design (Thesis) students are required to submit one bound copy (bound in standard orange cloth-covered cases, bearing the author’s name, title of work, year and the Environmental Design symbol (rainbow lettered in white)), and one portable document format (.PDF) copy on CD.

13. Financial Assistance

Financial assistance may be available to qualified students but cannot be guaranteed. For information on admission and academic awards, see the Awards and Financial Assistance section of this calendar, the EVDS website and the Awards Data Base on the Faculty of Graduate Studies website.

14. Other Information

Attendance at orientation for first year students is expected.

15. Faculty Members/Research Interests

Current information about faculty members and research interests can be found at http://evds.ucalgary.ca/contact-us.

French, Italian and Spanish FISL

Contact Information

Location: Craigie Hall, Room D310
Program number: 403.220.4001
Fax: 403.284.3634
Email address: fisgrad@ucalgary.ca
Web page URL: http://fis.ucalgary.ca

1. Degrees and Specializations Offered

Master of Arts (MA), thesis and course-based routes, with specialization in either French or Spanish

The MA degree may be taken on a full-time or a part-time basis.

Please see section 15 for a list of supported research areas.

The Department also participates actively in interdisciplinary degree programs, such as Canadian Comparative Literature (with English) and Film.

Applicants interested in a doctoral degree on a special case basis should review the program’s website to determine any additional requirements or restrictions, and then, if appropriate, contact the graduate program representative. Information on the Faculty of Graduate Studies Special Case Policy can be found at http://grad.ucalgary.ca/prospective/admissions/special-case.

A description of the special case PhD in Spanish or French Admission and Program Requirements as well as a sample Student Research Proposal can be found at http://fis.ucalgary.ca/graduate/prospective-students/doctor-philosophy.

2. Admission Requirements

In addition to Faculties of Graduate Studies and Arts requirements, the Department requires students:

a) To demonstrate a sufficiently high level of oral and written competence in the French or Spanish language.

b) To have an adequate academic background in the discipline.

c) To submit an example of the applicant’s written work: a term paper, research paper or other writing, which the applicant considers representative of his or her best work.

The paper must be in either French or Spanish, depending on the language of study.

d) A 250-word (minimum) statement of research interest including research topic and the reasons for wishing to pursue graduate work in this Department.

e) Two reference letters.
Program Descriptions 75

Geography GEOG

3. Application Deadline
Deadline for the submission of complete applications: February 1.
Applications received later than the deadline will be considered for admission and for departmental funding, but chances of financial support are greatly reduced.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be granted for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
Note: Normally no more than 3 units (0.5 full-course equivalent) of Directed Reading may be taken for credit.
In addition to Faculty of Arts requirements, the Department normally requires:

- Master of Arts (thesis-based)
  Eighteen units (3.0 full-course equivalents), including French 605 or Spanish 601, depending on the language of study.

- Master of Arts (course-based)
  Thirty units (5.0 full-course equivalents), including French 605 or Spanish 601, depending on the language of study.
Applicants lacking the requisite background in language or literature may be admitted as qualifying students. In this case, extra course work is normally required. A qualifying oral examination based on set texts may be required before the students attain regular Master of Arts status. Courses taken as a qualifying student do not normally count as part of the student’s course requirements.

Copyediting
The department prohibits copyediting in students’ thesis for the MA or PhD degrees.

6. Additional Requirements
All students must attend the departmental graduate orientation session in September. Attendance at the UoF Graduate Orientation is highly recommended.

- Both options have a knowledge areas requirement that must be satisfied by the first month of the second year in program, or, as appropriate, one month after the completion of course work, whichever occurs first. Upon admission students will be advised of any specific course or other work needed to fulfill this requirement.
- Before the end of their second year of study, MA Thesis students are required to make a departmental or external presentation related to their research.
- Students in the thesis-based and course-based programs are also expected to demonstrate their participation in university-wide research activities by attending at least five departmental or external scholarly presentations every year in their programs.

7. Credit for Undergraduate Courses
Only in exceptional circumstances and where appropriate to a student’s program may graduate credit be received for courses numbered 500-599. No more than 6 units (1.0 full-course equivalent) can be at the 500 level.

8. Time Limit
Expected completion time for full-time students is two years for a thesis program and three years for a course-based program.
Maximum completion time is four years for a thesis program and six years for a course-based program.

9. Supervisory Assignments
Newly admitted students begin their programs under the supervision of the departmental Graduate Director. Students are expected to choose a permanent supervisor by the end of the second regular academic session after first registration (April 30 for September registrants and December 15 for January registrants). Selection of a supervisor should be by mutual agreement between the student and the staff member concerned, approved by the Graduate Director.

10. Required Examinations

- Comprehensive examination (course-based)
The course-based program requires a comprehensive examination with a written and an oral component, taken after the completion of all course work and any other requirement such as the knowledge areas requirement. Students are required, as early as possible and, in any case, at least before registering for an eleventh semester to file the reading list on their chosen area of specialization with the Department’s Graduate Committee. The list should be drafted after consultation with the student’s supervisor and approved by that faculty member.
Final oral thesis examinations are open.

11. Research Proposal Requirements
Thesis students are required to submit a written thesis proposal thirteen months after initial registration (for September registrants: 1st draft to the supervisor is due by September 1 and the thesis proposal to the Graduate Committee is due by September 30; for January registrants: 1st draft to the supervisor is due by January 2 and the thesis proposal to the Graduate Committee is due by February 1).
This proposal should be approximately 1200 words in length and be accompanied by an abstract and an appropriately detailed preliminary bibliography. It should be drafted after consultation with the student’s supervisor and have his/her preliminary approval. These documents will be circulated to the departmental Graduate Committee for approval. Abstracts of proposals may be reproduced for information purposes.

12. Special Registration Information
None.

13. Financial Assistance
Funding is available to qualified thesis-based students in the form of scholarships and/or teaching assistantships. Master of Arts students can expect to receive funding for a maximum of 20 months.
Students applying for departmental funding for the following academic year must submit their applications to the Department by February 1. All students are strongly encouraged to seek external financial assistance throughout their program. For information on other funding opportunities, see the Awards and Financial Assistance section of this Calendar and the Faculty of Graduate Studies website: http://www.grad.ucalgary.ca/awards.

14. Other Information
Prospective students are encouraged to consult either the Head of the Department or the Graduate Director. Detailed information on our programs is also available at http://fis.ucalgary.ca.

15. Faculty Members/Research Interests
Support research areas: French Language, French Linguistics, French Literature from the Medieval to the Contemporary periods, French-Canadian Literature, Francophone Literatures, Culture and Film, Spanish Language, Hispanic Literatures, Culture and Film, Comparative Literature, Literary Theory, Creative Writing, Second Language Learning and Teaching.
Information about faculty members and their research interests may be found at http://fis.ucalgary.ca/.

Geography GEOG

Contact Information
Location: Earth Sciences Building, Room 356
Program number: 403.220.5584
Fax: 403.282.6561
Email address: geograd@ucalgary.ca
Web page URL: http://geog.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Arts (MA), thesis-based
Master of Science (MSc), thesis-based
Master of Geographic Information Systems (MGIS), course-based with research component

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department of Geography requires all MA/MSc and PhD applicants to submit:

- A proposal describing applicant’s intended research area.
- A current curriculum vitae or résumé.
- Two reference letters.
For MGIS applicants the Department requires:

a) A statement of interest outlining the applicant's goals, motivation for applying to the program, and research area of interest.

b) A current curriculum vitae or résumé.

c) Two reference letters.

For the academic background requirements for the MGIS program, the Department will accept a four-year BA or BSc degree in Geography or any related field that makes use of spatial data. Examples include, but are not limited to: Anthropology, Archaeology, Biological Sciences, Computer Science, Ecology, Environmental Science, Geology/Geophysics, Geomatics Engineering, History, Management, Mathematics, Political Science, Psychology, Tourism, Transportation Studies or Engineering, and Urban Studies.

3. Application Deadline

Deadlines for submission of complete applications:

For thesis programs
January 15 for September admission
August 31 for January admission

For MGIS applicants
April 30

Files are reviewed on an ongoing basis. Applications are accepted until the deadline, but late applications may be considered if there is capacity in the program.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements

In addition to Faculties of Graduate Studies and Arts requirements, the Department requires the following:

Master of Geographic Information Systems

Thirty units (5.0 full-course equivalents) must be completed while in the program. At least 24 units (4.0 full-course equivalents) of these must be at the 600 level or higher; the remaining 6 units (1.0 full-course equivalent) may be at the 500 level. These include:

a) Three core courses in Geographic Information Sciences in the areas of Remote Sensing, Spatial Analysis and Geographic Information Systems:

Geography 633 Research and Applications in Remote Sensing

Geography 639 Advanced Spatial Analysis and Modelling

Geography 647 Advanced Research and Applications in Geographic Information Systems

Each course assumes that the student has two undergraduate courses in the areas of Remote Sensing, analytical methods in Geography (or inferential statistics) and Geographic Information Systems, respectively.

b) Two research-based courses related to the area of Geographic Information Science:

Geography 681 GIS Project: Theoretical Issues

Geography 683 GIS Project: Application

These courses will be on a topic mutually agreed upon between the student and the supervisor. The first course will be concerned with the presentation and literature on the research topic and will provide a critical assessment of this literature. This will be written up as a course paper that will equate to the literature review chapter of a traditional thesis. The second research course will be concerned with carrying out a program of analysis in the chosen research area using the Geographic Information Science tools discussed in the core courses. The final paper produced for this course will equate to the analysis and discussion chapters of a traditional thesis.

c) Fifteen units (2.5 full-course equivalents) of additional courses chosen by mutual agreement between the student and the supervisor. These courses will support the student's chosen research project and understanding of the Geographic Information Sciences.

The MGIS program may be completed on a full-time or a part-time basis.

Master of Arts, Master of Science

a) Twelve units (2.0 full-course equivalents) in a two-year period, including History and Philosophy of Physical or Human Geography, and at least one graduate-level methods course in Geography.

b) Four semesters of Geography 601 (Graduate Research Seminars). Students may be exempted from a portion of this requirement by the Graduate Program Director.

c) An approved thesis proposal completed within the first year of the program.

For detailed information on courses and program requirements please refer to: http://www.geog.ucalgary.ca/

Full-time status is expected. In some situations thesis programs may be completed on a part-time basis with approval from the Graduate Program Director.

6. Additional Requirements

For thesis programs: participation in the graduate research seminar series and the annual Department Conference.

For MGIS students: participation in the annual graduate student Department conference (oral presentation or development of an academic poster of their project work for presentation/display).

Departures from regular departmental program/course requirements may be recommended on an individual basis by the interim advisor or supervisor with approval from the Graduate Program Director.

7. Credit for Undergraduate Courses

No more than one half of a regular thesis graduate student's coursework can be at the undergraduate level. Programs requiring a larger ratio of undergraduate courses must receive approval of the Dean of Graduate Studies at the time of admission. MGIS students are allowed a maximum of 6 units (1.0 full-course equivalent) credit at the 500 level.

8. Time Limit

Expected completion time is two years in MA/MSc programs and four years in the PhD program. Maximum completion time is four years for MA/MSc programs and six years for the PhD program. For the MGIS Program, minimum completion time is one year and maximum completion time is six years.

9. Supervisory Assignments

Each graduate student has a supervisor appointed within the first term in program. For PhD students, a supervisory committee should be appointed within three months of the appointment of supervisor.

10. Required Examinations

The following program-specific requirements supplement the Faculty of Graduate Studies requirements:

Comprehensive Examination
MGIS oral comprehensive examinations will be based on project and course work. MGIS students will be examined on their comprehensive understanding of course material and their integrated professional knowledge/conception of geographic information science. The examination committee will consist of at least three examiners, including the graduate student advisor, but with no requirement for an external examiner.

Candidacy
PhD candidacy examinations have a written and an oral component. Questions on the research proposal will not be included in the oral candidacy examination.

Thesis Examination
Thesis examinations are open.

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student's research,
including a relevant written sample of the materials related to the thesis, before an examination can be scheduled. Normally, the review of the research by the Supervisory Committee will be by presentation and discussion of the student’s thesis research at a Supervisory Committee Meeting supported by a relevant written sample of the materials related to the thesis. For master’s students that do not have a Supervisory Committee, the Supervisor will review the research.

Composition of the Committee
The Internal Examiner must be external to the home program.

11. Research Proposal Requirements
See Program/Course Requirements.

12. Special Registration Information
None.

13. Financial Assistance
Department funding is available to highly ranked thesis students. Financial assistance may be available to qualified thesis students. For information on awards, see the Awards and Financial Assistance section of this Calendar or check the Graduate Awards Database: http://www.grad.ucalgary.ca/funding.

14. Other Information
None.

15. Faculty Members/Research Interests
Faculty members and their research interests can be found at http://geog.ucalgary.ca/contact-us#academics.

Geoscience GLGP

Contact Information
Location: Earth Sciences Building, Room 118
Program number: 403.220.3254
Fax: 403.284.0074
Email address: geosciencegrad@ucalgary.ca
Web page URL: http://geoscience.ucalgary.ca/

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based or course-based
The course-based Master of Science degree may be taken on a full-time or a part-time basis.
Specialization:
- Reservoir Characterization (Interdisciplinary)*

*See the Calendar section on Interdisciplinary Specializations for further information.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Science requirements, the Department requires:

Master of Science
a) Normally, a four-year Bachelor of Science degree or equivalent. An Honours degree in geology or geophysics, or a field related to geophysics, such as physics or mathematics, is preferred.

b) A concise statement outlining the applicant’s research interests and reasons for wishing to attend the University of Calgary.

c) For those students required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based), 92 (Internet-based test), a MELAB score of 82, an IELTS score of 7.5, or a PTE score of 64.

d) Two reference letters.

Doctor of Philosophy
a) Normally, a Master of Science degree or equivalent in geology or geophysics or a field related to geophysics, such as physics or mathematics.

b) A concise statement outlining the applicant’s research interests and reasons for wishing to attend the University of Calgary.

c) For those students required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based), 92 (Internet-based test), a MELAB score of 82, an IELTS score of 7.5, or a PTE score of 64.

d) Two reference letters.

3. Application Deadline
Complete applications are due by: January 15 for September admission
January admissions will not normally be considered.

4. Advanced Credit
Thesis-based programs: Application for credit should be made to the graduate program at the time of admission, so that the previous work can be taken into account when specifying a student’s program.

Course-based programs: The student must request advanced credit in writing at the time of application for admission.

Master’s programs: The total of advanced credit and transfer credit will generally not exceed either one-third of the program or 12 units (2.0 full-course equivalents), whichever is less.

Advanced credit is not guaranteed and will be determined by the Graduate Program Director or Department Head with consideration of the recommendation of the Interim Supervisor.

Courses for which advanced credit is being sought must be from a recognized institution and not have been used for any degree or diploma accreditation. They must be graded, graduate-level courses, and the graded level of performance must be equivalent to a “B” grade or higher standing at the University of Calgary. Advanced credit is not normally given for courses taken more than five years before admission to the current graduate degree program or for courses taken for the purposes of qualifying for admission.

5. Program/Course Requirements
In addition to the Faculties of Graduate Studies and Science requirements, the Department requires:

Master of Science (course-based)

a) Twenty-seven units (4.5 full-course equivalents), 15 (2.5 full-course equivalents) of which must be at the 600 level or higher (includes Geology 701 or Geophysics 701 research project).

b) Completion of a Research Project (Geology 701 or Geophysics 701). The student is required to present and defend the project in a one-hour defence once the written research report is in near-final form. The supervisor and two other members of the department assess the project. If an industrial partner is involved, the industrial research supervisor may also assess the project.

c) Completion of at least 18 units (3.0 full-course equivalents) in the first year of study by full-time students, and at least 3 units (0.5 full-course equivalent) in the first academic session by part-time students.

Following is a list of required courses for the two concentration areas that are offered.

Geology Course-based Concentration

a) Geology 707.

b) At least seven additional geology or geophysics courses at the 500 or 600 level. At a minimum, three must be at 600 level. Up to four appropriate courses from another department may be substituted for a 500-level geology or geophysics course subject to program approval. Course-based students may receive credit for both Geology 703 and 701. Courses are selected in consultation with the supervisor and with the approval of the Graduate Program Director.

c) Geology 701. This course constitutes the research component of the degree and cannot be submitted and defended until after all other courses are completed.

d) Students with deficiencies may be required to take more than 27 units (4.5 full-course equivalents) upon the advice of their supervisor.

Geophysics Course-based Concentration

a) Four of the following: Geology 707, Geophysics 547, 551, 557, 657, 659

b) At least four other Geophysics courses at the 500, 600 or 700 level. At least four of the eight required courses must be at the 600 or 700 level. One or two appropriate courses from another department may be substituted for a 500-level geology or geophysics course subject to program approval. Course-based students may receive credit for both Geophysics 703 and 701. Courses are selected in consultation with the supervisor and with the approval of the Graduate Program Director.

c) Geophysics 701. This course constitutes the research component of the degree and cannot be submitted and defended until after all other courses are completed.
d) Students with deficiencies may be required to take more than 27 units (4.5 full-course equivalents) upon advice of their supervisor.

Master of Science (thesis-based)
a) Completion of a minimum of 12 units (2.0 full-course equivalents) in the first year of program.
b) Students with deficiencies may be required to take more than 12 units (2.0 full-course equivalents) upon advice of their supervisor.
c) An oral public presentation of thesis results.

Doctor of Philosophy
a) Completion of 12 units (2.0 full-course equivalents) in the first year of program.
b) Subject to supervisor and Graduate Program Director approval, some credit may be granted for courses taken during a master's program, to reduce the course requirement. Course requirements may be waived for a maximum of 9 units (1.5 full-course equivalents) for students with Master of Science degree from the Department of Geoscience at the University of Calgary, and 6 units (1.0 full-course equivalent) for students with Master of Science degrees from other programs or institutions.
c) Students with deficiencies may be required to take more than 12 units (2.0 full-course equivalents) upon advice of their supervisor.
d) Students with a Bachelor of Science degree, but no master's degree, to complete a minimum of 15 units (2.5 full-course equivalents), with four in the first year of program.
e) Students in Geology to take Geology 707 during the first academic year in program.
f) That all students take either Geology or Geophysics 701 or 703.
g) An oral public presentation of thesis results.

6. Additional Requirements
Master of Science (course-based)
Full-time students are normally expected to provide their own financial support and pay tuition and fees as outlined in the graduate student calendar since the department does not normally offer financial support to course-based Master of Science students. Normally, part-time students will be working in the field of Geology and/or Geophysics, and the industrial supervisor can agree to work with the supervisor in the Department to supervise the student’s research project, and to evaluate the research project.

7. Credit for Undergraduate Courses
The Department does not give graduate credit for courses taken below the 500-level.

8. Time Limit
Expected completion time is two years for students in thesis-based master's degree programs, two years for full-time students in a course-based master's program, and three or four years for doctoral students. Maximum completion time is four years for students in a thesis-based master's program, and six years for students in a course-based master's program and doctoral students.

9. Supervisory Assignments
Upon admission, a student is assigned an interim supervisor by the Graduate Program Director, either based on prior communication between the student and a prospective supervisor, or chosen from the research field the student has specified. Usually the interim supervisor becomes the permanent supervisor, but the Graduate Program Director must approve the final selection before the thesis proposal is submitted. Supervisory committees for doctoral students are selected by consultation between the permanent supervisor and the student.

10. Required Examinations
Candidacy
Doctoral students have a two hour oral candidacy examination that must be completed by the twenty-eighth month of program.

Questions on the research proposal may be included in the oral candidacy examination. Students should contact their department for further details.

Thesis Examination
Master of Science thesis-based and doctoral students have final thesis oral examinations that are open to the public, with a public presentation on the same day.

In addition to the Faculty of Graduate Studies requirements for thesis and thesis examinations, the Department requires:
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.
Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
Master of Science thesis-based students must file a thesis proposal by March 1 of the second session of study for September registrants and July 1 for January registrants. The thesis proposal must not be more than five pages of text long and include an abstract and a list of references cited in the text. The supervisor will assess the proposal in detail.

PhD thesis students will submit a more substantial thesis proposal within 18 months of registration.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this calendar.

Students applying for scholarships must have complete applications submitted to the Department by January 15.

No financial support will be given to students enrolled in the course-based master's program.

14. Other Information
The department requires all graduate students to file a comprehensive Annual Report. The report is due by December 15 and covers activities for the current calendar year. Recent September registrants are required to report activities for their first term of study only.

No office space will be provided to students enrolled in the course-based master's program.

Detailed information about the graduate program can be found at departmental website.

15. Faculty Members/Research Interests
The current faculty research interests can be found at http://www.geoscience.ucalgary.ca/faculty_directory2.

German GSEA
The German Graduate Program is offered through the Department of Linguistics, Languages and Cultures.

Contact Information
Location: Craig Hall, C Block, Room 205
Program number: 403.220.5293
Fax: 403.284.3810
Email address: llc@ucalgary.ca
Web page URL: http://llc.ucalgary.ca/

1. Degrees and Specializations Offered
Master of Arts degree (thesis-based)
The Department particularly solicits applications from students interested in pursuing a cross-disciplinary degree involving another department at the University of Calgary (e.g., English; History; Philosophy; French, Italian and Spanish).

Applicants interested in a doctoral degree in German Studies on a special case basis should review the program’s website to determine any additional requirements or restrictions, and then, if appropriate, contact the graduate program representative. Information on the Faculty of Graduate Studies Special Case Policy can be found at http://grad.ucalgary.ca/prospective/admissions/special-case.

The Department does not formally offer a part-time option – all students will be considered full-time.

2. Admission Requirements
In addition to the requirements of the Faculties of Graduate Studies and Arts, the Department of Germanic, Slavic and East Asian Studies requires:
a) A letter of intent outlining background, research interests, and goals for the program.
b) An academic writing sample (of approximately 8-15 pages) in English or German.
c) Two reference letters.
3. Application Deadline
Deadlines for the submission of complete applications:
- February 1 for September admission
- September 1 for January admission (discuss January admission with Department)
Late applications may be accepted but reduce the applicant’s chances of receiving funding.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
In addition to the Faculty requirements, the Department requires:
- Normally, 18 units (3.0 full-course equivalents) for students who hold a bachelor's degree.
- For some students, depending upon background preparation, a course in bibliography and methodology.
- Sufficient German language skills for the proposed program.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
No more than one-half of a regular graduate student’s required program of course work can be at the undergraduate level. Undergraduate courses may be taken for credit only with departmental approval. Programs requiring a larger ratio of undergraduate courses must receive the approval of the Dean of Graduate Studies at the time of admission.

8. Time Limit
Expected completion time is two years for the Master of Arts and four years for the Doctor of Philosophy. Maximum completion time is four years for the Master of Arts and six years for the Doctor of Philosophy.

9. Supervisory Assignments
The Graduate Program Director is normally the interim supervisor for students entering the program, and will assist them in finding a supervisor within the first year. In the case of cross-disciplinary degrees, the choice of supervisor must be established upon application to the program.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:
- Candidacy
- Questions on the research proposal will not be included in the oral candidacy examination of special case doctoral degree students.

Greek and Roman Studies GRST

Contact Information
Location: Social Sciences Building, Room 558
Program number: 403.220.4831
Fax: 403.210.9191
Email address: grstgrad@ucalgary.ca
Web page URL: http://clare.ucalgary.ca/GRST

1. Degrees and Specializations Offered
- Doctor of Philosophy (PhD)
- Master of Arts (MA) degree, thesis or course-based

The MA degree may be completed on a full-time or a part-time basis.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:
- Normally at least 66 units (11 full-course equivalents) of relevant undergraduate course work are expected for admission to the MA program, with some concentration in the proposed research area.
- All research areas require proficiency in reading Latin and/or Greek.
- Competence in reading French, German or Italian must be acquired either before or during the program.
- For the PhD, an MA is required.
- Two letters of reference.

3. Application Deadline
Deadline for submission of complete application is January 7 for September admission.

4. Advanced Credit
Contact department for information.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:
- Master of Arts (thesis-based)
- Twelve units (2.0 full-course equivalents) of other seminar courses, normally taken in the first year of the program; these may include up to 6 units (1.0 full-course equivalent) outside the department if appropriate to the area of specialization.
- Four directed studies in Greek and Latin texts (Greek or Latin 607), normally taken in Fall and Winter Terms of the first and second year (worth 1.5 units or 0.25 full-course equivalent each). Greek or Latin 607 may be replaced with Greek or Latin 602 and/or 604.
- Reading knowledge of French or German or Italian into English.
- A thesis of approximately 20,000 words, with oral examination.

- Master of Arts (course-based)
- Greek and Roman Studies 603, first-year course on research and professional training.
- Twenty-four units (4.0 full-course equivalents) of other seminar courses; these may include up to 6 units (1.0 full-course equivalent) outside the department if relevant to the student’s particular interests in the field.
- Four courses of directed studies in Greek and Latin (Greek or Latin 607), normally taken in Fall and Winter Terms of the first and second year (worth 1.5 units or 0.25 full-course equivalent each). Greek or Latin 607 may be replaced with Greek or Latin 602 and/or 604.
- Reading knowledge of French or German or Italian.
Doctor of Philosophy
a) Greek and Roman Studies 603, first-year course on research and professional training unless already taken at the Master’s level.

b) A minimum of 12 units (2.0 full-course equivalents) of other graduate seminar courses; these may include up to 6 units (1.0 full-course equivalent) outside the department if appropriate to the area of specialization.

c) Four courses of directed studies in Greek and Latin texts (Greek or Latin 607, worth 1.5 units or 0.25 full-course equivalent each); Greek or Latin 607 may be replaced with Greek or Latin 602 and/or 604.

d) Reading knowledge of two of the three following modern languages into English, French, German or Italian.

e) Examination of the Core Reading and Dissertation Reading List (contact the department for further information).

f) A twenty-page dissertation proposal.

g) A Candidacy Exam, which must be passed before 28 months of tenure.

h) A thesis of about 75,000 words, followed by an oral examination.

6. Additional Requirements
The department may require up to two additional courses (6 units or 1.0 full-course equivalent) in order to ensure sufficient preparation in relevant areas for the MA, or four additional courses (12 units or 2.0 full-course equivalents) in order to ensure sufficient preparation in relevant areas for the PhD. Students are advised of any such requirements upon entry into the program.

7. Credit for Undergraduate Courses
Not more than two of the courses (6 units or 1.0 full-course equivalent) required in the thesis-based MA program, and not more than four courses (12 units or 2.0 full-course equivalents) in the course-based program, may be taken at the 500 level.

8. Time Limit
Students studying on a full-time basis are expected to complete the Master’s program in two years. Students in thesis-based master’s programs must complete their degrees within four years. Students in course-based master’s programs must complete their degrees within six years. For the PhD program, students are expected to complete their degrees within six years.

9. Supervisory Assignments
The Graduate Program Director is normally the interim supervisor for a master’s student entering the program, and will assist the student to find a supervisor within eight months of entering the program. Doctoral students are expected to have a supervisor upon entry. The appointment of a supervisor is subject to approval by the Department Head.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the Department requires:

   a) A thesis of 75,000 words, followed by an oral examination.

   b) A Candidacy Exam, which must be passed before 28 months of tenure.

   c) A twenty-page dissertation proposal.

   d) A dissertation topic that will be submitted in accordance with the Faculty of Graduate Studies requirements.

   e) Examination of the Core Reading and Dissertation Reading List (contact the department for further information).

11. Research Proposal Requirements
A formal proposal is not required for the MA thesis. The student’s thesis topic is defined in consultation with the supervisor, normally within 12 months of entry into the program. It should be referred to the Graduate Program Director for approval. The PhD proposal is to be submitted in accordance with the Faculty of Graduate Studies requirements.

12. Special Registration Information
None.

13. Financial Assistance
The department offers full or partial support through teaching assistantships and Faculty of Graduate Studies Support to selected applicants. The Faculty of Graduate Studies offers numerous awards listed in the Graduate Calendar (e.g. Open Scholarships) in a university-wide competition. Various awards are available from other agencies (federal and provincial governments, private foundations, etc.).

Applicants are encouraged to seek funding vigorously. The department can offer advice on identifying sources.

Note: Faculty of Graduate Studies Support and university scholarships are normally awarded only to students in the thesis-based program.

14. Other Information
Enquiries should be addressed to: grad@ucalgary.ca.

15. Faculty Members/Research Interests
Details concerning the research areas of individual professors may be obtained from the department website at www.clare.ucalgary.ca.

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Business Administration (MBA), course-based and thesis-based
Specializations:
- Entrepreneurship and Innovation
- Finance
- Marketing
- Project Management
- Global Energy Management and Sustainable Development
- Global Energy (Executive MBA only)
- Energy and Environmental Systems (Interdisciplinary, thesis-based only)*

*See the Calendar section on Interdisciplinary Specializations for further information.

Joint programs, offered with other Faculties:
- Juris Doctor/Master of Business Administration (JD/MBA)
- Master of Public Policy/Master of Business Administration (MPP/MBA)
- Master of Social Work/Master of Business Administration (MSW/MBA)
- Master of Biomedical Technology/Master of Business Administration (MBT/MBA)
- Doctor of Medicine/Master of Business Administration (MD/MBA) (“Leaders in Medicine” Program)

Master of Business Administration (course-based)
The course-based MBA program is designed for students who wish to pursue a career in management and is offered to students who possess a four-year degree or equivalent in any discipline. The program consists of required courses designed to create integrative business skills and elective courses where students have the opportunity to pursue areas of specialization. Students can complete the Haskayne MBA through full-time study that normally requires 16 to 20 months, or through evening study with completion in two to six years. Normally, combined programs (JD/MBA, MPP/MBA, MSW/MBA, MBT/MBA, MD/MBA) must be completed on a full-time basis. Students in the Haskayne MBA program may choose a specialization in Finance, Entrepreneurship and Innovation, Marketing, Global Energy Management and Sustainable Development or Project Management. They may also elect not to have an area of specialization.

Executive MBA
The Executive MBA is offered jointly by the University of Calgary and the University of Alberta on alternate weekends and periodic
Program Descriptions

Executive MBA – Specializing in Global Energy

The Global Energy focused delivery of the Executive MBA maintains the core content of the MBA program and the alternative scheduling of the EMBA that is more conducive to executives who remain active in their career. The MBA curriculum is enhanced by collaboration with IHS Cambridge Energy Research Associates (IHS CERA) allowing greater emphasis on energy-focused business from a global perspective. The material is delivered through five distinct learning modules, each conducted over a period of three to five months. These modules feature intensive two- to three-week residencies providing real-world experiences in international energy centres. All graduates of the Global Energy Executive MBA receive a specialization in Global Energy.

Master of Business Administration (thesis-based)

This program of studies is designed for students wishing to pursue a special research interest in the Haskayne School of Business. It is normally offered to students who possess a Bachelor of Commerce degree or its equivalent. The thesis program will admit only those students who can demonstrate a serious commitment to research, the ability to work independently in the production of a thesis, and a qualified supervisor who is interested in overseeing their research program.

Doctor of Philosophy

The Doctor of Philosophy program offers talented research-oriented students the opportunity to pursue an academic career in business-related subjects.

2. Admission Requirements

Master of Business Administration

In addition to the Faculty of Graduate Studies requirements, the MBA program requires:

a) A current résumé.
b) A 250-word response to each of “How, considering your career progress to date, does an MBA fit in with your future career goals?” and “When thinking of your own personal successes, were they a result of your own personal skills or your ability to work with others? Please describe”.
c) For students required to prove proficiency in English, a minimum TOEFL score of 600 (paper-based), or 100 (Internet-based test), or an IELTS score of 7.0, or a MELAB test score of 84, or a PTE score of 70.
d) Completion of the Graduate Management Admission Test (GMAT*) with a recommended minimum score of 550 or an equivalent Graduate Record Examination (GRE) for the Haskayne MBA with high scores on both verbal and quantitative subcomponents. It is recommended that students should place above the 70th percentile on overall test scores. A minimum GMAT score of 600 or an equivalent GRE is required for the thesis program.
e) Two reference letters.
f) For the course-based MBA program only, the equivalent of at least 2 years of appropriate work experience.
g) For applicants to the thesis-based program, normally a Bachelor of Commerce with a minimum grade point average of 3.30 on a four-point scale.
h) For applicants to the Executive MBA (EMBA) delivery formats, the equivalent of at least seven years of work experience, a number of years of which must have carried management or professional responsibility.
i) Applicants to the EMBA specializing in Global Energy must be eligible to travel internationally.
j) Applicants may be interviewed by a member of the Admissions Committee as part of the application screening process.

Please note that receiving admission to both individual programs does not guarantee admission to the combined program.

Note: An applicant who has completed a bachelor’s degree with an admission grade point average (GPA) from 2.50 to 2.99 may be admitted to an MBA course-based program as a regular student on the basis of the following equivalent achievement score: \[ \frac{(GPA \times 200) + GMAT}{1150} \]

Doctor of Philosophy

In addition to the Faculty of Graduate Studies requirements, the Haskayne School of Business requires:

a) Normally, an MBA degree or equivalent from a recognized institution with a recommended minimum admission grade point average of 3.50 on a four-point scale. Students with an undergraduate or master’s degree in an area other than business may be required to complete a qualifying period to gain a general business background before beginning the normal doctoral course requirements.

It is possible to enter the PhD program without an MBA or other master’s degree. Consult the Director of the PhD Program for further information.

b) Completion of the Graduate Management Admission Test (GMAT*) with a recommended minimum score of 650, with high scores on both verbal and quantitative subcomponents. (Many successful applicants have earned scores of 700 and above). As an alternative to a GMAT score, results on the Graduate Record Exam (GRE) will be considered. Overall GRE test score in the 85th percentile is the recommended minimum.

c) For those students required to prove proficiency in English, a minimum TOEFL score of 600 (paper-based), or 100 (Internet-based test), or an IELTS score of 7.0, or a MELAB score of 84, or a PTE score of 70.
d) Current CV.
e) Two reference letters.
f) A personal statement outlining objectives, intent and commitment to a research program.
g) Availability of a research-active supervisor and resources for the area in which the student wishes to study.

Work experience in business or public organizations will be considered.

See the PhD program website http://haskayne.ucalgary.ca/programs/phd/admissions for more information. Approved changes to the program standards and requirements will be posted on the website. Consult the Haskayne School of Business about the Graduate Management Admission Test.

3. Application Deadline

March 1 for international applicants (September admission)

Refer to website for other deadlines.

PhD and MBA (thesis-based) programs

January 15 for September admission - year-round admission assessment and decision possible for exceptional students with complete applications.

Combined programs

As separate application to applicable program is required, please see relevant program for deadlines.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process to the MBA program. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

Course requirements for doctoral students will be based on the student’s background and program needs. Credit for previous courses will be provided as appropriate.

5. Program/Course Requirements

In addition to the requirements of the Faculty of Graduate Studies, the Haskayne School of Business requires:

MBA (course-based)

The MBA degree normally consists of 60 units (10 full-course equivalents); 19 3-unit (half) courses and two 1.5-unit (quarter) courses. Students may be granted exemption from foundation courses based upon prior academic preparation and with the approval of the Associate Dean (MBA Program). Students must complete a minimum of 45 units (7.5 full-course equivalents), of which a maximum of 15 units (2.5 full-course equivalents) may be transfer credit from another recognized graduate program, for the MBA degree.

Foundation Courses

Accounting 601 Financial Accounting

Accounting 603 Management Accounting

Finance 601 Managerial Finance
Program Descriptions

Human Resources and Organizational Dynamics 601 Managing Human Resources Management Information Systems 601 Management Information Systems Management Studies 611 Managerial Economics Management Studies 613 Managerial Decision Modelling Marketing 601 Marketing Management Operations Management 601 Operations Management Strategy and Global Management 601 Strategic Management Management Studies 601 Skills Development Integrative Courses Management Studies 715 Strategic Business Analysis Business and Environment 777 Global Environment of Business Management Studies 770 Topics in Leadership Specializations Students must complete 21 units (3.5 full-course equivalents) elective courses beyond the foundation and integrative courses. Students may select an area of specialization normally consisting of 12 units (2.0 full-course equivalents). Students wishing to specialize may choose from the following areas:
- Finance
- Entrepreneurship and Innovation
- Marketing
- Global Energy Management and Sustainable Development
- Project Management

Students who elect not to choose an area of specialization may choose instead from various graduate courses offered by the Haskayne School of Business. Subject to the approval of the Associate Dean (MBA Program) and the Faculty of Graduate Studies, graduate courses offered at the University of Calgary outside the Haskayne School of Business may also be taken.

Combined JD/MBA
A student admitted to the combined JD/MBA program spends the first year doing core studies in one program and the second year doing core studies in the other program. The remaining years in the program combine Law and Business courses in a way that will allow the achievement of both degrees in four rather than five years (please consult the MBA office).

Combined MSW/MBA
A student admitted to the combined MSW/MBA program will require an undergraduate degree in Social Work (BSW) or equivalent. The MSW/MBA degree can be completed in two years of study (24 months) including Fall/Winter and Summer (including Spring Intersession) Terms (please consult the MBA office).

Combined MBT/MBA
A student admitted to the combined MBT/MBA program will require an undergraduate degree in Biological Sciences or equivalent (please consult the MBA office).

Combined MD/MBA
A student admitted to the MD/MBA program spends the first year in the MBA program, completing a minimum of 36 units (6.0 full-course equivalents). The student will be required to hold an undergraduate degree and be admitted to both the MD and MBA programs. A program will be developed for each student under the guidelines of the Leaders in Medicine program (please consult the MBA office).

Combined MPP/MBA
Students must meet the admission requirements for the Faculty of Graduate Studies and those for the MBA and MPP programs. Please consult the MBA Admissions Officer or the MPP Program Manager for more information.

Executive MBA
The delivery format of the program is different from the Haskayne MBA program and requires more integrative types of sessions and activities. However, the program requires many of the same courses as are required in the Haskayne MBA program. In general, students in this program are expected to follow a general curriculum rather than electing an area-specific specialization other than the specialization in Global Energy Management. Only in rare cases will it be possible for students to do the latter. The Executive MBA has the same 13 core course credits with 7 additional courses for a total of 20 as the other MBA programs. A complete course overview can be found on the Haskayne website. It is expected that all participants entering the program in a given year will complete the program requirements at the same pace, completing all of them over the same 20-month time frame.

Executive MBA – Specializing in Global Energy
The delivery format of the program is different from the Haskayne MBA and Calgary-based Executive MBA programs. Course delivery will include more integrative types of sessions and activities, offered in modules in a variety of locations. The course content of the MBA required courses above, will be completed through the alternative delivery format with the added benefits of the networking and alternative scheduling for business career professionals and a real-world global experience with international travel. It is expected that all participants entering the program in a given year will complete the program requirements at the same pace, completing all of them over the same 19-month time frame. The Executive MBA Specializing in Global Energy has the same 13 core course credits with 7 additional courses for a total of 20 as the other MBA programs. A complete course overview can be found on the Haskayne website.

MBA (thesis-based)

a) A minimum of 24 units (4.0 full-course equivalents) selected by the student in consultation with his or her supervisor. Among these 24 units (4.0 full-course equivalents), a course in research methods (Management Studies 773, Multivariate Analysis in Management), Business and Environment 777 and Strategy and Global Management 601, or 795 are required. MBA Thesis students are also invited and encouraged to take one or more doctoral-level courses as part of their programs.

b) Approval of each individual’s program by the Director, MBA (thesis-based) Program.

Students who lack courses in one or more of the functional disciplines in management (i.e., accounting, finance, human resources and organizational dynamics, management information systems, operations management, marketing) may be required to take courses in those areas in partial fulfillment of their program either as part of, or in addition to, the normal 24 units (4.0 full-course equivalents) requirement.

Doctor of Philosophy
The program consists of a minimum of 36 units (6.0 full-course equivalents). Two of these are core courses required of all students. In addition, students choose at least five courses in their chosen area(s) of study and five research methods courses.

a) Two core courses – Management Studies (MGST) 794 Theory Development and Management Studies 792 Research Development. Students should take Management Studies 792 during the Spring/Summer Sessions between their first and second years.

b) Courses in the area(s) of study: Students will take a minimum of 15 units (2.5 full-course equivalents) in their area(s) of study. Students can choose a major area and a minor area. The major area must be chosen from those offered within the Haskayne School of Business:
- Accounting
- Entrepreneurship
- Environmental Management/Sustainable Development
- Finance
- Human Resources and Organizational Dynamics
- Management Information Systems
- Marketing
- Operations Management
- Risk Management and Insurance
- Strategy and Global Management

Students will be required to take a minimum of 9 units (1.5 full-course equivalents) from the major area.

c) Minor Area – The minor area of study must complement the major area. It may be chosen from those areas offered within the Haskayne School of Business or from those offered from other faculties. Students will be required to take a minimum of 3 units (0.5 full-course equivalent) in their minor area.
Program Descriptions

83

d) Research Methods and Statistics: Students are required to choose either Stream A or Stream B and to take at least two courses in their selected Stream from the following lists.

Stream A: Economics 615/495—Econometrics I; Economics 715/497—Econometrics II; Operations Management 799.03 Operational Research Issues

Stream B: Management Studies 773—Multivariate Analysis, Management Studies; 783—Advanced Research Methodology and Methods; Strategy and Global Management 796—Qualitative Research in Strategy and Organizations

Nine units (1.5 full-course equivalents) additional courses in research methods and statistics (a total of fifteen units) are required, offered within the Haskayne School of Business or by other faculties.

The typical student will take 36 units (6.0 full-course equivalents) over the first 20 months of the program. The number of courses may vary according to the student's particular program and background. Students work closely with their research-active supervisors who help guide them to the appropriate courses within and outside the School. There is also a requirement to complete courses/workshops at the Teaching and Learning Centre to develop necessary teaching skills.

6. Additional Requirements

Attendance at an orientation session is mandatory for all incoming students in all MBA program options and for all incoming doctoral students. Regular attendance at seminars offered by the PhD program, their disciplinary Areas, and the School is required of all doctoral students.

7. Credit for Undergraduate Courses

Credit for undergraduate courses taken prior to admission may be granted based on the approval of the Associate Dean (MBA Program).

8. Time Limit

Thesis-based Master: five years
Course-based Master: six years
Doctor of Philosophy: six years
MSW/ MBA: seven years

Note: It is expected that all participants entering the Executive MBA delivery format of the MBA program in a given year will complete the program requirements at the same pace, completing all of them over the same 20-month time frame.

9. Supervisory Assignments

Doctoral and MBA (thesis-based) students are required to have secured a permanent supervisor within the first twelve months of their program. For doctoral students, a supervisory committee reflective of the student's research interests is required within three months after the permanent supervisor has been approved.

10. Required Examinations

Candidacy

Doctoral students are required to complete written candidacy examinations developed by the supervisory committee within twenty-eight months of commencing the program. These often combine take-home examinations and an oral examination completed within a period of one month. Questions on the research proposal may be included in the candidacy exam. The written candidacy examination format may differ depending on the major area and the supervisory committee. Students are advised to consult with their supervisors at least six months in advance of the candidacy examination dates.

Thesis Examination

MBA thesis and doctoral students will complete an oral thesis examination at the end of their programs. The student presentation portion of the thesis examination is public.

In addition to Faculty of Graduate Studies regulations for thesis examination, the program requires:

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student's research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements

Students whose research involves human subjects must receive approval from the Haskayne School of Business and from the University of Calgary Conjoint Faculties Research Ethics Board before beginning data collection. Doctoral students are required to have an acceptable research proposal before commencing their dissertation research. MBA (Thesis) students must secure approval from the supervisor before beginning thesis research.

12. Special Registration Information

None.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, please see the Awards and Financial Assistance section of this Calendar.

MBA Thesis and doctoral students applying for scholarships must submit their applications to the Program Director by January 15. The Haskayne School of Business provides assistance for doctoral students in the form of Graduate Assistantships, Faculty of Graduate Studies Scholarships, the Robert Wilson Scholarship, and the Marion Janet and Ian Stormont Forbes Graduate Scholarship. Students should also enquire about scholarships available from the Faculty of Graduate Studies. All admitted full-time MBA students will be automatically considered for Business scholarships.

14. Other Information

Successful applicants will be required to confirm their acceptance of an offer of admission into the MBA program with an online non-refundable $500 deposit to the Haskayne School of Business. The $500 will be credited toward fees upon registration.

15. Faculty Members/Research Interests

The active research interests of the faculty can be found at http://www.haskayne.ucalgary.ca/faculty/dir/faculty/

History HIST

Contact Information

Location: Social Sciences Building, Room 656
Program number: 403.220.3839
Fax: 403.289.8566

Web page URL: http://hist.ucalgary.ca

1. Degrees and Specializations Offered

Doctor of Philosophy (PhD)
Master of Arts (MA), course-based and thesis-based

Specializations:

• History and Philosophy of Science (MA, thesis-based only)*

*This specialization is offered in cooperation with the Departments of Philosophy.

Candidates should apply to the program of their choice, indicating the area of research (see section 5 below).

2. Admission Requirements

In addition to the requirements of the Faculties of Graduate Studies and Arts, the Department requires:

Master of Arts

a) Normally, a four-year undergraduate program with honours or a major in history. Usually this entails at least 42 units (7.0 seven full-course equivalents) of History courses. Credit may be given for up to 6 units (1.0 full-course equivalent) in other disciplines, if appropriate for the proposed area of study.

b) A minimum admission grade point average of 3.40 on a four-point scale over the final 60 units (10 full-course equivalents) of the undergraduate degree.

c) A copy of a historical research paper, preferably graded, normally at the senior undergraduate level.

d) A 250-word (minimum) statement of research interest including research topics in the major field and the reasons for pursuing a postgraduate degree in history.

e) Two reference letters.

Doctor of Philosophy

a) Normally, a completed four-year undergraduate program with honours or a major in history and a completed master's degree
Program Descriptions

or the equivalent in history or in a related discipline.

b) A grade point average of 3.70 on a four-point scale in history at the graduate level.
c) A detailed statement of research interests, career goals, and ideas for the thesis topic.
d) A sample of written work, normally a master’s thesis chapter or a major research paper completed at the master’s level.
e) Two reference letters.

3. Application Deadline

Deadlines for the submission of complete applications:

January 15 for September admission and funding
April 15 for September admission only

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements

In addition to the Faculties of Graduate Studies and Arts requirements, the Department requires:

Master of Arts (thesis-based)

a) A minimum of one year of full-time study at the University of Calgary.
b) Eighteen units (3.0 full-course equivalents) (including History 690) in two semesters of course work. Master’s students will complete their coursework through regularly offered History seminars.

Areas of faculty research interests include: Canada, Europe, Latin America, United States, Britain, China, Atlantic History, History of Science, Intellectual History, Military-Diplomatic History, Political History, Popular Culture, Religious History, History of Gender and Sexuality, Social History, and Western Canada/Borderlands/Frontier.

In cooperation with the Department of Philosophy, the History Department offers a Master of Arts degree in the History and Philosophy of Science. Students who choose this specialization are required to take courses in the relevant departments. Candidates enrolled in the Department of History are expected to work with more than one instructor in History.

Students must take one seminar course (3 units or 0.5 full-course equivalent) in a field unrelated to the student’s research interests. In instances where there are no seminars being offered in the student’s research field, students may, with permission of the chair of graduate studies, take one 500-level undergraduate seminar but on the understanding that extra course work will be required.

c) A thesis of 80 to 150 pages, including notes, charts, tables and appendices, but excluding bibliography. Students begin thesis preparation as they undertake their course work and may fulfill the requirements for their Master of Arts degree in twelve months.
d) A demonstration of reading knowledge of a second language related to the major field of study prior to the oral thesis defence.

Master of Arts (course-based)

There is no full-time requirement for this program.

a) A minimum of 36 units (6.0 full-course equivalents); 12 units (2.0 full-course equivalents) may be senior undergraduate courses at the 500 level (but on the understanding that extra course work will be required), 12 units (2.0 full-course equivalents) must be graduate seminars and at least 12 units (2.0 full-course equivalents) are to be graduate seminars in a secondary field.
b) Completion of History 690 in the first year and History 651 and 653 in the final year of program.
c) A 50–60 page research paper prepared in the final year and defended in an oral examination.
d) A demonstration of reading knowledge of a second language related to the major field of study before the oral examination.
e) Completion of at least 3 units (0.5 full-course equivalent) per semester.

Doctor of Philosophy

a) A minimum of two years of full-time study at the University of Calgary.
b) Eighteen units (3.0 full-course equivalents) at the graduate level, including courses in the primary, secondary and cognate areas. Doctoral students are required to complete 15 units (2.5 full-course equivalents) in History coursework at the graduate level, of which at least 6 units (1.0 full-course equivalent) must be completed in the primary area and 3 units (0.5 full-course equivalent) in the secondary area. Doctoral students must also complete 3 units (0.5 full-course equivalent) outside of History in a cognate area. The areas will be defined in detail by the supervisor and the student in consultation with the Supervisory Committee and must be approved by the Department Graduate Studies Committee. During the candidacy examination, the student will demonstrate a comprehensive understanding of the primary and secondary areas as well as his or her particular field of research. The secondary area will be selected from an area of history outside of the primary area. The cognate course will consist of a non-history discipline or thematic history subject. The length of the reading list will be 100-150 titles for the primary area (with the understanding that three articles or stand alone chapters in essay anthologies is the equivalent of one book), and 50-75 titles for the secondary area. The availability of secondary areas and cognate/thematic courses will depend on faculty members’ expertise. Each of a student’s areas must be taught by a different faculty member or as defined by the committee.

Primary Areas: Canada; History of Science; Latin America; Medieval and Early Modern Europe; Military/Diplomatic; Modern Europe and Britain; United States; World.

Secondary Areas (to be chosen from outside of Primary Area): Canada; History of Science; Latin America; Medieval and Early Modern Europe; Military/Diplomatic; Modern Europe and Britain; United States; World.

Cognate Course: Students will complete 3 units (0.5 full-course equivalent) of graduate-level coursework in an area outside of History. A student’s cognate course will be determined in consultation with the supervisor.
c) A thesis normally of 400 pages, including notes, charts and tables, but excluding bibliography and appendices.
d) A demonstration of reading knowledge of a second language relevant to the student’s research prior to the candidacy examination.
e) Written and oral candidacy examinations in primary and secondary areas. The Supervisory Committee consists of the primary and secondary area supervisors with the third member being a faculty member whose area of expertise is in the field of study for the student. The History Department urges candidates to take candidacy examinations within 16 months of first registration. Examinations must be completed within 20 months of first registration.

The doctoral program consists of two terms of coursework relevant to the primary and secondary areas, and cognate course. The third and fourth terms, students read for the candidacy examinations. Four to five terms of thesis preparation will normally follow. Students who have not taken History 690 or its equivalent will be required to take it as part of their program in the first year and in addition to the requirements above.

Copyediting

The graduate program in the Department of History does not permit the use of third-party editors in the preparation of papers and theses.

6. Additional Requirements

None.

7. Credit for Undergraduate Courses

Students enrolled in the part-time course-based Master of Arts program may take two of the required 36 units (6.0 full-course equivalents) at the 500 level.

Students enrolled in the Master of Arts thesis program may apply for no more than one 500-level course for graduate credit, subject to the approval of the Department. Graduate students taking a 500-level course for graduate credit will be required to complete additional assignments.

8. Time Limit

Expected completion time is 12 to 20 months for the Master of Arts thesis program, and four years for the doctoral program. Maximum completion time is four years for the Master of Arts thesis program and six years for the course-based Master of Arts and doctoral programs.

9. Supervisory Assignments

Upon acceptance into the program, students are assigned an interim supervisor.
Each student should select a permanent supervisor, subject to the consent of the faculty member within three months of entering the program. Admission to the master's and doctoral programs is dependent upon the agreement of a faculty member to supervise in an interim capacity. The supervisor establishes a doctoral supervisory committee in consultation with the student. The Supervisory Committee consists of the primary and secondary area supervisors with the third member being a faculty member whose area of expertise is in the field of study for the student. The supervisory committee must be selected within three months of the supervisor's appointment (no later than March of the first year of a program).

10. Required Examinations

In addition to the Faculty of Graduate Studies requirements, the Department requires:

Candidacy

Doctoral candidacy examinations have a written and an oral component and are taken upon completion of all course and language requirements. Students will write exams for their primary and secondary areas. There will be a closed-book exam in each field. A primary area closed book format will require that the student write a three-hour exam on campus with no sources, answering two questions from a range of questions provided by the primary area supervisor. Secondary area closed book format will require that the student write a two-hour exam on campus with no sources, answering two questions from a range of questions provided by the secondary area supervisor. Area supervisors will decide whether to emphasize historiography or teaching in setting exam questions. The supervisory committee, in consultation with the student, sets the subjects. A level of general knowledge consistent with teaching an introductory survey course is expected for each area. The oral candidacy examination is taken no later than twenty calendar days after the last written examination. The department strongly recommends that students take their candidacy examinations within 16 months of their first date of registration. Examinations must be taken within 20 months of first registration.

Thesis Examinations

Final thesis oral examinations are open.

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student's research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements

Each doctoral student is required to submit a Dissertation Proposal to their graduate supervisory committee no more than four weeks after the oral examinations. The proposal will be approximately 2500 words in length, with three pages for the bibliography listing the most relevant primary and secondary works for the thesis. Within two weeks of receiving the dissertation proposal, the supervisory committee will have a meeting of up to one hour with the student to discuss it. The date for the proposal meeting will be set prior to the filing of the Notice of Candidacy. All of the members of the supervisory committee will sign off on the student's research proposal following the meeting, should they consider the proposal satisfactory. To be considered as making satisfactory progress in the PhD program, students must have their supervisory committee sign off on their dissertation proposal. Elements of a successful proposal include the problem or question that the research seeks to answer; the historiographic significance of that problem; a hypothesis as to how the problem might be addressed; a method for exploring that hypothesis; and an inventory of the most relevant evidence for the method.

12. Special Registration Information

Students should plan their courses in consultation with their supervisors, complete the Course Registration Form supplied by the department, obtain the supervisor's signature, and bring their course program to the Graduate Program Director for approval before registration.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their online applications to the Department by February 1.

14. Other Information

Since resources are limited, the Department may, in any year, admit fewer applicants than those who are qualified to undertake graduate studies.

15. Faculty Members/Research Interests

The research interests of current faculty can be found at: http://hist.ucalgary.ca/graduate/programs/areas-specialization.

Interdisciplinary Graduate Program IGP

Contact Information

Program number: 403.220.6501
Email address: ikubick@ucalgary.ca
Web page URL: http://www.ucalgary.ca/igp

1. Degrees and Specializations Offered

Doctor of Philosophy (PhD)
Master of Arts (MA), thesis-based
Master of Science (MSc), thesis-based

Please note that specializations are determined by the Supervisory Committee in consultation with the Director of the Interdisciplinary Graduate Program. Students are encouraged to select specializations as early as possible, preferably before beginning their programs of study.

2. Admission Requirements

In addition to Faculty of Graduate Studies requirements, the Interdisciplinary Graduate Program requires:

a) A statement identifying at least two academic disciplines or interdisciplinary degrees that will be integrated in the MA, MSc or PhD degree.

b) For MA and MSc admission an undergraduate degree in one of the academic disciplines or interdisciplinary degrees that will be integrated in the master's degree. For PhD admission the master's degree must be a thesis (research)-based (or equivalent) and in one of the academic disciplines or interdisciplinary degrees that will be integrated in the PhD degree. Please note that applicants who hold non-thesis-based master's degrees must present clear evidence of research experience (e.g., peer-reviewed papers in the research literature) that is equivalent to a thesis (research)-based degree.

c) A grade point average of 3.50 or higher (on the University of Calgary four-point system). For MA and MSc admission this is based on the last two years of the undergraduate degree (minimum of 60 units or 10 full-course equivalents). For PhD admission the overall GPA from the master's degree will be considered.

d) Applicants required to prove proficiency in English must fulfill this requirement in one of the following three ways:

- A TOEFL score of 100 on the Internet-Based Test (iBT), and a score of at least 50 on the Test of Spoken English (TSE)
- A TOEFL score of 100 on the Internet-Based Test
- An IELTS score of 7.5

e) Three reference letters on the Interdisciplinary Graduate Program's reference letter forms.

f) An up-to-date curriculum vitae. Please separate refereed and non-refereed research contributions.

g) A concise statement of reasons for applying to the Interdisciplinary Graduate Program, including its fit with career objectives.

h) A research statement (maximum of 1500 words (5 pages)). Please note that this research statement must include the following sections: Background, research questions, literature review, research methodology, intellectual merit of the proposed research, and broader impacts of the proposed research. The research statement should also indicate if ethics approval is required to carry out the proposed research.

i) A statement of interdisciplinarity that:

- Sets out what makes the proposed program of study interdisciplinary
- Specifies how each academic discipline or interdisciplinary degree will inform the
research and why each is essential to answering the proposed research questions.
• Provides clear evidence that the proposed program of study cannot be undertaken in any other disciplinary or interdisciplinary degree at the University of Calgary

Please note that insufficient academic preparedness for another disciplinary or interdisciplinary degree and absence of an MA, MSc, or PhD program at the University of Calgary in an established disciplinary or interdisciplinary degree are not adequate reasons for pursuing a degree in IGP.

j) Proposed coursework as set out below in Program/Course Requirements.

k) A proposed Supervisory Committee. For MA and MSc admission the Supervisory Committee must consist of at least two people (Supervisor plus one person), one from each identified academic discipline or interdisciplinary degree (maximum of three members). For PhD admission the Supervisory Committee must consist of at least three people (Supervisor plus two people), at least one from each identified academic discipline or interdisciplinary degree (maximum of four members).

l) The proposed Supervisor must provide a letter that:
• Confirms his/her willingness to supervise the applicant through to completion of the degree
• Supports the proposed research and statement of interdisciplinary
• Confirms that the proposed research cannot be carried out in his/her program
• Sets out how the proposed courses and research project will ensure sufficient disciplinary rigor within the program of study
• Explains how the selection of other members of the Supervisory Committee will ensure a balance of interdisciplinary and disciplinarity
• Confirms department/program approval for his/her role on the Supervisory Committee for this student
• Includes a curriculum vitae that provides evidence of his/her expertise and experience relevant to the proposed research

m) Each proposed Supervisory Committee member must provide a letter that:
• Confirms his/her willingness to serve on the Supervisory Committee through to completion of the degree
• Supports the proposed research and statement of interdisciplinary
• Confirms that the proposed research cannot be carried out in his/her program
• Sets out how the proposed courses and research project will ensure sufficient disciplinary rigor within the program of study
• Includes a curriculum vitae that provides evidence of his/her expertise and experience relevant to the proposed research

n) A proposed completion schedule. The Interdisciplinary Graduate Program does not offer a part-time registration status option.

Expected completion time is two years for the MA degree and the MSc degree and four years for the PhD degree. Maximum completion time is four years for the MA degree and the MSc degree and six years for the PhD degree.

o) A funding plan that provides evidence of sufficient financial resources to carry out the program of study. For MA and MSc admission a two-year funding plan is required. For PhD admission a four-year funding plan is required. Applicants must be eligible to hold awards administered by the Faculty of Graduate Studies and the Interdisciplinary Graduate Program. Please note that statements signalling an intention to apply for funding are not sufficient.

p) A statement of availability of, and access to, all resources that are required to carry out the proposed research (e.g., equipment, data, access to respondents, funding for fieldwork).

3. Application Deadline

The Interdisciplinary Graduate Program admits students for a September start through a four-step admissions process. Each step requires specific documentation by a specified date. The decision not to recommend admission can be made at each step in the process. Successful applicants at each step will move to the next step. Unsuccessful applicants at each step will receive a letter informing them that they will not be recommended for admission to the Interdisciplinary Graduate Program.

Step 1 Assessment of eligibility.

Deadline for submission of required documentation: 4:00 p.m. (MST) January 15

Required documentation:
• Online application
• Application fee
• Academic transcripts for all previous programs of study
• TOEFL or IELTS score (where required)
• Up-to-date curriculum vitae
• Specification of two academic disciplines or interdisciplinary degrees that will be integrated in the Interdisciplinary Graduate Program
• A statement confirming that at time of first registration you are eligible to hold graduate awards administered by the Faculty of Graduate Studies and the Interdisciplinary Graduate Program

Step 2 Assessment of proposed program of study, supervision and funding plan.

Deadline for submission of required documentation: 4:00 p.m. (MST) March 1

Required documentation:
• Statement of career goals and fit with proposed program of study
• Research statement
• Statement of interdisciplinary
• Proposed coursework
• Proposed completion schedule
• Funding plan

• Statement of availability of, and access to, resources necessary to carry out proposed research
• Three reference letters
• Supervisory Committee package (letters of support from the supervisor and members of Supervisory Committee; curriculum vitae of supervisor and each member of the Supervisory Committee)

Step 3 Admissions Seminar held within three weeks of assessment of proposed program of study, supervision and funding plan.

Step 4 Recommendation to the Faculty of Graduate Studies.

4. Advanced Credit

Requests for advanced credit must be made as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission. Advanced credit requests may not exceed one-third of the course load identified at the Admission Seminar. PhD applicants may not receive credit for undergraduate courses.

5. Program/Course Requirements

In addition to Faculty of Graduate Studies requirements, the Program requires:

For the MA degree and the MSc degree:
• A minimum of four graded courses (12 units or 2.0 full-course equivalents), two per academic discipline or interdisciplinary degree integrated in the program of study
• Additional courses in methodology and statistics as needed
• A maximum of one directed reading course
• At least 75 per cent of the coursework must be at the graduate level

For the PhD degree:
• A minimum of four graded graduate-level courses (12 units or 2.0 full-course equivalents), two per academic discipline or interdisciplinary degree integrated in the program of study
• Additional courses in methodology and statistics as needed
• A maximum of one directed reading course (3 units or 0.5 full-course equivalent)

Copyediting of students' theses is not allowed.

6. Additional Requirements

None.

7. Credit for Undergraduate Courses

None.

8. Time Limit

Maximum completion time is four years for a master's program and six years for a doctoral program.

9. Supervisory Assignments

All students must have an approved supervisory committee at the time of admission.
10. Required Examinations
The doctoral candidacy examination has a written component and an oral component. The written component consists of three questions set by the Supervisory Committee. The student has three weeks to complete the written component. The oral component of the candidacy examination will take place one week after the submission of the answers.

Questions on the thesis research proposal will not be included in the oral candidacy examination.

Final thesis examinations are open.

11. Research Proposal Requirements
All students must have a thesis research proposal approved by their Supervisory Committees. For PhD students, the thesis research proposal must be approved before the candidacy examination.

12. Special Registration Information
Course registration must be completed manually by completing the Faculty of Graduate Studies Change of Registration form.

13. Financial Assistance
Applicants will not be admitted to the MA degree or the MSc degree without an approved two-year funding plan. Applicants will not be admitted to the PhD degree without an approved four-year funding plan. Students are required to apply for external and internal awards for which they are eligible. For information on awards and application deadlines, see the Faculty of Graduate Studies website. Students should also check with the Interdisciplinary Graduate Program for internal deadlines.

Applicants: Please note that award deadlines may fall before the application deadline for admission.

Financial assistance may be available from the Interdisciplinary Graduate Program. Priority will be given to students in the first two years of a master's degree or the first four years of a PhD degree. This funding may include an Interdisciplinary Graduate Program Scholarship, a Graduate Teaching Assistantship and/or a Graduate Teaching Assistantship.

Applicants: Please note that award deadlines may fall before the application deadline for admission.

Financial assistance may be available from the Interdisciplinary Graduate Program. Priority will be given to students in the first two years of a master's degree or the first four years of a PhD degree. This funding may include an Interdisciplinary Graduate Program Scholarship, a Graduate Teaching Assistantship and/or a Graduate Teaching Fellowship.

Eligibility:
- May not hold or accept full-time employment
- May not hold or accept paid employment that entails 600 or more hours per year

Application:
MA students and MSc students
- Apply directly to the Interdisciplinary Graduate Program on its Awards Competition form
- Deadline: 4:00 p.m. (MST) January 15

PhD students
- Apply to the Faculty of Graduate Studies – Graduate Award Competition
- Deadline: 4:00 p.m. (MST) January 15

14. Other Information
None.

Kinesiology KNES

Contact Information
Location: Kinesiology B, Room 146
Program number: 403.220.5183
Email address: knesgrad@ucalgary.ca
Web page URL: http://www.ucalgary.ca/knes/grad

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based Specializations (offered only to PhD, MSc students):
- Biomechanics
- Exercise & Health Physiology
- Health, Exercise and Sport Psychology
- Innovation in Pedagogy and Sport Performance
- Neuro-Motor Psychology & Motor Learning
- Nutrition, Metabolism & Genetics
- Rehabilitation
- Sport History
- Sport Medicine

Master of Kinesiology:
Specialization:
- Applied Exercise Physiology

The Master of Kinesiology (MKn) is a full-time course-based program specializing in Applied Exercise Physiology.

Students are normally registered as full-time students however in very exceptional circumstances, registration as part-time students may be recommended by the Faculty of Kinesiology, Associate Dean (Graduate) for subsequent approval by the Dean, Faculty of Graduate Studies or designate.

2. Admission Requirements
In addition to Faculty of Graduate Studies requirements, the Faculty of Kinesiology requires the following:

Doctor of Philosophy
a) Consent for supervision from an approved Faculty Member in Kinesiology.
b) An appropriate academic background for the area of specialization.

c) A minimum grade point average (GPA) of 3.20 or higher on a four-point scale over the last 60 units (10 full-course equivalents) and/or last two years of study.
d) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (written) or 92 (Internet-based), or an IELTS score of 7.5, or a MELAB score of 82.
e) Two reference letters.

Master of Kinesiology
The following are the minimum requirements for applying to the program. Please note, normally applicants with higher GPAs are selected for admission to the program.
a) A minimum grade of “B” or 3.00 in each of the following undergraduate prerequisite courses or equivalents: Anatomy, Exercise Physiology, Biomechanics, Exercise and Sport Psychology and Statistics.
b) A minimum admission GPA of 3.00 or higher on a four-point scale over the last 60 units (10 full-course equivalents) and/or two years of study in Kinesiology or an appropriate academic background for the area of specialization.
c) A demonstrated ability to be self-motivated and capable of independent study as shown in undergraduate studies, volunteer work and/or work experience in exercise science areas will be considered.
d) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (written) or 92 (Internet-based), or an IELTS score of 7.5, or a MELAB score of 82.
e) Two reference letters.

3. Application Deadline
Doctor of Philosophy
Master of Science
The deadline for the submission of complete applications to thesis-based programs is March 31 for September 1 admission.

Master of Kinesiology
The deadline for the submission of complete applications to the course-based program is March 1 for September 1 admission.

4. Advanced Credit
Advanced credit will be limited to 12 units (2.0 full-course equivalents) with a grade of “B” or higher for students admitted to the Master of Kinesiology program. The student must request advanced credit in writing at the time of application for admission to the Faculty of Kinesiology.
5. Program/Course Requirements
In addition to Faculty of Graduate Studies requirements, the Faculty of Kinesiology requires:

Doctor of Philosophy
A minimum of 9 units (1.5 full-course equivalents) at the graduate level selected according to the student’s background and research focus and will be approved by the graduate supervisor and supervisory committee.

Master of Science
a) One graduate-level course (3 units or 0.5 full-course equivalent) in statistics.
b) One graduate-level course (3 units or 0.5 full-course equivalent) in research design.

Master of Kinesiology
a) A total of 33 units (5.5 full-course equivalents) at the graduate level.

Core Courses (Required of all students):
Kinesiology 605, 606, 615, 617, 673, 690, 697, 715, 717, 773, 775 and 785.

b) A final oral presentation is considered the capstone event. This will be undertaken in conjunction with Kinesiology 715.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Graduate credit may be granted for courses offered at the 500 level at the discretion of the Associate Dean (Graduate).

8. Time Limit
Doctor of Philosophy
Expected completion time is four years. Maximum completion time is six years.

Master of Science
Expected completion time is two years. Maximum completion time is four years.

Master of Kinesiology
Expected completion time is 20 months commencing in September. Maximum completion time is six years.

9. Supervisory Assignments
Doctor of Philosophy
Master of Science
Supervisor(s) must be identified at the time of admission for thesis-based programs. Within three months of admission, the student and supervisor(s) must select a supervisory committee according to the Faculty of Graduate Studies’ procedures. The composition of the supervisory committee must be approved by the Associate Dean (Graduate).

Master of Kinesiology
Not applicable.

10. Required Examinations
Doctor of Philosophy
a) Doctoral Candidacy Examination will occur after a student’s research proposal is approved by the Supervisory Committee and Associate Dean (Graduate). The Candidacy Examination has both written and oral components. The student and supervisor select one of the two formats for the written portion of the examination:
i) A closed book, six-hour examination administered on one-day in two three-hour blocks will be invigilated by the supervisor. The supervisor will provide the student with five questions determined by the Candidacy Examination Committee. The student will answer four out of five questions. The written answers are circulated to the Candidacy Examination Committee immediately after the written examination concludes.
ii) The Candidacy Examination Committee will determine five questions to be distributed to the student four weeks before the Oral Candidacy Examination. The student will prepare a written paper for four of the questions and submit a copy of each paper to each examiner one week before the Oral Candidacy Examination. Each paper should be a maximum of twenty double-spaced pages.

Oral Candidacy Examination: The basis of the Oral Candidacy Examination will be the written examination, general knowledge and the thesis topic. The Oral Candidacy Examination will occur seven (7) days after the written component concludes. Both the written and the oral components of the Candidacy Examination must be found acceptable in order to receive a Pass.

b) Doctoral Thesis Oral Examinations are administered according to the Faculty of Graduate Studies’ procedures and are open examinations.

Master of Science
Master’s Thesis Oral Examinations are administered according to the Faculty of Graduate Studies’ procedures and are open examinations.

Master of Kinesiology
Not applicable.

11. Research Proposal Requirements
Doctor of Philosophy
Master of Science
Each thesis-based student drafts and presents a research proposal to his/her supervisory committee prior to commencing data collection.

The proposal consists of:
a) Background information from the scientific literature, including a critical evaluation of previous work.
b) A clear statement of the objectives of the proposed research program.
c) An analysis of the methodology to be used in the implementation of the proposal.
d) An indication of the contributions to scientific knowledge that should result from the candidate’s research.

The supervisory committee may limit the length of the proposal, and must officially approve it before it is submitted to the Faculty of Kinesiology, Associate Dean (Graduate). Students whose research involves human subjects must receive approval from the University of Calgary Conjoint Health Research Ethics Board before beginning data collection. Research with animals must receive approval from a University Animal Care Committee.

Master of Kinesiology
Not applicable.

12. Special Registration Information
None.

13. Financial Assistance
Doctor of Philosophy
Evidence of external financial support in accordance with the Faculty of Kinesiology Graduate Program requirements must be provided before admission. This external funding must be in the form of a Supervisor’s Grant, external award(s), government funding, etc.

Master of Science
Students are encouraged to apply for external awards, government funding, etc. Financial assistance may be available to qualified thesis-based students in the form of Graduate Assistantships (Teaching). For information on other awards, please contact the Faculty of Kinesiology Graduate Program.

Master of Kinesiology
MKin students may apply for Graduate Assistantship (Teaching) positions.

14. Other Information
Initial enquiries should be directed to Faculty of Kinesiology Graduate Program.

15. Faculty Members/Research Interests
Current faculty and their areas of research interest can be found at http://www.ucalgary.ca/kines/research/interests.
Applicants interested in a doctoral degree in Law on a special case basis should review the program's website to determine any additional requirements or restrictions, and then, if appropriate, contact the graduate program representative. Information on the Faculty of Graduate Studies Special Case Policy can be found at http://grad.ucalgary.ca/prospective/admissions/special-case.

2. Admission Requirements
In addition to the requirements of the Faculty of Graduate Studies, the Faculty of Law requires, for both the thesis-based and course-based LLM degree programs and the Post-baccalaureate Certificate program:

a) An academic degree in law.

b) For applicants required to provide proof of proficiency in English, a minimum TOEFL Internet-based score of 100, of which the reading, listening and writing component must total 75; or a minimum TOEFL Paper-based score of 600 and a TWE score of 5.5; or the minimum IELTS overall band score of 7.0, with a reading and writing band minimum of 7.0; or a MELAB score of 85; or a PTE score of 70.

c) Applicants to the LLM program must submit a brief statement of their proposed thesis or major paper and indicate their proposed supervisor. Forms and details are available from the Faculty.

d) Two reference letters.

3. Application Deadline

a) Thesis-based LLM applications are accepted for September admission only. The deadline for submission of completed applications is December 15.

b) Course-based LLM applications are accepted for September admission only. The deadline for submission of completed applications is December 15.

c) Post-Baccalaureate Certificate applications are accepted for September or January admission. The deadline for completed applications for September admission is December 15 and the deadline for completed applications for January admission is July 15.

d) Deadlines are firm for international students, but may be flexible for Canadian students.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for courses taken as part of another completed degree/diploma/certificate or for courses taken to bring the grade point average to a required level for admission. Credit may be given for courses taken towards the Faculty of Law’s thesis-based or course-based LLM degree program or as part of the Faculty’s Post-baccalaureate Certificate program when transferring between programs.

5. Program/Course Requirements

In addition to Faculty of Graduate Studies requirements, the Faculty of Law requires:

LLM (thesis-based)

a) Law 703: Graduate Seminar in Legal Research and Methodology. Students must receive a passing grade in this course to advance in the program.

b) Law 705: Graduate Seminar in Legal Theory.

c) At least two additional 600-level courses (6 units or 1.0 full-course equivalent) in the areas of natural resources, energy or environmental law or in a related area or from a related discipline with the approval of the Graduate Director.

d) A substantial research thesis in the area of natural resources, energy or environmental law, approximately 100 to 125 pages (30,000–38,000 words) in length, exclusive of the bibliography, prepared under the supervision of a faculty member or other suitable person appointed by the Graduate Director.

e) Two terms in residence, normally consecutive and normally from September to April. Students usually require at least 15 to 18 months from initial registration for thesis completion and defence.

LLM (course-based)

a) Law 703: Graduate Seminar in Legal Research and Methodology. Students must receive a passing grade in this course to advance in the program.

b) An additional five courses (15 units or 2.5 full-course equivalents) in the areas of natural resources, energy or environmental law or in a related area or from a related discipline with the approval of the Graduate Director. At least two of the five additional courses must be at the 600 level and at least two of the five additional courses must include a research paper evaluation worth at least 50 per cent of the course grade. One of the additional courses may be Law 705, the Graduate Seminar in Legal Theory.

c) Law 706: A major research paper, approximately 50 to 60 pages (15,000–18,000 words) in length, prepared under the supervision of a faculty member or other suitable person appointed by the Graduate Director and evaluated on a Pass/Fail basis.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses

Not applicable.

8. Time Limit

a) All requirements for the thesis-based LLM degree must be completed within three calendar years of initial registration.

b) All requirements for the course-based LLM degree must be completed within five years of initial registration. It is expected that full-time students will complete the program in one calendar year.

c) All requirements for the Post-Baccalaureate Certificate program must be completed within three calendar years of initial registration.

d) All requirements for the Special Case PhD must be completed within six calendar years.

9. Supervisory Assignments

Contact the Faculty of Law Graduate Director for information.

10. Required Examinations

In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination

Thesis examinations are open.

Scheduling of the Examination

All members of the Supervisory Committee (where applicable), must have reviewed the student's draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements

The proposal submitted at the time of application must be in the area of natural resources, energy or environmental law.

12. Special Registration Information

None.

13. Financial Assistance

Financial assistance may be available to qualified students, although funding for course-based LLM and Post-Baccalaureate Certificate students will very rarely be provided. For information on awards, see the Awards and Financial Assistance section of this calendar or the Faculty of Law Calendar or website.

Students applying for scholarships must submit their scholarship applications to the Faculty of Law by the deadlines for completed admission applications.

14. Other Information

Attaining an LLM degree without a Canadian LLB degree will not qualify graduates to practice law in Canada. Inquiries on this issue must be addressed to the appropriate provincial governing body for the legal profession. In Alberta, contact the Law Society of Alberta.

15. Faculty Members/Research Interests

The active research interests of members of the Faculty of Law and the affiliated Canadian Institute of Resources Law (CIRL) can be found on the Faculty of Law website at http://www.law.ucalgary.ca.
1. Degrees and Specializations Offered

Master of Arts (MA)

The norm is full-time study, but part-time study may also be arranged. Full-time study is defined as in the Graduate Calendar ("Student Status") and is not compatible with full-time employment. Status of students with part-time employment will be determined on a case-by-case basis.

2. Admission Requirements

In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

a) Significant undergraduate training in linguistics, normally including at least one course in syntax and one course in phonology.

b) A statement of purpose specifying the applicant's research interests and reasons for wishing to pursue a Master of Arts degree at the University of Calgary.

c) A sample of previous work in linguistics or a related field (e.g., an Honours undergraduate thesis, or a course paper).

d) For applicants required to provide proof of proficiency in English, a minimum IELTS score of 7.0; OR a minimum TOEFL score of 560 (paper-based), 83 (Internet-based test); OR a minimum of 550 (paper-based), 80 (Internet-based test) AND a minimum score of 5.0 on the Test of Written English (TWE); OR a MELAB score of 81; OR a PTE score of 59.

e) Three reference letters.

3. Application Deadline

Students applying for admission and university scholarships must submit their applications to the Department of Linguistics by January 15. All applications submitted by this deadline will also receive full consideration for department scholarships and assistantships. Applications received by January 15 will normally be considered for September admission. We strongly encourage individuals to apply as soon as possible.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements

In addition to the Faculties of Graduate Studies and Arts requirements, the Department requires:

a) Completion of 18 units (3.0 full-course equivalents) in Linguistics beyond the MA, including Linguistics 611 and 613. Course requirements are normally completed during the first two years.

Note: No more than 6 units (1.0 full-course equivalent) can be taken with the same instructor.

b) Linguistics 600.

c) Knowledge of a language other than English demonstrated to the satisfaction of the Graduate Studies Committee. The following groups will be judged on acceptance to the program to have met the MA language requirement:

- Students whose mother tongue is English and who were required to satisfy the English language proficiency requirements for admission to program.
- Students whose mother tongue is English and who provide evidence of past schooling in another language (e.g., schooling in an immersion program in French, German or a First Nations language).
- Students whose mother tongue is English and who provide evidence of having completed a foreign language secondary school credit such as Spanish Language Arts 30, or French Language Arts 31.
- Students whose mother tongue is English and who provide evidence of at least A1 ("Basic User") level of proficiency in another language in the Common European Framework of Reference from a certified testing agency or a recognized academic institution (e.g., university or college) or a recognized language teaching organization.
during their PhD program in the following ways:

- By providing evidence of having received credit for 3 units (0.5 full-course equivalent) for a University of Calgary language course, e.g. Chinese 205, French 209, German 202, or Japanese 205, or Russian 201.
- By providing evidence of having received credit for one of the following courses: Indigenous Languages 205, Linguistics 551 or 605.

It is the responsibility of the student to provide relevant documentation that the doctoral language requirement has been met. This program requirement must be met by the time the thesis proposal is submitted. It is the responsibility of the supervisor to ensure that the student meets the deadline for completing this requirement.

**Copyediting**

Copyediting of the examination version of the thesis is not permitted. Students may make use of a copyeditor or copyediting service for the final version only of the thesis. The name of the copyeditor or copyediting service must appear on the Acknowledgements page. Acknowledgement is required whether the copyediting was done by a paid professional or by an acquaintance, friend or family member. Fees for copyediting must be assumed by the student.

**6. Additional Requirements**

None.

**7. Credit for Undergraduate Courses**

At both the master's and the doctoral level, with the approval of the Graduate Program Director and the Department Head, a student may take for credit a maximum of 6 units (1.0 full-course equivalent) at the undergraduate level. Normally, only 500-level courses are approved as acceptable, and students must provide evidence that such courses represent a necessary contribution to their program.

**8. Time Limit**

Expected completion time is two years for a master's degree and four years for a doctoral degree. Maximum completion time is four years for a master's degree and six years for a doctoral degree.

**9. Supervisory Assignments**

**Master of Arts**

A student is assigned a supervisor on admission to the program based on the stated research interests of the student, the disciplinary expertise of faculty members and Departmental capacity. This faculty member commits to supervising the student's thesis and to advising and mentoring the student. Since research interests can change while in program, students are free to select a different supervisor after admission to program but must finalize supervisory arrangements by the end of the second term of study (usually April). When a student wishes to change supervisor, that choice must be made by mutual agreement between the student and the faculty member concerned, in consultation with the Graduate Program Director.

**Doctor of Philosophy**

A student is assigned a supervisor on admission to the program based on the stated research interests of the student, the disciplinary expertise of faculty members and Departmental capacity. This faculty member commits to supervising the student's thesis and to advising and mentoring the student. Since research interests can change while in program, students are free to select a different supervisor after admission to program but will normally finalize supervisory arrangements by the end of the second term of study (usually April) and must finalize supervisory arrangements by the end of the second annual registration. When a student wishes to change supervisor, that choice must be made by mutual agreement between the student and the faculty member concerned, in consultation with the Graduate Program Director.

Once the student has finalized the choice of a thesis supervisor, a supervisory committee is struck. It will normally consist of the supervisor and two other faculty members from the Department. One of the two members of this committee may be external to the department. It is desirable to have at least one committee member with supervisory experience at the doctoral level. The supervisory committee must be recommended by the Graduate Program Director and be approved by the Dean of the Faculty of Graduate Studies no later than three months after supervisory arrangements are finalized. This will normally be during the summer of the first year of study, but no later than the third month following the second annual registration. The responsibility for organizing the supervisory committee lies with the supervisor but it should be constituted in consultation with the student.

**10. Required Examinations**

In addition to the Faculty of Graduate Studies requirements, the Department requires:

**Doctor of Philosophy Candidacy**

A doctoral student is required to take the Candidacy Examination after completion of all course work, normally within 20 months of first registration. Doctoral candidacy examinations have a written and oral component. The written candidacy examination consists of an original research paper in the student's research area, and a portfolio. The student's portfolio will normally consist of final papers from 3 of the 6 required courses, their current CV, and presentations and publications (if any). Course papers for inclusion in the portfolio are chosen by the student in consultation with the supervisor. Examination questions for the Faculty of Graduate Studies oral examination will be based on the original research paper and the student's portfolio papers.

**Thesis Examination**

**Scheduling of the Examination**

All members of the Supervisory Committee must have reviewed the student's research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

**Composition of the Committee**

The Internal Examiner may be internal to the home program.

**11. Research Proposal Requirements**

**Master of Arts**

Students in the master's program must complete Linguistics 697.

**Doctor of Philosophy**

Students in the doctoral program must submit a written thesis proposal to their supervisory committee within twenty-four months of the first registration, but not before the student has passed his/her oral candidacy examination. The body of the proposal (excluding bibliographic references) must not exceed ten pages in length.

**12. Special Registration Information**

None.

**13. Financial Assistance**

Financial assistance is normally available to qualified students. Funding is provided to full-time students only. Students are required to inform the department of any part-time employment. Failure to do so will result in revocation of departmental funding. For information on awards, see the Awards and Financial Assistance section of this calendar. Students applying for scholarships must submit their applications to the Department by January 15.

Students whose applications are complete by January 15 will automatically be considered by the Department for Graduate Research Scholarships and Graduate Assistantship support. In addition, faculty members of this Department may have special project funds for research assistantships. Information on Departmental assistantships is available on the Department's graduate programs web page: http://ling.ucalgary.ca/graduate.

**14. Other Information**

Students should consult the Departmental Graduate Handbook for further information and regulations governing the graduate program. Copies are available from the Graduate Program Administrator, CHC 205; or may be downloaded from the Department's graduate programs web page: http://ling.ucalgary.ca/graduate.

**15. Faculty Members/Research Interests**

Current faculty research interests can be found at http://llc.ucalgary.ca/graduate/graduate-program-linguistics.

**Mathematics and Statistics MTST**

**Contact Information**

Location: Math Sciences Building, Room 462
Mathematics and Statistics MTST

1. Degrees and Specializations Offered

Master of Science (MSc), course-based and thesis-based

The Master of Science (course-based) degree may be completed on a part-time basis. The normal course load for a full-time course-based Master of Science student is 9 units (1.5 full-course equivalents) per term.

Specializations:
- Mathematics
- Statistics

2. Admission Requirements

In addition to the Faculties of Graduate Studies and Statistics requirements, the Department requires:

Master of Science

a) Normally, bachelor's degree, or its equivalent, in the subject of the specialization to which the application is made, or a closely related area.

b) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based); or 93 (Internet-based test); or minimum IELTS score of 7; or minimum MELAB score of 84; or a minimum PTE score of 70.

c) Three Reference Forms with reference letters.

Doctor of Philosophy

a) A master's degree or equivalent in the subject of the specialization to which the application is made.

b) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based); or 93 (Internet-based test); or minimum IELTS score of 7; or minimum MELAB score of 84; or a minimum PTE score of 70.

c) Three Reference Forms with reference letters.

d) Excellent students, admitted to the master's program, may be transferred to the PhD program after having demonstrated exceptional performance at the graduate level, subject to endorsement by the supervisor and approval by the Graduate Committee. Such transfer requests are to be initiated by the supervisor and are to include information about research ability.

3. Application Deadline

The deadline for submission of complete applications is January 15 for September admission. After this date, complete applications may be considered if space is available.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process.

Credit will not be given for course work taken as a requirement of another completed degree/diploma. The determination for advanced credit will be made prior to entry into the program.

5. Program/Course Requirements

Course requirements are taken from the following lists of courses:

List A: Mathematics 601, 603, 605, 607
List B: Mathematics 617, 621, 625, 627, 631, 641, 661, 681, 685, Statistics 701
List C: Statistics 701, 703, 721, 723

In addition to Faculties of Graduate Studies and Statistics requirements, the Department normally requires that:

Master of Science (thesis-based)

All students must take course work to the equivalent of an honours bachelor's degree plus at least 15 units (2.5 full-course equivalents), or 12 units (2.0 full-course equivalents) if completing program in one year (not counting the seminar course 621) at the graduate level. In addition:

a) Mathematics students must include two courses from List A.
b) Statistics students must include three courses from List C.

Master of Science (course-based)

All students must take 24 units (4.0 full-course equivalents) (not counting the seminar course 621) at the graduate level. In addition:

a) Mathematics students must include two courses from List A.
b) Statistics students must include three courses from List C.

All students must complete a project resulting in a written report.

Doctor of Philosophy

Course requirements for the Doctor of Philosophy beyond those for a master's degree are determined on an individual basis, but the following rules apply: doctoral students must include 24 units (4.0 full-course equivalents) graduate-level courses in their total graduate program (MSc and PhD). In addition:

a) Mathematics students must include at least 15 units (2.5 full-course equivalents) taken during their doctoral program at the University of Calgary. Two of these courses must come from List A and a third from List A or List B.
b) Statistics students must include three courses from List C.

6. Additional Requirements

All MSc graduate students are required to register in one of the seminar courses Mathematics 600 or Statistics 600 in the first year of their program.

All PhD students are required to register in one of the seminar courses Mathematics 600 or Statistics 600 in the first or second year of their program.

The Seminar courses are not counted in the calculation of the number of required courses in each program.

All Mathematics PhD students are required to give three invited or contributed presentations during their doctoral degree, not including presentations that are required as part of a graduate course or the 600 seminar course.

7. Credit for Undergraduate Courses

Credit may be given for courses taken below the 600-level. At least one half of a graduate student's course work must be at the 600 level or higher and only where appropriate to a student's program may credit be given for courses numbered 500–599.

8. Time Limit

The expected completion time for full-time master's students is two years. The maximum completion time allowed for a thesis-based master's program is four years, and for a course-based master's program is six years. The expected completion time for a doctoral student is four years, and the maximum completion time is six years.

9. Supervisory Assignments

The Graduate Program Director, Department of Mathematics and Statistics, assigns supervisors based upon the graduate student's proposed program admission.

10. Required Examinations

Doctoral students must pass written Preliminary Examinations during the first year but no later than eighteen months from the beginning of their doctoral programs and before the oral candidacy examination.

Mathematics PhD students must pass Preliminary Exams on material for three courses, two of which must come from List A and the third from List A or List B.

Statistics PhD students must pass two Preliminary Exams, one in Statistics and the other in Probability.

Doctoral students must pass an Oral Candidacy Examination no later than twenty-eight months from the beginning of their doctoral program and after their Preliminary Examinations.

Thesis Examination

Final thesis oral examinations are open. In addition to the Faculty of Graduate Studies requirements, the Department requires:

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student's draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program. However, it is strongly encouraged that whenever reasonable the Internal Examiner should be external to the home program.

Further details about the written and oral examinations may be obtained from the Department website: http://math.ucalgary.ca/gradstudies/programs.
11. Research Proposal Requirements
At least three months before a PhD Oral Candidacy Examination, a research proposal, prepared by the student and approved by the supervisor, will be submitted to the student's Supervisory Committee. The Committee will inform the student of the material (topics, books, articles, etc.) to be mastered for the Oral Candidacy Examination. The material will be based upon the proposal, and will be agreed upon with the student.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Successful applicants may be offered departmental teaching assistantships and/or research stipends in their offer letter.

14. Other Information
None.

15. Faculty Members/Research Interests
Information about current faculty and their research interests is available from the Department website http://medicine.ucalgary.ca/gradstudies/research and from individual faculty members' web pages.

Medicine Programs

Contact Information
Graduate Medical Education Office
Location: Health Sciences Centre, Room G329
Fax: 403.210.8109
Web page URL: http://medicine.ucalgary.ca/grad

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD), thesis-based
Master of Science (MSc), thesis-based
Master of Biomedical Technology (MBT), course-based
Master of Community Medicine (MCM), course-based
Master of Disability and Community Studies (MDCS), course-based

Joint programs, offered with other Faculties:
The Cumming School of Medicine and the Haskayne School of Business offer a combined Master of Biomedical Technology/ Master of Business Administration (MBT/ MBA) program. Contact either program for further information.

