Course Description

This course is an application of ANTH357: Anthropology of Development. ANTH357 explores various theories and case studies regarding international-level development/aids. Compared to this, this course narrows the scope of development down to the local level. We will visit two rural communities in Hokkaido, northern Japan: Nibutani and Shiraoi. Nibutani is a small community with a population of about 400. It is the so-called “Ainu village,” where many residents identify themselves as Ainu descendants. In Shiraoi (pop. about 16,000), meaningful collaboration between Ainu and non-Ainu (Japanese) is just starting. We will look into the social, ecological and historical conditions of each community and discuss a better way of community development for them. After that, we will have a workshop at Hokkaido University, Sapporo, the capital of Hokkaido.

Course Goals (Learning Outcomes)

The goal of this course is to introduce students to a better understanding of “community” and to have them practice entry-level methods of community development.

Learning Objectives

By the end of this course, successful students will be able to:
• understand some theoretical frameworks and approaches towards community development;
• understand how the practice of community development works by way of actually entering communities in rural Hokkaido, Japan;
• acquire communication skills necessary for discussing with community people and research team members;
• develop analytical skills and presentation skills at a community meeting; and
• reflect critically on their own communities to which they belong.

Course Format

This course consists of pre-departure classes, the tour to Japan, and after-tour classes.
