Friday, May 26th, 2017

DR. KEITH BROWNELL LECTURESHIP IN ETHICS

"The Evolution of Neuroethics"

Walter Glannon PhD

Professor of Philosophy, University of Calgary

Learning Objectives:

- To examine how advances in neurology, psychiatry, neurosurgery and radiology have influenced assessment of the benefits and risks of intervening in the brain.
- To examine how imaging and functional neurosurgery in particular have resolved some ethical questions and raised new questions regarding diagnosis and prognosis of neuropsychiatric disorders.
- To consider whether upholding or collapsing the distinction between neurology and psychiatry will facilitate or complicate discussion of the ethical issues surrounding interventions in the brain.

For physicians recording their hours, visit: www.ucalgary.ca/dcns/attendance