Students in the Cumming School of Medicine and the Departments of Anthropology and Archaeology may choose an interdisciplinary specialization in Biological Anthropology. For further information on the Biological Anthropology (Interdisciplinary) specialization, see the separate listing in this calendar. The University of Calgary and Alberta offer a joint Biomedical Engineering Program. Further information can be obtained from the separate listing in this Calendar.

In addition, the University of Calgary offers the joint Leaders in Medicine Program leading to MD/Master's or MD/Doctoral degrees. Students applying to the MD/MSc or MD/PhD program must apply individually to each program and complete a supplementary application for the Leaders in Medicine Program.

Further information regarding the Leaders in Medicine Program is provided under the Degree Information section in this Calendar.

2. Admission Requirements
In addition to the Faculty of Graduate Studies regulations, the Cumming School of Medicine graduate programs require:

**Master of Science**
- BSc degree or equivalent
- A minimum admission grade point average of 3.30 (on the University of Calgary four-point system; equivalent to a "B+" based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents).

**Doctor of Philosophy**
- MSc degree, or relevant master's degree, recognized by the Faculty of Graduate Studies, or transfer from MSc program, or, in exceptional cases, BSc degree or equivalent.
- A minimum admission grade point average of 3.30 (on the University of Calgary four-point system; equivalent to a "B+" based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents) and any master's course work if applicable.

Refer to the individual program entries for additional program admission requirements.

3. Application Deadline
Refer to individual program information.

4. Advanced Credit
Applicants must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission. Refer to individual programs for additional advanced credit information.

5. Program/Course Requirements
Refer to individual program information.

6. Additional Requirements
Refer to individual program information.

7. Credit for Undergraduate Courses
Refer to individual program information.

8. Time Limit
Maximum completion times follow the Faculty of Graduate Studies regulations:
- Maximum completion time for a course-based master's program is six years
- Maximum completion time for a thesis-based master's program is four years
- Maximum completion time for a doctoral program is six years
- Maximum completion time for the MD/master's program is six years
- Maximum completion time for the MD/PhD program is eight years

For specific program expected time to completion, please refer to individual program information.

9. Supervisory Assignments
Supervisors and supervisory committees are assigned according to the Faculty of Graduate Studies regulations (see Academic Regulations) and are approved by the Graduate Program Director of each program. Master of Science students in the Leaders in Medicine Program must have supervisory committees constituted according to the regulations of the graduate home program. Both master's and doctoral students will also be evaluated and advised by a Joint Liaison Committee composed of the Associate Dean (Graduate Sciences Education) and the Associate Dean (Undergraduate Medical Education).

For specific program supervisory assignment information, please refer to the individual program entry.

10. Required Examinations
All thesis-based programs, MSc and PhD require successfully passing the Final Thesis Oral Examination. For more specific program examination information, please refer to the program section.

Doctoral Candidacy Examinations
In addition to Faculty of Graduate Studies regulations, the Cumming School of Medicine candidacy examinations consist of both a written and an oral component. For the MDCH doctoral candidacy examination procedure see the MDCH Graduate Calendar section. For all other programs:

The student's approved research proposal will serve as the examination's written component. The written component shall consist of a 13-17 page (single spaced) document, excluding references and figures, that includes a literature review of the students' topic area and a description of the proposed research. The oral examination will take place one month after the submission of the written document to the examination committee. The supervisor is a non-voting observer at the doctoral candidacy exam. The oral examination must be completed within 24 months after initial registration for direct-entry doctoral students and within 30 months after initial registration for doctoral students who transferred from an MSc program. The final thesis defence for MSc and PhD degrees will consist of a public seminar followed by an open oral examination. Refer to individual program sections for specific candidacy examination information.
Program Descriptions

11. Research Proposal Requirements
All MSc and PhD students must defend a written research proposal to their supervisory committee. For MSc students, this document must be submitted within 12 months after initial registration in the program. For PhD students, the research proposal forms the written component of the candidacy exam, and an approved version of the proposal must be submitted at least two weeks before the candidacy exam, with all exam requirements being fulfilled by 24 months after initial registration in the program. For additional information, refer to the individual program sections.

12. Special Registration Information
None.

13. Financial Assistance
Refer to the individual program sections.

14. Other Information
Research Integrity Day is a Research Ethics session offered in January and April of each year. All graduate students in the Cumming School of Medicine are required to attend Research Integrity Day once during their program as part of their course requirements.

- PhD students must meet this requirement prior to their candidacy exam.
- MSc students must meet this requirement prior to defending their thesis.
- MBT, MCM and MDCS students must contact the program administrator or review the program web page for further information on when they must meet this requirement.

15. Faculty Members/Research Interests
Refer to the individual program sections.

Medicine, Biochemistry and Molecular Biology MDBC

Contact Information
Location: Health Sciences Centre, Room G345B
Program number: 403.220.8306
Fax: 403.210.8109
Email address: bmbgrad@ucalgary.ca
Web page URL: http://www.ucalgary.ca/bmb

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based
Specialization:
- Bioinformatics

2. Admission Requirements
All master’s thesis and doctoral students are considered full-time. In exceptional circumstances, a part-time status may be considered and must be approved by the Graduate Program Director.

In addition to Faculties of Graduate Studies and Medicine requirements, the Department requires:

- A minimum admission grade point average over the last two years (minimum 60 units or 10 full-course equivalents) of 3.30 ("B+" on a four-point scale or equivalent).
- Normally, a four-year Bachelor of Science degree, or its equivalent.
- For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 600 (paper-based test), or 100 (Internet-based test), or a minimum IELTS score of 7.5, or a MELAB score of 84, or a minimum PTE score of 70.
- Master’s applicants are required to submit two reference letters and two corresponding reference forms. PhD applicants are required to submit three reference letters and three corresponding reference forms which follow the reference guidelines posted on the program’s prospective student website.
- A current curriculum vitae.

3. Application Deadline
Deadlines for submission of required documents for international applicants:
- April 1 for September admission
- August 1 for January admission
- December 1 for May admission
- February 1 for July admission

Deadlines for submission of required documents for domestic applicants:
- June 1 for September admission
- October 1 for January admission
- March 1 for May admission
- May 1 for July admission

Students applying to the MD/Master’s or MD/PhD program must also apply to the Medicine, Biochemistry and Molecular Biology Graduate Program. A permanent supervisory committee is required for both master’s and doctoral students in the BMB Graduate Program. A permanent supervisory committee must be in place no later than 6 months after beginning the program.

Students in the Leaders in Medicine program must have a supervisory committee constituted according to the regulations of the graduate program. In addition, these students are monitored by a Joint Liaison Committee of the Leaders in Medicine program.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

- Thesis Examination

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the program.

11. Research Proposal Requirements
See the “Medicine Programs” entry in this Calendar.

12. Special Registration Information
None.

13. Financial Assistance
All students who are accepted into the Biochemistry and Molecular Biology Graduate Program will receive a minimum stipend ($21,000 for MSc students and $23,000 for PhD students). Students are encouraged to
apply to external agencies for financial assistance from scholarships or studentships. Some of these awards provide stipends in excess of the program minimum. Information on awards can be obtained from the office of the Biochemistry and Molecular Biology Graduate Program.

14. Course Information
All Biochemistry and Molecular Biology graduate students are required to take either the Biochemistry and Molecular Biology core course Medical Science 721; or Advanced Genetics course Medical Science 641.01 as part of their course work requirement. In addition, Bioinformatics specialization students are required to take the Fundamentals of Bioinformatics course Medical Science 679).

Descriptions of courses with biochemistry and molecular biology content at the University of Calgary are included under Biochemistry (BCEM), Cellular, Molecular and Microbial Biology (CMBMB) and Medical Science (MDSC) listings elsewhere in the Calendar. Relevant courses for the Biochemistry and Molecular Biology graduate program include:

500-level Courses – Courses at the 500 level are not usually considered graduate courses. Students should register in 500-level courses only upon the recommendation of their supervisory committee.

Potential additional graduate-level courses for BMB students:
- Biochemistry 731 Protein and Metabolic Engineering
- Medical Science 604 Integrative Human Physiology
- Medical Science 605 Information Storage and Processing in Biological Systems (Computer Science 605)
- Medical Science 609.02 Genes and Development
- Medical Science 613.05 Regulation of Gene Expression in Bacteria
- Medical Science 619.01 Cellular and Molecular Neuroscience
- Medical Science 619.03 Developmental Neuroscience
- Medical Science 621.01 Basic Principles of Pharmacology
- Medical Science 631 Muscle Physiology
- Medical Science 639.01 Principles of Immunology
- Medical Science 639.02 Cellular and Molecular Immunology
- Medical Science 641.01 Advanced Genetics
- Medical Science 641.04 Genomics
- Medical Science 671 Techniques in Medical Science
- Medical Science 675 Bioinformatics Resources for the Biologist
- Medical Science 679 Fundamentals of Bioinformatics
- Medical Science 683.01 Cancer Pathology, Epidemiology and Therapy
- Medical Science 683.02 Molecular Mechanisms of Cancer
- Medical Science 683.04 Cell Biology of Cancer
- Medical Science 721 Biochemistry and Molecular Biology
- Medical Science 751.02 Cellular and Molecular Pathogenic Mechanisms of Diabetes
- Medical Science 751.09 Ion Channel Diseases

15. Other Information
For further information on graduate program application and admission, consult the department website at http://www.ucalgary.ca/bmb/.

16. Faculty Members/Research Interests
Faculty members in the Department are affiliated with one or more of the Cumming School of Medicine's Institutes and Centres. In addition, faculty research is grouped according to research streams: Molecular and Developmental Genetics, Molecular Biology of Disease, Genomics, Proteomics and Bioinformatics and Cell Signalling and Structure.

Research interests of the Groups can be found on the department website at http://www.ucalgary.ca/bmb/Research.

Medicine, Biomedical Technology MDBT

Contact Information
Location: Health Sciences Centre, Rooms G345C and G347C
Program number: 403.220.4288
Fax: 403.210.8109
Email address: mbtgrad@ucalgary.ca
Web page URL: http://www.biotech.ucalgary.ca/

1. Degrees and Specializations Offered
Master of Biomedical Technology (MBT), course-based

This interdisciplinary program combines courses in basic biomedical sciences (covering genetics, biochemistry, cell biology, physiology, immunology, microbiology, and pharmacology) with training in business aspects such as scientific, market, patent & financial analysis.

The Master of Biomedical Technology Graduate Program and the Haskayne School of Business offer a combined MBT/MBA program. Contact the Graduate Science Education Office for further information.

2. Admission Requirements
All students are considered full-time. Part-time status may be considered and must be approved by the Graduate Program Director. In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the program requires:

a) A minimum admission grade point average over the last two years (minimum 60 units or 10 full-course equivalents) of 3.30 (“B+” on a four-point scale or equivalent.

b) Normally, a four year Bachelor of Science degree in biological sciences, or its equivalent.

c) For students required to provide proof of proficiency in English, a TOEFL score of 600 (paper-based test), or 100 (Internet-based), or a minimum IELTS score of 7.5, or a MELAB test score of 84, or a minimum PTE score of 70 is required.

d) Two reference letters, which follow the reference guidelines posted on the program’s prospective student website, and two corresponding reference forms.

e) A current curriculum vitae.

f) A Vision Statement (no more than one page in length) outlining career goals, and how the MBT program will help to achieve them. 

3. Application Deadline
Deadline for the submission of completed applications for September admission: June 1 for Canadian citizens and permanent residents, and May 1 for applicants attending on a study visa.

4. Advanced Credit
See "Medicine Programs". In consultation with the Graduate Program Director, advanced credit may be requested in accordance with Faculty of Graduate Studies regulations.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the program requires all MBT students to successfully complete 33 units (5.5 full-course equivalents):

1. Medical Science 672: Biotechnology Business Aspects (3 units - runs over Fall and Winter)

2. Medical Science 673: Biomedical Technology Careers (3 units - runs over Fall and Winter)

3-4. Medical Science 674.01: Physiological and Pharmacological Aspects of Therapeutics Development (6 units - runs over Fall and Winter)

5-6. Medical Science 674.02: Molecular, Cellular and Immunological Biotechnology (6 units - runs over Fall and Winter)

7. Medical Science 669: Clinical Trials and Bio-Manufacturing (3 units - runs over Fall and Winter)

8. Medical Science 678: Project in Biomedical Technology (3 units - runs over Fall and Winter)

9. Medical Science 668: Biotechnology Commercialization (3 units - runs over Fall and Winter)

10-11. Medical Science 670: Practicum in Biomedical Technology (6 units - runs over Spring and Summer)

It is required that MDBT students will successfully complete all Fall and Winter courses prior to beginning their practi-
1. Degrees and Specializations Offered

- Doctor of Philosophy (PhD)
- Master of Science (MSc), thesis-based

Faculty members within the MDCV program hold academic appointments in Biochemistry and Molecular Biology, Biological Sciences, Medicine, or Physiology & Pharmacology. Faculty members are typically affiliated with the Libin Cardiovascular Institute, but may also be members of other research institutes within the Cumming School of Medicine.

2. Admission Requirements

All MSc and PhD students are considered full-time. In exceptional circumstances part-time status may be considered and must be approved by the Graduate Program Director. In addition to requirements outlined by the Faculty of Graduate Studies and Cumming School of Medicine, applicants to the MDCV program will be expected to meet the following criteria:

- A minimum admission grade point average over the last two years (minimum 60 units or 10 full-course equivalents) of 3.30 ("B+" on a four-point scale or equivalent).
- Applicants will have completed a four year Bachelor of Science degree, or its equivalent.
- For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 600 (paper-based test), or 100 (Internet-based test), a minimum IELTS score of 7.0, or a minimum MELAB score of 84, or a minimum PTE score of 70.
- Applicants to the MSc program are required to submit two reference letters and a correspondence reference forms. Applicants to the doctoral program are required to submit three reference letters, and three corresponding reference forms. References must follow the reference guidelines posted on the MDCV program’s website for prospective students.

3. Application Deadline

Deadlines for submission of required documents for international applicants:
- April 1 for September admission
- August 1 for January admission
- December 1 for May admission
- February 1 for July admission

Deadlines for submission of required documents for domestic applicants:
- June 1 for September admission
- October 1 for January admission
- March 1 for May admission
- May 1 for July admission

4. Advanced Credit

Advanced credit for previous course work is usually not given. For additional information, please see “Medicine Programs”.

5. Program/Course Requirements

In addition to the requirements described by the Faculty of Graduate Studies and Cumming School of Medicine, the MDCV program requires that:

- The minimum academic course requirement is normally 6 units (1.0 full-course equivalent) for the MSc and an additional 3 units (0.5 full-course equivalent) for the PhD program. At least one course for the MSc program and two courses for the PhD program should be from the list of recommended MDCV graduate courses.
- Students holding a completed BSc degree entering the PhD program are required to successfully complete a minimum of 9 units (1.5 full-course equivalents).
- Students holding a completed MSc degree in the same area of study entering the PhD program are required to complete a minimum of 9 units (1.5 full-course equivalents) unless otherwise agreed by the student’s supervisory committee.
- Students attending the seminar and journal club series organized by the student’s affiliated research institute (e.g. Libin Cardiovascular Institute, Hotchkiss Brain Institute, etc.) and arrange to present at least one research-in-progress seminar annually. Students are also required to participate in the monthly MDCV student seminar program, which will include an annual presentation.

The amount of course work to be undertaken is determined by the student’s supervisory committee; however, it also must meet the minimum requirements of the program.

6. Additional Requirements

- Students transferring from the MSc program to the PhD program are required to complete a minimum of one additional 3 units (0.5 full-course equivalent).
- Students holding a completed MSc degree in an unrelated field of studies entering the PhD program are required to complete a minimum of 9 units (1.5 full-course equivalents) unless otherwise agreed by the student’s supervisory committee.

7. Credit for Undergraduate Courses

Credit may be given for courses taken below the 600 level. At least one half of a graduate student’s course work must be at the 600 level or higher. Only under unusual circumstances and upon the recommendation of the supervisory committee and approval by the Graduate Director may credit be received for courses numbered 500–599.

8. Time Limit

For additional information, please see “Medicine Programs”.

9. Supervisory Assignments

The selection of a graduate supervisor must be by mutual agreement between the student and the faculty member concerned and approved by the MDCV Graduate Direc-
10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

- **Thesis Examination**
  - Scheduling of the Examination
  - All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.
  - Composition of the Committee
  - The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
See the “Medicine Programs” entry in this Calendar.

12. Special Registration Information
None.

13. Financial Assistance
All students who are accepted into the Cardiovascular and Respiratory Science Graduate Program will receive a minimum stipend as reflected by current national Tri-Council graduate stipend awards. Students are encouraged to apply to external agencies for financial support and studentship awards. Students in the MDCP program are also eligible to apply for University of Calgary Scholarships (see Awards and Financial Assistance section of this Calendar). Possible sources of financial support are listed on the Faculty of Graduate Studies website: http://grad.ucalgary.ca/awards.

Students in the program are eligible to receive a Tuition Reimbursement to assist them with tuition costs while paying full program fees. The amount of the scholarship varies from year to year, and is dependent on available funds.

14. Other Information
For information on individual course requirements, please visit the graduate program’s web page at http://www.ucalgary.ca/crs_gse/.

Detailed course descriptions are available at http://www.ucalgary.ca/pubs/calendar/ and timetabling information for individual courses can be found through the MyUofC portal.

15. Faculty Members/Research Interests
Faculty members and their research interests may be found at http://www.ucalgary.ca/crs_gse/Supervision.

**Medicine, Community Health Sciences MDCH**

**Contact Information**
- Location: Health Sciences Centre, Room 345
- Program number: 403.220.4288/403.210.6689
- Fax: 403.210.8109
- Email address: chsgrad@ucalgary.ca
- Web page URL: http://www.ucalgary.ca/communityhealthsciences

The Department of Community Health Sciences offers a number of degrees and specializations. Details on the course-based master’s degrees are presented first, followed by the thesis-based degrees. Further information on degree offerings can be obtained from the Department’s website.

**Course-Based Degrees**

1. **Degrees and Specializations Offered**
   - a) Master of Community Medicine (MCM) a course-based degree available only to physicians registered in the Public Health and Preventive Medicine Residency Training Program.
   - b) Master of Disability and Community Studies (MDCS), a course-based degree examines the intersection between community, disability, chronic illness, and marginalizing conditions within a social justice framework. The goal is to generate research, leadership, capacity, innovation, and partnerships. The graduate program attracts professionals across disciplines and sectors. The MDCS is offered in an alternate delivery format (combined face-to-face and online) and has a differential tuition fee.

2. **Admission Requirements**
   - a) MCM
     - Currently enrolled in the Royal College Residency Training Program in Public Health and Preventive Medicine at University of Calgary
     - Hold an MD or equivalent degree
     - Meet the admission requirements of the Department of Community Health Sciences
   - b) MDCS
     - Two letters of reference

3. **Application Deadline**
   - a) MCM - January 31 for September admission
   - b) MDCS - January 31 for September admission

4. **Advanced Credit**
   - a) MCM - Applicable graduate courses may be considered.
   - b) Completed at a satisfactory level (minimum “B+”) and within three years of admission to the graduate program, may be credited toward a student’s degree requirements.

5. **Program/Course Requirements**
   - In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Department requires:
     - a) MCM - A minimum of 36 units (6.0 full-course equivalents), in combination with the Public Health and Preventive Medicine Residency Program.
     - b) MDCS - A minimum of 36 units (6.0 full-course equivalents).

   Course descriptions and detailed outlines of courses offered by the Department of Community Health Sciences are found on the departmental website at http://www.ucalgary.ca/communityhealthsciences/. They are also listed in the Courses of Instruction section of this Calendar.

6. **Additional Requirements**
None.

7. **Credit for Undergraduate Courses**
   - The Department does not normally give credit for undergraduate courses.

8. **Time Limit**
   - a) MCM - Expected completion time is within 6 years (maximum six years).
   - b) MDCS - Expected completion time is 3 years (maximum six years).

9. **Supervisory Assignments**
   - a) MCM - A Supervisor must be named as part of the admission process. The Supervisory Committee must be named prior to planning the Community Health Sciences 602: Practicum in Public Health and Preventive Medicine, usually in the second term of the second year of the student’s program.
   - b) MDCS - A faculty member is assigned as a supervisor prior to the final project; supervisory committee is not required.

10. **Required Examinations**
    - a) MCM - A final comprehensive written and oral examination with respect to the course content, plus a practicum evaluation.
    - b) MDCS - A capstone project with a public presentation and paper will be required for completion of the degree. For further details, please see the department website.

11. **Research Proposal Requirements**
    - a) MCM - A formal research proposal is not necessary, however a practicum proposal is required.
    - b) MDCS – Not applicable.

12. **Special Registration Information**
None.
13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, please see the Awards and Financial Assistance section of this Calendar.

14. Other Information
MDCS - Students are encouraged to produce an article for publication.

15. Faculty Members/Research Interests
Current faculty and their areas of research can be found at: http://www.ucalgary.ca/communityhealthsciences/.

Thesis-Based Degrees

1. Degrees and Specializations Offered
   a) Doctor of Philosophy (PhD)
   b) Master of Science (MSc)

Specializations:
- Biostatistics
- Community Rehabilitation and Disability Studies
- Epidemiology
- Healthcare Epidemiology
- Clinical Epidemiology
- Health Economics
- Health Services Research
- Medical Education
- Population/Public Health

Within the thesis-based programs, the student must select a specialization from the list above.

Descriptions of each specialization and its requirements are found on the Departmental website at: http://www.ucalgary.ca/communityhealthsciences/.

2. Admission Requirements
In addition to Faculty requirements, the Department requires:
   a) Minimum admission grade point average of 3.30 on a four-point scale over the last two full years or equivalent.
   b) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 600 (paper-based), or 100 (Internet-based test), an IELTS score of 7.0, a MELAB score of 84, or PTE score of 70.
   c) A statement outlining the applicant’s interest and reasons for choosing the program.
   d) A letter from a faculty member of our Department indicating interest in supervising the applicant.
   e) Work and/or research experience in the health system, community rehabilitation and/or disability studies is highly recommended.
   f) Two letters of reference.

3. Application Deadline
The deadline for the submission of complete applications is January 31 for September admission.

Students applying to the MD/MSc or MD/PhD program must apply individually to each program and complete a supplementary application for the Leaders in Medicine Program.

4. Advanced Credit
Open Studies Students may take courses before applying for admission to a graduate program. However, these students are not eligible to enrol in the Block Week course: Introduction to Community Health Sciences (Community Health Sciences 600) and three core courses, Essentials of Biostatistics (Community Health Sciences 610), Fundamentals of Epidemiology (Community Health Sciences 640) and Health Research Methods (Community Health Sciences 681). A maximum of 6 units (1.0 full-course equivalent), completed at a satisfactory level (minimum *B+*) and within three years of admission to the graduate program, may be credited toward a student’s degree requirements. Completing courses does not guarantee admission into the program.

5. Program/Course Requirements
All students must complete the Block Week course: Community Health Sciences 600: Introduction to Community Health Sciences. All students, with the exception of the Community Rehabilitation and Disability Studies and the Medical Education Specialization, must also complete the Block Week course: Community Health Sciences 681: “Determinants of Health”. The additional program requirements are as follows:

Master of Science
A minimum of 18 units (3.0 full-course equivalents) for all specializations (with the exception of 15 units (2.5 full-course equivalents) in Medical Education). See departmental website for specific course requirements for each MSc specialization.

Doctor of Philosophy
A minimum of 12 units (2.0 full-course equivalents) for all specializations (with the exception of 9 units (1.5 full-course equivalents) in Medical Education), in addition to specific MSc courses if not completed previously. See departmental website for specific course requirements for each PhD specialization.

Course descriptions, schedules, and outlines are provided on the departmental website at: http://www.ucalgary.ca/communityhealthsciences/current. Some courses are only offered in block weeks.

6. Additional Requirements
Students are required to comply with Tri-Council Research Ethics training. Attendance at Research Integrity Day is required once during a student’s program.

All students attend the departmental seminars offered during the academic year.

7. Credit for Undergraduate Courses
The Department does not normally give credit for undergraduate courses.

8. Time Limit
Expected completion time for the MSc program is two to three years (maximum four years) and for the PhD program is four to five years (maximum six years). Time limits for MSc/PhD students in the Leaders in Medicine program are slightly different. Expected completion time for the MD/MSc program is four to five years (maximum six years) and for the MD/PhD program is six to seven years (maximum eight years).

9. Supervisory Assignments
Applicants must secure a supervisor prior to applying for admission. The Supervisor, in consultation with the student and the Graduate Program Director, recommends the Supervisory Committee within 3-6 months of registration. The student and Supervisor sign and submit an Appointment of Supervisor and/or Supervisory Committee form.

Students in the Leaders in Medicine Program must also have a Supervisory Committee as in above regulations. Both MD/MSc and MD/PhD students will also be evaluated and advised by a Joint Liaison Committee composed of the Associate Dean (Graduate Sciences Education), Associate Dean (Undergraduate Medical Education), and the Associate Dean (Research) of the Cumming School of Medicine.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

Candidacy
For the PhD candidacy exam the student and his/her Supervisory Committee establish a concept map outlining the student’s study area and an accompanying reading list. The Supervisory Committee develops three exam questions that meet the competency requirements as outlined by the department. These questions are derived from the concept map and reading list developed for each student. Questions on the research proposal are not included. The student has three weeks to prepare written solutions to the three questions. The oral examination follows seven days later.

Thesis Examination
In both MSc and PhD programs final thesis oral examinations are open.

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
The proposal is usually 12 to 15 single-spaced, typed pages. Appendices are permitted and should include the research instrument and, if the research involves agencies or institutions outside of the Department, their written permission to conduct the research. Doctoral students should include a complete literature review as an appendix. See departmental website at http://www.ucalgary.ca/communityhealthsciences/current/.
2. Admission Requirements
In addition to the Faculty of Graduate Studies regulations, the Cumming School of Medicine graduate programs require a minimum admission grade point average of 3.30 (on the University of Calgary four-point system; equivalent to a “B+”) based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents).

• BSc degree or equivalent
• MSc degree or, relevant master's degree, recognized by the Faculty of Graduate Studies, or transfer from MSc program, or, in exceptional cases, BSc degree or equivalent (3.70 GPA recommended).

a) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 600 (paper-based), or 100 (Internet-based test), or an IELTS score of 7.5, or a MELAB score of 84 or a PTE score of 70.
b) Two references from individuals who can attest to the applicant's academic background. Each referee to provide a reference form and accompanying letter on institutional letterhead.
c) Student must procure a supervisor within the Gastrointestinal Sciences program, prior to admission.
d) Endorsement by the Chairperson, Gastrointestinal Sciences Education Committee (GSEC) that the applicant is acceptable and that adequate supervision of the proposed program is available.
e) Meeting the minimum admission criteria does not guarantee acceptance into the program. Applications are ranked according to academic excellence, prior research experience and commitment to the study of gastrointestinal sciences.

3. Application Deadline
Deadlines for submission of required documents for international applicants:
- April 1 for September admission
- August 1 for January admission
- December 1 for May admission
- February 1 for July admission

Deadlines for submission of required documents for domestic applicants:
- June 1 for September admission
- October 1 for January admission
- March 1 for May admission
- May 1 for July admission

4. Advanced Credit
See “Medical Programs”.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Department requires:

a) The completion of a minimum of 6 units (1.0 full-course equivalent) for the Master of Science. For the degree of Doctor of Philosophy, the completion of a minimum of 3 units (0.5 full-course equivalent) for those entering with a master’s degree in a related subject. For those entering with a Bachelor of Science or equivalent, a minimum of 9 units (1.5 full-course equivalents) are required. Normally, one of these courses is Medical Science 637.01. Exceptions, however, can be approved by the Program Director on the recommendation of the supervisor or the graduate education committee.
b) A supervisory committee set up within three months of initial registration.
c) A written research proposal presented to the supervisory committee within twelve months of initial registration.
d) A seminar presentation once a year. Exceptions require recommendation by the supervisory committee and approval of the Graduate Program Director.
e) Doctoral students must pass an oral candidacy examination within 24 months in the program. If transferring from MSc to PhD within 30 months of initial registration in the program. The exam requires submission of an approved version of the doctoral research proposal and specific topics of study to the examining committee no less than 2 weeks prior to the exam. Specific details of the exam format can be found at http://grad.ucalgary.ca/current/managing-my-program/examinations.
f) Regular, mandatory attendance at the G.I. Sciences weekly seminar program.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
No credit given.

8. Time Limit
Expected completion time is two and a half years for the master's program and five years for the doctoral program. See “Medical Programs” for maximum completion times.

9. Supervisory Assignments
See “Medical Programs”.

The various laboratories in the group assess students, and the laboratory that has a need/interest in the student will offer the student a placement. Student is responsible for finding a supervisor prior to admission.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student's research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.
Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
See the “Medicine Programs” entry in this Calendar.

12. Special Registration Information
Exceptional students registered for the MSc degree may request to change their registration status to that of a PhD candidate within 24 months of admission to the program. Within 18 months of initial registration, the student will discuss with the supervisor his/her intent to transfer from the MSc to the PhD program. Students are only eligible for transfer if at least two graduate courses have been completed. A revised draft research proposal should be presented to the supervisory committee before the transfer has occurred. Transfers will require unanimous approval from each member of the supervisory committee and recommendation to the program director. The student’s academic record and approval from the supervisory committee will be considered in making a decision to recommend a transfer into a PhD program.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see http://grad.ucalgary.ca/awards.

14. Other Information
Contributions to journals, relevant journal clubs and/or seminars are an expectation. Please visit the Department of Gastrointestinal Sciences Website at http://www.ucalgary.ca/gisgp/grad_studies. for additional information.

15. Faculty Members/Research Interests
Current faculty research interests and additional information of the MDG1 graduate program can be found at http://www.ucalgary.ca/girg/grad_studies.

100 Medicine Programs

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based
Faculty members are affiliated with the Cumming School of Medicine and the Faculties of Science and Veterinary Medicine.
The Immunology Graduate Program is offered in collaboration with the above faculties, and the curriculum has been designed for students with undergraduate or MSc degrees in those faculties. Background experience, qualifications, and areas of interest of applicants will be taken into account at the time of admission.

Students in the MSc and PhD degree programs are normally considered full-time.

2. Admission Requirements
In addition to the Faculty of Graduate Studies regulations, the Cumming School of Medicine graduate programs require a minimum admission grade point average of 3.30 (on the University of Calgary four-point system; equivalent to a “B+”) based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents) and master’s course work if applicable.

Master of Science
- BSc degree or equivalent

Doctor of Philosophy
- MSc degree, or relevant master’s degree, recognized by the Faculty of Graduate Studies, or transfer from MSc program or, in exceptional cases, BSc degree or equivalent.

a) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 600 (written), or 100 (Internet-based), or a minimum IELTS score of 7.0, or a minimum MELAB score of 84, or a minimum PTE score of 70.
b) Two references from individuals that can attest to the applicant’s academic background. Each referee to provide a reference form and accompanying letter on institutional letterhead.
c) Endorsement by the Chairperson, Immunology Graduate Education Committee (IGEC) that the applicant is acceptable and that adequate supervision of the proposed program is available.
d) An undergraduate course in immunology (Cellular, Molecular Microbial Biology 527 or equivalent). It will be possible for a student to take Medical Science 755.01 during the first year of their program if he/she does not have an appropriate prerequisite course.
e) Meeting the minimum admission criteria above does not guarantee acceptance into the program. Applications will be ranked according to academic excellence, prior research experience and commitment to the study of immunology. Students must also have confirmed faculty member willing to supervise his or her studies.

3. Application Deadline
Deadlines for submission of required documents for international applicants:
- April 1 for September admission
- August 1 for January admission
- December 1 for May admission
- February 1 for July admission

Deadlines for submission of required documents for domestic applicants:
- June 1 for September admission
- October 1 for January admission
- March 1 for May admission
- May 1 for July admission

4. Advanced Credit
Applicants may request to receive credit for previously completed courses at the time of application. Where credit is to be given, it will be noted in the letter to the Faculty of Graduate Studies recommending the student’s admission.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Immunology Graduate Program requires:
a) Completion of a minimum of 6 units (1.0 full-course equivalent) for an MSc and 9 units (1.5 full-course equivalents) for a PhD. Medical Science 639.02 or 639.04 is compulsory for all MSc students. Both courses are compulsory for PhD students. Optional courses for either degree can be drawn from any 600 level courses offered by the Cumming School of Medicine in areas that are relevant to the student’s research proposal, and approved by the supervisor and supervisory committee. Courses taken while a student is an Open Study student cannot be used as credits in either the MSc or PhD program.
b) Participation in the seminar program of the Immunology Research Group (IRG). This will entail the annual presentation of a 30-50 minute Research in Progress seminar, attendance at the weekly seminars and journal club.
c) Presentation on the thesis project to the IRG around the time of the defence.

6. Additional Requirements
Attendance at a Research Integrity Day workshop is required for all graduate students. MSc students must attend prior to defending their thesis and PhD students must attend prior to their candidacy oral examination.

Contributions to journals, relevant journal clubs and/or seminars are desirable.

7. Credit for Undergraduate Courses
Credit will not be given for courses taken below the 600-level.

8. Time Limit
Expected completion time is 2.5 years for an MSc and 5 years for a PhD. See “Medicine Programs” for maximum completion times.

9. Supervisory Assignments
Individuals intending to apply for admission to the Immunology Graduate Program are encouraged to contact faculty members directly regarding the possibility of acting as a supervisor. If a potential supervisor has not been identified at the time of application, applications that meet or exceed the minimum criteria will be circulated to potential supervisors based on the indicated areas of interest (declared by candidates in the application). A supervisor and a source of funding (minimum of $19,000 per annum) must be identified for a student to be admitted to the Immunology Graduate Program.
The supervisor, in consultation with the student, selects a Supervisory Committee. For MSc students, the Supervisory Committee consists of the supervisor plus 2 faculty members, at least one of whom must have completed the supervision of an MSc student. For PhD students, the Supervisory Committee consists of the supervisor plus a minimum of 2 faculty members. At least two members should be from the IRG, and at least two members must have completed the supervision of a doctoral graduate.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

**Thesis Examination**

**Scheduling of the Examination**

All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

**Composition of the Committee**

The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
See the “Medicine Programs” entry in this Calendar.

12. Special Registration Information

Exceptional students registered for the MSc degree may request to change their registration status to that of a PhD candidate within 24 months of admission to the program. Within 18 months of first registration, the student will discuss with the supervisor his/her intent to transfer from the MSc to the PhD program. Students are only eligible for transfer if at least two graduate courses have been completed. A revised draft research proposal should be presented to the supervisory committee before the transfer has occurred. Transfers will require unanimous approval from each member of the supervisory committee and recommendation to the Chairperson, IGEC. The student’s academic record and approval from the supervisory committee will be considered in making a decision to recommend a transfer into a PhD program. If the transfer is approved, the Chairperson, IGEC will send a written recommendation to the Dean of the Faculty of Graduate Studies.

The student will be required to submit a revised research proposal and complete the course requirements of the doctoral program. Student must meet the 30-month deadline for the candidacy oral examination.

14. Other Information

The Immunology Graduate Program offers the following four courses:

- Medical Science 639.01: Principles of Immunology
- Medical Science 639.02: Cellular and Molecular Immunology
- Medical Science 639.04: Inflammation

Information regarding the courses can be obtained at http://www.ucalgary.ca/irg/education.

Detailed course descriptions are available at http://www.ucalgary.ca/pubs/calendar/ and timetabling information can be found through the MyUofC portal.

15. Faculty Members/Research Interests

The research interests of current IRG faculty members can be found at http://www.ucalgary.ca/irg/faculty.

**Medicine, Microbiology and Infectious Diseases MDMI**

**Contact Information**

Location: Health Sciences Centre, Room G329

Program number: 403.220.2558

Fax: 403.210.8109

Email address: midgrad@ucalgary.ca

Web page URL: http://www.ucalgary.ca/microinfect/

1. Degrees and Specializations Offered

Doctor of Philosophy (PhD)

Master of Science (MSc) thesis-based

2. Admission Requirements

In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Department requires:

a) A minimum admission grade point average over the last two years (60 units or 10 full-course equivalents) of 3.30 (“B+”) on a four-point scale or equivalent.

b) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based), or an IELTS score of 7.0, or a MELAB score of 82 or a PTE score of 64.

c) Two reference letters.

Applicants who do not meet the above requirements will be considered only in exceptional circumstances.

3. Application Deadline

Deadlines for submission of required documents:

- Domestic applicants:
  - October 1 for January admission
  - March 1 for July admission
  - May 1 for September admission
- International applicants:
  - October 1 for January admission
  - February 1 for March admission
  - May 1 for July admission

4. Advanced Credit

See “Medicine Programs”.

5. Program/Course Requirements

In addition to Faculty requirements, the Department requires:

**Master of Science**

a) The completion of a minimum of 6 units (1.0 full-course equivalent).

b) The presentation of an annual seminar in the applicable research group.

**Doctor of Philosophy**

a) The completion of a minimum of 9 units (1.5 full-course equivalents).

b) The presentation of an annual seminar in the applicable research group.

c) The presentation of a seminar on the results of his/her thesis research.

6. Additional Requirements

None.

7. Credit for Undergraduate Courses

No more than half a student’s program may be done at the 500 level.

8. Time Limit

Expected completion time is two years for students in the Master of Science program and four years for doctoral students. Maximum completion time is four years for the Master of Science program and six years for the doctoral program.

Leaders in Medicine - Expected completion time for the MD/Master’s program is four to five years, and for the MD/PhD program, six to seven years. The maximum completion time is six years for the MD/Master’s, and eight years for the MD/PhD program.
9. Supervisory Assignments
Students may interview several potential supervisors. The decision to establish a relationship is based upon mutual agreement between the student and the supervisor. Supervisory committees are established based upon the needs of the student and the expertise of the committee members, following discussions between the student and the supervisor.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
See the “Medicine Programs” entry in this Calendar.

12. Special Registration Information
None.

13. Financial Assistance
The general policy of the Microbiology and Infectious Diseases Graduate Program is that all students shall be full-time and that all students will receive financial support for the entire period of their program.

14. Other Information
Courses in Microbiology and Infectious Diseases are offered under the auspices of the Department of Medical Science and are listed in this Calendar under that heading.

15. Faculty Members/Research Interests
The research interests of the faculty can be found at http://www.ucalgary.ca/microinfect/Our_Grad_Program.

Medicine, Neuroscience MDNS
Contact Information
Location: Health Sciences Centre, Room G329
Program number: 403.220.2558
Fax: 403.210.8109
Email address: neurosci@ucalgary.ca
Web page URL:
http://www.ucalgary.ca/neuroscience

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based

2. Admission Requirements
In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Department requires:

a) A minimum admission grade point average over the last two years (60 units or 10 full-course equivalents) of 3.30 ("B+") on a four-point scale or equivalent.

b) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based), or 92 (Internet-based test), or an IELTS score of 7.0, or MELAB score of 82, or a PTE score of 64.

c) Two reference letters.

3. Application Deadline
Deadlines for submission of complete applications for students with Canadian and U.S. transcripts:

- June 1 for September admission
- October 1 for January admission
- March 1 for May admission
- May 1 for July admission
- Deadlines for submission of complete applications for international students:
- April 1 for September admission
- August 1 for January admission
- December 1 for May admission
- February 1 for July admission

4. Advanced Credit
Not given.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Department requires:

Master of Science
a) Satisfactory completion of Cellular, Molecular and Developmental Neuroscience (Medical Science 619.01), and Systems Neuroscience and Neuropathology (Medical Science 619.02) in the first year.
b) Participation in the HBI seminar program and a journal club.

Doctor of Philosophy
a) Satisfactory completion of Cellular, Molecular and Developmental Neuroscience (Medical Science 619.01) and Systems Neuroscience and Neuropathology (Medical Science 619.02).
b) Satisfactory completion of another graduate-level course in an area that is pertinent to the student’s thesis project.
c) Participation in the HBI seminar program and a journal club.

6. Additional Requirements
As determined by agreement with Supervisor and Supervisory Committee.

7. Credit for Undergraduate Courses
Not given.

8. Time Limit
Expected completion time for students in a master’s program is two years and four years for a doctoral program. See “Medicine Programs” for maximum completion times.

9. Supervisory Assignments
Supervisors must be identified and committed to support the student for the first two years, before admission is recommended. The decision should be by mutual agreement between the prospective student and the faculty member, and approved by the Graduate Co-ordinator. For relevant criteria and responsibilities of supervisors, see the Policies and Procedures of the Department of Neuroscience and the Academic Regulations section in this calendar. A Supervisory Committee must be struck within the first three months of initial registration. The method of striking, composition and functions of the Supervisory Committee are detailed in the Policies and Procedures.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
See the “Medicine Programs” entry in this Calendar.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance is available to qualified students through supervisor operating grants or competitive awards (a minimum stipend of $20,000 is required). For information on awards, see the Awards and Financial Assistance section of this Calendar, the Department of Neuroscience, the Cumming School of Medicine Research Office and the education section of the Hotchkiss Brain Institute at http://www.hbi.ucalgary.ca/education.

14. Other Information
Rather than study in “classical” disciplines such as anatomy or physiology, students are placed with a supervisor who is a member of a multidisciplinary research group. This multidisciplinary scheme greatly facilitates the development of individual research programs, especially with respect to collaborations involving different techniques and model systems. Students are encouraged to take advantage of such collaborations to enhance the scope and quality of their thesis research.

The purpose of the graduate program is to educate independent, reliable, and competent research neuroscientists. Although many holders of Master of Science and Doctor of Philosophy degrees find employment that does not directly involve research, having such degrees implies that an individual is able to pursue a research problem to a meaningful conclusion. The main role of the
program is to provide a favourable environment both for creative research and for the acquisition of a basic body of knowledge in the neurosciences. The Master of Science and doctoral degrees are distinguished both in the degree of originality expected in the candidate’s research, and in the normal course load undertaken. Members of the Department of Neuroscience, other than the supervisor, have an important role to play in each student’s training.

Further information on applications and admission, and brochures describing the research interests of individual Department members may be obtained from the Graduate Program Administrator, Neuroscience Graduate Program, Graduate Science Education, Cumming School of Medicine, University of Calgary, Room G329, Health Sciences Centre, 3330 Hospital Drive NW, Calgary, Alberta T2N 4N1. Faculty research interests can also be accessed on the Department of Neuroscience website at http://www.ucalgary.ca/neuroscience or the Hotchkiss Brain Institute website at http://www.hbi.ucalgary.ca/index.php.

Courses in Neuroscience are offered under the auspices of the Department of Medical Science and are listed in this Calendar in the Courses of Instruction section.

15. Faculty Members/Research Interests

The research interests of the department can be found at either the Department of Neuroscience website at http://www.ucalgary.ca/neuroscience or the HBI website at http://www.hbi.ucalgary.ca/member.

Medicine, Medical Science MDSC

Contact Information

Location: Health Sciences Centre, Room G347A
Program number: 403.220.6852
Fax: 403.210.8109
Email address: medgrad@ucalgary.ca
Web page URL: http://www.ucalgary.ca/mdsc

1. Degrees and Specializations Offered

Doctor of Philosophy (PhD)

Master of Science (MSc), thesis-based

Students in the MSc and PhD degree programs are normally considered full-time.

Specializations:

- Cancer Biology
- Critical Care Medicine
- Mountain Medicine and High Altitude Physiology
- Joint Injury and Arthritis
- Biomechanics
- Biomedical Ethics
- Molecular & Medical Genetics
- Pathologists’ Assistant
- Physiology
- Surgery (In co-operation with the Department of Surgery)
- Medical Imaging (Interdisciplinary)*

*See the Calendar section on Interdisciplinary Specializations for further information.

2. Admission Requirements

In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Medical Science Graduate Program requires the following:

a) A minimum admission grade point average of 3.30 (on the University of Calgary four-point system; equivalent to a “B+”) based on the last two years of the undergraduate degree consisting of a minimum of 60 units (10 full-course equivalents).

b) For applicants required to provide proof of proficiency in the English language, a minimum TOEFL score of 600 (paper-based test), 100 (Internet-based test), or a minimum IELTS score of 7.0, or a minimum MELAB score of 84, specializations may have additional requirements.

c) Two reference letters and reference forms. For admission to the Master of Science program with a specialization in surgery, prior admission to the surgery residency program is required. Students will normally apply to the Master of Science program in the third year of the surgery residency program. For admission to the Surgeon Scientist Program prior admission to the Medical Science Graduate Program is required.

d) For admission to the Master of Science program, students must have reviewed the student’s research, must have identified a supervisor, and must have additional requirements.

e) Two reference letters and reference forms. For admission to the Master of Science program, students must have reviewed the student’s research, must have identified a supervisor, and must have additional requirements.

3. Application Deadline

Deadlines for submission of required documents for international applicants:

- April 1 for September admission
- August 1 for January admission
- December 1 for May admission
- February 1 for July admission

Deadlines for submission of required documents for domestic applicants:

- June 1 for September admission
- October 1 for January admission
- March 1 for May admission
- May 1 for July admission

4. Advanced Credit

Advanced credit is normally not given in a thesis-based program. See “Medical Programs”.

5. Program/Course Requirements

In addition to the Faculty of Graduate Studies and Cumming School of Medicine requirements, the Department requires:

Master of Science

a) A BSc degree or equivalent.

b) A minimum of 6 units at the graduate level (1.0 full-course equivalent).

c) Regular attendance and presentation at a journal club and a final seminar which precedes the thesis defence, although specific training programs may have additional requirements.

Doctor of Philosophy

a) A MSc degree, or relevant master’s degree, recognized by the Faculty of Graduate Studies, or transfer from MSc program, or, in exceptional cases, BSc degree or equivalent.

b) A minimum of 9 units at the graduate level (1.5 full-course equivalents).

c) Regular attendance and presentation at a journal club and a final seminar which precedes the thesis defence, although specific training programs may have additional requirements.

6. Additional Requirements

Attendance at a half-day Research Integrity Day seminar during their program. Students must attend this seminar before they are approved to defend their thesis. The seminar is held only twice per year, once in January and again in April. Contact the Graduate Program Administrator for more information.

7. Credit for Undergraduate Courses

Graduate credit may be given for 500-level courses. No more than 3 units (0.5 full-course equivalent) of credit will be allowed in a 6 units (1.0 full-course equivalent) (e.g., if a 500-level full-course is taken, only 3 units (0.5 full-course equivalent) credit is allowed toward the completion of program course requirements).

8. Time Limit

Average completion time for students in the MSc program is two and a half years, four and a half years in the PhD program. The MSc program must be completed in four years and the PhD program in six years.

Leaders in Medicine - Expected completion time is four to five years in the MD/MSc program, six to seven years in the MD/PhD program.

See “Medical Programs” for maximum completion times.

9. Supervisory Assignments

Students in thesis-based programs must have identified a supervisor at the time of admission. In consultation with their supervisors, students select a supervisory committee consisting of their supervisor plus two other faculty members (MSc) or three other faculty members (PhD) within three months of the appointment of the Supervisor. The Graduate Program Director must approve the composition of the supervisory committee. Specializations may have additional requirements.

10. Required Examinations

In addition to the Faculty of Graduate Studies requirements, the program requires:

Thesis Examination

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.
11. Research Proposal Requirements
See the “Medicine Programs” entry in this Calendar.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance must be provided by the supervisor, except for MD holders also enrolled in a clinical training program. For information on awards, see the Awards and Financial Assistance section of this calendar. Information and deadlines for Medical Science Faculty of Graduate Studies’ award competitions will be provided throughout the year.

14. Other Information
None.

15. Faculty Members/Research Interests
Information about institutes in the Cumming School of Medicine can be found at http://medicine.ucalgary.ca/research/institutes.

Military and Strategic Studies CMSS

Contact Information
Location: 8th floor, Social Sciences Building
Program number: 403.220.4038
Fax: 403.282.0594
Email address: cmss@ucalgary.ca
Web page URL: http://www.cmss.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Strategic Studies (MSS), course-based (including the co-operative education option) or thesis-based

2. Admission Requirements
In addition to the requirements of the Faculties of Graduate Studies and Arts, CMSS requires:

Master of Strategic Studies (MSS), course-based and thesis-based
a) A bachelor’s degree with a grade point average of at least 3.40 on a four-point scale.
b) A writing sample.
c) An agreement to supervise by a potential supervisor from applicants to the thesis-based program.
d) A research proposal from applicants to the thesis-based program.

Doctor of Philosophy
Applicants will be admitted only if the CMSS Graduate Committee is satisfied that adequate supervision is likely to be available for the duration of their studies. Successful applicants should be aware that admission to the program does not imply a Centre commitment to provide supervision for all research interests they may have. Students are also advised to consult the Academic Regulations section in this calendar.

Prerequisites for admission to the PhD program are:
a) A completed master’s degree.
b) A GPA of 3.70 on a four-point scale over all completed graduate courses in the master’s program; 3.40 in the undergraduate program over the last 60 units (10 full-course equivalents) or two years of study.
c) A completed application to the Centre, along with supporting documentation.
d) A detailed statement of the proposed thesis research.
e) A representative piece of written work, normally a master’s thesis chapter or major research paper.
f) The Centre requires a tentative agreement from a faculty member to supervise, so students need to contact potential supervisors at the beginning of the application process.
g) All students whose native language is other than English are required to pass the TOEFL test with a minimum score of 600 (written), or 92 (Internet-based), or 7.0 on the IELTS test, or 84 on the MELAB test, or 70 on the PTE test. The test must have been taken within the last two years.
h) Two letters of reference.
i) All post-secondary transcripts.

3. Application Deadline
Deadlines for the submission of complete applications:
January 15 for September admission and funding

4. Advanced Credit
In the course-based master’s program, advanced credit may be given for a maximum of two courses (6 units or 1.0 full-course equivalent) at the senior undergraduate (500) level. The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to the required level for admission.

5. Program/Course Requirements
Master of Strategic Studies
In addition to Faculties of Graduate Studies and Arts requirements, the Centre for Military and Strategic Studies requires:
a) Core Courses: All master’s students take, in any sequence, the following three core area courses:
- Strategic Studies/History 655 Classics of Strategy
- Political Science 681 Advanced Analysis of International Relations
- Political Science 685 Strategic Studies
All master’s students will also take the following course in the Fall Block Week preceding their first term:
- Strategic Studies 603 Military and Strategic Studies: Questions and Methods
MSS students in the thesis stream are required to present their supervisor with a formal thesis proposal no later than the end of their second term (usually, the end of the Winter Term of their first year for students entering the program in the thesis stream; for students transferring from the course-based stream, where at all possible the same general timeline should apply).
b) Areas of Concentration: In any sequence, thesis-based students must complete 9 units (1.5 full-course equivalents); course-based students must complete 27 units (4.5 full-course equivalents); and course-based Co-operative Education students must complete 18 units (3.0 full-course equivalents) from the following:
(1) Arctic Security
Strategic Studies 662 Advanced Studies in Canadian Arctic Security
(2) Canadian Military Studies
Strategic Studies 609 Canadian Military and the Second World War
Strategic Studies 611 Canadian Military Studies
Strategic Studies 613 Canada and the First World War
(3) U.S. Security Policy
Political Science 633 U.S. Security Policy
(4) Domestic Security/Hemispheric Security
(5) Ethics and Morality in Conflict
Political Science 619 War and Interpretation
Political Science 684 Human Rights and Humanitarianism
(6) Intelligence and Security
Strategic Studies 657 Intelligence, Information Operations and Command, Control, Communications and Computers
(7) Military Anthropology
Anthropology 641 Graduate Seminar in Civil Military Relations
(8) Sea Power
Strategic Studies 659 Sea Power
(9) Unconventional Warfare
Political Science 689 Unconventional Warfare
Political Science 675 Special Topics in Comparative Politics
(10) Causes of War
Strategic Studies 663 War – Causes and Aftermath
(11) Military History
History 637 Topics in Military History
(12) Special Topics in Military and Strategic Studies
Strategic Studies 649 Special Topics in Military and Strategic Studies
(13) With the approval of the Graduate Director, thesis-based students may take 3 units (0.5 full-course equivalent) from the following and either course-based students or course-based students with Co-operative Education may take one or more courses from the following:
- Strategic Studies 651 Reading Seminar I
Strategic Studies 653 Research Seminar I (14) With the approval of the Graduate director any other graduate course pertinent to the student’s studies may be taken. Consult the Program website for a list of other recommended graduate courses.

c) Co-operative Education: The Co-operative Education option is only available as part of the course-based MSS program. Students will complete an 8-month work placement during their second year, which will replace three other non-core courses. Thesis-based MSS students will be permitted to transfer to the course-based co-operative education option during their first year of study. For further information interested students should contact the CMSS faculty co-operative education advisor or the Centre website.

Doctor of Philosophy

a) Course Work:
Each student must normally take 18 units (3.0 full-course equivalents) including three core courses:

- Political Science 681: Advanced Analysis of International Relations
- Political Science 685: Strategic Studies
- Strategic Studies 655: Classics of Strategy.

All PhD students will also take the following course in the Block Week preceding their first term:
Strategic Studies 603 Military and Strategic Studies: Questions and Methods

For candidacy examinations, students will have two major fields of study. One of these will be strategic studies and the other the dissertation area. Students will be required to take at least 3 units (0.5 full-course equivalent) in each field, namely Political Science 685 and an appropriate elective.

b) Written and oral candidacy examination.

c) Doctoral thesis proposal.

d) Written doctoral thesis.

e) Oral thesis defence.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
With the approval of the Graduate Director, students enrolled in the thesis-based MSS program may apply to take one 500-level course for graduate credit, but will be required to complete additional requirements for the course. Students in the course-based program may apply to take one 500-level course for graduate credit, but will be required to complete additional requirements for each course.

8. Time Limit
Expected completion time for the thesis-based and course-based Master of Strategic Studies is two years. Maximum completion time is four years for the thesis-based Master of Strategic Studies and six years for the course-based Master of Strategic Studies. Expected completion time for the PhD in Military and Strategic Studies is four years.

9. Supervisory Assignments
Students must contact a possible supervisor before admission. Agreement from a supervisor must be included in the application package.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the program requires:

Candidacy
For the PhD program, all course work must be completed before the candidacy examination can be taken.

There will be two three-hour written examinations, one in each field, as well as the single oral examination covering the content and questions on both of the written exams. There will normally be two fields – a major field and a second field. The major field will always be strategic studies, while the second field will be in an area closely related to the student’s dissertation research. Military and Strategic Studies is an interdisciplinary program, and our doctoral students will draw upon a wide variety of disciplines for their second field.

A candidacy examination consists of both written and oral components. CMSS requires that the written component be taken after the completion of course work and no later than 28 months of initial registration into the program, although completion within 16-20 months is encouraged by the Centre. For CMSS purposes, this component will consist of written examinations in the two major fields of study. The oral examination will be held no later than one month after the written examination.

Thesis Examination

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
The dissertation proposal is submitted to the members of the student’s Supervisory Committee, normally no later than eight weeks after the successful completion of the oral candidacy exam. After the proposal is successfully defended in a meeting of the Supervisory Committee, the student can go on to the dissertation research phase.

12. Special Registration Information
None.

13. Financial Assistance
Not applicable.

14. Other Information
None.

15. Faculty Members/Research Interests
Faculty members and their areas of interest may be found at http://www.cmss.ucalgary.ca.

Music MUSI

Contact Information
Location: Craigie Hall D 100
Program number: 403.220.5313
Fax: 403.282.6925
Email address: musicgs@ucalgary.ca
Web page URL: http://scpa.ucalgary.ca/studentsalumni/music-students/graduate

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Specializations:
- Composition
- Music Education
- Musicology
- Sonic Arts

Master of Arts (MA)
Specialization:
- Musicology

Master of Music (MMus) thesis-based
Specializations:
- Composition
- Conducting
- Music Education
- Performance
- Sonic Arts

*The Computational Media Design specialization is no longer available. See the Calendar entry for the Computational Media Design program.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, Music requires that all applicants submit:

a) One-page letter detailing their specific reasons for pursuing graduate study.

b) Two reference letters.

Other requirements are outlined below and based on the degree being pursued.

Master of Music (Performance)

a) A completed Bachelor of Music degree (or equivalent).

b) A live audition or video/audio recording. Repertoire for the audition must contain representative works from a variety of historical periods and must demonstrate an advanced level of technical accomplishment. Recordings should be approximately 20-30 minutes in length. Live auditions are scheduled for early February.

Master of Music (Conducting)

a) A completed Bachelor of Music degree, including study in conducting.

b) Demonstrated ability in an audition, which can be met in two ways:
- A video of approximately fifteen minutes.
• A rehearsal of a University ensemble (during Fall and early Winter).
  c) Demonstrated competence on a major instrument or voice.

**Master of Music (Composition)**
a) A completed Bachelor of Music degree (or equivalent), including study in composition.
b) A portfolio of at least three recent compositions, together with recordings (where available). Applicants wishing to specialize in electroacoustic composition must submit recordings.

**Master of Music (Sonic Arts)**
a) A completed Bachelor of Music degree (or equivalent) with a major, minor or concentration in Electroacoustic Music, Sonic Arts, Digital Audio Arts or similar field.
b) A portfolio of recent sonic arts creative and/or research projects, and a research paper.

**Master of Music (Music Education)**
Music is not currently accepting applications to the Master of Music (Music Education) for the 2015-2016 academic year.
a) A completed Bachelor of Music degree (or equivalent).
b) Normally, two years of successful teaching experience or equivalent professional involvement in music education.
c) An essay on a topic in Music Education prepared during or subsequent to the applicant’s undergraduate work.

**Master of Arts (Musical Arts)**
a) A completed Bachelor of Music degree (or equivalent).
b) A research essay or paper of approximately 10-15 pages on a topic in music history or theory prepared during or subsequent to the applicant’s undergraduate course work.

**Doctor of Philosophy**
a) A recognized master’s degree or equivalent.
b) Composition - a portfolio of works, together with recordings, if available, and an extended research paper.
c) Musicology - one or two extended research essays of approximately 25 pages in length.
d) Music Education - one or two extended research essays.
e) Sonic Arts - a portfolio of sonic arts creative and/or research projects, and an extended research paper.

**Application Deadline**
The deadline for the submission of complete applications for both master’s and doctoral program is January 15 for September admission.

For students wishing to pursue a Master of Music in Performance, an audition of approximately thirty minutes will be arranged on an individual basis from December 1 to April 15 (usually scheduled for early February). Specific dates and times can be arranged by contacting the Graduate Administrator at 403.220.5422.

For consideration for university scholarships, complete applications (including the audition and the required TOEFL score, if applicable) must be concluded by January 15. Departmentally-administered funding (such as graduate teaching assistantships and research scholarships) will be decided after April 15.

**Advanced Credit**
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

**Program/Course Requirements**
In addition to Faculties of Graduate Studies and Arts requirements, Music, excluding qualifying courses, requires:

**Master’s Degrees**
Master of Arts (Musical Arts): Music 637, 631 and 18 units (3.0 full-course equivalents) approved graduate-level courses.
Master of Music (Composition): Music 613, 637, 631, Music 641.01, 641.02 or 653 and 9 units (1.5 full-course equivalents) approved graduate-level courses.
Master of Music (Conducting): Music 637, 631, Music Performance 632 or 634 and 12 units (2.0 full-course equivalents) approved graduate-level courses.
Master of Music (Performance): Music 621, 623, 637, 631, 3 units (0.5 full-course equivalent) graduate-level course in Music Theory and Composition or Music History and Literature and 9 units (1.5 full-course equivalents) other approved course options.
Master of Music (Music Education): Music 631, 637 and 18 units (3.0 full-course equivalents) approved graduate-level courses.
Master of Music (Sonic Arts): Music 631, 651, 653 and 9 units (1.5 full-course equivalents) approved graduate-level courses.
Music 613 may be recommended.

**Restrictions**
No more than 6 units (1.0 full-course equivalent) for the Master of Music and Master of Arts degrees may be taken in an area other than Music.

**Doctor of Philosophy**
Students entering the PhD program will normally be required to complete at least 18 units (3.0 full-course equivalents). Music 631 is required unless this course or its equivalent has been completed as part of a master’s degree.

PhD (Composition), (Musical Arts), (Music Education): An interdisciplinary course (3 units or 0.5 full-course equivalent) designed by the student and supervisor, and 15 units (2.5 full-course equivalents) additional approved graduate-level courses.
PhD (Sonic Arts): Music 751, 753 and 12 units (2.0 full-course equivalents) additional approved graduate courses. Music 613 may be recommended.

**Additional Requirements**
Diagnostic tests in music history and theory will be given to all entering master’s students in order to determine if qualifying work in these areas is required.

**Language**

**Master’s Programs**
Master of Arts (Musical Arts)
Applicants are required to demonstrate a reading knowledge of a language other than English—normally German. In practice, this requirement and any other linguistic competence that may be deemed necessary for the student’s proposed research area must be met before the thesis topic will be approved.

Other Master’s Programs
While there are no formal second-language requirements for the various programs of the Master of Music degree, students may be required to attain proficiency in a language other than English where this is deemed appropriate for the proposed thesis/project.

**Doctor of Philosophy**
Doctor of Philosophy (Musical Arts)
Candidates are required to demonstrate a reading knowledge of two languages other than English. German is recommended as one of the required languages.

Doctor of Philosophy (Composition), (Music Education), (Sonic Arts)
Candidates are required to demonstrate a reading knowledge of one language other than English.

**Performance**
Graduate students in the MMus Performance program are required to participate in one of the large ensembles for the duration of their degree. Pianists are required to accompany two hours per week in a vocal or instrumental studio if they do not participate in an ensemble. Another option for pianists is to accompany a Junior or a Senior recital.

**Thesis/Recital/Project**

**Master’s Programs**
All master’s degree programs require a thesis or recital or project equivalent (see below), prepared under the guidance of a supervisor and approved by the Music Graduate Studies Committee.

**Master of Music (Performance)**
The thesis is interpreted to be two public recitals featuring solo performances and chamber music. At least one Canadian work should be included in one of the recitals. The examining committee will evaluate the candidate’s performance in both of the recitals. Recital proposals are to be submitted to the Graduate Administrator for approval by the Graduate Committee at least two months before each performance.
Master of Music (Conducting)
The thesis is interpreted to be two public performances, on or off campus, with University or community ensembles. At least one Canadian work should be included in one of the recitals. The examining committee will evaluate the candidate’s performance in both of the recitals. Recital proposals are to be submitted to the Graduate Administrator for approval by the Graduate Committee at least two months before each performance.

Master of Music (Composition)
The thesis is interpreted to be either a substantial creative project and an accompanying descriptive essay related to the project, or a portfolio of creative work, the majority of which must have been created in the second year of residency, and an accompanying descriptive essay related to the portfolio. Normally, the project or portfolio will have been presented in a public recital prior to the thesis defence.

Master of Music (Sonic Arts)
The thesis is interpreted to be either a substantial sonic arts creative project with an accompanying research document or a portfolio of sonic arts creative work realized in the second year of study and an accompanying descriptive essay related to the portfolio. The project or portfolio of works will be performed or presented in public prior to the thesis defence.

Master of Arts or Master of Music (CMD)
The thesis will satisfy the requirements described in the Computational Media Design section of the Graduate Calendar.

Doctor of Philosophy
Doctor of Philosophy (Composition)
The thesis is interpreted to be a substantial creative project and an accompanying analytical/research paper approved by the supervisory committee.

Doctor of Philosophy (Sonic Arts)
The thesis is interpreted to be a cohesive sonic arts creative project with an accompanying research document approved by the supervisory committee. The project will be performed or presented in public prior to the thesis defence.

7. Credit for Undergraduate Courses
Not applicable.

8. Time Limit
Maximum completion time is five years for the Master of Music programs and four years for the Master of Arts (Musicology). Maximum completion time is six years for the doctoral program.

9. Supervisory Assignments
The Graduate Director will function as the interim supervisor for all newly admitted students during their first term. This arrangement will allow students to use their first term as an opportunity to meet with faculty and to secure a permanent supervisor.

10. Required Examinations
In addition to Faculty of Graduate Studies requirements, the program requires:

Master’s Degrees
Master of Arts (Musicology), Master of Music (Composition), Master of Music (Music Education) and Master of Music (Sonic Arts)
A comprehensive oral examination encompassing all areas of the chosen field is required. This examination will take place following the completion of coursework and must be satisfactorily completed before the submission of the thesis/project. In (Sonic Arts) the exam questions will be based on a compiled bibliography (readings and works) relevant to the student's area of research.

Master of Music (Performance) and (Conducting)
A comprehensive oral examination based upon the literature of the instrument and more extensively upon the repertoire of the approved recital programs is required. This examination must be satisfactorily completed at least four weeks before the date of the second public performance required for the degree.

Doctor of Philosophy
Candidacy
This degree requires a candidacy examination with a written and an oral component upon completion of course work, but no later than 28 months after initial registration. Questions on the research proposal will be included in the oral candidacy examination.

Thesis Examination
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee
The Internal Examiner must be external to the home program.
Thesis examinations of written theses are open.

11. Research Proposal Requirements
Research proposals must be submitted to and approved by the Graduate Studies Committee at least two months before the student intends to defend or perform.
The proposal should include:
• A detailed description of the area of investigation.
• A clear statement of the approach to be taken and the research method to be utilized.
• An account of how the work will be presented.
• An indication of how the project will make an original contribution to the student’s field of study.

12. Special Registration Information
Students should consult the Graduate Director before registering.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.
For scholarship applications, see Application Deadlines.

14. Other Information
International applications will not be considered unless the applicant has completed and passed the TOEFL examination (or equivalent) before the application or scholarship deadline. Students must apply for the Graduate Awards Competition by January 15.

15. Faculty Members/Research Interests
Current faculty members and their areas of interest can be found at http://scpa.ucalgary.ca.

Nursing NURS
Contact Information
Location: Professional Faculties Building, Room 2260
Program number: 403.220.6241
Fax: 403.284.4803
Email address: nursgrad@ucalgary.ca
Web page URL: http://nursing.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Nursing (MN), course-based or thesis-based
Integrated Master of Nursing/Nurse Practitioner (MN/NP)
Post-Master’s Nurse Practitioner Diploma (PMNP)
The Doctor of Philosophy program is designed to educate professionals for excellence in nursing scholarship through original research related to specialized practice with identified client populations.

Master of Nursing programs prepare nurses for advanced practice in focused areas that may include direct clinical practice, education, or health policy/leadership. The thesis-based program offers a focused supervised research experience.

A Post-Master’s Nurse Practitioner (PMNP) diploma program, with an adult health acute care focus, is offered. The PMNP can be achieved as a Post-Master’s program or through an integrated Master of Nursing/Nurse Practitioner (MN/NP) program. The Nurse Practitioner program or any of its courses will only be offered contingent on the availability of resources and a sufficient cohort of students. Further information on the integrated MN/NP program can be found at http://nursing.ucalgary.ca.
2. Admission Requirements
In addition to the Faculty of Graduate Studies requirements, the Faculty of Nursing requires that an applicant must:

Master of Nursing
a) Be a Registered Nurse holding a baccalaureate degree, normally in nursing;
b) Be eligible for active nursing registration in Alberta (registrants in the program must provide proof of active CARNA registration or equivalent each year);
c) Hold CPR Certification at the Basic Rescuer or Basic Cardiac Life Support or “C” level;
d) Have successfully completed one undergraduate course (3 units or 0.5 full-course equivalent) in research methodology;
e) Have successfully completed one undergraduate course (3 units or 0.5 full-course equivalent) in statistics;
f) Applicants to the MN/NP and PMNP programs must have three years’ (full-time or equivalent) clinical experience and must provide documentation from their employer confirming they have met the three years’ experience (4,500 hours);
g) Submit two references, one from someone capable of assessing the applicant’s academic and research ability, normally an academic, and one from someone who can attest to the applicant’s nursing practice and expertise;
h) Submit a security/police clearance letter (Alberta Health Services require security clearance checks for nursing graduate students who will be doing a practicum or research in the region);
i) For applicants required to provide proof of proficiency in English submit a minimum TOEFL score of 600 (paper-based) or 100 (Internet-based test); IELTS score of 7.0; MELAB score of 83; PTE score of 70; or Level 3 on the EAP program, and;
j) Have an interview(s) with a faculty member, if requested by the Faculty.

The practicum providers and public health authorities have determined that in order to participate in practicum it is mandatory for students to be immunized against/tested for a variety of communicable diseases. They also must be fit tested for a N95 mask. Further information is available on the Faculty of Nursing website. This is also applicable to those in the MN/NP and the PMNP programs;

A minimum of three years’ (full-time or equivalent) Registered Nurse practice experience in the proposed area of study is required for applicants to the MN/NP or the PMNP. These applicants must also provide commitment from the Health Region for practicum placement availability for the final practicum of the NP program (Nursing 650).

Any graduate student requesting transfer to the integrated MN/NP program must consult with his/her current supervisor prior to application.

Applicants to the MN course-based program have the option of registering as a part-time student.

Applicants to the MN/NP can be admitted on a part-time basis up to the commencement of the first NP practicum (Nursing 642) at which time a transfer to full-time studies must occur.

Doctor of Philosophy
a) Normally be a Registered Nurse.
b) Normally hold CPR Certification at the Basic Rescuer or Basic Cardiac Life Support or “C” level.
c) Submit a study plan outlining the areas of proposed concentration, goals in undertaking doctoral work, initial intentions regarding course work, and a statement of the preliminary plans for thesis research.
d) Provide examples of the applicant’s written scholarly work such as publications, research reports, course assignments, etc.
e) Provide a curriculum vitae.
f) Provide a letter of commitment from the identified supervisor indicating willingness to provide supervision throughout the program of studies and supporting the applicant’s study plan.

g) For applicants required to provide proof of proficiency in English submit a TOEFL score of 600 (paper-based) or 100 (Internet-based test); IELTS score of 7.0; MELAB score of 83; PTE score of 70; or Level 3 on the EAP program.
h) Have successfully completed one graduate-level course (3 units or 0.5 full-course equivalent) in qualitative methods, one graduate-level course (3 units or 0.5 full-course equivalent) in quantitative methods, plus one graduate-level course (3 units or 0.5 full-course equivalent) in qualitative methods, plus one graduate-level course (3 units or 0.5 full-course equivalent) in statistics. Exceptions may be considered, but the onus will be on the applicant to provide sufficient evidence to warrant exception. Deficiencies must be substantiated prior to or in the first year of the doctoral program.
i) Submit three references, one of which must be from the applicant’s supervisor of his/her master’s program.
j) Submit a security/police clearance letter (Alberta Health Services require security clearance checks for nursing graduate students who will be doing a practicum or research in the region).

The practicum providers and public health authorities have determined that in order to participate in practicum it is mandatory for students to be immunized against/tested for a variety of communicable diseases. They also must be fit tested for a N95 mask. Further information is available on the Faculty of Nursing website.

Academic Accommodation Policy for Students with Disabilities
It is important for students with documented disabilities, who have met the admission criteria, to note that the Academic Accommodation Policy does not require the University to lower or substantially modify standards in order to accommodate students with disabilities. Adaptive technology and/or academic accommodations are available to facilitate learning, but they do not relieve students of their responsibilities to develop the essential skills and abilities expected of all other students.

3. Application Deadline
There are three application deadlines for submission of complete applications:

- December 1 for the following September
- February 1 for the following September
- September 15 for the following January

There are three application deadlines for the PMNP diploma program:

- December 1 and February 1 for admission in September if the prerequisite courses are completed
- If the prerequisite courses are not completed, applications must be submitted by September 15 for admission to the Winter or Summer (including Spring Inter-session) Terms as appropriate.

Applicants are highly encouraged to begin their application process early.

4. Advanced Credit
Applicants must include requests for advanced credit, accompanied by a rationale, when they apply for admission. For courses taken outside the University of Calgary, applicants must provide official transcripts and a copy of the course outline detailing the course description, objectives, assignments, readings, etc.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies’ requirements, the Faculty of Nursing requires the following:

Master of Nursing Programs
The Master of Nursing Program is presently revising its curriculum to align with Faculty of Nursing strategic plan, and comply with changes required by the Nursing Education Program Approval Board (NEPAB). The Nurse Practitioner program, in particular, will be revising and shifting content and delivery of the program to meet the NEPAB standards. These standards will be in accordance with established University processes, but the implementation of the revised courses may be done outside the usual annual cycle.

Courses in the integrated Master of Nursing/Nurse Practitioner program and the Post-Master’s Nurse Practitioner Diploma program (Nursing 642, 644, 646, 650, 661, 663, 665) are often scheduled outside the standard semester timelines, as permitted.

Master of Nursing (course-based)
a) Successful completion of the following core courses: Nursing 605, 611, 621, 627, 629, 633, 634, 683.
b) One graduate-level course (3 units or 0.5 full-course equivalent) in statistics (Nursing 609).
c) Two graduate-level course (3 units or 0.5 full-course equivalent) electives related to the student's focus of study.

**Master of Nursing/Nurse Practitioner**

d) Successful completion of the following core courses: Nursing 605, 611, 621, 627, 629, 633, 661, 663, 665, 683.

e) One graduate-level course (3 units or 0.5 full-course equivalent) in statistics (Nursing 609).

f) Successful completion of the following core NP courses: Nursing 642, 644, 646, 650.

**Post-Master's Nurse Practitioner Diploma**

g) Successful completion of prerequisite courses: Nursing 661, 663, 665.

h) Successful completion of the following core NP courses: Nursing 642, 644, 646, 650.

For the Nurse Practitioner practicum component of the integrated MN/NP and for the PMNP, there are additional requirements:

- Mandatory participation of NP students in all activities related to practicum courses. NP students' practicum experiences may be scheduled at various hours, including evenings, nights and weekends. Practicum experiences may also extend outside the normal academic term. Normally, a student will not be permitted to withdraw from a NP practicum course in order to avoid a failing grade in that course.

- Students in either the MN/NP or the PMNP will not be permitted to take Nursing 642 if their cumulative grade point average prior to commencing Nursing 642 is less than 3.00.

**Master of Nursing (thesis-based)**

a) At minimum successful completion of the following core courses: Nursing 605, 611, 621, 627, 629, 633, 683.

b) One graduate-level course (3 units or 0.5 full-course equivalent) in statistics (Nursing 609).

Evaluation of nursing practicum will be weighted at 40 per cent of the final grade across all of the practica in the MN course-based and MN thesis-based programs, with a weight of 60 per cent for the seminar component.

**Doctor of Philosophy**

a) For students prepared at the master's level in nursing a minimum of 18 units (3.0 full-course equivalents) is required: Nursing 705, 769, two courses in advanced research methods at the 700 level, and two doctoral thesis seminars (Nursing 711 and 733).

b) Students in the doctoral program normally are required to take advanced research methods courses at the 700 level in both qualitative and quantitative research approaches, one of which must be Nursing 721 or 783.

c) After completion of the student's course work and approval of the thesis research proposal, a candidacy examination with a written and an oral component is required. Baccalaureate and non-nursing master's prepared applicants must complete additional coursework beyond the six core courses listed in (a). Applicants are individually assessed. The number and types of additional courses required will vary according to the applicant's academic, research and practice background as well as the proposed research plan.

**6. Additional Requirements**

None.

**7. Credit for Undergraduate Courses**

Under special circumstances, with the consent of the Faculty, students may take undergraduate courses, normally at the senior or 500-level, for the Master of Nursing degree.

**8. Time Limit**

Expected completion time for full-time students in the Master of Nursing program is two years. Maximum completion time is four years for the thesis-based program and six years for the course-based program including the MN/NP. The PMNP is one year, full-time study. Expected completion time for doctoral students is four years; maximum completion time is six years.

**9. Supervisory Assignments**

a) Students in any of the course-based routes of the Graduate Programs will be assigned a permanent supervisor throughout their program of study.

b) If co-supervision is sought for a Master of Nursing/Nurse Practitioner (MN/NP) student, the supervision for the MN component will consist of the faculty member as the supervisor, and the NP faculty member as the co-supervisor. When the student commences the first practicum in the NP component, the supervision will reverse in that the supervisor will now be the NP faculty member and the co-supervisor will be responsible for the MN comprehensive examination.

c) In addition to normal regulations for assignment of supervisors in the MN program, a supervisory committee must be struck for all MN thesis students no later than three months after the appointment of supervisor.

d) Normally the Faculty of Nursing supervisor for an MN/NP or PMNP student is a member of the Nurse Practitioner Committee.

e) Doctoral students require a Faculty of Nursing member to commit to their supervision as a condition of admission.

**10. Required Examinations**

In addition to Faculty of Graduate Studies requirements, the program requires:

**Master of Nursing (course-based)**

A final comprehensive examination consists of a take-home written exam, designed according to the student's specialization, and an oral component. The written component must be completed within one week and constitutes the basis for a final oral examination two weeks later.

For the Nurse Practitioner component of the integrated MN/NP, all courses, with the exception of Nursing 650, must be completed prior to the MN comprehensive examination. Students may not proceed to Nursing 650 if they have not successfully completed their MN comprehensive examination.

The final exam in the MN/NP and the PMNP includes an experiential practice component and an oral examination.

In case of a fail in Nursing 650, a student under appeal may not proceed to the Nurse Practitioner (NP) comprehensive exam.

**Doctor of Philosophy**

Candidacy

The doctoral candidacy examination has a written and an oral component. The written component focuses on three areas:

a) the theory that defines existing knowledge in the student's chosen area of nursing research.

b) the literature that defines existing knowledge in the student's chosen area of nursing research.

c) the proposed research method and data analysis/management strategy chosen for the thesis. The student has three weeks to complete the written component. The candidacy committee has approximately two weeks to review the written submission before the oral examination.

The student is expected to defend and extend his/her knowledge in these three areas. Questions about the student's proposed research may be asked.

**Thesis Examination (Master of Nursing (thesis-based) and Doctor of Philosophy)**

**Scheduling of the Examination**

All members of the Supervisory Committee must have reviewed the student's draft thesis document before an examination can be scheduled.

**Composition of the Committee**

The Internal Examiner may be internal to the home program.

The final thesis examination is open.

**11. Research Proposal Requirements**

Doctoral students must have their research proposals approved in principle by their supervisory committee prior to candidacy. Students must receive formal approval of their research proposals from the supervisory committee before proceeding to ethical review and implementation of the project. The approved proposal will be housed in the Research Office, Faculty of Nursing.

Students whose research involves human subjects must receive ethics approval from the University of Calgary Conjoint Health Research Ethics Board.

**12. Special Registration Information**

None.

**13. Financial Assistance**

Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar. Scholarship application packages will be available on...
the Faculty of Nursing Website prior to each competition deadline. The application deadline for internal scholarships is February 1. Students admitted to the doctoral program are highly encouraged to seek external funding to support their studies and research. Please note that the deadlines for external funding applications may not coincide with the February 1 deadline.

14. Other Information
None.

15. Faculty Members/Research Interests
Current faculty and their research interests can be found at http://nursing.ucalgary.ca/contact-us.

Philosophy PHIL
Contact Information
Location: Social Sciences Building, Room 1248
Program number: 403.220.5533
Fax: 403.289.5698
Email address: philgrad@ucalgary.ca
Web page URL: http://www.phil.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Arts (MA), thesis-based and course-based
The course-based Master of Arts degree may be completed on a full-time or a part-time basis.

Specializations:
- History and Philosophy of Science (MA only)
- Philosophy of Religion (MA only)
*These two specializations are offered in cooperation with the Departments of History and Religious Studies respectively. Selecting a specialization is not mandatory.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

a) Applicants hold a four-year undergraduate degree with honours or a major in philosophy; however, applicants with a degree in a related academic field will be considered.
b) Three letters of reference, and a sample of written work, such as a recent essay, written in English. Applications will not be considered without a sample of written work.
c) A minimum grade point average (GPA) of 3.50 or higher on a four-point scale over the last 60 units (10 full-course equivalents) and/or the last two years of study in their degree.
d) For applicants required to prove proficiency in English, a minimum TOEFL score of 600 (paper-based), 100 (Internet-based test), a MELAB score of 84 or an IELTS score of 7.0 must be submitted.

3. Application Deadline
The deadline for submitting complete applications is January 15 for September admission. Candidates applying for financial assistance should ensure that all documents relevant to their scholarship application reach the Department by January 15. The Department makes its first round of decisions for financial support by the end of March. Although most applications are for September admission, January admission is also possible.

4. Advanced Credit
The Department does not normally give advanced credit for courses taken previously. However, in special circumstances, a request for advanced credit may be considered if it is made as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to raise the grade point average to a level required for admission. Normally, advanced credit may be given for a maximum of 9 units (1.5 full-course equivalents).

5. Program/Course Requirements
Note: Normally, in both master’s and doctoral programs, no more than 3 units (0.5 full-course equivalent) of Directed Reading can be taken to satisfy the minimum course requirement.
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

Master of Arts (thesis-based)
a) A minimum of 18 units (3.0 full-course equivalents). Philosophy 603 is a required course and is normally taken the first year in program.
b) In the specializations History and Philosophy of Science or Philosophy of Religion, courses taken in History or Religious Studies, may, with departmental approval, count as fulfilling course requirements for the degree.

Master of Arts (thesis-based) with Specialization in the History and Philosophy of Science
a) Six units (1.0 full-course equivalent) (two terms) in the philosophy of science.
b) Six units (1.0 full-course equivalent) (two terms) in the history of science.
c) Six units (1.0 full-course equivalent) (two terms) in the philosophy and science.
d) Proficiency in a second language or logic, depending on the department of enrolment.

Master of Arts (course-based)
a) A minimum of 30 units (5.0 full-course equivalents), including at least 6 units (1.0 full-course equivalent) in the History of Philosophy and 6 units (1.0 full-course equivalent) in 20th Century or Contemporary Philosophy. Philosophy 603 is a required course and is normally taken the first year in program.
b) Students to remedy background deficiencies, if any, in a certain area or areas of philosophy by taking course work below the 500-level.
c) Students must complete at least 3 units (0.5 full-course equivalent) in each annual registration period.

Doctor of Philosophy
a) Normally, a minimum of 18 units (3.0 full-course equivalents) for students with a Master of Arts degree.
b) Normally, a minimum of 36 units (6.0 full-course equivalents) for students entering directly from an honours undergraduate program.
c) Students to show competence in logic, which may be done by achieving a grade of “B” or better in Philosophy 379.
d) Philosophy 603 is a required course and is normally taken the first year in program.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Normally, undergraduate courses will not be credited towards completion of course requirements in a graduate program. Philosophy 379 may be taken to show proficiency in logic and is considered over and above the required number of graduate courses for completion of a degree.

8. Time Limit
Expected completion time for full-time students is two years in a master’s thesis program, three years in a master’s course-based program, and four years in a doctoral program. Maximum completion time is four years for a master’s thesis program, and six years for a master’s course-based or doctoral program.

9. Supervisory Assignments
Students are assigned an interim advisor until they have an opportunity to become acquainted with members of the faculty. Each student must have an assigned supervisor by the end of the second regular academic session after first registration (April for September registrants and December for January registrants). The choice of supervisor must be by mutual arrangement between the student and faculty member concerned, and approved by the Department.

A supervisory committee at the master’s level is not normally appointed. When such a committee is deemed necessary, the Dean’s approval must be obtained.

A doctoral student shall be under the general supervision of a supervisory committee. After consultation with the student, the supervisor will submit a list of possible members of the supervisory committee to the Graduate Studies Committee for approval. The supervisory committee should be established as soon as possible and no later than three months after the supervisor’s appointment.

10. Required Examinations
In addition to Faculty of Graduate Studies regulations for candidacy and thesis examinations, the program requires:
Doctor of Philosophy
Departmental Preliminary Examinations
Students will be required to show competence in three of the following four areas:
Area I – metaphysics and epistemology
Area II – history of philosophy
Area III – philosophy of language and logic
Area IV – moral and political philosophy
The student chooses three areas. Competence in an area is shown by submitting a satisfactory essay or passing an examination. At least one area must be passed by either a sit-down or take-home examination. Exams are administered, and essays accepted, four times yearly. All three areas must be passed within 20 months of registration and, the student is not allowed to take an exam in a particular major area more than three times. Students who have not passed three areas within 20 months of registration will not normally receive further Departmental support.

Oral Candidacy Examination
After completion of required course work and preliminary examinations, the doctoral student must pass an oral candidacy examination prior to beginning the doctoral thesis. The candidacy exam has both a written and oral component. The student’s research proposal (approximately 20 pages) must be submitted to all members of the candidacy examining committee for review at least two weeks prior to the oral examination. The thesis proposal will serve as the basis of discussion at the examination. The purpose of the examination is to ascertain whether the student’s academic preparation and ability are adequate to pursue profitable research on the issues proposed. Questions on the research proposal will be included in the oral candidacy examination.

Thesis Examination (Master of Arts (thesis-based) and Doctor of Philosophy)
Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the home program.

Master of Arts (course-based)
The course-based Master of Arts has a research component. This component is to be satisfied by passing both the written and oral parts of the Final Master’s Examination. A Final Master’s Examination of overall competency is required after completion of all course work, consisting of written and oral components. The examination policy is available in the Philosophy Graduate Handbook at http://www.phil.ucalgary.ca.

11. Research Proposal Requirements
The research proposal only applies to doctoral students and is to be submitted to the examining committee a minimum of two weeks prior to the scheduled candidacy oral exam.

12. Special Registration Information
Incoming students determine course work in consultation with the Graduate Director.

13. Financial Assistance
Most thesis students admitted to the program receive some level of financial support from the Department. Suitably qualified master’s students may be given a guarantee of financial support from September of their first year to the end of April of their second year. All doctoral students receive a guarantee of financial support for the four years of their program.

For information on awards, see the Awards and Financial Assistance section of this Calendar.

Students applying for scholarships must submit their applications to the Department by January 15.

Satisfactory academic progress in the student’s program is required for funding.

Satisfactory Academic Progress:
Thesis-based and Full-time Course-based MA Students
a) Must complete at least 15 units (2.5 full-course equivalents) in their first two terms, and maintain a GPA of at least 3.60 in all courses taken. This GPA is computed at the end of the first week of June each year. In any case no more than one grade of “B-” or lower is acceptable during the course of their program.
b) Are expected to complete their degree by May of their second year in the program. (Equivalent requirements apply to students who register at times other than September.)

Doctoral Students
a) Must complete at least 15 units (2.5 full-course equivalents) in their first two terms, and maintain a GPA of at least 3.60. This GPA is computed at the end of the first week of June each year. In any case no more than one grade of “B-” or lower is acceptable during the course of their program.
b) Must pass all Departmental PhD Preliminary Examinations within 20 months of first registration (for those without an MA, the period will be determined by the Graduate Studies Committee).
c) Must take the Candidacy Examination within eight months of the completion of the Preliminary Examinations and pass this examination no later than twenty-eight months after the date of the student’s first registration in the program (for those without an MA, thirty-six months after first registration in graduate studies in philosophy).

14. Other Information
None.

15. Faculty Members/Research Interests
The faculty’s main interests and specialties can be found at: http://www.phil.ucalgary.ca/people/.

Physics and Astronomy

PHAS

Contact Information
Location: Science B, Room 605
Program number: 403.220.3617
Fax: 403.289.3331
Email address: gradinfo@phas.ucalgary.ca
Web page URL: http://www.phas.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), course-based and thesis-based
The PhD and MSc degree may be completed on a full-time or a part-time basis.

Specializations:
• Astrophysics
• Medical Physics
• Physics
• Radiation Oncology Physics*
• Space Physics
• Medical Imaging (interdisciplinary)**

*Radiation Oncology Physics and Medical Imaging are not offered to the course-based MSc degree.
**See the calendar section on Interdisciplinary Specializations for further information.

Diplomas and Certificates:
• Postdoctoral Diploma in Radiation Oncology Physics
• Postdoctoral Certificate in Radiation Oncology Physics

2. Admission Requirements
In addition to Faculty of Graduate Studies and Faculty of Science requirements, the Department requires:
a) A University of Calgary Honours background in Physics, Engineering Physics, Astronomy/Astrophysics, or equivalent.
b) For some applicants, a satisfactory score on the Advanced Physics Graduate Record Examination.
c) All applicants for whom English is not their first language must also submit a Test of English as a Foreign Language (TOEFL) score. The minimum acceptable TOEFL score is 550 on the paper-based exam, or 80 on the Internet-based exam. For the IELTS examination (general module), the minimum acceptable score is 7.0.
d) Two reference letters.

Master of Science
Applicants to the Master of Science program, whose background does not include the equivalent of an undergraduate honours degree in the proposed area of study, may require additional make-up courses. Such applicants should consult with the department regarding their admission status.

Postdoctoral Diploma in Radiation Oncology Physics
For the Postdoctoral Diploma program, applicants must possess a PhD from a CAMPEP accredited graduate program or
equivalent and an appointment as an Associate Medical Physicist by the Alberta Health Services.

Postdoctoral Certificate in Radiation Oncology Physics

In addition to Faculty requirements, the Department requires a PhD in Physics, Medical Physics, Biophysics, Biomedical Engineering. Applicants with PhDs in sciences other than those listed above may consult with the department regarding possible admission. A minimum GPA of 3.50 over an applicant’s last 60 units (10 full-course equivalents) of course work is required before an applicant may be considered for admission; however, exceptional students with extenuating circumstances may be considered.

3. Application Deadline

Deadlines for the submission of complete applications:

- January 15 for September admission
- July 1 for January admission

Late applications will be considered if any openings remain in the graduate program.

4. Advanced Credit

The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

Postdoctoral Certificate in Radiation Oncology Physics: Credit for a maximum of 3 units (0.5 full-course equivalent) may be given for a course taken as part of previous graduate and/or undergraduate (minimum 600-level courses) degree. Coursework content will be reviewed on a case-by-case basis. This course must be deemed equivalent to those offered by the program and have been taken within the past 5 years. Oral examination may be required.

5. Program/Course Requirements

In addition to Faculty of Graduate Studies and Faculty of Science requirements, the Department requires:

- That all students, with the exception of registrants in the Postdoctoral Diploma program, in Radiation Oncology Physics and the Postdoctoral Certificate in Radiation Oncology Physics, register in the Graduate Seminar, Physics 691, during Fall and Winter Terms of the first two years in program.

