Courses of Instruction

Nursing 515  H(3S-0)
Mind/Body Integration: Ancient and Contemporary Healing Practices
Exploration of healing practices based on the concept of mind/body/spirit integration. Experience with selected healing modalities will be provided.
Prerequisite: Consent of the Faculty.
Note: Not open to students with credit in Nursing 503.22, 601.22 or 615.

Nursing 531  H(3-2)
Community Health Nursing Theory
Concepts and models related to population-focused nursing with emphasis on community, health promotion, team building, assessment strategies, and planning approaches.

Nursing 533  H(128 hours within one session)
Community Health Nursing Clinical Practice
Application and synthesis of concepts and models related to population-focused nursing.
Prerequisites: Nursing 531, current CPR Basic Cardiac Life Support, and proof of current, active nurse registration.
Note: Not open to students with credit in Nursing 532.
Note: Minimum passing grade is “C.”

Nursing 537  H(3-0)
Nursing Leadership and Management
Professional and interpersonal relationships in nursing practice with an emphasis on leadership, interdisciplinary collaboration, and the management of nursing care at macro and micro levels.

Nursing 539  H(3-0)
Research in Nursing
Concepts and process necessary for critiquing research and application to nursing practice.
Note: Completion of a statistics course is strongly recommended prior to taking Nursing 539.

Nursing 543  H(128 hours within one session)
Senior Practicum
Synthesis and application of theoretical concepts within a selected area of practice with emphasis on further development of self-directed skills and professional attitudes.
Prerequisites: Nursing 441/533, current CPR Basic Cardiac Life Support, and proof of current, active nurse registration.
Note: Not open to students with credit in Nursing 542.
Note: Minimum passing grade is “C.”

Nursing 589  H(3S-0)
Mind/Body Integration: Philosophical Foundations
Critical analysis of the integrated nature of mind/body/spirit comparing various cultural paradigms as they relate to health and healing.
Prerequisite: Consent of the Faculty.
Note: Not open to students with credit in Nursing 503.11, 601.21 or 689.

Graduate Courses

Nursing 601  H(3S-0)
Seminar on Special Topics Related to Health Care and Nursing
Prerequisite: Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 603  H(156 hours)
Independent Supervised Clinical Practicum
Prerequisite: Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 605  H(3S-0)
Philosophical Foundations for Advanced Nursing Practice
Exploration of the philosophical foundations of advanced nursing practice. A process of critical analysis and deconstruction of the various conceptual frameworks and paradigms leading to articulation of the philosophical perspectives that guide advanced nursing practice.
Prerequisite: Consent of the Faculty.

Nursing 607  H(39 hours)
Independent Guided Study
Prerequisite: Consent of the Faculty.
MAY BE REPEATED FOR CREDIT

Nursing 611  H(3-0)
Substantive Theory
Substantive theory related to specialty areas of advanced nursing practice.
Prerequisite: Consent of the Faculty.

Nursing 615  H(3S-0)
MIND/BODY INTEGRATION: ANCIENT AND CONTEMPORARY HEALING PRACTICES
Exploration of the healing potential of ancient and contemporary practices based on the concepts of body/mind/spirit integration. Learning methods include seminars on selected topics and experiential activities.
Prerequisite: Consent of the Faculty.

Nursing 621  H(3S-0)
Health Research Methods: Quantitative Designs
Critical analysis of nursing research. Emphasis on the study of research designs appropriate to clinical nursing problems, measurement, reliability and validity issues, and critique criteria.
Prerequisite: Consent of the Faculty.

Nursing 641  H(180 hours)
Nurse Practitioner Practicum I
Opportunity for students to develop advanced knowledge and skills related to clinical decision-making and client management of commonly presented health problems.
Prerequisites or Corequisites: Nursing 661/663/665 or equivalent, or consent of the Faculty and registration in Post-Master’s NP Certificate program or MN/NP program.
NOT INCLUDED IN GPA

Nursing 644  F(4S-14)
Nurse Practitioner Practicum II
Diagnostic and management skills related to care of patients in acute care settings. Further development of skills in clinical history taking, physical assessment, and diagnostic testing.
Prerequisite: Nursing 641.
Note: Not open to students with credit in Nursing 643.
NOT INCLUDED IN GPA

Nursing 646  F(4S-14)
Nurse Practitioner Practicum III (Adult)
Learning opportunities and practice experience with emphasis on clinical diagnosis, diagnostic imaging, laboratory tests, differential diagnosis, and management of high-risk hospitalized infants. Open to Adult Acute Care Nurse Practitioner students only.
Prerequisite: Nursing 644.
Note: Not open to students with credit in Nursing 645.
NOT INCLUDED IN GPA

Nursing 648  F(4S-14)
Nurse Practitioner Practicum III (Neonatal)
Learning opportunities and practice experience in Neonatal Intensive Care and Special Care Nursery with emphasis on clinical diagnosis, diagnostic imaging, laboratory tests, differential diagnosis, and management of high-risk hospitalized infants. Open to Neonatal Nurse Practitioner students only.
Prerequisite: Nursing 644.
Note: Not open to students with credit in Nursing 645.
NOT INCLUDED IN GPA

Nursing 650  F(1S-22)
Nurse Practitioner Practicum IV
Consolidation of components of NP role in specialty focus.
Prerequisites: Nursing 667 and one of 646 or 648.
Note: Not open to students with credit in Nursing 001.
NOT INCLUDED IN GPA

Nursing 661  H(3S-0)
Advanced Pathophysiology and Therapeutics
Study of pathophysiological phenomena and therapies at an advanced level. Classes will be a combination of didactic presentations, seminars and case studies. Students are invited to explore morbidity and mortality in the Canadian population in general and in their area of focus in particular.
Prerequisite: Consent of the Faculty.

Nursing 663  H(3S-1)
Pharmacotherapeutics in Advanced Nursing Practice
Principles of drug action, pharmacokinetics and pharmacotherapeutics in the context of advanced nursing practice. Opportunity to investigate pharmacotherapies specific to student’s individual client populations.
Prerequisite: Consent of the Faculty.

Nursing 665  F(4S-14)
Nurse Practitioner Practicum II
Diagnostic and management skills related to care of patients in acute care settings. Further development of skills in clinical history taking, physical assessment, and diagnostic testing.
Prerequisite: Nursing 641.
Note: Not open to students with credit in Nursing 643.
NOT INCLUDED IN GPA

Nursing 666  H(3-0)
Advanced Pathophysiology and Therapeutics
Study of pathophysiological phenomena and therapies at an advanced level. Classes will be a combination of didactic presentations, seminars and case studies. Students are invited to explore morbidity and mortality in the Canadian population in general and in their area of focus in particular.
Prerequisite: Consent of the Faculty.

Nursing 667  F(1S-22)
Nurse Practitioner Practicum IV
Consolidation of components of NP role in specialty focus.
Prerequisites: Nursing 667 and one of 646 or 648.
Note: Not open to students with credit in Nursing 001.
NOT INCLUDED IN GPA

Nursing 669  H(3-0)
Advanced Pathophysiology and Therapeutics
Study of pathophysiological phenomena and therapies at an advanced level. Classes will be a combination of didactic presentations, seminars and case studies. Students are invited to explore morbidity and mortality in the Canadian population in general and in their area of focus in particular.
Prerequisite: Consent of the Faculty.

Nursing 671  H(3S-1)
Pharmacotherapeutics in Advanced Nursing Practice
Principles of drug action, pharmacokinetics and pharmacotherapeutics in the context of advanced nursing practice. Opportunity to investigate pharmacotherapies specific to student’s individual client populations.
Prerequisite: Consent of the Faculty.

</table>
Courses of Instruction

Nursing Offsite 454  F (195 hours)

Community Focused Nursing (Nursing Practice)
Opportunity to develop skills with the community as the focus of care in a variety of settings.
Corequisite: Nursing Offsite 453.
Note: Minimum passing grade is "C."

Nursing Offsite 455  H (3-0)

Nursing Research
Introduction to quantitative and qualitative research methods appropriate to nursing with an emphasis on the critique of studies for their application to practice.
Note: Completion of a statistics course is strongly recommended prior to taking Nursing Offsite 455.

Nursing Offsite 457  H (3-0)

Rural Nursing (Theory)
Issues, theory and research related to the delivery and development of health care in rural areas.
Corequisite: Nursing Offsite 458.

Nursing Offsite 458  F (195 hours)

Rural Nursing (Nursing Practice)
An integrated approach to nursing in a variety of rural settings with an emphasis on the application of concepts and theory pertinent to rural health care.
Corequisite: Nursing Offsite 458.
Note: Minimum passing grade is "C."

Nursing Offsite 551  H (3-0)

Issues in Nursing Practice
An in-depth exploration of issues related to nursing practice and health care organizations.
Corequisites: Nursing Offsite 553/554.

Nursing Offsite 553  H (3-0)

Nursing Leadership and Management
Professional and interpersonal relationships in nursing practice with an emphasis on leadership, interdisciplinary collaboration and the management of nursing care at macro and micro levels.
Corequisites: Nursing Offsite 551/554.

Nursing Offsite 554  F (330 hours)

Senior Nursing Practice
Synthesis and integration of theoretical concepts from nursing and related disciplines, in the student's area of practice with emphasis on further development of self-directed learning skills to enhance professional practice. During their practicum, students will be under the direction of a Faculty Advisor and Clinical Preceptors.
Corequisites: Nursing Offsite 551/553.
Note: Minimum passing grade is "C."

Operations Management 301  H (3-0)

Introduction to Production and Operations Management
A survey of the decision processes in production and operations management and their relationship to other business functions. Topics include project planning and scheduling, inventory management, materials requirements planning, quality and maintenance management, capacity planning, facilities layout, and process improvement.
Prerequisites: Any 200-level Mathematics and Statistics 213 (or equivalent, excluding Statistics 201).
Note: Not available for credit toward the Bachelor of Commerce degree. Until August 15, preference in enrollment is given to students who have declared a Management and Society minor.

Operations Management 317  H (3-0)

Fundamentals of Operations Management
Introduction to the wide applicability, broad scope, strategic importance and major decisions of operations management, as well as important interactions with other functional areas. Topics covered include the design, control and improvement/innovation of business and other processes, project planning and control, quality management, statistical quality control, inventory management, just-in-time systems, and supply chains. Group assignments are a significant component of the course.
Prerequisites: Admission to the Haskayne School of Business, second year standing, Business and Environment 291 and Statistics 213.

Operations Management 401  H (3-0)

Materials and Supply Chain Management
An in-depth treatment of inventory and replenishment management. Topics treated include strategic implications of materials management, common control systems, single echelon decision rules (when and how much to reorder, recognizing quantity discounts, coordination of items, special opportunities for replenishment, etc.), production scheduling, manufacturing resources planning, just-in-time systems, supply chain and other multiechelon considerations, and implications of new information technology. Case studies and a site visit are used, as well as illustrations of spreadsheet modelling.
Prerequisites: Third year standing, Operations Management 317 and Management Studies 391.

Operations Management 403  H (3-0)

Managing Quality in Products and Service
An in-depth treatment of quality management practices and techniques for products and services. Topics and techniques covered include process design and improvement, total quality management, team-based problem solving, and process charting. In addition, managerial issues related to process performance measurement and procedures for implementation are discussed.
Prerequisites: Third year standing and Operations Management 317.

Operations Management 405  H (3-0)

Service Operations Management
Introduction to the management of service businesses from both a qualitative and quantitative perspective. Topics include the range of businesses that are called "services," service design and performance measurements, service quality and recovery, managing people in service industries, service demand forecasting, scheduling, managing lineups, yield management, network optimization, and the role of information technology. Industry examples include travel and hospitality, professional services, retail, communication and transportation, banking, etc. An industry project is used to give students the opportunity to apply course concepts.
Prerequisites: Third year standing. Operations Management 317 and Management Studies 391.

Operations Management 407  H (3-0)

Introduction to Project Management
Introduction to the management of projects in a variety of settings such as software development and installation, disaster relief, new product development, advertising campaigns, financial auditing, etc. Material from the organizational, planning, technical, financial, informational, and logistical aspects of project management will emphasize the interdisciplinary nature of projects. Group work related to actual projects will be required. Students will also learn to use commercial computer software for planning and scheduling projects.
Prerequisites: Third year standing and Operations Management 317.

Operations Management 409  H (3-1)

Computer Simulation for Business
Computer simulation as an analysis and decision-making tool for all management disciplines. The emphasis is on developing practical skills that students can use when applying simulation to real business problems. Students learn a powerful, user-oriented simulation language as well as advanced spreadsheet simulation tools. Effective management of a simulation project is also emphasized through an applied project.
Prerequisites: Third year standing, Operations Management 317 and Management Studies 391.

Operations Management 411  H (3-0)

Field Investigation in Operations Management
Field investigation concerned with improvements in operations activities in an off-campus organization. The students work in teams on a single project. Both oral and written reports are required.
Prerequisites: Third year standing. Operations Management 317 and one 400-level Operations Management course.
Corequisite: One 400-level Operations Management course.

Operations Management 413  H (3-0)

Advanced Spreadsheet Modeling using VBA: Business Applications
Spreadsheet Modeling using advanced automation tools provided through Visual Basic for Applications (VBA): Advanced quantitative modeling will be combined with introductory programming and
application development to provide decision support systems applied to the fields of operations management, finance, and marketing.

**Prerequisites:** Third year standing, Management Studies 391 and Operations Management 317.

**Operations Management 559**  
**H(3-0)**

**Selected Topics in Operations Management**

Investigation of selected topics in Operations Management.

