Published: June 2022
What is the Controlled Goods Program?

- A federal registration and compliance program that regulates access to controlled goods.
- Under authority of the *Defence Production Act* and the *Controlled Goods Regulations*.
- Part of Public Services and Procurement Canada.
What are Controlled Goods?

- Goods with strategic significance or national security implications.
- Includes components and technical data.
- UCalgary has multiple researchers in different departments and physical locations working with controlled goods.
EHS Oversees the Controlled Goods Program

- Security assess and approve/deny access to individuals.
- Develop site-specific and master security plans.
- Maintain records and regular reporting to the federal agency.
- Annually inspect sites and facilitate federal inspections.
- Enable uninterrupted research and avoid compliance enforcement.