Master of Science (thesis-based)

a) For students specializing in Astrophysics, Physics, or Space Physics, 12 units (2.0 full-course equivalents), including at least two of Physics 609, 611, 613, and 615, plus two elective courses at the 500 or 600 level, as approved by the Graduate Chair.

b) For students specializing in Medical Physics, 15 units (2.5 full-course equivalents), including Medical Physics 623, 625, at least two of Physics 609, 611, 613, and 615, plus one elective course at the 500 or 600 level, as approved by the Graduate Chair.

c) For students specializing in Radiation Oncology Physics, 24 units (4.0 full-course equivalents), including Medical Physics 623, 625, 633, 637, 638, 639, and two of Physics 609, 611, 613, and 615, and 1.5 units (0.25 full-course equivalent), Medical Physics 632.

Master of Science (course-based)

This program may be taken part-time or full-time.

- a) That the student choose one of the three broad areas of specialization: astrophysics, physics, or space physics. Medical physics and Radiation Oncology Physics are not available as a course-based degree.
- b) Thirty units (5.0 full-course equivalents), including Physics 603, 605, 609, 611, 613, 615.
- c) Twelve units (2.0 full-course equivalents), depending upon the area of specialization: Astrophysics – Astrophysics 699 plus 9 units (1.5 full-course equivalents) labelled ASPH (two of these may be at the 500 level). Physics 629 and Space Physics 679 may be taken instead of Astrophysics courses.
- d) A comprehensive examination with a written and oral component.

Doctor of Philosophy

a) A minimum of 6 units (1.0 full-course equivalent) at the 600 level or higher for students who hold a master’s degree.
- b) A minimum of 18 units (3.0 full-course equivalents) at the 600 level or higher for those entering the doctoral program without a master’s degree.
- c) For students specializing in Radiation Oncology Physics who do not hold an accredited MSc degree in Radiation Oncology Physics, Medical Physics 623, 625, 632, 633, 637, 638, 639, and two courses from Physics 609, 611, 613, or 615.

Postdoctoral Diploma in Radiation Oncology Physics

Twenty-four units (4.0 full-course equivalents) including Medical Physics 711, 712, 721, 722, 731, 741 and two of Human Resources and Organizational Dynamics 793, 741 or Strategy and Global Management 797.01.

Postdoctoral Certificate in Radiation Oncology Physics

The Department of Physics and Astronomy offers a postdoctoral certificate in Radiation Oncology Physics. This certificate program is a two-term program for students with PhDs in Physics wishing to transition to a career in clinical radiation oncology physics. Students will acquire a broad background in theoretical medical physics including radiation physics, radiobiology, radiation safety, medical imaging and the modern practice of radiation oncology, through intensive coursework and hands-on experience. The program is designed to meet all the recommendations in Report 1975S of the American Association of Physicists in Medicine. At the completion of this program students will be well-prepared to begin a residency in medical physics. Potential candidates for this program must hold a PhD in Physics or a related discipline.

The program requirements consist of six courses (Medical Physics 623, 625, 633, 637, 638, 639) and one quarter-course equivalent (Medical Physics 632). The semester schedule below is for full-time students:

Fall
Medical Physics 623 Radiological Physics and Radiation Dosimetry
Medical Physics 638 Imaging for Radiation Oncology Physics
Medical Physics 639 Radiobiology and Radiation Safety for Medical Physicists

Winter
Medical Physics 625 Radiation Oncology Physics
Medical Physics 632 Clinical Rotation in Radiation Oncology Physics
Medical Physics 633 Radiation Oncology Physics Laboratory
Medical Physics 637 Anatomy and Statistics for Medical Physicists

Ethics and Errors – offered not for credit
No substitutions accepted.

Graduation requires successful completion of all required courses with a minimum grade of “B”.

6. Additional Requirements

Postdoctoral Certificate in Radiation Oncology Physics: Regular attendance at Radiation Oncology Rounds, Grand Rounds and non-credit training sessions such as the Ethics and Errors course (winter term) – offered not for credit.

7. Credit for Undergraduate Courses

Credit for a maximum of 6 units (1.0 full-course equivalent) may be given for courses taken at the 500 level.

Postdoctoral Certificate in Radiation Oncology Physics: No credit will be given for undergraduate-level courses.

8. Time Limit

Expected completion time is two years for full-time students in a thesis master’s program, three years in a course-based program, four years in a doctoral program, and two years in the Postdoctoral Diploma program. Maximum completion time is four years for a thesis master’s program, and six years for a course-based master’s or a doctoral program. Expected completion time is 8 months (two terms) for a student in the Postdoctoral Certificate in Radiation Oncology Physics program.
9. Supervisory Assignments

Newly admitted students will normally be supervised by the Graduate Director or an interim supervisor in their field of interest during the first two terms. During this time students will normally complete all of the coursework and have an opportunity to become acquainted with the research of potential supervisors within the department. Students are responsible for securing a permanent supervisor from among the researchers in the department within the first four months of program. Registrants in the Postdoctoral Diploma program are supervised by the Director of Medical Physics or designate, Tom Baker Cancer Centre. The MSc program has a supervisory committee requirement which follows the same requirements and rules as the PhD.

Postdoctoral Certificate in Radiation Oncology Physics: All students will be supervised by the Postdoctoral certificate co-ordinator or delegate co-ordinator for the duration of their program.

10. Required Examinations

In addition to Faculty of Graduate Studies requirements, the Department requires:

Master of Science (course-based)

Two weeks before the comprehensive oral examination, students must write a three-hour, closed-book comprehensive examination, prepared by the Departmental Graduate Affairs Committee in collaboration with the supervisor.

Master of Science (thesis-based)

Thesis Examination

Scheduling of the Examination

All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee

The Internal Examiner may be internal to the home program.

Thesis Examination

Students are evaluated through assignments and course-based examinations.

11. Research Proposal Requirements

Students entering a doctoral program with a completed master’s degree must submit a written thesis proposal within 24 months of initial registration. Students entering a doctoral program with a bachelor’s degree, or who have transferred into the doctoral program from a master’s program, must submit a written thesis proposal within 28 months.

12. Special Registration Information

Registration in the Postdoctoral Diploma program is contingent upon employment by the Alberta Health Services as an Associate Medical Physicist.

13. Financial Assistance

Financial assistance may be available to qualified students. For information on awards, please see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their applications to the Department by January 15.

Registants in the Postdoctoral Diploma program must hold an Associate Medical Physicist position, which is a paid appointment.

14. Other Information

See the Department website.

Political Science POLI

Contact Information

Location: Social Sciences Building, Room 756
Program number: 403.220.5921
Fax: 403.282.4773
Email address: poligrad@ucalgary.ca
Web page URL: http://poli.ucalgary.ca

1. Degrees and Specializations Offered

Doctor of Philosophy (PhD)

Master of Arts (MA), thesis-based

The MA and PhD programs in Political Science are offered as full-time programs only.

2. Admission Requirements

In addition to the Faculties of Graduate Studies and Arts requirements, the Department requires:

Master of Arts

a) A minimum grade point average of 3.40 on a four-point scale over the last ten full-course equivalents taken in the applicant’s undergraduate program.

b) Normally a four-year BA in Political Science or a strong background in Political Science of at least 5.0 full-course equivalents in Political Science. Special consideration may be given to those who have not achieved this background.

c) All students whose native language is other than English are required to pass a language proficiency test: TOEFL with a minimum score of 620 (paper-based), or 105 (Internet-based); IELTS with a minimum score of 7.0; MELAB with a minimum score of 87; or PTE with a minimum score of 75.

d) Two reference letters.

e) A statement of research interests.

f) Sample of written work, preferably a paper submitted for a Political Science course.

g) Email confirmation from a potential supervisor who is interested in supervising your work.

Doctor of Philosophy

a) A minimum grade point average of 3.70 on a four-point scale over completed graduate courses.

b) Normally a Master of Arts in Political Science or a strong background in Political Science. Special consideration may be given to those who have not achieved this background.

c) All students whose native language is other than English are required to pass a language proficiency test: TOEFL with a minimum score of 620 (paper-based), or 105 (Internet-based); IELTS with a minimum score of 7.0; MELAB with a minimum score of 87; or PTE with a minimum score of 75.

d) Two reference letters.
3. Application Deadline
Deadline for the submission of completed applications is January 15 for September admission.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not normally be given for course work taken as part of another completed degree/diploma. If graduate-level courses are taken as post-BA courses, the Graduate Program Director may allow the student to claim up to 6 units (1.0 full-course equivalent) at our graduate level.

5. Program/Course Requirements
In addition to the Faculties of Graduate Studies and Arts requirements, the Department normally requires the following:

Master of Arts
a) Master of Arts students must complete a minimum of 15 units (2.5 full-course equivalents):
   • At least 6 units (1.0 full-course equivalent) must be taken in the Political Science Department at the University of Calgary.
   • Six or 9 units (1.0 or 1.5 full-course equivalents) will be in the student's major field (i.e. Canadian Politics, Comparative Politics, International Relations, and Political Thought).
   • A maximum of 6 units (1.0 full-course equivalent) can be a reading course.
   • Students must demonstrate a basic knowledge of research methods equivalent to Political Science 691. If students are required to take Political Science 691, it will be included in these 15 units (2.5 full-course equivalents). Students who have an equivalent of Political Science 691 will still be required to take 15 units (2.5 full-course equivalents).
   
   b) A written thesis.
   c) Thesis Oral Examination.

Doctor of Philosophy
a) Doctoral students must complete a minimum of 18 units (3.0 full-course equivalents):
   • At least 12 units (2.0 full-course equivalents) must be taken in the Political Science Department at the University of Calgary.
   • Six units (1.0 full-course equivalent) in each of the student's two major fields (i.e., Canadian Politics, Comparative Politics, International Relations, or Political Thought).
   • A maximum of 6 units (1.0 full-course equivalent) may be reading courses.
   • Language courses will not be considered part of the 18 units (3.0 full-course equivalents) requirement.
   • PhD Students must demonstrate a basic knowledge of research methods equivalent to Political Science 691. If students are required to take Political Science 691 it will not be considered part of the 18 units (3.0 full-course equivalents) requirement.
   
   b) A candidacy examination with a written and oral component, normally completed within twenty months of first registration.
   c) A thesis proposal, normally defended within four months of the oral candidacy exam.
   d) A demonstration of reading proficiency in a language other than English, as determined by the supervisory committee. Normally students without prior reading proficiency will be required to achieve a grade of at least "B" in 6 units (1.0 full-course equivalent) in a second language.
   e) A written dissertation.
   f) Dissertation Oral Examination.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
The department does not give graduate credit for courses taken below the 600-level, except in special cases.

8. Time Limit
Maximum completion time is four years for a master's program and six years for a doctoral program.
The Department of Political Science encourages completion of the master's within two years and the doctorate within four.

9. Supervisory Assignments
Master of Arts
Wherever possible, an incoming student should have a specific supervisor in mind when applying for the program and should initiate supervisory arrangements with this faculty member. A supervisor is determined as a result of consultations involving the student and the Graduate Program Director, normally within the first term of the student's program, but the supervisor must be appointed within 12 months of initial registration.

Doctor of Philosophy
Wherever possible, an incoming student should have a specific supervisor in mind when applying for the program and should initiate supervisory arrangements with this faculty member. Supervisory arrangements are normally completed within the first six months of the doctoral program, but the supervisor must be appointed within 12 months of initial registration. Where the matter of supervision is still under consideration, the Graduate Program Director usually serves as interim supervisor until a final decision is made.
Supervisory committees for doctoral students are struck as the result of consultations amongst the student, supervisor, and Graduate Program Director and must be established as soon as possible and no later than three months after the supervisor's appointment.

10. Required Examinations
In addition to Faculty of Graduate Studies requirements, the Department requires:

   10.1. Doctoral Candidacy Examinations
   The doctoral candidacy examination has a written and an oral component. The Department requires two written candidacy examinations, one in the student's field of thesis research and the other in the student's second chosen field of study. The examinations test the student's general knowledge of the fields as well as specific topics within these fields.

   10.2. Thesis Examinations (MA and PhD)
   Scheduling of the Examination
   All members of the Supervisory Committee (if applicable) must have reviewed the student's draft thesis document before an examination can be scheduled.

   Composition of the Committee
   The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
Doctoral students must submit and defend a written thesis proposal (no more than 20 pages in length) for approval by the supervisory committee.

12. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.
Students applying for scholarships must submit their applications to the Department by January 15.
For Department funding information, refer to: PhD funding: http://poli.ucalgary.ca/graduate/about-phd-program/phd-funding
MA funding: http://poli.ucalgary.ca/graduate/graduate-programs-offered/ma-program/ma-funding.

14. Other Information
None.

15. Faculty Members/Research Interests
General departmental research interests are listed at: http://poli.ucalgary.ca/graduate. Individual faculty members’ areas of research can be found at: http://poli.ucalgary.ca/research.

Psychology PSYC
Contact Information
Location: Administration Building, Room 255
Program number: 403.220.5659
Fax: 403.282.8249
Email address: psycgrad@ucalgary.ca
The Department of Psychology offers graduate work leading to the Master of Science and Doctor of Philosophy degrees in psychology and in clinical psychology. These degree programs are described separately in the links below.

**Psychology (PSYC) Program**

1. Degrees and Specializations Offered

   Doctor of Philosophy (PhD)

   Doctor of Science (MSc), thesis-based

   The Department accepts applicants who plan to remain full-time to the completion of their degree. The program does not offer a part-time option.

   **Specializations:**
   - Industrial/Organizational Psychology
   - Medical Imaging (Interdisciplinary)*

   *See the Calendar section on Interdisciplinary Specialization for further information.

2. Admission Requirements

   In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:
   a) A four-year undergraduate degree in Psychology or related discipline.
   b) A minimum admission grade point average of 3.40 on a four-point scale over the last 60 units (10 full-course equivalents).
   c) An undergraduate course in statistics/experimental design.
   d) An acceptable score on the Graduate Record Examination (Verbal, Quantitative, and Analytical) for students with an undergraduate degree in Psychology. Students not having an undergraduate degree in Psychology must also write the Psychology Subject Test.
   e) For applicants required to provide proof of proficiency in English, a TOEFL score of 600 (paper-based), or 100 (Internet-based test), an IELTS score of 7.5, a MELAB score of 84, or a PTE score of 70.
   f) Two reference letters.

3. Application Deadline

   Deadlines for the submission of completed applications:
   - December 5 for May or September admission
   - October 1 for January admission

   The Industrial Organizational Program accepts applications for a September start date only.

4. Advanced Credit

   The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements

   In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:
   **Master of Science**
   Master’s students must take no fewer than 18 units (3.0 full-course equivalents), 6 units (1.0 full-course equivalent) of which must come from Psychology 607, 611, 613, 615, 617, or 619; and at least 6 units (1.0 full-course equivalent) of which must come from Psychology 601, 620, 630, 639, 700, 710, 720, 730, or 739 over their 24-month program (courses other than Psychology 601 may be repeated for credit). A student may take seminar courses from other departments instead of courses in the second list above, upon approval of their supervisor and the Graduate Program Director.
   **Doctor of Philosophy**
   Doctoral students shall take no fewer than 18 units (3.0 full-course equivalents) while in the program. The Supervisor and the Director of Graduate Studies, Department of Psychology, must approve all courses. Incoming doctoral students must demonstrate that they have an adequate background in statistics and methodology (including computer applications). Those needing remedial work may be required by the Department of Psychology to take particular courses.
   **Industrial Organizational Specialization**
   I/O students in the MSc program are required to take 24 units (4.0 full-course equivalents) with 6 units (1.0 full-course equivalent) in research methods and statistics, 12 units (2.0 full-course equivalents) in I/O Psychology (639, 739), and 6 units (1.0 full-course equivalent) outside the I/O area. I/O students in the PhD program are required to take 12 units (2.0 full-course equivalents) in I/O Psychology (739), and 6 units (1.0 full-course equivalent) outside of I/O Psychology that were not completed during the MSc program.
   **Medical Imaging Specialization**
   The specialization is open to students interested in pursuing research in cognitive and clinical neuroscience. This specialization requires completion of a course sequence in Medical Imaging (see the MEDI section for further details). MSc students must take a minimum of two courses (the core and a foundational course). PhD students would take three courses (including the core, a foundational and an elective course). PhD students previously completing the MSc Specialization in Medical Imaging will be required to complete one elective course in medical imaging.
   These requirements are in addition to the core requirements of the Psychology graduate program. The Medical Imaging courses would count towards Psychology graduate program elective courses.

6. Additional Requirements

   None.

7. Credit for Undergraduate Courses

   Credit may be given for 500-level undergraduate courses.

8. Time Limit

   Expected completion time is two years for the Master of Science program and three years for the doctoral program. (Particular circumstances can be taken in to account).

9. Supervisory Assignments

   An interim supervisor is assigned to each student at the time of admission. In no case will a student be admitted if an appropriate supervisor is not expected to be available. The shift from interim to permanent supervisor formally takes place at the end of the first year. The Director of Graduate Studies, Department of Psychology, must approve the permanent supervisor.

   Master’s level students must have a supervisory committee consisting of the supervisor plus two other faculty members.

10. Required Examinations

    In addition to Faculty of Graduate Studies regulations for the thesis examination, the program requires:
    **Thesis Examination**
    Thesis oral examinations are open.
    **Scheduling of the Examination**
    All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.
    **Composition of the Committee**
    The Internal Examiner must be external to the home program.
    Core faculty members in the Psychology and Clinical Psychology programs are not eligible to serve as Internal Examiner; however, adjunct faculty members are eligible to serve in this capacity.
    **Candidacy Examination**
    A doctoral student will normally be required to take the candidacy examination within the first 17 - 20 months of the program. The candidacy examination has a written and an oral component. The written examination consists of one, two or three questions, determined by the supervisory committee that must be answered in no more than 30 double-spaced pages in total (word-processed, 12 pt font, reference list extra). Students must consult with their supervisors. The oral examination questions will be based on the answers to the written questions and the candidacy reading list.

11. Research Proposal Requirements

    Students whose research involves human subjects must receive approval from the appropriate departmental or University Ethics Review Committee before beginning data collection.

    All Master of Science students must formally present a thesis proposal not more than 14 months after admission to the program. The proposal must be typed and 10 to 30 double-spaced pages (12 pt font, reference
list extra). Students must consult with their supervisors. The supervisory committee must approve the thesis proposal. All Doctor of Philosophy students must formally present a thesis proposal not more than 16 months after admission to the program. The proposal must be typed and 10 to 30 double-spaced pages (12 pt font, reference list extra). Students must consult with their supervisors. The supervisory committee must approve the thesis proposal.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.

Students applying for scholarships are advised to submit their applications to the Department by January 15.

14. Other Information
Initial inquiries may be made to the Director of Graduate Studies, Department of Psychology.

15. Faculty Members/Research Interests
The active research interests of the faculty can be found at http://www.psychology.ucalgary.ca.

Clinical Psychology (CPSY) Program

Contact Information
Location: Administration, Room 255
Program number: 403.220.5659
Fax: 403.282.8249
Email address: psycgrad@ucalgary.ca
Web page URL: http://www.psychology.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based

The purpose of the graduate program in Clinical Psychology is to prepare students for careers as doctoral-level clinical psychologists in research, academic, and applied settings. In the course of doctoral training students also are required to complete the Master of Science (MSc) degree. However, consistent with its goal of doctoral training, the program only admits students who wish to pursue the doctoral degree.

Students registered in Master’s thesis-based and doctoral programs will be considered full-time. The program does not offer a part-time option.

2. Admission Requirements
In addition to the Faculties of Graduate Studies and Arts requirements, the program requires:

a) An honour’s degree in psychology (or equivalent) with a minimum grade point average of 3.60 on a four-point scale in the last 60 units (10 full-course equivalents) to be considered for entry, although competition for the program is such that higher grade point averages are typical of students who are admitted.

b) Scores on the Aptitude (Verbal/Quantitative) dimensions of the Graduate Record Examinations (GRE). Please note that students with scores less than the 50th percentile on the Verbal and Quantitative subtests will not normally be admitted.

c) A statement of research and professional interests, including the specification of prospective research supervisors from among current Program faculty.

d) For applicants required to provide proof of proficiency in English, a TOEFL score of 600 (paper-based), or 100 (Internet-based) test, or an IELTS score of 7.5, or a MELAB score of 84, or a PTE score of 70.

e) Two reference letters.

3. Application Deadline
The deadline for complete applications is December 5 for September admission.

4. Advanced Credit
Advanced credit may be given for up to 12 units (2.0 full-course equivalents) of graduate work, if this work is consistent with the program’s requirements.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:

The Program outline is as follows: Year 1
Psychology 650, 651, 659, 660, 671, 673, 615, thesis work

Year 2
Psychology 601, 650, 681, 683, plus a graduate-level Psychology Statistics course or Methodology course (Psychology 617 or equivalent), completion of the thesis

Year 3
Psychology 750, 760, a graduate-level breadth course, the Candidacy Examination, thesis work

Year 4
Psychology 750, 762, thesis work

Year 5
Pre-Doctoral Clinical Internship Psychology 798, and completion of thesis oral and written requirements

Breadth course requirements may be satisfied through Psychology 750, courses offered by the Department of Psychology, or by obtaining advanced credit for undergraduate courses. Please see program handbook for details.

The prerequisite for all Clinical Program courses (unless otherwise noted) is consent of the Program.

Successful completion of years one and two, plus the Master of Science thesis, constitute the requirements of the Master of Science degree. Program students must formally apply and be approved by the program and the Faculty of Graduate Studies for admission to the doctoral program upon completion of Master of Science requirements.

6. Additional Requirements
Clinical suitability and professional conduct.

7. Credit for Undergraduate Courses
Credit for breadth courses may be given if the applicant has two senior undergraduate courses in that area. Credit for Psychology 601 may be given if the applicant has a senior undergraduate course in History and Systems of Psychology.

8. Time Limit
It is expected that students will complete the MSc thesis within two years. Students in the MSc program must complete all requirements within four registration years. Students who have taken three years to complete all requirements for the master’s degree will normally not be admitted into the doctoral program. It is expected that students will complete the doctoral program within 5 years. Maximum time to completion for the MSc is 4 years and for the doctoral program is 6 years.

9. Supervisory Assignments
Program students must have a research supervisor at all times. Supervisors are arranged by mutual consent of student and faculty member, and are consistent with the focus of the student’s research work. Master’s level students must have a supervisory committee consisting of at least three members, with at least one who is a member of the core clinical faculty. Doctoral candidates must have a supervisory committee of at least three members.

10. Required Examinations
In addition to Faculty of Graduate Studies requirements, the program requires:

Candidacy
In addition to course-specific written requirements, students must sit a written and oral doctoral candidacy examination in the third year of their program (i.e., the first year of doctoral studies). The oral candidacy exam will focus on questions on general clinical psychology and research knowledge. Questions on the research proposal will not be included in the oral candidacy examination.

Thesis Examination
Final thesis oral examinations are open.

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner must be external to the home program.

Core faculty members in the Psychology and Clinical Psychology programs are not
eligible to serve as Internal Examiner; however, adjunct faculty members are eligible to serve in this capacity.

11. Research Proposal Requirements
Students in the program must complete both a Master's thesis and doctoral thesis, according to the criteria set by the Faculty of Graduate Studies. These research projects typically involve the design of a research question and research project, the collection, analysis and interpretation of original data, and the presentation of a written document consistent with good scholarship. Students whose research involves human subjects must receive approval from the appropriate departmental or University Ethics Review Committee before beginning data collection.

12. Special Registration Information
Admission to this Program is normally only available in September of each year.

13. Financial Assistance
Financial assistance may be available to qualified students. Applicants and program students are strongly encouraged to apply for internal and external awards. For information on Awards, see the Awards and Financial Assistance section of this Calendar. Students applying for scholarships must submit their applications to the Department by January 15.

14. Other Information
The program subscribes to the scientist-practitioner model of clinical training as described in the Canadian Psychological Association's requirements for program accreditation, and emphasizes the integration of course work, research, and clinical training. The program has been fully accredited by CPA for six years (2011-2017).

15. Faculty Members/Research Interests
https://psychology.ucalgary.ca/graduate/program-clinical-psychology.

Public Policy PPOL

Contact Information
Location: School of Public Policy
Downtown Campus
906 8th Avenue SW
5th Floor
Calgary, Alberta
T2P 1H9
Program number: 403.210.3802
Fax: 403.210.6939
Email address: mpp@ucalgary.ca
Web page URL: http://www.policyschool.ca

1. Degrees and Specializations Offered
Master of Public Policy (MPP), course-based
Master of Public Policy/Master of Business Administration (MBA/MPP), combined degree, course-based
Master of Public Policy/Juris Doctor (JD/MPP), combined degree, course-based
MPP
The MPP is a 12-month professional degree program offered for full-time study with limited seats for part-time study (Director approval required).

Combined MBA/MPP
The MPP/MBA program is normally restricted to full-time study. It allows students to obtain both degrees in a significantly shorter time frame than if they are taken separately.

Combined JD/MPP
The JD/MPP program is normally restricted to full-time study. It allows students to obtain both degrees in a significantly shorter time frame than if they are taken separately.

2. Admission Requirements
Master of Public Policy
In addition to the Faculty of Graduate Studies requirements, the School requires:

a) A minimum 3.30 grade point average (on the four-point scale) in the last two years of program or over the last 60 units (10 full-course equivalents).
b) A current resume.
c) A personal statement outlining the applicant’s career goals and how the applied-for program would help achieve those goals.
d) For students required to prove proficiency in English, a minimum TOEFL score of 600 (paper-based) or 100 (Internet-based test) or a score of 7.0 on the IELTS.

Combined MBA/MPP
Students must meet the admission requirements for the Faculty of Graduate Studies and those for the MBA and MPP programs. Please consult the MBA Admissions Officer or the MPP Program Manager for more information.

A separate application for the MPP and for the MBA is required for the combined MBA/MPP program. See deadlines for each program.

Combined JD/MPP
Students must meet the admission requirements for the Faculty of Graduate Studies and those for the JD and MPP programs. Please consult the JD Student Services Coordinator or the MPP Program Manager for more information.

A separate application for the MPP and for the JD is required for the combined JD/MPP program. See deadlines for each program.

3. Application Deadline
Deadline for the submission of completed applications for the MPP program is March 1 for Canadians and Permanent Residents of Canada and February 1 for International Students.

A separate application for the MPP and for the MBA is required for the combined MBA/MPP program and a separate application for the MPP and for the JD is required for the combined MBA/JD program. See deadlines for each program.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not normally be given for course work taken as part of another completed degree/diploma. If graduate-level courses are taken as post-BA courses and not used as credit towards another degree, the School may allow the student to claim up to 6 units (1.0 full-course equivalent) at our graduate level towards the MPP requirements should the student be admitted into the MPP program.

5. Program/Course Requirements
In addition to the Faculty requirements, the School requires that all students complete the following:

Master of Public Policy
Please note: All Public Policy courses are restricted to Master of Public Policy students. Students outside of the Master of Public Policy program must obtain permission to register in courses through the School of Public Policy. Core courses are held evenings throughout the academic year. Some exceptions may apply.

a) Two preparatory/foundation courses (Public Policy 601 and 603) during the last two weeks of August and during Fall Block Week prior to the start of the Fall Term. Satisfactory performance in these courses is required for continuation in the MPP program.

b) An effective writing and research course (Public Policy 613) during the September Block Week.

c) The following eight core courses:
Public Policy 605: Markets and Public Policy
Public Policy 607: Politics and Collective Choice
Public Policy 609: Decision Analysis
Public Policy 615: Public Finances
Public Policy 617: Regulation and the Law
Public Policy 619: Governance, Institutions and Public Policy
Public Policy 621: Communicating Policy
Public Policy 623: Capstone Project (Note: Credit/Fail – The capstone project is not included in final grade point calculation)

4) Two elective courses:

The elective courses must be selected from graduate-level courses offered at the University of Calgary. In selecting elective courses students need to be aware that they must satisfy the prerequisites for those courses. The two elective courses should be related in such a way that they form a concentration in an area of public policy.

See “Approved Graduate Elective Courses” below for suggested electives. The choice of elective courses must in all cases be approved by the Academic Director.
Public Policy 611. Independent Study. Various sections of this independent study course covering different topic areas are typically offered. These are reserved for Master of Public Policy students. School of Public Policy permission required for all other students. Please refer to the online course listings for details on topics covered each term.

Combined MBA/MPP

Students admitted to the MPP/MBA will normally focus mostly on courses for the MBA during the first year and mostly on MPP courses in year two. Typically, the remaining courses will be completed in the first term of year three. Please consult the MBA Admissions Officer or the MPP Program Manager for more information.

Combined JD/MPP

In the first year of the combined program students would complete all of the first year compulsory courses in Law. During the Summer Term of year 1, students in the joint program would complete the two MPP Foundation courses in economics and empirical methods (these may be waived for students with adequate academic backgrounds in these areas). In the second year of the Joint Program, students would focus on completing the compulsory core Law courses and five Public Policy core courses. The latter will vary depending on the student’s area of specialization but would typically include: Public Policy 605, 607, 609, 615 and 619. Up to two elective (non-core) Public Policy courses may be substituted with approval of the JD/MPP program committee, consisting minimally of the program directors of the two programs. In the Summer period (including Spring Intersession) between years 2 and 3 students would complete Public Policy 621 and 623. In year 3, students would complete the upper level JD compulsory course(s) and required International and Writing requirements, along with enough approved Law or Public Policy electives. It is expected that most students will complete in less than three and one-half calendar years by attending courses every session. Please consult the MPP Program Manager or the JD Student Services Coordinator for more information.

Copyediting

The School of Public Policy does not allow copyediting on students’ work.

6. Additional Requirements

The School hosts a variety of Community Outreach events year-round that attract global policy experts and practitioners. As a feature of the MPP program, The School also puts on a Speaker Series specifically for students in the program. These talks feature prominent policy figures in an interactive environment.

The School’s event series represents a tremendous opportunity for students to network with policy experts from business and government. For this reason, students are expected to attend as many events as possible throughout the academic year.

7. Credit for Undergraduate Courses

The School does not give graduate credit for courses taken below the 600-level, except in special cases.

8. Time Limit

Maximum completion time for the MPP is four years.

9. Supervisory Assignments

All MPP students in the program will be guided by faculty holding appointments to the School.

10. Required Examinations

No additional examinations outside of the courses are required.

11. Research Proposal Requirements

No additional research requirements outside of the courses are required.

12. Special Registration Information

None.

13. Financial Assistance

Students admitted to the MPP program will automatically be considered for financial awards from the School of up to $15,000 per student. Other financial assistance may be available to qualified students. For information on awards, see the website for the School and the Awards and Financial Assistance section of this Calendar.

14. Other Information

None.

15. Faculty Members/Research Interests

Current research interests in the School can be found at: http://www.poliscyschool.ca.

Samples of Graduate Elective Courses for the MPP

Note: Not all elective courses may be available in all years and availability may depend on student’s undergraduate program. Other elective courses not listed here may be considered. In all cases the choice of elective courses must be approved by the Academic Director.

Courses offered by the Department of Communication, Media and Film Studies

Communication and Culture 605: Organizational Communication
Communication and Culture 619: Communication and Cultural Industries
Communication and Culture 623: Social Contexts of Technology
Communication and Culture 627: Media and Politics
Communication and Culture 641: Intercultural and International Communication

Courses offered by the Department of Economics

Economics 619: Economics of International Commercial Policy
Economics 621: International Trade
Economics 627: Energy in the Production Sector of the Economy
Economics 635: Regulatory Economics
Economics 653: Public Revenue Analysis
Economics 655: Cost/Benefit Analysis
Economics 667: Seminar in Industrial Organization
Economics 675: Advanced Topics in Natural Resource Economics
Economics 677: Seminar in Economics of the Environment
Economics 679: Health Economics I
Economics 681: Health Economics II

Courses offered by the Department of Political Science

Political Science 617: Advanced Political Theory
Political Science 619: War and Interpretation
Political Science 631: Parties Elections and Representation
Political Science 641: Selected Topics in Public Law
Political Science 651: Policy Studies
Political Science 653: Gender and Public Policy
Political Science 683: Advanced Studies in Foreign Policy
Political Science 685: Strategic Studies
Political Science 689: Unconventional Warfare

Courses offered by the Department of Sociology

Sociology 603: Seminar in Sociology of Health and Illness
Sociology 653: Seminar on Urban Sociology
Sociology 667: Seminar on Ethnic Relations
Sociology 671: Seminar on the Sociology of Families
Sociology 677: Seminar in Sociology of Gender Relations

Courses offered by the Faculty of Social Work

Social Work 632: Social Policy and Social Justice
Social Work 665: Influencing Policy Development
Social Work 679: Special Topics Seminar I (Interested students should contact the Faculty of Social Work for a list of topics to be examined)

Courses offered by the Faculty of Law

Law 577: Tax Policy
Law 624: Environmental Law and Ethics
Law 630: International Petroleum Transactions
Law 648: Securities Law

Courses offered by Haskayne School of Business

Human Resources and Organizational Dynamics 601: Managing Human Resources
Human Resources and Organizational Dynamics 691: Project Team Building and Interpersonal Skills
Human Resources and Organizational Dynamics 721: Advanced Leadership and Technical Skills
Human Resources and Organizational Dynamics 745: Cross-Cultural Leadership and Human Resources Management
Strategy and Global Management 601: Strategic Management I

Courses offered by Cumming School of Medicine, Department of Community Health Sciences
Community Health Sciences 681: Health Economics I

Religious Studies RELS
Contact Information
Location: Social Sciences Building, Room 558
Program number: 403.220.4831
Fax: 403.210.9191
Email address: relsgrad@ucalgary.ca
Web page URL: www.clare.ucalgary.ca

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Arts (MA), thesis-based
Specializations:
- Eastern Religions
- Nature of Religion
- Western Religions

Feasibility of areas within these specializations depends on available research resources and faculty expertise; refer to section 15 of this entry for more information.

2. Admission Requirements
In addition to the Faculties of Graduate Studies and Arts requirements, the Department requires:

Master of Arts
a) An admission grade point average of 3.30 or higher on a four-point scale and a minimum of 36 units (6.0 full-course equivalents) in Religious Studies (or their equivalents), usually including at least 6 units (1.0 full-course equivalent) from each of the three streams (Eastern, Western, Nature), as determined by the graduate committee.
b) A reading knowledge of a modern language other than English or of a classical language appropriate to the thesis research. The language requirement normally should be met before admission to the master’s program. If this is not the case, the language requirement should be met during the students’ course of study in the master’s program.
c) Two reference letters.
d) Applicants must include in their application package a sample of written work (e.g. a recent research essay).

Doctor of Philosophy
a) A degree comparable to the University of Calgary Religious Studies Master of Arts with a minimum grade point average of 3.50 on a four-point scale.
b) Two reference letters.
c) Applicants must include in their application package a sample of written work (e.g. a recent research essay).

Students with an Honours Bachelor of Arts degree in Religious Studies, a grade point average of 3.70 or higher, and evidence of competence in the required languages may be admitted directly into the doctoral program or may be considered for transfer to the doctoral program after the first year of the master’s program. Such applicants must include in their application package a detailed statement (10 pages) of the purpose, field, and course of study to be pursued in the program.

3. Application Deadline
Deadline for the submission of complete applications is January 7 for September admission.

4. Advanced Credit
Any requests for advanced credit must be made when applying for admission. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission. Graduate course work completed before admission and not counted toward satisfying undergraduate degree requirements will be assessed by the Departmental Graduate Committee to determine course requirements.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department normally requires:

Master of Arts (thesis-based)
a) Five courses (in addition to individualized requirements that may be set by the Departmental Graduate Committee at the time of admission):
- Religious Studies 601 – Studies in Western Religions
- Religious Studies 603 – Studies in Eastern Religions
- Religious Studies 605 – Studies in the Nature of Religion
- Religious Studies 607 – Supervised Master’s Thesis Inquiry
- Religious Studies 609 – Critical Discourses in the Study of Religion
b) A thesis proposal to be presented to the Graduate Studies Committee for evaluation and approval before the second annual registration.

Doctor of Philosophy
a) For students with a Master of Arts in Religious Studies, five courses are required (in addition to individualized requirements that may be set by the Departmental Graduate Committee at the time of admission):
- Religious Studies 701 – Studies in Western Religions
- Religious Studies 703 – Studies in Eastern Religions
- Religious Studies 705 – Studies in the Nature of Religion
- Religious Studies 707 – PhD Departmental Colloquium
- Religious Studies 709 – Advanced Critical Discourses in the Study of Religion

6. Additional Requirements
PhD Language Requirements
Before the written candidacy examination, doctoral students must demonstrate a reading knowledge of at least two languages other than English. At the discretion of the Department and upon recommendation of the Graduate Director, competency in additional languages may be required. The foreign language requirement may be satisfied in two ways:
a) Successful completion (final grade of "B" or higher) at some stage of the student’s university program of at least 12 units (2.0 full-course equivalents) in a first language other than English, and 6 units (1.0 full-course equivalent) in a second language; or
b) Successful completion (grade of "B" or higher) of a language examination administered by the Department of Classics and Religion by another department or by another department on behalf of the Department of Classics and Religion. When the test is administered by another department, it will consist of a passage or passages selected by the supervisor and/or any requirements that the other department may deem necessary; the test will be graded by the examiner(s) of the other department. When members of the Department of Classics and Religion administer the test, the examination questions will be determined, administered, and graded by two members of the Department (one of whom normally will be the supervisor) who have expertise in the language under consideration. In the event that a second person with expertise...
in the required language is not available, the Department Head may seek an expert from outside the department.

7. Credit for Undergraduate Courses
Credit for undergraduate courses will be given only upon approval of the Departmental Graduate Committee.

8. Time Limit
Expected completion time for full-time students is two years in the master’s program and four years in the PhD program. Maximum completion time is four years in the master’s program and six years in the doctoral program.

9. Supervisory Assignments
The Departmental Graduate Committee assigns an advisor (interim supervisor) when an applicant is recommended for admission to the Faculty of Graduate Studies. A regular supervisor must be assigned by the beginning of the second registration year.

10. Required Examinations
In addition to the Faculty of Graduate Studies requirements, the Department requires:

Candidacy
The doctoral candidacy examination includes two written components and one oral component. Each written candidacy examination focuses on one aspect of the student’s doctoral research in Religious Studies:
Examination A – theory and method in the study of religion
Examination B – religious beliefs and practices in context
The written examinations are based on a bibliography established by the candidate in consultation with the supervisory committee and must be taken no later than 28 months after admission to the program. The oral examination is based on the bibliography, the written examinations and the thesis proposal.

Thesis Examination
Final thesis oral examinations are open. Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the material related to the thesis, before an examination can be scheduled.
Composition of the Committee
The Internal Examiner must be external to the home program.

11. Research Proposal Requirements
The thesis proposal must be approved by each member of the student’s supervisory committee, acknowledged by individual signature and date on the front cover, and by the Departmental Graduate Committee, no later than 24 months after admission to the program with a completed master’s degree. The proposal should be no more than 20 pages in length and must obtain all required approvals before the student is allowed to take the candidacy examination.

An approved thesis proposal is the basis of consensus on a candidate’s research program. When, as sometimes happens in the course of a research project, the research focus or methodology shifts markedly:
a) The candidate will forward a letter to the supervisory committee to document the shift and the reason for the shift. The student shall compose an addendum, to be appended to the initial proposal, detailing the new direction and supplying any necessary additions to the bibliography.
b) The supervisor, on behalf of the supervisory committee, will reply to the revised proposal indicating acceptability and/or required revisions.

Students should be aware that such shifts may entail revision of the supervisory committee structure.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar or inquire of the Department.

Students applying for scholarships must submit their applications to the Department by February 1.

14. Other Information
None.

15. Faculty Members/Research Interests
Details concerning the research areas of individual professors may be obtained from the program website at www.clare.ucalgary.ca.

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Post-Master’s Diploma in Advanced Studies in Social Work (PMDip)
Master of Social Work (MSW), course-based and thesis-based
MBA/MSW, course-based

Depending upon location and selected specialization, the course-based MSW can be completed on full-time or part-time basis.

Specializations:
- Clinical Social Work Practice
- Leadership in the Human Services
- International and Community Development

PhD
The PhD is a research-based degree and is intended to produce highly qualified social work researchers and teachers. The aim of developing such advanced scholarly and research skills is to equip doctoral students for future roles as leaders of the social work profession. Students complete nine courses, a candidacy exam, and a thesis. The PhD is Calgary-based.

PMDiploma
The Faculty of Social Work offers a Post-Master’s Diploma (PMDip) in Advanced Studies in Social Work. Students complete eight courses. The PMDip is Calgary-based.

MSW
The MSW programs are available for both BSW graduates and graduates from other disciplines. The objective of the MSW program is to prepare students for advanced professional practice in social work. The Faculty of Social Work offers MSW programs in Calgary, Edmonton, and Lethbridge. In all locations, students choose between the course-based or the thesis route to the degree. The course-based route is appropriate for students who intend to provide direct service in the field. The thesis route is appropriate for students who intend to proceed to doctoral studies and/or anticipate a career requiring advanced program evaluation or research skills.

In Calgary, MSW students are admitted annually and choose one of three Specializations: Clinical Social Work Practice, Leadership in the Human Services, or International and Community Development. Students without an undergraduate degree in social work are admitted to a two-year program, while BSW graduates are admitted directly into a one-year Specialization program.

In Edmonton, the Faculty of Social Work offers the Clinical Social Work Practice Specialization. Program delivery blends on-site and web-based formats. On-site courses are offered on Friday evenings and Saturdays, four times per term, and week-long intensives at the beginning of every fall term and some winter terms. Students may continue working while registered in the program but must ensure they are available for full-time,
weekend practica when scheduled. Students with a BSW complete the Clinical Special-
ization program in two years. Students with undergraduate degrees in other disciplines
complete a Foundation program followed by the Clinical Specialization program, requir-
ing a total of four years of study. Admission occurs in odd-numbered years (i.e., 2017,
2019, etc.).

In Lethbridge, the Faculty of Social Work offers the Clinical Social Work Practice Spec-
alization to students with a BSW. Program delivery blends web-based and on-site
formats, allowing students from Lethbridge and southern Alberta to continue working
while pursuing graduate education. Students complete the program in two years. Admis-
sion occurs in odd-numbered years (i.e., 2017, 2019, etc.).

The MSW course-based Specialization in Leadership in the Human Services is admin-
istered through Calgary as a blended pro-
gram and is accessible to students regard-
less of home location. In the first year of the
program, two required courses are offered
at the University of Calgary main campus for
one week in July. In the second year of the
program, one required course is delivered
on campus. The remaining courses are of-
ered via distance delivery. The program is
designed to be completed in two years of
full-time study.

MSW MBA

The Faculty of Social Work and the Has-
kayne School of Business offer a combined
program leading to the Master of Social
Work/Master of Business Administration
(MSW/MBA) degree. Offered from the
Calgary location, the Master of Social Work/
Master of Business Administration (MSW/
MBA) program is designed to prepare
students for business-related social work
careers. This program is available only to
full-time MSW Specialist students. A
Post-baccalaureate Certificate and
Diploma in Mental Health and Addictions
is offered in Calgary.

2. Admission Requirements

Students are responsible for meeting the admission requirements as established by
the Faculty of Graduate Studies. In addition to Faculty of Graduate Studies require-
ments, the Faculty of Social Work requires the following:

For PhD and PMDip:
- A Master of Social Work or equivalent
degree with a minimum grade
point average of 3.50 on a four-point scale.
- A study plan outlining the applicant’s edu-
cational goals, career expectations, research
proposal and research experience.
- Substantial professional experience.
- A sample of written work including, for
example, published and/or unpublished
scholarly papers and/or professional reports.
- For applicants required to provide proof
of proficiency in English submit a minimum
TOEFL score of 580 (paper-based) or 92
(Internet-based test); or IELTS score of 7.0;
or MELAB score of 90; or Level 3 on the EAP
program.
- Three reference letters.

For MSW course-based
In Calgary and Edmonton:
- A Bachelor of Social Work degree, or
a four-year bachelor’s degree from another
discipline.
- The equivalent of two years of full-time
paid or volunteer work in the human services
field.
- A study plan outlining the applicant’s edu-
cational goals and career expectations.
- For applicants required to provide proof
of proficiency in English: a minimum TOEFL
score of 580 (paper-based) or 92 (Internet-
based test); or IELTS score of 7.0; or MELAB
score of 90; or Level 3 on the EAP program.
- Two reference letters.

In Lethbridge:
- A Bachelor of Social Work degree.
- The equivalent of two years of full-time
paid or volunteer work in the human services
field.
- A study plan outlining the applicant’s edu-
cational goals and career expectations.
- For applicants required to provide proof
of proficiency in English: a minimum TOEFL
score of 580 (paper-based) or 92 (Internet-
based test); or IELTS score of 7.0; or MELAB
score of 90; or Level 3 on the EAP program.
- Two reference letters.

For MSW thesis-based
In Calgary and Edmonton:
- A Bachelor of Social Work degree, or
a four-year bachelor’s degree from another
discipline.
- The equivalent of two years of full-time
paid or volunteer work in the human services
field.
- A study plan outlining the applicant’s edu-
cational goals and career expectations.
- For applicants required to provide proof
of proficiency in English: a minimum TOEFL
score of 580 (paper-based) or 92 (Internet-
based test); or IELTS score of 7.0; or MELAB
score of 90; or Level 3 on the EAP program.
- Two reference letters.
- Three reference letters.

f) Two reference letters.

In Lethbridge:
- A Bachelor of Social Work degree.
- The equivalent of two years of full-time
paid or volunteer work in the human services
field.
- A study plan outlining the applicant’s edu-
cational goals and career expectations.
- For applicants required to provide proof
of proficiency in English: a minimum TOEFL
score of 580 (paper-based) or 92 (Internet-
based test); or IELTS score of 7.0; or MELAB
score of 90; or Level 3 on the EAP program.
- Two reference letters.

3. Application Deadline

Final submission deadlines are as follows:
PhD Program: January 31 for September
admission.
Calgary MSW Programs: December 1 for
September admission to the Clinical Social
Work Practice and International and Com-
munity Development Specializations, July
admission to the Leadership in Human Ser-
vices Specialization (distance delivery), and/
or July or September admission to MSW/
MBA (depending upon Specialization).

The Calgary MSW Program uses a rolling
admission policy; that is, qualified applicants
may be offered a space in a program prior to
final application submission deadlines.
Edmonton and Lethbridge MSW Programs:
January 31 for September admission in odd-
numbered years (2017, 2019, etc.).

4. Advanced Credit

Request for advanced credit must be made as
part of the application process. Credit will
not be given for coursework taken as part of
another completed degree/diploma or for
courses taken to raise the grade point aver-
Program Descriptions

Social Work SOWK

age for admission purposes. For all Faculty of Social Work graduate programs, advanced credit may be granted for not more than the equivalent of 9 units (1.5 full-course equivalents).

Approval of advanced credit will be based on an evaluation of the applicant’s particular circumstances and the fit between the prior coursework and the applicant’s program of study in the MSW or PhD. Students exploring the possibility of Advanced Credit should contact the Student Advisor in the program location to which they are applying (Calgary, Edmonton, or Lethbridge).

5. Program/Course Requirements

Please note that not all programs/courses are offered every semester. Students should consult the timetables and program curriculum plans located on the web for sequence and availability of courses.

In addition to Faculty of Graduate Studies requirements, the Faculty of Social Work requires:

PhD

A minimum of 27 units (4.5 full-course equivalents);

Required core courses include:

• Social Work 741: Research Foundations: Epistemology and Professional Knowledge-Building
• Social Work 743: Theory, History, and Philosophy: Values, Ethics and Professional Beliefs
• Social Work 745: Research Methods I: Quantitative
• Social Work 747: Research Methods II: Qualitative
• Social Work 721: Integrative Research Colloquia

Note: Social Work 721 can only be taken once all other required courses have been completed.

Twelve units (2.0 full-course equivalents) options relevant to the student’s area of specialization. Option courses may be taken outside of the Faculty of Social Work, depending on the student’s needs and course availability. All courses taken external to the Faculty of Social Work must have prior approval from the Faculty of Social Work.

Thesis-based students complete nine specialization courses (27 units or 4.5 full-course equivalents) and the MSW Capstone. Courses include:

a) Five core courses (see specific courses listed by specialization, below).

b) Three option courses (option course requirements and offerings vary by year, program and location).

c) Social Work 696: Advanced Practicum (525 hours; 6 units or 1.0 full-course equivalent).

MSW for students with a BSW:

Course-based students complete ten specialization courses (30 units or 5.0 full-course equivalents) and the MSW Capstone. Courses include:

a) Five core courses (see specific courses listed by specialization, below).

b) Three option courses (option course requirements and offerings vary by year, program and location).

c) Social Work 696: Advanced Practicum (525 hours; 6 units or 1.0 full-course equivalent).

MSW for students with a Bachelor’s degree in a discipline other than social work:

Nine foundation courses (27 units or 4.5 full-course equivalents), as follows: (note that foundation courses must be completed before students advance to specialization courses)

• Social Work 621: History and Foundation of the Profession
• Social Work 625: Practice with Individuals, Families and Groups
• Social Work 627: Practice with Organizations and Communities
• Social Work 629: Professional Communication and Interviewing
• Social Work 632: Social Policy and Social Justice
• Social Work 637: Human Behaviour in the Environment
• Social Work 641: Models of Practice
• Social Work 645: Issues in Social Work Research
• Social Work 633: Foundational Field Practicum (426 hours)

and

ten specialization courses (30 units or 5.0 full-course equivalents) and the MSW Capstone for course-based students. Courses include:

a) Five core courses (see specific courses listed by specialization, below).

b) Three option courses (option course requirements and offerings vary by year, program and location).

c) Social Work 696: Advanced Practicum (525 hours; 6 units or 1.0 full-course equivalent).

or

Nine specialization courses (27 units or 4.5 full-course equivalents) and the MSW thesis for thesis-based students. Courses include:

a) Five core courses (see specific courses listed by specialization, below).

c) One option course (option course requirements and offerings vary by year, program and location).

d) Social Work 696 Advanced Practicum (525 hours; 6 units or 1.0 full-course equivalent).

Clinical Social Work Practice Specialization

(available in Calgary, Edmonton and Lethbridge)

Required core courses:

• Social Work 651: Policy as Context for Clinical Work
• Social Work 653: Comparative Approaches to Change
• Social Work 657: Clinical Social Work Application
• Social Work 659: Evidence and Clinical Practice
• Social Work 697: Diversity, Oppression and Social Justice
• Social Work 696: Advanced Practicum (525 hours; 6 units or 1.0 full-course equivalent)

Leadership in the Human Services (LHS) Specialization (distance delivery; offered in Calgary only)

Required core courses:

• Social Work 665: Influencing Social Policy
• Social Work 667: Leadership Theories in Action
• Social Work 669: Leading Organizations and Communities
• Social Work 693: Research as a Foundation for Leadership
• Social Work 697: Diversity, Oppression and Social Justice
• Social Work 696: Practicum (525 hours; 6 units or 1.0 full-course equivalent)

In the LHS Specialization, option courses are predetermined, as follows:

• Social Work 685: Becoming an Evidence-Based Leader
• Social Work 679.10: Maximizing Staff Performance through Supervision
• Social Work 679.18: Practice Skills for Leading and Supervising in Human Services Organizations

International & Community Development

(available in Calgary only)

Required core courses:

• Social Work 671: Social Policy
Program Descriptions

- Social Work 673: International Social Development OR
- Social Work 699.21: Advanced Community Development Theory and Practice I
- Social Work 675: Advanced International Social Work Modules OR
- Social Work 699.22: Advanced Community Development Theory and Practice II
- Social Work 677: Social Work Research for International and Community Methods
- Social Work 697: Diversity, Oppression and Social Justice
- Social Work 699.21: Advanced Community Development Theory and Practice I
- Social Work 699.22: Advanced Community Development Theory and Practice II
- Social Work 696: Advanced Practicum (525 hours, usually completed outside of Canada in the Summer Term (including Spring Intersession) following completion of core courses; 6 units or 1.0 full-course equivalent).

In the International & Community Development Specialization there is one option course.

**MSW/MBA**

a) MSW Specialization year: a minimum of 24 units (4.0 full-course equivalents) are required:
- Core specialization courses (15 units or 2.5 full-course equivalents)
- Option (3 units or 0.5 full-course equivalent)
- Social Work 696 for 525 hours (6 units or 1.0 full-course equivalent)

b) MSW Capstone

c) MBA courses (48 units or 8.0 full-course equivalents)

Required MBA courses include:
- Accounting 601: Introductory Financial Accounting
- Accounting 603: Management Accounting
- Finance 601: Managerial Finance
- Human Resources and Organizational Dynamics 601: Managing Human Resources
- Marketing 601: Marketing Management
- Management Information Systems 601: Management Information Systems
- Management Studies 611: Managerial Economics
- Management Studies 613: Managerial Decision Modelling
- Management Studies 715: Strategic Business Analysis
- Operations Management 601: Operations Management
- Strategic and Global Management 601: Strategic Management I
- Business and Environment 777: Global Environment of Business
- Management Studies 601: Skills Development
- Management Studies 770: Topics in Leadership
- And three elective courses in the student’s area of interest.

**6. Additional Requirements**

Participation in Orientation Sessions held prior to the start of the Fall semester is strongly recommended for incoming students.

**7. Credit for Undergraduate Courses**

Credit for undergraduate courses will not be awarded.

**8. Time Limit**

As established by the Faculty of Graduate Studies, maximum completion time is four years for a thesis-based master’s program, six years for a doctoral program or a course-based master’s, and seven years for the MSW/MBA Program.

Expected completion times in the Calgary programs are:
- One 12-month year for full-time course-based MSW students with a BSW
- Two 12-month years for full-time course-based MSW students without a BSW
- 26 months for the MSW/MBA (minimum)
- Two 12-month years for a thesis-based MSW student with a BSW
- Three 12-month years for a thesis-based MSW student without a BSW
- Four 12-month years for a PhD

In the Edmonton and Lethbridge MSW programs, students are admitted as cohorts and are therefore required to complete courses as they are scheduled. For the purposes of government grants and loans, students are classified as full-time.

In Edmonton, course-based students admitted without a BSW complete the Foundation program component in the initial two years and the Clinical Specialization component in the subsequent two years.

In Edmonton and Lethbridge, course-based students admitted with a BSW complete the MSW Clinical Specialization in two years. Typically, thesis students require one additional 12-month year to complete their programs. Courses are scheduled on weekends, in week-long intensives and/or in online format for accessibility by rural and employed students.

**9. Supervisory Assignments**

Course-based MSW and MSW/MBA students are assigned a faculty advisor upon entry into the program. A change of advisor, initiated by the student or the faculty member, can occur at any time during the student’s enrolment in the program.

PhD, PMDip and thesis-based MSW students are initially assigned an interim supervisor. Before the end of April of the first year, each student must designate a faculty member as permanent supervisor. In the doctoral program, the supervisor and student must then select a supervisory committee within three months of the appointment of the permanent supervisor. Doctoral supervisory committees typically consist of the supervisor and two other members, one of whom may be external to the Faculty of Social Work.

**10. Required Examinations**

In addition to the Faculty of Graduate Studies regulations, the program requires:

**PhD**

**Candidacy**

The doctoral candidacy examinations must be completed within 28 months of the student’s admission to the program after all required course work has been completed and the thesis proposal has been approved by the student’s supervisory committee. The examinations include a written and an oral component, both of which the student must complete to the satisfaction of his or her examining committee. Students should consult the FSW candidacy examination guidelines for further detail. Students must also defend their thesis to the satisfaction of the examining committee.

**PhD Thesis Examination**

**Scheduling of the Examination**

All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

**Composition of the Committee**

The Internal Examiner must be external to the Faculty of Social Work.

Students must defend their thesis to the satisfaction of the examining committee.

**MSW (thesis)**

The final examination for the thesis-based MSW involves an oral defence of the thesis. The thesis examination is conducted by the student’s examining committee, which must be designated at least one month before the oral examination.

**Composition of the Committee**

The MSW examining committee includes the thesis supervisor, a faculty member from the Faculty of Social Work, an Internal Examiner, and a neutral chair. The Internal Examiner must be external to the Faculty of Social Work.

**MSW (course-based)**

Course-based students (including the combined MSW/MBA) are required to complete a capstone at the end of their coursework and practicum. Each student will meet this requirement according to the structure within his/her location (Calgary, Edmonton, Lethbridge).

**11. Research Proposal Requirements**

**PhD**

PhD students must have their thesis proposal approved by their supervisory committee prior to doing their candidacy exams and applying for ethics certification. Those students whose research involves human subjects must complete the Tri-Council Policy Statement 2 Course on Research Ethics (CORE) and receive approval from the University of Calgary Conjoint Faculties/Health Research Ethics Board before begin-
Sociology SOCI

Contact Information

Program number: 403.220.6501
Fax: 403.282.9298
Email address: sociograd@ucalgary.ca
Web page URL: http://soci.ucalgary.ca/

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Arts (MA), thesis-based
The MA and PhD programs in Sociology are offered as full-time programs only.

2. Admission Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:
- Master of Arts
  a) A grade point average of 3.30 on a four-point scale over the last two years of coursework or 60 units (10 full-course equivalents).
  b) Demonstrated competence, normally through course work, in classical and contemporary sociological theory, social research methods, and social statistics.
  c) A written statement of intent.
  d) A sample of written work.
  e) Two reference letters.

3. Application Deadline
January 15 for September admission.

4. Advanced Credit
The applicant must make advance credit requests as part of the admission process. Credit will not be given for coursework taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
In addition to Faculties of Graduate Studies and Arts requirements, the Department requires:
- Master of Arts
  a) Competence in sociological statistics, methods of sociological research, and sociological theory demonstrated by completing Sociology 611, 613 or 615, and 631.
  b) Completion of 6 units (1.0 full-course equivalent) of electives at the 600 or 700 level of which 3 units (0.5 full-course equivalent) must be a Sociology Department offering in a substantive area.
  c) Completion of Sociology 602 - Training in Professional Sociology and successful preparation and completion of a thesis prospectus.
  d) Completion of the MA Thesis requirement.

6. Thesis—Edmonton and Lethbridge
Normally, thesis-based MSW students in Edmonton and Lethbridge complete the Tri-Council Policy Research Ethics (CORE) course and apply for research ethics certification in the summer following their admission to the Clinical Specialization, after their thesis proposal has been approved by their supervisor. A copy of the proposal becomes part of the student's record within the Faculty of Social Work.

7. Thesis—Calgary
Students should complete all coursework prior to having their proposal approved by their supervisor. Once coursework has been completed and the proposal approved, students can proceed with completing the Tri-Council Research Ethics (CORE) course and apply for ethics certification. A copy of the proposal becomes part of the student's record within the Faculty of Social Work.

8. Special Registration Information
None.

9. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Faculty of Graduate Studies Calendar, search the Graduate Awards Database, and consult with the Student Services Office in the Faculty of Social Work.

10. Other Information
The Faculty of Social Work also offers a Post-baccalaureate Certificate and Diploma in Mental Health and Addictions. The Certificate is comprised of four courses and the diploma requires eight courses. Inquiries about this program should be directed to fswgrad@ucalgary.ca.

All students in the Faculty of Social Work are expected to be proficient in and have access to email, Internet searching, and word processing computer programs. Students may be expected to use technology in courses; video-conferencing, web-based tools, discussion boards, and chat rooms may be used in addition to or in lieu of class time.

The Master of Social Work program is accredited by the Canadian Association of Social Work Education. Information on the Faculty of Social Work and its programs is available online at http://www.fsw.ucalgary.ca.

Requests for information should be directed as follows:
Calgary: 1.877.220.6945
Edmonton: 1.888.492.2083
Lethbridge: 1.866.329.2794

11. Faculty Members/Research Interests
Current faculty members and their research interests can be found at http://fsw.ucalgary.ca/research/faculty-research.

12. Program Descriptions

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Faculty of Graduate Studies Calendar, search the Graduate Awards Database, and consult with the Student Services Office in the Faculty of Social Work.

14. Other Information
The Faculty of Social Work also offers a Post-baccalaureate Certificate and Diploma in Mental Health and Addictions. The Certificate is comprised of four courses and the diploma requires eight courses. Inquiries about this program should be directed to fswgrad@ucalgary.ca.

All students in the Faculty of Social Work are expected to be proficient in and have access to email, Internet searching, and word processing computer programs. Students may be expected to use technology in courses; video-conferencing, web-based tools, discussion boards, and chat rooms may be used in addition to or in lieu of class time.

The Master of Social Work program is accredited by the Canadian Association of Social Work Education. Information on the Faculty of Social Work and its programs is available online at http://www.fsw.ucalgary.ca.

Requests for information should be directed as follows:
Calgary: 1.877.220.6945
Edmonton: 1.888.492.2083
Lethbridge: 1.866.329.2794

15. Faculty Members/Research Interests
Current faculty members and their research interests can be found at http://fsw.ucalgary.ca/research/faculty-research.
Master of Arts and six years for the doctoral program.

9. Supervisory Assignments
An interim advisor is assigned to incoming students who have not already selected a supervisor. In the case of MA students, after one term in the program, a student will make supervisory arrangements with a faculty member in the chosen area of research. In the case of PhD students, the student and student will select two other faculty members to serve on the student’s supervisory committee.

10. Required Examinations
In addition to Faculty of Graduate Studies regulations for thesis examination, the program requires:

Doctoral Candidacy Examinations
The candidacy examination has a written and an oral component. A final reading list is prepared by the student’s supervisory committee and given to the student at least three months before the written examination. The written candidacy examination in the student’s substantive area is written within one month of the oral candidacy examination. The written candidacy is normally a seven day take-home or seven hour closed-book examination. Both the written and oral candidacy examinations are graded together. Questions on the research proposal will not be included in the oral candidacy examination.

The Candidacy Oral Defence is a Closed Examination.

Thesis Examinations
Thesis examinations are open.

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s draft thesis document before an examination can be scheduled.

Composition of the Committee
The Internal Examiner may be internal to the home program.

11. Research Proposal Requirements
Students whose research involves human subjects must receive approval from University of Calgary Conjoint Faculties Research Ethics Board or the Conjoint Health Research Ethics Board (if applicable) before beginning data collection.

Master of Arts students are required to prepare a thesis prospectus within nine months of the date of entry into the program.

Doctoral students are required to prepare a thesis prospectus for approval by their supervisory committee within twenty months of the date of entry into the program.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. Information on departmental funding is available in the online Graduate Student Handbook at http://soci.ucalgary.ca/graduate. For further information on awards, please see the Awards and Financial Assistance section of this Calendar.

Students applying for Graduate Award Competitions through the Faculty of Graduate Studies must submit their applications to the Department by January 15.

14. Other Information
Students should refer to the Department’s online information and the Sociology Graduate Student Handbook at http://soci.ucalgary.ca/graduate for further clarification and explanation of these regulations.

15. Faculty Members/Research Interests
The active research interests of the faculty can be found at http://soci.ucalgary.ca/people/faculty.

Sustainable Energy Development SEDV

Contact Information
Location: Haskayne School of Business, Scurfield Hall, Room 453
Program number: 403.220.2013
Fax: 403.282.0095
Email address: sedv@ucalgary.ca
Web page URL: http://www.ucalgary.ca/sustainableenergy/

1. Degrees and Specializations Offered
Master of Science (MSc), course-based
The MSc degree in Sustainable Energy Development (SEDV) is a multidisciplinary offering by the Haskayne School of Business, the Schulich School of Engineering and the Faculties of Law and Environmental Design.

2. Admission Requirements
In addition to Faculty of Graduate Studies requirements, the SEDV Program requires:

- Letter of intent (maximum 150 words) addressing the following:
  - How you will bring to the program.
  - How your strengths, ambitions and experience fit in with your future career goals.
  - Describe how, considering your career progress to date, an MSc in Sustainable Energy Development fits in with your future career goals.
  - Expand on the above by describing the strengths, ambitions and experience you will bring to the program.
  - Describe your ability to work in a team and how this has contributed to your successes.

b) A current curriculum vitae.
c) Normally, two years of professional work experience.

d) Proof of English Language Proficiency. Please refer to the Admissions section of this Calendar for more information regarding this requirement.
e) Two reference letters. Please refer to our website for detailed instructions and templates.

3. Application Deadline
Please note ALL required documentation, including official transcripts and reference letters, must be received by the below mentioned deadlines.

Early Admission and International application deadline is December 31.
Final deadline is February 28. Program commences annually on May 1.

4. Advanced Credit
The SEDV Program does not grant advanced credit for courses completed prior to the admission.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies requirements, SEDV requires:

- Successful completion of 14 SEDV graduate-level courses (42 units or 7.0 full-course equivalents), including the interdisciplinary project and presentation in Sustainable Energy Development 625.

b) Attendance and participation in seminars, upgrade workshops and field trips.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
The SEDV program does not grant advanced credit for undergraduate courses.

8. Time Limit
The expected completion time is 16 months for full-time studies; however, the maximum permitted time is 6 years.

9. Supervisory Assignments
Not applicable.

10. Required Examinations
None.

11. Research Proposal Requirements
Although this is a course-based program and does not require a formal thesis, an interdisciplinary project is required in Sustainable Energy Development 625.

12. Special Registration Information
The SEDV program has only one intake date, which is May 1 of each year.

13. Financial Assistance
For information on graduate awards and scholarships, please see the Awards and Financial Assistance section of this Calendar.

14. Other Information
None.
15. Faculty Members/Research Interests
Please see the SEDV program website for faculty profiles.

Veterinary Medical Sciences VMS

Contact Information
Location: Teaching Research and Wellness (TRW) Building, Room 2D09
Program number: 403.210.8764
Fax: 403.210.8121
Email address: vmggrad@ucalgary.ca
Web page URL: http://vet.ucalgary.ca/

Program Descriptions

1. Degrees and Specializations Offered
Doctor of Philosophy (PhD)
Master of Science (MSc), thesis-based
Note: All students are registered full-time.

2. Admission Requirements
In addition to the Faculty of Graduate Studies requirements, the Veterinary Medical Sciences program requires:

a) A baccalaureate degree* or its equivalent from a recognized institution with a minimum admission grade point average of 3.00 on a four-point scale or equivalent, and a minimum of 3.00 during the last two years (60 credit hours) of undergraduate study.
b) For applicants required to provide proof of proficiency in English, a minimum TOEFL score of 580 (paper-based) or 92 (Internet-based test), a minimum IELTS score of 7.0, or a minimum MELAB score of 82.
c) Two reference letters.

*Note that a Doctor of Veterinary Medicine (DVM) degree is not a requirement for entry into the MSc or PhD programs. Applicants who do not meet the above requirements will be considered only under exceptional circumstances.

3. Application Deadline
Applications will be considered for registration in the September, January, May and July terms and will only be reviewed upon submission of the online application and receipt of ALL required supporting documents. Applications will be processed in the order in which they are received and, once complete, they will be evaluated by the Graduate Education Committee of UCVM for suitability for admission to the Veterinary Medical Sciences graduate program. It is especially important for international students and their prospective supervisors to note that once admission is offered it may take considerable time to obtain the proper immigration authorization (up to six months depending on country of origin). International students are encouraged to apply for admissions well in advance of posted deadlines. Prospective students are unable to begin their programs prior to registration (only after the registration term begins), applicants become active students and gain access to university resources, including insurance.

4. Advanced Credit
Advanced credit may be given for course work completed prior to entry into the program. The applicant must make requests for advanced credit as part of his or her application for admission.

5. Program/Course Requirements
In addition to Faculty of Graduate Studies requirements, all MSc and PhD students must complete:
a) Veterinary Medicine 601 - Professional Skills in Health Science Research;
b) Veterinary Medicine 605 - Introduction to Research Methods*;

* A suitable entry-level biostatistics course may be taken as an alternative to Veterinary Medicine 605 with permission from the Graduate Program Director.

c) MSc students must take at least one additional course, and PhD students must take at least two additional graduate-level courses that are appropriate to their field of study and have been approved by their Supervisory Committee; and
d) MSc students are required to give one public seminar prior to scheduling the thesis examination; PhD students are required to give one public seminar prior to scheduling the oral candidacy examination, and are required to give a second public seminar prior to scheduling the thesis examination.
e) MSc and PhD students are required to give a public presentation of their thesis work immediately preceding their thesis examination.

6. Additional Requirements
In accordance with Canadian Council on Animal Care guidelines, all students who work with animals must take either Veterinary Medicine 603, or a suitable certification course on animal care and use. All students working with humans or animals must take appropriate certification. In accordance with Tri-Council guidelines, all students performing research involving humans must take the CORE tutorial certificate prior to applying for ethics certification (http://www.ucalgary.ca/research/research-services-office-rso/ethics-compliance/tcp22-core-tutorial) and must receive ethics certification prior to working with human subjects.

7. Credit for Undergraduate Courses
The student’s Supervisory Committee may recommend credit for undergraduate courses provided they are relevant to the area of study. Final approval is required by the Graduate Program Director.

8. Time Limit
In accordance with FGS policy, students in full-time study, are expected to complete an MSc in two years, with a maximum time of four years; students in PhD programs are expected to complete their degree in four years with a maximum time of six years.

9. Supervisory Assignments
Students will normally have identified a permanent supervisor at the time of admission. In consultation with the student’s supervisor(s), a Supervisory Committee will be selected that includes a minimum of two additional faculty members for MSc degrees, or three additional faculty members for PhD degrees. In PhD committees, one member will be named from outside the VMS graduate program. The appointment of a supervisory committee shall be completed within three months after starting the program. The Graduate Program Director will approve the composition of the committee.

10. Required Examinations
Candidacy
The candidacy exam for VMS PhD students will consist of a written and oral component. The student’s research proposal serves as the written component of the candidacy exam. In the VMS Graduate Program, the oral exam is based both on the written proposal and all relevant related topics assigned by the exam committee. Therefore, it is required that the oral candidacy is completed early in the student’s doctoral program, ordinarily by 18 months, but not later than 24 months after initial registration. The written component shall consist of maximum 20 page (double-spaced) document, excluding references and figures, and will include a relevant literature summary of the student’s field of study and description of proposed research. References, figures and appendices ordinarily should not exceed 15 pages. The oral exam should take place one week after submitting the written research proposal to the examining committee. The supervisor/co-supervisor will attend the exam, do not question the candidate, and serve as non-voting members.

Thesis Examination
The thesis examination for MSc and PhD degrees will consist of a public seminar immediately followed by an open oral examination. In the thesis examination, the supervisor(s) are full voting members of the examining committee.

Effective September 1, 2014, in addition to the Faculty of Graduate Studies thesis examination requirements, Veterinary Medical Sciences program requires:

Scheduling of the Examination
All members of the Supervisory Committee must have reviewed the student’s research, including a relevant written sample of the materials related to the thesis, before an examination can be scheduled.

Composition of the Committee
The Internal Examiner must be external to the home program.
11. Research Proposal Requirements
The VMS Graduate Program requires all master’s and doctoral students to defend a Research Proposal to their supervisory committee. A copy of the final version of the proposal will be kept in the student’s file. For VMS master’s students, it is recommended that the research proposal be defended by six months after starting the program, but no later than twelve months after initial registration in the program. For VMS doctoral students, the defence of the research proposal is the oral candidacy exam. All master’s students who transfer to a doctoral degree must present and defend a revised proposal to their Supervisory Committee within six months of program transfer as a component of their doctoral candidacy exam.

12. Special Registration Information
None.

13. Financial Assistance
Full-time graduate students in the VMS Graduate Program will be offered a stipend of at least $20,000 per year (normally two years for MSc and four to five years for PhD students). Funding, secured by the student and supervisor, may come from a variety of sources, including grants, external salary awards, and UCVM scholarships. Admission to the Program is conditional on demonstration of internal or external studentship support. Further information on funding opportunities can be found at http://vet.ucalgary.ca/awards_and_scholarships.

14. Other Information
Outstanding students enrolled in the MSc program may request a change of registration status and transfer to the PhD program. The request must be done within the first 18 months of the program and supported in writing by the supervisor and formally recommended by the Supervisory Committee to the Graduate Program Director. The student will be required to defend their thesis proposal, appropriate for a PhD project, within six months of transferring to complete the requirements of the PhD candidacy exam.

15. Faculty Members/Research Interests
Faculty members and their research interests may be found on the Faculty website (http://www.vet.calgary.ca/research). Additional information can be obtained by calling the contact number listed for the VMS program or from the Administrative Office of the Faculty of Graduate Studies.
Interdisciplinary Specializations

Biological Anthropology
BANT

Contact Information
Location: Earth Sciences 852
Program number: 403.220.2665
Fax: 403.282.9562
Email address: wwilson@ucalgary.ca
Web page URL: https://bioanth.ucalgary.ca/

1. Degrees and Specializations Offered
The University offers an interdisciplinary specialization in Biological Anthropology to students registered in an existing graduate program. The student will receive the degree offered by the home program:
- Doctor of Philosophy (PhD)
- Master of Science (MSc), thesis-based
- Master of Arts (MA), thesis-based

2. Admission Requirements
In addition to Faculty of Graduate Studies requirements, all applicants must meet the minimum standards of the home program. Admission to the specialization requires:
- A Bachelor of Arts or Bachelor of Science degree (and Master of Arts degree for admission to the PhD program) in Anthropology, Archaeology, Biology, Zoology, Ecology, or Health Sciences with a GPA of at least 3.30 on a four-point scale in the last two years of program or over the last 60 units (10 full-course equivalents).
- An example of the applicant's written work: a term paper, research paper, Master of Arts, or honours thesis that the applicant considers representative of his or her best work. Published work authored by the applicant is also acceptable provided the applicant is the sole or senior author.
- A concise statement setting forth the applicant's academic interests and reasons for wishing to pursue graduate work in the specialization. The area of thesis research should also be specified.
- An up-to-date curriculum vitae.

3. Application Deadline
The deadlines for the submission of complete application is January 15 for September admission and funding.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for coursework taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
In addition to Faculty of Graduate Studies and the home program requirements, the specialization requires:
- Master of Arts / Master of Science
  1. Fifteen units (2.5 full-course equivalents), which shall include:
     a) Archaeology 617 (Theory and Its Application in Biological Anthropology).
     b) Anthropology 603 (Thesis Development).
     c) Any two of the following: Medical Science 755 (Human Gross Anatomy), Archaeology 613 (Analysis of Human Skeletal Remains), Anthropology 635 (Primatological Theory), or Anthropology 605 (Professional Skills for Anthropologists), Anthropology 613 (Current Issues in Methodology in Primatology).
   - d) One optional course relevant to the proposed research topic.
   - e) All students are expected to have proficiency in statistics. The supervisor and two other faculty members of the specialization, in concert with the applicant, will determine if additional course work is needed in statistics, depending upon the applicant's background and proposed research area.
   - f) A season of fieldwork offering appropriate experience for the proposed research (for example, primate field study, archaeological excavation, or field research in human biology), to be approved by the supervisor. Fieldwork may have been undertaken before entry into the specialization and may be counted toward the fieldwork requirement. Students specializing in laboratory-based topics (for example, morphological studies or bone chemistry) may substitute an approved program of laboratory work for the fieldwork requirement.

6. Doctor of Philosophy
- Course Requirements:
  - If students entering the PhD specialization have completed the master's specialization in Biological Anthropology, or if they have completed equivalent courses in another master's program, they will not be required to repeat those courses. Rather, additional courses will be determined at the discretion of the student's supervisory committee. Normally, 18 units (3.0 full-course equivalents), which shall include (unless completed previously):
    a) Archaeology 617 (Theory and Its Application in Biological Anthropology).
    b) Anthropology 701 (Independent Studies).
    c) Any two of the following: Medical Science 755 (Human Gross Anatomy), Archaeology 613 (Analysis of Human Skeletal Remains), Anthropology 635 (Primatological Theory).

7. Credit for Undergraduate Courses
Students may apply for no more than one 500-level course for graduate credit, subject to the approval of the Program Director. Graduate students taking a 500-level course for graduate credit will be required to complete additional assignments.

8. Time Limit
- Expected completion time for the MA and MSc is two years and maximum completion time is six years.
- Expected completion time for the PhD is four years and maximum completion time is six years.

9. Supervisory Assignments
Students will be assigned a supervisor upon admission.

10. Required Examinations
Final thesis oral examinations are open.
Clinical Research CRES

Oral Candidacy Examinations
Following the completion of all coursework, the research paper and the language requirement, doctoral students sit the Candidacy Examination. In the Biological Anthropology Graduate Specialization, the Candidacy Examination consists of two parts in sequence, as follows: (1) a written component and (2) an oral component.

The oral candidacy examination is required by University regulations and must be held no later than twenty-eight months following initial registration as a full-time graduate student in a PhD program. Students entering the doctoral program with a bachelor’s degree, or transferring into a doctoral program from a master’s program before the master’s program is completed, must attempt the candidacy examinations no later than 36 months after initial registration in the Faculty of Graduate Studies.

The Candidacy Examination in the Biological Anthropology Graduate Specialization consists of a written plus an oral examination administered by the Candidacy Examination Committee, composed of the Supervisory Committee plus two additional members, one of whom must be external to the Specialization if the External is not already a member of the Supervisory Committee.

The Candidacy Examination is an examination of the student’s knowledge and abilities to reason and utilize the relevant literature, and to solve problems within the three fields or areas which have been set out.

In consultation with the student, the Supervisory Committee will determine three areas of knowledge for which the student will be responsible in his or her Candidacy Examination. These topics will be communicated (in writing) to the student, with copies to other members of the Supervisory Committee.

These topics will also be communicated to the two other members of the Candidacy Examination Committee, who must be selected no later than eight weeks prior to the oral examination.

Members of the Candidacy Examination Committee will each submit one or two questions, so that there are at least two questions within each of the three areas. The supervisor will select six questions from those submitted and provide them to the student at least five weeks prior to the Oral Candidacy Examination. The student will select one question from each of the three areas for a total of three questions. The student will have two weeks in which to prepare answers to these questions as a take-home, open-book exam. Each answer should be approximately 6000 words. Copies of the completed examination will be distributed to all members of the Examination Committee. The Committee will assess the written exam on a Pass/Fail basis. The oral examination is conducted in accordance with Faculty of Graduate Studies regulations.

In the oral component of the Candidacy Examination, the written examinations will serve as the basis from which the examination shall proceed, but examiners are not limited to the written component in framing the questions asked, and questioning may range into cognate areas, at the discretion of the Neutral Chair.

Students must pass both the written and oral exams in order to pass the candidacy exam.

11. Research Proposal Requirements
Within twenty months of entering the program, the student, with the supervisor’s advice, develops a thesis research proposal. This is then transmitted to the student’s supervisory committee for agreement and to the Graduate Program Director of the student’s home program for approval and placed on file.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available to qualified students. For information on awards, see the Awards and Financial Assistance section of this Calendar.

Students applying for scholarships must submit their applications to the home program by January 2.

14. Other Information
Given the limited resources, the specialization may, in any year, admit fewer applicants than those who are qualified to undertake graduate studies.

15. Faculty Members/Research Interests
See the website of the home department of the faculty member.

Clinical Research CRES
Applications for this interdisciplinary specialization are not currently being accepted.

Energy & Environmental Systems EESS

This Specialization is not accepting applications for 2015/2016 Academic Year.

Contact Information
Location: Energy, Environmental, Experiential Learning Building, Room 467
Program number: 403.210.6965
Fax: 403.220.2400
Email address: eessinfo@ucalgary.ca
Web page URL: http://science.ucalgary.ca/eess/student

1. Degrees and Specializations Offered
The University offers an interdisciplinary specialization in Energy and Environmental Systems to students registered in an existing graduate program currently offered through one of the following Faculties that are affiliated with the Institute for Sustainable Energy, Environment and Economy (ISEEE):

- Faculty of Arts
- Faculty of Environmental Design
- Haskayne School of Business
- Faculty of Law
- Faculty of Science
- Schulich School of Engineering

In cases where the student’s proposed research area cannot be supported through a single academic program, and which would necessitate the combination of at least two academic areas, they may seek admission and earn the EES specialization through the Interdisciplinary Graduate Program (IGP) of the Faculty of Graduate Studies.

2. Admission Requirements
In addition to the Faculty of Graduate Studies’ requirements, all applicants must meet the minimum admission requirements of the home graduate program and ISEE. To apply for the specialization, students must complete an online EES specialization application form: http://science.ucalgary.ca/iseee/student/apply-now.

When applying to the EES specialization, students must have already applied to a home graduate program, faculty, or department and must already have a supervisor. Successful candidates must be approved for admission by both the home graduate program as well as by EES. Admission to a degree program does not guarantee entrance to the EES specialization. Likewise, admission to the EES specialization does not guarantee entrance to a degree program.

3. Application Deadline
There are no deadlines for applying for admission into the EES Specialization; however, students will only be admitted into the EES Specialization on January 1, May 1 and September 1. Students who are already enrolled in a graduate program at the University of Calgary are able to apply to the EES Specialization.

4. Advanced Credit
Requests for advanced credit must be made at the time of application. Credit will not be granted for course work taken as part of another completed degree/diploma or for courses taken to bring the admission GPA to the required level.

5. Program/Course Requirements
In addition to the Faculty of Graduate Studies and the home graduate program’s requirements, students undertaking the EES specialization must successfully complete the following:

EES Specialization at the Master’s Level
Students in the EES specialization are required to complete four courses, which include:

- Energy and Environmental Systems 601: Introduction to Energy and Environmental Systems
Interdisciplinary Specializations

- Energy and Environmental Systems 607: Tools for System Analysis
- The remaining two courses must be electives approved by the EES Graduate Studies Committee. These courses are intended to bolster a student’s background in energy and environmental systems and/or interdisciplinary research methods, and may be taken in other faculties, schools, or departments at the University of Calgary.

Master’s students must also comply with the requirements of their home graduate program. In addition to these course requirements, students must conduct research that takes an interdisciplinary approach to a real-world problem in the area of energy and environmental systems. Students must also actively participate in EES seminars and activities, and contribute meaningfully to the interdisciplinary culture of the specialization.

EES Specialization at the Doctoral Level
Students who have previously earned a master’s degree with the EES specialization cannot enrol into the EES specialization as a PhD student. Doctoral students are required to take the same EESS core courses that are required at the master’s level and two electives in the area of energy and environment. Doctoral students must also comply with requirements of their home graduate program.

EES Specialization with MGIS Degree (course-based)
Students enrolled in the Master of Geographic Information Systems degree program who wish to earn the EES specialization will need to take three of the EES courses (Energy and Environmental Systems 601, 603, and one other). Students are not required to take Geography 683, but must take the other core courses in the MGIS program (Geography 647, 633, 639, and 681). Finally, students will still be required to fulfill the 30 units (5.0 full-course equivalents) requirement of the MGIS program, and can select the remaining three courses from Geography optional courses or EES related courses. It is not recommended that students required to complete the MGIS upgrade courses undertake the EES specialization.

EES Specialization with the Interdisciplinary Graduate Program (IGP)
The course curriculum for IGP students will be determined at the IGP admission seminar. Course requirements will typically include the EES core courses, but may also include other courses to ensure adequate coverage of the relevant disciplines involved. Changes to the student’s curriculum after the admission seminar will require the approval of the Supervisory Committee, IGP Director, and the Faculty of Graduate Studies.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
Students are allowed to take only one 500-level course for graduate credit, subject to the approval of the EES Graduate Studies Committee. Graduate students taking a 500-level course for graduate credit will be required to complete additional assignments.

8. Time Limit
Expected completion time for a master’s degree is two years and the maximum completion time is four years. Expected completion time for the PhD degree is four years and the maximum completion time is six years.

9. Supervisory Assignments
Students must meet supervisory requirements of home department.

10. Required Examinations
Final thesis orals follow the requirements of the Faculty of Graduate Studies and the home graduate program. Students in doctoral programs must fulfill the written candidacy examination requirement of the home graduate program. All doctoral students must complete the candidacy oral examination in accordance with Faculty of Graduate Studies’ regulations.

11. Research Proposal Requirements
If a research proposal is required by the home department, then a copy of the proposal must be submitted to the EES Graduate Studies Committee and will be placed on file.

12. Special Registration Information
None.

13. Financial Assistance
Financial assistance may be available on a competitive basis to all qualified full-time graduate students enrolled in the EES specialization. Students are also encouraged to seek funding opportunities through the Faculty of Graduate Studies’ Open Scholarship Competition (contact the home program for application deadlines), as well as external funding agencies.

14. Other Information
Given limited resources, the specialization may, in any year, admit fewer applicants than those who are qualified to undertake graduate studies.

Engineering, Energy & Environment ENEE

Contact Information
Location: Engineering Building, Room ENA206B
Program number: 403.220.2881
Fax: 403.210.9892
Email address: ceere@ucalgary.ca
Web page URL: http://www.schulich.ucalgary.ca/CEERE/

The Centre for Environmental Engineering Research and Education (CEERE) in the Schulich School of Engineering (SSE) has the overall responsibility for the co-ordination and delivery of a comprehensive postgraduate program specialization in the multidisciplinary field of energy & environment. All five engineering departments participate in delivering this SSE-wide specialization.

Applications for admission to the Faculty of Graduate Studies should be submitted to the engineering department that best matches the applicant’s undergraduate and/or postgraduate academic training.

1. Degrees and Specializations Offered
Degrees with an interdisciplinary specialization in Energy & Environment:
- Doctor of Philosophy (PhD)
- Master of Science (MSc), thesis-based
- Master of Engineering (MEng), thesis-based and course-based

Only the Master of Engineering degree is available for part-time enrolment.

2. Admission Requirements
In addition to the Faculty of Graduate Studies, SSE, and home department requirements, the Energy & Environment specialization requires:
- Master of Engineering and Master of Science
- A bachelor’s degree in engineering.
- Note: Applicants with applied science degrees may be considered, but additional undergraduate engineering courses may be required.
- Doctor of Philosophy
- A master’s degree in engineering.
- Note: Transfer to the doctoral program without completing the master’s degree may be approved for exceptional students.

3. Application Deadline
See departmental and program sections in this Calendar for deadlines regarding submission of complete applications for students with international transcripts or with Canadian and U.S. transcripts.

4. Advanced Credit
See “Engineering Programs”.

5. Program/Course Requirements
In addition to Faculty of Graduate Studies requirements and to the course requirements described below, students should consult their “home” department in the Schulich School of Engineering for any additional program or course requirement(s).

Master of Engineering (Course-based Route)
Thirty units (5.0 full-course equivalents) of which a minimum of 18 units (3.0 full-course equivalents) must be at the graduate level. Environmental Engineering 671 is required, together with at least four other courses selected from a list of courses related to Energy & Environment available from CEERE.
8. **Time Limit**

Expected completion time is two years for the Master of Science degree, and three years for the Doctor of Philosophy. Maximum completion time is four years for the Master of Science and Master of Engineering (Thesis) degrees and six years for the Master of Engineering (Courses Only) and Doctor of Philosophy degrees.

9. **Supervisory Assignments**

All students are required to have a thesis supervisor before the second annual registration. For students in the Master of Science and Doctor of Philosophy degree programs, a supervisor is normally appointed at the time of admission.

10. **Required Examinations**

Final thesis oral examinations follow the requirements of the Faculty of Graduate Studies and the home graduate program.

11. **Research Proposal Requirements**

None.

12. **Special Registration Information**

None.

13. **Financial Assistance**

See “Engineering Programs”.

14. **Other Information**

See “Engineering Programs”.

15. **Faculty Members/Research Interests**

The current research interests of the faculty members can be found at http://www.schulich.ucalgary.ca/CEERE/ or from the various engineering departments.

**Environmental Engineering ENEN**

**Contact Information**

Location: Engineering Building, Room ENA206B

Program number: 403.220.2881

Fax: 403.210.9892

Email address: ceere@ucalgary.ca

Web page URL: http://www.schulich.ucalgary.ca/CEERE/

The Centre for Environmental Engineering Research and Education (CEERE) in the Schulich School of Engineering (SSE) has the overall responsibility for the coordination and delivery of a comprehensive postgraduate program specialization in the interdisciplinary field of environmental engineering. All five engineering departments participate in delivering this SSE-wide environmental engineering specialization.

Applications for admission to the Faculty of Graduate Studies should be submitted to the engineering department that best matches the applicant's undergraduate and/or postgraduate academic training.

1. **Degrees and Specializations Offered**

Degrees with an interdisciplinary specialization in Environmental Engineering:

- Doctor of Philosophy (PhD)
- Master of Science (MSc), thesis-based
- Master of Engineering (MEng), thesis-based and course-based

Only the Master of Engineering degree is available for part-time enrolment

2. **Admission Requirements**

In addition to the Faculty of Graduate Studies, SSE, and home department requirements, the Environmental Engineering specialization requires:

- Master of Engineering and Master of Science

A bachelor's degree in engineering.

- Doctor of Philosophy

A master's degree in engineering, preferably in environmental engineering or equivalent.

3. **Application Deadline**

See departmental and program sections in this Calendar for deadlines regarding submission of complete applications for students with international transcripts or with Canadian and US transcripts.

4. **Advanced Credit**

See “Engineering Programs” in this Calendar.

5. **Program/Course Requirements**

In addition to Faculty of Graduate Studies requirements and the course requirements described below, students should consult their “home” department in the Schulich School of Engineering for any additional program or course requirement(s).

**Master of Engineering (Course-based Route)**

Thirty units (5.0 full-course equivalents). Environmental Engineering 603 and 605 are normally required, together with at least one of Environmental Engineering 621, 623, 625, 627 or 635, and at least two other Environmental Engineering courses.

Students with non-engineering undergraduate degrees may be required to take additional prerequisite courses at the undergraduate level.

**Master of Engineering (Thesis-based Route)**

A minimum of 12 units (2.0 full-course equivalents). Environmental Engineering 603 or 605 is normally required, together with at least one of Environmental Engineering 621, 623, 625, 627 or 635, and at least one other Environmental Engineering course.

Students with non-engineering undergraduate degrees may be required to take ad-
Master of Science and Master of Engineering completion time is four years for the Master of Engineering (thesis-based) degrees and six years for the Master of Engineering (course-based) and Doctor of Philosophy degrees.

9. Supervisory Assignments
All students are required to have a thesis supervisor before the second annual registration. For students in the Master of Science and Doctor of Philosophy degree programs, a supervisor is normally appointed at the time of admission.