**Prerequisites:** Third year standing, Operations Management 317 and Management Studies 391.

**MAY BE REPEATED FOR CREDIT**

**Graduate Courses**

**Operations Management 601**  
**H(3-0)**

**Operations Management**

Management of the production and/or service delivery system of the organization in concert with marketing, human resources, financial, and information systems. Management decision making on a continuum from day-to-day operating decisions such as inventory and scheduling to long term strategic decisions like capacity and technology choice. Topics covered in the course may include planning, management, product/service design and materials and supply chain management.

**Prerequisites:** Operations Management 601, Management Information Systems 601 and Marketing 601.

**Operations Management 719**  
**H(3-0)**

**Project Procurement and Logistics**

Procurement planning activities; commercial practice; tendering; bid evaluation; negotiation and award; contract administration; logistics management; transportation; warehousing and inventory management; modularization; regulatory requirements; customs; claims.

**Prerequisite:** Strategy and Global Management 691.

**Operations Management 725**  
**H(3-0)**

**e-Supply**

Applies e-technology to improve service, reduce costs and enhance customer satisfaction through evaluation, design, and optimization of the supply chain. Examines proven supply chain approaches developed by industry leaders at strategic, operational and tactical levels, as well as emergent but as yet unproved approaches associated with e-tailing, customer relationship management, and mass customization.

**Prerequisites:** Operations Management 601, Management Information Systems 601 and Marketing 601.

**Operations Management 743**  
**H(3-0)**

**Simulation of Operational Systems**

Computer simulation as a decision-making methodology for all areas of organizations. Topics include model development and validation, design of simulation experiments, generation of appropriate values of random variables, interactive procedures and interpretation of results. A user-oriented language is utilized and an applied project is carried out.

**Prerequisites:** Operations Management 601 and Management Studies 613.

**Operations Management 745**  
**H(3-0)**

**Inventory Management and Production Scheduling**

An in-depth treatment of inventory management and production scheduling. Topics treated include ABC classification, commonly used types of control systems, various extensions of the basic economic order quantity (quantity discounts, time-varying demand, coordinated control), choices on deciding when to order, aggregate implications of individual item decision rules, multiechelon inventory systems, materials requirements planning, just-in-time manufacturing, and flexible manufacturing systems.

**Prerequisites:** Operations Management 601 and Management Studies 613.

**Operations Management 749**  
**H(3-0)**

**Operations Management in Service Systems**

The operations management function in service and transportation organizations. Topics include important interfaces with other functional areas, forecasting of demand for services, locations, sizing and layouts of service facilities, work force staffing, service quality assurance, vehicle scheduling, illustrative applications of waiting line models.

**Prerequisites:** Operations Management 601 and Management Studies 613.

**Operations Management 797**  
**H(3S-0)**

**Advanced Seminar in Operations Management**

Prerequisite: Consent of the Haskayne School of Business.

**MAY BE REPEATED FOR CREDIT**

**PhD Course**

**Operations Management 799**  
**H(3S-0)**

**Doctoral Seminars in Operations Management**

799.02. Tactical Research Issues

799.03. Operational Research Issues

**Outdoor Pursuits ODPU**

Instruction offered by members of the Faculty of Kinesiology.

Students should also see course listings under the headings Dance Education, Dance Education Activity/Theory, Kinesiology, Outdoor Pursuits Activity/Theory, Physical Education, and Physical Education Activity/Theory.

**Junior Course**

**Outdoor Pursuits 201**  
**H(3-0)**

**Foundations of Outdoor Pursuits**

An overview of the foundational principles of outdoor pursuits as they pertain to philosophy, wilderness ethics, professional preparation, movement through wildlands, environmental hazards, navigation, and safety.

**Senior Courses**

**Outdoor Pursuits 371**  
**H(2-2)**

**Wilderness Emergency Response**

Wilderness Emergency Response and pre-hospital care for the sick and injured. Practical experiences and field scenarios are integrated with lecture material. Successful students receive certification in both CPR and WER.

**Outdoor Pursuits 401**  
**H(2-2)**

**Safety in Outdoor Pursuits**

An examination of the concept of safety in outdoor pursuits with particular reference to practical risk management of activities and accident/incident analysis.

**Prerequisite:** Third year standing in Outdoor Pursuits program.

**Outdoor Pursuits 403**  
**H(2-2)**

**Experiential Education in Outdoor Pursuits**

Experiential, adventure-based, and multidisciplinary programs to educate in and through the out-of-doors.

**Prerequisite:** Third year standing in Outdoor Pursuits program.

**Outdoor Pursuits 443**  
**H(3-0)**

**Administration of Outdoor Programs**

An overview of the principles, theories, and practices that are currently used in the administration of outdoor programs, both residential and mobile, with a focus on risk management, legal liability, policies and procedures, and staffing.

**Outdoor Pursuits 453**  
**H(2-2)**

**Leadership in an Outdoor Setting**

The study and application of the knowledge, skills, and abilities which contribute to effective leadership and facilitation of groups in outdoor settings.

**Prerequisite:** Third year standing in Outdoor Pursuits program.

**Outdoor Pursuits 459**  
**H(2-2)**

**Safety for Winter Wilderness Travel**

Winter leadership considerations for extended travel in wilderness areas. Theoretical and practical examination of snow mechanics, avalanche prediction, weather, and other high level winter hazards.

**Prerequisites:** Outdoor Pursuits Activity/Theory 359, valid CPR Heart Saver qualification or equivalent, and consent of the Faculty.

**Outdoor Pursuits 461**  
**H(2-2)**

**Heritage Arts and Wilderness Survival Skills**

Survival techniques in a natural environment in the temperate zone of North America with few manufactured items. The use of primitive and modern tools, heritage arts, shelters, and techniques in planned and emergency survival situations.

**Prerequisite:** Third year standing in Outdoor Pursuits program.

**Outdoor Pursuits 491**  
**H(0-4)**

**Praecitum in Outdoor Pursuits**

Practical field experiences in outdoor pursuits.

**Prerequisite:** Consent of the Faculty.

**Note:** Students wishing to take this course must consult with the Outdoor Pursuits Coordinator prior to registration in order that summer work placement can be arranged.

**Note:** Students must consult with the Pedagogy Coordinator in order to obtain required documentation to comply with the legal requirements for placement in schools.

**NOT INCLUDED IN GPA**

**Outdoor Pursuits 495**  
**H(3-0)**

**Wildlands and Outdoor Pursuits**

Reconciling the demands of outdoor pursuits with the preservation of wildlands.

**Outdoor Pursuits 503**  
**H(3-0)**

**Special Topics in Outdoor Pursuits**

**Prerequisite:** Consent of the Faculty.

**MAY BE REPEATED FOR CREDIT**
### Outdoor Pursuits Activity/Theory (OPAT)

Instruction offered by members of the Faculty of Kinesiology.

Students should also see course listings under the headings Dance Education, Dance Education Activity/Theory, Kinesiology, Outdoor Pursuits, Physical Education, and Physical Education Activity/Theory.

### Petroleum Engineering (ENPE)

Instruction offered by members of the Department of Chemical and Petroleum Engineering and the Department of Mechanical and Manufacturing Engineering in the Faculty of Engineering.

Chemical and Petroleum Engineering Department Head - T. Harding; Mechanical and Manufacturing Engineering Department Head - P. Gu

#### Corequisite:

- Safe glacier travel including applied knowledge of glacier geomorphology, hazards, rescue techniques, and group management.

#### Corequisite:

- Outdoor Pursuits Activity/Theory 253.

Courses of Instruction

Petroleum Engineering 523  H(3-1)

Introduction to Reservoir Engineering
Description and estimation of rock and fluid properties; reserve estimation using volumetric and material balance methods in gas, gas-condensate and oil reservoirs; discussion of different reservoir drive mechanisms; aquifer models; Darcy's law and single-phase flow through porous media; introduction to well testing, solution of radial diffusivity equation corresponding to infinite-acting and pseudo-steady state flow, of slightly compressible fluids and real gases.
Prequisites: Engineering 311 and Chemical Engineering 331 or Mechanical Engineering 341.

Petroleum Engineering 525  H(3-1)

Waterflooding
Discussion of two-phase flow in media, wettability, relative permeability and capillary pressure; trapping and mobilization of residual oil; immiscible displacement theory; linear waterflood calculations; viscous fingering in immiscible displacements; flood patterns and sweep efficiency considerations; characterization of reservoir heterogeneity; waterflood prediction models - Stiles, Dykstra-Parsons, CGM and Streamtube models; introduction to black-oil simulators; designing a waterflood; monitoring and analysis of waterflood performance.
Prequisite: Petroleum Engineering 523 or equivalent.

Petroleum Engineering 531  H(2-6)

Design for Oil and Gas Engineering II
Team Design Project continuing from Petroleum Engineering 511. Detailed design of large scale development and commercial exploitation of a petroleum resource. Topics considered will include: reservoir simulation; drilling and completion design; specification of petroleum processing equipment such as heaters, heat exchangers, contacting and separating equipment; safety and environmental issues; economic evaluation. Team designs will be evaluated through both an oral examination and a major written report.
Prequisite: Petroleum Engineering 511.
Note: Credit for both Petroleum Engineering 531 and Chemical Engineering 531 will not be allowed.

Petroleum Engineering 533  H(3-0)

Petroleum Production Engineering
Prequisite: Petroleum Engineering 523 or consent of the Department.

Petroleum Engineering 543  H(3-0)

Geological Characterization of Oil and Gas Reservoirs
Introduction to applied special statistics and probability theory; review of petroleum reservoir geology, geological depositional environments, classification of reservoir heterogeneity; an overview of the reservoir modelling methodology. Introduction to various forms of data for reservoir modelling - core data, well log data, well test data, geophysical data; brief review of geostatistics for data integration; assessment of uncertainty in reservoir modelling; basics of flow modelling and assessing the impact of reservoir heterogeneity on the flow response observed at wells.
Prequisite: Petroleum Engineering 523.

Petroleum Engineering 551  H(1-4)

Petroleum Engineering Laboratory
Experiments which demonstrate the operation of chemical or petroleum process equipment involving heat and/or mass transfer kinetics or flow through porous media. Lectures will cover experimental design and applied statistics.
Prequisites: Chemical Engineering 405 and Petroleum Engineering 523.
Note: Credit for both Petroleum Engineering 551 and Chemical Engineering 551 will not be allowed.

Petroleum Engineering 555  H(3-1T)

Oil and Gas Field Safety and Environment
Review of safety issues, blow outs, fire and other hazards, hydrate formation and decomposition, H2S and other toxic gases, safety standards, impact of petroleum operations on the environment, handling and safe transportation and disposal of petroleum wastes.

Petroleum Engineering 561  H(3-3/2)

Fuel Science and Technology

Petroleum Engineering 563  H(3-0)

Materials Aspects of Oil and Gas Production

Petroleum Engineering 565  H(3-0)

Mechanics of Oil and Gas Production

Petroleum Land Management 375  H(3-0)

Introduction to Petroleum Land Management
Petroleum land management including both technical and economic considerations in the search for and development of oil and gas resources. A field trip and/or simulation exercise may be required.
Prequisites: Admission to the Bachelor of Commerce program, second year standing and Business and Environment 395, or holder of a Bachelor of Commerce degree or equivalent or consent of the Haskayne School of Business.
Note: One half course in Geology is recommended but not required. Until December 15, preference in enrollment is given to students who are registered in the Bachelor of Commerce program and have declared a Petroleum Land Management concentration.

Petroleum Land Management 377  H(3-0)

Introduction to Oil and Gas Agreements
The concepts of ownership in the Canadian oil and gas industry, including Crown and freehold leases, basic oil and gas agreements, and assignment documentation.
Prequisites: Admission to the Bachelor of Commerce program, second year standing and Business and Environment 395, or holder of a Bachelor of Commerce degree or equivalent or consent of the Haskayne School of Business.
Corequisite: Petroleum Land Management 375.
Note: One half course in Geology is recommended but not required. Until December 15, preference in enrollment is given to students who are registered in the Bachelor of Commerce program and have declared a Petroleum Land Management concentration.

Petroleum Land Management 473  H(3-0)

Petroleum Business Agreements
Legal requirements in the acquisition and exploration of oil and gas rights in Canada.
Prequisites: Third year standing, Petroleum Land Management 375, 377 and Business and Environment 395.

Petroleum Land Management 475  H(3-1)

Petroleum Land Management Policy
Prepare graduates to effectively contribute to the management of oil and gas properties throughout the stated prerequisites, with the written permission of the Associate Dean (Undergraduate Programs) and appropriate, upon the recommendation of the Instructor of the course. However, should a student fail to achieve satisfactory standing in any course for which the stated prerequisite(s) is (are) lacking, he/she may be required to successfully complete the stated prerequisite(s) prior to being permitted to repeat the course. Students are required to have consent of the Haskayne School of Business Office before registering in 600-level courses offered by the Haskayne School of Business.
Courses of Instruction

Logic:
- 275 † 379 513
- 279 † 479 679
- 377

Philosophy of Logic, Philosophy of Language:
- 307 † 571 † 691
- 407 † 671

Epistemology and Philosophy of Science:
- 363 467 567
- 367 517 663
- 463 565 667

Contemporary Philosophy:
- 307 † 409 571
- 407 469

Other Courses:
- 315 435 595
- 331 589 601
- 333 590 627
- 337

† Courses which appear in more than one category.

Junior Courses

Note: Philosophy 201, 249, 275 and 279 have no prerequisites and may be taken in any order, save that 275 is not open to students with credit in 279.

Philosophy 201 H(3-1T)
Problems of Philosophy
Provides an introduction to philosophy through the discussion of selected topics such as skepticism, perception, personal identity, free will and determinism, God.

Philosophy 249 H(3-1T)
Ethics
A first enquiry into the nature and justification of moral standards.

Philosophy 275 H(3-1T)
Introductory Logic
An introduction to deductive and inductive techniques used in appraising arguments. The course will contain some elementary formal logic, but its main focus will be on analysing arguments as they occur in everyday life and ordinary language.

