# **Official Course Description**

An introduction to conducting international reconnaissance research in geography. Provides a background in various aspects of ethical research practices, qualitative and quantitative data collection, analysis, and dissemination.

## **Course Objectives**

To provide multiple views and topics related to international fieldwork and research. The objective will be facilitated by providing numerous themes, topics, locations, and guest speakers relating to the international academic experience. Geography 390, International field studies is a required preparation course for students going on field study programs in Geography, Earth Science, and Urban Studies. It is designed to provide students with approaches to doing field work/assignments in an overseas setting. Further it is designed to introduce students to a very different form of learning outside the classroom. A primary focus of the course is how to approach geographic and environmental fieldwork in an overseas setting. Lectures use examples of field notes, pictures of locations, video, virtual field trip assignments, and photo essays to get students to think about how to observe and think critically about environments, cities, and subject matter in the field. Students will complete virtual field trip assignments using video clips of different foreign environments. Students are required to answer questions that forces them to interpret what is happening in these environments, what the economy is, questions on resource use, and most importantly how they can relate and compare these locations to where they are from. Students also review important literature and other important information on our destination. Considerations such as culture shock, positionality, and cultural awareness are also covered in the course material. In addition to virtual fieldtrips, students will complete photo essays on campus to provide them with examples of similar field assignments they will complete in the field overseas. Successful students in this class will be ready to employ experiential learning tools that will not only enhance the learning outcomes for this class, it will allow them to be prepared and up to speed for their upcoming field work on their field study programs.

## **Course Learning Outcomes**

We expect members of our community to act with integrity. The University Calendar includes a statement on the principles of conduct expected of all members of the university community (including students, faculty, administrators, any category of staff, practicum supervisors, and volunteers), whether on or off university property. ### Plagiarism, Cheating, and Student Misconduct

Academic dishonesty is not an acceptable activity at the University of Calgary, and students are **strongly advised** to read the Student Misconduct section in the University Calendar at: <a href="www.ucalgary.ca/pubs/calendar/current/k-3.html">www.ucalgary.ca/pubs/calendar/current/k-3.html</a>. Often, students are unaware of what constitutes academic dishonesty or plagiarism. The most common are (1) presenting another student's work as your own, (2) presenting an author's work or ideas as your own without adequate citation, and (3) using work completed for another course. Such activities will not be tolerated in this course, and students suspected of academic misconduct will be dealt with according to the procedures outlined in the calendar at: <a href="https://www.ucalgary.ca/legal-services/university-policies-procedures/student-academic-misconduct-procedure">https://www.ucalgary.ca/legal-services/university-policies-procedures/student-academic-misconduct-procedure</a>