10. Required Examinations
Final thesis oral examinations follow the requirements of the Faculty of Graduate Studies and the home graduate program.

11. Research Proposal Requirements
None.

12. Special Registration Information
None.

13. Financial Assistance
See "Engineering Programs".

14. Other Information
See "Engineering Programs".

15. Faculty Members/Research Interests
The current research interests of the faculty members can be found at http://www.schulich.ucalgary.ca/CEERE/ or from engineering departments.

Medical Imaging MEDI
Contact Information
Location: FMC ST 1105
Program number: 403.944.4336
Email address: i3t@ucalgary.ca
Web page URL: www.ucalgary.ca/i3t

1. Degrees and Specializations Offered
A Graduate Specialization in Medical Imaging is offered in conjunction with the following graduate programs: Biomedical Engineering, Electrical and Computer Engineering, Medical Sciences, Neurosciences, Physics and Astronomy and Psychology. The specialization is offered at the MSc and PhD level.

2. Admission Requirements
Admission into a graduate program that offers the Graduate Specialization in Medical Imaging and submission and approval of a written request to join the Specialization. Specialization admission forms are available at www.ucalgary.ca/i3t. Program is open to both Canadian and international students.

3. Application Deadline
Not applicable. Students must first apply to a graduate program offering the specialization. See www.ucalgary.ca/i3t for a current listing of graduate programs offering the Graduate Specialization in Medical Imaging.

4. Advanced Credit
Credit may be granted for appropriate courses to count towards the specialization with approval of the Graduate Specialization in Medical Imaging.

Students Currently Enrolled in Participating Graduate Programs
Have completed (or are completing) at least one graduate-level course in medical imaging and plan to complete at least one more graduate course. Typically, these courses would consist of the core and one of the foundational courses. Upon request, an approved Medical Imaging elective course may be accepted to meet the foundational course requirement.

- Be attending the Advanced Imaging Seminar Series, and as part of their request for admission into the Graduate Specialization have given (or are scheduled to give) an appropriate presentation in this series.
- Undertake a Medical Imaging-related research thesis under the supervision of a specialization-participating graduate supervisor, and
- Enrolment in the specialization would also need to be approved by their Graduate Program.

5. Program/Course Requirements
The Specialization requirements will consist of completion of:

1. at least two graduate-level courses in medical imaging for MSc and three medical imaging courses for PhD (as described below),
2. the Professional Skills Workshop Program,
3. a Medical Imaging-related research thesis, and
4. attendance and annual presentation in the Advanced Imaging Seminar Series (fulfilled by repeated enrolment in Medical Science 689.98).

In addition, participation in an International or Industrial Exchange of approximately two to four months in duration, by PhD trainees will be strongly encouraged. The Specialization requires completion of a course sequence in Medical Imaging, in addition to requirements of the specific graduate program. MSc students must take a minimum of two graduate courses (the core and a foundational course). PhD students take at least three graduate courses (including the core, a foundational and an elective course). These requirements are in addition to the core requirements of a specific participating graduate program. In most programs, the medical imaging graduate courses would count towards graduate program elective courses. In some graduate programs, participation in the Specialization
may require students to take an additional graduate course or courses.

Students in the Medical Imaging Specialization should choose between the Technology and Application Streams. The Technology Stream would typically include students enrolled in engineering or physics graduate programs. Application Stream would typically include students in the biological, psychological or medical sciences.

Core required course (MSc and PhD students):
- Medical Science 689.01 - Medical Imaging Techniques

Select one of the following two foundational graduate courses (MSc and PhD students):
- Medical Science 689.10 - Medical Imaging Theory (for students in the Technology Stream)
- Medical Science 689.11 - Medical Imaging Applications and Analysis (for students in the Application Stream)

In consultation with your supervisor and supervisory committee (if appropriate), please select at least one elective course from the following list (PhD students):
- Electrical Engineering 697 - Digital Image Processing
- Mechanical Engineering 619.36 - Computer Measurement for BME
- Medical Science 689.02 - Advanced Magnetic Resonance Imaging
- Medical Science 689.03 - Advanced Image Processing
- Medical Science 689.04 - Advanced Molecular Imaging (offered alternate years)
- Medical Science 689.05 - Advanced Neuro-imaging (offered alternate years)
- Medical Science 689.10 - Medical Imaging Theory
- Medical Science 689.11 - Medical Imaging Applications and Analysis
- Medical Science 689.99 - Special Projects in Medical Imaging (with consent of Specialization)
- Neuroscience 5850 - Neuro-imaging Techniques - offered at The University of Lethbridge
- Other Medical Imaging-related graduate courses with prior approval of specialization and graduate program

In addition a new services course is offered (on a pass/fail basis):
- Medical Science 698 – Advance Imaging Seminar

6. Additional Requirements
Satisfactory completion of all graduate program and specialization requirements is required for awarding of the "Specialization in Medical Imaging" designation.

7. Credit for Undergraduate Courses
Credit (in the Specialization) will not be given for 500-level courses.

8. Time Limit
As per graduate program requirements.

9. Supervisory Assignments
As per graduate program requirements.

10. Required Examinations
As per graduate program requirements.

11. Research Proposal Requirements
Research proposal must be on a Medical Imaging topic and fit into a research area broadly defined by the Specialization (see www.ucalgary.ca/3t):
1. Image Acquisition and Reconstruction - Development of algorithms suitable for accurate imaging using existing technologies (e.g., MR, CT) and emerging methods (e.g., microwaves).
3. Quantitative Imaging and Analysis - Development of software engineering approaches, validation and testing for the creation of resilient methods for quantitative imaging.

A copy of the proposal must be provided to the Specialization office. Other requirements are as per the graduate program requirements. Typically this proposal is to be provided within 12 months of starting the program.

In programs that do not require submission of a research proposal, a suitable proposal should be developed by the student within 12 months of starting the specialization, approved by the supervisor and supervisory committee (where appropriate), and submitted to the Specialization office.

12. Special Registration Information
None.

13. Financial Assistance
As per graduate program requirements. Additional funding may be available through the Specialization or other University sources for well-qualified students.

14. Other Information
None.

15. Faculty Members/Research Interests
Please refer to www.ucalgary.ca/3t for a listing of participating faculty members and their research interests.

Reservoir Characterization RSCS

Contact Information
Geoscientists should contact the Department of Geoscience and engineers should contact the Department of Chemical and Petroleum Engineering for further information.

Department of Chemical and Petroleum Engineering
Location: Schulich School of Engineering, Room B202
Program number: 403.220.4802
Fax: 403.284.4852
Email Address: chemandpetenggrad@ucalgary.ca
Web page URL: http://www.eng.ucalgary.ca/Chemical

Department of Geoscience
Location: Earth Sciences 118
Program number: 403.220.3254
Fax: 403.284.0074
Email Address: geosciencegrad@ucalgary.ca
Web page URL: http://www.geo.ucalgary.ca

1. Degrees and Specializations Offered
The University offers an interdisciplinary specialization in Reservoir Characterization to students registered in an existing course-based master’s program in the Departments of Chemical and Petroleum Engineering or Geoscience. The program integrates reservoir engineering, geology, geophysics, and reservoir characterization. The student will receive the degree offered by the home program:
Master of Engineering in Chemical and Petroleum Engineering (MEng)
Master of Science in Geology or Geophysics (MSc)

All students will normally be considered to have full-time status. In exceptional circumstances part-time status may be considered and must be approved by the Graduate Director.

2. Admission Requirements
In addition to Faculty of Graduate Studies requirements, all applicants must meet the minimum standards of the home program.

Acceptance into the Master of Engineering program would normally require the completion of the equivalent of the Bachelor of Science in Oil and Gas Engineering degree offered by the University of Calgary. However, individuals with more diverse background and industry experience may be considered for admission.

Acceptance into the Master of Science program requires the completion of a Bachelor of Science in Geoscience plus a course in Well Logging and Formation Evaluation, Petroleum Engineering 507 at the University of Calgary, or equivalent.

Applicants with an undergraduate degree in geology must demonstrate acceptable
proficiency in mathematics. It is an asset for geologists to have taken additional mathematics courses as technical electives during their undergraduate degree.

3. Application Deadline
See departmental listings for the deadlines for the submission of completed applications.

4. Advanced Credit
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma or for courses taken to bring the grade point average to a required level for admission.

5. Program/Course Requirements
To address the broad background of students entering the Reservoir Characterization Interdisciplinary Specialization, there are three streams for completion: Geology, Geophysics, and Engineering.

All students must take at least six courses at the 600 and/or 700 level.

Students in the engineering stream are required to take:

Geophysics 559 – Geophysical Interpretation
Chemical Engineering 621 – Reservoir Simulation
Chemical Engineering 661 – Geostatistics for Reservoir Characterization OR Geology 697 – Advanced Geostatistics
Chemical Engineering 698/Geology 698** – Reservoir Characterization for Field Development (RCFD)

Human Resources and Organizational Dynamics 789 – Seminar in the Management of Human Resources
and select four from the following list, two of which MUST be geoscience:

Petroleum Engineering 543 – Geological Characterization of Oil and Gas Reservoirs
Chemical Engineering 629 – Secondary and Tertiary Recovery
Chemical Engineering 649 – Naturally-Fractured Reservoirs
Chemical Engineering 657 - Advanced Reservoir Engineering

Geophysics 559 – Geophysical Interpretation
Geophysics 667 – Introduction to Microseismic Methods
Geology 613* – Flow in Porous Media
Geology 694.03 – Reservoir Evaluation and Hydrocarbon Play Assessment
Geology/Geophysics 649 – Advanced Petrophysical Techniques
Geology 655 – Unconventional Gas Reservoir Characterization and Evaluation

Students in the geophysics stream are required to take:

Petroleum Engineering 543 – Geological Characterization of Oil and Gas Reservoirs
Chemical Engineering 629 – Secondary and Tertiary Recovery
Chemical Engineering 649 – Naturally-Fractured Reservoirs

Students in the engineering stream are required to take:

Geophysics 559 – Geophysical Interpretation
Chemical Engineering 621 – Reservoir Simulation
Chemical Engineering 661 – Geostatistics for Reservoir Characterization OR Geology 697 – Advanced Geostatistics

Chemical Engineering 698/Geology 698** – Reservoir Characterization for Field Development (RCFD)

Human Resources and Organizational Dynamics 789 – Seminar in the Management of Human Resources
and select four from the following list, two of which MUST be engineering:

Engineering 407 – Numerical Methods in Engineering
Petroleum Engineering 513* – Flow in Porous Media
Petroleum Engineering 525 – Waterflooding and Enhanced Oil Recovery
Petroleum Engineering 533 – Petroleum Production Engineering

Petroleum Engineering 543 – Geological Characterization of Oil and Gas Reservoirs
Chemical Engineering 629 – Secondary and Tertiary Recovery
Chemical Engineering 649 – Naturally-Fractured Reservoirs

Chemical Engineering 657 – Advanced Reservoir Engineering

Geophysics 667 – Introduction to Microseismic Methods
Geology 613* – Flow in Porous Media
Geology 694.03 – Reservoir Evaluation and Hydrocarbon Play Assessment
Geology/Geophysics 649 – Advanced Petrophysical Techniques
Geology 655 – Unconventional Gas Reservoir Characterization and Evaluation

*Choose only one (1) of Petroleum Engineering 513 or Geology 613.

**To be taken in the final semester of study.

The RCFD course is a team-based experience with each team required to analyse and integrate various data (e.g., seismic, logs, and production) from a real field. Each member of the team is expected to have proficiency on the software packages for geophysical interpretation, geological mapping, geostatistical modeling and reservoir flow modelling. The reservoir characterization will require the development and assessment of a geostatistical model of the field that will be used for a history match and to propose future development. The project will conclude with a formal presentation to experts from both academia and industry.

6. Additional Requirements
None.

7. Credit for Undergraduate Courses
The applicant must make advanced credit requests as part of the admission process. Credit will not be given for course work taken as part of another completed degree/diploma program, or for courses taken to bring the grade point average to the required level for admission.

8. Time Limit
Expected completion time is two years and maximum completion time is six years.

9. Supervisory Assignments
Supervisors will be approved by the specialization Graduate Program Director.

10. Required Examinations
After the conclusion of the Capstone Project, there will be a comprehensive oral examination of each student before an examining committee that includes a faculty member from each of the three disciplines. Each student will be expected to express in-depth knowledge in his/her area of expertise (engineering, geology, geophysics), and to have a comprehensive knowledge of the significance of the other two areas in successful reservoir characterization.

11. Research Proposal Requirements
None.

12. Special Registration Information
None.
13. Financial Assistance
For information on awards, see the Awards and Financial Assistance section of this Calendar.

14. Other Information
None.

15. Faculty Members/Research Interests
See the website of the home department of the faculty members.
Courses of Instruction

How to Use
This section contains the descriptions of courses offered at the University of Calgary. The courses are arranged in alphabetical order by course title not by abbreviation. In order to better understand the notations used throughout this section, an illustrated example of a course description is provided.

All courses listed are not necessarily offered every year and students should consult the Schedule of Classes for an official listing of those courses that will be offered in a given term.

Since this Calendar is published a considerable time before the opening of the academic year, the University reserves the right to make whatever changes circumstances may require including the cancellation of a particular course.

Note: Access to graduate level courses (numbered 600 and above) for Visiting and Exchange students is limited to those admitted to a graduate program. For Open Studies and other students, access to graduate courses is restricted to those with adequate preparation, normally an undergraduate degree or the equivalent. Permission for an Open Studies or other student to register in any graduate level course must be obtained from the Faculty of Graduate Studies office.

Sample Course Description
See numbered footnotes for explanations of the information commonly provided in a course description.

Medical Science 609  
3 units; H(3-2T)

Gene Expression
The flow of genetic information from DNA to final protein product. The subject will be covered in two courses offered in alternat-
ing years: gene structure and regulation of transcription, including gene structure and organization, chromatin structure, regulation of transcription and post-translational processing; and the activity of genes during development including stored messenger ribonucleoprotein particles and translational control in genes, the switch from maternal to zygote genome control of development in early embryos and the molecular basis of morphogenesis and differentiation.
609.02. Genes and Development

Prerequisite: Medical Science 537 (Biochemistry 537) or equivalent and consent of the Faculty.

Antirequisite: Credit for both Medical Science 609.01 and 607.01 will not be allowed. Credit for both Medical Science 609.02 and 751.14 will not be allowed.

Note: MAY BE REPEATED FOR CREDIT NOT INCLUDED IN GPA

'Course Numbers: e.g. Medical Science 609
The number of the course indicates the level of the course:
- Junior level: 200's
- Senior level: 300's and 400's
- Upper level undergraduate: 500's
- Graduate level: 600's and 700's

'Hours of Instruction: e.g. H(3-2T)
Note that we are transitioning to using "units" from "full-course equivalent" or "half-course equivalent":

Full course (F) = 6 units
Half course (H) = 3 units
Quarter course (Q) = 1.5 units
Eighth course (E) = 0.75 units
M (More than a full course)

The hours of instruction per week are indicated with numbers following the weight of the course. The first number represents the number of lecture hours per week and the second number represents the number of lab hours per week.

For example, (3-0) would indicate 3 hours of lectures per week and no labs. For (2-3), there would be 2 hours of lectures per week, along with 3 hours of lab per week.

The figures "S" or "T" attached to a number signify seminar or tutorial hours.

Cross-Listed Courses: e.g. Cellular, Molecular and Microbial Biology 561(Medical Science 561)
Courses which are listed under two Departments and which can be taken for credit from either Department, but not both. The credit is determined by the student's registration.

Prerequisite: Must be completed before registering in this class.

Corequisite: Must be completed at the same time as this class.

Antirequisite: Notes provide additional information pertaining to the course, e.g. restrictions, recommendations. Certain courses carry the notation "Not open to students with credit in course number XXX" or "Credit for both course number XXX and course number XXXX will not be allowed." Students may take these courses if they wish, but credit for both courses will not be granted towards their degree.

Notes: This contains any information that may be helpful regarding enrolment in the course. Some examples are: Enrolment in this course may be limited. See Program Details in the Faculty of Science section of this Calendar, or: This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped.

May Be Repeated for Credit
Some courses are decimalized in order to accommodate different topics of study e.g. 609.01, 609.02. If this notation is present, students are allowed to take multiple decimalized topics belonging to one course number.

'Totally Exempt
A course with this notation is graded as CR (Completed Requirements) or F (Fail). The course is not included in the calculation of the grade point average.
### Courses of Instruction by Faculty

**Faculty of Arts**
- Anthropology ANTH
- Archaeology ARCO
- Art AR
- Art History ARHI
- Communication and Culture CMCL
- Communications Studies COMS
- Dance DNCE

**Introductory Financial Accounting**
Introduction to accounting for business organizations. Reporting of financial results of operations and financial position to investors, managers, and others. Emphasis on the use of accounting information for decision-making.

**Management Accounting**
Breakeven analysis, activity-based costing and management, budgeting, productivity measures, and other tools and techniques that are part of a planning and control system that will help the manager make better economic decisions.

**Intermediate Financial Accounting I**
Provides detailed coverage of the Generally Accepted Accounting Principles (GAAP) primarily related to assets. Emphasizes the theory behind the methods, the strengths and weaknesses of such methods and the need for sound professional judgment.

**Prerequisite(s):** Accounting 601 and 603; or consent of the Haskayne School of Business.
### Accounting 643 3 units; H(3-0)
**Intermediate Financial Accounting II**
Builds on Intermediate Financial Accounting I with coverage of the Generally Accepted Accounting Principles (GAAP) primarily related to liabilities and owners’ equity. Emphasizes the theory behind the methods, the strengths and weaknesses of methods and the need for sound professional judgment.
Prerequisite(s): Accounting 641.

### Accounting 661 3 units; H(3-0)
**Cost Accounting**
Provides intermediate level discussions to the production and analysis of costs used for pricing, production and investment decisions, revenue analysis, performance evaluation, management incentive systems and strategy analysis.
Prerequisite(s): Accounting 603.

### Accounting 721 3 units; H(3-0)
**Taxation**
Discusses the core concepts, regulations, and interpretations underlying the Canadian individual and corporate income taxation. Emphasis is on who is taxable, on what income, when and how tax is calculated. Tax planning opportunities will be identified by using long-term and clientele-based techniques.
Prerequisite(s): Accounting 601.

### Accounting 723 3 units; H(3-0)
**Advanced Taxation**
Focusses on tax planning. It extends the material covered in the introductory tax course with an examination of specialized topics in personal and corporate income tax.
Prerequisite(s): Accounting 721.

### Accounting 725 3 units; H(3-0)
**Auditing**
Discusses the techniques and theory behind the external auditor’s provision of assurance services on financial information. Topics include: the demand for assurance, the role of auditors in providing assurance, auditor independence, audit reports, and audit liability.
Prerequisite(s): Accounting 641.

### Accounting 741 3 units; H(3-0)
**Financial Statement Analysis**
Covers the theories, concepts and practices of financial statement analysis with an emphasis placed on applications.
Prerequisite(s): Accounting 603.

### Accounting 743 3 units; H(3-0)
**Advanced Financial Accounting**
Focuses on advanced accounting methods related to inter-corporate investments and financial reporting. Topics include accounting for business combinations and inter-corporate investments, foreign currency transactions and translation, bankruptcy, partnerships, and not-for-profit organizations.
Prerequisite(s): Accounting 643.

### Accounting 745 3 units; H(3-0)
**Accounting Theory**
Examines the conceptual framework underlying the preparation of financial accounting information, and the theories and propositions on the use of such information by investors, regulators, standard setters, and other corporate stakeholders.
Prerequisite(s): Accounting 643.

### Accounting 765 3 units; H(3-0)
**Managerial Control Systems**
Emphasis is placed on how managers use planning and control to accomplish a firm’s strategies. Uses a case approach to management control systems explaining the usefulness of accounting data from a managerial perspective.
Prerequisite(s): Accounting 661.

### Accounting 789 3 units; H(3S-0)
**Seminar in Accounting**
Development of and solutions to current issues and problems in accounting.
Prerequisite(s): Accounting 603 or consent of the Haskayne School of Business.
MAY BE REPEATED FOR CREDIT

### Accounting 797 3 units; H(3S-0)
**Advanced Seminar in Accounting**
Advanced accounting research topics.
Prerequisite(s): Consent of the Haskayne School of Business.
MAY BE REPEATED FOR CREDIT

### PhD Course
**Doctoral Seminars in Accounting**
799.01. Seminar in Financial Accounting
799.02. Seminar in Managerial Accounting
799.04. Seminar in Taxation

### Anthropology ANTH
Instruction offered by members of the Department of Anthropology and Archaeology in the Faculty of Arts.

### Graduate Courses
Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

### Anthropology 601 3 units; H(3-0)
**Conference Course in Anthropology**
A specialized area of Anthropology selected on the basis of particular interest and need.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

### Anthropology 603 3 units; H(3S-0)
**Anthropology 603**
A reading and conference course in the student’s substantive area conducted jointly by at least two faculty members.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

### Anthropology 605 3 units; H(3-0)
**Professional Skills for Anthropologists**
Training and practice in research/teaching skills: grantmanship, conference and classroom presentations, academic publishing, job interviews.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Not open to students with credit in Anthropology 601.00 or the equivalent.
NOT INCLUDED IN GPA

### Anthropology 611 3 units; H(3-0)
**Methods in Anthropological Research**
A variety of topics relevant to research and the logic of inquiry in Anthropology.
Prerequisite(s): Consent of the Department.

### Anthropology 613 3 units; H(3-0)
**Current Issues in Methodology in Primatology**
A variety of topics relating to aspects of data collection and data analysis in primatology, with a focus on ecological and behavioural data.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

### Anthropology 631 3 units; H(3-0)
**Anthropological Theory**
Prerequisite(s): Consent of the Department.

### Anthropology 635 3 units; H(3-0)
**Primatological Theory**
Seminar dealing with the theoretical material of primatological and biobehavioural perspectives in Anthropology.
Prerequisite(s): Consent of the Department.

### Anthropology 641 3 units; H(3-0)
**Seminar in Civil-Military Relations**
Comparative analysis of relations between civil society and military institutions. A critical approach to analysing how civil and military institutions mutually constitute each other, rather than taking the military and civilian sectors as a given. Special attention will be paid to twentieth century militarization as a social process that has dramatically changed the shape of both civilian and military spheres.
Prerequisite(s): Consent of the Department.

### Anthropology 659 3 units; H(3-3)
**Specialist Course**
Prerequisite(s): Consent of the Department.

### Anthropology 701 3 units; H(3-0)
**Independent Studies**
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

### Archaeology ARKY
Instruction offered by members of the Department of Anthropology and Archaeology in the Faculty of Arts.

### Graduate Courses
Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

### Archaeology 601 3 units; H(3S-0)
**Archaeology 601**
Sponsored by the Anthropology Department.
Prerequisite(s): Consent of the Department.

### Archaeology 613 3 units; H(3-0)
**Current Issues in Methodology in Archaeology**
A variety of topics relating to aspects of data collection and data analysis in archaeology, with a focus on ecological and behavioural data.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

### Archaeology 631 3 units; H(3-0)
**Archaeological Theory**
Prerequisite(s): Consent of the Department.

### Archaeology 635 3 units; H(3-0)
**Archaeological Theory**
Prerequisite(s): Consent of the Department.

### Archaeology 641 3 units; H(3-0)
**Current Issues in Methodology in Archaeology**
A variety of topics relating to aspects of data collection and data analysis in archaeology, with a focus on ecological and behavioural data.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

### Archaeology 659 3 units; H(3-3)
**Archaeological Theory**
Prerequisite(s): Consent of the Department.

### Archaeology 701 3 units; H(3-0)
**Independent Studies**
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT
**Courses of Instruction**

#### The Interstellar Medium

Multimwavelength observations of gas and dust in our Galaxy; distribution and physics of neutral atomic hydrogen and molecules; interstellar chemistry; physics of dust grains; HiI regions; interstellar shocks; gas dynamics; star formation.

**Prerequisite(s):** Astrophysics 213, Physics 325, 381, and one of Mathematics 349 or 375 or Applied Mathematics 307.

**Note:** Taught in the Fall of odd years.

<table>

#### High Energy Astrophysics and Cosmology

Clusters of galaxies; microwave and X-ray background radiation; dark matter and dark energy; overview of cosmology; general relativistic considerations; large-scale structure and expansion of the universe; nucleosynthesis; gamma ray bursts and cosmic rays.

**Prerequisite(s):** Astrophysics 213, Physics 325, 381, and one of Mathematics 349 or 375 or Applied Mathematics 307.

**Note:** Taught in the Winter of even years.

### Biochemistry BCEM

Instruction offered by members of the Department of Biological Sciences in the Faculty of Science.

Department Head - R.M.R. Barclay

**Graduate Courses**

Enrolment in any graduate course requires consent of the Department.

Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

600-level courses are available with permission to undergraduate students in the final year of their program.

See also the separate listing of graduate-level Chemistry courses.

<table>

</tbody>
</table>

#### Current Topics in Biochemistry

A discussion of contemporary experimental and theoretical biochemical methods used for the study of drugs and diagnostics at a molecular level. Structural analysis, drug design and molecular dynamics methods will be described, as well as current practices for commercialization. Various modern ‘omics’ research approaches and current leading drug targets of the pharmaceutical industry will also be discussed.

### Biology of Laboratory Animals

The course is based on the Canadian Council on Animal Care Syllabus "Basic Principles of Laboratory Animal Science for Research Scientists." In addition to the study of common, research, farm and exotic animals, topics to be covered include ethical considerations, regulation and legislation, animal models, animal facilities and husbandry, hazard control, surgery, anaesthesiology, euthanasia and post-mortem examinations. Practical sessions will provide experience in handling and restraint of specific laboratory animals, infections, blood collection, anaesthesiology and surgery.

**Note:** Enrolment in this course is restricted in the first instance to graduate students who will do research utilizing animals.

#### Advanced Statistical Applications in Biology

This course explains and demonstrates the analysis of biological data with general linear models, generalized linear models, maximum-likelihood fitting of non-linear models, and resampling techniques. Content is presented in a workshop format, so that students learn the application of computer analysis coincidentally with statistical concepts.

**Prerequisite(s):** Familiarity with statistical inference, regression, and ANOVA-based experimental design (equivalent of Ecology 425) is required.

**Note:** Offered during odd-even dated academic years.

<table>

### Darwin’s Origin of Species

An examination of the first edition of Charles Darwin’s “On the Origin of Species” and related writings. Students will lead discussions of scientific, philosophical, and other issues raised by the book, and write a term paper on a related topic of their choice.

**Prerequisite(s):** Consent of the Department.

**Note:** The instructor does not assume an advanced background in biology and will not focus on technical scientific issues. May not be offered every year.

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
<th>Hours/Week</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biology 619</td>

#### Advanced Evolutionary Biology

The theory of organic evolution. Historical development of evolutionary ideas. Darwin’s contribution. The mechanism of natural selection; sexual, kin and group selection. The application of the theory in biogeography, ecology, ethology and other areas of biology.

**Note:** Offered during odd-even dated academic years.

<table>

**Courses of Instruction**

**Biomedical Engineering BMEN**

Instruction offered by members of the Schulich School of Engineering, Faculty of Kinesiology, and for graduate-level courses, other faculties involved in the multi-faculty Biomedical Engineering Graduate Program.

Associate Dean (Academic & Planning) – A. Nygren
Director, BME Graduate Program – K. Rinker

### Business and Environment BSEN

- **Business and Environment 691** 3 units; H(3-0)
- **Civil Engineering 691**
- **Fundamentals of Project Management**
- Application of management principles to the project environment; planning, control, scope, time and cost processes; project organization and human resource issues. Students review a current major capital project and submit and defend a project report. Prerequisite(s): Consent of the Program Director.
- **Business and Environment 719** 3 units; H(3-0)
- **Project External Issues**
- Projects may focus on the effects of external factors on business. External factors may include: corporate influences; financial interfaces; sources of funds; lending environment; owner’s and lender’s risks; government involvement; regulatory requirements; public interfaces; public information; compensation; project commissioning. Prerequisite(s): Business and Environment 691.
- **Business and Environment 749** 3 units; H(3-0)
- **Rediscovering Leadership: The Haskayne Wilderness Retreat**
- One-week intensive wilderness retreat combines experiential outdoor activities and personal growth challenges with cross-cultural first nations teachings and ceremonies to deliver core leadership skills for social responsibility and sustainable development.
- **Business and Environment 751** 3 units; H(3-0)
- **Strategies for Sustainable Development**
- The strategic context for making business decisions with respect to sustainable development issues. The role of sustainability in economic development, international trade relations and emerging technologies. Stakeholder perspectives and the effect of environmental and social issues on industrial performance.
- **Business and Environment 753** 3 units; H(3-0)
- **Managing Social and Environmental Issues in the Global Market Place**
- Canadian companies operating in the international arena find themselves faced with an increasingly complex array of social and environmental risks that threaten their strategic objectives. This course examines this new class of strategic corporate risks through a review of changes in international sustainable development policy initiatives, changes in communications, the emergence of an environmental and social activist sector, and the interaction of these factors resulting in new international business risk challenges. The course uses lectures, cases, simulations and class discussion of theories and concepts.

### Business and Environment 761

- **Business and Environment 761** 3 units; H(3-0)
- **Ethics and the Professional Manager**
- The role of values in business decision making; alternative moral codes and their principles; moral principles as decision tools, and reasoning through moral dilemmas; role of business in society; specific issues in business ethics; application through cases and exercises.

### Business and Environment 777

- **Business and Environment 777** 3 units; H(3-0)
- **Global Environment of Business**
- Economic, political, social and legal factors affecting management decisions. Topics may include Canada in the world economy, business and government relations, business ethics and legal environment for business. Develops knowledge and ability to analyse and deal with complexities of the business environment.
- **Corequisite(s):** Strategy and Global Management 601 or consent of the Haskayne School of Business.
- **Business and Environment 789** 3 units; H(3S-0)
- **Seminar in Business and Environment**
- Study and discussion of current research literature and contemporary issues on topics related to Business and Environment. MAY BE REPEATED FOR CREDIT
- **Business and Environment 793** 3 units; H(3-0)
- **Legal Environment of Business**
- The study of the various areas of business law. Topics may include: contracts, patents and copyrights, product liability, incorporation and other relevant legal issues.
- **Prerequisite(s):** Human Resources and Organizational Dynamics 601, Operations Management 601, Management Information Systems 601, Accounting 601 or equivalent.

### Business and Environment 797

- **Business and Environment 797** 3 units; H(3S-0)
- **Advanced Seminar in Business and Environment**
- **Prerequisite(s):** Consent of the Haskayne School of Business. MAY BE REPEATED FOR CREDIT

### Cellular, Molecular and Microbial Biology CMMB

Instruction offered by members of the Department of Biological Sciences in the Faculty of Science.

Department Head - R.M.R. Barclay

### Graduate Course

Enrolment in any graduate course requires consent of the Department.

- Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.
- 600-level courses are available with permission to undergraduate students in the final year of their programs.

### Cellular, Molecular and Microbial Biology 637

- **Cellular, Molecular and Microbial Biology 637** 3 units; H(3-0)
- **Advanced Topics in Molecular Microbiology**
- Techniques and discussion of recent literature in molecular microbiology. Topics covered will vary from year to year, but could include bioinformatics, genomics, mutagenesis, advanced microscopy techniques, proteomics, vectors and cloning techniques, gene expression, and over-expression of proteins, as they relate to the study of prokaryotic...
systems. Course content will be tailored to the interests of the graduate students enrolled in the class in a given year.

Chemical Engineering ENCH

Instruction offered by members of the Department of Chemical and Petroleum Engineering in the Schulich School of Engineering.

Department Head - I. Gates

Associate Heads - M. Foley, A. De Vischer

Graduate Courses

Chemical Engineering 601 0.75 units; E(3S-0)

Research Seminar

Introduction to health and safety, Supervisory relationships. Respect in the lab. Reference gathering and management. Presentation skills. Writing and publishing skills for scientific manuscripts and abstracts. Career development skills. Intellectual property. Reports on studies of current research in the Department.

MAY BE REPEATED FOR CREDIT NOT INCLUDED IN GPA

Chemical Engineering 607 3 units; H(3-0)

Natural Gas Processing Principles

Physical and chemical properties of natural gases; vapour-liquid equilibrium data and computations; flow of gas and gas-liquid mixtures; separation of gaseous mixtures; heat transfer in gas processing; production of natural gas and its associated liquids.

Note: This course does not count towards the degree requirements of MSc and PhD students.

Chemical Engineering 609 3 units; H(3-0)

Natural Gas Processing Technology

Design and operational criteria in transporting and processing of natural gas; refrigeration and compression; cryogenics; hydrocarbon dew point control; LPG recovery; sulphur recovery; mechancal flow diagrams; process simulation.

Prerequisite(s): Chemical Engineering 607.

Advanced Topics in Mass Transfer

Advanced concepts in mass transfer in multiphase systems. Mass transfer with simultaneous chemical reaction and heat transfer.

Chemical Engineering 615 3 units; H(3-1.5)

Model Predictive Control

Chemical Engineering 617 3 units; H(3-1.5)

Modelling and Identification Advanced Control

Chemical Engineering 619 3 units; H(3-0)

Special Problems

Advanced studies on specialized topics in chemical, petroleum, biochemical and environmental engineering.

MAY BE REPEATED FOR CREDIT

Chemical Engineering 620 6 units; F(0-4)

Graduate Project

Individual project in the student’s area of specialization under the guidance of a faculty member. A written proposal, one or more written progress reports, and a final written report are required. An oral presentation is required upon completion of the course. Open only to students in the MEng (course-based) program.

Prerequisite(s): Consent of the Department Head or Associate Head Graduate Studies.

Antirequisite(s): Credit for both Chemical Engineering 620 and 699 will not be allowed.

Chemical Engineering 621 3 units; H(3-0)

Reservoir Simulation

Enhanced recovery modelling (generalized black-oil models, compositional and miscible), well treatment, grid orientation. New developments in gridding, thermal models, naturally fractured reservoirs, modelling of induced fractures (hydraulic and waterflood), reservoir geomechanics, and practical aspects of conducting simulation studies.

Prerequisite(s): Petroleum Engineering 429 or 523.

Chemical Engineering 623 3 units; H(3-0)

Chemical Reactor Design

Advanced study of design and operation of chemical reactors for both homogeneous and heterogeneous systems, batch, continuous flow stirred tank, tubular and multitubed adiabatic reactors. Cold shot cooling in reactors. Optimal temperature gradients and yields. Catalyst effectiveness factors and optimal control with decaying catalysts. Analysis of sulphur plant reactor design including cost optimization.

Prerequisite(s): Chemical Engineering 421.

Chemical Engineering 625 3 units; H(3-0)

Advanced Topics in Heat Transfer

Chemical Engineering 627 3 units; H(3-1.5)

Chemical Process Simulation

Object oriented programming applied to the design of a steady state chemical process simulator via the sequential modular approach and by the equation-based approach. Material and energy balances for systems of process units.

Chemical Engineering 629 3 units; H(3-0)

Secondary and Tertiary Recovery

Prerequisite(s): Petroleum Engineering 525.

Chemical Engineering 631 3 units; H(3-0)

Advanced Topics in Fluid Mechanics

Chemical Engineering 633 3 units; H(3-0)

Chemical Thermodynamics

Advanced application of thermodynamic principles. Calculation of thermodynamic properties; ideal and non-ideal solution theory; calculation of phase equilibria; properties of reacting mixtures.

Prerequisite(s): Chemical Engineering 427.

Chemical Engineering 639 3 units; H(3-0)

Applied Numerical Methods in Engineering

Note: Knowledge of a programming language and undergraduate-level numerical methods is necessary.

Chemical Engineering 643 3 units; H(3-0)

(Environmental Engineering 641)

Air Pollution Control Engineering

Introduction to air quality and air pollution. Energy and air pollution. Fossil fuel combustion and related air pollution. Industrial air pollution control. Control of particulate matter. Control of VOCs, SOx, and NOx. Adsorption, absorption and biotreatment of air pollutants. GHG emission control. Recent advances on related topics.

Antirequisite(s): Credit for both Chemical Engineering 643 and Environmental Engineering 641 will not be allowed.

Chemical Engineering 645 3 units; H(3-0)

(Environmental Engineering 661)

Industrial and Produced Wastewater Treatment

Sources and characterization of industrial wastewater. Treatment objectives and regulations. Unit and process design. Physical/chemical treatment including sedimentation, coagulation, filtration, absorption, adsorption, ion exchange, membrane processes and pH adjustment.

Note: Credit for both Chemical Engineering 645 and Environmental Engineering 661 will not be allowed.

Chemical Engineering 647 3 units; H(3-0)

Thermal Recovery Methods

Prerequisite(s): Petroleum Engineering 429 or 523.

Chemical Engineering 649 3 units; H(3-0)

Naturally Fractured Reservoirs

Classification and characterization of naturally fractured reservoirs. Drillling and completion methods. Production characteristics. Tight gas reservoirs. Reserve estimation. Emphasis is placed on the relationship between geology, log interpretation, well testing, and primary-secondary recovery of hydrocarbons from naturally fractured reservoirs.
Courses of Instruction

Chemical Engineering 651 3 units; H(3-0)
(formerly Chemical Engineering 619.51)

**Engineering Fuel Cells**
Overview of Fuel Cells. Comparison of fuel cells with other energy technologies. Types of fuel cells; electrochemical reactions; materials and balance of plant.

Chemical Engineering 653 3 units; H(3-0)

**Horizontal Wells for Petroleum Production**
Drilling and completion methods for horizontal wells; mathematical analysis of steady state flow to horizontal wells and well combinations; pseudo steady state and constant well bore pressure models; theoretical comparisons of predicted performance and coning behaviour of horizontal and vertical well patterns; performance in fractured reservoirs; potential for horizontal wells in heavy oil and bitumen production; basic conceptual ideas of steam-assisted gravity drainage.

Prerequisite(s): Petroleum Engineering 429 or Petroleum Engineering 523.

Chemical Engineering 657 3 units; H(3-0)

**Advanced Reservoir Engineering**
Formulation and solution of reservoir-engineering problems including combination of variables, Laplace transform, approximate Integral methods, and solution methods of moving boundary problems. Examples from thermal processes (e.g. hot waterflooding, SAGD), different recovery mechanisms (e.g. imbibition, expansion drive, solution gas drive), well testing problems and naturally fractured reservoirs.

Prerequisite(s): Petroleum Engineering 429 or Petroleum Engineering 523.

Note: Prior knowledge of reservoir engineering and analytical solution methods of differential equations is necessary.

Chemical Engineering 659 3 units; H(3-0)

**Advanced Cell and Tissue Engineering**
Current challenges in tissue engineering. Focus on specific tissues. Course topics include a brief biology review, cell fate processes, stem cells, tissue microenvironments and mass transfer, biomaterials, bioreactors, and clinical delivery of tissue engineered constructs.

Prerequisite(s): Consent of the Department.

Note: Credit for both Chemical Engineering 659 and Biomedical Engineering 619.06 will not be allowed.

Chemical Engineering 661 3 units; H(3-0)

**Geostatistics for Reservoir Characterization**
Statistical/probability concepts, exploratory data analysis, spatial structural analysis, estimation theory (Kriging). Integration of auxiliary information and conditional stochastic simulation. Special emphasis on reservoir characterization and the particular problems encountered in that area. The geostatistical methodology for reservoir characterization will be demonstrated on a fluvial reservoir example.

Prerequisite(s): Petroleum Engineering 429 or Petroleum Engineering 523.

Note: Open to graduating Chemical Engineering, Civil Engineering and Geophysics students, and Geology graduate students with sound quantitative skills. Prior exposure to statistical/probability theory is required.

Chemical Engineering 665 3 units; H(3-0)
(Environmental Engineering 665)

**Wastewater Issues for the Oil and Gas Industry**
Produced water characteristics, regulations governing produced water management, management options. Technologies used for produced water treatment, novel emerging technologies. Process design approaches and comparative evaluation of various technologies. Case Study Examples.

Note: Credit for both Chemical Engineering 665 and Environmental Engineering 665 will not be allowed.

Chemical Engineering 677 3 units; H(3-0)

**Advanced Topics in Oil and Gas Production**
Problems related to production of conventional oil, heavy oil and natural gas; analysis of the interactions of oil, water and gas, effects of fluid properties, rock structure and capillary, gravity and viscous forces acting on the reservoir system; application to the design of improved oil and gas recovery methods. New processes in oil and gas recovery.

Prerequisite(s): Petroleum Engineering 429 or 523.

Chemical Engineering 687 3 units; H(3-0)
(formerly Chemical Engineering 619.87)

**Petroleum Economics**
Economic principles and risk management practices in the petroleum industry. Project selection; investment ranking; budgeting; and portfolio development. Decision making under uncertainty and risk.

Chemical Engineering 689 3 units; H(3-0)

**Drilling Advances, Modelling and Simulation**
Application of drilling optimization simulator tools to optimize rate of penetration and minimize cost. Drilling hydraulic simulation, directional drill string torque and drag calculations, drilling fluid selection and analysis and real time drilling rate analysis.

Antirequisite(s): Credit for both Chemical Engineering 689 and 619.91 will not be allowed.

Chemical Engineering 698 6 units; F(3-0)
(Geology 698) (formerly Chemical Engineering 619.95 and 619.96)

**Reservoir Characterization for Field Development**
A team-based, integrated reservoir description experience working with geophysical, geological, petrophysical, and engineering data to produce a field development plan.

Prerequisite(s): Chemical Engineering 621, Geology 697 and Human Resources and Organizational Dynamics 789 or equivalent.

Note: This course is intended for graduate students in the Master of Engineering with Reservoir Characterization Specialization.

Chemical Engineering 699 3 units; H(0-4)

**Special Project**
Project study conducted under the guidance of a faculty member and intended to expose the student to the tools, techniques and basic aspects of research. A written comprehensive report and one or more written progress reports are required.

Prerequisite(s): Consent of the Department Head or Associate Head Graduate Studies.

Antirequisite(s): Credit for both Chemical Engineering 699 and 620 will not be allowed.

MAY BE REPEATED FOR CREDIT

Chemical Engineering 701 3 units; H(3-0)
(Environmental Engineering 621)

**Experimental Design and Error Analysis**
Statistical analysis and design of engineering experiments. Random variables and sampling distributions; estimation and hypothesis testing; concepts of central tendency, variability, confidence level; correlation, regression and analysis of covariance; robust estimation; experiments of evaluation; experiments of comparison; factorial experiments (analysis of variance); experimental design involving randomization, replication, blocking and analysis of covariance.

Antirequisite(s): Credit for more than one of Chemical Engineering 701, Environmental Engineering 621, Chemical Engineering 619.45 and 619.82 will not be allowed.

Note: Intended for MSc/PhD students. MEng students may be able to register with instructor’s permission.

Chemical Engineering 703 3 units; H(3-0)

**Advanced Mathematical Methods in Engineering**
Review of theory of linear algebra. Review of ordinary differential equations: linear, non-linear; series solutions; special exact solutions; applications. Partial differential equations: geometric interpretation; characteristic curves; separation of variables; the Sturm-Liouville problem and Fourier series; eigenfunction expansion; Fourier, Laplace and Hankel transforms; self similarity; Green’s function; applications.

Antirequisite(s): Credit for both Chemical Engineering 703 and 619.83 will not be allowed.

Note: Intended for MSc/PhD students. MEng students may be able to register with instructor’s permission.

Chemistry CHEM

Instruction offered by members of the Department of Chemistry in the Faculty of Science.

Department Head - D.T. Cramb

Graduate Courses

Advanced graduate-level courses are listed below. Courses in certain areas are grouped under “Selected Topics” titles. The content and offering of these are decided annually by the Department to meet the requirements of graduate students in the program. A student may receive credit for several courses in a given selected topics area. Details of offerings and course outlines may be obtained from the Department on request.

Unless stated otherwise the prerequisite for entry to all courses at the 600 level and above is “consent of the Department.” Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

Chemistry 601 3 units; H(2S-0)

**Research Seminar**
Reports on studies of the literature or of current research. Required of all graduate students in Chemistry.

NOT INCLUDED IN GPA

Chemistry 603 3 units; H(2S-0)

**Research Seminar**
Continuation of Chemistry 601.

NOT INCLUDED IN GPA

**Civil Engineering ENCI**

**Courses of Instruction**

**Chemistry 613** - Electrochemical Fundamentals and Methodologies

Origin, significance, and thermodynamics of interfacial potential differences; structure of the double layer; basic principles of electron transfer at interfaces, Butler-Volmer equation; mass transport control of electro-chemical reactions; controlled potential methods as applied to electrode surface reactions and homogeneous reactions coupled to electron-transfer processes.

**Chemistry 615** - Analytical Separations

Theory and practice of resolving mixtures into separate components for analysis. Basic theory; liquid-liquid extraction; high performance liquid chromatography; gas-liquid, open bed, ion exchange and exclusion chromatography; electrophoresis.

**Chemistry 617** - Advanced Analytical Chemistry

Consideration of principles and equilibria pertaining to aqueous and nonaqueous neutralization, redox, complexation, precipitation and potentiometric methods employed in analyses. Statistical considerations of analytical data and analysis.

**Chemistry 619** - Selected Topics in Analytical Chemistry

Topics of current interest such as: properties of synthetic polymer membranes, advanced instrumental methods, developments in chemical sensors, speciation studies, environmental analytical chemistry.

**Chemistry 621** - Organometallic Chemistry

A detailed discussion of structure, bonding and preparative methods in organometallic chemistry including the industrial and synthetic applications of organometallic compounds.

**Chemistry 623** - Chemistry of the Main Group Elements

The chemistry of electron-deficient, electron-rich rings, inorganic polymers, and organometallic compounds of the main group elements; applications of spectroscopic techniques; industrial uses. Seminars on recent research developments.

**Chemistry 627** - Theoretical Inorganic Chemistry

Aspects of theoretical inorganic and organometallic chemistry including: quantitative and qualitative molecular orbital theory; the bonding and structure of molecules, clusters, and extended arrays; the fragments of organometallic species; orbital correlation diagrams in inorganic reactions; spectroscopic methods and their interpretation.

**Chemistry 629** - Selected Topics in Inorganic Chemistry

Courses are offered to cover topics of current interest, such as bioinorganic chemistry, inorganic solution phenomena, and the inorganic chemistry of the solid state.

**Chemistry 641** - Biochemical Toxicology

An interdisciplinary course focused on the diverse biomolecular mechanisms by which organic (e.g. PCB's) and inorganic pollutants (e.g. Cd, Hg, As) adversely affect cell function examined at multiple levels of organization, from molecules to whole animals. Topics include how natural toxins exert toxicity, how toxins/light generate free radicals within cells, how the speciation of metals in the environment affects their bioavailability/toxicity, and the toxicity mechanisms that lead to homeostatic dysfunction.

**Chemistry 651** - Advanced Organic Stereochemistry

Stereochemical principles in organic chemistry, including: geometry, bonding, symmetry, molecular isomerism, conformational analysis, asymmetric and stereocontrolled reactions.

**Chemistry 653** - Advanced Organic Spectroscopy

Advanced spectroscopic techniques for the determination of complex organic structures. Emphasis will be on NMR methods, practical aspects of acquiring spectra, advanced interpretation and reporting spectral data.

**Chemistry 655** - Advanced Organic Synthesis

A review of modern synthetic reactions and methods in the field of organic chemistry with emphasis on the recent literature.

**Chemistry 657** - Theoretical Organic Chemistry

Theoretical principles of organic chemistry including stereochemistry, molecular orbital calculations, pericyclic processes (Woodward-Hoffmann rules), and PMO theory.

**Chemistry 659** - Selected Topics in Organic Chemistry

Courses are offered in major branches of organic chemistry, including: carbohydrate chemistry, steroids and terpenoids, semichemistry, heterocyclic chemistry, biosynthesis of secondary metabolites, as well as other topics of current interest.

**Chemistry 669** - Selected Topics in Applied Chemistry

Courses are offered in such topics as electrochemistry, industrial catalysis, chemistry of energy sources, colloid and surface chemistry and polymer chemistry.

**Chemistry 681** - Crystallography

A general introduction to X-ray analysis of single crystals. Topics include: Geometry of the crystal lattice, diffraction of X-rays: Fourier synthesis; methods of structure solution; accuracy and precision of derived parameters.

**Chemistry 689** - Selected Topics in Physical Chemistry

Courses are offered in such topics as dielectric properties, kinetics, molecular vibrations, fluorescence spectroscopy, X-ray diffraction.
Courses of Instruction

**Civil Engineering 619** 3 units; H(3-0)

**Special Problems**
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member. Students would be required to consider problems of an advanced nature.

**MAY BE REPEATED FOR CREDIT**

**Civil Engineering 621** 3 units; H(3-0)

**Computer Analysis of Structures**

**Civil Engineering 623** 3 units; H(3-0)

**Behaviour and Design of Reinforced Concrete Members**
Behaviour and strength of reinforced concrete members; materials; safety; design of members subjected to flexure, compression, flexure and flexure including biaxial bending, shear, torsion; bond and anchorage; slender columns; deep beams; serviceability; rotation capacity; relation between results of research and current design codes.

**Civil Engineering 627** 3 units; H(3-0)

**Serviceability of Concrete Structures: Advanced Topics**

**Civil Engineering 629** 3 units; H(3-0)

**Computational Modelling of Concrete Structures**
Discussion of linear finite element analysis; non-linear analysis and iterative techniques; constitutive relations and failure theories; modelling of reinforcement and prestressing; cracking models and post-cracking behaviour; tension stiffening and strain softening; models for shear transfer, time-dependent effects of creep, shrinkage and temperature; behaviour under cyclic loading and dynamic effects; numerical examples and computer applications on analysis of beams, frames, slabs, shear panels and walls, thin shells, axisymmetric solids and three dimensional structures.

**Civil Engineering 633** 3 units; H(3-0)

**Fibre Reinforced Polymers for Construction and Repair of Structures**
Properties and behaviour of various types of Fibre-Reinforced Polymers (FRPs) materials, Limit States Design, procedures and design philosophy of structures reinforced or strengthened with FRP. Flexural and shear design, FRP systems for flexural and shear strengthening of structures. Axial strengthening of columns. Concrete prestressed with FRP. Durability and fire resistance, blast mitigation and repair using FRP. Case studies and field applications.

**Civil Engineering 635** 3 units; H(3-0)

**Behaviour and Design of Prestressed Concrete Bridges and Other Structures**

**Civil Engineering 637** 3 units; H(3-0)

**Behaviour and Design of Prestressed Concrete Members**
Flexural analysis and design of prestressed and partially prestressed concrete members based on stresses, deflections and strength. Design of members subjected to shear, torsion, compression or tension. Fire resistance. Composite members. Bond and anchorage zones. Prestressing losses and time-dependent deformations. Discussion of current design standards.

**Civil Engineering 639** 3 units; H(3-0)

**Structural Dynamics**
Numerical analysis of simple systems; rigorous analysis of one-degree systems; lumped mass multi-degree systems and structures with distributed mass and load; approximate analysis and design methods; earthquakes, blast-resistant design, beams subjected to moving loads; calculation of results by analog and digital computer.

**Civil Engineering 641** 3 units; H(3-0)

**Seismic Analysis and Design**
Introduction to seismology, ground movements, typical accelerograms. Response spectra for linear and non-linear responses, role of damping and inelastic behaviour. Equivalent lateral load for design, code requirements. Structural design concepts to mitigate seismic effects. Design of steel structures for earthquake motions. Design of concrete frames and walls for earthquake motions. Prerequisite(s): Civil Engineering 639.

**Civil Engineering 643** 3 units; H(3-0)

**Structural Masonry Design**
Component materials and their properties, masonry properties, quality control, plain and reinforced masonry, beams, walls, slender walls, columns, load-moment interaction curves, concentrated load bearing, shear load distribution, shear walls, code provisions, building envelope, detailing, differential movement, geometric walls, prestressed masonry, arches.

**Antirequisite(s):** Not open to students with credit in Civil Engineering 553 or 595.05.

**Civil Engineering 645** 3 units; H(3-0)

**Risk Analysis**
The objective of this course in engineering risk analysis and risk assessment is to familiarize students with the principles and techniques of quantitative risk analysis. Key focus points are the treatment of uncertainties, the attitude of conservatism, risk perception, the careful use of quantitative risk analysis, and the role of risk in decision making. Includes: Hazards, risk, risk analysis, risk assessment; risk measures; probability, uncertainty modelling, stochastic variables; using and misusing data, reliability, tails; risk assessment frameworks, models in health and environmental risk analysis, models in engineering risk analysis; risk perception, risk comparison; and practical case studies.

**Civil Engineering 647** 3 units; H(3-0)

**Structural Reliability Techniques**
The concepts of risk and reliability, uncertainties, and engineering decision making. Focuses on both aspects of uncertain systems, mainly structures, but also soils and environments, namely analysis and design. Techniques for structural reliability-based design and optimization are discussed and supplemented by practical applications.

**Civil Engineering 653** 3 units; H(3-0)

**Theory and Applications of the Finite Element Method**
Conceptual framework of the finite element method with emphasis on applications to structural analysis: shape functions, continuity at nodes, numerical integration, matrix assembly. Scope of the method, use of basic equations of elasticity, displacement (stiffness) method of analysis. Sources of error and poor performance; mesh sensitivity; element types, their selection and behaviour. Applications in structural analysis, heat conduction and other non-structural problems; use of available finite element programs.

**Civil Engineering 655** 3 units; H(3-0)

**Numerical Methods for Modelling Geomaterials**
Methods of theoretical analysis for solving partial differential equations associated with Geotechnical and Structural Engineering. Variational Principles, Principle of Virtual Work and Galerkin Method. Theory of finite element and focus on its computer implementation for analysis of engineering problems. Typical applications include two- and three-dimensional stress analysis, seepage flow, and coupled fluid flow-solid deformation problems. Advanced topics: numerical strategies for solving material and geometric non-linearities (plasticity and large deformations), poro-elasticity and plasticity, strain localization, and presentation of other numerical techniques such as finite difference, boundary element, discrete element methods.

**Civil Engineering 657** 3 units; H(3-0)

**Airport Planning and Engineering**
Planning of airport systems; planning and design of the airfield; airstide capacity and delay; air traffic
control; planning and design of the passenger terminal; analysis of airport operations.

Civil Engineering 659 3 units; H(3-0)

Sustainable Infrastructure
Sustainability and durability issues of structural materials; properties and uses of non-renewable and recycled materials; energy efficient design and green material selection; life cycle cost analysis. Constructability, Aesthetics. Infrastructure management, inventory, assessment/monitoring, performance and remaining service life. Preservation of existing infrastructure; repair and rehabilitation, strengthening and retrofitting to extend service life of structures. Structural composites: properties and applications to improve performance and sustainability of infrastructure.

Civil Engineering 666 3 units; H(3-0)

Fundamentals of Soil Behaviour
Principle of effective stress in saturated soil, unsaturated soil and clay. Engineering properties of soils. Shear strength and deformation characteristics of soils in static, cyclic, drained and/or undrained loading. Laboratory testing of soils. One-dimensional consolidation, poro-elastic deformation, swelling mechanism, time-dependent deformation and soil contamination in soils.

Applied Rock Engineering
Engineering properties of intact rock and rock mass. Rock classification. Slope and underground excavation; groundwater flow in fractured rock; poro-elastic deformation analyses; hydraulic fracturing.

Civil Engineering 669 3 units; H(3S-3)

Permafrost Engineering
Development, characteristics and significance of permafrost, including the thermal and hydrological processes and resulting periglacial geomorphology and geotechnical implications. Contemporary topics in science and engineering of seasonally and perennially frozen ground.

Antirequisite(s): Credit for both Civil Engineering 669 and Geography 689 will not be allowed.

Civil Engineering 671 3 units; H(4-0)

Advanced Foundation Engineering

Civil Engineering 673 3 units; H(3-0)

Constitutive Laws for Geomaterials
Definition of a continuous medium. Description of deformable continuous media; concepts of stress, strain and their invariants. Constitutive equations geomaterials as a generic for rock, soil and concrete materials in civil engineering. Review of elasticity theory. Introduction to yielding, plastic flow and failure phenomena in geomaterials. Limit analysis with applications to both geotechnical and structural engineering. Stress-strain behaviour for both cohesive and granular materials. Constitutive models based on critical state theory will be presented. Other topics such as strain localization and fracture phenomena may be included as appropriate.

Civil Engineering 689 3 units; H(3-0)

Advanced Project Management Practices and Principles
Advanced practices, tools and concepts in managing complex volatile or large projects. SMART project management based on best practices in diverse industries forms the basis of this course.

Prerequisite(s): Civil Engineering 691, 697 and consent of the Program Director.

Civil Engineering 691 3 units; H(3-0)

Fundamentals of Project Management
Application of management principles to the project environment; planning, control, scope, time and cost processes; project organization and human resource issues. Students review aspects of a current major capital project and submit and defend a project report.

Prerequisite(s): Consent of the Program Director.

Civil Engineering 693 3 units; H(3-0)

Project Management Engineering
Role of the engineering manager in the project management team. The engineering firm, its organization and function; project development, engineering project control; design control; scope and estimate control; engineering interfaces with procurement and construction; engineering responsibility in project commissioning start-up and operations.

Prerequisite(s): Consent of the Program Director.

Civil Engineering 695 3 units; H(3-0)

Project Construction Management
Role of the construction manager in the project management team; project options for the management of construction; managing the contractor’s business; labour relations; claims; contractor(s) responsibility in project commissioning start-up and operations.

Prerequisite(s): Consent of the Program Director.

Civil Engineering 697 3 units; H(3-0)

Project Planning and Control
Strategic and tactical planning; planning for scope, quality, time and cost; selection and implementation of project management information system; economic and risk analysis; planning for construction labour relations.

Prerequisite(s): Consent of the Program Director.

Civil Engineering 699 3 units; H(3-0)

Law for Project Managers
Legal issues related to the effective management of projects. Introduction to the legal system and processes; environmental law; intellectual property non-disclosure; professional liability; contract law; strategic alliances; employment law; the builder’s lien act. Cases are reviewed and students are expected to complete a number of assignments requiring research into case law.

Prerequisite(s): Consent of the Program Director.

Civil Engineering 703 3 units; H(3-0)

Fundamentals of ITS and Transportation System Performance
Definition of ITS, with particular emphasis on advanced traffic management and control and advanced traveler information issues; traffic assignment and dynamic traffic assignment, traffic simulation tools; various traffic flow models: from microscopic to macroscopic traffic flow theory; traffic and incident management; surface street control; freeway control.

Prerequisite(s): An undergraduate degree in engineering or instructor approval.

Civil Engineering 707 3 units; H(3-0)

Theory of Transport Demand Modelling
Modelling for transport planning; data in transport modelling; trip generation modelling; trip distribution modelling; modal split modelling; direct demand models; traffic assignment; equilibrium in transport modelling; discrete-choice models; specification and estimation of logit models; aggregation issues; simplified transport demand models; model updating and transferability.

Prerequisite(s): Consent of the Department.

Civil Engineering 709 3 units; H(2-4)

Practice of Transport Demand Modelling
Sample enumeration modelling; practical aspects of logit model estimation and calibration; disaggregate choice behaviour data; practical 4-step transport demand modelling using commercial software packages; application of computer-based network assignment models.

Prerequisite(s): Civil Engineering 707.

Civil Engineering 711 3 units; H(3-0)

Advanced Analysis and Modelling of Public Transit Systems
Role of public transport in a city; concepts of public and private benefits; economies of scale; main modes of urban public transport systems: rail, bus, van and other vehicles; advanced mathematical modelling of mode of operation, route alignment, access, station and stop location, transfer protocols, time table, vehicle and fleet size, reliability; concepts of utility and value of time; detailed functional design and optimization of a bus route, rail line, bus, rail and metro networks.

Prerequisite(s): An undergraduate degree in engineering or instructor approval.

Civil Engineering 715 3 units; H(3-0)

Transport Economics
Economic characteristics of transport; movement and location; transport demand; direct costs of transport; the value of travel time; external costs of transport; shadow prices; pricing of transport services; containment of external costs of transport; private and public sector investment analysis in transport; transport and economic development; transport policy.

Prerequisite(s): Consent of the Department.

Civil Engineering 741 3 units; H(3-0)

Environmental Engineering 655

Biological Processes for Wastewater Treatment
Specialized biological wastewater treatment processes for removal of impurities not effectively removed by conventional secondary wastewater treatment systems, such as nutrients (e.g. nitrogen and phosphorus), residual organics, residual solids, bacteria and viruses. Wetlands. Activated sludge modelling. Biological nutrient removal. Sludge management. Disinfection.

Note: Credit for both Civil Engineering 741 and Environmental Engineering 663 will not be allowed.

Civil Engineering 745 3 units; H(3-0)

Environmental Engineering 665

Hazardous Waste and Contaminated Sites Management
Integrated waste management. Functional and fundamental properties of hazardous waste. Toxicological properties of contaminants. Contami-

Note: Credit for both Civil Engineering 745 and Environmental Engineering 655 will not be allowed.

Civil Engineering 747 3 units; H(3-0) (Environmental Engineering 655)

Contaminated Soil Remediation
Overview of soil remediation engineering. Contaminant partitioning in air, water and gas phases. Phases of site assessments, Physical and chemical treatment processes, soil vapour extraction, air sparging, soil washing, soil flushing, thermal desorption and incineration, solidification and stabilization, vitrification, biological treatment processes, bioremediation kinetics, ex situ and in situ techniques. Liquid phase bioremediation as it pertains to soil remediation.

Note: Credit for both Civil Engineering 747 and Environmental Engineering 653 will not be allowed.

Civil Engineering 749 3 units; H(3-0)

Environmental Aspects of Waste Disposal Systems
Soil-chemical interactions and implications in waste disposal system design; landfill design principles; leachate production, leachate migration in the unsaturated/saturated zones; analytical and numerical solution of flow and transport equations; applications and case studies of groundwater contamination; design and construction of barrier systems; bioreactor landfills; landfill closure issues; greenhouse gas control systems.

Note: Credit for both Civil Engineering 749 and Environmental Engineering 651 will not be allowed.

Civil Engineering 751 3 units; H(3-0)

Snow Avalanche Hazard Mitigation
Avalanche motion and protection including avalanche terrain, frictional flow, impact pressures, avalanche risk for fixed structures, elements of structural defence, and run-out estimation based on statistical models, dynamic models, air photo interpretation, field studies of vegetation and historical records.

Civil Engineering 753 3 units; H(3-0)

Snow Avalanche Formation and Release
Snowpack properties and processes including meteorological and ground effects on the snowpack, energy balance at the snow surface, snowpack stratigraphy, metamorphism of snow grains, bonding, as well as spatial and temporal variability of the snowpack. Avalanche initiation including deformation and failure of weak layers, models of slab failure and fracture propagation. Concepts of snow stability, avalanche forecasting and avalanche risk for recreationists.

Communication and Culture CMCL

Graduate Courses
These courses are offered by the Graduate Program in the Department of Communication, Media and Film Studies.

Communication and Culture 601 3 units; H(3S-0) (formerly Communications Studies 601/ Culture and Society 601)

Interdisciplinary Approaches to Communication and Culture
An overview of theories, problematics and approaches in communication and culture.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 603 3 units; H(3S-0) (formerly Communications Studies 603)

Media Studies
Theories and perspectives in the study of media production, industries, genres, and reception.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 605 3 units; H(3S-0) (formerly Communications Studies 605)

Organizational Communication
An examination of the application of theory and methodology of administrative communication processes in complex organizations.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 607 3 units; H(3S-0) (formerly Communications Studies 607)

Socio-Cultural Approaches to Communication and Culture
Theoretical perspectives on communication and culture as symbolic processes that produce and reproduce shared meanings, social practices, and social structures.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 609 3 units; H(3S-0) (formerly Communications Studies 609)

Communication Law
An examination of the operation of Canadian law as it relates to the areas of telecommunications, broadcasting and other media.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 611 3 units; H(3S-0) (formerly Communications Studies 611)

Approaches to Development Theory and Praxis
Critical historical processes of development within a global context, competing theoretical and methodological paradigms for evaluating those processes, and their implications for the praxis of development in both the Global North and South.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 613 3 units; H(3S-0) (formerly Communications Studies 613)

Communication and Cultural Theory
An examination of the major perspectives in communication and cultural theory through a historical analysis of classic works and an overview of contemporary approaches and applications.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 615 3 units; H(3S-0) (formerly Communications Studies/Culture and Society 615)

Research Methods
A survey of research methods appropriate to the study of communication and culture.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 617 3 units; H(3S-0) (formerly Culture and Society 603)

Heritage and Identity - Issues and Approaches
An investigation of various issues related to defining and portraying cultural heritage, ethnic identity, and history within the public sphere.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 619 3 units; H(3S-0) (formerly Communications Studies 619)

Communications and Cultural Industries
An analysis of the governmental and social contexts which inform the current development of telecommunications, communications, cultural industries and new media in Canada.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 621 3 units; H(3S-0) (formerly Culture and Society 607)

Social and Global Justice
A critical overview of the meaning and implementation of social justice by examining key legal, social and political theories as well as the history of Canadian and international social justice movements.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 623 3 units; H(3S-0) (formerly Communications Studies 623)

Social Contexts of Science and Technology
Theoretical perspectives for understanding central debates in the study of science and technology in their social, political, cultural, and communication contexts.
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 625 3 units; H(3S-0)

Interpersonal and Small Group Communication
An examination of theory and research concerning communication processes in face-to-face and small group interaction. Provides opportunities to develop effective practical skills.
Prerequisite(s): Consent of the Graduate Program Director.
Courses of Instruction

Communication and Culture 627 3 units; H(3S-0)  
(formerly Communications Studies 627)

Media and Politics  
An examination of political communication in traditional and new media, focusing on the inter-relationships of media, political thought, and behaviour.  
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 629 3 units; H(3S-0)  
(formerly Communications Studies 629)

Communication Management  
An examination of communication management in business organizations. Looks at such topics as marketing, public relations and advertising in the context of rapidly changing business environments.  
Prerequisite(s): Consent of the Graduate Program Director.

Communication and Culture 711 3 units; H(3S-0)  
(formerly Communications Studies 711)

Directed Studies  
Prerequisite(s): Consent of the Graduate Program Director.  
MAY BE REPEATED FOR CREDIT

Communication and Culture 713 3 units; H(3S-0)  
(formerly Communications Studies 713)

PhD Theory Seminar  
A seminar that enables PhD students to focus their research interests and to explore theories relevant to their areas of specialization.  
Prerequisite(s): Consent of the Graduate Program Director.  
Note: Open only to PhD students in Communication and Culture.

Communication and Culture 717 3 units; H(3S-0)  
(formerly Communications Studies 717)

Selected Topics in Communication and Culture  
A variety of communication and cultural topics based on faculty expertise.  
Prerequisite(s): Consent of the Graduate Program Director.  
MAY BE REPEATED FOR CREDIT

Communication and Culture 790 6 units; F(0-6)  
(formerly Communications Studies 790)

Master’s Project  
A full year course required of all MCS students. Students develop a major research project under the supervision of a faculty member, on the basis of their particular interest.  
Prerequisite(s): Consent of the Graduate Program Director.

Communications Studies COMS  
Graduate Courses  
Courses for the graduate programs in the Department of Communication, Media, and Film Studies are listed under Communication and Culture (CMCL).

Community Health Sciences MDCCH  
Instruction offered by members of the Cumming School of Medicine.

Community Health Sciences 600 3 units; H(3-0)  
(formerly Medical Science 644)

Introduction to Community Health Sciences  
An introduction to the Department as well as a general orientation to the education and research programs in Community Health.  
Prerequisite(s): Must be registered in the Community Health Sciences or Public Health and Preventative Medicine program. Consent of the instructor is required for all other students.  
Note: Not available to Open Studies students.  
NOT INCLUDED IN GPA

Community Health Sciences 601 3 units; H(3-0)  
(formerly Medical Science 642)

Determinants of Health  
Learners will gain an understanding of the determinants of health within a population health framework. The course begins with an introduction to health and world views on how health is constructed. It then examines the determinants of health and population health frameworks through both an historical context and a contemporary analysis as well as key concepts such as the social gradient. The evidence-base for some of the determinants is then presented. The course ends with the implications for the determinants of health construct in analysing and addressing specific population health problems.  
Prerequisite(s): Must be registered in the thesis-based MSc and PhD Community Health Sciences graduate program. Consent of the instructor required for all other students.  
Community Health Sciences 602 3 units; H(1-0)  
(formerly Medical Science 649.01)

Practicum in Public Health and Preventative Medicine  
Clinical or field-based practicum for the Master of Community Medicine Program of the Community Health Sciences graduate program.  
Prerequisite(s): Must be registered in the Master of Community Medicine specialization or the Public Health and Preventative Medicine program.  
NOT INCLUDED IN GPA

Community Health Sciences 603 3 units; H(1-0)  
(formerly Medical Science 649.02)

Practicum in Healthcare Epidemiology  
Clinical or field-based practicum for the Healthcare Epidemiology specialization of the Community Health Sciences graduate program.  
Prerequisite(s): Must be registered in the Community Health Sciences graduate program’s Healthcare Epidemiology specialization.  
NOT INCLUDED IN GPA

Community Health Sciences 604 3 units; H(1-0)  
(formerly Medical Science 649.03)

Practicum in Community Health Sciences  
Clinical or field-based practicum for students in any specialization of the Community Health Sciences graduate program.  
Prerequisite(s): Must be registered in the Community Health Sciences graduate program.  
NOT INCLUDED IN GPA

Community Health Sciences 610 3 units; H(3-2T)  
(formerly Medical Science 643.01)

Biostatistics I: Essentials of Biostatistics  
Introduces the fundamental concepts of summarizing data and statistical inference, including graphical displays, hypothesis testing, p-values, and confidence intervals. Specific topics include comparisons of means and proportions, non-parametric tests, correlation and regression, confounding, sample size determination, and power calculations. Additional topics include a brief introduction to analysis of variance and covariance, logistic regression, and analysis of time-to-event data. Students gain hands-on experience analysing data using STATA statistical software. Although this course uses STATA exclusively, much of the technical knowledge and some of the computing techniques are applicable to any statistical package.  
Prerequisite(s): Must be registered in the Community Health Sciences graduate program or Public Health and Preventative Medicine program. Consent of the instructor is required for all other students.  
Note: There are no formal course prerequisites but good quantitative and mathematical skills are an asset. Not available to Open Studies students.

Community Health Sciences 611 3 units; H(3-2T)  
(formerly Medical Science 643.02)

Biostatistics II: Models for Health Outcomes  
Extends the fundamental concepts to modelling health outcomes using modern regression analysis techniques. Logistic and linear regressions, and their extensions, are covered in detail. The rationale, formulation, and statistical assumptions underlying each regression technique are discussed. Methods for selecting and assessing models are included. Additional topics include a brief introduction to models used in the analysis of repeated measures, longitudinal studies, and time-to-event data. STATA statistical software is used to analyse data. Required course for Biostatistics and Epidemiology specializations.  
Prerequisite(s): Community Health Sciences 610 or Medical Science 643.01 and registration in the Community Health Sciences graduate program.  
Note: A graduate-level course in (bio)statistics is required for all other students. Not available to Open Studies students.
Courses of Instruction

Community Health Sciences 612 3 units; H(3-2T)
(formerly Medical Science 643.03)

Biostatistics III: Models for Repeated Measures Studies and Time-to-Events Studies
Discusses techniques for analysing data collected at more than one point in time (repeated measures) and time-to-event (survival) data. Topics include generalized linear models (GLM), generalized additive models (GAM), Poisson regression, generalized estimating equations (GEE), and proportional hazards regression with time-varying covariates. STATA statistical software is used to analyse data.

Prerequisite(s): Community Health Sciences 611 or Medical Science 643.02 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Note: Not available to Open Studies students.

Community Health Sciences 620 3 units; H(1S-4)
(formerly Medical Science 731)

Medical Education
The design, planning, teaching and evaluation of courses in the health sciences disciplines. Practical experience in teaching methods and curriculum development. Intended for graduate students, faculty and resident physicians, and approved for study credit by the College of Family Physicians of Canada.

Prerequisite(s): Must be registered in the Medical Education Specialization of the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 621 3 units; H(3-1)
(formerly Medical Science 733)

Research Design and Statistics in Medical Education
Research design and statistical analysis including a broad overview of the variety of methods for research in medical education and related sciences. There is both a theoretical basis in lectures and seminars as well as applied approaches in laboratory exercises. A variety of research tools will be explicated and utilized.

Prerequisite(s): Must be registered in the Medical Education Specialization of the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 622 3 units; H(3-0)
(formerly Medical Science 734)

Qualitative Measurements for Medical Education
Provides an introduction to qualitative methods as adapted for medical education research and evaluation. Designed to focus on the rationale for qualitative research, the appraisal of qualitative research, methods of data collection (e.g., focus groups, interviews, and text), data handling, data analysis and writing a qualitative research proposal. Specific approaches used in qualitative research including: grounded theory, ethnographic designs, phenomenology, action research and discourse analysis will be discussed.

Prerequisite(s): Must be registered in the Medical Education Specialization of the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 623 3 units; H(3-0)
(formerly Medical Science 735)

Teaching Methods in the Medical Sciences
Examines traditional and innovative methods used in medical and science education and clinical teaching to enhance student and practitioner knowledge, skills and attitudes. Discussions and presentations will focus on the role of the teacher and teaching strategies that include the lecture, small group teaching, inquiry and problem solving methods, reflection, role simulation, surgical skills, computer-based instruction, bedside learning, one-on-one teaching and self-directed learning. The content will be presented within the context of contemporary research, practice and educational theories. Participants will be expected to identify, critique literature, and prepare instructional activities that link theory and research to practice.

Prerequisite(s): Must be registered in the Medical Education Specialization of the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 624 3 units; H(3-0)
(formerly Medical Science 736)

Medical Education Cognition Principles
Focus on the study of cognition as it relates to medical education. Begins with a broad overview of principles of adult education, including the fundamental theories of cognition, behaviourism, and social learning theory. From this foundation, the course will review key concepts in medical education cognition theory, analytical/ non-analytical problem solving, and cognitive load theory. Sessions will provide both didactic lecture material and interactive small group discussion.

Prerequisite(s): Must be registered in the Medical Education Specialization of the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 625 3 units; H(3-0)
(formerly Medical Science 737)

Curriculum Design and Evaluation in the Medical Sciences
Presents an overview of the key elements of curriculum design and evaluation within the context of contemporary medical education research, learning and teaching theory, and teaching. Through classroom and electronic discussion, reading and assignments, participants will explore learning needs, objectives, the selection of teaching methods, the identification of resources, the implementation and monitoring of curriculum and evaluation.

Prerequisite(s): Must be registered in the Medical Education Specialization of the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 626 3 units; H(3-0)
(formerly Medical Science 738)

Meta-Analysis/Systematic Review in Medical Education
To become familiar with the theory, research, and application of meta-analysis/systematic review as it applies to the compilation of studies in education and healthcare with a focus on the discipline of medicine education. In particular, an emphasis will be placed on the principles of using statistical methods and techniques related to synthesizing studies in the measurement of a pre-determined and appropriate topic of interest to the participant.

Prerequisite(s): Must be registered in the Medical Education Specialization of the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 627 3 units; H(3-0)
(formerly Medical Science 739)

Medical Education Measurement
Focuses on the assessment issues related to the measurement of student achievement, competency, and performance in educational settings.

Community Health Sciences 640 3 units; H(3-2T)
(formerly Medical Science 647.01)

Fundamentals of Epidemiology
Principles and methods of descriptive and analytic epidemiology. Emphasizes the underlying concepts and approaches of epidemiological research and critical appraisal of epidemiologic studies including: observational study designs and their vulnerabilities to bias, measures of frequency and association, basic methods for addressing sampling variability, confounding, and effect modification. Concepts related to causal judgment in epidemiology are also introduced.

Prerequisite(s): Registration in the Community Health Sciences graduate program or Public Health and Preventative Medicine program. Consent of the instructor is required for all other students.

Corequisite(s): Community Health Sciences 610 or Medical Science 647.01.

Note: Not available to Open Studies students.

Community Health Sciences 641 3 units; H(3-0)
(formerly Medical Science 659.04)

Introduction to Clinical Trials
An introduction to methodological issues in the design and conduct of randomized controlled trials. Topics include ethics, blinding, randomization, sample size determination, sequential designs, data monitoring, and the logistical and organizational aspects of single centre and multi-centre trials.

Prerequisite(s): Community Health Sciences 610 and 640 or Medical Science 643.01 and 647.01 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 642 3 units; H(3-0)

Psychiatric Epidemiology
An overview of the context, principles and methods of psychiatric epidemiology. Basic concepts of bias and random error will be applied specifically to problems encountered in conducting psychiatric epidemiological studies. An additional objective is for students to gain a basic understanding of psychiatric terminology and nosology, including a basic understanding of the clinical features of major diagnostic categories.

Prerequisite(s): Community Health Sciences 610 and 640 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Note: Not available to Open Studies students.

Community Health Sciences 643 3 units; H(3-0)
(formerly Medical Science 647.07)

Research in Healthcare Epidemiology and Infection Control
Emphasizes the research aspects of health care epidemiology and the application of basic epidemiologic and biostatistical techniques in the health care environment. The course uses an interdisciplinary approach and fosters the integra-
Courses of Instruction

On-line Basic Infection Control
Focuses on providing novice Infection Control Professionals (ICPs) with the basic knowledge, tools and strategies needed to do Infection control in a board range of health care environments from health care community. The purpose of this entry to practice course is (1) to identify and describe the scope of infection prevention and control problems and issues for novice ICPs and (2) to examine and integrate their current expertise with the basic knowledge, tools and strategies needed to examine problems and develop practical solutions in Infection Control.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 648 3 units; H(3-0) (formerly Medical Science 660.01)

Decision Analysis in Health Economic
Students will be introduced to the concepts of decision analysis and how it may serve as a useful tool in health care economics evaluation. Through attention to a clinical question or health care policy issue, students will develop the skills necessary to perform an economic evaluation to address it.
Prerequisite(s): Community Health Sciences 662 or Medical Science 659.08 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 664 3 units; H(3-0) (formerly Medical Science 659.07)

Leadership in Health Care Organizations
A foundation for developing management and leadership skills in health care organizations. The curriculum includes: fundamentals of leadership; formal and informal components of organizations; strategic, operational, financial and project planning; managing change and conflict; human resources and evaluating organizational performance. A variety of learning opportunities are incorporated including: reading materials, student seminars, self-assessment tools, case studies, team assignments, guest speakers and class discussion.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 666 3 units; H(3-0) (formerly Medical Science 645.10)

Health Economics I
Application of basic concepts from economics to examination of health and health care policy issues, such as why we have the kind of health care system we have, various aspects of health care reform, promotion of health, and evaluation of interventions.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 661 3 units; H(3-0) (formerly Medical Science 679/Economics 679)

Economic Evaluation
Designed for students interested in being able to critically interpret economic evaluation studies of health or health care interventions and beyond. The aim of the course is to introduce students to the concepts and methods of economic evaluation, provide an introduction to how it may serve as a useful tool in health and health care decision-making, and to enable students to critically appraise the economic evaluation literature.
Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 662 3 units; H(3-0) (formerly Medical Science 659.08)

Introduction to the Legal and Ethical Framework of Health Care in Canada
An introduction to two integrated aspects of health care in Canada: the legal dimensions and the ethical dimensions. No formal background or training in law or ethics is presupposed. Success-
Community Rehabilitation CORE

Courses of Instruction

ful students will gain grounding in the ethico-legal complexity of health care and health research in Canada.

Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 680
3 units; H(3S-0)
(formerly Medical Science 651.04)

Foundations of Population/Public Health
Students will learn, discuss, and interrogate foundational content in population health and public health. Foundational content includes history, structure, functions, concepts, theories, and debates. The course is structured with the first half focusing on public health and the second half focusing on population health.

Prerequisite(s): Registration in the Community Health Sciences graduate program or Public Health and Preventive Medicine program. Consent of the instructor is required for all other students.

Community Health Sciences 681
3 units; H(3-2T)
(formerly Medical Science 659.02)

Health Research Methods
Introduction to health research, including research design, measurement, data collection, proposal and grant writing.

Prerequisite(s): Community Health Sciences 610 or Medical Science 643.01 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 683
3 units; H(3-0)
(formerly Medical Science 659.05)

Qualitative Health Research
A focus on interpreting published examples of qualitative health research as well as qualitative data relevant to health. The importance of both methods and theories for sound interpretation will be emphasized. Examples relevant to people’s experiences of health services as well as influences on population health outcomes other than health services and technologies will be considered.

Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 687
3 units; H(3-0)
(formerly Medical Science 651.06)

Environmental Health
Examination of the interaction between natural and man-made environments in human health/illness.

Prerequisite(s): Must be registered in the Community Health Sciences graduate program or the Public Health and Preventive Medicine program. Consent of the instructor is required for all other students.

Community Health Sciences 689
3 units; H(3-0)
(formerly Medical Science 651.08)

Global Health and Development
An examination of health, the determinants of health, and approaches to health policy and programming in the context of less developed country populations. The course provides an overview of the history and evolution of primary health care and the role of health in development and examines current trends and issues related to global development. Cross-cutting themes include: international perspectives and trends in health sector reform, globalization, policy programming and financing, public participation in decision making, governance, health human resources, gender, human rights, partnerships and information-education-communication among others.

Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 700
3 units; H(1-6)

Community Health Directed Study
Independent study in special topics at an advanced level in Community Health Sciences.

Prerequisite(s): Consent of the instructor.

Advanced Topics in Epidemiology
An expansion on the understanding of causality and threats to validity in epidemiologic research. The focus will be on the assessment and control of bias, including selection, information and confounding. The concept of effect modification (interaction) will be appraised. Stratified analysis will be considered a tool for the assessment and control of confounding and effect modification and will be applied to a variety of study designs including case-control, and cohort studies.

Prerequisite(s): Community Health Sciences 640 or Medical Science 647.01 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 740
3 units; H(3-0)
(formerly Medical Science 712.02)

Advanced Topics in Epidemiology
Advanced topics and methods used in Epidemiology.

Prerequisite(s): Community Health Sciences 640 or Medical Science 647.01 and consent of the instructor.

Community Health Sciences 741
3 units; H(3-0)
(formerly Medical Science 711)

Systematic Reviews and Meta-Analysis
An exposure to all steps involved in the conduct of a systematic review and meta-analysis.

Prerequisite(s): Community Health Sciences 610 or Medical Science 643.01 and Community Health Sciences 640 or Medical Science 647.01 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 742
3 units; H(3-0)
(formerly Medical Science 712.02)

Advanced Topics in Epidemiology
Advanced topics and methods used in Epidemiology.

Prerequisite(s): Community Health Sciences 640 or Medical Science 647.01 and consent of the instructor.

Community Health Sciences 743
3 units; H(3-0)
(formerly Medical Science 712.03)

Advanced Topics in Health Services Research
Advanced topics and methods used in Health services research.

Prerequisite(s): Community Health Sciences 660 or Medical Science 645.18 and consent of the instructor.

Community Health Sciences 761
3 units; H(3-0)
(formerly Medical Science 705)

Advanced Methods in Health Research
Advanced health research designs and measurement techniques.

Prerequisite(s): Community Health Sciences 681 or Medical Science 659.02 and registration in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Health Sciences 780
3 units; H(3-0)
(formerly Medical Science 712.04)

Advanced Topics in Population/Public Health
Advanced topics and methods used in population/public health.

Prerequisite(s): Community Health Sciences 680 or Medical Science 651.04 and consent of the instructor.

Community Rehabilitation CORE

Instruction offered by members of the Community Rehabilitation and Disability Studies interdisciplinary team.

Director — E. A. Hughson

Graduate Courses

Community Rehabilitation 624
6 units; F(3-15-3)

Specialization Theory and Practice: A Collaborative Inquiry Capstone
Students refine a topic of inquiry, prepare background working papers, invite reactions from stakeholders/experts and report on their experience to stakeholder audience, fellow students and faculty. This is not a research course but an opportunity for students to own their knowledge and find ways to share their experience and education with others in a collaborative manner.

Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Rehabilitation 630
3 units; H(3-15)

Foundations and Futures of Disability and Community Studies
History, current issues, and futures of intervention, activism, and academic study related to disability. This will include the systems and changing roles of those traditionally served, professionals, the teams they generate and society.

Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Community Rehabilitation 631
3 units; H(3-15)

Politics of Inclusion and Exclusion of Disability and Community Studies
Current topics relevant to inclusion and exclusion will be reviewed. An examination of research in disability provides an opportunity for the student to learn, understand, and compare legislation, policy, and ethical frameworks that inform action. Frameworks of choice, respect, consultation, collaboration, and cooperation will be examined.

Prerequisite(s): Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

Antirequisite(s): Credit for both Community Rehabilitation 630 and 603.15 will not be allowed.

Community Rehabilitation 631
3 units; H(3-15)

Antirequisite(s): Credit for both Community Rehabilitation 631 and 603.12 will not be allowed.
**Courses of Instruction**

**Community Rehabilitation 632** 3 units; H(3-0)
*Leadership and Innovation*

The changing personal, organizational, and societal, leadership role and its importance for innovation in the field of disability and community studies.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 632 and 603.13 will not be allowed.

**Community Rehabilitation 633** 3 units; H(3-1S)
*Social Construction: Health Capacity and Disability*

A constructivist exploration of language, political structures, and sense of self to deepen the understanding of health capacity and disability.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 633 and 603.18 will not be allowed.

**Community Rehabilitation 634** 3 units; H(3-1S)
*Appraisal of Social and Health Quantitative Research Methods*

Provides students with experience in critically appraising a range of quantitative research methods and familiarize them with a variety of bio-statistical approaches. A variety of frameworks will be used to critically appraise literature from students’ chosen field of study and examine and discuss the implications for evidence-based practice.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 634 and 603.16 will not be allowed.

**Note:** Pre-session requirements include reading of pre-session materials and participation in orientation session prior to online course delivery.

**Community Rehabilitation 641** 3 units; H(3-0)
*Special Topics in International Disability Research and Policy*

Selected topics in disability research and policy provide an opportunity for the student to learn, understand, and compare the policies in two or more countries.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Community Rehabilitation 650** 3 units; H(3-0)
*Adapting Curriculum and Instruction from K-12*

A variety of practical strategies for developing meaningful curriculum and instructional methods for students with severe disabilities. The strategies are premised on the content of typical community collaborative team approaches to planning and implementing programs for students. Involving parents as part of the Learning Team will be emphasized.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 650 and 691.04 will not be allowed.

**Community Rehabilitation 651** 3 units; H(3-0)
*Challenging Behaviours in the Classroom: Inclusive Education*

Examines and builds upon the participant’s belief systems about challenging behaviour. Participants will be offered opportunities to learn about successful strategies for supporting difficult students within a classroom setting.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 651 and 691.32 will not be allowed.

**Community Rehabilitation 652** 3 units; H(3-0)
*Collaboration, Ethics, Management: Inclusive Education*

Each year a topic is negotiated with the education sector in partnership with provincial advocacy organizations.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 652 and 691.33 will not be allowed.

**Community Rehabilitation 653** 3 units; H(3-15)
*Advanced Seminar: Assessment and Intervention for Children with Special Needs*

Exploration of cognitive, social/emotional, motor, language/communication development and assessment of children with disabilities in the context of their families and communities.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 653 and 603.18 will not be allowed.

**Community Rehabilitation 654** 3 units; H(3-0)
*Health Research, Emerging Technologies and Marginalized Groups*

Provides an in-depth view of the impact of new emerging technologies and the governance of science and technology and health research on social policy, disability studies, disability research and the lives of disabled people and other marginalized groups.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 654 and 691.42 will not be allowed.

**Note:** This is an online course.

**Community Rehabilitation 655** 3 units; H(3-0)
*Bioethics and People with Disabilities*

Provides an in-depth view of the impact of bioethics on social policy, disability studies, disability research and the lives of disabled people.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Antirequisite(s):** Credit for both Community Rehabilitation 655 and 603.02 will not be allowed.

**Community Rehabilitation 676** 6 units; F(3-1S-3)
*Consultation in Human Services and Systems*

Qualitative and quantitative evaluation research informs the design and implementation of a collaborative evaluation of a rehabilitation program, policy or system.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other students.

**Community Rehabilitation 730** 3 units; H(3S-0)
*Doctoral Pro-Seminar in Disability, Community and Rehabilitation*

This advanced professional seminar focuses on a critical examination of theoretical, methodological, and professional issues relevant to research in the domains of community rehabilitation and disability studies. The course is intended for PhD students preparing their dissertation research proposals as a final preparation for their Candidacy Exam.

**Prerequisite(s):** Must be registered in the Community Health Sciences graduate program. Consent of the instructor is required for all other graduate students.

**NOT INCLUDED IN GPA**

**Computer Science CPSC**

Instruction offered by members of the Department of Computer Science in the Faculty of Science.

**Computer Science 601** 3 units; H(3-0)
*Special Topics in Computer Science*

A study of problems of particular interest to graduate students in Computer Science.

**Computer Science 605** 3 units; H(3-0)
*(Medical Science 605)*

**Information Storage and Processing in Biological Systems**

Examination of complex biological systems; concepts and fundamentals of biological solutions to information storage and processing; modelling and computer simulation of biological systems; information storage in biological molecules; genetic networks; hierarchical organization of biological information processing in signal transduction, development, evolution, and ecology; biological control systems.

**Computer Science 607** 3 units; H(3-0)
*Biological Computation*

Examination and modelling of biological networks; focus on the latest developments in biological computing and their theoretical backgrounds, such as: DNA computing; genomic algorithms; artificial chemistries; complex adaptive systems, chaos and fractals; immune system computing; gene regulatory networks; swarm intelligence systems.

**Computer Science 609: Foundations of Multi-Agent Systems**

Modelling of agents and properties of multi-agent systems. Communication issues, including interaction and coordination concepts, forming and maintaining organizations, and competitive agent environments. Example systems; the implementation of a multi-agent system will be performed as the assignment.

**Prerequisite:** Credit for both Computer Science 609 and Software Engineering 697 will not be allowed for programs offered by the Department of Computer Science.