An alternative to Philosophy 279.

Note: Not open to students with credit in Philosophy 279 or 377.

Philosophy 279 H(3-1T)
Logic I
Sentential and first-order logic from both deductive and semantic points of view. Some elementary metatheorems.

Note: Not open to students with credit in Philosophy 377.

Senior Courses

Note: Senior Courses will not necessarily be taught in every academic year, but will be available in accordance with student requirements and the availability of staff. The Department will normally offer two of Philosophy 301, 303, 305 each academic year.

Philosophy 301 H(3-0)
The Classical Period
An introduction to Philosophy through the study of a period in its history. A selection of philosophers from the Pre-Socratics, through Plato and Aristotle, to the Hellenistic and Roman philosophers will be discussed.

Philosophy 303 H(3-0)
The Medieval and Renaissance Period
An introduction to Philosophy through the study of a period in its history. A selection of philosophers from Augustine to Montaigne, such as Boethius, Abelard, Ibn Rushd, Maimonides, Aquinas, Ockham, and Erasmus will be discussed.

Philosophy 305 H(3-0)
The Seventeenth and Eighteenth Centuries
An introduction to Philosophy through the study of a period in its history. A selection of philosophers from Descartes to Kant will be discussed.

Philosophy 307 H(3-0)
Analytical Philosophy
An introductory survey of some of the fundamental concepts and techniques of contemporary philosophical analysis. Topics to be discussed will include: definition, meaning and reference, the analytic-synthetic distinction, the nature of philosophical analysis.

Prerequisite: A previous course in Philosophy or consent of the Department.

Philosophy 313 H(3-0)
Bioethics
A critical and analytical examination of ethical and legal problems arising in and about health care. Issues to be considered may include euthanasia, abortion, the conditions for the withdrawal of treatment, the physician-patient relationship, research on human subjects, genetic engineering. The practical applications of ethical and legal theory are emphasized. Students with a background or special interest in the biological and medical sciences, health care, or medical jurisprudence may find this course particularly helpful.

Philosophy 315 H(3-0)
Philosophy in Literature
This course is designed to acquaint the student with various philosophical problems, theories and points of view as these find expression in works of literature from classical times to the present. Authors to be studied may range from Homer to Orwell and Huxley. In years when the course is offered a course outline giving authors and aspects of philosophy to be treated will be available from the Department office.

Philosophy 319 H(3-0)
Law and Philosophy
An investigation of philosophical accounts of the nature of law and legal systems. For intending law students and for undergraduates who want to increase their understanding of the character and role of law in a society. Acquaints the student with central positions in jurisprudence, such as natural law theories, legal realism, legal positivism, and relations between law and morality.
Courses of Instruction

**Philosophy 321**  
*Metaphysics*  
An examination of some topics as categories, existence, persons, space, time, necessity.  
Prerequisite: A previous course in Philosophy or consent of the Department.  

**Philosophy 329**  
*Business Ethics*  
A critical and analytical examination of some central moral problems that arise in and for business. Emphasis throughout the course will be placed not only on the details of the particular problems studied but also on the conceptual and ethical tools needed to understand and resolve or solve such problems.  
Topics to be discussed will include the moral responsibilities and rights of corporations and their officers, codes of business ethics, and conflicts of responsibilities and rights.  

**Philosophy 331**  
*Philosophy of Religion*  
A philosophical examination of the fundamental concepts of religious thinking.  
Prerequisite: Religious Studies 205 or a previous course in Philosophy or consent of the Department.  

**Philosophy 333**  
*Aesthetics*  
An examination of the criteria and concepts employed in aesthetic evaluation.  

**Philosophy 337**  
*Feminist Philosophy*  
Issues in feminist philosophy and methodology. Topics may include feminist theories of knowledge and science, ethics, metaphysics, political theory and feminist methodology.  

**Philosophy 343**  
*Plato*  
A study of the writings of Plato.  
Prerequisite: A previous course in the History of Philosophy or consent of the Department.  

**Philosophy 347**  
*Contemporary Moral Problems*  
A critical and analytical examination of some current moral issues. Topics to be investigated may include: authority, religion in society, suicide, sexual morality, abortion, the legal enforcement of morality, justice.  

**Philosophy 349**  
*Contemporary Ethical Theories*  
A detailed investigation of some central normative ethical theories, including utilitarian, contractarian, and deontological theories.  
Prerequisite: A previous course in Philosophy or consent of the Department.  

**Philosophy 355**  
*Hume*  
A study of the writings of Hume.  
Prerequisite: A previous course in the History of Philosophy or consent of the Department.  

**Philosophy 363**  
*Epistemology*  
A study of some of the central problems in epistemology, including the following: knowledge and belief, empirical (perceptual and inductive) knowledge, a priori knowledge, appearance and reality, truth, skepticism.  
Prerequisite: A previous course in Philosophy or consent of the Department.  

**Philosophy 367**  
*Science and Philosophy*  
For students in any discipline who would like to understand some of the fundamental principles of scientific enquiry. Topics will include scientific explanation, theory, prediction and confirmation.  

**Philosophy 369**  
*Nineteenth Century European Philosophy*  
A study of the major currents in nineteenth-century philosophy. Central figures in this tradition include Fichte, Schelling, Hegel, Feuerbach, Marx, Kierkegaard, Schopenhauer and Nietzsche. The particular works and authors studied will vary from year to year.  
Prerequisite: A previous course in Philosophy or consent of the Department.  

**Philosophy 377**  
*Elementary Formal Logic*  
Sentential and first-order logic, with identity and descriptions, from both deductive and semantic points of view. Completeness, compactness, decidability for sentential logic.  
Note: Not open to students with credit in Philosophy 279.  

**Philosophy 379**  
*Logic II*  
Introduction to the metatheory of logical systems. Completeness, compactness, Löwenheim-Skolem, and undecidability theorems for first-order logic. Preview of non-standard models, second-order logic, and Gödel’s first incompleteness theorem.  

**Philosophy 381**  
*Philosophy of Mind*  
A study of topics such as: thought, emotions, action and the will, mind-body identity, personal identity, and theories about the nature of mind.  
Prerequisite: A previous course in Philosophy or consent of the Department.  

**Philosophy 399**  
*Topics in Philosophy*  
A detailed examination of a topic or tradition in European or Anglo-American philosophy. In years when the course is being offered a detailed course outline giving the topic or tradition to be discussed will be available.  

**Philosophy 405**  
*Early Modern Authors*  
A study of the writings of a seventeenth or eighteenth century philosopher other than Hume or Kant. In years when the course is offered a course outline giving the author and aspects of his/her philosophy to be treated will be available from the department office.  
Prerequisite: Two previous courses in Philosophy, one of which must be Philosophy 301, 303, or 305; or consent of the Department.  

**Philosophy 407**  
*Twentieth Century Analytic Philosophy*  
A study of the writings of a selected set of twentieth century analytical philosophers, which may include authors such as Russell, Wittgenstein, Austin, Quine, Putnam, Kripke, Dummett, Davidson. In years when the course is offered a course outline giving the authors to be discussed will be available from the department office.  
Prerequisite: Two previous courses in Philosophy at least one of which must be a 300 or higher level course, and the other of which must be either Philosophy 279 or 377; or consent of the Department.  

**Philosophy 409**  
*Current Topics in Philosophy*  
An intensive study of a selected current topic in Philosophy.  
Prerequisite: Two previous courses in Philosophy, at least one of which is at the 300 level, or consent of the Department.  

**Philosophy 421**  
*Problems in Metaphysics*  
An intensive study of a selected problem in metaphysics.  
Prerequisite: Two previous courses in Philosophy, at least one of which must be a 300 or higher level course; or consent of the Department.  

**Philosophy 431**  
*Marx and Engels*  
A philosophical study of the methods and concepts in the writings of socialist thinkers, primarily Marx and Engels. Topics to be considered may include the dialectic, materialism, alienation, structure of a theory of society, and the philosophical sources of these as applied to the writings of Marx and Engels.  
Prerequisite: Two previous courses in philosophy, at least one of which must be a 300 or higher level course; or consent of the Department.  

**Philosophy 433**  
*The Socialist Tradition*  
A study of selected thinkers or topics in Marxist or socialist thought.  
Prerequisite: Two previous courses in Philosophy, at least one of which must be a 300 or higher level course; or consent of the Department.  

**Philosophy 435**  
*Topics in Aesthetics*  
An intensive study of a selected topic in Aesthetics.  
Prerequisite: Two previous courses in Philosophy, at least one of which is at the 300 level, or consent of the Department.  

**Philosophy 454**

**Philosophy 279 or 377**  
A previous course in Philosophy or consent of the Department.  

**Philosophy 409**  
*Current Topics in Philosophy*  
An intensive study of a selected current topic in Philosophy.  
Prerequisite: Two previous courses in Philosophy, at least one of which is at the 300 level, or consent of the Department.  

**Philosophy 421**  
*Problems in Metaphysics*  
An intensive study of a selected problem in metaphysics.  
Prerequisite: Two previous courses in Philosophy, at least one of which must be a 300 or higher level course; or consent of the Department.  

**Philosophy 431**  
*Marx and Engels*  
A philosophical study of the methods and concepts in the writings of socialist thinkers, primarily Marx and Engels. Topics to be considered may include the dialectic, materialism, alienation, structure of a theory of society, and the philosophical sources of these as applied to the writings of Marx and Engels.  
Prerequisite: Two previous courses in philosophy, at least one of which must be a 300 or higher level course; or consent of the Department.  

**Philosophy 433**  
*The Socialist Tradition*  
A study of selected thinkers or topics in Marxist or socialist thought.  
Prerequisite: Two previous courses in Philosophy, at least one of which must be a 300 or higher level course; or consent of the Department.  

**Philosophy 435**  
*Topics in Aesthetics*  
An intensive study of a selected topic in Aesthetics.  
Prerequisite: Two previous courses in Philosophy, at least one of which is at the 300 level, or consent of the Department.  

**Philosophy 454**

### Physical Education

**PHED**

Instruction offered by members of the Faculty of Kinesiology.

Students should also see course listings under the headings Dance Education, Dance Education Activity/Theory, Kinesiology, Outdoor Pursuits, Outdoor Pursuits Activity/Theory, and Physical Education Activity/Theory.
Courses of Instruction

Senior Courses

Physical Education Activity/Theory 319 E(0-2)

Volleyball II

Prerequisite: Physical Education Activity/Theory 219.

Physical Education Activity/Theory 329 E(0-2)

Diving II

Prerequisite: Physical Education Activity/Theory 229.

Physical Education Activity/Theory 363 Q(0-4)

Alpine Skiing II

Prerequisite: Physical Education Activity/Theory 263.

Physical Education Activity/Theory 501 E(0-2)

Special Topics in Physical Activity

Prerequisite: Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Physical Education Activity/Theory 503 Q(0-4)

Special Topics in Physical Activity

Prerequisite: Consent of the Faculty.

MAY BE REPEATED FOR CREDIT

Physics PHYS

Instruction offered by members of the Department of Physics and Astronomy in the Faculty of Science.

Department Head - R. B. Hicks

Note: For listings of related courses, see Applied Physics, Astronomy, Astrophysics, Medical Physics and Space Physics.

Students intending to register in any Physics course should read the relevant Faculty of Science Program section of this Calendar.

Some Physics courses offered during First Year and the first session of Second Year are composed of modules (M1 to M13 and L1 to L4, listed below); see course listings for Physics 211, 219, 221, 223, 259, 269, 319, 321, 323 below.

Modules for First Year and First Session Second Year Physics Courses

M1 Motion and Kinematics. Motion in one dimension, including displacement, velocity and acceleration; relative motion; graphical analysis of motion.

M2 Forces and Acceleration. Newton's laws of motion; vectors; statics with forces; vector kinematics; uniform circular motion and other curvilinear motion; non-inertial reference frames.

M3 Energy, Momentum and Torques. Work and energy; gravitational energy; conservation of mechanical energy; friction; systems of particles and momentum conservation; statics involving torques.

M5 Magnetic Forces. Magnetic field, force on a moving charge, flux, Faraday's law, Lenz's law; applications; magnetic force on a current; magnetic field of a current; magnetic materials; applications.

M6 Thermal Physics. Gas laws; kinetic theory of gases; temperature; internal energy; specific heat; energy transfer; laws of thermodynamics; PVT diagrams.

M7 Basic Optics. Reflection, refraction; real and virtual images; images as objects; mirrors; lenses; optical instruments; wave nature of light; interference.

M8 Harmonic Motion. Simple harmonic motion (SHM) and its representation using complex numbers; physical examples; superposition; differential equation for SHM and its solution; damped and forced harmonic oscillators; physical examples.

M9 Waves I. Equations for travelling and standing waves; waves in gases, fluids, solids, and on strings; acoustic waves; superposition; wave speed; intensity and intensity level; Doppler shift for sound waves; energy transfer by radiation.

M10 Waves II. Wave equation and its harmonic solutions; waves in gases, fluids, solids, and on strings; acoustic waves; superposition; group and phase velocity; energy transport by waves; reflection and transmission; complex impedance; normal modes.

M12 Rotational Motion. Rotational kinematics and dynamics; linear dynamics; applications of the centre-of-momentum frame.

M13 Electricity and Magnetism III: Topics Involving Calculus. Non-uniform electric fields; continuous charge distributions, potential difference, potential gradient; magnetic fields: law of Biot and Savart, Ampere's law, inductance; spherical and cylindrical capacitors; RL and RC circuits.

L1 Physics Laboratory I. Laboratory to accompany Physics 223. Experimental techniques, data collection, graphical analysis, and report writing, applied to experiments in mechanics, electromagnetism, fluid mechanics, and thermodynamics.

