

When you are part of a team

Nowadays, individuals are required to work in many different settings as part of a team and online courses are no exception.

Think back to your time as a student or any other opportunities where you had to communicate and collaborate with a group of peers. Try to remember as many facts as possible.

Facts	My team experience
How did you communicate?	
Which tools did you use to communicate?	
Did you meet in person or discuss online?	
Did your group create rules or a team contract?	
How did you feel about working with your peers?