**Computer Science 610: Compiler Code Generation and Optimization**

Compiler code generation and optimization techniques, including register allocation, instruction selection, dataflow analysis, and code optimization techniques using intermediate representations. Implementation of special language features and tools for automated code generation.

**Computer Science 611: Complexity Theory**

Deterministic and non-deterministic time and space complexity; complexity classes and hierarchies; NP-complete problems and intractable problems; axiomatic complexity theory.

**Note:** Computer Science 413 or equivalent is recommended as preparation for this course.

**Computer Science 617: Category Theory for Computer Science**

Introduction to category theory with applications in computer science. Functors, natural transformations, adjoints and monads, initial and final algebras. Introduction to 2-categories and fibrations.

**Note:** Computer Science 513 or 521 or equivalent is recommended as preparation for this course.

**Computer Science 619: Quantum Computation**

Quantum information, quantum algorithms including Shor’s quantum factoring algorithm and Grover’s quantum searching technique, quantum error correcting codes, quantum cryptography, nonlocality and quantum communication complexity, and quantum computational complexity.

**Computer Science 622: Randomized Algorithms**

Design and analysis of randomized algorithms; discrete probability theory; randomized data structures; lower bound techniques; randomized complexity classes; advanced algorithmic applications from various areas.

**Computer Science 625: Principles of Computer Security**

Security policies and protection mechanisms for a computing system, including such topics as design principles of protection systems, authentication and authorization, reference monitors, security architecture of popular platforms, formal modelling of protection systems, discretionary access control, safety analysis, information flow control, integrity, role-based access control. Legal and ethical considerations will be introduced as necessary.

**Note:** Computer Science 457 and Mathematics 271, or equivalents, are recommended as preparation for this course.

**Computer Science 626: Network Systems Security**

Attacks on networked systems, tools and techniques for detection and protection against attacks including firewalls and intrusion detection and protection systems, authentication and identification in distributed systems, cryptographic protocols for IP networks, security protocols for emerging networks and technologies, privacy enhancing communication. Legal and ethical issues will be introduced as necessary.

**Note:** Computer Science 418 and 441, or equivalents, are recommended as preparation for this course.

**Computer Science 627: Computer Viruses and Malware**

Study of computer viruses, worms, Trojan horses, and other forms of malicious software. Countermeasures to malicious software. Legal and ethical issues, and some general computer and network security issues.

**Prerequisite(s):** Computer Science 313 and 457 or equivalents and consent of the Department.

**Computer Science 628: Spam and Spyware**

Spam and other unsolicited bulk electronic communication, and spyware. Legal and ethical issues. Countermeasures and related security problems.

**Prerequisite(s):** Computer Science 313 and 457 or equivalents and consent of the Department.

**Computer Science 629: Elliptic Curves and Cryptography**

An introduction to elliptic curves over the rationals and finite fields. The focus is both theoretical and computational aspects; subjects covered will include the study of endomorphism rings, Weil pairing, torsion points, group structure, and effective implementation of point addition. Applications to cryptography will be discussed, including elliptic curve-based Diffie-Hellman key exchange, El Gamal encryption, and digital signatures, as well as the associated computational problems on which their security is based.

**Note:** Pure Mathematics 315 is recommended as preparation for this course.

**Computer Science 630: Information Theoretic Security**

Information theoretic concepts such as entropy and mutual information, and their applications to defining and evaluating information security systems including encryption, authentication, secret sharing and secure message transmission.

**Note:** One of Computer Science 219, 233 or 235 and one of Mathematics 271, 273 or Pure Mathematics 315 and one of Statistics 205 or 211 or 213 or 321 or Mathematics 321, or equivalents, are recommended as preparation for this course.

**Computer Science 635: Image Analysis and Computer Vision**

**Computer Science 641: Performance Issues in High Speed Networks**

An overview of current research in high speed networks. Topics covered will include the current Internet, the future Internet, wireless networks, optical networks, Asynchronous Transfer Mode (ATM), TCP/IP network traffic measurement, Web server performance, and mobile computing. Emphasis will be placed on network performance issues for next-generation Internet protocols and applications.

**Computer Science 643: Modern Wireless Networks**

An introduction to the fundamentals and applications of wireless networks.

**Computer Science 653: Computational Geometry**

Geometric searching, hull proximity and intersection data structures and algorithms and their complexity.

**Note:** Computer Science 517 or equivalent is recommended as preparation for this course.

**Computer Science 657: Modelling And Visualization of Plants**

**Note:** Computer Science 453 or equivalent is recommended as preparation for computer science students taking this course.

**Computer Science 661: Algorithms for Distributed Computation**

Fundamental algorithmic problems in distributed computation; impact of communication, timing, failures and other characteristics on computability and complexity of solutions.

**Prerequisite(s):** Computer Science 561 or equivalent

**Computer Science 662: Agent Communications**

An examination of communication paradigms in multi-agent systems. A number of paradigms will be covered including simple protocols, BDI (Believe, Desire, Intention), and social commitments.

**Computer Science 667: Computer Algebra**

Fundamental problems, classical and modern algorithms, and algorithm design and analysis techniques of use in computer algebra. Integer and polynomial arithmetic. Additional problems in computer algebra, possibly including problems in computational linear algebra, factorization, and concerning systems of polynomial equations will be considered as time permits.

**Note:** Computer Science 413, 491 and Pure Mathematics 315, or equivalents, are recommended as preparation for this course.
Courses of Instruction

Computer Science 669 3 units; H(3-0)
(Pure Mathematics 669)

Cryptography
An overview of the basic techniques in modern cryptography, with emphasis on fit-for-application primitives and protocols. Topics will include symmetric and public-key cryptosystems; digital signatures; elliptic curve cryptography; key management; attack models and well-defined notions of security.

Note: Students should not have taken any previous course in cryptography.

Computer Science 671 3 units; H(3-0)

Database Management Systems
Foundations of database applications and database systems, plus some advanced topics in data management systems will be introduced.

Computer Science 672 3 units; H(3-0)
(formerly Computer Science 601.77)

Fundamentals of Social Network Analysis and Data Mining
Introduction to data mining with emphasis on frequent pattern mining, clustering and classification, data collection, network construction, basic graph theory concepts and network analysis metrics, and case studies.

Antirequisite(s): Students may not have credit for more than one of Computer Science 672, 572 or 599.77

Computer Science 673 3 units; H(3-0)

Distributed Database Systems
Introduction to distributed database systems. Topics covered include: architecture, data design, query processing, transaction management, multidatabases, object-oriented databases and advanced system issues.

Computer Science 675 3 units; H(3-0)

Datawarehouse Systems
Design, development and deployment of datawarehouses. Schemas, models, data organization, OLAP, tuning, data mining and architectural models may be discussed.

Computer Science 681 3 units; H(3-0)

Research Methods in Human-Computer Interaction
Application of the theory and methodology of human-machine studies to real systems; theory and practice.

Note: Computer Science 481 or equivalent is recommended as preparation for this course.

Computer Science 683 3 units; H(3-0)

Information Visualization: Theory and Practice
The theory and development of interactive visual representations of abstract data for the purpose of amplifying cognition. Topics covered can include representational issues, perceptual issues, visual literacy, spatial abstraction, and interaction issues.

Note: Computer Science 583 or equivalent is recommended as preparation for this course.

Computer Science 687 3 units; H(3-2T)

Computer Animation
Principles of traditional animation, key framing, parametric and track animation, free form deformation, inverse kinematics, dynamics, spring mass systems, particle systems, numerical integration, Lagrangian constraints, space time constraints, collisions, human animation, behaviour animation, metamorphosis, implicit animation tech-

iques, animating liquids, gases and cloth, motion capture.

Computer Science 689 3 units; H(3-2T)

Modelling for Computer Graphics

Computer Science 691 3 units; H(3-0)

Rendering

Computer Science 695 3 units; H(3-0)

Advanced Geometric Algorithms in Information Systems
Examination of advanced geometric algorithms for representation, analysis and visualization of Geographical Information Systems. Data structures such as progressive mesh, ROAM, multidimensional Delauney triangulation, quadtree and space partitioning. Algorithmic techniques such as incremental, divide and conquer, sweep-plane, and dimension reduction. Algorithms for surface simplification, culling, quality measurement and reduction.

Computer Science 696 3 units; H(3-0)

Information Security Seminar
Topics in information security, such as security management, emerging threats, research frontiers using case studies and best practices.

Antirequisite(s): Credit for both Computer Science 696 and 698 will not be allowed.

Computer Science 697 3 units; H(3-0)

Biometric Technologies

Computer Science 698 6 units; F(3-0)

Information Security Project
An information security project conducted under the guidance of a faculty member. A report must be written and presented on completion of the course.

Computer Science 699 3 units; H(3-0)

Research Methodology in Computer Science
Introductory to and survey of research areas and methods in Computer Science. Professional skills in computer science research such as reviewing, critical evaluation, and the preparation of research proposals.

Antirequisite(s): Credit for both Computer Science 699 and 698 will not be allowed.

Note: This course meets for one and one-half hours per week during the Fall and Winter Terms.

NOT INCLUDED IN GPA

Computer Science 701 3 units; H(3-0)

Research Topics in Computer Science
In depth course on a focused current research topic in Computer Science. Involves a significant research component and requires substantial background knowledge.

MAY BE REPEATED FOR CREDIT

Computer Science 767 3 units; H(3-0)

Advanced Topics in Multiaagent Systems
An in-depth study of a selected subfield of multiagent systems including state-of-the-art research. This is a project-driven course.

Prerequisite(s): Computer Science 567 or 609.

Computer Science 771 3 units; H(3-0)

Current Trends in Database Technology
Advanced topics chosen from Bioinformatics, Data mining, Mobile Databases, Spatial Databases and Web Databases. There is a large project component.

Computer Science 781 3 units; H(3-0)

Advanced Topics in Human-Computer Interaction
The topics covered will change year by year depending on current advances in human computer interaction research.

Prerequisite(s): Computer Science 481 or equivalent.

Note: Computer Science 581 or 681 or equivalent is highly recommended as preparation for this course.

Computer Science 785 3 units; H(3-0)

Implicit Modelling
A detailed look at modelling using implicit and iso-surface techniques taking an in-depth review of the literature. Algebraic methods will be followed by skeletal models, field function design, modeling techniques, rendering and texture mapping. Polygonization algorithms, ray tracing implicit techniques for animation, meta-morphosis, precise contact modelling, deformation and warping. Algorithms and data structures and implementation details will be presented. Students will be expected to make a new contribution in their project and term paper.

Computer Science 789 3 units; H(3-0)

Advanced Geometric Modelling
Current research topics including spline modelling, Subdivision Surfaces, multiresolution, wavelets, analysis of the subdivision surfaces and reverse subdivision.

Culture and Society CUSP

Courses for the graduate programs in the Department of Communication, Media and Film Studies are listed under Communication and Culture (CMCL).
Dance DNCE

Instruction offered by members of Dance in the School of Creative and Performing Arts in the Faculty of Arts. An audition and consent of Dance is necessary before students register in certain courses.

Graduate Course

Drama 681 3 units; H(2S-2)

Special Topics in Dance

Prerequisite(s): Consent of the Division Chair, Dance.

MAY BE REPEATED FOR CREDIT

Drama DRAM

Instruction offered by members of Drama in the School of Creative and Performing Arts in the Faculty of Arts.

Graduate Courses

Drama 605 3 units; H(4S-0)

Methods in Theatre Research

Methods in research in the four areas of specialization in the MFA Theatre program.

Note: Required of all students enrolled in the MFA Theatre program.

Drama 607 3 units; H(2S-2)

Director, Designer, and Mise-en-scene

Advanced collaborative methods and techniques for directors, designers and dramaturges, leading to the creation of a mise-en-scene for selected plays of varying styles and genres.

Drama 610 6 units; F(2S-3)

Selected Problems in Directing

Drama 623 3 units; H(2S-2)

Seminar in Scene Design

MAY BE REPEATED FOR CREDIT

Drama 625 3 units; H(2S-2)

Seminar in Costume Design

MAY BE REPEATED FOR CREDIT

Drama 627 3 units; H(2S-2)

Seminar in Lighting Design

MAY BE REPEATED FOR CREDIT

Drama 629 3 units; H(2S-2)

Seminar in Technical Direction

MAY BE REPEATED FOR CREDIT

Drama 647 3 units; H(3S-0)

Studies in Modern Drama I

Studies in the literature, history, theory and criticism of drama, theatre and performance from the late nineteenth century to the mid-twentieth century.

Drama 649 3 units; H(3S-0)

Studies in Modern Drama II

Studies in the literature, history, theory and criticism of drama, theatre and performance from the mid twentieth century to the present.

Drama 651 3 units; H(2S-0)

Directed Studies

MAY BE REPEATED FOR CREDIT

Drama 660 6 units; F(2S-3)

Seminar and Practicum in Performance Creation

Drama 671 3 units; H(3S-0)

Selected Problems in Playwriting I

Drama 673 3 units; H(3S-0)

Selected Problems in Playwriting II

Ecology ECOL

Instruction offered by members of the Department of Biological Sciences in the Faculty of Science.

Department Head - R.M.R. Barclay

Graduate Courses

Enrolment in any graduate course requires consent of the Department.

Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599. 600-level courses are available with permission to undergraduate students in the final year of their programs.

Ecology 603 3 units; H(3-0)

Advanced Behavioural Ecology

Current problems and recent research in areas of particular significance. Topics will vary from year to year.

Note: Offered during even-odd dated academic years.

MAY BE REPEATED FOR CREDIT

Ecology 607 3 units; H(0-6)

Limnology and Oceanography

Lectures, seminars and projects in the areas of limnology, aquatic ecology and oceanography.

Ecology 677 3 units; H(0-6)

Advanced Population Ecology

The theory and practice of the study of populations, methods of population estimation, factors affecting populations, and systems approaches to the modelling of populations.

MAY BE REPEATED FOR CREDIT

Ecology 731 3 units; H(3-0)

Advanced Plant Ecology

Current problems and recent research in areas of particular significance. Topics will vary from year to year.

MAY BE REPEATED FOR CREDIT

Economics ECON

Instruction offered by members of the Department of Economics in the Faculty of Arts.

Graduate Courses

Students are required to have departmental consent before registering in any of the following courses:

Economics 605 3 units; H(3-0)

Computational Optimization and Economic Applications

Examines issues from the economic literature on international trade. Focuses on quantitative and empirical analysis. Specific topics include the factor content of trade, firm level and multinational behaviour, empirical testing of political economy determinants of protection, and assessing the environmental impact of trade agreements.

Economics 621 3 units; H(3-0)

International Trade

Focuses on the microeconomic aspects of international economics with emphasis on general equilibrium models commonly employed in international economics. Specific topics covered include theories of international specialization and exchange, trade policy and economic welfare, international factor movement, trade and growth, under both perfect competition and imperfect competition, and selected problems of trade policy in the international trading system.

Economics 627 3 units; H(3-0)

Energy Economics

Applies the tools of microeconomics, institutional economics, and econometrics to energy markets and policies. Course content focuses on empirical studies of the energy business including markets for natural gas, crude oil, gasoline, electricity and coal.

Economics 633 3 units; H(3-0)

Labour Economics

Emphasizes empirical implementation of theoretical models through the use of data and econometrics. Topics include labor supply theory, search theory, wage determination theories, and numerical methods for the estimation of dynamic models.

Economics 635 3 units; H(3-0)

Regulatory Economics

An in-depth study of regulatory economics, defined as price and entry regulation. Price and entry regulation occurs when the state restricts who can provide services and approves the terms of ser-
Courses of Instruction

Economics 641 3 units; H(3-0)
Financial Economics
A review of the main themes of financial economics and an introduction of a number of frontier ideas that have marked the recent evolution of the discipline. The main focus is on asset pricing and the application of financial econometrics to modeling and prediction of financial data.

Economics 649 3 units; H(3-0)
Empirical Public Economics
Focuses on empirical research on the economics of the public sector, including material on taxation, public expenditures and social insurance. Gives a broad overview of this growing field and prepares for research frontier in public economics.

Economics 651 3 units; H(3-0)
Redistribution and Social Insurance
A focus on the economics of public expenditure programs designed to redistribute income or to provide social insurance against risks faced by households.

Economics 653 3 units; H(3-0)
Public Revenue Analysis
A focus on the revenue side of public finance, primarily in the form of taxation. The equity and efficiency aspects of different taxes are considered, as is optimal tax design. Possible topics include the taxation of labour and capital, the impact taxation on savings and risk taking, and environmental and resource taxation.

Economics 655 3 units; H(3-0)
Cost/Benefit Analysis
Theoretical and applied aspects of the use of cost-benefit techniques and applied welfare analysis in the evaluation of investment projects and public policies.

Economics 657 3 units; H(3-0)
Microeconomic Theory
Introduction to advanced microeconomic theory. Topics include consumer theory, theory of the firm, general equilibrium, uncertainty, game theory, and informational economics.

Prerequisite(s): Admission into the Master of Arts Economics program.

Note: Students in other departments can take this course with permission of the Department of Economics.

Economics 659 3 units; H(3-0)
Macroeconomic Theory
Introduction to the analysis of macroeconomics at an advanced level. Provides an overview of theories addressing the major questions of macroeconomic phenomena. Some coverage of applied topics, such as economic growth and government policy.

Prerequisite(s): Admission into the Master of Arts Economics program.

Note: Students in other departments can take this course with permission of the Department of Economics.

Economics 661 3 units; H(3-0)
Behavioural Economics
Survey of research incorporating psychological evidence into economics. Topics include fairness, altruism, prospect theory, self-control, biases in probabilistic judgment, mental accounting, and the relationship between markets, incentives, and attention and various cognitive processes.

Economics 667 3 units; H(3-0)
Industrial Organization
A focus on market power: its acquisition, maintenance, and exercise. Both theory and application, with an emphasis on how industrial organization does, and should, inform competition policy and antitrust law, will be examined.

Economics 669 3 units; H(3-0)
Empirical Industrial Organization
Firm behaviour in oligopolistic markets, as well as consumer and firm behaviour in environments with asymmetric information. Strong emphasis on combining economic models with econometric techniques to answer economic questions. Models of demand and supply, discrete static and dynamic games, production function estimation, single agent dynamic models and matching models.

Prerequisite(s): Credit for both Economics 669 and 611.71 will not be allowed.

Economics 675 3 units; H(3-0)
Natural Resource Economics
Examines economic models of the structure and nature of natural resource industries and their interaction with the rest of the economy. Includes non-renewable and renewable resources and applies methods from capital theory, growth theory, public economics, and industrial organization to the study of natural resources.

Economics 677 3 units; H(3-0)
Seminar in Economics of the Environment
Environmental economics describes the ways in which people interact with their natural environment and the policies that best achieve society’s goals in this context. Topics vary from year to year and may include benefit-cost analysis, non-market valuation, choice of policy instruments, environmental taxation, trade-growth and the environment, global warming and international environmental treaties.

Economics 679 3 units; H(3-0)
Health Economics
An overview of topics in health economics. An introduction to economic principles and techniques used in analysing and planning health policy, in particular the delivery of health services, and for understanding the health behaviour of individuals.

Economics 691 1.5 units; Q(3-0)
Research Methods I
Survey of research methods in economics. For course-based MA students.

Economics 693 1.5 units; Q(3-0)
Research Methods II
Survey of research methods in economics. For course-based MA students.

Economics 695 3 units; H(3-0)
Research Methods III
Master’s research project. Identify an interesting and feasible research question, carry out an extensive literature review of the problem area, develop an economic/econometric model to address the problem, identify and collect appropriate data for empirical research.

Prerequisite(s): Admission into the Master of Arts Economics (course-based) program.

Economics 697 3 units; H(3-0)
Research Methods IV
Master’s research project. Continuing from Research Methods III, the economic/econometric model is fully developed with specific attention to identification issues and testable hypotheses. Appropriate econometric analyses, validation and testing are carried out, leading to a research paper reporting the problem, the model and the results.

Prerequisite(s): Admission into the Master of Arts Economics (course-based) program.

Economics 707 3 units; H(3-0)
Advanced Microeconomic Theory I
Introduction to advanced microeconomic theory. Topics include consumer theory, theory of the firm, and general equilibrium.

Economics 709 3 units; H(3-0)
Advanced Macroeconomic Theory I
Introduction to the basic structure of the dynamic general equilibrium framework that forms the backbone of most modern macroeconomics research. Selected topics include growth, business cycles, and monetary and labor economics.

Economics 711 3 units; H(3-0)
Independent Study
MAY BE REPEATED FOR CREDIT

Economics 715 3 units; H(3-0)
Econometrics II
Selected topics in applied econometrics geared at developing econometric techniques needed to approach empirical problems in microeconomics. The focus is on understanding how data, econometric methodology and assumptions combine to address an economic question. An emphasis is placed on understanding the validity and critical role of assumptions. Covers econometric methods for linear and non-linear models using both cross-section and panel data.

Economics 717 3 units; H(3-0)
Trade, Growth and the Environment I
Covers relevant theoretical work on the environmental consequences of trade liberalization and economic growth, and the relationship between resource use and globalization, focusing on newly published research. Participants are expected to present and discuss research. The specific choice of topics will be based on research interests of the class.

Prerequisite(s): Economics 615.

Economics 723 3 units; H(35-0)
Trade, Growth and the Environment II
Covers relevant theoretical work on the environmental consequences of trade liberalization and economic growth, and the relationship between resource use and globalization, focusing on newly published research. Participants are expected to present and discuss research. The specific choice of topics will be based on research interests of the class.

Prerequisite(s): Credit for both Economics 723 and 611.10 will not be allowed.
Educational Psychology EDPS Courses of Instruction

**Economics 725** 3 units; H(3S-0)

*Trade, Growth and the Environment II*
Covers relevant empirical work on the environmental consequences of trade liberalization and economic growth, and the relationship between resource use and globalization, focusing on newly published research. Participants are expected to present and discuss research. The specific choice of topics will be based on research interests of the class.

**Economics 757** 3 units; H(3-0)

*Advanced Microeconometric Theory II*
Building on Economics 707, a comprehensive treatment of game theory, the economics of uncertainty and information, and the theory of incentives will be introduced. Other topics may be included as time and interest allow.

**Prerequisite(s):** Economics 707.

**Economics 759** 3 units; H(3-0)

*Advanced Macroeconomic Theory II*
Building on Economics 709, a survey of the ideas, controversies, and techniques that constitute modern macroeconomics. The principal issues it covers lie at the heart of monetary and fiscal policy and of such important social problems as business cycles and unemployment. The empirical study of key issues raised in theoretical and political debates is also emphasized.

**Prerequisite(s):** Economics 709.

**Educational Psychology EDPS**

Instruction is offered by members of Graduate Programs in Education.

Associate Dean – M. Jacobsen

**Note:** Additional graduate education courses are offered under the course headings Educational Research (EDER) and undergraduate courses are offered under the course heading Education (EDUC).

**Note:** Only Psychology courses may be used to fulfill the requirements for the Major or Minor in Psychology.

Effective May 2012 Applied Psychology (APSY) changed its name to Educational Psychology (EDPS). All courses originally listed under the APSY acronym will be under the EDPS acronym.

**Graduate Courses**

**Note:** Graduate courses within Graduate Programs in Education: Educational Psychology can be taken only with consent of Graduate Programs in Education, and in specific cases additional requirements may be necessary (see below).

**Educational Psychology 602** 3 units; H(3S-0) (formerly Applied Psychology 602, formerly Campus Alberta Applied Psychology 601)

*Counselling Theories and Professional Practice*
Engages students in a critical evaluation of a range of contemporary counselling theories and helps them begin to develop a description of their own emerging theory.

**Educational Psychology 604** 3 units; H(3-0) (formerly Applied Psychology 603, formerly Campus Alberta Applied Psychology 603)

*Professional Ethics in Applied Psychology*
Ethical, legal and professional knowledge to inform practice in educational, counselling and mental health contexts.

**Antirequisite(s):** Educational Psychology 603 or equivalent.

**Educational Psychology 606** 3 units; H(3S-0) (formerly Applied Psychology 606)

*Methods of Inquiry in Professional Practice*
Helps students critically analyse other research efforts and in the process learn how to think through their own research questions in a critically evaluative manner.

**Educational Psychology 609** 3 units; H(3-2) (formerly Applied Psychology 609)

*Research Design in Statistics II*
Research design and statistics, including methods for research in psychology and related laboratory instruction.

**Antirequisite(s):** Educational Psychology 605 or equivalent.

**Educational Psychology 610** 3 units; H(3-0) (formerly Campus Alberta Applied Psychology 617)

*Research Methodology in Counselling*
Survey course on research methodologies in counselling, which addresses issues of research design, methods and interpretation of research findings.

**Antirequisite(s):** Credit for Educational Psychology 610 and Applied Psychology 605 or Educational Psychology 605 or equivalent will not be allowed.

**Educational Psychology 611** 3 units; H(3-2) (formerly Applied Psychology 611)

*Qualitative Research Methodologies*
Advanced study of qualitative research methods for use in applied psychology and education.

**Educational Psychology 612** 3 units; H(3-0)

*Research Methods in School Psychology*
Advanced study of qualitative research methods for use in applied psychology and education.

**Educational Psychology 614** 3 units; H(3-0) (formerly Applied Psychology 603, formerly Campus Alberta Applied Psychology 603)

*Ethics in Professional Psychology*
Engages students in ethical and legal issues in psychology, and professional issues in practice settings.

**Antirequisite(s):** Educational Psychology 603 or equivalent.

**Educational Psychology 615** 3 units; H(3-0) (formerly Applied Psychology 615)

*Theoretical and Clinical Foundations of Assessment*
In-depth review of theoretical and clinical foundations of psycho-educational assessment. Focus is on processes of assessment, properties of tests, use and interpretation of tests and clinical diagnosis.

**Educational Psychology 616** 3 units; H(3S-0) (formerly Applied Psychology 616, formerly Campus Alberta Applied Psychology 613)

*Assessment Theory and Practices*
Combines a theoretical and practical focus to develop a framework from which to approach the assessment of client change in a variety of contexts.

**Prerequisite(s):** Educational Psychology 602 and 622 or equivalents.

**Educational Psychology 617** 3 units; H(3-3) (formerly Applied Psychology 617)

*Psychological Assessment of Adults*
Provides students with the knowledge and skills necessary to select, administer, score and interpret formal psychological tests and other assessment instruments commonly used within counselling contexts.

**Prerequisite(s):** Educational Psychology 615 or equivalent.

**Educational Psychology 618** 3 units; H(3-2) (formerly Applied Psychology 607)

*Multivariate Design and Analysis*
Research design and statistics in psychology, with special reference to large sample techniques.

**Prerequisite(s):** Educational Psychology 609 or consent of the instructor.

**Antirequisite(s):** Educational Psychology 607 or equivalent.

**Educational Psychology 619** 3 units; H(3-0) (formerly Applied Psychology 619)

*Counselling Girls and Women*
Sex role development; stereotyping and social roles; counselling theories; counselling approaches.

**Educational Psychology 621** 3 units; H(2-2) (formerly Applied Psychology 621)

*Creating a Working Alliance*
Theory and practice in developing skills contributing to working alliance and problem clarification. Ethical, legal and professional issues are the context for the application of generic counselling skills in laboratory experiences.

**Prerequisite(s):** Applied Psychology 419 or equivalent or consent of Graduate Programs in Education.

**Corequisite(s):** Prerequisite or Corequisite: Educational Psychology 623 or equivalent.

**Note:** Not open to Open Studies students.

**Educational Psychology 622** 3 units; H(3S-0) (formerly Applied Psychology 622, formerly Campus Alberta Applied Psychology 605)

*Developing and Sustaining a Working Alliance with Clients*
Focuses on the understanding and acquisition of skills that are essential for the development of working alliances in counselling contexts. Introduces a theoretical framework for the application of counselling skills in addition to providing the opportunity for skill practice.

**Corequisite(s):** Prerequisite or Corequisite: Educational Psychology 602 or equivalent.
Courses of Instruction

Educational Psychology 623  3 units; H(3-0)
(formerly Applied Psychology 623)

Theory in Counselling
History and systems involved in counselling psychology and client change.

Educational Psychology 624  3 units; H(3-0)
(formerly Campus Alberta Applied Psychology 607)

Cultural and Social Justice Issues in Professional Practice
A critical examination of cultural and equity issues related to the lives of clients and the psychological professionals serving them.

Antirequisite(s): Credit for Educational Psychology 624 and Applied Psychology 625 or Educational Psychology 625 will not be allowed.

Educational Psychology 625  3 units; H(3-0)
(formerly Applied Psychology 625)

Cultural Influences on Professional Practice
An examination of cultural influences on theory and practice in applied psychology.

Educational Psychology 626  3 units; H(3-0)
(formerly Campus Alberta Applied Psychology 637)

Group Interventions and Processes
Examines theoretical, research, experiential knowledge helpful in facilitating diverse educational and psychological groups.

Antirequisite(s): Credit for Educational Psychology 626 and Applied Psychology 627 or Educational Psychology 627 will not be allowed.

Educational Psychology 627  3 units; H(3-1)
(formerly Applied Psychology 627)

Group Processes in Applied Psychology
Theory of group practice in applied psychology, with experiential laboratory.

Antirequisite(s): Credit for Educational Psychology 627 and 626 will not be allowed.

Educational Psychology 629  3 units; H(3S-2)
(formerly Applied Psychology 629)

Theory and Applications: Selected Topics
MAY BE REPEATED FOR CREDIT

Educational Psychology 630  3 units; H(3-0)
(formerly Campus Alberta Applied Psychology 621)

Foundations of Career Counselling
Review and application of theoretical and research literatures relevant to counselling clients with career concerns.

Antirequisite(s): Credit for Educational Psychology 630 and Applied Psychology 631 or Educational Psychology 631 will not be allowed.

Educational Psychology 631  3 units; H(3-0)
(formerly Applied Psychology 631)

Theories of Career Development
Study of career development theory and related research; implications for the applied field.

Antirequisite(s): Credit for Educational Psychology 632 and Educational Psychology 630 will not be allowed.

Educational Psychology 632  3 units; H(3S-0)
(formerly Applied Psychology 632, formerly Campus Alberta Applied Psychology 627)

Career Development and Services for Organizational Settings
Designed to combine theoretical and practical concerns regarding applications of career development concepts to human resources contexts in organizations. Concepts will be relevant to counselling and human resources development professionals.

Prerequisite(s): Educational Psychology 602, 603, 622 and 625

Educational Psychology 633  3 units; H(2-2)
(formerly Applied Psychology 633, formerly Campus Alberta Applied Psychology 623)

Career Counselling
Laboratory and field experiences in career counselling.

Prerequisite(s): Educational Psychology 631.

Educational Psychology 634  3 units; H(3S-0)
(formerly Applied Psychology 634, formerly Campus Alberta Applied Psychology 629)

Multicultural Career Development and Counselling
Increasing cultural diversity requires career development practitioners to examine the ways that their services are designed and delivered. Designed to enable students to deliver culturally responsive career counseling services to diverse populations.

Prerequisite(s): Educational Psychology 636 and 646 or equivalent.

Educational Psychology 635  3 units; H(3-0)
(formerly Applied Psychology 635)

Advanced History, Theory, and Practice in Psychology
Course examines the history of psychological concepts in Western culture, major theoretical systems and research approaches, and the foundational assumptions of contemporary perspectives in psychology.

Note: Open to students in Psychology and Educational Research programs.

Educational Psychology 636  3 units; H(3S-0)
(formerly Applied Psychology 636, formerly Campus Alberta Applied Psychology 625)

Systemic Approaches to Community Change
Provides students with a theoretical and practical basis to work as effective community change agents in a broad range of sectors. An examination of comprehensive guidance in schools provides a foundation for exploring key concepts pertinent to developing and implementing comprehensive services in a variety of contexts, and in the process, gaining a better understanding of communities, and building their strengths and capacities.

Educational Psychology 637  3 units; H(3-0)
(formerly Applied Psychology 637)

Relationship Counselling
Review of theory and systems in marriage and family counselling. Structured observation activities.

Corequisite(s): Prerequisite or Corequisite: Educational Psychology 640 or consent of Graduate Programs in Education.

Educational Psychology 638  3 units; H(3S-0)
(formerly Applied Psychology 638, formerly Campus Alberta Applied Psychology 615)

Counselling Interventions for Client Change
Combines a theoretical and practical focus to develop a framework from which to plan and implement client change interventions in a variety of contexts.

Prerequisite(s): Educational Psychology 602 and 622 or equivalents.

Educational Psychology 639  3 units; H(2-2)
(formerly Applied Psychology 639)

Counselling Interventions
Theory and practice in planning and implementing client change interventions; the application of counselling interventions in laboratory experiences.

Prerequisite(s): Educational Psychology 621 and 623 or equivalents or consent of Graduate Programs in Education.

NOT INCLUDED IN GPA

Educational Psychology 640  6 units; F(2-7)
(formerly Applied Psychology 640)

Practicum in Counselling Psychology
Supervised counselling experience and related seminars.

Prerequisite(s): Educational Psychology 621, 623, 623 or equivalents or consent of Graduate Programs in Education.

Corequisite(s): Prerequisites or Corequisites: Educational Psychology 614, 615, 639 and 695, or equivalent.

Note: Not open to Open Studies students.

NOT INCLUDED IN GPA

Educational Psychology 641  3 units; H(3-0)
(formerly Applied Psychology 641)

Development, Learning and Cognition - Child and Adolescence
The interactions of development, learning and cognition in childhood and adolescence.

Educational Psychology 642  3 units; H(3S-0)
(formerly Applied Psychology 642, formerly Campus Alberta Applied Psychology 611)

Counselling Practicum I
Provides an opportunity for professional development and supervised practice in a general counselling setting. Students will be involved in direct work with clients under the supervision of a qualified professional.

Prerequisite(s): Educational Psychology 602, 604, 616, 622, 624, and 638.

NOT INCLUDED IN GPA

Educational Psychology 643  3 units; H(3-0)
(formerly Applied Psychology 643)

Development, Learning and Cognition - Adult
The interactions of development, learning and cognition in childhood and adulthood.

Educational Psychology 644  3 units; H(3S-0)
(formerly Applied Psychology 644, formerly Campus Alberta Applied Psychology 619)

Counselling Practicum II
Provides an opportunity for professional development and supervised practice in a specialized counselling context. Students will be involved in direct work with clients under the supervision of a qualified professional. The practicum allows students to actively explore issues encountered in
Courses of Instruction

Educational Psychology 646  3 units; H(3S-0) (formerly Applied Psychology 646, formerly Campus Alberta Applied Psychology 631)

Processes of Learning
Addresses the research on socialization processes in childhood and adolescence, with particular emphasis on family and peer interpersonal relations.

Educational Psychology 650  3 units; H(3-0) (formerly Applied Psychology 650)

Family and Social Bases of Behaviour
Course explores theoretical perspectives and contemporary theories and models of health, illness, and health promotion, and their relevance in a variety of settings.

Educational Psychology 651  3 units; H(3-0) (formerly Applied Psychology 651)

Disorders of Learning and Behaviour
Focuses on childhood and adolescent disorders through an examination of theories, diagnostic and associated features and disorders, prevalence, developmental course, cultural and gender context, and familial patterns.

Educational Psychology 652  3 units; H(3-0) (formerly Applied Psychology 652)

Academic and Language Assessment
Course provides a broad understanding of the standards that guide assessment practices through an examination of assessment of academic areas and language skills.

Antirequisite(s): Not open to students with credit in Educational Psychology 667 or equivalents.

Educational Psychology 653  3 units; H(3-0)

Professional Practice of School Psychology
A focus on the preparation, roles, functions, and employment of school psychologists as well as the regulation, evaluation, and accountability of school psychologists.

Educational Psychology 654  3 units; H(3-0) (formerly Applied Psychology 654)

Neurobiological and Developmental Bases of Learning and Behaviour
Examines the educational relevance of neuroscience and school neuropsychology in the context of school-based service delivery. A survey of the extant literature and methods regarding best practices in neuropsychological assessment, case conceptualization, and evidence-based intervention for children with and without neurodevelopmental disabilities.

Note: Open to students in Educational Psychology programs or consent of Graduate Programs in Education.

Educational Psychology 655  3 units; H(3-0)

Advanced Child Development
Explores the theory and research supporting recent advances in select areas of child development. Topics will include: developmental methodologies; parent and peer relations; personality, self, and self-concept; language and thought; emotion and motivation; and prosocial, antisocial, and moral development.

Note: Open to students in Educational Psychology programs or consent of Graduate Programs in Education.

Educational Psychology 656  3 units; H(1-14)

Practicum in Academic and Language Assessment and Intervention
This 200-hour practicum provides opportunities to develop competencies in academic and language assessment and interventions within an approved setting.

Note: Open to students in Educational Psychology programs.

Educational Psychology 657  3 units; H(3-0) (formerly Applied Psychology 657)

Cognitive and Neuropsychological Assessment
Focuses on the theory and practice of intellectual/cognitive, memory, and neuropsychological assessment primarily through the use of individually administered standardized tests.

Note: Open to students in School and Applied Child Psychology program.

Educational Psychology 658  3 units; H(3-0) (formerly Applied Psychology 658)

Interventions to Promote Cognitive, Academic, and Neuropsychological Well-Being
Focuses on evidence-based interventions aimed at promoting cognitive, academic, and neuropsychological development in children and youth.

Note: Open to students in School and Applied Child Psychology program.

Educational Psychology 659  3 units; H(3-0)

Academic Assessment and Intervention
Academic and language assessment and intervention primarily through the use of individually administered standardized tests and evidence-based interventions aimed at promoting academic and language development in children and youth.

Note: Open to students in School and Applied Child Psychology program.

Educational Psychology 660  3 units; H(3-0) (formerly Applied Psychology 660)

Social, Emotional, and Behavioural Assessment
Grounded in bioecological systems perspective and developmental and resiliency frameworks, course focuses on the comprehensive assessment of children and youth referred for social, emotional, and behavioural concerns.

Note: Open to students in School and Applied Child Psychology program.

Educational Psychology 661  3 units; H(3-0) (formerly Applied Psychology 661)

Psychological Foundations of Student Exceptionality
Major trends, developments, theoretical foundations, and current practices and challenges relative to the education of students with diverse learning needs.

Note: Open to students in School and Applied Child Psychology program.

Educational Psychology 662  3 units; H(3-1)

School Psychology Practicum I
Provides supervised experience to develop competencies aligned with the practice of school psychology, including consultation, assessment, and intervention. Adherence to all provincial and national ethical and professional guidelines is expected.

Prerequisite(s): Educational Psychology 659.

Note: Open to students in School and Applied Child Psychology program.

NOT INCLUDED IN GPA

Educational Psychology 663  3 units; H(3-1)

School Psychology Practicum II
Provides supervised experience to further develop and refine school psychologist competencies. Administration of evidenced-based intervention strategies will also be required. Adherence to all provincial and national ethical and professional guidelines is expected.

Prerequisite(s): Educational Psychology 665.

Note: Open to students in School and Applied Child Psychology program.

NOT INCLUDED IN GPA

Educational Psychology 664  3 units; H(3S-0) (formerly Applied Psychology 664, formerly Campus Alberta Applied Psychology 635)

Psychological Approaches to Health
Focuses on how human psychology and human health intersect and is organized according to core principles and skills that guide the practice of health psychology. Will orient students to contemporary theories and models of health, illness, and health promotion, and their relevance in a variety of settings.

Prerequisite(s): Educational Psychology 602, 624, and 610 or equivalents.

Educational Psychology 665  3 units; H(3-0)

Cognitive Assessment and Intervention
The theory and practice of intellectual/cognitive, and memory assessment primarily through the use of individually administered standardized tests and evidence-based interventions aimed at promoting cognitive, academic, and neuropsychological development in children and youth.

Prerequisite(s): Educational Psychology 662.

Note: Open to students in School and Applied Child Psychology program.
Assessment of Students with Exceptional Learning Needs

Theory and practice in school-based academic and social-emotional assessment techniques and strategies for use with students with diverse learning needs. Laboratory and field experiences.

Prerequisite(s): Credit for both Educational Psychology 667 and 652 or equivalent will not be allowed.

Note: Open to students in School and Applied Child Psychology program.

Educational Psychology 668 3 units; H(3S-0)
(formerly Applied Psychology 668, formerly Campus Alberta Applied Psychology 681)

Theory and Practice of Clinical Supervision

Intended for students to learn the process of clinical supervision and as a result become better consumers of supervision, more effective supervisors, and more able to evaluate their current and future development and involvement in supervisory roles.

Educational Psychology 669 3 units; H(3-0)

Social-Emotional Assessment and Intervention

Focuses on the theory and practice of social, emotional, and behavioural assessment and on evidence-based interventions to enhance the mental health and behavioural well-being of children and youth.

Prerequisite(s): Educational Psychology 663.

Note: Open to students in School and Applied Child Psychology program.

Educational Psychology 670 3 units; H(3S-0)
(formerly Applied Psychology 670, formerly Campus Alberta Applied Psychology 693)

Final Project Portfolio

Students complete a culminating independent project in their area of specialization to satisfy the degree requirements.

Prerequisite(s): Educational Psychology 602, 604, 610, 616, 622, 624, 638, and 642.

Educational Psychology 671 3 units; H(1-3)
(formerly Applied Psychology 671)

Practicum in School-based Interventions for Children and Youth with Exceptional Learning Needs: I

Practicum in educational interventions for children and adolescents with special learning needs. Focus on general assessment, analysis, intervention, and strategies in applied settings.

Prerequisite(s): Educational Psychology 661 or equivalent.

Educational Psychology 672 3 units; H(3S-0)
(formerly Applied Psychology 672, formerly Campus Alberta Applied Psychology 641)

Counselling Exceptional Children

Intended to help students enhance their awareness and understanding of major trends, developments, theoretical foundations, and current practices and challenges in counselling and providing consultation for special needs children and adolescents.

Educational Psychology 673 3 units; H(3-3)
(formerly Applied Psychology 673)

Practicum in School-based Interventions for Children and Youth with Exceptional Learning Needs: II

Advanced practicum in educational interventions for children and adolescents with special learning needs. Focus on specialized assessment, analysis, interventions, and strategies in applied settings.

Prerequisite(s): Educational Psychology 671 or equivalent.

Educational Psychology 674 3 units; H(3-0)
(formerly Applied Psychology 674)

Interventions to Promote Socio-emotional and Behavioural Well-Being

Focus on strategies to enhance the socio-emotional and behavioural well-being of children and youth who exhibit significant emotional and behavioural needs in school and community settings.

Prerequisite(s): Educational Psychology 660 or equivalent.

Educational Psychology 675 3 units; H(1-14)
(formerly Applied Psychology 675)

Practicum in Cognitive and Neuropsychological Assessment and Intervention

This 200-hour practicum provides opportunities to develop competencies in cognitive and neuropsychological assessment and intervention within an approved setting.

Prerequisite(s): Educational Psychology 658 or equivalent.

NOT INCLUDED IN GPA

Educational Psychology 676 3 units; H(1-14)
(formerly Applied Psychology 676)

Practicum in Social, Emotional, and Behavioural Assessment and Intervention

This 200-hour practicum provides opportunities to develop competencies in social, emotional, and behavioural assessment and intervention within an approved setting.

Prerequisite(s): Educational Psychology 674 or equivalent.

NOT INCLUDED IN GPA

Educational Psychology 677 3 units; H(3-0)
(formerly Applied Psychology 677)

Play Therapy Theory and Process

The theoretical foundations and basic orientation necessary to understand and use play as therapy are outlined, along with the developmental underpinnings of play in children and the basic principles upon which child-centred play therapy is built.

Educational Psychology 678 3 units; H(3S-0)
(formerly Applied Psychology 678, formerly Campus Alberta Applied Psychology 661)

Art Therapy History

Art therapy is examined from a broad perspective, from its beginnings as a treatment for mentally or emotionally disturbed people, to its development as a distinct profession in North America and Europe. The works of key authors are covered, along with their theoretical approaches and current trends in the field. Students will learn how the foundations of art therapy are incorporated by many disciplines, with applications in many settings.

Prerequisite(s): Educational Psychology 642, 616, and 638 or equivalents.

Educational Psychology 679 3 units; H(3-0)
(formerly Applied Psychology 679)

Fundamentals of Solution-Oriented Therapy

Provides a working knowledge of the theory and practice of solution-oriented therapy and related models.

Educational Psychology 680 3 units; H(3S-0)
(formerly Applied Psychology 680, formerly Campus Alberta Applied Psychology 695)

Counselling Graduate Practicum: Selected Topics

Graduate Practicum: Selected Topics.

MAY BE REPEATED FOR CREDIT

Educational Psychology 682 3 units; H(3-3)
(formerly Applied Psychology 682, formerly Campus Alberta Applied Psychology 691)

Special Topics: Counselling

Graduate Seminar: Special Topics.

MAY BE REPEATED FOR CREDIT

Educational Psychology 683 3 units; H(3-0)

Consultation in School Psychology

Examine the purpose and skills of consultation, evaluation issues, and strategies in consultation as well as the role of school psychologists relative to multidisciplinary school teams, school-based problems solving, and student development and learning.

Note: Open to students in Educational Psychology or consent of Graduate Programs in Education.

Educational Psychology 684 3 units; H(3-0)
(formerly Applied Psychology 684)

Advanced Seminar in the Domains of School Psychology Leadership and Function in the Schools

An advanced study of the domains and functions of school and applied child psychologists. Students are required to demonstrate a comprehensive understanding of competencies in ten domains identified by the National Association of School Psychologists as central to the school psychology profession.

Note: Open only to students enrolled in the MEd School and Applied Child Psychology program who have completed all other course work prior to enrolment.

Educational Psychology 685 3 units; H(3-0)

Child and Adolescent Counselling

Introduces the theory and practice of counselling in school-based settings and fosters student development of rudimentary counselling and psychotherapy skills for school-based service delivery.

Note: Open to students in Educational Psychology or consent of Graduate Programs in Education.

Educational Psychology 686 3 units; H(3S-0)
(formerly Applied Psychology 686)

Counselling Graduate Seminar: Selected Topics

Graduate Seminar: Selected Topics.

MAY BE REPEATED FOR CREDIT

Educational Psychology 691 1.5 units; Q(1.5S-0)
(formerly Applied Psychology 691)

Graduate Seminar: Selected Topics

MAY BE REPEATED FOR CREDIT

Educational Psychology 692 6 units; F(3S-0)
(formerly Applied Psychology 692)

Graduate Seminar: Selected Topics

MAY BE REPEATED FOR CREDIT

Educational Psychology 693 3 units; H(3S-0)
(formerly Applied Psychology 693)

Courses of Instruction

Educational Psychology 694 6 units; F(1S-3)  
(formerly Applied Psychology 694)

Graduate Practicum: Selected Topics  
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Educational Psychology 695 3 units; H(1S-3)  
(formerly Applied Psychology 695)

Graduate Practicum: Selected Topics  
Note: Open only to students in the Counselling Psychology program.  
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Educational Psychology 698 6 units; F  
(formerly Applied Psychology 698)

Pre-Master’s Internship in School and Applied Child Psychology  
This 1200 hour internship requires the integration and application of the full range of school psychology competencies and domains within an approved setting.

Prerequisite(s): Consent of Training Director.
Note: Open only to students in the MEd or MSc in School and Applied Child Psychology programs.
NOT INCLUDED IN GPA

Educational Psychology 701 3 units; H(3-0)  
(formerly Applied Psychology 701)

Advanced Research Design, Psychometrics and Statistics in Applied Psychology  
Provides intensive exposure to sophisticated quantitative techniques relevant to research design, psychometrics, and statistics such as structural equation modelling (SEM), item-response theory (IRT), and hierarchical linear modelling (HLM).

Prerequisite(s): Educational Psychology 607 or equivalent.

Educational Psychology 702 3 units; H(3-0)  

Advanced Theories in Measurement  
This advanced seminar course focuses on a variety of topics and issues related to measurement in the social, educational, and behavioural sciences. As we progress through the course, we will cover topics critical to measurement; including principles of scale development (e.g., item writing, scaling), and validity theory (e.g., construct representation and validation). This course is strongly recommended for anyone planning to pursue applied, clinical, or research studies/careers involving the use of tests and/or measures.

Prerequisite(s): Educational Psychology 607 or equivalent.
MAY BE REPEATED FOR CREDIT

Educational Psychology 703 3 units; H(3-0)  
(formerly Applied Psychology 703)

Advanced Seminar in Applied Psychology  
Doctoral seminar on issues in applied psychology. Dissertation development.

NOT INCLUDED IN GPA

Educational Psychology 705 3 units; H(3-0)  
(formerly Applied Psychology 705)

Advanced Seminar in Special Education I  
Advanced study of theoretical, empirical, and practical issues affecting individuals with exceptional learning needs.

Prerequisite(s): Educational Psychology 661 or equivalent.

Educational Psychology 709 3 units; H(3-0)  
(formerly Applied Psychology 709)

Advanced Seminar in Applied Learning and Developmental Psychology I  
Advanced study of theory and practice in human development and learning.

Educational Psychology 731 3 units; H(3-0)  
(formerly Applied Psychology 731)

Advanced Clinical Supervision in Applied Psychology  
Provides students with formal training in clinical supervision with the intent of raising an awareness of supervision models, as well as a conceptual framework and vocabulary for thinking through their supervision practice.

Note: Open only to doctoral students in Educational Psychology or consent of Graduate Programs in Education.

Educational Psychology 732 3 units; H(3-0)  
(formerly Applied Psychology 732)

Advanced Practicum in Counselling  
Advanced practicum in counselling psychology, and related seminars.

Note: Open only to doctoral students in Counselling Psychology program
NOT INCLUDED IN GPA

Educational Psychology 741 3 units; H(3-2)  
(formerly Applied Psychology 741)

Advanced Professional Skills and Issues  
Focuses on providing knowledge and developing skills in the areas of consultation, supervision, and program development and evaluation across the lifespan.

Educational Psychology 742 6 units; F(2-7)  
(formerly Applied Psychology 742)

Advanced Practicum in Counselling  
Advanced practicum in counselling psychology, and related seminars.

Educational Psychology 762 3 units; H(3-0)  

Advanced Neuropsychological Assessment and Intervention  
Builds advanced understanding of neuropsychological approaches to assessment and intervention and the use of the cognitive hypothesis testing model to formulate and test hypotheses.

Note: Open only to doctoral students in Educational Psychology.

Educational Psychology 764 3 units; H(3-2)  

Advanced Research Statistics  
Provides instruction in advanced statistical methods. Topics include, but are not limited to, multilevel/growth curve modelling, structural equation modelling, and topics related to the measurement of growth and change and the use of advanced statistical software.

Note: Open only to doctoral students in Educational Psychology.

Educational Psychology 766 3 units; H(3-1)

Advanced Neuropsychological Assessment and Intervention  
Builds advanced understanding of neuropsychological approaches to assessment and intervention and the use of the cognitive hypothesis testing model to formulate and test hypotheses.

Note: Open only to doctoral students in Educational Psychology.

Educational Psychology 768 6 units; F  
(formerly Applied Psychology 788)

Pre-Doctoral Internship in Counselling Psychology  
One full calendar year, full-time (or two years, half-time) supervised training experience in an approved clinical setting. Practical application of theories and interventions pertaining to individual and group, couple, or family counselling as well as assessment, consultation, and supervision. Experience in addressing a variety of professional issues.

Prerequisite(s): Consent of Training Director.
Note: Open to students enrolled in the PhD program in Counselling Psychology.
NOT INCLUDED IN GPA

Educational Psychology 788 6 units; F  
(formerly Applied Psychology 788)

Advanced Research Statistics  
Provides instruction in advanced statistical methods. Topics include, but are not limited to, multilevel/growth curve modelling, structural equation modelling, and topics related to the measurement of growth and change and the use of advanced statistical software.

Note: Open only to doctoral students in Educational Psychology.

Educational Psychology 792 6 units; F(3-0)  
(formerly Applied Psychology 792)

Advanced Practicum: Selected Topics  
MAY BE REPEATED FOR CREDIT

Educational Psychology 793 3 units; H(3S-0)  
(formerly Applied Psychology 793)

Graduate Seminar: Selected Topics  
MAY BE REPEATED FOR CREDIT

Educational Psychology 794 6 units; F(1S-3)  
(formerly Applied Psychology 794)

Advanced Practicum: Selected Topics  
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Educational Psychology 795 3 units; H(1S-3)  
(formerly Applied Psychology 795)

Advanced Practicum: Selected Topics  
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

## Courses of Instruction

**Educational Research 683**  3 units; H(3-0)

*Curriculum Development, Implementation and Assessment*
Making sense of what happens when curriculum policy becomes reality and affects students, teachers, parents and politicians.

**Educational Research 685**  3 units; H(3-0)

*Interpretive Curriculum Discourses*
The field of interpretive work in curriculum theory.

**Educational Research 687**  3 units; H(3-0)

*Interpretive Study of Curriculum I*
Introduction to the study of curriculum, theory and practice with an emphasis on lived experience at the Master's level.

**Educational Research 688**  3 units; H(3-0)

*Interpretive Study of Curriculum II*
In depth study of the historical movements and philosophical contexts of contemporary curriculum theorizing and practice at the Master's level.

**Educational Research 689**  3 units; H(3-0)

*Aspects of School Curriculum*
Introductory systematic study of research and issues focused on various areas of the school curriculum.

**Educational Research 692**  3 units; H(3-0)

*Collaboratory of Practice*
An examination of real world problems and practices through reviewing the theoretical and research literature linking these to an analytical framework.

**Educational Research 693**  3 units; H(3-0)

*Interpretive Study of Curriculum*
Introduction to the various forms of educational inquiry.

**Educational Research 696**  3 units; H(3-0)

*Special Topics in Education*
Topics designed to prepare foreign-prepared teachers to meet Alberta Education teacher certification requirements.

**Educational Research 697**  1.5 units; Q(1.5-0)

*Special Topics*

**Educational Research 698**  6 units; F(3-0)

*Special Topics*

**Educational Research 700**  6 units; F(3-0)

*Seminar for First-Year PhD/EdD Students*
Seminar on selected topics.

**Educational Research 701**  3 units; H(3-0)

*Advanced Research Methods*
Advanced study in the conduct of research.

**Educational Research 703**  3 units; H(3-0)

*Directed Study*
Individual doctoral study in a selected area.

**Educational Research 704**  3 units; H(3-0)

*Doctoral Seminar in Educational Leadership*
Provides doctoral students with a contemporary Canadian focus on significant issues in educational leadership.

**Educational Research 705**  3 units; H(3-0)

*Collaboratory of Practice I*
Review the theoretical and research literature and use analytical framework to explore problems of practice.

**Educational Research 706**  3 units; H(3-0)

*Collaboratory of Practice II*
Integrate theoretical, research, and practical knowledge through a focus on data collection and analysis.

**Educational Research 707**  3 units; H(3-0)

*Dissertation Seminar I*
Undertaking a doctoral research study after the successful passing of the candidacy exam.

**Educational Research 708**  3 units; H(3-0)

*Dissertation Seminar II*
Ongoing engagement in doctoral research activities as appropriate to the research timelines, research design and methodology, and requirements for writing and defending the dissertation.

**Educational Research 710**  3 units; H(3-0)

*Advanced Special Topics in Educational Leadership*
Provides doctoral students with advanced exploration of diverse, contemporary topics in k-12 and post-secondary learning organizations.

**Educational Research 719**  3 units; H(3-0)

*Advanced Workplace and Adult Learning*
Advanced exploration of diverse topics in workplace and adult learning.

**Educational Research 735**  3 units; H(3-0)

*Advanced Topics in Adult Learning*
Drawing from a foundational understanding and appreciation of adult education and adult learning, this course provides a deeper exploration of current and contemporary topics and discourses that inform this field of scholarship and practice.

**Educational Research 741**  3 units; H(3-0)

*Advanced Seminar in Theory and Research in Literacy Education*
A critical examination of theories, models, and research that underpin literacy education.

**Educational Research 768**  3 units; H(3-0)

*Theory and Research in Languages and Diversity*
Topics include current issues in languages and diversity, assessment and evaluation, language policy and planning, and language-identity-democracy.

**Educational Research 771**  3 units; H(3-0)

*Advanced Seminar in Technology Enabled Learning*
An exploration of advances and trends in learning and instructional design and development theory and evaluation; investigate collaboration and community; participatory cultures, innovation and change research, learning science and knowledge building.

**Educational Research 773**  3 units; H(3-0)

*Advanced Seminar in Design and Development of Learning*
An exploration of advances and trends in learning and instructional design and development theory and evaluation; investigate collaboration and community; participatory cultures, innovation and change research, learning science theory, and knowledge building.

**Educational Research 775**  3 units; H(3-0)

*Advanced Seminar in Technology Enabled Learning Environments*
An evaluation of prevalent and promising distributed, blended and collaborative learning environments through design, development and inclusive learning perspectives; analysis of affordances and constraints of mobile, dynamic and participatory realities and integrative networks.

**Educational Research 777**  3 units; H(3-0)

*Advanced Seminar in Leading Systemic Change*
Key concepts include issues of systemic change, network/systems theory, diffusion of innovations.
Courses of Instruction

Graduate Courses
Registration in all courses requires the approval of the Department of Electrical and Computer Engineering.

Electrical Engineering 601 3 units; H(3-1.5)

Power System Operation

Electrical Engineering 602 3 units; H(3-1)
(formerly Software Engineering for Engineers 619.71)

Virtual Environments and Applications
Introduction to virtual reality (VR) technologies; Characterization of virtual environments; hardware and software; user interfaces; 3D interaction; research trends. Applications: medicine, manufacturing, oil and gas reservoirs, the arts, and education.

Electrical Engineering 603 3 units; H(3-0)

Rotating Machines

Electrical Engineering 604 3 units; H(3-1)

System Design of Wireless Transceivers
Linear and nonlinear system analysis. Radio architectures – super-heterodyne, low intermediate frequency, direct conversion, sub-sampling; receiver system analysis and design; transmitter system analysis and design. Applications of transceiver system design to satellite and wireless communications.

Electrical Engineering 605 1.5 units; Q(1.5-0)

Professional Development I
Introduction to health and safety. Communication styles, supervisory relationships, and respect in the lab. Presentation planning and voice projection. Introduction to reference gathering and management.

Electrical Engineering 607 1.5 units; Q(1.5-0)

Professional Development II
Development of presentation skills. Writing and publishing scientific manuscripts. Introduction to peer review process, thesis defence and candidacy. Introduction to engineering design. Post-graduation career development including intellectual property, membership in professional organizations, and networking basics. This course is compulsory for all full-time graduate students.

Electrical Engineering 609 1.5 units; Q(3-1)

Special Topics
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member.

MAY BE REPEATED FOR CREDIT

Electrical Engineering 611 3 units; H(3-1)

Digital Systems
Introduction to digital system design for mask programmable and field programmable gate arrays. CMOS digital logic design. Flip-flop timing and metastability. Design for testability. CAD tools for digital system design.

Electrical Engineering 613 3 units; H(3-1)

RF Power Amplifiers and Transmitters
This is an advanced level graduate course, dealing with the theory, design and optimization of RF power amplification systems for wireless and satellite communication applications. The course provides a detailed treatment of linear and non-linear characteristics and modeling of amplifiers/transmitters from device to system level perspective. Theory of operation as well as design techniques of linear amplifiers (class A, AB, B, C), switching mode amplifiers (class E, D and F) and balanced amplifiers are presented. Linearization and power efficiency enhancements techniques of power amplifiers/transmitters are also covered.

Electrical Engineering 615 3 units; H(3-0)
(formerly Electrical Engineering 619.16)

Non-linear Control
Non-linear systems; phase portraits, equilibrium points, and existence of solutions. Lyapunov stability definitions and theorems. Non-linear control design; feedback linearization, sliding modes, adaptive control, backstepping, and approximate-adaptive control. Frequency domain stability analysis using describing functions.

Electrical Engineering 617 3 units; H(3-0)

RF Integrated Circuit Design
Introduction to complementary metal oxide semiconductor (CMOS) wireless communication circuits; computer-aided design; impedance matching concepts; passive circuit elements in monolithic circuits; radio frequency integrated circuit building blocks.

Electrical Engineering 618 3 units; H(3-0)

Biomedical Systems and Applications

Electrical Engineering 619 3 units; H(3-1)

Special Problems
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member.

MAY BE REPEATED FOR CREDIT

Electrical Engineering 623 3 units; H(3-1)
Courses of Instruction

Prerequisite(s): Consent of the Department.

Electrical Engineering 625 3 units; H(3-0)

Estimation Theory
Estimation theory as applied in communication systems, signal processing, measurement systems, geophysical systems, biomedical engineering and geomatics engineering. Estimators covered include: MVU, BLUE, LS, ML, Bayesian and MMSE. Concepts covered include: CRLB, Neyman-Fisher and Sufficient Statistics.

Electrical Engineering 627 3 units; H(3-0)

Antennas
Foundations of theory and practice of modern antennas. Topics covered will include: theoretical background, antenna parameters, simple radiators, antenna array theory, wire antennas, broadband antennas, microstrip antennas, aperture radiators, base station antennas, antennas for mobile communications, antenna measurements.

Note: Students registering in this course should have a background in electromagnetics and basic microwave engineering.

Electrical Engineering 629 3 units; H(3-0)

Advanced Logic Design of Electronic and Nanoelectronic Devices
Two-level and multi-level logic synthesis; flexibility in logic design; multiple-valued logic for advanced technology; multi-valued minimization; Binary Decision Diagrams, Word-level Decision Diagrams, sequential and combinational equivalence checking; technology mapping; technology-based transformations; logic synthesis for low power, optimizations of synchronous and asynchronous circuits, logical and physical design from a flow perspective; challenges of design of nanoelectronic devices.

Electrical Engineering 631 3 units; H(3-0)

System Identification and Parameter Estimation

Prerequisite(s): Electrical Engineering 649.

Electrical Engineering 633 3 units; H(3-0)

Wireless Networks

Note: A senior undergraduate course in wireless communications is suggested as preparation for this course.

Electrical Engineering 635 3 units; H(3-0)

Cryptography and Number Theory with Applications
The topic of the course is to provide the students with vital information about the use of number theory in designing and implementing various public key cryptographic schemes. We will stress on the efficacy of the algorithms used and their application in areas outside cryptography and coding theory.

Prerequisite(s): Credit for Electrical Engineering 635 and 619.87 will not be allowed.

Electrical Engineering 637 3 units; H(3-0)

Arithmetic Techniques with DSP Applications
The course is aimed at the use of specific computer-puter arithmetic techniques for efficient design of DSP algorithms. We will provide comprehensive information form the theory of computer arithmetic. We will show how the performance of different algorithms can be optimized by using efficient arithmetic techniques. Many examples will be provided.

Prerequisite(s): Credit for both Electrical Engineering 637 and 619.88 will not be allowed.

Electrical Engineering 639 3 units; H(3-0)

Radio Frequency and Microwave Circuit Design
Circuit design via transmission line elements: special emphasis on microstrip circuits and effects of discontinuities (corners, Tees, and impedance steps). Analysis of passive impedance matching and microwave circuits using distributed and lumped elements. Narrow band matching and wide band matching techniques as well as wide band matching to a complex load. One and two port small signal amplifiers. Scattering parameter design methods; amplifier gain, input and output matching and stability. Computer aided design methods and broadband design methods. Large signal transistor amplifiers; device non-linearities and design methodologies.

Electrical Engineering 641 3 units; H(3-0) (formerly Electrical Engineering 619.05)

Optimization for Engineers

Prerequisite(s): Engineering 407 or the consent of the instructor.

Antirequisite(s): Credit for both Electrical Engineering 641 and 619.05 will not be allowed.

Electrical Engineering 643 3 units; H(3-0)

Fibre Optics Transmission
Fundamental theory of cylindrical optical waveguides by way of Maxwell’s equation and the modal analysis of the slab waveguides, step-index and graded-index fibres, review of fibre chemistry and production techniques. Problems relating to measurement of fibre parameters. Optical transmitters, photodetectors and receivers, modulation and multiplexing techniques, splices and connectors. Multiport optical fibre analog and digital data analysis. Optics, optical switching and amplification, integrated optics.

Electrical Engineering 645 3 units; H(3-0) (formerly Electrical Engineering 619.51)

Data Mining and Knowledge Discovery

Electrical Engineering 647 3 units; H(3-0)

Analogue Integrated Circuit Design

Electrical Engineering 649 3 units; H(3-0) (formerly Electrical Engineering 619.22)

Random Variables and Stochastic Processes
Axiomatic view of probability; continuous and discrete random variables; expectation; functions of random variables; conditional distributions and expectations; stochastic processes; stationarity and ergodicity; correlation and power spectrum; renewal processes and Markov chains and non-Markovian processes in continuous time.

Electrical Engineering 651 3 units; H(3-0) (formerly Electrical Engineering 619.04)

Resource Management for Wireless Networks
Qualitative and mathematical formulation of the resource management problem in wireless networks; elements of radio resource management; power and Walsh code allocation and control. Call admission control, traffic load control, packet scheduling; radio resource management algorithms; fixed resource allocation, handover resource management, transmitter power management, dynamic resource allocation, and packet scheduling algorithms; quality-of-service (QoS) and resource management; joint radio resource management problem across heterogeneous wireless networks; applications and case studies: resource management in third generation (3G) and beyond 3G wireless internet protocol (IP) networks; open research challenges in resource management for wireless networks.

Electrical Engineering 653 3 units; H(3-1T-3/2) (formerly Electrical Engineering 619.23)

Theory and Practice Advanced DSP Processor Architecture
Architecture and capabilities of SISD, SIMD and VLIW processors; Developing high speed algorithms: code timing, reliability, background DMA activity, maintainability; Developing a personal software process appropriate for embedded systems.

Electrical Engineering 655 3 units; H(3-0)

Discrete Time Signal Processing
Foundations of discrete time signal processing of deterministic and stochastic signals: code timing, reliability, background DMA activity, maintainability; Developing a personal software process appropriate for embedded systems.

Electrical Engineering 657 3 units; H(3-0) (formerly Electrical Engineering 619.73)

Detection of Signals in Noise
Detection of distorted and noise corrupted deterministic and random signals. Application to optimum statistical signal processing algorithms in data communications, GPS, radar, synchronization and image processing.

Prerequisite(s): At least one of Electrical Engineering 675, 649, or 625 or consent of the instructor.
Courses of Instruction

Electrical Engineering 659 3 units; H(3-0)  
Active-RC and Switched-Capacitor Filter Design  
The filter design problem; operational amplifier characteristics; cascade methods of RC-active filter design; filter design with the active biquad; active filter design based on a lossless ladder prototype. Switched-capacitor (SC) integrators; design of cascade, ladder, and multiple feedback SC filters; non-ideal effects in SC filters; scaling of SC filters; topics in fabrication of SC filters.

Electrical Engineering 661 3 units; H(3-0)  
(formally Electrical Engineering 619.18)  
Grid-Connected inverters for Alternative Energy Systems  
Analysis and design of grid-connected inverters fed by an alternative energy source. Switch mode converters, inverter topologies, harmonics, drive electronics, control methodologies, implementation techniques, course project.

Electrical Engineering 663 3 units; H(3-0)  
(formally Electrical Engineering 619.09)  
Numerical Electromagnetic Field Computation  
Solution techniques for electromagnetic fields: finite difference, finite elements/volumes, boundary elements, finite difference time domain, and moment methods. Practical aspects concerning computer implementation: accuracy, speed, memory, and solvers.

Electrical Engineering 665 3 units; H(3-0)  
(formally Electrical Engineering 619.21)  
Bioelectromagnetism  
Generation, transmission, and measurement of electromagnetic events generated by excitable cells (heart, brain, muscle). Topics cover the scale from membrane and cell dynamics to tissue behaviour and body surface recordings.

Electrical Engineering 667 3 units; H(3-0)  
(formally Electrical Engineering 619.25)  
Intelligent Control  
Application of machine learning algorithms in control systems: neural networks, fuzzy logic, the cerebellar model arthritic computer, genetic algorithms; stability of learning algorithms in closed-loop non-linear control applications. 
Prerequisite(s): At least one undergraduate-level course in control systems.

Electrical Engineering 669 3 units; H(3-0)  
(formally Electrical Engineering 619.52)  
Renewable Energy and Solid State Lighting for the Developing World  

Electrical Engineering 671 3 units; H(3-0)  
Adaptive Signal Processing  

Electrical Engineering 673 3 units; H(3-0)  
Wireless Communications Engineering  
The basics of mobile radio telephone: mobile telephone frequency channels, components of mobile radio, objectives of mobile telephone systems, major problems and tools available. The mobile radio environment: fading and propagation loss, propagation loss prediction, channel and signal models, fading statistics, classification of fading channels. Methods of reducing fading effects: diversity techniques and diversity combining methods. Signaling over fading channels. Frequency reuse schemes: cellular concept, mobile radio interference, FDMA, TDMA, and spread spectrum techniques. Portable systems, air-to-ground systems, and land mobile/satellite systems, processing. 
Prerequisite(s): Electrical Engineering 571 or equivalent.

Electrical Engineering 675 3 units; H(3-0)  
Digital Communications  
Prerequisite(s): Electrical Engineering 571 or equivalent.

Electrical Engineering 677 3 units; H(3-0)  
Information Theory Applied to Digital Communications  
Understanding of the digital communication link in a noisy channel with distortion. Fundamentals of information theory applicable to the statistical signal processing of digital communication receivers, presented in depth that will provide insights into optimum receiver architecture, processing and error coding. Capacity analysis of SISO and MIMO multiple antenna communication systems as well as other forms derived within the framework of information theory.

Prerequisite(s): Electrical Engineering 675 or equivalent.

Electrical Engineering 679 3 units; H(3-0)  
(formally Electrical Engineering 619.60)  
Digital Video Processing  
Fundamentals of digital video representation, filtering and compression, including popular algorithms for 2-D and 3-D motion estimation, object tracking, frame rate conversion, deinterlacing, image enhancement, and the emerging international standards for image and video compression, with such applications as digital TV, web-based multimedia, videoconferencing, videophone and mobile image communications. 
Prerequisite(s): At least one undergraduate-level course in Signal Processing.

Electrical Engineering 681 3 units; H(3-0)  
(formally Electrical Engineering 619.76 and 619.82)  
VLSI and SOC  
Timing and power models; Issues in BIST for SOC; System and Circuit Optimization for SOC applications using compiler techniques; System-on-a-chip design methodology; Topics in Architectural low-power techniques; Design methodology for embedded architectures; Advanced architectures for image/video/speech/audio/Internet/wireless applications; Topics in algorithm/architecture design under timing and throughput constraints. 
Prerequisite(s): At least one undergraduate-level course in Microelectronics or VLSI.

Electrical Engineering 683 3 units; H(3-0)  
(formally Electrical Engineering 619.19)  
Algorithms for VLSI Physical Design Automation  
Aspects of physical design including: VLSI design cycle, fabrication processes for VLSI devices, basic data structures and algorithms, partitioning, floor planning, placement and routing.

Electrical Engineering 685 3 units; H(3-1)  
(formally Electrical Engineering 619.64)  
Software Defined Radio Systems  
Advanced design aspects related to the design of Software Defined Radio (SDR) Systems applicable to wireless and satellite communication systems. System level modelling and baseband design aspects of SDR systems. Transmitter and receiver architectures appropriate for SDR transceivers. Multi-band transmitters, sub-sampling receivers and six-port based receivers. Design strategies and calibration techniques for SDR systems. 
Prerequisite(s): Engineering 574 or equivalent, or the consent of the Instructor. 
Antirequisite(s): Credit for both Electrical Engineering 641 and 619.64 will not be allowed.

Electrical Engineering 687 3 units; H(3-0)  
Switch Mode Power Converters  
Design and analysis of dc-to-dc and ac-to-ac single-phase power converters. Device characteristics. Dc-to-dc topologies, dc-to-ac topologies and ac-to-ac topologies. Linearized models. Classical feedback control; introduction to state-space analysis methods. Input harmonic analysis, output harmonic analysis, and techniques to obtain unity input power factor.

Electrical Engineering 691 3 units; H(3-0)  
Integrated Micro and Nanotechnology Sensory Systems  
Integrated circuits for sensing. The physical process of sensing photons and ions. The circuitry of signal amplification. Considerations for integrated circuit implementation. Solid state sensors and development in CMOS technology. Analog to Digital conversion in sensory arrays. Technology scaling and impact. Low voltage and implications regarding signal processing. Other types of sensors such as pH sensing. MEMS technology and applications. Integrated Light sources. System examples. 
Antirequisite(s): Credit for both Electrical Engineering 691 and 619.25 will not be allowed.

Electrical Engineering 693 3 units; H(3-0)  
Restructured Electricity Markets  
Market design and auction mechanisms, role of independent system operator (ISO) in different markets, generation scheduling in deregulation, transmission operation and pricing. Transmission rights, procurement and pricing ancillary services, system security in deregulation, and resource management in a market environment. 
Antirequisite(s): Credit for both Electrical Engineering 693 and 619.98 will not be allowed.

Electrical Engineering 695 3 units; H(3-11)  
Applied Mathematics for Electrical Engineers  
Understanding of vector spaces and function spaces; eigenvalues and eigenvectors in both the linear algebraic and differential equation sense;
special functions in mathematics; advanced methods for solutions of differential equations.

**Prerequisite(s):** Electrical Engineering 327 or equivalent.

**Antirequisite(s):** Credit for both Electrical Engineering 695 and either of 519.42 or 619.95 will not be allowed.

**Electrical Engineering 697** 3 units; H(3-2)

**Digital Image Processing**
Image formation and visual perceptual processing. Digital image representation. Two dimensional Fourier transform analysis. Image enhancement and restoration. Selected topics from: image reconstruction from projections; image segmentation and analysis; image coding for data compression and transmission; introduction to image understanding and computer vision. Case studies from current applications and research.

**Prerequisite(s):** Electrical Engineering 327 or equivalent.

**Electrical Engineering 698** 6 units; F(0-4)

**Graduate Project**
Individual project in the student’s area of specialization under the guidance of the student’s supervisor.

**Note:** Open only to students in the MEng Courses Only Route.

**Electrical Engineering 699** 3 units; H(3-0)

**Multidimensional Signal Processing**

---

**Energy and Environmental Systems EESS**

**Graduate Courses**

**Energy and Environmental Systems 603** 3 units; H(1-3T)

**Project Course**
Projects are applied interdisciplinary problem-solving courses in which students work as leaders or as members of project teams. Most course time is devoted to project management and presentations from students. The project course gives students experience working on weakly-structured, real-world problems that require teamwork and contributions from diverse disciplines. They are co-managed by students and faculty advisors and should be responsive to an external "client" or expert panel. Problem areas are abstracted from local, provincial and national situations and involve the interaction of energy systems, the environment and public policy. Oral and written presentations concerning the results of project studies are required.

**Prerequisite(s):** Graduate standing in Energy and Environmental Systems specialization or instructor permission.

**Electrical Engineering 696** 3 units; H(3-0)

**Graduate Project**
Individual project in the student’s area of specialization under the guidance of the student’s supervisor.

**Note:** Open only to students in the MEng Courses Only Route.

**Electrical Engineering 699** 3 units; H(3-0)

**Multidimensional Signal Processing**

---

**Energy and Environmental Systems EESS**

**Graduate Courses**

**Energy and Environmental Systems 606** (formerly Energy and Environmental Systems 605) 3 units; H(2S-0)

**Graduate Seminar**
The graduate research seminar fosters the development of presentation and communication skills as well as engagement in critical analysis and debate. Course time is primarily research presentations by faculty, research staff and students. All students must present their work.

**Prerequisite(s):** Graduate standing in Energy and Environmental Systems specialization or instructor permission.

**Energy and Environmental Systems 607** 3 units; H(3-0)

**Tools for Systems Analysis**
This course provides an introduction to analytical methods and software tools that are most frequently used for research in energy and environmental systems. Analytical methods include risk, uncertainty and decision analysis; an introduction to environmental economics; and an introduction to tools for environmental modelling. Software tools include Excel, and extensions such as Crystalball, general purpose systems such as Matlab and Mathematica; and GIS tools for non-specialists.

**Prerequisite(s):** Graduate standing in Energy and Environmental Systems specialization or instructor permission.

**Energy and Environmental Systems 619** 3 units; H(3-0)

**Special Topics**
Students will be provided with the opportunity to focus on advanced studies in specialized topics pertaining to energy system engineering, law, public policy or economics, or a combination of these issues.

**Prerequisite(s):** Graduate standing in the Energy and Environmental Systems specialization or instructor permission.

**MAY BE REPEATED FOR CREDIT**

---

**English ENGL**

**Graduate Courses**

**English 603** 3 units; H(3-0)

**Studies in Genre**

**MAY BE REPEATED FOR CREDIT**

**English 605** 3 units; H(3-0)

**Studies in National or International Literatures**

**MAY BE REPEATED FOR CREDIT**

**English 607** 3 units; H(3-0)

**Theoretical and Cultural Studies**

**MAY BE REPEATED FOR CREDIT**

**English 609** 3 units; H(3-0)

**Studies in a Literary Period**

**MAY BE REPEATED FOR CREDIT**

**English 612** 6 units; F(3-0)

**Studies in Medieval and Renaissance Literature**

**MAY BE REPEATED FOR CREDIT**

**English 618** 6 units; F(3-0)

**Studies in Restoration and Eighteenth-Century Literature**

**MAY BE REPEATED FOR CREDIT**

**English 676** 6 units; F(3-0)

**Studies in Canadian Literature**

**MAY BE REPEATED FOR CREDIT**

**English 684** 6 units; F(3-0)

**Studies in Literary Criticism**

**MAY BE REPEATED FOR CREDIT**

**English 691** 3 units; H(3S-0)

**Special Topics**

**MAY BE REPEATED FOR CREDIT**

**English 693** 3 units; H(3-0)

**Studies in Creative Writing: Poetry**
A close examination and discussion of the student’s own work, with emphasis on advanced technique.

**Prerequisite(s):** Consent of the Department.

**Note:** One month before the class begins, prospective students must submit a portfolio of their own work for evaluation before consent to register for this course will be given. Details of this procedure are available from the Department of English.

**MAY BE REPEATED FOR CREDIT**
Courses of Instruction

English 694  3 units; H(3-0)

Studies in Creative Writing: Prose Fiction
A close examination and discussion of the student’s own work, with emphasis on advanced technique.
Prerequisite(s): Consent of the Department.
Note: One month before the class begins, prospective students must submit a portfolio of their own work for evaluation before consent to register for this course will be given. Details of this procedure are available from the Department of English.
MAY BE REPEATED FOR CREDIT

English 695  3 units; H(3-0)

Studies in Creative Writing: Creative Non-Fiction
A close examination and discussion of the student’s own work, with emphasis on advanced technique.
Prerequisite(s): Consent of the Department.
Note: One month before the class begins, prospective students must submit a portfolio of their own work for evaluation before consent to register for this course will be given. Details of this procedure are available from the Department of English.
MAY BE REPEATED FOR CREDIT

English 696  6 units; F(1-0)

Studies in Bibliography, Research Methods, and Palaeography
Note: Required of all graduate students who have not had an equivalent course.
NOT INCLUDED IN GPA

English 698  6 units; F(1-0)

Studies in Creative Writing
A close examination and discussion of the student’s own work, with emphasis on advanced technique.
Note: By mid-August, prospective students must submit a portfolio of their own work for evaluation before consent to register for this course will be given. Details of this procedure are available from the Department of English.
MAY BE REPEATED FOR CREDIT

English 701  3 units; H(1-0)

Major Field
Note: Required of all doctoral students.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

English 703  3 units; H(1-0)

Minor Field
Note: Required of all doctoral students.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

English 710  3 units; H(1-0)

Capstone Project
Prerequisite(s): Consent of the Department.
Note: Restricted to and required of all Master of Arts (nine year project-based) students. By June 1, students must submit a topic proposal to the Graduate Program Director for approval. Details of this procedure are available from the Department of English.
NOT INCLUDED IN GPA

Entrepreneurship and Innovation ENTI
Instruction offered by members of the Haskayne School of Business. Entrepreneurship and Innovation Chairperson — TBD

Graduate Courses

Entrepreneurship and Innovation 781  3 units; H(3-0)

Introduction to Entrepreneurship
An experience-based course covering the prestart-up stage of business development through group projects and case studies designed to provide experience-based skill development in creativity, idea generation, and feasibility analysis.

Entrepreneurship and Innovation 783  3 units; H(3-1)

Opportunity Development
A project- and case-based course designed to explore concepts of opportunity development.

Entrepreneurship and Innovation 785  3 units; H(3-0)

Venture Development
A project-based course designed around the formation of business concepts in the formalization of a business plan.

Entrepreneurship and Innovation 787  3 units; H(3-0)

Applied Business Analysis
Approaches to advising new and existing ventures on effective venture development. Projects will involve the student conducting analysis of several ventures and providing advice to them.
Prerequisite(s): Marketing 601 or consent of the Haskayne School of Business.

Entrepreneurship and Innovation 791  3 units; H(3-0)

Technology Commercialization
The process of taking a technology product or service from development to the market, including market strategies, finding investors and potential early customers, the role of advisors, legal issues and the importance of the exit strategy for founders and early stage investors. Students will be required to complete a major project to write a feasibility study for a new technology or a case study of a successful technology venture.

Entrepreneurship and Innovation 793  3 units; H(3-0)

(formerly Entrepreneurship and Innovation 799.01)

Technology and Innovation Management
The dynamics of innovation as the primary driving force within firms and modern industrialized economies. Potential concepts are: incremental versus radical innovations, market-pull versus technology-push theories, dominant designs, technological trajectories, key factors for successful innovation. The emergence of new technologies; the importance of national and regional innovation systems; the role of science, regulations and social pressure in innovations dynamics; knowledge management; and implications for firms in rapidly changing industrial settings may be discussed.

Entrepreneurship and Innovation 797  3 units; H(SS-0)

Advanced Seminar in Venture Development
797.02. Strategic Legal Planning for New Ventures
Prerequisite(s): Consent of the Haskayne School of Business.

Entrepreneurship and Innovation 799  3 units; H(SS-0)

Doctoral Seminars in Venture Development
799.01. Entrepreneurship: The State of the Art
799.02. Conceptual Models and Theories of New Venture Development
799.03. Special Topics in Entrepreneurship and Innovation
799.04. Advanced Topics in Entrepreneurship

Environmental Design EVDS

Environmental Design 601  3 units; H(3-0)
(architectural studies 483)

Conceptual Bases of Environmental Design
Conceptual frameworks in Environmental Design and theories related to design and environment that influence environmental design thinking and practice.
Antirequisite(s): Credit for both Environmental Design 601 and Architectural Studies 483 will not be allowed.
Note: Students are strongly encouraged to complete Environmental Design 601 prior to entering their second registration year.

Environmental Design 603  3 units; H(0-8)

Studio I - Design Thinking
Foundation concepts in design and form making involving a sequence of progress skill building, visual and spatial thinking and problem solving exercises.
Antirequisite(s): Credit for Environmental Design 603 and Environmental Design Architecture 580 will not be allowed.

Environmental Design 616  3 units; H(3-0)

Urban Infrastructure and Land Use
Acquaints students with the key infrastructure systems of a city. Examines current policies, standards and practices, challenges, and innovations in the following infrastructure sectors: water, sewage, waste management, open space, energy, transportation, and communication. Discusses the relationship between infrastructure systems and land use, and its impacts on quality of life, economic development, spatial structure, and the environment. Emphasis is given to green infrastructure development. The course also examines various financial and institutional frameworks for delivering infrastructure systems, and how they vary across different contexts.
### Courses of Instruction

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Units</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Environmental Design 618</td>
<td>Environmental Design Studio</td>
<td>3 units; H(0-8)</td>
<td>This studio aims to further develop skills in conceptualization and visualization through consideration of urban design issues. It includes documentation and analysis of urban form and process, and explores site planning and design of the public realm. Issues of local and regional identity and sustainability inform the approach of the studio. <strong>Prerequisite(s):</strong> Environmental Design Planning 637 or permission of the instructor.</td>
</tr>
<tr>
<td>Environmental Design 621</td>
<td>Health in the Built Environment</td>
<td>3 units; H(3-0)</td>
<td>Concepts of health in an environmental context; historic approaches to preventive medicine; medical basis of building-related illness; case studies in indoor air quality; strategies for prescription and design of healthy indoor environments. <strong>Prerequisite(s):</strong> Environmental Design Planning 621 or Environmental Design Planning 622.</td>
</tr>
<tr>
<td>Environmental Design 622</td>
<td>Real Estate Development and Finance</td>
<td>3 units; H(3-0)</td>
<td>Focuses on the principles of real estate development and finance. Provides hands-on experience through real-world simulations and case studies. Goal is for students to gain a basic understanding of the planning process in real estate development, including private public partnerships, and development impacts. Introduces fundamental tools for conducting an economic and fiscal analysis of real estate proposals. Students will have an opportunity to develop a pro forma as part of a risk assessment. Other topics include the use of GIS for location studies and market assessment. <strong>Prerequisite(s):</strong> Environmental Design Planning 621 or Environmental Design Planning 622.</td>
</tr>
<tr>
<td>Environmental Design 623</td>
<td>Regional Planning Studio</td>
<td>3 units; H(0-8)</td>
<td>A regional overview of the history and theory of regional planning and an overview of regional planning institutional frameworks and issues in a Canadian regional planning context. Understanding current regional planning issues and institutional, legislative and policy frameworks in a Canadian land use planning context related to growth management, resource extraction, infrastructure and services, transportation, strategic planning, water and airshed management. A review and examination of regional land use planning and policy tools and role of regional planners in inter-jurisdictional and transboundary government and public-private stakeholder engagement mechanisms. Preparation of a plan. <strong>Prerequisite(s):</strong> Environmental Design Planning 637 or permission of the instructor.</td>
</tr>
<tr>
<td>Environmental Design 624</td>
<td>Impact Assessment and Risk Management</td>
<td>3 units; H(3-0)</td>
<td>EIA is the process of identifying, predicting, evaluating and mitigating the effects of development proposals prior to major decision-making. Biophysical, economic and social impact assessment will be reviewed in an integrated, interdisciplinary approach which will include lectures, studies of methodologies, theory and practical problems, and discourse with practitioners. Federal and various Provincial impact assessment policies and procedures will be critically analysed. <strong>Prerequisite(s):</strong> Environmental Design Planning 624 or Environmental Design Planning 622.</td>
</tr>
<tr>
<td>Environmental Design 628</td>
<td>Housing and Neighbourhood Change</td>
<td>3 units; H(3-0)</td>
<td>Considers urban growth management, affordable housing, suburban growth and inner-city redevelopment, current suburban development patterns, as well current municipal goals regarding density and intensification and precedents/best practices. Theoretical understanding and practical insights into these issues through assessment of the social, economic, and spatial aspects related to housing and neighbourhood change. <strong>Environmental Design 643 Field Studies</strong></td>
</tr>
<tr>
<td>Environmental Design 671</td>
<td>Urban Design Theory</td>
<td>3 units; H(3-0)</td>
<td>Intended to provide students with an introduction to theories, concepts, methods and contemporary issues in urban design. The course consists of lectures, case studies, seminars and short projects. <strong>Prerequisite(s):</strong> Open only to students in Environmental Design degree programs.</td>
</tr>
<tr>
<td>Environmental Design 675</td>
<td>Urban Systems</td>
<td>3 units; H(3-0)</td>
<td>Provides a general overview of urban history, development and planning traditions. Lecture and field studies give a chronological overview of urban, architectural and design history and the inter-relation to political programs, economic and strategic planning as well as cultural nationalism. The course will extract a number of more general issues about contemporary cities for debate. <strong>Prerequisite(s):</strong> Open only to students in Environmental Design degree programs. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>
<tr>
<td>Environmental Design 683</td>
<td>Advanced Special Topics in Environmental Design</td>
<td>3 units; H(3-0)</td>
<td>In-depth inquiry and design related to environmental design topics. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>
<tr>
<td>Environmental Design 697</td>
<td>Advanced Special Topics in Environmental Design</td>
<td>1.5 units; Q(3-0)</td>
<td>Thematic inquiry and design related to environmental design topics. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>
<tr>
<td>Environmental Design 703</td>
<td>Directed Study in Environmental Design</td>
<td>1.5 units; Q(0-3)</td>
<td>Thematic research, readings or design studio project related to environmental design topics. <strong>Prerequisite(s):</strong> Consent of the Faculty. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>
<tr>
<td>Environmental Design 711</td>
<td>Theoretical Basis for Interdisciplinary Intervention and Design</td>
<td>3 units; H(0-8)</td>
<td>Comparisons and contrasts among disciplinary, multidisciplinary and interdisciplinary intervention and research. Focus on interdisciplinary teamwork knowledge and skills, on the ability to integrate research into professional real world contexts and on the ability to communicate research results effectively. This course is open only to students registered in a PhD program. <strong>Prerequisite(s):</strong> Consent of the Faculty. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>
<tr>
<td>Environmental Design 723</td>
<td>Interdisciplinary Intervention in Environmental Design</td>
<td>3 units; H(0-6)</td>
<td>Interdisciplinary teams will tackle client-based real world environmental design problems. Intervention strategies and design as a problem-solving approach to complex urban, ecological, social, and technological interactions will be addressed. 723.02. Sustainable Futures and Planning Scenarios 723.03. People and Technology</td>
</tr>
<tr>
<td>Environmental Design 793</td>
<td>Directed Study in Environmental Design</td>
<td>3 units; H(0-8)</td>
<td>Thematic research, readings or design studio project related to environmental design topics. <strong>Prerequisite(s):</strong> Consent of the Faculty. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>
<tr>
<td>Workshop in Environmental Design</td>
<td>3 units; H(0-8)</td>
<td>Instruction and supervised experience in the use of tools and equipment for the development of study models, prototypes and graphic material related to student projects. <strong>Prerequisite(s):</strong> Consent of the Faculty. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
<td></td>
</tr>
<tr>
<td>Environmental Design 797</td>
<td>Preceptorship</td>
<td>3 units; H(3-0)</td>
<td>A preceptorship is a study and training arrangement made between a student and an employer or an equivalent supervisor which has specific educational objectives, a method of evaluation and is an integral part of a student's Program of Studies. Preceptorships offer a number of benefits: acquiring skills and knowledge which may be better obtained outside the University; developing first-hand experience of professional design practice; preparing for more focused studies in the Faculty; and conducting research. <strong>Prerequisite(s):</strong> Consent of the Faculty. <strong>MAY BE REPEATED FOR CREDIT</strong></td>
</tr>

Application of building science principles to building structure and enclo-
Courses of Instruction

Environmental Design Architecture 613 3 units; H(3-0)

Structures for Architects I
Fundamentals of Structural Analysis including: the characteristics and performance of the various components of structures; the terminology and notation necessary for effective teamwork with structural engineering consultants; and basic design calculations for simple structures.

