Sustainable Offices Badges

The badges are designed to be used in a variety of ways. They can be used as a badge for a meeting, a badge for a waste station, or a badge for a recycling station. They can also be used as a badge for a sustainable office or event. The badges are designed to be used in a variety of ways. They can be used as a badge for a meeting, a badge for a waste station, or a badge for a recycling station. They can also be used as a badge for a sustainable office or event.

The Meetings Badge

The Waste Badge

The Energy & Emissions Badge

The Energy and Emissions badge is a guide to reduce the amount of emissions UCalgary offices produce. Tasks include eliminating unnecessary personal devices such as space heaters, ensuring all appliances are operating as efficiently as possible, and striving to reduce the number of single occupant cars traveling to campus. By reducing the amount of greenhouse gases the university produces we can help meet UCalgary's goal of being a carbon neutral campus by 2050, as seen in the [Climate Action Plan](#).

The Purchasing Badge

The Purchasing Badge is a guide to purchase items in a more sustainable fashion, and provides recommendations for better choices of common office products. Tasks include holding an office-supplies clean out, placing online shopping orders less frequently, and buying third-party certified supplies. These actions help to eliminate the amount of waste we produce as a campus and better utilize the resources we already have available in our communities.

The Health, Wellbeing & Community Badge

Lastly, The Health, Wellbeing and Community Badge is a guide to promote social sustainability. This badge has tasks such as reviewing the **nine-dimensions of wellness** that contribute to a better workplace and creating initiatives that meet an offices individual needs. This badge is in place to improve the campus community for all and make the workplace meet occupant health and wellbeing needs.
