ACI Alberta Chapter**

Present a HALF-DAY WORKSHOP:

Slab-on-Grade Design, Construction, and Practical Considerations

Presenters:

**Andy Vizer, Cement Association of Canada
Martin Darby, Lafarge Canada
Bozena Czarnecki, EBA Engineering Consultants Ltd.**

Andy Vizer, based in Vancouver, is well known in the concrete industry across Western Canada. Andy will present design methods for a variety slab-on-grade applications.

Martin Darby, based in Calgary, has extensive experience related to the construction of slabs-on-grade. Martin will address mix design issues as well as shrinkage prediction and practical constructability concerns.

Bozena Czarnecki, also based in Calgary, also has extensive experience related to slab-on-grade construction from a consultant's perspective. Bozena will discuss common problems encountered with slabs-on-grade, realistic and non-realistic expectations or demands, and which types of slabs-on-grade are most suitable for a variety of different uses.

Note that workshop prices include a slab-on-grade design manual titled "Concrete Floors on Ground" which will be graciously provided by the Cement Association of Canada "at cost" to the workshop registrants.

When: Thursday, May 12, 2005

12:00 pm	Registration
12:30 pm	Buffet Lunch
1:00 pm – 4:30pm	Three Presentations with coffee breaks
4:30 – 5:00pm	Questions and wrap-up.

Where: Danish Canadian Club, 727 – 11th Ave. S.W., Calgary
