**To: Biosafety Permit holders, Laboratory Supervisors, Associate Deans (Research) for Medicine, Veterinary Medicine, Science, Engineering, Kinesiology, Arts and Nursing**  
**CC: Biosafety Committee**

***Biosafety Cabinet Replacement Program– mandatory training to be completed by lab personnel***

You are receiving this email because you were in receipt of a replacement Biosafety Cabinet. This is a reminder that training is required for use of Biosafety Cabinets. The Principal Investigator is responsible to train workers in the proper use of the equipment and document such training on the [Laboratory Health and Safety Orientation and Training Record](#).

**Training**

To assist in this training process, you are asked to refer to the documentation supplied with the Biosafety Cabinet and may also avail of this online [Video](#) for Labconco Purifier Logic Biosafety Cabinets.

As part of the initiative announced on Wednesday (see below), the Biosafety Committee is auditing training completion by lab personnel during the site visits (May – June) from the Biosafety Committee.

Thank you for your continued support.  
Eoin

**Eoin O'Grady PhD**

Manager, Occupational Health & Safety (Foothills & Spyhill Campuses) and University Biosafety Officer