Environmental Design Architecture 615 1.5 units; Q(3-0)

Environmental Control Systems
Approaches to the design of heating, cooling, and ventilation systems for buildings. Issues in system design such as energy efficiency and indoor air quality.

Environmental Design Architecture 617 1.5 units; Q(3-0)

Architectural Lighting Design
Fundamentals of light and visual perception. Approaches to the design of non-uniform and uniform lighting systems for buildings. Issues in system design such as human satisfaction and performance and energy efficiency. Development of skills in the selection and design of lighting systems.

Environmental Design Architecture 619 3 units; H(3-0)

Structures for Architects II
Advanced structural systems for buildings including: structural connections and composite structures; system characteristics and architectural intent; and case studies in contemporary building structures.

Environmental Design Architecture 621 3 units; H(3-0)

Introduction to Design Theories
The contemporary cultural, social, and philosophical arena in which architecture exists are examined through lectures, readings and seminars.

Environmental Design Architecture 661 3 units; H(3-0)

Architectural Professional Practice I
The nature of the building industry, stakeholders and many of the participants and their responsibilities. Brings together the theoretical framework of the architect’s role in society with the practicality of managing a practice. Project management and office administration, trends, liabilities and systems for project control such as building economics; cost analysis and estimating techniques; and cost controls during design and construction.

Environmental Design Architecture 663 3 units; H(3-0)

Architectural Professional Practice II
An overview of the structure, organization and changing roles of the design professions through history with emphasis on emerging patterns of practice. The procedures, constraints and opportunities of practice in its legal, ethical and technical dimensions will be examined using a case study method.

Environmental Design Architecture 682 6 units; F(0-8)

Intermediate Architectural Design Studio
An intermediate design studio in which students work on projects defined by the instructor. Topics may vary from year to year. They are determined by the creative interests of the faculty assigned to the course. Enrolment may be limited.

682.02 Intermediate Studio

Note: Environmental Design Architecture 682.02 and 682.04 must be successfully completed in numerical order.

Environmental Design Architecture 703 3 units; H(0-3)

Directed Study in Architecture
Research and readings in architecture and design related to the Senior Research Studio in Architecture.

MAY BE REPEATED FOR CREDIT

Environmental Design Architecture 782 6 units; F(0-8)

Senior Research Studio in Architecture
A research design studio in which students collaborate with design faculty in exploring projects that engage contemporary issues defining the built and natural environments.

MAY BE REPEATED FOR CREDIT

Environmental Design Planning EVDP

Introduction offered by members of the Faculty of Environmental Design.

Environmental Design Planning courses are only open to students in the Master of Planning program or with consent of the Instructor.

Graduate Courses

Environmental Design Planning 602 3 units; H(2-2)
(formerly Environmental Design 602)

Computer Modelling for Urban Design
Introduction to the use of computer modelling, animation and virtual reality in urban design. Professional CAD and rendering applications will be used to explore the aesthetic and technical aspects of design. Emphasis given to developing sensitivity to the application appropriate to communicating three dimensional urban and natural form using computer generated images.

Environmental Design Planning 611 3 units; H(2-2)
(formerly Environmental Design 611)

Geographic Information Systems for Environmental Design
Introduction to the use of GIS in urban planning and environmental management. GIS modeling focusing on population projection, location theory, land use modelling and environmental and ecological management. Case studies from both the public and private sector provide the basis of assignments. Emphasis given to developing sensitivity to the application appropriate for specific GIS problems.

Environmental Design Planning 621 3 units; H(3-0)

Professional Planning Practice
Considers various plans, policies, regulatory processes, legal institutions and administrative frameworks involved in urban and regional planning. Examines the role of planners in municipal development processes related to land use re-designations, development permits, subdivision and appeals. Discusses professional planning issues including ethics, relationships with clients, the public, and other professions. Discusses practice options for graduates including professional certification/registration.

Environmental Design Planning 625 3 units; H(0-8)

Site Planning Studio
Introduction to urban design practice. Emphasizes sense of place, human behavior/built from relationships and sustainability. Completion of a series of progressively complex site planning projects. Skills development in hand and computer-aided drawing to describe, document and analyze urban form and processes and to develop physical plans.

Environmental Design Planning 626 3 units; H(4-4)
(formerly Environmental Design 626)

Landscape Ecology and Planning
Key concepts in ecology, landscape ecology and environmental science relevant to planning at landscape scales. Principles of urban ecology, regional landscape ecology, watershed management and parks and protected area design are coupled with knowledge of landscape processes, ecosystem services, ecological infrastructure, and habitat to assess planning interventions in the built and natural environments. Skills are developed in geographic information systems (GIS) for monitoring the current state of landscapes and potential challenges to landscape function and for proposing solutions to these challenges. Includes guest speakers from government and industry, GIS exercises and field visits to various areas within the region.

Environmental Design Planning 627 3 units; H(3-0)

Planning History and Theory
An overview of key principles and theories, and contemporary issues and tools of participation and public engagement as it applies to planning. Consideration of public engagement, facilitation, negotiation and conflict resolution processes from the point of view of community activists, city planners, developers and planning/design professionals. Development and implementation of public engagement plans.

Environmental Design Planning 631 3 units; H(3-0)

Planning and Public Engagement
An overview of key principles and theories, and contemporary issues and tools of participation and public engagement as it applies to planning. Consideration of public engagement, facilitation, negotiation and conflict resolution processes from the point of view of community activists, city planners, developers and planning/design professionals. Development and implementation of public engagement plans.

Environmental Design Planning 633 3 units; H(3-1)

Project Management for Planners
Principles, techniques and tools of project management. Development, administration, monitoring and evaluation of implementation plans, including financial aspects are discussed. Project risk analysis and management.
Environmental Engineering 601 3 units; H(3-0)

Analytic Methods for Planners
Approaches to identify, gather and critically analyse strategic information needed to assess planning situations and support decision-making. Focuses on both quantitative and qualitative planning methods. Techniques to present information effectively

Environmental Design Planning 637 3 units; H(0-8)

Introduction to land use planning and development issues. Provides a step-by-step introduction to community planning processes and essential planning policies to create development that is economically feasible, socially inclusive and environmentally sustainable.

Prerequisite(s): Environmental Design Planning 625 or equivalent.

Environmental Design Planning 644 6 units; F(0-6)

Advanced Professional Planning Studio
An advanced studio exploring contemporary themes in planning and professional planning practice. Centres on a real world problem or client project; involves analysis, synthesis, and formulation of a planning or design solution. Culminates in a professional report and presentation.

Prerequisite(s): Environmental Design Planning 625, 637 and one of Environmental Design 618 or 623.

Environmental Engineering ENEN

Instruction and services offered by Centre for Environmental Engineering Research & Education (CEERE), Schulich School of Engineering.

Director of CEERE: A.K. Mehrotra

Graduate Courses

Environmental Engineering 601 0.75 units; EI(0-3S)

Research Seminar
Oral presentations consisting of reports on studies of the literature or of current research. Required of all full-time graduate students registered in MSc and PhD degree programs in Environmental Engineering and Energy & Environment (Engineering).

MAY BE REPEATED FOR CREDIT

ENVIRONMENTAL ENGINEERING

Environmental Engineering 603 3 units; H(3-0)

Environmental Engineering 605 3 units; H(3-0)

Environmental Chemistry and Microbiology
Chemistry of organic and inorganic contaminants in the environment. Natural chemical cycles in the biosphere, geosphere, hydrosphere and atmosphere, and consequences of anthropogenic disturbances. Aquatic, atmospheric and soil chemistry. The fate of hazardous, refractory and heavy metal pollutants in the environment. Introductory toxicological chemistry and atmospheric chemistry. Analytical techniques for contaminants in air, water, energy and soil. Introductory microbiology; characteristics and classification of microorganisms, kinetics and mathematical models of microbial growth, applications in environmental engineering. Introduction to ecology.

Environmental Engineering 619 3 units; H(3-0)

Special Topics
New courses on specialized topics relevant to environmental engineering. It may also be offered to doctoral degree students to enable them to pursue advanced studies in particular areas under the direction of a faculty member, which must be arranged and approved prior to registration.

MAY BE REPEATED FOR CREDIT

Environmental Engineering 623 3 units; H(3-0)

Air Dispersion Modelling

Environmental Engineering 625 3 units; H(3-0)

Computational Methods for Environmental Engineering
Taylor series, numerical integration. Linear and non-linear algebraic equations and solvers. Ordinary and partial differential equations. Finite difference methods: explicit, implicit and Crank-Nicholson methods. Finite difference, finite element or finite volume numerical approximations. Initial and boundary value problems. Boundary conditions, discretization considerations, and design of approximations, accuracy and error reduction. Applications in environmental engineering, such as pollutant dispersion and transport, will be discussed.

Antirequisite(s): Credit for Environmental Engineering 625 and any of Chemical Engineering 639, Civil Engineering 743 or Mechanical Engineering 611 will not be allowed.

Environmental Engineering 627 3 units; H(3-0)

Contaminant Transport

Environmental Engineering 631 3 units; H(3-0)

Spatial Statistics for Environmental Modelling
Spatial statistics for topological, geometric and geographic properties. Spatial statistical models for data having an explicit spatial distribution. Basic and advanced methods in geo-spatial statistics. Spatial models for simulation and spatial inferential statistics for point, line and region. All levels (from visual to analytical) of possible spatial analysis techniques are examined for each type of variable and applications in environmental modelling are used to illustrate the concepts.

Environmental Engineering 633 3 units; H(3-0)

Fuzzy Logic for Environmental Engineering
Complex, non-linear, or ambiguous system models. Fuzzy set theory, fuzzy logic operations, fuzzification and de-fuzzification. Development of membership functions, fuzzy system simulation, Rule-based reduction methods, Fuzzy classification and pattern recognition, Fuzzy arithmetic and extension principle. Fuzzy Control and Fuzzy cognitive mapping, applications in environmental engineering.

Environmental Engineering 635 3 units; H(2-2) (Geomatics Engineering 583)

Environmental Engineering 644 3 units; H(0-8) (Geomatics Engineering 637)

Earth Observation for the Environment
An introduction to environmental earth observation systems in particular to satellite platforms. Topics include: discussion of physical principles; imaging system geometries; radiometric corrections, including calibration and atmospheric correction; spatial filtering for noise removal and information extraction; geometric corrections, including rectification and registration; fusion of multi-dimensional datasets; and application of satellite images in addressing selected environmental issues.

Antirequisite(s): Credit for Environmental Engineering 644 and Geomatics Engineering 637 or 655 will not be allowed.

Environmental Engineering 641 3 units; H(3-0) (Chemical Engineering 643)

Air Pollution Control Engineering
Introduction to air quality and air pollution. Energy and air pollution. Fossil fuel combustion and related air pollution. Industrial air pollution control. Control of particulate matter. Control of VOCs, SOx, and NOx. Adsorption, absorption and biofiltration of air pollutants. GHG emission control. Recent advanced on related topics.

Antirequisite(s): Credit for Environmental Engineering 641 and Chemical Engineering 643 will not be allowed.
Courses of Instruction

Environmental Engineering 643 3 units; H(3-0)

Air Pollutant Sampling and Characterization

Environmental Engineering 651 3 units; H(3-0)

Advanced Topics in Solid Waste Engineering

Environmental Engineering 653 3 units; H(3-0)

Biological Processes for Wastewater Treatment
Specialized biological wastewater treatment processes for removal of impurities not effectively removed by conventional secondary wastewater treatment systems, such as nutrients (e.g. nitrogen and phosphorus), residual organics, residual solids, bacteria and viruses. Wetlands, Activated sludge modelling. Biological nutrient removal. Sludge management. Disinfection. Antirequisite(s): Credit for Environmental Engineering 663 and Civil Engineering 741 will not be allowed.

Environmental Engineering 665 3 units; H(3-0) (Chemical Engineering 665)

Wastewater Issues for the Oil and Gas Industry

Antirequisite(s): Credit for Environmental Engineering 665 and Chemical Engineering 665 will not be allowed.

Environmental Engineering 671 3 units; H(3-0)

Energy and Environment
Introduction to formation, extraction, transportation and conversion of fossil fuels; electricity generation, transmission and distribution; thermal power and cogeneration; nuclear power; renewable energy sources; energy efficiency and conservation; energy analysis; greenhouse gas emissions; air, land and water pollution and their mitigation.

Antirequisite(s): Credit for Environmental Engineering 663 and Chemical Engineering 665 will not be allowed.

Environmental Engineering 673 3 units; H(3-0) (Mechanical Engineering 637)

Thermal Systems Analysis
Fundamentals of thermodynamics, fluid mechanics and heat transfer; thermal and energy systems, heat exchangers, co-generation; Second law of thermodynamics and concept of entropy generation and thermo-economics; Environmental issues and pollution control; Renewable energy systems; Co-generation design; Heat exchanger design; Energy storage systems; Optimization process.

Prerequisite(s): Engineering 311 or equivalent

Antirequisite(s): Credit for Environmental Engineering 673 and Mechanical Engineering 637 will not be allowed.

Environmental Engineering 681 3 units; H(0-6)

Project in Environmental Engineering I
A one-term half-course which allows course-based MEng degree students with the opportunity of pursuing advanced studies or a design project in environmental engineering under the direction of one or more faculty members, which must be arranged and approved prior to registration. A written proposal, progress reports, and a final report are required.

Antirequisite(s): Credit for Environmental Engineering 681 and 682 will not be allowed.

Note: Available to course-based MEng degree students only. Cannot be taken following the completion of Environmental Engineering 681.

Environmental Engineering 693 3 units; H(3-0)

Environmental Policy Analysis
An examination of the policy tools used in decision-making related to the environment, the course aims to facilitate dialogue between political scientists and engineers. Topics include: risk analysis; decision analysis; uncertainty assessment; and benefit-cost analysis. The structure and evolution of environmental regulation will be used as a theme with an emphasis on energy.

Antirequisite(s): Credit for Environmental Engineering 691 and Political Science 755.31 will not be allowed.

Environmental Engineering 693 3 units; H(3-0)

Life Cycle Assessment
Concepts of life cycle assessment. Consideration of environmental and economic impacts from the extraction of resources to the disposal of unwanted residuals. Review and evaluation of tools and frameworks (e.g. process, input-output, hybrid life cycle assessment). Relative merits of various methods for interpreting and valuing the impacts. Examples of applications in environmental engineering and the energy industry.

Antirequisite(s): Credit for Environmental Engineering 693 and 683.85 will not be allowed.

Graduate Courses

Finance 601 3 units; H(3-0)

Managerial Finance
The major decision-making areas confronting modern financial managers today. Provides a general understanding of financial markets and how they can be used for personal finance. Covers traditional subjects such as capital budgeting, net present value, risk/return, capital structure and dividend policy. Topical areas covered are IPOs, mergers and acquisitions, derivatives and options. The course is integrated with current events from the financial world.

Prerequisite(s): Accounting 601.

Finance 745 3 units; H(3-0)

Futures and Options
After presenting basic definitions, institutional details, and strategies, a general theory of derivative pricing based on the principle of No Arbitrage will be developed. This theory will then be applied to the basic derivative contracts (futures, forwards, put options and call option) as well as exotic options. Using the binomial model, as well as the continuous time model of Black Scholes, hedging and replication will also be examined.

Prerequisite(s): Finance 601.

**Courses of Instruction**

**Advanced Topics in Financial Administration**  
Classical and contemporary topics in the theory and practice of financial management including capital structure, cost of capital, real options valuation, bankruptcy costs and debt holder-equity holder conflicts, corporate financial strategy, managerial incentives and financial decisions, information conveyed by financial decisions, and mergers and acquisitions.

Prerequisite(s): Finance 601.

**Problems in Financial Management**  
The application of financial management principles to actual problems mainly in the corporate sector, including such areas as working capital, management, short, intermediate and long-term financing problems, dividend policy and reorganization.

Prerequisite(s): Finance 601.

**Management of Financial Institutions**  
Financial intermediaries such as banking and brokerage. Explains the risks faced by institutions and the integration through modern financial markets. Covers issues such as lending, trading, securitization, deposit insurance and the regulatory environment. Concludes with modern bank management from the shareholder value point of view.

Prerequisite(s): Finance 601.

**Investment and Portfolio Management**  
Theory and analysis of investment and portfolio management decisions. Evaluation of performance of individual and professional investors and portfolio managers.

Prerequisite(s): Finance 601.

**Mergers and Acquisitions**  
A study of economic theory and practical issues around takeover strategies, and takeover defence strategies. Valuation issues, corporate restructuring, corporate governance, and methods of ensuring congruence between management and shareholder goals are also discussed.

Prerequisite(s): Finance 601.

**Financial Risk Management**  
A framework for evaluating financial risks and managing them with the use of financial securities including derivatives. Includes firm valuation with risk management, value-at-risk, testing financial models, optimal hedging strategies, energy risk management, market risk, static versus dynamic strategies, interest rate risk, credit risk and liquidity risk. Case analysis of financial disasters due to risk management failures.

Prerequisite(s): Finance 601.

**New Venture Finance**  

Prerequisite(s): Finance 601 or consent of the Haskayne School of Business.

**Seminar in Financial Management**  
Intensive study and discussion of current literature and research with respect to selected, advanced topics in Finance.

MAY BE REPEATED FOR CREDIT

Prerequisite(s): Finance 601.

**International Finance**  
A study of the international financial environment and the issues firms face when operating in this environment. Currency regimes, currency crises, balance of payments, exchange rate and interest rate parity conditions, supranational agencies, political risks, management of foreign exchange exposure are some of the major topics studied.

Prerequisite(s): Finance 601.

**Advanced Seminar in Finance**  
Prerequisite(s): Consent of the Haskayne School of Business.

MAY BE REPEATED FOR CREDIT

**PhD Course**

- **Doctoral Seminars in Finance**
  - Finance 799.01. Theory of Finance
  - Finance 799.02. Empirical Methods in Finance
  - Finance 799.03. Topics in Finance
  - Finance 799.04. Financial Engineering
  - Finance 799.05 Theory of Corporate Finance
  - Finance 799.06 Asset Pricing
  - Finance 799.07 Topics in Asset Pricing and Corporate Finance

MAY BE REPEATED FOR CREDIT

**French 605**  
Instruction offered by the Faculty of Arts.

**Graduate Courses**

- **Fine Arts 601**  
  Studies at the Banff Centre
  Interdisciplinary fine arts studies. Although the Banff Centre does not provide credit course instruction, students with advanced experience in art, dance, drama or music at the Banff Centre may apply for graduate-level credit from the University of Calgary.

Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

**Topics in Fine Arts: Interdisciplinary Seminar**  
Interdisciplinary seminar in the advanced study and interpretation of the interrelationships between music, the fine arts, and the history of ideas, using a theme-oriented approach.

Note: This is a required course in the PhD program for Music Education, Composition and Musicology.

MAY BE REPEATED FOR CREDIT

**French 607**  
Concentrated instruction in computer applications in the Fine Arts.

Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

**French 609**  
Concentrated instruction in computer applications in the Fine Arts.

**French 625**  
Concentrated instruction in computer applications in the Fine Arts.

**French 635**  
Concentrated instruction in computer applications in the Fine Arts.

**French 639**  
Concentrated instruction in computer applications in the Fine Arts.

**French 655**  
Concentrated instruction in computer applications in the Fine Arts.

**French 699**  
Concentrated instruction in computer applications in the Fine Arts.

**French 753**  
Concentrated instruction in computer applications in the Fine Arts.

**French 755**  
Concentrated instruction in computer applications in the Fine Arts.

**French 759**  
Concentrated instruction in computer applications in the Fine Arts.

**French 765**  
Concentrated instruction in computer applications in the Fine Arts.

**French 767**  
Concentrated instruction in computer applications in the Fine Arts.

**French 785**  
Concentrated instruction in computer applications in the Fine Arts.

**Topics in Multi-Media Research**  
Concentrated instruction in computer applications in the Fine Arts.

Prerequisite(s): Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

**Frangophonies**

**Problématiques littéraires**

MAY BE REPEATED FOR CREDIT

**Problématiques linguistiques**

MAY BE REPEATED FOR CREDIT

**Études cinématographiques**

MAY BE REPEATED FOR CREDIT

**Études théâtrales**

MAY BE REPEATED FOR CREDIT

**Poesie de langue française**

MAY BE REPEATED FOR CREDIT

**Francophonies**

<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 639</td>
<td>3 units; H(3-3)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Advanced Spatial Analysis and Modelling</td>
<td>History of spatial modelling in geography; comprehensive coverages of techniques, spatial analysis and spatial modelling as currently used within GIS and remote sensing.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 647</td>
<td>3 units; H(3-3)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Advanced Research and Applications in Geographic Information Systems</td>
<td>Focus on advanced GIS applications in core areas; methodological developments in GIS, and current research directions in GIS.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 681</td>
<td>3 units; H(3-0)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geographic Information Systems Project: Theoretical Issues</td>
<td>A critical and comprehensive review of information and literature on a GIS research topic. This course provides the conceptual basis for Geography 683.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 683</td>
<td>3 units; H(3-0)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geographic Information Systems Project: Application</td>
<td>Implementation of a project on a GIS topic which will involve demonstrating mastery of GIS project design and the implementation and presentation of results commensurate with graduate-level work. This topic will relate to material covered by the student in Geography 681.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 685</td>
<td>3 units; H(3-0)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Arctic System Science</td>
<td>This course investigates the process linkages at various spatiotemporal scales between the atmosphere, lithosphere and hydrosphere operating within high latitude environments of the Northern Hemisphere. Of particular interest is the response of the terrestrial and marine cryosphere to climate variability and change, including methods for its detection and quantification.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 687</td>
<td>3 units; H(3-3)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Advanced Glacial Geomorphic Systems</td>
<td>Contemporary topics in glacial geomorphology and sedimentology. Course consists of lecture, seminar and field trip components.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 689</td>
<td>3 units; H(3-3)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Advanced Topics in Geocryology</td>
<td>Contemporary topics in the science and engineering of seasonally and perennially frozen ground. Course consists of lectures and seminars.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 691</td>
<td>3 units; H(3-3)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Urban, Regional and Global Political Economy Seminar</td>
<td>Spatial and power relations that shape urban, regional and global processes. Investigation of a wide range of processes, ranging in scale from the local to the global: capital investment and disinvestment; state power and policymaking; planning, governance and governmentality; political struggle, all in multiple forms of spatiality; place, scale, territory, networks.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite(s): Consent of the Department.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Geography 696</td>
<td>3 units; H(3-0)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Seminar in Geographic Research Methods</td>
<td>MAY BE REPEATED FOR CREDIT</td>
<td></td>
<td></td>

</table>
Courses of Instruction

Geography 795 3 units; H(3-0)

Selected Topics in Geographic Research Methods
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Geography 797 3 units; H(3-0)

Selected Topics in Human Geography
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Geography 799 3 units; H(3-0)

Selected Topics in Physical Geography
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Geology GLGY

Instruction offered by members of the Department of Geoscience in the Faculty of Science.
Department Head - C.M. Henderson

Graduate Courses

Geology 601 3 units; H(3-2)

Advanced Physical Hydrogeology
An advanced treatment of topics covered in Geology 401.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for both Geology 601 and 401 will not be allowed.

Geology 605 3 units; H(3-2T)

Groundwater Flow and Transport Modelling
Review of the partial differential equations and boundary conditions that describe groundwater flow and transport. Introduction to numerical methods. The course emphasizes the practical aspects of building groundwater and transport models using computer exercises and a groundwater modelling project.
Prerequisite(s): Geology 401 or 601.

Geology 607 3 units; H(3-0)

Advanced Physical Hydrology
Coverage of more advanced topics in the physical hydrology of surface and subsurface waters including land-atmosphere exchange, vadose zone processes, and watershed hydrology.
Prerequisite(s): Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219 and Geography 415 and Geology 401.

Geology 609 3 units; H(3-3)

Advanced Contaminant Hydrogeology
An advanced treatment of topics covered in Geology 505.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for both Geology 609 and Geology 505 will not be allowed.

Geology 611 3 units; H(2-2)

Groundwater Resource Management
Advanced topics related to groundwater resource development and management, including exploration methods, aquifer test analysis, aquifer-aquitard systems, groundwater recharge, and the role of models. Fundamental issues related to regional integrated management of water resources.
Prerequisite(s): Mathematics 253 or 267 or 277 or 283 or Applied Mathematics 219 and Geology 401 or Geography 415.

Geology 613 3 units; H(3-1T-3)

Flow in Porous Media
Fundamentals of fluid flow in porous media: pore structure, capillarity, single phase flow, immiscible and miscible fluid flow, pore level modelling of porous media. Concepts applied to hydrocarbon reservoirs and fluid migration in soils including: characterization of pore space, single phase flow in porous media, capillarity, wettability, routine and advective core analysis, miscibility in porous media. Similarities and differences between hydrocarbon reservoirs and soils. Introduction to enhanced oil and gas processes.
Prerequisite(s): Chemical Engineering 331 or Geology 401.
Antirequisite(s): Credit for both Geology 613 and either 699.20 or Petroleum Engineering 513 will not be allowed.

Geology 623 3 units; H(3-3)

Modern Diffraction and Scattering Techniques
Space groups and principles of X-ray, neutron, and electron diffraction and their applications. Crystal structure determination and refinement using single crystal and Rietveld methods. X-ray and neutron scattering techniques (using the Pair Distribution Function, PDF) to examine local disorder in nano-materials and glasses. Phase transition and structural evolution with pressure, temperature, and composition. Analyses of experimental data sets and extensive use of computers.
Prerequisite(s): Geology 523 or equivalent.
Note: Offered every alternate Fall Term.

Geology 627 3 units; H(3-3)

Advanced Topics in Ore Deposits
A detailed study of ore occurrences with special emphasis on Canadian deposits. Laboratory: the study of comprehensive suites from deposits.
Prerequisite(s): Geology 527.

Geology 633 3 units; H(3-3)

Advanced Petrologic Methods
Theoretical and applied problems in petrology, including some or all of: numerical techniques in petrology, phase equilibria, geothermometry, and geobarometry, kinetics in petrology, chemistry and physics of magma processes. Laboratory will consist of petrographic study of rock suites.
Prerequisite(s): Geology 543.

Geology 639 3 units; H(160 hours)

Field Laboratory in Groundwater Hydrogeology
Entails a week at a hydrogeology field site in Alberta or British Columbia. Hydrogeology and geotechnical techniques will be demonstrated and will involve hands-on participation by students. After the field work, students will conduct extensive analysis and interpretation of data gathered during the field session, complete exercises and prepare a written report. Relative to Geology 441, Geology 639 requires more sophisticated analyses of data and additional exercises. Geology 639 normally runs for two to three weeks following Winter Term Final Examinations or prior to the Fall Term.
Prerequisite(s): Geology 401 or 601 and consent of the Department.
Antirequisite(s): Credit for both Geology 639 and 441 will not be allowed.

Note: This course has limited enrolment. This course occurs in rugged field conditions and varying weather, for which participants must be prepared and equipped. Students will be required to cover food and accommodation costs, and a supplemental fee will be assessed to cover the costs of equipment and other resources.

Geology 641 3 units; H(3-3)

Advanced Structural Methods
Analysis of mesoscopic and megascopic structural data; the construction and analytical use of cross-sections, subsurface maps and 3-dimensional models; structural analysis of the Canadian Cordillera.
Prerequisite(s): Consent of the Department.
Antirequisite(s): Credit for both Geology 641 and 541 will not be allowed.

Note: There is a weekend field excursion during the term.

Geology 655 3 units; H(3-0)

Unconventional Gas Reservoir Characterization and Evaluation
Overview of the unique storage and production mechanisms associated with coalbed methane, tight gas and shale gas reservoirs; adsorbed gas storage and modelling; gas-in-place determination and volumetric reserves estimation; material balance techniques; fracture and matrix flow mechanisms; completion/stimulation methods; reservoir characterization methods including core analysis, rate-transient and pressure-transient analysis; exploration and development concepts.
Prerequisite(s): Petroleum Engineering 523 or consent of the instructor.
Antirequisite(s): Credit for both Geology 655 and Geology 699.37 will not be allowed.

Geology 663 (Physics 663) 3 units; H(2-1)

Applications of Stable Isotopes
Application of stable isotope techniques with special focus on Hydrogeology, Geology and Environmental Sciences. The use of isotopes to understand the water, carbon, nitrogen and sulphur cycles is demonstrated. Topics include hydrology, paleoclimates, geothermometry, fossil fuels exploration and recovery, pollutant tracing, food webs, forensic investigations, among others.
Prerequisite(s): Consent of the Department.

Geology 675 3 units; H(3-0)

Advanced Topics in Dinosaur Paleontology
Topics related to the paleobiology, paleoecology, and paleoenvironments of the Dinosauria will be covered.
Prerequisite(s): Consent of the Department or enrolment in a paleontology-based graduate program.

Geology 677 3 units; H(3-3)

Advanced Topics in Oil and Gas Production
Advanced study of the problems related to production of conventional oil, heavy oil, and natural gas; analysis of interactions of oil, water and gas; the effects of fluid properties, rock structure and capillary, gravity and viscous forces acting on the reservoir system; application to the design of improved
Geology 707: 3 units; H(2-2)

**Geology and Geophysics of Western Canada**
Topics include stratigraphy, sedimentology, structure, petrology, geophysics and economic geology. Laboratories contain a field component.

**Note:** Open only to graduate students in the Department of Geoscience and compulsory for beginning doctoral students in Geology.

Geology 709: 3 units; H(3S-3)

**Seminars on Applied Basin Studies**
A seminar-based course that will cover topics that consider the development, evolution, stratigraphic and sedimentologic architecture, and stratigraphic correlation of sedimentary basins. Topics could include biostratigraphy, tectonics and sedimentation, subsurface correlation including sequence stratigraphy, siliciclastic and carbonate sedimentology, geochronology and petroleum geology. Concepts will be developed from discussions, assigned reading, seminars and field trips to local geological sites.

**Prerequisite(s):** Graduate student registration in the Department of Geoscience.

Geology 711: 3 units; H(3S-3)

**Seminars on Applied Basin Field Studies**
A seminar-based course that will consider the entire geologic history of a particular basin or sub-basin as well as key sections or geological sites that will be visited at the end of the semester. Topics will range across the full discipline of sedimentary geology with emphasis on applications to Petroleum Geology.

**Prerequisite(s):** Graduate student registration in the Department of Geoscience.

Geology 729: 3 units; H(3-3)

**Sedimentary Geochemistry**
Application of chemical and isotopic data and techniques to the mineral assemblages observed to form during diagenesis. Water-rock interaction is examined using the thermodynamics of solution-mineral-gas equilibria. Topics may include kinetics, reaction path modeling, fluid flow in sedimentary basins and the relationships between fluid flow and diagenetic events.

**Prerequisite(s):** Graduate student registration in the Department of Geoscience.

Geology 733: 3 units; H(3-0)

**Analytical Methods in Petrology**
Topics may include scanning electron microscope, electron probe, x-ray diffraction and x-ray fluorescence.

**Geomatics Engineering ENGO**

Estimation for Navigation
Overview of estimation fundamentals including stochastic processes, covariance matrices, auto-correlation functions, propagation, error propagation, least-squares estimation, summation of normals and sequential least-squares formulation, and role of measurement geometry in least-squares position estimation. Constraints and implementations. Concept of Kalman filtering; relationship between Kalman filtering and least-squares; linear, linearized and extended Kalman filter formulations; system model formulation; process noise model determination; measurement models, and error propagation. Introduction to other estimation techniques including unscented Kalman filters and particle filters. Application of above topics to relevant navigation estimation problems.

**Geomatics Engineering 671** 3 units; H(3-0)

**Participatory Geographic Information Systems (PGIS)**
Introduction of methods to engage in effective dialogue and advocacy through the adoption of Participatory Geographic Information Systems (PGIS). Approaches learned to safeguard culturally sensitive information from external misuse and exploitation; methods to ensure traditional custodians maintain control of their spatial information; methods for producing, geoerferencing and visualizing (indigenous) spatial knowledge that promote peer-to-peer dialogue, and their aspirations and concerns with higher-level authorities. The course will be a workshop forward that incorporates readings and various group exercises to provide students with a road make to undertaking PGIS.

**Geomatics Engineering 620** 3 units; H(2-2)

Inertial Surveying and INS/GPS Integration
Inertial sensors and their application in inertial navigation, existing inertial systems, new developments in strapdown technology. Practical aspects of inertial positioning definition of an operational inertial frame, inertial error models. Effect of inertial sensor errors on the derived navigation parameters, performance characteristics of inertial sensors, calibration of inertial sensors. Mechanization equations in different co-ordinate frames, step by step computation of the navigation parameters from the inertial sensor data introduction to Kal-
Courses of Instruction

Geomatics Engineering 625 3 units; H(3-2)
Advanced GNSS Theory and Applications

Geomatics Engineering 629 3 units; H(3-0)
Advanced Estimation Methods and Analysis

Geomatics Engineering 633 3 units; H(3-0)
Atmospheric Effects on Satellite Navigation Systems
Theoretical and observed aspects of radio wave propagation in the ionosphere and troposphere, with an emphasis on L-band (GPS) signals. Fundamentals of absorption, attenuation, depolarization, and defraction will be covered, in addition to characteristics and physical properties of the propagation medium and atmospheric constituents. The impact of such effects, and methods of mitigation, will be interpreted with respect to satellite navigation applications.

Geomatics Engineering 637 3 units; H(3-0)
Earth Observation for the Environment
Earth Observation for the Environment An introduction to environmental earth observation systems in particular to satellite platforms. Topics include: physical principles, including governing equations; imaging system geometries; radiometric corrections, including calibration and atmospheric correction; spatial filtering for noise removal and information extraction; geometric corrections, including rectification and registration; fusion of multi-dimensional datasets (i.e., multi-spectral, multi-temporal, multi-resolution, and point-source ground data); and application of satellite images in addressing selected environmental issues.

Antirequisite(s): Credit for any of Environmental Engineering 637 or 619.05 and Geomatics Engineering 637 and 655 will not be allowed.

Geomatics Engineering 638 3 units; H(2.5-1)
GNSS Receiver Design
Global Navigation Satellite System signal structure, overview of receiver architecture, measurements, antenna design, receiver front-end, reference oscillator, sampling and quantization, phase lock loops, frequency lock loops and delay lock loops, tracking loop design and errors, signal acquisition and detection, interference effects.

Geomatics Engineering 639 3 units; H(3-0)
Advanced Topics in Digital Image Processing
Review of basic digital imaging; advanced topics in multispectral or hyperspectral analysis, multiresolution analysis, image segmentation, image transform, data fusion, pattern recognition or feature matching; current research applications especially in Geomatics.

Geomatics Engineering 642 3 units; H(3-0)
Optical Imaging Metrology
Optical imaging methods for precise close-range measurement. Photogrammetric techniques with emphasis on the bundle adjustment. Photogrammetric datum definition, network design and quality measures. Principles of laser rangefinding and laser scanning. Imaging distortions, sensor modelling and system self-calibration for a variety of imaging sensors including digital cameras, panoramic cameras, 3D laser scanners and 3D range cameras. Automated point cloud processing methods; registration, modelling and segmentation. Selected case studies.

Geomatics Engineering 645 3 units; H(3-0)
Spatial Databases and Data Mining
Comprehensive overview of spatial database management systems and issues related to spatial data mining. The topics that will be covered include: overview of spatial databases, spatial concepts and data models, spatial query languages, spatial storage and indexing, spatial networks, spatial data mining, and trends in spatial databases.

Geomatics Engineering 658 3 units; H(3-0)
Geocomputation
Overview of the fundamental concepts, approaches, techniques, and applications in the field of Geocomputation. Topics being discussed include Geocomputation Intelligence, Complex Systems theory, Cellular automata modelling, Multi-agent system modelling, Calibration and validation of dynamic models, Scale, Artificial neural network, Data mining and knowledge discovery, Geovisualization, and Post-normal science. Individual projects involving the application of Geocomputational techniques and models are conducted.

Geomatics Engineering 667 3 units; H(3-0)
Advanced Topics in Photogrammetry
Overview of aerial triangulation procedures (strip triangulation, block adjustment of independent models, bundle block adjustment, automatic aerial triangulation, direct versus indirect orientation). Mapping from space (modelling the perspective geometry of line cameras, epipolar geometry for line cameras). Multi-sensor aerial triangulation (integrating aerial and satellite imagery with navigation data). Photogrammetric products (Digital Elevation Models, ortho-photos). The role of features in photogrammetric operations (utilizing road network captured by terrestrial navigation systems in various orientation procedures).

Geomatics Engineering 675 3 units; H(3-0)
Statistical Spatial
Spatial phenomena and spatial processes. Spatial data analysis and the importance of spatial data in scientific research. Methods will range from exploratory spatial data analysis through to recent developments such as nonparametric semivariogram modelling, generalized linear mixed models, estimation and modelling of nonstationary covariances, and spatio-temporal processes.

Geomatics Engineering 681 3 units; H(3-0)
Advanced Global Geophysics and Geodynamics
Elasticity, figure of the Earth, Earth structure and seismology, gravity and its temporal variations; isostasy, tides, Earth rotation and orientation, time, plate flexure, glacial rebound, continental drift, geodetic observation methods for geodynamics.

Geomatics Engineering 693 3 units; H(3-0)
Cadastral Information Systems
Cadastral Systems, cadastral data, land registration, data structures and schemas for land administration information, ISO standards, evolutionary models, land tools, effectiveness metrics.

Geomatics Engineering 694 3 units; H(3-0)
Advanced Topics in Sensor Web and Internet of Things
Overview of the sensor web architecture and algorithms, with a focus on Internet of Things. The topics that will be covered include: sensor web data management, sensor web search and discovery, sensor web server design and implementation, interoperability issues, sensor-based analytics and visualization, introduction to sensor networks, and trends in sensor web and Internet of Things.

Geomatics Engineering 695 3 units; H(3-0)
Participatory GIS
Provides students with an introduction to methods that enable people to engage in effective dialogue and advocacy through the adoption of Participatory GIS. The course will follow a workshop format that incorporates readings and various group exercises to provide students with a road map to undertaking Participatory GIS.

Geomatics Engineering 698 3 units; H(3-8)
Professional Development Seminar
This professional development seminar aims at providing relevant skills to be a successful graduate student and to make a smooth transition to a rewarding professional career. In addition to efficient communication skills, this course will place an emphasis on research methodologies such as formulating research problems, preparing a scholarly application, writing a paper for publication, and defending a thesis. How to prepare for a successful interview in industry or academia and the required process for becoming a professional engineer will also be discussed.

NOT INCLUDED IN GPA

Geomatics Engineering 699 3 units; H(3-0)
Special Studies
Focus on advanced studies in specialized topics. Students may also conduct individual studies under the direction of a faculty member. MAY BE REPEATED FOR CREDIT

Geophysics GOPH
Instruction offered by members of the Department of Geoscience in the Faculty of Science.
Department Head - C.M. Henderson
Graduate Courses
Graduate students are urged to read the Geoscience Department section in the Graduate Studies calendar. Only where appropriate to a student’s
program may graduate credit be received for courses numbered 500-599. Courses numbered 600 are available to fourth-year students who obtain Departmental approval and who have credit for the prerequisite courses.

**Geophysics 645**
3 units; H(3-0)

**Seismic Wave Propagation**
Seismic body and surface waves, reflection, refraction, diffraction, anelasticity, anisotropy, ray methods, point and line source solutions to the equation of motion, finite-difference methods for seismic waves, additional topics depending on current research interests.

**Prerequisite(s):** Geophysics 551.

**Geophysics 653**
3 units; H(3-0)

**Electromagnetic and Induced Polarization Topics**
Topics in electromagnetic and induced polarization exploration as applied to the search for metallic minerals.

**Geophysics 657**
3 units; H(3-0)

**Seismic Signal Analysis**
Advanced methods of seismic data analysis in exploration and production geophysics. Topics include velocity analysis, polarization filtering, median filtering, migration, inversion and tomography.

**Geophysics 659**
3 units; H(3-3/2)

**Practical Seismic Modelling, Migration, and Inversion**
Concepts and techniques of seismic imaging (migration) are explored. Practical considerations such as algorithm characteristics and data geometry are emphasized; poststack and prestack migration and DMO methods are examined from the Kirchhoff, Fourier, and downward continuation perspectives.

**Note:** Some familiarity with seismic data and computer programming is assumed.

**Geophysics 665**
3 units; H(3-0)

**Theoretical Seismology**
Seismic ray theory, inverse theory, full-wave methods, matrix methods, numerical methods, additional topics depending on current research interests.

**Prerequisite(s):** Geophysics 551.

**Geophysics 667**
3 units; H(3-3)

**Introduction to Microseismic Methods**
Use of microseismic methods as surveillance technology during hydraulic-fracture treatment of tight reservoirs. Methods for acquiring, processing and interpreting microseismic data. Methods for picking events, determining hypocenter location and magnitude, and interpreting the stimulated rock volume.

**Prerequisite(s):** Consent of the Department.

**Geophysics 669**
3 units; H(3-0)

**Global Seismology**
An introduction to theory and practice of global seismology. Topics include: seismograph systems, global wave propagation, moment tensors, shear-wave splitting, surface waves, receiver functions, seismic tomography and teleseismic receiver functions.

**Prerequisite(s):** Admission to the graduate program in geophysics.

**Geophysics 671**
3 units; H(3-0)

**Inverse Theory and Applications I**
An introduction to the mathematical and numerical techniques of geophysical inversion. Topics include least squares, singular value decomposition, and Tikhonov regularization. Development of numerical codes to solve real inverse problems is stressed.

**Prerequisite(s):** Admission to the graduate program in geophysics.

**Geophysics 673**
3 units; H(3-0)

**Inverse Theory and Applications II**
Multidimensional real-world inverse problems, such as constrained seismic, gravity, or resistivity inversion. Fourier, maximum entropy, Bayesian approaches and iterative solution techniques such as Kaczmarz and conjugate gradient are covered.

**Prerequisite(s):** Consent of the instructor.

**Geophysics 681**
3 units; H(3-0)
(Geometrics Engineering 681)

**Advanced Global Geophysics and Geodynamics**
Elasticity, figure of the Earth, Earth structure and seismology, gravity and its temporal variations, isostasy, tides, Earth rotation and orientation, time, plate flexure, glacial rebound, continental drift, geodetic observation methods for geodynamics.

**Geophysics 683**
3 units; H(3-0)

**Dynamics of the Earth**
Fluid mechanics and Earth rheology, heat flow and mantle convection, magneto hydrodynamics and core dynamics, stresses, folding and diapirism, faulting and earthquake mechanism.

**Geophysics 687**
3 units; H(3-0)

**Theory of Seismic Imaging**
The theories of wave propagation in acoustic and elastic media are used to develop the major algorithms used in seismic imaging (migration). Green’s theorem, Huygen’s principle, Kirchhoff diffraction theory, raytracing, wavevectoring, multidimensional Fourier analysis, and Radon transforms are explored.

**Note:** Elementary knowledge of vector calculus and partial differential equations is assumed.

**Geophysics 695**
3 units; H(3-0)

**Research Topics and Tools**
An introduction to seismic structural imaging and interpretation, seismic velocity anisotropy, and multicomponent seismology, including seismic survey design for PS converted waves. Discussion of software packages used for graduate research programs.

**Prerequisite(s):** Consent of the Department.

**Geophysics 699**
3 units; H(3-3)

**Selected Topics in Geophysics**
Courses are offered in specific topics in areas such as seismology, environmental geophysics, potential methods, integrated geophysical studies, and geodynamics.

**Prerequisite(s):** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

**Geophysics 701**
3 units; H(0-6)

**Advanced Independent Study**
A written report based on laboratory and field studies is required.

**Note:** Open only to graduate students in the Department of Geoscience.

**Geophysics 703**
3 units; H(0-6)

**Readings in Geophysics**
A written report based on a literature review is required.

**Note:** Open only to graduate students in the Department of Geoscience.

**German GERM**

Instruction offered by the Department of Linguistics, Languages, and Culture in the Faculty of Arts. Students are encouraged to consult the Department website (http://lic.ucalgary.ca/) for more details on course descriptions and titles of decentralized courses.

**Note:** Consent of the Department can be received in lieu of a stated prerequisite when equivalent knowledge can be demonstrated.

**Graduate Courses**

Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599.

**German 627**
3 units; H(3S-0)

**Seminar in German Literature and Culture**
Selected topics in literary history.

**MAY BE REPEATED FOR CREDIT**

**German 629**
3 units; H(3S-0)

**Seminar in German Language and Linguistics**

**MAY BE REPEATED FOR CREDIT**

**German 631**
3 units; H(3S-0)

**Seminar in German Language Pedagogy**

**MAY BE REPEATED FOR CREDIT**

**German 696**
6 units; F(1-0)

**Bibliography, Research Methods and Grant Proposal Writing**

**Note:** Required of all graduate students who have not had an equivalent course.

**NOT INCLUDED IN GPA**

**German 699**
3 units; H(3-0)

**Conference Course**
Meets the needs of individual students. It may include a general or specific linguistic topic; or the detailed study of an author, period, genre; or any literary problem not dealt with in the honors or graduate courses listed above.

**MAY BE REPEATED FOR CREDIT**

**Greek GREEK**

Instruction offered by members of the Department of Classics and Religion in the Faculty of Arts.

**Note:** For courses on Greek Literature in translation, Greek History, Art, Archaeology, etc., see Greek and Roman Studies (GRST).

Enrolment in any higher level Greek course requires a grade of at least “C-” in the prerequisite course(s), or consent of the Department. Greek 551 is a supplementary course.
Graduate Courses

Greek 601 3 units; H(3S-0)
Graduate Seminar
MAY BE REPEATED FOR CREDIT
Greek 602 3 units; H(4-1)
Introductory Language Class for Graduate Students
Introduction to grammar, vocabulary and translation skills.
MAY BE REPEATED FOR CREDIT
Greek 604 3 units; H(3-1)
Intermediate Language Class for Graduate Students
Consolidation of grammar, vocabulary and translation skills.
MAY BE REPEATED FOR CREDIT
Greek 607 1.5 units; Q(0-1T)
Directed Studies
MAY BE REPEATED FOR CREDIT

Greek and Roman Studies GRST

Instruction offered by members of the Department of Classics and Religion in the Faculty of Arts.

For courses in the ancient Greek and Latin languages see listings under Greek and Latin.

Graduate Courses

Only where appropriate to a student’s program may graduate credit be received for courses numbered 601-607.

Greek and Roman Studies 601 3 units; H(3S-0)
Graduate Seminar
MAY BE REPEATED FOR CREDIT
Greek and Roman Studies 603 3 units; H(1S-0)
Research and Professional Training
NOT INCLUDED IN GPA

History HTST

Instruction offered by members of the Department of History in the Faculty of Arts.

Graduate Courses

Note: Only a limited number of these 600-level courses will be offered in any one year. Students may obtain further information from the Department.

Graduate students outside of the department are required to have department approval to register for any of the following courses:

History 601 3 units; H(3-0)
Topics in Imperial History
MAY BE REPEATED FOR CREDIT
History 603 3 units; H(3-0)
Topics in Religious History
MAY BE REPEATED FOR CREDIT
History 607 3 units; H(3-0)
Topics in Western Canadian History
MAY BE REPEATED FOR CREDIT
History 623 3 units; H(3-0)
Topics in Canadian History
An examination of crucial issues in Canada’s political, economic, social and cultural history.
MAY BE REPEATED FOR CREDIT
History 633 3 units; H(3-0)
Topics in Modern European History
MAY BE REPEATED FOR CREDIT
History 637 3 units; H(3-0)
Topics in Military History
MAY BE REPEATED FOR CREDIT
History 639 3 units; H(3-0)
Topics in History of Science
Topics may include the scientific revolution, science and religion, and the reception of scientific ideas.
MAY BE REPEATED FOR CREDIT
History 641 3 units; H(3-0)
Topics in Medieval or Early Modern European History
MAY BE REPEATED FOR CREDIT
History 645 3 units; H(3-0)
Topics in U.S. History
MAY BE REPEATED FOR CREDIT
History 647 3 units; H(3-0)
Topics in Latin American History
MAY BE REPEATED FOR CREDIT
History 651 3 units; H(3S-0)
Reading Seminar
History 653 3 units; H(3S-0)
Research and Methods Seminar
History 655 3 units; H(3-0)
Classics of Strategy
Strategic thought from Sun Tzu to Clausewitz, Mahan to Corbett. Analyses the writings of classic strategic thinkers, and then by way of case studies examines their theories as they pertain to military and political planners from the Peloponnesian War to the present.
History 673 3 units; H(3-0)
Topics in Legal History
MAY BE REPEATED FOR CREDIT
History 675 3 units; H(3-0)
Selected Topics in History
MAY BE REPEATED FOR CREDIT
History 690 3 units; H(3-0)
Historiography and the Theories of History
History 691 3 units; H(3-0)
Conference Course in Special Topics
Note: Open only to graduate students.
MAY BE REPEATED FOR CREDIT
History 795 3 units; H(3S-0)
Advanced Seminar in Historiographical Interpretations

Human Resources and Organizational Dynamics HROD

Instruction offered by members of the Haskayne School of Business.

Human Resources and Organizational Dynamics Chairperson — TBD

Graduate Courses

Human Resources and Organizational Dynamics 601 3 units; H(3-0)
Managing Human Resources
Survey course on managing the human side of business. Development of leadership and team skills.

Human Resources and Organizational Dynamics 631 3 units; H(3-0)
Managing Human Resources from a Strategic Perspective
Integrated coverage of human resource management theory, practice and research as it applies to the strategic management of organizations.

Prerequisite(s): Human Resources and Organizational Dynamics 601.

Human Resources and Organizational Dynamics 691 3 units; H(3-0)
Project Team Building and Interpersonal Skills
Leadership style and behaviour; interpersonal effectiveness and self-awareness; project teams; group dynamics; organizational change; application to the project environment.

Note: Available only to students in the MEng Program (Project Management). Not open to students in the MBA Program.

Human Resources and Organizational Dynamics 721 3 units; H(3-0)
Advanced Leadership and Technical Skills
Covers increasing self-awareness, self-understanding and presentation of self. The interpersonal skills necessary for group effectiveness, team management and performance leadership will be analysed and developed through small group exercises.

Prerequisite(s): Human Resources and Organizational Dynamics 601.

Human Resources and Organizational Dynamics 723 3 units; H(3-0)
Organizational Change and Development
Diagnosing organizational situations where the need for change exists and facilitating such changes. Utilization of behavioural science knowledge for organizational problem-solving.

Prerequisite(s): Human Resources and Organizational Dynamics 601.

Human Resources and Organizational Dynamics 725 3 units; H(3-0)
Organizational Analysis and Design
Application of knowledge of organizational theory and behaviour to organizational analysis and design. Emphasis will be placed on the acquisition of the required analysis and design skills based on an understanding of how organizations are structured,

Courses of Instruction

Latin LATI

Instruction offered by members of the Department of Classics and Religion in the Faculty of Arts.

Note: For courses in Latin Literature in translation, Roman History, Art, Archaeology, etc., see Greek and Roman Studies.

Graduate Courses

Latin 601 3 units; H(3S-0)

Graduate Seminar
MAY BE REPEATED FOR CREDIT

Latin 602 3 units; H(4-1)

Introductory Language Class for Graduate Students
Introduction to grammar, vocabulary and translation skills.
MAY BE REPEATED FOR CREDIT

Latin 604 3 units; H(3-1)

Intermediate Language Class for Graduate Students
Consolidation of grammar, vocabulary and translation skills.
MAY BE REPEATED FOR CREDIT

Latin 607 1.5 units; Q(0-1T)

Directed Studies
MAY BE REPEATED FOR CREDIT

Law LAW

Instruction offered by members of the Faculty of Law.

For course descriptions and details of the transition from the old to the new curriculum, consult the electronic Faculty of Law Calendar available at www.law.ucalgary.ca.

600-Level Courses

Law 601  H(3-0)(3 credits)
Advanced Criminal Law
An in-depth examination of case authorities, primarily through an examination of case authorities, certain concepts in criminal law the understanding of which is essential for a criminal practitioner.
Prerequisite(s): Consent of the home department.
MAY BE REPEATED FOR CREDIT

Law 602  H(4-0)(4 credits)
Advocacy, Selected Topics
Instruction in litigation strategy and advocacy related to the forms of binding, third-party decision-making processes of dispute resolution, their commonalities and differences, and application of those processes in a substantive area of law. The course is taught in a three week intensive format through performance-based learning methods.
Evaluation will include a mock trial and written exercises such as a submission to the court in the substantive area.

Note: This course is graded CR, D or F.

Law 607  H(2-0)(3 credits)
Advanced Legal Research
This course builds on legal research instruction in the first year of the program and affords further opportunities to learn and practice research skills.
The course provides instruction in research methodology, citation, print and electronic research databases, covering case law, statute law, texts, periodicals and web-based materials.

Law 608  H(3-0)(3 credits)
Oil and Gas Contracts
Selected problems in oil and gas law including industry contracts (pooling, farmout, joint operating, purchase and sale and royalty agreements); fiduciary duties; and title review.
Corequisite(s): Prerequisite or Corequisite: Law 571.

Law 609  H(3-0)(3 credits)
Estate Planning
Legal aspects of corporate finance transactions, including applicable regulatory frameworks. Topics may include equity and debt financing, secured transactions, share and/or share purchase and sale agreements, and takeover bids.
Corequisite(s): Prerequisite or Corequisite: Law 505.

Law 611  H(3-0)(3 credits)
Conflict of Laws
The doctrines and rules governing legal disputes cutting across provincial or national boundaries. Topics include jurisdiction, distinctions between substantive and procedural rules, the recognition and enforcement of foreign judgments, domicile, proof of foreign law, and the choice of law rules relating to private law (torts, contracts, property, succession and family law).

Law 612  H(2-0)(3 credits)
Advanced Private Law
Advanced issues in private law (property, contract, tort, unjust enrichment and equity), including contemporary controversies over appropriate rights and remedies when different causes of action either converge or intersect.
Corequisite(s): Prerequisite or Corequisite: Law 402, 405 and 551.

Law 613  H(3-0)(3 credits)
Conflict of Laws
The doctrines and rules governing legal disputes cutting across provincial or national boundaries. Topics include jurisdiction, distinctions between substantive and procedural rules, the recognition and enforcement of foreign judgments, domicile, proof of foreign law, and the choice of law rules relating to private law (torts, contracts, property, succession and family law).

Law 615  H(3-0)(3 credits)
Advanced Civil Procedure
The strategic use of the Alberta Rules of Court in civil proceedings with reference to related legislation and ethical requirements. Topics include commencement of proceedings, interlocutory and ex parte applications, discovery of persons and records, trial preparation, and the roles of the court.
Corequisite(s): Prerequisite or Corequisite: Law 505.

Law 617  H(3-0)(3 credits)
The renewable energy and energy efficiency sectors. Topics include federalism, wind, small hydro, solar, biomass etc., energy conservation and demand side management, and access to energy infrastructure.
Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 618  H(3-0)(3 credits)
Corporate Finance Law
Legal aspects of corporate finance transactions, including applicable regulatory frameworks. Topics may include equity and debt financing, secured transactions, share and/or share purchase and sale agreements, and takeover bids.
Corequisite(s): Prerequisite or Corequisite: Law 505.

Law 619  H(3-0)(3 credits)
Estate Planning
Personal dispositions of property, both inter vivos and on death, to achieve estate and succession planning objectives. Topics include trusts, corporations, wills, life insurance, buy-sell arrangements, income splitting, estate freezing, and tax deferral plans.
Corequisite(s): Prerequisite or Corequisite: Law 527, 533 and 598.

Law 621  H(3-0)(3 credits)
Corporate Governance and Litigation
The principal concepts in corporate governance and their evolution in Canada; the Sarbanes-Oxley Act of 2002 and the related rules of the U.S. Securities and Exchange Commission and the New York Stock Exchange; the securities regulatory response of Canada to the adoption of Sarbanes-Oxley in the United States; and other current topics in corporate governance.
Corequisite(s): Prerequisite or Corequisite: Law 505 and 509.

Law 623  H(3-0)(3 credits)
Environmental Impact Assessment Law
Environmental impact assessment (EIA) law and practice in Canada. Topics include the role of EIA in the regulatory process and as a planning tool, federalism, triggers, equivalency, harmonization, joint assessment, implementation of assessment decisions, adaptive management, strategic environmental assessment, the role of traditional knowledge, and public participation.
Corequisite(s): Prerequisite or Corequisite: Law 503.

Law 624  H(3-0)(3 credits)
Environmental Law and Ethics
The ethical underpinning of environmental law, with a consideration of various views, including the land ethic, deep and shallow ecology, instrumental and utilitarian approaches, and inherent value.

Law 625  H(3-0)(3 credits)
Intellectual Property Transactions
Intellectual property transactions and strategies in a variety of industries in energy, information technology, and life sciences. Topics include open...
source IP, IP governance, management and best practices, valuation, ownership, improvements, co-ownership and collaboration, patent pools and standard setting organizations, software licensing and IT transactions, licensing, infringement management, and warranties.

Corequisite(s): Prerequisite or Corequisite: Law 543.

**Law 626**  
**International Development Law**  
The role of law in promoting social and economic growth, with a focus on the rule of law as an instrument of development and the dialogue between the developed and less developed worlds through international agreements. Topics include the rules of international trade and finance, intellectual property, the environment and natural resources, and the war on terrorism.

Corequisite(s): Prerequisite or Corequisite: One of Law 549, 597 or 563.

**Law 627**  
**International Environmental Law**  
The customary and treaty law rules applicable to global and transboundary environmental issues. Topics include air pollution, climate change, international wildlife and trade, the international chemicals agreements liability regimes, and shared resources.

**Law 628**  
**International Investment Law**  
Investor protection in customary law and treaties, in particular NAFTA Chapter 11, bilateral investment treaties (BITs), and the Energy Charter; the main disciplines, including national treatment, most favoured nation treatment, fair and equitable treatment, and the rules pertaining to expropriation; soft law norms pertaining to investment; and relevant domestic law, including the Investment Canada Act.

Corequisite(s): Prerequisite or Corequisite: Law 549 or 597.

**Law 630**  
**International Petroleum Transactions**  
International business transactions in the context of the petroleum industry, including the various forms of state agreements; confidentiality agreements; study and bidding agreements; international joint operating agreements; agency agreements; and participation agreements; with attention to the key legal, business and ethical issues raised in negotiations.

**Law 631**  
**International Tax Law**  
The tax implications of both inbound and outbound investment and implications for structuring affiliates, with consideration of international tax treaties and foreign tax credit mechanisms.

Corequisite(s): Prerequisite or Corequisite: Law 527.

**Law 634**  
**Law of Species and Spaces**  
The principal federal and provincial laws governing the management of biological diversity, including protected area legislation and endangered species legislation. Explores the constitutional and common law fundamentals of wildlife law as well as contemporary disputes about species protection, ecosystem-level land management, and game ranch operations.

Corequisite(s): Prerequisite or Corequisite: Law 503.

**Law 636**  
**Municipal Law**  
The legal position of local governments, including cities and regional governments. Topics include the powers of Municipal Councils and Districts, the duties and responsibilities of elected and appointed municipal officials, conflicts of interest, elections, the regulation and licensing of businesses, proprietary and contractual powers, tort and the public body, subdivision, land use planning, and the role of the courts.

Corequisite(s): Prerequisite or Corequisite: Law 503.

**Law 637**  
**Energy Law**  
An overview of energy regulation, focusing on competition and pricing. Topics include the theory and process of energy regulation, regulatory jurisdiction, judicial review of energy regulation, regulation of natural gas and electricity prices, market restructuring, and deregulation. The course will familiarize students with the legal issues that arise when the legislature and regulators respond to market failures, and/or protect the public interest, in the provision of natural gas and electricity services.

Corequisite(s): Prerequisite or Corequisite: Law 503.

**Law 641**  
**Oil and Gas and Mining Taxation**  
The resource regime rules of the Income Tax Act as applied to the oil and gas and mining sectors. Topics include: operations subject to the resource regime; the treatment of property costs and common industry expenditures (i.e. applicable “tax pools” and their characteristics); resource industry “subsidies” (e.g. flow-through share financing, investment tax credits); the avoidance provisions (e.g. the successor rules); and the treatment of foreign operations of a Canadian resident taxpayer.

Corequisite(s): Prerequisite or Corequisite: Law 697.

**Law 645**  
**Pollution Control and Waste Management Law**  
The provincial and federal pollution control regimes for air and water pollution and for the handling, storage, treatment, and disposal of hazardous and non-hazardous wastes. Topics include federalism; regulatory and non-regulatory approaches to pollution from “point” and “non-point” sources; cumulative pollutant loads; the “precautionary” and “polluter pays” principles; and liability for contaminated sites.

Corequisite(s): Prerequisite or Corequisite: Law 503 and 531.

**Law 647**  
**Regulatory Theory and the Law**  
The main theories that explain or justify government regulation, including correction for market failure, political economy or public choice, and deliberative democracy. The relationship between those theories and the development and implementation of regulatory legislation, regulation, and public policy.

Corequisite(s): Prerequisite or Corequisite: Law 503.

**Law 648**  
**Securities Law**  
The regulation of capital market participants; the issuance of, and trades in, securities of companies, with an emphasis on Alberta and the National instruments enacted by the Canadian securities regulator; the theory of securities regulation, as well as enforcement and compliance.

**Law 653**  
**Directed Research**  
A supervised research project involving the in-depth examination of a legal problem or area of concern not normally covered in a substantive or procedural course and which provides the basis for an article, research paper, brief, memorial, draft legislation, etc. Admission to this course depends on the availability of supervising faculty.

Prerequisite(s): Consent of the Faculty.  
MAY BE REPEATED FOR CREDIT

**Law 667**  
**Advanced Public Law**  
Selected issues in constitutional law at the advanced level. Topics may include constitutional amendment, comparative approaches to rights, comparative federalism, the role of international law in constitutional interpretation, the legitimacy of judicial review, evidentiary issues in constitutional litigation, the role of social movements, and strategic litigation in securing constitutional rights.

Prerequisite(s): Law 400.

**Law 673**  
**Jessup Moot**  
Preparation for and participation in the Philip C. Jessup International Law Moot Court Competition.

Prerequisite(s): Consent of the Faculty.

**Law 677**  
**Canadian Corporate/Securities Law Moot**  
The development of appellate advocacy and other lawyering skills in the context of corporate and securities law in Canada.

Prerequisite(s): Consent of the Faculty.

**Law 678**  
**The Gale Cup Moot**  
The development of appellate advocacy and other lawyering skills in the context of preparation for and participation in the national Gale Cup Moot.

Prerequisite(s): Consent of the Faculty.

**Law 683**  
**Advanced Family Law**  
Selected topics in family law, including matrimonial property; division of pensions; international family law; and the law relating to children, including regulatory aspects (e.g. child welfare).

Corequisite(s): Prerequisite or Corequisite: Law 515.

**Law 685**  
**Business Clinical**  
The skills employed by a corporate solicitor in the context of one or more transactions. Skills covered
Courses of Instruction

Law 687  H[3-0](3 credits)

**Criminal Justice Clinical**
A clinical seminar in elements of criminal law covering topical, practical, and ethical issues in the practice of criminal law. Three short placements with Crown and defence lawyers and a provincial court judge.

**Corequisite(s):** Prerequisite or Corequisite: Law 511.

**Note:** This course is graded CR, D or F.

Law 689  H[3-0](3 credits)

**Family Law Clinical Seminar**
A clinical seminar in elements of family law practice. The clinical experience may be obtained through simulated exercises, supervised handling of files and/or placements. Topics include Chambers advocacy, marital dispute consultations and drafting of a settlement.

**Corequisite(s):** Prerequisite or Corequisite: Law 515.

**Note:** This course is graded CR, D or F.

Law 690  H[3-0](3 credits)

**Western Canada Macintyre Cup Trial Competition**
The development of trial advocacy and other lawyering skills in the context of preparation for and participation in the Western Canada Trial Competition. Credit for this competition does not preclude credit for the Sopinka Cup.

**Prerequisite(s):** Consent of the Faculty.

Law 691  H[3-0](3 credits)

**Natural Resources, Energy and Environmental Law Clinical**
A clinical seminar involving placements in any one of the following practice areas: energy law, resources law, water law, and environmental law.

**Corequisite(s):** Prerequisite or Corequisite: One of Law 531, 571, 583 or 637.

**Note:** This course is graded CR, D or F.

Law 692  H[2-0](2 credits)

**Selected Topics I**
A variety of subject areas, either doctrinal or theoretical.

**MAY BE REPEATED FOR CREDIT**

Law 693  H[3-0](3 credits)

**Selected Topics II**
A variety of subject areas, either doctrinal or theoretical.

**MAY BE REPEATED FOR CREDIT**

Law 694  H[4-0](4 credits)

**Selected Topics III**
A variety of subject areas, either doctrinal or theoretical.

**MAY BE REPEATED FOR CREDIT**

Law 695  H[3-0](3 credits)

**External Competitions**
The development of advocacy and other lawyering skills in the context of preparation for and participation in an external competition not otherwise the subject of a course. A written component is generally required.

**Prerequisite(s):** Consent of the Faculty.

Law 696  H[3-0](3 credits)

**Clinical Studies**
Participation in a clinical experience not otherwise the subject of a clinical course.

**Prerequisite(s):** Consent of the Faculty.

Law 697  H[3-0](3 credits)

**Corporate Tax**
The provisions of the Income Tax Act applicable to corporations and their shareholders. Topics include the classification of corporations for tax purposes, the taxation of corporate income, the taxation of corporate distributions, and the taxation of various types of corporate reorganizations.

**Corequisite(s):** Prerequisite or Corequisite: Law 509 and 527.

Law 698  H[3-0](3 credits)

(formerly Law 539)

**Immigration and Refugee Law**
Basic principles, policies, and procedures governing immigration and refugee law. Topics include refugee law status; selection and admission of immigrants; inadmissible and removable classes; and appeals and judicial review in the federal court, including Charter issues.

**Corequisite(s):** Prerequisite or Corequisite: Law 503.

Law 699  H[3-0](3 credits)

(formerly Law 517)

**Labour Law**
The law governing unionized workplaces in Canada. Topics include freedom of association, the status of participants, union organization and certification, unfair labour practices, collective bargaining, the collective agreement and arbitration, industrial conflict, the duty of fair representation, and interaction between the labour law regime and the common-law of employment.

**Corequisite(s):** Prerequisite or Corequisite: Law 503.

**700-Level Courses**

Law 703  H[3-0](3 credits)

**Graduate Seminar in Legal Research and Methodology**
Preparation for developing, researching and writing a thesis or major research paper. Students will be introduced to specific research techniques and to the challenges of comparative and cross-cultural work.

**Note:** This course is only open to students in the LLM program or by approval of the Graduate Director.

Law 706  F[0-5](5 credits)

**Major Research Paper**
Under the supervision of a member of the Faculty of Law or other suitable person appointed by the Graduate Co-ordinator, students will complete a major research paper, approximately 50 to 60 pages (15,000 – 18,000 words) in length. The paper must reflect extensive research on a topic in natural resources, energy or environmental law, and it must propose a solution to a problem or present a critical evaluation of an issue in this area of law. The paper will be evaluated on a Pass/Fail basis by the supervisor and one other person appointed by the Graduate Co-ordinator. In the event of disagreement between the supervisor and the other appointee, the Graduate Co-ordinator shall determine whether the paper is a Pass or Fail after reading the paper and then consulting with the supervisor and other appointee.

**Note:** This course is only open to students in the LLM program.

Linguistics LING

Instruction offered by members of the Department of Linguistics, Languages, and Culture in the Faculty of Arts.

**Note:** A student may not register in any Linguistics course unless a grade of at least “C-” has been achieved in each prerequisite for that course.

**Graduate Courses**

Only where appropriate to a student’s program may graduate credit be received for courses numbered 500-599. Admission to all 600-level courses is with consent of the Department in addition to any other prerequisites which may be stated.

Linguistics 600  1.5 units; Q(2-0)

**Introduction to Graduate Studies in Linguistics**
This course provides an introduction to areas of research and theoretical orientations in which faculty in this department specialize, as well as to research and professional skills.

**NOT INCLUDED IN GPA**

Linguistics 605  3 units; H(3-0)

**Field Methods**

**Prerequisite(s):** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

Linguistics 611  3 units; H(3-0)

**Advanced Syntactic Analysis**
An advanced course in syntactic theory with focus on analytical and critical skills required for conducting syntactic research.

**Prerequisite(s):** Linguistics 511 and consent of the Department.

Linguistics 613  3 units; H(3-0)

**Advanced Phonological Analysis**
An advanced course in phonological theory with focus on analytical and critical skills required for conducting phonological research.

**Prerequisite(s):** Linguistics 403 and consent of the Department.
Courses of Instruction

Linguistics 631 3 units; H(3-0)
Topics in Linguistic Theory
Seminar in any area of theoretical linguistics, including phonetics, phonology, morphology, syntax, and semantics.
Prerequisite(s): Consent of the Department.
Note: Consult the Department regarding topics offered in any given year as topics vary. Not offered every year.

Linguistics 633 3 units; H(3-0)
Topics in Language Acquisition
Seminar in language acquisition.
633.01. First Language Acquisition
633.02. Second Language Acquisition
Prerequisite(s): Consent of the Department.
Note: Consult the Department regarding topics offered in any given year as topics vary. Not offered every year.
MAY BE REPEATED FOR CREDIT

Linguistics 635 3 units; H(3-0)
Analysis of a Language or Language Family
Seminar in the analysis of selected language or language family.
Prerequisite(s): Consent of the Department.
Note: Consult the Department regarding topics offered in any given year as topics vary. Not offered every year.
MAY BE REPEATED FOR CREDIT

Linguistics 651 3 units; H(3-0)
Topics in Historical Linguistics
Seminar in historical linguistics.
Prerequisite(s): Consent of the Department.
Note: Consult the Department regarding topics offered in any given year as topics vary. Not offered every year.
MAY BE REPEATED FOR CREDIT

Linguistics 660 3 units; H(3-0)
Quantitative Modelling of Linguistic Data
Introduction to basic statistical concepts, methods of analysis, and quantitative modelling techniques, with a focus on their application to the unique properties of language research and linguistics data.
Prerequisite(s): Consent of the Department.

Linguistics 697 3 units; H(3-0)
Thesis Research Development

Management Information Systems MGIS
Management Information Systems 601 3 units; H(3-0)
Graduate Courses
Management Information Systems 725 3 units; H(3-0)
e-Technology
Technical and managerial issues related to buying, building, and implementing e-technology to enable various organizational and business strategies and relationships including business-to-business, business-to-customer, business-to-employee, and employee-to-employee strategies. Topics include: systems interntworing, information management, systems integration, wireless technologies, transmission security and authentication, project management, software design, technology diffusion and evaluation, technology-enabled business process design, and legal and ethical issues.
Prerequisite(s): Management Information Systems 601.

Management Information Systems 735 3 units; H(3-0)
Systems Analysis and Design
Planning and implementation of network-enabled (i.e. Intranet and Internet) solutions to facilitate information and knowledge transfer across business environments. Reflects the information explosion of recent years, the new technological advances in information systems, and the exponential growth in electronic business processes. Course emphasis is placed on the management of technology-enabled business processes.
Prerequisite(s): Management Information Systems 601.

Management Information Systems 737 3 units; H(3-0)
Enterprise Data Management
Data systems, technologies and management issues associated with information design, capture, storage, search, and dissemination to various stakeholders of an organization. Includes database management technologies, data modelling tools, interface design, structured query language, document and knowledge management systems, and information backup, security and disaster recovery. Brief aspects of the course explore linkages with Internet-based technologies, design issues, web services, search strategies and telecommunication systems for information delivery (wireless and wired, intranet, extranet, and internet).
Prerequisite(s): Management Information Systems 601.

Management Information Systems 743 3 units; H(3-0)
Telecommunications
Basic telecommunications and data communications concepts relevant to organizations. Fundamentals of analog and digital signalling and transmission. Wide and local area networking. Protocols and standards; telecommunication applications. The role of the Internet in organizations.
Prerequisite(s): Management Information Systems 601.

Management Information Systems 797 3 units; H(3S-0)
Advanced Seminar in Management Information Systems
Prerequisite(s): Consent of the Haskayne School of Business.
MAY BE REPEATED FOR CREDIT

PhD Course
Management Information Systems 799 3 units; H(3S-0)
Doctoral Seminars in Management Information Systems
799.01. PhD Seminar I in Management Information Systems
799.02. PhD Seminar II in Management Information Systems
799.03. PhD Seminar III in Management Information Systems
799.04. PhD Seminar IV in Management Information Systems

Management Studies MGST
Management Studies 601 1.5 units; Q(3-0)
Skills Development
Introduction to basic MBA Skills required for effective learning throughout the MBA Program. Specific topics may include business communications and writing, report writing, oral presentations, team roles and responsibilities, critical thinking and case analysis.
Prerequisite(s): Credit for both Management Studies 601 and 790.01 will not be allowed.

Management Studies 611 3 units; H(3-0)
Managerial Economics
Introduction to economic models for business decision making. Models from microeconomics are applied to provide insight in understanding costs, pricing, industry structure, and competitive interaction. Information economics is used to illustrate principal-agent problems that commonly arise in a business context. Macroeconomic models of supply and demand are applied to illustrate how government policy affects inflation and exchange rates.

Management Studies 613 3 units; H(3-0)
Managerial Decision Modelling
The transformation of raw data into useful information for decision-making. Quantitative models are implemented with spreadsheets to develop skills in generating managerial insight from data and in dealing with uncertainty. Topics covered include basic probability and statistics, decision trees, regression analysis, optimization, and simulation.
Management Studies 715 3 units; H(3-0)  
(Formerly Management Studies 615)  
**Strategic Business Analysis**  
Introduction to strategic analysis. Integration of learning from various management disciplines through a "field experience" study of a business firm.  
**Prerequisite(s):** Strategy and Global Management 601.  
**Antirequisite(s):** Credit for both Management Studies 715 and 615 will not be allowed.

Management Studies 741 3 units; H(3-0)  
**Business Process Improvement and Creative Problem Solving**  
Business process improvement and creative problem solving as critical components of competitiveness. The adjective "business" is used to indicate that the course emphasizes improvements in non-manufacturing processes (of relevance to all organizations) in such areas as development, distribution, financial accounting/planning, order entry, personnel, and purchasing. Topics covered include the relationship to Total Quality Management and Time-Based Competition, incremental versus radical improvement, selection of key processes for study (including benchmarking and the role of capacity constraints), process flow diagramming, Pareto analysis, cause-and-effect analysis, statistical control charts, affinity diagrams, and steps in creative problem solving. Team exercises and projects make up a substantial portion of the course.  
**Prerequisite(s):** Operations Management 601 or equivalent.

Management Studies 743 3 units; H(3-0)  
**International Logistics**  
The management functions of physical distribution, procurement and production are examined in a global context. International purchasing and logistics activities, global sourcing and production, and supply chain management to provide excellent, cost-effective service on a world-wide basis. Both theoretical and practical approaches are applied.  
**Prerequisite(s):** Operations Management 601 or equivalent.

Management Studies 751 3 units; H(3-0)  
**Global Energy Finance and Accounting**  
**Prerequisite(s):** Accounting 603 and Finance 601.

Management Studies 761 3 units; H(3-3T)  
**Personal Financial Management in Canada**  
Introduction to personal financial management in Canada. Goal setting, personal financial statements analysis, the time value of money, the Canadian personal income tax system, taxation issues for small businesses, risk management, an overview of investments, retirement planning and estate planning. Completion of a personal financial plan by the end of the course.  
**Prerequisite(s):** Finance 601 or equivalent.  
**Note:** May not be used as part of a student’s major in Finance.

Management Studies 770 1.5 units; Q(3-0)  
**Topics in Leadership**  
Students near graduation must prepare for the transition from individual contributor to team and organization leader. This course is a comprehensive assessment of leadership from the dimensions of creating a leadership mindset and managing relationships (subordinates, peers, superiors and stakeholders). The topics may be addressed through theory development, simulation, case and experiential methods to provide to a full awareness and appreciation of the corporate responsibility, ethical dilemmas, and societal impacts of decision-making within business, not-for-profit, and institutional leadership environments.  
**Prerequisite(s):** Management Studies 601.  
**Antirequisite(s):** Credit for both Management Studies 770 and 790.02 will not be allowed.

Management Studies 773 3 units; H(3-0)  
**Multivariate Analysis in Management**  
Multivariate Analysis in Management is concerned with the study of association among sets of measurements. This multivariate statistics course is intended primarily for PhD students in Management although MBA (Thesis) students pursuing an empirical-based thesis can also benefit. The objective of this course is to introduce graduate students to a variety of multivariate statistical techniques and methods to enable them to effectively carry out an empirical research study in management including the business, public, and not-for-profit sectors. Topics include: introduction to research design and multivariate methods, linear regression, logistic regression, analysis of variance and covariance, multivariate analysis of variance, discriminant analysis, principal components analysis, common factor analysis, and additional multivariate topics if time permits. The technical level of treatment would require basic understanding of matrix and linear algebra and at least one first level course in statistics. Such preliminary technical understanding will be helpful to appreciate the theory and intuition behind the multivariate techniques. A good blend of technical, conceptual, and practical aspects (using SPSS software) of the course will be maintained.  
**Prerequisite(s):** Consent of the Haskayne School of Business.

Management Studies 781 3 units; H(3-0)  
**Philosophy of Science in Management Studies**  
Historical and critical perspectives of classical issues in philosophy of science, nature of scientific explanation, confirmation of scientific theories, theories of truth, distinctions between science and non-science.  
**Prerequisite(s):** Consent of the Haskayne School of Business.

Management Studies 783 3 units; H(3-T)  
**Advanced Research Methodology and Methods**  
Research methodology relevant to examination and testing of theoretical and applied issues in management. The development and testing of research concepts; research operations, designs and analysis.  
**Prerequisite(s):** Consent of the Haskayne School of Business.

Management Studies 789 3 units; H(3S-0)  
**Seminar in Management Studies**  
Intensive study and discussion of current literature and research with respect to selected topics in Management Studies.  
**Prerequisite(s):** Consent of the Haskayne School of Business.  
**MAY BE REPEATED FOR CREDIT**

Management Studies 790 1.5 units; Q(3-0)  
**Seminar in Management Studies**  
Intensive study and discussion of current literature and research with respect to selected topics in Management Studies.  
**Prerequisite(s):** Consent of the Haskayne School of Business.  
**MAY BE REPEATED FOR CREDIT**

Management Studies 791 3 units; H(3-0)  
**Management Education Seminar**  
Curricular and course design, instructional techniques, instructional tools, teaching styles, career planning and professional ethics. Nature, role and function of universities, and business schools, business school relations.  
**Note:** Doctoral students whose supervisors are members of the Haskayne School of Business are required to register in this seminar in the second year of doctoral studies.  
**NOT INCLUDED IN GPA**

Management Studies 792 6 units; F(1-0)  
**Research Development**  
Development of research skills through participation in a well-defined project under the direct supervision of an experienced researcher.  
**Prerequisite(s):** Management Studies 781 or 783 or equivalent.

Management Studies 793 3 units; H(3S-0)  
**Conceptual Frameworks of the Enterprise**  
Advanced, comparative institutional analysis to explain the choice of the firm's boundaries, the governance mechanisms to manage the interface with the external environment and the internal organizational design, so as to reduce transaction costs and facilitate value creation.  
**Prerequisite(s):** Consent of the Haskayne School of Business.

Management Studies 794 3 units; H(3S-0)  
**Theory Development**  
Processes of building, testing, and disseminating business management theories. Focus on the elements that constitute a theory, requirements for theory validation, and the role of theory in business management research. Analysis of mainstream theories in business management research. Readings include philosophy of science and management research materials on theory development and dissemination.  
**Prerequisite(s):** Consent of the Haskayne School of Business.

Management Studies 797 3 units; H(3-0)  
**Directed Graduate Study in Management**  
Coverage of various topics on the basis of student and faculty interest.  
**Prerequisite(s):** Consent of the Haskayne School of Business.  
**MAY BE REPEATED FOR CREDIT**

Management Studies 799 3 units; H(3-0)  
**Topics in Management Studies**  
Coverage of various topics on the basis of student and faculty interests.  
**Prerequisite(s):** Consent of the Haskayne School of Business  
**MAY BE REPEATED FOR CREDIT**
Graduate Courses

Manufacturing Engineering 605 3 units; H(3-0)

Planning and Control of Computer Integrated Manufacturing
Advanced techniques for the design, planning, and control of integrated manufacturing systems. Course elements include: a framework for manufacturing planning and control; data flow and structured modelling methodologies; hierarchical models of manufacturing; cellular manufacturing organization; databases and communications; forecasting, demand management, capacity planning and master production scheduling; materials requirements planning, manufacturing resource planning, Just-In-Time manufacture, and Optimized Production Technology; control of independent demand inventory items; production activity control, shop floor control, scheduling, order release and dispatching; simulation in planning and control.

Manufacturing Engineering 607 3 units; H(3-0)

Total Quality Management

Manufacturing Engineering 609 3 units; H(3-0)

Design and Analysis of Experiments
Statistical Design of Experiments (DOE) techniques for efficient data collection, analysis and interpretation. Analysis of Variance (ANOVA), including blocking and nesting, in full and fractional factorial designs. Robust design, including classical response surface and Taguchi techniques. Applications to product and process improvement.

Manufacturing Engineering 613 3 units; H(3S-0)

Research Seminar I
Reports on studies of the literature or of current research. This course is compulsory for all MSc and thesis-route MEng students and must be completed before the thesis defence.

NOT INCLUDED IN GPA

Manufacturing Engineering 619 3 units; H(3-0)

Special Problems in Manufacturing Engineering
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member. Students would be required to consider problems of an advanced nature.

MAY BE REPEATED FOR CREDIT

Manufacturing Engineering 621 3 units; H(3-0)

Optimization Methods with Robotics Applications
Designed for graduate and senior undergraduate students interested in advanced topics in robotics.

Based on the students' research topics, contents may vary. These include: fundamental theory in robotics, mathematical toolbox for optimization, differential kinematics, kinematics and actuation redundancy, optimal control, co-operating manipulators, redundancy in force sensing and sensor fusion.

Manufacturing Engineering 623 3 units; H(3-0)

CAD/CAM/CAE

Manufacturing Engineering 698 6 units; F(0-4)

Graduate Project
Individual project in the student's area of specialization under the guidance of the student's supervisor. A written proposal, one or more written progress reports, and a final written report are required. An oral presentation is required upon completion of the course. Open only to students in the MEng (courses only) program.

Manufacturing Engineering 713 3 units; H(3S-0)

Research Seminar II
Reports on studies of the literature or of current research. This course is compulsory for all PhD students and must be completed before the candidacy examination.

NOT INCLUDED IN GPA

Marine Science MRSC
Most formal courses in Marine Science are offered at the Bamfield Marine Sciences Centre that is owned by the Western Canadian Universities Marine Sciences Society. The Centre is situated in Bamfield on the Pacific Coast of Vancouver Island. B.C. Instructors are drawn generally from the staffs of the participating universities (University of Alberta, University of Calgary, University of British Columbia, Simon Fraser University, University of Victoria).

Appropriate courses at the 300 level (or higher) in Biology, Plant Biology (Botany) and/or Zoology are prerequisite to these courses.

Each full course will last six weeks (plus four days travelling time) with an average of 50 hours weekly of lectures, laboratories, tutorials and field trips.

Fall Program: The Western Canadian Universities Marine Sciences Society offers an integrated program of courses in Marine Biology at the Bamfield Marine Sciences Centre. Attendance at the program requires residence at Bamfield Marine Sciences Centre for an entire Fall Term. Details are available from the Department of Biological Sciences.

University of Calgary students must apply to and be accepted by the Centre before they are permitted to register for the Marine Science courses at the University of Calgary. For further information students should consult the Department of Biological Sciences.

†Numbers in parentheses are the course numbers listed by the Bamfield Marine Sciences Centre. In many cases these courses have been renumbered to fulfill University of Calgary requirements. The courses listed below are not necessarily offered every year. Other courses and specific titles in special topics courses will be offered yearly. Students are requested to look for current listings in the Department of Biological Sciences.

Graduate Courses

Enrolment in any graduate course requires consent of the Department.

600-level courses are available with permission to undergraduate students in the final year of their programs.

Special Graduate Courses: Each year the Western Canadian Universities Marine Biological Society offers short (one-week) intensive courses especially for graduate students interested in Marine Biology. Topics vary from year to year. Details are available from the Department of Biological Sciences.

Marine Science 600 6 units; F(0-6)

Marine Science 500†

Directed Studies
A course of directed studies under the supervision of a member of faculty, involving a research project approved by the supervisor. Each study will be designed to take maximum advantage of laboratory and/or field opportunities offered by the Bamfield Marine Sciences Centre.

Marine Science 601 3 units; H(3-3)

Marine Science 502†

Special Topics (3 weeks)
Courses of a specialized nature offered, as opportunities arise, by distinguished scientists visiting the Bamfield Marine Sciences Centre.

Marine Science 602 6 units; F(3-3)

Marine Science 501†

Special Topics (6 weeks)
Courses of a specialized nature offered, as opportunities arise, by distinguished scientists visiting the Bamfield Marine Sciences Centre.

Marketing MKTG

Instruction offered by members of the Haskayne School of Business.

Marketing Chairperson — TBD

Graduate Courses

Marketing 601 3 units; H(3-0)

Marketing Management
An introductory course on marketing management with an emphasis on the marketing concept as the focus of business strategy. The decision variables as well as functional frameworks used by marketing managers are emphasized by concentrating on the relationship between business and consumers.

Marketing 735 3 units; H(3-0)

Marketing Communications
Evaluation of strategic roles of a variety of communication disciplines - such as advertising, direct response advertising, sales promotion and public relations - and how companies combine those disciplines to provide clarity, consistency, and maximum impact.

Prerequisite(s): Marketing 601.

Marketing 741 3 units; H(3-0)

Business-To-Business Marketing
Management issues in the marketing of products and services to business, government and industrial customers. Topics include organizational buying behaviour, industrial market segmentation, demand analysis and sales forecasting, development and implementation of an industrial marketing mix.

Prerequisite(s): Marketing 601.
Courses of Instruction

**Marketing 761** 3 units; H(3-0)

**Buyer Behaviour**
Study of factors influencing buyer decision-making processes and purchase behaviours, with implications for marketing practice.

Prerequisite(s): Marketing 601.

**Marketing 763** 3 units; H(3-0)

**Marketing Research**
Study of research as a process for gathering market information to aid problem solving. Steps in the research process reviewed include problem definition, research design, data collection, data analysis and report preparation.

Prerequisite(s): Marketing 601.

**Marketing 783** 3 units; H(3-0)

**Services Marketing and Management**
Study of processes and practices relevant to strategic firms using service for competitive advantage. Focuses on the integration of marketing, operations, and human resources from the consumer’s perspective.

Prerequisite(s): Marketing 601.

**Marketing 785** 3 units; H(3-0)

**New Venture Marketing**
Within the context of high-potential, high growth ventures, examines four pillars of new product/new business opportunity. How to create value for the customer, solve significant problems through product and service design, measure sustainable financial value, and assess fit of new ideas with entrepreneur/organization. Emphasis on discovering market opportunities and exploring product or service feasibility.

Prerequisite(s): Marketing 601.

**Marketing 789** 3 units; H(3S-0)

**Seminar in Marketing Management**
Intensive study and discussion of current literature and research with respect to selected, advanced topics in marketing.

Prerequisite(s): Marketing 601 or consent of the Haskayne School of Business.

MAY BE REPEATED FOR CREDIT

**PhD Course**

**Mathematics MATH**

Instruction offered by members of the Department of Mathematics and Statistics in the Faculty of Science.

Department Head - M. Bauer

**Graduate Courses**

**Mathematics 600** 1.5 units; Q(3S-0)

**Research Seminar**
A professional skills course, focusing on the development of technical proficiencies that are essential to succeed as practicing mathematicians in academia, government, or industry. The emphasis is on delivering professional presentations and using modern mathematical research tools. A high level of active student participation is required.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

**Mathematics 601** 3 units; H(3-0)

**Measure and Integration**
Abstract measure theory, basic integration theorems, Fubini’s theorem, Radon-Nikodym theorem, Lp spaces, Riesz representation theorem.

Prerequisite(s): Mathematics 545 or Pure Mathematics 545.

Antirequisite(s): Credit for more than one of Mathematics 501, 601, Pure Mathematics 501 and 601 will not be allowed.

Mathematics 603 3 units; H(3-0)

**Analysis III**
Sequences and series of functions; Lebesgue integration on the line, Fourier series and the Fourier transform, pointwise convergence theorems, distributions and generalized functions.

Prerequisite(s): Mathematics 447 or a grade of “B+” or better in Pure Mathematics 445 or Mathematics 445.

Antirequisite(s): Not open to students with credit in Mathematics 545 or Pure Mathematics 545.

Mathematics 605 3 units; H(3-0)

**Differential Equations III**

Prerequisite(s): Applied Mathematics 411 and Pure Mathematics 445 or 545 or equivalents.

Antirequisite(s): Credit for Mathematics 605 and Applied Mathematics 605 will not be allowed.

Mathematics 607 3 units; H(3-0)

(formerly Pure Mathematics 611)

**Algebra III**
A sophisticated introduction to modules over rings, especially commutative rings with identity. Major topics include: snake lemma; free modules; tensor product; hom-tensor duality; finitely presented modules; invariant factors; free resolutions; and the classification of finitely generated modules over principal ideal domains. Adjoint functors play a large role. The course includes applications to linear algebra, including rational canonical form and Jordan canonical form.