L2 Physics Laboratory II. Ten laboratory experiments to accompany Physics 321 and 323.

L4 Physics Laboratory IV. Ten laboratory experiments to accompany Physics 259 and 269. Five of these experiments (L4a) will be completed as part of Physics 269 and five (L4b) as part of Physics 259.

Physics 004 E(12 hours)

Module M4 Electric Forces and Circuits

Prerequisite: Consent of the Department.

Module M5 Magnetic Forces

Prerequisite: Consent of the Department.

Module M6 Thermal Physics

Prerequisite: Consent of the Department.

Module M7 Basic Optics

Prerequisite: Consent of the Department.

Module M12 Rotational Motion

Prerequisite: Consent of the Department.

Module M13 Electricity and Magnetism III: Topics Involving Calculus

Prerequisite: Consent of the Department.

Physics 020 E(16 hours)

Physics Skills I

Use of laboratory tools such as electronic devices, oscilloscopes, and vacuum systems. The "Physics Dictionary" and other useful study tools.

Prerequisites: Physics 211 or 221, and 213 or 223 or 225; or 215 and 217; or 259 and 269.

NOT INCLUDED IN GPA

Physics 024 E(12 hours)

Module L2 Physics Laboratory II

Prerequisite: Consent of the Department.

NOT INCLUDED IN GPA

Physics 030 Q(16 hours)

Data Analysis I

Acquisition and analysis of experimental data; computational techniques.

Prerequisite: Physics 315 or 323 or 355.

NOT INCLUDED IN GPA

Physics 031 Q(16 hours)

Data Analysis II

Continuation of Physics 030.

Prerequisite: Physics 030.

NOT INCLUDED IN GPA

Physics 041 Q(16 hours)

Computers in Physics II: Document Preparation

Preparation of reports, papers, and other documents using Tex and LaTex.

Prerequisite: Physics 315 or 323 or 355.

NOT INCLUDED IN GPA

Junior Courses

Physics 211 H(4-2T)

Mechanics

Modules M1, M2 and M3.

Prerequisite: Pure Mathematics 30 or Mathematics 30 or Mathematics II (offered by Continuing Education). Note: Physics 30 is recommended as preparation for Physics 211.

Note: Credit for both Physics 211 and any of 205, 217, 221 or 231 will not be allowed.

Not open to students with 70% or higher in Physics 30 and Pure Mathematics 30 or Mathematics 30 and 60% or higher in Mathematics 31, except with special Departmental permission.

Note: Physics 211 and 221 differ in their prerequisites, but cover the same material and have the same examination and tutorial quizzes. Physics 211 has an extra lecture hour per week to deal with certain topics from High School Physics and Mathematics 31.

Physics 221 H(3-2T)

Mechanics

Modules M1, M2 and M3.

Prerequisite: A grade of 70% or higher in Physics 30; 50% or higher in Mathematics 31; and 70% or higher in Pure Mathematics 30 or Mathematics 30 or a grade of 'B-' or above in Mathematics II (offered by Continuing Education).

Note: Credit for both Physics 221 and any of 205, 211, 217 or 231 will not be allowed.

<tbody>
<tr>
<td>Physics 223</td>
<td>Introductory Electromagnetism, and Thermal Physics</td>
<td>H(3-3)</td>
<td>Modules M4, M5, M6 and L1. Intended for students intending to major in Biosciences, Chemistry, Geology, or Geophysics. Prerequisite: Physics 211 or 217 or 221. Note: Credit for both Physics 223 and any of 207, 213 or 355 will not be allowed.</td>
</tr>
<tr>
<td>Physics 225</td>
<td>Classical Physics</td>
<td>H(3-1T-3)</td>
<td>Rotational mechanics; simple harmonic motion; waves; fluids. Prerequisites: Physics 211 or 217 or 221; Applied Mathematics 217 or Mathematics 249 or 251 or 261. Note: Credit for both Physics 225 and any of Physics 321 or Modules M6, M10 or M12 will not be allowed. Note: For students intending to major in Physics, Applied Physics, Astrophysics, or Chemical Physics.</td>
</tr>
<tr>
<td>Physics 259</td>
<td>Electricity and Magnetism (for students in Engineering)</td>
<td>H(3-1T-3/2)</td>
<td>Modules M4, M5, M13 and L4b. Electric charges and electric current; Ohm’s Law, Kirchhoff’s Laws, application to simple circuits; potential and capacitance. An introduction to electromagnetic induction; inductance; electromotive force; electrical properties of materials. Prerequisite: Engineering 205. Prerequisite or Corequisite: Applied Mathematics 219.</td>
</tr>
<tr>
<td>Physics 301</td>
<td>Modern Physics I</td>
<td>H(3-3)</td>
<td>Relativistic kinematics; spacetime diagrams; relativistic energy and momentum conservation with applications to particle physics. Nuclear radiation and exponential decay. Probabilistic aspects of nuclear processes. Planck’s blackbody radiation law. Elementary particle physics. Prerequisites: Physics 211 or 221; 213 or 223; Mathematics 221 or 211.</td>
</tr>
<tr>
<td>Physics 319</td>
<td>Directed Study in Physics II</td>
<td>H(3-3)</td>
<td>Three modules, subject to prerequisites and availability. At least one module must be from Modules M8, M10, M12 and M13. Prerequisite: Consent of the Department.</td>
</tr>
<tr>
<td>Physics 321</td>
<td>Harmonic Motion, Waves, and Rotation</td>
<td>H(3-3)</td>
<td>Modules M8, M10 and M12. Prerequisites: Physics 211 or 217 or 221; Mathematics 221 or 211; and 253 or Applied Mathematics 219. Note: Credit for both Physics 321 and any of Physics 225 or 311 or 313 or 317 or 363 will not be allowed.</td>
</tr>
<tr>
<td>Physics 323</td>
<td>Optics and Electromagnetism</td>
<td>H(2-2T-3)</td>
<td>Modules M7, M13 and L2. Prerequisites: Physics 211 or 221, and 213 or 223; Applied Mathematics 217 or Mathematics 249 or 251 or 261. Corequisite: Mathematics 253 or 263. Note: Credit for both Physics 323 and any of Physics 209 or 311 or 313 or 355 will not be allowed.</td>
</tr>
<tr>
<td>Physics 325</td>
<td>Modern Physics II</td>
<td>H(3-3)</td>
<td>Origins of quantum mechanics, a historical perspective. Concepts of wave mechanics and applications: atoms, molecules, and solids. Kinetic theory of gases; distribution functions; statistics of quantum gases with applications. Prerequisites: One of: (a) Physics 311, 313 and 315, (b) Physics 321 and 323, or (c) Physics 341, 355. Note: Credit for both Physics 209 and 325 will not be allowed.</td>
</tr>
<tr>
<td>Physics 341</td>
<td>Classical Mechanics I</td>
<td>H(3-1)</td>
<td>Forced and damped harmonic oscillations with real and complex numbers; anharmonic oscillators; central force motion and scattering; non-inertial frames; 2- and 3-body problems; applications of linear differential equations and complex numbers. Prerequisites: Physics 225 or 321; Mathematics 211 or 221. Prerequisite or Corequisite: Applied Mathematics 307 or Mathematics 253 or 263.</td>
</tr>
<tr>
<td>Physics 343</td>
<td>Classical Mechanics II</td>
<td>H(3-0)</td>
<td>Rotating frames of reference; general rotations of rigid bodies; moment of inertia tensor; eigenvectors and eigenvalues; Lagrangian and Hamiltonian mechanics; potential theory and tides; perturbation theory. Prerequisites: Physics 341; Applied Mathematics 307 or Mathematics 253 or 263.</td>
</tr>
<tr>
<td>Physics 347</td>
<td>Thermodynamics</td>
<td>H(0)</td>
<td>Laws of thermodynamics, absolute temperature, entropy, thermodynamic potentials, applications. Prerequisites or Corequisites: Physics 217 or 223 or 315 or 325; Applied Mathematics 307 or 311 or Mathematics 349 or 351. Note: Credit for both Physics 347 and Chemistry 371 will not be allowed.</td>
</tr>
<tr>
<td>Physics 355</td>
<td>Electromagnetic Theory I</td>
<td>H(3-3)</td>
<td>Electrostatics, DC circuits, calculation of magnetic intensity from currents, motion of charged particles in electric and magnetic fields, electromagnetic induction, transient effects in capacitors and inductors, electric and magnetic properties of materials. Prerequisites: Physics 211 or 221; Applied Mathematics 219 or Mathematics 253. Note: Credit for both Physics 355 and 323 will not be allowed.</td>
</tr>
<tr>
<td>Physics 369</td>
<td>Acoustics, Optics and Radiation for students in Engineering</td>
<td>H(3-3)</td>
<td>Wave motion as applied to acoustics, geometric and physical optics, and radiant energy transfer. Traditional and modern applications. Prerequisites: Applied Mathematics 217, 219, Physics 259.</td>
</tr>
<tr>
<td>Physics 443</td>
<td>Quantum Mechanics I</td>
<td>H(3-0)</td>
<td>Basic postulates of quantum mechanics. Mathematical formalism of the theory and its physical interpretation. Schrödinger’s time-dependent and time-independent equations. Single particle in a potential field (square well, potential barrier, harmonic oscillator, Kronig-Penney, Coulomb) and rigid rotator. The applicability of these potentials to atomic, molecular, nuclear, and solid state physics will be indicated. Prerequisites: Physics 325; 343 or 433. Note: Credit for both Physics 443 and Chemistry 373 will not be allowed.</td>
</tr>
<tr>
<td>Physics 449</td>
<td>Statistical Mechanics</td>
<td>H(3-0)</td>
<td>An introduction to statistical mechanics with applications. Prerequisite: Physics 347 or 447.</td>
</tr>
<tr>
<td>Physics 455</td>
<td>Electromagnetic Theory II</td>
<td>H(3-0)</td>
<td>Macroscopic Maxwell equations. Scalar and vector potentials, energy and momentum in Maxwell’s theory. Electrostatics and magnetostatics. Dielectric and magnetic properties of materials. Superconductors. Prerequisites: Physics 313 or 323 or 355; Applied Mathematics 309 or Mathematics 353. Prerequisite or Corequisite: Applied Mathematics 413.</td>
</tr>
<tr>
<td>Physics 491</td>
<td>Undergraduate Seminar I</td>
<td>Q(1S-0)</td>
<td>Attendance at weekly seminars and presentation of one seminar on current physics-related research areas based on literature research, plus a written report. Prerequisites: Physics 325, 343, 455.</td>
</tr>
</tbody>
</table>
Courses of Instruction

Physics 499  
Problem-Solving in Physics  
H(1-3T)  
Solving problems that require methods from more than one area of physics. Problems may include physics of lasers, atoms and molecules, plasmas, rocket flight, fluids, and special relativity.  
Prerequisites: Physics 343, 445, 449.  
Prerequisite or Corequisite: Physics 443.

Physics 501  
The Theory of Relativity  
H(3-0)  
Prerequisites: Physics 301 and one of Mathematics 353 or Applied Mathematics 309.

Physics 507  
Solid State Physics  
H(3-0)  
Prerequisites: Physics 443 or Chemistry 373; Physics 449, 455.

Physics 509  
Plasma Physics  
H(3-0)  
Occurrence of plasmas in nature, single particle motion, plasmas as fluids, waves in plasmas, diffusion, resistivity, equilibrium and stability, kinetic theory of plasmas, non-linear effects.  
Prerequisites: Physics 343 or 433; 455.

Physics 533  
Advanced Mathematical Methods of Physics  
H(3-0)  
Prerequisites: Physics 443 or Chemistry 373; Physics 449.

Physics 535  
Computational Methods in Physics  
H(3-0)  
Solution of problems associated with the analysis of physical systems, using digital computers, high level programming languages, and mathematical computation systems (e.g., Maple, Macsyma).  
Prerequisites: Physics 443 or Chemistry 373 and Physics 455.  
Note: A knowledge of a high level programming language (C, C++, Fortran or Pascal) is highly recommended.

Physics 543  
Quantum Mechanics II  
H(3-0)  
Theory of angular momentum and applications, perturbation theory and applications, identical particles. Introduction to relativistic wave equations.  
Prerequisite: Physics 443 or Chemistry 373.

Physics 561  
Stable and Radioactive Isotope Studies, Fundamentals  
H(2-1)  
A multidisciplinary course. Topics include nucleosynthesis, radioactive decay, isotope exchange phenomena, kinetic isotope effects, tracer techniques, molecular spectra and instrumentation.  
Prerequisite: Consent of the Department.

Physics 571  
Laser Physics  
H(3-0)  
Theoretical aspects of lasing and lasers. Principles of operation of solid-state, liquid, and gas lasers. Applications of laser systems to research, medical, and industrial projects.  
Prerequisites: Physics 443, 455.  
Note: Physics 449 is suggested but not required.

Physics 591  
Undergraduate Seminar II  
Q(1S-0)  
Similar to Physics 491, but including literature research into the connection between, influence on, or role of Physics in other areas of academia or society.  
Prerequisite: Physics 491.

Physics 597  
(formerly Physics 409)  
H(1-6)  
Senior Laboratory  
Selected advanced experiments. Where possible, students may choose those experiments most suited to their interests.  
Prerequisites: Physics 325; Physics 355; and Applied Physics 407 or 507.

Physics 598  
Research in Physics  
F(0-6)  
Research project in Physics.  
Prerequisites: Physics 443, 449, 455 and consent of the Department.

Physics 599  
Independent Study  
H(0-9)  
Each student will be assigned a project in consultation with a tutor. A written report and oral presentation are required.  
Prerequisite: Consent of the Department.  
Note: This course may be repeated once for credit.

