

Covid-19 Communications

SUMMARY

There have been nine positive cases of covid-19 identified on campus today.

CASE A

An individual who spent time in the Earth Sciences building tested positive for covid-19. Their infectious window on campus was January 31 and February 1. Contact tracing is complete and five close contacts have been identified.

LOCATION AND DATE(S)

January 31

- 08:00 — 20:00: ES

February 1

- 8:30 — 16:30: ES

CASE B

An individual who spent time in the Kinesiology building tested positive for covid-19. Their infectious window on campus was January 28. Contact tracing is complete and close contacts have been identified.

LOCATION AND DATE(S)

January 28

Crowsnest Hall

- 10:00 — 14:00: KNB

CASE C

An individual who spent time in the Active Living Centre tested positive for covid-19. Their infectious window on campus was January 31. Contact tracing is complete and close contacts have been identified.

LOCATION AND DATE(S)

January 31

- 11:30 — 12:00: PM ALC

CASE D

An individual who spent time in Murray Fraser Hall tested positive for covid-19. Their infectious window on campus was January 21. Contact tracing is complete and two close contacts have been identified.

LOCATION AND DATE(S)

January 21

- 19:00 — 16:00: MFH

CASE E

An individual who spent time in the Health Sciences Centre tested positive for covid-19. Their infectious window on campus was January 30. Contact tracing is complete and close contacts have been identified.

LOCATION AND DATE(S)

January 30

- 22:30 — 00:00: HSC

CASE F

An individual who spent time in Aurora Hall and the Dining Centre tested positive for covid-19. Their infectious window on campus was February 2. Contact tracing is complete and close contacts have been identified.

LOCATION AND DATE(S)

February 2

Aurora Hall

- 09:30 — 10:00: Dining Centre

CASE G

An individual who spent time in the Biological Sciences building tested positive for covid-19. Their infectious window on campus was January 27. Contact tracing is complete and close contacts have been identified.

LOCATION AND DATE(S)

January 27

- 09:00 — 12:00: Biological Sciences

CASE H

An individual who spent time in the Health Research Innovation Centre tested positive for covid-19. Their infectious window on campus was January 31. Contact tracing is complete and close contacts have been identified.

LOCATION AND DATE(S)

January 31

- 09:30 — 13:00: HRIC

CASE I

An individual who spent time in the Kinesiology building tested positive for covid-19. Their infectious window on campus was January 28. Contact tracing is complete and close contacts have been identified.

LOCATION AND DATE(S)

January 28

- 07:30 — 15:30: KNB

STEPS TAKEN

Areas where the individuals are known to have spent time are being deep cleaned.

UCalgary has created [covid safe guidelines](#) to support our campus community. Students, faculty and staff are required to either attest they are fully immunized against Covid-19 in order to be on campus. UCalgary also requires individuals on

campus to wear face coverings when in public locations or unable to distance. Visitors to campus will also be expected to comply with the university's program.

Please do not come to campus if you are experiencing cold or flu-like symptoms and go home immediately if symptoms develop while you are on campus. If you have been exposed to someone with covid-19, and you are not fully immunized please protect others by staying home.

If you have covid-19, please inform UCalgary by filling out the [webform](#) so we can help you to inform others with whom you may have been in close contact. Close contacts should monitor for covid-19 symptoms; isolate and be tested for covid-19 if symptoms develop.

As per exposure criteria established by Alberta Health Services, a close contact is anyone who, during the infectious period has lived with or was within two metres of a person who has covid-19 for 15 minutes, even if a non-medical mask was worn during that contact. This includes cumulative contact where multiple interactions add up to 15 minutes or more. A close contact could also be someone who had direct physical contact (handshake, hugging, kissing) with an infectious person or direct contact with their bodily fluids, such as being coughed or sneezed on. [Learn more.](#)

The best protection against covid-19 is to be fully vaccinated. [Learn more.](#)