Prerequisite(s): Pure Mathematics 431 or Mathematics 411. Pure Mathematics 431 is recommended.

Antirequisite(s): Credit for more than one of Pure Mathematics 511, 611 and Mathematics 607 will not be allowed.

Mathematics 617 3 units; H(3-0)

(formerly Applied Mathematics 617)

**Functional Analysis**
Introduction to some basic aspects of Functional Analysis, Hilbert and Banach spaces, linear operators, weak topologies, and the operator spectrum.

Prerequisite(s): Mathematics 545 or 603.

Antirequisite(s): Credit for more than one of Applied Mathematics 617 and Pure Mathematics 617 and Mathematics 617 will not be allowed.

Mathematics 621 3 units; H(3-0)

**Complex Analysis**

Prerequisite(s): Mathematics 335 or 355 or Pure Mathematics 435 or 455.

Mathematics 625 3 units; H(3-0)

**Introduction to Algebraic Topology**
Introduction to the algebraic invariants that distinguish topological spaces. Focus on the fundamental group and its applications, and homology. Introduction to the basics of homological algebra.

Prerequisite(s): Pure Mathematics 505 and 431.

Antirequisite(s): Credit for more than one of Applied Mathematics 621 and Mathematics 621 and Mathematics 625 will not be allowed.

Mathematics 627 3 units; H(3-0)

**Algebraic Geometry**
Introduction to modern algebraic geometry sufficient to allow students to read research papers in their fields which use the language of schemes. Topics will include Spectra of rings; the Zariski topology; affine schemes; sheaves; ringed spaces; schemes; morphisms of finite type; arithmetic schemes; varieties; projective varieties; finite morphisms, unramified morphisms; etale morphisms.

Prerequisite(s): Mathematics 607.

Mathematics 631 3 units; H(3-0)

**Discrete Mathematics**
Discrete Geometry; Euclidean, spherical and hyperbolic n-spaces, trigonometry, isometries, convex sets, cones, polytopes, (mixed) volume(s), classical discrete groups, tilings, isoperimetric inequalities, packings, coverings. Graph Theory: connectivity; trees; Euler trails and tours; Hamilton cycles and paths; matchings; edge colourings; vertex colourings; homomorphisms; plane and planar graphs; extremal graph theory and Ramsey theory. 631.01. Discrete Geometry 631.03. Graph Theory

Prerequisite(s): Consent of the Department.

Mathematics 635 3 units; H(3-0)

**Geometry of Numbers**
The interplay of the group-theoretic notion of lattice and the geometric concept of convex set,
the lattices representing periodicity, the convex sets geometry. Topics include convex bodies and lattice points, the critical determinant, the covering constant and the inhomogeneous determinant of a set, Star bodies, methods related to the above, and homogeneous and inhomogeneous forms.

**Prerequisite(s):** Consent of the Department.

**Mathematics 637** 3 units; H(3-0)

**Infinite Combinatorics**
An excursion into the infinite world, from Ramsey Theory on the natural numbers, to applications in Number Theory and Banach Spaces, introduction to tools in Model Theory and Logic, fascinating homogeneous structures such as the rationals and the Rado graph, and possibly further explorations into the larger infinite world.

**Prerequisite(s):** Consent of the Department.

**Mathematics 661** 3 units; H(3-0)

**Scientific Modelling and Computation I**
The Convex Optimization: an introduction to modern convex optimization, including basics of convex analysis and duality, linear conic programming, robust optimization, and applications. Scientific Computation: an introduction to both the methodological and the implementation components underlying the modern scientific computations with the natural emphasis on linear algebra, including modern computing architectures and its implications for the numerical algorithms. Numerical Differential Equations: fundamentals of solving DEs numerically addressing the existence, stability and efficiency of such methods.

**Mathematics 663** 3 units; H(3-0)

**Applied Analysis**
Interior Point Methods: exposes students to the modern IPM theory with some applications, to the extent that at the end of the course a student should be able to implement a basic IPM algorithm. Theoretical Numerical Analysis: provides the theoretical underpinnings for the analysis of modern numerical methods, covering topics such as linear operators on normed spaces, approximation theory, nonlinear equations in Banach spaces, Fourier analysis, Sobolev spaces and weak formulations of elliptic boundary value problems, with applications to finite difference, finite element and wavelet methods. Differential Equations: essential ideas relating to the analysis of differential equations from a functional analysis point of view. General topics include Hilbert spaces and the Lax-Milgram's theorem, variational formulation of boundary value problems, finite element methods, Sobolev spaces, distributions, and pseudo-differential operators.

**Mathematics 667** 3 units; H(3-0)

**Introduction to Quantum Information**
Focus on the mathematical treatment of a broad range of topics in quantum Shannon theory. Topics include quantum states, quantum channels, quantum measurements, completely positive maps, Neumark's theorem, Stinespring dilation theorem, Choi-Jamiolkowski isomorphism, the theory of majorization and entanglement, the Peres-Horodecki criterion for separability, Shannon's noiseless and noisy channel coding theorems, Lieb's theorem and the strong subadditivity of the von Neumann entropy, Schumacher's quantum noiseless channel coding theorem, and the Holevo-Schumacher-Westmoreland theorem.

**Prerequisite(s):** Applied Mathematics 411 or Physics 443.

**Mathematics 669** 3 units; H(3-0)

**Stochastic Calculus for Finance**
Martingales in discrete and continuous time, risk-neutral valuations, discrete- and continuous-time (B,S)-security markets, the Cox-Ross-Rubinstein formula, Wiener and Poisson processes, Itô's formula, stochastic differential equations, Girsanov's theorem, the Black-Scholes and Merton formulas, stopping times and American options, stochastic interest rates and their derivatives, energy and commodity models and derivatives, value-at-risk and risk management.

**Prerequisite(s):** Applied Mathematics 481.

**Mathematics 681** 3 units; H(3-0)

**Computational Finance**
Basic computational techniques required for expertise quantitative finance. Topics include basic econometric techniques (model calibration), tree-based methods, finite-difference methods, Fourier methods, Monte Carlo simulation and quasi-Monte Carlo methods.

**Prerequisite(s):** Applied Mathematics 481 and 691.

**Mathematics 683** 3 units; H(3-0)

**Introduction to Quantum Information**
Focus on the mathematical treatment of a broad range of topics in quantum Shannon theory. Topics include quantum states, quantum channels, quantum measurements, completely positive maps, Neumark's theorem, Stinespring dilation theorem, Choi-Jamiolkowski isomorphism, the theory of majorization and entanglement, the Peres-Horodecki criterion for separability, Shannon's noiseless and noisy channel coding theorems, Lieb's theorem and the strong subadditivity of the von Neumann entropy, Schumacher's quantum noiseless channel coding theorem, and the Holevo-Schumacher-Westmoreland theorem.

**Prerequisite(s):** Applied Mathematics 411 or Physics 443.

**Mathematics 669** 3 units; H(3-0)

**Stochastic Calculus for Finance**
Martingales in discrete and continuous time, risk-neutral valuations, discrete- and continuous-time (B,S)-security markets, the Cox-Ross-Rubinstein formula, Wiener and Poisson processes, Itô's formula, stochastic differential equations, Girsanov's theorem, the Black-Scholes and Merton formulas, stopping times and American options, stochastic interest rates and their derivatives, energy and commodity models and derivatives, value-at-risk and risk management.

**Prerequisite(s):** Applied Mathematics 481.

**Mathematics 681** 3 units; H(3-0)

**Computational Finance**
Basic computational techniques required for expertise quantitative finance. Topics include basic econometric techniques (model calibration), tree-based methods, finite-difference methods, Fourier methods, Monte Carlo simulation and quasi-Monte Carlo methods.

**Prerequisite(s):** Applied Mathematics 481 and 691.

**Mathematics 683** 3 units; H(3-0)

**Prerequisite(s):** Applied Mathematics 481 and 691.

**Mathematics 683** 3 units; H(3-0)
Courses of Instruction

Mathematics 685 3 units; H(3-0)

Stochastic Processes
Stochastic processes are fundamental to the study of mathematical finance, but are also of vital importance in many other areas, from neuroscience to electrical engineering. Topics to be covered: Elements of stochastic processes, Markov chains and processes, Renewal processes, Martingales (discrete and continuous times), Brownian motion, Branching processes, stationary processes, Diffusion processes, The Feynman-Kac formula, Kolmogorov backward/forward equations, Dynkin’s formula.

Prerequisite(s): Consent of the Department

Advanced Mathematical Finance I
Topics include specific areas of mathematical finance and build on Mathematics 681.

Lévy Processes (LP); fundamental concepts associated with LP such as infinite divisibility, the Lévy-Khintchine formula, the Lévy-Itô decomposition, subordinators, LP as time-changed Brownian motions, and also dealing with semi-groups and generators of LP; the Itô formula for LP; the Girsanov theorem; stochastic differential equations driven by LP; the Feynman-Kac formula; applications of LP and numerical simulation of LP;

Credit Risk: corporate bond markets, modelling the bankruptcy risk of a firm, and understanding how corporate bonds are priced.

691.01 Lévy Processes

691.03. Credit Risk

Prerequisite(s): Mathematics 681.

Mathematics 693 3 units; H(3-0)

Advanced Mathematical Finance II
Topics include specific areas of mathematical finance and build on Mathematics 681 and 683.

Monte Carlo Methods for Quantitative Finance: random number generation, simulation of stochastic differential equations, option valuation, variance reduction techniques, quasi-Monte Carlo methods, computing ‘greeks’; valuation of path-dependent and early exercise payoffs; applications to risk management; Markov Chain Monte Carlo methods.

Energy, Commodity and Environmental Finance: energy and commodity markets; spot, futures, forwards and swap contracts; the theory of storage; stochastic models for energy prices; model calibration; emissions market modelling; weather derivatives; energy risk management; energy option valuation.

693.01 Monte Carlo Methods for Quantitative Finance

693.03. Energy, Commodity and Environmental Finance

Prerequisite(s): Mathematics 681 and 683.

In addition to the numbered and titled courses shown above, the department offers a selection of advanced level graduate courses specifically designed to meet the needs of individuals or small groups of students at the advanced doctoral level. These courses are numbered in the series 800.01 to 899.99. Such offerings are, of course, conditional upon the availability of staff resources.

Mechanical Engineering

ENME

Instruction offered by members of the Department of Mechanical and Manufacturing Engineering in the Schulich School of Engineering.

Department Head – R. Brennan

Co-Director (Mechanical Engineering Program) – L. Sudak, A. Budiman

Co-Director (Graduate Program, Mechanical and Manufacturing Engineering) – T. Freiheit

Graduate Courses

Mechanical Engineering 603 3 units; H(3-0)

Physical Fluid Dynamics
Physical phenomena of incompressible fluid motion for a variety of flows, e.g. pipe and channel flow, flow past a cylinder, and convection in horizontal layers. The derivation of the basic equations of fluid mechanics using Cartesian tensor notation. High and low Reynolds number flows including some solutions of the viscous flow equations, inviscid flow, and elementary boundary layer theory. Thermal free convective flows.

Mechanical Engineering 605 3 units; H(3-0)

Combustion Processes

Mechanical Engineering 607 3 units; H(3-0)

Mechanics of Compressible Flow

Mechanical Engineering 613 3 units; H(3S-0)

Research Seminar I
Reports on studies of the literature or of current research. This course is compulsory for all MSE and thesis-route MEng students and must be completed before the thesis defence.

NOT INCLUDED IN GPA

Mechanical Engineering 615 3 units; H(3-0)

Instrumentation
Basic principles relating to measurement systems. Static and dynamic characteristics of signals. Measurement system behaviour. Application of probability and statistics to measurement systems. Uncertainty analysis. Data acquisition: analog and digital devices and sampling theory. Application of theory to various measurement systems such as pressure, velocity, strain, concentration, temperature.

Mechanical Engineering 619 3 units; H(3-0)

Special Problems
Designed to provide graduate students, especially at the PhD level, with the opportunity of pursuing advanced studies in particular areas under the direction of a faculty member. Students would be required to consider problems of an advanced nature.

MAY BE REPEATED FOR CREDIT

Mechanical Engineering 631 3 units; H(3-0)

Numerical Methods for Engineers
Introduction, mathematical modelling, sources of errors in the process of numerical analysis and solution methodology; Elements of numerical analysis, Taylor series, round-off error, truncation error, concept of stability, consistency and convergence; Linear algebra, normal forms, Gauss elimination method, LU-decomposition, tridiagonal systems of equations; Iterative methods, Jacobi, Gauss-Seidel, SOR, SSOR methods, conjugate gradient methods and preconditioning and principles of the multi-grid methods; Elliptic “equilibrium” equation, Laplace and Poisson equations, finite difference and finite control volume concepts and stability analysis; Parabolic equations: explicit, implicit and Crank-Nicolson methods, time-splitting method, method of lines, Stability analysis; Hyperbolic equations; Introduction to other methods; future challenging problems.

Mechanical Engineering 633 3 units; H(3-0)

Mathematical Techniques for Engineers
Application of mathematical techniques to the solution of ordinary and partial differential equations arising in engineering problems. Methods that will be considered are: separation of variables, method of characteristics, transform methods and complex variable methods.

Mechanical Engineering 637 3 units; H(3-0)

(Environmental Engineering 673)

Thermal Systems Analysis
Fundamentals of thermodynamics, fluid mechanics and heat transfer; thermal and energy systems, heat exchangers, co-generation; Second law of thermodynamics and concept of entropy generation and thermo-economics; Environmental issues and pollution control; Renewable energy system; Co-generation design; Heat exchanger design; Energy storage systems; Optimization process.

Prerequisite(s): Engineering 311.

Mechanical Engineering 639 3 units; H(3-0)

Numerical Methods for Computational Fluid Dynamics

Mechanical Engineering 643 3 units; H(3-0)

Advanced Control Systems
Introduction to multivariable systems; state space models; analysis of linear systems; stability; Cayley-Hamilton theorem; controllability and observability; state feedback control; pole placement designs; introduction to linear optimal control and estimation; Kalman filtering; separation theorem and duality; performance specifications; controller reduction concepts; introduction to robust control.
Medical Physics MDPH

Courses of Instruction

**Medical Engineering 643** 3 units; H(3-0)

Optimal and Adaptive Control
Discrete time and sampled-data system models and properties; discrete time domain controller design principles; system identification using least-squares analysis; self-tuning control; indirect adaptive control; model reference adaptive control; sliding mode control in continuous and discrete time; optimal design of sliding mode controllers; sensitivity functions and their role in control theoretical performance specification; robust stability and robust performance objectives; Kharitonov stability.

Mechanical Engineering 650 3 units; H(3-0)

Mobile Robotics

Prerequisite(s): Mechanical Engineering 505, or equivalent.

**Mechanical Engineering 653** 3 units; H(3-0)

Continuum Mechanics in Engineering
Review of linear algebra and tensor analysis; kinematics of the deformation; deformation and strain tensors; strain rates; balance equations and equations of motion; stress principle; stress power and conjugated stress-strain couples; stress rates; elements of Lagrangian and Hamiltonian Mechanics for discrete and continuum systems; thermomechanics and constitutive theory; isotropic and anisotropic hyperelasticity; composite materials.

Mechanical Engineering 660 6 units; F(0-3)
(Mechanical Engineering 560)

Mechatronics Design Laboratory
A hands-on laboratory experience in the design and analysis of microprocessor-controlled electro-mechanical components. Laboratory projects in which teams will configure, design, and implement mechatronic systems. Aliasing, quantization, electronic feedback, power amplifiers, digital logic, encoder interfacing, and motor control leading to prototyping and design of commercially viable products. Lectures will cover comparative surveys, organizational principles, and integrated design issues associated with mechanical, electrical and control components.

Mechnanical Engineering 663 3 units; H(3-1/2)
(Medical Science 663)
(Kinesiology 663)

Advanced Muscle Mechanics and Physiology
A look at problems associated within muscle mechanics and contractility. Also the use of muscle mechanics as a scientific discipline to critically learn and evaluate the scientific process. Basic anatomy and physiology of muscle contraction including the cross-bridge theory, and the force-length, force-velocity and force-time relationships of actively and passively contracting muscles will also be covered.

Prerequisite(s): Consent of the Faculty.

**Mechanical Engineering 665** 3 units; H(3-0)

Elements of Materials Engineering
The course covers a variety of material aspects and provides a fundamental understanding of Materials Science and Engineering. The course emphasizes the understanding of advanced dialation theory and its application in illustration of diffusion, deformation and fracture of metals. Fundamentals of material strengthening mechanisms are covered. Practical aspects that are relevant to material uses and failures, such as environmental-induced cracking, creep, fatigue, strain aging and corrosion, are discussed. Typical surface analysis techniques for material characterization are introduced.

**Mechanical Engineering 667** 3 units; H(3-0)

Fracture Mechanics
Basic fracture theory, failure criteria, overview of fracture mechanics, brittle and ductile failure, crack tip parameters, geometric considerations, methods of analysis, fracture toughness and testing standards. Applications in design, fatigue subsurface crack growth, creep and impact.

**Mechanical Engineering 669** 3 units; H(3-0)

Fatigue of Materials

**Mechanical Engineering 683** 3 units; H(3-0)

Applications of 3D Rigid Body Mechanics in Biomechanics
Applications of 3D motion analysis and rigid body mechanics to musculoskeletal system locomotion, and movement. Experimental, theoretical and numerical methods for optical motion imaging, 3D analysis of joint kinematics and kinetics, joint angle representations, prediction of joint forces, data analysis and filtering, error propagation, inverse and forward dynamics approaches, and applications to clinical and orthopaedic engineering.

**Mechanical Engineering 685** 3 units; H(3-3)
(Medical Science 685)

Biomechanics of Human Movement

Prerequisite(s): Consent of the Faculty.

Antirequisite(s): Credit for more than one of Mechanical Engineering 665, Medical Science 685 and Kinesiology 685 is not allowed.

**Mechanical Engineering 698** 6 units; F(0-4)

Graduate Project
Individual project in the student’s area of specialization under the guidance of the student’s supervisor. A written proposal, one or more written progress reports, and a final written report are required. An oral presentation is required upon completion of the course. Open only to students in the MEng (courses only) program.

**Mechanical Engineering 713** 3 units; H(3S-0)

Research Seminar II
Reports on studies of the literature or of current research. This course is compulsory for all PhD students and must be completed before the candidacy examination.

**Medical Physics 623** 3 units; H(3-0)

Radiological Physics and Radiation Dosimetry
Photon and electron interactions, charged particle and radiation equilibrium, cavity theory, absolute and relative dosimetry, calibration protocols.

Prerequisite(s): Consent of the Department.

**Medical Physics 625** 3 units; H(3-0)

Radiation Oncology
Clinical photon and electron beams, brachytherapy, treatment planning, radiation therapy devices, special techniques.

Prerequisite(s): Medical Physics 623 and consent of the Department.

**Medical Physics 632** 1.5 units; Q(0-1.5)

Clinical Rotation in Radiation Oncology Physics
Clinical observation of radiotherapy for cancer. Students observe the treatment process, including immobilization, CT simulation and radiotherapy treatment. Treatments observed include conventional radiotherapy, intensity modulated radiotherapy, total body irradiation, stereotactic radiosurgery, brachytherapy.

Prerequisite(s): Medical Physics 623 and consent of the Department.

**Medical Physics 633** 3 units; H(1-3)

Radiation Oncology Physics Laboratory
Absorption dose determination, dose descriptors, photon beam modelling, quality control.

Prerequisite(s): Medical Physics 623 and consent of the Department.

**Medical Physics 637** 3 units; H(3-0)

Anatomy and Statistics for Medical Physicists
Anatomy, physiology, probability, statistical inference, hypothesis testing, regression models, clinical trials, survival analysis.

Prerequisite(s): Consent of the Department.

**Medical Physics 638** 3 units; H(3-0)

Imaging for Radiation Oncology Physics
An overview of the imaging modalities used for Radiation Oncology including: CT, MRI, planar X-ray, nuclear medicine and ultrasound. Course will cover basic physics, instrumentation and application.

Prerequisite(s): Consent of the Department.

**Medical Physics 639** 3 units; H(3-0)

Radiobiology and Radiation Safety for Medical Physicists
Cell kinetics, cell survival curves, radiation pathology, fractionation, radiation safety, shielding calculations.

Prerequisite(s): Consent of the Department.

**Medical Physics 711** 3 units; H(0-8)

Clinical Competency I
This three credit hour course extends over the first year of the diploma program and consists of rotations through areas of clinical physics under the supervision of adjunct faculty. Objectives are set,
Courses of Instruction

Medical Science MDSC

Students' progress will be evaluated throughout the course with regular feedback to the student.

Prerequisite(s): Consent of the Department.

Medical Science 603 3 units; H(3-1) (Biology 603)

Biology of Laboratory Animals
Based on the Canadian Council of Animal Care Syllabus "Basic Principles of Laboratory Animal Science for Research Scientists." In addition to the study of common, research, farm and exotic animals, topics covered include ethical considerations, regulation and legislation, animal models, animal facilities and husbandry, hazard control, surgery, anaesthesiology, euthanasia and post-mortem examinations. Practical sessions will provide experience in handling and restraint of specific laboratory animals, injections, blood collection, anaesthesiology and surgery.

Prerequisite(s): Consent of the Faculty.

Note: Enrolment in this course is restricted to graduate students who will do research utilizing animals.

Medical Science 604 6 units; F(3-3)

Integrative Human Physiology
Physiology is the study of how living organisms function and encompasses the integration of processes from molecules to the whole-organism. Designed to provide the student with fundamental principles and concepts about the normal function of the major human organ systems. At the end of this course, the student should be well equipped to apply his/her acquired knowledge to solve complex physiological problems related to integrative human physiology.

Prerequisite(s): Consent of the Faculty.

Medical Science 605 3 units; H(3-0) (Computer Science 605)

Information Storage and Processing in Biological Systems
Examination of complex biological systems; concepts and fundamentals of biological solutions to information storage and processing; modelling and computer simulation of biological systems; information storage in biological molecules; genetic networks; hierarchical organization of biological information processing in signal transduction, development, evolution, and ecology; biological control systems.

Prerequisite(s): Consent of the Faculty.

Medical Science 609 3 units; H(3-0)

Gene Expression
The flow of genetic information from DNA to final protein product. The subject will be covered in two courses offered in alternating years: gene structure and regulation of transcription, including gene structure and organization, chromatin structure, regulation of transcription and post-translational processing; and the activity of genes during development including stored messenger ribonucleoprotein particles and translational control in gametes, the switch from maternal to zygote genome control of development in early embryos and the molecular basis of morphogenesis and differentiation.

Prerequisite(s): Consent of the Department.

Medical Microbiology
The basic principles of medical microbiology and the pathogenesis of infectious disease and of clinically important microbial pathogens including bacteria, viruses, parasites and fungi. Recent concepts will be described and students will be expected to present and critically discuss research advances of their choosing from the current research literature.

Prerequisite(s): Cellular, Molecular and Microbial Biology 241 and 343 or equivalent or consent of the Faculty.

Medical Science 613 3 units; H(3-0)

Advanced Studies in Microbiology
Specialized topics including basic principles of infection; spread, prevention and control of infectious diseases; mechanisms of and approaches to study bacterial pathogenesis; mechanism, methodology and modelling of gene expression.

Medical Science 619 3 units; H(4-2)

Neurosciences
Introductory neuroscience courses covering aspects of cellular, molecular, and systems physiology, neuroanatomy, and neurodevelopment.

Prerequisite(s): Must be registered in the Neuroscience Graduate Program. Consent of instructor(s) is required for all other students.

Medical Science 620 3 units; H(3-0)

Topics in Systems Physiology
Designed for students undertaking research in physiology or related disciplines with only limited prior exposure to the discipline. Introduces and discusses fundamental and current issues in physiology ranging from the basic physiological systems through to translational clinical topics. Encompasses the basic physiological mechanisms with emphasis on the role of the autonomic nervous system. Subject areas will include basic physiology of the cardiovascular, respiratory, gastrointestinal, renal, endocrine and reproductive systems.

Prerequisite(s): Consent of the Faculty.
### Courses of Instruction

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Lecture Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medical Science 621</td>
<td>3 units; H(3-0)</td>
<td>Principles of Drug Action</td>
<td>The action of chemicals and drugs on biological systems ranging from subcellular particles to the intact organism. 621.01. Basic Principles of Pharmacology&lt;br&gt;Prerequisite(s): Zoology 461, Medical Science 404 and Medical Science/Biology 501, or consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 622</td>
<td>3 units; H(3S-0)</td>
<td>Neurobiology of Mental Illness</td>
<td>Students are exposed to up-to-date research regarding the neurobiological theories of various mental illnesses (such as depression, anxiety disorders, schizophrenia, etc.). The seminar format will involve discussion in both research and review articles. The focus of discussion will be on both preclinical research and clinical studies that shed insight into the neurobiology of mental illnesses or their treatments. &lt;br&gt;Prerequisite(s): Medical Science 619.02 and registration in a Cumming School of Medicine graduate program. Consent of instructor is required for all other students. &lt;br&gt;Note: Open to Psychology graduate students and Psychiatry residents with consent of instructor.</td>
</tr>
<tr>
<td>Medical Science 623</td>
<td>3 units; H(3-1T)</td>
<td>Respiratory Science and Critical Illness</td>
<td>Respiratory physiology: including topics such as cellular, morphologic, mechanics, control of breathing, and respiratory muscles, necessary to an understanding of respiration and respiratory failure. As well, core physiology and molecular biology underlying critical illness. 623.01. Pulmonary Mechanics and Gas Exchange 623.02. Physiology of Respiration and Critical Illness 623.03. Respiratory Science: Basic 623.04. Respiratory Science: Applied&lt;br&gt;Prerequisite(s): Zoology 463 or 465 or consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 624</td>
<td>3 units; H(2-2)</td>
<td>(formerly Medical Science 751.42) Neuroanatomy</td>
<td>Detailed introduction to neuroanatomy using Homo sapiens as the primary experimental species but relying on other vertebrates for additional details. Detailed anatomic aspects of each major brain region, along with major connections and functions related to those regions will be presented. Laboratories will examine gross specimens, virtual microscopic images, and other anatomical images. &lt;br&gt;Prerequisite(s): Medical Science 619.02 or consent of instructor.</td>
</tr>
<tr>
<td>Medical Science 629</td>
<td>3 units; H(3-0)</td>
<td>Cardiovascular Dynamics</td>
<td>Includes topics such as basic physiologic mechanisms including excitation-contraction coupling, mechanics, energetics, and cardiovascular control; major diseases entities as a means of illustrating pathologic alterations in normal physiologic mechanisms; or a systematic in-depth examination of the chemicals that affect the cardiovascular system. 629.01. Cardiovascular Physiology 629.02. Cardiovascular Pathophysiology 629.03. Cardiovascular Pharmacology&lt;br&gt;Prerequisite(s): Consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 631</td>
<td>3 units; H(3-0)</td>
<td>Muscle Physiology</td>
<td>Contractile processes, excitation-contraction coupling, the control of contraction and energetics in smooth, cardiac and skeletal muscle. Molecular studies of the contractile process and of the process of excitation contraction coupling. &lt;br&gt;Prerequisite(s): Consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 633</td>
<td>3 units; H(3-0)</td>
<td>The Kidney</td>
<td>Advanced courses detailing the functional organization of the kidney at all levels, from cell to intact organism. Topics encompass basic physiological principles and their relevance to experimental medicine and therapeutics, as well as the study of disease processes, which impact kidney function. 633.01. Renal Physiology 633.02. Renal Pathophysiology 633.03. History of Renal Physiology&lt;br&gt;Prerequisite(s): Medical Science 604 or equivalent or consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 635</td>
<td>3 units; H(3-0)</td>
<td>Psychosocial Oncology</td>
<td>A seminar-based course focusing on the possible causes of psychosocial problems in cancer patients and families (medical, psychological and social) and also on how patients and families are helped through the difficult transitions resulting from a cancer diagnosis, treatment, recurrent disease, and end of life care. The course is open to health professionals and researchers, and to advanced undergraduate students in relevant disciplines. &lt;br&gt;Prerequisite(s): Consent of the Faculty. &lt;br&gt;Antirequisite(s): Credit for both Medical Science 635 and 645.14 will not be allowed. &lt;br&gt;Note: This course is open to health professionals and researchers, and to advanced undergraduate students in relevant disciplines.</td>
</tr>
<tr>
<td>Medical Science 637</td>
<td>3 units; H(3-0)</td>
<td>Gastrointestinal Physiology</td>
<td>Physiology of the gastrointestinal (GI) tract at all levels from the cell to the intact system. Medical Science 637.01 has three components 1) An introductory series of lectures covering the basic physiological principles of the regulation of the GI tract and the individual organs that comprise it or are associated with it. 2) Extended directed tutorials conducted on-line through D2L. Topics will be selected to reflect the needs and interests of the enrolled students. 3) A written term paper on a subject of the students’ own choice and pre-approved by the course co-ordinator that will also be presented orally to the class. 637.01. Organization and Function of the GI Tract&lt;br&gt;Prerequisite(s): Consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 638</td>
<td>3 units; H(4-0)</td>
<td>Mucosal Pathophysiology</td>
<td>Focuses on the physiology and pathophysiology of the gastrointestinal tract, lung and other mucosal tissues. A particular emphasis will be placed on inflammatory processes in these tissues, and how they contribute to symptom generation and tissue dysfunction. Involves independent research on the part of the students, small group sessions, written assignments and class presentations. &lt;br&gt;Prerequisite(s): Consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 639</td>
<td>3 units; H(3-0)</td>
<td>Immunology</td>
<td>Introductory and advanced courses in immunology that cover humoral and cellular immunity and the inflammatory response at the cellular, molecular, and whole organism level. Basic mechanisms that lead to immunity or to inflammatory responses. The contribution of immunological and inflammatory processes in the immunopathogenesis of disease. 639.02. Cellular and Molecular 639.04. Inflammation&lt;br&gt;Prerequisite(s): Consent of the Faculty.</td>
</tr>
<tr>
<td>Medical Science 640</td>
<td>3 units; H(3-1T)</td>
<td>Introduction to Immunology</td>
<td>Introductory immunology for graduate students who have no background in immunology in their undergraduate studies. It provides a comprehensive overview of the immune responses: antibody-antigen interaction, antibody structure, genetics and synthesis, cellular immunology, MHC, phagocytosis, and tolerance. Using this basic understanding of fundamental immune processes the involvement of the immune response in autoimmunity, hypersensitivity, tissue rejection, tumor immunology, vaccine production, viral, bacterial, fungal and parasitic infections will be discussed. Additionally, methods for the study of immunology will be covered. &lt;br&gt;Prerequisite(s): Consent of the Faculty. &lt;br&gt;Antirequisite(s): Credit for Medical Science 640 and Cellular, Molecular and Microbial Biology 527 will not be allowed. &lt;br&gt;Note: This course will share lectures with Cellular, Molecular and Microbial Biology 527 as an additional separate tutorial.</td>
</tr>
<tr>
<td>Medical Science 641</td>
<td>3 units; H(3-0)</td>
<td>Genetics</td>
<td>Advanced courses that provide in depth coverage of the research discipline of genetics, including the areas of cytogenetics, genomics, metabolic genetics, mouse genetics, population genetics, and human and medical genetics. 641.01. Advanced Genetics I 641.02. Advanced Human Cytogenetics 641.03. Advanced Genetics II 641.04. Genomics&lt;br&gt;Prerequisite(s): Consent of the instructor.</td>
</tr>
<tr>
<td>Medical Science 663</td>
<td>3 units; H(3-1/2)</td>
<td>(Kinesiology 663)/ (Mechanical Engineering 663) Advanced Muscle Mechanics and Physiology</td>
<td>A look at problems associated within muscle mechanics and contractility. Also the use of muscle mechanics as a scientific discipline to critically learn and evaluate the scientific process. Basic anatomy and physiology of muscle contraction including the cross-bridge theory, and the force-length, force-velocity and force-time relationships of actively and passively contracting muscles will also be covered. &lt;br&gt;Prerequisite(s): Consent of the Faculty.</td>
</tr>
</tbody>
</table>
| Medical Science 668 | 3 units; H(3-3) | Biotechnology Commercialization | Technology commercialization is the process of translating research results, scientific discoveries or processes and methods into a commercially useful and profitable product. Students will study the biotechnology commercialization process and will develop a mock-up i) starting with a new product or service idea, ii) carrying out the early
Courses of Instruction

stage development, iii) developing the necessary strategic and business plans, iv) securing adequate and appropriate financing, and v) marketing and selling the product. The primary deliverable will be the creation of a strategic plan for an innovative biotechnology product or service.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of the instructor(s) is required for all other students.

**Medical Science 669** 3 units; H(3S-3T)

**Clinical Trials and Bio-manufacturing**
The objective of this course is to provide general understanding and appreciation, regulatory requirements and ethical considerations around conducting clinical trials as well as bio-pharmaceutical manufacturing. An emphasis will be placed on regulatory obligations. The course will provide opportunities in writing protocols, clinical trial applications, auditing facilities and process validation.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of instructor(s) is required for all other students.

**Medical Science 670** 6 units; F(0-6)

**Practicum in Biomedical Technology**
A full course carried out in an academic or industrial setting for a period of at least twelve weeks. Students have an opportunity to apply the principles and methods of investigation learned during the Master of Biomedical Technology program and carry out related research. Practicum projects can be focused on any of the following aspects of the commercialization process: patent filing, research and development, business development, manufacturing, marketing and sales.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program.

**Note:** Completion of all other course requirements in Master of Biomedical Technology program is normally required prior to registration for this course. Exceptions must be approved by the Graduate Director.

**NOT INCLUDED IN GPA**

**Medical Science 671** 3 units; H(0-6)

**Techniques in Medical Science**
Introduction to the theory of operation of electronic devices commonly used in biophysical studies including principles of amplifiers and filters, micro- and patch electrode techniques and computer-laboratory interfacing.

**Prerequisite(s):** Consent of the Faculty.

**MAY BE REPEATED FOR CREDIT**

**Medical Science 672** 3 units; H(2-0)

**Biotechnology Business Aspects**
Aspects involved in taking an original scientific idea or discovery to a start-up company will be covered. Lecturers discuss commercialization, venture capital, business plan, patents and law, marketing.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of instructor(s) is required for all other students.

**Medical Science 673** 3 units; H(3S-0)

**Careers in Biotechnology**
A series of talks and workshops designed to provide students with practical knowledge of the biotechnology industry. In collaboration with the University of Calgary Career Services, the course covers personal and professional development planning, resume writing, networking, negotiation and interviewing skills and job search strategies specifically for the biotechnology field. This course runs during the fall and winter block weeks with additional retreat days throughout the year.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of instructor(s) is required for all other students.

**Medical Science 674** 6 units; F(3-0)

**Integrated Systems Course**
The principles of molecular and cell biology, pathology, physiology, pharmacology, microbiology and immunology as applied to new diagnostics, vaccines or therapeutics. Lectures in the two courses are in parallel and fully integrated. Both courses are required components of the MBT program. The goal of the course, with an emphasis on cellular and molecular mechanisms in health and disease, is to provide students with the skills to interface with individuals in these disciplines in the biotechnology industry. Complemented by special lectures that provide industry perspectives in these disciplines.

**674.01. Physiological and Pharmacological Aspects of Therapeutics Development**

**674.02. Molecular Cell Biology of Diagnostic and Vaccine Development**

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of the instructor(s) is required for all other students.

**Medical Science 675** 3 units; H(2-3T)

**Bioinformatics Resources for the Biologist**
This introductory graduate-level course will familiarize biologists with algorithms and search engines used to analyze nucleic acid and protein sequences and structures.

**Prerequisite(s):** Consent of the Faculty.

**Medical Science 676** 3 units; H(2.5-1)

**Scripting and Database Querying for Molecular Biologists**
Intended for biologists who wish to improve their bioinformatics analysis capabilities by learning just a small amount of query and programming syntax. The focus is on practicality rather than program theory. The course explores how to use existing tools (on the command-line and on the web) to gather and process large datasets all at once, rather than doing many individual analyses manually.

**Note:** No prior programming experience is required.

**Medical Science 677** 3 units; H(1-6)

**Directed Study in Biomedical Technology**
Lectures, seminars, term papers or training in theoretical and/or laboratory methods at the advanced level in biomedical technology or medical sciences.

**Prerequisite(s):** Consent of both the faculty member who will supervise and the MBT faculty member who will co-supervise the chosen study and must be registered in the Master of Biomedical Technology program.

**MAY BE REPEATED FOR CREDIT**

**Medical Science 678** 3 units; H(1-3T-6)

**Project in Biomedical Technology**
Students will conduct both business and laboratory-based projects throughout the year. The business-based aspect will include running a business, doing market research for companies or working with their business mentor. The laboratory-based aspect will include new diagnostics development and validation. This course will cover basic principles of project management as well as biotech lab theory and practical aspects covered via tutorials, journal club and laboratory sessions. There will be a combination of monthly meetings, lectures, lab tutorials, commercial technology reviews, tours, demos, and practical labs.

**Prerequisite(s):** Must be registered in the Biomedical Technology Graduate Program. Consent of the instructor(s) is required for all other students.

**Medical Science 679** 3 units; H(2-2)

**Fundamentals of Bioinformatics**
Foundational techniques and current research in bioinformatics are explored. Focus on biological concepts and relevant algorithms. Topics covered will include large-scale programmatic data access via data-marts and genome browsers, visualization, statistical techniques, and analysis of sequence and ‘omics’ datasets.

**Prerequisite(s):** Registration in the Bioinformatics specialization of the Biochemistry and Molecular Biology undergraduate program or consent of instructor.

**Note:** This course assumes some computational background including programming or scripting ability.

**Medical Science 683** 3 units; H(3-0)

**The Biology and Therapy of Human Cancer**
An examination and discussion of current knowledge of the molecular and cellular biology of human cancer and the scientific basis of cancer therapy. Offered in a modular format: each course will consist of one required module and two elective modules. Students can choose the elective modules from a list that is specific for each course. Modules will emphasize student presentations, critical evaluation, and discussions of current and seminal research papers on the module topic. Refer to the Southern Alberta Cancer Research Institute website at www.sacr.ucalgary.ca for more information.

683.01. Cancer Pathology, Epidemiology and Therapy
683.02. Molecular Mechanisms of Cancer
683.04. Cell Biology of Cancer

**Prerequisite(s):** Must be a Cumming School of Medicine graduate student. All other students require consent of the instructor.

**Medical Science 685** 3 units; H(3-3)

**(Mechanical Engineering 685)**

**Biomechanics of Human Movement**

**Prerequisite(s):** Consent of the Faculty.

**Antirequisite(s):** Credit for more than one of Medical Science 685, Mechanical Engineering 685 and Kinesiology 685 is not allowed.

**Medical Science 689** 3 units; H(3-0)

**Medical Imaging**
Introduction to the theory and practical applications of medical imaging. Specific courses focus on an overview of modern diagnostic imaging techniques (689.01), as well as advanced study of specific techniques including magnetic resonance...
Advanced Topics in Reproductive Health
A series of topics, ranging from basic sciences to clinical topics (including ethical issues) to increase awareness and comprehension regarding current issues in reproductive health.
Prerequisite(s): Consent of course co-ordinator and student’s supervisor, if applicable.
Note: Interest in reproductive health/reproductive biology is essential.

Medical Science 703 3 units; H(2-6)
Human Anatomy: Concepts, Exploration and Teaching
Introductory course for graduate students with an interest in mammalian morphology to human cadaver dissection, human anatomy concepts and teaching strategies within the medical professional curriculum. Weekly lectures and discussions supplement a cadaver dissection-based course intended for students interested in pursuing an academic career in a medically related field.
Prerequisite(s): Should have some previous experience with dissection. Consent of the instructor.

Medical Science 706 3 units; H(3-0)
Theory and Practice of Family Therapy
Overview of different family therapy approaches focusing on systemic assessment and systemic intervention through therapeutic interviewing. The development of student knowledge and skills in family therapy utilizing social constructionist, narrative, systemic, collaborative, and pro-feminist ideas while fostering the professional identity of the therapist.

Medical Science 707 3 units; H(2S-12)
Family Therapy Practicum
The development of conceptual and experiential expertise in working therapeutically with families.

Medical Science 708 3 units; H(3-0)
Theory and Practice of Interprofessional Psychosocial Oncology
Provides graduate students with a multidisciplinary introduction to the field of psychosocial oncology. Emphasis will be placed on understanding and interpreting the experience of cancer informed by theory, evidence and illness narratives. Case-based learning in small interprofessional groups will allow students to explore a variety of key learning themes relevant to psychosocial oncology including distress assessment, depression, anxiety, adjustment and coping, sexuality, loss and grief. Attention to diversity will be integrated throughout the course.
Prerequisite(s): Consent of the instructor.
Note: Must have an undergraduate degree in a relevant domain (including, but not limited to medicine, psychology, nursing, social work, spiritual care/theology). This is an online course.

Medical Science 710 3 units; H(3-0)
Business and Careers in Biotechnology
An overview of the biotechnology sector from several perspectives: product development, regulatory, intellectual property, market analysis and finance. This course will include series of lectures and discussions to provide both the necessary background about the biotechnology industry and an understanding of careers in the biotechnology industry.
Prerequisite(s): Must be a registered graduate student in a thesis-based Masters or Doctoral program.

Medical Science 713 3 units; H(0-3T)
Topics in Mountain Medicine and High Altitude Physiology
A tutorial-based course focused on high altitude medicine and physiology. The aim of the course is to introduce the students to the physiological adaptations of and pathophysiology associated with, the hypoxia of altitude. Students will be introduced to several diseases associated with the hypoxia of high altitude (i.e., Acute Mountain Sickness; High Altitude Pulmonary Edema, High Altitude Cerebral Edema), and the pathophysiology underlying these diseases.
Prerequisite(s): Consent of the instructor.

Medical Science 721 3 units; H(3-0)
Biochemistry and Molecular Biology
Discussions and presentations in a small group format will highlight historical and recent developments in analysis of eukaryotic genomes and control of gene expression, chromosome structure, translation, protein structure, proteomics, regulatory networks and related technologies and their applications to the study of human diseases. Additional learning objectives relate to the critical assessment of published literature as well as the development of research proposal writing and presentation skills.
Prerequisite(s): Must be registered in the Biochemistry and Molecular Biology Graduate Program. Consent of the instructor is required for all other students.

Medical Science 722 3 units; H(4-0)
The Blood Vessel
Modular course offering advanced knowledge at the cellular, molecular, and whole organism levels including the hormonal regulation of the vascular system, the interaction between endothelium and smooth muscle in the blood vessel, the molecular mechanisms underlying smooth muscle contraction and relaxation, differentiation and dedifferentiation, and the pathogenesis of vascular diseases including hypertension and atherosclerosis. Drug treatments for vascular diseases and their molecular mechanisms will also be covered.

Medical Science 740 6 units; F(3T-0)
Smooth Muscle Structure Function
An inquiry-based approach used to provide students with a broad background for the study of smooth muscle and to introduce students to current trends in the field. Students will also be introduced to the spectrum of research on smooth muscle ongoing at the University of Calgary. The subjects to be included range from the molecular biology and biochemistry of individual proteins to their function and regulation of integrated smooth muscle systems. A number of methodological approaches that are being used for the study of smooth muscle will also be discussed.
Prerequisite(s): Consent of the instructor.

Medical Science 751 3 units; H(3-0)
Topics in Medical Science
751.07. The Physiological Development of the Fetus and Newborn
751.09. Ion Channel Diseases
751.31. Joint Injury and Disease Biomechanical Focus
751.43. Orientation and Clinical Rotations for Pathologists’ Assistants
Prerequisite(s): Consent of the Faculty.
Note: Enrolment in Medical Science 751.43 is restricted to students registered in the Pathologists’ Assistant Specialization in the Medical Science (Master’s) graduate program.

Courses of Instruction

Music Performance MUPF

Instruction offered by members of Music in the School of Creative and Performing Arts in the Faculty of Arts.

Students are cautioned that notwithstanding the given prerequisite, registration in any of the performing ensembles is subject to the approval of the ensemble director.

Further information on ensembles is available at http://music.ucalgary.ca/.

Graduate Courses

Music Performance 632 6 units; F(2-3)
Advanced Choral Conducting
Prerequisite(s): Consent of the Division Chair, Music.

Music Performance 634 6 units; F(2-3)
Advanced Instrumental Conducting
Prerequisite(s): Consent of the Division Chair, Music.

Music Performance 641 3 units; H(0-4)
Advanced Chamber Ensemble I
Intensive coaching in chamber ensembles.
Prerequisite(s): Consent of the Division Chair, Music.

Music Performance 643 3 units; H(0-4)
Advanced Chamber Ensemble II
Continuation of Music Performance 641.
Prerequisite(s): Music Performance 641 or consent of the Division Chair, Music.

Nursing NURS

Instruction offered by members of the Faculty of Nursing.

Note: Where applicable, Clinical Practice courses must be taken concurrently with the theoretical components.

Graduate Courses

Nursing 601 3 units; H(3S-0)
Seminar on Special Topics Related to Health Care and Nursing
Prerequisite(s): Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 603 3 units; H(156 hours)
Independent Supervised Clinical Practicum
Prerequisite(s): Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 605 3 units; H(3S-0)
Philosophical Knowledge and Advanced Nursing Practice
Exploration of the philosophical knowledge of advanced nursing practice. A process of critical analysis, reflection and inquiry into the various philosophical approaches, ways of knowing, theories concepts and paradigms leading to a philosophically informed analysis of the knowledge practices activated during the conduct of nursing work.
Prerequisite(s): Consent of the Faculty.

Nursing 607 3 units; H(39 hours)
Independent Guided Study
Prerequisite(s): Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 609 3 units; H(3-1)
Applied Statistics for Nursing Research
The understanding of the conceptual basis, use, and pitfalls of common bio statistical methods used in the analyses of data, as well as, being able to analyze data using computer software. This course minimizes mathematical theory and concentrates on the ‘when to use’, ‘why to use’, and ‘what the results mean’ to statistical issues.
Prerequisite(s): Consent of the Faculty.

Nursing 611 3 units; H(3-0)
Theoretical Knowledge and Advanced Nursing Practice
Introduction to substantive theory related to advanced nursing practice. As students identify their population focus they will examine frameworks for advanced nursing practice that inform their care for individuals, families and communities of practice.
Prerequisite(s): Consent of the Faculty.

Nursing 617 3 units; H(3-0)
Philosophy and Practice in Palliative Care
Examination of the philosophy of palliative/hospice care, taught by faculty from many disciplines. An important focus includes the students’ self-exploration of their own beliefs, values, and attitudes about life, illness, death, and dying, and how this self-exploration shapes interactions with those we care for.
Prerequisite(s): Consent of the Faculty.

Nursing 621 3 units; H(3S-0)
Quantitative Designs and Analysis
Critical analysis of nursing research. Emphasis on the study of research designs appropriate to clinical nursing problems, measurement, reliability and validity issues, and critique criteria.
Prerequisite(s): Consent of the Faculty.

Nursing 623 3 units; H(3-0)
(formerly Nursing 601.23)
Hermeneutic Phenomenology
Inquiry into the philosophical and historical influences that have shaped hermeneutic phenomenology as an approach to nursing and health care research. Exploration of interpretive practices essential to the conduct of hermeneutic research.
Prerequisite(s): Consent of the Faculty.

Nursing 627 1.5 units; Q(18 hours)
Academic Scholarly Writing
An intensive two-day writing workshop with additional pre-course reading and writing. Students will prepare for the course by reading texts and writing scholarly accounts that may be based in their nursing practice.
Prerequisite(s): Consent of the Faculty.

Nursing 629 1.5 units; Q(18 hours)
Evidence-Informed Nursing
Building on foundations of critical inquiry by emphasizing the evaluation and interpretation of qualitative and quantitative research, students develop an enhanced ability to use systematic reviews and research-based innovations in making evidence-based decisions for client care, nursing knowledge and organizational or system improvement.
Prerequisite(s): Consent of the Faculty.

Nursing 633 3 units; H(3S-8)
Leadership in Advanced Nursing Practice and Practicum I
A critical examination of theories and principles of leadership and leadership development as it relates to individual leadership practices, leading multidisciplinary teams, and leadership within the broader health system. Students will explore and discuss the influence of leaders and leadership on the healthcare workplace, on client/population outcomes, and the health care system. In the practicum project students will utilize evidence to assess their leadership skills and competencies, and how they relate to the development and evaluation of their practicum project.
Prerequisite(s): Nursing 605 and 611.

Nursing 634 6 units; F(2S-8)
Advanced Nursing Practice: Practicums II and III
The purpose of clinical practicums II and III is to follow through with the project that was proposed in Nursing 633 including: implementing the study, analysing and interpreting the findings, writing and submitting the paper for publication and/or presenting the paper at a conference.
Prerequisite(s): Nursing 633.

Nursing 642 6 units; F(52S-180 within 8-week block)
Nurse Practitioner Practicum I and Role Integration
Building on the foundational knowledge of advanced pathophysiology, advanced health assessment and pharmacology, this course provides an opportunity for students to begin to acquire advanced knowledge and skills related to clinical diagnosis, decision-making and management of commonly presented acute and chronic health problems. Additionally this course will address issues related to nurse practitioner role integration.
Prerequisite(s): Nursing 661, 663 and 665 or equivalent, or consent of the Faculty, registration in Post-Master’s NP Diploma program or the integrated MN/NP program.
NOT INCLUDED IN GPA

Nursing 644 6 units; F(52S-180 within 8-week block)
Nurse Practitioner Practicum II
Diagnostic and management skills related to care of patients. Further development of skills in clinical history taking, physical assessment, and diagnostic testing.
Prerequisite(s): Nursing 642.
NOT INCLUDED IN GPA
Courses of Instruction

Nursing 646 6 units; F(52S-180 within 8-week block)

Nurse Practitioner Practicum I
Learning opportunities and practice experience with emphasis on clinical diagnosis, diagnostic imaging, laboratory tests, differential diagnosis, and patient management.
Prerequisite(s): Nursing 644.
NOT INCLUDED IN GPA

Nursing 650 6 units; F(16S-292 within 8-week block)

Nurse Practitioner Practicum IV
Consolidation of components of NP role in specialty focus.
Prerequisite(s): Nursing 646.
Note: NOT INCLUDED IN GPA

Nursing 661 3 units; H(4S-0)
Advanced Pathophysiology and Therapeutics
Study of pathophysiological phenomena and therapeutics at an advanced level. Classes will be a combination of didactic presentations, seminars and case studies. Students are invited to explore morbidity and mortality in the Canadian population in general and in their area of focus in particular.
Prerequisite(s): Consent of the Faculty.

Nursing 663 3 units; H(3S-3)
Pharmacotherapeutics in Advanced Nursing Practice
Principles of drug action, pharmacokinetics and pharmacotherapeutics in the context of advanced nursing practice. Opportunity to investigate pharmacotherapies specific to student’s individual client populations.
Prerequisite(s): Consent of the Faculty.

Nursing 665 3 units; H(3S-3)
Advanced Health Assessment
Builds upon fundamental health assessment skills to provide a solid foundation for advanced assessment. Focuses on history taking physical examination, diagnostic reasoning and clinical judgment, as well as selected diagnostic skills necessary for advanced practice.
Prerequisite(s): Consent of the Faculty.

Nursing 683 3 units; H(3S-0)
Qualitative Designs and Analysis
Exploration of research methods based primarily on inductive reasoning. Methods, issues and techniques of sampling, data collection, analysis, and interpretation will be explored. Experience will be provided in data collection, management, and analysis.
Prerequisite(s): Consent of the Faculty.

Nursing 701 3 units; H(3-0)
Doctoral Special Topics
Prerequisite(s): Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 705 3 units; H(3-0)
Philosophy of Science in Nursing
Exploration of major philosophical positions and their contributions to the generation and evaluation of knowledge. Examination of the development and evolution of nursing knowledge.
Prerequisite(s): Consent of the Faculty.

Nursing 707 3 units; H(39 hours)
Directed Study
Prerequisite(s): Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 711 3 units; H(2S-0)
Doctoral Scholarship in Nursing
Focus on development of a nurse scientist. Seminar discussions will address launching a viable and fundable program of research, grantmanship, managing multi-disciplinary research teams, and establishing a record of publication and dissemination.
Prerequisite(s): Consent of the Faculty.

Pharmacotherapeutics in Advanced Nursing Practice
Prerequisite(s): Nursing 662 or equivalent.

Nursing 723 3 units; H(3-0)
(formerly Nursing 701.23)

Hermeneutic Phenomenology
Inquiry into the philosophical and historical influences that have shaped hermeneutic phenomenology as an approach to nursing and health care research. Exploration of interpretive practices essential to the conduct of hermeneutic research.

Nursing 733 3 units; H(2S-0)
Doctoral Thesis Seminar
Opportunity for students to discuss development of their thesis proposal with a focus on the question, design, ethical considerations, and funding.
Prerequisite(s): Nursing 705 and one graduate-level advanced research course.
NOT INCLUDED IN GPA

Nursing 769 3 units; H(3-0)
Contemporary Issues in Health Care
Theoretical examination of concepts and research for increasing the availability and accessibility of health care. Appraisal of the relationships among leadership, policy and practice issues from a multidisciplinary perspective.
Prerequisite(s): Consent of the Faculty.

Nursing 783 3 units; H(3-0)
Advanced Qualitative Research Methods
Exploration of the philosophical foundations and practice of qualitative research methods in health care inquiry. Emphasis on interpretive assumptions and practices relevant to the conduct of qualitative research.
Prerequisite(s): Nursing 683 or equivalent.

Operations Management 601 3 units; H(3-0)
Management Science Using Spreadsheets
The modelling and analysis of quantitative problems from a variety of fields within business, with emphasis on insight for decision making. Use of optimization, simulation, decision analysis, and other techniques in spreadsheets. Spreadsheet engineering as an approach to reducing spreadsheet errors. Case studies are used to develop skill in dealing with incomplete and ambiguous information.
Prerequisite(s): Management Studies 613.

Operations Management 619 3 units; H(3-0)
Project Procurement and Logistics
Project procurement and logistics management in engineering, construction management and manufacturing, both nationally and internationally. Topics include fundamentals of procurement management, preparation of request for proposals, the selection of bidders, the evaluation of bids, supplier selection, contract management, control of inventory, handling of material flow and management of warehousing, logistics strategy and global issues.
Prerequisite(s): Business and Environment 691.

Operations Management 719 3 units; H(3-0)
Simulation of Operational Systems
Computer simulation as a decision-making methodology for all areas of organizations. Topics include model development and validation, design of simulation experiments, generation of appropriate values of random variables, interactive procedures and interpretation of results. A user-oriented language is utilized and an applied project is carried out.
Prerequisite(s): Operations Management 601 and Management Studies 613.

Operations Management 743 3 units; H(3-0)
Operations Planning and Supply Chain Management
An in-depth treatment of inventory management and operations planning as related to supply chain management. Topics treated include commonly used inventory control systems, various extensions of the basic economic order quantity model, aggregate planning, materials requirement planning, production scheduling, just-in-time manufacturing, and managing materials along the supply chain. Case studies will be used as well as illustrations of spreadsheet modelling.
Prerequisite(s): Operations Management 601 and Management Studies 613.

| Philosophy 679 3 units; H(3-0) |
| Topics in Logic MAY BE REPEATED FOR CREDIT |

| Physics PHYS |
| Instruction offered by members of the Department of Physics and Astronomy in the Faculty of Science. Department Head - R.I. Thompson Note: For listings of related courses, see Astronomy, Astrophysics, Medical Physics and Space Physics. Students intending to register in any Physics course should consult the relevant Faculty of Science Program section of this Calendar. |

| Graduate Courses   |
| Only where appropriate to a student's program may graduate credit be received for courses numbered 500-599. |
| Physics 603 3 units; H(3-0) |
| Experimental Methods of Physics Instrumentation for physical experiments. General philosophy of experimentation; signal processes; signal processing methods; instrument design and control; data acquisition and storage; specific detection methods. |
| Physics 605 3 units; H(3-0) |
| Advanced Data Analysis Methods of extraction of significant information from experimental data degraded by noise. Parametric and non-parametric statistical methods; curve fitting; spectral analysis; filtering, sampling, convolution and deconvolution techniques. |
| Physics 609 3 units; H(3-0) |
| Physics 617 3 units; H(3-0) |
| Physics 615 3 units; H(3-0) |
| Advanced Quantum Mechanics II Relativistic quantum mechanics. Topics may include Feynman path integrals. Scattering theory. Charged particles in electric and magnetic fields. Approximation methods. Quantum field theory. |
| Physics 617 3 units; H(3-0) |
| Statistical Physics I Topics: Theory of equilibrium and non-equilibrium critical phenomena and methods to study fluctuating systems selected from the following list of topics: Percolation, scaling theory, phase transitions, Landau-Ginzburg theory, lattice models, Monte Carlo methods, renormalization group, self-organized criticality, theory of random graphs; Brownian motion, random walks and diffusion, Fokker-Planck-Equation, Markov processes, stochastic differential equations, first passage times. |
| Physics 619 3 units; H(3-0) |
| Physics 621 3 units; H(3-0) |
| Physics 629 3 units; H(3-0) |
| Gravitation An introduction to Einstein's theory of gravitation. Applications to the solar system, black holes, and cosmology. |
| Physics 663 3 units; H(2-1) (Geology 663) |
| Applications of Stable Isotopes Application of stable isotope techniques with special focus on Hydrogeology, Geology and Environmental Sciences. The use of isotopes to understand the water, carbon, nitrogen and sulphur cycles is demonstrated. Topics include hydrology, paleoclimates, geothermometry, fossil fuels explo-
of the aspects of quality presentations and exercises aimed at improving student speaking skills, and will be taken by graduate students in their first fall term in program. Effective Scientific Writing courses provide students with instruction on preparing quality scientific papers, as well as exercises aimed at improving students' writing skills, and will be taken during students' second fall term in program. The Graduate Seminar courses will be run each winter, and provide all students enrolled in each course the opportunity to present one or two scientific talks, as well as to provide peer feedback to other students in the course. At the end of each Graduate Seminar term, the course instructor(s) will identify those students who have reached an acceptable level of scientific speaking competency and exempt these students from any further Physics 691 Graduate Seminar courses for their current degrees.

MAY BE REPEATED FOR CREDIT

NOT INCLUDED IN GPA

Topics in Contemporary Physics

Topics will be from the research areas of staff members.

MAY BE REPEATED FOR CREDIT

Plant Biology 693 3 units; H(0-6)

Plant Biology Microtechniques

Principles and practice of preparation of plant tissues for light and electron microscopy. Study, Plastic embedding techniques, histochemistry, immunohistochemistry, quantitative cytochemistry, fluorescence microscopy, confocal laser scanning microscopy and photomicroscopy are included.

Note: Offered during odd-even dated academic years.

**Political Science POLI**

Instruction offered by members of the Department of Political Science in the Faculty of Arts.

**Graduate Courses**

Courses numbered 600–799 are offered as either special reading courses or as seminars, as required. Students should consult the Department regarding enrolment in these courses.

**Political Science 605** 3 units; H(3S-0)

**Advanced Introduction to Sexual Ethics**

An advanced introduction to theorizing human sexuality using works of historical and contemporary political philosophy. Topics may include: the nature of love and friendship, the good of marriage, limits of sexuality, and the place of justice, equality, and shame.

Antirequisite(s): Credit for both Political Science 605 and 505 will not be allowed.

**Political Science 615** 3 units; H(3S-0)

**Advanced History of Political Thought**

An intensive study of selected major political thinkers within the history of political thought.

**Political Science 617** 3 units; H(3-0)

**Advanced Political Theory**

Discussion of contemporary topics in political philosophy. Emphasis on analysis of problems rather than history of ideas.

**Political Science 619** 3 units; H(3-0)

**War and Interpretation**

An examination of the philosophical justifications offered to defend the use of military force, based particularly on the analysis of texts in the history of Western political philosophy.

**Political Science 621** 3 units; H(3-0)

**Canadian Political Institutions**

Examination of the structure and operation of the central institutions of the Canadian state, including the constitution, federalism, parliamentary government, and political parties.

**Political Science 623** 3 units; H(3-0)

**Canadian Political Process**

Examination of Canadian political behaviour within its institutional context, including points in parties, interest groups, voting, and socialization. Computer use is optional.
Psychology PSYC

Courses of Instruction

Political Science 631 3 units; H(3-0)
Parties, Elections and Representation
An examination of political parties and elections in both established and emerging democracies as a means of understanding the nature of political representation in modern representative democracies.

Political Science 633 3 units; H(3S-0)
U.S. Security Policy
An examination of U.S. security policy, with an emphasis both on how U.S. security policy is made and on the main contemporary security issues the U.S. faces today.

Political Science 641 3 units; H(3-0)
Selected Topics in Public Law
Examination of the political, philosophical, and institutional dimensions of selected public law issues, with particular reference to judicial and quasi-judicial tribunals as policy-making institutions. Consult the Department for information on choice of topics.

Political Science 643 3 units; H(3-0)
Law and Armed Conflict
An examination of key texts and topics concerning the evolution, conceptualization, codification, and practical application of the laws of armed conflict. Topics may include the historical and philosophical development of the customary and codified laws of armed conflict, military law and military training and education, and the use of law to punish and deter war crimes.

Political Science 651 3 units; H(3-0)
Policy Studies
Critical review of major themes, issues, and approaches in the study and evaluation of public policy.

Political Science 653 3 units; H(3-0)
Gender and Public Policy
Explores the gendered impact of a range of public policies and also explores the influence of gender norms and ideas on the formulation of public policy. Topics covered include gender-based policy analysis, gender and the welfare state, family and child-care policies, policies to address gender inequalities in the labour market and workplace, and reproductive rights policies.

Political Science 671 3 units; H(3-0)
Advanced Comparative Politics: Political Development
Analysis of comparative methods and paradigms of political development.

Political Science 673 3 units; H(3-0)
Advanced Comparative Politics: Institutions and Systems
Comparative analysis of political institutions and systems.

Political Science 675 3 units; H(3-0)
Selected Topics in Advanced Comparative Politics
Selected regions and topics in Comparative Politics.
MAY BE REPEATED FOR CREDIT

Political Science 681 3 units; H(3-0)
Advanced Analysis of International Relations
Selected issues and approaches in the analysis of world politics.

Political Science 683 3 units; H(3-0)
Advanced Studies in Foreign Policy
Selected themes in the formation and implementation of foreign policies.

Political Science 684 3 units; H(3-0)
Human Rights and Humanitarianism
An advanced introduction to the principal contemporary debates in the field of human rights and humanitarian politics.
Antirequisite(s): Credit for both Political Science 684 and 571 will not be allowed.

Political Science 685 3 units; H(3-0)
Strategic Studies
Advanced seminar in major topics in strategic studies, such as arms control, deterrence, and other military doctrines.

Political Science 687 3 units; H(3S-0)
Advanced Studies in Canadian Arctic Security
The Canadian Arctic is an emerging area of concern due to changes scarcely imaginable even a few years ago. Examines the nature of some of these changes—e.g., climate change and the northern seas' dramatically changing ice conditions, growing recognition of the region’s resource wealth, and evolving international relations in the circumpolar region—and what they mean for Canadian Arctic security.
Antirequisite(s): Credit for both Political Science 687 and 523 will not be allowed.

Political Science 689 3 units; H(3-0)
Unconventional Warfare
Analysis of warfare conducted by, or against, sub-state groups. This may include in-depth studies of guerrilla warfare, asymmetric conflict, or terrorism.

Political Science 691 3 units; H(3-1)
Quantitative Analysis in Political Science
Examination of empirical research methods and techniques of quantitative analysis in the study of political phenomena. Computer use is required.

Political Science 693 3 units; H(3-0)
Advanced Quantitative Analysis in Political Science
Examination of advanced empirical research methods and techniques of multivariate quantitative analysis in the study of political phenomena.
Prerequisite(s): Political Science 691.

Political Science 699 3 units; H(3-0)
Qualitative Analysis in Political Science
An introduction to qualitative research methods in Political Science. Topics may include qualitative methodology, elite interviewing, focus groups, content analysis, case studies and qualitative data analysis.
Prerequisite(s): Political Science 691.

Political Science 715 3 units; H(3-0)
Special Topics in Political Theory
MAY BE REPEATED FOR CREDIT

Political Science 721 3 units; H(3-0)
Special Topics in Canadian Politics
MAY BE REPEATED FOR CREDIT

Political Science 723 3 units; H(3-0)
Special Topics in Political Science
MAY BE REPEATED FOR CREDIT

Political Science 725 3 units; H(3-0)
Special Topics in Public Administration
MAY BE REPEATED FOR CREDIT

Political Science 741 3 units; H(3-0)

Political Science 781 3 units; H(3-0)
Special Topics in International Relations
MAY BE REPEATED FOR CREDIT

Political Science 791 3 units; H(3-0)
Scope and Methods in Political Science
Advanced seminar covering various approaches, topics, methods and theories employed in the discipline of political science.
MAY BE REPEATED FOR CREDIT

Each year, depending on the needs of students, a number of 600- and 700-level graduate courses are offered from the foregoing list. In addition to the numbered and titled courses shown above, the Department offers a selection of advanced level graduate courses specifically designed to meet the needs of individuals or small groups of students. These courses are numbered in the series 800.01 to 899.99. Such offerings are, however, contingent upon the availability of staff resources.

Psychology PSYC

Instruction offered by members of the Department of Psychology in the Faculty of Arts.

Graduate Courses

Psychology 601 3 units; H(3-0)
History and Systems of Psychology
History of psychological concepts in Western culture, major theoretical systems of twentieth century psychology, foundational assumptions of theories in contemporary psychology.
Prerequisite(s): Consent of the Department.

Psychology 607 3 units; H(3-0)
Advanced Research Design and Methodology in Psychology
Survey of advanced topics in the conduct of psychological research including issues in philosophy of science; origins of research ideas; validity and reliability; measurement; experimental, quasi-experimental, and non-experimental designs; survey research; specialized methods such as computer simulation, psychophysiological methods, event-sampling, online data collection, and cognitive procedures; and ethics.
Prerequisite(s): Consent of the Department.

Psychology 611 3 units; H(3-3)
Advanced Qualitative Inquiry in Psychology
Qualitative research designs and historical research in psychology. Advanced study of selected qualitative approaches in psychology to include research design, methods, and analysis. Specific topics covered include foundations of qualitative research, evaluation and practical techniques including computerized analysis.
Prerequisite(s): Consent of the Department.

</table>
| PSY613   | 3     |                 | Psychology 613 3 units; H(3-3)  
Signal and Systems Analysis in Behavioural Research  
Application of signal and systems analysis to behavioural neuroscience and psychophysica.  
Prerequisite(s): Consent of the Department. |
| PSY615   | 3     |                 | Psychology 615 3 units; H(3-3)  
Analysis of Variance  
Applications of the general linear model to research design and analysis. Topics include analysis of variance, regression, and analysis of covariance.  
Prerequisite(s): Consent of the Department. |
| PSY617   | 3     |                 | Multivariate Analysis  
Multivariate techniques and design issues, including canonical correlation, discriminant analysis, multivariate analysis of variance, multivariate regression, principal components analysis and factor analysis.  
Prerequisite(s): Consent of the Department. |
| PSY619   | 3     |                 | Special Topics in the Design of Psychological Research  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY620   | 3     |                 | Advanced Topics in Brain and Cognitive Sciences  
An advanced survey of some of the fundamental issues and recent developments in the Brain and/ or Cognitive Sciences. Topics will vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY630   | 3     |                 | Advanced Topics in Social and Theoretical Psychology  
An advanced survey of some of the fundamental issues and recent developments in Social and/or Theoretical Psychology. Topics will vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY639   | 3     |                 | Advanced Industrial and Organizational Psychology  
Application of psychological principles, research and methods relating to human interactions and performance in work settings.  
Prerequisite(s): Consent of the Department. |
| PSY641   | 3     |                 | Advanced Topics in Health Psychology  
Introduces students to current research issues in health psychology. Focuses primarily on issues related to the study of chronic illnesses and evaluates the role of psychological/behavioural factors in: the etiology of disease, disease prevention, adaptation to illness, and disease progression.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY650   | 6     |                 | Research Seminar in Clinical Psychology  
An introduction to research and design issues in clinical psychology.  
Note: Open only to students enrolled in the Clinical Psychology program. MAY BE REPEATED FOR CREDIT |
| PSY651   | 3     |                 | Psychopathology  
Current theory, issues, and research regarding the epidemiology, etiology, diagnosis, and prognosis of psychopathology. Implications for assessment and treatment. |
| PSY659   | 3     |                 | Ethics and Professional Issues in Clinical Psychology  
Ethical and legal standards for clinical psychologists. An introduction to professional issues in contemporary clinical practice.  
Note: Open only to students enrolled in the Clinical Psychology program. |
| PSY660   | 6     | F(0-14)         | Summer Practicum in Clinical Psychology  
Supervised training experience in an approved clinical setting. Provides exposure to basic issues and techniques in the practice of psychological assessment.  
Note: Open only to students enrolled in the Clinical Psychology program. MAY BE REPEATED FOR CREDIT |
| PSY671   | 3     |                 | Psychological Assessment of Adults  
An overview of theoretical, professional, and ethical issues in the psychological assessment of adult clinical populations. Instruction in the administration and interpretation of assessment procedures for adults including interviews, behavioural assessments, and selected intellectual and personality tests. Supervised practical experience in the application of adult assessments in a relevant clinical setting.  
Note: Open only to students enrolled in the Clinical Psychology program. |
| PSY673   | 3     |                 | Psychopathology and Psychological Assessment of Children  
An overview of theoretical, professional and ethical issues in the psychopathology and psychological assessment of child clinical populations. Instruction in the administration and interpretation of child and family assessment procedures including interviews, behavioural assessments, and selected psychological tests. Supervised practical experience in the application of child and family assessments in a relevant clinical setting.  
Note: Open only to students enrolled in the Clinical Psychology program. |
| PSY681   | 3     |                 | Adult Psychotherapy  
Theory, research, and practice in adult psychotherapy and behaviour change. Supervised exposure to the practice of adult psychotherapy in a relevant clinical setting.  
Note: Open only to students enrolled in the Clinical Psychology program. |
| PSY683   | 3     |                 | Child Psychotherapy  
Theory, research, and practice in child and family psychotherapy and behaviour change. Supervised exposure to the practice of child and family psychotherapy in a relevant clinical setting.  
Note: Open only to students enrolled in the Clinical Psychology program. |
| PSY700   | 3     |                 | Integrative Seminar in Psychology  
Selected interdisciplinary topics in Psychology. Topics will vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY702   | 3     |                 | Research in Brain and Cognitive Sciences  
Completion of a research project in Brain and/or Cognitive Sciences conducted under the supervision of a faculty member. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY703   | 3     |                 | Research in Social and Theoretical Psychology  
Completion of a research project in the areas of Social and/or Theoretical Psychology conducted under the supervision of a faculty member. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY709   | 3     |                 | Research in Industrial/Organizational Psychology  
Completion of a research project in Industrial/ Organizational Psychology conducted under the supervision of a faculty member. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY710   | 6     | F(3S-0)         | Integrative Seminar in Psychology  
Selected interdisciplinary topics in Psychology. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY712   | 6     | F(0-3)          | Research in Brain and Cognitive Sciences  
Completion of a research project in Brain and/or Cognitive Sciences conducted under the supervision of a faculty member. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY713   | 6     | F(0-3)          | Research in Social and Theoretical Psychology  
Completion of a research project in the areas of Social and/or Theoretical Psychology conducted under the supervision of a faculty member. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY720   | 3     |                 | Seminar in Brain and Cognitive Sciences  
Selected topics in Brain and/or Cognitive Sciences. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
| PSY730   | 3     |                 | Seminar in Social and Theoretical Psychology  
Selected topics in Social and/or Theoretical Psychology. Topics may vary.  
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT |
Courses of Instruction

Psychology 739 3 units; H(3S-0)

Seminar in Industrial/Organizational Psychology
Application of psychological principles and methods to business, industry and other organizational settings.
Prerequisite(s): Psychology 639.
MAY BE REPEATED FOR CREDIT

Psychology 750 1.5 units; Q(3S-0)

Advanced Seminar in Clinical Psychology
A doctoral level seminar in advanced topics in the practice of clinical psychology.
750.01. Psychopharmacology
750.02. Neuropsychology
750.05. Diversity Issues in Clinical Psychology
750.06. Clinical Geropsychology
750.09. Addictions
750.10. Health Psychology
750.11. Eating Disorders
750.12. Consultation/Supervision

Note: Open only to students enrolled in the Clinical Psychology program.
NOT INCLUDED IN GPA

Special Topics in Adult Psychopathology
A specialized topic course in the area of adult psychopathology. Course offerings will vary from year to year and may include such topics as: schizophrenia, substance abuse, suicide, mental health delivery systems, or computer applications in clinical psychology.
MAY BE REPEATED FOR CREDIT

Psychology 760 6 units; F(1-7)

Specialty Practicum in Clinical Psychology I
Supervised training experience in an approved clinical setting. Provides in-depth exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Note: Open only to students enrolled in the Clinical Psychology program.
NOT INCLUDED IN GPA

Psychology 762 6 units; F(1-7)

Specialty Practicum in Clinical Psychology II
Supervised training experience in an approved clinical setting. Provides advanced in-depth exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Note: Open only to students enrolled in the Clinical Psychology program.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Psychology 765 3 units; H(1-7)

Practicum in Clinical Psychology
Supervised training experience in an approved clinical setting. Provides exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Note: Open only to students enrolled in the Clinical Psychology program.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Psychology 778

Pre-Doctoral Internship in Clinical Psychology
A full calendar year, full-time (or two-years, half-time) supervised training experience in an approved clinical setting. Intensive exposure to various professional issues, the opportunity to work with a diverse range of clinical populations and problems, and advanced training in the use of specific psychological assessment and intervention strategies.
Note: Open only to students enrolled in the Clinical Psychology program.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Public Policy PPOL

Instruction offered by members of the School of Public Policy and individual faculties.

Public Policy 601 3 units; H(3-0)

Foundations I
This preparatory course covers the foundations necessary to understand and apply economic analysis and it covers selected topics relevant to the core courses listed below.
NOT INCLUDED IN GPA

Public Policy 603 3 units; H(3-0)

Foundations II
This preparatory course covers the foundations of basic empirical analysis, including quantitative and qualitative research methods.
NOT INCLUDED IN GPA

Public Policy 605 3 units; H(3-0)

Markets and Public Policy
The role of markets in the allocation of resources and the determination of income. Sources of market failure, and the appropriate public policy response to those failures, are examined. Students learn how private firms make decisions, and how they respond to policy initiatives.

Public Policy 607 3 units; H(3-0)

Politics and Collective Choice
How public policy issues emerge and how they are developed, refined, and influenced by the political process. The roles and influences of NGOs, interest groups, the media, political parties, and social protest on the development of new public policies are examined from the perspective of several disciplines. The importance of agenda setting, management and planning, policy reform and the organizational resistance to change is examined. Models of rational actors and bureaucratic behavior are explored.

Public Policy 609 3 units; H(3-0)

Decision Analysis
The focus is on the foundations, applications and use of quantitative methods commonly used in decision making in the public and private sectors. Included are methods such as impact analysis, cost-benefit analysis, surveys, game theory and risk management tools.

Public Policy 611 3 units; H(3-0)

Independent Study
Supervised individual study in a selected public policy area.
MAY BE REPEATED FOR CREDIT

Public Policy 613 3 units; H(3-0)

Effective Writing and Research Skills
Development of skills for writing high quality documents in a professional setting. Defining, designing and executing applied, policy-oriented research.

Public Policy 615 3 units; H(3-0)

Public Finances
An overview of government finances and the restrictions on policy choices resulting from the need for governments to satisfy a budget constraint. Tax policy, the appropriate design of expenditure policies, policies with respect to deficits and debt, and issues of intergovernmental relations will be examined.

Public Policy 617 3 units; H(3-0)

Regulation and the Law
The role of international and national legal institutions in determining public policy choices. Legal research and interpretation skills are developed through specific public policy issues such as the design of market regulation in telecommunications, energy and various utility markets.

Public Policy 619 3 units; H(3-0)

Goverance, Institutions and Public Policy
An examination of the rules and informal relationships among those determining public policy outcomes. Alternative institutional relationships and the evolution of those relationships are studied. The ever-changing dynamic of multi-level governance and court versus legislative public policy making are explored.

Public Policy 621 3 units; H(3-0)

Communicating Policy
Examines all aspects of communication in the context of policy, including the impact of new modes of communication on the development and dissemination of public policy. The new role of blogs, on-line communities, and web-based media at marshalling and influencing public opinion and the changing role of print media are discussed and evaluated. Implications for copyright policies, media concentration, privacy, and advertising are among the issues examined.

Public Policy 623 3 units; H(9-0)

Capstone Project
Students learn methods by which research contributes to the design and development of policy outcomes. Students are required to apply the skills they have learned to the completion of a capstone project which investigates a well-defined issue of public policy. The final product of the capstone project is expected to be a substantive, well-researched, focused and highly professional document. Work on the capstone project will be guided by a School of Public Policy faculty member and may include input provided by an expert from the private sector or public sector.
NOT INCLUDED IN GPA

Social Work 632

Social Policy and Social Justice

An exploration of the social, political and economic forces, social movements and social structures that are transforming the Canadian welfare state and the practice of social work.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 633

Social Work 637

Human Behaviour in the Environment

Human development and diversity within a social work context.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 641

Models of Practice

Practices the conceptual and theoretical foundation for social work to the skills in practice in Social Work.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 645

Issues in Social Work Research

An overview of research topics and issues.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 651

Policy as Context for Clinical Work

Policies and their impacts on the delivery of clinical work will be examined.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 653

Comparative Approaches to Change

Various clinical change applications will be examined and critiqued.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 655

Thesis Research

An introduction to preparing a thesis proposal.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 657

Clinical Social Work Applications

Specific issues involved in the effective application of clinical approaches will be studied.

Note: Restricted to Social Work MSW students or consent of the Faculty.

Social Work 659

Evidence and Clinical Practice

Research as utilized in the clinical arena will be the focus of this course.

Note: Restricted to Social Work MSW students or consent of the Faculty.

<td>3 units</td>
<td>A concluding course offered as final component of student’s course work. Allows doctoral students and the instructor to engage in a series of research colloquia, thereby facilitating critical analysis, feedback and synthesis of materials covered and skills learned in other course work. This process will help students to develop conceptual and methodological skills.</td>
</tr>
<tr>
<td>Social Work 741</td>
<td>Research Foundations: Epistemology and Professional Knowledge-Building</td>
<td>3 units</td>
<td>An exploration of major philosophical issues that have shaped social work’s diverse approaches to knowledge building and research methods.</td>
</tr>
<tr>
<td>Social Work 745</td>
<td>Theory, History and Philosophy: Values, Ethics and Professional Beliefs</td>
<td>3 units</td>
<td>An exploration of the philosophical and ideological issues that have been historically important to the profession with respect to its conception of its ethics, mandate and practices.</td>
</tr>
<tr>
<td>Social Work 747</td>
<td>Research Methods I: Quantitative</td>
<td>3 units</td>
<td>Quantitative methodological and design options in social work research.</td>
</tr>
<tr>
<td>Social Work 749</td>
<td>Quantitative Data Analysis</td>
<td>3 units</td>
<td>Statistical analysis of quantitative data.</td>
</tr>
<tr>
<td>Social Work 799</td>
<td>Special Topics Seminar</td>
<td>3 units</td>
<td>Advanced selected topics related to the PhD focus area.</td>
</tr>
<tr>
<td>Sociology SOCI</td>
<td>Sociology SOCI</td>
<td>3 units</td>
<td>Instruction offered by members of the Department of Sociology in the Faculty of Arts.</td>
</tr>
<tr>
<td>Sociology 601</td>
<td>Seminar in Special Topics in Sociology</td>
<td>3 units</td>
<td>Arranged for various topics of Sociology on the basis of special interest and need.</td>
</tr>

</table>
Courses of Instruction

Sociology 602 6 units; F(3S-0)
Master's Seminar in Professional Sociology
NOT INCLUDED IN GPA

Sociology 603 3 units; H(3S-0)
Seminar in Sociology of Health and Illness
Prerequisite(s): Consent of the Department.

Sociology 611 3 units; H(3S-3)
Social Statistics: The General Linear Model
Multiple regression with applications to sociological research, with topics such as regression diagnostics, categorical predictors, non-linear relationships, logistic regression, and testing of mediation and moderation.
Prerequisite(s): Consent of the Department. (Sociology 311 and 315 normally recommended.)

Sociology 613 3 units; H(3S-2)
Seminar in Quantitative Research Methods
Advanced study in the theory and practice of quantitative research methods. Topics may include the logic of causality, mixed methods designs, sampling, measurement, survey construction and implementation.
Prerequisite(s): Sociology 313. Sociology 413 is recommended.

Sociology 615 3 units; H(3S-0)
Seminar in Qualitative Research Methods
Advanced study in the theory and practice of qualitative research methods. Topics may include participant observation, in-depth interviews, narrative analysis, conversation and discourse analysis, autoethnography, archival research, and feminist research methods.
Prerequisite(s): Sociology 313. Sociology 413 is recommended.

Sociology 625 3 units; H(3S-0)
Seminar on Deviant Behaviour
Prerequisite(s): Sociology 325.

Sociology 631 3 units; H(3S-0)
Seminar in Sociological Theory
Prerequisite(s): Sociology 331 and 333 or equivalents.

Sociology 653 3 units; H(3S-0)
Seminar on Urban Sociology
Prerequisite(s): Sociology 353.

Sociology 667 3 units; H(3S-0)
Seminar on Ethnic Relations
Prerequisite(s): Sociology 375.

Sociology 671 3 units; H(3S-0)
Seminar on Families, Relationships, and Personal Life
Prerequisite(s): Sociology 471.

Sociology 677 3 units; H(3S-0)
Seminar in Sociology of Gender Relations
Prerequisite(s): Consent of the Department.

Sociology 699 1.5 units; Q(0-3)
Special Topics in Sociology
Prerequisite(s): Consent of the Department. MAY BE REPEATED FOR CREDIT

Sociology 701 3 units; H(3S-0)
Doctoral Seminar in Sociology
Seminar on selected topics. Consult Department for details.
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 702 6 units; F(3S-0)
Doctoral Seminar in Professional Sociology
Prerequisite(s): Consent of the Department.
NOT INCLUDED IN GPA

Sociology 705 1.5 units; Q(3S-0)
Selected Topics in Advanced Methodological Issues
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 711 1.5 units; Q(3S-3)
Selected Topics in Advanced Quantitative Methods
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 715 1.5 units; Q(3S-0)
Selected Topics in Advanced Qualitative Methods
Prerequisite(s): Consent of the Department.
MAY BE REPEATED FOR CREDIT

Sociology 731 3 units; H(3S-0)
Doctoral Seminar in Sociological Theory
Prerequisite(s): Consent of the Department.

Software Engineering SENG

Software Engineering 609 1.5 units; Q(3-1)
Special Topics in Software Engineering
A study of problems of particular interest to students specializing in Software Engineering.
Note: Consult Department (Computer Science or Electrical and Computer Engineering) for details regarding offerings in the upcoming academic year.
MAY BE REPEATED FOR CREDIT

Software Engineering 611 1.5 units; Q(3-1)
Requirements Engineering I
The elicitation, modelling, expression, and validation of requirements.

Software Engineering 615 3 units; H(3-1)
Agile Software Engineering
Investigation and application of agile software development practices.
Antirequisite(s): Credit for both Software Engineering 615 and Computer Science 601.93 will not be allowed.
Note: Students are expected to have some background in software development as preparation for this course.

Software Engineering 622 3 units; H(3-1)
Software Release Planning
Product release planning covers systematic methods, tools and techniques for defining the functionality of a sequence of product releases in incremental development. The planning and replanning is established as a systematics process trying to optimize resources available towards the functionality most requested by customers and stakeholders.
Antirequisite(s): Credit for both Software Engineering 622 and 607.25 will not be allowed.

Software Engineering 627 3 units; H(3-1)
Software Engineering Decision Support
Provides methodological foundations of software engineering decision-making and how to apply them to make better decisions about processes, products, and resources as well as for selection of tools and techniques.
Antirequisite(s): Credit for both Software Engineering 627 and 625 will not be allowed.

Software Engineering 629 1.5 units; Q(3-0)
(formerly Software Engineering 609.17)
Software Engineering Standards and Models
Formal description of algorithms for current software engineering standards and models. Trends and future development in software engineering standardization.

Software Engineering 637 3 units; H(3-2)
Dependability and Reliability of Software Systems
Principles of software dependability techniques, and techniques to improve and predict software reliability.
Antirequisite(s): Credit for both Software Engineering 637 and 521 will not be allowed.
Note: Engineering 319, Software Engineering 511, and Software Engineering 437 or 421, or their equivalents, are recommended as preparation for this course.

Software Engineering 639 3 units; H(3-0)
(formerly Software Engineering 607.22)
Advanced Software Testing
Advanced techniques, tools and concepts in software testing including: Agile testing, accep-
Courses of Instruction

Graduate Courses
Registration in all courses requires the approval of the Department of Electrical and Computer Engineering.

**Software Engineering for Engineers 603** 3 units; H(3-1)

**Modelling and Measurement of Software Performance**
- Performance-oriented review of computer systems; methodologies to evaluate software performance; fundamental performance laws; performance prediction using queuing network models; discrete event simulation of computer system performance, simulation input and output analysis; performance testing, monitoring and benchmarking; workload characterization; software performance engineering.

**Software Engineering for Engineers 604** 3 units; H(3-0)

**Theoretical Foundations of Software Engineering**
- Explores formal principles of software engineering based on common recognition that software engineering is not constrained by any physical laws as we know. The transdisciplinary foundations of software engineering are presented from the facets of information, computing, mathematics, cognitive, and management sciences, software engineering philosophies; engineering, mathematical, computational, management science, cognitive informatics, computational intelligence foundations and approaches of software engineering. As a result, a coherent framework of software engineering theories is learnt.

**Software Engineering for Engineers 619** 3 units; H(3-1)

**Special Topics Half Course**
- A study of problems of particular interest to students specializing in Software Engineering.

**Space Physics SPPH**
Instruction offered by members of the Department of Physics and Astronomy in the Faculty of Science.

**Department Head** - R.I. Thompson
**Note:** For listings of related courses, see Astronomy, Astrophysics, Medical Physics and Physics.

**Graduate Course**

**Space Physics 671** 3 units; H(3-0)

**Physics of the Magnetosphere**
- Physics of the interaction between the earth’s magnetic field and the fields and plasmas of the surrounding interplanetary environment. Topics include magnetic field models and co-ordinate systems, reconnection, current flow in the magnetosphere, substorms, and particle acceleration.

**Antirequisite(s):** Note: It is expected that a student’s background will include Physics 509 and 555 or equivalent.

**Spanish SPAN**
Instruction offered by members of the Department of French, Italian and Spanish in the Faculty of Arts.

**Graduate Courses**
**Note:** The Department will give graduate credit for 500-level courses in cases it deems exceptional. This option is subject to the approval of the Department. Graduate students taking a 500-level course for graduate credit will be asked to complete additional requirements.

**Spanish 601** 3 units; H(3-0)

**Literary and Cultural Theory**
**MAY BE REPEATED FOR CREDIT**

**Spanish 613** 3 units; H(3-0)

**Critical Analysis of Medieval Texts**
**MAY BE REPEATED FOR CREDIT**

**Spanish 615** 3 units; H(3-0)

**Golden Age Literature**
**MAY BE REPEATED FOR CREDIT**

**Spanish 617** 3 units; H(3-0)

**Theatre and Performance in the 19th or 20th Centuries**
**MAY BE REPEATED FOR CREDIT**

**Spanish 619** 3 units; H(3-0)

**Post-Franco Literature, Art and Film**
**MAY BE REPEATED FOR CREDIT**

**Spanish 621** 3 units; H(3-0)

**Art, Film and Literature in the Spanish Avant-Garde**
**MAY BE REPEATED FOR CREDIT**

**Spanish 623** 3 units; H(3-0)

**Spanish American Literature and Culture to 1900**
**MAY BE REPEATED FOR CREDIT**

**Spanish 625** 3 units; H(3-0)

**20th Century Spanish American Literature**
**MAY BE REPEATED FOR CREDIT**

**Spanish 627** 3 units; H(3-0)

**Avant-Garde Movements in Spanish America**
**MAY BE REPEATED FOR CREDIT**

**Spanish 631** 3 units; H(3-0)

**Popular Culture**
**MAY BE REPEATED FOR CREDIT**

**Spanish 633** 3 units; H(3-0)

**Writings in Exile**
**MAY BE REPEATED FOR CREDIT**

**Spanish 635** 3 units; H(3-0)

**Literature and the Visual Arts in Hispanic Culture**
**MAY BE REPEATED FOR CREDIT**

**Spanish 637** 3 units; H(3-0)

**Identities and Post-Colonial Voices**
**MAY BE REPEATED FOR CREDIT**
## Graduate Courses

**Note:** Some 500- and 600-level statistics courses may have concurrent lectures. Extra work in these courses (e.g., extra assignments, advanced examination questions, a term project) will be required for credit at the 600 level.

### Statistics 600
(formerly Statistics 621)

**Research Seminar**
A professional skills course, focusing on the development of technical proficiencies that are essential for students to succeed in their future careers as practicing statistician in academia, government, or industry. The emphasis is on delivering professional presentations and using modern statistical research tools. A high level of active student participation is required.

**MAY BE REPEATED FOR CREDIT**

**NOT INCLUDED IN GPA**

### Statistics 601

**Topics in Probability and Statistics**
The content of this course is decided from year to year in accordance with graduate student interest and instructor availability. Topics include but are not restricted to: Advanced Design of Experiments, Weak and Strong Approximation Theory, Asymptotic Statistical Methods, the Bootstrap and its Applications, Generalized Additive Models, Order Statistics and their Applications, Robust Statistics, Statistics for Spatial Data, Statistical Process Control, Time Series Models.