Graduate Courses

Physics 603  
Experimental Methods of Physics  
H(3-0)  
Instrumentation for physical experiments. General philosophy of experimentation; signal processing; computer processing methods; instrument design and control; data acquisition and storage; specific detection methods.

Physics 605  
Advanced Data Analysis  
H(3-0)  
Methods of extraction of significant information from experimental data degraded by noise. Parametric and non-parametric statistical methods; curve fitting; spectral analysis; filtering, sampling, convolution and deconvolution techniques.

Physics 609  
Advanced Classical Mechanics  
H(3-0)  
Variational principles, Lagrange's equations, Noether's theorem, Hamilton's equations and canonical transformations, Hamilton-Jacobi theory, action-angle variables. Perturbation theory.  
Note: It is expected that a student's background will include Physics 433 or equivalent.

Physics 611  
Statistical Physics  
H(3-0)  
Note: It is expected that a student's background will include Physics 449 or equivalent.

Physics 613  
Electrodynamics  
H(3-0)  
Interaction between charged particles and the electromagnetic field in relativistic formulation. Scattering and energy losses of charged particles. Radiation by charged particles.  
Note: It is expected that a student's background will include Physics 501 and 555 or equivalents.

Physics 615  
Advanced Quantum Mechanics I  
H(3-0)  
Note: It is expected that a student's background will include Physics 543 or equivalent.

Physics 617  
Advanced Quantum Mechanics II  
H(3-0)  
Second quantized description of N-particle systems. Quantum theory of the electromagnetic field, coherent states. Relativistic quantum mechanics.  
Note: It is expected that a student's background will include Physics 543 or equivalent.

Physics 629  
Gravitation  
H(3-0)  
An introduction to Einstein's theory of gravitation. Applications to the solar system, black holes, and cosmology.  
Note: It is expected that a student's background will include Physics 501 or equivalent.

Physics 663  
Geology 663 (formerly Geology 699.03)  
H(2-1)  
Applications of Stable Isotopes  
Applications in archaeology, biology, chemistry, engineering, geography, geology, medicine, meteorology, paleontology, physics and space sciences. Topics include hydrology; paleoclimates, ore deposits, geothermometry, fossil fuels exploration and recovery, pollutant tracing, food webs and forensic investigations.  
Prerequisite: Consent of the Department.

Physics 671  
Atomic and Molecular Spectroscopy  
H(3-0)  
Atomic structure and spectra. Rotational, vibrational and electronic spectra of diatomic molecules, including microwave, infrared, Raman and visible/

<tbody>
<tr>
<td>Phys 673</td>
<td>Non-Linear Optics and Quantum Electronics</td>
<td>H(3-0)</td>
<td>Operating principles and capabilities of lasers. Theory and application of nonlinear optics and quantum electronics with possible examples including nonlinear mixing, optical parametric oscillators, stimulated Brillouin and Rayleigh Scattering, and electro-optic effects.</td>
</tr>
<tr>
<td>Phys 675</td>
<td>Special Topics in Laser and Optical Sciences</td>
<td>H(3-0)</td>
<td>Lectures by Physics and Astronomy, Chemistry, Engineering, and/or Medicine staff on current research topics in laser science and modern optical techniques.</td>
</tr>
<tr>
<td>Phys 691</td>
<td>Graduate Seminar</td>
<td>H(2S-0)</td>
<td>Reports on studies of the literature or of current research. Required of all graduate students in the Department of Physics and Astronomy.</td>
</tr>
<tr>
<td>Phys 697</td>
<td>Topics in Contemporary Physics</td>
<td>H(3-0)</td>
<td>Topics will be from the research areas of staff members.</td>
</tr>
<tr>
<td>Phys 699</td>
<td>Project in Physics</td>
<td>H(0-9)</td>
<td>Each student will select a project in consultation with a staff member. The project may be experimental or theoretical in nature. A written report and an oral presentation are required.</td>
</tr>
<tr>
<td>Phys 701</td>
<td>Independent Study</td>
<td>H(0-9)</td>
<td>Each student will select a topic of study in consultation with a staff member. The topic will be in the research area of the staff member. This course may not be used to meet the regular course requirements in the MSc and PhD programs.</td>
</tr>
<tr>
<td>Poli 201</td>
<td>Introduction to Government and Politics</td>
<td>H(3-1T)</td>
<td>A systematic introduction to the basic concepts and institutions of the process of politics.</td>
</tr>
<tr>
<td>Poli 213</td>
<td>(formerly Political Science 313)</td>
<td>H(3-0)</td>
<td>An introduction to the study of political ideologies such as nationalism, socialism, liberalism, and fascism.</td>
</tr>
<tr>
<td>Poli 225</td>
<td>Canadian Politics: A Comparative View</td>
<td>H(3-0)</td>
<td>An introduction to the study of government and politics through the examination of current issues and trends in post-industrial nations, comparing Canada with Europe and Anglo-American democracies.</td>
</tr>
<tr>
<td>Poli 279</td>
<td>Politics of the Global South</td>
<td>H(3-0)</td>
<td>An introduction to political issues common to the developing regions of Africa, Asia, Latin America and the Middle East, with special emphasis on topics such as democratization, globalization, development, and human rights.</td>
</tr>
<tr>
<td>Poli 309</td>
<td>Rational Choice</td>
<td>H(3-0)</td>
<td>Topics such as game theory, cooperation, collective action, public choice, coalitions and voting rules.</td>
</tr>
<tr>
<td>Poli 310</td>
<td>History of Political Thought</td>
<td>F(3-0)</td>
<td>Focuses on the quest for the good regime in the West. The criteria for the good regime will be enunciated and applied to the Classical (Platonic, Aristotelian and Roman), the Medieval (Augustinian and Thomistic) Machiavellian, Liberal, Marxian and Utopian conceptions of the good regime.</td>
</tr>
<tr>
<td>Poli 321</td>
<td>The Canadian State</td>
<td>H(3-1T)</td>
<td>The formal institutions of the Canadian state, including Parliament, the executive, federalism, the Constitution, and the courts. Emphasis on the way that political processes are shaped by these and other institutions. This course may have a special instructional format. Please consult the Department for details.</td>
</tr>
<tr>
<td>Poli 323</td>
<td>Politics of the North</td>
<td>H(3-0)</td>
<td>An introduction to the political development of Canada’s northern regions and the circumpolar world.</td>
</tr>
<tr>
<td>Poli 325</td>
<td>Federalism</td>
<td>H(3-0)</td>
<td>Theoretical and empirical examination of federalism in Canada and other selected states.</td>
</tr>
</tbody>
</table>

**Political Science 327**

**Feminist Political Theory**

Examination of feminist political theories and ethical issues in gender politics.

**Political Science 329**

**Alberta and Provincial Politics**

Alberta politics in the comparative context of Canadian provincial politics.

**Political Science 343**

**Law, Politics, and the Judicial Process**

The judicial system as a branch of government and as part of the political process. Focus on the Canadian judiciary within a comparative context.

**Senior Courses**

- **Political Science 321**
  - **formerly Political Science 313**
  - **(H(3-0))**
  - An introduction to the study of political ideologies such as nationalism, socialism, liberalism, and fascism.
- **Political Science 225**
  - **H(3-0)**
  - Canadian Politics: A Comparative View
  - An introduction to the study of government and politics through the examination of current issues and trends in post-industrial nations, comparing Canada with Europe and Anglo-American democracies.
- **Political Science 279**
  - **(formerly Political Science 379)**
  - Politics of the Global South
  - An introduction to political issues common to the developing regions of Africa, Asia, Latin America and the Middle East, with special emphasis on topics such as democratization, globalization, development, and human rights.
- **Political Science 283**
  - **H(3-0)**
  - Issues and Trends in World Politics
  - Major trends and issues in world politics, such as international tensions, migration, ethnic conflicts, human rights and sustainable development.
- **Political Science 309**
  - **H(3-0)**
  - Rational Choice
  - Topics such as game theory, cooperation, collective action, public choice, coalitions and voting rules.
- **Political Science 310**
  - **F(3-0)**
  - History of Political Thought
  - Focuses on the quest for the good regime in the West. The criteria for the good regime will be enunciated and applied to the Classical (Platonic, Aristotelian and Roman), the Medieval (Augustinian and Thomistic) Machiavellian, Liberal, Marxian and Utopian conceptions of the good regime.
- **Political Science 321**
  - **H(3-1T)**
  - The Canadian State
  - The formal institutions of the Canadian state, including Parliament, the executive, federalism, the Constitution, and the courts. Emphasis on the way that political processes are shaped by these and other institutions. This course may have a special instructional format. Please consult the Department for details.
- **Political Science 323**
  - **H(3-0)**
  - Politics of the North
  - An introduction to the political development of Canada’s northern regions and the circumpolar world.
- **Political Science 325**
  - **H(3-0)**
  - Federalism
  - Theoretical and empirical examination of federalism in Canada and other selected states.
- **Political Science 327**
  - **H(3-0)**
  - Feminist Political Theory
  - Examination of feminist political theories and ethical issues in gender politics.
- **Political Science 329**
  - **H(3-0)**
  - Alberta and Provincial Politics
  - Alberta politics in the comparative context of Canadian provincial politics.
- **Political Science 343**
  - **H(3-1T)**
  - Law, Politics, and the Judicial Process
  - The judicial system as a branch of government and as part of the political process. Focus on the Canadian judiciary within a comparative context.
- **Political Science 357**
  - **H(3-0)**
  - Introduction to Public Policy Analysis
  - An introduction to themes and methods in public policy studies. The practical and normative problems facing governments in initiating, formulating, enacting, and implementing policy will be discussed. Case studies will be employed.
- **Political Science 359**
  - **H(3-0)**
  - Comparative Government and Politics
  - An introduction to the analytical concepts of the comparative approach to political analysis.
  - Note: The Department recommends this course precede Senior Courses taken in the field of Comparative Government.
- **Political Science 361**
  - **H(3-0)**
  - Governments and Politics of Eastern Europe
  - Post-communist politics in eastern Europe, including the Baltic states and Ukraine. Concentration on transitions to democracy and relations with the European Union.
- **Political Science 363**
  - **H(3-0)**
  - Governments and Politics of Western Europe
  - An introduction to the governments and politics of the states and societies of western Europe including the importance of their membership in the European Union.
- **Political Science 365**
  - **H(3-0)**
  - Government and Politics of China
  - Politics of China in its social, economic, and ideological environment.
- **Political Science 369**
  - **H(3-0)**
  - Governments and Politics of the Middle East
  - A survey and analysis of the organization and functioning of governments and politics of the contemporary Middle East, with emphasis on the social and economic environments which influence them.
- **Political Science 371**
  - **H(3-0)**
  - Governments and Politics of Africa
  - Political institutions of selected African states. The influence of class and tribal structure; political parties; elections, the source and nature of ideologies; and economic and social policies.
Political Science 375 H(3-0)  
**Government and Politics of Russia**
The collapse of the U.S.S.R. and Russia's constitution, power struggles, elections, democracy, and marketization.

Political Science 377 H(3-0)  
**Government and Politics of the United States**
A study of the institutions and processes of American politics.

Political Science 381 H(3-0)  
**Introduction to International Relations**
The structures and processes of international relations and foreign policy.

Political Science 383 H(3-0)  
**Introduction to International Law**
The basic concepts, principles, and functions of international law. **Prerequisite:** Political Science 381 or consent of the department.

Political Science 385 H(3-0)  
**Introduction to International Organizations**
An introductory analysis of international governmental organizations with main emphasis on the United Nations and selected regional organizations. **Prerequisite:** Political Science 381 or consent of the department.

Political Science 387 H(3-0) (History 387)  
**Political History of Ireland from 1603**
A study of modern Ireland from the English conquest of 1603 to the present. It will include a special emphasis on the origins of the contemporary Irish Republic and Northern Ireland.

Political Science 389 H(3-0) (History 389)  
**Government and Politics of Japan Since 1850**
Political development of modern and contemporary Japan, and Japan's diplomatic relations with its Asia-Pacific neighbours.

**Note:** Not open to students with credit in Political Science 367.

Political Science 391 H(3-0) (History 391)  
**Modern Latin American Politics and Society**
A political history of modern and contemporary Latin America. Themes may include populism, revolution, militarism, new social movements, and democratization.

**Note:** Not open to students with credit in Political Science 373.

Political Science 399 H(3-1T)  
**Research Methods**
Research design, measurement, data collection, and data analysis. **Prerequisite:** One half course at the 200 level in Political Science or consent of the Department.

**Note:** Credit towards degree requirements will be given for only one of Anthropology 307, Applied Psychology 301/303, Engineering 319, Political Science 399, Psychology 312, Sociology 311/315, Statistics 201/211, 213/217, 333, 357; that one being a course appropriate to the degree program. All courses numbered 401-597 inclusive are generally offered in alternate years. Please consult the master timetable.

Political Science 401 H(3-0)  
**Property and Justice**
Ethical reflections on theories of property in their political context. Focus on Augustine, Aquinas and contemporary Christian views. **Prerequisite:** Political Science 310 or consent of the Department.

Political Science 405 H(3-0)  
**Biopolitics**
Biological and cultural origins of political behaviour. Topics such as altruism, reciprocity, sex differences, aggression, and emergence of the state.

Political Science 407 H(3-0)  
**Classical Political Thought**
An examination of selected classical texts from historians, dramatists and political philosophers with special focus upon the concepts relevant to political problems in the twentieth century. **Prerequisite:** Political Science 310 or consent of the Department.

Political Science 409 H(3-0)  
**Liberalism and Conservatism**
Liberal and conservative writers such as J.S. Mill and Edmund Burke. Contemporary developments in neoliberalism and neoconservatism. **Prerequisite:** Political Science 310 or consent of the Department.

