“I started my studies with a plan of exactly what I wanted to do. Thanks to the variety of courses offered in the department, I ended up discovering a passion for something completely different.”

Julie Paulssen, BSc'18, studied Cellular, Microbial, and Molecular Biology, and is currently a graduate student working in Dr. Lisa Gieg's microbiology laboratory.
EMBRACE YOUR CURIOSITY

Experience the energy in the Biological Sciences Department, where endless discoveries await you.

Ever wonder what it would be like to study the evolutionary effects of climate change, learn how microbes can be used to clean up oil spills, or design and carry out your own research? It’s all possible at the University of Calgary!

Passionate about cells and the molecules that build them? Intrigued by bacteria, plants or animals and the processes that determine how these organisms evolved and interact in ecosystems? Our award-winning instructors and researchers will fuel your curiosity, inspire you to investigate fundamental and applied questions, and celebrate with you when you succeed.

PICK YOUR PASSION

You’re an individual — so why not tailor your learning experience to fit your unique interests?

You can choose to explore several aspects of life through a biological sciences degree, or you can explore one discipline in depth through our exciting specializations:

• Biochemistry
• Cellular, Molecular and Microbial Biology
• Ecology
• Plant Biology
• Zoology

THE PLACES YOU’LL GO . . .

When you earn a Bachelor of Science (BSc) in Biological Sciences, you can take your career in many different directions.

Whether your ultimate goal is to become a medical or veterinary doctor, a research biologist, an environmental consultant, or an educator, the Biological Sciences Department will spark your curiosity and take you where you want to go!