**MAY BE REPEATED FOR CREDIT**

### Statistics 603
(formerly Statistics 601.14)

**Applied Statistics for Nursing Research**
Descriptive statistics; probability theory; statistical estimation/inference; power analysis; regression analysis; anova; logistic regression analysis; non-parametric tests; factor analysis; discriminant analysis; Cox’s Proportional Hazard Model.

### Statistics 619

**Bayesian Statistics**
Fundamentals of Bayesian inference, single and multiparameter models, hierarchical models, regression models, generalized linear models, advanced computational methods, Markov chain Monte Carlo.

### Statistics 625

**Multivariate Analysis**

### Statistics 633

**Survival Models**
Advanced topics in survival models such as the product limit estimator, the cox proportional hazards model, time-dependent covariates, types of censorship.

### Statistics 635

**Generalized Linear Models**
Exponential family of distributions, binary data models, loglinear models, overdispersion, quasi-likelihood methods, generalized additive models, longitudinal data and generalized estimating equations, model adequacy checks.

### Statistics 637

**Non-linear Regression**
Topics include but are not restricted to selections from: linear approximations; model specification; various iterative techniques; assessing fit; multivariate parameter estimation; models defined by systems of differential equations; graphical summaries of inference regions; curvature measures.

### Statistics 639

**Conference Course in Actuarial Modelling**
Topics in advanced actuarial theory and practice, such as: insurance risk models; practical analysis of extreme values; advanced property and casualty rate making; actuarial aspects of financial theory.

**MAY BE REPEATED FOR CREDIT**

### Statistics 701

**Theory of Probability I**

### Statistics 703

**Theory of Probability II**

### Statistics 721

**Theory of Estimation**

### Statistics 723

**Theory of Hypothesis Testing**

### Statistics 761

**Stochastic Processes I**
In addition to the numbered and titled courses shown above, the department offers a selection of advanced level graduate courses specifically designed to meet the needs of individuals or small groups of students at the advanced doctoral level. These courses are numbered in the series 800.01 to 899.99. Such offerings are, of course, conditional upon the availability of staff resources.

### Strategic Studies STST

**Instruction offered by members of the Faculty of Arts.**

**Graduate Courses**
Only where appropriate to a student’s program may graduate credit be received for courses numbered 500–599.

### Strategic Studies 601

**MAY BE REPEATED FOR CREDIT**

### Strategic Studies 602

**MAY BE REPEATED FOR CREDIT**

### Strategic Studies 603

**NOT INCLUDED IN GPA**

### Strategic Studies 609

**The Canadian Military in the Second World War**
An examination of the political parameters imposed by the Canadian government, the quality of Canadian leadership, and the “fit” between British forms of military organization and the fighting quality of Canadian soldiers, sailors and airmen.

### Strategic Studies 611

**Canadian Military Studies**
Canadian military studies, excepting the two world wars. Topics will include the evolution of Canadian defence policy, past or present, the development and evolution of the Canadian Forces or any of its main elements (army, navy or air force), Canadian military operability with the military forces of Allied nations, and the relationship between Canadian foreign policy and the use of the Canadian military.

### Strategic Studies 613

**The Canadian Military in the First World War**
The development and operational achievements of the Canadian Expeditionary Force, wartime civil-military relations and conscription politics.

**Note:** Credit for both Strategic Studies 613 and History 520 will not be allowed

### Strategic Studies 649

**Special Topics in Military and Strategic Studies**

**MAY BE REPEATED FOR CREDIT**

### Strategic Studies 651

**Reading Seminar**

**Prerequisite(s):** Permission of the Graduate Coordinator.

**MAY BE REPEATED FOR CREDIT**
Courses of Instruction

Strategic Studies 653 3 units; H(3-0)

Research Seminar
Prerequisite(s): Permission of the Graduate Coordinator.
MAY BE REPEATED FOR CREDIT

Strategic Studies 655 3 units; H(3-0)
(formerly History 655)

Classics of Strategy
Strategic thought from Sun Tzu to Clausewitz, Mahan to Corbett. Analyses the writings of classic strategic thinkers and then, by way of case studies, examines their theories as they pertain to military and political planners from the Peloponnesian War to the present.

Strategic Studies 657 3 units; H(3-0)

Intelligence; Information Operations; and "Command, Control, Communications and Computers." An assessment of the history of intelligence, information operations, and command systems for military and diplomatic institutions as well as contemporary theory and practice related to these issues.

Strategic Studies 659 3 units; H(3-0)

Sea Power
The meaning of sea power and an assessment of how modern states use it. An analysis of the writings of major naval strategic thinkers and case-study examination of the application of those theories from Nelson to the present.

Strategic Studies 662 3 units; H(3S-0)

Advanced Studies in Canadian Arctic Security
The Canadian Arctic is an emerging area of concern due to changes scarcely imaginable even a few years ago. Examines the nature of some of these changes — e.g. climate change and the northern seas' dramatically changing ice conditions, growing recognition of the region's resource wealth, and evolving international relations in the circumpolar region — and what they mean for Canadian Arctic Security.

Strategic Studies 663 3 units; H(3S-0)

War — Causes and Aftermaths
An examination of the complexity and experience of conflict and war as well as the broader institutions that govern post-conflict recovery and transition in the twentieth and twenty-first centuries. Special attention will be paid to the methodological complexities of studying violence.

Strategic Studies 751 3 units; H(3-0)

Reading Seminar
Prerequisite(s): Permission of the Graduate Coordinator.
MAY BE REPEATED FOR CREDIT

Strategic Studies 753 3 units; H(3-0)

Research Seminar
Prerequisite(s): Permission of the Graduate Coordinator.
MAY BE REPEATED FOR CREDIT

Strategy and Global Management 601 3 units; H(3-0)
(formerly Strategy and Global Management 701)

Strategic Management I
The role of the CEO and other senior executives in formulating and implementing corporate strategies, and provides an overview of key strategic issues and topics. Covers such areas as industry analysis, executive leadership, corporate strategy, corporate diversification, strategic change, global strategy, mergers and acquisitions, and strategic implications of new technologies.

Antirequisite(s): Credit for both Strategy and Global Management 601 and 701 will not be allowed.

Strategic Management II

Prerequisite(s): Strategy and Global Management 601 or consent of the Haskayne School of Business.

Strategy and Global Management 796 3 units; H(3-0)

Qualitative Research in Strategy and Organizations
Processes of collecting, analysing, and reporting qualitative data, as well as inducing theory from them. Application to the area of Strategy and Organizations is emphasized. Focus on various approaches to qualitative research and on developing competence in conducting it.

Prerequisite(s): Consent of the Haskayne School of Business.

PhD Course

Strategy and Global Management 799 3 units; H(3S-0)

Doctoral Seminars in Strategy and Global Management

799.01. Survey of the Field
799.02. Corporate and Competitive Strategy
799.03. Current Topics in Strategic Management
799.04. Business Environment
799.05. Interorganizational Relationships: Creating and Managing Strategic Alliances

Sustainable Energy Development SEDV
Instruction offered by members of the Faculties of Environmental Design, Law, Schulich School of Engineering and the Haskayne School of Business.

Note: Enrolment is limited to students admitted to the MSc in Sustainable Energy Development program, or approved by the Director of the Sustainable Energy Development Program.

Graduate Courses

Sustainable Energy Development 601 3 units; H(3-0)

Energy Systems I: Non-Renewable Energy
Interactions between non-renewable energy resources and the environment; Exploration, production and exploitation of energy resources, including petroleum, oil sands, natural gas, coal, nuclear, coal-bed methane; Technical, economic and environmental aspects of production and use of non-renewable energy.

Prerequisite(s): Admission to the Sustainable Energy Development Program or consent of the Program Director.
### Courses of Instruction

**Sustainable Energy Development 603**  
3 units; H(3-0)

**Energy Systems II: Renewable Energy**  
Renewable energy sources leading to global sustainable energy infrastructure: wind, hydro, solar photovoltaic, solar heat collection, geothermal, biomass, cogeneration; System level physical modelling; Steady-state turbine operation; Introductory thermodynamics; Economic tools, such as levelized cost of energy analysis.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 605**  
3 units; H(3-0)

**Ecology, Sustainable Development and Indigenous Cultures**  
Inter-relationships between ecological systems, sustainability and aboriginal cultures; Review of government policies with regard to environmental issues; Case based analysis of selected issues and strategic management mechanisms for dealing with aboriginal concerns in resource project development and the approval process; Aboriginal law and its relation to resource development.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 607**  
3 units; H(3-0)

**Water Pollution and its Impact on the Energy Sector**  
Causes and consequences of water pollution; Technologies for prevention, mitigation and control of pollutant effluents including those related to energy projects; Water usage and management in energy development.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 609**  
3 units; H(3-0)

**Air Pollution and its Impact on the Energy Sector**  
Causes and consequences of air pollution; Technologies for prevention, mitigation and control of pollutant emissions including those related to energy projects; Greenhouse gas emissions and their impact on global warming.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 611**  
3 units; H(3-0)

**Land Pollution and Waste Management in the Energy Sector**  
Causes and consequences of land pollution; Technologies for prevention, minimization, mitigation and control of pollution from solid waste including those related to energy projects; Management of contaminated sites; Waste to energy practices.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 613**  
3 units; H(3-0)

**Energy Systems III: Planning and Energy Economics**  
Financial principles and evaluation techniques; Application to energy investment planning and to assessment of foundations in energy econom-ics and policies; Financial decision-making tools to support environmental and social initiatives, programs, investments and projects.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 615**  
3 units; H(3-0)

**Environmental Impact Assessment in the Energy Sector**  
Principles and professional practice of environmental impact assessment, with application to energy development projects.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 617**  
3 units; H(3-0)

**Human Resource and Management in the Energy Sector**  
Major concepts and theories of management and organizational dynamics as they impact on the energy sector; Interpersonal effectiveness and self-awareness, motivation, group dynamics, project teams, supportive communication, stress, leadership, power, influence and conflict, organizational culture, processes of change.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program only or consent of the Program Director.

**Sustainable Energy Development 619**  
3 units; H(3-0)

**Environmental Law in the Energy Sector**  
Legal systems, nature and sources; International environmental law and its implementation; Fundamental legal concepts including jurisdiction, procedural fairness, liability, property and contract; Environmental regulatory systems and alternative instruments; Judicial review; Enforcement and compliance; Alternative dispute resolution.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 621**  
3 units; H(3-0)

**Environmental Management Tools in the Energy Sector**  
Implementing strategy through environmental management systems, including tools and methods to achieve environmental goals from compliance of laws and regulations to leadership in environmental innovation; Tools and methods explored include policies, structures, indicators, audits, and reporting.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 623**  
3 units; H(3-0)

**Strategic Environmental Planning for Energy Organizations**  
A strategic approach to managing environmental and social issues facing energy industry and its economic rationale in a competitive global energy market.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 625**  
3 units; H(3-0)

**Research Project**  
An introduction to research methodology; Environmental issues with energy projects; Demonstration of knowledge and skills through a comprehensive interdisciplinary project completed individually or in small groups.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Sustainable Energy Development 631**  
3 units; H(3-0)

**Life Cycle Assessment in the Energy Sector**  
The concept of life cycle assessment (LCA) as it applies to energy production and consumption from an environmental and sustainability perspective; Use of LCA to support informed decision-making for improved environmental performance of energy projects and for avoiding problem-shifting and sub-optimization.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**Antirequisite(s):** Credit for Sustainable Energy Development 631 and Sustainable Energy Development 699.03 will not be allowed.

**Sustainable Energy Development 699**  
3 units; H(3-0)

**Topics in Energy and the Environment**  
Study of selected topics related to energy and the environment and related subjects. Specific course(s) will reflect changing needs and faculty interests.  
**Prerequisite(s):** Admission to the Sustainable Energy Development Program or consent of the Program Director.

**MAY BE REPEATED FOR CREDIT**

**Tourism Management TOUR**

Instruction offered by members of the Haskayne School of Business.  
Tourism Management Chairperson: TBD

**Graduate Courses**

**Tourism Management 741**  
3 units; H(3-0)

**Policy Planning and Development in Tourism**  
**Prerequisite(s):** Consent of the Haskayne School of Business.

**Tourism Management 745**  
3 units; H(3-0)

**International Tourism**  
**Prerequisite(s):** Consent of the Haskayne School of Business.
### PhD Course

**Tourism Management 799** 3 units; H(3S-0)

**Doctoral Seminars in Tourism**
- 799.01. General Fields in Tourism Management
- 799.02. Special Fields in Tourism Management
- 799.03. Tourism Policy and Strategy

**University**

**UNIV**

**Instruction offered by the University and individual Faculties depending on the topic(s) being covered.**

### Graduate Courses

**University 601** 3 units; H(3-0)

**Ethics of Research with Human Subjects**
A multidisciplinary course addressing issues in research with human subjects. Topics include theoretical approaches to understanding ethics, respect for persons, benefit and harm, confidentiality and publication, and selection of research subjects. Taught by a multidisciplinary team with very broad experience on research ethics boards.

**Prerequisite(s):** Consent of the Course Coordinator.

**University 611** 3 units; H(3-0)

**Special Topics in Sustainability**
611.01. Introduction to Sustainable Development
611.02. Theoretical Basis for Interdisciplinary Intervention and Design

**MAY BE REPEATED FOR CREDIT**

**University 613** 3 units; H(0-8)

**Introduction to Interdisciplinary Design Practice**

**University 615** 3 units; H(0-8)

**Advanced Interdisciplinary Design Practice**

**Prerequisite(s):** University UNIV 611.01.

### Veterinary Medicine VETM

**Instruction and services offered by the Faculty of Veterinary Medicine.**

**Associate Dean (Curriculum):** J.V. Bailey

### Graduate Courses

The following courses are delivered through the Veterinary Medical Sciences Graduate Program. Enrolment in these courses is not open to DVM students. Please consult the Graduate Studies calendar for additional details and requirements for students in other graduate programs.

**Associate Dean (Graduate Education):** J.R. Matyas

**Veterinary Medicine 601** 3 units; H(3-0)

**Professional Skills in Health Science Research**
Includes a series of workshops focusing on skills essential for success in health science research. Topics include: Research Integrity; Ethics; Grants and Grant Writing; Verbal and Written Communication of Research Findings; Career Development; and Career Options in the Health Sciences.

**Prerequisite(s):** Consent of the Faculty.

**NOT INCLUDED IN GPA**

**Veterinary Medicine 603** (Biology 603) 3 units; H(3-1)

**Biology of Laboratory Animals**
Based on the Canadian Council on Animal Care Syllabus “Basic Principles of Laboratory Animal Science for Research Scientists.” In addition to the study of common, research, farm and exotic animals, topics to be covered include ethical considerations, regulation and legislation, animal models, animal facilities and husbandry, hazard control, surgery, anaesthesiology, euthanasia and post-mortem examinations. Practical sessions will provide experience in handling and restraint of specific laboratory animals, injections, blood collection, anaesthesiology and surgery.

**Note:** Enrolment in this course is restricted in the first instance to graduate students who will do research utilizing animals.

**Veterinary Medicine 605** 3 units; H(3-1T)

**Introduction to Research Methods**
An introductory course on how to design and analyse veterinary research. Emphasis is placed upon formulating good research questions, evaluating the appropriateness of different research designs, planning a well-designed experiment or clinical trial, and performing statistical analyses on the results.

**Prerequisite(s):** Consent of the Faculty.

**Veterinary Medicine 690** 3 units; H(3-0)

**Directed Study**
Lectures, seminars, term papers and/or other training directed to one or only a few students in theoretical and/or laboratory methods at the advanced level in veterinary medical sciences. These courses are offered when no other suitable alternatives are available.

**Prerequisite(s):** Consent of the Faculty.

**Note:** An approval form may be obtained from the Office of Research and Graduate Education, and must be signed by the VMS Graduate Program Director before a student can register.

**MAY BE REPEATED FOR CREDIT**

**Veterinary Medicine 701** 3 units; H(3-0)

**Advanced Topics in Reproductive Health**
A series of topics, ranging from basic sciences to clinical topics (including ethical issues) to increase awareness and comprehension regarding current issues in reproductive health.

**Prerequisite(s):** Research interest in reproductive health/reproductive biology. Consent of course coordinator and student’s supervisor, if applicable.

**Veterinary Medicine 702** 3 units; H(3-0)

**Advanced Topics in Stem Cell Biology and Regenerative Medicine**
Provides a comprehensive overview of stem cell biology in the context of embryonic development and adult tissue maintenance. Students will gain an appreciation for embryonic versus adult stem cells and how these pluripotent or multipotent cells may be utilized in regenerative medicine (i.e. treatment of congenital defects, diseases or injury).

**Prerequisite(s):** Students not enrolled in the VMS graduate program will require consent of the instructor.

**Veterinary Medicine 721** 3 units; H(3-0)

**Wildlife Parasitology: Principles and Techniques**
Students will learn about the ecology of parasites in wildlife populations with emphasis on impacts of parasitism, invasive species, and conservation issues. This is taught through a series of seminars, critical evaluation and discussion of the literature, and independent and group projects. Laboratory sessions include on parasitology techniques for surveillance and research.

**Prerequisite(s):** Consent of the instructor.

**Note:** This course may not be offered every year. Please contact vgrad@ucalgary.ca for information.
Student Services

Student and Enrolment Services

Enhancing the Student Experience

Student and Enrolment Services (SES) is committed to fostering a community that values student engagement, challenges students to explore their potential and supports each student’s success through the provision of best practice services and programs that enhance the student experience in support of the Eyes High strategy of the University of Calgary.

Our services exist so that you, as a University of Calgary student, can make the most of your experience at our university. We see students through from the moment they make contact with us as a prospective student through to graduation and beyond. To achieve our mission we adhere to the highest standards of personal, interpersonal and professional behaviour.

We stand on four core values:

- Community: We endeavour to develop a University community that promotes lifelong learning, citizenship and societal engagement.
- Development: We foster an environment that inspires self-confidence, nurtures personal achievement and actively connects co-curricular with classroom learning experience.
- Diversity: We recognize that our campus community is diverse and we celebrate this rich environment.
- Accountability: We recognize that as individuals we are responsible for our actions, learning, development and the impact we have on others.
- We are committed to involving students in our planning and our decision-making, and encourage you to make contact with our departments and staff members if you have any ideas, comments or questions.

Career Services
Manager: Colleen Bangs
Vision: Career Services inspires students and alumni to embrace their potential, achieve career excellence and contribute to the betterment of their communities; employers benefit through access to future leaders and innovators.

Mission: Career Services facilitates and supports mutually beneficial relationships between students, alumni and employers. We connect passion to purpose and students to opportunity.

Values: Career Services is committed to providing transparency and excellence through service and support, collaboration and community, teamwork and trust.

Programs and services at Career Services include:

- One to one Career Development & Education, Drop-in Appointments, Career Workshops, Strengths, Strong & MBTI Assessments.
- CareerLink provides online access to full-time, summer, part-time and co-op and internship positions, online interview sign-up, company profiles, an event calendar and more.
- Meet potential employers at career fairs, information sessions, and networking events. Event listings and online sign-up are found on CareerLink.
- Attend industry panels and Career LIVE events that help students define career options through interaction with industry professionals.

Peak recruitment times for most employers are September, October and January through March.

Centre for Community-Engaged Learning

The Centre for Community-Engaged Learning is a division of Student Services that supports curricular and co-curricular service-learning programs. The CCEL supports students’ learning and leadership development and encourages lifelong community engagement through projects and partnerships with the non-profit sector. The CCEL offers:

- One-day volunteer projects with local organizations through the ucalgarycares program
- Immersion experiences over Reading Week or the Spring/Summer Intersession in places such as Calgary, New Orleans, and rural Costa Rica through the ucalgarycares program where students live, learn and volunteer together and explore issues in our communities
- Projects and campaigns on food security through Meal Exchange
- Senior leadership experiences through the Peer Helper Program
- Support to faculty developing service-learning courses
- A place of contact for community organizations looking to engage with students on experiential learning opportunities

Telephone: 403.210.7998
Fax: 403.210.9877
Enrolment Services

Enrolment Services assists students in carrying out a variety of administrative functions at the University of Calgary. Enrolment Services provides front-line services and phone student support services in the following areas: prospective student inquiry, admissions, student awards and scholarships, course registration support, financial aid and student fees. Enrolment Service Advisors are available to support and assist students with questions.

Enrolment Service Advisors can be accessed as follows:

By Telephone: 1.403.210.7625*

*Limited information and service can be provided on the phone due to the Freedom of Information and Protection of Privacy Act legislation.

In-person Service:

- Transcript orders and printing on demand (online service)
- Proof of enrolment forms completed for undergraduate students (online service)
- Fee payments, undergraduate assessment and account inquiries
- Student loan inquiries, signing and completion of interest free forms
- Undergraduate registration support and referral
- Undergraduate adding/dropping/withdrawal from courses
- Undergraduate award/scholarship support/assistance and general inquiries
- Prospective student inquiries

Online services are available 24 hours a day, 7 days a week via MyUofC online.

Student Centre:

- Transcript Request, by mail and/or courier
- Add/drop/edit/swap courses
- Update personal information
- Print T2202A tax receipts (available online only)
- Print Proof of enrolment letters (not for government student loans)
- Change of program and Letter of permission requests
- Tuition and fees assessment, view account details, and due dates

International Student Services

Ricky Ramdhany, Manager International Student Services

International Student Services provide support to international students related to their adjustment to the university and Canada, and promotes an understanding of international issues among Canadians by involving them in programs which develop a global experience.

- Immigration advising for international students
- International student advising and support, including handbook and information sheets
- Bridging programs (bringing Canadians and international students together): Global Friends, Language Bank
- Arrival orientations and workshops for new international students and a term long Mentorship/Buddy Program to assist new students

Leadership and Student Engagement

The Leadership and Student Engagement office provides undergraduate and graduate students with the opportunity to engage with their campus community and develop their leadership potential through a series of programs and events. Leadership and Student Engagement is committed to providing all students with a well-rounded university experience from their first-year through to graduation and beyond. Programs include:

- UCalgaryStrong programming, including low-commitment drop-in events to connect students
- University of Calgary Leadership (UCL) Program – various workshops to help students realize their own leadership potential
- One-to-one and group leadership advising – students can discover their “Top 5” Themes of Talent through completing StrengthsQuest
- Leadership-on-Demand - facilitated leadership training and team building, customized to meet the needs of student clubs and teams
- Leadership Exchange - an annual leadership conference

- Emerging Leaders Program and Sophomore Leadership Program
- Summer and Fall Orientation
- The Common Reading Program - bringing together students, staff, faculty and community leaders to build community, inspire discussion, and support students' transitions to university life
- Senior volunteer opportunities through the Peer Helper Program

The Native Centre

Director: Shawna Cunningham, BA, MA

The University of Calgary welcomes, respects, and supports the rich diversity of Aboriginal learners, their communities, cultural traditions, and aspirations in post-secondary education. The Native Centre provides academic, personal, and cultural support to prospective and current First Nations, Métis, and Inuit students. Through student engagement and cultural events, the Native Centre also strives to create a welcome, inclusive, and inter-cultural educational environment for the whole campus community.

Student Support

- Admissions advising and referral
- Academic Program Advising
- Course Registration assistance
- Financial Advising for FNMI students
- Information and referral to other campus services
- Peer tutoring and remedial support
- Cultural and spiritual advising

Programs

- N.A.P.I. Ambassador Aboriginal Youth Outreach Program
- LYNX: Aboriginal Student Career and Employment Program
- ASSERT: Aboriginal Student Success, Empowerment and Re-Engagement Training Program
- Aboriginal Student Access Program (ASAP)
- Circle of Welcome – Orientation Sessions
- Aboriginal Relations Leadership Training Program (in partnership with Career Services)

Cultural Enrichment

- Indigenous Knowledge Lecture Series
- Social gatherings and potlucks
- Cree Grandmothers’ Tea Ceremonies
- Annual Graduation Banquet and Pow-wow

Student Engagement

- Social Activities and cultural events
- N.A.P.I. Leadership Training
- Volunteer Opportunities
- First Nation’s Student Association
The Student Success Centre
Manager: Roxanne Ross, BA, MA
From when you first arrive at the University of Calgary through to when you graduate, the Student Success Centre provides services and programs to ensure you make the most of your time here at UCalgary. Whether you’re an undergraduate, graduate, international or open studies student, we have a program or service for you.

- Academic Development Advisors provide personalized academic planning and learning support advising sessions to help students achieve their academic goals.
- Central Academic Advisors help current, prospective and open studies students with the exploration of academic programs and effective program choices.
- Writing Support Tutors are available by appointment or drop-in for all students wanting to learn strategies to write more effectively and gain a better understanding of how to improve their written assignments. Writing workshops are also held in the fall and winter semesters.
- Student Success Seminars are offered throughout the fall and winter semesters covering a variety of topics to help support students’ academic success.

SU Wellness Centre
SU Wellness Centre Director: Debbie Bruckner
The SU Wellness Centre is the collaboration of Student Health, Counselling Services and the Faith and Spirituality Centre to provide wellness in mind, body and spirit to support academic and personal success. Integration has created a culture of wellness on campus – a place where students can truly experience an opportunity to grow in health and wellbeing through partnership with Wellness Centre professionals.

Counselling Centre
Programs and services at the Counselling Centre include:
- Individual and couples counselling provided by registered psychologists and counsellors-in-training
- Workshops including stress management, emotional wellness, healthy relationships, social anxiety, presentation anxiety, test anxiety, life balance
- Career Clinic, appointment bookings to assist with your educational and career decisions
- Academic Clinic, appointment bookings to assist you with educational success strategies
- Counsellor Training Program for provisionally registered psychologists and graduate level practicum placements

Faith and Spirituality Centre
The Faith and Spirituality Centre consists of several Chaplains from various faith/religious traditions (Catholic, Protestant, Jewish, Buddhist, Muslim). We offer spiritual and faith-based programs, events and support to students, staff and faculty on campus. The Centre operates under four guiding principles: connecting, learning, serving, and practicing.

We offer a variety of services that are open to all:
- Drop-in Centre
- Meditation and Prayer Rooms
- Multi-Faith support, guidance and worship services
- Community/Social events
- Lunch and Learns
- Spiritual and Social Justice programs
- Crisis support

Telephone: 403.220.5451

Email: amhumeni@ucalgary.ca
Location: MacEwan Student Centre 373

University Health Services
University Health Services offers the following services to students and their dependents:
- Confidential health services from family physicians with extensive experience in collegiate health care - including family medicine and walk-in services
Student Services

- Physician referrals to specialists as indicated
- Health promotion and education
- Immunization programs
- Psychiatric services
- Chiropractic services (Traditional, ART, Acupuncture and Graston)
- Massage therapy
- Nutrition services
- Travel Clinic

For faculty and staff:
- Walk-in clinic hours for urgent care only
- Massage, chiropractic and nutrition services
- Travel Clinic

Telephone: 403.210.9355 (WELL) #3 for Health Services
Fax: 403.282.5218
Location: MacEwan Student Centre 370
Website: http://www.ucalgary.ca/wellnesscentre

Women's Resource Centre
Co-ordinator: Nanako Furuyama
The Women's Resource Centre provides a safe and supportive place to advance women's equality and build community where all experiences are valued, and everyone is offered the resources necessary to make informed choices. The WRC strives to create a more inclusive campus environment where each individual's agency and voice are nurtured to contribute to the collective spirit of a community where citizenship and leadership is made possible for all, regardless of gender. We celebrate diversity based on – but not limited to – gender, ethnicity, race, class, ability age and sexual orientation and we believe that the key to achieving empowerment is through the cycle of reflection and action, creating positive social change. The WRC uses three pillars of work to achieve our goals: Wellness, Leadership, and Diversity.

Programs and services at the WRC include:

Student Services:
- Peer Support (peer to peer counseling on a diversity of issues)
- Meaningful volunteer opportunities, training and recognition
- Training and certificates in Leadership, Wellness and Diversity
- Workshops (health and wellness, global and cultural issues, etc.)
- Online Resource Database (with hundreds of resources accessible through the WRC website)
- Social Gatherings (knitting circles, craft groups, movie nights – all free of charge)
- The WRC Awards - To celebrate women’s Wisdom, Resilience and Compassion by identifying and honouring an alumna and a female University of Calgary student
- Special Events - December 6th Memorial: National Day of Remembrance and Action on Violence Against Women, International Women’s Day Celebration

Facilities:
- Lounge
- Study Space
- Resource Library
- Club and group meeting space
- Quiet meeting space for women experiencing challenging situations

Telephone: 403.220.8551
Fax: 403.210.7970
Email: women@ucalgary.ca
Website: http://www.ucalgary.ca/women/
Location: MacEwan Student Centre 482
Hours: Monday to Friday, 8:30 a.m. – 4:30 p.m.

Writing Support Services
Writing Support Services offers free half-hour individualized writing tutorials for all students who want to improve their writing. In a tutorial, students can:
- Discuss their writing process and learn strategies to write more effectively
- Review returned papers to understand how to improve their written assignment
- Work with a tutor on an ongoing basis to improve essay structure, paragraph development, sentence structure and style, grammar, and punctuation
- Receive information on writing papers, book reviews, or other assignments
- Get advice on how to use and document sources
- Get help with English as a Second Language
- Writing Support Services instructors will give general advice on any written document; however, they will not proofread.

To book a half-hour appointment or for online writing assistance, please visit http://www.ucalgary.ca/ssc/writing-support.
Telephone: 403.220.5881
Email: wconline@ucalgary.ca
Tutoring Location: Student Success Centre, 3rd Floor TFDL
Website: http://www.ucalgary.ca/ssc/writing-support

Active Living
As a University of Calgary student, you are automatically an ‘all-access’ member of one of Calgary’s largest and most complete recreation facility. You pay for this membership with a fee that is assessed with your tuition. Students can also purchase family memberships at special student rates. Community members, alumni and staff are also welcome to become members.

You can find complete, detailed information about our facilities and programs (including fitness classes and open recreation time) online at http://www.activeliving.ucalgary.ca, or by calling 403.220.7749. For our automated schedule, please call 403.220.6942 (24 hours), Look for Active Living and Outdoor Centre Program Guides in display racks located around campus.

Facilities:
- Our giant Fitness Centre features free weights, weight machines, cardio equipment, a Super Circuit and a six lane, 200 meter indoor track. Certified staff are available for fitness appraisals, fitness and nutrition counseling, and customized programs.
- We have the largest Racquet Centre in Calgary with squash, racquetball, badminton, pickleball and tennis courts. Students pay no court fees.
- Our Aquatic Centre boasts an Olympic sized pool. Aquatic instruction and certification is available for adults, children and youth. The Aquatic Centre hires new lifeguards on a regular basis.
- The University of Calgary Gymnastics Centre has a large variety of Olympic-standard equipment, including: sprung gymnastics floor, sprung tumble strip, trampoline, foam pits, ropes, bars, rings, beams, resi-pit and vaults. If you love gymnastics we are always looking to hire new, active people to join our team!
- The Outdoor Centre offers equipment rental and a fantastic range of outdoor recreational and instructional programs for summer and winter activities. The “OC” also features an indoor climbing wall, specifically designed for climbing instruction and free for U of C students to access.

Programs:
- Active Living offers a wide variety of programs from health and wellness, to recreation programs and certifications. Instruction is offered in fitness, first aid and CPR, pre-hospital care, skating, swimming, gymnastics, court sports and many more. Intramural Sports as well as Competitive and Recreational Club Sports are open to students, staff, faculty and the general public for a nominal fee. Information for all registered programs can be found online and in the Active Living Guide.
- If you have children, we offer gymnastics, swimming, skating, court sports, outdoor activities and Karate programs for all ages from pre-school to teens. We are also one of Calgary’s largest summer camp providers with a huge range of camps for every kind of kid or teen.
- Telephone: 403.220.7749
- Website: http://www.activeliving.ucalgary.ca
- Location: Kinesiology Complex

Bookstore
The University of Calgary Bookstore (Est. 1966) proudly serves students, faculty and staff on campus. Our campus bookstore is where you’ll find textbooks and other course materials, Dinos gear and merchandise, books for leisure reading, gift items, school supplies and a full-service Starbucks to help you refuel any time of day.
- We focus on having the exact course material students need online or in-store for the beginning of every semester. You can choose new, used, digital or rental textbooks. New books are listed at publisher’s list price. Used books are sold at 75 per cent
of the new book price. Or, you can rent your textbooks online and have them delivered right to your door. Visit the online price comparison shopping system to find the best options for you. At the end of the semester, you can sell your textbooks through the Buyback program.

More than just textbooks, the Bookstore also carries:
- Stationery (pens, paper, pencils, sticky notes, binders)
- Art supplies (markers, paint brushes, specialty paper, sketch pads, pencils)
- General reading books (bestsellers, fiction, non-fiction, magazines)
- Electronics and gadgets (batteries, head-phones, speakers, software, tablets)
- Medical/Nursing supplies (lab coats, scrubs, stethoscopes)
- Health and fitness materials (DVDs, yoga mats)
- Children's reading and activity books
- Dino's fan apparel and accessories
- Faculty hoodies and T-shirts
- Ink Jet refills
- 3D printing
- Custom printed T-shirts
- Greeting cards and gifts

Location: First floor, MacEwan Student Centre, 424 Collegiate Blvd. N.W.
Hours of operation: Monday to Friday, 9 a.m. to 6 p.m.; Saturday: 10 a.m. to 5 p.m.
Telephone: 403.220.5937
Email: bkstore@ucalgary.ca
Website: calgarybookstore.ca

All Bookstore proceeds stay on campus; supporting student programming, academic, and research initiatives.

Food Services
University of Calgary Food Services over-sees the food services operator, select retail outlets and catering on campus. The Dining Hall, along with 17 other food retailers across campus provides the campus community a variety of healthy choices with everything from home-style comfort foods to authentic international cuisine. From coffee and baked goods, to dine-in service locations, Food Services has something for nearly every preference.

- Bistro Alma, International House (higher end table-service, liquor licensed)
- Brew & Blendz, Kinesiology Complex (coffee, smoothies, light fare)
- Brew & Blendz, Scurfield Hall (coffee, smoothies, light fare)
- Dining Hall, Dining Centre (cafe-style)
- Extreme Pita ICT (baked flat bread pitas, salads and drinks)
- Good Earth Café, TFDL (coffee, snacks and light fare)
- Good Earth Café, ICT (coffee, snacks and light fare)
- On the Go, Education Building (coffee, snacks and light fare)
- On the Go, Health Sciences Building (coffee, snacks and light fare)
- Tim Hortons, three locations in MacEwan Hall (coffee, soup, sandwiches, donuts)
- Tim Hortons, Murray Fraser Hall (coffee, soup, sandwiches, donuts)
- Toujours, Social Sciences Building (coffee, light fare) Open Monday to Thursday: 7:30 a.m. to 7 p.m., Friday: 7:30 a.m. to 3 p.m.
- Subway, Yamountsa Hall (sandwiches, salads, soup, soft drinks)
- Starbucks, MacEwan Hall, Bookstore (coffee, specialty coffee, baked goods, light fare)
- Starbucks, Yamountsa Hall (coffee, specialty coffee, baked goods, light fare)

Meal Plans
Meal plans are managed by Food Services, in coordination with the Unicard office. Meal plans are a simple way to budget and an effective way to eat on campus. Meal plans are available to anyone who has a Unicard. The cards are also loadable on an ad-hoc basis and can serve as a simple way to purchase food on campus. (ucalgary.ca/unicard/meal-plans).

Location: DC 18B, 2500 University Drive N.W.
Hours of operation: Monday to Friday: 8:30 a.m. to 4:30 p.m.
Telephone: 403.220.5541
Email: food.services@ucalgary.ca
Website: ucalgary.ca/foodservices

All Food Services proceeds stay on campus; supporting student programming, academic, and research initiatives.

Healthy U of C
Health and Wellness is a key focus of the University of Calgary Human Resources People Strategy; it contributes to the University’s goal of being an employer that successfully attracts and retains valued staff. A commitment to organizational and individual health and wellness will lead to a supportive environment where faculty and staff feel valued and are proud of their achievements and their contributions to the University’s organizational goals. The University of Calgary promotes a healthy learning and work environment for students and University staff members. We offer services and facilities that will help you with your physical, social and mental well-being. When you feel well, you are more resilient and better able to do your best in your studies, work and life.

The Wellness Guide is an online resource for students with everything you need to know about academic success, and emotional, spiritual, physical and social stuff. Visit www.ucalgary.ca/wellnessguide.

2008 was the formal launch of a new Wellness Centre and the integration of Health Services (family physicians, chiropractors, massage therapists, nutritionist, psychologists, Counselling and the Chaplaincy.

Integration will create a culture of wellness on campus – a place where students can truly experience a commitment to improving health and wellness.

Smoking Reduction Policy
With its Smoking Reduction Policy, the University strives to provide a safe and healthy work, learning and living environment for all staff, faculty, students and visitors. As a champion of health and wellness, the University believes that a reduction in smoking on campus is beneficial to all. Smoking is not permitted indoors nor within five metres of building entrances and air intake vents. As of January 1, 2009, tobacco product sales have been prohibited on campus in compliance with provincial legislation, the Alberta Tobacco Reduction Act. Please respect everyone’s right to clean air and a healthy environment. For details see the Smoking Policy at https://www.ucalgary.ca/policies/files/policies/Smoking%20Policy.pdf.

Scent-Free Initiatives
The Scent Free Awareness Campaign “We Share the Air” asks for your support in limiting or eliminating the use of scented personal care products whenever possible. Please see the website http://www.ucalgary.ca/safety/for information about the health effects related to scented personal care products and alternatives that you can choose.

Thank you for helping make the University of Calgary campus a healthy environment for everyone.

The University of Calgary was honoured to receive the Calgary Chamber of Commerce Gold level H.E.A.L.T.H. (Helping Employees Achieve LifeTime Health) award in 2005 for our workplace health initiatives. We believe that the quality of our workplace influences the quality of student experience.

The University of Calgary is the proud recipient of the Premier’s Award for Healthy Workplaces (2006), and received the highest accolade as the recipient of the Award of Distinction for employers with greater than 1000 employees. This award recognizes Alberta employers who demonstrate commitment to improving the health of employees and provide healthy workplace programs that encourage employees to make healthy eating choices and live an active lifestyle to remain healthy at work and beyond.

Healthy U of C recognizes that health and wellness is a shared responsibility between the organization and its people. Health, Safety and Wellness is one of the thirteen portfolios in the Campus Sustainability Plan, and the Sustainability Stewardship Working Group is an interdisciplinary team co-ordinating initiatives designed to actively engage the campus community in promoting a healthy campus culture. The portfolio’s mission is to further understand the interrelationships between quality of life and sustainability, and seek local and global solutions; to enhance awareness of the interrelationships between the built environment, health, and wellness; and to enhance
the quality of life on campus and in the community at large. As a post-secondary institution, we have a special responsibility to create a healthy community that enhances the student experience and models healthy choices.

Use of Alcohol Policy

The Use of Alcohol policy deals with the consumption of alcoholic beverages on the campus and at University functions. No one may bring or consume liquor on campus except as permitted under the University’s Institution License from the Alberta Gaming and Liquor Commission.

Details regarding the University’s liquor policy may be obtained from Risk Management & Insurance under Policies and Guidelines. See Special Events & Use of Alcohol: http://www.ucalgary.ca/UofC/departments/RISK/riskmgmt/ucalgary.ca/.

If there are concerns about student misconduct, please refer to: http://ucalgary.ca/conduct/.

Information Technologies

The Information Technologies (IT) department provides computing and media services in support of learning, teaching, research, and administration at the University of Calgary.

Accounts

To ensure you are able to access all the online services available to you, please register for the following accounts:

eID

Your eID identifies you as member of the university community or as a prospective student, giving you access to a variety of online services available to you through the myUofC portal.

IT Account

Other IT services (including webmail) require an IT Account. Students registered in at least one full-time course can sign up for an IT Account by visiting https://itregportal.ucalgary.ca/. Services that require login with an IT Account include: student email, login access to lab computers, free software downloads and wireless Internet access (AirUC Secure). For more information, visit www.ucalgary.ca/IT/access/itaccount.

Forgot your password? Reset all passwords online at https://ucalgary.ca/access/recovery.

Computer Labs and Printing

There are a number of open-access and drop-in computer labs on campus. Find available computer labs via the interactive campus maps at www.ucalgary.ca/map.

Wireless Networks

Browse the web, check your email, and work online from anywhere on campus. AirUC Secure is the preferred wireless network on campus, available in all buildings, as well as outdoors. Living in residence? Reznet is the network available to all students living in residence buildings on campus.

Other IT Services

IT supports many online services that students will utilize throughout their academic learning experience at the University of Calgary. For more information on IT services, visit www.ucalgary.ca/it/services.

myUofC

The myUofC portal features single sign-on capabilities, providing you with a streamlined gateway to web-based applications, services and tools, including your Student Centre, university email account and Desire2Learn. https://my.ucalgary.ca/.

Desire2Learn

Desire2Learn (D2L) is the university’s new learning management system that offers a ‘virtual classroom’ for teaching and learning. Instructors will post course notes and assignments, as well as administer quizzes through D2L.

Audio Visual Services

In need of Audio Visual (AV) equipment? IT’s Com Media team provides AV services, including classroom equipment bookings, videography and AV conferencing and event support. Students can also rent a variety of audio-visual equipment for on or off campus use. www.ucalgary.ca/IT/commedia.

Software

Free software is available for members of the campus community, and is accessible through IT’s software download page. Remote access to specialized software is also available through Virtual Desktop. http://www.ucalgary.ca/IT/software/downloads.

Dinos Athletics (The Interuniversity Athletic Program)

A big part of your University of Calgary experience is Dinos Athletics. There is no better way to feel the proud 45-year history of our school than to join your fellow students in the stands, cheering the Dinos to victory. With a mission of lifting the spirit and pride of all members of the University community, Dinos Athletics belongs to everyone and we encourage you to enjoy the experience.

Dinos Athletics is a full member of the Canada West Universities Athletic Association. Canada West is one of the most competitive conference in Canadian Interuniversity Sport (CIS).

The Dinos compete in Canada West conference league sports including basketball, field hockey, football, ice hockey, rugby, soccer, and volleyball and in Canada West tournament sports including cross-country, swimming, track and field, and wrestling.

Professional coaches and world-class equipment, facilities and support services are provided for the interuniversity athletic program. Students will find interuniversity athletics challenging and exciting as participants, and interesting and entertaining as spectators.

Don’t forget, all undergraduate and graduate students are admitted free of charge to all regular season games upon presentation of proper I.D.

For further information contact:

Dinos Athletics - Faculty of Kinesiology
Kinesiology Complex A 147
Telephone: 403.220.6803
Email: goDinos@ucalgary.ca

Parking and Transportation Services

Parking and Transportation Services is your one-stop shop for all of your parking and transportation needs at the University of Calgary.

Parking and Transportation Services offers the following:

- Permits (annual, semester, monthly)
- Meters and pay-lots (hourly, daily)
- Event parking
- Motorcycle parking
- Citations and appeals
- UPass and transit
- Secured bicycle parking
- Carpooling and Car2Go

Location: Olympic Volunteer Centre (OVC), 1833 Crowchild Trail N.W.
Hours of operation: Monday to Friday: 7:30 a.m. to 5 p.m.
Telephone: 403.220.6772
Email: parking@ucalgary.ca
Website: ucalgary.ca/parking

All Parking and Transportation Services proceeds stay on campus; supporting student programming, academic, and research initiatives.

Residence Services

Residence Services provides quality accommodations and programs, which enhance the student experience, support academic success and foster leadership development. The vibrant and supportive community environment in residence leads to lifelong friendships and strong ties to the university. Research shows that students living in residence maintain a higher GPA and are more apt to complete their PSE studies.

Student Housing

Residence buildings offer a variety of accommodation styles, including traditional dormitory (for first-year), studios, one-bedrooms, two bedrooms and four bedroom apartments, as well as two and three bedroom suite-style buildings. Housing options transition with students as they progress through their university experi-
ence. All buildings have an academic lounge where students can study or attend tutoring sessions and a recreational lounge to relax with friends.

**Residence Programming**

Each building has trained staff including Community Advisors (CAs) and Residence Life Coordinators (RLCs) who are available 24-hours-a-day to provide support to students living in residence. Staff members are specifically trained in responding to personal crises, and are able to direct students to appropriate university resources, leadership development, academic learning strategies, and community building. A variety of living-learning communities are supported through our residence life programming.

**Location:** DC01, 124 University Gate N.W.

**Hours of operation:** Monday to Friday 8 a.m. to 8 p.m., Saturday 10 a.m. to 3 p.m., Sundays and Holidays 10 a.m. to 3 p.m.

**Telephone:** 403.220.3210

**Email:** residence@ucalgary.ca

**Website:** ucalgary.ca/residence

**Student-Family Housing**

Student family housing consists of 250 townhouses, arranged in a garden court setting specially designed for students with families. In addition to the facilities offered, Residence Education Staff facilitate programs and services to meet family members’ needs, including community barbecues, summer camps, ESL conversation groups, and the Jenna Chang Children’s Resource Library.

**Location:** 3735 - 32 Avenue N.W.

**Telephone:** 403.220.7227

**Email:** family.housing@ucalgary.ca

**Website:** ucalgary.ca/residence

**All Residence Services proceeds stay on campus; supporting student programming, academic, and research initiatives.**

**Student Legal Assistance (SLA)**

**Executive Director:** Michelle Christopher

Student Legal Assistance (SLA) is the on-campus law clinic staffed by U of C law students who, with the assistance of volunteer advising lawyers, provide free representation and legal assistance to U of C students and needy Calgary and area residents who are unable to afford a lawyer.

SLA provides services throughout the year in civil, criminal and family law matters, with evening clinics during the academic year and daytime clinics during the summer months.

SLA student caseworkers can assist with academic appeals and with most matters in Provincial Court and administrative tribunals, including contract disputes, landlord-tenant matters, employment and wrongful termination disputes, traffic and by-law infractions, criminal law matters where the Crown proceeds by summary conviction and is not seeking jail time and some family law matters, excluding divorce and child welfare.

SLA also provides commissioner for oaths and notarial services free of charge for students. A disbursement charge may apply. For donation purposes, please note that SLA is a registered charitable organization.

For further information, to make a donation or to book an intake appointment, please call during business hours.

**Telephone:** 403.220.6637

**Location:** 3390 Murray Fraser Hall

**Study Abroad Office/International Learning**

Colleen Packer, Manager

Students are encouraged to include an ‘international experience’ into their time at university. This may include Study Abroad in credit programs such as student exchange programs with partner universities; group study programs led by University of Calgary professors; term abroad programs; research projects; practica; internships and co-operative education abroad; independent study approved for a Letter of Permission. It may also include volunteering abroad or non-credit experience abroad.

The Study Abroad Office activities include:

- Study/work/volunteer abroad resource library
- Selection and administration for Student Exchange Programs and Group Study Programs
- Volunteer opportunities in CISSA and referral to other organizations in Canada and abroad
- Handbooks for study abroad students
- Workshops to prepare University of Calgary students going abroad and returning home: Risk and Safety; Academic Issues, Cultural Differences and Culture Shock, and Re-entry - Coming Home.

**Telephone:** 403.220.5581

**Fax:** 403.289.4409

**Email:** study.abroad@ucalgary.ca

**Location:** MacEwan Student Centre, Room 275 (CISSA)

**Website:** https://www.ucalgary.ca/studyabroad/

**Unicard Office**

The Unicard is a multi-purpose campus card for all students, staff and faculty, and is the official University of Calgary identification and access card. It can also be used to check out books at the library, to access the gym and athletic facilities and as a debit card for purchasing products and services on campus ranging from meals and Bookstore merchandise to printing and photocopying.

The Unicard is available at the Unicard office, located on the main floor of the Dining Centre. Use our selfie system to submit your photo online and you will be notified when your card is ready for pickup, or stop by the office during regular business hours to have your photo taken and card processed. You must bring a piece of government-issued photo ID with you when you pick up your card (e.g. driver’s license, passport).

**Location:** DC018, 124 University Gate N.W.

**Hours of operation:** Monday to Friday: 8:30 a.m. to 4:30 p.m.

**Telephone:** 403.220.7290

**Email:** unicard@ucalgary.ca

**Website:** ucalgary.ca/unicard

All Unicard proceeds stay on campus; supporting student programming, academic, and research initiatives.

**University Child Care Centre (UCCC)**

The University Child Care Centre Society currently has two locations at the U of C: one located on Main Campus between Scarfe Hall and the Biological Sciences Building and the other on West Campus, across from the Alberta Children’s Hospital. The UCCC is a not-for-profit charitable organization governed by a Board of Directors. Six of these Board members are U of C Board of Governor appointed representatives, four are elected parent representatives, one is a Students’ Union representative and one is a Graduate Student representative. The UCCC’s Executive Director reports to the Board. Each centre has a Leadership Team which includes a Program Director and a Program Co-ordinator. Both of our centres are licensed, monitored and regulated by both Alberta Human Services Child development branch and Alberta Environmental Health. UCCC strives for excellence and high quality early childhood care, education and development and therefore maintains voluntary “accredited” status through Alberta Accreditation of Early Learning and Care Services (AELCS).

**Mandate:**

Our mandate is to provide and promote childcare services and early childhood education and development for the children of students, faculty and staff that make up the University of Calgary community.

**Mission Statement:**

To enrich the lives of our UCCC Society family by celebrating and building a foundation of excellence in early care and life-long learning.

**Vision Statement:**

**Philosophy:**

At the UCCC we believe that play is imperative during the early years of life. This belief is the basis of our emergent curriculum that focuses on the children’s interests, abilities and learning styles. Our goal is to provide an exemplary inclusive program that supports and encourages the unique potential within each child. We do this by promoting the natural process of play in an enriched setting that provides optimal conditions for each child to grow at their own pace.
Hours of Operation:
The Centre is open from 7:30 a.m. to 5:30 p.m. Monday through Friday. UCCC Society closes on all days that the U of C ceases regular operation. We are closed on all U of C holidays, statutory holidays, two professional development days per year (which take place during student reading weeks in February and November) as well as the U of C assigned “floater days” that occur during the week between Christmas and New Year, with a traditional early closure on Christmas Eve.

Waitlist and Admission to UCCC Society:
Applicants are prioritized within each age group on the basis of their waiting list application date. At our Main Campus location the order of priority placement is first given to University of Calgary full-time students followed by University of Calgary faculty, and staff, with the exception of children who have a sibling attending the UCCC Society, in which case sibling placement takes priority. At our West Campus location, staff and faculty have priority over full-time students. To be on our waiting list you must turn in a completed waiting list application form accompanied by a non-refundable registration fee and confirmation of your University affiliation. Being placed on the waitlist does NOT guarantee you a spot at the centre. On average, most children are on the waitlist one to three years.

Kindergarten at UCCC:
UCCC is proud to offer a private kindergarten program delivered from our West Campus site. The kindergarten curriculum is mandated by Alberta Education and is taught by a certified teacher. We currently offer both morning and afternoon classes with a maximum of 19 students in each class. Full-time child care is included in the kindergarten monthly fee. Our enhanced kindergarten classes include numerous field trips, community connections and the delivery of additional on-site programs such as yoga, music, Fit Kids, and Seeds of Empathy.

For more information on The University Child Care Centre Society please visit our website at:

University Library
See Libraries and Cultural Resources in About the University of Calgary.
# About the University of Calgary

The University of Calgary is Canada’s leading next-generation university – a living, growing and youthful institution that embraces change and opportunity with a can-do attitude. Located in the nation’s most enterprising city, the university has a clear strategic direction – Eyes High – to become one of Canada’s top five research universities by 2016, grounded in innovative learning and teaching and fully integrated with the community of Calgary.

As a comprehensive academic and research institution, the University of Calgary inspires and supports discovery, creativity and innovation across all disciplines. Through the Taylor Institute for Teaching and Learning, under construction now, the university will take the lead in educational innovation by researching the most effective methods for engaging students, by supporting faculty to be the best teachers they can be and by providing some of the most innovative learning spaces available anywhere in North America.

The University of Calgary attracts and nurtures the talent that drives new knowledge creation, improves lives and better our world. In this rich learning environment, the university serves over 31,000 students in more than 200 undergraduate, graduate and professional degree programs, and provides the community with diverse lifelong learning opportunities. International study, volunteer, work, and research programs provide global context while promoting diversity and excellence in learning, teaching and research.

The University of Calgary stands out among Canadian universities in how it actively engages students in leadership development in all areas – the arts, athletics, science, medicine, engineering, volunteerism and business. It is also a leader in sustainability with its set of values embraced by the campus through teaching, leadership and campus operations.

## Research and Education

As a member of the U15 leading research-intensive universities in Canada, the University of Calgary is ranked one of the Top 10 research universities in the country. As a comprehensive research institution, the university houses 73 Canada Research Chairs and more than 80 research institutes and centres working to find solutions to some of the most challenging problems facing society today. It has over 1,800 academic staff actively engaged in research, scholarship and teaching in Canada and around the world.

Innovation, discovery and learning are at the heart of all that we do. Our relentless pursuit of quality in our teaching and research programs is guided by our mission to contribute to the well-being of the people of Alberta, Canada and the world. Research brings significant benefits provincially, nationally and internationally, and is the foundation of Alberta’s economic and social vitality. Interdisciplinary research is core to the university’s teaching and research mandate.

The university offers a high quality undergraduate education that is characterized by the synthesis of research, teaching and learning. We mean to enhance the undergraduate learners’ experience by using a student-centred focus that maximizes opportunities to provide a distinctive learning experience that fully integrates the features of a research university. The university is broadening opportunities for students to take inquiry-based courses that lead to greater critical thinking skills, increased exposure to undergraduate research and greater access to leading edge scholars.

International study, volunteer, work, and research programs give graduates global context while promoting diversity and innovation in teaching and research.

The U of C is the first university in Canada to offer a four-year graduation guarantee to students embarking upon four-year undergraduate degree programs in the faculties of Arts and Science. The guarantee program offers incoming students an agreement that ensures they will be able to graduate within four years, or the university will pay the tuition for any extra courses needed to finish.

Students at the University of Calgary are officially recognized for their involvement in campus activities outside of the classroom. The co-curricular record is an initiative that encourages and fosters a campus culture of volunteerism and community involvement amongst its students.

The University of Calgary stands out among Canadian universities in how it actively engages students in leadership development in all areas – the arts, athletics, science, medicine, engineering, volunteerism and business. It is also a leader in sustainability – living a set of values embraced by the campus through teaching, leadership, and campus operations.

Our efforts are to raise our global profile, enhance the quality of our undergraduate and graduate programs, promote innovation and excellence in scholarly activity and provide significant returns and tangible benefits to our community and economy.

## Facilities

The MacEwan Student Centre is a hub of activity at the university. There is also a museum and art gallery, four performance theatres, two childcare centres and residences for single students and students with families.

The U of C is currently expanding the Engineering Complex, establishing the Taylor Institute for Teaching and Learning, and creating new residences.

The Cumming School of Medicine and the Faculty of Veterinary Medicine are located on the south campus adjacent to the Foothills Hospital. Satellite institutes of the university include, the Kananaskis Biogeo-science Institute, located a short drive from the city on the eastern slopes of the Rocky Mountains, the Rothney Astrophysical Observatory, located in the foothills south of the city and a campus in Doha, Qatar, offering internationally accredited nursing degrees to students in the Middle East.

Development of the university’s west campus is currently taking place, and is the site of the new Alberta Children’s Hospital.

The University of Calgary features some of the finest athletic facilities in the country. The Olympic Oval is an international speedskating facility and houses the Canadian Sport Institute, a high-performance training centre and two Olympic-sized rinks where the reigning women’s gold medal hockey team trains. There are also tennis courts, a triple gymnasium, a yoga studio, an Olympic-size swimming pool, weight rooms, jogging tracks, an Outdoor Centre offering equipment rentals, courses and instruction, and a huge indoor climbing wall. Nearby is the home of U of C Dinos football team, McMahon Stadium.

## Governance

The University of Calgary has two governing bodies:

- The Board of Governors is the corporate body charged with the management and
control of the University, its property, revenue, business and affairs.

- The General Faculties Council (GFC) is responsible for the academic affairs of the University, subject to the authority of the Board of Governors.

Each Faculty has a Faculty Council empowered to determine the Faculty’s programs of study, conduct examinations, provide for the admission of students, determine conditions for withdrawal, and to authorize the granting of degrees, subject to conditions imposed by the General Faculties Council.

The Students’ Union and the Graduate Students’ Association provide for the administration of the affairs of students and the promotion of their general welfare.

More information can be found at: http://www.ucalgary.ca/secretariat.

Coat of Arms/Logo

The University of Calgary combines the best of long-established University traditions with Calgary’s frontier spirit of originality and innovation.

Our logo was designed to reflect that spirit. The logo has two components: the Coat of Arms (including the scroll with our motto) and the wordmark. The coat of arms represents and respects our historical roots while the more contemporary wordmark reflects our focus on the future and leading edge.

The Coat of Arms consists of a shield, an escroll containing the motto and the wordmark. The coat of arms represents and respects our historical roots while the more contemporary wordmark reflects our focus on the future and leading edge.

The shield consists of two parts, the upper part (the chief) separated from the lower (the base) by an arched line symbolizing the Chinook arch. The ground colour of the chief is scarlet, commemorating the North West Mounted Police under whose influence Western Canada was settled. Upon this colour is a pair of open books bound in gold. Between the books is a white rose, symbolic of Alberta. The ground colour of the base is gold, indicative of golden sunshine or golden grain. Upon this is a black bull’s head with red horns and crossed staves bearing red flags, reminiscent of the family crest of Lt. Col. J.F. Macleod, the NWMP officer who founded Fort Calgary.

Below the shield, printed on an escroll, is the university’s motto, “Mo shuile togam suas” (translated as “I will lift up mine eyes”), rendered in Gaelic uncial letters. The scroll is white; the draped ends are red. They were granted to U of C in 1966 by Lord Lyon King of Arms at Edinburgh.

Official Colours

The university has three official colours that appear in the Coat of Arms:

- Red PMS 485;
- Gold PMS 116; and
- Black.

Tartan

The University has an official tartan that incorporates the U of C’s official colours of red, black and gold in its design. It was designed by Jim Odell, a U of C Education and Fine Arts graduate and accredited in a ceremony presided over by Duncan Paisley of Westerlea, President of the Scottish Tartans Society and director of the Register of All Publicly Known Tartans.

The Mace

Certain formal occasions involve the use of special regalia, the significance of which is now symbolic but most of which has practical origins. In early times the mace was used first as a weapon to protect and second as a symbol of authority.

The mace carried into Convocation is a symbol of the authority of the Chancellor. It represents the Crown and the authority vested in the Chancellor to grant degrees. It is always carried in front of the Chancellor at Convocation. One interesting tradition in the use of maces is that if the real authority (the Queen) was present in person, the mace would be inverted.

Historical Highlights

1905

- Alberta becomes a province. The Alberta Normal School for training teachers is established in Calgary.

1906

- Premier A.C. Rutherford names Edmonton as the site of the University of Alberta (U of A).

1907

- Strathcona (now a part of Edmonton) is named as the site of the provincial university. Enraged, Calgarians conduct an unsuccessful battle to have the university relocated to Calgary.

1910

- Calgary College is created.

1912

- Calgary College opens its doors as a private post-secondary institution. It has no degree-granting status.

1914

- A provincial commission recommends against giving Calgary College degree-granting status.

1922

- Calgary Normal School (formerly Alberta Normal School) relocates onto the Institute of Technology and Art campus (now SAIT).

1945

- The Normal School becomes a southern extension of the U of A Faculty of Education.

1946

- Citizens form the Calgary University Committee.

1947

- The Calgary Branch of the U of A offers the first two years of a Bachelor of Education degree. A.L. Doucette is appointed the first director. Land is set aside in Houndsfield Heights for an eventual university.

- The timetable for the fall term includes folk dancing and tumbling on Saturday.
1950
- Land in Houndsfield Heights is exchanged for the present campus site.
- The Board of Governors at the U of A sells all land south of 24th Avenue because the Calgary Branch of the University of Alberta would never grow large enough to use it.

1951
- Radio broadcasts and ads on top of milk cartons are designed to encourage enrolment at the Calgary Branch of the University of Alberta.
- The Calgary University Committee urges an expansion of the Calgary Branch of the U of A and succeeds. First years of the BA and BSc are offered.

1953
- First year of BComm is offered.

1957
- The name changes to University of Alberta in Calgary (UAC). By now the first years of the BSc (Eng) and BPE are offered.

1958
- Sod-turning for the present campus. The Department of Public Works begins leveling the land.

1960
- The new campus opens with two new buildings, Arts and Science A. McMahon Stadium opens. M.G. Taylor is appointed principal.
- April 1, Gauntlet editor Alan Arthur launches the first Bermuda Shorts Day by writing on a chalkboard “Wear shorts tomorrow.” The major events are a huge marble tournament and a game called squamish.

1961
- The name changes to University of Alberta, Calgary. The first physical education building opens.

1962
- The 80-acre research park is designated. Campus patrol arrives. Full degree study is offered.

1963
- Students begin a drive for autonomy from the University of Alberta.

1964
- H.S. Armstrong is appointed President. Name changes to University of Alberta at Calgary. The football Dinos begin to play.

1965
- On May 1 UAC is granted academic and financial autonomy. The residence complex, Calgary Hall (now Craigie Hall), Science B and the Meteorological Station are completed. The Faculty of Engineering and the Division of Continuing Education are founded.

1966
- The Universities Act passes, creating The University of Calgary. F. C. Manning is appointed as the first Chair of the Board of Governors. The Senate and School of Social Welfare are established.

1967
- The first convocation is held March 29. The first recipient of a degree, Doctor of The University of Calgary, is Lester B. Pearson. Faculties of Business and Fine Arts are established.

1969
- A.W.R. Carrothers is named President. School of Nursing is established. More buildings open: Social Sciences, Mathematical Sciences and Physical Plant.

1970
- General Faculty Council is renamed General Faculties Council. First students are admitted to the Faculty of Medicine.

1971
- Faculty of Environmental Design is established. Four year degree programs begin.
- Dinnies Den opens as the first pub on campus.
- Students’ Union takes over management of MacEwan Hall.

1974
- W.A. Cochran is named President.

1975
- Faculty of Law is established.

1976
- Faculty of Arts and Science is divided into the University College and the Faculties of Science, Social Science, and Humanities. Day Care Centre opens. Arctic Institute of North America is relocated here.

1978
- Norman E. Wagner is named President.
- The Nickle Arts Museum opens.

1979
- The Canadian Institute of Resources Law is established.

1981
- The University College becomes the Faculty of General Studies. The University of Calgary Press is established.

1982
- The University of Calgary is selected as the 1988 Olympic Games venue for the athletes’ village and speed-skating events.

1984
- A $17 million supercomputer is acquired.
- The Office of Technology Transfer is established.

1985
- Calgary Hall is re-named Craigie Hall in memory of former Vice-President (Academic) Peter Craigie.

1986
- The International Centre is established.

1987
- The University acquires the land under McMahon Stadium in a trade with the city for a piece of northeast campus to expand the Light Rail Transit system.
- The footbridge spanning Crowchild Trail is relocated to the entrance of the University. It was originally designed by Engineering Professor Bob Loov.

1988
- The Winter Olympics come to campus. Murray Fraser is named President. Enrolment is frozen at approximately 16,000 full-time undergraduate students.

1989
- The University of Calgary athletic teams win five national championships. Employment Equity program is adopted.

1990
- Total outside funding for research reaches $60 million from government and private sources.

1991
- The University celebrates its 25th anniversary.

1992
- NASA space shuttle Columbia blasts off carrying a University of Calgary science experiment.

1993
- The University raises more than $45 million in its first national fundraising campaign. Students commit $2.2 million to the Building on the Vision campaign.

1994
- The University of Calgary hosts the 1994 Learned Societies Conference in June and welcomes a record 8,100 delegates representing 105 societies and conferences from 24 countries.

1995
- The University acquires the Higher Education Reserve Lands west of Campus.
- Site dedication ceremony held for the new Rozsa Centre.

1996
- Construction of the Rozsa Centre for International Understanding and Fine Arts begins.
- Terry White is appointed U of C President.

1997
- The university launches U of C 101 - a four-day orientation session for new students and the first program of its kind in Canada. The program aims to help students make the most out of their university experience - both inside and outside the classroom.
- The university launches U of C 101 - a four-day orientation session for new students and the first program of its kind in Canada. The program aims to help students make the most out of their university experience - both inside and outside the classroom.

1998
- The university launches U of C 101 - a four-day orientation session for new students and the first program of its kind in Canada. The program aims to help students make the most out of their university experience - both inside and outside the classroom.
- U of C cancer researchers receive international recognition after discovering a naturally-occurring human virus that kills cancer in mice.

1999
- Largest Information Commons of its kind in North America opens in MacKinnie Library.
2000
• Science professor Alan Hildebrand is part of an international research team that tracks down and recovers meteorites in northern B.C. The meteorites are discovered to be one of the most primitive solar system materials ever found.
• International research led by U of C archaeology professor William Glanzman partially uncover a 3,000-year-old temple in Yemen that is linked with the legendary Queen of Sheba. Experts believe the temple could be as significant a discovery as the ruins of Pompeii, the Pyramids of Giza, or the Acropolis of Athens.

2001
• Dr. Harvey P. Weingarten is appointed as seventh President and Vice-Chancellor of the University of Calgary.
• Information and Communication Technology (ICT) Building opens. It features state-of-the-art teaching and Research labs. The building is strategically located between the faculties of Science and Engineering, and provides a link between the two.

2002
• President Weingarten unveils “Raising our Sights”, a four-year academic plan designed to propel the University of Calgary into the upper echelon of Canadian universities by strategically allocating resources towards four distinct areas of strength where the university can truly become an international leader.
• The Calgary Centre for Innovative Technology (CCIT) officially opens. CCIT fosters multidisciplinary initiatives through teams comprised of researchers, students and professors from such faculties as engineering, science, medicine, kinesiology collaborating with colleagues for industry, government agencies and other universities to find solutions to problems facing society and industry in several key areas.

2003
• Ground for the new Alberta Children’s Hospital was broken on the West Campus.
• The Libin Cardiovascular Institute of Alberta was created with a $15-million gift from the Alvin and Mona Libin Foundation and a $5-million donation by David and Gail O’Brien helped launch a world-class undergraduate educational centre in the Faculty of Medicine.

2004
• Fine Arts professor Eric Cameron is awarded one of the highest honours for a Canadian artist: a Governor General’s Award in Visual and Media Arts.
• Allan Markin, chairman of Canadian Natural Resources, donates $18 million to establish an Institute for Public Health.
• University of Calgary scientist Samuel Weiss, PhD, director of the Hotchkiss Brain Institute at the U of C Faculty of Medicine wins one of the world’s most prestigious medical science awards, a Gairdner International Award.
• U of C launches Canada’s fifth veterinary program in the new Faculty of Veterinary Medicine. Student involvement beyond the classroom is recognized as part of a new initiative called co-curricular record. The record is a first for Western Canadian universities.

2005
• Seymour Schulich, a director and the largest private shareholder of Newmont Mining Corp., the largest gold mining company in the world, donates $25 million to the University’s engineering faculty, an amount matched by the provincial government. The faculty is renamed the Schulich School of Engineering in honour of the donation. Schulich’s donation creates an endowment, more than 100 new scholarships, three new research chairs, and invests in enhanced learning opportunities for students.
• The University launches Fast-Track 05, an initiative to enhance the quality of the student experience. Projects include more opportunities for experiential learning, a wireless campus, improved student spaces, and a new cyber café.

2006
• The university marked its 40th anniversary with a series of celebrations touching on almost every area of the campus community. One of the biggest 40th anniversary was the Take Your Place initiative, which saw student designers renovate 40 student spaces on campus.

2007
• Official opening of a branch campus called University of Calgary-Qatar, will bring state-of-the-art nursing education, in Qatar’s capital city of Doha.
• The Child Development Centre officially opened on October 9, 2007. The centre will house a second child-care facility on campus and be home to a full continuum of researchers and clinicians dedicated to the study of child development-related issues. It will ultimately house other community groups with similar interests. Canada’s most advanced child development centre is also Calgary’s most environmentally advanced structure, built to Leed Platinum standards.
• University of Calgary scientist Samuel Weiss, PhD, director of the Hotchkiss Brain Institute at the U of C Faculty of Medicine wins one of the world’s most prestigious medical science awards, a Gairdner International Award.

2008
• The Faculty of Education was re-named for Teaching and Learning.
• The Taylor family donates $40 million to the University of Calgary's downtown campus.

2009
• The university finalizes the site of its new downtown campus, which will open its doors in the fall of 2010 for students and researchers in a variety of programs.
• International House opens housing Global Village (the university’s first multicultural living-learning residence) and Hotel Alma (the university’s first on-campus hotel).
• Alumni and celebrated Canadian astronaut Robert Thirsk, BSc’76, LLD’09, began his 189-day mission aboard the International Space Station. While in space, he accepted an honorary degree from U of C.

2010
• A new chapter in the U of C’s 44-year history begins as Elizabeth Cannon, Dean of the Schulich School of Engineering, is officially selected as the University of Calgary’s eighth president and vice-chancellor on March 24.

2011
• In a short amount of time, construction has transformed the hole in the ground outside of MacEwan Hall into the Taylor Family Digital Library (TFDL). The first two floors of the building, including the Information Commons opened January 2011. The building is fully operational in Summer 2011.
• U of C’s Ward of the 21st Century Research and innovation Centre welcomed the Duke and Duchess of Cambridge on July 7, 2011.
• The new Energy Environment and Experiential Learning (EEEL) Building was opened to the University community September 6, 2011.
• A new strategic direction for the next five years, Eyes High, is launched Fall 2011.
• The Haskayne School of Business and the Department of Economics at the University of Calgary announce the new Centre for the Digital Economy (CDE®) sited at the University of Calgary’s downtown campus.
• The University of Calgary’s Hotchkiss Brain Institute (HBI) has united with local businessman Ronald P. Mathison to create a centre dedicated to finding innovative treatments and providing early intervention for mental illness.

2012
• The Taylor family donates $40 million to establish a home for the Taylor Institute for Teaching and Learning.
• The Faculty of Education was re-named for Teaching and Learning.
### About the University of Calgary

- The Faculty of Medicine was named The Cumming School of Medicine in honour of $100 million donation from Geoffrey Cumming.

### Campus Services

#### Campus Security

Campus Security is dedicated to maintaining the campus as a safe and pleasant place to live, work and study. Campus Security is responsible for the security and protection of people on campus in addition to the buildings and grounds. Close liaison is maintained with police and other security agencies in addition to City of Calgary emergency services. Officers are on duty 24 hours a day, year round, to respond to your security and emergency needs.

Campus Security, in partnership with the Students’ Union, provides a Safewalk service to any location on campus including the LRT, parking lots, bus zones and campus housing. Campus Security can be contacted from any of the “Help” phones located around campus or by dialing 403.220.5333.

**Telephone:** 403.220.5333  
**Fax:** 403.282.2765  
**Location:** MacEwan Student Centre, Room 260  
**Website:** http://www.ucalgary.ca/security

#### Conference and Event Management

The University of Calgary campus is a vibrant and dynamic space where you and your guests can enjoy catered venues, casual events, training sessions, conferences and even formal occasions such as award dinners and weddings.

Centrally managing over 42,000 square feet of bookable classroom, boardroom, conference, and event space, 141 lecture theatres and more than 300 hectares of beautiful, park-like outdoor space, the Conference and Event Management (CEM) team is sure to find a creative solution for your event. Whether you need to arrange a multi-day conference, a business luncheon or a social event, our CEM staff will take care of all essential details. You will be assigned a professional Event Planner to coordinate your event, and provide you with a quote on services, available à la carte.

À la carte services include:
- Venue rentals (classroom, boardroom, hall, dining area, outdoor space)
- Set-up and delivery requirements
- Catering (customized menus)
- Audio and visual and lighting rentals
- Venue décor (centerpieces, flower arrangements, linens, etc.)
- Event planning and coordination
- Conference registration and processing of fees
- Registration desk management
- Hotel accommodations right on campus
- Catering including custom menus

- Coordination and rentals of Audio/Visual and IT requirements
- Organization and coordination of social events and external outings
- Sourcing and purchase of conference materials including promotional items, printing and gifts
- Preparation and distribution of event packages

**Location:** 169 University Gate N.W.  
**Office hours:** Monday to Friday: 8:30 a.m. to 4:30 p.m.  
**Telephone:** 403.220.3111  
**Email:** mse@ucalgary.ca  
**Website:** ucalgary.ca/mse

All Conference and Event Management proceeds stay on campus; supporting student programming, academic, and research initiatives.

#### Hotel Alma

Set in the heart of the University of Calgary campus, Hotel Alma treats guests to gracious service, affordable accommodations (special rates for staff and visiting families of students) and a host of meeting spaces. Hotel Alma features 96 rooms and suites, a stylish bistro and conference facilities for up to 125—all conveniently close to campus activities and amenities such as shops, services and food.

With every stay at Hotel Alma guests will enjoy:
- Complimentary breakfast at Bistro Alma
- Free Wi-Fi
- Free long distance calls in North America (excluding Hawaii and Alaska)
- Complimentary access to the fitness facilities such as the Fitness & Life Centre, Aquatic Centre, Racquetball Centre, Speed skating Oval and wall climbing.

**Short and Longer-Term Stays**

Accommodations include one, two and three bedroom apartments as well as traditional dormitory rooms and can accommodate groups of up to 1,122 people. Through the fall and winter season (late August through April), Seasonal Residence provides two bedroom, short-term residences to teams, student groups, exchange students, etc.  

**Location:** 169 University Gate N.W.  
**Hours:** 24-hours-a-day, seven-days-a-week  
**Telephone:** 403.220.3203  
**Email:** stay@hotelalma.ca  
**Website:** hotelalma.ca

**All Hotel Alma proceeds stay on campus; supporting student programming, academic, and research initiatives.**

#### Environment, Health and Safety

The University of Calgary is committed to providing a safe and healthy environment for students in which to learn. The EH&S Department provides leadership in the implementation of the University’s Occupational Health and Safety and Environmental Management Systems, including WHMIS (Workplace Hazardous Materials Information System), radiation safety, and biohazardous materials.

Students are expected to take the necessary training to allow them to anticipate, recognize, evaluate and control the hazards they may encounter during course activities on campus, and to follow established procedures. These activities may include working in a laboratory, workshop or during field studies off site. By understanding and following safe work practices at the University, the student will be better prepared when entering their vocation.

The EH&S website provides information on legislation; policies and procedures; safety courses and online registration; as well as other health and safety related information and guidance.

**Environment, Health and Safety can be contacted at:**  
**Telephone:** 403.220.6345  
**Website:** http://www.ucalgary.ca/safety

#### Libraries and Cultural Resources

Libraries and Cultural Resources combines the expertise and services of the University’s information providers - Institutional Repository, the Nickle Galleries, Special Collections, University Archives, University Library, and the University of Calgary Press - to ensure provision of full access to the best recorded knowledge and creativity in a variety of formats and media.

#### Institutional Repository

The Institutional Repository is a stable, sustainable model for dissemination of the intellectual output of the faculty, graduate students and research groups affiliated with the University of Calgary. Submission to the repository fulfills granting agency requirements and supports open access. Collections like the Students’ Union Undergraduate Research Symposium and the University of Calgary Theses provide access and exposure for student work alongside faculty research collections. Alumni may request the deposit of their graduate thesis and any accompanying files in the Retrospective Theses Collection while current Graduate Students can submit to the Vault.

**Email:** digitize@ucalgary.ca  
**Website:** http://dspace.ucalgary.ca

#### Nickle Galleries

Nickle Galleries houses collections of art, numismatics and textiles to support its role as an outstanding centre for exhibitions, academic research and aesthetics. The art collection concentrates on Western Canadian art of the twentieth century incorporating artists of regional and national importance. The numismatic collection’s primary focus is on the ancient Mediterranean region, but also includes paper money and ethnographic numismatic items from around the world. The carpet and textile collection is the largest of any Canadian university museum, comprised of hand-woven carpets and textiles of Central and West Asia. The collections support teaching and research from across the University of Calgary, and
are available to visiting scholars and classes by appointment. Nickle Galleries is also central to the minor program in Museum and Heritage Studies offered through Interdisciplinary Programs in the Faculty of Arts.

Originally opened in 1979 as The Nickle Arts Museum, Nickle Galleries initiates the next chapter for the programs and collections first made possible by a bequest to the University of Calgary by Samuel C. Nickle and furthered by the subsequent donation dedicated to numismatics by his son Dr. Carl Nickle. The Nickle Galleries has completed its move to the Taylor Family Digital Library and the High Density Library which places its activities and collections in a new space at the heart of the most vibrant and heavily visited facility on campus – a facility that provides improved conditions and integrated technology to enhance exhibitions and access to collections.

Nickle Galleries promotes critical thinking, visual literacy, and experiential learning through provocative exhibitions, tours, lecture series and symposia. Its programming is centred on modern and contemporary Canadian art, on numismatics, and on carpets and textiles and extends to historic and international art, indigenous heritage, archaeology, anthropology, history, and popular culture. Now a part of the Centre for Arts and Culture, Nickle Galleries is also formally connected to the unique and special research collections held by Libraries and Cultural Resources, and is a catalyst for the promotion and combined use of object-based and textual collections.

Museo, located next to Nickle Galleries, is a museum shop offering a wide selection of unique giftware, stationery and jewellery, in addition to an excellent selection of art publications.

Admission to Nickle Galleries is free for all visitors.

For hours of operation and upcoming events, please contact Nickle Galleries.

Telephone: 403.220.7234
Fax: 403.210.3075
Email: nickle@ucalgary.ca
Website: http://www.ucalgary.ca/~nickle

Special Collections

Archives and Special Collections is comprised of Canadian Architectural Archives and Special Collections that together acquire, maintain and provide access to print and archival collections of enduring value to support inquiry, learning, teaching, research and effective recordkeeping at the University of Calgary.

Canadian Architectural Archives collects, preserves and ensures access to the records of twentieth-century Canadian architects and architectural firms to support learning and teaching through instruction, reference, exhibitions and publications. Website: http://caa.ucalgary.ca/; email: archives@ucalgary.ca.

Special Collections acquires, preserves and makes accessible print and archival collections with a strong focus on Canadian literature, art, music and Western Canadian history. It includes archives of authors like W.O. Mitchell, Morley Callaghan, and Alice Munro, and rare books and incunabula including a leaf of the Gutenberg Bible. Website: http://specialcollections.ucalgary.ca/; Email: archives@ucalgary.ca.

Special Collections is located within the Centre for Arts and Culture on the 5th floor of the Taylor Family Digital Library. Research services are available Monday to Friday, from 10:00 a.m. to 4:30 p.m. Please contact Special Collections in advance of your visit since any materials you wish to access will need to be retrieved from our vaults.

Web: http://asc.ucalgary.ca/
Email: archives@ucalgary.ca

University Archives

The University Archives preserves and builds the institutional, administrative, research and cultural heritage of the University of Calgary by acquiring, maintaining, preserving and facilitating access to records of permanent value created and received by university. It also contributes to the development of information management strategies and projects across campus.

The University Archives is located within the Centre for Arts and Culture on the 5th floor of the Taylor Family Digital Library. Research services are available weekdays from 10:00 a.m.—4:30 p.m. Please contact the Archives at least one day in advance of your visit since any materials you wish to access will need to be retrieved from our vaults.

Telephone: 403.220.3024
Web: http://archives.ucalgary.ca
Email: uarc@ucalgary.ca

University Library

Libraries and Cultural Resources (LCR) offers students, faculty, and staff easy access to a wealth of research materials, expertise and services. Many of these resources are housed in the six-storey Taylor Family Digital Library (TFDL), a unique combination of library, student advising, alumni office, music centre, cafe, archives, special collections and art gallery.

All of these resources come alive with technology that encourages exploration and new ways of learning, making the Taylor Family Digital Library one of the most information-rich facilities in Canada.

The Library is ranked among the largest research libraries in Canada, with a collection that spans over nine million objects including books, journals, maps, artifacts, works of art, rare books, special collections, music scores.

The Learning Commons, located on the first three floors of the TFDL, is the centre of activity for students, faculty, staff and visitors. It is a light-filled area with comfortable furniture, 100 per cent wireless and cellular coverage, collaborative work rooms, individual workstations, and access to plug-ins for laptops.

The upper floors on the TFDL house more than half a million of the latest and most frequently used books, journals and research materials. The Centre for Arts and Culture encourages closer study of fine art and archival materials, while researchers can browse the wealth of resources on performing arts, art, architecture and music. Other distinctive facilities include the Visualization Studio dedicated to supporting faculty research, Spatial and Numeric Data Services providing access to cartographic materials, GIS and statistical data and software, and the Digital Media Commons facilitating the exploration and creation of new media forms.

The Taylor Family Digital Library is located at the heart of the campus, with six branch libraries: Health Sciences Library, Bennett Jones Law Library, Gallagher Library, the Doucette Library of Teaching Resources, the Business Library, the Downtown Campus Library, and The Military Museums Library and Archives.

The University Library is open 90 hours each week, offering access to the resource materials as well as reference assistance, specialized information consulting and instruction in the skills and process of information retrieval and management to equip independent learners for success in the knowledge era. Library resources and services are also "delivered to your desktop" via our online information system, featuring the Library catalogue, an extensive selection of networked databases, electronic information resources and services for distance learning.

University of Calgary Press

The University of Calgary Press publishes peer-reviewed scholarly work that makes a difference. We disseminate research that makes us think, that moves the conversation forward. Our books explore a sense of place in western Canada, the relevance of history in our lives, and our impact on the world around us. We publish in print, eBook, and open access formats.

Publishing interests include: Canadian art and architecture, African studies, environment and history; Latin American and Caribbean studies, the West, Northern studies, energy, ecology and sustainability, cinema, and Canadian defence and strategic studies.

U of C Press offices are located on the sixth floor of the Taylor Family Digital Library.

Usual business hours are 8:30 a.m. to noon and 1:00 to 4:30 p.m., Monday to Friday.

Taylor Institute for Teaching and Learning

The Taylor Institute for Teaching and Learning is a cornerstone of the University of Calgary’s Eyes High vision and strategy. The
The Taylor Institute will take the lead in education innovation by bringing a unique, research-based approach to teaching and learning. Housed in a groundbreaking new building, the Taylor Institute will be a hub for enhancing teaching and learning experiences across campus. The institute was conceived as a collaboration between three interdependent units: the Office of Experimental Learning, the College of Discovery, Creativity and Innovation, and the Educational Development Unit.

The College of Discovery, Creativity and Innovation
Research and learning go hand-in-hand. The College of Discovery, Creativity and Innovation, within the Taylor Institute, will provide all students with research opportunities from the very beginning of their undergraduate degree.

The College of Discovery, Creativity and Innovation will also bring together students from different faculties to collaborate on finding solutions to challenges facing society. It will ensure that University of Calgary students develop the critical thinking, problem-solving and research skills that will give them the edge in competing in a global economy. Creative solutions sparked by these student collaborations, with the guidance of graduate students, postdoctoral fellows, academic staff and other leading experts, will also help Albertans tackle some of the world’s biggest issues.

Educational Development Unit
The Educational Development Unit supports the development of teaching and learning capacity at the University of Calgary through continuous improvement, research-informed practice, and technology integration.

The EDU offers programs and support in the following areas:
- Supporting faculty, instructors and graduate students to strengthen their teaching practice;
- Developing and evaluating learning technologies, and supporting their integration into classrooms and teaching practices;
- Planning or revising courses and instructional strategies to enrich student learning in face-to-face, blended and online environments;
- Supporting curriculum mapping, assessment and improvement to enhance the quality of student experiences and outcomes across academic programs;
- Promoting research-informed practice, and supporting and engaging in the scholarship of teaching and learning;
- Facilitating the development of a community of teaching and learning through individual and peer consultation, collaboration and mentorship.

The Educational Development Unit also administers the University of Calgary Teaching Awards and University of Calgary Teaching and Learning Grants.

Contact Information:
General Inquiries:

Fax: 403.282.0730
Email: ti.edu@ucalgary.ca
540 Biological Sciences Building
2500 University Drive NW
Calgary AB T2N 1N4
Office Hours
Monday - Friday 8:30 a.m. - 4:30 p.m.
http://ucalgary.ca/taylorinstitute/edu

The Office of Experimental Learning
The Office of Experimental Learning will be located within the Taylor Institute and will dramatically increase the number of hands-on learning opportunities for students, including internships and service projects designed to provide career-building experiences. This shift outside the classroom ensures learning takes place where students choose to work, volunteer or lead.

University Theatre Services
Website: http://arts.ucalgary.ca/theatres/
Boris Roubakine Recital Hall
The Boris Roubakine Recital Hall is a 200-seat lecture theatre converted to provide performance facilities for small music recitals, film presentation, slide shows and similar events. It is available for both academic and community use.

The Reeve Theatre
The Reeve Theatre is the Department of Drama’s primary research and public performance facility, a strategic site of experiential learning for both undergraduate and graduate programs in Drama.

The Rozsa Centre
The Rozsa Centre houses the 384-seat Eckhardt-Gramatte Hall, a music performance and teaching facility for the Department of Music and the Husky Oil Great Hall, a conference facility for the International Centre. It also houses the Rozsa Recording Studio - a state-of-the-art digital audio recording studio capable of producing professional quality recording masters. The Rozsa Centre is available for community booking through University Theatre Services.

The University Theatre
The University Theatre provides seating for 505 persons, with performance facilities for drama, music, dance, films, exhibitions and lectures. After academic needs are met, the University Theatre is available for a wide variety of community uses.

The University of Calgary Academic Plan, 2012-2016 has identified Internationalization as one of seven institutional priorities.

"Calgary is a global community – and we must prepare our graduates to work in a globalized world." Academic Plan 2012-2016.

We are committed to raising the profile of the University of Calgary worldwide, making it an attractive destination for international students, academics and researchers. As well, we provide options for students to study around the world as part of their University of Calgary degree. Problems are international in their dimensions and require global solutions as countries are linked culturally, economically and ecologically. University graduates require skills which enable them to find solutions in a world characterized by a diversity of languages, religions, living standards, technological standards, historical perspectives and cultural values. The University of Calgary has over 3200 international students registered on campus (Fall 2014) from over 100 countries. In addition, our alumni, including Canadians, are living in all areas of the world, proving the importance of an international education. The University of Calgary offers major entrance scholarships and awards for first year undergraduate international students as well as awards for continuing students as a part of the University of Calgary support for internationalization and to international students.

The University of Calgary has agreements with targeted institutions in the developing world to leverage our expertise to share capacity and to consider spending time at the University of Calgary working with academics in disciplines assisting in cutting edge research.

3. Enhance opportunities for international collaborations and partnerships in a research and education.

4. Leverage our unique areas of expertise to engage in international development.

“Our University will be a global intellectual hub” where our students, staff, and faculty at the centre of this hub will radiate new discoveries, ideas, and applications that have global impact.” Academic Plan 2012-2016.
offer intensive study opportunities abroad with University of Calgary faculty members during Spring and Summer Intersessions and Block Weeks. Students may also use their initiative to design their own program of study or undertake a research project.

While some study programs require knowledge of a language other than English, not all the University of Calgary exchange partners expect a student to be fluent in order to participate. It is possible to combine study abroad with language learning.

Students unable to study abroad may get involved with international activities on campus: volunteering with international offices such as UC International or International Student Services and taking part in events to promote discussion and an international understanding: refer to “Make Your Degree More International” section of University Calendar for more information.

“We will leverage our expertise to share capacity with targeted institutions in the developing world. International partnerships will be equitable, respectful of differences in culture, and mutually beneficial. We will be a global source for objective information, expertise, and productive collaborations across all sectors of government, industries, and non-governmental organizations.”

Academic Plan 2012-2016

The University of Calgary has over 250 international partnerships that include collaborative research, joint academic and scientific studies, collaborative degrees and student exchanges, training programs, internships and practicums. University of Calgary staff/faculty have led development projects in Water Management in Central and South America; Maternal Child Health in Uganda; Health care Accessibility, Rehabilitation and Education in South Sudan. University of Calgary students may complete a semester-long internship/practicum through our participation with NGO’s in Ghana.

The University of Calgary opened its first branch campus “UC Qatar” in Fall 2007 offering a Bachelors of Nursing and post-degree diploma programs to residents of the Gulf region. The University of Calgary celebrated its first graduating class from UQatar in June 2010 and has approximately 400 students enrolled in the Nursing Program. In addition to Baccalaureate degrees, UC Qatar offers a Master’s Program.

FastFacts

- In October 2014, the University opened a “Global Research Initiative” facility in Beijing China. This cooperative venture in unconventional oil and gas is a unique venture in cooperation with private interest and major universities in China.
- There are more than 3200 international students at the University of Calgary and the five countries from which we receive the largest number of international students are: China, Iran, India, the USA, and Saudi Arabia.
- The University of Calgary has developed a “Global Energy MBA” program which is unique in drawing on resources in the oil and gas industry in Calgary and from major centres around the world.
- Through the American Friends of the UofC, Antje Graupe Pryor Foundations and UofC International Studentships, the University of Calgary awards more than $350,000 each year for students spending a period of time studying abroad.
- The Student Refugee Committee of the Students’ Union sponsors a new refugee student at the University of Calgary each year through World University Services of Canada (WUSC).
- New student orientation programs assist international students to become comfortable with their new environment. Opportunities include a “Buddy” or “Mentor” program for new students.
- The top destination countries for University of Calgary exchange programs are Australia, the UK, South Korea and the Netherlands.
- The University of Calgary offers Semester Abroad programs for undergraduates in the Czech Republic, and Spain. Architecture graduate students may spend the Fall Term in Barcelona Spain and/or in Melbourne, Australia.
- In 2014, 1000 (est.) University of Calgary undergraduate students studied abroad as part of their degree programs. Many participate in spring or summer schools abroad.
- The University of Calgary offers more than $750,000 a year in academic scholarships and awards to undergraduate international students attending the university for degree programs.