Political Science 411 H(3-0)  
**Recent Political Thought**
A study of selected twentieth-century political thinkers and their critics. Consult the department for information on the selection of topics. **Prerequisite:** Political Science 310 or consent of the Department.

Political Science 413 H(3-0)  
**Politics and Literature**
Political analysis of how selected works of literature articulate visions of order and disorder. **Prerequisite:** Political Science 310 or consent of the Department.

Political Science 423 H(3-0)  
**Politics of the Canadian North**
The evolution of government and politics in Canada's Territories.

Political Science 425 H(3-0)  
**Local Government**
A study of both institutions and political processes at the local level. **Prerequisite:** Political Science 321 or consent of the Department.

Political Science 429 H(3-0)  
**Electoral Behaviour**
An examination of individual and group influences on public opinion, citizen participation and electoral choice. A portion of the course will require quantitative analysis. Computer use is required. **Prerequisite:** Political Science 399 or consent of the Department.

Political Science 431 H(3-0)  
**Political Parties and Interest Groups**
Political representation of territorial, linguistic, gender and class interests in the decision-making process. **Prerequisite:** Political Science 321 or consent of the Department.

Political Science 435 H(3-0)  
**Canada and World Politics**
An analysis and evaluation of Canada's role on the international scene; main objectives of Canadian foreign policy; security and defence policies; Canada's participation in universal international organizations; the influence of Canada as a middle power upon world events. **Prerequisites:** Political Science 381 or consent of the Department.

Political Science 437 H(3-0)  
**Canada-United States Relations**
Roles of the respective governments in the various facets (political, strategic, economic, and socio-cultural) of the relationship between the two countries will be examined. **Prerequisites:** Political Science 381 or consent of the Department.

Political Science 439 H(3-0)  
**Strategic Studies**
An analysis of the causes of war, the meaning of security and defence in the post-Cold War era, including the use and control of military force. **Prerequisite:** Political Science 381 or consent of the department.

Political Science 441 H(3-0) (Religious Studies 441)  
**Millenarian Movements**
A study of religious and political millenarianism. Persons such as Louis Riel, Thomas Munzter, Karl Marx, and William Aberhart. Movements such as cargo cults, nativism, Seventh-Day Adventists, Jehovah's Witnesses, and Nichiren Shoshu Buddhism. **Prerequisite:** Political Science 381 or consent of the department.

Political Science 442 H(3-0)  
**Constitutional Law and Politics**
The interaction of constitutional law and politics, with special emphasis on judicial review of federalism and entrenched rights. Focus on Canada within a comparative context. **Prerequisites:** Political Science 321 and 343 or consent of Department.
Political Science 447 H(3-0)  
Public Policy Issues  
Case studies of selected public policies. Emphasis on Canada, with comparative examples.  
Prerequisite: Political Science 357.

Political Science 451 H(3-0)  
Public Administration  
Theories of public administration and their practical application in Canada and selected countries.  
Prerequisite: Political Science 321 or consent of the Department.

Political Science 461 H(3-0)  
Post-Soviet Politics  
The interplay between nationalism, domestic politics, and foreign policy in the successor states of the former U.S.S.R.

Political Science 463 H(3-0)  
Politics of Advanced Industrial States  
Comparative analysis of the political dynamics of advanced industrial states. Focus on problems associated with advanced industrialization and on explanations for political stability and change.  
Prerequisite: Political Science 359.

Political Science 465 H(3-0)  
The Politics of Development in China  
Chinese Communist leadership and policy disputes from the 1940s to the present with focus on alternative strategies for development.

Political Science 467 H(3-0)  
Japan: Contemporary Political Problems  
In-depth analysis of selected problems with emphasis on Japan’s politics and its diplomatic relations with its Asia Pacific neighbours.  
Prerequisite: Political Science 389 (History 389) or consent of the Department.

Political Science 469 H(3-0)  
Middle East: Contemporary Political Problems  
An in-depth analysis of selected political, economic and social problems and issues affecting individual nations and the area in general.  
Prerequisite: Political Science 389 or consent of the Department.

Political Science 471 H(3-0)  
Africa: Contemporary Political Problems  
An analysis of political problems in selected political systems of Africa. Topics will include the politics of rural development, political elites and the state in Africa, political institutions, constraints on development, and urban politics.  
Prerequisite: Political Science 371 or 379 or African Studies 301; or consent of the Department.

Political Science 473 H(3-0)  
Latin America: Contemporary Political Problems  
An analysis of political problems in selected political systems of Latin America. Topics examined will include political elites, ideologies, political institutions, political socialization and political change.  
Prerequisite: Political Science 359 or consent of the Department.

Political Science 475 H(3-0)  
International Relations of the Asia Pacific  
In-depth analysis of selected problems in security and economic relations of Asia Pacific countries, including Canada, U.S., Japan, Russia, PRC, Taiwan, North and South Korea, and ASEAN countries.  
Prerequisite: Political Science 381 or consent of the Department.

Political Science 479 H(3-0)  
International Relations of the Contemporary Arab World  
An examination of the Arab regional system, with emphasis on regional interaction, regional organizations, and external linkages. The specific cultural, political, ideological, and strategic characteristics of the system will be analysed.  
Prerequisite: Political Science 369 or consent of the Department.

Political Science 485 H(3-0)  
The Politics of the International Economic Order  
Analysis of the political management of international economic relations. Topics may include the politics of trade and money relations, energy, multinational corporations, and the New International Economic Order.  
Prerequisite: Political Science 381 or consent of the Department.

Political Science 489 H(3-0)  
Foreign Policies of Major Powers  
An analysis and evaluation of the foreign policies of selected major powers, such as the United States, Russia, etc.  
Prerequisite: Political Science 381 or consent of the department.

Political Science 493 H(3-0)  
Theories of International Relations  
Moral issues in international relations, such as justice and the legitimacy of aggression and intervention in the affairs of foreign states. The course may involve a simulation  
Prerequisite: Political Science 381 or consent of the Department.

Political Science 499 H(3-0)  
Honours Seminar  
Classic works in the subfields of political science. Normally required of Honours students in the second half of their third year, and open to others with the consent of the Department.

Political Science 500 F(3-0)  
Honours Thesis  
For students in the last year of their Honours program.

Political Science 501 H(3-0)  
Independent Research  
Fourth-year Political Science Majors will select research topics in one of the following fields: political theory; Canadian politics; comparative politics; international relations; public policy, law, and administration.  
Prerequisite: Consult the Department for assignment to a faculty supervisor.  
Note: Not open to students with credit in Political Science 500.

Political Science 503 H(3-0)  
Selected Topics in Political Theory  
Content of the course will vary from year to year. Consult the Department for information on choice of topics.  
Prerequisite: Political Science 310 or consent of the Department.

Political Science 521 H(3-0)  
Canadian Executive Federalism  
Preparation for and participation in a model First Ministers’ Conference.  
Prerequisite: Consent of the Department.

Political Science 541 H(3-0)  
Selected Topics in Public Law  
An examination of the political, philosophical, and institutional dimensions of selected public law issues. Civil liberties issues will be emphasized, but other questions may also be studied. Consult the Department for information on choice of topics.  
Prerequisite: Political Science 343 or 442.

Political Science 551 H(3-0)  
Women in 20th Century Canadian Politics  
A political history of women in Canada in the 20th century. Topics include campaigns for suffrage, legal personhood and equality rights, women’s political activism, the evolution of public policy concerning women, and the participation of women in public life.  
Prerequisite: Political Science 321 or History 343, or consent of the Department.

Political Science 561 H(3S-0)  
Government and Politics of the European Union  
An examination of the politics of the European Union. May be offered as a seminar or in preparation for and participation in a model European Council Meeting.  
Prerequisite: Consent of the Department.

Political Science 567 H(3-0)  
United States Constitutional History  
History of constitutionalism in the U.S. from colonial times to the present. The process of constitutional development through judicial interpretation of the basic law.

Political Science 569 H(3S-0)  
Selected Topics in Middle East Politics  
Emphasis will be on foreign-policy development and application in the Middle East.  
Prerequisites: Political Science 369 and one 400-level course in comparative politics or international relations, or consent of the Department.

Political Science 577 H(3S-0)  
Government and Politics of the United States  
Domestic political issues in American politics including political parties, courts, Congressional-
Courses of Instruction

Presidential relations, and budgetary, fiscal and social relations. May be offered as a simulation.
Prerequisite: Political Science 377.

Political Science 579 H(3-0)
Political Economy of Development
Third World development projects, programs, and policies in Africa, Asia and Latin America, intended to raise the standard of living and enhance political participation.
Prerequisite: Political Science 379 or consent of the Department.

Political Science 581 H(3S-0)
Selected Topics in International Law and Organizations
An advanced seminar on international order and on cooperative and competitive efforts by states and other international actors to create, maintain and change the order.
Prerequisite: Political Science 383 or 385 or consent of the Department.

Political Science 583 H(3-0)
The United States and the World since 1890
A historical and analytical examination of the development of modern United States foreign policy from the late nineteenth century to the present. Topics include the institutional structure of foreign policy decision-making, including the role of the President, Congress, State Department, Pentagon and public opinion, and the relationship between domestic politics and foreign policy. Historical dimensions include the turn to imperialism, World War I, the coming of World War II, the Cold War, Korea, Vietnam, Latin American relations, strategic arms limitations talks, and detente.
Prerequisites: Third or fourth year standing and one of History 219 or 383, Political Science 381 or consent of the Department.

Political Science 587 H(3-0)
Directed Readings in Political Science
Students wishing to register in this course must submit to the Head of the Department a detailed statement by the instructor of the work to be carried out.
Prerequisite: Consent of the Department.
MAY BE REPEATED FOR CREDIT

Graduate Courses
Courses numbered 600-799 are offered either as special reading courses or as seminars, as required. Students should consult the Department regarding enrollment in these courses.

Political Science 615 H(3-0)
Advanced History of Political Thought
Intensive study of major political thinkers.

Political Science 617 H(3-0)
Advanced Political Theory
Discussion of contemporary topics in political thought. Emphasis on analysis of problems rather than history of ideas.

Political Science 619 H(3-0)
Applied Ethics and Military Force
An examination of the philosophical justifications offered to defend the use of military force, based particularly on the analysis of texts in the history of Western political philosophy.

Political Science 621 H(3-0)
Canadian Federal Politics
Examination of the structure and operation of the Canadian federal state including its constitutional framework, parliamentary government, intergovernmental relations, and political culture.

Political Science 623 H(3-0)
Canadian Political Process
Examination of Canadian political behaviour within its institutional context, including political parties, interest groups, voting and socialization. Computer use is optional.

Political Science 625 H(3-0)
Canadian Public Administration
Examination of the problems of administrative agencies and public authorities.

Political Science 631 H(3-0)
Parties, Elections and Representation
An examination of political parties and elections in both established and emerging democracies as a means of understanding the nature of political representation in modern representative democracies.

Political Science 641 H(3-0)
Selected Topics in Public Law
Examination of the political, philosophical, and institutional dimensions of selected public law issues, with particular reference to judicial and quasi-judicial tribunals as policy-making institutions. Consult the Department for information on choice of topics.

Political Science 651 H(3-0)
Policy Studies
Critical review of major themes, issues, and approaches in the study and evaluation of public policy.

Political Science 671 H(3-0)
Advanced Comparative Politics: Political Development
Analysis of comparative methods and paradigms of political development.

Political Science 673 H(3-0)
Advanced Comparative Politics: Institutions and Systems
Comparative analysis of political institutions and systems.

Political Science 675 H(3-0)
Selected Topics in Advanced Comparative Politics
675.01. Middle East 675.02. Africa 675.03. East Asia 675.04. Latin America 675.05. Western Europe 675.06. Eastern Europe and the Former Soviet Union 675.07. Public Policy 675.08. Politics of Development

Political Science 681 H(3-0)
Advanced Analysis of International Relations
Selected issues and approaches in the analysis of world politics.

Political Science 683 H(3-0)
Advanced Studies in Foreign Policy
Selected themes in the formation and implementation of foreign policies.

Political Science 685 H(3-0)
Strategic Studies
Advanced seminar in major topics in strategic studies, such as arms control, deterrence, and other military doctrines.

Political Science 687 H(3-0)
Mass Violence and Human Rights
An examination of the political, ethical and legal dilemmas surrounding collective violence and its impact on populations in the context of Post-Cold War case histories.

Political Science 691 H(3-0)
Quantitative Analysis in Political Science
Examination of empirical research methods and techniques of quantitative analysis in the study of political phenomena. Computer use is required.

Political Science 693 H(3-0)
Theoretical Foundations of Political Science

Political Science 715 H(3-0)
Special Topics in Political Theory
MAY BE REPEATED FOR CREDIT

Political Science 721 H(3-0)
Special Topics in Canadian Politics
MAY BE REPEATED FOR CREDIT

Political Science 725 H(3-0)
Special Topics in Public Administration
MAY BE REPEATED FOR CREDIT

Political Science 741 H(3-0)
Special Topics in Public Law
MAY BE REPEATED FOR CREDIT

Political Science 751 H(3-0)
Public Policy Case Study I

Political Science 753 H(3-0)
Public Policy Case Study II
Prerequisite: Political Science 751.

Political Science 755 H(3-0)
Special Topics in Public Policy
MAY BE REPEATED FOR CREDIT

**Political Science 781**  
Special Topics in International Relations  
MAY BE REPEATED FOR CREDIT

Each year, depending on the needs of students, a number of 600- and 700-level Graduate Courses are offered from the foregoing list. In addition to the numbered and titled courses shown above, the Department offers a selection of advanced level Graduate Courses specifically designed to meet the needs of individuals or small groups of students. These courses are numbered in the series 800.01 to 899.99. Such offerings are, however, contingent upon the availability of staff resources.

