The Canadian Society for Civil Engineering
La Société canadienne de génie civil

March 15, 2007 Dinner Meeting

"Sustainable Development Plan for Calgary"

by Glen Radway, ACP, MCIP, City of Calgary and
Eric MacNaughton, P.Eng., City of Calgary

Sponsored by CH2M Hill

The terms of reference for The City of Calgary's Integrated Land Use and Mobility Plan was recently approved by Council. This sets the path for the comprehensive review and update of two of Calgary's major policy plans: *The Calgary Plan* (Municipal Development Plan, MDP) and the *Calgary Transportation Plan* (CTP).

Led by the Sustainable City Team, the mission of this two year project is to achieve a more sustainable Calgary by integrating land use and mobility policy and creating effective implementation strategies with practical tools and processes for decision makers.

Glen Radway and Eric MacNaughton will talk about the project, where it is going over the next two years and the opportunities and challenges of linking long term sustainability planning with the immediate growth needs of a dynamic city and region.

Glen Radway has been a practicing planner in Alberta for 17 years. He is with The City's Sustainable City Team, leading the land use component of Calgary's Integrated Land Use and Mobility Plan review.

Eric MacNaughton is a transportation engineer with The City of Calgary, and is currently working as a strategic planner on the Sustainable City Team. His current duties include development of a more sustainable integrated land use and transportation scenario for Calgary at 2.5 million people, and assistance in updating the City's process for selecting and evaluating transportation infrastructure investments.

Please register your attendance with APEGGA at 262-7714 at least 24 hours prior to event.
