

UBUNTU & THE SUSTAINABLE DEVELOPMENT GOALS

MAY 6 - MAY 29, 2021

UCalgary Sustainability Studies is excited to invite you on an engaging interdisciplinary group study program that will engage the UN Sustainable Development Goals (SDGs) to challenge western ideologies of development and your role as a global citizen. You will be immersed in Ugandan communities to begin to understand the daily and ongoing challenges from the local to the global, and you will be inspired by their resilience and innovation.

Through the lens of Ubuntu: the Bantu work and life philosophy that is relationship-oriented and strives for communal solidarity, students will engage with and learn from local community leaders, organizations and businesses as they work towards the common goal of true sustainable community development.

Get UCalgary credit for: UNIV 501.XX AND UNIV 501.XX
UCalgary keeps it affordable! See website for funding details.
