

# 2006/07 PROGRAM

## NOTICE OF FORTHCOMING EVENT

The CSCE is a learned society intended to develop and maintain high standards of civil engineering practice in Canada and to enhance the public image of the civil engineering profession.

The Canadian Society for Civil Engineering  
La Société canadienne de génie civil

### November 29, 2006 National Lecture Tour

Sponsored by The City of Edmonton

***"Infrastructure Capacity Building"***  
*by Alan Perks, P.Eng., PCSCE*  
*Director, R.V. Anderson Associates Limited*

The National Lecture Tour on infrastructure will focus on the theme of "capacity building". This includes issues of the financial capacity of the industry to address the infrastructure deficit, knowledge and information needs of the industry to move towards investment decision processes based on the principles of sustainability and the development of tools and technologies needed to make sustainable investment decisions.

The intent of the NLT on infrastructure is to share this issue with a national audience, reinforcing the need to invest time, effort and resources in the process of building this capacity in the industry.

The lecture will be delivered by Mr. Alan Perks, P.Eng., drawing on both domestic and international experiences in developing and managing civil infrastructure systems. Mr. Perks is responsible for his firm's international activities, and is a past President of CSCE. Mr. Perks was one of the keynote speakers at the CSCE's 1<sup>st</sup> International Conference on Infrastructure Technologies, Management and Policies, which took place in June 2005.

**Please register your attendance with APEGGA Tel 403-262-7714 at least one day prior to event.**
