Unofficial title

Urban Political Economies in the Southern Cone: A feminist and post/de-colonial analysis of Buenos Aires

Course Objectives

In this program, students will undertake deep theoretical and empirical analysis of the interplay between the neoliberal reform enforcement and civil society's resistance, in an urban setting in the "Southern Cone" region of South America. The Southern Cone has been since the 1970s a test bed for neoliberalism, but the 1990s marked a turning point of privatization and deregulation that led to political instability and fierce organized civil resistance. The focus of this course is on the aftermath of the financial and social crisis of 2001 that stemmed from these prior decades' transformations.

This program will explore urban space as an evolving, complex and contested landscape shaped by — and with the power to shape— neoliberal measures and policies: a landscape crisscrossed by a multiplicity of social and political movements that contest and question the legitimacy of the social, economic and political neoliberal agenda. Over the last four decades, Buenos Aires —and Argentina as a whole— has experienced successive rounds of socioeconomic reforms that have greatly impacted not only the materiality of the city, but also the balance of power between different actors and the kind of contestations taking place around what kind of city Buenos Aires should be, and for whom. These culminated in immense social and political turmoil in the 2001 crisis, which will shape the city and the region for generations. These dynamics make Buenos Aires an ideal site for students to immerse themselves in the consequences of neoliberalism and its critiques.