**Psychology**  
Instruction offered by members of the Department of Psychology in the Faculty of Social Sciences.  
Department Head - B. H. Iland  
Exceptions to listed prerequisites will be considered through application to the Department of Psychology.  
Note: Only Psychology courses may be used to fulfill the requirements for the Major or Minor in Psychology.

Application of psychological research and theory to people-system relationships and the work.
Courses of Instruction

Psychology 427
Environmental Psychology
The theory and data pertaining to the relationship between human behaviour and the physical environment, both natural and built. Particular emphasis is placed on the implications of current knowledge for the management of the human-environment interface. A research project is an integral part of the course.
Prerequisite: Psychology 312.

Psychology 431
Current Issues in Psychopathology
Coverage of the theoretical and methodological aspects of current research into the etiology and modification of behavioural and experiential disorders.
Prerequisites: Psychology 312 and 385.

Psychology 433
Clinical Psychology
Assessment and treatment problems in clinical settings.
Prerequisite: Psychology 385. Psychology 331 is recommended.
Note: Restricted to fourth-year Psychology Majors and fourth-year Psychology Honours students.

Psychology 435
Behaviour Modification
Current behaviour change procedures for children and adults. Practical considerations involved in the selection, implementation, maintenance, and evaluation of behaviour modification programs.
Prerequisite: Psychology 385.
Note: Restricted to fourth-year Psychology Majors and fourth-year Psychology Honours students.

Psychology 439
Psychology of Gender
An analysis of psychological theory and research on gender situated within the interdisciplinary field of gender studies. Topics include the meaning of gender, psychological development and gender, and gender and interpersonal relationships.
Prerequisites: Psychology 312, and one of 345 or 351.
Note: Not open to students with credit in Psychology 347.

Psychology 441
Social Psychology: Theory and Research
A review of current theory and research in the area of social psychology. Research projects will introduce methodologies used in this area.
Prerequisites: Psychology 312 and 345.
Note: Sociology 341 does not substitute for Psychology 345 as a prerequisite.

Psychology 443
Interpersonal Relationships
Application of social psychological theory and methodology to a variety of topics in the area of interpersonal relationships such as attraction, close relationships, interpersonal conflict, communication, and power. Course projects will be an integral part of the course.
Prerequisites: Psychology 312 and 345.
Note: Sociology 341 does not substitute for Psychology 345 as a prerequisite.

Psychology 447
Advanced Topics in Personality or Social Psychology
An examination of current research topics in personality or social psychology or gender.
Prerequisites: Psychology 205 and appropriate 300-level course. Students are advised to consult with the Department regarding specific prerequisites for the course in a given year.
Note: May be repeated once for credit with consent of the Department.

Psychology 449
Experimental Child Psychology: Social-Personality Development
Socialization processes and behaviours from birth to adolescence; observational learning, altruism, moral development, sex-roles, dependency, emotional development, and social motivation.
Prerequisites: Psychology 312 and one of 351 or 355.

Psychology 451
Experimental Child Psychology: Basic Processes
Neonatal, infant, and child behaviour drawn from the laboratory and experimental research; sensory and basic learning processes and perceptual-cognitive development.
Prerequisites: Psychology 312 and 351.

Psychology 455
Sensory, Perceptual, and Cognitive Aspects of Aging
Basic research and contemporary issues in the age-related changes in sensation, perception, attention, learning and memory, intelligence and problem-solving.
Prerequisites: Psychology 312 and 353.
Note: Not open to students with credit in Psychology 553.

Psychology 457
Social and Clinical Aspects of Aging
Stability and change in the later years of life with a focus on social and clinical areas of aging.
Prerequisites: Psychology 312 and 353.
Note: Not open to students with credit in Psychology 553.

Psychology 461
Learning: Theory and Research
Traditional and contemporary learning theory emphasizing intrahuman data.
Prerequisite: Psychology 312.

Psychology 463
Memory
Current and classic memory research is explored. Topics include how memories are encoded, stored, and retrieved. Laboratory projects introduce methodologies used in memory research.
Prerequisites: Psychology 312 and 365.

Psychology 465
Research in Cognitive Psychology
Current research in human memory, thinking, attention, and language processing is explored. Laboratory projects will introduce research methodologies used in these areas.
Prerequisites: Psychology 312 and 365.

Psychology 467
Experimental Psycholinguistics
Exploration of the cognitive, neuropsychological, and social processes that underlie language abilities. A laboratory component provides experience with methodologies used to study language behaviour.
Prerequisite: Psychology 312.
Note: Not open to students with credit in Linguistics 339.
## Courses of Instruction

### Psychology 469

**H(3-2)(Area III)**

**Vision**

A systematic examination of vision and its role in our interactions with the natural environment. Topics may include: the physics of light; optics; eye and retina; visual pathways and visual brain; perception of color, space, change and motion; visual development and aging; art and vision; visual disorders; and recovery from blindness.

**Prerequisites:** Psychology 312 and 369.

### Psychology 471

**H(3-2-2)(Area III)**

**Auditory Processing**

Basic acoustics, anatomy, and physiology of the auditory system, psychoacoustics (sensitivity to various aspects of sound), speech perception, and effects of noise on hearing.

**Prerequisites:** Psychology 312 and 369.

### Psychology 473

**H(3-0) (Area III)**

**Evolutionary Psychology**

An examination of the scientific synthesis of evolutionary biology and modern psychology, which offers a novel approach to such issues as short-term and long-term human mating strategies, short-term sexual strategies, conflict between the sexes, parental investment, aggression, and social dominance.

**Prerequisite:** Psychology 312.

**Note:** Not open to students with credit in Psychology 377.

### Psychology 475

**H(3-0)(Area III)**

**Behavioural Pharmacology**

The behavioural effects of drugs specifically employed to affect the nervous system, as seen in the treatment of mental disorders, behavioural disorders, and other conditions such as Parkinson’s, Huntington’s and Alzheimer’s diseases. Neuropharmacologic agents will be discussed as they relate to the biochemistry and physiology of putative neurotransmitters.

**Prerequisite:** Psychology 371 or 375.

### Psychology 476

**F(3-3)(Area III)**

**Physiological Psychology**

Physiological bases of sensory, perceptual, motivational, emotional, learning, and motor processes. The functioning of the nervous system in these processes is emphasized.

**Prerequisite:** Psychology 371 or 375.

### Psychology 479

**H(3-2)(Area III)**

**Human Neuropsychology**

Integration of the literature on human brain damage with the evidence from animal research. Topics include developmental neuropsychology; cognitive deficits associated with frontal, parietooccipital, and temporal lobes; origins and mechanisms in the determination of cerebral dominance; disorders of learning and memory; long-term effects of cerebral lesions.

**Prerequisite:** One of Psychology 371 or 375.

### Psychology 489

**H(3-3T)(Area II)**

**The Psychology of Creativity**

Personality characteristics of creative people, and the psychological experiences they report while working. Theoretical accounts of creativity provided by psychologists will be particularly emphasized.

Tutorials will include feature films that dramatize lecture topics.

**Prerequisite:** Psychology 205.

**Note:** Psychology 209 is recommended as a preparation for this course.

### Psychology 491

**H(3-0)(Area III)**

**Cross-Cultural Cognition**

Theory and research on the interaction of culture and human cognition. Topics include cross-cultural research in perception, language processing, memory, concepts, and reasoning.

**Prerequisite:** Psychology 365.

### Psychology 497

**H(3-0)(Area III)**

**Consciousness**

An exploration of the origin, nature, and function of consciousness as informed by research on conscious and unconscious processes, psychological disorders, neuropsychological case studies, consciousness-altering drugs, hypnosis, meditation, state-dependent memory, sleep, and dreams.

**Prerequisites:** Psychology 312 and 365.

### Psychology 501

**H(35-0)(Area II)**

**Special Topics Seminar**

Selected topics from one or more of the following areas in psychology: aging, clinical, development, industrial, organizational, personality, social, history, and theory.

**Prerequisites:** Psychology 312 and consent of the Department.

**Note:** May be repeated once for credit with the consent of the Department. Students should consult the Department concerning topics and recommended preparation for a given session.

### Psychology 503

**H(3-0)(Area II)**

**Conference Course in Psychology**

Selected topics from one or more of the following areas in psychology: aging, clinical, development, industrial, organizational, personality, social, history, and theory.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Psychology 504

**F(3-3)(Area III)**

**Conference Course in Psychology**

Research project from one of the following areas in psychology: behavioural neuroscience, cognition, human factors, learning, motivation, sensation, perception, and quantitative methods.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Psychology 505

**H(3-3)(Area III)**

**Conference Course in Psychology**

Research project from one of the following areas in psychology: behavioural neuroscience, cognition, human factors, learning motivation, sensation, perception, and quantitative methods.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Psychology 506

**F(3-3)(Area II)**

**Research in Psychology**

Research project from one of the following areas in psychology: aging, clinical, developmental, industrial, organizational, personality, social, history, and theory.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Psychology 507

**H(3-0)(Area III)**

**Conference Course in Psychology**

Selected topics from one or more of the following areas in psychology: behavioural neuroscience, cognition, human factors, learning, motivation, sensation, perception, and quantitative methods.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Psychology 509

**H(3-3)(Area II)**

**Research in Psychology**

Research project from one of the following areas in psychology: aging, clinical, developmental, industrial, organizational, personality, social, history, and theory.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

### Psychology 511

**H(35-0)(Area III)**

**Special Topics Seminar**

Selected topics from one or more of the following areas in psychology: behavioural neuroscience, cognition, human factors, learning, motivation, sensation, perception, and quantitative methods.

**Prerequisites:** Psychology 312 and consent of the Department.

**Note:** May be repeated once for credit with the consent of the Department. Students should consult the Department concerning topics and recommended preparation for a given session.

### Psychology 573

**H(3-0)(Area III)**

**Advanced Topics in Evolutionary Psychology**

A detailed examination of current research topics and theories in evolutionary psychology.

**Prerequisites:** Psychology 312, and one of 377 or 473.

### Psychology 591

**H(3-0)(Area III)**

**Advanced Topics in Cognitive Psychology**

A detailed examination of current research topics in cognitive psychology. Topics may include one or more of the following: human memory, thinking, attention, language processing, and computer modelling.

**Prerequisite or Corequisite:** Psychology 465.

**MAY BE REPEATED FOR CREDIT**

### Psychology 596

**F(2S-6)(Area II)**

**BA Honours Thesis and Seminar**

Research project under the direction of a member of the Department. In the seminar, students will present and discuss their projects and other topics of current relevance.

**Prerequisite:** Admission to Honours BA program.

### Psychology 598

**F(2S-6)(Area III)**

**BSc Honours Thesis and Seminar**

Research project under the direction of a member of the Department. In the seminar, students will present and discuss their projects and other topics of current relevance.

**Prerequisite:** Admission to Honours BSc program.

**Courses of Instruction** 467

---

**Prerequisites:** Consent of the Department.
Psychology 638  
**Research in Engineering Psychology**
Original project on a research problem in the human factors, including human-computer interaction, driving behaviour, usability, and performance in work settings.

**Prerequisite:** Consent of the Department.

Psychology 639  
**Advanced Industrial and Organizational Psychology**
Application of psychological principles, research and methods relating to human interactions and performance in work settings.

**Prerequisite:** Consent of the Department.

Psychology 650  
**Research Seminar in Clinical Psychology**
An introduction to research and design issues in clinical psychology.

**Note:** Open only to students enrolled in the Clinical Psychology program.

**MAY BE REPEATED FOR CREDIT**

**NOT INCLUDED IN GPA**

Psychology 651  
**Adult Psychopathology**
Current theory, issues, and research regarding the epidemiology, etiology, diagnosis, and prognosis of adult psychopathology. Implications for assessment and treatment.

Psychology 653  
**Child Psychopathology**
Current theory, issues, and research regarding the epidemiology, etiology, diagnosis, and prognosis of child psychopathology. Implications for assessment and treatment. Topics include internalizing and externalizing disorders, risk and protective factors, and developmental continuities and discontinuities in psychopathology.

Psychology 659  
**Ethics and Professional Issues in Clinical Psychology**
Ethical and legal standards for clinical psychologists. An introduction to professional issues in contemporary clinical practice.

**Note:** Open only to students enrolled in the Clinical Psychology program.

Psychology 660  
**Summer Practicum in Clinical Psychology I**
Supervised training experience in an approved clinical setting. Provides exposure to basic issues and techniques in the practice of psychological assessment and psychotherapy.

**Note:** Open only to students enrolled in the Clinical Psychology program.

**NOT INCLUDED IN GPA**

Psychology 662  
**Summer Practicum in Clinical Psychology II**
Supervised clinical training in an approved clinical setting. Provides exposure to the basic issues and techniques in the practice of psychological assessment and psychotherapy.

**Note:** Open only to students enrolled in the Clinical Psychology program.

**MAY BE REPEATED FOR CREDIT**

**NOT INCLUDED IN GPA**

Psychology 671  
**Psychological Assessment of Adults**
An overview of theoretical, professional, and ethical issues in the psychological assessment of adult clinical populations. Instruction in the administration and interpretation of assessment procedures for adults including interviews, behavioural assessments, and selected intellectual and personality tests. Supervised practical experience in the application of adult assessments in a relevant clinical setting.

**Note:** Open only to students enrolled in the Clinical Psychology program.

Psychology 673  
**Psychological Assessment of Children**
An overview of theoretical, professional and ethical issues in the psychological assessment of child clinical populations. Instruction in the administration and interpretation of child and family assessment procedures including interviews, behavioural assessments, and selected psychological tests. Supervised practical experience in the application of child and family assessments in a relevant clinical setting.

**Note:** Open only to students enrolled in the Clinical Psychology program.

Psychology 681  
**Adult Psychotherapy**
Theory, research, and practice in adult psychotherapy and behaviour change. Supervised exposure to the practice of adult psychotherapy in a relevant clinical setting.

**Note:** Open only to students enrolled in the Clinical Psychology program.

Psychology 683  
**Child Psychotherapy**
Theory, research, and practice in child and family psychotherapy and behaviour change. Supervised exposure to the practice of child and family psychotherapy in a relevant clinical setting.

**Note:** Open only to students enrolled in the Clinical Psychology program.

Psychology 689  
**Research Course in Psychology**
Offered under various subtitles. Consult the Department for details.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

Psychology 701  
**Graduate Teaching Seminar**
This seminar aims to foster the development of graduate student instruction/presentation skills. Topics covered include the development of new courses, lecturing, leading discussion, motivating students, computer-assisted instruction, development of A-V materials, the use of instructional technology, examination and grade management, marking, and ethical/protocol/misconduct issues in the classroom. Students will also be provided with teaching experience and feedback in a supportive environment.

Psychology 705  
**Seminar in History/Systems/Theoretical Psychology**
Selected topics in the history of twentieth-century psychology and the theoretical problems of modern psychology.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

Psychology 706  
**Research in History/Systems/Theoretical Psychology**
Advanced research in recent developments in theory, methodology and foundational issues and/or the development of historiography in the discipline.

**Prerequisite:** Consent of the Department.

Psychology 721  
**Seminar in Sensation and Perception**
Selected topics in cognitive psychological theory and research.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

Psychology 722  
**Research in Sensation and Perception**
Advanced project on a contemporary research issue in vision and/or audition. Specific project will vary with student and supervisor interest as well as available research facilities, possible research areas include spatiotemporal aspects of sight or hearing, speech perception, visual attention, and age-related changes in these functions.

**Prerequisite:** Consent of the Department.

Psychology 723  
**Seminar in Cognition**
Selected topics in cognitive psychological theory and research.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

Psychology 724  
**Research in Cognition**
Empirical research in cognitive psychology conducted under the supervision of a faculty member.

**Prerequisite:** Consent of the Department.

Psychology 725  
**Seminar in Developmental Psychology**
Selected topics in developmental psychology.

**Prerequisite:** Consent of the Department.

**MAY BE REPEATED FOR CREDIT**

Psychology 726  
**Research in Developmental Psychology**
Advanced faculty-supervised research project on contemporary research problems in infancy, childhood, adolescence. Specific project will vary with student and supervisor interest as well as available facilities. Possible research areas include the study of normal or abnormal developmental aspects of early-life differences or change in auditory, cognitive, emotional, language, moral, perceptual or sensory functioning.

**Prerequisite:** Consent of the Department.
Courses of Instruction

Psychology 727  H(3-0)
Seminar in Social/Personality Psychology
Selected topics related to interpersonal processes, gender, justice, and personality and its assessment.
Prerequisite: Consent of the Department.
MAY BE REPEATED FOR CREDIT

Psychology 728  F(0-3)
Research in Social/Personality Psychology
Advanced research project in the areas of social and/or personality psychology.
Prerequisite: Consent of the Department.

Psychology 729  H(3-0)
Seminar in Current Gerontological Issues
Prerequisite: Consent of the Department.
MAY BE REPEATED FOR CREDIT

Psychology 730  F(0-3)
Research in Current Gerontological Issues
Advanced faculty-supervised research project on contemporary research problem in adult aging. Specific research topic depends on student and supervisor interest as well as available facilities. Possible areas of study include age-related differences or change in auditory, cognitive, emotional, linguistic, social or visual functioning.
Prerequisite: Consent of the Department.

Psychology 731  H(3-0)
Seminar in Behavioural Neuroscience
Prerequisite: Consent of the Department.
MAY BE REPEATED FOR CREDIT

Psychology 732  F(0-3)
Research in Behavioural Neuroscience
Behavioural neuroscience theory and techniques including: behavioural analysis, electrophysiological recording and anatomical methods.
Prerequisite: Consent of the Department.

Psychology 733  H(3-0)
Seminar in Cognitive Development
Selected topics in cognitive development.
Prerequisite: Consent of the Department.
MAY BE REPEATED FOR CREDIT

Psychology 734  F(0-3)
Research in Cognitive Development
Empirical research in cognitive development conducted under the supervision of a faculty member.
Prerequisite: Consent of the Department.

Psychology 737  H(3S-0)
Seminar in Ergonomics
Application of psychological principles and methods to the design of complex systems and to the operator/system interface.
Prerequisites: Psychology 637/639 or consent of the Department.
MAY BE REPEATED FOR CREDIT

Psychology 739  H(3S-0)
Seminar in Industrial/Organizational Psychology
Application of psychological principles and methods to business, industry and other organizational settings.
Prerequisites: Psychology 639 or consent of the Department.
MAY BE REPEATED FOR CREDIT

Psychology 750  F(3S-0)
Advanced Seminar in Clinical Psychology
A doctoral level seminar in advanced topics in the practice of clinical psychology.
750.01. Psychopharmacology/Substance Abuse
750.02. Neuropsychology
750.03. Family Therapy
750.04. Group Therapy
750.05. Diversity Issues in Clinical Psychology
750.06. Clinical Geropsychology
750.07. Couple and Sex Therapy
750.08. Forensic Psychology
Note: Open only to students enrolled in the Clinical Psychology program.

Psychology 751  H(3-0)
Special Topics in Adult Psychopathology
A specialized topic course in the area of adult psychopathology. Course offerings will vary from year to year and may include such topics as: schizophrenia, substance abuse, suicide, mental health delivery systems, or computer applications in clinical psychology.
MAY BE REPEATED FOR CREDIT

Psychology 753  H(3-0)
Special Topics in Child and Family Psychopathology
A specialized topic course in the area of child and family psychopathology. Course offerings will vary from year to year and may include such topics such as: developmental psychopathology, family violence, early prevention and intervention, or multicultural issues.
MAY BE REPEATED FOR CREDIT

Psychology 760  F(1-7)
Specialty Practicum in Clinical Psychology I
Supervised training experience in an approved clinical setting. Provides in-depth exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Note: Open only to students enrolled in the Clinical Psychology program.
NOT INCLUDED IN GPA

Psychology 762  F(1-7)
Specialty Practicum in Clinical Psychology II
Supervised training experience in an approved clinical setting. Provides advanced in-depth exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Note: Open only to students enrolled in the Clinical Psychology program.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Psychology 765  H(1-7)
Practicum in Clinical Psychology
Supervised training experience in an approved clinical setting. Provides exposure to specific clinical populations and to the application of various psychological assessment and intervention strategies and techniques.
Note: Open only to students enrolled in the Clinical Psychology program.
MAY BE REPEATED FOR CREDIT
NOT INCLUDED IN GPA

Psychology 782  F(0-3)
Senior Psychology Practicum
Prerequisite: Consent of the Department.

Psychology 798
Pre-Doctoral Internship in Clinical Psychology
A full calendar year, full-time (or two-years, half-time) supervised training experience in an approved clinical setting. Intensive exposure to various professional issues, the opportunity to work with a diverse range of clinical populations and problems, and advanced training in the use of specific psychological assessment and intervention strategies.
Note: Open only to students enrolled in the Clinical Psychology program.
NOT INCLUDED IN GPA

Psychology 799  H(0-3)
Research Course in Psychology
Offered under various subtitles. Consult the Department for details.
Prerequisite: Consent of the Department.
Note: May be repeated for credit with the consent of the Department.

In addition to the numbered and titled courses shown above, the department offers a selection of advanced level Graduate Courses specifically designed to meet the needs of individuals or small groups of students at the advanced doctoral level. These courses are numbered in the series 800.01 to 899.99. Such offerings are, of course, conditional upon the availability of staff resources.

Pure Mathematics

Pure Mathematics 315  H(3-11)
Abstract Algebra
Prerequisite: Mathematics 211 or 221.
Pure Mathematics 319  
Transformation Geometry  
Prerequisites: Mathematics 211 or 221 and one other 200-level Mathematics course.  

Pure Mathematics 329  
Introduction to Cryptography  
Description and analysis of cryptographic methods used in the authentication and protection of data. Classical cryptosystems and cryptanalysis, information theory and perfect security, the Data Encryption Standard (DES) and Public-key cryptosystems.  
Prerequisite: Mathematics 271.  
Note: Credit for both Pure Mathematics 329 and 321 will not be allowed.  

Pure Mathematics 371  
Combinatorial Mathematics  
Counting, graph theory, combinatorial optimization.  
Prerequisite: Mathematics 271.  

Pure Mathematics 415  
Set Theory  
Axioms for set theory, the axiom of choice and equivalents, cardinal and ordinal arithmetics, induction and recursion on wellfounded sets, infinitary combinatorics, applications.  
Prerequisite: Mathematics 271 or 311 or 353 or Pure Mathematics 315 or consent of the Division.  

Pure Mathematics 419 (Statistics 419)  
Information Theory and Error Control Codes  
Information sources, entropy, channel capacity, development of Shannon’s theorems, development of a variety of codes including error correcting and detecting codes.  
Prerequisites: Mathematics 311, and Mathematics 321 or any Statistics course, or consent of the Division.  

Pure Mathematics 421  
Introduction to Complex Analysis  
Prerequisites: Mathematics 349 and 353; or consent of the Division.  
Note: Credit for both Pure Mathematics 421 and 521 will not be allowed.  

Pure Mathematics 423  
Differential Geometry  
Prerequisite: Mathematics 353 or consent of the Division.  

Pure Mathematics 425  
Geometry  
Introduction to some of the following geometries: Discrete geometry, finite geometry, hyperbolic geometry, projective geometry, synthetic geometry.  
Prerequisite: Pure Mathematics 315 or consent of the Division.  

Pure Mathematics 427  
Number Theory  
Prerequisite: Pure Mathematics 315 or consent of the Division.  

Pure Mathematics 429  
Cryptography - The Design of Ciphers  
Review of basic algorithms and complexity. Symmetric key cryptography. Discrete log based cryptography. One-way functions and Hash functions. Knapsack. Introduction to primality testing. Factoring. Other topics may include elliptic curves, zero-knowledge, and quantum cryptography.  
Prerequisite: Pure Mathematics 321 or 329.  
Prerequisite or Corequisite: Pure Mathematics 427.  

Pure Mathematics 431  
Groups, Rings and Fields  
Factor groups and rings, polynomial rings, field extensions, finite fields, Sylow theorems, solvable groups. Additional topics.  
Prerequisites: Mathematics 311 and Pure Mathematics 315 or consent of the Division.  

Pure Mathematics 435  
Analysis I  
Numbers, functions; sequences; limits and continuity; theory of differentiation and integration of functions of a single variable.  
Prerequisite: Mathematics 253 or 263 or Applied Mathematics 219 or consent of the Division.  
Note: This course is offered in the Fall Session and would normally be taken in the third year. Potential honours students are urged to consider taking this course in second year. Please consult the appropriate Division Chair.  

Pure Mathematics 445  
Analysis II  
Series; sequences and series of functions, uniform convergence; basic topology in Euclidean spaces; analysis with functions of several variables; implicit and inverse function theorems.  
Prerequisites: Mathematics 353 and Pure Mathematics 435, or consent of the Division.  
Corequisite: Mathematics 311.  

Pure Mathematics 471  
Discrete Optimization  
Block designs and extremal set theory, efficiency of algorithms, complexity theory, trees and sorting, graphs and transversals of families of sets, networks and the max-flow min-cut theorem, dynamic programming, recursion.  
Prerequisite: Pure Mathematics 371.  

Pure Mathematics 501  
Integration Theory  
Abstract measure theory, basic integration theorems, Fubini’s theorem, Radon-Nikodym theorem, further topics.  
Prerequisite: Pure Mathematics 545 or consent of the Division.  
Note: Credit for both Pure Mathematics 501 and 601 will not be allowed.  

Pure Mathematics 503  
Topics in Pure Mathematics  
This course is offered under various subtitles. Consult Department for details.  
Prerequisite: Consent of the Division.  
MAY BE REPEATED FOR CREDIT  

Pure Mathematics 505  
Topology I  
Metric spaces. Introduction to general topology.  
Prerequisite: Pure Mathematics 435 or consent of the Division.  

Pure Mathematics 511  
Rings and Modules  
Ring theory, and structure of modules. Application to Abelian groups and linear algebra. Additional topics.  
Prerequisite: One of Pure Mathematics 431, Applied Mathematics 441; or consent of the Division.  

Pure Mathematics 519  
Information Theory, Codes, and Cryptography  
A continuation of Pure Mathematics 419. Topics include: Entropy, Shannon’s Theorem, Hamming codes, Reed-Muller codes, Reed-Solomon codes, M.D.S. codes and finite geometries, Ergodic and Markov processes.  
Prerequisite: Pure Mathematics 419.  

Pure Mathematics 521  
Complex Analysis  
Prerequisite: Pure Mathematics 435 or consent of the Division.  
Note: Credit for both Pure Mathematics 521 and 421 will not be allowed.  

Pure Mathematics 529  
Advanced Cryptography and Cryptanalysis  
Probability and perfect secrecy. Provably secure cryptosystems. Prime generation and primality testing. Cryptanalysis of factoring-based cryptosystems. Discrete log based and elliptic curve cryptography and cryptanalysis. Other advanced topics may include hyperelliptic curve cryptography, other factoring methods and other primality tests.  
Prerequisites: Pure Mathematics 427 and 429.  

Pure Mathematics 545  
Analysis III  
Metric spaces and function spaces; equi-continuity; trigonometric series and Fourier series; elements of Lebesgue integration.  
Prerequisite: Pure Mathematics 445 or consent of the Division.
### Graduate Courses

**Note:** Students are urged to make their decisions as early as possible as to which Graduate Courses they wish to take, since not all these courses will be offered in any given year.
